

DANCE - MINOR

The minor in dance is designed to provide the student with a broad overview of dance as an art form.

Our curriculum is designed to use dance and the body to challenge assumptions about practices, values, technology, sustainability and personal and global positionality. Our program scaffolds entrepreneurial approaches to art-making based in personal initiative, curiosity and versatility. Required courses introduce students to basic elements of dance while the remaining plan is created by the student in conjunction with their primary advisor. If you have specific dance questions, please contact the director of dance or the undergraduate director of dance.

The rules of the College of Arts and Sciences apply in designing each student's program.
