NATURAL RESOURCES LAW AND POLICY - GRADUATE CERTIFICATE

The University of Colorado Law School has a proud tradition as a leader in the field of natural resources law, and it consistently ranks among the best programs in that field. The Energy, Environmental, and Natural Resources Law and Policy Certificate recognizes the strength of the law school’s natural resources program by affording law students the opportunity to design an educational program that provides a solid foundation in natural resources law, even while ensuring that they receive a well-rounded legal education. The certificate also offers prospective employers evidence of a student’s interest and commitment to the study of natural resources law.

Requirements

At least 92 total credit hours in law school courses or in graduate-level courses approved for the certificate program by the Dean’s Office, in consultation with the Director of the Natural Resources Law Center.

At least 18 credit hours in natural resources law and policy courses, in addition to administrative law, as set forth below.

Required Courses and Semester Credit Hours
