Distance Education

The University of Colorado Boulder offers master’s degrees, graduate certificates, and individual graduate courses online in several disciplines:

- Aerospace Engineering Sciences
- Applied Shakespeare (hybrid)
- Arts Administration
- Civil Engineering
- Computer Science
- Computational Linguistics, Analytics, Search and Informatics (CLASIC) (hybrid)
- Earth Data Analytics - Foundations
- Education (hybrid)
- Electrical Engineering
- Engineering Management
- Interdisciplinary Telecom
- Journalism Entrepreneurship (hybrid)
- Organizational Leadership
- Renewable and Sustainable Energy

CU Boulder’s distance technology enables online students to participate live in actual campus courses from afar or to take courses according to their own schedules. A virtual library (https://www.colorado.edu/graduateschool/distance-education/library-courses) of more than 100 previously recorded graduate courses are accessible for students to take for academic credit with the professor’s permission.

Students may enroll in a single course, in a graduate certificate, or in a full master’s degree program. Students applying for admission to a degree program may enroll in courses before being accepted, but should apply for admission before finishing a third course. Courses taken before admission are considered transfer credit. A maximum of nine hours of transfer credit will be accepted toward degree requirements once a student is admitted into that program.

For more information, visit the Graduate School website (https://www.colorado.edu/graduateschool/distance-education), call 303-492-6331 or email cugrad@colorado.edu.
