

# MUSIC - MASTER OF MUSIC (MMUS)

The Master of Music degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. The purpose of Master of Music degree work is to refine skills in music performance, music composition, research and writing, and pedagogy. There are numerous fields of study within the Master of Music program as listed below. The musicology program admits students only at the PhD level.

The Master of Music degree provides advanced studies in performance, performance/pedagogy, composition (with an optional emphasis in technology), music theory, and conducting (choral, orchestral and wind). Areas of emphasis in performance and performance/pedagogy include all band and orchestral instruments, guitar, harp, harpsichord, jazz, piano and voice. Each of the MM degrees incorporates studies in the major area, support courses in music electives and thesis/recital work. The minimum credit hours required for a MM degree varies from 30 to 32 depending on the area of study. For specific major area requirements, see the list of Master of Music degrees (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>) at the College of Music website.

Brass, conducting, percussion, string, voice and woodwind majors are required to participate in a music ensemble. A student's ensemble placement will be determined by an audition during the first week of classes.

## Requirements

### Prerequisites

Students should have completed undergraduate preparation equivalent to that expected for the bachelor's degree at this university. Normally this is a bachelor of music degree in the proposed area of concentration.

Before admission, composition majors should upload representative scores and recordings (to the digital portfolio on the application) and a list of completed compositions. Theory majors should upload two scholarly writing samples that demonstrate ability in critical analysis, appropriate research techniques and skill in the cogent use of English. For further details, see the Application Process section of the website.

### Program Requirements

The master of music (MM) degree, which the Graduate School considers a Plan II program, requires a minimum of 30–32 credit hours of graduate coursework, including thesis projects. Many students find it necessary to exceed this minimum in order to meet the musical and academic standards demanded by the MM preliminary examinations. Specific degree requirements (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>) for each program are available online at the College of Music website.

Each student's program is directed by a three-member advisory committee headed by the major advisor (the student's major professor). A second member is chosen from the major area; the third member is usually from outside the major area. (Major areas include: composition, music education, music theory and performance.) By the second semester of residence, the student should complete a tentative degree plan and obtain the approval of the advisory committee and

the associate dean for graduate studies. Students must complete the master's degree within four years of matriculation into the program.

### Examinations

In addition to preliminary examinations, master's degree students in music must take the Master's Qualifying Examination. The procedures, guidelines for registration and deadlines for taking these examinations are announced by the Music Graduate Office.

### Recital/Thesis Requirements

The recital/thesis requirement for the MM in composition is a body of work(s) lasting at least 20 minutes in duration. This could be comprised of one or more original works for varying forces. For the major in conducting, the requirement is a public practicum and a performance-related or other scholarly document. For the major in music theory, it is two thesis papers. Or, with consent of the faculty advisory committee, a single, extended thesis for four credit hours. For the major in performance, presentation of two public recitals fulfills the requirement. For the major in performance and pedagogy, a full-length recital and a research document in pedagogy are required.

## Dual Degree Program

### Master's Degree in Two College of Music Programs

Students may apply for a dual master's degree that combines any two master's programs (with approval from both departments) in the College of Music. To guarantee the ability to pursue a dual master's degree, the student must apply separately and be admitted by the faculty in each of the degree programs under their respective admissions procedures and standards. The student must be accepted into both degree programs at the time of the initial application. If a student is already accepted to the College of Music in one degree program and is interested in adding a second degree (dual degree plan), the second master's degree must be approved by both area Department Chairs and the Associate Dean of the College of Music.

In consultation with the Department Chairs, Associate Dean and Graduate Studies Coordinator, a comprehensive degree plan will be devised for all requirements expected for the student to earn the dual degree. This plan must be completed before the last anticipated semester of study in the student's original degree. With the exception of thesis credit hours, courses that fulfill requirements in both degree programs need only be taken once to be counted for both degrees. A minimum of 45 credit hours must be earned.
