Distance Education

Distance Education
The University of Colorado Boulder offers master's degrees, graduate certificates, and individual graduate courses online in several disciplines, including:

- Aerospace Engineering Sciences
- Civil Engineering
- Computer Science
- Electrical, Computer, and Energy Engineering
- Engineering Management
- Interdisciplinary Telecom
- Education
- Applied Shakespeare

CU Boulder’s distance technology enables online students to participate live in actual campus courses from afar or to take courses according to their own schedules. A virtual library of over 100 previously recorded graduate courses are accessible for students to take for academic credit with the professor’s permission.

Students may enroll in a single course, in a graduate certificate, or in a full master’s degree program. Students applying for admission to a degree program may enroll in courses before being accepted, but should apply for admission before finishing a third course. Courses taken before admission are considered transfer credit. A maximum of nine hours of transfer credit will be accepted toward degree requirements once a student is admitted into that program.

For more information, visit the Graduate School (http://www.colorado.edu/graduateschool) website, call 303-492-6331 or email cugrad@colorado.edu.
