The project management certificate is ideal for students who aspire to develop management capabilities that build on technical expertise. Gain the skills and management savvy to take any project from beginning to end. This certificate fulfills both the in-class requirement for PMP certification and project requirements for other CU Boulder degree programs.

For more information, see the Engineering Management Program's Project Management webpage.

**Distance Education Option**
Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the graduate program advisor or visit the Graduate School's Distance Education webpage.

**Requirements**
This Project Management Certificate requires 9 credit hours.
