COMPUTER AND NETWORK SECURITY - GRADUATE CERTIFICATE

The Computer and Network Security Graduate Certificate (http://www.colorado.edu/itp/prospective-students/graduate-certificates) from the Interdisciplinary Telecommunications Program (http://www.colorado.edu/itp) offers students a foundation of knowledge and technical skills in the highly-sought after job markets of network engineering, network security, wireless networking, and telecom policy and strategy. Even better, ITP certificates also allow students to apply course credits toward their master's degree if they decide to continue on in their studies.

The Computer and Network Security Graduate Certificate (http://www.colorado.edu/itp/prospective-students/graduate-certificates) requires a completion of 12 credit hours. This certificate can be completed on-campus or from a distance.
