MATERIALS SCIENCE AND ENGINEERING - DOCTOR OF PHILOSOPHY (PHD)

The materials science and engineering (MSE) program is an interdisciplinary PhD program aimed at providing a rigorous education in materials science and engineering and the fundamental physics, engineering, chemistry and biology that underlie this discipline.

Educational goals are achieved through both course work and training in cross-disciplinary research supervised by one or more science and engineering faculty members.

For more information, visit the Materials Science and Engineering (http://www.colorado.edu/mse) website.

Requirements
All PhD students must declare a track by the second semester. With the approval of their advisor, the student can change tracks. The course program should represent a coordinated approach to the attainment of the student's ultimate goals, including class work, professional preparation and research.

The following course requirements are subject to change; for the most current information, visit the department's Coursework (http://www.colorado.edu/mse/graduate-study/coursework) webpage.

Required Core Courses for All Tracks
- CHEM 5261 Organic Materials: Structures and Functions 3
- MSEN 5370 Materials Thermodynamics 3
- MCEN 5228 Special Topics in Mechanical Engineering (section 009) 3

Required Track-Specific Courses 1
6

Students must take both required track-specific electives.

Track-Specific Electives 1
6

Students must select two approved track-specific electives.

Breadth Electives
9

Students must select three breadth electives with approval of the PhD research advisor and committee. Independent study and MSEN 5000 may count as breadth electives.

Total Credit Hours 30

1 Required track-specific courses and approved track-specific electives are listed on the department's Coursework (http://www.colorado.edu/mse/graduate-study/coursework) webpage.

Preliminary Examination
Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

PhD Dissertation
Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit
All degree requirements must be completed within six years of the date of commencing course work.
