Courses

No Italian courses are offered at the graduate level.

FREN 5110 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5120 (3) French Special Topics

Different topics are offered and, in a number of cases, cross-listed with other departments.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5170 (3) Francophone African Literature

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5250 (3) Medieval and Renaissance Readings

Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France. Readings in French. May be taught in English to accommodate students in other programs.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5310 (3) 17th Century French Tragedy and Poetry

Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history.

Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5320 (3) 17th Century French Prose

Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnetete and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5330 (3) Moliere and 17th Century French Comedy

Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L'ecole des femmes and Tartuffe. Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5350 (3) French Enlightenment

Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'Alembert's Encyclopedie, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's Discours, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5360 (3) 18th Century French Literature

Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/ writer and their significance as representatives of the century's changing society and culture.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5420 (3) 19th Century French Literature

A survey of principal works and movements, intended as an introductory course.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5430 (3) Topics in 19th Century French Prose, Poetry, and Theatre

Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5440 (3) Literary Ludics

Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5445 (3) Literary Theory, Part I

Covers Western literary theory from Plato to Latour as the first part of a two-semester literary theory course investigating the Western tradition from the Greeks on to post-colonial and empire studies. This initial course follows the history of criticism and its philosophical underpinning up to 20th century trends but does not cover cultural and post-colonial studies.

Requisites: Restricted to graduate students only.

FREN 5470 (3) 20th Century French Theatre and Poetry

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5770 (2-3) Methods of Teaching French as a Foreign Language

Familiarizes students with current methodology and techniques in foreign language teaching.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 6840 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 6940 (1) Master's Candidate for Degree

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Pass/Fail

FREN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

French - Master of Arts (MA)

The MA program in French offers students the opportunity to pursue their interest in literature and culture, working with faculty members who produce distinguished scholarship in a broad variety of fields. Students are encouraged to take courses in many of those fields and to become acquainted with a diversity of critical and theoretical approaches. The program consists of coursework and a comprehensive examination.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): French - Bachelor of Arts (BA) (p. 300).

Requirements

Admission Requirements

Prerequisites for admission to the French MA studies:

- An undergraduate major in French or its equivalent with a grade average of at least B in all French courses.
- Official GRE scores if the student would like to be considered for a fellowship nomination. GRE scores are not mandatory for admission.
- Good pronunciation in French as evidenced by a recording submitted with the application.
- Students are required to submit a statement of purpose and one paper of their choice done for an undergraduate French course.
- Recommendations from three professors with whom the student has worked.

Course Requirements

Degree requirements are subject to change. Students wishing to pursue graduate work in French should visit the department's MA Guidelines

(<http://www.colorado.edu/frenchitalian/graduate/ma-guidelines/>) for the most up-to-date degree requirements.

The following summary of minimum requirements is expressed in terms of courses. Each course represents a graduate seminar carrying two or three credit hours. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Master's Degree Requirements (p. 989) section of this catalog.

Master's students are not normally permitted to take independent study courses. However, in exceptional circumstances, and with the approval of the Associate Chair for Graduate Studies, they may register for one and at the very most two such courses.

Code	Title	Credit Hours
Required Courses		
<i>French Literature and Culture Courses</i>		
At least eight courses (5000-level or above) in French literature and culture. Students must take at least one course in seven of the eight major historical fields of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature, and film. Options include:		24
FREN 5110	French Special Topics	
FREN 5120	French Special Topics	
FREN 5170	Francophone African Literature	
FREN 5250	Medieval and Renaissance Readings	
FREN 5310	17th Century French Tragedy and Poetry	
FREN 5320	17th Century French Prose	
FREN 5330	Moliere and 17th Century French Comedy	
FREN 5350	French Enlightenment	
FREN 5360	18th Century French Literature	
FREN 5420	19th Century French Literature	
FREN 5430	Topics in 19th Century French Prose, Poetry, and Theatre	
FREN 5440	Literary Ludics	
FREN 5445	Literary Theory, Part I	
FREN 5470	20th Century French Theatre and Poetry	
<i>Related Field Courses</i>		
Up to two courses (4000-level or above) in a related field (e.g., English, Spanish, Classics, Linguistics, Film Studies, History, Fine Arts, Education) to be determined in consultation with the Associate Chair for Graduate Studies. ¹		6
<i>Additional Coursework</i>		
FREN 5770	Methods of Teaching French as a Foreign Language	3
Total Credit Hours		33

¹ Students planning to apply for the doctoral program should remember that PhD candidates are expected to take three courses in a related field at the 5000 level or above. Courses in a related field at the 4000 level will normally not count toward this total.

Language Requirement

All MA candidates must acquire a reading knowledge of a language other than French and English. The language should be related to the student’s academic program. The requirement may be fulfilled by taking a translation exam offered by the department in the language in question or by passing coursework either at CU or prior to arrival on campus equivalent to a fourth semester (2120 at CU) college course.

Early in their first semester in the MA program, each student should meet individually with the Associate Chair for Graduate Studies to discuss their overall plan of study, including the ways in which they will satisfy the language requirement.

MA Comprehensive Examination

This examination will be based on a reading list in literature, culture, and theory prepared by the Graduate Faculty. It will be administered by an Examination Committee composed of the Associate Chair for Graduate Studies and two other members of the Graduate Faculty, appointed by the Chair. The examination will consist of three essays of three hours each, based on questions formulated by the Examination Committee, and a one-hour oral examination designed to test the student’s overall knowledge of the reading list. Normally the three essays will be written within a six-day period, and the one-hour oral exam will normally follow within two weeks. Two of the three essays must be written in French, but should students decide to exercise the option of writing one in English, they are entirely free to choose which one it shall be. The Comprehensive Examination must be taken during the fourth semester of the MA program.

Two-Year Plan of Study

The MA degree is intended to be completed in two years. The normal pattern of courses would be as follows:

Course	Title	Credit Hours
Year One		
Fall Semester		
Two seminars		6
FREN 5770	Methods of Teaching French as a Foreign Language	3
Credit Hours		9
Spring Semester		
Three seminars		9
Credit Hours		9
Year Two		
Fall Semester		
Three seminars		9
Credit Hours		9
Spring Semester		
Two seminars		6
Credit Hours		6
Total Credit Hours		33

French - Doctor of Philosophy (PhD)

The Department of French and Italian at CU Boulder enjoys a national reputation and is the only PhD-granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding

record of placing its PhD recipients in desirable positions of employment. Our students pursue interests from the Middle Ages to 21st-century and Francophone literatures.

Requirements

Prerequisites

Doctoral candidates should possess excellence in reading, speaking, writing and understanding spoken standard French; general knowledge of French literature and civilization; and knowledge of one language other than English and French.

Program Requirements

The PhD program in French literature consists of coursework, a comprehensive examination, a doctoral dissertation and an oral defense of the doctoral dissertation.

Degree requirements are subject to change. Students should visit the department’s PhD Guidelines (<http://www.colorado.edu/frenchitalian/graduate/phd-guidelines/>) webpage for the most up-to-date degree requirements.

Required Courses and Credits

The following summary of minimum requirements is expressed in terms of courses. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Doctoral Degree Requirements (p. 990) section of this catalog.

Code	Title	Credit Hours
Required Courses		
At least 12 courses (5000-level and above) in French literature and culture.		36
Up to three courses (5000-level or above) in a related field (e.g., comparative literature, English, Spanish, classics, linguistics, philosophy, film studies, history, fine arts, education) to be determined in consultation with the Associate Chair for Graduate Studies.		6-9
Total Credit Hours		42-45

Students must also have 30 hours of Dissertation Guidance (Graduate School requirement) with no more than ten hours taken before the completion of the PhD Comprehensive Examination.

PhD students are normally allowed to take two independent studies courses, subject to the approval of the Associate Chair for Graduate Studies. However, they may not take more than two (including any taken at the master’s level) except in exceptional circumstances and with the approval of the Associate Chair for Graduate Studies..

Students must also have taken at least one course (5000-level and above) in seven of the eight major periods of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature and film. Students continuing from the MA program at CU will normally have fulfilled this requirement as part of their MA degree.

Students entering the PhD program with an MA in French or equivalent from another university can count five of their previous MA courses

toward the 15-course requirement; they must take 10 courses during the first two years of candidacy, up to two of which may be in a related field. Such students must take courses covering four of the eight fields of French literature. Previous coursework will be evaluated, and if at least seven of the fields were not covered at the MA level, courses will be required to attain this coverage.

In summary, for students entering from other MA programs, the requirements are: 1) at least four courses within the department to cover four fields, with these at the candidate's discretion except for the requirement to cover gaps from the MA program; 2) up to two courses in related fields; 3) four additional courses within the department at the discretion of the student.

Students entering the PhD program without an MA in French must consult with the Associate Chair for Graduate Studies.

Language Requirement

A sound reading knowledge of one modern language other than English and French is required. Such reading knowledge must be certified by the student passing a reading examination in the language. The examination normally consists of a timed translation of a literary text or a text dealing with literature (e.g., literary criticism). A dictionary is permitted. This language should be relevant to the student's academic program.

Examination/PhD Comprehensive Examination

As students are finishing their required coursework, they should have a good idea of the way their courses and ideas are coalescing around a given general field and a specific problem within that field. Courses taken outside the department, as well as work in the related field, should fit into this pattern. As this specification of interest toward the area of the dissertation takes place, the student should constitute a Doctoral Committee consisting of five graduate faculty members (one of whom must come from outside the student's department) who will guide the student's work. One of these faculty members will serve as the Director and take responsibility for co-coordinating the work of this ad hoc Doctoral Committee. Once the Doctoral Committee is formed and approved by the Graduate School, the student will begin to prepare for the PhD Comprehensive Examination. Working in consultation with the Director and other members of the Doctoral Committee, the student will formulate a dissertation topic. He or she will prepare a list of primary texts pertaining to that topic, and a further list of secondary materials composed of critical and theoretical texts intended to inform the student's approach to the dissertation topic. Those two lists will be circulated to the Doctoral Committee before the Comprehensive Examination. The examination itself will consist of one substantial essay (the equivalent of a 30-page seminar paper) followed by an oral examination. The essay will focus on the dissertation topic. The student will have two weeks to write the essay. Once that essay is written, the Doctoral Committee will conduct the oral part of the examination as a discussion of material covered in the essay, material on the two reading lists, as well as matters pertaining to the general direction of the dissertation and the approach that the student propose to take therein. Normally the Comprehensive Examination should be taken at the end of the student's second year in the PhD program (for students continuing from CU's MA program) or at the end of the third year in the program (for students entering from other MA programs). In both cases, that allows the student a full year of independent study after the conclusion of course requirements. Upon successful completion of the PhD exams, students normally spend the next two years writing a dissertation.

PhD Dissertation

The PhD dissertation must be based upon original scholarship and demonstrate mature scholarship and critical judgment as well as familiarity with the tools and methods of research. It should make a worthwhile contribution to knowledge in the student's special field. Students are advised to familiarize themselves thoroughly with the various Graduate School rules governing the format and deadlines for the dissertation. The dissertation is normally written in English, and all departures from this norm must be approved by the student's committee.

Oral Defense of the Dissertation

After the dissertation has been accepted, a final oral examination on the dissertation and related topics will be held. The examination will be conducted by a five-member committee, appointed by the dean of the Graduate School, which will consist of representatives of areas in which the student has worked. At least one member of the committee will be from outside the student's field of study. The committee should be approved by the Graduate School at least two weeks prior to the oral defense. More than one negative vote will disqualify the candidate in the oral defense.

Plans of Study

Typical Six-Year Structure for Entering MA Students

The PhD degree is intended to be completed in six years. The MA would normally be awarded after two years in the program. The standard sequence of courses is as follows:

Course	Title	Credit Hours
Year One		
Fall Semester		
Two seminars		6
Supervised teaching		
	Credit Hours	6
Spring Semester		
Three seminars		9
	Credit Hours	9
Year Two		
Fall Semester		
Three seminars		9
	Credit Hours	9
Spring Semester		
Two seminars		6
MA comprehensive exam		
	Credit Hours	6
Year Three		
Fall Semester		
Three seminars		9
	Credit Hours	9
Spring Semester		
Two to three seminars		6-9
	Credit Hours	6-9
Year Four		
Fall Semester		
Five hours of dissertation guidance		5
	Credit Hours	5

Spring Semester		
Five hours of dissertation guidance	5	
PhD comprehensive exam		
Credit Hours	5	
Year Five		
Fall Semester		
At least five hours of dissertation guidance	5	
Submission of dissertation prospectus		
Credit Hours	5	
Spring Semester		
At least five hours of dissertation guidance	5	
Credit Hours	5	
Year Six		
Fall Semester		
At least five hours of dissertation guidance	5	
Credit Hours	5	
Spring Semester		
At least five hours of dissertation guidance	5	
Submission and oral defense of dissertation		
Credit Hours	5	
Total Credit Hours	75-78	

Typical Five-Year Structure for Students Who Hold an MA in French from Another Institution

The standard sequence of courses is as follows:

Course	Title	Credit Hours
Year One		
Fall Semester		
Two to three seminars		6-9
Credit Hours		6-9
Spring Semester		
Three seminars		9
Credit Hours		9
Year Two		
Fall Semester		
Three seminars		9
Credit Hours		9
Spring Semester		
Two to three seminars		6-9
Credit Hours		6-9
Year Three		
Fall Semester		
Five hours of dissertation guidance		5
Credit Hours		5
Spring Semester		
Five hours of dissertation guidance		5
PhD comprehensive exam		
Credit Hours		5
Year Four		
Fall Semester		
At least five hours of dissertation guidance		5

Submission of dissertation prospectus	
Credit Hours	5
Spring Semester	
At least five hours of dissertation guidance	5
Credit Hours	5
Year Five	
Fall Semester	
At least five hours of dissertation guidance	5
Credit Hours	5
Spring Semester	
At least five hours of dissertation guidance	5
Submission and oral defense of dissertation	
Credit Hours	5
Total Credit Hours	60-66

Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography, and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population, and urban geography. Environment and society geography includes political ecology, natural hazards, and conservation practice. Physical geography includes climatology, geomorphology, hydrology, and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing, and cartography. The Department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa, Middle East and South Asia. To complement its curriculum, the Department also offers internship opportunities for geography majors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read carefully the requirements for advanced degrees in the Graduate School section. Additional information should be obtained from the Department of Geography.

The course code for this program is GEOG.

Master's Degree

- Geography - Master of Arts (MA) (p. 1142)

Doctoral Degree

- Geography - Doctor of Philosophy (PhD) (p. 1142)

Certificates

- Development Studies - Graduate Certificate (p. 1143)
- Hydrologic Sciences - Graduate Certificate (catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/)
- Population Studies - Graduate Certificate (p. 1144)

Interdisciplinary Program

- Earth Data Analytics - Foundations - Graduate Certificate (p. 1526)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abdalati, Waleed (https://experts.colorado.edu/display/fisid_145800/)
Professor; PhD, University of Colorado Boulder

Balch, Jennifer Kakareka (https://experts.colorado.edu/display/fisid_154464/)
Associate Professor; PhD, Yale University

Chair, Professor; PhD, University of California, Berkeley

Courses

GEOG 5003 (4) Elements of Geographic Information Systems

Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite some experience with Mac or Windows.

Additional Information: Departmental Category: GIScience

GEOG 5023 (4) Advanced Quantitative Methods for Spatial Data

Reviews fundamental statistical and quantitative modeling techniques and introduces more advanced statistical techniques widely used in geography today. Emphasizes geographic examples and spatial problems teaching hands-on skills in statistical programming. Topics covered include generalized linear models, spatial autocorrelation, spatial regression methods, and working with complex datasets.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4023

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methods

GEOG 5043 (4) Advanced Geovisualization and Web Mapping

Advanced technical course in web-based cartography and geovisualization stressing the important role digital cartography plays in cyberspace and society. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects demonstrating skills in geovisualization and cartographic practice.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4043

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methods

GEOG 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4093 and GEOL 4093 and GEOL 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methods

GEOG 5100 (1-4) Special Topics: Geography

Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5103 (4) Geographic Information Science: Spatial Analytics

Explores advanced topics in geospatial databases, spatial analytics and geoprocessing in a Geographic Information System (GIS). Emphasizes how geographic concepts are linked to methodological frameworks for recording, transforming, storing/retrieving, analyzing, and processing geographic data as well as various forms of uncertainty. Exercises demonstrate the application of GIS-based methods to real world scenarios in interdisciplinary settings.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4103

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: GIScience

GEOG 5113 (3) Seminar: Geographic Information Systems

Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or instructor consent required.

Additional Information: Departmental Category: GIScience

GEOG 5152 (3) History and Theory of Geography

History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography.

Requisites: Restricted to Geography (GEOG) graduate students only.

GEOG 5161 (3) Research Design in Geography

The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas.

Requisites: Restricted to Geography (GEOG) graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5203 (4) Geographic Information Science: Spatial Modeling

Focuses on the use and development of advanced models for human and environmental applications in a geospatial environment integrating raster and vector data models. Covers terrain and hydrologic modeling, geostatistical modeling, dasymetric modeling, as well as multi-criteria modeling. Group projects critically design, implement and test spatial models to develop independent skillsets in a chosen problem setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4203

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or working knowledge of GIS software or instructor consent required.

Additional Information: Departmental Category: Methods

GEOG 5211 (3) Seminar: Physical Climatology

Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5221 (3) Synoptic and Dynamic Climatology

Examines global climates from the standpoint of synoptic and dynamic climatology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5241 (1-3) Topics in Physical Geography

Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4251

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4271

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5292 (3) Migration, Immigrant Adaptation, and Development

historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4292

Requisites: Restricted to graduate students only.

GEOG 5303 (4) Geographic Information Science: Spatial Programming

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data using open source tools. Covers concepts, principles and techniques of programming and solving spatial problems in natural and social science settings. Group projects will foster skillsets in implementing solutions to complex spatial problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4303

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4203/5203.

Additional Information: Departmental Category: GIScience

GEOG 5321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4321

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4331

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4371

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5391 (3) Seminar: Biogeography

Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4401

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5403 (3) Geographic Information Science: Space Time Analytics

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands-on, flipped classroom approach with in-class development of technical skills.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4403

Requisites: Restricted to graduate students only.

GEOG 5463 (3) Earth Analytics Data Science Bootcamp

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4463

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4501

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment-Society Geography

GEOG 5503 (3) Geographic Information Science: Project Management

Managing a geospatial project encompasses problem identification, project design, analysis and supporting team dynamics. The class mixes lectures and class exercises with student-selected projects and works through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4503

Requisites: Requires prerequisite course of GEOG 5103 (minimum grade C-).

GEOG 5563 (3) Earth Analytics

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problem. Comparable programming course work may be substituted for GEOG 5463 with instructor approval.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4563

Requisites: Requires prerequisite course of GEOG 5463 (min grade B-) Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5603 (3) GIS in the Social and Natural Sciences

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4603

GEOG 5622 (3) City Life

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4622

Requisites: Restricted to graduate students only.

GEOG 5632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4632

Requisites: Restricted to graduate students only.

GEOG 5642 (3) Seminar: Urban Geography

Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.

Requisites: Restricted to graduate students only.

GEOG 5652 (3) Introduction to Social Theory

Surveys theoretical paradigms in the social sciences. Includes canonical works from the history of the social sciences as well as contemporary theorists. Appropriate for beginning to advanced graduate students doing qualitative research.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5662 (3) Seminar: Topics in Economic Geography

Covers selected topics emphasizing faculty specialties. Topics vary with instructor. Check with department for semester offerings.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5663 (3) Earth Analytics Applications

Develop expertise in finding, organizing, managing and processing large, heterogeneous, spatio-temporal data to address a real-world problem. Students will work collaboratively on semi-guided science project. Students gain critical skills required to understand data structures, utilize APIs, extract insight from data and understand how uncertainty propagates. Culminates with a formal presentation of project results.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites GEOG 4463 or GEOG 4563 or GEOG 5463 or GEOG 5563.

Grading Basis: Letter Grade

GEOG 5712 (3) Political Geography

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4712

Requisites: Restricted to graduate students only.

GEOG 5722 (3) Field Methods in Human Geography

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4722

Requisites: Restricted to graduate students only.

GEOG 5732 (3) Population Geography

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4732

Requisites: Restricted to graduate students only.

GEOG 5750 (3) Climate Politics and Science-Policy

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750, ENVS 5750 and SOCY 5750

Grading Basis: Letter Grade

GEOG 5782 (3) Sustainable Development: Critique

Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development.

Requisites: Restricted to graduate students only.

GEOG 5832 (3) Geography of Tibet

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4832

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

GEOG 5840 (1-3) Graduate Independent Study

Offers independent research for master's students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5842 (3) Global Frontiers in Southeast Asia

Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4842 and ASIA 4842

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4852

Requisites: Restricted to graduate students only.

GEOG 5930 (3) Advanced Internship

Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5961 (3) Theories of Climate and Climate Variability

Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6180 (1-3) Seminar: Geographic Problems

Applies research methods to selected problems. Topics vary with instructor.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6211 (1-3) Readings in Climatology

Discusses selected topics in current climatological literature. Specific themes vary.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6402 (3) Seminar: Political Ecology

Critically examines the politics of human-environment relationships across cultures and societies. Focuses on environmental degradation, change and management from the perspectives including political economy, cultural politics, STS and post structural theory.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6712 (3) Seminar: Political Geography

Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6732 (3) Formal Population Geography: Analysis and Forecasting

In-depth introduction to formal demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 5023.

GEOG 6742 (3) Seminar: Cultural Geography

Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6940 (1) Master's Candidate for Degree

Instructor consent required.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

GEOG 6950 (1-6) Master's Thesis

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 7840 (1-3) Graduate Independent Study

Offers independent research for doctoral students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Instructor consent required.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Geography - Master of Arts (MA)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Master's Degree Requirements (p. 989) section carefully.

Requirements Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the MA program's required core classes.

In addition to knowledge of basic geography, it is desirable that the student has coursework in at least two areas outside geography in cognate fields in the social and natural sciences. Students are encouraged to have some background in college math, statistics and computer skills.

General Requirements

The minimum requirements for an MA in geography may be fulfilled by completing 30 credit hours of graduate work (5000 level or above), including 4 to 6 credit hours of thesis work. Master's students may, with the written approval of their advisor, use a maximum of 6 hours of 3000- or 4000-level coursework to reach the required 30 hours.

Students are encouraged to have some background in college math and computer skills. Students are also required to have proficiency in basic statistics. This requirement may be met by having taken an undergraduate course in statistics.

Code	Title	Credit Hours
Required Courses		
GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3
GEOG 5023	Advanced Quantitative Methods for Spatial Data	4
or GEOG 5722	Field Methods in Human Geography	
GEOG 6950	Master's Thesis	4-6
Electives		
Select at least 14 additional hours of coursework at the 5000 level or above to meet the 30-credit minimum.		16-14
Total Credit Hours		30

Geography - Doctor of Philosophy (PhD)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Doctoral Degree Requirements (p. 990) section carefully.

Requirements Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the PhD program's required core classes.

In addition to knowledge of basic geography, it is desirable that the student has coursework in at least two areas outside geography in cognate fields in the social and natural sciences. Students are encouraged to have some background in college math and computer skills. Students are also required to have proficiency in basic statistics. This requirement may be met by having taken an undergraduate course in statistics.

Prior to acceptance to the PhD program, a student must have completed an MA or MS degree.

General Requirements

The PhD degree is not conferred merely upon the satisfactory completion of a course of study. The candidate must also demonstrate proficiency in some broad subject of learning, and be able to critically evaluate work in the field, show the ability to work independently in the chosen field and make an original contribution of significance to the advancement of knowledge.

The minimum requirements are 30 credit hours of coursework numbered 5000 or above and 30 credit hours of dissertation. Ordinarily the number of coursework hours and dissertation hours will be greater than 30 each. At least 20 of these hours must be taken at the University of Colorado; up to 10 credit hours from another institution may be transferred upon approval.

A 3.00 (B) average or higher must be maintained in all coursework.

Six semesters of residence are required, of which four must be at the University of Colorado. With department approval, students with a University of Colorado master's degree in geography may apply all credit hours from 5000-level courses or above (except thesis credits) to the PhD requirements.

Language Requirement

The department's minimum language requirement is a demonstration of proficiency in one foreign language. Ways in which this requirement

may be satisfied are determined by the student's Advisory Committee and may include timed translation, publication in the language and/or coursework. If more than the minimum proficiency is needed for library and/or field research, the choice and number of languages, as well as the required level of skill and methods of testing these skills, are determined and approved by the student's Advisory Committee. The language requirement must be satisfied before the comprehensive exam is taken.

Preliminary Exam

The Graduate School requires that all students in the doctoral program successfully pass a preliminary exam. In geography, this requirement is met by obtaining a grade of B or better in each of the three required courses:

Code	Title	Credit Hours
Required Courses		
GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3
GEOG 5023	Advanced Quantitative Methods for Spatial Data	4
or GEOG 5722	Field Methods in Human Geography	

Following completion of the preliminary exam requirement, students undertake preparation for comprehensive exams.

Comprehensive Exams

Following successful completion of the preliminary exam, doctoral students must pass a comprehensive exam for advancement to candidacy for the doctoral degree. The comprehensive exam consists of two parts, including an exam on three subfields of geography with written and oral components, and completion of a written dissertation proposal and oral defense. Working together, the student and an Advisory Committee of three to five faculty set the subfield topics. The student creates a reading list for each subfield, and usually spends a semester reading and preparing for the subfields exam. The Advisory Committee sets the subfields exam questions and evaluates the written and oral responses, as well as the proposal defense. Upon successful completion of the comprehensive exam, a student can turn full attention to dissertation research and writing.

Dissertation

In addition to the minimum of 30 hours of coursework required for the doctorate, a student must register for a total of at least 30 hours of dissertation credit, with a maximum of 10 hours in any one semester. Coursework and work on the dissertation may proceed concurrently throughout the PhD program, but at no time shall a doctoral student register for more than 15 hours of 5000-level courses and above.

Following successful completion of comprehensives and admission to candidacy, students must register continuously. Students admitted to candidacy for degree will register for and be charged for a minimum of five dissertation hours each semester. Students may also register for classes in addition to the five dissertation hours.

After admission to candidacy, those not making use of campus facilities may register for three dissertation hours (part-time status). Continuous registration during the academic year will be required until completion of the dissertation defense. It is expected that the student and advisor will

consult each semester as to the number of hours for which the student will register, consistent with the classifications described above.

Development Studies - Graduate Certificate

The Department of Geography offers a graduate certificate in development studies. Development studies is a well-established, interdisciplinary field of research with institutional centers at a number of major universities and several scholarly journals dedicated to its study. The certificate provides training in development studies to graduate students through a structured yet flexible program built around courses taught by CU faculty in a number of social science departments.

Because development issues such as agrarian change, labor migration, new social movements, industrial growth, urban planning and natural resource use cut across disciplinary divides, the study of development demands interdisciplinary approaches.

For more information, visit the department's Graduate Certificate in Development Studies (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>) webpage.

Requirements

Admission Requirements

Currently enrolled graduate students at CU and nondegree ACCESS students with bachelor's degrees may pursue the development studies certificate by completing the four required courses with a grade of B or higher.

For more information, please contact the certificate director, Jennifer Fluri (Jennifer.Fluri@colorado.edu) or visit the department website (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>).

Required Courses and Credits

The certificate requires the completion of 12 credits (four courses), at least two but not more than three of which should be taken in the Department of Geography.

Code	Title	Credit Hours
Core Requirement		
1. All students must take the core Geography class in development:		
GEOG 5632	Development Geography	3
Geography Seminar Requirement		3
2. All students must take one additional Geography seminar from among the following:		
GEOG 5662	Seminar: Topics in Economic Geography	
GEOG 6402	Seminar: Political Ecology	
GEOG 5732	Population Geography	
GEOG 5292	Migration, Immigrant Adaptation, and Development	
Additional Seminar Requirements		6
3. & 4. In addition, students should complete 2 additional seminars from the following list, at least one of which should be outside of Geography:		
GEOG 5662	Seminar: Topics in Economic Geography	

GEOG 6402	Seminar: Political Ecology
GEOG 5732	Population Geography
GEOG 5292	Migration, Immigrant Adaptation, and Development
GEOG 5100	Special Topics: Geography (with approval from the certificate program director)
HIST 6019	Readings in World History
HIST 5628	Modern China: Collapse of Imperial Brilliance, 1644-1949
HIST 5129	Colloquium in Modern Asian History
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology ¹
ANTH 7600	Human Ecology: Cultural Aspects
ANTH 5020	Explorations in Anthropology (Conservation and Indigenous Peoples)
ANTH 5500	Cross-Cultural Aspects of Socioeconomic Development
MDST 6211	Communication and International Development
SOCY 6016	Topics in Sex and Gender (Gender in Globalization)
SOCY 6007	Foundations of Environmental Sociology
SOCY 6017	Inequality, Democracy, and the Environment
SOCY 7017	Population and Environment
SOCY 6012	Population Issues, Problems, and Policies
ENVS 6305	Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions
ENVS 6304	Introduction to Food Systems Internationally
PSCI 7132	Comparative Political Economy
PSCI 7073	Seminar: Global Political Economy
PSCI 7032	Seminar: Latin American Politics
PSCI 7022	Seminar in Political and Economic Development
PSCI 7206	Public Policy and the Governance of Natural Resources
WGST 6090	Feminist Theories
WGST 6190	Feminist Methodology
WGST 6290	Special Topics in Gender and Sexuality Studies (only certain topics apply) ²

Total Credit Hours

12

¹ One of the following sections: Section 2 Human Ecology; Section 3 Space, Place and Capitalism; Section 5 National and Cultural Citizenship; Section 9 Ethnographies of Globalization or Ethnographies of Latin America; Section 12 Modernity; Section 13 Anthropology of Neoliberalism

² One of the following sections: Gender – Global Perspective; Global Gender Issues; Gender and Global Human Rights

Plan(s) of Study

For more information, visit the department's Graduate Certificate in Development Studies (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>) webpage.

Population Studies - Graduate Certificate

Offered through the Population Program of the Institute of Behavioral Science (IBS), the graduate certificate in population studies recognizes master's and doctoral degree students for interdisciplinary work in issues related to population dynamics and its components, composition, distribution and change. The population program, which is international in scope and has an applied and policy-oriented focus, fosters research on population trends and patterns and provides training in population analysis. Students who are earning graduate degrees through the departments of geography, sociology or economics and are interested in majoring in population studies are eligible to petition for admission to the program.

Questions about the certificate program in population studies should be directed to cupc@colorado.edu

Requirements

Admission Requirements

All graduate degrees are awarded through departments and, therefore, graduate students wishing to pursue the Graduate Certificate in Population Studies must be first admitted into a departmental program. As certificates are only conferred with a degree, students must also make sure they satisfy all departmental degree requirements. For more information, please consult departmental staff.

Course Requirements

In addition, the graduate certificate in population studies requires 9-12 credits, dependent upon status as MA, MS or PhD student. The required courses include:

- Two required core courses that focus on population studies theory, methods and issues.
- *For MA or MS students:* an additional two courses with substantial population studies content (list below). One course must be outside the student's home discipline.
- *For PhD students:* an additional three courses with substantial population studies content (list below). Two courses must be outside the student's home discipline.

Code	Title	Credit Hours
Required Courses		
SOCY 6012	Population Issues, Problems, and Policies	3
GEOG 6732	Formal Population Geography: Analysis and Forecasting	3
Other Potential Courses ¹		6-9
ECON 8686	Seminar: Labor Economics 2	
ECON 8784	Economic Development 2	
ECON 8764	History of Economic Development	

GEOG 5292	Migration, Immigrant Adaptation, and Development
GEOG 5622	City Life
GEOG 5642	Seminar: Urban Geography
GEOG 5662	Seminar: Topics in Economic Geography
GEOG 5852	Health and Medical Geography
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology
PSCI 7021	Latinos and U.S. Politics
PSCI 7022	Seminar in Political and Economic Development
PSCI 7062	The Politics of Ethnicity
PSCI 7181	Immigration Law and Immigrants' Rights
PSCI 7203	Political Economy of International Migration and Policy
SOCY 7002	Social Disparities in Health
SOCY 7006	Sociology of Sex and Gender
SOCY 7012	The Social Demography of Race
SOCY 7014	Gender, Race, Class, and Crime
SOCY 7017	Population and Environment

¹ For courses not included in this list, please check with the Director of the certificate program to assure sufficient demographic content.

Extracurricular Requirements

In addition to coursework, the graduate certificate on population studies requires participation in extracurricular offerings relevant to population studies. For MA or MS students, 10 hours of participation in extracurricular activities are required. For PhD students, 15 hours of participation in extracurricular activities are required. Such offerings can include:

- Attendance at the bi-weekly Population & Health workshop in IBS.
- Attendance at CUPC research presentations in IBS, typically one-hour sessions; check IBS website for schedule.
- Participation in methodological short courses and workshops, typically ranging from 4–40 hours.
- ICPSR offers summer workshops in Boulder each year; check their schedule.
- IBS Center for Research and Computing Services offers these on occasion; check IBS events.
- Annual conference on "Integrating Genetics and Social Sciences" (IGSS) typically held in the Fall; check IBS events or contact Jason.Boardman@colorado.edu.
- Annual Migration-Climate-Health workshops typically held in May; check IBS events or contact Lori.Hunter@colorado.edu.
- IBS' graduate student Professionalization Seminars ("ProSem"); check IBS events or contact Stefanie.Mollborn@colorado.edu.
- CARTSS dissertation writing workshop; check IBS events or contact Carew.Boulding@colorado.edu.
- Many institutions outside of CU offer workshops as well. For example, check websites for Stanford, Berkeley.

Students should alert the Certificate Director (Lori.Hunter@colorado.edu) of their intention to participate in such events for certificate credit. For more information, see the center's Graduate Certificate Program

in Population Studies (<https://behavioralscience.colorado.edu/unit/population/graduate-certificate-in-population-studies/>) webpage.

Plan(s) of Study

For more information, see the center's Graduate Certificate Program in Population Studies (https://www.colorado.edu/ibs/cupc/grad_cert.html) webpage.

Geological Sciences

With one of the most successful graduate programs in the nation, the Department of Geological Sciences has enjoyed a reputation of excellence for more than 100 years. Our doctoral program is ranked among the top 10 percent of U.S. geology programs by the National Research Council, and CU Boulder is ranked as one of the top two universities in the world for geosciences by *U.S. News and World Report*.

Graduate students have an opportunity to work with over 35 tenured and tenure-track faculty who support a wide range of interdisciplinary research programs in such areas as: cosmochemistry and planetary geology; Earth science education; economic and energy resources; geobiology and astrobiology; geochemistry; geochronology and thermochronology; geodynamics, geophysics, and remote sensing; geomorphology and cryosphere; global change; hydrology; natural hazards; paleoclimate and paleoceanography; paleontology and paleobiology; petrology and mineralogy; sedimentology and stratigraphy; and structure and tectonics.

The graduate degrees offered include Master of Science (MS) and Doctor of Philosophy (PhD).

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the Geological Sciences (<http://www.cugeology.org/>) website.

Professional Licensure

The State of Colorado does not require individuals working in Geology or the Geological Sciences to obtain Professional Geology Licensure, however many states require professional geologists to pass the ASBOG Fundamentals of Geology (FG) and/or Practice of Geology (PG) examinations. Information regarding ASBOG examination specifications can be found on the ASBOG (<https://www.asbog.org/>) website.

Students planning to seek professional licensure or certification for employment in a state other than Colorado, are strongly recommended to contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how the education received at CU Boulder may assist the student in their efforts to gain licensure in that state.

Course code for this program is GEOL.

Master's Degree

- Geology - Master of Science (MS) (p. 1153)

Doctoral Degrees

- Geology - Doctor of Philosophy (PhD) (p. 1153)
- Geophysics - Doctor of Philosophy (PhD) (p. 1154)

Certificates

- Geophysics - Graduate Certificate (p. 1154)
- Hydrologic Sciences - Graduate Certificate (catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lon D. (https://experts.colorado.edu/display/fisid_145044/)
Senior Instructor; PhD, University of California, Santa Cruz

Anderson, Robert S. (https://experts.colorado.edu/display/fisid_130117/)
Distinguished Professor; PhD, University of Washington

Arthurs, Leilani A. (https://experts.colorado.edu/display/fisid_145087/)
Assistant Professor; PhD, University of Notre Dame

Budd, David A. (https://experts.colorado.edu/display/fisid_101963/)
Professor; PhD, University of Texas at Austin

Chin, Karen (https://experts.colorado.edu/display/fisid_122666/)
Associate Professor; PhD, University of California, Santa Barbara

Clark, Alisha (https://experts.colorado.edu/display/fisid_164457/)
Assistant Professor

Eberle, Jaelyn J. (https://experts.colorado.edu/display/fisid_126544/)
Professor; PhD, University of Wyoming

Farmer, G. Lang (https://experts.colorado.edu/display/fisid_100498/)
Professor; PhD, University of California, Los Angeles

Flowers, Rebecca M. (https://experts.colorado.edu/display/fisid_144054/)
Associate Professor; PhD, Massachusetts Institute of Technology

Ge, Shemin (https://experts.colorado.edu/display/fisid_101387/)
Professor, Chair; PhD, Johns Hopkins University

Hynek, Brian Michael (https://experts.colorado.edu/display/fisid_130622/)
Associate Professor; PhD, Washington University

Jakosky, Bruce M. (https://experts.colorado.edu/display/fisid_105845/)
Professor; PhD, California Institute of Technology

Jones, Craig H. (https://experts.colorado.edu/display/fisid_105590/)
Professor; PhD, Massachusetts Institute of Technology

Kopf, Sebastian H. (https://experts.colorado.edu/display/fisid_155295/)
Assistant Professor; PhD, California Institute of Technology

Mahan, Kevin H. (https://experts.colorado.edu/display/fisid_143975/)
Associate Professor; PhD, University of Massachusetts at Amherst

Marchitto, Thomas (https://experts.colorado.edu/display/fisid_128241/)
Associate Professor; PhD, Massachusetts Institute of Technology

Markle, Bradley R.
Assistant Professor; Ph.D, The University of Washington, Seattle WA, USA

Miller, Gifford Hubbs (https://experts.colorado.edu/display/fisid_102374/)
Professor; PhD, University of Colorado Boulder

Mojzsis, Stephen J. (https://experts.colorado.edu/display/fisid_118484/)
Professor; PhD, University of California, San Diego

Molnar, Peter Hale (https://experts.colorado.edu/display/fisid_114528/)
Professor; PhD, Columbia University

Mueller, Karl Jules (https://experts.colorado.edu/display/fisid_107629/)
Professor; PhD, University of Wyoming

Overeem, Irina (https://experts.colorado.edu/display/fisid_125258/)
Associate Professor; PhD, Delft University of Technology (Netherlands)

Sheehan, Anne (https://experts.colorado.edu/display/fisid_103645/)
Professor; PhD, Massachusetts Institute of Technology

Simpson, Carl (https://experts.colorado.edu/display/fisid_159652/)
Assistant Professor; PhD, University of Chicago

Smyth, Joseph R.
Professor; PhD, University of Chicago

Snell, Kathryn Elaine (https://experts.colorado.edu/display/fisid_155298/)
Assistant Professor; PhD, University of California, Santa Cruz

Stempien, Jennifer
Instructor; PhD, Virginia Polytechnic Institute and State University

Stern, Charles R. (https://experts.colorado.edu/display/fisid_100941/)
Professor; PhD, University of Chicago

Templeton, Alexis S. (https://experts.colorado.edu/display/fisid_141202/)
Associate Professor; PhD, Stanford University

Tiampo, Kristy F. (https://experts.colorado.edu/display/fisid_155908/)
Professor; PhD, University of Colorado Boulder

Tilton, Eric Small (https://experts.colorado.edu/display/fisid_126548/)
Professor, Associate Chair; PhD, University of California, Santa Cruz

Trower, Lizzy (https://experts.colorado.edu/display/fisid_159463/)
Assistant Professor; PhD, Stanford University

Tucker, Gregory E. (https://experts.colorado.edu/display/fisid_130605/)
Professor; PhD, Pennsylvania State University

Weimer, Paul (https://experts.colorado.edu/display/fisid_104630/)
Professor; PhD, University of Texas at Austin

White, James (https://experts.colorado.edu/display/fisid_102726/)
Professor; PhD, Columbia University

Willis, Michael John (https://experts.colorado.edu/display/fisid_158345/)
Assistant Professor; PhD, The Ohio State University

Wing, Boswell A. (https://experts.colorado.edu/display/fisid_158302/)
Associate Professor; PhD, Johns Hopkins University

Courses

GEOL 5001 (3) Physics and Chemistry of the Solid Earth

Reviews the physical and chemical characteristics of the solid earth, from the core to the crust, and the processes that govern behavior through the earth. Lectures are supplemented with readings from the recent literature. Topics include convection, phase transitions, melt generation, forces of plate tectonics, origin of continents and lithosphere, continental tectonics, and earthquakes.

Requisites: Restricted to graduate students only.

Recommended: Requisite a course in basic chemistry and a course in physics.

Additional Information: Departmental Category: Graduate Course

GEOL 5002 (3) Physics, Chemistry, and Biology of Sedimentary Systems

Reading and discussion of current issues and themes in the stratigraphic sciences, including stratigraphic and facies analysis, spatial heterogeneity and self-organization, numerical modeling; origin, evolution, mass extinctions, and megatrazjectories of life; and paleoceanographic and paleoclimatic signals in sedimentary rocks. Goal is to diversify students' understanding of the role of physics, chemistry, and biology in attacking research problems in sedimentary systems.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5003 (2) Graduate Writing Seminar

Aims at improving graduate student writing, editing, and reviewing skills, while meeting student writing goals. Includes discussion of materials about effective writing, and peer-editing of text that students are producing for their graduate research endeavors.

GEOL 5042 (3) Computational Tools in Geosciences

Scientific research and teaching in geological sciences and related disciplines relies increasingly on computational tools. This class aims to introduce graduate students in the geological, geophysical and biogeochemical sciences to a wide range of commonly used concepts and open source data tools to empower them to find the right tool for their computational needs in research and teaching. Previously offered as a special topics course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite Prior experience with at least one programming language is recommended.

GEOL 5060 (4) Oceanography

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4060

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5080 (3) Advanced Hydrogeology and Modeling Concepts

Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification and prediction. Department enforced prerequisite: MATH 2300 or Fortran.

Additional Information: Departmental Category: Graduate Course

GEOL 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4093 and GEOG 4093 and GEOG 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5101 (1) Introduction to Geological Sciences Faculty I

Welcomes and introduces all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week's geology colloquium is discussed. Tutorials from staff introduce how the university works, what funding opportunities exist, and how and when to apply for such funding.

Grading Basis: Letter Grade

GEOL 5102 (1) Introduction to Geological Sciences Faculty II

Continues to introduce all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week's geology colloquium is discussed. In addition, students craft reports on their intended research.

Grading Basis: Letter Grade

GEOL 5110 (3) Geomechanics

Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Department enforced prerequisite: restricted to graduate students only and a course in calculus.

Additional Information: Departmental Category: Graduate Course

GEOL 5111 (3) Rheology: Fracture and Flow of Rocks

Focuses on the elastic and plastic deformation of planetary materials (e.g. rocks and minerals, melts, tectonic plates, etc.). Topic include stress and strain, failure criterion, fracture propagation, creep (dislocation and diffusion), and deformation of multiphase materials. Prior coursework in basic chemistry, physics, mineralogy/petrology, and structure/geology is recommended.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOL 5120 (3) Advanced Structural Geology and Tectonics

Provides valuable exposure to theory and applications related to deformation (rheology) of solid Earth materials as well as the structural and geophysical characteristics of the world's major orogenic belts. The processes that will be covered span a wide range of Earth's depths, from compaction in sedimentary rocks and flow of ice/salt near Earth's surface to cataclastic mechanisms in fault rocks to plastic flow of deep crust and mantle rock. The course will involve lectures, some in-class and take home problem sets, some local field exercises and field data analysis, classic and modern paper discussions, and a research term project (written and oral presentation).

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4120

Recommended: Prerequisite GEOL 3120.

Grading Basis: Letter Grade

GEOL 5123 (3) Teaching and Learning in Post-Secondary Science Education

Introduces the science of learning and research-based instructional strategies. Open to students in any STEM discipline considering a career that involves college-level teaching. Students apply research on learning and teaching to the development of instructional materials for a target course they envision teaching at the college level in the future.

Recommended: Prerequisite at least one semester teaching/TAing undergraduate courses (waived with instructor approval).

GEOL 5125 (3) Communicating Earth Science with the Public

Introduces research on science communication and discusses examples drawn from geoscience. Students apply research on science communication to conceptualizing how to communicate about their specific geoscience research to the public in different contexts. Students should be familiar enough with their area of graduate research in geoscience to apply different models of science communication to it.

Requisites: Restricted to graduate students only.

GEOL 5150 (2) Planetary Field Geology

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4150

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5185 (3) Geomicrobiology

Examines how microbial and chemical processes interact on the Earth's surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4185, ENVS 4185, and MCDB 4185

Grading Basis: Letter Grade

GEOL 5215 (2) Geochronology and Thermochronology

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4215

Additional Information: Departmental Category: Graduate Course

GEOL 5216 (1) Geochronology Reading and Discussion Seminar

The goals of this reading and discussion seminar are to: 1) learn key aspects of a selected geochronology topic, 2) read, critically evaluate, and discuss peer-reviewed scientific papers that include geochronology data, methods, and interpretations, and 3) set up a framework and appropriate environment in which participants will discuss the next steps to address the big problems associated with each theme. This course will focus on a different geochronology theme each time that it is offered. A theme will be selected based on conversations among interested participants. At the beginning of the semester, weekly discussion topics and associated papers will be chosen to systematically work through concepts associated with that theme. Previously offered as a special topics course.

Repeatable: Repeatable for up to 5.00 total credit hours.

GEOL 5253 (3) Stable Isotope Fractionation in Biogeochemical Processes

Investigates the origins of stable isotope fractionation in geochemical systems with special emphasis on the role of biological catalysts as key drivers of isotopic effects during biogeochemical transformations. The class will cover a wide range of topics relevant to isotope fractionation including partition functions, diffusional, enzymatic and equilibrium isotope effects, open and closed system behavior, Rayleigh distillation, reservoir effects, enzymatic catalysis, physiological drivers and signal preservation.

Recommended: Prerequisites MATH 1300 or APPM 1350.

GEOL 5270 (3) Marine Chemistry and Geochemistry

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO₂; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4270

Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5280 (3) Aqueous and Environmental Geochemistry

Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations and microbial geochemistry. Department enforced prerequisite: GEOL 3320 or 2 year of college chemistry.

Additional Information: Departmental Category: Graduate Course

GEOL 5305 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft and measurement networks. Department enforced prerequisite: restricted to graduate students only, general chemistry and some organic chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5840

Additional Information: Departmental Category: Graduate Course

GEOL 5330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4330 and ASTR 4330 and ASTR 5330

Additional Information: Departmental Category: Graduate Course

GEOL 5380 (3) Fundamentals of Stable Isotope Geochemistry

This course teaches students the fundamental principles of stable isotope fractionation during physical and biological processes, and the application of these behaviors to a wide range of important geologic questions. The course will use classic case studies from the geologic record to illustrate these principles.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4380

Requisites: Requires prerequisite course of MATH 1300 or APPM 1350 (minimum grade D-).

GEOL 5420 (3) Quaternary Dating Methods

Features in-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5430 (3) Paleooceanography and Paleoclimatology

Examines scientific tools, data, and theories related to the dramatically varied past climate of the Earth. Focus will be on marine records of climate change and ocean circulation, but ice cores and other continental archives will also be discussed. Course covers the Cenozoic Era (66 Ma to present), but with particular emphasis on the Quaternary ice age cycles.

Recommended: Prerequisites Introductory geology and introductory oceanography or atmospheric science.

Additional Information: Departmental Category: Graduate Course

GEOL 5432 (3) Active Tectonics

Considers the physical processes that drive coseismic and interseismic strain in the upper crust on Earth. It is focused on recognition and interpretation of surface strain produced by active faulting, folding and flexure at a range of timescales. This includes defining how coseismic strain cycles act to build geologic structures while considering methods of analysis with rapidly emerging remotely sensed and geochronologic datasets to quantify strain rates for seismic hazard assessment. Previous coursework in structural geology, geomorphology and remote sensing is recommended.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

GEOL 5474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and MUSM 5474

Additional Information: Departmental Category: Graduate Course

GEOL 5555 (3) Topics in Macroevolution

Macroevolution extends beyond the limits of microevolution by including processes that encompass many species, in both recent and fossils organisms. Some of the topics include evolutionary novelty and innovation, developmental evolution, disparity and diversity dynamics, and extinction. We will survey case studies, methods, and the current literature.

Repeatable: Repeatable for up to 9.00 total credit hours.

GEOL 5611 (3) Organic Geochemistry

Explores the biomarker concept as a tool to elucidate microbial, biogeochemical, and climatic processes in natural systems through three fundamental goals: a) characterization and classification of organic molecules in complex, natural mixtures; b) biosynthesis, transport, transformation, preservation and destruction of organic matter in nature; c) application of lipid biomarkers and their stable isotope composition to study biological, biogeochemical, and climatic processes in modern and ancient systems.

Recommended: Prerequisites CHEM 1113 or equivalent from undergraduate degree and GEOL 5270 or GEOL 5280 or GEOL 5305 or GEOL 5675.

GEOL 5612 (3) Techniques in Organic Geochemistry

Explores the techniques in analytical chemistry and organic geochemistry for the study of lipid biomarkers in the environment, which include the following topics: a) Extraction of environmental samples and separation of lipid classes; b) Analysis of apolar lipids using gas chromatography-mass spectrometry (GC-MS); c) Determine the stable isotope composition of lipids using GC-isotope ratio-MS (GC-IR-MS); d) Analysis of polar lipids using high performance liquid chromatography-MS (HPLC-MS). Requires previous coursework in general chemistry and Organic Geochemistry.

Recommended: Prerequisites Introductory or advanced courses in organic chemistry, biochemistry, biogeochemistry, geochemistry, geomicrobiology, paleoclimate, or geology.

GEOL 5660 (3) Sedimentology & Geobiology of Carbonates

Carbonate sedimentary rocks are a significant component of the geobiological rock record, capturing a history of organisms and the environments they inhabit. This course will focus on how carbonate sediments are formed, deposited, and lithified and what influences the preservation and alteration of textural and geochemical signals. We will cover facies identification, interpreting depositional environment, and carbonate geochemistry, with a particular emphasis on recent advances and unanswered questions at the intersection of carbonates and geobiology, including the role of microbial carbonate precipitation and/or dissolution in the formation and degradation of stromatolites, carbonate mud, ooids, etc.

Recommended: Prerequisite prior coursework in Sedimentology.

GEOL 5670 (3) Isotope Geology

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4670

Additional Information: Departmental Category: Graduate Course

GEOL 5675 (3) Stable Isotopes in Paleoclimate and Paleoecology

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4675

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5690 (3) Tectonic History of the Western United States

Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarometry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class.

Requisites: Requires prerequisite courses of GEOL 3120 and PHYS 1110 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Course

GEOL 5700 (1-4) Geological Topics Seminar

Offers seminar studies in geological subjects of special current interest. Primarily for graduate students, as departmental staff and facilities permit.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5701 (2) Super-Problems in Quaternary Climate

Investigates major problems in the study and understanding of Quaternary climate variation, in seminar format. Each year one major topic will be addressed, such as: the physics and chemistry of the Ice Age ocean circulation; the theory and mechanics of glacial/interglacial atmospheric CO₂ change; the origins of the 20, 40, and 100 kyr orbital (Milankovitch) climate cycles.

Recommended: Prerequisites Introductory geology and climatology, oceanography, paleoclimatology, or paleoceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5702 (1) Geomorphology Seminar

Explores the dynamics and forms of the earth's surface through critical reading and discussion of both classical and modern literature.

Repeatable: Repeatable for up to 10.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5703 (1) Seminar in Tectonics

Focuses on a wide variety of topics related to crust, mantle and whole earth tectonics. Published papers from recent peer-reviewed literature are read and discussed. The format and specific topics will vary each semester (e.g., a relatively focused theme or open format) and will in part be determined by the makeup of enrolled students. Department enforced prerequisite: restricted to graduate students only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5704 (1) Carbonates Seminar

Focuses broadly on the topic of carbonates, including sedimentology, geochemistry, and geobiology of carbonates. Each semester will have a distinct theme under these sub-topics. Students will be responsible for leading discussion on individual readings and will be able to provide input on both the theme and the individual reading selections. Upper-level GEOL majors can register with instructor approval.

Repeatable: Repeatable for up to 10.00 total credit hours.

GEOL 5705 (1-3) Seminar in Paleoclimate

Investigates major problems in the study and understanding of past climate variations as preserved in the geologic record. Course format is a seminar-style critical reading and discussion of journal articles in paleoclimatology and paleoceanography. Topical focus varies from year to year. Prior coursework in geology, climate science, and/or paleoclimate is recommended.

Repeatable: Repeatable for up to 9.00 total credit hours.

GEOL 5711 (1-3) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5712 (1-3) Structural Field Geology

Methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5714 (2) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic and electrical measurements. Department enforced prerequisite: restricted to graduate students only and GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5715 (1-3) Field Techniques in Surficial Geology and Geohydrology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements and using field data for water budget analysis. Department prerequisite: GEOL 2001 or GEOL 2700.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5716 (1-3) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters and atmospheric particulates. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and CHEM 1011 and CHEM 1031 or CHEM 1113 or CHEM 1133 and GEOL 3320.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5717 (2) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and at least one of the following: GEOL 3120 or GEOL 3320 or GEOL 3430.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5719 (2) Field Analysis and Tectonics of Crystalline Rocks

Introduces basic and advanced mapping tools and concepts for structural and tectonic analysis of solid-state and magmatic deformation, metamorphism, and fluid flow in igneous and metamorphic rocks. Includes some digital mapping concepts using smartpad and smartphone applications, and computer-based analysis of structure data. Includes multi-day mapping projects in the Front Range, and in western Colorado, southern Wyoming, or northern New Mexico. Also includes introductions to Precambrian tectonic history of western North America and mineral resources of Colorado.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4719

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOL 5725 (1-4) Field Based Special Topics in Geoscience

Explores selected geological subjects of special interest in a field setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4725

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5755 (2) Field Geobiology

Provides students technical fieldwork skills in the interdisciplinary field of geobiology, spanning modern environments and to ancient environments in preserved in rock record, and spanning techniques from geochemistry, environmental microbiology, and sedimentology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4755

Repeatable: Repeatable for up to 8.00 total credit hours.

GEOL 5775 (3) Introduction to Numerical Modeling in Geoscience

Numerical models play an essential role across the geosciences, with applications that include hypothesis exploration, data interpretation, and prediction. This course provides a hands-on introduction to numerical modeling. Students learn scientific programming and modeling concepts by iterating through a series of model-development assignments in Python and Matlab. Applications span a range of topics in the geosciences, with emphasis on physical processes that involve mass, energy, and/or momentum transport.

GEOL 5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5800

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres - past and future.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5810 and ASTR 5810

Additional Information: Departmental Category: Graduate Course

GEOL 5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5820 and ATOC 5820

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and ASTR 5830

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and ASTR 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5840 (1-3) Independent Study-Quaternary Geology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5841 (1-3) Independent Study-Economic Geology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5842 (1-3) Independent Study-Petrology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5843 (1-3) Independent Study-Sedimentology**Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5844 (1-3) Independent Study-Structure/Tectonics****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5845 (1-3) Independent Study-Geochemistry****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5846 (1-3) Independent Study-Geophysics****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5847 (1-3) Independent Study-Hydrology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 5849 (1-3) Independent Study-Paleontology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Additional Information:** Departmental Category: Graduate Course**GEOL 5851 (1-3) Independent Study-Sediment Petrology****Repeatable:** Repeatable for up to 7.00 total credit hours.**Additional Information:** Departmental Category: Graduate Course**GEOL 5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences**

Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.

Additional Information: Departmental Category: Graduate Course**GEOL 5862 (1-4) Geology Independent Study****Equivalent - Duplicate Degree Credit Not Granted:** GEOL 4862**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.**GEOL 5910 (3) Geothermodynamics**

Provides a solid foundation in chemical thermodynamic concepts and calculations as applied to geochemistry and geobiology.

GEOL 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and ASEN 6050**Grading Basis:** Letter Grade**Additional Information:** Departmental Category: Graduate Course**GEOL 6060 (4) Petroleum Geology of Turbidite Systems**

Covers the exploration and production aspects of petroleum submarine fans and turbidite systems.

Requisites: Requires prerequisite course of GEOL 6330 (minimum grade B).**Additional Information:** Departmental Category: Graduate Course**GEOL 6310 (3) Sedimentary Petrology**

Covers interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Department enforced prerequisites: GEOL 3010 and GEOL 3020 and GEOL 3430 or equivalents.

Additional Information: Departmental Category: Graduate Course**GEOL 6330 (4) Applied Sequence Stratigraphy and Basin Analysis**

Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop and their applications to basin analysis in petroleum exploration.

Department enforced prerequisite: restricted to graduate students only and introductory undergraduate physics and sedimentology/stratigraphy.

Additional Information: Departmental Category: Graduate Course**GEOL 6610 (3) Earth and Planetary Physics 1**

Offered alternate years. Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6610 and PHYS 6610**Additional Information:** Departmental Category: Graduate Course**GEOL 6620 (3) Earth and Planetary Physics 2**

Offered alternate years. Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6620 and PHYS 6620**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Graduate Course**GEOL 6630 (3) Earth and Planetary Physics 3**

Offered alternate years. Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6630 and PHYS 6630**Additional Information:** Departmental Category: Graduate Course**GEOL 6650 (1-3) Seminar in Geophysics**

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6650 and PHYS 6650**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.**Additional Information:** Departmental Category: Graduate Course**GEOL 6655 (3) InSAR Processing and Interpretation**

Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6655**Grading Basis:** Letter Grade**GEOL 6670 (2) Geophysical Inverse Theory**

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations. Department enforced prerequisites: a course in calculus and a course in computer programming (any language).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6670**Additional Information:** Departmental Category: Graduate Course

GEOL 6940 (1) Master's Candidate for Degree**Requisites:** Restricted to graduate students only.**Grading Basis:** Pass/Fail**Additional Information:** Departmental Category: Graduate Course**GEOL 6950 (1-6) Master's Thesis****Repeatable:** Repeatable for up to 6.00 total credit hours.**Additional Information:** Departmental Category: Graduate Course**GEOL 6960 (1-3) Plan II Master's Research**

The Plan II program requires at least 3 credit hours of GEOL 6960 (Plan II Master's Research) under the supervision of the advisory committee.

Additional Information: Departmental Category: Graduate Course**GEOL 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.**Additional Information:** Departmental Category: Graduate Course

Geology - Master of Science (MS)

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARC). Related areas of study are geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the Geological Sciences website (<https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/>).

Requirements

Admission Requirements

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests, and letters of recommendation. The Graduate Record Examination is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Prerequisites

Entering students normally have completed at least 24 credit hours of basic courses in geological sciences and two semesters each of chemistry, physics and calculus. In some cases, undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological sciences.

Program Requirements

Candidates for the master's degree in geological sciences must complete at least 30 hours of graduate credits either with a thesis (Plan I) or without a thesis (Plan II). The only specifically required classroom

courses are GEOL 5101 Introduction to Geological Sciences Faculty I and GEOL 5102 Introduction to Geological Sciences Faculty II (1 credit each).

A maximum of 6 credit hours may be completed at the 3000- or 4000-level to count toward the 30 hours. A maximum of 9 graduate-level credits may be transferred from another university. Both types of substitution are at the discretion of the student's principal advisor and the department's Associate Chair for graduate studies

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the department's Information for Prospective Graduate Students (<https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/>) webpage.

Plan I: Thesis Option

Students must complete a minimum of 4, but no more than 6, credit hours of Master's Thesis (GEOL 6950) as part of the 30 credit hour requirement.

Plan II: Non-thesis Option

The Department of Geological Sciences typically does not admit students into a Plan II (non-thesis) master's program, but Plan I or PhD candidates occasionally transfer into this option. Students must complete 3 credit hours of Plan II Master's Research (GEOL 6960) under the supervision of the student's advisory committee, as part of the 30 credit hour requirement.

Geology - Doctor of Philosophy (PhD)

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARC). Related areas of study are geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the department's Graduate Degree Programs (<https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/>) webpage.

Requirements

Admission & Prerequisites

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests, and letters of recommendation. The Graduate Record Examination is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Entering students normally have completed at least 24 credit hours of basic courses in geological sciences and two semesters each of chemistry, physics and calculus. In some cases, undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological sciences.

Program Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder. The only specifically required courses are GEOL 5101 and GEOL 5102, Introduction to Geological Sciences Faculty (1 credit each). In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation (GEOL 8990), with not more than 10 of these taken before the semester during which the comprehensive examination is passed, and not more than 10 taken in any one semester.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration, and degree requirements on the department's Information for Prospective Graduate Students (<https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/>) webpage.

Geophysics - Doctor of Philosophy (PhD)

The interdisciplinary doctoral program in geophysics encourages students with a variety of undergraduate backgrounds to pursue graduate study in the physics of the Earth, with special emphasis on the interior of the planet. Students specialize in one of the subfields of geophysics while gaining a broad, general background in the discipline and in-depth education in the relevant aspects of the parent fields of geology, physics and engineering.

Students enter the program by applying for admission to one of the following departments:

- aerospace engineering sciences
- astrophysical and planetary sciences
- civil, environmental and architectural engineering
- electrical and computer engineering
- geography
- geological sciences
- mechanical engineering
- physics

Upon satisfactory performance on the doctoral preliminary examination given by the home department, the student may formally apply for admission to the geophysics doctoral program.

The program is administered by the geophysics graduate program committee, which includes representatives from each of the participating departments. The comprehensive examination and the dissertation defense are directed by this committee, with a faculty member of the home department normally chairing these procedures.

For more information, visit the Geophysics Studies Program (<http://www.colorado.edu/geophysics/>) website.

Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder.

In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken

before the semester during which the comprehensive examination is passed.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
ASTR/GEOL/PHYS 6610	Earth and Planetary Physics 1 (Seismology)	3
ASTR/GEOL/PHYS 6620	Earth and Planetary Physics 2 (Geodesy)	3
ASTR/GEOL/PHYS 6630	Earth and Planetary Physics 3 (Geodynamics)	3
ASTR/GEOL/PHYS 6650	Seminar in Geophysics	1-3
One semester of graduate-level applied mathematics from the following:		3
PHYS/MATH 5030	Intermediate Mathematical Physics 1	
APPM 5350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
ASTR 5540	Mathematical Methods	
MCEN 5020	Methods of Engineering Analysis 1	
Dissertation		
GEOL 8990	Doctoral Dissertation ¹	30
Electives		
Additional courses compatible with the student's research interests to complete the 60-credit minimum.		17-15
Total Credit Hours		60

¹ Or equivalent in home department.

For a list of approved elective courses, visit the Geophysics PhD Program (<https://www.colorado.edu/geophysics/academics/geophysics-phd-program/>) webpage.

Geophysics - Graduate Certificate

The geophysics graduate certificate offers a coherent curriculum in geophysics that can complement and supplement a student's regular degree program and encourages multi-disciplinary education in the area of geophysics. The geophysics certificate program allows students to obtain recognition for their accomplishments in geophysics without having to switch into the geophysics degree program.

Requirements

Admission Requirements

A student wishing to be considered for a certificate in geophysics must be pursuing a graduate degree in one of the participating graduate departments (ASEN, APS, CEAE, ECEN, GEOG, GEOL, MCEN, PHYS). Students from outside the participating departments can apply for entry to the geophysics certificate program by submitting a letter addressed to the Geophysics Graduate Program Committee.

A student must have a course background that includes mathematics through three semesters of calculus and four undergraduate science or engineering courses.

Program Requirements

All students must take at least three geophysics core courses and the Seminar in Geophysics. At least one of the three geophysics core courses must be from the earth and planetary physics (EPP) series, and another must be from outside the student's home department. Most geophysics core courses are offered once every two years.

Completion with a grade of B or better of a total of three geophysics core courses (at least one from the EPP sequence) and one credit hour for the Seminar in Geophysics.

A certificate in geophysics will be awarded upon the student's completion of degree requirements in their home department. Upon request from a student, the program director and the student's advisor will determine whether a student has met the requirements for the certificate and will generate a letter to the appropriate department head and dean. The certificate is not intended as a substitute for a degree and will be awarded only upon completion of a graduate degree.

Germanic and Slavic Languages and Literatures

As a department of foreign languages, literatures and cultural studies, the Department of Germanic and Slavic Languages and Literatures prepares students for life and careers in an increasingly global world. Our programs in German, Russian and Nordic Studies enable students to combine their language training with interdisciplinary study of the regions where their language is spoken. The cultural legacies of the Germanic and Slavic countries continue to shape fields such as literature, art, music, film, philosophy and political science.

Course codes for these programs are GRMN, GSLL and RUSS.

Master's Degrees

- German Studies - Master of Arts (MA) (p. 1160)
- Russian Studies - Master of Arts (MA) (p. 1162)

Doctoral Degree

- German Studies - Doctor of Philosophy (PhD) (p. 1164)

Certificate

- Critical Theory - Graduate Certificate (p. 1166)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

GRMN 5010 (3) Theory and Practice of German Studies

Provides a graduate-level introduction to German Studies, with emphasis on theoretical approaches and current trends in German Studies. Special attention will be given to developing the tools necessary for advanced criticism: close-reading skills, mastery of critical terminology, and training in a range of theoretical approaches. The main goals of this course are (1) to introduce students to critical approaches to literature/art/film and recent theoretical trends in German literary and cultural studies, (2) to give students the opportunity to deepen interpretive skills through close reading and discussion of representative texts, and (3) to encourage students to explore theoretical approaches to literary and cultural material.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5020 (3) Applied Linguistics and Foreign Language Teaching Methodology

Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5030 (3) Foundations of Critical Theory

An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4051

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Courses Taught in English
Departmental Category: German Graduate Courses

GRMN 5210 (3) Seminar: The Age of Enlightenment

Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5220 (3) Seminar: Topics in the Age of Goethe

Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include Sturm und Drang as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5231 (3) Sex, Love and Marriage in Literature and Philosophy

Traces notions of love, sex and marriage in 19th-20th century philosophy and literature. Considered will be whether/how these representations reflect or challenge ideas of human agency, dignity and happiness. Examined will be shifting views of gender and other social configurations (e.g., friendship, adultery, same-sex desire) to understand their influence on modern attitudes towards sexuality and fidelity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4231

Additional Information: Departmental Category: German Graduate Courses

GRMN 5301 (3) Gender, Race, and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4301 and WGST 4301

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5310 (3) Seminar: Topics in the 19th Century

Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5320 (3) Seminar: The German Novel from 1901--1956

Beginning with T. Mann's *Buddenbrooks*, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5330 (3) Seminar: German Intellectuals and Society Between the Wars

Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5410 (3) Seminar: Topics in Early 20th Century German Society

Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5420 (3) Seminar: Topics in Contemporary German-speaking Societies

Analyzes artistic and literary engagement with major discussions and debates in contemporary German-speaking societies. Course also provides an introduction to theoretical approaches relevant to the topic. See specific topic description for more details.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's *Doctor Faustus*. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4504 and HUMN 4504

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5510 (3) Seminar: Open Topics in German Civilization

Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5520 (3) Seminar: Current Issues in German Literature and Media

Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 6900 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: German Graduate Courses

GRMN 7010 (1-3) Writing Colloquium

Prepares students for the qualifying examination paper and dissertation, and equips students with the skills needed to transform seminar papers into publishable work. Includes sessions on dissertation writing, publishing journal articles, preparing a reading list, and conducting archival research. Required for students in the German Studies PhD program. Cannot be satisfied through transfer credit.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to German Studies PhD students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German

GRMN 7900 (1-6) Independent Study

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German Graduate Courses

GRMN 7930 (1-6) Internship

Provides an academically supervised opportunity for doctoral students to earn credit while working for public or private organizations. Students supplement their work experience through directed readings and assignments. Students interested in applying for an internship must complete the Arts & Sciences Internship Application at <http://advising.colorado.edu/sites/default/files/Internshipcredit.pdf>. 1-6 hours;

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to German Studies graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German Graduate Courses

GRMN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements of the degree. For detailed information regarding doctoral dissertation credit, refer to Graduate School rules.

Repeatable: Repeatable for up to 100.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GSLI 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Germanic and Slavic Courses

RUSS 5010 (4) Advanced Russian Seminar

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4010

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5020 (4) Advanced Russian Seminar 2

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4020

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5050 (4) Professional Russian

Introduces graduate and advanced undergraduate students to various stylistic registers of Russian (business, politics, the Internet, TV, etc.). Develops new vocabulary and idiomatics, with a special focus on fluency of speech and written communication skills. Along with language training, the course offers an immersion into the world of contemporary Russian media, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4050

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Russian

RUSS 5110 (3) Slavic Culture and Society

Examines important ideologies and myths in Slavic societies, with emphasis on contemporary movements and their reinterpretation of history. Acquaints students with major tools for study of cultures of Eastern Europe and the post-Soviet states: research methods, bibliography, transliteration, critical thinking and writing skills. Required for Russian MA. Taught in English.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5120 (3) Russia after Communism: Post-Soviet Politics and Culture

Explores the process of the re-invention and re-shaping of Russian national identity after the collapse of Communism. Topics will include the formation of a neoconservative and neo-imperialist agenda (as demonstrated by the Ukraine crisis), the growth of anti-Western attitudes, and the anti-Putin protest movement. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4120

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5210 (3) Topics in Russian Culture

Selected topics in Russian literature, film, art and music. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4210

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5220 (3) Open Topics: Russian Culture in Russian

Selected topics in Russian culture and society. Taught all or partly in Russian.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4220

Repeatable: Repeatable for up to 6.00 total credit hours.

RUSS 5221 (3) Stalinism: Culture and Society

Examines Soviet society and culture of the Stalin period (1929-1953). The Great Terror, Communist ideology, commercial practices, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4221

RUSS 5230 (3) Russian Cultural Idioms

Analyzes Russian cultural discourse through Russian idioms. Taught in Russian. Formerly GSLL 5230.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4230

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5251 (3) Russian Queer Culture

Explores the contributions to Russian/Soviet literature, film, and the performing arts by such LGBTQ cultural icons as Nikolai Gogol, Marina Tsvetaeva, Sergei Eisenstein, and Pyotr Tchaikovsky. The course also surveys the history of social and legal restrictions on non-heteronormative behaviors in Russia from the medieval period to the present, with an emphasis on the emergence of LGBT rights activism and the reactionary rise of homophobia as a tool of nationalist politics in Putin's Russia.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4251

RUSS 5301 (3) American-Russian Cultural Relations

Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4301

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5321 (3) Mythological Russia

Examines folklore, popular culture, and everyday life in contemporary Russia to reveal beliefs, ideals, and ideologies. Subjects include witchcraft, shamanism, healing, death, remembrance, nostalgia, collective memory, obscenity. Students will learn to analyze artifacts, photographs, interviews, memoirs, songs, stories, and rituals. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4321

Recommended: Prerequisite prior experience with folklore or Russian studies.

RUSS 5352 (3) Russian Novel: Theory and Practice

Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. Formerly GSLL 5352.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5401 (3) The Russian Jewish Experience

Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with the Bolshevik Revolution, Stalinism, Holocaust, and post-Stalin period; the place of Jews as individuals and a minority within Russian and Soviet society; challenges of co-existence of Jews and their neighbors; and emigration to America and elsewhere in the late 20th and early 21st centuries. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4401 and JWST 4401

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5431 (3) Dostoevsky

Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English. Formerly GSLL 5431.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4431

RUSS 5441 (3) Tolstoy

Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English. Formerly GSLL 5441.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4441

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5451 (3) Chekhov

Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Formerly GSLL 5451.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4451

RUSS 5471 (3) Women in 20th-21st Century Russian Culture

Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English. Formerly GSLL 5471.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4471 and WGST 4471

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English. Formerly GSLL 5481.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4481 and IAFS 3621

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5821 (3) 20th Century Russian Literature and Art

Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4821

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5830 (3) Topics in Literature and History

Taught in English. Formerly GSLL 5830.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5831 (3) Contemporary Russian Literature

Acquaints students with the most representative works of Russian writers after the collapse of the Soviet regime. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are in English. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4831

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5841 (3) History of Modern Russian Drama

Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western dramatic theory. Surveys most influential directorial styles from Stanislavsky's "method" to contemporary verbatim theatre. All readings are in English. Taught in English. Formerly GSLL 5841.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4841

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5850 (4) Russian Film and Society (taught in Russian)

Examines topics in Russian film and TV series from sociohistorical and cultural perspectives, while simultaneously developing students' auditing, comprehension, and speaking skills in Russian language. Critical thinking and analytical approaches will be key to working through the course's material. Screenings, discussions, and written assignments are in Russian. Taught in Russian.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4850

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisites RUSS 2020 or equivalent.

Additional Information: Departmental Category: Russian

RUSS 5851 (3) Critical Thinking: Russian Film and Society (taught in English)

Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English. Formerly GSLL 5851.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4851

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5861 (3) Absurd and Supernatural in Russian Literature

Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmis, Bulgakov, Sinyavsky, Petrushevskaya and Pelevin within the contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Taught in English. Formerly GSLL 5861.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4861

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5900 (1-6) Independent Study

See department for registration information. Department enforced requisite: graduate standing. Department Consent Required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Russian

RUSS 6940 (1-3) Master's Candidate for Degree

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Russian

RUSS 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

German Studies - Master of Arts (MA)

The department offers an interdisciplinary MA in German studies, focusing on German-speaking central European society from the Enlightenment to the present. In addition to expertise in German literature, the faculty's interdisciplinary strengths include comparative literature, philosophy, social and political theory, film, cultural studies, intellectual history, art history, gender studies, Jewish studies and translation. To get a better idea of the department's areas of specialization, prospective students are encouraged to consult the list of recent graduate seminars and the profiles of the graduate faculty and expanded graduate faculty. The faculty works closely with students to design their own course of study. Most German MA students receive a teaching assistantship and tuition waiver. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the MA in German studies, please visit the program's website (<https://www.colorado.edu/gsll/german-program/>).

Students wishing to pursue the interdisciplinary master's in German studies should read the requirements tab (p. 1161) of this catalog carefully.

Education Abroad

Universities of Göttingen and Regensburg

One year (10 months) of study, from mid-October to the end of July.

- Number of positions: One at each university.
- Benefits: Matriculation plus a monthly stipend for living expenses, and housing in a dorm.
- Note: German citizens are not eligible for the Regensburg exchange program, but are eligible for the Göttingen exchange program.

For more information on graduate exchange programs in Germany, visit the department webpage (<https://www.colorado.edu/gsl/cu-graduate-exchange-programs-germany/>).

For more information on any Education Abroad programs, scholarships and application information, contact the Office of International Education, UCB 123, Boulder, CO 80309, (303) 492-7741 or visit the Education Abroad (http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=6E1E909F-9011-F4D1-DA01962CC1E53067) website.

Requirements

Program Requirements

Students applying to the MA degree are expected to have a BA or equivalent in German or BA-level proficiency in German with a BA in a related field, and should have a general knowledge of the German-speaking countries' literature, history and culture.

The master's degree requires either 24 credit hours of approved coursework and a master's thesis (6 credit hours) or 30 credit hours of coursework without thesis, and reading knowledge of one foreign language in addition to German and English.

All German MA students must take Theory and Practice of German Studies (GRMN 5010). All German teaching assistants must also take Applied Linguistics and Foreign Language Teaching Methodology (GRMN 5020). For specific requirements, visit the department's German MA (<http://www.colorado.edu/gsl/german/graduate/ma/>) webpage.

Degree Plans

Plan I: Thesis Option (Standard Option)

The thesis option requires 30 credit hours, including 24 hours of coursework and 6 thesis hours. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study coursework may be taken with the approval of the associate chair of graduate studies.

Code	Title	Credit Hours
Core/Required Courses		
GRMN 5010	Theory and Practice of German Studies	3
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	3
GRMN 6900	Master's Thesis	6

Dual Degree Program MBA/MA in German Studies

To support the university's mission of advancing knowledge across disciplines, the Leeds School of Business and the Department of Germanic and Slavic Languages and Literatures offer a dual degree, Master of Business Administration and Master of Arts in German studies. In most cases, students should be able to complete the dual degree in three years with a total of 70 credit hours.

Prospective students must apply to and meet the application and admission requirements for each program separately. See the Department of Germanic and Slavic Languages and Literatures (<http://www.colorado.edu/gssl/german/graduate/>) website to apply to the German studies MA program, and the Leeds School of Business (<http://www.colorado.edu/business/mba/>) website to apply to the MBA program.

Russian Studies - Master of Arts (MA)

The department offers an interdisciplinary professional MA in Russian studies focusing on Russian language proficiency, Russian culture and interrelations between Russian history, politics and culture from the 19th through the 21st centuries. The faculty's interdisciplinary strengths include literature, cinema, folklore, literary/cultural theory, cultural studies, gender studies, minority studies, nationalism, sociolinguistics and pedagogy.

The faculty works closely with students to design their own course of study. Some Russian MA students receive a teaching assistantship and tuition waiver.

For contact information and more general information on the MA in Russian studies, visit the Russian Program (<http://www.colorado.edu/gsll/russian-program/>) website or email gsll@colorado.edu.

Requirements

Course Requirements

Russian MA students may take up to 12 credit hours in an outside area. Students frequently choose business, political science, geography, education, history, linguistics, film studies, Jewish studies, religious studies, fine arts, and theater and dance, but students may pursue other options. All outside area courses must be approved by the Director of Russian Graduate Studies.

Upon approval of the Director of Russian Graduate Studies, students may take up to six credit hours of 3000- or 4000-level courses toward their MA degree.

Students interested in independent study should obtain an informational sheet and an Independent Study Contract from the department. Once the contract is approved by the chair, a staff member will enroll the student in the course. MA students may not take more than a total of 7 hours of independent study.

Transfer credit from accredited institutions is accepted by CU Boulder only after approval by the Director of Russian Graduate Studies and the Graduate School. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. MA students are allowed a maximum of 9 hours of transfer credit.

All students must pass the Russian language proficiency exam, consisting of written and oral components, during their final semester.

Degree Plans

Plan I: Thesis Option

Students must complete at least 30 credit hours, including 24 hours of coursework and 6 thesis hours. Students must submit a thesis and pass a one-hour oral defense.

German Studies - Doctor of Philosophy (PhD)

The German PhD offers close mentorship and a vibrant intellectual exchange between students and faculty. Graduate students work closely with leading scholars of modern literature, culture, philosophy, and the arts from the Enlightenment to the present. PhD students are encouraged to conduct interdisciplinary research in German studies and a secondary concentration (i.e. classics, environmental science, art history, Jewish studies). To see the wide range of subjects covered in the German program, consult the research and publication profiles of the faculty and graduate students.

PhD students work and study with established scholars of German studies whose fields of expertise include aesthetics, literary criticism and theory, history of science and technology, critical theory, cultural studies and contemporary art. In combination with advising in literature, students might seek advising in law, popular culture, media and other fields. Students participate in student-centered colloquia, workshops, and the annual Graduate Summer School in German Studies, which brings to Boulder graduate students and scholars from leading German programs. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the PhD in German studies, please visit the program's website (<https://www.colorado.edu/gssl/german-program/>). A timeline for the German Studies PhD (<https://www.colorado.edu/gssl/timeline-german-studies-phd/>) can be found on our German Program webpage.

Requirements

Academic Preparation

If a student has gaps in their academic preparation, the department may require them to take additional courses.

Course Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above. Students who have completed an MA degree may be able to apply up to 21 hours toward this requirement.

In addition to coursework, students must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed. Students must be enrolled in a minimum of 5 dissertation hours during the semester in which they defend their dissertation (including summer session, if the defense is held over the summer).

Transfer credit from accredited institutions may be accepted by CU Boulder after approval by the graduate associate chair and the graduate school. PhD students are allowed a maximum of 21 hours of transfer credit. Thesis hours may not be transferred. All courses accepted for transfer credit must be graduate-level courses and must have a grade of B or above. Coursework completed more than five years prior to acceptance to the PhD program will be evaluated by the department with regard to current relevance and applicability to the degree requirements. Credit may not be transferred until the student has completed at least six credits of CU graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Thesis hours do not count toward the required 30 hours and cannot be used as transfer credit.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		6
GRMN 5010	Theory and Practice of German Studies	
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	
Two pre-20th century content courses such as:		6
GRMN 5030	Foundations of Critical Theory	
GRMN 5210	Seminar: The Age of Enlightenment	
GRMN 5220	Seminar: Topics in the Age of Goethe	
GRMN 5310	Seminar: Topics in the 19th Century	
GRMN 5504	Goethe's Faust	
GRMN 5510	Seminar: Open Topics in German Civilization	
Electives		
At least 6 credit hours in an interdisciplinary area of concentration. ¹		6
Additional courses to meet 30-credit minimum.		12
Total Credit Hours		30

¹ Students design this concentration in close consultation with their faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Examples of interdisciplinary concentrations include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics and international affairs.

Secondary concentration

As a German studies PhD student, you will develop an interdisciplinary area of concentration. This secondary field will consist of at least 6 credit hours. You will design this concentration in close consultation with your faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics, international affairs.

Language Requirement

In addition to demonstrating a high level of proficiency in German, you must demonstrate moderate proficiency in an additional foreign language. You can do this by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- completing a fourth-semester (second-semester sophomore) college language course with a grade of "pass,"
- completing a proficiency exam administered at CU, or
- presenting other evidence of moderate proficiency to the graduate associate chair.

Students should consult with the graduate associate chair at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before or during the semester in which the student advances to candidacy.

Comprehensive PhD Examination

The comprehensive exam tests a student's knowledge in areas of specialization appropriate for their anticipated dissertation topic. The exam takes place in the second or third year, depending on whether the student entered the program with a BA or MA and, if the latter, how many coursework credits were applied from the MA. Students take the exam in the spring semester. The exam is based on a reading list the student assembles in close consultation with the members of their committee. It consists of a take-home written exam followed by a two-hour-long oral examination that concentrates on the written exam, but may also address texts and topics on the reading list that are not covered in the written exam. The composition of the comprehensive exam committee follows the guidelines of the prospectus & dissertation committee composition below.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/>) webpage.

Prospectus & Dissertation Committee

After successful completion of the comprehensive examinations, the student forms a dissertation committee and prepares a dissertation prospectus, to be followed by its defense a week later. The dissertation committee should be finalized and a dissertation prospectus submitted

no later than the end of the fifth week of the semester following the successful completion of the comprehensive examination.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/>) webpage.

Dissertation

The student formally begins to write their dissertation after successfully completing the comprehensive exam and defending the dissertation prospectus. The student should work closely with their dissertation advisor and committee members while writing the dissertation. In particular, students are advised to submit draft copies of each chapter to all members of their committee. Any subsequent changes to the student's "timeline for completion" need to be circulated to the committee for approval. A final draft must be submitted to the committee members at least three weeks before the defense.

Students are required to register continuously for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive exam and extending through the semester in which the student successfully defends their dissertation.

A student who fails to register continuously for dissertation credit hours after passing the comprehensive exam must retake and pass the exam, and validate any coursework more than five years old, to regain status as a student in good standing with the graduate school.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/>) webpage.

Recommended Coursework

Internships

Students are strongly encouraged to complete at least one internship during their doctoral studies. Three hours of internship credit can count toward the 30 required hours of coursework for the PhD. GSLL graduate students have completed internships with businesses, nonprofit agencies and schools, and at locations including Colorado, Germany and Washington, DC. Internship offerings vary by semester. To enroll in a graduate internship, see the associate chair for graduate studies.

Graduate Exchange Opportunities

Students are recommended to spend one academic year abroad during their doctoral studies, on either a CU graduate exchange or an exchange funded by an agency such as the German Academic Exchange Service (DAAD) or the Fulbright Commission. For more information concerning DAAD, Fulbright and other grants, see the department's Scholarships & Awards (<http://www.colorado.edu/gsll/scholarships-awards/>) webpage.

In partnership with CU's Office of International Education, GSLL offers funded graduate exchanges at the University of Göttingen and the University of Regensburg. These exchanges offer matriculation at the host institution for one academic year (10 months), plus a monthly stipend for living expenses. One position is offered per year at each institution. To qualify for an exchange, the student must demonstrate fluency in German and evidence of superior academic work.

Students interested in either program should notify the graduate associate chair by December 1 for study abroad the following academic year and formally apply by February 15.

Graduate Certificate Programs

Students are also encouraged to consider completing a graduate certificate program at CU. GSLL offers a critical theory graduate certificate (p. 1166). Other graduate certificates include the women and gender studies graduate certificate (p. 1287) and the comparative ethnic studies graduate certificate (p. 1130).

Critical Theory - Graduate Certificate

This certificate offers students a background in philosophical foundations of critical theory. Drawing on disciplines such as philosophy, psychoanalysis, Marxism, literary criticism and sociology, critical theory develops analytical tools for describing and evaluating modern society and cultural production.

Requirements

Procedures

Students who are currently enrolled in a graduate disciplinary degree or a professional degree program are encouraged to apply for the graduate certificate in critical theory early in their graduate career.

To complete the certificate program, a student must complete the Certificate Completion Worksheet (<https://www.colorado.edu/gsll/critical-theory-completion-worksheet/>) and submit it to the Graduate Program Assistant, Karen Hawley, McKenna 129, gsll@colorado.edu. The worksheet should be submitted the semester the student competes the certificate requirements. It can also be submitted any semester thereafter, but no later than the end of the semester in which the student will graduate. The director will review and approve the worksheet. The certificate will not be posted to a transcript until student graduates and degree has been awarded.

Graduate Certificate Forms and Links

- Certificate Elective Courses List (<https://www.colorado.edu/gsll/graduate-certificate-program-critical-theory-elective-courses/>)
- Affiliated Faculty List (<https://www.colorado.edu/gsll/affiliated-faculty/>)
- Certificate Completion Worksheet (<https://www.colorado.edu/gsll/critical-theory-completion-worksheet/>)

For more information contact the Certificate Director (<https://www.colorado.edu/gsll/contact-us/>) or the Graduate Program Assistant, Karen Hawley (Karen.Hawley@colorado.edu), (303) 492-3529.

Required Courses and Credits

A total of 12 credit hours are required for completion of the certificate. Of those, 6 credits are earned through a two-course core sequence designed to provide the intellectual history and philosophical foundations for contemporary research directions in critical theory. Students must also take two electives in theory. These courses may be from the list below, and students can also request that the director approve other theory courses.

Students must obtain a grade of B or above in each course taken toward the certificate.

Code	Title	Credit Hours
Required Courses		
Students are required to take the following 2 core graduate courses. Although they may be taken in any order, we encourage students to take them in order when possible. Neither of these courses may be taken as an independent study.		
GRMN 5030	Foundations of Critical Theory	3
GRMN 5051	Critical Theory of the Frankfurt School	3
Electives		
Select two additional elective courses in theory from the list below. Students may also submit a request to the director to recognize courses not listed by submitting a copy of the current syllabus. (Except under extraordinary circumstance, independent study courses do not count toward the graduate certificate.)		6
ANTH 5785	Advanced Seminar in Cultural Anthropology	
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	
ANTH 7620	Seminar: Ethnography and Cultural Theory	
ARTF 5004	Topics in Film Theory	
ARTF 5604	Colloquium in Film Aesthetics	
ARTH 6929	Seminar: Theories of Art History	
COMM 6010	Communication Research and Theory	
COMM 6320	Rhetorical Theory	
COMM 6360	Social and Cultural Theory	
ENGL 5019	Survey of Contemporary Literary and Cultural Theory	
ENGL 7489	Advanced Special Topics	
ENVS 5240	Environmental Philosophy	
FREN 5445	Literary Theory, Part I	
GEOG 5100	Special Topics: Geography	
GEOG 5632	Development Geography	
GEOG 6742	Seminar: Cultural Geography	
HIST 6540	Readings in Cultural History and Theory	
HIST 6414	Readings in European Intellectual History	
HIST 7326	Seminar: U.S. Intellectual History	
LING 6320	Linguistic Anthropology	
LING 7350	Language and Gender in Cultural Perspective	
LING 7420	Syntactic Theory	
MDST 6051	Media Theories	
MDST 6071	Critical Theories of Media and Culture	
MDST 7011	Proseminar in Media Communication Theory 1	
MDST 7021	Proseminar in Media and Communication Theory 2	
PHIL 5110	Contemporary Moral Theory	
PHIL 5200	Contemporary Political Philosophy	
PHIL 5240	Seminar in Environmental Philosophy	
PHIL 5300	Philosophy of Mind	
PHIL 5490	Philosophy of Language	

PSCI 7004	Seminar: Political Theory
SOCY 5201	Graduate Seminar in Sociological Theory
SOCY 7036	Feminist Theory
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures
THTR 5010	Introduction to Performance Studies
WGST 6090	Feminist Theories
Total Credit Hours	
12	

History

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All history graduate students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history); and
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses.

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

Course code for this program is HIST.

Master's Degree

- History - Master of Arts (MA) (p. 1175)

Doctoral Degree

- History - Doctor of Philosophy (PhD) (p. 1176)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

HIST 5000 (3) Historical Methods: Introduction to the Professional Study of History

Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5012 (3) Graduate Colloquium in European History

Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. Department enforced requisite: admission to the graduate program in history.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4013

Requisites: Restricted to graduate students only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4053

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4061 and CLAS 4061 and CLAS 5061

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5106 (3) Graduate Colloquium in United States History

Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II. Instructor's permission required for non-history graduate students.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4116

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5125 (3) Early American History to 1763

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4125

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5126 (3) History of U.S. Foreign Relations Since 1941

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4126

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5128 (3) The History of Modern Mexico Since 1821

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4128

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5129 (3) Colloquium in Modern Asian History

Introduces major topics and themes in Asian history. Analyzes readings relating to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 5205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4205

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4215

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5222 (3) War and the European State, 1618-1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4222

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5223 (3) The French Revolution and Napoleon

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades of revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4223

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4235

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5303 (3) Venice and Florence during the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5303

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4328

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4339

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 5343 (3) Spain and Portugal during the Golden Age

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 5064.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4343

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4349

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 5422 (3) World War I in Europe

Examines the origins of World War I; the military, social, and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the twentieth-century world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4422

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5448 (3) World War II in Southeast Asia

Examines World War II in Southeast Asia, emphasizing the political, social, economic, cultural, and ideological impact of the conflict. How can we define ¿Southeast Asia¿? In what ways did conflict affect men and women, soldiers and civilians, and ethnic, religious, and sexual communities? How can we understand the war as a local, regional, and global experience, with legacies for today?

Equivalent - Duplicate Degree Credit Not Granted: HIST 4448 and ASIA 4448

HIST 5538 (3) History of Modern India

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4538

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and JWST 4544

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Topical

HIST 5548 (3) Women in Modern India

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4548

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities as served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4616 and WGST 4616

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4619 and WGST 4619

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics as Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4628

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics, and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4636 and WGST 4636

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5638 (3) Contemporary China: Radicalism and Reform, 1949 to Present

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4638

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5658 (3) China and Islam from the 7th Century to the 20th Century

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4658

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4728

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4738

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4761 and CLAS 4761 and CLAS 5761

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5840 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5841 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5842 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5843 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5844 (1-3) Independent Study-Europe/Topical

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5845 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5846 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5847 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 5848 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5849 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6000 (3) Teaching History in the University

Introduces graduate students to basic pedagogy with special attention to discipline-specific methods, practices, and challenges in teaching history at the college level. In touching upon and integrating the several stages of teaching in a graduate student's career and after, this course provides a solid foundation for students to continue their pedagogical development as their instructional experience and skills become more advanced.

Requisites: Restricted to graduate students only.

HIST 6012 (3) Readings in Modern European History

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 6019 (3) Readings in World History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6020 (3) Modern Empires: Readings in Imperial History

Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6028 (3) Readings in Modern Latin American History

Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite HIST 5128.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 6030 (3) Readings: Frontiers and Borderlands in the Americas

Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethnogenesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6109 (3) Readings in Asian History

Explores a specific theme in Asian History in depth. Topic may vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6113 (3) Readings in English History to 1714

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6115 (3) Readings in American Colonial History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 6116 (3) Readings in American Diplomatic History

Requisites: Restricted to graduate students only.

Recommended: Requisite undergraduate work in American history.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6123 (3) Readings in English History Since 1688**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Specific Countries**HIST 6150 (3) Critical and Theoretical Issues in Museums**

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and ARTH 6150 and ANTH 6150**Requisites:** Requires prerequisite course of MUSM 5011 (minimum grade D-).**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 6212 (3) Readings in 17th Century Europe****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Modern**HIST 6317 (3) Readings in the American West****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 2**HIST 6326 (3) Readings in United States Intellectual History**

Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse.

Requisites: Restricted to History (HIST) graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 6329 (3) Readings in Comparative Ethnohistory****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Comparable and General**HIST 6330 (3) History of Sex and Sexuality**

Examines major historical trends in the study of meanings and practices of sex and sexuality. Focuses on emergence and negotiation of sexual matters in circumstances where sex and identity were not coterminous.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 6349 (3) Decolonization in Transnational Perspective: The End of the British Empire in S Asia & Middle East**

Examines Britain's withdrawal from South Asia and the Palestine mandate. Topics include collaboration, anticolonial resistance, Indian and Palestinian nationalisms, Zionism, transcolonial connections, counter insurgency, and partition.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6410 (3) Readings in Environmental History

Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Formerly HIST 6417.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 6413 (3) Readings in Modern German History****Requisites:** Restricted to graduate students only.**Recommended:** Requisite general background in European history.**Additional Information:** Departmental Category: Europe: Specific Countries**HIST 6414 (3) Readings in European Intellectual History****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Topical**HIST 6420 (3) Memory and History in Transnational Perspective**

Engages in debates about historical methods and how the past is represented. Central topics will include memory and the forces of nationalism and war; commemoration and monuments; the role of memory in the construction of race and ethnicity; personal past and cultural remembrance; and the relationships between academic, public, and popular histories.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 6427 (3) Readings in African American History**

Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 2**HIST 6511 (3) Readings in Medieval History****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Ancient and Medieval**HIST 6526 (3) Readings in U.S. Social History, 1880--1940****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 6528 (3) Reading in South Asian History**

Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 6540 (3) Readings in Cultural History and Theory

Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6610 (3) Readings in Gender History

Examines the field of gender history that includes an understanding of women's and/or men's experience as lived and socially or culturally constructed. Regional or national focus and time period to be determined by the faculty member teaching the course in any given semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6616 (3) Readings in the History of American Women

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6756 (3) Race and Nationalism

Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6790 (3) Readings in Digital History

Re-conceptualizes topics surrounding traditional theories, methods, and practices of writing history in the digital age. Topics revolve around collating big data, curating digital exhibits, copyright and image preparation for digital/print publications, website development/design, cartography, sustainability and preservation, among other themes. Lab work provides conceptual and technical recommendations required to conceive, launch, and preserve online digital history projects.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6800 (3) Readings in Global History

Explores various topics, regions, and methods in history and historical writing by utilizing a global/thematic approach. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7052 (3) Seminar: Modern European History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7110 (3) Research Seminar in Atlantic History 1500-1800

Discusses the concepts and methods that inform the field of Atlantic history in the early modern era. Readings and research papers explore the interactions of peoples from Europe, Africa, and the Americas, including the exchange of ideas, peoples, commodities, and cultural practices.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7119 (3) Graduate Research Seminar in Asian History

Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials.

Requisites: Restricted to graduate students only.

Recommended: Requisite background in Asian history.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 7153 (3) Seminar: English History, 800--1688

Requisites: Restricted to graduate students only.

Recommended: Requisite background in English or European history.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 7155 (3) Seminar: Early American History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7156 (3) Seminar: American Diplomatic History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7252 (3) Seminar: Early Modern Europe, 16th to 18th Centuries

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7257 (3) Seminar: History of the American Frontier

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 7326 (3) Seminar: U.S. Intellectual History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7415 (3) Graduate Seminar in Modern United States History

Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7424 (3) Research Methods in Medieval/Early Modern European History

Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 7485 (3) Seminar: United States History, 1948-Present

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7556 (3) Seminar: American Society and Thought

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7581 (3) Latin Paleography

Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts.

Requisites: Restricted to graduate students only.

Recommended: Requisite reading knowledge of Latin.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 7800 (3) Research Seminar in Global History

Discusses various topics, themes and methods which inform the field of Global History. Readings and research papers will explore transnational and global historical interactions, including the exchange of ideas, peoples, commodities, and cultural practices. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to History (HIST) graduate students only.

HIST 7840 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7841 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 7842 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7843 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 7844 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 7845 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7846 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7847 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 7848 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 7849 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Methodological, Comparative, and Global

History - Master of Arts (MA)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular

geographical area of study as well as an ability to situate that area of study in a larger global context.

All MA students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should carefully read the Master's Degree Requirements (p. 989) section carefully. For more information, visit the department's Graduate Students webpage.

Requirements

Admission Requirements

For purposes of admission to the graduate program, the general Graduate Record Examination is required and a score in the 85th percentile or above on the verbal component is generally expected.

Prerequisites

As general preparation for graduate work in history, a broad liberal arts education, as well as a major in history, are desirable, though not specifically required. Candidates for graduate degrees may be required to pursue such fundamental courses in history as the department deems necessary to provide a suitable historical background.

Degree Requirements

The following are special departmental requirements. For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

Most MA coursework will be at the 5000, 6000 and 7000 levels. With the approval of a student's academic advisor and the endorsement of the department's director of graduate studies, a maximum of 6 credit hours of upper-division (4000-level) undergraduate history coursework may be counted toward the MA degree. All courses completed at CU Boulder must be taken in the Department of History, except for courses recommended by the advisor and approved by the director of graduate studies.

All MA students must complete the following:

Code	Title	Credit Hours
Required Courses		
HIST 5000	Historical Methods: Introduction to the Professional Study of History	3
A two-semester regional/national field colloquium sequence.		6
HIST 5106	Graduate Colloquium in United States History ("To 1865" and "Since 1865")	
HIST 5012	Graduate Colloquium in European History ("To 1789" and "Since 1789")	

HIST 5129	Colloquium in Modern Asian History ("South Asia" and "East Asia")
-----------	---

Degree Plans

Plan I: Thesis Option

Thesis-track MA students must complete a total of 24 credit hours of coursework, plus 6 credit hours of MA thesis credit (HIST 6950). Of those, a minimum of 12 credit hours must come in each of a student's two fields, regional/national and global/thematic. A thesis must be successfully defended before a faculty committee as the final requirement for the degree.

Plan II: Non-Thesis Option

Non-thesis track MA students must complete 30 credit hours of coursework, including a minimum of three hours of 7000-level research seminar. Students must complete 12 credit hours in each of their two fields (regional/national and global/thematic). A final examination must be passed in the field of study before the degree is granted.

Language Requirement

For students working in fields of history that require the use of foreign languages, their advisory committees may require a demonstration of language proficiency.

History - Doctor of Philosophy (PhD)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All PhD students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should read the Doctoral Degree Requirements (p. 990) section carefully. For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

Requirements

Admission

For purposes of admission to the graduate program, the general Graduate Record Examination is required and a score in the 85th percentile or above on the verbal component is generally expected.

Prerequisites

Students who wish to work toward the PhD degree in history must indicate knowledge of certain fields of history, acquaintance with the fundamental tools of historical scholarship and the ability to do original work. The PhD program does not require the completion of a master's degree, but directly admits those qualified applicants who hold an undergraduate history degree or who have completed appropriate undergraduate history preparation and who have been recommended by the graduate admissions committee.

Residence

At least three years of graduate study, two of which must be spent in residence, are required for the PhD degree.

Degree Requirements

A total of 45 post-baccalaureate credit hours, at least 36 of which must be taken at this university, and a dissertation are required for the degree. A minimum of one foreign language is required; however, students must be able to use those languages essential to research and advanced study in their respective fields. In addition, as required by the Graduate School, those students pursuing a PhD should complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement.

After completion of the coursework requirements, each candidate for the PhD degree must assemble and defend a PhD portfolio before proceeding to the dissertation stage of the program. The dissertation must be an original contribution to the discipline. An oral defense of the dissertation must be successfully completed in order for the degree to be conferred.

Integrative Physiology

The Department of Integrative Physiology offers a variety of graduate study opportunities that range from a coursework-only option to a research-intensive option. To facilitate maximal flexibility in the design of a student's program, the Department has established a minimum number of required courses that must be completed by all graduate students and the remainder of the program can be individualized to meet the long-term goals of the student.

A graduate degree in integrative physiology provides opportunities for careers in academia, industry, and the health professions. The placement list of PhD and MS graduates (<https://www.colorado.edu/iphy/graduate/placement-recent-phd-and-ms-graduates/>) indicates some of the jobs and educational programs that our graduate students have found after completion of the PhD or MS degree.

Course code for this program is IPHY.

Master's Degree

- Integrative Physiology - Master of Science (MS) (p. 1180)

Doctoral Degree

- Integrative Physiology - Doctor of Philosophy (PhD) (p. 1181)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; PhD, Ludwig-Maximilians-Universität München (Germany)

Wright, Kenneth P. (https://experts.colorado.edu/display/fisid_125586/)
Professor; PhD, Bowling Green State University

Courses

IPHY 5010 (1) Graduate Student Research Forum

Special topics spanning the broad scope of integrative physiology are covered in a seminar-style format. Presentations by current IPHY faculty are augmented by graduate student presentations of thesis and dissertation work.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5100 (2) Colloquium in Integrative Physiology

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5102 (2) Introduction to Physiology Genomics

Covers recent developments in genomics: a body of revolutionary new approaches that deal with the analysis of all the DNA sequence in the cell. Relies on a genomics text and student presentation/discussion aided by a study guide.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200.

IPHY 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and PSYC 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5262 (3) Application of Bioinformatics and Genomics

Explore public websites, databases, and bioinformatic tools that can be used for analysis of genomic data. These include NCBI Resources, genome databases, gene expression databases, tools for nucleotide and algorithms analyses and protein databases. Students develop a mini-grant proposal that is required to incorporate use of some of the tools covered.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200 and IPHY 5102.

IPHY 5300 (3) Statistical Genetics for Complex Traits

Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4440

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5550 (3) Exercise Biochemistry

Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise including carbohydrate, fat, and protein metabolism. The interaction of key biochemical alterations as it relates to disease (diabetes, obesity, and aging) and exercise will be addressed.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650 and one year of general chemistry (lecture + lab).

IPHY 5580 (3) Sleep Physiology

Describes the physiology, neurobiology, physiology and functions neurobiology of sleep and circadian rhythms; explains the impact of sleep, sleep deprivation, and circadian rhythms, as well as sleep and circadian disruptions and disorders on immune, endocrine, thermoregulatory, cardiovascular, respiratory, and neural systems; systems, as well as examines changes in sleep and circadian rhythms across the the life span. The integrative nature of sleep and circadian rhythms in normal physiological and cognitive functions and their importance in health and disease processes will be emphasized. Department enforced prerequisite: statistics equivalent.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4580

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5600 (3) Immunology

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4600

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisites one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3470.

IPHY 5720 (4) Neurophysiology

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4720

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Grading Basis: Letter Grade

IPHY 5730 (3) Integrative Motor Control

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4730

Recommended: Prerequisites IPHY 3410 and IPHY 3470.

IPHY 5740 (3) Theory of Motor Skill Learning

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4740

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5780 (3) Sleep, Circadian Rhythms, and Health

Examines the history of the fields of sleep and circadian rhythms; lifespan development of sleep and rhythms; observational, physiological, and clinical measures of sleep; screening for sleep and circadian disorders; associations between poor sleep and circadian misalignment and health; and evidenced-based sleep and circadian interventions/preventions in healthy and clinical samples. Dept. enforced requisite: one year of biology (lecture and lab); statistics course.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4780

IPHY 5800 (4) Advanced Statistics and Research Methods in Integrative Physiology

Introduces advanced statistical techniques important for analyzing data rising in biomedical research, including physiology. Statistical reasoning will be emphasized through problem solving and applications using statistical software packages.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 2800.

IPHY 5840 (1-6) Graduate Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5880 (3) Advanced Data Analysis in Biomedical Research

Provides advanced training on statistics and scientific reasoning in laboratory and clinical research. Conceptual foundations of classical and modern statistical techniques is reviewed. Multiple class projects consist of written reports on statistical analysis of data representative of the student's field of interest. The use of statistical packages, primarily R, is required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4880

Requisites: Requires prerequisite course of IPHY 5800 (minimum grade B).

Grading Basis: Letter Grade

IPHY 5900 (3) Data Literacy in Biomedical Research

Provides a platform to develop a deeper understanding of quantitative biomedical research, current trends, challenges, and limitations. The course complements graduate statistical training by introducing topics relevant to open science and data literacy, including reproducibility, data privacy challenges, and the importance of good data management. Challenges in advanced statistical data evaluation and analysis in biomedical research settings will be discussed.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 5800.

Grading Basis: Letter Grade

IPHY 6010 (1-3) Seminar

Presents special topics in integrative physiology.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6650 (3) Cellular Cardiovascular Physiology

Focuses on the cellular control of cardiac and smooth muscle contraction, at rest and in response to acute and chronic exercise. Addresses certain pathophysiological and physiological adaptive mechanisms.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650.

IPHY 6660 (3) Locomotion Energetics and Biomechanics

Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisites IPHY 4540 and IPHY 4650.

IPHY 6670 (2) Hypothesis Testing in Locomotion Biomechanics

Focuses on the scientific process including formulating and testing hypotheses in studies of locomotion. Students analyze primary articles to determine whether the studies tested hypotheses and to generate new hypotheses that logically follow from previous studies.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 6680 (3) Matlab for Physiological and Biomechanical Research

Introduces Matlab programming skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6830 (3) Professional Skills for the Research Scientist

Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring and other professional skills.

Requisites: Restricted to Integrative Physiology (IPHY) doctoral students only.

IPHY 6840 (1-3) Research Project

Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6940 (1) Master's Candidate for Degree

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Grading Basis: Pass/Fail

IPHY 6950 (1-6) Master's Thesis

Must have 4 credit hours and may be repeated up to 6 total credits.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to Integrative Physiology (IPHY) doctoral students only.

Integrative Physiology - Master of Science (MS)

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. A graduate degree in integrative physiology provides opportunities for careers in academia, industry and the health professions.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Integrative Physiology - Bachelor of Arts (BA) (p. 402)

Requirements

Admission Requirements

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in integrative physiology at the University of Colorado or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human anatomy lecture, as well as human physiology lecture and lab courses.

Deficiencies

If the undergraduate preparation of a prospective graduate student is not adequate, the student may be allowed to pursue graduate study with the understanding that identified deficiencies will be completed. The graduate admissions committee will determine the nature and extent of these deficiencies.

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy at least one deficiency per semester until all deficiencies are satisfied. Graduate courses taken before removing deficiencies may be accepted for graduate degree credit only if prior approval of the graduate coordinator has been granted.

Course Requirements

Master's candidates entering the graduate program must complete 30 credits to graduate. They may select one of three options:

- Coursework only plan: 30 required credits to graduate
- Research project plan: 3 research project hours as part of the 30 required credits to graduate
- Thesis plan: 4 to 6 thesis hours as part of the 30 required credits to graduate

It is possible, however, to change from one option to another during the program of study.

Students must have a minimum cumulative grade point average of 3.0 in all graduate work taken, and must perform satisfactorily on the comprehensive exam.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
IPHY 5100	Colloquium in Integrative Physiology	2
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	4
Degree Plan Option		
Select the coursework-only (0 credits), research project (3 credits) or thesis (4-6 credits) option.		0-6
IPHY 6840	Research Project	
IPHY 6950	Master's Thesis	
Electives		
Elective coursework to fulfill the 30-credit minimum.		18-24
Total Credit Hours		30

Candidacy for Degree

Within the first semester of study, the student and mentor must prepare a program of study for the student. This program of study may be changed during the residence of the student with the approval of the mentor. It is the student's responsibility to transfer the program of study to the Application for Admission to Candidacy form required for graduation. The Application to Candidacy is due no later than ten weeks prior to defense of the thesis or research project. The original Application to Candidacy form should be submitted to the program assistant for review and approval.

Comprehensive Examination

All candidates are required to complete an examination (oral or written) covering the thesis or research project as well as coursework leading to the degree.

Integrative Physiology - Doctor of Philosophy (PhD)

The objectives of the doctoral program are to:

- Provide an academic foundation for understanding how humans and other animals function at the level of genes, cells, tissues, organs and systems.
- Develop the professional skills required to become a research scientist.

Learning Outcomes

Instructions for Program Learning Outcomes:

As a part of regular program review and ongoing campus accreditation efforts, the campus will continue to move toward asking each unit to specify what knowledge and skills students will gain during the course of a degree program.

If your unit has already crafted and approved program learning outcomes, please include them on this Learning Outcomes tab. If not, this tab may be left blank and the tab will not appear in the final 2021-22 catalog for this program.

For more information about creating program learning outcomes, see Writing Effective Learning Outcomes (<https://www.colorado.edu/oda/assessment/conducting-assessment/writing-effective-learning-outcomes/>) and contact the ODA Assessment (<https://www.colorado.edu/oda/assessment/>) group.

Jewish Studies

The Program in Jewish Studies, which is open to all students of all backgrounds, Jewish and non-Jewish, explores Jewish culture, history, religion, society, and thought from a broad, interdisciplinary perspective, training graduate students for diverse career paths.

With a faculty of engaged scholars and teachers working in fields across the humanities, arts, and social sciences, the Program supports the research, teaching, and professional development of graduate students pursuing a master's or doctoral degree in a diverse and growing array of departments, including history, religious studies, English, Germanic and Slavic languages and literature, linguistics, art and art history, and critical media practices. Students receive intensive mentoring through the graduate colloquium, and/or to complete a graduate certificate.

Course code for this program is JWST.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Boyd, Samuel L. (https://experts.colorado.edu/display/fisid_155484/)
Assistant Professor; PhD, University of Chicago

Goodman, Nan (https://experts.colorado.edu/display/fisid_100633/)
Professor; PhD, Harvard University

Kalisman, Hilary Falb (https://experts.colorado.edu/display/fisid_164096/)
Endowed/Named Professor; PhD, University of California, Berkeley

Malin, Jonathan (https://experts.colorado.edu/display/fisid_151714/)
Associate Professor; PhD, University of Chicago

Mehta, Samira (https://experts.colorado.edu/display/fisid_165972/)
Assistant Professor; PhD, Emory University; MDiv, Harvard University

Rivlin, Eyal Ofer (https://experts.colorado.edu/display/fisid_151100/)
Senior Instructor; MA, Naropa Institute

Sacks, Elias R. (https://experts.colorado.edu/display/fisid_151425/)
Director, Associate Professor; PhD, Princeton University

Wartell, Rebecca (https://experts.colorado.edu/display/fisid_164288/)
Instructor; PhD, Monash University (Australia)

Weber, Beverly Marie (https://experts.colorado.edu/display/fisid_144523/)
Associate Professor; PhD, University of Massachusetts at Amherst

Certificate

- Jewish Studies - Graduate Certificate (p. 1182)

Courses

JWST 5200 (3) Religion and Reproductive Politics in the United States
Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4200, JWST 4200, WGST 5200

JWST 5348 (3) Graduate Topics in Jewish History
Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

JWST 5800 (3) Ethics, Medicine and the Holocaust: Legacies in Health and Society
Engages the disturbing fact that German health care professionals actively participated in the architecture and machinery of the Third Reich; explores the implications of these facts for contemporary health care ethics; expands beyond the Holocaust to consider the ramifications for our understanding of the problem of evil in general.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4800
Grading Basis: Letter Grade

JWST 5900 (1-6) Graduate Independent Study in Jewish Studies
Working with a faculty member in Jewish Studies on an independent study research project provides graduate students with an opportunity to learn outside the formal classroom structure with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term).
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

Jewish Studies - Graduate Certificate

This certificate program allows graduate students across campus who are interested in Jewish studies to explore Jewish culture, history, society, and thought in a number of disciplines. Jewish studies also provides intensive mentoring of graduate research and writing projects through the Jewish Studies Graduate Student Colloquium.

Requirements

Admission Requirements

This graduate certificate is open to all currently matriculated graduate students. Students may apply for the graduate certificate at any point in their graduate career at CU. For more information, view the Jewish Studies website (<https://www.colorado.edu/jewishstudies/certificate/>).

Course Requirements

Successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from Jewish Studies' list of approved graduate courses, issued every semester, which comprises graduate courses crosslisted in the Program in Jewish Studies as well as approved courses taught by faculty in the Program in Jewish Studies. If you think a course is missing from this list, please contact the Director of Graduate Studies.

Students may petition the graduate studies committee to have a maximum of one graduate level course (including independent study courses) from outside this list, if that course contains significant Jewish Studies content and the student's completed work for that course is related to Jewish Studies.

Code	Title	Credit Hours
Approved Courses		
JWST 5200	Religion and Reproductive Politics in the United States	3
JWST 5348	Graduate Topics in Jewish History (Modern Childhood in Israel/Palestine)	3
JWST 5800	Ethics, Medicine and the Holocaust: Legacies in Health and Society	3
JWST 5900	Graduate Independent Study in Jewish Studies	1-6
ENGL 5109	Literature and Culture of the United States (Jewish American Literature)	3
GRMN 5410	Seminar: Topics in Early 20th Century German Society (Ruins of Modernity)	3
GRMN 5520	Seminar: Current Issues in German Literature and Media (Depending on Semester Syllabus)	3
HIST 5544	History of Yiddish Culture	3

HIST 6012	Readings in Modern European History (depending on the semester syllabus)	3
HIST 6800	Readings in Global History (Global History of Genocide - depending on the semester syllabus)	3
HIST 6800	Readings in Global History (Microhistory - depending on the semester syllabus)	3
RLST 5170	God and Politics	3
RLST 5180	Is God Dead?	3
RLST 5190	Love and Desire	3
RLST 5260	Topics in Judaism	3
RLST 5820	Interdisciplinary Seminar on Religion (Mediterranean Religious Society)	3
RLST 5820	Interdisciplinary Seminar on Religion (Medieval Spain: Religion, Culture and Ethnicity)	3
RUSS 5401	The Russian Jewish Experience	3

Colloquium

The certificate requires two semesters of participation in the Program in Jewish Studies Graduate Student Colloquium, which meets three times per semester. Participation will be defined as attendance at two colloquium sessions in a given semester and presentation of a work in progress during that semester.

Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible for us to construe another person's ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

Purpose of the MA Program

The goal of the MA program in linguistics is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career and prepares students who decide to do so to apply to the PhD program at CU or at other institutions.

The main component of the MA program is 30 credits of coursework (at least 24 of them in linguistics). Students may also choose to write an MA thesis. Students on both the thesis plan and non-thesis plan must take and pass the comprehensive exam in the fourth semester of study in order to receive the MA degree. By meeting additional requirements, MA students may also obtain the MA with a certificate in cognitive science, human language technology, teaching English to speakers of other languages (TESOL), or culture, language and social practice (CLASP).

Purpose of the MS Program

The program is intended to provide students with a solid background in both theoretical linguistics and computer science. Graduates of the program will be specialists in the application of computers to the processing of natural languages, such as English, Chinese, Arabic and Urdu. The field of computational linguistics, also known as text analytics, natural language processing and informatics, is burgeoning and has become critical to the success of mainstream global businesses who compete for employees qualified to address these needs. The interdisciplinary nature of CLASIC is a significant market strength, because success in this developing field of natural language processing requires a strong background in both linguistics and computer science. The training will prepare students for careers in predictive text messaging, search engines, question-answering, interactive virtual agents and machine translation.

CLASIC students will complete a two-year degree (32 credits of approved graduate study in linguistics and computer science), including a 2-credit capstone project that will run in conjunction with an internship or CU based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. For more information, visit the department's Computational Linguistics (CLASIC) MS (<https://www.colorado.edu/linguistics/current-students/graduates/computational-linguistics-clasic-ms/>) webpage.

Purpose of the PhD Program

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations. We encourage doctoral students to begin engaging in research projects early, as these will contribute to developing the research program that will lead to the thesis project. Early projects not only lead to preliminary exam topics and/or publishable papers, but also enable students to pilot methods that will be usable for the dissertation project. Early projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Doctoral students complete a core of required courses that provide a firm foundation in linguistic theory and methods. These courses are supplemented by advanced courses and individual work related to an area of specialization in a field where this department offers research strengths (e.g., description of Native American and Chadic (Central African) languages, sociolinguistics, interaction and grammar, computational linguistics, psycholinguistics, first-language acquisition, phonetics, phonology, functionally-oriented syntax). Doctoral students may complete the CLASP or human language technology certificates. Additionally, students may apply to pursue a joint PhD in linguistics and cognitive science.

Course codes for this program are LING and ESLG.

Master's Degrees

- Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS) (p. 1519)
- Linguistics - Master of Arts (MA) (p. 1188)

Doctoral Degree

- Linguistics - Doctor of Philosophy (PhD) (p. 1187)

Certificates

- Cognitive Science - Graduate Certificate (p. 1189)
- Culture, Language and Social Practice - Graduate Certificate (p. 1190)
- Human Language Technology - Graduate Certificate (p. 1191)
- Teaching English to Speakers of Other Languages (TESOL) - Graduate Certificate (p. 1192)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bell, Alan
Professor Emeritus

Brown, Susan Windisch
Assistant Professor Adjunct; PhD, University of Colorado Boulder

Calder, Jeremy (https://experts.colorado.edu/display/fisid_159936/)
Assistant Professor; PhD, Stanford University

Cowell, James Andrew (https://experts.colorado.edu/display/fisid_107090/)
Professor; PhD, University of California, Berkeley

Farrelly, Raichle (https://experts.colorado.edu/display/fisid_166033/)
Senior Instructor; PhD, University of Utah

Fox, Barbara (https://experts.colorado.edu/display/fisid_106066/)
Professor; PhD, University of California, Los Angeles

Frajzyngier, Zygmunt (https://experts.colorado.edu/display/fisid_104000/)
Professor; PhD, University of Warsaw (Poland)

Hall, Kira (https://experts.colorado.edu/display/fisid_123111/)
Professor, Associate Chair; PhD, University of California, Berkeley

Haynie, Hannah (https://experts.colorado.edu/display/fisid_166099/)
Assistant Professor; PhD, University of California, Berkeley

Hodges, Adam
Assistant Professor Adjunct; PhD, University of Colorado

Hulden, Mans (https://experts.colorado.edu/display/fisid_154602/)
Associate Professor; PhD, University of Arizona

Menn, Lise
Professor Emerita

Michaelis-Cummings, Laura A. (https://experts.colorado.edu/display/fisid_105599/)
Professor, Chair; PhD, University of California, Berkeley

Narasimhan, Bhuvaneswari (https://experts.colorado.edu/display/fisid_144863/)
Associate Professor; PhD, Boston University

Palmer, Alexis
Assistant Professor; PhD, University of Texas at Austin

Palmer, Martha (https://experts.colorado.edu/display/fisid_138162/)
Professor; PhD, University of Edinburgh (Scotland)

Raymond, Chase Wesley (https://experts.colorado.edu/display/fisid_158278/)
Associate Professor; PhD, University of California, Los Angeles

Rood, David
Professor Emeritus

Scarborough, Rebecca (https://experts.colorado.edu/display/fisid_143741/)
Associate Professor, Associate Chair; PhD, University of California, Los Angeles

Shay, Erin J. (https://experts.colorado.edu/display/fisid_110594/)
Assistant Professor Adjunct; PhD, University of Colorado

Stenzel, Kristine
Professor Adjunct; PhD, University of Colorado

Taylor, Allan R.
Professor Emeritus

Thomas-Ruzic, Maria L.
Senior Instructor Emerita

Courses

LING 5030 (3) Linguistic Phonetics

Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.

Requisites: Restricted to graduate students only.

LING 5140 (2) CLASIC Capstone

In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master's program, we will review each student's internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.

Requisites: Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.

Recommended: It is recommended that this course be taken after the CLASIC internship has been completed.

LING 5200 (3) Introduction to Computational Corpus Linguistics

Covers computer methods for doing linguistics with on-line corpora. Includes extensive introduction (with lab) to the Python programming language, UNIX corpus tools, concordance programs, syntactic treebanks, propbanks, and corpora for discourse and phonology research.

Equivalent - Duplicate Degree Credit Not Granted: LING 4200

Requisites: Restricted to graduate students only.

LING 5300 (3) Research in Psycholinguistics

After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production and theories of brain specialization for language, are explored.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one graduate-level course in LING, PSYC or CSCI.

LING 5410 (3) Phonology

Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5030.

LING 5420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4420

Requisites: Restricted to graduate students only.

LING 5430 (3) Semantics and Pragmatics

Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5420.

LING 5570 (3) Introduction to Diachronic Linguistics

Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 5610 (3) Pedagogical Grammar for Teachers of English to Speakers of Other Languages

Provides an introduction to the study of English grammar from the perspective of the nonnative learner and user of English. The focus is on understanding the form, meaning, and use of grammatical constructions and on how to teach these constructions in an ESL/EFL context.

Equivalent - Duplicate Degree Credit Not Granted: LING 4610

Requisites: Restricted to graduate students only.

LING 5620 (3) Teaching Second Language (L2) Oral Skills and Communication

Provides teaching and learning principles and practices for developing nonnative speakers' oral English proficiency and intercultural communication skills. Examines the sound system of American English (including prosody), listening and pronunciation, lexical considerations, and discourse functions and grammar, and how these contribute to speaking fluency, accuracy and communicative effectiveness. Focuses on teaching applications and includes one-on-one sessions with English learners.

Equivalent - Duplicate Degree Credit Not Granted: LING 4620

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 3100 or LING 5030 and LING 5410.

Grading Basis: Letter Grade

LING 5622 (3) Statistical Analysis for Linguistics

Aims to acquaint students with the fundamentals of quantitative analysis in linguistics and provide a practical introduction to the R statistical computing environment. Topics that will be covered include examining and manipulating data, tests for independence, regression modeling, mixed models, measures of association, and data visualization. It is suitable for students with no prior experience with statistics or statistical software packages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4622

LING 5630 (3) TESOL and Second Language Acquisition: Principles and Practices

Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5610 or LING 5620.

Grading Basis: Letter Grade

LING 5700 (3) Conversation Analysis and Interactional Linguistics

Provides an introduction to the theories and methods of Conversation Analysis (CA) and Interactional Linguistics (IL), which aim to uncover the procedural infrastructure of language use in social interaction.

The course emphasizes hands-on experience in analyzing naturally-occurring interactional data. Topics may include: turn-taking, sequence and preference organization, repair, reference, epistemics, and identity.

Grading Basis: Letter Grade

LING 5800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

LING 5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5832

Requisites: Restricted to graduate students only.

LING 5900 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 5910 (1-3) TESOL Practicum

Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process.

Equivalent - Duplicate Degree Credit Not Granted: LING 4910

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of LING 4630 or LING 5630 (minimum grade C). Restricted to graduate students only.

Recommended: Prerequisite LING 4610 or LING 5610.

LING 6200 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

LING 6300 (3) Topics in Language Use

Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.

Requisites: Restricted to graduate students only.

LING 6310 (3) Sociolinguistic Analysis

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.

Requisites: Restricted to graduate students only.

LING 6320 (3) Linguistic Anthropology

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6320

Requisites: Restricted to graduate students only.

LING 6450 (3) Syntactic Analysis

Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs.

Requisites: Restricted to graduate students only.

LING 6500 (3) Issues in Indigenous Languages

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6500

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

LING 6510 (3) Language Structures

Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 6520 (3) Topics in Comparative Linguistics

Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 6560 (3) Language Acquisition

Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5430.

LING 6632 (3) Machine Learning and Linguistics

Is an introduction to machine learning, with a focus on linguistic applications. It is oriented toward students who want to understand the basics of machine learning and apply well-known techniques to address problems related to language and linguistics. The main goal is to achieve a practical grasp of the fundamental and most successful concepts in machine learning and to be equipped with techniques to apply this knowledge in linguistic domains. The course is also intended to provide a perspective on natural language acquisition and learning; namely, insight into what types of language acquisition problems are truly difficult, and what types of learning problems can be solved by fairly straightforward pattern recognition techniques.

LING 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course

This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6861

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

LING 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

LING 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

LING 7030 (3) Phonetic Theory and Analysis

Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5030 and LING 5410.

LING 7100 (3) Field Methods 1

Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 7350 (3) Language and Gender in Cultural Perspective

Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.

Requisites: Restricted to graduate students only.

LING 7410 (3) Phonological Theory

Phonetic and morphophonological representations: distinctive features, segments, prosodic structures, morphological structures. Phonological processes and their interaction. Naturalness conditions.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Department enforced prerequisites: CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

LING 7420 (3) Syntactic Theory

Covers various topics in syntactic theory.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5420.

LING 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506.

LING 7430 (3) Semantic Theory

Current developments in the theory of linguistic semantics. Topics include truth-conditional theories, generative linguistic theories, semantic theories of communicative competence and integration of these theories in development of a combined theory of semantics and pragmatics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5430.

LING 7565 (3) Computational Phonology and Morphology

Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 7570 (3) Advanced Diachronic Linguistics

Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items and its relation to theories of grammar and of language variation.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

LING 7800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 7900 (1-5) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Linguistics - Doctor of Philosophy (PhD)

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations.

We encourage doctoral students to begin engaging in research projects early, as this engagement contributes to the development of the research program that will lead to the thesis project. Early projects may also lead to preliminary exam topics and/or publishable papers, and importantly, they may enable students to pilot the methods they'll use for the dissertation project. Projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Students should select a specialization and begin their own research as early as possible. The department offers specializations in:

- sociolinguistics
- phonetics
- semantics
- syntax
- morphology
- laboratory phonology
- conversation analysis
- historical linguistics
- typological comparison
- Amerindian linguistics
- African linguistics
- linguistic anthropology
- psycholinguistics
- corpus linguistics
- language development
- cognitive linguistics
- computational modeling of language knowledge

Students wishing to pursue graduate work in linguistics should carefully read the Doctoral Degree Requirements (p. 990) section of this catalog and the detailed degree requirements available from the department office.

Requirements

Admission Requirements

Applicants should hold a recognized baccalaureate degree. They should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level. GRE scores are required from United States residents; scores are also required from native speakers of English who wish to be considered for fellowship aid. TOEFL scores are normally required from foreign applicants.

To be admitted to the PhD program, students must have completed coursework equivalent to:

Code	Title	Credit Hours
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3

Students who do not have this preparation may be admitted to the MA program. They may apply for admission to the PhD program when these requirements are close to completion. Students may be admitted to the PhD program before finishing the MA.

Degree Requirements

Thirty credit hours of coursework are normally required for the PhD. Four linguistics courses are required at the 6000 level or above, and the remaining six courses may include up to four courses in other departments appropriate to the specialization.

Code	Title	Credit Hours
Required Courses		
Both of the following courses must be taken:		
LING 6450	Syntactic Analysis	3
LING 7100	Field Methods 1	3
Select two of the following linguistics courses:		6
LING 7030	Phonetic Theory and Analysis	
LING 7410	Phonological Theory	
LING 7420	Syntactic Theory	
LING 7430	Semantic Theory	
LING 7570	Advanced Diachronic Linguistics (Electives)	
Electives		
Select six courses appropriate to the specialization, up to four of which can be from other departments.		18
Total Credit Hours		30

Language Requirement

All PhD students must demonstrate the ability to read linguistic literature in a language other than English.

Preliminary Examination

As a PhD preliminary examination, students submit a data-based research paper early in the second year in the PhD program.

Comprehensive Examination

The university comprehensive examination requirement is completed in two steps: the completion of a synthesis paper followed by the defense of a dissertation prospectus.

Doctoral Thesis Credits

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. These are distinct from the 30 credit hours of coursework that are required for the PhD. A student may not register for more than 10 dissertation credit hours in any one semester. A minimum of 5 credits must be taken each semester following passing of the comprehensive exam.

Linguistics - Master of Arts (MA)

The goal of this master's program is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career, and prepares students who decide to do so to apply to the PhD program at CU (p. 1187) or at other institutions.

Students wishing to pursue graduate work in linguistics should carefully read the master's degree requirements (p. 989) section of this catalog, as well as the detailed degree requirements available on the departmental website (<https://www.colorado.edu/linguistics/current-students/graduates/masters-program/>).

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Linguistics - Bachelor of Arts (BA) (p. 437)

Requirements

Admission Requirements

Applicants should hold a recognized baccalaureate degree, and should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level.

GRE scores are required from United States residents; scores are also required from native speakers of English who wish to be considered for fellowship aid. TOEFL scores are normally required from foreign applicants.

Degree Requirements

The master's degree calls for a minimum of three semesters of study, though most students require four semesters. Courses are normally taken at the 5000 level or above.

All students must pass a comprehensive written examination covering general topics in linguistics.

Degree Plans

Plan I: Thesis Option

Students in this plan must complete a total of 30 credit hours, at least 24 of which must be in linguistics, including 4–6 thesis credit hours.

Code	Title	Credit Hours
Required Courses		
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3
Electives		
Additional courses to fulfill the 30-credit minimum.		9-11
Thesis		
LING 6950	Master's Thesis	4-6
Total Credit Hours		30

Plan II: Non-Thesis

Students in this plan must complete a total of 30 credit hours of coursework, at least 24 of which must be in linguistics.

Code	Title	Credit Hours
Required Courses		
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3
Electives		
Additional courses to fulfill the 30-credit minimum.		15
Total Credit Hours		30

Cognitive Science - Graduate Certificate

Tailored to the individual student's area of interest, the cognitive science curriculum for this certificate is designed to provide broad as well as in-depth training in the cognitive sciences.

Graduate students in good standing in one of the following participating academic units may apply to earn a graduate certificate in cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a certificate can significantly enhance a student's academic knowledge and career choices.

To learn more about the certificate, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/>).

Requirements

The graduate certificate consists of course requirements only.

Code	Title	Credit Hours
Required Courses		
PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310	Issues and Methods in Cognitive Science	3

PSYC/LING Topics in Cognitive Science (2
7775/CSCI 7772/ semesters, 1 credit per semester)
EDUC 7775/SLHS
7775/PHIL 7810

Electives

Three cognitive science courses of 2 credit hours or more 6
One interdisciplinary course 2-3

Additional courses to complete the credit-hour requirement from at least two different departments outside of the student's home department

To learn more about the program, visit the department's Cognitive Science Graduate Certificate (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/>) webpage.

Culture, Language and Social Practice - Graduate Certificate

CU Boulder is home to the Graduate Certificate in Culture, Language and Social practice (CLASP). This program provides an interdisciplinary forum on language and society for CU students and faculty. This is facilitated through regular colloquia on the subject of language and society, as well as the diverse course offerings in the CLASP graduate certificate program.

The CLASP program brings cohesion to empirical and theoretical research currently conducted on campus in varied analytic traditions that focus on the study of culture, language and social practice. These traditions include sociolinguistics, linguistic anthropology, literacy, bilingualism, second language acquisition, language endangerment and revitalization, narrative studies, symbolic interactionism, language variation and change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

The program currently has over twenty affiliated faculty members from a variety of schools and departments, among them anthropology, communication, education, French and Italian, German and Slavic, linguistics, political science, Spanish and Portuguese, sociology and speech, language and hearing science.

For more information on the application process and program requirements, visit the CLASP Culture, Language & Social Practice (<http://www.colorado.edu/clasp/>) website.

Requirements

Twelve credit hours of graduate-level coursework are required for the graduate certificate in culture, language and social practice. Three credit hours must come from the list of approved core courses (Group A); six credit hours must come from the list of elective courses (Group B); and the three remaining credit hours must come from a course in either social theory or research methods (Group C), subject to approval by the CLASP curriculum committee. The course chosen to fulfill the Group C requirement, while not necessarily language-related, should be a methodological or theoretical course that informs the student's research interests in the relationship between language and society. *At least one of the three selected courses from Lists A and B must be from **outside** the student's home department.*

2 A student may opt to substitute a CU Boulder MA thesis on the subject of culture, language and social practice for one of the Group B courses, if approved by the curriculum committee, which is constituted by the CLASP faculty advisor and CLASP director. An independent study may also be substituted for a formal course, if approved by the committee.

A number of new and unlisted seminars on the subject of language and society are taught within individual departments each year. Students should check with the CLASP program director each semester for a list of additional courses that fulfill the requirements. Students wanting to substitute an unapproved course for one of the courses listed below must receive approval from the CLASP curriculum committee.

The acquisition of a CLASP certificate is dependent on the successful completion of all courses in the academic curriculum with a grade of B or higher.

Required Courses and Credits

Code	Title	Credit Hours
Group A: Core Courses		
Students will choose one core course from the list below.		3
ANTH/LING 6320	Linguistic Anthropology	
COMM 6410	Discourse Analysis	
COMM 6445	Intercultural Communication	
COMM 6460	Ethnography of Communication	
LING 6310	Sociolinguistic Analysis	
LING 6320	Linguistic Anthropology	
EDUC 5615	Second Language Acquisition	
EDUC 5635	Education and Sociolinguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
Group B: Elective Courses		
Students will choose two elective courses. Recently offered courses that fulfill this requirement include: ¹		6
ANTH 6320	Linguistic Anthropology	
COMM 5210	Readings in Communication Theory	
COMM 5435	Readings in Community and Social Interaction	
COMM 6410	Discourse Analysis	
COMM 6445	Intercultural Communication	
COMM 6460	Ethnography of Communication	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
EDUC 5615	Second Language Acquisition	
EDUC 5635	Education and Sociolinguistics	
EDUC 5465	Introduction to ESL/Bilingual and Special Education	
EDUC 5635	Education and Sociolinguistics	
EDUC 8615	Language Issues in Education Research	
LING 6310	Sociolinguistic Analysis	
LING 6320	Linguistic Anthropology	
LING 7350	Language and Gender in Cultural Perspective	
SPAN 5450	Introduction to Hispanic Linguistics	

Group C: Courses in Social Theory and Research Methods

Choose one course in either social theory or research methods that is appropriate for research goals, in consultation with their CLASP faculty advisor.² 3

Examples of social theory courses include:

ANTH 5530	Theoretical Foundations of Sociocultural Anthropology
ANTH 5605	Anthropology of Neuroscience
ANTH 5610	Medical Anthropology
ANTH 5730	Latin American Politics and Culture through Film and Text
ANTH 5745	Science, Technology and Society
ANTH 5755	Cultures of Expertise: Science, Power and Knowledge
ANTH 5780	Core Course-Cultural Anthropology
ANTH 5785	Advanced Seminar in Cultural Anthropology
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology
ANTH 7620	Seminar: Ethnography and Cultural Theory
COMM 6360	Social and Cultural Theory
EDUC 5075	Sociology in Education
EDUC 6325	Anthropology of Education
GEOG 6742	Seminar: Cultural Geography
HIST 6330	History of Sex and Sexuality
PSCI 7004	Seminar: Political Theory
SOCY 5201	Graduate Seminar in Sociological Theory
SOCY 6041	Cultural Sociology
SOCY 7006	Sociology of Sex and Gender
SOCY 7036	Feminist Theory
SOCY 7131	Seminar in Social Psychology
WGST 5000	Advanced Topics in Gender and Sexuality Studies
WGST 5001	Advanced Topics in Gender and Sexuality Studies (AH)
WGST 5002	Advanced Topics in Gender and Sexuality Studies (SS)
WGST 5400	Critical Inquiries in Transgender Studies
WGST 6090	Feminist Theories
WGST 6290	Special Topics in Gender and Sexuality Studies
WGST 6796	Queer Theories

Examples of seminars in methods include:

ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology
ANTH 7300	Seminar: Research Methods in Cultural Anthropology
COMM 6030	Qualitative Research Methods
COMM 6455	Community-based Research Methods
EDUC 7346	Ethnographic Methods in Educational Research
EDUC 8250	Qualitative Methods I
EDUC 8260	Qualitative Methods II

SOCY 5111	Data 1: Introduction to Social Statistics	
SOCY 6111	Data 2: Data Analysis	
SOCY 6121	Qualitative Methods	
SOCY 7026	Feminist Research Methods	
SOCY 7121	Qualitative Analysis	
WGST 6190	Feminist Methodology	
Total Credit Hours		12

¹ The courses listed in this category have been offered at CU Boulder in the recent past. They are not necessarily offered on a regular basis, and they often have rotating faculty members and are subject to change. Students may also substitute an approved independent study with a CLASP faculty member as one of the required electives.

² This is a working list of possible courses offered in these areas at CU Boulder, as listed in the catalog. Note that these are not CLASP-approved courses. Unlike the courses specified in Categories A and B, these courses are listed as suggestions only, to provide examples of the kinds of seminars that might be used to fulfill this requirement. Because many of these courses are taught by revolving faculty members who are not CLASP-affiliated, the course content is subject to change from semester to semester. In addition, some of these seminars have prerequisites or limit student enrollment on the basis of disciplinary background.

Human Language Technology - Graduate Certificate

The explosive growth of the web and the vast improvements in computing power in the last decade have led to a strong need for education and research in human language technology. Human language technology is an interdisciplinary field that includes the following key technological and scientific areas:

- Computer speech recognition and understanding
- Natural language understanding and generation
- Text-based information retrieval
- Web-based dialog agents

CU Boulder's interdisciplinary certificate in human language technology, offered jointly by the Institute of Cognitive Science; the Department of Computer Science; the Department of Linguistics; and the Department of Speech, Language and Hearing Sciences, provides a rich and broad background for students interested in computational tools for human language processing.

To learn more about the certificate, visit the Institute of Cognitive Science (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/>) website.

Required Courses and Credits

The curriculum for the certificate consists of *five* different courses, as shown in the course table below. Three of these five required courses must be taken at the graduate level.

Code	Title	Credit Hours
Programming		
One semester of programming required (waived for those with programming background).		

CSCI 1300	Computer Science 1: Starting Computing	4
Core Courses		
Choose three core courses from the list below; at least two must be outside the student's home department and college.		9
<i>Speech and Language Technologies</i>		
CSCI 5832	Natural Language Processing	
CSCI 6302	Speech Recognition and Synthesis	
<i>Human Communication</i>		
SLHS 2010	Science of Human Communication	
LING 5030	Linguistic Phonetics	
LING 5420	Morphology and Syntax	
LING 7800	Open Topics in Linguistics	
Optional Course		
Choose one from the optional course list (or two if programming was waived). Extra courses from the core list (beyond the required three) can also be counted as optional courses. ¹		3
Total Credit Hours		16

¹ For a full list of core and optional courses, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/>).

Teaching English to Speakers of Other Languages - Graduate Certificate

The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is a 14-15 credit post-baccalaureate program. It is designed for individuals who wish to gain, or continue to develop, the professional knowledge, skills and dispositions that qualify them to teach learners of English as an additional language in the U.S. and/or abroad. This graduate certificate prepares teacher candidates to teach young learners, adolescents and adults in a number of contexts, domestic and abroad, including community-based programs, private language institutes, intensive English programs and after school programs.

Coursework prepares students with foundational knowledge in the structure of the English language including the grammar, phonological systems and concepts related to sociopragmatics, semantics and morphology. Required linguistics (TESOL) courses prepare students to design activities and lesson plans that target specific learning objectives fostering the development of English language learners' macro- and micro-language skills (macro: listening, speaking, reading, writing; micro: fluency, pronunciation, vocabulary, comprehension). Field placements (praxis) allow for students to develop their identities as reflective practitioners as they make connections between theory and classroom practice.

Requirements

Admission Requirements

Students interested in the graduate certificate should complete the application form on the Department of Linguistics (<https://www.colorado.edu/linguistics/graduate-certificate-tesol/>) website. This is an in-house form that the department uses to admit and track students in the program. Interested post-baccalaureate degree and non-degree students students may contact the Academic Program Director

Dr. Rai Farrelly (Raichle.Farrelly@colorado.edu?subject=TESOL%20BA%20Certificate) with any questions. The Director will also advise students on their course plans and successful certificate completion.

Note: Non-matriculated students will need to enroll through Continuing Education (<https://ce.colorado.edu/>) (CE) to acquire a student ID and an Identikey, which provides access to course enrollment, a student email account, tuition bill and more. Learn more about enrollment options for graduate certificate programs at the Department of Linguistics (<https://www.colorado.edu/linguistics/graduate-certificate-tesol/>) website.

Required Courses and Credits

To earn the certificate, students must meet the following course requirements and receive a grade of B- or better in all certificate courses.

Code	Title	Credit Hours
Required Linguistics Courses with a TESOL Focus		
LING 5630	TESOL and Second Language Acquisition: Principles and Practices	3
LING 5610	Pedagogical Grammar for Teachers of English to Speakers of Other Languages	3
LING 5620	Teaching Second Language (L2) Oral Skills and Communication	3
Required Education Course		
EDUC 5615	Second Language Acquisition	3
Elective Course		
Choose one:		2-3
COMM 6445	Intercultural Communication	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5445	Curriculum for Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
LGTC 5010	Second Language Acquisition and Language Education (Summer, online) ¹	
LGTC 5031	Emerging Technology for Language Learning (Language Technology Tools in Practice - Fall, online) ¹	
LGTC 5031	Emerging Technology for Language Learning (Emerging Technology for Language Teaching - Spring, online) ¹	
LGTC 5035	Online and Blended Language Instruction (Fall, online) ¹	
LING 5910	TESOL Practicum	
Total Credit Hours		14-15

¹ LGTC courses are shorter, 2-credit courses taught online. Students pursuing the graduate certificate alongside the MA in Linguistics will be one credit short by taking an LGTC course as an elective.

Mathematics

PhD Program

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and

foundations, number theory, probability and stochastic processes and topology. For more information, see the Department of Mathematics (<https://www.colorado.edu/math/>) website.

MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the bachelor's-accelerated master's (p.) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Course code for this program is MATH.

Master's Degree

- Mathematics - Master of Arts (MA) (p. 1198)

Doctoral Degree

- Mathematics - Doctor of Philosophy (PhD) (p. 1199)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MATH 5000 (3) Foundations of Mathematics

Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation. Department enforced prerequisites: MATH 2130 and MATH 3140.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4000

Requisites: Restricted to graduate students only.

MATH 5001 (3) Analysis 2

Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).

Equivalent - Duplicate Degree Credit Not Granted: MATH 4001

Requisites: Restricted to graduate students only.

MATH 5030 (3) Intermediate Mathematical Physics 1

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5030

Requisites: Restricted to graduate students only.

MATH 5040 (3) Intermediate Mathematical Physics 2

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory and Fourier analysis. Department enforced prerequisite: MATH 5030.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5040

Requisites: Restricted to graduate students only.

MATH 5120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4120 and MATH 4120 and APPM 5120

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

MATH 5140 (3) Abstract Algebra 2

Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra. Department enforced prerequisite: MATH 3140.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4140

Requisites: Restricted to graduate students only.

MATH 5150 (3) Linear Algebra

Highlights vector spaces, linear transformations, eigenvalues and eigenvectors, and canonical forms. Department enforced prerequisite: MATH 2130 or MATH 2135. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5200 (3) Introduction to Topology

Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4200

MATH 5230 (3) Differential Geometry of Curves and Surfaces

Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4230

Requisites: Restricted to graduate students only.

MATH 5240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics

Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4240

Requisites: Restricted to graduate students only.

MATH 5330 (3) Fourier Analysis

The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics. Department enforced prerequisite: MATH 4001.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4330

Requisites: Restricted to graduate students only.

MATH 5430 (3) Ordinary Differential Equations

Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems. Department enforced prerequisites: MATH 2130 and MATH 3001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5440 (3) Mathematics of Coding and Cryptography

Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed; prepares students for the more advanced ECEN 5682.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4440

Requisites: Restricted to graduate students only.

MATH 5470 (3) Partial Differential Equations

Studies initial boundary and eigenvalue problems for the wave, heat and potential equations. Solution by separation of variables, Green's function, and variational methods. Department enforced prerequisite: MATH 3430 or MATH 5430. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4470

Requisites: Restricted to graduate students only.

MATH 5510 (3) Introduction to Probability Theory

Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4510

Requisites: Restricted to graduate students only.

MATH 5520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.

Equivalent - Duplicate Degree Credit Not Granted: STAT 4520 and MATH 4520 and STAT 5520

Requisites: Restricted to graduate students only.

MATH 5540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models, modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: MATH 4520 or MATH 5520 or APPM 4520 or APPM 5520.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4540 and STAT 4540 and STAT 5540

Requisites: Restricted to graduate students only.

MATH 5600 (3) Numerical Analysis 1

Solution of nonlinear algebraic equations, interpolation, approximation theory and numerical integration. Department enforced prerequisites: MATH 2130 or MATH 2135 or APPM 3310 and experience with a scientific programming language. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5610 (3) Numerical Analysis 2

Solution of linear systems, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: MATH 5600 or APPM 5600. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5730 (3) Set Theory

Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4730

MATH 5810 (1-3) Special Topics in Mathematics

Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4810

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 5820 (3) History of Mathematical Ideas

Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4820

Requisites: Restricted to graduate students only.

Recommended: Requisite completion of upper division Written Communication requirement.

MATH 5905 (1) Mathematics Teacher Training

Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Department enforced prerequisite: current employment as a teaching assistant.

Requisites: Restricted to graduate students only.

MATH 6000 (3) Model Theory

Proves the compactness theorem, showing the essential finiteness of logical implication. Proves many basic properties of theories, showing how the syntactic form of statements influences their behavior w.r.t., different models. Finally, studies properties of elements that cannot be stated by a single formula (the type of the element) and shows it can be used to characterize certain models.

Requisites: Restricted to graduate students only.

MATH 6010 (3) Computability Theory

Studies the computable and uncomputable. Shows that there are undecidable problems and from there builds up the theory of sets of natural numbers under Turing reducibility. Studies Turing reducibility, the arithmetical hierarchy, oracle constructions and end with the finite injury priority method. Department enforced prerequisite: MATH 6000.

Requisites: Restricted to graduate students only.

MATH 6110 (3) Introduction to Number Theory

Examines divisibility properties of integers, congruences, diophantine equations, arithmetic functions, quadratic residues, distribution of primes and algebraic number fields. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6130 (3) Algebra 1

Studies group theory and ring theory. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6140 (3) Algebra 2

Studies modules, fields and Galois theory. Department enforced prerequisite: MATH 6130. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6150 (3) Commutative Algebra

Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals and Noetherian rings. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6170 (3) Algebraic Geometry

Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6180 (3) Algebraic Number Theory

Introduces number fields and completions, norms, discriminants and differentials, finiteness of the ideal class group, Dirichlet's unit theorem, decomposition of prime ideals in extension fields, decomposition and ramification groups. Department enforced prerequisites: MATH 6110 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6190 (3) Analytic Number Theory

Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function and the prime number theorem. Department enforced prerequisites: MATH 6110 and MATH 6350. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6210 (3) Introduction to Topology 1

Introduces elements of point-set topology and algebraic topology, including the fundamental group and elements of homology. Department enforced prerequisites: MATH 2130 and MATH 3140 and MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6220 (3) Introduction to Topology 2

Continuation of MATH 6210. Department enforced prerequisite: MATH 6210. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6230 (3) Introduction to Differential Geometry 1

Introduces topological and differential manifolds, vector bundles, differential forms, de Rham cohomology, integration, Riemannian metrics, connections and curvature. Department enforced prerequisites: MATH 2130 and MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6240 (3) Introduction to Differential Geometry 2

Continuation of MATH 6230. Department enforced prerequisite: MATH 6230. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6250 (3) Theory of Rings

Studies semi-simple Artinian rings, the Jacobson radical, group rings, representations of finite groups, central simple algebras, division rings and the Brauer group. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6260 (3) Geometry of Quantum Fields and Strings

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories. Department enforced prerequisites: MATH 6230 and MATH 6240 and PHYS 5250 and PHYS 7280. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6260

Requisites: Restricted to graduate students only.

MATH 6270 (3) Theory of Groups

Studies nilpotent and solvable groups, simple linear groups, multiply transitive groups, extensions and cohomology, representations and character theory, and the transfer and its applications. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6280 (3) Advanced Algebraic Topology

Covers homotopy theory, spectral sequences, vector bundles, characteristic classes, K-theory and applications to geometry and physics. Department enforced prerequisite: MATH 6220. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6290 (3) Homological Algebra

Studies categories and functors, abelian categories, chain complexes, derived functors, Tor and Ext, homological dimension, group homology and cohomology. If time permits, the instructor may choose to cover additional topics such as spectral sequences or Lie algebra homology and cohomology. Department enforced prerequisites: MATH 6130 and MATH 6140.

Requisites: Restricted to graduate students only.

MATH 6310 (3) Introduction to Real Analysis 1

Develops the theory of Lebesgue measure and the Lebesgue integral on the line, emphasizing the various notions of convergence and the standard convergence theorems. Applications are made to the classical L^p spaces. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6320 (3) Introduction to Real Analysis 2

Covers general metric spaces, the Baire Category Theorem, and general measure theory, including the Radon-Nikodym and Fubini theorems. Presents the general theory of differentiation on the real line and the Fundamental Theorem of Lebesgue Calculus. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite MATH 6310.

MATH 6350 (3) Functions of a Complex Variable 1

Focuses on complex numbers and the complex plane. Includes Cauchy-Riemann equations, complex integration, Cauchy integral theory, infinite series and products, and residue theory. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6360 (3) Functions of a Complex Variable 2

Focuses on conformal mapping, analytic continuation, singularities and elementary special functions. Department enforced prerequisite: MATH 6350. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6534 (3) Topics in Mathematical Probability

Offers selected topics in probability such as sums of independent random variables, notions of convergence, characteristic functions, Central Limit Theorem, random walk, conditioning and martingales, Markov chains and Brownian motion. Department enforced prerequisite: MATH 6310. Instructor consent required for undergraduates

Requisites: Restricted to graduate students only.

MATH 6550 (3) Introduction to Stochastic Processes

Systematic study of Markov chains and some of the simpler Markov processes, including renewal theory, limit theorems for Markov chains, branching processes, queueing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: APPM 6550

Requisites: Restricted to graduate students only.

MATH 6730 (3) Set Theory

Presents cardinal and ordinal arithmetic, and basic combinatorial concepts, including stationary sets, generalization of Ramsey's theorem, and ultrafilters, consisting of the axiom of choice and the generalized continuum hypothesis. Department enforced prerequisites: MATH 4000 or MATH 5000 and MATH 4730 or MATH 5730. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6740 (3) Forcing

Presents independence of the axiom of choice and the continuum hypothesis, Souslin's hypothesis and other applications of the method of forcing. Introduces the theory of large cardinals. Department enforced prerequisite: MATH 6730. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6900 (1-3) Independent Study

Instructor consent required for undergraduates.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 6940 (1) Master's Candidate for Degree

This course is for students preparing for the no-thesis option for a master's degree. The content is set by the students' advisors.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

MATH 6950 (1-6) Master's Thesis**MATH 8114 (3) Topics in Number Theory**

May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory. Department enforced prerequisite: MATH 6110. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8174 (3) Topics in Algebra I

Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8234 (3) Topics in Differential Geometry

Presents advanced topics in Differential Geometry, such as index theory, partial differential equations on manifolds, exterior differential systems, and Cartan's methods.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of MATH 6230 and MATH 6310 (minimum grade D-). Restricted to graduate students only. Instructor consent required for undergraduates.

MATH 8250 (3) Mathematical Theory of Relativity 1

Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups, metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Instructor consent required.

Requisites: Restricted to graduate students only.

MATH 8304 (3) Topics in Analysis 1

Presents advanced topics in analysis including Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Department enforced prerequisites: MATH 8330 and MATH 8340. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8330 (3) Functional Analysis 1

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisites: MATH 6310 and MATH 6320. Instructor consent required for undergraduates. See also MATH 8340.

Requisites: Restricted to graduate students only.

MATH 8340 (3) Functional Analysis 2

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisite: MATH 8330. Instructor consent required for undergraduates. See also MATH 8330.

Requisites: Restricted to graduate students only.

MATH 8370 (3) Harmonic Analysis 1

Examines trigonometric series, periodic functions, diophantine approximation and Fourier series. Also covers Bohr and Stepanoff almost periodic functions, positive definite functions and the L^1 and L^2 theory of the Fourier integral. Applications to group theory and differential equations. Department enforced prerequisites: MATH 5150 and MATH 6320. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8714 (3) Topics in Logic 1 and 2

Requisites: Restricted to graduate students only.

MATH 8815 (1-3) Ulam Seminar

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MATH 8900 (1-3) Independent Study

Instructor consent required for undergraduates.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

Requisites: Restricted to graduate students only.

Mathematics - Master of Arts (MA) MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the Bachelor's–Accelerated Master's (BAM) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in Mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Mathematics - Bachelor of Arts (BA) (p. 448).

Requirements

Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements

Students must complete 30 hours of approved credit. At least 24 credit hours must be completed at the 5000 level or above. A maximum of six credit hours may be completed at the 3000 or 4000 level if approved by the department. Students must take two 2-semester sequences. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher excluding MATH 5820.

For the MS degree in applied mathematics, 6–12 credit hours must be in an approved minor program outside the mathematics department, and at least 18 credit hours must be approved inside the mathematics department.

Students should read carefully the materials describing the university requirements in the Graduate School section. The student is responsible for satisfying these requirements at the proper time.

Examinations

To earn an MA degree, a student must pass a master's examination based on the particular program of the student.

Thesis

For the MA degree in mathematics, students can pursue a thesis option, which requires 4–6 credit hours of thesis work, and a thesis defense.

Mathematics - Doctor of Philosophy (PhD)

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes, and topology.

For more information, visit the Department of Mathematics (<http://www.colorado.edu/math/>) website.

Requirements

Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements

Students must complete at least 30 credit hours of approved graduate coursework and 30 credit hours of thesis work.

Before being admitted to candidacy for the PhD degree in mathematics, a student must take two graduate courses each in algebra, real analysis and geometry/topology en route to passing two out of three preliminary exams in these fields. In addition, the student must take a course in complex analysis. The student must then pass a comprehensive exam.

Students should read the Doctoral Degree Requirements (p. 990) section carefully. The student is responsible for satisfying these requirements at the proper time.

Molecular, Cellular and Developmental Biology

In view of the strong research orientation of the fields involved, the department does not accept applications from students seeking the MA as a terminal degree. The master of arts degree, either with a thesis (Plan I) or without (Plan II), is awarded under special circumstances.

Course code for this program is MCDB.

Doctoral Degree

- Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD) (p. 1203)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lois A.
Senior Instructor Emerita

Anseth, Kristi S. (https://experts.colorado.edu/display/fisid_103471/)
Distinguished Professor; PhD, University of Colorado Boulder

Betterton, Meredith D. (https://experts.colorado.edu/display/fisid_125396/)
Associate Professor; PhD, Harvard University

Blumenthal, Thomas (https://experts.colorado.edu/display/fisid_143346/)
Professor, Visiting Professor; PhD, Johns Hopkins University

Boswell, Robert E. (https://experts.colorado.edu/display/fisid_100196/)
Professor; PhD, University of Colorado Boulder

Cech, Thomas R. (https://experts.colorado.edu/display/fisid_103252/)
Distinguished Professor; PhD, University of California, Berkeley

Chen, Zhe (https://experts.colorado.edu/display/fisid_148754/)
Assistant Research Professor; PhD, University of Colorado Boulder

Copley, Shelley (https://experts.colorado.edu/display/fisid_104067/)
Professor; PhD, Harvard University

DeDecker, Brian S. (https://experts.colorado.edu/display/fisid_143934/)
Senior Instructor; PhD, Yale University

Detweiler, Corrella Scott (https://experts.colorado.edu/display/fisid_128240/)
Associate Professor; PhD, University of California, San Francisco

Donaldson, Zoe Rebecca (https://experts.colorado.edu/display/fisid_157087/)
Assistant Professor; PhD, Emory University

Dowell, Robin D. (https://experts.colorado.edu/display/fisid_147779/)
Associate Professor; DSc, Washington University

Dubin, Mark W.
Professor Emeritus

Espinosa, Joaquin Maximiliano (https://experts.colorado.edu/display/fisid_134378/)
Visiting Associate Professor; PhD, Univ of Buenos Aires (Argentina)

Fillman, Christy L. (https://experts.colorado.edu/display/fisid_145115/)
Senior Instructor; PhD, University of Colorado Boulder

Garcea, Robert L. (https://experts.colorado.edu/display/fisid_146103/)
Professor; MD, University of California, San Francisco

Gold, Lawrence (https://experts.colorado.edu/display/fisid_100581/)
Professor; PhD, University of Connecticut

Guild, Nancy Ann
Professor Attendant Rank; PhD, University of Colorado

Han, Min (https://experts.colorado.edu/display/fisid_105512/)

Courses

MCDB 5201 (1) Graduate Lab in Molecular Evolution

Ever wonder what functional clues might reside in the DNA sequence of your favorite gene? In this course, graduate students will learn the fundamentals of phylogenetics with an emphasis on evolutionary models that infer selective pressures in protein-coding DNA sequences (genes). During the course, students will be working on their favorite gene and using it as a case study for applying all of the concepts that we will cover. By the end of the course they will have generated a publication-quality summary figure, along with appropriate supplemental figures, of the selective pressures shaping their favorite gene. Additionally, they will learn how to design and execute an experimental approach based off of findings from the evolutionary analysis.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MCDB 5210 (3) Cell Structure and Function (Lecture and Discussion)

MCDB 5220 (3) Graduate Core 2

Requisites: Restricted to graduate students only.

MCDB 5230 (3) Graduate Core 1

Requisites: Restricted to graduate students only.

MCDB 5250 (3) Topics in Developmental Genetics (Methods and Logic)

Repeatable: Repeatable for up to 6.00 total credit hours.

MCDB 5301 (3) Immunology

Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and misfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4300

Requisites: Restricted to graduate students only.

MCDB 5310 (3) Microbial Genetics and Physiology

Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4310

MCDB 5312 (3-4) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5312, MCDB 4312 and BCHM 4312

Grading Basis: Letter Grade

MCDB 5350 (3) Microbial Diversity and the Biosphere

Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4350

Requisites: Restricted to graduate students only.

MCDB 5361 (3) Evolution and Development

Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development).

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4361

MCDB 5425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease

Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4425

Requisites: Restricted to graduate students only.

MCDB 5426 (3) Cell Signaling and Developmental Regulation

Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4426

MCDB 5427 (3) Biology of the Visual System

Explores the neurobiology, cell biology, genetics and developmental biology of the visual system. Discusses neurodegenerative and vascular diseases that lead to blindness. Students read and analyze original research articles to train scientific reasoning. Involves student-organized presentations and classroom discussion.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4427

Requisites: Requires prerequisite courses of MCDB 3135 and MCDB 3145 (all minimum grade C-).

MCDB 5441 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4441 and EBIO 4440 and EBIO 5440

Requisites: Restricted to graduate students only.

MCDB 5471 (3) Mechanisms of Gene Regulation in Eukaryotes

Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4471

MCDB 5520 (3) Bioinformatics and Genomics

Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4520

Requisites: Restricted to graduate students only.

MCDB 5521 (1) Bioinformatics and Genomics Laboratory

Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, plan and execute data analysis in selected areas.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4521

Grading Basis: Letter Grade

MCDB 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4550 and PHYS 4550 and PHYS 5550

MCDB 5560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4560 and PHYS 4560 and PHYS 5560

Grading Basis: Letter Grade

MCDB 5615 (3) Biology of Stem Cells

Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4615

Requisites: Restricted to graduate students only.

MCDB 5621 (3) Genome Databases: Mining and Management

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5621, MCDB 4621 and BCHM 5621

MCDB 5650 (2) Teaching and Learning in Undergraduate Science Courses

Discusses recent research on how students learn and applications to the teaching of undergraduate science courses. Conducted as an interactive workshop, in which active-engagement in learning approaches are modeled and experienced by participants. Open to undergraduate and graduate students. May be used to fulfill the pedagogical training requirement for undergraduate Learning Assistants in upper division science courses. Post-doctoral and faculty auditors are welcome to participate as regular auditors.

MCDB 5651 (3) Developmental Biology

Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4650

Requisites: Restricted to graduate students only.

MCDB 5680 (3) Mechanisms of Aging

Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4680

Requisites: Restricted to graduate students only.

MCDB 5750 (3) Animal Virology

Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Fulfills MCDB scientific reasoning requirement. Course has additional graduate student level requirements.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4750

Requisites: Restricted to graduate students only.

MCDB 5776 (1) Scientific Ethics and Responsible Conduct in Research

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5776

Requisites: Requires a corequisite course of MCDB 5230 or BCHM 5771.

MCDB 5777 (3) Molecular Neurobiology

Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4777

MCDB 5811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4811 and EDUC 4811 and EDUC 6811

Requisites: Restricted to graduate students only.

MCDB 6000 (3) Introduction to Laboratory Methods

Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to plan and execute experiments in selected areas.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Biological Sciences (MCDB) graduate students only.

MCDB 6440 (1-3) Special Topics in MCD Biology

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MCDB 6441 (1) Faculty Res Seminar

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MCDB 6442 (2) Research Grant Writing

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MCDB 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

MCDB 6950 (1-6) Master's Thesis

Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

MCDB 7840 (1-6) Graduate Independent Study

An independent study contract is required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

MCDB 7910 (1) Seminar Practicum

Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

MCDB 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD)

Areas of Study

Opportunities for graduate study and original research leading to the PhD degree are available in a variety of areas. The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree if they decide to leave the program after completing 30 hours of graduate coursework and the PhD oral and written comprehensive examination.

Molecular Biology

Includes gene regulation, virology, nucleic acid-protein interactions, chromosome structure and function, chromosome replication, microbial diversity, human genome structure, RNA structure and catalysis.

Cell Biology

Includes cytoskeleton, biophysical cytology, vacuole assembly, analysis of yeast spindle pole bodies and vertebrate centrosomes, synthesis and secretion of glycoproteins and polysaccharides, defense responses in plants and 3-D high resolution reconstruction, biogenesis of mitochondria

and chloroplasts, energy metabolism, assembly of membrane protein complexes, cell cycle regulation and checkpoints and signal transduction.

Developmental Biology

Covers mechanisms and regulation of morphogenesis and cell growth, genetic control of development, molecular genetics of embryogenesis, sex determination, ras proteins and vulval development and programmed cell death in nematodes, molecular genetics of *Drosophila* neurobiology, developmental genetics of *Drosophila* and *Caenorhabditis*, neural development in mice, transgenic mice and muscle development and function.

Genetics

Includes genetics of human disease, complex traits, mouse development and invertebrate development.

Requirements

Admission Requirements

The graduate program of the Department of Molecular, Cellular and Developmental Biology is sufficiently flexible to accommodate students with a wide range of training. Students with bachelor's degrees in any of the biological, biochemical or physical sciences are encouraged to apply. Background necessary for the program includes the equivalent of undergraduate courses in cell biology, developmental biology, genetics, organic chemistry, biochemistry, chemical thermodynamics, differential and integral calculus and general physics.

Prerequisites

Students accepted with deficiencies may demonstrate mastery of the required areas by taking appropriate undergraduate courses, by passing advanced-standing examinations or by successfully completing graduate-level courses that require the undergraduate courses as prerequisites. Students admitted generally have independent research experience.

Degree Requirements

A minimum of 30 credit hours of courses numbered 5000 and above, plus 30 credit hours of doctoral thesis, are required. Specific courses depend on the student background and field of specialization.

The faculty of the department offers a variety of courses to help graduate students acquire knowledge in the various areas of study. Further, students are required to work in at least three different laboratories to broaden their education and to help them identify the field of greatest interest for their thesis work.

Advisory Committee

An advisory committee, appointed upon entrance, develops an appropriate curriculum based in part on the student's background. A written preliminary exam consists of a series of courses and exams administered during the first year.

Qualifying Exam

A comprehensive qualifying exam administered at the beginning of the spring semester of the second year includes a written research proposal and an oral defense of the proposal that emphasizes breadth and depth of knowledge as well as an ability to communicate and synthesize facts into a coherent scientific argument.

Thesis

The principal elements in graduate training are defining a thesis problem, investigating this problem with a coherent piece of research that

constitutes a substantial contribution to knowledge, and writing a report on this work in the form of peer-reviewed journal articles and a thesis submitted to a departmental committee for approval. After completion of the thesis, each candidate for the PhD degree is required to take a final oral examination on the thesis and related topics, and to present a public seminar.

Teaching

Generally, each candidate for the PhD degree does two semesters of apprentice teaching. This obligation is usually met during the student's first year of graduate study.

Museum and Field Studies

Graduate training in anthropology, art history, history, botany, entomology, paleontology and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the Museum and Field Studies Program. Areas of study include, but are not limited to:

- anthropological interpretation
- diatom taxonomy, systematics and ecology
- southwestern archaeology and ethnology
- plant taxonomy, evolution and phytogeography
- vertebrate paleontology and Cenozoic mammals
- biology of aquatic invertebrates
- systematics and population biology of insects of the Rocky Mountain Region
- plant–insect interactions
- mammalogy

Museum assistantships include support from the Walker Van Riper fund and research support from the Collie and William Henry Burt museum funds. Other financial assistance is available to selected students. Students interested in working toward advanced degrees under the direction of museum faculty may use the contact information above.

Course code for this program is MUSM.

Master's Degree

- Museum and Field Studies - Master of Science (MS) (p. 1206)

Certificate

- Museology - Graduate Certificate (p. 1208)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Tripp, Erin Anne (https://experts.colorado.edu/display/fisid_152313/)
Assistant Professor; PhD, Duke University

Courses

MUSM 5011 (4) Introduction to Museum Studies

Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorship, exhibition theory, and administration.

Additional Information: Departmental Category: Museum Studies

MUSM 5021 (2-4) Selected Museum Topics

Provides framework for student projects on varied museum topics (e.g., ethics of collecting, data management, the museum's role in the community). Student projects include case study analysis, interviewing, and original presentations. Topics vary each semester. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Museum Studies

MUSM 5030 (3) Museum Education

Survey of the theory and practice of education in museums and informal learning centers. Topics include current trends in the field, learning theories, teaching methodologies, program development, museum/school relationships, the role of education in exhibit development, and being a critically reflective practitioner.

Additional Information: Departmental Category: Museum Studies

MUSM 5031 (3) Museums and the Public: Exhibit Development

Covers elements of exhibition development and design, up to production and evaluation of exhibit prototypes. The team approach is emphasized. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies

MUSM 5041 (3) Museum Administration

Covers theory of organizations and how it applies to museums. Application of small business management and nonprofit organizations. Review museum organizational charts and staffing. Evolution of marketing and development in a museum context are reviewed. Budget process and annual financial reporting are discussed, and there is an emphasis on evaluating financial statements. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies

MUSM 5045 (3) Introduction to Museum Anthropology

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and ANTH 5045

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Anthropology

MUSM 5051 (3) Museum Collections Management

Deals specifically with curation and data management. Topics include acquisition practices and problems; organization, management, use and preventive conservation of collections; computer data management of collections.

Additional Information: Departmental Category: Museum Studies

MUSM 5061 (3) Introduction to Scientific Illustration

Intended for students with little to no art background. Focus is on the accurate rendering of scientific subjects for publication and for public display. Course begins with basic drawing skills and sharpening of visual perception. Students progress to be able to produce realistic renderings of subjects. Students are exposed to a variety of black and white and color techniques and the standards for presenting illustrations for a variety of audiences. Course concludes with computer illustration tools and techniques.

Additional Information: Departmental Category: Museum Studies

MUSM 5474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and GEOL 5474

Additional Information: Departmental Category: Geology

MUSM 5484 (3) Museum Field Methods in Geology

Paleontological and paleoecological field techniques including collecting; recording of geographic, stratigraphic and quarry information; preservation; interpretation, including applicable readings. Designed for individuals who have some background in geology but little or no prior field experience. Offered summer only.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4484

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geology

MUSM 5760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4760 and EBIO 5760

Additional Information: Departmental Category: Zoology

MUSM 5795 (3) Field Methods in Zoology and Botany

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods, and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4795 and ENVS 4795

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Zoology

MUSM 5900 (1-6) Independent Study

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4900

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

MUSM 5912 (3) Collections Research Practicum in Cultural Anthropology

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4912 and ANTH 4470 and ANTH 5470

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Anthropology

MUSM 5913 (3) Museum Practicum in Botany

Students take part in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloguing, conservation and collection management. Enrollment is limited therefore students should make arrangements during the previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4913

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Botany

MUSM 5914 (3) Museum Practicum in Geology

Students take part in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloguing, collection management and a survey of current laws as they apply to specimens. Enrollment is limited therefore students should make arrangements during the previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4914

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Geology

MUSM 5915 (1-3) Museum Practicum in Zoology

Students take part in basic curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloguing, storing and shipping. Also introduces students to the animal kingdom.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4915

Additional Information: Departmental Category: Zoology

MUSM 5916 (1-3) Museum Practicum in Entomology

Students take part in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling, identification, rearing techniques and exhibit preparation. Enrollment is limited, students should make arrangements during previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4916

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Entomology

MUSM 5917 (1-3) Museum Practicum in Techniques

Students participate in museum public education functions that may include researching, planning, developing, and producing exhibits, traveling trunks, booklets, and other materials. May involve writing labels, molding and casting, conservation, and restoration.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4917

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Museology

MUSM 5918 (3) Museum Practicum in Advanced Collections Management

Provides a hands-on environment for exploring issues in museum collections management. Through lecture, resource procurement, in-class activities and out-of-class projects, students will gain practical and professional experience in areas of policy, procedure, best practices, museum storage planning and legal issues.

Recommended: Prerequisite MUSM 5051.

Additional Information: Departmental Category: Museum Studies

MUSM 5919 (3) Collections Research Practicum: Archaeology

Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4919 and ANTH 5919

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

MUSM 6110 (1-3) Advanced Seminar in Museum Issues

Offers a weekly seminar for museum and field study students that addresses one new topic each semester relevant to museum operations such as archival administration, museums, multiculturalism, repatriation and others. Department enforced prerequisite: MUSM 5011.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Museum Studies

MUSM 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Department enforced prerequisite: MUSM 5011.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 6150 and HIST 6150 and ANTH 6150

Additional Information: Departmental Category: Museum Studies

MUSM 6930 (2-4) Museum Internship

Provides experience in museums of different sizes, audiences, and subjects, including history, natural history, art, and children's museums. Each student is supervised individually by a faculty member as well as the appropriate person in the cooperating museum.

Additional Information: Departmental Category: Museum Studies

MUSM 6940 (1-4) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Museum Studies

MUSM 6950 (1-6) Master's Thesis

A thesis, which may be of a research, expository, critical or creative type, is required of every master's degree candidate under the thesis option.

Department enforced prerequisites: MUSM 5011 and MUSM 5051 and one of the following: MUSM 5030 or MUSM 5031 or MUSM 5041.

Additional Information: Departmental Category: Museum Studies

MUSM 6960 (1-4) Master's Project or Paper

A project or paper in the student's discipline and related to some aspect of museum studies is required of every master's degree candidate under the non-thesis-option plan. Department enforced prerequisites: MUSM 5011 and MUSM 5051. Students in collections/field track also need MUSM 5030 or MUSM 5031 or MUSM 5041.

Additional Information: Departmental Category: Museum Studies

Museum and Field Studies - Master of Science (MS)

The interdisciplinary museum and field studies program is administered by the University of Colorado Museum of Natural History, in conjunction with the departments of anthropology; history; art history; ecology and evolutionary biology; and geological sciences; as well as other departments. The program provides a strong background in a chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians and administrators.

Program Tracks

Three tracks are available: a collections/field track, a public/administration track and an art history track.

Collections/Field Track

This track offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present and biological inventory. The curriculum gives students academic training as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.

Public/Administration Track

This track offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

Art History Track

The art history track in the MFS program is open to applicants who hold a BA degree in the liberal arts, preferably with a major in art history. This track addresses issues specific to the research and curation of artworks. The curriculum provides students with academic training in art history and offers students firsthand museum experience in curatorial and collections work through exhibitions practica and collections research.

Requirements

Admission Requirements

Students must meet all university requirements for admission to graduate school and have a baccalaureate degree and at least a B (3.00) grade-point average in previous academic work. The baccalaureate degree should be in anthropology, biology, geology, geography, history (including archival studies), classics, fine arts or education, although other majors will be considered. Acceptance to the program is decided by the admissions committee of the University Museum in consultation with the student's department. The student must be accepted by an advisor in his or her discipline. Applicants accepted for graduate work by museum faculty must be admitted to the Graduate School.

Course Requirements

The degree in museum and field studies is a two-year program requiring a total of 32 credit hours, plus 150 hours of internship. Depending on the track and plan, students complete from 9 to 15 credit hours in a department and from 13 to 22 credit hours in museology courses.

Program Tracks

Collections/Field Track

Internship

A museum internship of 150 hours is required.

Committee

A committee of at least three graduate faculty will be selected during the first semester in residence, by consultation between the student, the student's advisor, and the director of the MFS program. At least one member of the committee must be a tenured or tenure-track member of the museum faculty. The committee will serve as program advisors for the comprehensive exam and as the defense committee for the thesis or project. A student and advisor may apply for an exception in writing, which must be approved by the MFS program director.

Degree Plans

Students may choose either the thesis or non-thesis plan.

Plan I: Thesis Option

This plan requires the completion and successful defense of a thesis.

Plan II: Non-Thesis Option

This plan requires the completion of a project and paper.

Museology - Graduate Certificate

Providing professional museum training for CU Boulder graduate students and for museum professionals who seek to upgrade their skills and credentials, the Professional Certificate in Museology serves a range of disciplines in the arts and sciences, education and engineering, as well as the Colorado museum community.

CU Graduate Students

The Museum and Field Studies program offers a Graduate Professional Certificate in Museology for graduate students. This program provides professional training and certification for students at the University of Colorado Boulder whose primary enrollment is in a graduate program in another museum-related discipline (e.g., anthropology, art, art history, biology, business administration, education, geological sciences, history, etc.). For graduate students in other university departments, the coursework in a cognate discipline is provided by MA/MS or PhD programs in their home department.

Museum Professionals

Additionally, the professional certificate program is open to museum professionals in Colorado and the surrounding Rocky Mountain region. The program provides an avenue for early and mid-career museum staff to upgrade their skills and credentials in order to better meet the challenges and opportunities that museum work affords in the 21st century. For museum professionals, additional disciplinary work is available as appropriate upper division undergraduate or graduate coursework taken as electives under the nondegree study plan available in the ACCESS program through Continuing Education.

Requirements

The Professional Certificate in Museology requires a minimum of 12 credit hours and a 75-hour internship that may be waived if comparable professional experience is demonstrated.

Philosophy

Applicants for admission to the Graduate School for work toward a master's or doctoral degree with a major in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the master's and doctoral programs must satisfy a variety of requirements, including the completion of coursework. The Department of Philosophy has a diversified faculty that can supervise the writing of master's theses and doctoral dissertations on a wide range of topics.

The department makes available teaching assistantships and then graduate part-time instructorships to doctoral students, and assists with job placement. Teaching assistantships are sometimes available to master's students as well. Descriptions of both degree programs are available from the Department of Philosophy.

Students wishing to pursue graduate work in philosophy should note master's degree requirements (p. 989) and doctoral degree requirements (p. 990), and should consult the graduate portion (<https://www.colorado.edu/philosophy/graduate/>) of the department's website.

Course code for this program is PHIL.

Master's Degree

- Philosophy - Master of Arts (MA) (p. 1212)

Doctoral Degree

- Philosophy - Doctor of Philosophy (PhD) (p. 1215)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Dominic T.J. (https://experts.colorado.edu/display/fisid_145110/)
Associate Professor; PhD, University of Cambridge

Boonin, David Isaac (https://experts.colorado.edu/display/fisid_113100/)
Professor; PhD, University of Pittsburgh

Bredeson, Garrett Zantow (https://experts.colorado.edu/display/fisid_154933/)
Instructor; PhD, Vanderbilt University

Cleland, Carol (https://experts.colorado.edu/display/fisid_105674/)
Professor; PhD, Brown University

Demarest, Heather (https://experts.colorado.edu/display/fisid_159052/)
Assistant Professor; PhD, Rutgers University

Fileva, Iskra Nikova (https://experts.colorado.edu/display/fisid_154600/)
Assistant Professor; PhD, Boston University

Heathwood, Christopher Charles (https://experts.colorado.edu/display/fisid_141144/)
Associate Professor; PhD, University of Massachusetts at Amherst

Huemer, Michael (https://experts.colorado.edu/display/fisid_113081/)
Professor; PhD, Rutgers University–Newark

Jacobson, Daniel
Professor; PhD, University of Michigan

Kaufman, Daniel Patrick (https://experts.colorado.edu/display/fisid_134174/)
Associate Professor; PhD, University of Massachusetts at Amherst

Lee, Mi-Kyoung (https://experts.colorado.edu/display/fisid_141821/)
Associate Professor; PhD, Harvard University

Norcross, Alastair J. (https://experts.colorado.edu/display/fisid_144850/)
Associate Professor; PhD, Syracuse University

Oddie, Graham James (https://experts.colorado.edu/display/fisid_104741/)
Professor; PhD, University of London (England)

Pasnau, Robert C. (https://experts.colorado.edu/display/fisid_115293/)
Professor; PhD, Cornell University

Potter, Jason Timothy (https://experts.colorado.edu/display/fisid_103972/)
Instructor; PhD, University of Colorado Boulder

Rupert, Robert D. (https://experts.colorado.edu/display/fisid_139802/)
Professor, Associate Chair; PhD, University of Illinois at Chicago

Saucedo Ceballos, Raul (https://experts.colorado.edu/display/fisid_153759/)
Assistant Professor; PhD, Cornell University

Staffel, Julia (https://experts.colorado.edu/display/fisid_163744/)
Assistant Professor; PhD, University of Southern California

Steup, Matthias P. (https://experts.colorado.edu/display/fisid_157766/)
Professor; PhD, Brown University

Talbot, Brian Thomas (https://experts.colorado.edu/display/fisid_147617/)
Assistant Professor; PhD, University of Southern California

Wingo, Ajume H. (https://experts.colorado.edu/display/fisid_144391/)
Associate Professor; PhD, University of Wisconsin–Madison

Youkey, David A. (https://experts.colorado.edu/display/fisid_105211/)
Instructor; PhD, University of Colorado Boulder

Courses

PHIL 5010 (3) Single Philosopher

Philosophers covered include, from year to year, Plato, Aristotle, Augustine, Aquinas, Descartes, Spinoza, Locke, Leibniz, Hume, and Kant. Includes at least one course per year on an ancient author and one course per year on a modern author.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4010

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5020 (3) Topics in the History of Philosophy

Examines a specific philosophical problem over an extended historical period.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5030 (1) Greek Philosophical Texts

Selected readings in classical philosophy, in the original language, with a focus on achieving fluency in reading philosophical Greek.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

PHIL 5040 (1) Latin Philosophical Texts

Selected readings in classical and medieval philosophy, in the original language, with a focus on achieving fluency in reading philosophical Latin.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

PHIL 5100 (3) Ethics

Presents representative positions in normative ethics and metaethics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5110 (3) Contemporary Moral Theory

Provides an in-depth look at some recent work in moral theory, usually organized around a single topic. Topics vary from year to year. Previous topics include: consequentialism and its critics, virtue theory, deontological ethics, moral psychology, well-being, and metaethics.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4110

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5120 (3) Philosophy and Animals

Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5120

Requisites: Restricted to graduate students only.

PHIL 5150 (3) Topics in Applied Ethics

Discusses advanced work in applied normative philosophy. Topics vary from semester to semester and may focus on one or two specific areas (e.g., race, procreative ethics, military ethics, sports ethics) or take a broader approach that includes issues from across a wider range of subjects.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4150

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5200 (3) Contemporary Political Philosophy

Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5210 (3) Philosophy and Social Policy

Studies philosophical approaches to social and political issues such as abortion, bioethics, environmental preservation, human rights, and reverse discrimination. Gives attention to strengths and weaknesses of philosophical treatments of these issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5230 (3) Bioethics and Public Policy

Examines public policy implications of contemporary biological, genetic, biomedical, and behavioral science in light of ethics and human values. Considers theoretical and practical grounds for moral assessment of scientific research and possible applications of technology.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5240 (3) Seminar in Environmental Philosophy

Philosophical examination of several different approaches to environmental problems: economic, juridical, political and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights and land use and urban planning.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5240

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5260 (3) Philosophy of Law

Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4260

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5290 (1-3) Topics in Values and Social Policy

Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5300 (3) Philosophy of Mind

Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation and the nature of mental states.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4300

Requisites: Restricted to graduate students only.

PHIL 5340 (3) Epistemology

Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4340

PHIL 5360 (3) Metaphysics

Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will and modality.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4360

Requisites: Restricted to graduate students only.

PHIL 5370 (3) Free Will and Determinism

Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4370

PHIL 5400 (3) Philosophy of Science

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4400

Requisites: Restricted to graduate students only.

PHIL 5440 (3) Topics in Logic

Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4450 and PHYS 5450 and PHYS 5450

Requisites: Restricted to graduate students only.

PHIL 5460 (3) Modal Logic

Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4460

Requisites: Restricted to graduate students only.

PHIL 5470 (3) Probability and Rational Choice

Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons and Schelling points) and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4470

Requisites: Restricted to graduate students only.

PHIL 5480 (3) Formal Methods in Philosophy

Introduces formal methods used in contemporary philosophy beyond classical first-order logic. Specific topics may vary. Examples: extensions of and alternatives to first-order logic (including propositional and quantified modal logic and higher-order and plural logic), alternatives to classical logic (including many-valued and intuitionistic systems), generalized and substitutional quantifiers, the lambda calculus, indicative and subjunctive conditionals, probability theory, inductive logic, and decision theory.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4480

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5490 (3) Philosophy of Language

Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions, intentions and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke and Chomsky.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4490

Requisites: Restricted to graduate students only.

PHIL 5550 (3) Metaphysics and Epistemology Proseminar

Covers seminal classic texts and/or fundamental topics in analytic metaphysics and epistemology.

Requisites: Restricted to Philosophy graduate students only.

PHIL 5600 (3) Philosophy of Religion

Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5700 (3) Aesthetics

Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5800 (3) Open Topics in Philosophy

Variety of new courses at the 5000 level. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5810 (1-3) Special Topics in Philosophy

Instructor meets regularly with three or more students to discuss special topics in philosophy.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5840 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6000 (3-4) Seminar in the History of Philosophy

Studies advanced topics in the history of philosophy. Content varies by semester, but may extend to any period in the history of philosophy, from the Presocratics into the modern era.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6100 (3) Seminar in Ethics

Intensive study of selected topics in ethical theory.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6200 (3) Seminar in Social and Political Philosophy

Provides an in-depth look at some particular topic in social and political philosophy, such as rights, political freedom, political obligation, or democracy.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6300 (3) Seminar in Philosophy of Mind

Intensive study of selected topics in philosophy of mind.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6310 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

PHIL 6340 (3) Seminar in Epistemology

Intensive study of selected topics in epistemology.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6380 (3) Seminar in Metaphysics

Intensive study of selected topics in metaphysics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6400 (3) Seminar in Philosophy of Science

Topics connected with development of nature of science: the structure of scientific theories, the testing of hypotheses, the theory of decisions in science and the basic conceptions and models of abstraction in the history of science.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6490 (3) Seminar in Philosophy of Language

Studies some of the main topics in the philosophy of language, such as meaning and theories of meaning, translation, speech acts, rules of language, reference, relevance of psycholinguistics, language and thought, and language and ontology.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 6940 (1) Master's Candidate for Degree

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

Grading Basis: Pass/Fail

PHIL 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

PHIL 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive

Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

PHIL 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

Recommended: Prerequisite EDUC 6505 or PHIL 6310.

PHIL 7810 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

Philosophy - Master of Arts (MA)

The MA in Philosophy is intended to provide students with:

- A solid foundation in all the core areas of philosophy, together with a thorough grounding in the history of philosophy, in preparation for more advanced and specialized work at the doctoral level.

- Philosophical training for those who intend to go on to work in interdisciplinary areas bordering with philosophy, such as cognitive science or applied ethics and public policy.
- An opportunity for those who wish to explore more advanced study of philosophy for personal enrichment and satisfaction.
- The education needed for teaching philosophy at the secondary school level or at a community college.

We offer to MA students not only an outstanding education in philosophy, but also all the benefits of being in a large, active, collegial department, with numerous colloquia, conferences, workshops and reading groups in many areas of philosophy. MA students enroll in the same classes as PhD students, and are treated as full members of the graduate program.

Master's degree students do not receive guaranteed departmental funding, but in recent years most have received teaching assistantships in at least some of their semesters in the program. (TA-ships come with both a stipend and a tuition waiver.) The department also has a fellowship specifically for MA students, the Wille Fellowship, which is awarded each semester to a first-year MA student to help defray the costs of tuition. MA students are encouraged to apply through the university for financial aid and university scholarships (for more information, see the Funding (<https://www.colorado.edu/philosophy/graduate/funding/>) webpage).

All domestic graduate students qualify for in-state tuition (<https://www.colorado.edu/bursar/costs/>) after just one year of residency in Colorado (<https://www.colorado.edu/registrar/students/state-residency/adult/>). Applicants admitted to the MA program who are not residents of Colorado or of any of the Western states might consider petitioning to defer their enrollment for one year, during which time they can establish residency in Colorado, in order to avoid paying out-of-state tuition.

The Department of Philosophy at the University of Colorado Boulder is a member of the Western Regional Graduate Program (<http://wiche.edu/wrgp/>) (WRGP) which means that students from the Western states (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) can enroll in our MA program at in-state Colorado tuition rates (<http://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/>). Students need not demonstrate financial need. To be considered for the WRGP tuition rate, students simply apply directly to our program and identify themselves as WICHE WRGP applicants. WRGP students must fulfill all of our usual requirements for admission, meet all admission deadlines, and be selected for admission.

Students in the master's program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of master's theses on a wide range of topics.

Students considering both our PhD and our MA program should apply to the PhD program. Applicants not accepted to the PhD will automatically be considered for the MA program. Those interested only in the terminal MA program should apply just to that program. Students applying to the MA program can expect to hear about admission some time in late March to early April.

Students wishing to pursue a master's degree in philosophy should note the Graduate School requirements in the master's degree requirements (p. 989) section and consult the MA program portion (<https://www.colorado.edu/philosophy/graduate/ma-program/>) and the Graduate Admissions portion (<https://www.colorado.edu/philosophy/graduate/graduate-admissions/>) of the philosophy department's website.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Philosophy - Bachelor of Arts (BA) (p. 475).

Requirements

Degree Plans

Plan I: Thesis Option

The MA requires:

- 30 hours of approved graduate study at the 5000 level or above (philosophy courses taken below the 5000 level may be taken as PHIL 5810, with approval)
- demonstrated proficiency in the core areas of philosophy
- a successful thesis defense.

Four to six hours of the 30 credit hours must be thesis hours; the remaining 24 to 26 hours are for coursework credit hours (typically eight courses). At least 18 hours must be philosophy courses (PHIL 6940 and PHIL 6950 do not count).

No more than 9 hours of credit may be transferred into the program from other graduate programs. Students who enter the MA program already holding an MA degree may not transfer into the program any credits that applied toward the MA degree already held.

Students must demonstrate competence in the core areas of philosophy by passing, with a grade of B or better, one graduate or upper-division course in each of the following three areas: history of philosophy, metaphysics and epistemology, and values.

Required Courses and Credit Hours

Code	Title	Credit Hours
Required Courses		
PHIL 6950	Master's Thesis	4-6
Electives		
One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Descartes to Kant).		3
PHIL 5010	Single Philosopher	
PHIL 5020	Topics in the History of Philosophy	
PHIL 6000	Seminar in the History of Philosophy	
One course in metaphysics and epistemology:		3
PHIL 5300	Philosophy of Mind	
PHIL 5340	Epistemology	
PHIL 5360	Metaphysics	
PHIL 5370	Free Will and Determinism	
PHIL 5400	Philosophy of Science	
PHIL 5490	Philosophy of Language	
PHIL 5550	Metaphysics and Epistemology Proseminar	

PHIL 6300	Seminar in Philosophy of Mind	
PHIL 6340	Seminar in Epistemology	
PHIL 6380	Seminar in Metaphysics	
PHIL 6400	Seminar in Philosophy of Science	
PHIL 6490	Seminar in Philosophy of Language	
One course in values:		3
PHIL 5100	Ethics	
PHIL 5110	Contemporary Moral Theory	
PHIL 5120	Philosophy and Animals	
PHIL 5150	Topics in Applied Ethics	
PHIL 5200	Contemporary Political Philosophy	
PHIL 5210	Philosophy and Social Policy	
PHIL 5230	Bioethics and Public Policy	
PHIL 5240	Seminar in Environmental Philosophy	
PHIL 5260	Philosophy of Law	
PHIL 5290	Topics in Values and Social Policy	
PHIL 5470	Probability and Rational Choice	
PHIL 5700	Aesthetics	
PHIL 6100	Seminar in Ethics	
PHIL 6200	Seminar in Social and Political Philosophy	
Other course as approved by the graduate director.		
Other electives to fulfill the 30-credit minimum:		15
PHIL 5030	Greek Philosophical Texts	
PHIL 5040	Latin Philosophical Texts	
PHIL 5440	Topics in Logic	
PHIL 5450	History and Philosophy of Physics	
PHIL 5460	Modal Logic	
PHIL 5600	Philosophy of Religion	
PHIL 5810	Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)	
PHIL 5840	Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)	
PHIL 6310	Issues and Methods in Cognitive Science	
PHIL 7415	Cognitive Science Research Practicum	
PHIL 7810	Topics in Cognitive Science	

Students must demonstrate competence in logic by earning a grade of B– or better in PHIL 2440 (Symbolic Logic), or an equivalent course, or in some more advanced logic course. Students may satisfy this requirement either by taking all the examinations in PHIL 2440 and averaging at least a B– or by earning at least a B– on the comprehensive final examination offered in that course each semester. Students may be exempted from this requirement by the Director of Graduate Studies if they have done suitable work in formal logic at other institutions, or in other departments at CU Boulder.

Total Credit Hours	28-30
--------------------	-------

Thesis and Oral Defense

Each student must prepare a thesis plan acceptable to the chair of his or her thesis committee and proceed to write the thesis, working as closely as necessary with the chair. At the appropriate time, the committee will convene to hold a final oral defense of the thesis. A copy of the thesis

must be furnished to each committee member at least two weeks prior to the scheduled date of the defense.

Plan II: Non-Thesis Option

The department will award a non-thesis MA to any student who has completed 36 credits of graduate-level coursework with a B+ average or better. Twenty-four hours of coursework must be in philosophy.

The student must also meet the standard logic requirement and take six credits in each of our three general areas: history of philosophy, metaphysics and epistemology, and values.

Standard restrictions on the number of credits earned from special topics and from independent study apply.

Required Courses and Credit Hours

Code	Title	Credit Hours
Electives		
One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Descartes to Kant).		3
PHIL 5010	Single Philosopher	
PHIL 5020	Topics in the History of Philosophy	
PHIL 6000	Seminar in the History of Philosophy	
One course in metaphysics and epistemology:		3
PHIL 5300	Philosophy of Mind	
PHIL 5340	Epistemology	
PHIL 5360	Metaphysics	
PHIL 5370	Free Will and Determinism	
PHIL 5400	Philosophy of Science	
PHIL 5490	Philosophy of Language	
PHIL 5550	Metaphysics and Epistemology Proseminar	
PHIL 6300	Seminar in Philosophy of Mind	
PHIL 6340	Seminar in Epistemology	
PHIL 6380	Seminar in Metaphysics	
PHIL 6400	Seminar in Philosophy of Science	
PHIL 6490	Seminar in Philosophy of Language	
One course in values:		3

PHIL 5470	Probability and Rational Choice	
PHIL 5700	Aesthetics	
PHIL 6100	Seminar in Ethics	
PHIL 6200	Seminar in Social and Political Philosophy	
Other course as approved by the graduate director.		

Other electives to fulfill the 36-credit minimum:

27

PHIL 5030	Greek Philosophical Texts
PHIL 5040	Latin Philosophical Texts
PHIL 5440	Topics in Logic
PHIL 5450	History and Philosophy of Physics
PHIL 5460	Modal Logic
PHIL 5600	Philosophy of Religion
PHIL 5800	Open Topics in Philosophy
PHIL 5810	Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)
PHIL 5840	Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)
PHIL 6310	Issues and Methods in Cognitive Science
PHIL 7415	Cognitive Science Research Practicum
PHIL 7425	Cognitive Science Research Practicum 2
PHIL 7810	Topics in Cognitive Science

Students must demonstrate competence in logic by earning a grade of B– or better in PHIL 2440 (Symbolic Logic), or an equivalent course, or in some more advanced logic course. Students may satisfy this requirement either by taking all the examinations in PHIL 2440 and averaging at least a B– or by earning at least a B– on the comprehensive final examination offered in that course each semester. Students may be exempted from this requirement by the Director of Graduate Studies if they have done suitable work in formal logic at other institutions, or in other departments at CU Boulder.

Total Credit Hours

36

Philosophy - Doctor of Philosophy (PhD)

The PhD program in philosophy at CU Boulder consists of approximately 2.5 years of coursework and 2.5–3.5 years of work on a dissertation, with 6 years of guaranteed funding. We are both a research and a teaching department; teaching appointments are not only the principal means of supporting graduate students but are also the way that we train graduate students for a career of teaching as well as doing research in philosophy.

Applicants for admission to the Graduate School for work toward a doctoral degree with a major in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the doctoral program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of doctoral dissertations on a wide range of topics. The department makes available teaching assistantships and then graduate part-time instructorships to its doctoral students and assists with job placement.

Students wishing to pursue doctoral work in philosophy should note the doctoral degree requirements (p. 990) and should consult the PhD program portion (<https://www.colorado.edu/philosophy/graduate/phd-program/>) and the Graduate Admissions portion (<https://www.colorado.edu/philosophy/graduate/graduate-admissions/>) of the Department of Philosophy website.

Requirements

- *Coursework:* Students must take a minimum of 45 hours of approved graduate study, in addition to the 30 hours of dissertation credit hours required by the Graduate School.
- *Distribution requirements:* 27 hours must be devoted to satisfying specific distribution requirements.
- *Language and technical requirement:* Students must satisfy any language and/or technical requirements that the department judges to be necessary given the area of the dissertation.
- *Logic:* Students must demonstrate proficiency in propositional and first-order logic
- *Diagnostic paper:* Students must submit a diagnostic paper, generally at the beginning of the third semester of graduate study.
- *Qualifying papers:* Students must submit a qualifying paper, generally at the beginning of the fifth semester of graduate study. Students may advance in the program only if the qualifying paper is judged acceptable by the examining committee and approved by the department.
- *Prospectus and oral examination:* After passing the qualifying paper, students must assemble a prospectus committee of five faculty members, including a Chair/Advisor and (typically) an outside member. Students must submit a written prospectus to this committee, who, after judging the prospectus acceptable, will conduct an oral exam on the prospectus and related topics.
- *Dissertation and oral defense:* Students must write a dissertation that is acceptable to the dissertation committee, and defend the dissertation in a public, oral defense at a time deemed appropriate by the committee.
- Students are expected to make reasonable progress toward the PhD, and will be evaluated by the department in this regard each spring.

For detailed requirements, consult the PhD section (<https://www.colorado.edu/philosophy/graduate/phd-program/>) of the department's website and especially the Official PhD Requirements and Additional Program Information (<https://www.colorado.edu/philosophy/phdreqs/>) (PDF).

Recommended Plan of Study

Ideally, PhD students in their first two years will take and complete three courses per semester, for a total of 12 courses (36 credit hours) by the end of the second year. The minimum number of courses PhD students can take to make good progress in the first two years of the program is five courses per year.

At the beginning of the third semester in the program, students turn in a diagnostic paper and will receive feedback from three faculty members.

At the beginning of the fifth semester in the program, students turn in the qualifying paper, which will be evaluated anonymously; this is a qualifying event that the student must pass in order to be considered for advancement to candidacy in the PhD program.

In the fifth semester, students continue to take courses in order to complete the required 45 credit hours (typically 15 courses). Ideally, students should have completed coursework by the end of their fifth semester and should then begin work on the prospectus.

Ideally, students will submit and defend their prospectus sometime in their sixth semester. Students are eligible to sign up for up to 10 dissertation hours before they pass their prospectus exam. The

remainder of the required 30 dissertation hours are used in the fourth and fifth (and possibly sixth) years in the program while completing the dissertation.

Physics

Graduate study and opportunities for basic research are offered in the areas of nuclear physics, theoretical physics, condensed matter physics, elementary particle physics, plasma physics, atomic and molecular physics, optical science and engineering, laser physics, fundamental measurements, liquid crystal science and technology, biophysics, quantum information science, and physics education research.

Doctoral programs in chemical physics and geophysics are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

Course code for this program is PHYS.

Master's Degree

- Physics - Master of Science (MS) (p. 1222)

Doctoral Degree

- Physics - Doctor of Philosophy (PhD) (p. 1222)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

PHYS 5030 (3) Intermediate Mathematical Physics 1

This course and its continuation, PHYS 5040, form a survey of classical mathematical physics. Studies complex variable theory and finite vector spaces, and includes topics in ordinary and partial differential equations, boundary value problems, potential theory, and Fourier analysis.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5030

Requisites: Restricted to graduate students only.

PHYS 5040 (3) Intermediate Mathematical Physics 2

Continuation of PHYS 5030. Includes group theory, special functions, integral transforms, integral equations and calculus of variations.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5040

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5030.

PHYS 5070 (3) Introduction to Computational Physics

Surveys methods and practices in programming and scientific computing for the study of physics, using the Python programming language. Core material will include data analysis and visualization, numerical solution of differential equations, working with large-scale remote computers, and general software skills such as debugging, version control, and collaborative tools. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

PHYS 5130 (3) Biological Electron Microscopy: Principles and Recent Advances

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4130

PHYS 5141 (3) Astrophysical and Space Plasmas

Covers magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5140

Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

PHYS 5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory). Department enforced prerequisite: PHYS 3310. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5150

Requisites: Restricted to graduate students only.

PHYS 5160 (3) Fundamentals of Optics and Lasers

Covers the basic physics of lasers. Topics include basics of optical resonators and gaussian beam propagation, stimulated emission, laser threshold conditions, laser linewidth, q-switching and mode locking of lasers, tuning of Cw lasers, and specifics of various common lasers.

Requisites: Restricted to graduate students only.

PHYS 5210 (3) Theoretical Mechanics

Variational principles, Lagrange's equations, Hamilton's equations, motion of rigid body, relativistic mechanics, transformation theory, continuum mechanics, small oscillations, Hamilton-Jacobi theory.

Requisites: Restricted to graduate students only.

PHYS 5250 (3) Introduction to Quantum Mechanics 1

Quantum phenomena, Ehrenfest theorem and relation to classical physics, applications to one-dimensional problems, operator techniques, angular momentum and its representations, bound states and hydrogen atom, and Stern-Gerlach experiment and spin and spinor wave function. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

Requisites: Restricted to graduate students only.

PHYS 5260 (3) Introduction to Quantum Mechanics 2

Symmetries and conservation laws, identical particle systems, approximation techniques (including time-dependent and time-independent perturbation theories and variational techniques) and their applications, scattering theory, radiative transitions, and helium atom.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5250.

PHYS 5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400 and ASTR 5400

Requisites: Restricted to graduate students only.

PHYS 5430 (3) Advanced Laboratory

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Department enforced prerequisites: PHYS 3330 and PHYS 3220 and PHYS 3320. Department enforced corequisites: PHYS 4410.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4430

Requisites: Restricted to graduate students only.

PHYS 5450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4450 and PHIL 4450 and PHIL 5450

Requisites: Restricted to graduate students only.

PHYS 5460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4460 and EDUC 4460 and EDUC 5460

Requisites: Restricted to graduate students only.

PHYS 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4550 and MCDB 4550 and MCDB 5500

PHYS 5560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4560 and MCDB 4560 and MCDB 5560

Grading Basis: Letter Grade

PHYS 5606 (3) Optics Laboratory

Consists of 13 optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers and holograms, and experimentation of fiber optics and Fourier optics.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5606

Recommended: Prerequisite undergraduate optics course such as PHYS 4510.

PHYS 5730 (3) Particle Physics

Introduces the properties of elementary particles, phenomenology of particle interactions, particle detector, particle accelerators, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, symmetries and symmetry breaking.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites undergraduate courses in quantum mechanics and electricity and magnetism.

PHYS 5770 (3) Gravitational Theory (Theory of General Relativity)

Presents Einstein's relativistic theory of gravitation from geometric viewpoint; gives applications to astrophysical problems (gravitational waves, stellar collapse, etc.). Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 3220 and PHYS 3320.

PHYS 5840 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 5970 (3) Seminar on Physical Methods in Biology

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, EELS, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, CAT), Fourier analysis, synchrotron radiation, EXAFS, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4970

Requisites: Restricted to graduate students only.

PHYS 6260 (3) Geometry of Quantum Fields and Strings

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories.

Equivalent - Duplicate Degree Credit Not Granted: MATH 6260

Recommended: Prerequisites MATH 6230 and PHYS 5250 and MATH 6240 and PHYS 7280.

PHYS 6610 (3) Earth and Planetary Physics 1

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and ASTR 6610

Requisites: Restricted to graduate students only.

PHYS 6620 (3) Earth and Planetary Physics 2

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6620 and ASTR 6620

Requisites: Restricted to graduate students only.

PHYS 6630 (3) Earth and Planetary Physics 3

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and ASTR 6630

Requisites: Restricted to graduate students only.

PHYS 6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and GEOL 6650

Requisites: Restricted to graduate students only.

PHYS 6655 (3) InSAR Processing and Interpretation

Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6655

Grading Basis: Letter Grade

PHYS 6670 (2) Geophysical Inverse Theory

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6670

Requisites: Restricted to graduate students only.

Recommended: Prerequisites a course in calculus and a course in computer programming (any language).

PHYS 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

PHYS 6950 (1-6) Master's Thesis

Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and development work. Work of an original nature expected.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHYS 7160 (3) Intermediate Plasma Physics

Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation- ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 7160

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5150.

PHYS 7230 (3) Statistical Mechanics

Classical and quantum statistical theory, including study of both equilibrium and nonequilibrium systems. Topics covered include kinetic theory, degenerate gases, macrocanonical and grand canonical ensembles, and irreversible processes. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

Requisites: Restricted to graduate students only.

PHYS 7240 (3) Advanced Statistical Mechanics

Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7230.

PHYS 7250 (3) Quantum Many Body Theory

Theory of quantum many body systems, including methods based on Green's functions, Feynman diagrams, and coherent state path integral with applications to interacting quantum gases, superconductivity and superfluidity, quantum phase transitions, quantum magnetism, quantum motion in the presence of disorder, and topological states of matter.

Requisites: Restricted to graduate students only.

PHYS 7270 (3) Introduction to Quantum Mechanics 3

Radiation theory; relativistic wave equations with simple applications; introduction to field theory and second quantization.

Requisites: Restricted to graduate students only.

PHYS 7280 (3) Advanced Quantum Theory

Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7270 or instructor consent required.

PHYS 7310 (3) Electromagnetic Theory 1

Sophisticated approach to electrostatics, boundary value problems, magnetostatics, applications of Maxwell's equations to electromagnetic wave propagation, wave guides, and resonant cavities and magnetohydrodynamics.

Requisites: Restricted to graduate students only.

PHYS 7320 (3) Electromagnetic Theory 2

Continuation of PHYS 7310. Topics include relativistic particle dynamics; radiation by moving charges; multiple fields; radiation damping and self-fields of a particle; collisions between charged particles and energy loss; radiative processes; and classical field theory.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7310.

PHYS 7430 (3) Soften Condensed Matter Physics

Introduces the science of liquid crystals, polymers, biological membranes, biopolymers, block copolymers, molecular monolayers, colloids, nanoparticle suspensions, emulsions, foams, gels, elastomers and other soft materials. Topics vary from semester to semester and is geared toward graduate students with diverse preparation backgrounds, including students from the Department of Physics, as well as other science and engineering departments.

Requisites: Restricted to graduate students only.

PHYS 7440 (3) Theory of the Solid State

Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity.

Requisites: Restricted to graduate students only.

PHYS 7450 (3) Theory of Solid State 2

Second semester of condensed matter physics, covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity and other topics at the discretion of the instructor.

Requisites: Restricted to graduate students only.

PHYS 7550 (3) Atomic and Molecular Spectra

Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.

Requisites: Restricted to graduate students only.

PHYS 7560 (3) Quantum Optics

Covers quantum optical and atomic systems including topics such as: coherent and squeezed states, theory of optical coherence, atom-radiation interaction, optical Bloch equations, open quantum systems, dynamics on the Bloch sphere, resonance fluorescence, beam-splitters and interferometry, entanglement and quantum information.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 3220 and PHYS 4410.

PHYS 7570 (3) Quantum Information and Computing

Covers the foundations of quantum information and computing. Includes bits and qubits, entanglement, quantum algorithms, and quantum error correction. More advanced topics selected from: Quantum Shannon theory, quantum communication and networks, quantum-enhanced measurements, and quantum simulation. Department enforced prerequisite: PHYS 5250.

Requisites: Restricted to graduate students only.

PHYS 7650 (3) Nonlinear and Nano-Optics

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include: description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their integration, measurement and manipulation and their use in applications including spectroscopy.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 4510 or PHYS 5160.

PHYS 7660 (3) Ultrafast Optics

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their generation, measurement and manipulation and their use in applications including spectroscopy. Department enforced prerequisite: PHYS 5160, or PHYS 4510, or ECEN 5645.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

PHYS 7730 (3) Theory of Elementary Particles

Systematics of elementary particles, leptons, quarks, gauge bosons, symmetries and symmetry breaking, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.

Requisites: Restricted to graduate students only.

PHYS 7810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHYS 7820 (3) Topics in Scientific Writing

Teaches strategies used in scientific writing with emphasis on problem statement, audience analysis and principles of sound argument; reviews and reinforces essential writing skills, stressing the need for careful and strategic revision; provides experience in writing academic and professional communications; presentation skills and proposal writing. Most appropriate for students beginning to write journal articles, Comps II paper, or dissertation chapter.

Requisites: Restricted to graduate students only.

PHYS 7830 (1) Plasma Seminar

One credit 'journal club' style course covering current and significant historical advances in plasma physics research. Each week the class is assigned a journal article to read in advance of the meeting and one student is selected (on a rotating basis) to present a synopsis and lead a round-table discussion. Cannot be used for minimum credit hour requirements of graduate program. See also PHYS 7810 and PHYS 7820. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

PHYS 7840 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 7850 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Physics - Master of Science (MS)

Students may obtain a master's degree as either an undergraduate student through the bachelor's–accelerated master's degree program or as a graduate student.

Graduate students are generally only admitted to the PhD program in physics. Therefore, graduate students who have completed their PhD comprehensive exam or who are unable to complete the PhD program may earn an MS degree en route to a PhD degree. In certain circumstances, students can be admitted to the graduate program for a terminal master's degree, in which case the prerequisites are the same as for the doctoral program.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degrees:

- Physics - Bachelor of Arts (BA) (p. 488)
- Engineering Physics - Bachelor of Science (BSEP) (p. 821)

Requirements

Qualifying Examination

The Graduate Record Examination (GRE) aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

Course Requirements

There are two separate plans for obtaining the master's degree, both of which require a total of 30 credit hours with a grade of B- or better at the 5000 level or above (up to 6 credit hours may be at the 3000 or 4000 level if approved by the physics graduate chair). All but 3 credit hours must be in physics (more credit hours may be allowed with permission of the physics graduate chair). A minimum of a B average (GPA of 3.0) must be maintained.

Degree Plans

Plan I: Thesis Option

This plan requires 4–6 thesis credit hours and completion of five of the following courses with a grade of B- or better.

Code	Title	Credit Hours
Required Courses		
Select five of the following courses:		15
PHYS 5250	Introduction to Quantum Mechanics 1	
PHYS 5260	Introduction to Quantum Mechanics 2	
PHYS 7310	Electromagnetic Theory 1	
PHYS 7320	Electromagnetic Theory 2	
PHYS 5210	Theoretical Mechanics	
PHYS 7230	Statistical Mechanics	
Total Credit Hours		15

The student must write a thesis and present a talk to a three-member faculty committee.

Plan II: Non-Thesis Option

This plan requires completion of five of the following courses with a grade of B- or better.

Code	Title	Credit Hours
Required Courses		
Select five of the following courses:		15
PHYS 5250	Introduction to Quantum Mechanics 1	
PHYS 5260	Introduction to Quantum Mechanics 2	
PHYS 7310	Electromagnetic Theory 1	
PHYS 7320	Electromagnetic Theory 2	
PHYS 5210	Theoretical Mechanics	
PHYS 7230	Statistical Mechanics	
Total Credit Hours		15

The student must pass the comprehensive exam II, which is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question and answer oral session.

Physics - Doctor of Philosophy (PhD)

Graduate study and opportunities for basic research are offered in the areas of nuclear physics, theoretical physics, condensed matter physics, elementary particle physics, plasma physics, atomic and molecular physics, optical science and engineering, laser physics, fundamental measurements, liquid crystal science and technology, biophysics, quantum information science, and physics education research.

Doctoral programs in chemical physics (catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/chemical-physics-doctor-philosophy-phd/) and geophysics (p. 1154) are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

Requirements

Prerequisites

Entering graduate students must have a thorough undergraduate preparation in physics, equivalent to an undergraduate physics major at a recognized college or university. This preparation includes courses in general physics, analytical mechanics, electricity and magnetism,

thermodynamics, quantum mechanics, atomic physics and mathematics through differential equations and complex variables.

Students wishing to pursue graduate work in physics leading to candidacy for an advanced degree should carefully read the Doctoral Degree Requirements (p. 990) section of this catalog.

Qualifying Examination

The Graduate Record Examination aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

Course Requirements

To earn a PhD, candidates must complete 30 credit hours of graduate courses and 30 hours of dissertation credit. At least 27 of the 30 credit hours of coursework must be physics courses at the 5000 level or above; exceptions may be granted with the discretion of the associate chair of graduate studies. All courses, required or otherwise, must be passed with a grade of B- or better, and a course may be repeated only once.

Comprehensive Examination

The comprehensive examination is divided into three parts. Part I consists of passing any five of the following six courses with a B- or better.

Code	Title	Credit Hours
PHYS 5210	Theoretical Mechanics	3
PHYS 7230	Statistical Mechanics	3
PHYS 5250 & PHYS 5260	Introduction to Quantum Mechanics 1 and Introduction to Quantum Mechanics 2	6
PHYS 7310 & PHYS 7320	Electromagnetic Theory 1 and Electromagnetic Theory 2	6

The associate chair may waive courses for students with graduate-level equivalents. Students who are enrolled in Applied Physics Tracks have different course requirements than listed above. See the Applied Physics Tracks Requirements page (<https://www.colorado.edu/physics/academics/graduate-students/graduate-program-requirements-phd/graduate-tracks-applied-physics-and/>) on the Department of Physics website for more information. Part II is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question-and-answer oral session. Part III consists of a thesis prospectus presented to the thesis committee.

Part II of the comprehensive examination must be taken after successful completion of Part I, but no later than the student's sixth enrolled regular semester. Part III must be completed prior to the completion of the student's fourth year. Parts II and III of the comprehensive examination may be taken a second time, no more than one semester after the first attempt.

Language Requirement

The department has no requirement in foreign languages.

Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative

politics, international relations, public policy, political theory and empirical theory and methodology. The department's mission is to understand the political world and to equip students and their community with the skills for a lifetime of inquiry and engagement.

Course code for this program is PSCI.

Doctoral Degree

- Political Science - Doctor of Philosophy (PhD) (p. 1230)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adler, Edward Scott (https://experts.colorado.edu/display/fisid_108903/)
Professor; PhD, Columbia University

Andersson, Krister Par (https://experts.colorado.edu/display/fisid_140076/)
Professor; PhD, Indiana University Bloomington

Aydin, Aysegul (https://experts.colorado.edu/display/fisid_143789/)

Young, Gregory D. (https://experts.colorado.edu/display/fisid_143374/)
Instructor; PhD, University of Colorado Boulder

Courses

PSCI 6851 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831 and SOCY 6851

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

PSCI 6948 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

PSCI 7002 (3) Seminar in West European Politics

Examines West European politics in terms of general theories of comparative politics, including institutional, behavioral and political economy approaches.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7004 (3) Seminar: Political Theory

Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Political Theory

PSCI 7008 (1) Teaching Political Science

Designed to prepare graduate student teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline-specific education.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Additional Information: Departmental Category: General

PSCI 7011 (3) Seminar: American Politics

Core field seminar for students of American politics. Course work emphasizes the diversity of contemporary research on American political history, political institutions, and political behavior.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7012 (3) Seminar: Comparative Political Systems

Discusses current literature on comparative politics including theoretical and methodological issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7013 (3) Seminar: International Relations

Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7021 (3) Latinos and U.S. Politics

Examines in depth the theoretical and empirical literature assessing the political situation and activities of Latinos (Mexican Americans, Puerto Ricans, Cuban Americans, and others) in the U.S. Stresses original research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7022 (3) Seminar in Political and Economic Development

Covers domestic political and economic development in Latin America, Africa, and Asia, as well as interactions with the global economy. Includes defining, explaining, and prescribing policies for successful development, and comparing the experiences of developing and industrialized countries.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7024 (3) Seminar: Selected Political Theories

Familiarizes students with selected political philosophies or theories in classical or modern political thought.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Political Theory

PSCI 7028 (1) Teaching Political Science 2

Second course designed to train graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline specific education.

Requisites: Requires prerequisite course of PSCI 7008 (minimum grade D-). Restricted to Political Science (PSCI) graduate students only.

Additional Information: Departmental Category: General

PSCI 7031 (3) Seminar: Political Attitudes and Behavior

Provides an intensive examination of topics in political attitudes and behavior such as political participation, ideology, voting, and elite behavior. Reviews methodology of behavioral research and introduces ICPSR data archive and computer-based research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7032 (3) Seminar: Latin American Politics

Stresses intensive study of the political process in Latin America with special emphasis on democratization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7043 (3) Seminar: Problems of International Organization

Studies selected problems concerning administration and operation of public international organizations, including the United Nations and its specialized agencies. Considers decision making, executive leadership, internal organization, personnel policies, coordination of activities, and financing.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7046 (3) Seminar: Urban Public Policy

Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Policy

PSCI 7051 (3) Seminar: The United States Congress

Comprehensively examines literature and selected research topics concerning the United States Congress.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7052 (3) Democracy & Authoritarianism

Examine differences between democracies and authoritarian regimes; the choices and the consequences of democratic institutions in authoritarian regimes; and the causes of authoritarian survival and demise and the subsequent political choice.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PSCI 7012.

Additional Information: Departmental Category: Comparative

PSCI 7053 (3) War and Peace

Explores the conditions that promote conflict between countries, focusing on broad and systemic explanations of war and peace. Investigates classical as well as current behavioral approaches to understanding why countries fight.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7055 (3) Introductory Game Theory

Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7056 (3) Readings in Public Policy

Explores diverse approaches to policy choice, change, and learning processes. Overviews literature on policy determinants and typologies, policy subsystems, innovation and diffusion, agenda setting, implementation, problem definition and social construction, policy design, institutional analysis, and policy and democratic values.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Policy

PSCI 7062 (3) The Politics of Ethnicity

Explores the political aspects of pluralism, ethnonationalism, separatism, and related phenomena. Examines theories of ethnic mobilization, conflict, and accommodation in the context of political development and nation building. Includes cross-polity comparisons and case studies of multiethnic societies in the developed and developing world.

Requisites: Restricted to graduate students only.

Recommended: Requisite at least one course in comparative politics.

Additional Information: Departmental Category: Comparative

PSCI 7071 (3) Seminar: An Introduction to the Rule of Law

Introduces students to debates about the role of institutions, particularly but not exclusively legal institutions, in placing limits on the state and fostering the rule of law. What is law? Why do courts exist and what is their role in the state? What institutions are necessary to establish the rule of law? Why are institutions successful in some contexts and not others? Considers these questions by surveying classic and current research from American and comparative politics literatures on topics such as judicial independence, credible commitments, separation of powers and constitutional design.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7073 (3) Seminar: Global Political Economy

Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7075 (3) Scope and Methods of Political Science

Introduces students to research design, with a subsequent focus on professional development. Students learn about different styles of research, central methodological points surrounding (and differentiating) these styles, and standards for evaluating research, regardless of approach or content.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7085 (4) Introduction to Political Science Data Analysis

Provides intensive experience with quantitative techniques commonly employed in political science research, covering basic inferential and descriptive statistics through multiple regression. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7091 (3) Politics of Social Movements

Examines theoretical and empirical research on American social movements. Emphasizes the role of movements as political actors and their ability to bring about changes in public policy and national political institutions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7095 (3) Advanced Political Data Analysis

Provides advanced training in the statistical modeling of political relationships. Focuses on the properties and assumptions of the ordinary least squares regression model, building on material covered in PSCI 7085: Introduction to Political Science Data Analysis.

Requisites: Requires prerequisite course of PSCI 7085 (minimum grade B-). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7108 (3) Special Topics

Various topics not normally offered in the curriculum. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSCI 7111 (3) Seminar: American Political Institutions

Intensive examination of the structure and rules of different political institutions in the United States. Explores both the changing approaches to the study of American political institutions as well as many of the major research topics on the presidency, Congress, the judiciary, and the bureaucracy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7114 (3) Survey of Historical and Contemporary Political Theory

Examines major texts of Western political thought from the ancients through the 21st century. Introduces students to major schools of contemporary political theory, while situating these in their larger political context. Professionalizes students through presentations and research projects. Texts vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite some previous coursework in political theory or philosophy.

Additional Information: Departmental Category: Political Theory

PSCI 7115 (3) Qualitative Methods

Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7116 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5740

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Policy

PSCI 7123 (3) Civil Conflict

Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including the causes and consequences of civil war, protests, insurgency, terrorism, revolution, and intervention.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7124 (3) Contemporary Democratic Theory

Surveys major schools of contemporary democratic theory and introduces students to current scholarly debates about democracy and democratic politics. Professionalizes students through class presentations and research projects. Specific controversies and texts vary each semester.

Requisites: Restricted to graduate students only.

Recommended: Requisite some previous coursework in political theory or philosophy.

Additional Information: Departmental Category: Political Theory

PSCI 7126 (3) Introduction to Public Policy

Designed for graduate students specializing in the field of public policy in the political science program. Surveys a wide variety of approaches to the analysis and understanding of public policy. The course is not a survey of any particular set of substantive policy areas but instead is intended as an examination of the enduring puzzles that analysts of public policy commonly confront, the kinds of research methodologies that they employ, and a selection of the techniques that they bring to bear on their research questions.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7131 (3) Political Psychology

Focuses on the psychological roots of political behavior, including the origins of political beliefs, political decision-making processes, and the psychology of group interactions.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7132 (3) Comparative Political Economy

Explores the relationship between economics and politics in developed and developing countries. Gives students an historical overview of 20th century economic trends and covers scholarly approaches to topics such as political and economic institutions, economic ideas and interests, the political causes of growth and equality, globalization and the welfare state, and varieties of capitalism.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PSCI 7012.

Additional Information: Departmental Category: Comparative

PSCI 7136 (3) Public Policy and Behavioral Science

Public policy is usually designed with the assumption that we make optimal choices based on our own best interests. Findings from the behavioral sciences, however, challenge this traditional view and reveal that a wide array of factors influence our decisions. In this course, we will explore the gaps between how we assume individuals to behave and how people actually behave. With better knowledge of what motivates human behavior, we will examine and discuss how policy might be better designed and executed to improve outcomes in society.

Requisites: Restricted to graduate students only.

PSCI 7143 (3) Strategic Choice of Political Conflict

Explores the conditions under which political actors go to war, and the conditions under which they broker peace. Approaches political conflict from the perspective of strategic choice. Conflict is not an accident, but is the deliberate result of decisions by actors. Actors choose conflict when bargaining obstacles prevent them from reaching a peaceful agreement.

Requisites: Restricted to graduate students only.

PSCI 7145 (3) Advanced Game Theory

Covers more advanced applications of game theory in political science. Equips students with the skills to design and solve models at a reasonably high level of complexity and generality, and to understand how to effectively make use of such models in their research.

Requisites: Requires prerequisite course of PSCI 7055 (minimum grade B-). Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7151 (3) American Subnational Politics and Government

Provides a comprehensive overview of the issues and literature concerning American "Subnational" politics. Considers three bodies of literature: American federalism and intergovernmental relations, state politics, and urban/local politics. Also examines a number of policy issues.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7155 (3) Maximum Likelihood Estimation and Generalized Linear Models

Introduces maximum likelihood estimation and extends the linear model to several "generalized linear models." Provides students with the skills to analyze and understand a broad class of outcome variables and data structures such as dichotomous outcomes, counts, ordered and unordered categorical outcomes and bounded variables. Also examines several special topics such as multilevel models, causal inference and missing data.

Requisites: Requires prerequisite courses of PSCI 7075 and PSCI 7085 and PSCI 7095 (all minimum grade B-). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7165 (3) Experimental Methods

Focuses on the design, implementation, and analysis of experiments in political science, including lab experiments, survey experiments, and field experiments.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7171 (3) Seminar: Law and Democratic Governance

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8205

Recommended: Prerequisite PSCI 7011.

Additional Information: Departmental Category: American

PSCI 7172 (3) Comparative Political Institutions

Institutional theory has burgeoned across the social sciences in the last three decades. This course aims to raise awareness and understanding of institutional theory in comparative politics, as compared to alternative approaches such as political economy, political behavior, etc., and to help students develop skills to communicate this awareness and understanding to other professional political scientists.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7173 (3) The Politics of International Factor Flows

Focuses on the second dimension of international trade: the politics of international factor flows. Economic globalization can be defined as the freer flow of (1) goods and services (i.e., international trade) and (2) factors of production (e.g., capital and labor) across national borders. Links these topics in International Political Economy to broader theories of International Relations, namely Institutionalism and Liberalism.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7175 (3) Dissertation Seminar

Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7181 (3) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7615

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 7183 (3) International Cooperation

Investigates the origins, forms and consequences of international cooperation. The course covers both theoretical material related to international cooperation and various related global issue areas; security, economy, environment and social welfare. For each issue area, the key theoretical debates, empirical findings, as well as central challenges and parameters that constrain international cooperation will be investigated.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7185 (3) Political Network Analysis

Explores all aspects of political network analysis including disciplinary background, theories and concepts, approaches and applications, data basics and measurement, and techniques of analysis. Data assignments use software such as UCINET and R. Introduces visualization software including NetDraw, NetworkX and Cytoscape.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7191 (3) Law and Politics Colloquium: Race in America

A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8645

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7203 (3) Political Economy of International Migration and Policy

Provides an overview of the seminal and cutting edge research on the political economy of international migration including both immigration and emigration. Covers a diverse set of international migration issues, including public attitudes toward immigration, special interest politics of immigration policy making and the dynamics between political institutions and international migration.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Relations

PSCI 7206 (3) Public Policy and the Governance of Natural Resources

Addresses a basic empirical puzzle in comparative environmental policy: why are some governmental organizations able to create relatively functional governance arrangements for natural resources management, while many others fail to do so? More specifically, we will seek to understand the particular contextual conditions that make successful governance transformations more likely.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7222 (3) Comparative Political Behavior

Provides an introduction to research on behavioral processes and outcomes using readings mainly from the sub-fields of American Politics and Comparative Politics. Geographic emphasis leans toward advanced democracies because this is how behavioral research has generally developed but will also explore works by developing country experts. The main goals are to help students become familiar with the existing literature and to help them explore several key debates in the field.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7255 (3) Time Series and Pooled Time Series

Time series models and pooled time series (sometimes called cross-sectional time series or time series cross-sectional) models which utilize variation across both time and spatial units are very common in political science. While these models offer substantial leverage over important social science problems that use purely cross-sectional data, there are a number of pitfalls that are necessary to avoid during estimation.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite students should have a background in advanced regression statistics (such as PSCI 7085, PSCI 7095 and PSCI 7155).

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7306 (3) Program Evaluation

Focuses on applying the tools of causal inference and program evaluation to various policy issues. The course materials explore whether programs meet their desired goals. There are a number of ways in which the effectiveness of a program can be defined and measured. Empirical applications based on real-world data will be drawn from a wide range of policy areas, including education, welfare, unemployment, discrimination, health, immigration, the environment, and economic development. Previously offered as a special topics course.

PSCI 7901 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: American

PSCI 7902 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Comparative

PSCI 7903 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: International Relations

PSCI 7904 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Political Theory

PSCI 7905 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7906 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Public Policy

PSCI 7908 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSCI 8901 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American

PSCI 8902 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Comparative

PSCI 8903 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: International Relations

PSCI 8904 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Political Theory

PSCI 8905 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 8906 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Public Policy

PSCI 8908 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSCI 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: American

PSCI 8992 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Comparative

PSCI 8993 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: International Relations

PSCI 8994 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Political Theory

PSCI 8995 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 8996 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Public Policy

Political Science - Doctor of Philosophy (PhD)

The Department of Political Science at CU Boulder offers instruction and research in the art and science of politics. The department has a long tradition of excellence in training graduate students. A diverse faculty of nearly 30 professors trains graduate students to conduct original research in six areas of political science:

- American government and politics
- comparative politics
- international relations
- political theory
- public policy
- empirical theory and methodology

Admission is highly competitive, with approximately 10–12 new students enrolled each fall. This ensures a high faculty-to-student ratio and close mentoring opportunities. In addition, the department holds an outstanding placement record.

The department does not accept applications for a terminal MA in political science. Students in the PhD program earn an MA in political science after the completion of a successful qualifying paper and defense at the end of the second year in the program.

Requirements

The Department of Political Science PhD program includes coursework in six fields of study, a qualifying research paper and oral defense, comprehensive written and oral examinations, doctoral prospectus defense, final dissertation defense, and minimum 30 dissertation credit hours.

Students take a wide range of courses and demonstrate mastery of two different fields, the major (first field) and the minor (second field). Students take a minimum of three seminars in each field and at least three courses outside of their major and minor fields.

Students complete a minimum of 42 credit hours of coursework with a B average or better. Of these 42 credit hours, 39 must be at the 7000 level or higher and 35 credit hours must be taken in the Political Science Department. Students also take a minimum of 30 dissertation credit hours.

Students take additional coursework with the consideration that they will fulfill all requirements needed to complete the program. During the first semester in residence students are required to take three introductory courses:

- PSCI 7008 Teaching Political Science
- PSCI 7075 Scope and Methods of Political Science
- PSCI 7085 Introduction to Political Science Data Analysis

In addition, there are five majors with required core seminar coursework.

- American Politics Major - PSCI 7011 is required.
- Comparative Politics Major - PSCI 7012 is required.
- International Relations Major - PSCI 7XX3 is required (please identify an appropriate graduate seminar in consultation with your advisor).
- Political Theory Major - PSCI 7004 is required.
- Public Policy Major - PSCI 7126 is required.

As a condition of funding, all students appointed as graduate assistants are required to enroll in a minimum of 9 credit hours per semester for their first five semesters or until they have passed comprehensive exams.

Students wishing to pursue graduate work toward the degree should carefully read the Doctoral Degree Requirements (p. 990) section and review the courses listed in this catalog. Requirements for the political science graduate program are clarified in more detail on the department's PhD Requirements and Handbook (<http://www.colorado.edu/polisci/graduate/phd/>) webpage.

Time Limit

Full-time students are expected to complete all requirements for the PhD degree within five years of entering the program; the maximum time allowed by the Graduate School is six years.

Psychology and Neuroscience

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric, and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (<https://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/>) webpage.

Note: The department does not offer a terminal master's degree program.

Course codes for this program are PSYC and NRSC.

Doctoral Degrees

- Neuroscience - Doctor of Philosophy (PhD) (p. 1238)
- Psychology - Doctor of Philosophy (PhD) (p. 1239)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Allen, David Lehigh (https://experts.colorado.edu/display/fisid_114466/)
Senior Instructor; PhD, University of California, Los Angeles

Wilson, James R.
Professor Emeritus

Yuan, Lei
Assistant Professor

Courses

Neuroscience

NRSC 5015 (3) Affective Neuroscience

Experiencing and learning from affect–emotional value—is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4015

Requisites: Restricted to graduate students only.

NRSC 5032 (3) Neurobiology of Learning and Memory

Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4032

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective

Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4072

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5082 (3) Neural Circuits of Learning and Decision Making

Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4082

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

NRSC 5092 (3-4) Behavioral Neuroendocrinology

Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function. In addition to attending and meeting all the requirements for the lecture portion of the course, graduate students meet for an additional hour each week to discuss in depth behavioral neuroendocrinology relevant research articles.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4092

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5100 (3) Introduction to Neuroscience I

This first course in the year-long sequence of introduction to neuroscience provides an intensive introduction to the principles of neuroscience, covering detailed neuroanatomy, physiology, neurophysiology, neurochemical and developmental characteristics of the central nervous system. Structure-function relationships in sensory and motor systems are then explored with neuroanatomical and electrophysiological perspectives.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite, restricted to interdepartmental Neuroscience Program or instructor consent required.

NRSC 5110 (3) Introduction to Neuroscience II

Provides an intensive interdisciplinary introduction to the principles of neuroscience. It is a sequel to NRSC 5100. Provides a detailed overview of neurochemistry, neurodevelopment, neuromotor control, neurogenetics, and cognitive neuroscience. Open to undergraduates with instructor permission.

Requisites: Requires a prerequisite course of NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-).

NRSC 5132 (3) Neuropharmacology

Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4132

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

NRSC 5262 (3) Mammalian Neuroanatomy

Provides a detailed overview of peripheral and central nervous system connectional neuroanatomy targeted at delineating functional sensory, motor and motivational systems and the control of behavior and cognition. Emphasizes histological, anatomical and functional techniques employed in investigations of the nervous system. Formerly PSYC 5262.

Requisites: Requires a prerequisite course of NRSC 2100 or NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-).

Additional Information: Departmental Category: Biological

NRSC 5545 (3) Neurobiology of Addiction

Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4545

Requisites: Restricted to graduate students only.

NRSC 5911 (3) Teaching of Neuroscience

Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate with instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4911

Requisites: Restricted to graduate students only.

NRSC 6100 (2) Advances in Neuroscience Seminar

Designed for beginning graduate students interested in neuroscience. Students read, discuss, and evaluate the primary literature on a number of current topics in neuroscience as well as attend the seminar program in neuroscience.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

NRSC 6602 (1) Behavioral Neuroscience Professional Skills Development

Enrolled graduate students in the behavioral neuroscience program will be asked to prepare, present and receive feedback on scientific presentations of their own research or from review of a current research project.

Repeatable: Repeatable for up to 14.00 total credit hours.

Grading Basis: Letter Grade

NRSC 7102 (1-3) Topics in Neuroscience

Advanced seminar dealing with different specialized topics in neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

NRSC 7152 (3) Special Topics in Neuroscience V

Advanced seminar dealing with several different specialized topics in Neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-).

Psychology**PSYC 5052 (4) Behavioral Neuroscience**

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4052 and NRSC 4052 and NRSC 5052

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 5082 (2-3) Seminar: Biological Psychology

Special topics concerning biological bases of behavior. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of PSYC 4052 (minimum grade D-).

Additional Information: Departmental Category: Biological

PSYC 5102 (3) Introduction to Behavioral Genetics

Provides introduction to basic principles of genetics in the study of behavior, methods used to examine the influences of genes and environment on behavior and interpretation of studies using these methods.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 5112 (3) Concepts in Behavioral Genetics

Examines selected topics in greater detail than is possible in the comprehensive undergraduate course in behavioral genetics (PSYC 3102). Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics. Instructor consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Biological

PSYC 5122 (3) Quantitative Genetics

Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of mutation, migration, and selection. Also looks at correlations among relatives, heritability, inbreeding, crossbreeding, and selective breeding.

Additional Information: Departmental Category: Biological

PSYC 5131 (3) Affective Science

Core graduate course on affective science and fulfills APA Cognitive and Affective Aspects of Behavior Requirement. Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of emotions; cognitive and behavioral aspects of emotion; neurobiological mechanisms; development of emotion; and psychopathology and emotion.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: General

PSYC 5145 (4) Advanced Cognitive Psychology

Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4145

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 5175 (4) Computational Cognitive Neuroscience

Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4175

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and IPHY 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: General

PSYC 5232 (2) Molecular Genetics and Physiology

Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases. Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities.

Requisites: Requires a prerequisite course of PSYC 5200 or IPHY 5200 (minimum grade D-).

Additional Information: Departmental Category: Biological

PSYC 5242 (3) Biometrical Methods in Behavioral Genetics

Studies development of structural models appropriate to behavioral genetics and the estimation procedures necessary for their application.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 5423 (3) Research Problems in Clinical Psychology

Provides an overview of fundamental research methods relevant to clinical psychology, including literature synthesis, hypothesis formulation and study design, measure selection, and data analysis. Students will gain specific experience writing scientific papers and funding proposals. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 5433 (3) Adult Psychopathology

Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 5453 (3) Developmental Psychopathology

Examines the development of psychopathology across the lifespan, including etiological influences, neurobiological correlates, symptom presentation, and clinical diagnosis and intervention. Instructor consent required.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 5541 (1-6) Special Topics in Psychology

Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 5606 (3) Proseminar: Social-Personality Psychology

Provides a thorough introduction to methods and theories in social psychology concerned with topics such as the self, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, health and social psychology, and others. Instructor consent required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Social

PSYC 5656 (3) Advanced Graduate Research Methods

Provides training in the philosophical roots of empirical research, inference of causality, internal and external validity and reliability. These topics will be covered as they relate to a range of research designs including passive observational, experimental, quasi-experimental, meta-analytic and longitudinal. Additional topics include statistical inference and research ethics.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Social

PSYC 5665 (2) Perception and Attention Proseminar

Required proseminar for students in the Cognitive Psychology Ph.D. program. Provides an introduction to current thinking about sensory and perceptual processing, object recognition and attention. Students will read peer-reviewed journal articles and make class presentations on appropriate topics, including methods of data collection and analysis. Graduate students in all programs are welcome with instructor consent and advanced undergraduates are welcome with instructor consent.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Experimental

PSYC 5685 (2-3) Research Methods Proseminar

Main topic is research methods in cognitive psychology, with an emphasis on experimental methods. Skills and knowledge will be gained that are necessary to A) critically evaluate existing research and B) design, conduct, analyze and write up experimental studies. Required for graduate students in Cognitive Psychology. Graduate students in all programs are welcome with instructor consent and advanced undergraduates are welcome with instructor consent.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Experimental

PSYC 5695 (2) Memory Proseminar

Provides beginning Ph.D. students with a basic introduction to (primarily human) memory research. One of the six required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of experimental, theoretical, behavioral and cognitive neuroscience perspectives on memory. Graduate students in all programs are welcome with instructor consent and advanced undergraduates are welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 5741 (4) General Statistics

Surveys probability and statistics in psychology. Instructor consent required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 5751 (4) General Statistics

Continuation of PSYC 5741. Instructor consent required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 5761 (3) Structural Equation Modeling

Provides training in the use of structural equation modeling, a class of analytic techniques that include the estimation of unobserved, or latent, constructs and an estimation of relationships among latent constructs.

Recommended: Prerequisite successful completion of graduate level statistics.

Additional Information: Departmental Category: General

PSYC 5815 (2) Language Proseminar

Introduction to research on human language. A required proseminar for Cognitive Psychology Ph.D. students. Covers research at the cognitive, neural, and computational levels. Addresses phenomena at the levels of phonology, grammar, and meaning. Emphasizes interrelationships between language and other domains of cognition (perception, memory, executive function). Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Experimental

PSYC 5825 (2) Executive Function Proseminar

Provides beginning Ph.D. students with an introduction to the study of executive functions. Required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of working memory, inhibition, multi-tasking, monitoring, selection, lifespan changes and social/clinical applications at the cognitive, neural and computational levels. Graduate students in all programs are welcome with instructor consent and advanced undergraduates are welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 5835 (2) Thinking Proseminar

Provides beginning Ph.D. students with a basic introduction to research on complex human cognition, including reasoning, problem solving, decision making, analogy, concept learning and knowledge representation. Includes consideration of theoretical, behavioral and cognitive neuroscience perspectives. One of six proseminar modules required of students in the Cognitive Psychology Ph.D. program. Graduate students in all programs are welcome with instructor consent and advanced undergraduates are welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 6200 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 6603 (1) Professional Issues in Clinical Psychology

Covers a range of topics important for professional development in clinical psychology, including preparation and delivery of research presentations, preparation of grant proposals/manuscripts and practicum experience (i.e., interviewing and assessment, treatment planning, intervention and documentation). Intended to prepare students for careers as research scientists and clinicians. Instructor consent required.

Repeatable: Repeatable for up to 10.00 total credit hours.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 6605 (1) Cognitive Psychology Research Update

Provides summaries of current research by graduate students and faculty members in the Cognitive Psychology program in the Department of Psychology and Neuroscience. Professional Development issues relevant to cognitive psychologists will also be discussed. Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology (PSYC) and Neuroscience (NRSC) PhD Students only.

Grading Basis: Pass/Fail

PSYC 6606 (1) Professional Issues in Social Psychology

Covers a range of topics important for professional development in social psychology, including preparation and delivery of research presentations, preparation of grant proposals and manuscripts, and peer review of manuscripts. Intended to prepare students for careers as research scientists.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Social

PSYC 6761 (3) Topics in Advanced Structural Equations Modeling

Covers topics in advanced structural equation modeling, including modeling with nonlinear observed variables, latent variable interactions, longitudinal models, mixture models and transition analysis. Other topics will be covered by request.

Recommended: Prerequisite PSYC 5761.

Additional Information: Departmental Category: General

PSYC 6831 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6851 and PSCI 6851

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

PSYC 6841 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 6911 (1-3) Research Practicum

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: General

PSYC 6941 (1) Master's Candidate for Degree

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

PSYC 6951 (1-6) Master's Thesis

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSYC 7012 (1-3) Research in Behavioral Genetics

Individual research projects.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 7102 (2-3) Seminar: Behavioral Genetics

Intensive study of selected topics in behavioral genetics. Emphasizes recent research. Attention to both human and animal studies. Instructor consent required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 7215 (3) Seminar: Experimental Psychology

Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology. Instructor consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 7291 (3) Multivariate Analysis

Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory. Instructor consent required.

Additional Information: Departmental Category: General

PSYC 7315 (2) Advanced Research Seminar on Human Memory

Addresses topics in the experimental psychology of human memory. Specific content varies from semester to semester. Both theoretical issues and contemporary empirical work will be reviewed. Each student will be required to engage in laboratory work outside of class, which will include an original experiment. Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Additional Information: Departmental Category: Experimental

PSYC 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and SLHS 7418

Requisites: Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Experimental

PSYC 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and SLHS 7428

Requisites: Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 7536 (1-3) Personality and Social Psychology

Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and prejudice, social neuroscience, person perception, social psychology and the self, health and social psychology, race and ethnic identity, or social cognition.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Social

PSYC 7663 (1) Intellectual Assessment Laboratory

Practice administration of common intellectual and neuropsychological tests.

Requisites: Requires corequisite courses of PSYC 7683. Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7673 (3) Adult Psychotherapy

Provides an intensive introduction to the science and practice of psychological treatments for adult psychopathology. Will focus on selected treatments and address the relevant theoretical and empirical base for each approach and the specific principles and procedures utilized. Aim of course is for students to acquire both a scientific and applied knowledge of evidence-based practice in clinical psychology, with a focus on intervention for adult mental disorders. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 7683 (1-3) Intellectual Assessment, with Practicum, in Clinical Psychology

Focuses on administering and interpreting objective test commonly used in clinical psychology practice. Includes case study approach and direct clinical experience. Instructor consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7693 (3) Personality Measurement

Covers theory and basic applications of psychological assessment, with an emphasis on measurement theory and the assessment of psychopathology and personality. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 7703 (1-3) Seminar: Clinical Psychology

Selected topics in the area of clinical psychology. Instructor consent required.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7713 (1-3) Practicum in Clinical Psychology

Provides direct clinical experience for clinical graduate students only. Instructor consent required.

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the LCS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in LCS Cognitive Science Academic Programs.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Experimental

PSYC 7793 (1-3) Child Assessment Practicum

Allows students who have already learned adult assessment measures to broaden their knowledge and skills in order to complete psychoeducational evaluations with children. The course covers the background of common childhood disorders, general testing strategies with children, and specific test administration.

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisite PSYC 7683.

Additional Information: Departmental Category: Developmental

PSYC 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: General

Neuroscience - Doctor of Philosophy (PhD)

The neuroscience community at CU Boulder is made up of over 80 faculty and research associates rostered in 13 departments and institutes. Neuroscience activities on the campus are coordinated by the Center for Neuroscience.

The graduate PhD program in neuroscience is an interdepartmental program currently consisting of eight tracks to a PhD:

- Behavioral, Psychiatric and Statistical Genetics (Integrative Physiology, Psychology & Neuroscience)
- Behavioral Neuroscience (Psychology & Neuroscience)
- Clinical Neuroscience (Psychology & Neuroscience)
- Cognitive Neuroscience (Psychology & Neuroscience)
- Social Neuroscience (Psychology & Neuroscience)

- Integrative Physiological Neuroscience (Integrative Physiology)
- Molecular, Cellular and Developmental Neuroscience (Molecular, Cellular and Developmental Biology)
- Speech, Language and Hearing Neurosciences (Speech, Language and Hearing Sciences)

The neuroscience curriculum includes a year-long intensive core course, graduate seminar courses linked to an invited speaker series and wide-ranging neuroscience courses offered by many departments and institutes across campus.

Interested students are encouraged to visit the Center for Neuroscience (<https://www.colorado.edu/neuroscience/>) website, which provides detailed information on the program, application process, courses, faculty and current trainees.

Requirements

Admission Requirements

Students apply for admission to one of the participating departments, which determines whether to admit the student to CU Boulder and provide financial support. Once in residence, students enter the neuroscience PhD program while still maintaining their "home" in the department to which they were admitted. They receive a PhD that lists both their home department and neuroscience.

All students are admitted with the expectation that they will work toward the PhD degree. Many students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field; furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

Required Courses and Semester Credit Hours

Code	Title	Credit Hours
Required Neuroscience Core Courses		
NRSC 5100	Introduction to Neuroscience I	3
NRSC 5110	Introduction to Neuroscience II	3
NRSC 6100	Advances in Neuroscience Seminar (three semesters, 2 credits per semester)	6
Required Fundamentals of Neuroscience Depth Courses		
Choose a minimum of 3 additional neuroscience-related courses (2-3 credit hours per course). ¹		7-9
Neuroscience-Related Discipline Specialization		
Choose a sequence of courses that provides an advanced graduate-level specialization in a discipline that contributes to the field of neuroscience.		11
Total Credit Hours		30-32

¹ For a list of approved neuroscience courses, visit the Neuroscience PhD Program (<https://www.colorado.edu/neuroscience/graduate-education-neuroscience/>) webpage.

Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Potential applicants are encouraged to visit the Center for Neuroscience website, which provides detailed information on the program, application process, courses, faculty and current trainees.

Psychology - Doctor of Philosophy (PhD)

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (<http://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/>) webpage.

Note: The department does not offer a terminal master's degree program.

Requirements

All students are admitted with the expectation that they will work toward the PhD degree. Students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field. Furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, there is a first-year research requirement that starts the student on an active program of research. First-year graduate students typically enroll in a two-semester graduate statistical sequence. The student also must enroll in a sequence of courses designed to give exposure to various research topics and methods. In later years, a variety of advanced research seminars are taught on a regular basis.

Students complete a master's degree (MA) based on research and coursework completed within their first 2-3 years. Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Religious Studies

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to

approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Course codes for this program are RLST and SNSK.

Master's Degree

- Religious Studies - Master of Arts (MA) (p. 1242)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

RLST 5030 (3) Religions in America

Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4030

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5050 (3) Topics in Christian Studies

Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4050

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

RLST 5170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4170 and JWST 4170

Requisites: Restricted to graduate students only.

RLST 5180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4180 and JWST 4180

Requisites: Restricted to graduate students only.

RLST 5190 (3) Love and Desire

Explores debates about the following questions: what and whom should humans and gods love, and what role should passions play in religion? Examining traditions such as Judaism and Christianity, this course considers diverse views on topics including religion and sexuality, the promise and perils of loving gods and humans, and the relationship between love, politics, and violence.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4190 and JWST 4190

Requisites: Restricted to graduate students only.

RLST 5200 (3) Topics in Hinduism

Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4200

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 5210 (3) Advanced Readings in Sanskrit

Requires at least two years of prior Sanskrit training. Students will read texts in the original. Class time is devoted to parsing out difficult grammatical structures, discussing the philosophical import of the readings and addressing the historical contexts that assist in interpreting the texts. The topic varies according to student interest.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 2120 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

RLST 5250 (3) Topics in Buddhism

Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4250

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

RLST 5260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4260 and JWST 4260

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

RLST 5280 (3) Body and Magic in India

Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4280

Requisites: Restricted to graduate students only.

RLST 5300 (3) Topics in Native American Religions

Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown and fool; crisis cult movements.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4300

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 3 additional credit hours of RLST course work or instructor consent.

RLST 5350 (3) Native American Religions: Regional Studies

Studies religion(s) of a single native North American tribe or geographic region within context of history and culture of the tribe.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 additional credit hours of RLST course work or instructor consent.

RLST 5353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4353 and ETHN 4353 and ETHN 5353

Requisites: Restricted to graduate students only.

RLST 5650 (3) Islam in the Modern World

Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4650

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 credit hours of religious studies at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 5750 (3) Daoism

Traces the development of Daoism from its origin as an organized, communal religion in the second century CE to the vibrant living religion of today, encompassing meditative monastics, martial exorcists, solemn ritual masters and lay practitioners of inner alchemy and other self-cultivation techniques. Focuses on the extensive Daoist ritual tradition and the community of believers who created and used it.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4750 and CHIN 4750 and CHIN 5750

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 5780 (3) New Religions of East Asia

Explores the new religious movements of modern China, Japan, and Korea, which have arisen over the last century due to the influence of the West and in response to the pressures of modernization. Previous coursework in religious studies or Asian languages and civilizations is recommended.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4780

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 5820 (3) Interdisciplinary Seminar on Religion

Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4820

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5840 (1-6) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5850 (3) Gender in Hagiography

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4850 and WGST 4850

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 6110

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 6830 (3) Introduction to the Academic Study of Religion

Introduction to the graduate academic study of religion through the exploration of contemporary models and issues that demonstrate the nature and future of the field. Students prepares a profile of intended area of research.

Requisites: Restricted to graduate students only.

RLST 6840 (1-6) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

RLST 6945 (1-4) Portfolio: Non-Thesis Option

Course work finished or in the last semester.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

RLST 6950 (1-4) Master's Thesis

Requisites: Restricted to graduate students only.

Religious Studies - Master of Arts (MA)

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history,

texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia, and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Requirements

Course Requirements

The student must successfully complete 30 credit hours of academic work, at least 27 of which must be completed at the 5000 level or above. Up to 6 credit hours of coursework may be taken outside the department or transferred from another accredited institution, consistent with the student's special needs and interests and with the advisor's approval. Independent study credit hours shall not exceed 6 credit hours.

A graduate degree represents the mastery of a significant body of knowledge and interpretation within an academic discipline. A degree is not granted merely because a student completes a specific number of courses. The student is expected to acquire both breadth and depth in religious studies.

A student who has not completed at least 12 credit hours, or the equivalent, of undergraduate academic coursework directly related to the study of religion will be required to do remedial work to make up this deficit before beginning graduate study or, with the director of graduate studies' permission, after beginning the program. This can be done by attaining a grade of B or better in an appropriate 2000- or 3000-level course taken within the first year. Remedial courses may not be counted toward the degree.

Courses for each term must be approved by the student's faculty advisor and be in compliance with the requirements of the Graduate School where necessary. In order to register for any given term, the student must have the course of study for that term approved in writing by the advisor on the student's Record of Progress Toward the MA Degree Form. No changes can be made to registration without the advisor's approval.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
RLST 6830	Introduction to the Academic Study of Religion	3
RLST 6945 or RLST 6950	Portfolio: Non-Thesis Option Master's Thesis	3-6

Electives	24-21
Total Credit Hours	30

Residency Requirement

All students must fulfill the residency requirement. In general this can be fulfilled by either two full-time semesters or four part-time semesters of study. A full-time program is defined as 5 credit hours of coursework at the 5000 level or higher, 8 credit hours of total coursework or at least one credit hour of thesis research.

Degree Plans

In the second year of graduate study, students will select either the MA portfolio option or the MA portfolio with thesis option.

Plan I: Portfolio with Research Paper

Students selecting the portfolio with research paper option will take a 3-credit portfolio preparation course on secondary scholarship in a specific field (theoretical topic, geographic area or religious tradition) that will culminate with a portfolio defense. The portfolio defense, to be completed in accordance with the deadline set by the graduate school each semester, will involve a three-member committee, and will be overseen by the advisor.

Plan II: Portfolio with Thesis

Students selecting the portfolio with thesis option will take 6 credits of thesis coursework over two semesters (RLST 6950). The first semester of RLST 6950 (3 credit hours) will result in a thesis prospectus with the thesis committee. After successfully completing the prospectus defense, the student will enroll in the second semester of RLST 6950 (3 credit hours), which will result in the full portfolio defense, which includes defending the thesis.

Plans of Study

Plan I: Portfolio

	Credit Hours	6
	Total Credit Hours	30

(Note: Students who have not already established Colorado residency at the time they begin the program may wish to consider taking 12 credits during their first year and 18 credits during their second year.)

Dual Degree Programs

The Department of Religious Studies also participates in a dual master's degree program with the Departments of History and Asian Languages and Civilizations. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

For more information visit the department's Dual MA (<https://www.colorado.edu/rlst/graduate/dual-ma/>) webpage.

Sociology

The graduate program in the Department of Sociology at CU Boulder seeks to train creative and productive scholars and teachers. The department maintains a strong emphasis in the theories and methods of the discipline while specializing in the following areas:

- Criminology
- Cultural Sociology
- Environment, Hazards and Disasters
- Gender and Sexuality
- Health and Medicine
- Life Course, Aging and Youth
- Political Economy
- Population
- Race and Ethnicity
- Social Psychology and Emotions

The department offers a PhD program focusing on teaching, researching and training in theory and methods. It does not, however, offer a separate

MA program. More information about program specifics can be found in the Graduate Handbook (<http://www.colorado.edu/sociology/students/graduate-students/resources/>).

Graduate students will meet with faculty advisors during their time at CU Boulder to foster social integration at the university as well as research interests. Financial support is given to students serving as teaching assistants (TAs). A teaching assistantship is a fulfilling position that allows students to further their understanding of a specific area of study while gaining knowledge in instructing at the university level.

Additionally, advanced graduate students are encouraged to teach their own courses as graduate part-time instructors (GPTIs). The department encourages graduate students to pursue opportunities for funded research wherever possible and supports the efforts of other university units in which students may seek financial support for their research, such as the Institute of Behavioral Science. Aside from teaching and research, CU Boulder offers a wide array of courses for graduate students taught by a diverse and well-regarded faculty.

Course code for this program is SOCY.

Doctoral Degree

- Sociology - Doctor of Philosophy (PhD) (p. 1248)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

SOCY 5031 (3) Research Design

Principles and practice of social research, including the nature of scientific explanation, the relationship between theory and research, research design, measurement problems, sampling questionnaire construction, interviewing, ethnographic methods, and statistical analysis.

Additional Information: Departmental Category: General Sociology

SOCY 5037 (3) Hazards, Disasters and Society

Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, key issues in the sociological study of disasters, social vulnerability, the impacts of disasters in the U.S. and worldwide and the U.S. Emergency Management System.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4037

Additional Information: Departmental Category: Environment and Society

SOCY 5071 (3) Social Stratification

Studies theories of class, ethnic, sex, and age stratification. Examines social inequality in the United States and analyzes the resulting conflicts.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4071

Additional Information: Departmental Category: General Sociology

SOCY 5111 (3) Data 1: Introduction to Social Statistics

Introduces statistical analysis in the social sciences. Introduces basic techniques of inferential statistics and several bivariate statistical techniques including t-test for the difference in means, chi-square independence, analysis of variance (ANOVA), correlation, and simple regression (OLS). Prepares students for the required course on multivariate regression techniques (Data 2).

Requisites: Restricted to Sociology (SOCY) graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 5181 (3) Logics of Qualitative Inquiry

A required first-year seminar that introduces the logics of qualitative inquiry in sociology. Introduces the history of qualitative epistemology. Considers the logic of common qualitative methodologies and qualitative research representations. Engages with the logics of inquiry in classic and more recent well regarded qualitative sociological works.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Sociology

SOCY 5201 (3) Graduate Seminar in Sociological Theory

Examines theoretical approaches to core issues and problems in sociology, including the nature of society, the relationship between society and the individual, the role of culture and social structure, the sources of social power, and the conceptual structure of sociological knowledge itself.

Requisites: Restricted to Sociology (SOCY) graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 5202 (3) Graduate Seminar in Contemporary Theory

Examines selected sociological theories considered contemporary, including but not limited to cultural sociology, feminist theory, postcolonial thought, actor-network theory, microsociology, field theory, and poststructuralism. Discusses the formation of a sociological canon and the challenge of categorizing theory. Considers the process of theorizing as an acquired skill. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

SOCY 5350 (3) Comparison, Narrative, Meaning, and Method in Historical Sociology

Examines the comparative, narrative, and interpretive methods historical sociologists use when investigating temporally unfolding social processes occurring in the recent or distant past. Through an introduction to the methodological literature and a close reading of exemplary historical research, students will learn to (a) critically evaluate historical sociological research and (b) design methodologically sophisticated historical research projects that address questions that most interest them, potentially incorporating ethnographic and/or quantitative methods into their research designs. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

SOCY 5611 (3) Teaching in Sociology

Learn how to teach sociology more effectively while developing a new content area and a clearer sense of the field. Choose a content area within sociology as the basis for planning a course and developing and practicing different teaching techniques. Department enforced prerequisite: enrollment in the Sociology graduate program.

Additional Information: Departmental Category: General Sociology

SOCY 5750 (3) Climate Politics and Science-Policy

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750, GEOG 5750 and ENVS 5750

Grading Basis: Letter Grade

SOCY 5841 (1-6) Independent Study in Sociology

Graduate variable credit. Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Sociology

SOCY 5937 (1-6) Graduate Research Internship in Environmental Sociology

Offers the opportunity for sociology graduate students specializing in environmental sociology to work with local governmental or non-profit organizations on research assignments. The research topic, academic reading list, and expectations for the final project will be developed collaboratively with a faculty sponsor and organizational representative.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Environment and Society

SOCY 6004 (3) Topics in Criminology

Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 6007 (3) Foundations of Environmental Sociology

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 6007

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 6012 (3) Population Issues, Problems, and Policies

Presents contemporary perspectives on relations between population and society. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies.

Additional Information: Departmental Category: Population and Health Issue

SOCY 6016 (3) Topics in Sex and Gender

Covers diverse specializations of faculty in the area of sex and gender. See current departmental announcements or online Schedule Planner for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sex and Gender

SOCY 6017 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between a) inequality and democratic decision making and b) undemocratic economic and political decision making, U.S. and corporate food and energy policy; and global environmental degradation. Focus will also be placed on the role that global inequality plays in fostering environmental degradation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 6041 (3) Cultural Sociology

Explores "the cultural turn" in sociology and related disciplines.

Reviews basic themes in cultural studies: distinguishing "cultural" and "social"; narrative as catalyst between symbols and practices; cultural production processes; self as embodied; culture and power; methods and epistemological issues. Students present their own projects in class and as research papers.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6111 (3) Data 2: Data Analysis

Introduces students to mainstream multivariate regression techniques used in the social sciences. The majority of the course focuses on the Ordinary Least Square model and on the extension of this model to nominal, ordinal and count dependent variables. Students analyze data of their choosing with statistical software packages including SPSS, SAS, and STATA. Department prerequisite: SOCY 5111 or equivalent.

Additional Information: Departmental Category: General Sociology

SOCY 6121 (3) Qualitative Methods

Training in the systematic observation of people in situations, finding them where they are, staying with them in a role acceptable to them that allows intimate observations of behavior. Students report their findings in ways useful to social science but not harmful to those observed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6821 (1-2) Graduate Sociology Forum 1

Introduces first-year graduate students to the full range of substantive topics, research programs, and other projects in which graduate sociology faculty are engaged. Provides a forum in which issues of the discipline are presented and discussed. Features weekly presentations by graduate sociology faculty.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6831 (1) Graduate Professional Seminar

Offers guidance and instruction on topics related to advanced graduate study and academic life beyond graduation. Discussions will include writing journal articles; creating a vitae; writing dissertations; applying for grants and other sources of funding; the academic job search; and what to expect as a junior faculty member.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6841 (1-6) Guided Research in Sociology

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6851 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831 and PSCI 6851

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Sociology

SOCY 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course

This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).

Equivalent - Duplicate Degree Credit Not Granted: LING 6861

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

SOCY 6941 (1) Master's Candidate for Degree

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Sociology

SOCY 6951 (1-6) Master's Thesis

Additional Information: Departmental Category: General Sociology

SOCY 7002 (3) Social Disparities in Health

Presents social disparities in health in their social context. Includes the sociology of health behavior; links between health status and social statuses including gender, race, ethnicity, and socioeconomic status; fundamental causes and other explanations for social disparities in health; environment and health; health insurance disparities; the physician-patient interaction and its consequences.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Population and Health Issue

SOCY 7004 (3) Criminological Theory

Examines the major criminological theories of the 18th through 21st centuries in Europe, Australia, and the U.S. Emphasizes the historical contexts and paradigms of knowledge influencing these theories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7006 (3) Sociology of Sex and Gender

Theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture.

Additional Information: Departmental Category: Sex and Gender

SOCY 7012 (3) The Social Demography of Race

Introduction to relevant, timely research within sociological and social demographic research on race and ethnicity. Specific areas will include conceptual/measurement issues; population size, growth, and migration; health and mortality; marriage, family, and fertility; socioeconomic context; and policy considerations. Course content will be structured around current empirical pieces in sociology literature with emphasis on methodological approach in analyses.

Additional Information: Departmental Category: Population and Health Issue

SOCY 7014 (3) Gender, Race, Class, and Crime

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 6014

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7017 (3) Population and Environment

Reviews research on human-environment interactions, with a focus on ways in which demographic processes influence, and are influenced by, the environmental context. Specific topics include conceptual and analytical frameworks; methodologies; intervening factors shaping human dimensions of environmental change; and regionally-focused research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 7024 (3) Punishment and Social Control

Exploration of sociological perspectives on the criminal justice process. Considers organization of criminal law responses, including enforcing and sentencing. Race, class, gender, and age differences in treatment and sentencing are analyzed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7026 (3) Feminist Research Methods

Epistemological and methodological issues generated by feminist research and students' own projects.

Additional Information: Departmental Category: Sex and Gender

SOCY 7034 (3) Capital Punishment in the United States

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7036 (3) Feminist Theory

Examines the main schools of feminist thought and their impact upon sociological theories. Also examines current feminist theoretical debates and their relevance to feminist sociology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sex and Gender

SOCY 7111 (3) Data III--Advanced Data Analysis

Denotes third graduate course in sequence of quantitative methods. Following basic inferential statistics (SOCY 5111) and multivariate regression analysis (SOCY 6111), students study advanced statistical techniques such as event history analysis, multilevel modeling, structural equation modeling, and latent class analysis.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires a prerequisite course of SOCY 6111 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 7121 (3) Qualitative Analysis

Drawing on data gathered through participation, observation and in-depth interviewing, students focus on developing theoretical analyses and exploring classical and post-modern ethnographic writing formats. Students present and revise their papers as well as review journal articles. Department enforced prerequisite: SOCY 6121.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 7131 (3) Seminar in Social Psychology

Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms, and conformity.

Additional Information: Departmental Category: General Sociology

SOCY 7141 (3) Third-year Paper Seminar

Guides graduate students through the creation of the required third-year paper and helps establish productive writing habits. Includes assigned readings, discussion, peer review, and specific tasks related to scholarly writing. Students will revise and defend the paper during the semester following the seminar. Department enforced prereqs., SOCY 5111 and SOCY 5201.

Requisites: Restricted to Sociology (SOCY) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Sociology

SOCY 7171 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: General Sociology

Sociology - Doctor of Philosophy (PhD)

Our program offers solid training in the foundational theories and methods of the discipline and allows students the flexibility to pursue interests in a variety of specialty areas. The Department of Sociology at CU Boulder is a well-respected center for teaching and research. Here students can work with award-winning faculty members who have been recognized for their research, teaching and service.

The Department of Sociology strives to maintain a diverse mix of graduate students, promote respect for and opportunities to learn from others with a broad range of backgrounds and experiences, and otherwise promote inclusive excellence. By providing a variety of perspectives, a diverse student body enhances students' educational experiences and strengthens our research and outreach endeavors.

We offer the following areas of specialization:

- criminology
- cultural sociology
- environment, hazards and disasters
- gender and sexuality
- health and medicine
- life course, aging and youth
- political economy
- population

- race and ethnicity
- social psychology and emotions

Community

The department views the recruitment and retention of an inclusive and diverse student body as an essential component of a successful graduate program. Besides enhancing the quality of our program by bringing a larger diversity of experience to it, recruitment and retention of students from many different backgrounds and experiences will increase the diversity in the profession of sociology overall. Our department is committed to improving the diversity of the student body and the graduate program experience.

Students are encouraged to become involved in CU Boulder's United Government of Graduate Students (UGGS) (<http://www.colorado.edu/uggs/about-uggs/>). UGGS is committed to enhancing the graduate student experience by interacting with the university administration on matters such as financial aid, etc. UGGS has worked with the Graduate School to develop the Graduate Student Bill of Rights and Responsibilities (<http://www.colorado.edu/uggs/sites/default/files/attached-files/Graduate%20Student%20Bill%20of%20Rights%20and%20Responsibilities.pdf>).

Requirements

Students must complete a total of 45 credit hours of coursework before taking the specialty area comprehensive exam. At least 24 hours must be in the Department of Sociology on the Boulder campus. All courses taken within the Department of Sociology must be numbered 5000 or above to qualify for graduate credit.

All first-year coursework must be completed with at least a 3.50 GPA and no grade lower than a B to continue into the second year.

At the end of the first and second years, faculty members teaching required courses, faculty mentors/advisors and faculty supervising teaching assistants conduct a review of students' progress.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
SOCY 5031	Research Design	3
SOCY 5111	Data 1: Introduction to Social Statistics	3
SOCY 5181	Logics of Qualitative Inquiry	3
SOCY 5201	Graduate Seminar in Sociological Theory	3
SOCY 6111	Data 2: Data Analysis	3
Electives		
A second theory seminar of the student's choice.		3
Two 1-credit-hour graduate forums:		2
SOCY 6821	Graduate Sociology Forum 1	

Master's Degree

The Department of Sociology does not have a master's degree program; however, students who are unable to meet the requirements for the doctoral degree may pursue an MA with Graduate Committee approval. In addition, PhD students may obtain the MA in the process of completing the doctoral degree. The department does not allow extra time for the completion of the MA degree while pursuing the PhD.

All MA students are required to complete a minimum of 30 credit hours of graduate coursework. These 30 credit hours must include at least 6 credit hours in at least two seminars in the student's major fields. Students may take a maximum of 6 credit hours of independent study. Independent study may not be substituted for regular seminars. In addition, all students must take courses from at least four faculty members. Finally, all MA students must designate a master's advisory committee that consists of at least three regularly appointed graduate faculty members from the Department of Sociology.

For the MA degree, a student must complete 30 credit hours of coursework at the 5000 level or above, including 4–6 thesis credit hours and the required Theory and Methods sequence with a B or higher in addition to the preparation of a written thesis and a successful oral defense of the thesis. Students must register for thesis credit hours in the semester of thesis defense.

Dissertation

Students must prepare a written dissertation proposal and orally defend it before the dissertation committee, and complete dissertation research and defend by the end of the sixth program year.

Recommended Plan of Study

Students enter the program in a cohort of approximately 12 students. Students typically focus on required courses during the first year. Graduate students are expected to take two or three seminars each semester. We encourage students to work with their faculty advisors to determine the course load for the first year based on prior coursework, etc. Beyond the first year, we recommend that students take three courses each semester.

Each incoming student will be assigned an individual faculty advisor who will help guide the student through the first year of the program. Under the first-year advising system, students are encouraged to work with their first-year advisors to explore the program, the research specialties of the department and their own developing research interests while getting to know faculty members. Once a student has had an opportunity to meet and work with a variety of faculty, decisions regarding long-term advisors should be made. Beginning in year two of the program, graduate students are expected to seek their own faculty advisors.

Students in their first year are required to attend the graduate forum (SOCY 6821). Students will meet bimonthly throughout the academic year with the forum leader. The primary purposes of the forum are to introduce faculty and their research to the first-year cohort and to provide a communal forum for the cohort to discuss issues of concern with the forum leader.

The department offers an ongoing professionalization seminar ("prosem") led by a group of elected graduate students.

During the first two years, a student's coursework will focus on theory and methods. In the third and fourth years, the student will work with their advisor to develop a specialty area. Upon successful completion of the specialty comprehensive exam, the student will be admitted to candidacy and begin their dissertation research.

Spanish and Portuguese

Ranked as a top graduate program in the nation by the National Research Council, the Department of Spanish and Portuguese offers MA degrees in Peninsular and Latin American Literature as well as Hispanic Linguistics.

It also offers PhD degrees in Peninsular and Latin American Literatures, and Medieval and Early Modern Hispanic Literatures.

All students are eligible for graduate teaching assistantships. These appointments include a monthly stipend and tuition remission, and they cover all student health insurance premiums. Grants and fellowships (summer, research and travel) are also available by application.

Course codes for this program are SPAN and PORT.

Master's Degree

- Spanish - Master of Arts (MA) (p. 1253)

Doctoral Degree

- Spanish - Doctor of Philosophy (PhD) (p. 1254)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; PhD, Universitat Autònoma de Barcelona (Spain)

Courses

Portuguese

PORT 5110 (3) Brazilian Literature

Focuses on Brazilian literature through the lenses of literary and cultural studies. May address fiction, poetry or the relationship between literature and film. Besides reading literary texts, reading of academic essays is included.

Equivalent - Duplicate Degree Credit Not Granted: PORT 4110

Additional Information: Departmental Category: Portuguese

PORT 5150 (3) Literature of the Portuguese Speaking World

Examines major works of Portuguese literature and/or Portuguese speaking African literature through the lenses of cultural and literary studies. May address fiction, poetry, or the relationship between literature and cinema.

Equivalent - Duplicate Degree Credit Not Granted: PORT 4150

Additional Information: Departmental Category: Portuguese

Spanish

SPAN 5120 (3) Seminar: Spanish Literature and/or Spanish American Literature

Selected topics in Spanish and/or Spanish American literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7120

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5130 (3) Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures

An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5140 (3) Seminar: Spanish Literature, Medieval Period

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7140

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 5200 (3) Seminar: Spanish Literature, Renaissance and Baroque

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7210

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7300

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7320

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5400 (3) Seminar: Spanish Phonology

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7400

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5410 (3) Seminar: Spanish Syntax

Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7410

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5430 (3) Seminar: Hispanic Linguistics

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7430

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5440 (3) Seminar: Trends in Hispanic Linguistics

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5450 (3) Introduction to Hispanic Linguistics

Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4450

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5580 (1) Research Methods and Skills

This seven-week introductory course is designed to refine research methods and skills and to critically examine different types of materials (print, music recording, electronic resources). In the age of fake news, you will consider an array of information sources that will help you reflect on the research process while enhancing critical thinking and evaluative research skills. Reading knowledge of the Spanish language is desired.

Equivalent - Duplicate Degree Credit Not Granted: LIBR 5580

Grading Basis: Letter Grade

SPAN 5650 (3) Methods of Teaching Spanish

Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4650

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 6840 (3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 6940 (1) Master's Candidate for Degree

Requisites: Restricted to Spanish (SPAN) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Spanish

SPAN 6950 (1-6) Master's Thesis

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7120 (3) Seminar: Spanish Literature and/or Spanish American Literature

Selected topics in Spanish and/or Spanish American literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5120

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7130 (3) Seminar: Critical Approaches to Iberian and Latin American Literatures and Cultures

An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7140 (3) Seminar: Spanish Literature, Medieval Period

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5140

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 7200 (3) Seminar: Spanish Literature, Renaissance and Baroque

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5210

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5300

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5320

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7400 (3) Seminar: Spanish Phonology

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5400

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7410 (3) Seminar: Spanish Syntax

Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5410

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7430 (3) Seminar: Hispanic Linguistics

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5430

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7440 (3) Seminar: Trends in Hispanic Linguistics

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 8840 (3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

Spanish - Master of Arts (MA)

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements (p. 989) section of this catalog.

Areas of Concentration

Literature Concentration

Our MA in Peninsular and Latin American literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA students are required to take 30 hours of graduate coursework.

Linguistics Concentration

Our MA in Hispanic linguistics is an interdisciplinary program that provides students with a solid foundation in linguistics through the coursework taken in the Departments of Spanish and Portuguese, Linguistics, Communication, Anthropology and the School of Education. Students have the unique opportunity to work closely in collaboration with faculty to develop their areas of concentration and graduate as specialists in a wide range of topics (e.g., history of the Spanish language, Spanish in the United States, sociolinguistics, etc.)

All MA students in the Hispanic linguistics option are required to take 30 hours of graduate coursework. They are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education could serve as important complements to linguistics courses taken in our department.

Requirements

General Course Requirements

The MA in Spanish is offered in two areas of concentration: one with an emphasis on literature and one with an emphasis on linguistics.

All MA students are required to complete at least 30 hours of graduate coursework, at least 25 of which must be completed at CU Boulder. MA students may transfer to the department a maximum of 6 credit hours of acceptable graduate-level courses and may take no more than 6 credit hours of independent study courses.

Courses taken as part of the MA program must be offered by our department or by others upon having been approved by the student's MA supervisory committee (or the Associate Chair of Graduate Studies if the committee has not yet been formed). In addition, MA students may not take more than 9 hours of graduate coursework in any given semester.

No graduate course in the department may be taken pass/fail by a graduate student in our program. This rule also applies to those courses taken in the Department of Linguistics by our MA students.

Students who are failing a course will not be allowed to drop the course, except under special circumstances. To do so, approval must be secured from the course instructor, the Associate Chair of Graduate Studies and the department Chair.

Concentration Requirements

Literature Concentration

Code	Title	Credit Hours
Required Courses		
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures	3
SPAN 4980	Methods Language Learn/Pedagogy	1
Electives		
One Hispanic linguistics course:		3
SPAN 5400	Seminar: Spanish Phonology	
SPAN 5410	Seminar: Spanish Syntax	
SPAN 5430	Seminar: Hispanic Linguistics	
SPAN 5440	Seminar: Trends in Hispanic Linguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
A minimum of 3 graduate credit hours in each of the following subject areas:		21
Medieval Iberian literature		
Early modern Spanish literature		
Colonial Spanish American literature		
19th-century Spanish American literature		
18th- and 19th-century Peninsular literature		
20th- and 21st-century Peninsular literature		
20th- and 21st-century Spanish American literature		
Additional courses to fulfill the 30-credit minimum.		2
Total Credit Hours		30

Linguistics Concentration

MA students in the Hispanic linguistics option are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate

seminars offered in linguistics, sociology, psychology, anthropology and education can serve as important complements to linguistics courses taken in our department.

Code	Title	Credit Hours
Required Courses		
LING 2000	Introduction to Linguistics ¹	3
SPAN 4980	Methods Language Learn/Pedagogy	1
Electives		
	One Spanish graduate-level seminar.	3
	Additional courses to fulfill the 30-credit minimum.	23
	Total Credit Hours	30

¹ Required for students who did not take a similar course as part of their previous course of study. Students who must take LING 2000 are required to do so during their first semester in the program.

Language Requirement

Students must demonstrate, as early as possible and before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of a foreign language other than Spanish. They also must be able to speak, read and write English well.

Spanish - Doctor of Philosophy (PhD)

Unique among other departments in the country, the Spanish and Portuguese Department at CU Boulder offers two distinct tracks to our PhD students:

- Medieval and early modern Hispanic literatures
- Peninsular and Latin American literatures

Both PhD programs offer students a rigorous yet flexible plan of studies designed to deepen their knowledge of Peninsular and Latin American literatures and cultures.

Our faculty is actively engaged in research and publication in a variety of topics covering the whole range of peninsular and Latin American literatures and cultures, from the role of women's leadership in the Peninsular Middle Ages to cultural histories of banditry in Latin America, from Cervantes to the work of contemporary authors like Roberto Bolaño.

Students work closely with CU Boulder faculty members and are encouraged to pursue their own research interests.

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements section of this catalog.

Requirements

Residence Requirement

PhD students must complete a minimum of one academic year in residence on the Boulder campus (excluding summer) within the four years immediately preceding the date on which they present themselves for the PhD comprehensive examination.

Areas of Concentration

The PhD in Spanish is offered in six literary periods of concentration:

- Medieval
- Golden Age
- 18th and/or 19th century Peninsular
- 20th and 21st century Peninsular
- Colonial and 19th century Spanish American
- 20th and 21st century Spanish American

For further information on these options, contact the department.

Course Requirements

Prior to taking the PhD comprehensive exams, students must complete a minimum of 36 credit hours in graduate seminars in Spanish and/or related fields numbered 5000 or above. Students can take as many as 9 graduate credit hours outside the department. The student's advisor and the Associate Chair of Graduate Studies, in consultation with the Chair of the department, must approve credit hours in excess of 9, provided that the student formally requests it and gives a compelling reason for the standard limit to be overridden. Approval of the MA degree must also be presented for the PhD. Each advisor, in consultation with the student, will determine which courses will be acceptable.

All PhD students must take at least 30 credit hours of graduate coursework at CU Boulder. PhD students may transfer to the department a maximum of 6 hours of acceptable graduate-level credit. Transfer of credits will be considered only at the moment of admission into the program, not later on. Students may take no more than 3 credit hours of independent study courses. Additional independent study has to be approved by the graduate committee, which makes a recommendation to the Associate Chair of Graduate Studies or the Chair of the department. Under no circumstances can independent study coursework exceed 25 percent of the coursework required for the PhD degree.

Doctoral students can only take up to 12 credits in course load that are not regular graduate seminars in the Spanish and Portuguese Department. These 12 credits are a combination of credits taken outside of the Spanish and Portuguese Department and independent studies offered by a faculty member of the Spanish and Portuguese Department. If a student decides to take one independent study with their advisor, then the student is allowed to take 9 credits outside the department; this is the recommended situation. If a student takes two independent studies, then they can only take 6 credits outside the department, and so on. No more than 9 credit hours can be used in independent studies, and no more than 9 credit hours can be taken outside the department.

PhD students who did not take a teaching methodology seminar, a literary theory seminar, or a Hispanic linguistics seminar as part of their MA program must do so as part of their PhD program. Those students who did not take a minimum of 3 graduate credit hours in each of the seven subject areas as part of their MA program, must make up coursework in these areas as part of the PhD program. The Associate Chair of Graduate Studies makes the decision regarding this additional work during the student's first semester in the program. If this additional work is not completed the semester prior to the PhD exam, students will not be able to take their comprehensive exams.

Language Requirement

Students must demonstrate, as early as possible before taking the PhD Comprehensive Examination, communication knowledge in Portuguese and one other modern language (subject to the approval of the student's PhD Supervisory Committee). English and Spanish are not part of this language requirement. Communication knowledge is defined as the achievement of the current minimal acceptable score of the Graduate

School Foreign Language Test or completion of a fourth-semester college-level course with a grade of B or higher. A fourth-semester college level of Latin (with a grade of B or higher) will also fulfill part of this requirement. Successful completion of PORT 2350 with a B or higher will satisfy the language requirement in Portuguese.

Speech, Language and Hearing Sciences

The graduate curriculum in speech, language and hearing sciences (SLHS) leads to either a master's or a doctoral degree. The programs in speech-language pathology and audiology are accredited by the Council on Academic Accreditation (CAA) and the Colorado State Department of Education.

Prospective students should read the Master's Degree (p. 989) or Doctoral Degree Requirements (p. 990) sections of this catalog.

Course code for this program is SLHS.

Accreditation

Degree programs in Speech-Language Pathology (SLP) and Audiology are designed to provide a theoretically and clinically rich learning experience for students planning to work as audiologists or speech-language pathologists in medical, educational and private practice settings. States have varied requirements for practitioners of speech-language pathology and audiology (e.g. additional externship hours, earning the Certificate of Clinical Competence (<https://www.asha.org/certification/>), etc.). Students are reminded to contact the applicable licensing board in the state where they are planning on looking for employment. Information is also available on the university's Accreditation & State Authorization (<https://www.colorado.edu/accreditation/professional-licensure-programs-degrees/>) website.

The MA education program in speech-language pathology and the Doctor of Audiology (AuD) education program in audiology at CU Boulder is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association. (Address: 2200 Research Boulevard, #310, Rockville, MD 20850. Phone: 800-498-2071 or 301-296-5700)

Master's Degree

- Speech, Language and Hearing Sciences - Master of Arts (MA) (p. 1263)

Doctoral Degrees

- Audiology - Doctor of Audiology (AuD) (p. 1264)
- Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD) (p. 1265)

Certificate

- Speech-Language Pathology Assistant - Graduate Certificate (p. 1266)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Melinda
Assistant Professor Adjunct

Arehart, Kathryn H. (https://experts.colorado.edu/display/fisid_105561/)
Associate Professor; PhD, University of Washington

Baiduc, Rachael (https://experts.colorado.edu/display/fisid_157676/)
Assistant Professor; PhD, University of Washington

Belin, Christine
Lecturer; AuD, University of Florida

Boerger, Karin
Scholar in Residence

Bonino, Angela (https://experts.colorado.edu/display/fisid_157741/)
Assistant Professor; PhD, University of North Carolina Chapel Hill

Boudreau, Donna
Lecturer; PhD, University of Colorado Boulder

Brennan, Christine (https://experts.colorado.edu/display/fisid_155861/)
Assistant Professor; PhD, Northwestern University

Christensen, Kate
Lecturer; MA, University of Colorado Boulder

Damico, Jack (https://experts.colorado.edu/display/fisid_165416/)
Professor, Chair; PhD, University of New Mexico

Finan, Donald (https://experts.colorado.edu/display/fisid_122670/)
Lecturer; PhD, Indiana University

Fredrickson, Tammy L. (https://experts.colorado.edu/display/fisid_148888/)
Clinical Associate Professor; PhD, University of Colorado Boulder

Gabbard, Sandra
Lecturer; PhD, University of Colorado Boulder

Glick, Hannah
Lecturer; PhD, University of Colorado

Greene, Nathaniel
Assistant Professor Adjunct; PhD, University of Rochester

Griffin, Meghann
Lecturer; MEd, Georgia State University

Hardin, Kathryn Theresa Yarema (https://experts.colorado.edu/display/fisid_139358/)
Assistant Professor Adjunct; MA, University of Colorado Boulder

Hilger, Alexandra
Assistant Professor; PhD, Northwestern University

Kan, Pui Fong (https://experts.colorado.edu/display/fisid_145806/)
Associate Professor; PhD, University of Minnesota Twin Cities

Kates, James (https://experts.colorado.edu/display/fisid_146722/)
Scholar in Residence; MS, Massachusetts Institute of Technology

Kleiber, Holly
Lecturer; MS, University of Washington

Langer, Elizabeth
Lecturer; PhD, University of Colorado Boulder

Lemke, Alison (https://experts.colorado.edu/display/fisid_164203/)
Clinical Associate Professor; MA, University of Iowa

Lewon, Jennifer (https://experts.colorado.edu/display/fisid_147362/)
Clinical Assistant Professor; MA, Northern Arizona University

Lynch, Karen
Lecturer; PhD, University of Louisiana at Lafayette

Marson Parker, Jennifer
Lecturer; MA, University of Colorado Boulder

Meyers-Denman, Christina Nicole (https://experts.colorado.edu/display/fisid_155857/)
Assistant Professor; PhD, University of Arizona

Moers, Willard Lee (https://experts.colorado.edu/display/fisid_114371/)
Instructor; MA, Gallaudet University

Moore, Susan
Clinical Professor Emeritus

O'Dell, Alexandra
Lecturer; AuD, University of North Carolina Chapel Hill

Pollard, Ryan D. (https://experts.colorado.edu/display/fisid_153106/)
Clinical Assistant Professor; PhD, University of Colorado Boulder

Portnuff, Cory
Lecturer; PhD, University of Colorado Boulder

Ramig, Peter R.
Professor Emeritus

Ramsberger, Gail (https://experts.colorado.edu/display/fisid_100943/)
Associate Professor; ScD, Boston University

Riseman, Christina
Lecturer; MA, University of Colorado Boulder

Rudden, D'Anne
Lecturer; AuD, A.T. Still University

Schick, Brenda (https://experts.colorado.edu/display/fisid_110058/)
Professor Emeritus; PhD, Purdue University

Schwartz, Scott
Lecturer; PhD, University of Wisconsin-Madison

Sharma, Anu (https://experts.colorado.edu/display/fisid_143814/)
Associate Professor, Associate Chair; PhD, Northwestern University

Snyder, Lynn
Professor Emeritus

Sommerfeldt, Kristin (https://experts.colorado.edu/display/fisid_156054/)
Clinical Assistant Professor; AuD, University of Florida

Steffen, Jeffrey
Lecturer; MA, University of Colorado Boulder

Stith, Joanna
Lecturer; PhD, University of South Carolina

Sweetman, Richard H.
Professor Emeritus

Tennant, Sherri
Scholar in Residence; MS, University of Wisconsin Madison

Tucker, Kathryn
Lecturer; MA, University of Colorado Boulder

Walton, Patricia
Lecturer; MA, University of Colorado Boulder

Werner, LJ (https://experts.colorado.edu/display/fisid_154952/)
Scholar in Residence; MA, University of Colorado Denver

Woeber, Caroline
Lecturer; MA, University of Central Florida

Yoshinaga-Itano, Christine
Professor Emeritus

Courses

SLHS 5002 (2) Evidence-based Practice and Research Methods 1

Provides opportunities for students to acquire the knowledge of evidence-based practice (EBP) in the areas of speech, language and hearing sciences (SLHS). Covers topics about EBP in SLHS, levels of evidence and strategies for using scientific evidence in the process of making clinical decisions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5012 (3) Evidence-based Practice and Research Methods

Focuses on the knowledge of research methods and the application of research principles into clinical practice. In particular, covers quantitative research methods that are in speech-language pathology clinical settings. Will cover (1) clinical practice and research methods in speech, language and hearing sciences; (2) single-subject designs in clinical settings; (3) introduction to data collection, data organization and data analysis; (4) interpretation and presentation of clinical data. Formerly SLHS 5000.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5032 (3) Competencies and Strategies for the SLPA

This course includes content regarding roles and responsibilities of the SLPA, Codes of Ethics and ethical issues, standard health precautions and infection control, health and safety policy and procedures, confidentiality (FERPA & HIPAA), culture of public schools, service delivery models, screening protocols, intervention processes and procedures, data collection and documentation, assistive technology, special populations and cultural-linguistic diversity, reflective practice and continuing professional growth. Students must be accepted in the SLPA certification program to enroll in this course.

Requisites: Requires a prerequisite course of SLHS 4918 (minimum grade D-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5112 (2) Clinical Practice I

Provides entering graduate students a framework for beginning their clinical education and building the relationship of theory and research to current clinical practice in speech-language pathology. Key topics for exploration include contemporary professional issues, licensure, professionalism, ethics and ethical conduct, scope of practice, competency development, teaming and collaboration, accountability and multicultural issues. Formerly SLHS 5110.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5122 (1) Clinical Practice II: Assessment and Treatment Planning

Explores critical elements associated with assessment and treatment planning in speech-language pathology. Topic areas include assessment style, interviewing, test selection and techniques of test administration. Diagnosis and treatment planning section includes differential diagnoses, ethics of diagnoses, goal writing and treatment rationale.

Requisites: Requires a prerequisite course of SLHS 5112 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5132 (1) Clinical Practice II: School Based Skills

Targeted skills for implementation in educationally-based settings for speech-language pathologists. Specific coursework will address writing IEPs/IFSPs, expanded work with service delivery models and implementation of state and federal requirements for school based services.

SLHS 5142 (1) Clinical Practice III: Clinical Practice in Medical and Private Practice Settings

Explores skills specific to working in medically-based settings and private practice. Topics include billing, coding and reimbursement, working with an interdisciplinary team and measures and documentation specific to these settings.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5242 (3) Language Disorders in School Age Children

Addresses the nature, assessment, and treatment of developmental language disorders in school age children.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5252 (3) Acquired Language Disorders in Adults

Introduces the neural bases and medical etiologies of acquired language disorders in adults, explores the ways in which normal language processing may become disordered, and studies current methods of evaluation and treatment design.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5262 (3) Dysphagia

Provides students with background in the anatomical, physiological, and neurological bases of swallowing function and disorders across the lifespan. Etiological factors are presented, as well as various assessment tools and principles of treatment of swallowing disorders in children and adults.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5272 (1) Augmentative Alternative Communication: Theory and Use

Provides an overview of the application of current technology to alternative/augmentative communication. Emphasizes assessment and intervention with nonverbal children and adults with need for alternative/augmentative communication systems. Presents various technological devices and systems. Addresses system selection, programming, development and integration of use in environmental contexts.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5282 (3) Acquired Cognitive Disorders

Explores the theoretical and clinical management of acquired cognitive disorders that impact communication. Includes basic functional neuroanatomy.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5292 (3) Neurogenic Speech Disorders in Adults

Presents the neural bases of normal and disordered speech motor control, teaches assessment and treatment of motor speech disorders in adults, and applies motor control research to clinical problems.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5302 (3) Speech Sound Disorders in Children

Provides overview of phonological development, perception, and production. Presents factors related to articulation and focuses on critical evaluation of traditional and phonological based assessment and intervention procedures. Includes coverage of phonological awareness, metaphonological skills as related to literacy, as well as treatments and principles specific to children with motor speech disorders.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5312 (2) Aging and Communication

Examines normal age-related changes to communication systems. Anatomic and physiological changes to the mechanisms of speech production, audition and the brain will be included, with a focus on the functional impacts of such changes for speech production and perception, cognition, language and social communication.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

SLHS 5322 (2) Complex Medical Speech-Language Pathology Cases

Expands upon the basic knowledge learned in SLHS 5252 (acquired language disorders), 5332 (voice disorders), 5282 (acquired cognitive disorders), 5262 (dysphagia), 5292 (neurogenic speech disorders) and 5362 (fluency disorders). Students will explore clinical management options for complex medical cases created by factors such as multiple and/or rare diagnoses, medical complications, socioeconomic factors and behavioral or personality issues.

Requisites: Requires prerequisite courses SLHS 5252 and SLHS 5332 and SLHS 5282 (all minimum grade B). Requires corequisite course SLHS 5292. Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5332 (2) Voice Disorders

Examines the anatomical and physiological bases for normal and disordered laryngeal function. Explores structural, neuropathologic, functional/behavior and idiopathic voice disorders. Emphasis on assessment and treatment of individuals with voice disorders, including special populations.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5342 (2) Counseling in Speech-Language Pathology

Designed to demonstrate the principles of counseling for individuals with communication disorders and their families throughout the client's lifespan. Counseling systems and techniques for specific communication disorders will be included. The course will focus on the basic theory of counseling and how counseling skills can be used in the treatment of various communication disorders. Provides an introduction to the basic counseling skills necessary to help speech-language pathologists achieve the greatest success possible when working with individuals exhibiting communication disorders.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5352 (3) Bilinguals with Communication Disorders

Covers current empirical research regarding the linguistic and cognitive system of bilinguals with and without communication disorders. Address cross-cultural and cross-linguistic issues in selection and implementation of assessment and intervention procedures. Discuss various intervention strategies for working with bilinguals and their families.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5362 (3) Fluency Disorders

Exploration of the nature, differential diagnosis and treatment of fluency disorders across the life-span. Students will develop the requisite skills and knowledge base to provide prevention, consultation, assessment and intervention for fluency disorders. Research bearing on affective, behavioral and cognitive components of stuttering will be reviewed, along with recent data on the neural bases of the disorder. A broad range of treatment approaches will be discussed and demonstrated.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5372 (1) Cleft and Resonance: Fundamentals for Evaluation and Treatment

Provides an overview of fundamental awareness and knowledge of the etiology, development and treatment of children with cleft lip and palate and other disorders of resonance. It covers general parameters of care for speech language pathologists across various age groups (birth, toddler, preschool, and school age) with this population. Students will learn the methods for identifying and treating compensatory mis-articulation patterns and abnormal resonance patterns and the aspects of multidisciplinary team care for families and individuals with cleft lip and palate.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5555 (3) Advanced Topics in Social Communication: Autism Spectrum Disorders

Students will acquire knowledge and skills in the appropriate selection, application and evaluation of interventions for children, adolescents and adults with autism spectrum disorders (ASD) and their families. Evaluation and diagnosis, including development of the IFSP and IEP, will be addressed.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5576 (3) Neuroanatomy and Neurophysiology of Communication

Provides an introduction to the neuroanatomy and neurophysiology that collectively give rise to human communication including speech perception and production. We will consider how speech, language and hearing are represented in and controlled by the central nervous system and how neuropathologies affect processes of communication.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 5602 (3) Communication Challenges in Children: Birth to Six

Emphasizes nature and profile of language and communication disorders affecting infants and young children. Facilitates integration of clinical and theoretical perspectives with specific approaches for family-centered assessment and intervention principles, models and techniques.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5612 (3) Language Learning Disabilities

Expands upon the nature of Language Disorders in SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.

Requisites: Requires a prerequisite course of SLHS 5242 (minimum grade B).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5622 (2) Advanced Topics in Learning Disabilities

Expands upon the nature of Language Learning Disabilities learned in SLHS 5612 (Learning Disabilities) and SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.

Requisites: Requires prerequisite courses of SLHS 5242 and SLHS 5612 (all minimum grade B).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5632 (1-3) Special Clinical Focus in Speech-Language Pathology

Provides opportunity for students to develop clinical area(s) of deeper knowledge and skill, via courses approved for professional-level continuing education units (CEU) by the American Speech Language Hearing Association (ASHA), in areas that may not be available through the SLHS curriculum. Courses may be taken via ASHA approved Online resources or through courses offered at professional scholarly meetings.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

SLHS 5674 (2) Signals, Systems, and Calibration in Audiology

Provides in-depth study of instrumentation used by audiologists for hearing aid evaluation and fitting, signal generation and modification, and signal measurement and calibration.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 5848 (1-4) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Practica

SLHS 5849 (1-4) Independent Study 1, M.A.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 5859 (1-4) Independent Study 2, M.A.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 5898 (1-4) Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention

Offers on-campus and off-campus supervised clinical practice in diagnosis, assessment, and intervention of speech-language-hearing disorders in children and adults.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5918 (1-3) Audiology Clinical Practicum: Lab

Provides clinical training in the on site Speech, Language and Hearing Center in skills including audiology identification, evaluation and management for adults and children with hearing loss.

Repeatable: Repeatable for up to 16.00 total credit hours.

Requisites: Restricted to Speech, Language, and Hearing Sciences (SLHS) OR Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5928 (1-4) Audiology Clinical Practicum: Level 1

Provides clinical training in an off-campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Requires a prerequisite course of SLHS 5918 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

SLHS 5930 (4) Speech Language Pathology Assistant Internship

Placement for 15-18 hours per week for a total of 180 clock hours including a minimum of 50% supervised provision of 80 hours of direct intervention (in-person/virtual) with students on caseload. SLPA interns will complete tasks for mentor/supervisor including file reviews, scheduling, research of evidence-based practices, materials preparation, observation of intervention and IEP meetings, and provide other assistance as specified by mentor and within the scope of practice of an SLPA (Asha, 2013). Competency development and professional growth will be documented through midterm formal conferences and final semester ratings of specific competencies and completion of internship assignments. Students must be accepted into the SLPA certificate program to enroll in this course.

Requisites: Requires a prerequisite course of SLHS 4918 (minimum grade D-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5938 (1-4) Audiology Clinic Practicum: Level 2 Educational

Provides clinical training in an off campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5948 (1-4) Audiology Clinic Practicum: Level 2 Medical

Provides clinical training in an off campus medical audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6000 (1-4) Advanced Topics in Speech, Language and Hearing Sciences

Studies selected topics related to the theory and management of communication disorders, and theoretical/scientific information related to speech, language, and hearing.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6006 (3) Advanced Hearing Science

Provides advanced study in hearing science, including physical, physiological, and psychological acoustics of both normal and impaired auditory systems. Department enforced prerequisite: graduate standing in SLHS; undergraduate course work in biology or anatomy.

Additional Information: Departmental Category: Didactic: Speech-Hearing Science

SLHS 6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200

Requisites: Restricted to graduate students only.

SLHS 6504 (1) Professional Ethics in Audiology

Overview of ethics and ethical issues in the profession of audiology. Topics to be discussed include code of ethics by professions, approaches to analyzing ethical dilemmas, ethics in relationships with manufacturers, and ethical considerations in teaching, clinical practice and research.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6514 (1) Professional Issues in Audiology

Overview of professional issues related to the profession of audiology. Topics to be discussed include certification, licensure, professional associations, infection control, practice management, federal regulations related to audiology, professional communications and professional relationships.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6544 (3) Auditory Processes: Adult Assessment

Advanced study on the current science surrounding hearing assessment of adults across the age span. Includes theoretical foundations and clinical applications.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6554 (3) Auditory Processes: Child Assessment

Provides advanced study in hearing assessment and management of children across the age span. Topics include epidemiological, medical, audiological, developmental, and habilitative aspects of normal and impaired hearing in children.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6564 (3) Auditory Processes: Neurodiagnostics

Provides advanced study in the neural bases of hearing. Includes theoretical foundations and clinical assessment of neurological functioning in auditory systems with both normal and impaired function.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6614 (3) Fundamentals of Amplification

Discusses theoretical and clinical issues regarding the design, fitting, and evaluation of amplification technology for individuals with hearing loss. Includes the use of behavioral, psychological, electroacoustic, and physiological (real ear) measures in the selection and evaluation of digital and analog hearing aid technology.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6642 (3) Development and Intervention in Childhood Hearing Loss

Reviews development and intervention with children who are deaf and hard-of-hearing, birth through school age. Focuses on speech, auditory training, language, literacy and cognitive development. Formerly SLHS 6640.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 6650 (3) Counseling and Multicultural Issues in SLHS

Explores counseling theories and techniques following the diagnosis of a communication disorder across the life span. Considers issues related to grieving and mourning, parenting, disability, cultural customs, attachment, and relationships. Covers professional ethics and ethical responsibilities.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6670 (3) Aging and Hearing Loss

The course will address research and evidence-based practice regarding hearing loss in adults across the age span. Topics will include aural rehabilitation, co-morbidities associated with hearing loss (e.g., cognition and dementia; mental health; sensory-perceptual-motor skills; other health/medical conditions), and impacts of hearing loss on functioning, disability, health, and health services.

Requisites: Requires a prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.

Recommended: Prerequisites SLHS 7418 and SLHS 7540.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6918 (7) Practicum 2: Medical-Clinical Internship

Gives an off-campus experience in a clinical or medical setting that provides in-depth practice in management of communication disorders of children and adults.

Repeatable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6928 (7) Practicum 2: Public School Internship

Provides an off-campus supervised experience providing extended and in-depth practice involving school-age children in a school classroom.

Repeatable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6938 (1-10) Audiology Clinic Externship Educational

Provides students with full time off campus experience in an educational audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

Repeatable: Repeatable for up to 21.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6940 (1) Master's Candidate for Degree

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6948 (1-10) Audiology Clinic Externship: Medical

Provides students with full time off campus experience in a medical audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6950 (1-7) Master's Thesis

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7000 (3) Research Designs in Human Communication Sciences and Disorders

Offers an advanced seminar in research designs for human behavior: efficacy, ethnographic, single-subject, quasi-experimental, and experimental designs. Designed to familiarize students with terminologies and research designs frequently used in speech-language-hearing areas.

Recommended: Prerequisite basic statistics.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7200 (3) Business, Management and Ethics in Audiology

Focuses on the business aspects of managing an audiology practice. Addresses developing a business plan, contracting for services, legal issues, financial reporting, budgeting, pricing, billing and reimbursement, regulatory issues, marketing, personnel management, risk abatement, and business ethics.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7418 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

SLHS 7428 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425

Requisites: Restricted to graduate students only.

SLHS 7450 (3) Audiology Capstone Project

Provides an individualized project for AUD, completed prior to initiation of final clinical year. May be in the form of research-based investigation, an evidence-based position paper, a clinical protocol based on peer-reviewed literature, a grant proposal, or another format approved by AUD committee. Project requires approved proposal by AUD committee and focused study supervised by capstone advisor.

Requisites: Restricted to Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7520 (3) Auditory Processes: Medical and Genetic Bases

Discusses current developments in epidemiology, pathogenesis, and symptomatology of hearing loss. Investigates the genetic bases of hearing loss and deafness. Incorporates clinical decision theory in assessment and intervention. Explores cross-disciplinary topics from genetics, radiology, pharmacology, pathology, and otology.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7530 (3) Auditory Processes: Theory and Application in the School Environment

Focuses on application of routine audiological practices such as screening, assessment, rehabilitation, and instrumentation to children in educational settings. Emphasizes federal education regulations and pertinent case law.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7540 (3) Auditory Processes: Physiology, Assessment, and Management of the Vestibular System

Emphasizes current research on physiology of the vestibular system, including both structure and function. Considers the etiology of both peripheral and central pathologies of the vestibular system. Discusses ways to assess function of the vestibular system as well as theoretical and practical considerations of vestibular rehabilitation.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7550 (3) Prevention of Hearing Loss from a Public Health Perspective

Discusses the prevention of hearing loss from public health perspectives. Includes the effects of noise and other damaging agents on the auditory physiology. Discusses prevention, screening, identification, and management of occupational and recreational hearing loss. Considers noise measurement and monitoring. Addresses local, national and global initiatives and legislation regarding hearing health.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7614 (3) Implantable Devices: Technology and Clinical Application

Examines technological aspects and clinical applications of implantable prostheses such as cochlear implants, brainstem implants, hybrid cochlear implants, Baha devices and middle ear implants. Topics will include: history of implantable devices, anatomy and histopathology of the inner ear, speech processing in implants, mapping devices, candidacy criteria, behavioral and electrophysiologic techniques for assessment and outcomes in implanted children and adults.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7640 (3) Communication Processes and Hearing Loss: Birth through Six

Provides in-depth study of current research literature and its implications for clinical practice regarding development of communication processes in the first six years of life and impact of hearing loss. Investigates development of language, auditory perception, speech production, social-emotional abilities, and cognition.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7714 (3) Advanced Topics in Amplification

Discusses advanced issues in the design and fitting of hearing aid technology, including advanced signal processing, outcomes assessment, evidence-based practice and specialized fitting protocols for pediatric and geriatric populations. Current research is integrated with clinical case studies to guide the development of evidence-based practice in hearing aid fittings.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7800 (1) Seminars in Audiology: Advanced Topics

Graduate seminar exploring advanced topics in the field of audiology as they relate to diagnosis and (re)habilitation. Topics will include novel clinical issues and topics including tinnitus, intraoperative monitoring, pharmacology, hyperacusis/misophonia, auditory processing. Discussion of the evidence-based literature surrounding these advanced topics will be central to this seminar.

Requisites: Requires prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.

Grading Basis: Letter Grade

SLHS 7849 (1-4) Independent Study 1, PhD

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 7859 (1-4) Independent Study 2, PhD

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 7918 (3) Practicum 3: Clinical Supervision

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8918 (3) Practicum 3: Classroom Instruction

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8928 (3) Practicum 3: Research Coordination

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

Speech, Language and Hearing Sciences - Master of Arts (MA)

Focus Areas

There are two areas of focus available at the MA level:

- MA leading to professional certification in speech-language pathology
- Research

Professional Certification Focus

The master's degree program leading to professional certification in speech-language pathology (MA-SLP (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/>)) is designed to provide a theoretically and clinically rich path for students planning to work as speech-language pathologists in medical, educational, and private practice settings. Students in the MA-SLP program are provided with a strong foundation of theoretical and clinical knowledge through their coursework and clinical experiences.

Students completing the MA-SLP program obtain a Master of Arts degree from the University of Colorado and are eligible to receive the Certificate of Clinical Competence in speech-language pathology from the American Speech-Language-Hearing Association (<http://www.asha.org/>) (ASHA) upon successful completion of the clinical fellowship year and the national PRAXIS examination and thus meet educational requirements for Speech-Language Pathology licensure in all states. However, students should also contact the applicable licensing board in the state where they are planning on looking for employment. Students can also apply for Colorado State Licensure to work in the public schools.

Research Focus

The master's program with a research focus allows students to design their own master's degree in SLHS (<https://www.colorado.edu/slhs/graduate/masters-non-clinical-degree/>) in any topic related to speech, language or hearing sciences. This degree does not result in clinical certification. Working with an advisor, students design a plan of study, with coursework within SLHS and from other departments. A master's thesis is required.

Requirements

Professional Certification Focus

The master's program with a professional certification focus (MA-SLP) is a two-year (24-month) program that culminates in one or two internships and either successful passage of the comprehensive exam or completion of a thesis. The program consists of an initial summer intensive session beginning in early August and ends in late July two years later. Students are enrolled for August intensive, fall year 1, spring year 1, summer year 1, fall year 2, spring year 2, and summer year 2.

Within departmental and ASHA guidelines, master's students with a focus in speech-language pathology complete a core set of seminars and clinical assignments that assure at least minimal competence in the full scope of practice for speech-language pathologists. In addition, students complete at least one of three electives that provide the opportunity to develop greater knowledge and skills in areas of specific interest. Clinical assignments are initiated in the on-site Speech, Language and Hearing Center; later, student input is obtained in making off-campus clinical assignments in educational and medical settings.

Students with an undergraduate degree in speech-language pathology and audiology can expect to complete the program in two calendar years (see the MA-SLP (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/>) webpage). Those without such a background are required to make up undergraduate deficiencies, which normally require at least an additional 18 credit hours of courses in speech, language and hearing sciences and related disciplines.

Students must meet standards for both academic and clinical competence, as well as professional conduct. Full-time graduate study is required.

Prerequisites

In addition to meeting the Graduate School and SLHS requirements, students in the MA-SLP program must meet ASHA requirements for clinical certification. MA-SLP students must complete all undergraduate course prerequisites, which can be found on our website (<https://www.colorado.edu/slhs/prerequisite-coursework/>). Students may complete the prerequisites prior to applying to the graduate program, either as part of their undergraduate degree program, or following completion of the undergraduate degree in any other major. Students may also apply to enter the MA-SLP program and complete the prerequisites during the first year of their graduate study as a 3-year track student (the prerequisites will not count as credits in the MA-SLP program). Please note that all prerequisite coursework must be approved by the CAA Program Director.

Research Focus

The research focus is designed for students who are not seeking clinical certification.

Working with an advisor, students design a plan of study with coursework from SLHS and other departments. A master's thesis is required. The non-clinical master's degree in SLHS requires 30 credit hours of graduate coursework, with four to six credit hours devoted to the master's thesis. For more information, visit the Thesis Option (<http://www.colorado.edu/slhs/thesis-option/>) webpage.

At least 24 hours must be completed at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department. Students may be able to transfer up to 9 credit hours of graduate credit towards this degree. The non-clinical master's degree requires close work with a faculty member of your choosing. Students interested in pursuing this degree option are encouraged to talk with SLHS faculty members who share their interests before applying (see the Meet Us (<http://www.colorado.edu/slhs/meet-us/>) webpage).

Sample Two-Year Plan of Study

Below is a sample curriculum for the MA-SLP program. MA-SLP students must take 3 credit hours of elective classes. Students will take either the comprehensive exam in the fall of the second year or pursue a thesis option. The department recommends students take the PRAXIS exam by mid-April of the second year. Due to the length of time of the two internships in spring of year two, most MA-SLP students officially graduate in the summer term.

Course	Title	Credit Hours
Year One		
August Intensive		
SLHS 5112	Clinical Practice I	2
SLHS 5342	Counseling in Speech-Language Pathology	2
	Credit Hours	4
Fall Semester		
SLHS 5012	Evidence-based Practice and Research Methods	3
SLHS 5252	Acquired Language Disorders in Adults	3
SLHS 5362	Fluency Disorders	3
SLHS 5576	Neuroanatomy and Neurophysiology of Communication	3
SLHS 5602	Communication Challenges in Children: Birth to Six	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
	Credit Hours	16-19
Spring Semester		
SLHS 5242	Language Disorders in School Age Children	3
SLHS 5272	Augmentative Alternative Communication: Theory and Use	1
SLHS 5282	Acquired Cognitive Disorders	3
SLHS 5302	Speech Sound Disorders in Children	3
SLHS 5332	Voice Disorders	2
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
	Credit Hours	13-16
Summer		
SLHS 5262	Dysphagia	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
SLHS 6000	Advanced Topics in Speech, Language and Hearing Sciences (Optional elective)	1-4
	Credit Hours	5-11
Year Two		
Fall Semester		
SLHS 5132	Clinical Practice II: School Based Skills	1
SLHS 5142	Clinical Practice III: Clinical Practice in Medical and Private Practice Settings	1
SLHS 5292	Neurogenic Speech Disorders in Adults	3
SLHS 5372	Cleft and Resonance: Fundamentals for Evaluation and Treatment	1
SLHS 5555	Advanced Topics in Social Communication: Autism Spectrum Disorders	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
SLHS 5352	Bilinguals with Communication Disorders (Optional elective)	3

SLHS 6642	Development and Intervention in Childhood Hearing Loss (Optional elective)	3
SLHS 6000	Advanced Topics in Speech, Language and Hearing Sciences (Optional elective)	1-4
	Credit Hours	17-23
Spring Semester		
SLHS 6918	Practicum 2: Medical-Clinical Internship	7
SLHS 6928	Practicum 2: Public School Internship	7
	Credit Hours	14
	Total Credit Hours	69-87

Audiology - Doctor of Audiology (AuD)

The AuD is the entry-level degree in clinical audiology (<https://www.colorado.edu/slhs/graduate/doctorate-audiology/>) that emphasizes both clinical competency development and evidence-based practice. Students in the AuD program complete a four-year curriculum that includes academic coursework, clinical practicum and a capstone project. Students take advanced seminars in hearing science, clinical audiology and research methods.

Students have the opportunity to pursue clinical research in both laboratory and clinical settings, with faculty in a wide range of areas including electrophysiology, psychological acoustics, physiological acoustics, diagnostic evaluation and intervention procedures for newborns through geriatrics, advanced amplification, speech perception in noise, assistive technologies, cochlear implants, vestibular assessment techniques and aural habilitation and rehabilitation of individuals with hearing loss. Furthermore, students undertake clinical practica to develop competency across the scope of practice consistent with national clinical certification and/or licensure in audiology. Successful completion of the AuD at CU Boulder meets the requirements for certification in audiology by the American Speech-Language-Hearing Association (ASHA). Currently, the AuD meet the educational requirements for licensure as an Audiologist in every state.

Students will have the opportunity to complete clinical rotations in several different settings including full use of laboratories and suites in the Department of Speech, Language & Hearing Sciences. Clinical rotations occur at sites such as University of Colorado Hospital (UCH) in Denver and the UCH outpatient Boulder clinic, Children's Hospital Colorado, local school districts, and other clinical settings throughout the metro Boulder and Denver area. Students complete fourth-year externships in Denver hospitals or clinical settings throughout the nation.

Requirements

Prerequisite Coursework

The AuD faculty recommends that students have undergraduate coursework in speech-language-hearing sciences including content knowledge in audiological evaluation and rehabilitation, hearing and speech science, language development, phonetics, and speech and language disorders. A strong foundation in college algebra and pre-calculus is also expected. A *college-level* course in statistics is required.

Students who matriculate in the AuD program are required to document their background content knowledge and to address any missing

competencies. See the department's Doctorate of Audiology (<https://www.colorado.edu/slhs/graduate/doctorate-audiology/>) webpage for a list of prerequisites and a sample course schedule.

Course Requirements

The AuD program requires a total of 89 credits. Below is a list of sample courses that fulfill this requirement.

Code	Title	Credit Hours
SLHS 5576	Neuroanatomy and Neurophysiology of Communication	3
SLHS 5674	Signals, Systems, and Calibration in Audiology	2
SLHS 5918	Audiology Clinical Practicum: Lab	1-3
SLHS 5928	Audiology Clinical Practicum: Level 1	1-4
SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4
SLHS 5948	Audiology Clinic Practicum: Level 2 Medical	1-4
SLHS 6006	Advanced Hearing Science	3
SLHS 6544	Auditory Processes: Adult Assessment	3
SLHS 6554	Auditory Processes: Child Assessment	3
SLHS 6564	Auditory Processes: Neurodiagnostics	3
SLHS 6614	Fundamentals of Amplification	3
SLHS 6650	Counseling and Multicultural Issues in SLHS	3
SLHS 6670	Aging and Hearing Loss	3
SLHS 6938	Audiology Clinic Externship Educational	1-10
SLHS 6948	Audiology Clinic Externship: Medical	1-10
SLHS 7000	Research Designs in Human Communication Sciences and Disorders	3
SLHS 7200	Business, Management and Ethics in Audiology	3
SLHS 7450	Audiology Capstone Project	3
SLHS 7520	Auditory Processes: Medical and Genetic Bases	3
SLHS 7530	Auditory Processes: Theory and Application in the School Environment	3
SLHS 7540	Auditory Processes: Physiology, Assessment, and Management of the Vestibular System	3
SLHS 7550	Prevention of Hearing Loss from a Public Health Perspective	3
SLHS 7614	Implantable Devices: Technology and Clinical Application	3
SLHS 7640	Communication Processes and Hearing Loss: Birth through Six	3
SLHS 7714	Advanced Topics in Amplification	3

Dual Degree Program

AuD/PhD in Audiology and Speech, Language and Hearing Science

The department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the fields of audiology and hearing science. The PhD/AuD dual degree program

(<https://www.colorado.edu/slhs/graduate/audphd-dual-degree/>) trains students in both clinical research and clinical practice in audiology. Students in the program gain training that will prepare them to become independent scholars, teach in higher education, conduct research, become certified clinical audiologists and gain leadership skills. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program.

Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD)

The PhD program is grounded in research. Supervisory, administrative, instructional and research activities acquaint students with problems and concepts at a higher level of professional activity and responsibility. Students in the PhD program gain the knowledge and skills that will prepare them to become independent scholars, teach in higher education, conduct research, and become leaders within the discipline.

Wide latitude prevails in planning individual PhD programs. It is expected that students have some professional or research experience before entering the program and that they have specific academic or professional goals in mind. PhD students must take a four-course sequence in statistics, four core courses within Speech, Language and Hearing Sciences (SLHS), complete the preliminary and comprehensive examinations and successfully defend a dissertation research project. Beyond that, student degree plans are individually designed through the joint efforts of the student and an advisory committee.

Requirements

The student will select an advisory committee during the first semester of his or her program. Then the student will develop a plan of study in conjunction with the advisory committee during the first year of doctoral study. The plan of study will detail the student's goals, coursework to be completed to meet those goals and departmental and Graduate School requirements, and a proposed schedule for completion of doctoral work. The plan of study will become the student's blueprint for their doctoral work. The advisory committee must approve the plan of study, which may be amended later with the committee approval.

Departmental and Graduate School requirements for doctoral students are intended to allow maximum flexibility in developing a plan of study. All students take three SLHS doctoral seminars, at least 12 credit hours in statistics and research tools, and additional coursework in their own research area. There is no foreign language requirement. The Graduate School specifies that not more than 25 percent of coursework can be taken through independent study.

Code	Title	Credit Hours
Required Coursework		
Three doctoral-level SLHS seminars.		9
At least 15 credit hours in the student's major content area.		15
One teaching practicum:		3
SLHS 8918	Practicum 3: Classroom Instruction	
One research practicum.		3
Two courses each in statistics and research tools.		12-15
Thirty hours of doctoral dissertation credit.		30

SLHS 8990	Doctoral Dissertation
Total Credit Hours	72-75

Upon approval of the advisory committee, a maximum of 21 credit hours of coursework may be transferred to fulfill the above requirements. This should be accomplished by the end of the first semester of doctoral study. Requests must be made to the Graduate School on a form, which they provide; an official transcript must accompany the request.

In order to continue in the program, a grade point average of 3.50 or better on coursework every semester will be required as well as continued recommendation of the SLHS faculty advisory committee. Grades below B will not count toward a doctoral degree.

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

Dual Degree Programs

Students may pursue a dual PhD with neuroscience (p. 1238) or cognitive science (p. 1093). In addition, the department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the field of audiology and speech, language and hearing science. The PhD/AuD dual degree program trains students in clinical research and clinical practice in audiology. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program. Students may apply to both programs simultaneously, or may apply to the PhD portion after having been accepted into the AuD portion or may apply to the AuD portion after having been accepted into the PhD portion.

For more information, visit the department's Graduate Coursework (<http://www.colorado.edu/slhs/graduate-coursework/>) webpage.

Speech-Language Pathology Assistant - Graduate Certificate

Speech-Language Pathology Assistants (SLPAs) work directly with students with communication challenges in public school settings under the supervision of a fully qualified and nationally certified speech-language pathologist (MA-SLP, CCC). SLPAs have a significant role in enhancing the quality of services for children and adolescents that need support for speech, communication, reading, and writing. This certificate program provides the opportunity to meet the requirements for SLPA authorization in the state of Colorado only, through the Colorado Department of Education, to work in Colorado public schools. The education provided in the Speech-Language Pathology Assistant (SLPA) Certificate program does not meet educational requirements for authorization in other states. Students are encouraged to contact the appropriate state licensing board in the state they wish to practice to determine applicability.

Candidates develop the knowledge and skills to work under the supervision of a certified SLP in the public school setting with ages birth–21. This certificate is appropriate for individuals with a BA in speech, language and hearing sciences (SLHS); those completing a BA in SLHS (enrolled in their last semester of senior year at CU); or individuals

with a BA in another field, who have completed or are completing equivalent leveling coursework (24 hours) through an approved SLHS department. See coursework required as listed under the "Apply" section of the department website (<http://www.colorado.edu/slhs/online/slpa-certificate-program/requirements-admission/>).

The Colorado Department of Education currently provides a legislated statewide credential for SLPAs who meet qualifications to provide intervention services and supports, under the supervision of a qualified MA CCC-SLP provider. For additional information, please search for SLPA authorization on the Colorado Department of Education website (<http://www.cde.state.co.us/cdeprof/checklist-initialspeechlanguage/>). Acquisition of this SLPA license in Colorado does not necessarily transfer to all other states and it is recommended students inquire if applicable credentials exist in other states in which they intend to seek employment as an SLPA.

This certification program at CU Boulder was developed as a BA Plus program to address shortages of qualified personnel and extend the intensity of services to special education students, especially in high-need districts and rural areas in Colorado where there is an ongoing paucity of qualified professional related service providers. This was made possible through ongoing collaboration with the Colorado Department of Education, BOCES Boards throughout Colorado, and our university and district school partners. Many interested students complete the program as part of their residency in Colorado as they complete their BA to gain additional experience in speech-language pathology prior to applying for a MA degree. Others in rural or high needs areas see this online opportunity to continue their education and work as an SLPA as they prepare to move on to graduate school through distance learning programs as they work close to home without moving. Out of state BA students also apply to the program as an opportunity to continue their education as courses are offered remotely with onsite internships experience in their own state.

At this time, this program may not meet the educational requirements for SLPA certification or licensure in states other than Colorado. Students residing outside of Colorado are encouraged to consult the speech-language pathology and audiology board (<https://www.colorado.edu/slhs/node/1243/attachment/>) in their state prior to applying or enrolling in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting with an MA-SLP, CCC.

Requirements

Admission Requirements

The program is competitive and requires complete applications in electronic format. Preference for in-state students and especially qualified students in rural areas is given. A specific number of seats are reserved for Colorado students who qualify and are sponsored by BOCES to participate in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting in their own state with a MA CCC-SLP.

Required GPA of 3.0 or above.

Education Requirements

Completion of one option below:

- Last semester SLHS senior (students may be enrolled in a maximum of 2 required prerequisite courses concurrently with the SLPA program, although enrollment in only one is preferred).
- BA in SLHS.

- BA in a field other than SLHS with completion of 24 credits of "leveling" prerequisite coursework in SLHS.

Prerequisites or "Leveling" Coursework

The courses listed below are offered by the SLHS department at CU Boulder. Equivalent courses from other universities will also meet these requirements, if approved by the program director. These requirements are consistent with the Colorado Department of Education SLPA Authorization (<http://www.cde.state.co.us/>).

Code	Title	Credit Hours
LING 3100 or SLHS 3006	Language Sound Structures Phonetics	3
SLHS 3106	Hearing Science	3
SLHS 3116	Anatomy, Physiology, and Science of Speech	3
SLHS 4502	Language Disorders Across the Lifespan	3
SLHS 4512	Speech Disorders Across the Lifespan	3
SLHS 4560	Language Development	3
SLHS 4704	Audiological Evaluation	3
SLHS 4714	Audiological Rehabilitation	3
SLHS 4918	Introduction to Clinical Practice (Requires documentation of 25 hours of observation of ASHA-certified SLPs)	2

Required Courses and Credits

Students will register for two courses to be taken in the semester for which they have been admitted. These courses are as follows:

Code	Title	Credit Hours
SLHS 5032	Competencies and Strategies for the SLPA	3
SLHS 5930	Speech Language Pathology Assistant Internship ¹	4

¹ Placement hours must be under the 50 percent supervision of an MA CCC-SLP.

Theatre & Dance

The Department of Theatre & Dance is a community of students, scholars, artists and artisans who regard the collaborative and creative process as the core of education. We engage with that process at all levels of our work as we pursue excellence and understanding. From the root of process stems practice, and that practice bears the fruit of experience. The Department of Theatre & Dance guides that fruition, offering students an expanse of opportunities to encounter the art forms of theatre, dance and experience design, their making and meaning. We strongly value the amperand in Theatre & Dance, and seek to make connections across communities. We aim to make change, make art, and to make a difference, together.

We honor a global diversity of ways of making and of knowing. European colonialism and U.S. imperialism have long worked to diminish and eliminate knowledge that differed from a European worldview. As a U.S.-based institution, we recognize that the only way we can truly see beyond the limitations of our own perspectives is to listen and learn from people with experiences that are different from our own throughout the world.

Our diversity efforts are therefore grounded on establishing long-lasting relationships with scholars and artists who have worked and continue to work outside of the United States, and to attract graduate students that can help us continue to learn from these perspectives.

The CU Boulder graduate studies in Theatre & Dance is designed to accommodate a variety of students, from the practicing professional to the recent BA/BFA graduate. Our approach is to develop students' creativity, pedagogical and scholarly skills in equal measure. We combine traditional studies with opportunities for practical training. Ambitious seasonal programs of theatre productions and dance concerts feature student performers, designers, directors and choreographers. Guest artists of national and international fame regularly participate in curricular, performance and extracurricular activities.

The performing arts at CU Boulder embrace many conventional and emerging modalities of presentation: proscenium stages, film, devised work, online social platforms, digital arenas, interactive installations, community collaboration, process-based work, performance activism that is both affective and effective, and new creations of bold imaginarians.

Our primary hope is to enable a deepening of your artistic and scholarly voice, to put what is distinctive about you in conversation with the world. Each of the above programs is designed to suit international expectations in skill acquisition and capacity. We differ from other colleges in our extensive efforts to support and enrich each student's individual interests and distinct gifts. For this reason, the number of annual admissions is limited to allow for highly personalized mentorship.

Students interested in theatre and performance studies, dance, and experience design are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

Course codes for this department are THTR, DNCE, TDXD and THDN.

Departmental Requirements

Students wishing to pursue graduate work in theatre & performance studies, dance, and experience design should carefully read both requirements for advanced degrees in the Graduate School section and the individual degree handbooks published on the Theatre and Dance (<http://www.colorado.edu/theatredance/>) website. Students should note that departmental requirements are sometimes more comprehensive than those minimums established by the Graduate School.

Prerequisites

Applicants are admitted to the graduate programs in theatre & performance studies, dance, and experience design on the basis of their academic records and recommendations.

Advising

Every student is assigned a faculty advisor and will have a meeting with their advisor upon entering the program. Topics discussed in the meeting and other available information are employed to design the best possible course of study for the student.

All candidates for a degree have the responsibility of making certain that the appropriate persons or committees have been appointed to supervise the various steps in their graduate programs. Detailed instructions can be found in the handbook for each degree, available from the department website.

Master's Degrees

- Dance - Master of Fine Arts (MFA) (p. 1275)
- Experience Design - Master of Fine Arts (MFA) (p. 1278)
- Theatre and Performance Studies - Master of Arts (MA) (p. 1280)

Doctoral Degree

- Theatre and Performance Studies - Doctor of Philosophy (PhD) (p. 1283)

Certificates

- Applied Shakespeare - Graduate Certificate (p. 1286)
- Hip-Hop Studies - Graduate Certificate (p. 1285)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bergner, Bruce Alan (https://experts.colorado.edu/display/fisid_113315/)
Associate Professor; MFA, University of Illinois at Chicago

Cloud, Anya
Assistant Professor; MFA, University of California San Diego

Cobin, Martin T.
Professor Emeritus

Coleman, Bertram E. (https://experts.colorado.edu/display/fisid_103065/)
Endowed/Named Professor; PhD, University of Texas at Austin

Devin, Richard
Professor Emeritus

Diachenko, Nada (https://experts.colorado.edu/display/fisid_101362/)
Professor Emerita

Ellsworth, Michelle (https://experts.colorado.edu/display/fisid_112060/)
Professor; MFA, University of Colorado Boulder

Assistant Professor, Associate Chair; MFA, George Washington University

Williams, Letitia S.
Senior Instructor Emerita

Yang, Daniel
Professor Emeritus

Courses

Dance

DNCE 5001 (1-2) Graduate Technique

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5012 (1) Concert Production

Meets with DNCE 4012.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5014 (2) Inside the Groove: Developing Rhythmic Skills for Graduates

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, poly-meter, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Meets with DNCE 3014.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 4015.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Movement Awareness
Injury Prevent for the Dancer

DNCE 5016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4016 (with addition of readings and a paper)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4017, with addition of graduate papers and/or a project

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4023 (with the addition of written analysis and creative assignments)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5024 (2) SOUND Choices: Enhancing the Music/Dance Relationship

Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Meets with DNCE 3024.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialties of participants.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4038

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5047 (3) Hip-Hop Dance History

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 4047.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5048 (3) Performance and Community Engagement

Engages students in the power of performance for effecting positive social change. Students research collaboratively to create performances and workshop experiences to intentionally author the future they want. Readings provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations. Open to all forms of performance.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5052 (1-3) Studio Concert

Provides the opportunity for choreographic and performative synthesis and experimentation via the execution of a project related to the student's major area of creative research. Project must be approved by the student's first reader.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5053 (3) Advanced Dance Composition

Meets with DNCE 4053.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5056 (2) Graduate Teaching Seminar

Examines practical, pedagogical, philosophical, and legal issues in current dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Provides practice in practical application of theoretical material. All genres of dance may be utilized.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5064 (2) Music and Dance Seminar: Collaboration

Investigates music in relation to dance performance, choreography, and teaching. Topics may include: a survey of musical styles and composers; direct experimentation with composition and recording techniques; enhancement of rhythmic versatility; work with accompanist/composers; and/or improvement of analytical listening and writing skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5101 (1) Intermediate Graduate Ballet

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5128 (1) Ballet Repertory

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and Neo-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 4128.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5261 (1) Advanced Jazz Dance Technique

Refines advanced students' approach to the nuances and virtuosity of the jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 4261.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5301 (2) Graduate Hip-Hop Technique 1

Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination and performance skills.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5331 (2) Graduate Hip-Hop Technique 2

Students deepen their understanding of Hip-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. Focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 3301.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

DNCE 5339 (1-3) Hip-hop Practicum

Design and implement an experiential, action-based learning project that connects to local innovators in the Boulder/Denver Hip-hop community who are engaged in one of Hip-hop culture's five elements: mc'ing, djing, breaking/street dance, graffiti, knowledge. Projects might range from creating a piece of graffiti with a local crew to organizing an academic panel or workshop with a Hip-hop pioneer.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

DNCE 5411 (2) Aerial Dance Technique

Study of basic technique skills in aerial dance on single point, low-flying trapeze. Additional skills include choreographic techniques, improvisation, and an historical overview of aerial dance. Through the theoretical readings and discussion, this course defines the place of aerial dance in the lineage of modern dance and addresses aesthetics, philosophical approaches to teaching, and safety issues.

Requisites: Restricted to graduate students only.

DNCE 5501 (2) Graduate African Dance

Explores the technique, styles and rhythms of regional and national cultures of Africa by introducing signature attributes common to different countries' dance traditions. Features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity. Areas of concentration may vary by each semester (e.g. Ghana, Guinea, Intermediate).

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Major Technique

DNCE 5601 (2) Alexander Technique for Graduate Students

Studies how human reaction, coordination, and movement play a role in all activities. Graduate students will explore direct application to dance training, performance, choreography, and teaching. Through in-depth class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 3601.

Requisites: Restricted to Dance (DNCE) or Theatre (THTR) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5701 (2) Contact Improvisation 2

Moves into rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 4701.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5901 (1-3) Graduate Technique Practicum

Offers special courses in the technique series. Course may meet at the same time with an undergraduate studio course and includes the practical movement experience with an additional scholarly study of specially chosen issues in dance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 4909

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4919

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6016 (2) Teaching Lab-Contemporary Dance

Provides opportunity to apply principles and skills introduced in DNCE 5056. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on development, analysis and evaluation of teaching skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6017 (3) Cultural Collisions and Ethics in Dance and Movement Performance

Explores the inevitable transformation of traditions in dance/movement performance, using hip-hop and transnational fusion as foundation studies. As students expand their application of ethical inquiry, we will investigate what responsibility artists have as ambassadors in a digital culture. Films, readings and discussions will address personal integrity, ethics, industry practices, values and distortions imparted by history and socialization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6047 (3) Dance Studies

Studies current dance trends, mostly in the United States, with particular attention paid to dance's intersection with philosophy, theory, technology, politics, current events and the other arts.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6056 (2) Professional Development

Examines current trends and issues in dance education and the professional dance world. Explores curriculum development, administration, and job opportunities along with other topics such as grant writing, community engagement, dance advocacy, and working as an independent artist.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6073 (3) Choreography

Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 6101 (1) Advanced Graduate Ballet

Open only to graduate dance majors.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 6849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6919 (1-3) Directed Studies

Explores advanced topics in dance not regularly covered in the curriculum of the graduate program.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6949 (1) Master's Candidate for Degree

Requisites: Restricted to Dance (DNCE) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Independent Study

DNCE 6959 (1-6) Master's Thesis

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6969 (1-6) The Graduate Project

Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

Experience Design

TDXD 5005 (3) Design Theory

Interrogates the principals, theories and philosophies that scaffold successful and innovative design with specific application to the design of immersive and interactive experiences and across a range of commercial, performative and cultural contexts. Activities will clarify how the philosophies of design support the core story-telling and interactive elements of experience designs.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5105 (3) Collaboratory in Experience Design 1

Addresses philosophies of storytelling through experience and the general concepts and aesthetics of Experience Design. The first in a two-part series, this course lays foundational principles focusing on the components of a live experience and how space, narrative and interaction affect the design from early conceptualization through implementation.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 5500 (3) Experience Design Atelier 1: Design Evolution and Expression

Introduces students to various techniques for graphically representing design ideas using drawing and illustration techniques in order to augment and deepen the diverse skill sets of students in the class. The first in three-part sequence on graphic representation and expressive practices, students will learn how to work out design ideas through sketching, drawing, creating storyboards and collages.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5700 (3) Experience Design Atelier 2: Introduction to Design Graphics

Introduces students to advanced techniques for representing design ideas in graphic form including commonly used software applications (Sketchup, Vectorworks, AutoCAD), scale modeling, mechanical drawing and rendering. The second in a three-part class sequence on graphic representation and expressive practices, this atelier will offer a range of exercises tailored to the skill level of individual students.

Requisites: Requires a prerequisite course of TDXD 5500 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5805 (3) Professional Portfolio 1

Focuses on selecting, organizing and developing a plan for presenting material that will eventually culminate in the completion of a competitive professional portfolio, a vital tool for gaining employment in the Experience Design industry. The first of a two-part credited final project, students begin the process to prepare their professional portfolio under the guidance of faculty and industry professionals.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6105 (3) Collaboratory in Experience Design 2

Introduces students to professional models of working in the Experience Design industry. The second in a two-part class sequence, students work collaboratively on industry case studies focusing on entertainment, education and cultural destination genres with input from outside professionals in the field.

Requisites: Requires a prerequisite course of TDXD 5105 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 6210 (3) Storytelling for XD

Explores multi-modal, expressive strategies for experimental storytelling and investigates the diverse languages of live experience. Students complete projects using varying modes of conveyance including physical and spatial action, filmic approaches, digital media and alternative methods. Students will discuss current trends in expressive methods and the nature of story.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

TDXD 6500 (3) Experience Design Atelier 3: Packaging the Design Presentation

Investigates strategies for visually communication and "selling" design ideas in a compelling and well composed visual/aural presentation. The third in a three-part sequence on graphic representation and expressive practices, this class culminates in a final, comprehensive design project portfolio that follows current professional standards.

Requisites: Requires a prerequisite course of TDXD 5700 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 6555 (3) Experience Design Technology

Explores established and cutting-edge technologies employed in visual, auditory, and interactive elements of designed environments and experiences. Develops an understanding of the function of these areas, the ways in which they facilitate a complete experience and examines new directions of experimentation in these fields. Elicits research, analysis, and development of new concepts in response to current practices and design problems.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

TDXD 6805 (3) Professional Portfolio 2

Through editing materials collected in TDXD 5805, students will complete adaptable versions (hard copy, digital, web-based and presentations) of their professional portfolios. In this second of a two-part credited project, a committee comprised of faculty and industry professionals guide the completion of XD portfolios.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of TDXD 5805 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6849 (3-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

TDXD 6901 (3) XD Implementation and Engineering

Explores the realities and challenges of implementing themed entertainment design. Within the framework of project based case studies and a real work project, this course analyzes aspects of construction management, client management and approvals, scheduling, budgeting, value engineering, architecture and design.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

TDXD 6910 (3-6) The Experience Design Center

Offers Experience Design students an opportunity to engage in and complete projects posed by industry professionals or non-profit partners seeking assistance with experiential projects in a professional, practicing lab/studio setting. The XD Center, house in a campus "maker-space," accepts design challenges and assignments that provide a realistic field experience for students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

Theatre**THTR 5010 (3) Introduction to Performance Studies**

Introduces students to the diverse genealogies of the field of performance studies by surveying foundational texts and key topics and by examining theoretical and methodological questions raised by particular performance practices. Provides students with vocabulary and references to continue to navigate the field of performance studies, as well as the many other academic fields that intersect with it.

Requisites: Restricted to graduate students only.

THTR 5011 (3) Seminar: Theory and Criticism

Studies theories and criticisms of drama and theatrical performances from Plato to post-modernism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5025 (3) Costume Patterning and Construction

Includes techniques for the patterning and construction of contemporary and period costumes. Hands-on format covers techniques, materials and equipment particular to theatrical production.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5031 (3) Russian Theatre

Studies Russian theatre history and the development of Russian drama from the 18th century to the present. Taught in translation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5033 (3) Advanced Movement for the Stage

Explores a wide range of physical actor training methods and practices that support the fundamentals of mask training and mask performance for the actor. Students will experience each mask by gaining an understanding of its historical and performative relevance and directly bring into play the authentic life required of the specific mask. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4033

Requisites: Restricted to graduate students only.

THTR 5039 (3) Musical Theatre Repertory

Developed around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4039

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5045 (3) Costume Crafts

Covers basic and advanced techniques in casting/molding, mask making, dyeing, painting, jewelry making, ventilating and wig style and millinery via a series of projects. Culminates in a final project encompassing all techniques. Instruction consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisite THTR 1115.

THTR 5049 (1-4) Special Topics in Theatre

Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4049

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5051 (3) Special Topics in Theatre History

Detailed study of a particular topic in theatre history (e.g., an era, a style, a country, or an organization). Topic specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5061 (3) On Stage Studies: Asian Performance

Study of live performance forms, theory, and literature throughout Asia: performance history, production styles, and social functions of performance.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite background in theatre, dance, or Asian studies.

Additional Information: Departmental Category: History/Dramaturgy/Directing

Departmental Category: Asia Content

THTR 5065 (3) Theatrical Tailoring

Explores classic and theatrical tailoring techniques and theories through the construction of classical men's wear: trousers, vest/waistcoats and coats. Student work with hand and machine sewing techniques, patterning skills and appropriate tailoring materials. Period of exploration will vary by semester. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite THTR 1115.

THTR 5067 (3) Teaching Shakespeare

Provides students with pedagogies, lesson plans and exercises for making Shakespeare accessible for students of all ages and across multiple content. This online course may be taken as a standalone, 3-credit course or as part of the Graduate Certificate in Applied Shakespeare.

THTR 5071 (3) Advanced Directing

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercises. Instructor consent required.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5085 (3) Theatre Management

Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4085

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5105 (3) Theatre Make-Up Design

Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4105

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5113 (3) Comedy Matters

Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4113

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Performance

THTR 5125 (3) Watercolor Illustration and Rendering Techniques

Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4125

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5143 (3) Shakespeare in Community

Surveys a growing field of arts practitioners who are intersecting Applied Theatre, Shakespeare and community in meaningful ways, including Shakespeare in Prisons, Shakespeare with Veterans and Shakespeare for Inclusive Audiences. Students will explore a variety of methodologies for teaching and practicing Shakespeare and create original work using Shakespeare as a lens for examining a particular theme, topic or social issue.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4143

Requisites: Restricted to graduate students only.

THTR 5175 (3) Conceptualization

Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live, theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4175

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5213 (3) Improvisation I: Thinking On Your Feet

Provides students with an introduction to several forms of improvisation, including short form, long-form, playback theatre and clown. A useful course for anyone interested in improving confidence with public speaking, communication and/or performance. Attendance and participation are mandatory.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Performance

THTR 5849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6003 (1-3) Production Research and Practicum: Acting

Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a written report and evaluation of the research, rehearsal, and performance process.

Requisites: Restricted to graduate students only.

Recommended: advanced studies in acting and advisor approval.

Additional Information: Departmental Category: Performance

THTR 6005 (1-3) Production Research and Practicum: Designing

Allows students to undertake a design project, normally within the theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision, and prepare a documented written report and evaluation of the research, design, and realization process, as well as fully rendered designs and/or plots. Projects may be in costumes, lights, or scenery.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 6007 (3) Colorado Shakespeare Festival Dramaturgy

Students work as production dramaturgs for the Colorado Shakespeare Festival, developing detailed textual, historical, and critical research for CSF productions, participating in education and outreach programs, and writing production-related articles for publication.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Shakespearean Production

THTR 6011 (3) On-Stage Studies: Global Ancient and Classical Theatre

Studies classical and neoclassical drama in performance, with particular attention to 20th century productions and the critical and scholarly responses to these productions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

Departmental Category: Asia Content

THTR 6021 (3) On-Stage Studies: Shakespeare

Studies Elizabethan and Jacobean dramatic texts as playscripts for performance, with particular attention to contemporary Shakespeare criticism and landmark Shakespeare productions over the last two centuries.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6031 (3) On-Stage Studies: American Theatre

Studies American drama in performance, with particular attention to critical and scholarly responses to landmark productions of American classics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6041 (3) On-Stage Studies: Global Modern Theatre

Studies global theatre from 1600 to 1950, with particular attention paid to critical and scholarly responses to landmark productions of classics from the period.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6051 (1-3) Production Research and Practicum: Directing

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercise. Instructor consent required.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6071 (3) Seminar: Perspectives on Acting

Art of acting is examined through study of acting theories and practices developed during major periods of theatre history. Examines the variety of theories about acting that remain today.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6081 (3) Seminar in American Theatre: Lesbians and Gays

Studies the portrayal of lesbians and gays in mainstream American theatre during the 20th and 21st centuries, as well as the contributions of gay and lesbian theatre artists during the same period.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6091 (1-3) Production Research and Practicum: Dramaturgy

Students undertake a dramaturgical project, normally within the major season, requiring detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report of their project.

Requisites: Restricted to graduate students only.

Recommended: advanced course work in dramatic literature and advisor approval.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6111 (3) On Stage Studies: Global Contemporary Theatre

Explores global theatre from the early 1960s to the present, with particular attention towards balancing the avant garde and popular theatre in recent world drama.

Requisites: Restricted to graduate students only.

THTR 6849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6949 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6959 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 7004 (3-6) Colorado Shakespeare Festival Summer Immersion

Immersive summer intensive designed to provide an in-depth study of Shakespeare with the Colorado Shakespeare Festival (CSF). Students learn from and engage with CSF company members and faculty from English and Theatre & Dance departments in a small group, experiential setting. Students attend plays, rehearsals and lectures, and explore acting, directing and pedagogy.

Additional Information: Departmental Category: Shakespearean Production

THTR 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

Theatre & Dance**THDN 6009 (2) Research and Teaching in Theatre, Dance and Performance Studies**

Provides an overview of resources, methodologies, and strategies for graduate teaching in the fields of theatre, dance, and performance studies. Students will be exposed to library and other resources available to them in the department and in the university, and will develop a research proposal for a project they plan to develop during their graduate studies.

Requisites: Restricted to THTR MA, THTR PhD or DNCE MFA students

Dance - Master of Fine Arts (MFA)

The MFA program is designed to accommodate a variety of students, ranging from the practicing professional to the recent BA/BFA graduate. The MFA develops students' creative, performance, pedagogical and scholarly work. With an emphasis on embodied research, this degree positions participants for teaching careers in higher education and a great variety of careers in the field of dance, movement, entrepreneurship, critical theory, advocacy and arts administration.

Whereas an undergraduate degree provides a broad introduction to a field of study, an MFA is an intense immersion into a student's expertise and curiosities as an artist and scholar. Great transformations in learning are an expected part of the graduate school experience, and significant space is allocated for self-directed interests. The decision to pursue an MFA in dance indicates a hunger to embark upon the challenges, rewards and maturation this experience will bring.

Curriculum

The primary core MFA curriculum focuses on the development of the individual artistic voice in performance, choreography, teaching, research and writing. The presentation of new creative work is bolstered, augmented and enriched by the study of theory, history and many diverse artists of all dance genres and movement disciplines. The program is designed to be responsive to individual areas of interest and to ensure effective preparation for careers in academics, not-for-profit organizations, and the professional arenas.

Students are encouraged to think outside of the box in terms of course choices, creative pursuits and scholarly activities. A considerable number of the required credits consists of student-selected courses and electives, allowing for a great deal of freedom and individualized study. It is critical that a student work closely with their advisor in selecting courses in the dance curriculum, courses outside of the department and creating independent studies that will support the student's goals and secondary area of emphasis.

Performance and Choreography

All MFA students are expected to present choreographic work each semester, either as part of course-related events or in other departmentally-produced events. Students are coached to seek refinement of their established artistic practices, but also assiduously to stretch their artistic selves into less familiar movement, choreographic, aesthetic and expressive modes. Evaluation of artistic growth is based on intellectual and physical articulateness, creative problem-solving, depth of theatrical and conceptual exploration and on the extent to which a student has deeply sought discovery, reconsideration and analysis of their art-making methods.

Students are encouraged to seek a variety of performance opportunities with fellow graduate students, undergraduates, faculty and guest artists. Produced performances are presented multiple times each year and informal showings occur regularly. Given the rigorous schedule of our MFA program, extensive work with off-campus groups can be extremely difficult to schedule and tends to overwhelm students with multi-tasking and juggling of priorities.

Modified MFA Program for Professionals

Those students entering our program with extensive professional backgrounds including teaching, choreography and/or performance may be able to request a modified degree plan. For such students, an interview with the Director of Dance and the Director of Graduate Studies for Dance during the application/audition process is necessary. The interview will help determine if there is a good match between the student's goals and the MFA program.

The goal of the modified program for professionals is to provide flexibility in the pursuit of individual goals and the fortification of specific educational gaps. In close consultation with the faculty and graduate advisor, the student will be able to propose and develop new areas of research and creative work. All modifications to the MFA program must receive the approval of program directors and the CU Boulder Graduate School. The number of required credits and semesters will be determined based on the individual's exceptional professional experiences.

For detailed information, visit the department's MFA in Dance (<https://www.colorado.edu/theatredance/dance/graduates/mfa-dance-application/>) webpage to download the *MFA Handbook*.

Requirements

Admission Requirements

The deadline for all applications is December 1. The dance program does not accept applications or transfer requests for spring semester admission. After the December 1 submission deadline, the Director of Graduate Studies will pre-screen applications to determine if each person is a fit for our program. Applicants will be notified by early January if they will be invited to audition. Applicants are expected to show a high level of proficiency in dance performance, pedagogy and choreography. International students may request to audition in digital format.

Applicants who want to be considered for program support (<https://www.colorado.edu/theatredance/dance/graduates/mfa-dance-application/>) in the form of teaching positions must also submit the Teaching Application portion of the application. Applicants with outstanding teaching qualifications will be invited to a teaching audition the day before the on-campus audition.

The specific audition dates and detailed information about the on-campus audition can be found on the department's Dance MFA Application (<https://www.colorado.edu/theatredance/admissions/degrees/mfa-dance/dance-mfa-application/>) webpage.

Graduate Record Exam (GRE) scores are not required for the MFA in Dance application.

Prerequisites

- Hold a baccalaureate degree in dance, or equivalent dance proficiency and experience with a degree in another field
- Have an undergraduate GPA of at least 2.75 and meet the Graduate School's minimum Admission Requirements (<https://www.colorado.edu/graduateschool/admissions/>)
- Demonstrate proficiency in dance performance and choreography

Program Requirements

Required Courses and Credits

The three-year program requires a minimum of 60 credit hours, at least 50 of which must be completed on campus at CU Boulder. At this time there is no low-residency option for the MFA program. The curriculum focuses on performance, choreography, scholarship, pedagogy and a secondary area of specialization. Grades lower than a B- cannot be applied towards graduation; a 3.0 GPA is needed to graduate.

Code	Title	Credit Hours
Required Courses		
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
Independent Study ¹		1
DNCE 5001	Graduate Technique (to be taken four times)	8
Varied Additional Technique Classes (DNCE)		6
DNCE 5012	Concert Production ²	1
DNCE 5053	Advanced Dance Composition ²	3
DNCE 5056	Graduate Teaching Seminar	2
DNCE 5064	Music and Dance Seminar: Collaboration	2
DNCE 6073	Choreography (taken twice with different instructors) ²	6
<i>Seminar</i>		

Select two of the following:	6
THTR 5010 Introduction to Performance Studies	
DNCE 5048 Performance and Community Engagement	
DNCE 6017 Cultural Collisions and Ethics in Dance and Movement Performance	
DNCE 6047 Dance Studies	
DNCE 6969 The Graduate Project	4
Electives ³	
Secondary Emphasis	6-10
Additional Electives	9-13
Total Credit Hours	60

¹ First year students complete a customized independent study orientation to gender studies, critical race theory and post-colonialism.

² Students must complete Advanced Composition, both Choreography courses, and Concert Production prior to the semester in which their choreographic/creative project is presented.

³ Students who do the Aerial or Somatic Off-Campus Secondary Emphases will complete fewer credit hours of electives.

MFA Project/Research Paper

The culmination of graduate study is the MFA Project and Research Paper. The Graduate Project is based on creative work: a choreographic/creative project usually presented in a concert or digital format, followed by a paper and an oral defense of the project and paper. We celebrate many varieties of creative projects and possess the imaginative expertise of an outstanding production team.

Graduate Comprehensive Portfolio

Prior to graduation, MFA candidates submit a collection of scholarly, pedagogical and creative work. The portfolio is intended to document and synthesize the graduate's personal practice, philosophies, choreography and academic investigations. It includes creative and pedagogical statements, scholarly essays, a CV and digital documentation of teaching, performance and choreography.

Plan(s) of Study

Course	Title	Credit Hours
Year One		
Fall Semester		
DNCE 5001	Graduate Technique ¹	2
DNCE 5053	Advanced Dance Composition	3
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
Critical Theory Independent Study		1
Electives and/or Independent Study ¹		2
Credit Hours		10
Spring Semester		
DNCE 5001	Graduate Technique ¹	2
DNCE 5056 or DNCE 5064	Graduate Teaching Seminar or Music and Dance Seminar: Collaboration	2
DNCE 6073	Choreography	3

Seminar ¹	3
Credit Hours	10

Year Two

DNCE 5001	Graduate Technique	2
DNCE 5012	Concert Production	1
Electives and/or Independent Study		7
Credit Hours		10

Spring Semester

DNCE 5001	Graduate Technique	2
DNCE 5064 or DNCE 5056	Music and Dance Seminar: Collaboration or Graduate Teaching Seminar	2
Seminar		3
Electives and/or Independent Study		3
Credit Hours		10

Year Three

Fall Semester

DNCE 6969	The Graduate Project	2
Electives and/or Independent Study		8
Credit Hours		10

Spring Semester

DNCE 6969	The Graduate Project	2
Electives and/or Independent Study		8
Credit Hours		10
Total Credit Hours		60

¹ Students paying out-of-state tuition rates their first and second semesters are encouraged to discuss with the program a reduced course load option for those two semesters.

Secondary Emphasis

We wholeheartedly assert that a liberal arts education cultivates a healthy balance of critical thinking, creativity and communal excellence. In this spirit, MFA candidates choose at least one secondary area of study to give variety and dimension to their training.

Secondary Emphases Within Our Campus

Students may choose an emphasis that can be fulfilled by courses taken within the department and/or in other campus departments. Secondary emphases vary between two and five courses, depending on the choice of subject. The university setting is particularly well-suited to broad educational goals, given the wide assortment of subjects available at the CU Boulder campus. We encourage students to search far and wide through the course catalog to discover courses and areas of study that are particularly suited to their individual interests and goals.

Students may also choose to complete a graduate certificate as their secondary emphasis. The most common certificates earned by MFA students are:

- Women & Gender Studies Certificate (<https://www.colorado.edu/wgst/graduates/>)
- Hip-hop Studies Certificate (<https://www.colorado.edu/theatredance/dance/hip-hop-studies-certificate/>)
- Comparative Ethnic Studies Certificate (<https://www.colorado.edu/ethnicstudies/graduate/graduate-certificate/>)

- Emergent Technologies and Media Arts Practices (<https://www.colorado.edu/cmci/dcmp/cert-etmap/>)
- Critical Theory Certificate (p. 1166)
- Digital Humanities Certificate (<https://www.colorado.edu/crdds/dhgc/>)
- Arts Administration Certificate (<https://www.colorado.edu/music/academics/graduate-advising/graduate-certificate-arts-administration/>)

Secondary Emphases with an Off-Campus Component

Students also have two options for secondary emphases that involve off campus private lessons taken at special training schools/centers and subject to their requirements. The somatic and aerial emphases are sponsored by the program, but require students to take some of the private lessons and training that occur at local specialty centers. Because of this extra-curricular study, the number of CU Boulder credit hours required for the MFA is reduced from 60 to 50 credit hours.

Aerial Dance Emphasis

Courses in the aerial dance emphasis are offered for those students who have a serious interest in aerial dance and its application to dance training, performance and/or teacher training. Students can work towards the completion of the Professional Training Program at Frequent Flyers Aerial Dance Studio (<http://www.frequentflyers.org/>)® (located in Boulder) while simultaneously pursuing their MFA degree. The Professional Training Program must be successfully completed before the MFA degree will be awarded. Before a student is eligible to begin work in the aerial dance emphasis, they must be officially accepted by Frequent Flyers® Professional Training Program and have been approved by the Director of Graduate Studies for Dance to follow the aerial dance emphasis.

Somatic Emphasis

The somatic emphasis is social justice oriented. It is intended for students with a strong devotion to intersectional practice-based research. Designed as a connective tissue within the MFA in Dance, the somatic emphasis fosters the artist-citizen to be accountable, embodied and aware through dancing, dance making, performance, critical discourse, collaboration, wellness and activism. Students are supported in accumulating broad experiential knowing through diverse somatic approaches.

We prioritize the development of skills and strategies toward cultivating radical aliveness. How we inhabit our living bodies/minds, and relate to others, impacts our identities, our communities, and the structures we participate in. We consider how somatic decolonizing will deepen collective movements toward justice, equity, diversity, inclusivity, and responsive global citizenship.

The MFA in Dance honors the complexity of somatic lineages and practices. We place value on knowing the global roots of somatics and strongly assert that Eurocentric certified somatic systems are not the only traditions to hold valuable somatic knowledge. Our program supports innovative research into somatic practices of every origin. We aim for a collaborative re-imagining of the potential applications for culturally informed and politically engaged somatic practice; depth of inquiry, integration of theory and practice, and queering of perspectives is encouraged. This emphasis calls for investment in the power of our anatomical, energetic, cultural bodies/minds in the face of converging crises, shifting human demographics, emerging realities, and potential futures.

The somatic emphasis consists of an individualized course of study worth 12 credits. The specific course of study will be developed by each student in collaboration with Dance faculty Anya Cloud.

Course of study will be developed from the following:

- Graduate level Dance courses in somatics
- One approved course in anatomy, physiology and/or kinesiology
- Peer-to-peer somatic lab practice
- Cumulative somatic research documentation and bibliography
- Intensive off-campus somatic training¹
- One approved course outside of the department from the following areas: Ethnic Studies, Women and Gender Studies, LGBTQ Studies, Disability Studies, Native American and Indigenous Studies, Peace and Conflict Studies, Environmental Justice and Eco-Social Justice, or a related and relevant course approved by faculty

¹ Students can apply for CU Boulder grant funding (<https://www.colorado.edu/graduateschool/funding/awards-grants/>) to pursue off-campus somatic training. MFA in Dance grant options are listed within the MFA Handbook (<https://www.colorado.edu/theatredance/graduate-student-resources/>). Current local partners include the Renée Crown Wellness Institute at CU Boulder and community practitioners of Feldenkrais®, Alexander Technique, Body-Mind Centering®, Gyrotonic®/Gyrokinesis®, and Pilates. Current international remote partner includes a practitioner of Kung Fu.

Students must declare a somatic emphasis in writing by spring semester of the first year. All requirements must be successfully completed before the MFA degree will be awarded. The Dance faculty advisor for the somatic emphasis is Anya Cloud.

Learning Outcomes

- To encourage the clarification and individuation of each student's artistic voice.
- To prepare and empower students to fulfill their chosen career paths, both in their graduate studies and in the professional world.
- To investigate traditional and innovative approaches to movement invention, choreography and performance.
- To deepen somatic awareness and increase fluency in dance technique, including but not limited to Improvisation, Jazz, African Caribbean, Aerial, Hip-hop, Transnational Fusion, North and West African dance, Ballet and Modern.
- To actively engage in dance research, with particular attention to discovering relationships between scholarship and creative work.
- To examine pedagogical goals and strategies from aesthetic, cultural and anatomical perspectives.
- To present choreography/creative work on a regular basis and perform in the creative work of faculty, peers and guest artists working in a variety of aesthetic and technical styles.

Experience Design - Master of Fine Arts (MFA)

Every other year, this unique, studio-centric MFA in experience design (XD) admits a cohort of eight to twelve talented students from varied backgrounds, including all areas of design, art, architecture and engineering. Students in the XD program form a studio collective to

complete an array of XD projects under the direct guidance of CU faculty and professionals in the field, many who provide project content. As a result of this industry involvement, and the students own self-exploration, XD graduates are prepared to enter the field of experience design.

The MFA in XD also exposes students to new ways of seeing the reality around them, new ways of creating, resolving problems, expressing ideas and telling stories. Essentially, the MFA in XD is a course of study in using new languages.

The program also features a summer "design center" where students and faculty can accept real-time XD problems posed by outside entities (including some contracted projects with commercial firms) and solve them via a collaborative, studio approach. The work of this center provides a service to various communities and is a practical extension of learning for students.

While the MFA in XD advances a collaborative studio environment where teamwork is held in high regard, we consider it a mission of the program to foster the individual talents, visions, and interests of each student in the program. The program will make every effort to provide an environment where individual students may gestate their own concepts, allowing them room to explore, test and innovate with the support of the studio, other students, faculty and industry professionals.

Connections to Industry

Some of the program's professional advisors, endorsers and participants include:

- Jim Doyle of WET Design (<https://wetdesign.com/>), makers of the famed Bellagio Fountains in Las Vegas
- Dave Cooperstein and Al Cross of PGAV Destinations (<http://pgavdestinations.com>), designers of Sea World and the NASA Space Museum
- Electrosonic (<http://www.electrosonic.com>), makers of the live video projection technology for Disney's Magic Kingdom Castle
- Adam Bezark (<http://bezark.com>), Phil Hettema (<http://www.thehettemagroup.com>) and Steve Ryan, commercial producers of live experiences with credits at Disney, Universal and Landmark Entertainment
- Drew Campbell, Creative Director at International Resorts in Singapore
- Baam Productions (<http://www.baamproductions.com>)
- Nassal (<http://www.nassal.com>)
- Super 78 (<http://www.super78.com>)
- Bolder Interactive, Technology Designers for Themed Experiences
- Stantec, Experiential Architecture Firm

Requirements

Application Process

The professional MFA in experience design admits a new cohort of 8–12 students every other fall semester. Applications will be accepted on a rolling deadline for entry in a fall semester beginning in July of the previous year.

Theatre and Performance Studies - Master of Arts (MA)

Our Master of Arts in Theatre & Performance Studies is committed to performance and research as integral to the study of the history, theory and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender race, and/or coloniality play in this work? Why is it relevant today?

We offer two tracks in our MA in Theatre & Performance Studies, the thesis and the non-thesis track. The thesis track prepares students to pursue a PhD, requiring students to write and defend a substantial research document demonstrating mature critical thought and based on independent study and investigation.

The non-thesis track allows students to further their interests through coursework, and requires written and oral exams. Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience, or beyond.

MA students who are accepted into the PhD program complete their PhD in an additional three years.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Theatre - Bachelor of Arts (BA) (p. 573)

Requirements

Prerequisites

Applicants must have a bachelor's degree and an undergraduate GPA of at least 2.75. While a bachelor's degree in theatre is not a requirement, theatre experience is highly desirable.

Program Requirements

Required Courses and Credits

Students must earn 30 credit hours, at least 24 of which must be at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor. Theatre courses below the 5000 level cannot be counted toward the

degree. Courses in which grades below B- are received are not accepted for master's degree programs.

The degree is normally completed in four semesters (excluding summers).

Students must declare either the thesis or non-thesis option by the start of their third semester. Those choosing the thesis option will apply 4–6 thesis credit hours toward the 30-credit-hour requirement.

Elective Coursework

MA students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, MA students are encouraged to take courses in other departments. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements. All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments.

Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Independent study coursework cannot exceed 25 percent of the coursework required for the master's degree.

Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credits. A limit of 3 credits in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit are:

- one credit hour for successfully completing the project;
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch);
- three credits hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor.

MA Degree Tracks

The MA program in Theatre & Performance Studies has two tracks: a thesis option and non-thesis option. Students must declare either track by the start of their third semester.

Track I: Thesis Option

This track prepares students to pursue a PhD degree at CU or elsewhere. Students must write a thesis, a substantial research document demonstrating mature critical thought based on independent study and investigation. Students must demonstrate proficiency in three areas: academic coursework, the thesis and the final exam (oral).

Students in the thesis track take two one-hour oral examinations back-to-back (i.e. on the same day) after the majority of coursework for the degree has been completed and the master's thesis is "essentially" complete. The first oral exam covers coursework. The second oral examination covers the thesis.

Required Courses and Credits for the Thesis Track

Code	Title	Credit Hours
Required Courses		
THTR 5010	Introduction to Performance Studies	3
THTR 5011	Seminar: Theory and Criticism	3
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
Select two of the following:		6
THTR 6011	On-Stage Studies: Global Ancient and Classical Theatre	
THTR 6021	On-Stage Studies: Shakespeare	
THTR 6031	On-Stage Studies: American Theatre	
THTR 6041	On-Stage Studies: Global Modern Theatre

Any THDN, TDXD or DNCE course at the 3000 level or above ²		
Courses from other departments at the 3000 level or above, if approved by the student's advisor ²		
Total Credit Hours		30

¹ Students may take 4–6 thesis hours. The number of electives is adjusted accordingly.

² A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

Track II: Non-Thesis Option

Students who do not plan to pursue a PhD can elect the non-thesis track, which requires a two-part comprehensive exam, comprised of a take home written exam and a 1.5-hour oral exam. The written and oral exams will be comprehensive, covering all coursework presented for the degree. The exam will take place near the end of the last semester of coursework.

Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience, or beyond. To complete the non-thesis track, students must demonstrate proficiency in two areas: academic coursework and the final exam (written and oral).

Alternatively, students may apply for both programs simultaneously, in which case students must apply to each program separately and meet the admissions standards for each program separately.

NOTE: Residents of U.S. Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program, provided the student applies and is accepted to both programs in the same admissions cycle. For more information, visit the Western Regional Graduate Program (<http://wiche.edu/wrgp/>) webpage.

Program Requirements

The MA/MBA is a dual degree program, and its curriculum is best conceived that way. A minimum of 67 approved credit hours must be completed to earn both degrees. Dual degree students will be required to complete 43 hours of MBA coursework and 24 hours of theatre/dance coursework. The dual degree agreement allows students to count 18 credit hours of courses towards both degrees.

First-year students in the MA/MBA in Theatre & Performance Studies take courses exclusively in either the Leeds School of Business or the Department of Theatre & Dance. In the second year, courses are taken exclusively in the other program. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Because of the two-year cohort model at Leeds School of Business, students are advised to start their coursework in the Department of Theatre & Dance. This is the case even if the student was admitted to both programs simultaneously.

Coursework for the MBA portion of the Dual MA/MBA in Theatre & Performance Studies (p. 1341) can be found on the Leeds School of Business catalog page. The MBA requires 55 credit hours. MA/MBA students will complete 43 credit hours of business courses. Twelve credit hours from the student's coursework for the MA will count toward the MBA.

The MA in Theatre & Performance Studies requires 30 credit hours, 24 of which must be at the 5000 level or above. Six credit hours from the student's work in the Leeds School of Business will count toward the MA in Theatre & Performance Studies. Students are encouraged to explore classes outside the Department of Theatre & Dance for some of their electives, as approved by their advisor.

All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments. Theatre courses below the 5000 level cannot be counted toward the degree.

Courses in which grades below B are received are not accepted for the MA in Theatre & Performance Studies.

Students in the MA/MBA will choose between the thesis track and the non-thesis track. Those choosing the thesis track will take 4–6 master's thesis credit hours and the number of electives in THTR or DNCE will be adjusted accordingly.

Dual Degree Program

MA/MBA in Theatre and Performance Studies

The Department of Theatre & Dance, in conjunction with the Leeds School of Business, offers students the ability to earn an MBA and an MA in Theatre & Performance Studies through a three-year dual degree program. The dual MA/MBA offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially. An MBA degree in combination with an MA degree in Theatre & Performance Studies will provide students with a set of business tools to complement their artistic talents and expand their career options.

Students in the MA/MBA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums, not-for-profit organizations and arts presenters.

Application Process

Students may apply either to the Department of Theatre & Dance for the MA degree program or to the Leeds School of Business for the MBA degree program. Having been accepted, they will subsequently apply to the other degree program.

Learning Outcomes

The goal of the MA, MA/MBA, BAM Degrees in Theatre & Performance Studies is to cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues.

- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breadth and relevance to our field and beyond.

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- For non-thesis track: completion of culminating project and exam
- For thesis track: completion of thesis and exam

Theatre and Performance Studies - Doctor of Philosophy (PhD)

The PhD in Theatre & Performance Studies is primarily designed for those who intend to be scholars working in an academic environment.

Our PhD in Theatre & Performances Studies is committed to performance as research as integral to the study of the history, theory, and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing, and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender, race and/or coloniality play in this work? Why is it relevant today?

The program is designed to be completed in four years for students entering with a master's degree. The first through fourth semesters focus on coursework, the fifth semester is spent preparing for and taking the comprehensive examination and writing the dissertation prospectus and the sixth through eighth semesters are spent writing and defending the dissertation. It is possible for a student entering the PhD program with a master's degree to finish in three years.

Requirements

Prerequisites

Applicants to the PhD in Theatre & Performance Studies must have a master's degree in any subject. Students who apply to the PhD but will not have earned a master's degree prior to the start of the program will instead be considered for the MA in Theatre & Performance Studies.

Program Overview

To complete the program, students must:

1. Demonstrate proficiency in academic coursework.
2. Demonstrate reading competency in at least one foreign language equivalent to the completion of a second-semester college-level course.
3. Pass a comprehensive exam.
4. Prepare and successfully defend a dissertation.

Doctoral students in theatre complete 30 credit hours of coursework beyond the master's degree at the 5000 level or above. When approved by the student's advisor, credit hours from other departments on campus may count, provided the course is taught by a member of the graduate faculty in that department. In addition to the 30 credit hours of coursework, 30 dissertation credit hours (THTR 8999) are required.

Required Courses

The PhD program is based upon a core of required courses which emphasize the interrelatedness of theory, history and practice.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
THTR 5010	Introduction to Performance Studies	3
THTR 5011	Seminar: Theory and Criticism	3
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2

THTR 6031	On-Stage Studies: American Theatre	
THTR 6041	On-Stage Studies: Global Modern Theatre	
THTR 6111	On Stage Studies: Global Contemporary Theatre	
Electives		
Additional courses to meet the 30-credit minimum.		13
Dissertation		30
THTR 8999	Doctoral Dissertation	
Total Credit Hours		60

Elective Coursework

PhD students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, PhD students are encouraged to take courses in other departments, especially as they relate to the anticipated dissertation topic. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements.

Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Although there is no limit to the number of independent study credit hours a doctoral student may take, they should be held to a minimum.

Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credit hours. A limit of 3 credit hours in each category may apply toward the degree. All courses are supervised by members of

the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit hours are:

- one credit hour for successfully completing the project
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch)
- three credit hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor

Language Requirement

Reading competency in a foreign language is an important skill for a scholar. It allows the student to consider a dissertation topic beyond the limits of English-speaking theatre, thereby significantly broadening their research and publishing possibilities. Doctoral students are required to demonstrate proficiency in a foreign language equivalent to the completion of a second-semester college-level course before taking the comprehensive exam. This requirement may be fulfilled by coursework taken within five years previous to the exam or by testing.

Dissertation

The PhD program culminates in the dissertation, a research document that makes a significant and original contribution to the field of theatre studies. The dissertation will be defended before a committee of five members.

Learning Outcomes

Goal of the PhD Degree in Theatre & Performance Studies

To cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues .
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breath and relevance to our field and beyond.

Indicators for Reaching Learning Objectives

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- Completion of comprehensive examination and dissertation
- Assessment of teaching

Hip-Hop Studies - Graduate Certificate

This consolidated certificate program in Hip-hop Studies for matriculated graduate students is designed to expose students to the richness, complexity and vitality of Hip-hop—as theory and practice.

Hip-hop, which arose in youth communities of color in the 1970s amid political abandonment and economic devastation, has become the most important cultural movement of the last-half century. Practiced in nearly every corner of the globe, it is now one of the most important through-lines in human culture. To understand Hip-hop is to understand the world in which we live. Inclusive excellence is the bedrock of Hip-hop; membership in its community is not defined by subscription to a particular place or race but rather to its unique ethos, which privileges virtuosic innovation as much as historic and self knowledge.

Hip-hop is fundamentally an interdisciplinary form. It does not live in one field alone. Rather, it is a dialogue that occurs across dance, music, visual and verbal arts, as well as history and theory. While the Graduate Certificate in Hip-Hop Studies is housed in the Department of Theatre & Dance, courses are available in other departments, such as History, Sociology, English and Ethnic Studies. Organized in this way, with offerings from several campus departments, the consolidated certificate program is the best way to give students a sense of the richness, complexity and vitality of Hip-hop.

Importantly, the certificate's community-based practicum ensures the students in the program will know Hip-hop as a lived culture, not merely an object to be consumed inside the halls of academia. This active learning component will integrate students into the local Boulder/Denver communities that are shaping the future of Hip-hop's forms. It ensures students will know themselves as ethnographers, as well as theorists, and know Hip-hop as an ever-evolving, potent and urgent tool of self-expression.

The certificate in Hip-hop Studies is designed to be an enriching, interdisciplinary supplement to other areas of study. It provides a broad base, which can serve as an entry point to more focused study and practice. While offering rich and rewarding experiences, the graduate certificate is not a professional endorsement from Rennie Harris or Larry Southall of the student's skills. Rather, it develops students' appreciation and respect for one of the most important American cultural forms to have emerged in the last half-century.

Requirements

Prerequisites

All currently matriculated graduate students at CU Boulder are eligible for admission to the certificate program. Students must submit a Statement of Interest which will be reviewed and approved by the Hip-hop Studies Directors, Rennie Harris and Larry Southall.

Program Requirements

To obtain this certificate, students will be required to complete eleven graduate-level credit hours:

- Two movement-based courses (4 credits)
- One community-based practicum (1 credit)

- Two elective courses that develop the critical thinking skills required for understanding Hip-hop's impact and socio-historical development (6 credits)

This broad menu of options, which upholds both theoretical engagement and embodied practice with equal importance, will equip students with the skills necessary to engage with Hip-hop as praxis.

Courses will be offered on a regular basis in the departments of Theatre & Dance, Ethnic Studies and English. Additionally, other departments may offer courses that are relevant to the certificate. Students may petition to have these and other Special Topics courses approved by their Hip-hop Studies advisor.

In order to earn the certificate, students must earn a grade of B in each course and meet the graduate school's overall GPA requirement.

Code	Title	Credit Hours
Movement Courses ¹		4
Choose from:		
DNCE 5001	Graduate Technique (Hip-hop section)	
DNCE 5038	Dance Repertory (Hip-hop section)	
DNCE 5301	Graduate Hip-Hop Technique 1

Total Credit Hours		11

¹ Students may petition their Hip-hop Studies advisor to have other courses approved. All courses for the certificate must be graduate level (5000 or above). Independent Study is not accepted.

Applied Shakespeare - Graduate Certificate

By participating in this unique, cross-disciplinary graduate certificate program that combines courses from the Department of Theatre & Dance and the Department of English, students get to know the Bard and his plays as never before.

Students experience a vital mix of performance and scholarship by taking two distance-learning courses and then visiting campus for a one-week summer intensive during the Colorado Shakespeare Festival (CSF) to

learn from the nationally recognized CSF company members and CU faculty in small experiential groups.

The summer intensive includes acting, directing, stage combat, Elizabethan culture, rehearsal visits, play attendance, classes on how to teach Shakespeare and more. Self-directed reading and a final project are the conclusion of the certificate requirements.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Required Courses and Credits

Code	Title	Credit Hours
ENGL 5000	Introduction to Applied Shakespeare	3
THTR 5067	Teaching Shakespeare	3
THTR 5143	Shakespeare in Community	3
THTR 7004	Colorado Shakespeare Festival Summer Immersion	3
Total Credit Hours		12

Within one month of completing the two-week summer intensive, students must submit their final paper.

Women and Gender Studies

The graduate certificate in Women and Gender Studies offers CU Boulder graduate students a cutting-edge, interdisciplinary education in gender and sexuality studies. It provides a thorough grounding in feminist theories, queer theories, and/or feminist methodology, as well as the opportunity to explore diverse special topics in gender and sexuality studies. The graduate certificate is designed to train graduate students from a wide range of CU Boulder departments and programs to conduct interdisciplinary research in gender and sexuality studies. On a practical level, the certificate has proven especially useful to graduate students seeking to demonstrate their expertise in gender and sexuality studies to prospective employers in academia, government and the private sector.

Course code for this program is WGST.

Courses

WGST 5000 (3) Advanced Topics in Gender and Sexuality Studies

Provides an advanced interdisciplinary course organized around a specific topic, problem, or issue relating to gender and sexuality. Course work includes discussion, reading and written projects.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4000

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

WGST 5001 (3) Advanced Topics in Gender and Sexuality Studies (AH)

Provides an advanced interdisciplinary course organized around a specific issue in the social sciences relating to gender and sexuality.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4001

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 5002 (3) Advanced Topics in Gender and Sexuality Studies (SS)

Provides an advanced interdisciplinary course organized around a specific issue in the arts and humanities relating to gender and sexuality.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5002

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 5200 (3) Religion and Reproductive Politics in the United States

Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4200, JWST 4200, JWST 5200

WGST 5400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4400 and LGBT 4400 and LGBT 5400

Grading Basis: Letter Grade

Additional Information: Departmental Category: LGBT Studies

WGST 6090 (3) Feminist Theories

Explores how feminist theorists have understood gender and how it interrelates to our understandings of race, ethnicity, sexuality, embodiment and knowledge. Meets the requirements for the WGST certificate.

Requisites: Restricted to graduate students only.

WGST 6190 (3) Feminist Methodology

Explores feminist methodology across a range of disciplines. Themes include experience and interpretation, the social position of the researcher, language and argument structure, knowledge and power, bias and objectivity, and the ethics and politics of research. Meets the requirements for the WGST certificate.

Requisites: Restricted to graduate students only.

WGST 6290 (3) Special Topics in Gender and Sexuality Studies

Offers interdisciplinary feminist perspectives on different special topics such as gender and war, gender and globalization, women's social movements, gender and citizenship, gender and collective memory, and cultural representations of gender and sexuality. Meets the requirements for the WGST certificate.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

WGST 6796 (3) Queer Theories

Explores key concepts and debates in the field of queer theory with an interdisciplinary focus on crosscutting issues (aesthetic, cultural, legal, medical, political and social) that shape queer subjectivities, practices and relations.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

WGST 6840 (1-3) Independent Study

Provides course credit for a directed research project or reading program in women and gender studies, supervised by a WGST faculty member and approved by the WGST graduate director. Requires an independent study approval agreement form completed by the student and signed by the faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Women and Gender Studies - Graduate Certificate

The graduate certificate in women and gender studies is designed to complement a CU Boulder graduate disciplinary degree program—providing graduate students the opportunity to engage a variety of

scholarly and methodological approaches to the study of gender and sexuality.

Students wishing to take part in the women and gender studies certificate program must be currently enrolled in a graduate disciplinary degree or professional degree program at CU Boulder. Students are encouraged to apply for the graduate certificate early in their course of graduate studies; students enrolled in the program will get priority if placed on a waitlist for a graduate-level women and gender studies course.

Requirements

Students must complete 9 credit hours of coursework in women and gender studies and one additional 3 credit hour course to be approved by the women and gender studies graduate director, for a total of 12 credit hours.

The minimum acceptable grade for courses submitted for the graduate certificate is a B. Minimum GPA for all courses submitted for the graduate certificate is a cumulative 3.5.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
At least three of the following four courses:		9
WGST 6090	Feminist Theories	
WGST 6190	Feminist Methodology	
WGST 6796	Queer Theories	
WGST 6290	Special Topics in Gender and Sexuality Studies	
Electives		
One additional 3-credit course approved by the women and gender studies graduate director. This course should focus on issues related to women, gender and/or sexuality; take an interdisciplinary approach; and ideally be taken either outside of the student's home department or as an additional course in women and gender studies.		3
Total Credit Hours		12

None of the three required women and gender studies courses may be taken as independent study.

Independent study courses taken with faculty not affiliated with the Department of Women and Gender Studies will not count for the graduate certificate. Independent study courses taken with department faculty members may count only in exceptional circumstances as determined by the graduate committee.

For more details, including application instructions, visit the WGST Graduate Certificate (<http://www.colorado.edu/wgst/graduates/>) webpage or email wgst@colorado.edu.

Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Students can specialize in accounting, finance, management and entrepreneurship, marketing, and real estate. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *Wall St. Journal*, the *New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Graduation Recognition Ceremony

Every December and May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

Facilities & Research

The Leeds School of Business houses resources for the specific needs of business students:

- Burridge Center for Finance
- Business Research Division

- Career Strategy
- Center for Education on Social Responsibility
- Center for Research on Consumer Financial Decision Making
- MBA Business Center
- Office of Diversity Affairs
- Real Estate Center
- Robert H. and Beverly A. Deming Center for Entrepreneurship
- smart classrooms
- student lounges
- Undergraduate Student Services
- William M. White Business Library and Information Commons

The William M. White Business Library and Information Commons

The White Business Library (<http://www.colorado.edu/libraries/libraries/william-m-white-business-library/>) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (<https://vems1.colorado.edu/>).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its

annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to \$75,000 in grant funds and 50/50 cost sharing for strategic projects.

Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burrige Center for Finance, the Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship's mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

Cutting-Edge Curriculum

Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing and business planning,
- interdisciplinary programs in engineering, business, law and environmental studies,
- undergraduate business minor (p. 625) with a certificate of entrepreneurship for students across campus,
- undergraduate certificate of entrepreneurship (p. 626) for Leeds students,
- MBA (p. 1338) concentration in entrepreneurship, and
- world-renowned PhD program (p. 1344) in entrepreneurship.

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education.** Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting,

curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.

- **Real-world experience.** Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students with projects, advisors and internships that challenge them to use their new skills creatively.
- **Student experience.** Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.
- **The community.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs

Real Estate Center

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Coursework is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project coursework and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

Burridge Center for Finance

The Burridge Center for Finance is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public,
- identifying critical research issues in the theory and practice of security analysis and valuation, and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

Center for Education on Social Responsibility (CESR)

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR

oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although the Center's primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

Courses

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite 3000-level course Business Law, Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4827/ACCT 4827, CESR 4828/MGMT 4828 and the Global Seminar *Social Entrepreneurship & Innovation* in Panama.

Certificate and Portfolio

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the certificate in social responsibility and ethics (p. 628) (SRE). At the MBA level, CESR has formalized a Sustainability Portfolio of courses, including the MBA requisite Socially Responsible Enterprise course, and electives such as MBAX 6570 and MBAX 6140.

CESR Co-Curricular Activities

- **CESR Stampede at Leeds: A Week of Driving Values in Business.**

This weeklong event showcases the values-driven and innovative curriculum developed by the CESR that is shaping tomorrow's business leaders. Through class visits, expert panels and lectures student competitions and showcases, attendees will explore their own values and network with like-minded professionals about applying positive values in a business setting. Stampede Week also includes the fourth annual Conscious Capitalism Conference, a CESR flagship event.

CESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:

- **CESR Business Ethics Case Competition (BECC).** The CESR BECC is an interactive way to deepen the Leeds undergraduate students' understanding of the importance of creating ethical as well as profitable business cultures. Teams are provided with a business case in the weeks leading up to the competition which they will have to analyze, create recommendations for course of action and present their solutions to a panel of professional judges. Cash prizes are awarded to the top three teams.
- **Conscious Capitalism Conference.** An annual conference hosted by CESR featuring innovative executives and entrepreneurs who have used the traditional tools of capitalism to serve social needs.
- **Student Center for Social Entrepreneurship.** CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development, an interdisciplinary, inter-generational campus group that is involved in researching, teaching and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club.** CESR is home to a graduate chapter of Net Impact, an international nonprofit organization whose mission is to use the

power of business to create a more socially and environmentally sustainable world.

- **New Venture Challenge Social Impact Track.** CESR developed and continues to support the Social Impact Track of the **CU New Venture Challenge**, a campuswide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and experience making entrepreneurship accessible to anyone on the CU Boulder campus with the enthusiasm and creativity required to start a new business.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Programs & Leadership

Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and

mentors, the PMP provides workshops, training and additional support for participants throughout the program.

Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- advice and assistance on academic questions, career options, life beyond college and more,
- access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network,
- opportunities to practice and strengthen professional communication and presentation skills,
- help in defining personal and professional goals, and the strategies to achieve them,
- unique internship and job opportunities, and
- development of a life-long friend and connection in the business world.

Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- Athletic Business Club
- CU Fashion Club
- Beta Alpha Psi
- Collegiate DECA
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- International Business Club
- Leeds Ambassadors
- Leeds Association of Information Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- Music Industry Club

- Real Estate Club
- Women in Business Club

Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support and represent the student body. The council also works to make Leeds a better business school through social, academic and professional programming. The council is made up of five primary committees and an executive board that control a significant portion of the Leeds student fees.

Two members of Leeds Council also serve as representatives on University of Colorado Student Government (CUSG) to voice the interests of business students at the main campus.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Programs of Study

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Master's Degrees

- Accounting - Master of Science (MS) (p. 1345)
- Business Analytics - Master of Science (MS) (p. 1346)
- Finance - Master of Science (MS) (p. 1347)
- Real Estate - Master of Sciences (MS) (<https://catalog.colorado.edu/graduate/colleges-schools/business/programs-study/real-estate-master-science-ms/>)
- Supply Chain Management - Master of Science (MS) (<https://catalog.colorado.edu/graduate/colleges-schools/business/programs-study/supply-chain-management-master-science-ms/>)
- Taxation - Master of Science (MS) (p. 1349)

Certificates

- Business Analytic Methods - Graduate Certificate (p. 1350)
- Marketing Analytics - Graduate Certificate (p. 1350)
- Supply Chain Analytics - Graduate Certificate (p. 1351)
- Supply Chain Foundations - Graduate Certificate (p. 1352)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adams, Heather L. (https://experts.colorado.edu/display/fisid_143714/)
Instructor; PhD, University of Maryland, College Park

Alston, Eric Christopher (https://experts.colorado.edu/display/fisid_158159/)
Scholar in Residence; JD, University of Chicago

Appenzeller, William
Professor Emeritus

Auslander, Bonnie (https://experts.colorado.edu/display/fisid_158273/)
Instructor; MFA, University of Massachusetts

Balkin, David B. (https://experts.colorado.edu/display/fisid_105481/)
Professor; PhD, University of Minnesota Twin Cities

Ballantine, John T. Jr. (https://experts.colorado.edu/display/fisid_102703/)
Senior Instructor; JD, University of Colorado Boulder

Bangs, F. Kendrick
Professor Emeritus

Banks, Cynthia (https://experts.colorado.edu/display/fisid_158245/)
Instructor; MS, University of Colorado Denver

Bei, Xiaoshu (https://experts.colorado.edu/display/fisid_165170/)
Assistant Professor; PhD, Duke University

Bein, Jonathan Weber (https://experts.colorado.edu/display/fisid_155451/)
Scholar in Residence; PhD, University of Colorado Boulder

Bennett, Douglas P. (https://experts.colorado.edu/display/fisid_149983/)
Instructor; JD, George Washington University

Bercovitz, Janet (https://experts.colorado.edu/display/fisid_159339/)
Professor; PhD, University of California, Berkeley

Bernstein, Asaf (https://experts.colorado.edu/display/fisid_157738/)
Assistant Professor; BS, Harvey Mudd College

Bernthal, Wilmar F.
Professor Emeritus

Bhagat, Sanjai (https://experts.colorado.edu/display/fisid_100789/)
Professor; PhD, University of Washington

Billings, Stephen B. (https://experts.colorado.edu/display/fisid_157918/)
Associate Professor; PhD, University of Colorado Boulder

Bondi, Salvatore (https://experts.colorado.edu/display/fisid_165936/)
Instructor; MS, University of Illinois at Urbana-Champaign

Bone, Jennifer Emerling (https://experts.colorado.edu/display/fisid_158206/)
Instructor; PhD, University of Colorado Boulder

Boss, Russel Wayne (https://experts.colorado.edu/display/fisid_105260/)
Professor; PhD, University of Georgia

Brown, Daniel (https://experts.colorado.edu/display/fisid_152029/)
Senior Instructor; D.Phil, Oxford University

Buchman, Thomas A.
Professor Emeritus

Bumbaca, Frederico (https://experts.colorado.edu/display/fisid_163475/)
Assistant Professor; PhD, University of California, Irvine

Campbell, Margaret Catherine (https://experts.colorado.edu/display/fisid_118141/)
Professor, Associate Dean; PhD, Stanford University

Carbone, Christopher (https://experts.colorado.edu/display/fisid_158166/)
Instructor; MFA, University of Baltimore

Carson, Visda (https://experts.colorado.edu/display/fisid_158296/)
Instructor; MBA, University of Colorado, Leeds School of Business

Cateora, Phillip R.
Professor Emeritus

Chari, Mukund (https://experts.colorado.edu/display/fisid_159141/)
Assistant Professor; PhD, University of Washington

Chen, Zeyun
Assistant Professor; PhD, University of Houston

Christoff, Lorna Colleen (https://experts.colorado.edu/display/fisid_146614/)
Instructor; JD, University of Denver

Contreras, Jeremiah
Instructor; MBA, Grand Canyon University

Cookson, John Anthony (https://experts.colorado.edu/display/fisid_152874/)
Associate Professor; PhD, University of Chicago

Correll, Mark R.
Professor Emeritus

Cropanzano, Russell Salvador (https://experts.colorado.edu/display/fisid_151710/)
Professor, Chair; PhD, Purdue University

Cunningham, Cory
Instructor; PhD, University of Oklahoma

Daley, Brendan (https://experts.colorado.edu/display/fisid_159486/)
Associate Professor; PhD, Stanford University

Dam, Robert Anthony
Assistant Professor; PhD, Northwestern University

Darnell, Jerome C.
Professor Emeritus

Davies, Shaun William (https://experts.colorado.edu/display/fisid_152995/)
Assistant Professor; PhD, University of California, Los Angeles

DelPrete, Michael
Scholar in Residence

Demaree, John D.
Professor Emeritus

Donchez, Robert M. (https://experts.colorado.edu/display/fisid_101267/)
Senior Instructor, Faculty Director; MBA, Fordham University

Donohew, Zachary (https://experts.colorado.edu/display/fisid_164033/)
Scholar in Residence

Drake, David Francis (https://experts.colorado.edu/display/fisid_163641/)
Assistant Professor; PhD, INSEAD (France)

Duncan, Calvin
Professor Emeritus: Leeds School of Business

Eargle, David (https://experts.colorado.edu/display/fisid_159053/)
Assistant Professor; PhD, University of Pittsburgh

Edwards, Emily (https://experts.colorado.edu/display/fisid_153378/)
Instructor; MBA, University of Colorado Denver

Engel, Steven
Professor Emeritus

Ertimur, Yonca (https://experts.colorado.edu/display/fisid_151585/)
Professor, Professor; PhD, New York University

Fernbach, Philip M. (https://experts.colorado.edu/display/fisid_149786/)
Associate Professor; PhD, Brown University

Fisher, Christina Marie (https://experts.colorado.edu/display/fisid_158798/)
Instructor; MS, University of Delaware

Frederick, David M.
Professor Emeritus: Leeds School of Business

Gallagher, Emily Anne (https://experts.colorado.edu/display/fisid_163544/)
Assistant Professor; PhD, Paris School of Economics

Gallo, John
Instructor; PhD, University of Iowa

Garcia, Diego (https://experts.colorado.edu/display/fisid_156036/)
Professor, Endowed Chair; PhD, University of California, Berkeley

Garnand, John J.
Professor Emeritus

Gasta, Mark (https://experts.colorado.edu/display/fisid_165314/)
Instructor; PhD, Pepperdine University

Glover, Fred W.
Professor Emeritus

Goeldner, Charles R.
Professor Emeritus

Gordon, Kenneth R.
Professor Emeritus

Goren, Bahriye (https://experts.colorado.edu/display/fisid_158218/)
Instructor; MS, Erasmus University (Netherlands)

Gross, David Michael (https://experts.colorado.edu/display/fisid_109026/)
Senior Instructor, Faculty Director; PhD, University of Colorado Boulder

Gwozdz, Ronald Scott (https://experts.colorado.edu/display/fisid_144830/)
Instructor; MBA, University of Colorado Boulder

Hawk, Ashton Lewis (https://experts.colorado.edu/display/fisid_157915/)
Assistant Professor; PhD, New York University

He, Chuan (https://experts.colorado.edu/display/fisid_124857/)
Associate Professor; PhD, Washington University

Hekman, David R. (https://experts.colorado.edu/display/fisid_151359/)
Associate Professor; PhD, University of Washington

Higgins, Brian Edmund (https://experts.colorado.edu/display/fisid_156515/)
Instructor; JD, University of Denver

Hirschhorn, Diane
Instructor; MBA, University of California System

Ikenberry, David L. (https://experts.colorado.edu/display/fisid_149340/)
Professor; PhD, University of Illinois at Urbana-Champaign

Jackson, Betty R.
Professor Emerita

Jedamus, Paul E.
Professor Emeritus

Jennings, Tracy M. (https://experts.colorado.edu/display/fisid_128765/)
Senior Instructor, Faculty Director; PhD, University of Denver

Jensen, Howard G.
Professor Emeritus

Johnson, Stefanie Kathleen (https://experts.colorado.edu/display/fisid_153813/)
Associate Professor; PhD, Rice University

Kennedy, Heather (https://experts.colorado.edu/display/fisid_157932/)
Instructor; MA, University of Texas at Austin

Keplinger, Ksenia (https://experts.colorado.edu/display/fisid_156660/)
Scholar in Residence; PhD, Johannes Kepler University of Linz, Austria

Kline, Bruce Richard
Senior Instructor; MA, Northwestern University

Koberg, Christine S.
Associate Professor Emerita

Koc, Ozlem
Instructor; PhD, Georgia State University

Kolb, Burton A.
Professor Emeritus

Kornish, Laura Joyce (https://experts.colorado.edu/display/fisid_139966/)
Professor; PhD, Stanford University

Kozar, Kenneth A.
Professor Emeritus

Kwaramba, Marcia (https://experts.colorado.edu/display/fisid_164299/)
Scholar in Residence; PhD, Monash University (Australia)

Lacerenza, Christina Noelle (https://experts.colorado.edu/display/fisid_159797/)
Assistant Professor; PhD, Rice University

Laguna, Manuel (https://experts.colorado.edu/display/fisid_102975/)
Professor, Faculty Director, Endowed/Named Professor; PhD, University of Texas at Austin

Larsen, Kai Rune (https://experts.colorado.edu/display/fisid_118160/)
Associate Professor; PhD, SUNY at Albany

Laurion, Henry R. (https://experts.colorado.edu/display/fisid_163642/)
Assistant Professor; PhD, University of California, Berkeley

Lawrence, Stephen R. (https://experts.colorado.edu/display/fisid_102032/)
Associate Professor; PhD, Carnegie Mellon University

Leach, Chris (https://experts.colorado.edu/display/fisid_105152/)
Professor, Endowed/Named Professor; PhD, Cornell University

Lee, Jintae (https://experts.colorado.edu/display/fisid_115390/)
Associate Professor; PhD, Massachusetts Institute of Technology

Lewis, Barry L.
Professor Emeritus

Lewis, Mary Beth (https://experts.colorado.edu/display/fisid_153829/)
Senior Instructor; MBA, University of Pittsburgh

Lewis, Ryan C. (https://experts.colorado.edu/display/fisid_157865/)
Assistant Professor; PhD, London Business School (England)

Lichtenstein, Donald (https://experts.colorado.edu/display/fisid_101701/)
Professor; PhD, University of South Carolina

Liu, Liu (https://experts.colorado.edu/display/fisid_163568/)
Assistant Professor; PhD, New York University

Lyle, Catherine (https://experts.colorado.edu/display/fisid_155020/)
Instructor; JD, The John Marshall Law School

Lynch, John G. (https://experts.colorado.edu/display/fisid_147448/)
Faculty Director, Professor, Associate Dean, Endowed/Named Professor; PhD, University of Illinois at Chicago

Macaluso, Gregg Richard (https://experts.colorado.edu/display/fisid_123302/)
Faculty Director, Instructor; MS, University of California, Irvine

Macfee, Raymond D. Jr.
Professor Emeritus

Maciszewski, Michael (https://experts.colorado.edu/display/fisid_153223/)
Instructor; JD, University of Denver

Marshall, Nathan Thomas (https://experts.colorado.edu/display/fisid_156034/)
Assistant Professor; PhD, Indiana University Bloomington

Matusik, Sharon Marie Frances (https://experts.colorado.edu/display/fisid_133564/)
Professor; PhD, University of Washington

Maxwell, Christopher (https://experts.colorado.edu/display/fisid_164956/)
Instructor; BS, Colorado State University

Mcgee, Micah
Instructor; PhD, University of Northern Colorado

McGraw, Albert Peter (https://experts.colorado.edu/display/fisid_133262/)
Professor; PhD, The Ohio State University

McMahon, Kevin Christopher (https://experts.colorado.edu/display/fisid_143892/)
Senior Instructor; MBA, Indiana University

McNown, Robert F.
Professor Emeritus

Melicher, Ronald W. (https://experts.colorado.edu/individual/deptid_10255/)
Professor Emeritus: Leeds School of Business

Merrell, Jeffery C.
Instructor; PhD, University of Colorado Boulder

Meyer, G. Dale
Professor Emeritus

Milburn, Catherine Knoll (https://experts.colorado.edu/display/fisid_142214/)
Senior Instructor, Faculty Director; MS, University of Colorado Boulder

Mohr, Pete J. (https://experts.colorado.edu/display/fisid_155498/)
Senior Instructor; MS, Colorado State University

Montealegre, Jose Ramiro (https://experts.colorado.edu/display/fisid_100072/)
Associate Professor; DBA, Harvard University

Moon, Katie Seoyeon (https://experts.colorado.edu/display/fisid_157680/)
Assistant Professor; PhD, University of Maryland

Morley, Susan (https://experts.colorado.edu/display/fisid_116716/)
Senior Instructor; JD, University of Colorado Boulder

Moyen, Nathalie (https://experts.colorado.edu/display/fisid_113873/)
Associate Professor; PhD, University of British Columbia (Canada)

Mueller, Erick Michael (https://experts.colorado.edu/display/fisid_140940/)
Senior Instructor, Faculty Director; MBA, University of Colorado Boulder

Mukhopadhyay, Tathagat (https://experts.colorado.edu/display/fisid_159337/)
Assistant Professor; PhD, London Business School (England)

Munter, Paul
Senior Instructor; PhD, University of Colorado Boulder

Neil, Josh (https://experts.colorado.edu/display/fisid_152068/)
Senior Instructor, Faculty Director; MS, Oklahoma State University

Nelson, James E.
Professor Emeritus

Nunziato, Joshua (https://experts.colorado.edu/display/fisid_164373/)
Instructor; PhD, Villanova University

Oest, Donald G. (https://experts.colorado.edu/display/fisid_146623/)
Senior Instructor; MBA, Fairleigh Dickinson University

Palmer, Michael
Professor Emeritus

Papuzza, Antonio (https://experts.colorado.edu/display/fisid_145295/)
Instructor; PhD, University of Florence (Italy)

Parkin, Don
Professor Emeritus

Purmehdi, Mostafa (https://experts.colorado.edu/display/fisid_158906/)
Instructor; PhD, University of Montreal (Canada)

Ravishankar, G. Ravi (https://experts.colorado.edu/display/fisid_144567/)
Scholar in Residence; MBA, Massachusetts Institute of Technology

Reinholtz, Nicholas S. (https://experts.colorado.edu/display/fisid_155180/)
Assistant Professor; PhD, Columbia University

Reuer, Jeffrey J. (https://experts.colorado.edu/display/fisid_155768/)
Professor, Endowed Chair; PhD, Purdue University

Reznicek, Birdie C. (https://experts.colorado.edu/display/fisid_149091/)
Instructor; MBA, Northwestern University

Richey, Clyde W.
Professor Emeritus

Ringgenberg, Ralph G.
Professor Emeritus

Rock, Steven Karl (https://experts.colorado.edu/display/fisid_113689/)
Associate Professor, Chair; PhD, Pennsylvania State University

Rodgers, Timothy (https://experts.colorado.edu/display/fisid_155460/)
Instructor; PhD, University of California, Santa Cruz

Rogers, Jonathan Lawrence (https://experts.colorado.edu/display/fisid_153009/)
Professor, Endowed/Named Professor; PhD, University of Pennsylvania

Rosse, Joseph G.
Professor Emeritus: Leeds School of Business

Santosh, Shri
Assistant Professor; PhD, University of Chicago, Booth School of Business

Schattke, Rudolph
Professor Emeritus

Schaub, Kevin D. (https://experts.colorado.edu/display/fisid_144142/)
Instructor; MBA, University of Colorado Boulder

Sears, Curtis R. (https://experts.colorado.edu/display/fisid_145482/)
Senior Instructor, Faculty Fellow; JD, University of Colorado Boulder

Selto, Frank
Professor Emeritus

Assistant Professor; PhD, Texas A&M University

Tong, Wenfeng (https://experts.colorado.edu/display/fisid_144520/)
Professor; PhD, The Ohio State University

Tracy, John A.
Professor Emeritus

Urrea, Gloria (https://experts.colorado.edu/display/fisid_165311/)
Assistant Professor; PhD, Università della Svizzera italiana, Switzerland

Van Wesep, Edward D. (https://experts.colorado.edu/display/fisid_154573/)

Associate Professor; PhD, Stanford University

Volpone, Sabrina D. (https://experts.colorado.edu/display/fisid_158941/)

Assistant Professor; PhD, Temple University

Vossen, Thomas Wilhelmus (https://experts.colorado.edu/display/fisid_126642/)

Associate Professor; PhD, University of Maryland, College Park

Waddell, Jay L. (https://experts.colorado.edu/display/fisid_151520/)

Instructor; MS, University of Wisconsin–Madison

Wang, Clare (https://experts.colorado.edu/display/fisid_165260/)

Associate Professor; PhD, University of Pennsylvania, The Wharton School

Wang, Yanwen

Assistant Professor; PhD, Emory University

Waters, Brian Todd (https://experts.colorado.edu/display/fisid_155846/)

Assistant Professor; PhD, University of California, Los Angeles

Wenger, Paula (https://experts.colorado.edu/display/fisid_113621/)

Senior Instructor; MA, Miami University–Oxford

Werner, Walter Bradley (https://experts.colorado.edu/display/fisid_158225/)

Instructor; MBA, University of Chicago

Williams, Lawrence Edwin Jr. (https://experts.colorado.edu/display/fisid_145743/)

Associate Professor; PhD, Yale University

Winn, Daryl

Professor Emeritus

Wobbekind, Richard (https://experts.colorado.edu/display/fisid_100997/)

Associate Dean; PhD, University of Colorado Boulder

Yao, Xin

Assistant Professor; PhD, University of Washington

York, Jeffrey Glenn (https://experts.colorado.edu/display/fisid_148387/)

Professor; PhD, University of Virginia

Zechman, Sarah Louise Center (https://experts.colorado.edu/display/fisid_156016/)

Professor; PhD, University of Pennsylvania

Zender, Jaime (https://experts.colorado.edu/display/fisid_122563/)

Professor, Endowed/Named Professor, Chair; PhD, Yale University

Zhang, Dan (https://experts.colorado.edu/display/fisid_149619/)

Professor, Faculty Director; PhD, University of Minnesota Twin Cities

Zhang, Rui (https://experts.colorado.edu/display/fisid_157866/)

Assistant Professor; PhD, University of Maryland

Zhang, Xingtang (https://experts.colorado.edu/display/fisid_159295/)

Assistant Professor; PhD, University of Pennsylvania

Zikmund, Noah

Senior Instructor; MBA, University of Tulsa

Courses

For business administration (BADM) courses, see the Business Administration (p. 1320) section.

Accounting

ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5450 (3) Income Taxation of Business Entities

Examines the income tax consequences of business entities. Focuses on regular corporations, partnerships, limited liability companies and S corporations.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting

Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-).

Grading Basis: Letter Grade

ACCT 5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6000 (1-3) Academic Internship in Accounting

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

Grading Basis: Pass/Fail

ACCT 6220 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes credit scoring, risk analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710

Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290

Recommended: restricted to ACCT-MS and ACTX-MS students.

Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation

Studies and applies the method used in tax research and tax planning, with the goal of developing tax research, technical writing and tax planning skills. Topics include examining primary and secondary sources of federal tax law, evaluating the hierarchy of these sources and developing technical writing skills using deductive legal reasoning.

Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167

Requisites: Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157

Requisites: Requires corequisite courses of ACCT 6420 and ACCT 6700. Restricted to Bus Admin, Acct, Acct-Tax, Acct-Info Syst, Fnce Acct Tax, Acct Acct Tax, Mgt Sci-Info Syst, Fnce, Mktg, Taxation or Master of Business Admin graduate students only.

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

Requisites: Requires a prereq course of ACCT 5620 (min grade C). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007

Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207

Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 6900 (1-6) Independent Study

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6940 (1) Master's Candidate for Degree

Departmental form required.

Requisites: Restricted to Business (BUSN) graduate students only.

Grading Basis: Pass/Fail

ACCT 6950 (1-4) Master's Thesis

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study

Instructor consent required and departmental form (taught as doctoral seminar).

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation

Requisites: Restricted to Business (BUSN) graduate students only.

Business Environment & Policy**BPOL 6940 (1) Master's Candidate for Degree**

Grading Basis: Pass/Fail

BPOL 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

BPOL 7500 (3) Doctoral Seminar: Strategic Management 1

Provides an overview of the literature, including classic articles and books, in business strategy and policy (strategic management). Brings the student up to date on schools of thought, research issues, and practical applications in strategic management.

Repeatable: Repeatable for up to 6.00 total credit hours.

BPOL 7530 (3) Doctoral Seminar: Strategic Management 2

Continuation of BPOL 7500.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of BPOL 7500 (minimum grade D-). Restricted to Business Administration (BUAD) graduate students only.

BPOL 7560 (3) Entrepreneurship, International Business and Technology Management

Provides doctoral students with an understanding of strategic management and entrepreneurship theory, as applied to international business and technology management literatures. Additionally, students are exposed to research methods in the strategy and entrepreneurship arenas.

Requisites: Requires prerequisite courses of BPOL 7500 and BPOL 7530 (all minimum grade D-).

BPOL 8900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

BPOL 8990 (1-10) Doctoral Dissertation**Business Law****BSLW 5120 (3) Advanced Business Law**

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120

Requisites: Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

BSLW 6900 (1-6) Independent Study

Requisites: Restricted to Business (BUSN) graduate students only.

MBA Core**MBAC 6001 (1.5) Foundations of Teamwork**

Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees' and colleagues'.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6002 (1.5-3) Social, Moral and Economic Foundations for Business

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6003 (1.5) Foundations of Leadership

Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6010 (3) Managerial Economics

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6011 (1.5) Managerial Economics 1

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6012 (1.5) Managerial Economics 2

Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6020 (3) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6030 (1.5) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6031 (1.5) Quantitative Methods 1

Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6032 (1.5) Quantitative Methods 2

Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6050 (3) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6051 (3) Operations Management

Develops an understanding of processes and the alignment of a process with the organization's operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers *c-suite*-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6052 (3) Capstone Projects

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6081 (3) Data and Decisions

Employers need managers who can integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6090 (3) Marketing Management

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6096 (1.5) Managerial Communications

Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6098 (1) Professional Development I

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6099 (1.5) Professional Development II

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: MBA: Core Courses

MBA Advanced Electives**MBAX 6000 (3) Socially Responsible Enterprise**

Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6051 (2) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6100 (3) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6101 (1.5) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6105 (3) Design Thinking for National Security

Covers research topics of current interest in computer science that does not fall into a standard subarea.

MBAX 6110 (3) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6111 (2) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6130 (3) Sustainable Venturing

Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6140 (3) Social Entrepreneurship in Emerging Markets

Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6170.

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies

Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying “adolescent” firms that are past the initial start-up stage but haven’t evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6170 (3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6171 (1.5-3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite courses of MBAX 6100, MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6180 (3) New Venture Launch

Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6190 (3) Projects in Entrepreneurial Companies

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.

Requisites: Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6111 is strongly recommended prior to enrolling in MBAX 6190.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6195 (1-3) Special Topics in Entrepreneurship

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6210 (3) Applied Financial Management

Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6211 (2) Applied Financial Management

Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6220 (3) Investment Management and Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6221 (1.5-3) Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6230 (3) International Financial Management

Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6240 (3) Financial Markets, Institutions and Regulations

Focuses on the legal and regulatory issues surrounding complex transactions that involve change of ownership. Topics include law/regulation issues affecting all stakeholders involved in corporate restructuring transactions, the legal aspects of the corporate bankruptcy process and the practical aspects of raising capital, such as understanding the instruments and the institutions involved in the financing activities of firms at different stages in their lifecycle, road shows and the mechanics of pursuing initial public offering.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6250 (3) Derivative Securities

Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6260 (3) Fixed Income Investing

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6270 (3) Applied Derivatives

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar

First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6281 (1-2) Entrepreneurship Valuation and Investment Seminar2

Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6280.

MBAX 6282 (1) Entrepreneurship Valuation and Investment Seminar 3

Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6281 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6290

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAC 6060 (minimum grade D-).

Grading Basis: Letter Grade

MBAX 6300 (3) Marketing Communication

Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Marketing

MBAX 6301 (2) Marketing Communications

Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students' understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6310 (3) Marketing Strategy

Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6311 (2) Marketing Strategy

Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6330 (3) Market Intelligence

Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6331 (3) Market Intelligence

Market Intelligence is a marketing decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers for both products and services. It is for managers as users of market information across marketing management, consulting, general management, and entrepreneurship to address problems of market selection, segmentation, positioning, new products, customer value and retention, pricing, communication, channel, etc.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6340 (1.5) Marketing Field Project

Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6350 (3) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6351 (2) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6360 (3) New Product Development

Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6361 (3) New Product Development

Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6365 (3) Practical Product Management

This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry

Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6370 (2-3) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6372 (1.5-2) Professional Selling and Sales Management

The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individual professional sellers and the organizations that employ them.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6381 (2) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6410 (3) Process Analytics

Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6420 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoptions efforts to success.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6421 (1.5-3) IT & Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6440 (3) Project Management

Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6441 (2) Project Management

Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6450 (2-3) International Operations Management

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Additional Information: Departmental Category: MBA: Management

MBAX 6451 (2) International Business

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6460 (1.5-3) Supply Chain Management

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Recommended: Prerequisite MBAC 6080.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6500 (3) Management of Organizational Change

Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6530 (3) Negotiating and Conflict Management

Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6531 (2) Negotiations

Practice the art and science of successful negotiations. Provides students high interaction with businesses and entrepreneurs.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6540 (3) Consulting Skills

Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6550 (3) Management of Technology and Innovation

Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6560 (3) Executive Leadership

Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6561 (2) Executive Leadership

Provides an opportunity to examine leadership from the executive perspective in organizations including private and public sector firms and non-profits. Topics covered include how executives lead change and innovation in organizations, interact with the top management team, deal with the board of directors, leadership issues involved with governance of the firm and strategies for enhancing executive influence.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6565 (1.5) Inclusive Leadership

This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 25% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population ; but fewer than 1% of Fortune 500 CEOs ; are Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.

Grading Basis: Letter Grade

MBAX 6570 (3) Topics in Sustainable Business

Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6595 (1-3) Special Topics in Organizational Behavior

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6600 (3) Real Estate Principles

Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

Requisites: Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6610 (3) Real Estate Finance and Investment Analysis

Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6620 (3) Real Estate Project Competition

Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6630 (3) Real Estate Economics

Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6640 (3) Real Estate Law and Practice

Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Formerly MBAX 6855.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6695 (1-3) Special Topics in Real Estate

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

MBAX 6700 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6220

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6710 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes credit scoring, risk analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6250

Requisites: Requires prerequisite course of MBAC 6020 or MSBC 5020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS majors only).

Additional Information: Departmental Category: MBA: Accounting

MBAX 6761 (2) Managerial Accounting, Planning and Control

Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Accounting

MBAX 6801 (3) Global Perspectives Seminar

Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester, each focusing on

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6802 (3) Pricing Strategy and Tactics

Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMn or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6806 (1.5-2) Global Perspectives

Contrasting operations in US and China will study what changes US companies have made to successfully operate in the Chinese market and how US companies have influenced Chinese business operations. Reviews the history and present state of the interdependency between the US and Chinese business environments. Culminates in a 9-day trip to China.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

MBAX 6815 (3) Sustainable Real Estate

Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5827

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6841 (2) Decision Making for Managers

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6843 (3) Supply Chain and Operations Analytics

Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

Requisites: Requires prereq courses of MBAC 6031 and 6080 (all min grade D-). Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) Prof'l MBA Prog (PMBA) or Supply Chain Mgmt (SCMN-MS) majors or SCAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Operations and Production Management

MBAX 6846 (2) Global Strategy

The ability to compete effectively globally is increasingly important for many firms. Topics such as globalization and the competitive environment; key differences in institutions around the globe and their implications; how firms can succeed internationally (e.g., different entry strategies, how to manage across country borders, the firm's broader responsibility in the global community) will be discussed.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6847 (2) Emerging Markets in Global Business

Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6885 (3) Interpreting the Economic Environment

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6930 (3) Commercializing Sustainable Energy Technologies

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5005

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6966 (1-3) Independent Study-Real Estate

Independent study in the field of real estate.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Real Estate

MS Business Core**MSBC 5015 (1.5) Managerial Economics**

Studies the elements of the business firm's fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5020 (1.5) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5030 (3) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods. Heavy use of R programming in course execution.

Requisites: Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5031 (3) Quantitative Methods in Finance

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5032 (3) Quantitative Methods in Real Estate

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5070 (3) Survey of Business Analytics

Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding; it will introduce and subsequently involve extensive use of Python.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5180 (3) Machine Learning in Python

This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

MSBC 5220 (3) MS Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

MSBC 5460 (3) Supply Chain Strategy

Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5480 (3) SCMN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5490 (3) BUAN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5610 (3) MS Real Estate Finance and Investment

Topics include 1) conducting income property investment analysis; 2) developing the technical competence necessary to structure real estate transactions; and 3) understanding the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to REAL-MS students only.

Grading Basis: Letter Grade

MSBC 5680 (3) Optimization Modeling

Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MS Business Electives**MSBX 5080 (3) Decision Modeling and Applications**

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

MSBX 5205 (3) Financial Strategy and Decision Modeling

Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.

Requisites: Restricted to Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5225 (3) Advanced Portfolio Management

Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

Requisites: Restricted to Master of Finance (FNCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5310 (2-3) Customer Analytics

Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5311 (2) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MSBX 5405 (3) Structured Data Modeling and Analysis

Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5410 (3) Fundamentals of Data Analytics

Exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using R before demonstrating the same concepts using SPSS and SAS. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis using R.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or Supply Chain Analytics (SCAG-CERG) students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5415 (2-3) Advanced Data Analytics

Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors and BAMG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis

Moves the student beyond structured data and sources into business scenarios where data is semi-structured to unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.

Requisites: Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) Supply Chain Mgmt (SCMN) or Business Analytics (BUAN) or BAMG-CERG mjrs onl

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5430 (3) Advanced Statistical Analysis

Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5435 (3) Planning and Production

At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Additional Information: Departmental Category: MS: Business Electives

MSBX 5440 (3) Decision Analysis

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5450 (3) Transportation and Logistics

Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5470 (3) Procurement and Contracting

Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5480 (3) Information Security Management

A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

MSBX 5500 (3) Security Analytics with Python and Machine Learning

Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.

Requisites: Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (ITP) majors only.

Grading Basis: Letter Grade

MSBX 5605 (3) Real Estate Investment and Risk Management

Examines strategies for mitigating the legal, property and portfolio risks associated with income properties. The course begins by examining risks created by leases. The course then analyzes the risks associated with a single property and examines how risk changes with portfolios containing multiple properties. Finally, the course examines how to optimally incorporate investment properties in mixed asset portfolios.

Requisites: Requires prerequisite course MBAX 6610 or MSBC 5610 (min grade D-). Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5680 (3) Real Estate Technology

Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

Requisites: Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with DUAL Degree (DMA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

Business Administration

The Leeds School of Business holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International). The Leeds School of Business offers programs leading to the following degrees:

- Master of Business Administration (MBA)
- Master of Science (MS) in the following fields:
 - Accounting
 - Business Analytics
 - Finance
 - Real Estate
 - Supply Chain Management
 - Taxation
- Doctor of Philosophy (PhD)

The Leeds School also offers a part-time MBA program called the Evening MBA that leads to the same degree as the full-time MBA program. Dual degree options are not available in the Evening MBA program.

Dual degree options available in the MBA program include:

- MBA/JD (p. 1665)
- MBA/MD (<https://medschool.cuanschutz.edu/education/md-admissions/about-cu-school-of-medicine/joint-degree-programs/>)
- MBA/MA in anthropology (p. 1012)
- MBA/MFA in art practices (p. 1040)
- MBA/MS in computer science (p. 1457)
- MBA/MFA in dance (p. 1275)
- MBA/MS in environmental studies (p. 1119)
- MBA/MENV (<https://www.colorado.edu/menv/>)
- MBA/MA in German studies (p. 1160)
- MBA/MS in technology, cybersecurity and policy (<https://www.colorado.edu/engineering/academics/degree-programs/technology-cybersecurity-and-policy/>)
- MBA/MA in theatre (p. 1280)
- MBA/MS STEM (business analytics (<https://www.colorado.edu/business/ms-programs/masters-program-business-analytics/>) or supply chain management (<https://www.colorado.edu/business/ms-programs/masters-program-supply-chain-management/>))

These programs are open to qualified individuals who hold a bachelor's degree from a regionally accredited college or university, or a recognized international university, without regard to their undergraduate major.

Master's Degrees

- Business Administration - Master of Business Administration (MBA) (p. 1338)
- Accounting - Master of Science (MS) (p. 1345)
- Business Analytics - Master of Science (MS) (p. 1346)
- Finance - Master of Science (MS) (p. 1347)
- Real Estate - Master of Science (MS) (p. 1347)
- Supply Chain Management - Master of Science (MS) (p. 1348)
- Taxation - Master of Science (MS) (p. 1349)

Doctoral Degree

- Business Administration - Doctor of Philosophy (PhD) (p. 1344)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adams, Heather L. (https://experts.colorado.edu/display/fisid_143714/)
Instructor; PhD, University of Maryland, College Park

Alston, Eric Christopher (https://experts.colorado.edu/display/fisid_158159/)
Scholar in Residence; JD, University of Chicago

Appenzeller, William
Professor Emeritus

Auslander, Bonnie (https://experts.colorado.edu/display/fisid_158273/)
Instructor; MFA, University of Massachusetts

Zhang, Xingtian (https://experts.colorado.edu/display/fisid_159295/)

Assistant Professor; PhD, University of Pennsylvania

Zikmund, Noah

Senior Instructor; MBA, University of Tulsa

Courses

ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5450 (3) Income Taxation of Business Entities

Examines the income tax consequences of business entities. Focuses on regular corporations, partnerships, limited liability companies and S corporations.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting

Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-).

Grading Basis: Letter Grade

ACCT 5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6000 (1-3) Academic Internship in Accounting

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

Grading Basis: Pass/Fail

ACCT 6220 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes credit scoring, risk analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710

Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290

Recommended: restricted to ACCT-MS and ACTX-MS students.

Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation

Studies and applies the method used in tax research and tax planning, with the goal of developing tax research, technical writing and tax planning skills. Topics include examining primary and secondary sources of federal tax law, evaluating the hierarchy of these sources and developing technical writing skills using deductive legal reasoning.

Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167

Requisites: Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157

Requisites: Requires corequisite courses of ACCT 6420 and ACCT 6700. Restricted to Bus Admin, Acct, Acct-Tax, Acct-Info Syst, Fnce Acct Tax, Acct Acct Tax, Mgt Sci-Info Syst, Fnce, Mktg, Taxation or Master of Business Admin graduate students only.

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

Requisites: Requires a prereq course of ACCT 5620 (min grade C). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007

Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207

Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 6900 (1-6) Independent Study

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6940 (1) Master's Candidate for Degree

Departmental form required.

Requisites: Restricted to Business (BUSN) graduate students only.

Grading Basis: Pass/Fail

ACCT 6950 (1-4) Master's Thesis

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study

Instructor consent required and departmental form (taught as doctoral seminar).

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation

Requisites: Restricted to Business (BUSN) graduate students only.

BADM 6202 (1.5) Principles of Finance

Focuses on the role of finance in small and large businesses. Topics covered include financial statement analysis, time value of money, bonds and stocks (both their markets and their valuation), capital budgeting analysis, and investor expectations regarding risk and return.

Requisites: Requires prerequisite course of BADM 6702 (minimum grade D-).

Grading Basis: Letter Grade

BADM 6302 (1.5) Marketing Principles

Course imparts the core marketing toolkit important for success as a general business manager, including an understanding of the following critical principles of marketing: market exchange, strategic planning, market research, segmentation, targeting, positioning, and the marketing mix (design of product, place, promotion, and price to create exchanges).

Grading Basis: Letter Grade

BADM 6502 (1.5) Introduction to Leadership

This course provides an opportunity to examine leadership from the executive perspective in various organizations, including private and public sector firms, and non-profits. Builds graduate students' understanding of leadership theories, concepts, processes, and behavior while also helping them identify, develop, and build their own leadership capabilities. Enables students to enhance their readiness for leadership positions in business, government, and non-profit organizations and to embark on paths of personal leadership development.

Requisites: Requires prerequisite course of BADM 6302 (minimum grade D-).

Grading Basis: Letter Grade

BADM 6702 (1.5) Introduction to Accounting

Accounting is the language of business and involves the accumulation, presentation, and analysis of relevant financial data of a company to serve the needs of creditors, investors, other external decision makers as well as internal decision makers. We will explore the judgment involved in accounting as well as the rationale behind some of the principles.

Requisites: Requires prerequisite course of BADM 6502 (minimum grade D-).

BADM 6820 (1-3) Topics in Business Administration

Offered irregularly to provide opportunity to investigate new topics in business administration.

BADM 6940 (3) Land Use Law

Examines Federal, state and local regulations governing land use in the U.S. and surveys the basic principles of urban planning and public finance. Describes basic tools governments use to control land use: Euclidean zoning, nuisance law, police power, eminent domain and takings, Planned Urban Developments, historic preservation, wetlands and flood zones, airports, endangered species, view restrictions, and environmental law.

Requisites: Restricted to Master of Business Administration (MBAD), MBA with dual degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

BSLW 5120 (3) Advanced Business Law

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120

Requisites: Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

BSLW 6900 (1-6) Independent Study

Requisites: Restricted to Business (BUSN) graduate students only.

MBAC 6001 (1.5) Foundations of Teamwork

Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees' and colleagues'.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6002 (1.5-3) Social, Moral and Economic Foundations for Business

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6003 (1.5) Foundations of Leadership

Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6010 (3) Managerial Economics

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6011 (1.5) Managerial Economics 1

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6012 (1.5) Managerial Economics 2

Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6020 (3) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6030 (1.5) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6031 (1.5) Quantitative Methods 1

Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6032 (1.5) Quantitative Methods 2

Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6050 (3) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6051 (3) Operations Management

Develops an understanding of processes and the alignment of a process with the organization's operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers c-suite-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6052 (3) Capstone Projects

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6081 (3) Data and Decisions

Employers need managers who can integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6090 (3) Marketing Management

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6096 (1.5) Managerial Communications

Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6098 (1) Professional Development I

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6099 (1.5) Professional Development II

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: MBA: Core Courses

MBAX 6000 (3) Socially Responsible Enterprise

Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6051 (2) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6100 (3) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6101 (1.5) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6105 (3) Design Thinking for National Security

Covers research topics of current interest in computer science that does not fall into a standard subarea.

MBAX 6110 (3) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6111 (2) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6130 (3) Sustainable Venturing

Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6140 (3) Social Entrepreneurship in Emerging Markets

Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6170.

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies

Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying “adolescent” firms that are past the initial start-up stage but haven't evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6170 (3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6171 (1.5-3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite courses of MBAX 6100, MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6180 (3) New Venture Launch

Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6190 (3) Projects in Entrepreneurial Companies

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.

Requisites: Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6111 is strongly recommended prior to enrolling in MBAX 6190.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6195 (1-3) Special Topics in Entrepreneurship

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6210 (3) Applied Financial Management

Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6211 (2) Applied Financial Management

Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6220 (3) Investment Management and Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6221 (1.5-3) Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6230 (3) International Financial Management

Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6240 (3) Financial Markets, Institutions and Regulations

Focuses on the legal and regulatory issues surrounding complex transactions that involve change of ownership. Topics include law/regulation issues affecting all stakeholders involved in corporate restructuring transactions, the legal aspects of the corporate bankruptcy process and the practical aspects of raising capital, such as understanding the instruments and the institutions involved in the financing activities of firms at different stages in their lifecycle, road shows and the mechanics of pursuing initial public offering.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6250 (3) Derivative Securities

Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6260 (3) Fixed Income Investing

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6270 (3) Applied Derivatives

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar

First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6281 (1-2) Entrepreneurship Valuation and Investment Seminar2

Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6280.

MBAX 6282 (1) Entrepreneurship Valuation and Investment Seminar 3

Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6281 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6290

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAC 6060 (minimum grade D-).

Grading Basis: Letter Grade

MBAX 6300 (3) Marketing Communication

Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Marketing

MBAX 6301 (2) Marketing Communications

Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students' understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6310 (3) Marketing Strategy

Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6311 (2) Marketing Strategy

Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6330 (3) Market Intelligence

Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6331 (3) Market Intelligence

Market Intelligence is a marketing decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers for both products and services. It is for managers as users of market information across marketing management, consulting, general management, and entrepreneurship to address problems of market selection, segmentation, positioning, new products, customer value and retention, pricing, communication, channel, etc.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6340 (1.5) Marketing Field Project

Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6350 (3) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6351 (2) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6360 (3) New Product Development

Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6361 (3) New Product Development

Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6365 (3) Practical Product Management

This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry

Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6370 (2-3) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6372 (1.5-2) Professional Selling and Sales Management

The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individual professional sellers and the organizations that employ them.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6381 (2) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6410 (3) Process Analytics

Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6420 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoptions efforts to success.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6421 (1.5-3) IT & Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6440 (3) Project Management

Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6441 (2) Project Management

Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6450 (2-3) International Operations Management

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Additional Information: Departmental Category: MBA: Management

MBAX 6451 (2) International Business

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6460 (1.5-3) Supply Chain Management

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Recommended: Prerequisite MBAC 6080.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6500 (3) Management of Organizational Change

Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6530 (3) Negotiating and Conflict Management

Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6531 (2) Negotiations

Practice the art and science of successful negotiations. Provides students high interaction with businesses and entrepreneurs.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6540 (3) Consulting Skills

Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6550 (3) Management of Technology and Innovation

Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6560 (3) Executive Leadership

Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6561 (2) Executive Leadership

Provides an opportunity to examine leadership from the executive perspective in organizations including private and public sector firms and non-profits. Topics covered include how executives lead change and innovation in organizations, interact with the top management team, deal with the board of directors, leadership issues involved with governance of the firm and strategies for enhancing executive influence.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6565 (1.5) Inclusive Leadership

This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 25% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population ; but fewer than 1% of Fortune 500 CEOs ; are Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.

Grading Basis: Letter Grade

MBAX 6570 (3) Topics in Sustainable Business

Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6595 (1-3) Special Topics in Organizational Behavior

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6600 (3) Real Estate Principles

Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

Requisites: Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6610 (3) Real Estate Finance and Investment Analysis

Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6620 (3) Real Estate Project Competition

Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6630 (3) Real Estate Economics

Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6640 (3) Real Estate Law and Practice

Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Formerly MBAX 6855.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6695 (1-3) Special Topics in Real Estate

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

MBAX 6700 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6220

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6710 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes credit scoring, risk analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6250

Requisites: Requires prerequisite course of MBAC 6020 or MSBC 5020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS majors only).

Additional Information: Departmental Category: MBA: Accounting

MBAX 6761 (2) Managerial Accounting, Planning and Control

Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Accounting

MBAX 6801 (3) Global Perspectives Seminar

Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester, each focusing on

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6802 (3) Pricing Strategy and Tactics

Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6806 (1.5-2) Global Perspectives

Contrasting operations in US and China will study what changes US companies have made to successfully operate in the Chinese market and how US companies have influenced Chinese business operations. Reviews the history and present state of the interdependency between the US and Chinese business environments. Culminates in a 9-day trip to China.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

MBAX 6815 (3) Sustainable Real Estate

Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5827

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6841 (2) Decision Making for Managers

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6843 (3) Supply Chain and Operations Analytics

Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

Requisites: Requires prereq courses of MBAC 6031 and 6080 (all min grade D-). Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) Prof'l MBA Prog (PMBA) or Supply Chain Mgmt (SCMN-MS) majors or SCAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Operations and Production Management

MBAX 6846 (2) Global Strategy

The ability to compete effectively globally is increasingly important for many firms. Topics such as globalization and the competitive environment; key differences in institutions around the globe and their implications; how firms can succeed internationally (e.g., different entry strategies, how to manage across country borders, the firm's broader responsibility in the global community) will be discussed.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6847 (2) Emerging Markets in Global Business

Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6885 (3) Interpreting the Economic Environment

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6930 (3) Commercializing Sustainable Energy Technologies

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5005

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6966 (1-3) Independent Study-Real Estate

Independent study in the field of real estate.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Real Estate

MSBC 5015 (1.5) Managerial Economics

Studies the elements of the business firm's fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5020 (1.5) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5030 (3) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods. Heavy use of R programming in course execution.

Requisites: Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5031 (3) Quantitative Methods in Finance

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5032 (3) Quantitative Methods in Real Estate

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5070 (3) Survey of Business Analytics

Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding; it will introduce and subsequently involve extensive use of Python.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5180 (3) Machine Learning in Python

This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

MSBC 5220 (3) MS Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

MSBC 5460 (3) Supply Chain Strategy

Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5480 (3) SCMN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5490 (3) BUAN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5610 (3) MS Real Estate Finance and Investment

Topics include 1) conducting income property investment analysis; 2) developing the technical competence necessary to structure real estate transactions; and 3) understanding the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to REAL-MS students only.

Grading Basis: Letter Grade

MSBC 5680 (3) Optimization Modeling

Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MSBX 5080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

MSBX 5205 (3) Financial Strategy and Decision Modeling

Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.

Requisites: Restricted to Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5225 (3) Advanced Portfolio Management

Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

Requisites: Restricted to Master of Finance (FNCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5310 (2-3) Customer Analytics

Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5311 (2) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MSBX 5405 (3) Structured Data Modeling and Analysis

Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5410 (3) Fundamentals of Data Analytics

Exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using R before demonstrating the same concepts using SPSS and SAS. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis using R.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or Supply Chain Analytics (SCAG-CERG) students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5415 (2-3) Advanced Data Analytics

Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors and BAMG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis

Moves the student beyond structured data and sources into business scenarios where data is semi-structured to unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.

Requisites: Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) Supply Chain Mgmt (SCMN) or Business Analytics (BUAN) or BAMG-CERG mjrs onl

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5430 (3) Advanced Statistical Analysis

Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5435 (3) Planning and Production

At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Additional Information: Departmental Category: MS: Business Electives

MSBX 5440 (3) Decision Analysis

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5450 (3) Transportation and Logistics

Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5470 (3) Procurement and Contracting

Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5480 (3) Information Security Management

A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

MSBX 5500 (3) Security Analytics with Python and Machine Learning

Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.

Requisites: Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (ITP) majors only.

Grading Basis: Letter Grade

MSBX 5605 (3) Real Estate Investment and Risk Management

Examines strategies for mitigating the legal, property and portfolio risks associated with income properties. The course begins by examining risks created by leases. The course then analyzes the risks associated with a single property and examines how risk changes with portfolios containing multiple properties. Finally, the course examines how to optimally incorporate investment properties in mixed asset portfolios.

Requisites: Requires prerequisite course MBAX 6610 or MSBC 5610 (min grade D-). Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Program (PMBA) majors only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5680 (3) Real Estate Technology

Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

Requisites: Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with DUAL Degree (DMA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

Business Administration - Master of Business Administration (MBA)

The breadth of training that master of business administration graduates receive prepares them to become high-level managers and lead in a challenging and evolving business environment.

The MBA program is rigorous and comprehensive, and demands student commitment. The curriculum develops a set of broad-based, integrative skills. Core courses provide a solid foundation in both business management and analytical disciplines, a foundation that fosters continued career growth. In addition to core courses stressing key functional areas of business, students can choose electives specific to a chosen area of concentration.

The case study method and student projects are used broadly throughout all courses, and common areas of study such as ethics, technology, communications and international issues are integrated throughout much of the curriculum. Students learn about management theory and its practical applications in "real-world" situations. Lectures, seminars, team teaching, team projects and guest lectures are various approaches taken by the faculty to generate new ideas and encourage student input.

Diversity

The Leeds School of Business encourages qualified individuals to apply regardless of gender, race, religion, national origin, age, physical limitation or sexual orientation.

Requirements

Full-Time MBA

During the first semester of study, to ascertain degree requirements, MBA students should check in with a member of the student services team for the MBA program.

Students entering the MBA program take a prescribed sequence of classes before beginning elective courses. A total of 55 credit hours is needed to graduate. Students entering the MBA program are expected to complete the degree in two years. Transferred coursework is not accepted into the MBA program.

MBA students may enroll in up to 12 credit hours of elective coursework outside the Leeds School of Business with approval from the MBA Programs office, provided the remaining 12 credit hours of electives are taken within the MBA program. Coursework taken outside the Leeds School of Business must be at the graduate program level and pre-approved. Students may not take courses outside the University of Colorado Boulder and count them toward the degree. Students should contact individual departments for course listings and registration requirements for non-business courses.

All courses applied toward the 55 credit hours must be taken for a grade. Courses in which a C- or below is received are not accepted for credit toward the 55 credit hours and may have to be retaken. In this case, both grades are factored into the GPA. To withdraw from an elective course and receive a grade of W, a student must be earning a passing grade in that course. Students normally are not permitted to withdraw from courses after the sixth week of the semester. Students in the MBA program may not withdraw from specified MBAC lockstep coursework. An "I" is an incomplete grade. Use of the "I" is at the discretion of the course instructor and/or the dean. Students must ask for an incomplete grade. An "I" is given only when students, for reasons beyond their

control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

Co-curricular activities are a critical counterpart to the classroom experience and enrich the value of the degree. Case competitions, student leadership positions, clubs, networking opportunities, guest speakers, small-group meetings with business leaders and professional mentoring all add to the immersive nature of the full-time program. Summer internship opportunities allow students to apply those core skills and develop new insights to help focus their choice of elective courses.

Full-Time MBA Elective Courses

Students complete a total of 24 elective credits that count toward the 55 total credits needed for graduation. Electives are typically offered only once each academic year. This list is subject to change. Offerings each year will vary depending on faculty availability.

Evening/Hybrid MBA

The curriculum of the Evening MBA program and Hybrid MBA program includes the same core of required courses as the full-time MBA program,

but delivered in a format that accommodates students who are fully employed. Building on foundational courses, evening MBA and Hybrid MBA students then choose 12 total credits of electives to add greater depth and specificity of knowledge.

The Evening MBA program maintains a traditional classroom format, with classes meeting twice per week (summer terms may vary). The Hybrid MBA is a combination of enhanced virtual instruction and traditional classroom format (one Saturday/month with variation during summer terms).

The Evening MBA Program and Hybrid MBA program each begin in May, with an innovative schedule that allows students to graduate in two years (six semesters). During the second year, students complete MBAC 6052 Capstone Projects. For additional information about courses by semester, see the Plan(s) of Study tab.

Executive MBA

The Leeds Executive MBA (EMBA) program is delivered in a cohort model that provides a shared learning experience with rich collaboration among classmates. This cohort model allows students to cultivate a professional and personal network throughout the program. Courses are delivered over three terms each academic year. Each term begins with enhanced virtual instruction to provide flexibility so that students can focus on work and personal lives as well as school. During these

weeks students will continue to meet with assigned teams and faculty periodically, leveraging technology for engagement. Toward the end of the term students will attend an intensive, one-week residency (six days onsite) where students collaborate with faculty and classmates and apply the lessons learned. The six-day residencies are scheduled each term during the months of January, April and October.

The EMBA curriculum begins with a first year of rigorous business fundamentals. Leadership is spread throughout the program with themes around inclusion, executive and ethical responsibilities, and how to effectively negotiate. During the second year, students will learn advanced topics in marketing, finance, and strategy as well as innovative business practices and how an entrepreneurial mindset can be leveraged even inside a corporate structure. Rich co-curricular workshops will be offered throughout on topics such as personal branding, digital marketing, crisis communication, emerging technologies and many more. The EMBA curriculum comprises 45 total credits. Please see Plans of Study for detailed course list.

Dual Degree Programs

Juris Doctor/MBA

The purpose of this dual degree program is to allow students admitted to both the School of Law and the Leeds School of Business to obtain the juris doctor (JD) and the master of business administration (MBA) degrees in four (or fewer) years of full-time study. The program is designed to train students for careers in which business administration and law overlap.

Admission

To be eligible for the JD/MBA dual degree program of the School of Law and the Leeds School of Business, a student must apply separately to and be admitted by each of the two schools under their respective admission procedures and standards.

Students may elect the dual degree program at the time of initial application to both schools, or they may apply for the dual degree program during their first year of study in the degree program of either school.

Course of Study

A student enrolled in the JD/MBA program may commence studies under the program in either the School of Law or the Leeds School of Business. Dual degree students are strongly encouraged to begin their course of study at the School of Law. However, a student must take the first year of the JD curriculum as a unit exclusively in the School of Law. Likewise, a student must take the first year of the MBA curriculum as a unit exclusively in the Leeds School of Business. Students can then take additional courses necessary to meet the requirements of the degree programs of the two schools.

No student in the dual degree program shall be allowed to take fewer than 9 credit hours or more than 16 credit hours during any term (excluding summer terms) without receiving the consent of the program advisor in each school in which courses are being taken.

Credit for Law Courses in the JD/MBA Program

The Leeds School of Business grants credit toward the MBA degree for up to 12 credit hours of acceptable performance in law courses taken by a JD/MBA student at the School of Law. Core courses required in the law school program cannot be counted toward the 12 credit hours. A student must earn at least a 77 grade in a law school course to be accepted for Leeds School of Business credit. For credit to be granted, the law school courses must be approved before enrollment by an MBA advisor. Only courses taken after admission into the MBA program are credited toward the degree.

Grading in the Dual Degree Program

Leeds School of Business credit for courses completed in the School of Law as part of the joint degree program is recorded on a *pass/fail* basis and is not included in the required MBA 3.00 cumulative average.

MBA/MD

The Leeds School of Business and the University of Colorado School of Medicine offer students the ability to earn both an MBA and a Doctor of Medicine (MD) degree.

With the MD/MBA dual degree, students acquire expertise in business essentials like leadership, finance, accounting, marketing, strategy, innovation and social responsibility. As collaborative leaders, these medical professionals with business fundamentals are positively impacting patient care and healthcare delivery by leveraging their knowledge in powerful new ways. As the medical field rapidly changes and evolves—with new technologies, shifting professional roles, a dynamic public policy landscape, and new healthcare delivery models—physicians need leadership skills now more than ever to tackle complex issues and ensure high standards of care.

Admission

To ensure student success—both academically and professionally—admission to the program is competitive. Each application undergoes a holistic review, including an evaluation of academic strengths and a high-level assessment of compatibility with the Leeds MBA program.

SOM students must apply to become a dual degree student one year prior to beginning the MBA curriculum. All dual degree students must fulfill all requirements for each program, as well as all applicable dual degree requirements.

Course of Study

The 5-year dual degree from CU Leeds School of Business and CU School of Medicine requires 31 credits of MBA core coursework. Dual degree students begin with the MD program. Students must complete two academic years of the MD program prior to starting the MBA experience. MBA requirements will be satisfied with successful completion of core curriculum (summer/fall/spring).

MBA/MFA

The Leeds School of Business, in conjunction with the Department of Art and Art History, offers students the ability to earn an MBA and an MA in fine arts through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in digital marketing, web design, e-commerce, gallery/museum administration and private art consulting.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in fine arts spend the first year of their dual degree program exclusively in either the business school or the fine arts program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and fine arts elective courses.

Credit for Fine Arts Courses in the MBA/MA Fine Arts Program

Dual degree students in studio arts are required to complete 43 credit hours of MBA coursework and 45 credit hours of fine arts coursework. Dual degree students in art history are required to complete 43 credit hours of MBA coursework and 30 credit hours of fine arts coursework.

MBA/MA in Anthropology

The MBA/MA in anthropology dual degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing field of corporate cultural anthropology and ethnography or museum management.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in anthropology spend the first year of their dual degree program exclusively in either the business school or the department of anthropology. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers

students the opportunity to take both MBA and anthropology elective courses.

MBA/MA in German Studies

The MBA/MA in German studies dual degree program enables students to earn an MBA and an MA in German studies simultaneously over three or four years. Students in this MBA/MA program pursue careers in international business.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in German studies spend the first year of their dual degree program exclusively in either the Leeds School of Business or the Department of Germanic and Slavic Languages and Literatures. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers students the opportunity to take both MBA and German studies elective courses.

MBA/MA in Theater and Dance

The Leeds School of Business, in conjunction with the Department of Theatre and Dance, offers students the ability to earn an MBA and an MA in theatre or dance through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums and arts presenters.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in theatre and dance spend the first year of their dual degree program exclusively in either the business school or the theatre/dance program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Credit for Courses

Dual degree students are required to complete 43 credit hours of MBA coursework and 24 credit hours of theatre/dance coursework. A minimum of 67 approved credit hours must be completed to earn both degrees.

MBA/MS in Computer Science

The MBA/MS in computer science enables students to earn an MBA and an MS in computer science over three or four years. Students in this MBA/MS program have career interests that combine corporate business and technology.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply

simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MS in computer science spend the first year of the dual degree program exclusively in either the business school or the computer science department. In the second year, courses are taken exclusively in the other department. The remaining year(s) students may take both MBA and computer science electives.

MBA/MENV

An MBA degree in combination with the Masters of the Environment (MENV) degree will provide a student with a powerful set of tools and knowledge to expand career options. The MBA offers a valuable business toolkit—including leadership, critical thinking and communication skills. This option allows a student to complete two specialized master's degrees in less time than it would take to earn both separately.

Admission

Students must apply to each program separately and meet the respective application requirements and admissions standards for each program. Students admitted simultaneously to both programs are advised to begin the MBA program first. A person may elect the dual degree program at the time of initial application to both schools; or a student enrolled in the applicable degree program of either school may apply for admission to the other school and elect to be enrolled under the dual degree program.

Course of Study

Dual degree students in their second year will exclusively enroll in the Masters of the Environmental Program. Students will choose a specialization and enroll in all core and required MENV courses. MENV specializations include: Environmental Policy; Public Lands and Natural Resources; Renewable and Sustainable Energy; Sustainable Food Systems; and Urban and Regional Sustainability. Both degrees must be awarded simultaneously. Dual degree students must maintain the academic and ethical standards required of both programs. Students in good standing in one school, but not the other, may be allowed to continue in the school in which they are in good standing. Students who do not complete the dual degree program requirements (i.e., who withdraw for any reason from one of the two programs) will be required to meet the full requirements of the remaining program in which they are enrolled. Dual degree students must complete a Dual Degree Curricular Program (DDCP) form for their program and present to both advisors prior to beginning the degree. This is the initial map of the course sequence to meet the dual requirements and can change over time.

Credit for Courses

The MBA/MENV dual degree program allows for 9 MBA credits to be used for MENV degree requirements, and 12 MENV credits to be used for MBA degree requirements. Dual degree students will be required to complete 43 hours of MBA coursework and 39 hours of MENV coursework, for a total of 82 hours of combined coursework.

MBA/MS in Environmental Studies

The MBA/MS in environmental studies enables students to earn an MBA and an MS in environmental studies over three or four years. Students in the MBA/MA program have career interests that combine corporate business and environmental protection, the management of renewal energy, water conservation or environmental programs.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MS in environmental studies spend the first year of the dual degree program exclusively in either the business school or the environmental studies department. In the second year, courses are taken exclusively in the other department. The remaining year(s) students may take both MBA and environmental studies electives.

MBA/MS in STEM

The purpose of this dual degree program is to allow students admitted to the Leeds School of Business as a dual degree student to obtain the master of business administration (MBA) and master of science in business analytics or supply chain management degrees in two years of full-time study. An MBA degree in combination with the MS degree will provide students with a set of business tools to develop leadership, critical thinking and communications skills as well as a specialization in one of the STEM designated areas of either Business Analytics or Supply Chain Management. The MBA/MS offers students the opportunity to earn both degrees together in less time than if the degrees were earned separately.

Admission

To be eligible for the MBA/STEM dual degree program, a student must apply directly to the Leeds School of Business choosing dual degree status. Applicants must select the MBA/MS-SCMN or the MBA/MS-BUAN dual degree option at the time of application to be evaluated for admission to both programs, simultaneously. Students may not apply to the MBA program, and subsequent to the start of classes, add the dual degree designation. Students must meet the admissions standards for each program separately. The Graduate Management Admissions Test (GMAT) or Graduate Record Examinations (GRE) will be used as the standardized examination for admissions to both the Leeds School of Business MBA and MS Supply Chain Management or Business Analytics programs.

Course of Study

Dual degree students must begin with the MBA program, and will take courses exclusively in the MBA program during the first year. The second year of the dual degree program will consist of the existing MS Supply Chain Management or MS Business Analytics curriculum, in full: 33 credits over three semesters.

Credit for Courses in the MBA/STEM Program

Students are required to complete 37 credit hours of MBA coursework and 33 credit hours of MS coursework. Certain MBA elective courses are part of the STEM curriculum and must be taken in the second year as an MS student.

MBA/MS in Technology, Cybersecurity and Policy

The Leeds School of Business, in conjunction with the College of Engineering and Applied Science, offers a dual degree program resulting in a master of business administration (MBA) and master of science in technology, cybersecurity and policy (MS/TCP). The dual degree program combines broad-based business management study with an in-depth understanding of telecommunications technology. This program prepares

students to be competent, effective managers in the telecommunications industry.

Admission

An individual must apply separately and be admitted to both programs under each school's or college's admission procedures and standards. Applicants are encouraged to apply to the programs concurrently.

Course of Study

Students in the MBA/MS in technology, cybersecurity and policy spend the first year of the dual degree program exclusively in either the business school or the TCP program. In the second year, courses are taken exclusively in the other department. In the third year students will take both MBA and TCP elective courses to complete both master's degrees.

Credit for Courses

Dual degree students are required to complete 43 credit hours of MBA coursework and 36 credit hours of TCP coursework. A minimum of 79 approved credit hours must be completed to earn both degrees.

Business Administration - Doctor of Philosophy (PhD)

The Leeds School of Business provides a dynamic professional atmosphere comprised of quality diverse faculty and PhD students, framed by a thriving business community and a beautiful environment. The Leeds PhD program prepares students for research careers at leading universities and equips students with a deep understanding of the most influential research within the disciplines, as well as the tools necessary to contribute state-of-the-art research advancing these disciplines:

- accounting
- finance
- marketing
- organizational behavior and information systems
- strategy, entrepreneurship, and operations

In addition to the creation of knowledge, the program also supports the dissemination of that knowledge from classrooms to the profession at large. The program is small enough to ensure that all students can receive the mentoring needed to innovate at the frontier of their disciplines.

Dr. Edward Van Wesep chairs the PhD Curriculum and Policy Committee which oversees the Leeds PhD program.

Requirements

PhD students must complete all Graduate School, Leeds School of Business and division requirements to be conferred the PhD in business administration. All PhD students are required to complete at least 30 credit hours of coursework and at least 30 credit hours of dissertation at CU Boulder. Additional coursework may be required as determined by the academic advisor. To comply with this 30-credit-hour requirement, a course must be taught by a member of the university's graduate faculty, must be at the 5000 level or above, and the student must achieve a grade of B- or better. Most students complete 7000- and 8000-level PhD seminars.

PhD students in all program areas except for Accounting are required to maintain a minimum GPA of 3.3 or better while in residence in the program. Accounting students must maintain a minimum GPA of 3.0.

PhD students are required to assume teaching apprentice roles for three sections of any course and then independently teach two courses to achieve teaching proficiency. PhD students are also expected to attend eight (8) workshops and/or trainings while in residence.

Time Limit

PhD students have six years from the commencement of coursework to complete all requirements of the degree, but most PhD students complete their program within five years.

Comprehensive Examination

Before admission to candidacy, a PhD student must pass a comprehensive examination in the field of concentration. The examination may be oral, written or both, and will test the student's mastery of a broad field of knowledge, not merely the formal coursework completed. Each division will determine the required content, length and standards of evaluation for the exam. Check with the division as to the specific requirements for the comprehensive exam.

Admission to Candidacy

PhD students are admitted to candidacy according to Graduate School procedures and requirements. PhD students shall complete all coursework and any other requirements listed on their degree plans, earn at least four semesters of residence and successfully pass the comprehensive exams before admission to candidacy is approved by the Graduate School. In addition, requirements related to academic quality of work, graduate-level coursework, the minimum number of course credit hours, and graduate faculty membership must be met before admission to candidacy is approved.

Dissertation Proposal and Final Defense

All PhD students are required to successfully present and defend a dissertation proposal on a subject approved by the candidate's dissertation committee. The dissertation proposal must be passed before attempting to defend a final dissertation.

A final dissertation must be based upon original investigation showing mature scholarship and critical judgment, as well as competence with research tools and methods. To be acceptable, the dissertation must be a significant contribution to knowledge in the candidate's primary field and must comply with the CU Boulder Graduate School Thesis and Dissertation Specifications. All PhD students are required to present a final dissertation defense, which is open to the public.

Accounting - Master of Science (MS)

A master's degree in accounting prepares students to become financial professionals who can help a wide range of organizations thrive. Accounting is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful. Through the program, graduates develop specific expertise in the area of accounting by strengthening and enhancing the ability to interpret and communicate information about a company's operations and finances. Academic experience, combined with a practical internship experience, propels graduates to be proficient in the "language of business" that is accounting.

Typically, over 90 percent of MS accounting students have a job in accounting and financial advisory fields at graduation, and the demand for CU Boulder-educated accountants continues to soar. Many graduates begin careers with public accounting firms in audit, tax or advisory

business services. Others prefer information management, tax or compliance positions within corporations. Still other opportunities exist in financial management, nonprofits and government agencies.

MS Program

Coursework in accounting conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding and use of information, which enables students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

Accounting students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses they may need to fulfill in order to obtain licensure in a particular state.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Business Administration - Bachelor of Science (BS) (p. 624).

Requirements

The MS accounting degree consists of ten graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

Prerequisites

Four intermediate-level accounting courses must be completed before starting the master's-level accounting courses.

Business Analytics - Master of Science (MS)

The MS degree in business analytics focuses on the exciting and fast-growing field of "big data." Merging developments in marketing and customer analytics with operations research, business analytics, aspects of computer science and statistical methods, the specialization offers a technical, quantitative and statistically intensive program designed to train specialists in turning "big data" into business decisions. Analytics may be used as input for human decisions or may drive fully automated decisions about why some data pattern is observed, what will happen next and how a firm can adapt to optimize that outcome. Students have an option to customize their curriculum by specializing in marketing, decision science or security analytics.

This 10-month program includes extensive coursework and an application of materials, preparing students for a range of job opportunities. In addition to the academic coursework, four enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support our commitment to developing the "whole student" by incorporating professional development into the academic experience.

Requirements Tracks

The MS in Business Analytics offers three tracks to develop analytic skills in specific disciplines: marketing analytics, decision science and security analytics. Learn more on the Plan(s) of Study tab.

Experiential Projects

The experiential project pairs students with clients in industry to work on important practical problems in business analytics. Students work under the supervision of faculty and meet together weekly to discuss progress, jointly work on problems and to share experiences. This hands-on analytics project management experience prepares graduates to make an immediate meaningful contribution in the workplace.

Finance - Master of Science (MS)

The nine-month MS in finance provides extensive coursework and an in-depth application of materials, preparing students for a range of job opportunities. In addition to the coursework, enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support the "whole student" experience by incorporating professional development into the academic experience.

The focused finance curriculum offers students a firm grounding in general finance, and helps to develop the specific skills necessary to pursue careers in a variety of financial fields.

The MS degree in finance offers two tracks to develop skills in specific disciplines:

- The **investment management track** provides the skills necessary to pursue a career with an investment management firm and preparation to take the CFA Level I exam.
- The **corporate finance/consulting track** prepares students for a career in management consulting, investment banking, private equity and venture capital.

Real Estate - Master of Science (MS)

The MS in Real Estate program is a full-time, nine-month, on campus program. The degree provides students with a comprehensive foundation in the financial, investment and operational aspects of real estate. Students develop expertise in quantitative financial analysis, essential business concepts and leadership techniques. As technology continues to redefine the real estate industry, data-driven insights on the use of commercial and residential space are critical to maximizing value and impact. With this degree, students will acquire the analytical skills and innovative thinking necessary to provide these insights. World-class faculty, along with industry influencers, draw from in-depth knowledge of the latest industry trends and business applications giving students an edge in a rapidly advancing field.

This program also incorporates optional co-curricular opportunities including market treks, case competitions, networking events and skills training like ARGUS and advanced real estate Excel modeling.

Requirements

Admission Requirements

Applicants for the real estate track must have a minimum of two years' relevant work experience.

For additional information, please visit Leeds School's Graduate Programs (<http://www.colorado.edu/business/ms-programs/>) webpage or email leedsgrad@colorado.edu.

Supply Chain Management - Master of Science (MS)

The supply chain management master's degree provides students with the expertise needed to manage business supply chains in the global economy. This ten-month program includes extensive coursework which prepares students for a range of job opportunities. In addition to the academic coursework, four enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support our commitment to developing the "whole student" by incorporating professional development into the academic experience.

Based on an "action learning" model, the program is designed to provide hands-on supply chain project management experience, amplified by shared experiences with other students.

Graduates will be prepared for responsible and influential jobs in a variety of organizations, including large manufacturing, retail and distribution organizations; transportation companies; supply chain software companies; and supply chain consulting firms.

Requirements

Admission Requirements

Admission to the program may recommend or require preparation or refresher courses in statistics, math and business.

Experiential Projects

The experiential project pairs students with clients in industry to work on important practical problems in supply chain management. Students work under the supervision of faculty and meet together weekly to discuss progress, jointly work on problems and to share experiences. This hands-on project management experiences prepares graduates to make an immediate meaningful contribution in the workplace.

For additional information, please visit Leeds School Graduate Programs (<http://www.colorado.edu/business/ms-programs/>) or email leedsgrad@colorado.edu.

Taxation - Master of Science (MS)

A master's degree in taxation prepares students to become financial professionals who can help a wide range of organizations thrive. Taxation is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful. Through our program, our graduates develop specific expertise in the area of taxation by strengthening and enhancing the ability to interpret and communicate information about a company's operations and finances. Academic experience, combined with a practical internship experience, propels our graduates to be proficient in the "language of business" that is taxation.

Coursework in taxation conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding, and use of information, which enable students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

CPA Licensure

Taxation students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses, they may need to fulfill in order to obtain licensure in a particular state.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Business Administration - Bachelor of Science (BS) (p. 624).

Requirements

The MS taxation degree consists of 10 graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

Prerequisites

Four intermediate-level accounting courses must be completed before starting the master's-level accounting courses.

Business Analytic Methods - Graduate Certificate

The business analytic methods certificate courses comprise the foundational topics in a business analytics curriculum, providing business analytics training for mid-career professionals in a number of roles, including human resources, pricing, optimization, procurement, finance, real estate and acquisition.

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Nondegree students must apply through Continuing Education as nondegree students.

Course Prerequisites

Students applying to the graduate certificate are required to complete two course prerequisites.

The Business Analytics Overview requirement may be fulfilled by any *one* of the following:

- Successful completion of MSBC 5070
- Successful completion of similar coursework at another university
- Other qualifying education and/or work experience, as evaluated by Leeds faculty and admission staff

The R Programming Language requirement may be fulfilled by any *one* of the following:

- Successful completion of MSBX 5410
- Successful completion of similar coursework at another university
- Demonstrated experience and competency with the R Programming language as evaluated by Leeds faculty and admissions staff

Additional Materials

In addition to the prerequisite course requirements above, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the business analytic methods graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

Course Requirements

Business analytic methods certificate courses include the courses listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
MSBC 5030	Quantitative Methods	3
MSBX 5405	Structured Data Modeling and Analysis	3
MSBX 5415	Advanced Data Analytics	3
MSBX 5420	Unstructured and Distributed Data Modeling and Analysis	3
Total Credit Hours		12

Marketing Analytics - Graduate Certificate

The marketing analytics certificate courses comprise the major topics in an advanced business analytics curriculum, providing marketing analytics training for mid-career professionals in business analytics or marketing roles. The courses have been specifically selected in order to teach students core concepts and targeted skills in marketing analytics

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Nondegree students must apply through Continuing Education as nondegree students.

Course Prerequisites

Students applying to the graduate certificate are required to complete two course prerequisites.

The Business Analytics Overview requirement may be fulfilled by any *one* of the following:

- Successful completion of MSBC 5070
- Successful completion of similar coursework at another university
- Other qualifying education and/or work experience, as evaluated by Leeds faculty and admission staff

The R Programming Language requirement may be fulfilled by any *one* of the following:

- Successful completion of MSBX 5410
- Successful completion of similar coursework at another university
- Demonstrated experience and competency with the R Programming language as evaluated by Leeds faculty and admissions staff

Additional Materials

In addition to the prerequisite course requirements above, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the marketing analytics graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

Courses

Marketing analytics certificate courses including the following:

Code	Title	Credit Hours
APRD 6342	Digital Advertising	3
MBAX 6330	Market Intelligence	3
MSBX 5310	Customer Analytics	2-3
APRD 6343	Applications of Advanced Statistical Techniques in Advertising	3

Supply Chain Analytics - Graduate Certificate

The supply chain analytics certificate courses comprise the major foundational topics in any supply chain management curriculum, providing necessary background for further advanced study. The four courses have been specifically selected in order to teach students core concepts and targeted skills in the fundamentals of supply chain analytics.

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS supply chain degree.

Students educated in supply chain analytics will have the knowledge to expand their careers as analysts in supply chain network design, logistics, purchasing and procurement, inventory and production control, transportation network design, facilities location planning, demand forecasting, long term aggregate planning and sub-specialties therein.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Nondegree students must apply through Continuing Education as nondegree students.

Course Prerequisite

Students applying to the graduate certificate are required to complete a course prerequisite. The course prerequisite may be satisfied by *one* of the following:

- Successful completion of MSBC 5460 (or successful completion of similar coursework at another university)
- Successful completion of the non-credit Coursera course Supply Chain Management Strategy
- Relevant work experience

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

Additional Materials

In addition, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the supply chain analytics graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

Courses

Supply chain analytics certificate courses include the following:

Code	Title	Credit Hours
MSBX 5410	Fundamentals of Data Analytics	3
MSBC 5030	Quantitative Methods	3
MSBX 5405	Structured Data Modeling and Analysis	3
MBAX 6843	Supply Chain and Operations Analytics	3

Supply Chain Foundations - Graduate Certificate

The supply chain foundations certificate courses comprise the major foundational topics in any supply chain management curriculum, providing necessary background for further advanced study. The four courses have been specifically selected in order to teach students core concepts and targeted skills in supply chain management.

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS supply chain degree.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Nondegree students must apply through Continuing Education as nondegree students.

Course Prerequisite

Students applying to the graduate certificate are required to complete a course prerequisite. The course prerequisite may be satisfied by *one* of the following:

- Successful completion of MSBC 5460 (or successful completion of similar coursework at another university)
- Successful completion of the non-credit Coursera course Supply Chain Management Strategy
- Relevant work experience.

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

Additional Materials

In addition, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the supply chain foundations graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

Courses

Supply chain foundations certificate courses include the following:

Code	Title	Credit Hours
MSBX 5450	Transportation and Logistics	3
MSBX 5470	Procurement and Contracting	3

MSBX 5435	Planning and Production	3
MBAX 6450	International Operations Management	3

Education

The School of Education offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K–12 classrooms, conducting educational research, developing evidence-informed policy and designing innovative learning environments both in schools and in community-based settings.

Graduate programs in the School of Education serve practicing teachers, higher education professionals, as well as those seeking to improve education through rigorous research and evidence-informed policy and practice. The School of Education's doctoral program is a cohort-based, full-time program that prepares individuals to lead in universities, research or policy institutes, state or government agencies and innovative non-profit organizations.

Mission

Our mission in the School of Education is grounded in a lived commitment to democracy, diversity, equity and justice. We teach and conduct research to make a positive difference with and in schools and communities. The work of our faculty, researchers, staff and students leads to evidence-based policy and practice. We aim for our graduates to be engaged and informed educators, researchers, policymakers and community leaders.

Licensure

The School of Education is authorized by the Colorado Department of Education and the Colorado Department of Higher Education to offer teacher preparation programs.

Because each state has its own laws and standards regarding teacher preparation, our teacher education programs do *not* prepare candidates for licensure in states other than Colorado. It is strongly recommended that students planning to seek professional licensure or certification in a state other than Colorado contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how a degree from CU Boulder may satiate another state's requirements for licensure in advance of program completion.

Policies & Requirements

Admission

Prospective students seeking admission to a graduate degree program should view electronic application instructions and admission information on the School of Education Graduate Program (<http://www.colorado.edu/education/graduate-programs/>) webpage. GRE test scores are required for admission to the doctoral programs. Applicants should request that the Educational Testing Service send their scores on the verbal reasoning, quantitative reasoning and analytical writing sections of the Graduate Record Examination (GRE) to CU Boulder's Graduate Processing Office.

Admission to all programs and degrees in the School of Education is selective. Meeting minimal admission requirements does not guarantee admission.

Application papers and all supporting documents, including GRE or Miller's Analogy Test (MAT) scores, if these scores are required for admission to the desired program, must be submitted electronically by the admission deadline. Master's admissions deadlines are September 1 for spring semester and January 10 for summer session and fall semester. The PhD deadline is December 1. The PhD program only has one admission cycle each year. The international student deadline for PhD applications is also December 1. Students should visit the International Admissions (<http://www.colorado.edu/international/international-admissions/>) webpage for additional forms and information. The Secondary Master's Plus (MA+) application deadline is January 10.

Advising

Graduate students are assigned an individual faculty advisor after admission and are required to submit a formal plan of study, approved by their advisor, before the end of the first full year of study.

Maximum Load and Part-Time Study

A maximum of 15 credit hours in any one semester may be applied toward degree requirements. During the summer, 9 credit hours is the maximum that will be counted toward education graduate degrees. Within this limit, students may take up to 6 credit hours in a five-week summer term, and/or 3 credit hours in a three-week term. During the academic year for financial aid purposes, students will be regarded as having a full load if they are registered for 5 or more credit hours in courses numbered 5000 or above, or are registered in a minimum of 5 dissertation or 1 MA thesis hour. At least four semesters of residence credit hours, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder. See the Graduate School section for clarification.

Opportunities for Assistantships

The School of Education has a limited number of assistantships administered by the dean on the recommendations of faculty and the associate deans. Some assistantships involve the supervision of student teachers; others involve helping professors in their teaching or research. Taxable stipends in amounts set by the university are paid for all assistantships. Appointments are usually made in terms of one-fourth time (10 hours a week) or one-half time (20 hours a week).

Master of Arts in Education

The master of arts degree requires one academic year or more of graduate work beyond the bachelor's degree.

The master's degree must be completed within four years of initial enrollment. The MA plan II (non-thesis) degree requires a minimum of 30 credit hours. See the Graduate School section for discussion of plan I and plan II. Students may transfer no more than 9 credit hours of work taken at another institution or as a non-degree student at CU Boulder.

All program areas have outlined a recommended or required program of study, and students pursuing a degree are expected to follow that program unless they have appropriate substitutions arranged in advance with their advisors and the associate dean of students.

At the beginning of the final term of study, each student must submit a "Candidacy Application for an Advanced Degree." These forms are available online through the Graduate School (<https://www.colorado.edu/graduateschool/admissions/>). If a minor is included, the form must first be signed by a representative of the student's minor department or program area. The form must first be signed by the student and the

student's faculty advisor, then submitted to the School of Education for approval and then to the Graduate School for final approval. All students are required to pass a comprehensive-final examination or its equivalent, as determined by the program's faculty committee (For time limits and other information, see the Graduate School section under master's degree).

Scholarships and Awards

A limited number of scholarships and awards are available for second- and third-year PhD students within the School of Education to support study at the master's and undergraduate levels. Each year a combination of teaching assistantships (TAs), research assistantships (RAs), other forms of graduate assistantships (GAs) and fellowships are available in the School of Education to support full-time doctoral study. The strongest doctoral applicants are nominated by the school for fellowships awarded by the Graduate School. Candidates apply in the spring semester for scholarships and awards for the following school year. Application procedures and deadlines are publicized on the School of Education website.

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students from low-income families. Information about these opportunities may be found on the School of Education (<http://www.colorado.edu/education/>) website.

Academic Standards

A grade average of B (3.00) or better is required for all work taken for any graduate degree. Transferred credits are not included when calculating grade averages.

A mark below B- will not be credited toward the PhD program; a mark below C is not acceptable for MA students. Students who do not maintain at least a B (3.00) average or better may be suspended by the dean of the Graduate School upon the recommendation of the School of Education. Students may also be suspended from the Graduate School for continued failure to maintain satisfactory progress toward the degree sought.

Please refer to the Graduate School (p. 980) for details on Academic Standing.

Programs of Special Interest

Graduate Students of Color Collaborative

The Graduate Students of Color Collaborative (GSoCC) is a collective that strives to create and promote safe spaces for graduate students of color in the School of Education and across campus. In recognizing the unique challenges and isolation that students of color often face in graduate programs at CU, GSoCC aims to regularly offer social gatherings, opportunities to critically reflect and engage in discussions of race as it pertains to campus climate, as well as a formal presence representing graduate students in diversity initiatives across campus. In addition, GSoCC members seek to collaborate with other cultural, equity and diversity based organizations on campus and graduate student support structures ranging from first-year student community support to dissertation writing groups.

Programs of Study

Degree Programs

The degrees available in the various areas of graduate study are listed below.

Curriculum & Instruction

- Master of Arts

Educational Equity & Cultural Diversity

- Master of Arts

Educational Foundations, Policy & Practice

- Master of Arts
- Master of Arts in Higher Education

Learning Sciences & Human Development

- Master of Arts

Education

- Doctor of Philosophy
The School of Education offers a PhD in Education, which has seven program areas of emphasis:
 - Educational Foundations, Policy, and Practice
 - Equity, Bilingualism, and Biliteracy
 - Learning Sciences and Human Development
 - Literacy Studies
 - Research and Evaluation Methodology
 - STEM Education
 - Teacher Learning, Research and Practice

Teaching Endorsements at the Graduate Level

Through the School of Education, CU Boulder offers advanced coursework leading to teacher added endorsements in the following areas:

- Culturally & Linguistically Diverse Education (grades K–12)
- Culturally & Linguistically Diverse Bilingual Education Specialist (grades K–12)
- Reading Teacher (grades K–12)
- Special Education Generalist (grades K–12)
- Special Education Specialist (grades K–12)

All of the above programs have degree, licensure or experience requirements that must be fulfilled before admission. Please check with the School of Education before applying.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

EDUC 5001 (3) Framing Equity and Justice in the Humanities Classroom
Critically frames learning to teach for equity and justice within schools as systems. Orients students to the School of Education's mission and guiding principles of the Secondary Humanities program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 50 hours in local schools.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4001

Requisites: Restricted to Masters-level teacher licensure students with a English-Secondary Education (EDEN-LICG) or Social Studies-Secondary Educ (EDSS-LICG) plan.

Grading Basis: Letter Grade

EDUC 5005 (3) Advanced Social Foundations of Education

Critically examines the intellectual and political forces that shape the aims, policies, and practices of K-12 education in the United States.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5010 (1) Race and Equity in Higher Education

Introduces students to the research and theory surrounding access to college and equity in higher education institutions. It specifically addresses access and equity issues related to race and ethnicity. Also discusses equity for faculty and administrators. Major themes include: college access, college choice, affirmative action and diversity.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5011 (1) College Student Career Development

Explores the diverse aspects of career development for college students. Examines the different models of career services for students in different schools, colleges and majors.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5012 (1) Higher Education Finance

Covers the major, basic elements of budgeting and finance in higher education. It is designed to address the budget process in colleges and universities, as well as the impact of budget activities on other areas of planning and operations within an institution. Enhances students' knowledge of both internal and external financial environments facing higher education.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5014 (1) Ethical Dilemmas in Higher Education

Examines ethical issues involved in higher education and student affairs administration. Uses real and fictional ethical cases to bring to light various moral and ethical tensions relevant for higher education and student affairs professionals.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace Corps and Volunteer Agencies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4015

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5020 (1) College Academic Advising

Explores the diverse aspects of academic advising for college students. Examines the different models of advising for students in different schools, colleges and majors.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5021 (1) College Athletic Affairs

Examines the relationship between student-athletes and the institution and explores how intercollegiate athletics fits into the academic enterprise of higher education. Key questions include: 1) what purpose does athletics serve and 2) for whose benefit? With these questions in mind, we examine the range of issues at the intersection of athletic administration, student development theory, and educational leadership and policy.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5022 (1) LGBTQ+ Topics in Higher Education

Explores the diverse aspects of college and university life for students, staff, and faculty who identify as LGBTQ+. Examines the different higher education supports and challenges for LGBTQ+ student populations.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5023 (1) College Admissions and Enrollment

Explores the diverse aspects of college and university student recruitment, outreach, admissions, and enrollment. Examines the different models of admissions processes and systems, with attention to relevant politics and professional practices.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5026 (1) Technology in Higher Education

Examines impact of technology on higher education and student affairs. Explores impact of technology on students and their development, and teaching and learning. Although technical aspects of technology are discussed in some depth, this is not designed as a 'technical' course; the content revolves around implications of technology as both a driving and a supportive element within higher education

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5027 (1) Institutional Advancement and Development in Higher Education

Examines the roles of institutional advancement, development, and fundraising in higher education and student affairs. Explores the impact of advancement on students, staff, and faculty, as well as on teaching and learning, research, campus life, and the larger community. The content will revolve around implications of development work as both a driving and a supportive element within higher education.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5028 (1) International Education in Higher Education and Student Affairs

To provide an introduction to the field of international education. Students pursuing graduate studies in higher education administration will benefit from an overview of global student mobility trends and an exploration of career pathways within the field. In-class discussions, out-of-class readings, and guest speakers will guide student learning.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

EDUC 5030 (1) Accessibility and Students with Disabilities in Higher Education

Provides students with important knowledge about issues of accessibility and development for students with disabilities in higher education. Examines strategies to offer support and guidance to students with disabilities in order to foster a safe and engaging learning and living environment.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5031 (1) Institutional Research & Analytics in Higher Education

Examines the roles and uses of institutional research and data analytics in higher education and student affairs. Provides students with a foundational understanding of the field of institutional research and data analytics in higher education. Explores the activities in which institutional researchers engage, the tools they need to be successful in their jobs, the topics they study and issues they investigate.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5032 (1) College Student Leadership Development

Surveys the study and practice of leadership and provides students with a variety of experiences to wrestle with large leadership questions. What is leadership? Who can be a leader? How is leadership an important aspect of understanding self and others?

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5035 (3) Proseminar: Parent and Community Involvement

Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5050 (3) Knowing and Learning in Mathematics and Science

The course is aimed at providing graduate students the opportunity to engage deeply with theories of mathematics and science learning for the purposes of designing engaging and affirming learning environments. The course is centered around reading deeply and critically in the literature on learning theory, coupled with a youth and community-based research project.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4050

Requisites: Restricted to graduate students only.

EDUC 5060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4060

Requisites: Restricted to Educ-Curriculum Instruction (ECI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5065 (3) Curriculum Theories

Examines four central curricular traditions: progressive; conservative; radical; and spiritual. Highlights the strengths and weaknesses of various writers within each tradition with attention paid to the conceptual features and the practical implications of each educational view. Encourages students to examine their own educational assumptions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5070 (3) Spirituality and Religion in Education

Examines features of religion, spirituality, and a liberal arts education, so as to further understand the constitutional, historical and cultural constraints on, and acceptable approaches to the study of religion and spirituality in American education. Specifically explores aspects of a contemplative orientation and the degree to which such an orientation should/can be pursued in K-12 public and higher education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5075 (3) Sociology in Education

In-depth analysis of theories and concepts in sociology and education. Evolution of curriculum, organization, and enrollment characteristics of American schools. Schooling, race, class, culture, gender, stratification, and educational reform in light of paradigmatic change in theories and concepts of sociology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5085 (3) History of American Education

Highlights social and intellectual history perspectives of American educational history, major reform movements from the 19th century to Dewey, and assessment of how differences of race, class, ethnicity, religion, power, and gender affected American education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5105 (3) Teaching for Understanding and Equity

Addresses perspectives and evidence-based teaching practices that promote equity and access to conceptual understanding. Introduces the knowledge base on effective and socially just teaching practices, and the theories and research that support these practices. Explores the impact of theory and research on classroom instruction.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5112 (3) Educational Psychology and Adolescent Development

Analyzes fundamental concepts from psychology and the learning sciences to understand how educators can support youth development in and out of school. Includes service learning requirement. This course is not appropriate for in-service teachers.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4112 and PSYC 4114

Requisites: Restricted to graduate students only.

EDUC 5115 (3) Issues in School Change and Reform

Examines recent developments in teaching, and trends in the philosophy and practice of education. Focuses special attention on a variety of issues central to school reform.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5135 (3) Story and Memoir

Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4135

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5145 (3) Gender, Literacy, and the K-12 Classroom

Explores and critiques various conceptions of gender within popular and scholarly publications that have influenced how gender and sexual diversity is approached in classrooms. Builds a theoretical stance toward gender and sexual diversity that supports equity, engagement and achievement for all children and youth. Discusses teaching strategies that thoughtfully take into account gender identities and equity.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5150 (3) Introduction to Qualitative Research Methods

Introduces students to qualitative research in education. Examines the foundations, design, methods and analysis of qualitative research methods. Readings include texts about the foundations and purposes of qualitative inquiry, and methodological readings about the application of research techniques. Students will complete a variety of small, hands-on projects that introduce major dimensions of qualitative research including observation, interviewing, and document analysis.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4150

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 5165 (3) Children's Literature

Involves reading and evaluation of picture books, and emphasizes children's interests, authors and illustrators, multicultural literature, the components of narrative, and the features of illustrations. Examines connections between children's literature and children's development as writers.

Additional Information: Departmental Category: Graduate Education

EDUC 5205 (3) Elementary Mathematics Theory and Methods

Provides pre-service teachers opportunities to explore contemporary theories of learning, curriculum development, and pedagogical strategies pertaining to teaching elementary-level mathematics. Blends exploration in mathematical content with development of sophisticated mathematical models for teaching.

Requisites: Requires corequisite course of EDUC 4351. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 5215 (3) Elementary Science Theory and Methods

Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications.

Requisites: Requires corequisite courses of EDUC 4331 and 4341.

Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 5222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4222

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5235 (3) Language and Literacy Across the Curriculum

Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4232

Requisites: Restricted to EDCI, EECD, EFPP, EPSY or REME graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5245 (3) Foundations of Reading Instruction K-12

Comparatively analyzes current and emerging philosophies and programs in K-12 with focus on teaching reading and thinking skills.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5255 (3) Digital Literacies and New Media

Engage in digital reading and writing experiences using tools for communication, collaboration, design and research. Students will discuss and critically reflect on the role of technology in literacy instruction, grounded on learning and literacy theories. Connections to English language arts include genre study of literary and nonfiction texts and using quality children's literature as mentor texts for multimodal craft.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5265 (3) Processes in Writing

Examines processes writers use from early ages to maturity by investigating current research related to writing curriculum, instruction, and policy. Includes opportunities for students to engage in inquiry related to writing curriculum and instruction in K-12 classrooms.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5275 (3) Assessment in Literacy

Assumes an interactive model of reading and supports the perspective of assessment as interrelated with curriculum and instruction; examines principles that guide the selection and interpretation of assessment strategies and tools, with a focus on students who are experiencing difficulties with literacy.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5285 (3) Reading Clinic Procedures K-12

Focuses learning on a select group of K-12 students to assess reading proficiency, develop appropriate instructional goals, and provide instruction that addresses these goals. Emphasis on interpreting assessment data, extending a repertoire of instructional strategies, and developing and implementing a strong instructional plan.

Requisites: Requires a prerequisite course of EDUC 5275 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5295 (3) Narrative and Story in the Humanities

Explores a wide variety of texts that might be used in secondary English and Social Studies classrooms. Examines philosophies and instructional approaches to the teaching of reading and literature. Considers the influence of story and storytelling in the construction of personal and societal meaning.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4295

Requisites: Requires prerequisite of EDUC 4001 or EDUC 5001 (minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG) or Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5301 (3) Queer(ing) Topics in Education

Bring critical and queer theoretical perspectives to bear on an inquiry into what's counted as "normal" in social, historical, and political contexts of education in the United States. We'll explore queerness, queer theory, and queer pedagogy, in an effort to examine schooling as a heteronormative institution that has tended toward (re)producing heterosexism, homophobia, and violence against queer bodies and identities.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4301

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5310 (3) Social and Emotional Learning in Schools

Explore the ways SEL benefits students through investigating its purposes and goals, the competencies it seeks to promote, the characteristics of effective programs, and the range of program formats. We frame these topics through examining ongoing dilemmas in the field. We also conduct in-depth reviews of several programs and the research that supports them.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4310

Requisites: Restricted to graduate students only.

EDUC 5315 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4315

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5316 (3) Nature of Social Studies and Social Studies Education

Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI), Social Studies-Secondary Educ. (EDSS), Anthropology (ANTH), Economics (ECON), Geography (GEOG), History (HIST) or International Affairs (IAFS) majors only.

Additional Information: Departmental Category: Graduate Education

EDUC 5317 (3) Perspectives on Mathematics

Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4317

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5325 (3) Queering Literacy in Secondary Classrooms

Engages theories and practices of literacy teaching and learning that challenge multiple forms of oppression. Using the tools of queer pedagogy, students will learn, develop, and enact strategies for planning and implementing literacy instruction that moves beyond inclusion of differences in the English/language arts and social studies curriculum.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4325

Requisites: Restricted to Master's teacher licensure students in English (EDEN-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5330 (3) Secondary Social Studies Methods I

Explores effective social studies teaching techniques used to prepare secondary students for success in college, career, and civic life. An emphasis is placed on interpreting sources, understanding multiple perspectives, and employing critical thinking with diverse students.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4330

Requisites: Requires prerequisite of EDUC 4001 or EDUC 5001 (both minimum grade C-). Requires corequisite of EDUC 4901. Restricted to teacher licensure students in Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

EDUC 5345 (3) Secondary English Methods I

Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of language, writing, and speaking and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4345

Requisites: Requires a prerequisite of EDUC 4001 or EDUC 5001 (both minimum grade C-). Requires corequisite of EDUC 4901. Restricted to teacher licensure students in English (EDEN-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5355 (3) Secondary Social Studies Methods II

Explores effective techniques associated with reading, processing and assessing social studies subject area content with an emphasis on developing critical thinking skills and meeting the needs of diverse students.

Requisites: Requires prerequisite course of EDUC 4330 or EDUC 5330 and EDUC 4901 (all minimum grade C-). Requires corequisite of EDUC 4902. Restricted to teacher licensure students in Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5365 (3) Secondary English Methods II

Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of reading, thinking, and viewing and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.

Requisites: Requires prerequisite course of EDUC 4342 or EDUC 5345 and EDUC 4901 (all minimum grade C-). Requires corequisite of EDUC 4902. Restricted to teach licensure students in English (EDEN-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5375 (3-4) Problem-Based Math Instruction

Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4375

Requisites: Restricted to EDCl, EDSC, or EDMA majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5385 (3-4) Problem-Based Science Instruction

Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

Requisites: Restricted to EDCl, EDSC, or EDMA majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5390 (3) Professional Teaching for Equity and Justice

Explores what it means to be a professional educator for equity and justice. Examines how such educators might best work to sustain their commitments through advocacy and care and how they might extend their role through involvement in the professional community and conversation at local, state, and national levels.

Requisites: Requires prerequisite of EDUC 5365 or EDUC 5355 (both minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG) of Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

EDUC 5425 (3) Introduction to Bilingual/Multicultural Education

Provides an introduction for currently practicing K-12 teachers and non-specialists to bilingual and multicultural education programs for emergent bilingual students. Includes an overview of the history and legislation related to the education of emergent bilingual students, identification and placement, as well as the various models, theoretical and philosophical underpinnings, and pedagogical practices that constitute sound educational practices for emergent bilingual students.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4425

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5435 (3) Materials and Methods in Bilingual/ Multicultural Education

Provides an in-depth study of the curriculum options available for bilingual and ESL programs. Presents, reviews, and critiques specific methods and strategies for teaching language to minority students. Gives the opportunity to develop and present teaching units in Spanish or in ESL methodology, as appropriate.

Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5445 (3) Curriculum for Multicultural Education

Analyzes curriculum programs and examines principles that inform innovation for education of diverse students at all school levels. Includes topics of ethnic, racial, socio-economic, linguistic, and gender diversity.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5455 (3) Literacy for Linguistically Different Learners

Presents current and emerging philosophies and methods on teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transference from L1 to L2 reading.

Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4460 and PHYS 4460 and PHYS 5460

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5465 (3) Introduction to ESL/Bilingual and Special Education

Provides students with the fundamental information of ESL, bilingual and special education, including theories, assumptions, philosophies, and paradigms of bilingual and special education. Discusses successful teaching techniques and instructional approaches, including individualization, least restrictive environment, transition, and career education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5485 (3) Differentiation in the Classroom

Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices, programmatic interventions that support student learning and using research to inform practice. Includes practicum. Department enforced prerequisite: restricted to MA+ students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5490 (3) Blurring Disciplinary Lines in the Humanities

Explores theories, methods, and materials for building interdisciplinary connections within and across secondary English and Social Studies classrooms. Provides opportunities for collaborative work in building lessons and unit plans that challenge disciplinary boundaries and advocate for complex problem solving.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4490

Requisites: Requires prerequisite of EDUC 4342 or EDUC 5342 or EDUC 4330 or EDUC 5330 (all minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICU or EDEN-LICG) or Social Studies (EDSS-LICU or EDSS-LICG).

Grading Basis: Letter Grade

EDUC 5505 (3) Education of Students with Learning and Behavior Disorders

Discusses unique learning needs of students with learning and behavior disorders. Emphasizes development of a systems model for diagnosis, programming, and remediation. Stresses data-based individualization of instruction, with emphasis on intervention in inclusive learning environments and developing a culturally responsive system.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5515 (3) Curriculum and Assessment for Special Learners

Emphasizes assessment of special education students from pre-referral through staffing and placement, including response to intervention, research-based assessment practices, analytic teaching and assessment, curriculum-based assessment and measurement. Selection, administration, and interpretation of formal and informal assessment devices are studied, with particular emphasis on cultural relevance and equity in assessment for special learners with mild to severe needs.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5525 (3) Research Issues in Special Education

Provides practical experience in the review, critique, conceptualization, and writing of research studies in special education. Also offers experience in design of evaluation systems for classroom practice.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5535 (3) Diagnostic Testing in ESL and Bilingual Education

Promotes critical uses of assessment instruments and information. Provides methods for educators to incorporate assessment as a meaningful activity in the classroom intended to support learning among bilingual students. Examines effectiveness, validity, and fairness in the testing of linguistically diverse populations. Provides first-hand experiences developing, selecting, reviewing, and adapting test materials as critical to making informed teaching decisions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5545 (3) Strategies for Teaching Students with Special Needs

Provides teachers with specific evidence-based methods and techniques for teaching students with a wide variety of high and low disabilities including learning and language disabilities, hearing and visual impairments, physical disabilities, and health impairments. Emphasizes different teaching methods, instructional materials, and learning strategies that have proven effective working students with cognitive learning needs.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5555 (3-4) Practicum in Bilingual/Special Education

Offers supervised field experience in elementary and secondary special education class settings. Each credit hour requires 50 contact hours.

Requisites: Requires prerequisite courses of EDUC 5465 and EDUC 5505 and EDUC 5515 or EDUC 5545 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5575 (1-4) Workshop in Curriculum and Instruction

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 5580 (3) Physics and Everyday Thinking

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5595 (1-4) Practicum in Linguistically Different: English as a Second Language

University supervised, school-based field experience teaching linguistically different students, as well as assistance in the completion of EECD portfolio.

Requisites: Requires prerequisite courses of EDUC 5425 and EDUC 5435 and EDUC 5535 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5605 (3) Research Issues in Bilingual Education

Offers practical experience in the review, critique, conceptualization, and writing of research studies in bilingual/ESL education. Provides experience in the design of classroom evaluation systems.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5610 (1-3) Math and Science Education

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5615 (3) Second Language Acquisition

Presents a broad survey of second-language acquisition research. Stresses theoretical concerns and research findings and practical applications to teaching second languages. Gives special emphasis to second-language acquisition.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5625 (3) Methods of Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 5615.

Additional Information: Departmental Category: Graduate Education

EDUC 5635 (3) Education and Sociolinguistics

Explores the discipline of sociolinguistics, the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech and social identities, and sociolinguistic research related to teaching and learning.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5706 (3) Assessment in Mathematics and Science Education

Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4706

Additional Information: Departmental Category: Graduate Education

EDUC 5716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5726 (3) Introduction to Disciplined Inquiry

Considers various research approaches and methodologies included in education including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational; and sociological, historical, and philosophical research. Topics include library research, research criticism, research design, and proposal writing.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5800 (1-9) Master's Special Topics

Designed to meet needs of students with topics of pertinent interest. 00 total credit hours. Allows multiple enrollment in term.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5815 (3) Teaching K-12 Mathematics: Number Sense

Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development. Formerly EDUC 5810.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4815

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5821 (3) Teaching K-12 Mathematics: Algebraic Thinking

Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K-12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4821

Additional Information: Departmental Category: Graduate Education

EDUC 5822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

Requisites: Requires prerequisite course of CHEM 1021 or CHEM 1113 or CHEM 1400 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5833 (3) Teaching and Learning Earth Systems

Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). The course focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions and developing effective discourse within and outside the classroom.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5835 (3) Teaching K-12 Mathematics: Geometry & Measurement

Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K-12 learners. Formerly EDUC 5830.

Additional Information: Departmental Category: Graduate Education

EDUC 5850 (3) Teaching K-12 Mathematics: Probability & Statistics

Focuses on teaching probability, data analysis, and statistics in K-12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4850

Additional Information: Departmental Category: Graduate Education

EDUC 6110 (3) Student Affairs in Higher Education

Provides students with a thorough introduction to the field of student affairs administration in higher education. Explores diverse facets of college student affairs administration and its role within US higher education. The course will help students develop a broad foundation for subsequent Higher Education study and practice. Focuses on philosophies, complexities, and futures of the student affairs profession.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6210 (3) Education Policy and the Law

Approaches education policy issues through the rich history of litigation and current legal challenges facing American K-12 schooling. Builds an understanding of the legal and policy development of the American schooling system, particularly in the 20th century. Laws and legal cases will be used as jumping-off points for broader discussions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6220 (3) Gender Issues in Education

Provides a strong foundation in the various issues of gender and sexual diversity in education. Stimulates explorations into the ways the construct of "gender" affects and is affected by the educational system and process. Presents theory and research about contemporary educational issues related to sexism and homophobia. Encourages development of well-considered views about the various issues, research, and theories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6230 (3) Ethics in Education

Investigates controversies in education from a self-consciously ethical perspective, drawing as appropriate from moral and political theory as well as law. Focuses on public education's role in fostering democratic citizenship and providing equal educational opportunity. Critically evaluates various education reform policies and curriculum policies. Applies method commonly used in medical ethics to make decisions regarding concrete ethically problematic cases.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6240 (3) African American Education in the United States

Explores development of schooling for African Americans in the U.S.. Emphasizes historical and contemporary struggles of this group in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for this group. Degree credit not granted for EDUC 4240 and 6240.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Education

EDUC 6250 (3) Higher Education in the United States

Examines major issues in higher education focusing on the sociopolitical contexts in which US universities operate as gatekeepers to opportunities. Topics include the purposes and history of higher education in the United States, college teaching and learning, finance and governance, issues of access and equity related to race, gender, sexual orientation, gender identity, immigration status and class, and student life.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EDUC 6260 (3) Transnational Migration, Education, and Citizenship

Examines the education of transnational migrant youth and families in comparative perspective, with a focus on citizenship formation. Compares state-led responses to diversity through education and integration policies with the transnational practices of distinct migrant and diaspora communities in both the United States and Europe.

Considers the educational experiences of distinct types of migrants, including undocumented immigrant students and their families and university students studying abroad, and implications for citizenship.

Requisites: Restricted to graduate students only.

EDUC 6318 (3) Psychological Foundations of Education

Introduces students to theoretical and empirical contributions of educational and developmental psychology and the learning sciences emphasizing applications to educational practices. Topics include learning, development, cognitive processes, social and cultural context, motivation, assessment and individual differences.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6325 (3) Anthropology of Education

Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6328 (3) Advanced Child Growth and Educational Development

Introduces students to recent theoretical and research advances in the study of children and adolescent's cognitive, social and emotional development, with an emphasis on implications for learning in and out of school.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6368 (3) Adolescent Psychology and Development for Teachers

Examines current theory and research on adolescent development, learning, motivation, and academic achievement. Emphasizes how theory and research can inform instructional decisions in the secondary classroom.

Requisites: Restricted to English-Secondary Education (EDEN), Social Studies-Secondary Educ (EDSS), Mathematics-Secondary Educ (EDMA) or Science-Secondary Educ (EDSC) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6405 (3) College Student Development and Counseling Theories

Covers theories of student development in higher education as they apply to the growth of students and the influence of the college environment on growth and development. Examines selected approaches to counseling theory and practice. Theoretical formulations basic to human development and the counseling process are presented including historical and philosophical background. This course explores themes of human development, self-evolution, meaning making, separation and connection, and moral meaning making, and how college students are other adults construct themselves and the meaning they make of their experience.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6504 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Department enforced prerequisite: graduate standing or at least one upper-division course in computer science, linguistics, philosophy, or psychology.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and LING 6200 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6505 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6506 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Requires prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Graduate Education

EDUC 6516 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6705 (3) Leadership in Higher Education

Examines theory and research on leadership and management in higher education, and the structure and governance of colleges and universities. Explores the internal organization and culture of institutions, as well as external and related bodies that affect higher education such as the federal and state governments, accrediting agencies, associations and foundations.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6804 (1-4) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4811 and MCDB 4811 and MCDB 5811

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6844 (1-4) Master's Independent Study

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6855 (1-4) Independent Study in Curriculum and Instruction---Master's Level

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6877 (1-4) Independent Study in Educational Equity & Cultural Diversity: Master's Level

An independent study may be established between a student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6888 (1-4) Independent Study in Educational and Psychological Studies---Master's Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6899 (1-4) Independent Study in Educational Foundations Policy & Practice--Master's Level

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6915 (1-4) Practicum in Curriculum and Instruction

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6916 (1-4) Practicum in Research and Evaluation Methodology

Additional Information: Departmental Category: Graduate Education

EDUC 6917 (1-4) Practicum in Educational Equity and Cultural Diversity

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6918 (1-4) Practicum in Educational and Psychological Studies

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6919 (1-4) Practicum in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6925 (1-4) Readings in Curriculum and Instruction

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6926 (1-4) Readings in Research and Evaluation Methodology

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6927 (1-4) Readings in Educational Equity and Cultural Diversity

Five times per semester our faculty and PhD students gather to explore topics that are relevant to becoming a scholar and researcher in our field. All EECD PhD students are encouraged to attend; however, for first and second year PhD students attendance is required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6928 (1-4) Readings in Learning Sciences and Human Development

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 6929 (1-4) Readings in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6944 (1-3) Master's Candidate for Degree

Repeatable: Repeatable for up to 12.00 total credit hours.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Graduate Education

EDUC 6945 (3) MA Capstone Seminar in Foundations of Education

Supports students completing a summative writing assignment for their Masters degree requirements. Writing assignments will be designed around the professional and academic goals of each student, in collaboration with the student's academic advisor. Students will analyze research studies across different disciplinary and methodological approaches. Through instructor coaching and peer review exercises, students will draft and refine a final assignment.

Requisites: Restricted to MA students in Education (EPSY-MA, EFPP-MA, HEDU-MA).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6954 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 6964 (3) Capstone: Inquiry in the Content Areas

Supports students in using and building on the ideas and content encountered in previous coursework. Requires students to conceptualize, design and implement an original research project that will serve as exit requirement for the degree. Reads and engages in research and theory associated with Teacher Research (i.e. research conducted by teachers for professional purposes).

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7015 (3) Teaching Internship in Teacher Education

One-semester teaching internship in an undergraduate or graduate foundations course.

Additional Information: Departmental Category: Graduate Education

EDUC 7055 (3) Philosophy of Education

Examines exemplars of educational philosophy from ancient times to the present day, emphasizing their relevance and application to current controversies in education (e.g., free speech, multiculturalism, and affirmative action). Formerly EDUC 5055.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7105 (3) Collaboration to Meet Special Needs

Covers effective collaboration practices involving the special education teacher, other educational personnel, students, and parents. Bilingual special education considerations in collaboration will be described. Issues regarding inclusion will be explored. Practical application to teaching and learning will be made. Strategies for disseminating information and collaborative activities will be discussed.

Additional Information: Departmental Category: Graduate Education

EDUC 7115 (3) Critical Inquiry into Becoming a Teacher Educator

Designed to support doctoral students' development as university level instructors/teacher educators, particularly in relation to undergraduate courses that center equity and justice as central topics, this course will draw on critical perspectives and pedagogies to shape course goals, material/content and pedagogical approach. This will be done in two primary ways: a) through the use of pedagogies adapted from Freirean Culture Circles and Boalian Theater, and b) through the application of practitioner inquiry approaches designed to develop critical, reflective practices/habits of mind among teachers and teacher educators.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 7316 (3) Intermediate Statistical Methods

Studies sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis.

Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7326 (3) Quasi-Experimental Design in Causal Inference in Social Sciences

Focuses on experimental and quasi-experimental designs in educational research; applications of the general linear model; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed design; analysis of covariance; effects of assumption violations; and related computer programs for statistical analysis.

Additional Information: Departmental Category: Graduate Education

EDUC 7336 (3) Methods of Survey Research and Assessments

Examines theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview and mailed surveys, assessing reliability and validity, sampling plans, data reduction (e.g., factor analysis), and analysis of continuous and categorical data.

Requisites: Requires prerequisite courses of EDUC 5726 and EDUC 7316 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7346 (3) Ethnographic Methods in Educational Research

Explores the history of ethnography and its translation into educational research. Students practice participant observation, interviewing, journal writing, artifact searches, qualitative analysis and interpretation, and styles of reporting.

Requisites: Requires a prerequisite course of EDUC 6325 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 7376 (3) Theory and Practice of Educational and Psychological Measurement

Introduces theories of measurement and applications, and presents classical test theory. Includes quantitative concepts, methods, and computational techniques for the development, application, and evaluation of measurement instruments in social/ behavioral science and education.

Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7386 (3) Educational Evaluation

Builds an understanding of the range of approaches taken by educational evaluators, focusing particularly on the evaluation of programs. Explores the nature of different evaluation perspectives and how these disparate views translate into methodological and conceptual models. Students develop a familiarity with the most common and influential approaches to evaluation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7396 (3) Categorical Data Analysis

Introduces contemporary advanced multivariate techniques and their application in social science research. Methods include multivariate regression and analysis of variance, structural equation models, and factor analysis. Prior experience with Anova and multiple regression is assumed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7416 (3) Seminar: Research Methodology

Presents selected topics for advanced study in educational research, statistics, measurement, and evaluation.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 7436 (3) Item Response Theory

Includes one-, two-, and three-parameter logistic models for dichotomously-scored items and partial credit models for polychotomously-scored items; applications of the models to problems such as equating of test forms, test design, computerized adaptive testing, and the detection of item bias.

Requisites: Requires prerequisite courses of EDUC 7316 and EDUC 7376 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7446 (3) Seminar: Policy Issues in Education

Explores major policy issues confronting U.S. education and examines the nature and undertaking of educational policy studies. Learn to approach policy issues from a contextual perspective that highlights systemic forces and analyzes and applies differing policy instruments. While a wide variety of policies are covered in the course, it particularly emphasizes issues of educational equity.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7456 (3) Multilevel Modeling

Covers in depth two advanced multivariate models common to social science research: latent variable (structural equation) models and multi-level (hierarchical) models. Topics may be taught with a particular analytic context, such as measurement of change (longitudinal analysis) or experimental design.

Additional Information: Departmental Category: Graduate Education

EDUC 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8014 (3) Advanced Seminar in Democracy, Diversity and Social Justice

Addresses the sociopolitical context of multiculturalism and education, and the sociocultural context of learning. Examines critical issues involved in making schooling responsive to an increasingly multicultural and multilingual society.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of EDUC 8210 (minimum grade B-). Restricted to EDUCI, EECED, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8025 (3) Seminar: Curriculum Theories

Examines in depth recent developments in curriculum theory highlighting conceptual, contextual, and normative issues. Substantially explores distinct curricular traditions, corresponding conceptions of the good life along with related approaches to reason and emotion. Focuses on the works of prominent curriculum theorists.

Additional Information: Departmental Category: Graduate Education

EDUC 8045 (3) Philosophical Issues in Educational Research

Familiarizes students with important concepts and issues from the philosophy of science and, to a lesser extent, political theory and ethics; grounds such concepts and issues in the literature (often in terms of primary philosophical sources); and stimulates students to apply this material to the field of educational research in an informed way.

Requisites: Restricted to PhD students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8055 (3) Theoretical Issues in Education Policy

Provides students with an examination of the theories behind education policy analysis. Takes a thematic approach to the study of policy in order to understand how policy agendas are set; how democratic deliberation should be linked with research and policy; and the relationship between politics, media, social structures, research and policies.

Requisites: Restricted to PhD students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8115 (3) History and Policy Issues in Teaching and Teacher Education

Examine how issues and dilemmas in teacher education are grounded in historical and political contexts. Analyze patterns in preparation of new teachers, in mechanisms used to govern entry into teaching and make determinations of quality of teachers and teaching, and in efforts to professionalize and de-professionalize teachers and teaching. Investigate contemporary teacher education debates to better understand potential research-policy-practice connections.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 8125 (3) Seminar: Radical Education Theories

Examines radical analyses of schooling, based on class, gender, sexual identity and race, through which U.S. public schooling is said to maintain dynamics of oppression and domination that undermines the schools' democratic premise. Scrutinizes the conceptual framework, interpretive and explanatory adequacy, and ethical justification of radical claims.

Additional Information: Departmental Category: Graduate Education

EDUC 8135 (3) Theories and Methodologies for Examining Teacher Learning

Examines the potential range and roles of theory in analyzing prospective and practicing teachers' learning (experiences). Explores various conceptions of teacher learning, including, but not limited to: teacher learning as a knowledge-centric phenomenon; teacher learning as a process of assembling a repertoire of practice; teacher learning as an identity-work phenomenon; and teacher learning as an activist/action-in-the-world phenomenon.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

Additional Information: Departmental Category: Graduate Education

EDUC 8145 (3) Designing for Teacher Learning and Teacher Education

Examines questions and issues related to the design of preservice teacher education programs and practicing teachers' professional development/learning opportunities. Analyzes the program and/or learning opportunity conditions, features and approaches that potentially support and/or constrain prospective and practicing teachers' learning, particularly in relation to their development and as asset-oriented teachers.

Additional Information: Departmental Category: Graduate Education

EDUC 8155 (3) Advanced Topics in Literacy Education

Examines special topics in theory and research related to literacy and literacy education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8165 (3) Advanced Topics in Mathematics Education

Examines special topics in theory and research related to mathematics education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8175 (3) Advanced Topics in Science Education

Engages participants in the process of curriculum development. Principles that guide the development of curricula and learning environments are discussed as they integrate with learning theory. Participants develop and/or test specific activities in the classroom and modify them as a result. There is a particular focus on incorporating the practices of the discipline into each content-based activity.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8177 (3) Advanced Seminar in Curriculum and Policy in Mathematics & Science Education

This course explores the changing curriculum in school mathematics and science. It will examine the history and evolution of K-20 math and science curricula from the late 1890s to current times. It will examine motivations and political forces that have helped shape and change math and science curricula.

Grading Basis: Letter Grade

EDUC 8178 (3) Advanced Seminar on Learning in Math & Science Education

This course focuses on research on the learning of mathematics and science in the K-12 schooling environment. It serves to introduce students to seminal learning theories that have guided and shaped mathematics & science education over the past thirty years (e.g., constructivist, cognitive, situative/sociocultural and critical perspectives). Core ideas within each of these theoretical perspectives will be explored such as knowledge construction and conceptual change, argumentation and reasoning, classroom discourse processes, participation and identity, and access and power. Pragmatic implications of these different theoretical perspectives will also be examined. For example, questions such as the following are considered: What is the purpose of a theory of learning (e.g., for research, for practice)? What constitutes learning within each perspective? What are the implications of a particular theoretical perspective for organizing and analyzing learning environments? What are the implications for differences

Grading Basis: Letter Grade

EDUC 8179 (3) Advanced Seminar in Mathematics and Science Teaching & Teacher Education

This course examines how scholarship on teaching and teacher learning has been evolving in mathematics and science educational research since the 1980s and 1990s. Students will explore theories of teacher learning and how they relate to designs for teacher preparation and professional development. We will also study common designs and design principles for conducting research to study teaching and teacher learning.

Grading Basis: Letter Grade

EDUC 8210 (3) Perspectives on Classroom Teaching and Learning

Introduces students to various theoretical perspectives informing educational research and how they are employed to study teaching, learning, and policy in K-12 classrooms. Includes reading and discussion related to the assumptions, questions, methods, and findings associated with theoretical traditions within and across disciplines.

Requisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8220 (3) Introduction to Educational Research and Policy

Introduces conceptual and empirical issues and controversies in educational research and policy. Complements other EDUC doctoral courses in quantitative and qualitative methodology.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

Additional Information: Departmental Category: Graduate Education

EDUC 8230 (3) Quantitative Methods I

Explores the use of statistics to formalize research design in educational research. Introduces descriptive statistics, linear regression, probability, and the basics of statistical inference. Includes instruction in the use of statistical software, (e.g., SPSS.).

Requisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8240 (3) Quantitative Methods II

Continues the exploration of research design in the social sciences, especially the evaluation of the quantitative research reported in professional journals. Introduces instances of the general linear model (both multiple regression and ANOVA) and its application to educational research.

Requisites: Requires prerequisite course of EDUC 8230 (minimum grade D-). Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8250 (3) Qualitative Methods I

Introduces students to the theory and practice of qualitative research in education. First of a two-course sequence covering research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education.

Requisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8260 (3) Qualitative Methods II

Builds on EDUC 8250 to develop knowledge and skills in ethnographic and case study research. Second of a two-course sequence covering qualitative research design, theoretical perspectives, and methods.

Requisites: Restricted to EDCI, EECD, EPSY, EFPP or REME PhD graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8270 (3) Intermediate and Advanced Application of Quantitative Methods for Behavioral Sciences

This course helps students develop the pragmatic skills needed to conduct quantitative analyses in their own research, in which they must apply concepts with novel data and in novel settings. It also provides a formal introduction to a variety of interstitial topics in quantitative analysis that may be assumed knowledge in more advanced methods courses. In addition, students will learn how to teach themselves new quantitative methods as they need them in their future careers.

Requisites: Requires prerequisite courses of EDUC 8230 and EDUC 8240 (all minimum grade B-).

EDUC 8310 (3) Design of Learning Environments for Radical Possibilities

Design is a tool for imagining radical new possibilities for living together. We will discuss how we can work with community and school partners to leverage cultural and historical resources in design. This course will introduce students to models of design and tools for participatory design used across the Global North and South that can promote individual, social, and institutional change. It will include attention to political, affective, and ethical dimensions of design, as well as explore dilemmas presented by faculty and students engaged in ongoing design projects.

Requisites: Restricted to graduate students only.

EDUC 8348 (3) Seminar: Human Development

Intensive study of selected topics in human development. The focus of the seminar will vary depending on the instructor's expertise and students' interests. Recent topics include adolescent development in social context, Vygotsky and Cultural-Historical Activity Theory, and design-based research methods. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.

Additional Information: Departmental Category: Graduate Education

EDUC 8358 (3) Seminar: Human Learning

Intensive study of selected topics in human learning. The focus of the seminar will vary depending on the instructor's expertise and students' interest. Recent topics include sociocultural and social practice theories, STEM learning in and out of school. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.

Additional Information: Departmental Category: Graduate Education

EDUC 8605 (3) Research and Professional Ethics for Educational Researchers

Examines the central issues and venerable theories of philosophical ethics that have historically framed research ethics. Also examines contemporary ethical theory that emphasizes a greater attention to the social sciences. Focuses on research ethics (both research of human subjects and research misconduct), various issues of professional academic ethics, and the AERA ethical code.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8610 (3) Advanced Topics in Educational Equity and Cultural Diversity

Examines special topics in theory and research related to educational equity and cultural diversity in education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8615 (3) Language Issues in Education Research

Examines ways in which issues of language can affect the validity of educational research. Discusses how language can be properly addressed with a multidisciplinary perspective through different stages in the process of an investigation, including design, sampling, data collection, and data analysis. Provides the conceptual basis for addressing linguistic diversity from a multidisciplinary perspective.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8620 (3) Language and Power

Through language we enact positionality and identity. Language has the power to shape our assumptions and beliefs. This course explores the relationship between linguistic nationalism and xenophobia, bilingual education and accent discrimination, multilingualism and youth culture, code-switching and translanguaging, etc. Participants will analyze domestic policies and current events to understand how language serves to maintain or disrupt the status quo.

EDUC 8630 (3) Bilingual and Biliterate Development in Children and Adolescents

This advanced doctoral seminar introduces doctoral students to key theories and empirical research on bilingual and biliterate development in school age children (preK & 12). Participants will explore sociolinguistic, sociocultural, and psycholinguistic perspectives of the language and literacy development of children growing up with two or more languages, and critically examine how varying educational contexts and policies impact the schooling experiences of bilingual learners from early childhood to late adolescence. Recommended Restriction: Doctoral students only.

Grading Basis: Letter Grade

EDUC 8640 (3) Rethinking Disability

Students explore the foundations, trends and future directions of disability in education. Disability is socially, historically, and culturally constructed. It is one of multiple identities that make us human, rather than a problem in need of a cure. This course investigates and disrupts disparities in education that relate to the intersections of disability, culture, race, language, and other identities and explores models for success.

Requisites: Restricted to doctoral students.

EDUC 8710 (3) Measurement in Survey Research

Introduces students to classical test theory and item response theory. Emphasizes the process of developing, analyzing and validating a survey instrument. Focuses on developing a survey instrument with items that derive from a clearly delineated theory for the construct to be measured. Analyzes item responses and put together a validity argument to support the proposed uses of the survey.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8720 (3) Advanced Topics in Measurement

Focuses on psychometric models for measurement and their applications in educational and psychological research. Emphasizes understanding and evaluating the utility of models from item response theory (IRT). Applies and compares measurement models in the context of simulated or empirical data sets.

Recommended: Prerequisite EDUC 8710.

Additional Information: Departmental Category: Graduate Education

EDUC 8730 (3) Advanced Qualitative Data Analysis

Requires students begin semester with qualitative data already collected (from class project, pilot study, dissertation). Instructors present diverse methods of analyzing data and writing about interpretations. Instructors customize part of course to address specific topic of expertise, e.g., discourse analysis, video analysis, textual analysis, ethnographic analysis.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8740 (3) Advances in the Assessment of Student Learning

Focuses on theories underlying traditional and contemporary proposals for assessment of student learning, and design and research of large-scale and classroom-based methods to assess student learning. Explores intersections between large-scale and classroom assessment, although greater attention is given to issues related to classroom assessment.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8750 (3) Research in Teaching and Teacher Education

Invites students to acquire a deeper understanding of the history of and challenges in teacher education research, strengthen their knowledge of theoretical and methodological approaches to the study of teacher education, and discuss their own potential contributions to the field.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 8804 (3) Special Topics

Designed to meet needs of graduate students with topics of pertinent interest.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8844 (1-4) Doctoral Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8855 (1-4) Independent Study in Curriculum and Instruction: Doctoral Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8866 (1-4) Independent Study in Research and Evaluation Methodology: Doctoral Level

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8877 (1-4) Independent Study in Educational Equity and Cultural Diversity: Doctoral Level

An independent study may be established between a doctoral student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8888 (1-4) Independent Study in Learning and Human Development: Doctoral Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8899 (1-4) Independent Study in Educational Foundations Policy and Practice: Doctoral Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8935 (1-6) Internship in Curriculum and Instruction

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8936 (1-6) Internship in Research and Evaluation Methodology

Repeatable: Repeatable for up to 36.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8937 (1-6) Internship in Educational Equity and Cultural Diversity

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8938 (1-6) Internship in Learning Sciences and Human Development

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8939 (1-6) Internship in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8950 (3) Proposal and Dissertation Writing

Provides students with ongoing opportunities to write social science research in the context of the design, analysis and data representation, development, and write-up of students' dissertation proposals and dissertations. Students will learn to expand how they think about and use evidence, clarify their ideas and arguments, and improve their writing. Students working on proposals and dissertations should enroll.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

Additional Information: Departmental Category: Graduate Education

EDUC 8994 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 60.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

Curriculum and Instruction

Curriculum and Instruction (C&I) graduate programs focus on teaching and learning in the following curricular areas: Literacy Studies (master's), STEM Education (master's), and Humanities (master's). Additionally, the MA+ teacher licensure program leads to a Colorado initial teaching license plus a master's degree in C&I. Coursework focuses on foundations of learning, foundations of education and subject matter knowledge and pedagogy. The programs prepare students to understand the complexities of classroom contexts and teaching practice in relation education goals of equity, democracy and justice.

Master's Degree

- Curriculum and Instruction - Master of Arts (MA) (p. 1370)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1382)

Education - Curriculum and Instruction - Master of Arts (MA)

The Curriculum & Instruction (C&I) master's degree requires one academic year or more of graduate work beyond the bachelor's degree.

Program Tracks

Humanities Education Track

This track is designed to support teachers who are interested in developing greater understanding and expertise in the teaching and learning of the humanities. Courses within this concentration provide opportunities for teachers to strengthen discipline-specific content knowledge, knowledge for teaching humanities, and a greater understanding of how curriculum and instructional approaches can be tailored to foster students' understanding of concepts and questions about human experience and culture that invite a multidisciplinary response.

This track is only offered as a master's degree. Prospective doctoral students interested in the humanities are encouraged to consider the Educational Foundations, Policy, and Practice emphasis of the Education PhD (p. 1382) program.

Literacy Education Track

This track is designed to support teachers who are interested in developing greater understanding and expertise in the teaching and learning of literacy. Students completing this program track may be eligible for a Reading Teacher K–12 endorsement from the state of Colorado. Because the endorsement is an advanced and specialty certification, all candidates for the degree must have a minimum of two years' teaching experience and pass the Praxis Teaching Reading exam (#5204) before they can receive the endorsement.

Typical students in the program are practicing teachers who want to strengthen their literacy instruction and earn a Reading Teacher K–12 endorsement from the state of Colorado.

STEM Education Track

The CU Boulder School of Education offers this program to support educators who are interested in developing greater understanding of and expertise in education related to STEM (particularly science and mathematics). The program enables teachers, educational designers and scholars to explore and critically analyze educational, pedagogical, and curricular strategies designed to support students' STEM learning and identities. Disciplinary connections to critical issues in STEM are strengthened through lesson design and analysis, fieldwork, coursework and research activities. Throughout these experiences, we center equity, democracy, and justice as core concerns in STEM education.

The program serves practicing teachers, educational leaders, designers of informal educational settings, as well as individuals with backgrounds in STEM wishing to learn more about teaching and learning. Graduates of our MA program go on to become teacher leaders, instructional

designers, curriculum specialists, district administrators and educational consultants.

MA+ Teacher Licensure

The MA+ teacher licensure program (p. 1386) leads to a Colorado initial teaching license in Secondary Math, Science, English or Social Studies plus a master's degree in C&I. This program is for candidates who have earned a bachelor's degree from an accredited institution of higher education and who want to elaborate and deepen the close connections between fieldwork and coursework to become a teacher. For more information, contact the School of Education.

Requirements

General Requirements

Program Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year time limit.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Master's degree students who began CU's Teacher Education Program as undergraduates or as post-baccalaureate students have the following transfer credit options:

- If the student took the courses as an undergraduate, they may be eligible to transfer up to two of their track's eligible transfer courses, depending on when those courses were taken and if the credits did not count towards the degree. Contact the School of Education for more information.
- If the student took the courses as a post-baccalaureate student, they may transfer up to two of their track's eligible transfer courses as electives, as long as the courses were taken within the past five years. Note: Students transferring from secondary programs will transfer seven credits; therefore, they will complete a 31-credit master's degree.

Time Limit

The master's degree must be completed within four years.

Program Tracks

Humanities Education Track

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
Learning and Development		
Choose at least 3 credit hours of learning and development courses. Eligible courses include:		3
EDUC 6318	Psychological Foundations of Education	
EDUC 6328	Advanced Child Growth and Educational Development	
EDUC 5105	Teaching for Understanding and Equity	
Foundations of Education Curriculum		
Choose at least 3 credit hours of foundations of education curriculum courses. Eligible courses include:		3
EDUC 5065	Curriculum Theories	
EDUC 5075	Sociology in Education	
EDUC 5085	History of American Education	
EDUC 5115	Issues in School Change and Reform	
EDUC 5726	Introduction to Disciplined Inquiry	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6230	Ethics in Education	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Seminar: Policy Issues in Education	
Curriculum and Instruction in Humanities		
Choose at least 12 credit hours of curriculum and instruction in humanities courses. Eligible courses include: ¹		12
EDUC 5070	Spirituality and Religion in Education	
EDUC 5145	Gender, Literacy, and the K-12 Classroom	
EDUC 5165	Children's Literature	
EDUC 5222	Language Study for Educators	
EDUC 5235	Language and Literacy Across the Curriculum	
EDUC 5265	Processes in Writing	
EDUC 5316	Nature of Social Studies and Social Studies Education	
EDUC 5325	Queering Literacy in Secondary Classrooms	
EDUC 5345	Secondary English Methods I	
EDUC 5445	Curriculum for Multicultural Education	
Electives		
Choose at least 9 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen in consultation with an advisor. ^{1,2,3}		9
Capstone Course		3
EDUC 6964	Capstone: Inquiry in the Content Areas	
Total Credit Hours		30

¹ See also "Eligible Transfer Courses" below.

² GRTE courses may not count toward a master's degree.

³ Students may deepen their content knowledge in the humanities disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

Eligible Transfer Courses

See the Transfer Credit (p. 1371) section for details.

Code	Title	Credit Hours
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5316	Nature of Social Studies and Social Studies Education	3
EDUC 5355	Secondary Social Studies Methods II	3
EDUC 5365	Secondary English Methods II	3

Capstone Course

During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6964 Capstone: Inquiry in the Content Areas. This course is only offered once a year. The Capstone course is a graduation requirement and requires the submission of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

Literacy Education Track with CO Reading Teacher Endorsement Track-Specific Courses

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
EDUC 5245	Foundations of Reading Instruction K-12	3
EDUC 5255	Digital Literacies and New Media (prerequisite EDUC 5245)	3
EDUC 5265	Processes in Writing	3
EDUC 5275	Assessment in Literacy (prerequisite EDUC 5255)	3
EDUC 5285	Reading Clinic Procedures K-12 (prerequisite EDUC 5275; capstone course)	3
Total Credit Hours		15

Electives

An additional 15 credit hours of electives and the Capstone Course are required. Electives may be selected from any School of Education program area with the agreement of the advisor. Education courses must be at the 5000 level or above^{1,2,3}.

Suggested electives include the following:

Code	Title	Credit Hours
Electives		12
Learning Development		
EDUC 6318	Psychological Foundations of Education	
EDUC 6328	Advanced Child Growth and Educational Development	
EDUC 5105	Teaching for Understanding and Equity	

Foundations in Education, Curriculum or Educational Research

EDUC 5065	Curriculum Theories
EDUC 5075	Sociology in Education
EDUC 5085	History of American Education
EDUC 5115	Issues in School Change and Reform
EDUC 5726	Introduction to Disciplined Inquiry
EDUC 6220	Gender Issues in Education
EDUC 6230	Ethics in Education
EDUC 6325	Anthropology of Education
EDUC 7055	Philosophy of Education
EDUC 7446	Seminar: Policy Issues in Education

Curriculum and Instruction

EDUC 5070	Spirituality and Religion in Education
EDUC 5222	Language Study for Educators
EDUC 5235	Language and Literacy Across the Curriculum
EDUC 5315	Perspectives on Science
EDUC 5165	Children's Literature
EDUC 5316	Nature of Social Studies and Social Studies Education
EDUC 5317	Perspectives on Mathematics
EDUC 5445	Curriculum for Multicultural Education
EDUC 5325	Queering Literacy in Secondary Classrooms
EDUC 5345	Secondary English Methods I
EDUC 5706	Assessment in Mathematics and Science Education
EDUC 5815	Teaching K-12 Mathematics: Number Sense
EDUC 5821	Teaching K-12 Mathematics: Algebraic Thinking
EDUC 5835	Teaching K-12 Mathematics: Geometry & Measurement
EDUC 5850	Teaching K-12 Mathematics: Probability & Statistics

Culturally and Linguistically Diverse Learners

EDUC 5035	Proseminar: Parent and Community Involvement
EDUC 5445	Curriculum for Multicultural Education
EDUC 5455	Literacy for Linguistically Different Learners
EDUC 5525	Research Issues in Special Education
EDUC 5615	Second Language Acquisition
EDUC 5625	Methods of Teaching English as a Second Language

Capstone Course (required) 3

EDUC 5285	Reading Clinic Procedures K-12	
Total Credit Hours		15

¹ See also "Eligible Transfer Courses" below.

² GRTE courses may not count toward a master's degree.

- ³ Students may deepen their content knowledge in the mathematics or science disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

Eligible Transfer Courses

See the Transfer Credit (p. 1371) section for full details.

Code	Title	Credit Hours
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5316	Nature of Social Studies and Social Studies Education	3
EDUC 5317	Perspectives on Mathematics	3
EDUC 5355	Secondary Social Studies Methods II	3
EDUC 5365	Secondary English Methods II	3
EDUC 5375	Problem-Based Math Instruction	4
EDUC 5385	Problem-Based Science Instruction	4

Comprehensive Exam/Capstone Course

During the final Spring semester prior to graduation, students must enroll in the capstone course Reading Clinic Procedures K-12 (EDUC 5285). This course is only offered once a year. The Capstone course is a graduation requirement and requires the submission of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

STEM Education Track

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
Learning and Development		
Choose at least 3 credit hours of learning and development courses. Eligible courses include:		3
EDUC 6318	Psychological Foundations of Education	
EDUC 6328	Advanced Child Growth and Educational Development	
EDUC 5105	Teaching for Understanding and Equity	
Foundations of Education Curriculum		
Choose at least 3 credit hours of foundations of education curriculum courses. Eligible courses include:		3
EDUC 5065	Curriculum Theories	
EDUC 5075	Sociology in Education	
EDUC 5085	History of American Education	
EDUC 5115	Issues in School Change and Reform	
EDUC 5726	Introduction to Disciplined Inquiry	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6230	Ethics in Education	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Seminar: Policy Issues in Education	
Curriculum and Instruction in Mathematics and Science		
Choose at least 12 credit hours of curriculum and instruction in mathematics and science courses. Eligible courses include: ¹		12

EDUC 5070	Spirituality and Religion in Education (3 credit hours)
EDUC 5317	Perspectives on Mathematics
EDUC 5460	Teaching and Learning Physics
EDUC 5580	Physics and Everyday Thinking
EDUC 5706	Assessment in Mathematics and Science Education
EDUC 5815	Teaching K-12 Mathematics: Number Sense
EDUC 5821	Teaching K-12 Mathematics: Algebraic Thinking
EDUC 5822	Teaching and Learning Chemistry
EDUC 5835	Teaching K-12 Mathematics: Geometry & Measurement
EDUC 5850	Teaching K-12 Mathematics: Probability & Statistics
EDUC 6811	Teaching and Learning Biology

Electives

Choose at least 9 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen in consultation with your advisor. ^{1,2,3}

Capstone Course	3
EDUC 6964	Capstone: Inquiry in the Content Areas

Total Credit Hours 30

¹ See also "Eligible Transfer Courses" below.

² GRTE courses may not count toward a master's degree.

³ Students may deepen their content knowledge in the mathematics or science disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

Eligible Transfer Courses

See the Transfer Credit (p. 1371) section for full details.

Code	Title	Credit Hours
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5317	Perspectives on Mathematics	3
EDUC 5375	Problem-Based Math Instruction	4
EDUC 5385	Problem-Based Science Instruction	4

Comprehensive Exam

During the final Spring semester prior to graduation, students must enroll in the capstone course EDUC 6964. This course is offered only once a year. The capstone course is a graduation requirement and requires the of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

Learning Outcomes

MA students in Curriculum & Instruction will:

- Develop greater understanding and expertise in teaching and learning within and/or across content domains (e.g., Humanities, Literacy, STEM Education).

- Demonstrate professional integrity through ethical conduct, reflection and leadership.
- Collect and analyze information from research and practice to inform decisions and enhance equitable teaching and learning for all students.
- Make educational decisions based on deep engagement with educational scholarship, perspectives and data.
- Understand the importance of partnering with and centering the knowledge of families and communities, particularly those that have experienced histories of marginalization, to work toward social change and educational justice.
- Draw on disciplinary knowledge, perspectives and practices to broaden opportunities personal and social transformation

Education - Learning Sciences and Human Development

The Learning Sciences & Human Development (LSHD) program takes an interdisciplinary approach to understanding learning, teaching and the design of learning ecologies. The program is particularly concerned with examining learning and development as it happens in and across in-school and out-of-school contexts and at the intersection of learning and policy. To this end, the program enacts innovative teaching practices that are attuned to our current technological and socio-political climate. Our interdisciplinary approach encourages students in the program to cultivate a strong commitment to and develop a strong record of working successfully with school and community partners to organize innovative practices that open up opportunities for transformative learning.

The LSHD program is on the leading edge of the field in its theoretical and practical explorations of issues of social and spatial justice, technology and design, culture and diversity in learning. LSHD faculty and students are also leaders in theorizing and building partnerships with schools, districts and state agencies, as well as youth and community organizations.

Master's Degree

- Learning Sciences and Human Development - Master of Arts (MA) (p. 1374)

Learning Sciences and Human Development - Master of Arts (MA)

The Learning Sciences & Human Development (LSHD) master’s program focuses on research, theory and professional knowledge, with an emphasis on learning and teaching in K–12 educational settings—both inside and outside of the traditional classroom. The program is structured in accordance with a researcher-practitioner model, with primary emphasis given to academic study and research. Students in the MA in LSHD should expect to engage in rigorous and robust individual and collaborative inquiry around key issues and concepts of learning design, pedagogy, and individual and social cognitive development.

The program is designed to provide an academic and practical foundation that prepares students for a variety of career pathways, for example, for work in K–12 education, with youth-serving community organizations, or employment in the private sector. In addition, faculty advisors and students build programs of study that meet both the program goals and the student’s interests.

Prior Experience

To make the most of the LSHD MA program, it is helpful—though not required—for students to have taken coursework focused on learning and human development. For example, courses that address topics such as how people learn, cognition and the social and cultural contexts of development, including the study of culture, race, ethnicity, gender or linguistics would be relevant. Commensurate professional or paraprofessional experience in educational settings—in and out of school and with youth and adults—is also a valued prior experience.

Requirements

Required Courses and Credits

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Code	Title	Credit Hours

Capstone Project		6
Total Credit Hours		30

¹
GRTE courses may not count toward a master's degree.

Capstone Project

The capstone project is the culminating academic experience for students in the MA program. The capstone project is meant to provide a context in which students can use the conceptual and methodological

tools, along with their grounded professional experiences to develop a project designed to integrate their lived experiences with the knowledge they have gained through coursework.

Students will be supported to develop their capstone project through three phases.

Phase 1: In EDUC 5726 Introduction to Disciplined Inquiry, students will develop a literature review focused on a topic of interest connected to the study of learning sciences and human development.

Phase 2: In EDUC 5XXX Critical Design for Learning and Development, students will develop their proposal for their capstone project. This will involve building on the literature review they developed in EDUC 5726 and then identifying, with the course instructor, how they could ground their understandings in a real world setting. The proposed project will be an empirical investigation; it could take multiple forms such as an observational study or an intervention study or a process of improvement developed in collaboration with an external organization. Students can take EDUC 5XXX Critical Design for Learning and Development, contact their faculty advisor to make appropriate arrangements to support the capstone work.

Phase 3: In EDUC 6945 MA Capstone Seminar in Foundations of Education, students will complete their proposed study and write a report of their findings. Students are expected to draw on their coursework and independent research to develop their capstone project. The students will share their written proposal with the instructor of EDUC 5726, their advisor, and (as appropriate) the external organization with whom they are collaborating to get feedback on their plans. Although students are not required to implement their intervention, they need to discuss the research that supports their logic, methods, and claims.

Time Limit

The master's degree must be completed within four years.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. Students who have transfer credits must complete the transfer of credit paperwork.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Educational Equity and Cultural Diversity

Educational Equity and Cultural Diversity (EECD) offers a course of study devoted to the critical examination of theory, practice and policy in two major areas of emphasis, including:

- The education of culturally and linguistically diverse students
- The education of exceptional children

The program stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

Program faculty offer courses in first and second language acquisition theory, program development for bilingual education and English as a second language and methodologies appropriate for such programs. Faculty also offer courses in special education methodologies, assessment and program implementation. Additional related courses are available in other programs of the School of Education and in other departments of the university.

The program is designed to train scholars, teachers, resource specialists and administrators for careers in academic institutions, public schools and federal and state agencies. Doctoral level preparation is research-oriented and qualifies graduates to be curriculum specialists in school districts or faculty in university positions.

Master's Degree

- Educational Equity and Cultural Diversity - Master of Arts (MA) (p. 1375)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1382)

Educational Equity and Cultural Diversity - Master of Arts (MA)

Educational Equity & Cultural Diversity (EECD) offers a course of study devoted to the critical examination of theory, practice and policy in two major areas of emphasis: the education of culturally and linguistically diverse students and the education of students with disabilities. The program stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

Areas of Emphasis

Culturally & Linguistically Diverse Education Emphasis

The School of Education offers the master's degree in EECD with an emphasis in Culturally & Linguistically Diverse Education. Completion of this program qualifies one for a Colorado endorsement in the area of Culturally & Linguistically Diverse education (K-12). Some candidates may also be eligible for the Culturally & Linguistically Diverse Education Specialist: Bilingual Education endorsement. Please contact the School of Education for details.

The program provides a range of direct experiences in bilingual/multicultural/ESL education with the opportunity to develop skills and expertise essential to the work of educators of the bilingual/emerging bilingual learner. The overall purpose of the program is to develop sound bilingual/multicultural/ESL competencies in teachers and

school leaders. Program coursework includes foundations of bilingual/multicultural education, assessment practices and issues, methods in bilingual and ESL, biliteracy, family/community engagement, and a field-based practicum. Participation in the program may be on a part-time basis. International students seeking participation in this program should consult with a faculty advisor before applying for admission and must complete a practicum in a public school. This program is not appropriate for individuals wishing to teach English as a foreign language in other countries.

Culturally & Linguistically Diverse Ed/Special Ed Generalist Emphasis

The School of Education offers the master's degree in EECD with an emphasis in bilingual/ESL special education. Completion of this program qualifies one for a teacher endorsements in two areas of Special Education Generalist (K-12) and Culturally & Linguistically Diverse education (K-12). Program graduates are employed in both general and special education programs. The program offers courses in foundations in special and ESL/bilingual/multicultural education; assessment issues and practices in bilingual/ESL special education; methods of bilingual, ESL and special education; biliteracy; family and community engagement; and a field-based practicum. This program is not suitable for international students seeking preparation in Teaching English as a Foreign Language (TEFL). This is a part-time program for practicing educators with courses offered evenings and summers. This program is designed to be completed over a three year period.

Social/Multicultural/Bilingual Education Emphasis

This program is a non-endorsement degree with an interdisciplinary focus. The program offers courses in foundations of bilingual/multicultural education, curriculum and methods in multicultural education, and curriculum theory. Participation in the program may be on a part-time or full-time basis.

Requirements

Social/Multicultural/Bilingual Education (Non-Endorsement) Plan

Program Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master's degree within four years. This program does *not* lead to an added endorsement in Linguistically Diverse Education.

Required Courses and Credits

The program requires 15 credit hours in bilingual, ESL and multicultural education. The remaining 15 credit hours are electives that may be taken either in the School of Education or in other CU departments, but should be discussed with and approved by an advisor. Education courses must be at the 5000 level or above. GRTE courses may not count toward a master's degree. A maximum of 6 credit hours may be completed in Arts & Sciences courses taken at the 3000 or 4000 level. The frequency of individual course offerings varies; therefore candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Code	Title	Credit Hours
Core Requirements		
EDUC 5525/5605	Research Issues in Special Education	3
Suggested bilingual, ESL and multicultural education courses include the following:		12
EDUC 5035	Proseminar: Parent and Community Involvement	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5445	Curriculum for Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
EDUC 5535	Diagnostic Testing in ESL and Bilingual Education	
EDUC 5615	Second Language Acquisition	
EDUC 5625	Methods of Teaching English as a Second Language	
Electives		15
Total Credit Hours		30

Comprehensive Exam

A written comprehensive examination must be completed during the student's last term of study for the MA degree. The examination will cover the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder. Students must be enrolled in a course in the same semester they are taking comps.

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Culturally & Linguistically Diverse Education (CO CLD Endorsement) Plan

Program Requirements

Student must successfully complete 31 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master's degree within four years.

Required Courses and Credits

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course

offerings varies; therefore, candidates should plan ahead so that the required 31 credit hours are completed within the four-year limit.

Approved coursework meets the following course requirements:

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
<i>Course or Requirement:</i>		
EDUC 5425/5465	Introduction to Bilingual/Multicultural Education	3
EDUC 5445	Curriculum for Multicultural Education	3
EDUC 5035	Proseminar: Parent and Community Involvement	3
EDUC 5435	Materials and Methods in Bilingual/Multicultural Education	3
EDUC 5455	Literacy for Linguistically Different Learners	3
EDUC 5535	Diagnostic Testing in ESL and Bilingual Education	3
EDUC 5605	Research Issues in Bilingual Education	3
EDUC 5615	Second Language Acquisition	3
EDUC 5625	Methods of Teaching English as a Second Language	3
Comprehensive Exam/Capstone Course		4
EDUC 5595	Practicum in Linguistically Different: English as a Second Language	
Total Credit Hours		31

Comprehensive Exam

A written comprehensive examination must be completed during the student's last term of study for the MA degree. The examination will cover the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- EDUC 5595 Practicum in Linguistically Different: English as a Second Language (1-4): (4 credit hours) Practicum includes 200 hours of in-school work (can be taken over two semester blocks)

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Special Education Generalist and Culturally & Linguistically Diverse Education (CO Dual Endorsement) Plan

Program Requirements

Students must successfully complete 36–37 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master's degree within four years.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 36–37 credit hours are completed within the four-year limit.

Approved coursework meets the following distribution requirements:

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
<i>Course or Requirement:</i>		
EDUC 5035	Proseminar: Parent and Community Involvement	3
EDUC 5455	Literacy for Linguistically Different Learners	3
EDUC 5465	Introduction to ESL/Bilingual and Special Education	3
EDUC 5505	Education of Students with Learning and Behavior Disorders	3
EDUC 5515	Curriculum and Assessment for Special Learners	3
EDUC 5525	Research Issues in Special Education	3
EDUC 5535	Diagnostic Testing in ESL and Bilingual Education	3
EDUC 5545	Strategies for Teaching Students with Special Needs	3
EDUC 5615	Second Language Acquisition	3
EDUC 5625	Methods of Teaching English as a Second Language	3
EDUC 7105	Collaboration to Meet Special Needs	3
Comprehensive Exam/Capstone Course		3-4
EDUC 5555	Practicum in Bilingual/Special Education	
Total Credit Hours		36-37

Comprehensive Exam

A written comprehensive examination must be completed during the student's last term of study for the MA degree. The examination will cover the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- Practicum in Bilingual/Special Education (EDUC 5555): 3-4 credit hours

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the

Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Learning Outcomes

Students in the Educational Equity and Cultural Diversity MA program will:

- Develop pedagogical expertise in planning for instruction and effectively teaching bi/multilingual students and/or students with identified special needs in PK-12th grade settings.
- Understand the complex interaction of language, culture, identity and learning in and out of schools.
- Develop the knowledge and skills to advocate on behalf of culturally and linguistically diverse learners in schools.
- Build effective partnerships with communities and families in the pursuit of educational equity and opportunity.
- Embrace a holistic/dynamic bilingual lens and an anti-racist stance in making decisions regarding policy, programs, assessment, curriculum and instruction.
- For CLD and Dual Endorsement Programs: Meet requirements for the State of Colorado Endorsement in Cultural and Linguistic Diversity in Education.
- For Double Endorsement Program: Meet requirements for the State of Colorado Endorsement in Special Education.

Educational Foundations, Policy and Practice

Educational Foundations, Policy & Practice (EFPP) graduate programs focus on policy analysis and the application of academic disciplines—anthropology, history, law, philosophy and sociology—to the analysis of education. Programs are devoted to the critical examination of the relations among education, society, culture and government, with special emphasis on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The master's program prepares students for a variety of pathways, including policy analyst careers for state and local organizations, and further study at the PhD level. The PhD program prepares students for university faculty positions and other careers requiring deep knowledge of research.

Master's Degrees

- Educational Foundations, Policy and Practice - Master of Arts (MA) (p. 1378)
- Higher Education - Master of Arts (MA) (p. 1380)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1382)

Educational Foundations, Policy and Practice - Master of Arts (MA)

The master's program in Educational Foundations, Policy & Practice (EFPP) includes two possible concentrations, each with a different focus: *community-based change*, and *evaluation and policy analysis*. Both concentrations engage students in a critical examination of the relations among education, society, culture and government, with special emphases on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The program stresses analysis of educational theory, policy, and practice by drawing on the humanities and the social sciences. Its foundation is critical scholarship, which examines educational institutions within broad social, political, cultural, legal, and economic contexts in the United States. Program faculty members offer courses in social, cultural, historical, legal and philosophical foundations of education; in policy analysis; and in evaluation. Additional related courses are available in other programs within the School of Education and in other departments of the university.

EFPP has designed its master's program as a flexible program with a relatively small size to encourage strong and enduring relationships among students and faculty. All master's program concentrations are designed to prepare graduates for diverse roles as educators, advocates or policy analysts in schools, government agencies, think tanks, policy organizations, community organizations or institutions of higher education. This program also prepares graduates to pursue doctoral work.

Community-Based Change Concentration

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as contemporary school reforms and partnerships between schools and communities. This strand of the EFPP MA program is specifically geared toward educators, non-profit leaders, parents, and other community members who wish to gain skills and knowledge that will assist them in becoming powerful advocates for high-quality, equitable education.

Key foundations courses in this concentration include but are not limited to: policy issues in education, philosophy of education, anthropology of education, sociology in education, history of American education, education policy and the law, international and comparative education, queer(ing) topics in education, and issues in African-American education. Students will create a specific course plan around their interests in consultation with their advisor.

Evaluation and Policy Analysis Concentration

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as the process of school reform and the development of more equitable education policies. The program is designed to prepare evaluators and policy analysts for careers in academic institutions and agencies at the state and federal levels.

Graduates will be able to analyze, recommend, and evaluate public policies.

Key courses in this concentration include but are not limited to: education evaluation, policy issues in education, philosophy of education, education policy and the law, and theoretical issues in education policy. Students will create a specific course plan around their interests in consultation with their advisor.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Ethnic Studies - Bachelor of Arts (BA) (p. 287).

Completing the BAM degree program efficiently requires early and careful planning. Interested students can contact education advisors at edadvise@colorado.edu or 303-492-6555, and Ethnic Studies advisors at ethnics@colorado.edu or 303-492-8852 at any time.

Requirements

(Educational Foundations, Policy and Practice MA Degree Plan (<http://www.colorado.edu/education/graduate-programs/educational-foundations-policy-practice-efpp/ma-efpp/degree-requirements/>))

Requirements for Master's Degree

1. Students must successfully **complete 30 credit hours** of approved coursework while maintaining at least a B (3.0) average in *all* work attempted while enrolled.
2. Successfully pass their Capstone Course.
3. The master's degree must be completed within four years.

Degree Requirements

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit set forth below.

Students select the remaining 6 credit hours in consultation with their advisors, depending on the credit distribution in the above categories.

Required Courses and Credits

Code	Title	Credit Hours
Foundations		15
Choose at least 15 credit hours in educational foundations.		
Suggested courses:		
EDUC 5015	International / Comparative Education	
EDUC 5075	Sociology in Education	
EDUC 5085	History of American Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	

EDUC 6230	Ethics in Education	
EDUC 6240	African American Education in the United States	
EDUC 6250	Higher Education in the United States	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Seminar: Policy Issues in Education	
EDUC 8045	Philosophical Issues in Educational Research	
EDUC 8055	Theoretical Issues in Education Policy	
Education Research		6
Ordinarily, entering master's-level students will take the following two courses to meet this requirement:		
EDUC 5716	Basic Statistical Methods	
EDUC 5726	Introduction to Disciplined Inquiry	
Those who have already taken one or more comparable courses can adjust their course of study accordingly.		
Electives		6
Students may select 6 credits of coursework in consultation with their advisor.		
Capstone Course		3
Total Credit Hours		30

Capstone Course

During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6945 MA Capstone Seminar in Foundations of Education. This course is only offered in the spring semester. The capstone course requires the submission of a paper or project reviewed by faculty to successfully complete both course and graduation requirements.

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours. These transfer credits are accepted only after approval of the department chair or program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed six credits of graduate-level coursework, with a 3.0 GPA, as a degree-seeking student on the CU Boulder campus.

Learning Outcomes

MA students in Educational Foundations, Policy and Practice will:

- Understand and apply various disciplinary perspectives and critical theoretical lenses to analyze educational policy and practice.

- Analyze the relationship between schools and various social, political and economic forces that structure educational aims, institutions and practices.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the ability to evaluate how (and to what extent) various educational policies and practices advance or undermine such aims.
- Develop and practice strategies and skills of policy analysis and program evaluation, in order to effectively analyze, recommend and evaluate public policies and to advocate for high-quality, equitable education.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning.

Higher Education - Master of Arts (MA)

As the demand for knowledgeable, ethical and diverse leaders in higher education continues to grow, the professional MA program will help students broaden their knowledge of higher education policy, research and practice, especially in the areas of student affairs, academic affairs, diversity and community engagement.

The professional MA program offers a supportive community and flexible coursework designed to accommodate busy professionals' schedules. An innovative collaborative effort between the School of Education and various administrative departments on campus, the program offers a dynamic combination of academic knowledge and experiential education.

Requirements

The MA in Higher Education (MAHE) program aims to develop knowledgeable, ethical, and diverse leaders in higher education. Students will broaden their knowledge of higher education in three key areas: the foundations of higher education; research and evaluation; and higher education and student affairs practice. Students complete two professional practicum experiences in higher education as well as a research-based Capstone project, a summative writing project designed around the professional and academic goals of each student, with their advisor.

Students must successfully complete 36 credit hours of approved coursework while maintaining at least a B (3.0) grade point average, and must pass their capstone course. Additionally, the master's degree must be completed within four years.

Required Courses and Credits

Code	Title	Credit Hours
Foundations of Higher Education (9 credits)		9
EDUC 6250	Higher Education in the United States (Required Course)

EDUC 5030	Accessibility and Students with Disabilities in Higher Education
EDUC 5031	Institutional Research & Analytics in Higher Education
EDUC 5032	College Student Leadership Development
Required Capstone Course (3 Credits)	
EDUC 6945	MA Capstone Seminar in Foundations of Education

Total Credit Hours	36
--------------------	----

Learning Outcomes

Students in the MAHE program will:

- Understand the mission, roles, and functions of higher education in the United States, including the history and philosophy of higher education; college student development; and key factors that influence student and organizational behavior.
- Translate theoretical knowledge into meaningful practices in the profession, including in areas such as advising, instruction, supervision, program design, administration and research.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the competencies necessary to engage

with diverse students and staff with sensitivity, effectiveness and confidence.

- Practice skills of program assessment, design, implementation, and evaluation, as appropriate for various divisions and offices in higher education. Develop professional relationships with peers and team members in a university setting.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning. Students will be able to offer (and receive) critical and supportive peer feedback, and gain experience presenting work to external audiences.

Research and Evaluation Methodology

The Research & Evaluation Methodology (REM) program offers the opportunity to combine substantive interests in education with advanced training in research methods. The program's central mission is to provide students with the training they need to use sophisticated methods that shed light on policies, programs and practices that have been enacted to facilitate student learning and to mitigate inequality in educational opportunities and outcomes. Students will learn both how to apply a variety of methodological approaches, and, of equal or greater importance, to think deeply about when and why the approach is sensible given the real-world contexts in which these research designs and methods are applied.

A spirit of critical inquiry and intellectual curiosity is a defining feature of the REM community. When claims are made—by students or faculty—it is expected that those claims will be supported by an adequate warrant, drawing on empirical evidence when appropriate.

Within this framing, learning goals for REM students include that they:

- Develop knowledge and skills for applying appropriate research methods and study designs to answer substantive questions about educational policies, programs, and practices aimed at promoting equitable opportunities and outcomes for historically underserved and marginalized populations.
- Learn to communicate relevant findings and insights to a broad audience of stakeholders including the public, policymakers and academic peers.
- Find fulfilling careers in a context that is the best fit for each individual student's research (and teaching) interests. These careers may be in university teaching and research, research and evaluation in state departments of education, large school districts, think tanks or research firms, federally funded regional research and development laboratories; assessment and testing organizations; and consultation for government and education agencies.

REM faculty strive to foster an environment for students that is both challenging and supportive. During the weekly "REM seminar," students have the opportunity to interact with invited speakers, discuss timely research topics and studies, brainstorm ideas for publishable papers, and practice giving oral presentations. Regular interactions among students and faculty is the norm, not the exception. REM faculty teach courses and mentor students with the same commitment and dedication that is evident in our scholarly research. Students will have ongoing support as they embark on a path that begins with coursework, transitions to dissertation prospectus and defense, and culminates in a job that aligns with their particular career aspirations in educational research.

Students participate in graduate research assistantships each semester and most can expect to work with faculty on research projects as part of CADRE at some point during their doctoral studies.

The Center for Assessment, Design, Research and Evaluation (CADRE (<https://www.colorado.edu/cadre/>))

REM students can explore opportunities to be involved in CADRE research. The mission of CADRE is to produce generalizable knowledge that improves the ability to assess student learning and to evaluate programs and methods that may have an effect on this learning. CADRE projects represent a collaboration with the ongoing activities in the School of Education, the university, and the broader national and international community of scholars and stakeholders involved in educational assessment and evaluation. Visit the center's CADRE Projects and Resources (<http://www.colorado.edu/cadre/cadre-projects-and-resources/>) website for examples.

Other CU Boulder Center-Based Opportunities

REM faculty are affiliates of various centers at CU Boulder. REM students may have opportunities to gain research experience via faculty collaborations within these centers, which include:

- The Institute of Behavioral Science (<https://behavioralscience.colorado.edu/>)
- Renée Crown Wellness Institute (<https://www.colorado.edu/crowninstitute/>)

Career Opportunities

Opportunities for students with a PhD with an area of emphasis in REM include:

- University teaching and research
- Research, evaluation and testing in state departments of education and large school districts
- Research and policy analysis for think tanks like the RAND Corporation, SRI International, and federally funded regional research and development laboratories
- Measurement or statistical analysis for assessment and testing organizations such as the Educational Testing Service
- Consultation for government and education agencies

Examples of our REM graduates' careers over the past ten years:

- National Center for the Improvement of Educational Assessment (Senior Associate)
- Educational Testing Service (Research Scientist)
- Center for Assessment, Design, Research and Evaluation (Associate Director)
- SRI International (Principal Research Scientist)
- Stanford University (Assistant Professor)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1382)

Education - Doctor of Philosophy (PhD)

Overview

The School of Education offers a single major in Education. The major has seven program areas of emphasis, from which a student chooses:

- Educational Foundations, Policy and Practice
- Equity, Bilingualism and Biliteracy
- Learning Sciences and Human Development
- Literacy Studies
- Research and Evaluation Methodology
- STEM Education
- Teacher Learning, Research and Practice

Requirements

Required Courses and Credits

Students must successfully complete 56 credit hours of approved coursework, with 23 credit hours of core courses (see below) taken as a doctoral cohort during the first two years of study. Students must maintain at least a B (3.0) average with no grade lower than a B- while enrolled.

Students must complete 30 hours of dissertation credit. Students must be registered for a minimum of 5 dissertation hours per semester after successful completion of their comprehensive exam.

All PhD students are required to take the following seven courses in their first and second years:

Code	Title	Credit Hours
EDUC 8210	Perspectives on Classroom Teaching and Learning	3
EDUC 8220	Introduction to Educational Research and Policy	3
Research Methods Sequence ¹		
EDUC 8230 & EDUC 8240	Quantitative Methods I and Quantitative Methods II	6
EDUC 8250 & EDUC 8260	Qualitative Methods I and Qualitative Methods II	6
Advanced Seminar in Democracy, Diversity & Social Justice		3
Choose from the following courses in consultation with faculty advisor.		
EDUC 5015	International / Comparative Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6240	African American Education in the United States	
EDUC 6245	Latinx Education Across the Americas	
EDUC 8014	Advanced Seminar in Democracy, Diversity and Social Justice	
EDUC 8125	Seminar: Radical Education Theories	
EDUC 8615	Language Issues in Education Research	
EDUC 8620	Language and Power	

EDUC 8165	Advanced Topics in Mathematics Education ²
EDUC 8175	Advanced Topics in Science Education ²
EDUC 8358	Seminar: Human Learning ²
<hr/>	
Total Credit Hours	21

- ¹ Students may take one or both sequences in the first year, or take one sequence each year in first or second years.
- ² In some instances, particular sessions of the "special topics" courses have been accepted for this requirement; check with the Associate Dean of Students or the School of Education handbook for the most recent list of approved courses.

Program Area of Emphasis Course Distribution Requirement

Each program area of emphasis requires a one-credit, specialty seminar course to be taken both fall and spring semesters of the first year. Other requirements vary by program area of emphasis. Please consult the staff advisor and appropriate faculty for the remaining program area of emphasis course distribution requirements.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. Students who have transfer credits must complete the transfer of credit paperwork.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 12 credit hours, and is accepted only after approval of the faculty advisor and Director of Advising and Student Success. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Language Requirement

Please see the Graduate Student Handbook (<https://www.colorado.edu/education/student-life/graduate-experience/>) for more information on this requirement.

Dissertation Credit

All doctoral students must take a minimum of 30 dissertation hours (EDUC 8994 Doctoral Dissertation).

Students are allowed to take up to 10 hours prior to passing their comprehensive exam. Once students pass their comprehensive exam, they must be registered for a minimum of 5 dissertation hours every semester. Students may be registered for 3 hours if they are "off-campus" status, meaning they are not on appointment and are not taking any coursework hours.

Students must be registered for a minimum of 5 dissertation hours during the semester they defend.

Scholarly Project

All doctoral students are required to complete, at minimum, one scholarly project prior to taking the comprehensive exam. Presentations at

professional meetings, published articles, reviews, etc., are typical ways to satisfy the requirement.

Comprehensive Exam

The comprehensive exam should be taken after students have completed the majority of their coursework but prior to completion of the dissertation. The committee comprises three graduate faculty members from the School of Education, and must be approved by the Associate Dean for Students and Director of Advising and Student Success prior to the exam. Students should consult their advisors concerning the format of the comprehensive examination. The candidacy application must also be submitted at the beginning of the semester in which the exam is taken.

Committee members must receive approval from the School of Education prior to the exam. Please check the deadlines sheet for dates.

Proposal Committee

Once students have successfully passed their comprehensive exam, they should consult their faculty advisor to propose their dissertation proposal committee. The dissertation proposal committee must include at least five faculty: three of whom must be School of Education graduate faculty and one of whom must be CU Boulder campus resident graduate faculty but outside the School of Education. These members must also be approved by the graduate school prior to the proposal.

Committee members must receive approval from the School of Education prior to the exam. Please check the deadlines sheet for dates.

Dissertation Committee and Final Defense

The dissertation committee must include at least five faculty: three of whom must be School of Education graduate faculty and one of whom must be CU Boulder campus resident graduate faculty but outside the School of Education. These members must also be approved by the graduate school prior to the proposal.

After successful completion of dissertation defense, the completed dissertation must be uploaded to the graduate school according to graduate school procedures and deadlines. Please see the graduate school website for deadlines details.

Committee members must receive approval from the School of Education prior to the exam. Please check the deadlines sheet for dates.

Time Limit

The doctoral degree must be completed within six years.

Areas of Emphasis

Educational Foundations, Policy, and Practice

The Educational Foundations, Policy, and Practice (EFPP) program area of emphasis focuses on policy analysis and the application of academic disciplines—anthropology, history, law, philosophy and sociology—to the analysis of education. Programs are devoted to the critical examination of the relations among education, society, culture and government, with special emphasis on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The EFPP program area of emphasis prepares students for university faculty positions and other careers requiring deep knowledge of research.

Equity, Bilingualism, and Biliteracy

The Equity, Bilingualism, and Biliteracy (EBB) program area of emphasis stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

EBB is specifically geared to preparing researchers and leadership personnel in the field of bilingual multicultural education. Program graduates are typically employed in schools of education as faculty and/or researchers. Other graduates also serve in professional positions with state and federal education agencies, as well as local school districts.

Learning Sciences and Human Development

Faculty and students in the Learning Sciences & Human Development (LSHD) program area of emphasis study how people learn in the context of organizing for more equitable, sustainable social futures. Researchers consider how the practice of research can inform social change that can improve learning and teaching for K–12 students and their teachers, for undergraduates and the organization of higher education pathways, and in community contexts. Working in partnership with school and community partners is a key component of the approach taken to understanding educational problems and their possible solutions.

The LSHD program prepares graduate students to research and inform collective efforts to improve conditions of learning, particularly for young people from non-dominant communities and the adults (including teachers, community organizers and community members) who work with them. The program emphasizes:

- How a strong foundation in psychological perspectives on education and human development can inform efforts to improve conditions for learning in school and out of school contexts.
- The need to go beyond psychological perspectives to interpret learning and development in social, cultural and historical contexts.
- Social justice as a central concern in studying and informing efforts to improve conditions of learning.
- Humanistic approaches to research that draw on interpretive, phenomenological and social practice theories of human action.

Students work with faculty members who conduct research in a range of settings, including schools, preservice teacher education programs, after-school programs, museums, community organizations, workplaces and grassroots social movements.

Literacy Studies

The Literacy Studies program combines rigorous preparation for teaching and research in specific content areas with particular attention devoted to curriculum and instruction, cognitive and social processes, and research methodology. It prepares you for careers in research and teaching in university settings, educational leadership and services to schools, or research and development in the private or non-profit sector.

Building on the School of Education's foundational courses, we offer seminars focusing on the dynamics of literacy learning from early childhood through adulthood, examining literacy practices both in and out of school, and exploring the literacy demands associated with demographic, technological, and economic change. In our research and classes, we emphasize the centrality of literacy in promoting equitable opportunities to participate in a globalized world as citizens and workers

and to discover reading and writing as sources of personal enrichment, satisfaction and meaning.

Grounded in sociocultural, sociocognitive and critical conceptions of teaching and learning, our program highlights the interrelations among theory, research, practice and policy. Affiliated faculty across our school and campus offer courses that provide interdisciplinary perspectives, advanced methodological preparation, and further grounding in the intellectual traditions that have shaped literacy scholarship over time. Doctoral students enjoy opportunities to collaborate with faculty on a range of research projects, to engage in community outreach activities, and to work in teacher education programs emphasizing social justice and effective instructional strategies for today's diverse students.

Research and Evaluation Methodology

The Research and Evaluation Methodology (REM) program is a place for intellectually curious and motivated students who want to learn about deep research methodology with an eye toward influencing education policy and practice. The most common methodological specializations are:

- Psychometrics and educational assessment
- Applied statistics

The program is a full-time commitment, and all admitted students are supported with five years of funding, including tuition remission and a stipend for living expenses. Students participate in graduate research assistant-ships each semester and can expect to work with faculty on research projects as part of CADRE (<http://www.colorado.edu/cadre/cadre-projects-and-resources/>), the Center for Assessment, Design, Research and Evaluation.

STEM Education

The STEM Education program offers students an opportunity to build their understanding and expertise in STEM (predominantly science and mathematics) topics, with a special focus on diversity and justice in STEM education. The program helps teachers develop their content knowledge, as well as greater understanding of how learning environments can be designed to foster students' understanding of and participation in mathematics and science. Our faculty work in deep partnership with STEM faculty in other departments at CU Boulder, as well as with teachers, schools, districts, and community members. The PhD prepares students for careers in research and teaching in university settings, educational and public leadership and services to schools, or research and development in the private or non-profit sectors.

The STEM Education program is centered on and takes an interdisciplinary stance to:

- Learning beyond cognitive change towards participation in sociopolitical learning environments that involve issues of identity and power.
- Collaboration with teachers and public schools as partners in broadening and re-envisioning STEM education to include more humanizing experiences and outcomes.
- Recognition that current values and traditions of STEM disciplines need to be de-settled to expand what counts as knowing and to be a knower.
- Exploration of the generation of knowledge among learning communities of all types and the negotiation of shared visions and integrity among their members.

- Building and studying programs that engage and sustain learners and their communities through engagement in meaningful and relevant STEM questions.
- Youth empowerment and agency by drawing on scientific knowledge and practices to explore meaningful questions in their communities.

Teacher Learning, Research and Practice

The Teacher Learning, Research & Practice (TLRP) program offers a rigorous pathway for those interested in becoming teacher educators who conduct research and support the practice of teaching and teacher education. The TLRP program takes seriously this hybrid role of teacher educator as both researcher and practitioner, as well as the historical legacy of inequalities perpetuated by teacher education. This program prepares graduate students for careers as researchers and teachers in university settings with a particular emphasis on equity and justice, as educational leaders in schools and community organizations, and as researchers and developers in private and nonprofit sectors.

The TLRP program is grounded in a commitment to the practice, study, and transformation of teacher education in ways that forward and honor humanizing thinking and action. Doctoral students enjoy opportunities to work in and with the school's multiple teacher education programs and to collaborate with faculty, doctoral students, and other stakeholders (e.g., school partners; community organizations) in the critical design and study of these programs. Conducting research with members of this community provides additional opportunities to deepen understandings from coursework and to pose and pursue questions using innovative research methodologies and methods.

Teacher Leadership Program

To help teachers make a difference in their districts and communities, our innovative online Teacher Leadership program offers graduate certificates that can lead to a master's degree. Our coursework threads reflective practices, content mastery and skill development throughout so that students can practice leadership skills as they engage with the curriculum. This program is offered *entirely online* and is organized around asynchronous (course work completed at separate times) as well as synchronous formats (meeting virtually at the same time).

MA in Teacher Leadership

To earn the master's degree, students will complete three graduate certificates. Each certificate blends together on-demand, self-paced online courses with a synchronous capstone course held in the summer. These affordable certificates have been designed for educators looking to enhance their skills and capacities as classroom teachers and leaders and to make a difference in their schools and local communities. Students can choose to take classes and separately complete certificates without enrolling in the full MA program.

Graduate Certificates in Teacher Leadership

Social and Emotional Learning - Graduate Certificate

The certificate in Social and Emotional Learning provides practicing teachers with requisite background knowledge, understanding, and preparation so as to engage students in social and emotional learning. In order for teachers to enable students to become more aware and understanding of their own and others' emotions, teachers need to understand their own emotions as well.

The arena of social and emotional learning is a new, growing, and much needed public school curricular domain. During the last three decades, public schools have focused almost exclusively on cognitive academic outcomes. While some progress has been achieved, the consensus seems to be that a renewed emphasis on the whole student needs to be restored. At the same time teachers' professional work conditions have deteriorated. Teachers new to the field are leaving the profession at greater rates than in the past. Teacher "burnout" is a recognized and acknowledged public education phenomenon.

Culturally and Linguistically Diverse Education - Graduate Certificate

The certificate in Culturally and Linguistically Diverse Education will offer teachers an introduction to the history and current policy and laws that relate to emerging bilingual learners in Colorado public schools. Teachers will learn about the process of language acquisition, develop skills and strategies to teach English and adapt their curriculum and instruction to the developing needs of emerging bilingual learners, and learn key strategies for engaging diverse families in their school and classroom communities.

Leading for Change in Science Assessment Practice - Graduate Certificate

In this certificate, teachers learn how to adapt, develop and pilot assessments that elicit students' integrated understanding of disciplinary core ideas and crosscutting concepts and that connect to students' interests and identities. This certificate supports the needs of partnerships in Colorado and beyond in to develop assessment systems aligned to new science standards.

Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

The four-course certificate explores the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools. The certificate will prepare educators to lead efforts to promote compassion and dignity in schools. The certificate provides educators with supports and resources for caring for themselves and for cultivating and sustaining compassion for students, families, their school community and colleagues. The courses prioritize ways in which educators can see and feel their own daily teaching practices, struggles, constraints and joys reflected in the curriculum as well as the ways in which educators might become more compassionate teacher leaders. The compassion practices and skills embedded in the courses support district-level equity goals of creating safe and inclusive schools that challenge racism and promote justice. The certificate draws upon rigorous research, contemplative wisdom and deeply embedded lived experience of educators. The certificate was co-designed by the Crown Institute and the Compassion Institute working in collaboration with teachers, counselors and administrators.

Program Policies

This specialized program does not align with standard campus policies. Please refer to the Specialized Programs (p. 1685) section of the catalog for more information.

Program Requirements

MA in Teacher Leadership

The MA in Teacher Leadership degree requires completion of any three teacher leadership certificates (a minimum of 30 credit hours of

approved, graduate-level coursework) and a minimum cumulative grade-point average (GPA) of 3.00.

Once a student has completed three of the 10-credit online certificates that prepare them for leadership in their teaching career, they will be awarded the MA in Teacher Leadership. A comprehensive final examination is not required.

Graduate Certificates in Teacher Leadership

Each graduate certificate in teacher leadership requires 10 completed credits, as follows:

- Three two-credit asynchronous classes, taken in sequence. The two-credit asynchronous course sessions are self-paced and must be completed within a six month period. These classes must be completed two weeks before beginning a synchronous capstone in the summer.
- One four-credit synchronous class, taken in the summer. The last course for all certificates is a synchronous capstone course that brings together all the content and curriculum. This course runs as a 3-week intensive after academic school years end in May/June.

Learning Outcomes

MA in Teacher Leadership

Knowledge outcomes:

- Teachers will examine and understand the central knowledge claims within each certificate domain;
- Teachers will examine and understand the distinct instructional strategies within each certificate domain;
- Teachers will examine and understand the particular K-12 curricular content for their students' development;
- Teachers will utilize this certificate domain knowledge in the creation of a classroom, school, or community implementation plan.

Skill outcomes:

- Teachers will become acquainted with and able to convey the relevant domain's content knowledge to students, other teachers and community members;
- Teachers will become acquainted with and able to convey the distinct instructional strategies within each certificate domain to students, other teachers, and community members;
- Teachers will be able to convey the relevant K-12 curricular content to their students;
- Teachers will be able to engage other teachers and community members so as to further their understanding of and see the value of their chosen certificate domain.

Graduate Certificates in Teacher Leadership

Social and Emotional Learning - Graduate Certificate

Knowledge outcomes:

This certificate will prepare teacher leaders to:

- Examine and reflect on the role of emotions in teaching and learning;
- Know the important distinct features and curricular approaches utilized in K-12 SEL curricula; consider alternative approaches to student well-being; and
- Choose and justify the appropriate K-12 or teacher SEL programming for their setting.

Skill outcomes:

This certificate will prepare teacher leaders to:

- Know the ways in which their emotions affect their classroom interactions and educational contexts.
- Implement an existing or develop an alternative SEL curriculum for their setting.
- Identify or develop a teacher SEL approach for their setting.

Culturally and Linguistically Diverse Education - Graduate Certificate

This certificate will prepare teacher leaders to:

- Recognize and understand the cultural and linguistic differences within their classroom, school and communities.

- Analyze their own classroom as a site for second language acquisition and make appropriate adjustments.
- Use knowledge of factors affecting second language acquisition to modify instruction for multilingual students.
- Capably address the linguistic and cultural differences in classrooms in ways that build on students' linguistic and cultural diversity.
- Can assess content learning of students who are at different levels of English proficiency.

Leading for Change in Science Assessment Practice - Graduate Certificate

The certificate will prepare teacher leaders to:

- Explain the key assumptions of the vision for equitable teaching and learning in *A Framework for K-12 Science Education* to teachers and other leaders.
- Identify supports needed to help teachers make shifts to teaching and assessment to address new science standards.
- Design tasks that invite students to explain phenomena and solve problems that connect to their interests, experiences and identities.

Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

The certificate will prepare teacher leaders to:

- Consider the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools.
- Explore supports and resources for caring for themselves.
- Identify and practice skills to cultivate and sustain compassion for students, families, their school community and colleagues.
- Apply compassion tools and resources to serve as compassionate leaders in school and community settings and to address the many challenges they face in today's increasingly precarious climate.

Teacher Licensure Program

The MA+ teacher licensure program leads to a Colorado initial teaching license in Secondary (grades 7–12) Math, Science, English or Social Studies plus a master's degree in Curriculum & Instruction. This offers an efficient and experiential route to earning a master's degree with teaching licensure.

This program is for candidates who have earned a bachelor's degree from an accredited institution of higher education and want to elaborate upon and deepen the close connections between fieldwork and coursework to become a teacher. Graduate students follow a planned sequence of core courses that meet state content preparation standards, complete a master's degree and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and 7–12 school placements.

Students who successfully complete all School of Education requirements will be recommended for a Colorado initial teaching license. The teacher education programs at the University of Colorado Boulder do not prepare candidates for teacher licensure exams in states other than Colorado. For students planning to seek professional licensure or certification in a state other than Colorado, it is strongly recommended that you contact the appropriate licensing entity in the state in which you are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how the Colorado license may transfer in advance of program completion. If you will have

to take an additional course or take a different licensure exam in order to transfer your license, then your contact the correct state agency will allow you to plan for that and avoid surprises.

Program Mission & Commitments

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators who desire to invest and succeed in school. This involves noticing youth; building relationships with them; valuing their perspectives; and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion, fuel both learning and teaching.
- Teachers must design equitable learning environments in which all youth are engaged in robust and consequential learning.
- Teachers' instruction and student learning are always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matter and must be analyzed. Our language and action construct or constrain opportunities for youth to build meaningful, positive and sustained relationships to learning and one another.

Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below:

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach. The secondary teacher has knowledge of literacy and mathematics and is an expert in his or her content endorsement area(s).
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers demonstrate professionalism through ethical conduct, reflection and leadership.

Admission Requirements

To be eligible for admission to the MA+ program, applicants must meet all of the requirements below. Please note, satisfying the minimum criteria does not guarantee acceptance.

Secondary Mathematics and Secondary Science

To be considered for admission, applicants must meet the following:

- Hold a bachelor's degree from an accredited institution of higher education.
- Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area

coursework. Please note, GRE Scores are not required for the MA+ program.

- Document 25 hours of youth experience with students in grades 7–12 (12–18 years old).
- Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE, or Praxis CORE exam will also satisfy the requirement.
- Complete content coursework. If all content coursework is not completed by the start of the program, up to nine (9) semester credit hours may be completed during the program. All content coursework must be completed prior to the start of the second fall of the program, before student teaching.

Secondary English Language Arts and Secondary Social Studies

To be considered for admission, applicants must meet the following:

- Hold a bachelor's degree from an accredited institution of higher education. English Language Arts applicants must have a degree in English Literature, Ethnic Studies, Spanish Literature, or Humanities with a literature emphasis.
- Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area coursework. Please note, GRE Scores are not required for the MA+ program.
- Document 25 hours of youth experience with students in grades 7–12 (12–18 years old).
- Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.
- Complete content coursework. Applicants must complete all content coursework for their teaching area *prior* to the beginning of the Fall semester in the program. Any candidate who has not completed their content coursework by the time their program begins will be dismissed from the program or may be given the option to defer admission one year.
- Complete the appropriate, state-approved licensure exam (currently the Praxis Subject Assessments exams) for their content area prior to the beginning of the first class in the program. Any candidate that has not passed the licensure exam by the time their program begins will be dismissed from the program or may be given the option to defer admission one year.
 - Praxis English Language Arts: Content Knowledge (test code 5038)
 - Praxis Social Studies: Content Knowledge (test code 5081)

MA+ Secondary English Language Arts (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirement

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Mathematics: College-level mathematics.	3

Natural Science	3
Social Science	3
Advanced Writing: Critical or creative writing beyond the lower-division/introductory composition level.	3
Visual Communication: Includes theatre, film, or other digital media courses.	3
Literature: Must include a component of American literature, British literature, World literature (non-American/non-British literature), and Multicultural literature.	12
English and English Language Arts-related courses	30
Acceptable course work may be in communication/speech, composition, drama/ theatre, humanities, journalism, and/or literature. (May include courses from the content requirements above.)	
Recent English Language Arts coursework in the past 5 years	6

Education Course Requirements

Code	Title	Credit Hours
First Semester (Summer)		
EDUC 5001	Framing Equity and Justice in the Humanities Classroom	3

Third Semester (Spring)		
EDUC 5365	Secondary English Methods II	3
EDUC 5490	Blurring Disciplinary Lines in the Humanities	3
EDUC 4902	Student Teaching II	4
Fourth Semester (Summer)		
EDUC 5390	Professional Teaching for Equity and Justice	3
Total Credit Hours		37

Student Teaching

Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring semesters of the program. Student teaching coursework does not count towards the Master's degree.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Matriculation

Pass the state-approved licensure exam, PRAXIS English Language Arts: Content Knowledge (test code 5038).

MA+ Secondary Mathematics (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Literature & Arts	3
	Natural Science	3
	Social Science	3
	Written Communication: College-level composition or writing	3
	Calculus 1	4-5
	Calculus 2	4-5
	Linear Algebra	3
	Functions & Modeling/Analysis/Abstract Mathematics: One course in functions and modeling, analysis or topology.	3
	Geometry: One course in modern geometry.	3
	Probability & Statistics: One course in probability theory and mathematical statistics.	3
	Math or applied math coursework. Eighteen of the required 24 credit hours above must be completed at the sophomore level or higher. (May include requirements above.)	24
	Recent mathematics coursework in the past 5 years. (May include EDUC 5317.)	6

Education Course Requirements

EDUC 4712	Student Teaching: Secondary School (Must be taken with EDUC 4513.)	10
Fourth Semester		
Additional graduate credits to complete the master's degree.		9
If you have a teaching position during this semester, you only need to take one course and are able to finish the master's degree over the next academic year.		
Total Credit Hours		43

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester. Student teaching coursework does not count towards the master's degree.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to student teaching

Pass the state-approved licensure exam, PRAXIS Mathematics: Content Knowledge (test code 5161).

CU Teach Final ePortfolio: During Student Teaching

Must complete the ePortfolio, a compilation of assignments and reflections documenting your growth as learner and teacher.

MA+ Secondary Science (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Complete three of the following four content-area lab courses:		
	Biology lab	
	Earth/space science lab	
	Chemistry lab	

Physics lab	
Recent science coursework in the past 5 years	6
Students must complete 24 credit hours in one of the sections below:	24
Biology (may include courses from biology area above). Coursework must include the study of general biology, matter & energy in living systems, ecology, evolution, genetics, molecular biology, human anatomy, environmental biology and biotechnology.	
Chemistry (may include courses from chemistry area above). Coursework must include the study of analytical, inorganic, organic and physical chemistry.	
Earth/space science (may include courses from Earth/Space Science area above). Coursework must include the study of environmental science, astronomy, historical & physical geology, meteorology, oceanography, and geomorphology & earth systems.	
Environmental science. Coursework must include the study of ecology and astronomy, and 17 credit hours in biology.	
Physics (may include courses from Physics area above). Coursework must include the study of mathematics through differential equations, astronomy, atomic & nuclear, classical mechanics, electricity & magnetism, heat & thermodynamics, optics & sound, quantum mechanics, radiation & radioactivity, relativity and waves.	

Education Course Requirements

Code	Title	Credit Hours
First Semester		
EDUC 5005	Advanced Social Foundations of Education	3
EDUC 5060	Classroom Interactions	3
Complete one of the following courses:		3
EDUC/PHYS 5460	Teaching and Learning Physics	
EDUC 5822	Teaching and Learning Chemistry	
EDUC 5833	Teaching and Learning Earth Systems	
EDUC 6811	Teaching and Learning Biology	
EDUC 5580	Physics and Everyday Thinking	
Second Semester		
EDUC 6368	Adolescent Psychology and Development for Teachers	3
EDUC 5485	Differentiation in the Classroom	3
EDUC 5235	Language and Literacy Across the Curriculum	3
EDUC 5385	Problem-Based Science Instruction	4
Third Semester		
Student Teaching: Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester.		
EDUC 4513	Education and Practice (Must be taken with EDUC 4712.)	2
EDUC 4712	Student Teaching: Secondary School (Must be taken with EDUC 4513.)	10
Fourth Semester		

Additional graduate credits to complete the master's degree.	9
If you have a teaching position during this semester, you only need to take one course and are able to finish the master's degree over the next academic year.	
Total Credit Hours	43

Student Teaching

Satisfactory completion of all content and education course requirements is a prerequisite for student teaching. No other courses may be taken during the student teaching semester. Student teaching coursework does not count towards the master's degree.

- EDUC 4513 Education and Practice (2 credits). Must be taken with EDUC 4712.
- EDUC 4712 Student Teaching: Secondary School (10 credits). Must be taken with EDUC 4513.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to student teaching

Pass the state-approved licensure exam, PRAXIS General Science: Content Knowledge (test code 5435).

CU Teach Final ePortfolio: During Student Teaching

Must complete the ePortfolio, a compilation of assignments and reflections documenting your growth as learner and teacher.

MA+ Secondary Social Studies (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Literature & Arts	3
	Mathematics: College-level mathematics.	3
	Natural Science	3
	Written composition: College-level composition or writing.	3
	US History	6
	World History	6
	Economics: Must be completed in an Economics department.	3
	Political Science: Must be completed in a Political Science department.	3
	Cultural/Human Geography: Must be completed in a Geography department. Physical Geography does NOT qualify.	3
	Sociology or Social/Cultural Anthropology: Must be completed in a Sociology or Anthropology department. Physical Anthropology does NOT qualify.	3

30 credit hours of course work in one of the following disciplines: Anthropology, Economics, Ethnic Studies, Geography, History, International Affairs or Political Science. A minimum of 12 credit hours must be upper division. (May include courses from the content requirements above.)	30
Recent social studies course work in the past 5 years.	6

Education Course Requirements

Code	Title	Credit Hours
First Semester (Summer)		
EDUC 5001	Framing Equity and Justice in the Humanities Classroom	3
EDUC 5112	Educational Psychology and Adolescent Development	3
Second Semester (Fall)		
EDUC 5005	Advanced Social Foundations of Education	3
EDUC 5316	Nature of Social Studies and Social Studies Education	3
EDUC 5325	Queering Literacy in Secondary Classrooms	3
EDUC 5330	Secondary Social Studies Methods I	3
EDUC 5485	Differentiation in the Classroom	3
EDUC 4901	Student Teaching I	3
Third Semester (Spring)		
EDUC 5355	Secondary Social Studies Methods II	3
EDUC 5490	Blurring Disciplinary Lines in the Humanities	3
EDUC 4902	Student Teaching II	4
Fourth Semester (Summer)		
EDUC 5390	Professional Teaching for Equity and Justice	3
Total Credit Hours		37

Student Teaching

Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring semesters of the program. Student teaching coursework does not count towards the Master's degree.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Matriculation

Pass the state-approved licensure exam, PRAXIS Social Studies: Content Knowledge (test code 5081).

Engineering & Applied Science

The College of Engineering and Applied Science has a tradition of excellence in engineering education dating back to 1893, and we continually update and improve our programs to reflect the highest standards in teaching and learning, discovery, innovation, community and culture. We are the top-ranked engineering school in the Rocky

Mountain region with 15 baccalaureate programs and 12 graduate programs offering more than 35 degrees. Via our partnership program with Colorado Mesa University, we also offer students on the Western Slope the opportunity to earn degrees in mechanical engineering and civil engineering.

Mission & Vision

The College of Engineering & Applied Science's mission is to generate new knowledge in engineering and related fields, and to equip students from diverse backgrounds to become leaders and citizens responsible for the betterment of individuals and society. Our vision is to be a recognized world leader for excellence and innovation in engineering research and education, with an emphasis on inclusive excellence, active learning and global society.

Degree Programs

Graduate degrees are offered in the following areas:

- Aerospace engineering sciences (p. 1392)
- Architectural engineering (p. 1410)
- Chemical engineering (p. 1420)
- Civil engineering (p. 1425)
- Computer science (p. 1441)
- Creative technology and design (p. 1468)
- Electrical engineering (p. 1474)
- Engineering management (p. 1497)
- Environmental engineering (p. 1502)
- Materials science and engineering (p. 1507)
- Mechanical engineering (p. 1510)
- Technology, cybersecurity and policy (p. 1441)

Policies & Requirements

Academic Excellence

Graduate study in engineering at the University of Colorado Boulder offers a challenging, collaborative environment with exceptional possibilities. Graduate education at the College of Engineering & Applied Science involves the creation and dissemination of knowledge in many forms.

Academic Standards

Academic Policies

College of Engineering and Applied Science graduate students must abide by policies within their programs of study, college and the Graduate School policies. Students should refer to these websites often; policies, procedures and forms may be updated throughout the academic year.

Academic Integrity

Graduate students in the College of Engineering and Applied Science may be required to pass an academic integrity quiz.

See also the campuswide Academic Integrity (p. 982) and Student Conduct (p. 997) sections and the Honor Code (<http://honorcode.colorado.edu/>) website.

Academic Standing

Refer to the Graduate School (p. 980) for details.

Credit and Enrollment

Attendance and Full-Time Enrollment

While the majority of our students attend classes on the Boulder campus, many of the college's graduate degrees and certificates are available online through Boulder Connect (<http://www.colorado.edu/connect/>). Attendance and enrollment requirements are governed by Graduate School policies (<http://www.colorado.edu/graduateschool/policies/>). However, the college's individual graduate programs may have requirements that are more stringent than the Graduate School.

Credit Policies

Final Grade Appeal

Visit the college's Grade Appeal Policy (<http://www.colorado.edu/engineering-facultystaff/college-rules-policies/grade-appeal-policy/>) webpage.

Transfer Credit

Transfer credit requirements are governed by the Graduate School policies (<http://www.colorado.edu/graduateschool/policies/>). However, the college's individual graduate programs must approve the transfer credits and may have transfer credit requirements that are more stringent than the Graduate School. Refer to the individual graduate programs for specific transfer credit requirements.

Petition Policy

A student desiring a waiver of departmental and/or Graduate School policies must request and secure approval for this waiver through a petition procedure. Petitions are first presented to the student's individual graduate program for review, followed by review at the Graduate School.

Requirements

Prerequisites

To enroll for an advanced degree in any department or program in the College of Engineering and Applied Science, candidates either must have previously earned a bachelor's degree in a curriculum that includes the necessary prerequisites for that branch of engineering or must qualify for the concurrent BS and MS program. If the candidate's preliminary education was taken at another institution, the degree of qualification for advanced work is determined by the department concerned and by the dean of the Graduate School.

Graduates of engineering technology programs should note that the equivalent of a BS degree in an appropriate engineering field is required for entry into the Graduate School. Because the goals and orientation of engineering programs differ from those of technology programs, technology graduates should expect to make up deficiencies before being admitted to graduate study in engineering. Students may not be admitted to the Graduate School while making up deficiencies, but can enroll as nondegree students.

Coursework

Graduate work in each department of the College of Engineering and Applied Science falls into two classes:

1. courses that are offered for candidates who have chosen to major in the particular department, and
2. courses that are offered for candidates who have chosen their major in some other department, but who are pursuing a certificate or other complementary coursework.

Availability of Courses

All courses are not necessarily offered every year. They may only be available if there is sufficient demand.

Qualifying or Preliminary Examinations

Graduate students who plan to become candidates for the MS or PhD degree may be required to take a qualifying or preliminary examination. Individual departments should be consulted concerning the timing or requirement of this examination.

Teaching and Research Assistantships

The College of Engineering and Applied Science requires that all graduate teaching assistants and research assistants be proficient and intelligible in spoken English. In order to ensure that this is the case, all prospective teaching assistants and research assistants whose native language is not English, or others for whom the department graduate program coordinator believes that spoken language intelligibility is a concern, regardless of native language, will be tested for spoken language intelligibility prior to or at the beginning of the semester in which the teaching or research assistantship is awarded. In the event that a prospective teaching or research assistant does not demonstrate a satisfactory level of proficiency, as determined by campus assessment, that student will be required to participate in training designed to improve intelligibility.

Programs of Study

Aerospace Engineering Sciences

The aerospace program is organized around focus areas in astrodynamics and satellite navigation systems, bioastronautics, remote sensing, Earth and space sciences and aerospace engineering systems, including fluid dynamics and propulsion, automatic control, structures and mechanics of materials.

The Ann and HJ Smead Department of Aerospace Engineering Sciences (<http://www.colorado.edu/aerospace/>) at the University of Colorado Boulder is one of the top aerospace engineering departments in the nation. Aerospace engineers work on Earth and in space not only to extend frontiers, but also to better understand and preserve our terrestrial environment. Few fields offer as many exciting and diverse career opportunities: becoming an astronaut (15 graduates to date have become astronauts), designing the next generation of aircraft and spacecraft, monitoring our global habitat via remote sensing from space, *in situ* sensing with unmanned vehicles and helping to develop environmentally clean energy and transportation systems.

Aerospace graduate students often formulate degree plans on the basis of their interests and needs. Portions of the program are designed to promote our students' engineering and professional development.

Graduate students are admitted into a specific focus area that provides research advising and financial support, and sets specialized admission and program requirements with recommendations for coursework within and outside the department.

The five focus areas are:

- Astrodynamics and Satellite Navigation Systems
- Autonomous Systems
- Bioastronautics

- Fluids, Structures and Materials
- Remote Sensing, Earth and Space Sciences

Each focus area has defined the required characteristics of its successful graduates at the MS and PhD level, and defined the required and elective courses that support its educational program.

Aerospace-related research centers in the College include the Colorado Center for Astrodynamics Research, Aerospace Mechanics Research Center, the Research and Engineering Center for Unmanned Vehicles, and BioServe Space Technologies. Other research centers and institutes within the University that are involved in aerospace-related research activities are the Center for Astrophysics and Space Astronomy (CASA), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Earth Science & Observation Center (ESOC), JILA, and the Laboratory for Atmospheric and Space Physics (LASP).

Course code for this program is ASEN.

Master's Degrees

- Aerospace Engineering Sciences - Master of Science (MS) (p. 1403)
- Aerospace Engineering Sciences - Professional Master of Science (MSAES) (p. 1406)

Doctoral Degree

- Aerospace Engineering Sciences - Doctor of Philosophy (PhD) (p. 1407)

Certificates

- Astrodynamics and Satellite Navigation Systems - Graduate Certificate (p. 1408)
- Engineering Management in the Aerospace Industry - Graduate Certificate (p. 1501)
- Hypersonics - Graduate Certificate (catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/aerospace-engineering-sciences/hypersonics-graduate-certificate/)
- Radio Frequency Engineering for Aerospace - Graduate Certificate (p. 1409)
- Remote Sensing - Graduate Certificate (p. 1409)
- Satellite Systems Design - Graduate Certificate (p. 1533)
- Space Weather and Applications - Graduate Certificate (p. 1534)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Nisar R. (https://experts.colorado.edu/display/fisid_153237/)
Assistant Professor; PhD, Cornell University

Akos, Dennis M. (https://experts.colorado.edu/display/fisid_131119/)
Professor; PhD, Ohio University

Anderson, Allison P. (https://experts.colorado.edu/display/fisid_156275/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Argrow, Brian M. (https://experts.colorado.edu/display/fisid_102860/)
Professor, Chair; PhD, University of Oklahoma

Axelrad, Penina (https://experts.colorado.edu/display/fisid_100792/)
Distinguished Professor; PhD, Stanford University

Baker, Daniel N. (https://experts.colorado.edu/display/fisid_103264/)
Professor; PhD, University of Iowa

Bosanac, Natasha (https://experts.colorado.edu/display/fisid_158199/)
Assistant Professor; PhD, Purdue University

Boyd, Iain (https://experts.colorado.edu/display/fisid_165828/)
National Security Faculty Director, Professor; Ph.D., University of Southampton (England)

Brasseur, James G. (https://experts.colorado.edu/display/fisid_156801/)
Research Professor; PhD, Stanford University

Braun, Robert D. (https://experts.colorado.edu/display/fisid_158523/)
Professor; PhD, Stanford University

Braun, Robert D. (https://experts.colorado.edu/display/fisid_158523/)
Professor; Ph.D, Stanford University

Chu, Xinzhaoh (https://experts.colorado.edu/display/fisid_141893/)
Professor; PhD, Peking University (China)

Clark, Torin K. (https://experts.colorado.edu/display/fisid_155959/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Culp, Robert D.
Professor Emeritus; Ph.D., University of Colorado Boulder

Davis, Kate
Lecturer; Ph.D., University of Colorado Boulder

Doostan, Alireza (https://experts.colorado.edu/display/fisid_147382/)
Associate Professor; PhD, Johns Hopkins University

Emery, William J.
Professor Emeritus; Ph.D., University of Hawaii

Evan, Thomas (https://experts.colorado.edu/display/fisid_163895/)
Associate Professor; PhD, University of Colorado Boulder

Evans, John A. (https://experts.colorado.edu/display/fisid_152970/)
Assistant Professor; PhD, University of Texas at Austin

Farnsworth, John A. (https://experts.colorado.edu/display/fisid_153255/)
Assistant Professor; PhD, Rensselaer Polytechnic Institute

Felippa, Carlos A. (https://experts.colorado.edu/display/fisid_105701/)
Professor; PhD, University of California, Berkeley

Forbes, Jeffrey M.
Professor Emeritus, Research Professor; Ph.D., Harvard University

Frew, Eric W. (https://experts.colorado.edu/display/fisid_134685/)
Professor, Professor Adjunct, Associate Chair; PhD, Stanford University

Gates, Harvey
Associate Professor Adjunct; PhD, University of Denver

Gerren, Donna S. (https://experts.colorado.edu/display/fisid_108563/)
Teaching Professor; PhD, University of Kansas

Gremban, Keith (https://experts.colorado.edu/display/fisid_166519/)
Research Professor; Ph.D, Carnegie Mellon University

Hieb, Rick
Scholar in Residence; MS, University of Colorado

Hodgkinson, Robert F. (https://experts.colorado.edu/display/fisid_153274/)
Instructor; M.S., University of Colorado Boulder

Holzinger, Marcus J. (https://experts.colorado.edu/display/fisid_164054/)
Associate Professor, Associate Chair; PhD, University of Colorado Boulder

Hussein, Mahmoud I. (https://experts.colorado.edu/display/fisid_144300/)
Professor; PhD, University of Michigan Ann Arbor

Jackson, Jelliffe
Senior Instructor; Ph.D., University of Florida

Jansen, Kenneth E. (https://experts.colorado.edu/display/fisid_147360/)
Professor, Associate Chair; PhD, Stanford University

Johnson, Aaron W. (https://experts.colorado.edu/display/fisid_164839/)
Instructor; PhD, Massachusetts Institute of Technology

Kantha, Lakshmi H. (https://experts.colorado.edu/display/fisid_100231/)
Professor; PhD, Massachusetts Institute of Technology

Klaus, David M. (https://experts.colorado.edu/display/fisid_107103/)
Professor; PhD, University of Colorado Boulder

Knipp, Delores Jane (https://experts.colorado.edu/display/fisid_147655/)
Research Professor; PhD, University of California, Los Angeles

Koster, Jean N.
Professor Emeritus; Ph.D., University of Karlsruhe

Kubitschek, Daniel (https://experts.colorado.edu/display/fisid_144283/)
Lecturer; Ph.D., University of Colorado Boulder

Larson, Kristine M.
Professor Emerita, Research Professor; Ph.D., Scripps Institution of Oceanography

Lawrence, Dale A. (https://experts.colorado.edu/display/fisid_104057/)
Professor; PhD, Cornell University

Leben, Robert R.
Research Professor Emeritus; Ph.D., University of Colorado Boulder

Li, Xinlin (https://experts.colorado.edu/display/fisid_100016/)
Professor; PhD, Dartmouth College

Liu, Hanli
Associate Professor Adjunct; PhD, University of Michigan

Lopez Jimenez, Francisco (https://experts.colorado.edu/display/fisid_157867/)
Assistant Professor; Ph.D, California Institute of Technology

López Jiménez, Francisco (https://experts.colorado.edu/display/fisid_157867/)
Assistant Professor; PhD, California Institute of Technology

Macdonald, Robyn (https://experts.colorado.edu/display/fisid_165823/)
Assistant Professor; Ph.D., University of Illinois at Urbana-Champaign

Mah, John K. (https://experts.colorado.edu/display/fisid_164214/)
Instructor; M.S., Stanford University

Marshall, David B. (https://experts.colorado.edu/display/fisid_158629/)
Research Professor; PhD, Monash University (Australia)

Marshall, Robert A. (https://experts.colorado.edu/display/fisid_155957/)
Assistant Professor; PhD, Stanford University

Maslanik, James
Research Professor Emeritus

Matsuo, Tomoko (https://experts.colorado.edu/display/fisid_145041/)
Assistant Professor; PhD, SUNY at Stony Brook

Maute, Kurt (https://experts.colorado.edu/display/fisid_113875/)
Professor; PhD, University of Stuttgart (Germany)

McGrath, Michael T. (https://experts.colorado.edu/display/fisid_100133/)
Professor Adjunct; BS, University of Colorado Boulder

McMahon, Jay W. (https://experts.colorado.edu/display/fisid_150062/)
Assistant Professor; PhD, University of Colorado Boulder

Minton, Timothy (https://experts.colorado.edu/display/fisid_167230/)
Professor; Ph.D., University of California Berkeley

Morton, Yu Jade (https://experts.colorado.edu/display/fisid_159076/)
Professor; PhD, Pennsylvania State University

Nabity, James A. (https://experts.colorado.edu/display/fisid_153102/)
Associate Professor; PhD, University of Colorado Boulder

Neogi, Sanghamitra (https://experts.colorado.edu/display/fisid_156773/)
Assistant Professor; PhD, Pennsylvania State University

Nerem, R. Steven (https://experts.colorado.edu/display/fisid_118478/)
Professor; PhD, University of Texas at Austin

Palo, Scott E. (https://experts.colorado.edu/display/fisid_109033/)
Professor; PhD, University of Colorado Boulder

Park, Kwang-Chun
Professor Emeritus; Ph.D., Clarkson College

Rainville, Nicholas (https://experts.colorado.edu/display/fisid_164756/)
Instructor; PhD, University of Colorado Boulder

Schaub, Hanspeter (https://experts.colorado.edu/display/fisid_143818/)
Professor; PhD, Texas A&M University

Scheeres, Daniel J. (https://experts.colorado.edu/display/fisid_145035/)
Distinguished Professor; PhD, University of Michigan Ann Arbor

Schwartz, Trudy L. (https://experts.colorado.edu/display/fisid_108607/)
Senior Instructor; MS, University of Colorado Boulder

Scott, Hank
Lecturer; M.A., University of Queensland (Australia)

Singer, Howard Joseph
Professor Adjunct; PhD, University of California, Los Angeles

Sirangelo, Mark
Entrepreneur in Residence; J.D., Seton Hall University

Sternovsky, Zoltan (https://experts.colorado.edu/display/fisid_115211/)
Associate Professor; PhD, Charles University (Czech Republic)

Stodieck, Louis S. (https://experts.colorado.edu/display/fisid_105272/)
Research Professor; PhD, University of Colorado Boulder

Sunberg, Zachary
Assistant Professor; PhD, Stanford University

Thayer, Jeffrey P. (https://experts.colorado.edu/display/fisid_134469/)
Professor; PhD, University of Michigan Ann Arbor

Voss, James S. (https://experts.colorado.edu/display/fisid_140891/)
Scholar in Residence; MS, University of Colorado Boulder

Williams, Christopher (https://experts.colorado.edu/display/fisid_105765/)
Research Professor; PhD, University of Colorado Boulder

Wingate, Kathryn (https://experts.colorado.edu/display/fisid_164029/)
Instructor; PhD, University of Colorado Boulder

Zea, Luis P. (https://experts.colorado.edu/display/fisid_156131/)
Research Professor; PhD, University of Colorado Boulder

Courses

ASEN 5007 (3) Introduction to Finite Elements

Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite matrix algebra.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5010 (3) Spacecraft Attitude Dynamics and Control

Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5012 (3) Mechanics of Aerospace Structures

Applies fundamental concepts of continuum mechanics, theory of elasticity and energy methods to the analysis of structures.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5023

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites APPM 2360 and ASEN 2001 and ASEN 2003 and ASEN 3112 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5014 (3) Linear Control Systems

Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Systems and Control

ASEN 5016 (3) Space Life Sciences

Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5018 (3-6) Graduate Projects I

Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5158 or instructor consent required.

ASEN 5022 (3) Dynamics of Aerospace Structures

Applies concepts covered in undergraduate dynamics, structures and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements and dynamic stability.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5012 or ASEN 5227 or MATH 2130 or APPM 3310 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5034 (3) Stochastic Methods for Systems Engineering

Development of stochastic models used in aerospace and other systems engineering and optimization problems. Review of probability theory, stochastic models used in decision theory, random processes, queuing theory, information theory, reliability and quality control. Computer solutions required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5044 (3) Statistical Estimation for Dynamical Systems

Introduces theory and methods of statistical estimation for general linear and nonlinear dynamical systems, with emphasis on aerospace engineering applications. Major topics include: review of applied probability and statistics; optimal parameter and dynamic state estimation; theory and design of Kalman filters for linear systems; extended/unscented Kalman filters and general Bayesian filters for non-linear systems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 5047 (3) Probability and Statistics for Aerospace Engineering Sciences

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes and quality control, including software models of same.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5050 (3) Space Flight Dynamics

Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5052

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5051 (3) Fundamentals of Fluid Dynamics

Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5052 (3) Analytical Astrodynamics

Introduction to astrodynamics with an emphasis on analytical approaches. The primary subjects covered are the general solution of the 2-body problem; orbital trajectories, transfers, targeting, and time of flight; orbit perturbations and averaging analysis; and the restricted 3-body problem. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5050

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

ASEN 5053 (3) Rocket and Spacecraft Propulsion

An in depth presentation of the theory, analysis, and design of modern rocket and spacecraft propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5063 (3) Aircraft Propulsion

Designed to teach the theory, analysis and design of engines used for aircraft propulsion. Will deal with engine selection, engine performance, analysis and design of various components of modern aircraft engines, with emphasis on recent developments.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5067 (3) Microavionics & Introduction to PIC Microcontrollers for Aerospace Systems

Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. The goal of this course is to learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students "learn by doing" through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo. Previously offered as a s

ASEN 5090 (3) Introduction to Global Navigation Satellite Systems

Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 5098 (3) System Engr and Design

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5111 (3) Introduction to Aeroelasticity

Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3111 or MATH 2130 or APPM 3310 and MATH 3430 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4114

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3128 and ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Systems and Control

ASEN 5121 (3) Boundary Layers and Convection

This course presents an introduction to the principles of viscous fluid flow and methods for performing engineering calculations of quantities such as skin friction and heat transfer rates in boundary layers. The first portion of the course material will focus on basic principles of fluid mechanics. We will derive the Navier-Stokes equations and discuss some simple solutions to these equations. The second portion of the course will concentrate on the application of these principles to boundary layers. We will derive the boundary layer equations and discuss their approximate and almost exact solutions. Formerly offered as a special topics course.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors.

Recommended: Prerequisite ASEN 3111 and/or ASEN 5051.

ASEN 5122 (3) Control of Aerospace Structures 1

Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5148 (3) Spacecraft Design

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5151 (3) Compressible Flow

Provides aerodynamic theory applicable to the high speed flight of subsonic, transonic, and supersonic aircraft, and hypersonic vehicles. Topics include linear theory of subsonic and supersonic speeds, the nonlinear theories of transonic and hypersonic speeds, and compressible boundary layers.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5158 (3) Space Habitat Design

Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5168 (3) Remote Sensing Instrumentation Design

Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5188 (3) Fundamentals of Systems Engineering

Examines the disciplined processes of designing and managing complex systems over their life cycle. Requirements engineering, reliability, logistics, team leadership, testing and evaluation, maintainability and other disciplines are examined with focus on the system engineering of small spacecraft.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5210 (1) Remote Sensing Seminar

Covers subjects pertinent to remote sensing of the Earth and space, including oceanography, meteorology, vegetation monitoring, geology, geodesy and space science, with emphasis on techniques for extracting geophysical information from data from airborne and spaceborne platforms. Course requirement for Remote Sensing Certificate. Formerly ASEN 6210.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 5212 (3) Composite Structures and Materials

Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4218

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4222

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3112 and ASEN 4012 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5227 (3) Mathematics for Aerospace Engineering Sciences 1

Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5235

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite one year of calculus-based physics and math up through differential equations.

Additional Information: Departmental Category: Remote Sensing

ASEN 5245 (3) Radar and Remote Sensing

Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 5307 (3) Engineering Data Analysis Methods

Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5321 (3) Computational Fluid Dynamics Structured Grid

Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Formerly ASEN 6327.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5417 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5325 (3) Small Scale Processes in Geophysical Fluids

Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5331 (3) Computational Fluid Dynamics Unstructured Grid

Focuses on unstructured grid computational approaches to solve the Navier-Stokes equations. Assumes a basic knowledge of the solution of partial differential equations with numerical methods with focus finite element/volume methods (FEM/FVM but primarily FEM). These issues include: the discrete formulation, non-linear equation iterator, linear equation formation, boundary condition prescription and linear equation solution.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5335 (3) Aerospace Environment

Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite Senior or graduate standing in engineering or related physical sciences.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5347 (3) Math Methods in Dynamics

Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Department consent required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5417 (3) Numerical Methods in Engineering and Science

Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or Matlab.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite APPM 2360 or equivalent or instructor consent required.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4426 and ECEN 4821 and ECEN 5821

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5440 (3) Mission Design and Development for Space Sciences

Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5780

Grading Basis: Letter Grade

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5506 (1-2) Bioastronautics Seminar

Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5519 (1-3) Selected Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite varies.

Additional Information: Departmental Category: Specialized Courses

ASEN 5849 (1-6) Independent Study

Study of special projects.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 5940 (3-6) Engineering Research Internship

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6008 (3) Interplanetary Mission Design

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5050 or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6009 (1-2) Special Topics Seminar

Presents research and developments in each department's focus areas.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6010 (3) Advanced Spacecraft Dynamics and Control

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann Hamel equations) to model a hybrid rigid/flexible spacecraft system.

Requisites: Requires prerequisite course of ASEN 5010 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6011 (3) Experimental Fluid Mechanics

This course presents an intermediate level introduction into the theory and practice of performing experimental measurements in fluid mechanics. The fundamental principles and definitions associated with instrumentation, measurement procedures, data analysis, and uncertainty quantification will be discussed. A specific focus will be placed on the application of a variety of measurement techniques in low-speed aerodynamic environments. A selection of measurement techniques will be extensively studied and applied including: classical pressure and temperature measurements, thermal (hot-wire) anemometry, laser doppler anemometry, particle image velocimetry, surface and field flow visualization techniques, schlieren and shadowgraph photography techniques. Undergraduates may enroll with instructor permission. Previously offered as a special topics course.

Requisites: Requires prerequisite or corequisite course of ASEN 5051 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors.

ASEN 6013 (3) High Speed Propulsion

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 6014 (3) Spacecraft Formation Flying

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5050 or instructor consent required.

Additional Information: Departmental Category: Systems and Control

ASEN 6015 (3) Space Vehicle Guidance and Control

The course gives a comprehensive view of guidance systems used in space vehicles, and methods for analyzing the performance of these systems. The types of guidance systems that will be covered are launch vehicle ascent, intercept/rendezvous, interplanetary, orbit station-keeping, atmospheric re-entry, lander, and low-thrust. The mathematical foundation of these systems will be derived and discussed. Real world applications will be presented by reviewing selections from published literature. Course work will emphasize the analysis of the guidance system performance to achieve stated goals. Previously offered as a special topics course.

Requisites: Requires prerequisite courses of ASEN 5014 and ASEN 5050 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

ASEN 6020 (3) Optimal Trajectories

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 5050 and ASEN 5014 or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6021 (3) Viscous Flow

Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6024 (3) Nonlinear Control Systems

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov and Describing Function methods.

Requisites: Requires prerequisite course of ASEN 5014 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 6028 (3) Graduate Projects II

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5018 or ASEN 5158 or instructor consent required.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6037 (3) Turbulent Flows

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Formerly ASEN 5037.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and GEOL 6050

Requisites: Requires prerequisite course of ASEN 5335 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6055 (3) Data Assimilation & Inverse Methods for Earth & Geospace Observations

Covers a selection of topics in probability theory, spatial statistics, estimation theory, numeric optimization, and geophysical nonlinear dynamics that form the foundation of commonly used data assimilation and inverse methods in the Earth and Space Sciences. Hands-on computational homework and projects provide opportunities to apply classroom curricula to realistic examples in the context of data assimilation.

Requisites: Requires prerequisite course of ASEN 5044 (minimum grade B-). Restricted to graduate students.

Grading Basis: Letter Grade

ASEN 6060 (3) Advanced Astrodynamics

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5050 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6061 (3) Molecular Gas Dynamics and DSMC

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6070 (3) Satellite Geodesy

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6080 (3) Statistical Orbit Determination

Course on orbit and advanced estimation techniques. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination.

Requisites: Requires prerequisite course of ASEN 5044 (minimum grade D-). Restricted to Aerospace Engineering (ASEN) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5090 or instructor consent required.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5090.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 6107 (3) Nonlinear Finite Element Methods

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5007 or equivalent or instructor consent required.

Additional Information: Departmental Category: Specialized Courses

ASEN 6116 (3) Spacecraft Life Support Systems

Study the environmental control and the life support systems and technologies that keep people alive and healthy in spacecraft and habitats. Students will learn about thermal control systems, air revitalization processes, water reclamation and treatment, waste handling and the reuse of materials, and food and nutrition. Expect to develop analytical models from first principles and perform hands-on laboratory experiments. Formerly ASEN 5116.

Requisites: Requires prerequisite course of ASEN 5158 (minimum grade D-). Requires corequisite course of ASEN 5016. Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 6265 (3) Fundamentals of Spectroscopy for Optical Remote Sensing

Provides a comprehensive overview of the fundamentals of quantum physics, atomic spectroscopy, molecular spectroscopy and laser spectroscopy. Exposes students to the spectroscopy applications in modern optical and laser remote sensing. Assists students to develop the fundamental knowledge and skills for independent learning.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

ASEN 6337 (3) Remote Sensing Data Analysis

Covers some of the most commonly used machine learning techniques in remote sensing data analysis, specifically for clustering, classification, feature extraction and dimensionality reduction, and inverse methods used to retrieve geophysical information from remote sensing data. Hands-on computational homework and group and individual projects provide opportunities to apply classroom curricula to real remote sensing data.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 6365 (3) Lidar Remote Sensing

Provides a comprehensive, yet easily understandable, up-to-date understanding of lidar principles, technologies and applications. Contains approaches for quantitative lidar simulation, lidar sensitivity and error analysis, lidar data retrieval, lidar system design and performance analysis. Gives students opportunities to see and operate real state-of-the-art lidar systems and make connections to lidar experts in the nation and world.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids

Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation and numerical solutions of problems modeled as plates, shells and solids. Includes an overview of advanced variational formulations.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite introductory graduate level course in FEM and familiarity with linear algebra.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6412 (3) Uncertainty Quantification

This advanced topics course provides an exploration of techniques for representation and propagation of uncertainty in PDE/ODE-based systems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites APPM 5570 and ECEN 5612 (all minimum grade B) or equivalent courses with instructor consent.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6427 (3) Advanced Computational Fluid Dynamics

Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5417 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6517 (3) Computational Methods In Dynamics

Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5022 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite varies.

Additional Information: Departmental Category: Specialized Courses

ASEN 6800 (3) Master of Engr Project

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6849 (1-6) Independent Study

Studies special projects agreed upon by student and instructor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 6949 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Specialized Courses

ASEN 6950 (1-6) Master's Thesis

Additional Information: Departmental Category: Specialized Courses

ASEN 8990 (1-10) Doctoral Dissertation

Additional Information: Departmental Category: Specialized Courses

Aerospace Engineering Sciences - Master of Science (MS)

CU Boulder's Department of Aerospace Engineering Sciences (AES) is internationally recognized for its research and education leadership in aerospace engineering, Earth and space sciences. Its world-renowned engineers and scientists tackle challenges in aerospace technology and science, focusing on Astrodynamics and Satellite Navigation Systems (ASN); Autonomous Systems (AUT); Bioastronautics (BIO), Fluids, Structures and Materials (FSM); and Remote Sensing, Earth and Space Science (RSESS).

With more than 50 faculty members and over 550 MS and PhD students, our graduate programs prepare aerospace engineering students to meet the needs of our 21st-century society through the understanding, conception, design and application of aerial and spacecraft systems.

In the MS program we focus on hands-on, experiential learning, technical and organizational expertise, and end-to-end mission and systems perspectives via course-based degree options.

Research opportunities for MS students are very limited and are not funded. Students interested in completing an MS thesis are encouraged to take a few of our courses before deciding to pursue that route.

For more information, visit the department's

Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage and our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>).

Requirements

Program Requirements

Students must complete a total of 30 credit hours, equivalent to 10 classes, with a grade of B- or better and a cumulative GPA of at least 3.00. Of these 30 credits, at least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in Aerospace Engineering (ASEN) courses, and one approved math course. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class. Seminar credits, even those earned in other disciplines, do not count toward the MS degree.)

Up to 6 credits can be taken at the 4000 level in approved engineering, math and science departments (ECEN, CVEN, MCEN, CHEN, CSCI, ATOC, ASTR, PHYS, MCDB, APPM, MATH, CHEM, IPHY, GEOL, ENVD). ASEN courses level 4000 or below do not count towards AES graduate degrees.

Focus Area-Defined Courses

Some focus areas offer the option to take additional courses to satisfy the non-thesis option. This will represent at least an additional six credit hours with respect to the minimum requirement to obtain a MS with that focus area.

Code	Title	Credit Hours
------	-------	--------------

Required Math Course:

<i>Choose one:</i>		3
ASEN 5044	Statistical Estimation for Dynamical Systems ¹	
ASEN 5227	Mathematics for Aerospace Engineering Sciences ¹	
ASEN 5307	Engineering Data Analysis Methods	
ASEN 5417	Numerical Methods in Engineering and Science	
ASEN 5519	Selected Topics (Multi-Object Filtering Theory)	
ASEN 5519	Selected Topics (Experimental Design and Statistical Methods)	
ASEN 6412	Uncertainty Quantification	
EMEN 5005	Introduction to Applied Statistical Methods	
ECEN 5612	Random Processes for Engineers	
ECEN 5632	Theory and Application of Digital Filtering	
ECEN 5652	Detection and Extraction of Signals from Noise	
4000, 5000, 6000, or 7000 level APPM course		
4000, 5000, 6000, or 7000 level MATH course		

Choose one of the following:

Thesis Option

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the faculty advisor. The thesis topic must be related to the major field.

ASEN 6950 Master's Thesis

Non-Thesis Option (Select One)

ASEN 5018 Graduate Projects I
& ASEN 6028 and Graduate Projects II (6 credits)

Required courses leading to an approved certificate (or completion of the dual ASEN/EMP degree)

Course-only option (FSM and AUT)

¹ Can be used to meet only one ASEN curriculum-specific requirement, i.e. math or ASN core. This restriction does not apply to certificate requirements.

Please visit our Graduate Student Handbook for focus area requirements and coursework offerings. Also, visit our website (<https://www.colorado.edu/aerospace/>) for syllabi and tentative future schedules.

Astrodynamics and Satellite Navigation Systems (ASN) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/astrodynamics-satellite-navigation-systems/>)

Requirements of the MS degree in the Astrodynamics and Satellite Navigation Systems focus area are:

- Three ASN Core Classes
- One ASEN MS Course or Required course from an outside (non-ASN) AES focus area

Code	Title	Credit Hours
Core Courses		9
Choose three:		
ASEN 5010	Spacecraft Attitude Dynamics and Control	
ASEN 5044	Statistical Estimation for Dynamical Systems	
ASEN 5050 or ASEN 5052	Space Flight Dynamics Analytical Astrodynamics	
ASEN 5090	Introduction to Global Navigation Satellite Systems	
Additional Course		3
Choose one ASEN MS Course or Required course from an outside (non-ASN) AES focus area		
<i>Elective Courses Offered by ASN Focus Area</i>		
ASEN 6008	Interplanetary Mission Design	
ASEN 6010	Advanced Spacecraft Dynamics and Control	
ASEN 6014	Spacecraft Formation Flying	
ASEN 6015	Space Vehicle Guidance and Control	
ASEN 6020	Optimal Trajectories	
ASEN 6060	Advanced Astrodynamics	
ASEN 6070	Satellite Geodesy	
ASEN 6080	Statistical Orbit Determination	
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications	
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture	
ASEN 6519	Special Topics (GNSS for Remote Sensing)	
ASEN 6519	Special Topics (Celestial Mechanics & Advanced Astrodynamics)	
ASEN 6519	Special Topics (Multi-Object Detection, Tracking, and Characterization)	

Autonomous Systems (AUT) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/autonomous-systems/>)

Students are required to take one course from three of the following topic areas:

Code	Title	Credit Hours
Control Theory		
ASEN 5014	Linear Control Systems	
ASEN 6024	Nonlinear Control Systems	
Estimation and Sensor Fusion		

ASEN 5044 Statistical Estimation for Dynamical Systems

Dynamics and Modelling of Vehicles

ASEN 5519 Selected Topics (Small UAS Dynamics and Control)

ASEN 6519 Special Topics (System Identification for Control)

Autonomous Decision-Making

ASEN 5519 Selected Topics (Decision-Making Under Uncertainty)

ASEN 5519 Selected Topics (Algorithmic Motion Planning)

Programming for Embedded Systems

ASEN 5067 Microavionics & Introduction to PIC Microcontrollers for Aerospace Systems

MCEN 5115 Mechatronics and Robotics I

ECEN 5613 Embedded System Design

ECEN 5813 Principles of Embedded Software

CSCI 5302 Advanced Robotics

Elective Courses Offered by AUT Focus Area

ASEN 5114 Automatic Control Systems

ASEN 5519 Selected Topics (Machine Learning for Aerospace)

ASEN 5519 Selected Topics (Aerobotics)

ASEN 6519 Special Topics (Cooperative Control)

ASEN 6519 Special Topics (Stochastic Verification and Synthesis)

ASEN 6519 Special Topics (Hybrid Control Systems)

Bioastronautics (BIO) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/bioastronautics/>)

Students are required to take two Core courses and one course from each of the following areas:

Code	Title	Credit Hours
Core Courses		6
ASEN 5016	Space Life Sciences	3
ASEN 5158	Space Habitat Design	3
<i>Choose one:</i>		3
ASEN 5519	Selected Topics (Medicine in Space and Surface Environments)	
ASEN 6116	Spacecraft Life Support Systems	
ASEN 6519	Special Topics (Human Operation of Aerospace Vehicles)	
ASEN 6519	Special Topics (Extravehicular Activity)	
<i>Choose one:</i>		3
ASEN 5335	Aerospace Environment	
ASEN 5050 or ASEN 5052	Space Flight Dynamics Analytical Astrodynamics	
ASEN 5053	Rocket and Spacecraft Propulsion	
Elective Courses Offered by BIO Focus Area		
ASEN 5519	Selected Topics (Experimental Design and Statistical Methods)	
ASEN 5519	Selected Topics (Medicine in Space and Surface Environments)	

ASEN 6116	Spacecraft Life Support Systems
ASEN 5849	Independent Study
ASEN 6519	Special Topics (Extravehicular Activity)
ASEN 6519	Special Topics (Human Operation of Aerospace Vehicles)
ASEN 6849	Independent Study

Fluids, Structures and Materials (FSM) (<https://www.colorado.edu/aerospace/academics/graduates/curriculum/fluids-structures-and-materials/>)

Requirements of the MS degree in the Fluids, Structures and Materials (FSM) focus area are:

- Two Core Classes in your chosen track, and one Core course in the other FSM track.
- Two electives from the FSM focus area, with at least one in your chosen track. (See Graduate Handbook for detailed listing.)
- Attending 50% of the “Fluid, Structures and Materials” seminars each semester.

Code	Title	Credit Hours
Core Courses		
<i>Fluids Sub-Track</i>		
ASEN 5051	Fundamentals of Fluid Dynamics	
ASEN 5151	Compressible Flow	
ASEN 6037	Turbulent Flows	
<i>Structures and Materials Sub-Track</i>		
ASEN 5007	Introduction to Finite Elements	
ASEN 5012	Mechanics of Aerospace Structures	
ASEN 5022	Dynamics of Aerospace Structures	
Elective Courses Approved by FSM Focus Area		
<i>Fluids</i>		
ASEN 5053	Rocket and Spacecraft Propulsion	
ASEN 5063	Aircraft Propulsion	
ASEN 5121	Boundary Layers and Convection	
ASEN 5519	Selected Topics (Introduction to Hypersonics)	
ASEN 5321	Computational Fluid Dynamics Structured Grid	
ASEN 5331	Computational Fluid Dynamics Unstructured Grid	
ASEN 6011	Experimental Fluid Mechanics	
ASEN 6061	Molecular Gas Dynamics and DSMC	
ASEN 6519	Special Topics (Advanced Turbulence Simulation)	
ASEN 6519	Special Topics (Flow Control)	
ASEN 6519	Special Topics (Stabilized and Multiscale Finite Element Methods)	
ASEN 6519	Special Topics (Mathematical Foundations of Finite Element Analysis)	
ASEN 6519	Special Topics (Isogeometric Analysis)	
MCEN 5022	Classical Thermodynamics	
MCEN 5042	Heat Transfer	
MCEN 5151	Flow Visualization	
MCEN 5152	Introduction to Combustion	

MCEN 6001	Reacting Flows
<i>Structures and Materials</i>	
ASEN 5111	Introduction to Aeroelasticity
ASEN 5148	Spacecraft Design
ASEN 5188	Fundamentals of Systems Engineering
ASEN 5218	Large Space Structures Design
ASEN 5519	Selected Topics (Design Optimization in Aerospace Systems)
ASEN 5519	Selected Topics (Introduction to Phononics)
ASEN 5519	Selected Topics (Inverse Methods)
ASEN 5519	Selected Topics (Deployable and Lightweight Structures)
ASEN 6107	Nonlinear Finite Element Methods
ASEN 6367	Advanced Finite Element Methods for Plates, Shells, and Solids
ASEN 6412	Uncertainty Quantification
ASEN 6519	Special Topics (Isogeometric Analysis)
ASEN 6519	Special Topics (Mathematical Foundations of Finite Element Analysis)
ASEN 6519	Special Topics (Molecular Dynamics)
CVEN 5161	Advanced Mechanics of Materials I
CVEN 6161	Advanced Mechanics of Materials 2
CVEN 7141	Plates and Shells
CVEN 7511	Computational Finite Inelasticity and Multiphase Mechanics
MCEN 5044	Mechanical Behavior of Materials
MCEN 5228	Special Topics in Mechanical Engineering (Mechanics of Composite Materials)
MCEN 5228	Special Topics in Mechanical Engineering (Mechanics of Soft Materials)

Remote Sensing, Earth and Space Science (RSESS) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/remote-sensing-earth-space-sciences/>)

Note that MS students using the Remote Sensing Certificate for their degree requirements in lieu of an MS thesis or two semester graduate projects may count a maximum of 2 of the 4 required RSESS focus area courses toward the certificate requirement.

Code	Title	Credit Hours
Data or Numerical Analysis Methods Primary Courses		
Choose one:		3
ASEN 5307	Engineering Data Analysis Methods

ASEN 5051	Fundamentals of Fluid Dynamics	
ASEN 5148	Spacecraft Design	
ASEN 6070	Satellite Geodesy	
Total Credit Hours		12

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one to two years.

Dual Degree Program

MS in Aerospace Engineering Sciences and ME in Engineering Management

Students may complement their aerospace engineering master's degree with a Master of Engineering (ME) in Engineering Management. To complete the Aerospace Engineering and Engineering Management dual

degree program, students must be admitted to Aerospace Engineering first, and apply to Engineering Management afterwards.

Requirements

The dual degree consists of 45 credits: 24 credits based on Aerospace Engineering requirements and 21 based on Engineering Management requirements, as detailed below.

For more information, visit the Engineering Management Program's MS Aerospace Engineering Sciences & ME Engineering Management (<http://www.colorado.edu/emp/programs/graduate-program/dual-degree-program/ms-aerospace-engineering-sciences-me-engineering/>) webpage.

Aerospace Engineering

At least 24 credits at the 5000 level or above:

- At least 18 credits in Aerospace Engineering (ASEN) courses. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class).
- One approved math course (3 credits)
- Professional MS students do not follow focus area-specific requirements and do not require the completion of a certificate, graduate projects or MS thesis
- Traditional MS students:
 - Completion of an approved certificate, graduate projects (6 credits) or MS thesis (6 MS thesis credits)
 - Fulfill focus area-specific requirements

Review our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>) for details on focus area requirements, GPA and grade minimums, and other information.

Engineering Management

Students must complete at least 21 credits. Visit the Engineering Management website (<https://www.colorado.edu/emp/current-students/graduate-programs/dual-graduate-degree/>) for details.

Aerospace Engineering Sciences - Professional Master of Science (MSAES)

A professional master's degree (MSAES) in aerospace engineering sciences from CU Boulder is designed for working engineers and people planning to pursue a career in industry. We designed the program with industry partners to meet your needs, further your career and with your location in mind—the degree can be earned on campus or 100 percent online.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage.

Requirements

Program Requirements

Students must complete a total of 30 credit hours, equivalent to 10 classes, with a grade of B- or better and a cumulative GPA of at least 3.00. Of these 30 credits, at least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in Aerospace Engineering (ASEN) courses, and one approved math course. (Note: EMEN 5405 Fundamentals of Systems Engineering

counts as an ASEN class. Seminar credits, even those earned in other disciplines, do not count toward the MS degree.)

Up to 6 credits can be taken at the 4000 level in approved engineering, math and science departments (ECEN, CVEN, MCEN, CHEN, CSCI, ATOC, ASTR, PHYS, MCDB, APPM, MATH, CHEM, IPHY, GEOL, ENVD). ASEN courses level 4000 or below do not count towards AES graduate degrees.

Select a 4000, 5000, 6000, or 7000 level APPM course		
Additional Coursework		9
Total Credit Hours		30

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework.

Aerospace Engineering Sciences - Doctor of Philosophy (PhD)

Students typically complete their PhD in aerospace engineering sciences within 4 to 6 years, depending on whether they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program without a master's degree.

The primary focus of a PhD student is to perform novel research guided by their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. PhD students are supported through research and teaching assistantships and are also encouraged to apply for their own source of funding.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage.

Requirements

Course Requirements

- A minimum of 30 credit hours of courses numbered 5000 or above (at least 15 of these must be in ASEN) with a minimum of 3.25 GPA.
- 30 credit hours of dissertation credit are required for the degree.
- A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a PhD degree if approved by the graduate committee of the department and the Graduate School.
- All courses taken for the master's degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the university.
- The formal coursework must include a minimum of 15 credit hours of courses or their equivalent in aerospace engineering sciences.

Preliminary Examination

Students must pass a preliminary examination by no later than the end of the third semester if the student already has an aerospace master's degree upon entry to the program, or the fifth semester if the student does not have an aerospace master's degree. The exam is administered by a committee consisting of three regular or research aerospace faculty members, two of whom must be from the student's main focus and the third from a secondary focus area. The exam will include a written and an oral element, as determined, prepared, and evaluated by the exam committee.

Comprehensive Examination

By no later than the fifth or seventh semester, students must also pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This should be preceded by individual examinations or interviews, either written or oral or both, by every committee member. The oral examination before the committee is based primarily on a written proposal for the thesis research provided by the student to committee members in advance.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Astrodynamics and Satellite Navigation Systems - Graduate Certificate

The Astrodynamics and Satellite Navigation Systems Certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in Astrodynamics and Satellite Navigation (ASN). It is essentially a

specialization of the AES MS degree in the ASN focus area, with additional requirements for breadth and depth. The certificate will make students more desirable to future employers looking for astrodynamics and satellite navigation specialists.

This certificate is available to degree-seeking and non-matriculated students. For the latter, please visit Continuing Education (<https://ce.colorado.edu/programs/access/>) to learn more about enrollment and costs. Additional certificate information can be found in the department's Astrodynamics and Satellite Navigation Systems Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/asn-certificate/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Completed undergraduate degree from an institution accredited by and agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra, and differential equations, two semesters of undergraduate calculus-based physics, and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Submission of application form. Please visit the AES Certificates Page (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) for more details.
- For Continuing Education (non-matriculated) students, enrollment permission from teaching faculty for each course to take.

We are not able to evaluate transcripts or offer advice on remedial coursework. Please use our Undergraduate Curriculum (<https://www.colorado.edu/aerospace/current-students/undergraduates/curriculum/>) and Course Syllabi (<https://www.colorado.edu/aerospace/current-students/course-syllabi/>) as reference. Courses from already awarded degrees cannot be used to fulfill certificate requirements.

Certificate Requirements

Complete all four core area subjects in ASN, plus two advanced ASN courses of the student's choosing (18 credit hours)

Code	Title	Credit Hours
Core Requirements ¹		
ASEN 5010	Spacecraft Attitude Dynamics and Control	3
ASEN 5050	Space Flight Dynamics ²	3
ASEN 5044	Statistical Estimation for Dynamical Systems ³	3
ASEN 5090	Introduction to Global Navigation Satellite Systems	3
Advanced Requirements		
<i>Select any two 6000-level ASN courses, including but not limited to:</i>		6
ASEN 6008	Interplanetary Mission Design	

ASEN 6010	Advanced Spacecraft Dynamics and Control	
ASEN 6014	Spacecraft Formation Flying	
ASEN 6020	Optimal Trajectories	
ASEN 6060	Advanced Astrodynamics	
ASEN 6070	Satellite Geodesy	
ASEN 6080	Statistical Orbit Determination	
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications	
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture	
ASEN 6519	Special Topics ⁴	
Total Credit Hours		18

¹ Any core requirement can be satisfied by taking an additional 6000-level course which has the corresponding core requirement as a prerequisite. *This substitution does not require a petition.*

² This requirement can be satisfied by taking ASEN 5055 Analytical Astrodynamics or an additional 6000-level course that has ASEN 5050 as a prerequisite.

³ Taking ASEN 5044 as part of the certificate requirement does not preclude it counting as a math course to satisfy the MS or PhD requirement.

⁴ Topics include GNSS for Remote Sensing, Celestial Mechanics & Advanced Astrodynamics, and Multi-Object Detection, Tracking, and Characterization.

Radio Frequency Engineering for Aerospace - Graduate Certificate

A joint certificate program between Smead Aerospace and the Department of Electrical, Computer & Energy Engineering. This certificate fills an industry need in Colorado and beyond for cross disciplinary graduate level education in aerospace and electrical engineering.

The program is open to new and current degree-seeking Aerospace Engineering Sciences (AES) and Electrical, Computer and Energy Engineering (ECEE) students. This certificate is not available to non-matriculated students.

Additional certificate information can be found in the department's Radio Frequency Engineering for Aerospace Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/radio-frequency-engineering-aerospace/>) page.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Be a matriculated graduate student in the AES or ECEE departments
- Submission of application form. Please visit the AES Certificates Page (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) for more details

This certificate is co-managed by AES and ECEE. Students must follow the rules and policies of each department. Courses from already awarded degrees cannot be used to fulfill certificate requirements.

Certificate Requirements

Code	Title	Credit Hours
Required Courses		
ECEN 5134	Electromagnetic Radiation and Antennas ¹	3
or ECEN 5104	Passive Microwave Circuits	
ECEN 5634	Microwave and RF Laboratory	3
ASEN 5090	Introduction to Global Navigation Satellite Systems	3
Choose one of the courses below, depending on major:		3
ASEN 5148	Spacecraft Design (required for ECEE majors)	
ECEN 3410	Electromagnetic Waves and Transmission (required for AES majors)	
Elective Courses		
Choose two:		6
ECEN 5134	Electromagnetic Radiation and Antennas ²	
or ECEN 5104	Passive Microwave Circuits	
ECEN 5114	Advanced Electromagnetics	
ECEN 5154	Computational Electromagnetics	
ASEN 5245	Radar and Remote Sensing	
AES Grad Projects ³		
Total Credit Hours		18

¹ For students interested in taking both courses, one course can count as a requirement and one course can count as an elective. A single course cannot count as both a required course and an elective course, simultaneously.

² As an elective, choose whichever course *not* taken as a requirement.

³ Approved radio frequency project; can only count for one elective.

Remote Sensing - Graduate Certificate

Remote sensing (satellite and ground-based) is increasingly being used as a technique to probe the Earth's atmosphere, ocean, and land surfaces. Probing of other planets is accomplished largely by satellite remote sensing. Given national priorities in such areas as climate and global change, the interest in remote sensing will only increase with time. Graduate students, research staff and faculty work on a wide variety of topics ranging from the theory of remote sensing, to instrument development and application.

This certificate is available to degree-seeking and non-matriculated students. For the latter, please visit Continuing Education (<https://ce.colorado.edu/programs/access/>) to learn more about enrollment and costs. Additional certificate information can be found in the department's Remote Sensing Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/remote-sensing-certificate/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Completed undergraduate degree from an institution accredited by and agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra, and differential equations, two semesters of undergraduate calculus-based physics, and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Submission of application form. Please visit the AES Certificates Page (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) for more details.
- For Continuing Education (non-matriculated) students, enrollment permission from teaching faculty for each course to take.

We are not able to evaluate transcripts or offer advice on remedial coursework. Please use our Undergraduate Curriculum (<https://www.colorado.edu/aerospace/current-students/undergraduates/curriculum/>) and Course Syllabi (<https://www.colorado.edu/aerospace/current-students/course-syllabi/>) as reference. Courses from already awarded degrees cannot be used to fulfill certificate requirements.

Certificate Requirements

The Remote Sensing Certificate (<http://www.colorado.edu/aerospace/current-students/graduates/curriculum/remote-sensing-earth-space-science/remote-sensing-certificate/>) will be awarded based on a written request by the student to the Remote Sensing Earth Space Science Focus Lead or Graduate Chair, provided that the following requirements have been met:

1. Four courses are required totaling at least 12 credits, with grades of B or better.
2. Two courses from one of the following topical areas:
 - a. Data Analysis
 - b. Instrumentation and Measurement Techniques
 - c. Remote Sensing Theory
3. One course in each of the two remaining topical areas.
4. At least one semester of Remote Sensing Seminar (currently listed as ASEN 5210 and ATOC 7500), offered each year in the fall semester.

Code	Title	Credit Hours
Data Analysis Courses		
ASEN 5307	Engineering Data Analysis Methods	3
ASEN 6337	Remote Sensing Data Analysis	3
ASTR 5550	Observations, Data Analysis and Statistics	3
ECEN 5244	Stochastic / Environmental Signal Processing	3
ECEN 5254	Remote Sensing Signals and Systems	3
ECEN 5612	Random Processes for Engineers	3
ECEN 5652	Detection and Extraction of Signals from Noise	3

GEOG 5103	Geographic Information Science: Spatial Analytics	4
GEOG 5203	Geographic Information Science: Spatial Modeling	4
GEOG 5303	Geographic Information Science: Spatial Programming	4

Code	Title	Credit Hours
------	-------	--------------

Instrumentation & Measurement Techniques Courses

ASEN 5168	Remote Sensing Instrumentation Design	3
ASEN 5245	Radar and Remote Sensing	3
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture	3
ASEN 6365	Lidar Remote Sensing	3
ASTR 5760	Astrophysical Instrumentation	3
ECEN 5134	Electromagnetic Radiation and Antennas	3
PHYS 5160	Fundamentals of Optics and Lasers	3
ASEN 6050	Space Instrumentation	3
GEOG 5100	Special Topics: Geography	1-4

Code	Title	Credit Hours

Remote Sensing Theory Courses

ASEN 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
ASEN 6265	Fundamentals of Spectroscopy for Optical Remote Sensing	3
ATOC 5560	Radiative Processes in Planetary Atmospheres	3
ECEN 5264	Electromagnetic Absorption, Scattering, and Propagation	3
GEOG 5093	Remote Sensing of the Environment	4
GEOG 5100	Special Topics: Geography	1-4
PHYS 5150	Introductory Plasma Physics	3

For more information about the certificate, please contact the aerospace engineering sciences graduate advisor at aerograd@colorado.edu, or visit the certificate webpage (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>).

Architectural Engineering

Architectural engineering focuses on the design, construction and operation of buildings and the integration of their systems. The department offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees in architectural engineering with a study emphasis in (1) building energy, (2) illumination, (3) materials and resources, and (4) construction engineering and management.

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>). The Graduate Record Examination (GRE), consisting of the aptitude tests and advanced test in engineering, is used to evaluate MS and PhD candidates. Candidates who submit GRE scores are more likely considered for financial assistance.

Course code for this program is AREN.

Research Interests and Facilities

The Larson HVAC Laboratory has been a staple of the University of Colorado's building energy research activities and AREN program education. The laboratory has been the stepping stone for fundamental and applied research in building energy efficiency, energy controls, thermal comfort and indoor air quality. The newly renovated Larson HVAC Laboratory provides a unique facility that permits the evaluation of entire systems in a controlled dynamic environment, providing repeatable test conditions. The laboratory has been recently redesigned to allow maximum flexibility in conducting a wide variety of research and testing procedures. In particular, both the HVAC and control systems in the laboratory are reconfigurable in that components, subsystems or entire systems can be readily installed and tested. For instance, the performance of air handling units, displacement ventilation units, chilled beams and variable refrigerant flow units can be tested. In addition, coils, air mixers, dampers, filters and variable frequency drives can be evaluated. Moreover, the laboratory offers the possibility to test standalone HVAC and refrigeration systems including water heaters, boilers, thermal energy storage tanks and chillers.

The Lighting Laboratory is a learning and research space for lighting students in the AREN program. The lab has a dynamic ceiling with adjustable height to allow a wide range of academic and research exploration. Although the lab has a full-wall, with north-facing windows, there are blackout curtains installed to eliminate any undesirable external light. In addition, this lab houses a goniophotometer used to measure the intensity of light leaving a luminaire at various vertical and horizontal angles. The measured data allow establishing photometric light distribution of the luminaire and metrics such as total lumen output, luminaire luminance and zonal lumen summary. The lab also houses a small lighting sphere, which allows testing of lumen output of LED luminaires and LED chips. In addition, the lighting lab includes a studio space used primarily for lighting research. The lab has an extensive aluminum open ceiling grid that allows for quick electrical and physical connection of light sources and luminaires for research. For lighting design-oriented classes, students have access to theatrical-type and programmable color-changing luminaires to do mock-ups and study lighting effects.

The AREN laboratories offer state-of-the-art facilities to test a wide range of operational and control strategies for lighting and HVAC systems and subsystems. Indeed, several control projects have been carried out in the Larson HVAC laboratory including demand-ventilation controls, optimal chiller and thermal energy storage controls, outdoor air intake controls, and optimal operation of evaporative systems. In addition, fault diagnostic algorithms have been tested in the laboratory for specific HVAC equipment including for heating and cooling coils, chillers and outdoor air intake dampers.

Master's Degrees

- Architectural Engineering - Master of Science (MS) (p. 1415)

Doctoral Degree

- Architectural Engineering - Doctor of Philosophy (PhD) (p. 1416)

Certificate

- Architectural Lighting - Graduate Certificate (catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-

[study/engineering-applied-science/architectural-lighting-graduate-certificate/](https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-))

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Amadei, Bernard (https://experts.colorado.edu/display/fisid_105978/)
Distinguished Professor; PhD, University of California, Berkeley

Amy, Gary L.
Professor Emeritus

Balaji, Rajagopalan (https://experts.colorado.edu/display/fisid_118480/)
Professor, Chair; PhD, Utah State University

Professor; PhD, University of Colorado Boulder

Zuo, Wangda (https://experts.colorado.edu/display/fisid_159550/)

Associate Professor, Faculty Fellow; PhD, Purdue University

Courses

AREN 5001 (3) Building Energy Systems: Thermal, Electrical & Lighting Sys

Prepares graduate students with general knowledge and skills that are required by advanced AREN technical courses. Covers three parts of materials: 1) building thermal systems, 2) building lighting systems, 3) building electrical systems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Building Systems Engineering

AREN 5010 (3) Energy System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4010

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 4140.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings.

Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5050 (3) Advanced Solar Design

Predicts performance and analyzes economics of low-temperature, high-temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5060 (3) Distributed Electricity Generation

Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Building Systems Engineering

AREN 5070 (3) Thermal Analysis of Buildings

Examines response factors, conduction transfer functions and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal gains and infiltration analysis as modeled in hourly simulations. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure.

Requisites: Requires prerequisite course of AREN 4110 or AREN 5110 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5110 (3-4) HVAC System Design

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4110

Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5130 (3) Optical Design for Illumination and Solid State Lighting

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4130

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3540.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5510 (3) Architectural Lighting I

Teaches the fundamentals of architectural lighting systems and the human responses to those systems. Describes the properties of light sources, how light interacts with architectural elements, and how light affects human visual and non-visual responses. Provides a broad overview of the holistic effects of light on building occupants, as well as the implications for building energy use and sustainability. Previously offered as a special topics course.

Requisites: Restricted to non-degree (NDGR) graduate students only.

AREN 5520 (3) Architectural Lighting II

Builds on the fundamentals taught in AREN 5500 with a detailed look at how technical information about lighting systems can be used for design concepts and analyses. Provides an examination of daylighting in buildings. Describes the latest research and design standards for color rendering, glare, flicker, circadian rhythms, and alerting effects. Concludes by considering case studies of various project types.

Requisites: Open to Non-degree, Non sponsored Students only.

AREN 5530 (3) Architectural Lighting Capstone

Concludes the nine-credit Professional Graduate Certificate in Architectural Lighting with an immersive hands-on experience. Concepts learned in the two prior online courses will be demonstrated and experienced using facilities and equipment available on the CU Boulder campus. A culminating, comprehensive project submittal that includes content developed during the entire three-course sequence will be submitted following the on-campus experience.

Requisites: Requires prerequisite courses of AREN 5510 and AREN 5520 (all minimum grade C-). Restricted to non-degree (NDGR) graduate students only.

AREN 5540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4540

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites AREN 3540 and AREN 4550.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4570

Requisites: Requires prerequisite course of AREN 5001 (minimum grade D-).

Recommended: Prerequisite AREN 3030.

AREN 5580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

AREN 5620 (3) Adaptive Lighting Systems

Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4620

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4550 (minimum grade D-).

Recommended: Prerequisite AREN 4130.

AREN 5650 (3) Forensic Engineering

Identify and explore the physical, chemical, mechanical, and biological deterioration mechanisms in the most common construction materials; concrete, masonry, metals, wood, polymers, and fiber-reinforced composites. Course topics include an introduction to failure analysis; materials science; ion diffusion; electrochemistry (corrosion); fracture, fatigue, and creep; and diagnostic, retrofit, and rehabilitation strategies for extended service life.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

AREN 5660 (3) Embodied Carbon in Buildings

Introduces students to whole building life cycle assessment (LCA) and embodied carbon in buildings. Topics include LCA methodologies, whole-building LCA tools, materials science of low-carbon and carbon-storing building materials, and strategies for reducing embodied carbon.

Requisites: Restricted to graduate students only, or BAM students with C-AREN, C-CVEN, or C-ARENCVEN subplan.

AREN 5830 (1-3) Architectural Engineering Special Topic

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

AREN 5849 (1-3) Independent Study in Architectural Engineering

The topics and the goals of this course are tailored to fit the needs of the student in various areas related to the Architectural Engineering program. These topics and goals, documented in the course agreement form at the start of the semester, include but are not limited to areas of building energy engineering, building illumination systems, construction engineering and management, building materials and resources, and building electrical systems.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

AREN 5890 (3) Sustainable Building Design

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4890

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4990

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites AREN 2120 and APPM 2360.

Additional Information: Departmental Category: Building Systems Engineering

AREN 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Building Systems Engineering

AREN 6950 (1-6) Master's Thesis

Additional Information: Departmental Category: Building Systems Engineering

AREN 6960 (1-3) Master's Report

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Building Systems Engineering

AREN 8990 (1-10) Doctoral Dissertation

A minimum of 30 credit hours is required.

Additional Information: Departmental Category: Building Systems Engineering

Architectural Engineering - Master of Science (MS)

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a Master of Science degree with study emphases in several major areas:

- building systems engineering
- construction engineering and management
- global engineering

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Architectural Engineering - Bachelor of Science (BS) (p. 735)

Requirements

For a Master of Science (MS) degree in architectural engineering, students may undertake Plan I (with a thesis) or Plan II (with a project).

Up to 6 credits of independent study may be taken, where an individual course of study is worked out between the student and a faculty member. Up to 9 credits of graduate courses can be transferred from another institution. Students are allowed up to 6 credits in total of non-technical coursework for the MS/PhD degree.

Degree Plans

Plan I: Thesis Option

Plan I requires 24 credits of coursework, plus 6 credits of thesis work. The thesis is a formal research report that discusses an organized research topic. Experience has shown that it takes a student from 24 to 30 months to complete this plan. Financial support is generally limited to exceptionally well-qualified students selecting Plan I.

Plan II: Non-Thesis Option

Plan II requires 27 credits of coursework, plus 3 credits of MS project work. The 3-credit Master's Report (AREN 6960) is related to an applied research AREN topic. It can be successfully completed in 18–24 months by a diligent student. Note that one-half of the coursework must be taken in the CEAE Department (an exception may be made if the relevant courses were taken as part of an undergraduate degree).

With the approval of the advisor, non-CEAE courses at the 4000 level may be used for graduate credit up to a maximum of 6 credits.

Course Requirements

Courses offered in the architectural engineering graduate program may be separated into four tracks, one specific to the Construction Engineering & Management discipline and three related to the Building Systems Engineering discipline. Students may decide to concentrate in one of these track areas, or they may wish to take a broad selection from the courses; there is no requirement for picking any specific track under the general track option.

Code	Title	Credit Hours
Required Core Courses		
AREN 5001	Building Energy Systems: Thermal, Electrical & Lighting Sys	3
Electives (Varies by Plan)		6-9
<i>Building Energy Engineering Track</i>		
Select 15 credits from the following:		15
AREN 5010	Energy System Modeling and Control	
AREN 5110	HVAC System Design	
AREN 5060	Distributed Electricity Generation	
AREN 5080	Computer Simulation of Building Energy Systems	
AREN 5830	Architectural Engineering Special Topic (Building Electrical Systems)	
AREN 5020	Building Energy Audits	
AREN 5890	Sustainable Building Design	
AREN 5830	Architectural Engineering Special Topic (Applied Data Analysis & Modeling)	
AREN 5830	Architectural Engineering Special Topic (CFD of Buildings & Environment)	

AREN 5830	Architectural Engineering Special Topic (Grid Connected Systems)	
AREN 5830	Architectural Engineering Special Topic (Modeling and Simulation of Community Energy Systems)	
<i>Illumination Engineering Track</i>		
Select 15 credits from the following:		15
AREN 5830	Architectural Engineering Special Topic (Illumination 2)	
AREN 5830	Architectural Engineering Special Topic (Luminous Radiative Transfer)	
AREN 5830	Architectural Engineering Special Topic (Daylighting)	
AREN 5830	Architectural Engineering Special Topic (Advanced Lighting Design)	
<i>Materials and Resources Track</i>		
Select 15 credits from the following:		15
CVEN 5830	Special Topics for Seniors/Grads (Forensic Engineering)	
CVEN 5835	Special Topics for Seniors/Grads (Design of Wood Structures)	
CVEN 5835	Special Topics for Seniors/Grads (Design of Masonry Structures)	
CVEN 5830	Special Topics for Seniors/Grads (Sustainable Materials & Structures)	
CVEN 5831	Special Topics (Construction Materials)	
CVEN 5565	Life-Cycle Engineering of Civil Infrastructure Systems	
<i>Construction Engineering & Management Track</i>		
Select 15 credits from the following:		15
CVEN 5836	Special Topics for Seniors/Grads (Construction Engineering and Management Fundamentals)	
CVEN 5246	Legal Aspects of Construction	
CVEN 5276	Engineering Risk and Decision Analysis	
CVEN 5226	Construction Safety	
CVEN 5286	Design Construction Operations	
CVEN 5836	Special Topics for Seniors/Grads (BIM for Construction)	
CVEN 5346	Managing Construction and Engineering Projects and Organizations	

Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering program (p. 1440) must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

Architectural Engineering - Doctor of Philosophy (PhD)

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a PhD degree with study emphases in several major areas:

- building systems engineering
- construction engineering and management
- engineering for developing communities

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

Requirements

Course Requirements

For a Doctor of Philosophy degree (PhD) in architectural engineering, students need at least 30 hours of graduate-level coursework plus a dissertation.

Courses offered in the architectural engineering graduate program may be separated into four tracks, one specific to the Construction Engineering & Management discipline and three related to the Building Systems Engineering discipline. Students may decide to concentrate in one of these track areas, or they may wish to take a broad selection from the courses; there is no requirement for picking any specific track under the general track option.

CVEN 5835	Special Topics for Seniors/Grads (Design of Wood Structures)
CVEN 5835	Special Topics for Seniors/Grads (Design of Masonry Structures)

Construction Engineering & Management Track

Select 15 credits from the following:

CVEN 5226	Construction Safety
CVEN 5246	Legal Aspects of Construction
CVEN 5276	Engineering Risk and Decision Analysis
CVEN 5286	Design Construction Operations
CVEN 5346	Managing Construction and Engineering Projects and Organizations
CVEN 5836	Special Topics for Seniors/Grads (BIM for Construction)
CVEN 5836	Special Topics for Seniors/Grads (Construction Engineering and Management Fundamentals)

Residency Requirements

For an entrant from another university, up to 21 hours of acceptable graduate courses may be transferred, leaving at least 9 hours of coursework to be completed at the University of Colorado upon the approval of their advisors. The transfer credits are transferable at the discretion of the research advisor, and students may be asked to take additional courses toward the completion of their degree. Work already applied toward a graduate degree received from the University of Colorado or another institution cannot be accepted for transfer toward another graduate degree of the same level at the University of Colorado. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

For students already in the MS program in the CEAE department, 30 hours of graduate coursework performed at CU is applicable towards the PhD degree upon the approval of their advisors. The PhD also requires that 30 hours of dissertation credit be taken, with a minimum residency of 2 years. After passing the comprehensive exam, PhD candidates are required to maintain continuous registration. Candidates must register for at least 5 hours of dissertation credits each semester.

Preliminary Examination

Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. Each CEAE group has a designated time for PhD students to take the exam. Students should discuss the schedule, date and format of the exam with their academic adviser.

Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering (p. 1440) program must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

Biomedical Engineering

CU Boulder's Biomedical Engineering program offers students a flexible degree program to achieve their degree and research goals. Biomedical engineering is an exciting, multidisciplinary field that lies at the intersection of medicine, biology, and engineering.

With a cross-listed curriculum and an interdisciplinary faculty roster, the BME program delivers a multi-faceted and rigorous education in biomedical engineering. Our department consists of 32 faculty members from multiple backgrounds and disciplines. They conduct research in the areas of biomechanics, tissue engineering, biomaterials, drug delivery, molecular imaging, image-guided therapy, point-of-care diagnostics, biosensors, prosthetics, bioastronautics, systems biology, and many more.

Our program offers students the opportunity to take courses in any of the following areas:

- Biomechanics
- Imaging and Diagnostics
- Medical Devices
- Therapeutics

The BME program is directed by Professor Mark Borden. For more information, visit the Biomedical Engineering Program (<https://www.colorado.edu/bme/>) website.

Course code for this program is BMEN.

Master's Degree

- Biomedical Engineering - Master of Science (MS) (p. 1419)

Doctoral Degree

- Biomedical Engineering - Doctor of Philosophy (PhD) (p. 1419)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

BMEN 5840 (1-6) Independent Study

Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN-MS) graduate students only.

BMEN 6950 (1-6) Master's Thesis

Work with a faculty advisor on a masters thesis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN-MS) graduate students only.

BMEN 8990 (1-10) Doctoral Dissertation

Work with a faculty advisor on a doctoral dissertation.

Repeatable: Repeatable for up to 60.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

Biomedical Engineering - Master of Science (MS)

The Biomedical Engineering Master of Science (MS) degree program is designed to be flexible to meet the individual student's needs. Students will collaborate with faculty and other advisors to create a tailored degree plan based on their career interests and goals.

Students may choose either a coursework- or thesis-based MS. The thesis option requires completion of a research project with a faculty mentor, a written thesis that describes the research in detail, and an oral defense in front of a committee of program faculty.

For more information, visit the Biomedical Engineering MS Program (<https://www.colorado.edu/bme/masters-program/>) page.

Requirements

Biomedical Engineering MS students must complete 30 credit hours at the 5000 level or higher and obtain a minimum of grade of C (2.0) in each class to count towards the degree. PhD students must receive a grade of B- (2.7) or higher in each course. Students must also maintain a 3.0 cumulative GPA or higher to be in good standing with the Graduate School.

For more information, visit the Biomedical Engineering MS Program (https://www.colorado.edu/bme/masters-program/#coursework_requirements-127) page.

Required Courses

- BMEN 5117 – Anatomy and Physiology for Biomedical Engineers (offered starting Fall 2021)
- Up to 9 credit hours (3 courses) can be taken outside the College of Engineering, with the remainder in biomedical engineering or related fields.
- Thesis students must use 6 credit hours toward their thesis.

Biomedical Engineering - Doctor of Philosophy (PhD)

Biomedical Engineering PhD students have the opportunity to participate in cutting-edge research with engineering faculty in many different biomedical fields. Our program provides the scientific foundation to prepare students for careers in academia, healthcare, industry and government labs.

The PhD program is open to both first-time graduate students as well as those who hold master's degrees.

For more information, visit the Biomedical Engineering PhD Program (<https://www.colorado.edu/bme/academics/phd-program/>) page.

Requirements

All Biomedical Engineering PhD student must complete a minimum of 30 credit hours at the 5000 level or higher, plus 30 credit hours of dissertation credits. Some research advisors will require that their students complete more than 30 course credits, and the department recommends that specific course decisions should be agreed upon through individual faculty/student discussions.

Required Courses and Credits

BMEN 5117 – Anatomy & Physiology for Biomedical Engineers (offered starting Fall 2021)

Preliminary Examination

Biomedical Engineering PhD students are required to pass a preliminary examination. It consists of a comprehensive review of primary literature that supports the current and future research directions of the

student. This must be completed within the first three semesters after matriculation into the program.

Comprehensive Examination

The Comprehensive Examination is an important second evaluation step required to advance the student to candidacy for the PhD degree, which is typically completed within the first three years after matriculation to the program and greater than one year prior to graduation. It consists of an NIH R21-style research proposal in addition to an oral exam with a selected committee of faculty advisors, both focusing on the proposed course of research. Students will also likely have completed on chapter of their dissertation for submission to a peer-reviewed journal before taking the Comprehensive Exam.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements for the Biomedical Engineering PhD must be completed within six years of the date commencing coursework.

Chemical Engineering

The Department of Chemical and Biological Engineering (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) (ChBE) offers an innovative graduate program and emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within the Department of Chemical and Biological Engineering include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science; energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials, and renewable energy.

Biological engineering research includes a broad collection of focal areas spanning from the molecular scale (metabolites, genes, proteins) to the cellular and multicellular scales. Biological engineering projects account for a significant portion of the research activity within the ChBE Department. This research is supported in a variety of manners: federal grants (NIH, NSF, DOD, etc.), national foundations (Howard Hughes, Cystic Fibrosis, etc.), and industrial collaborators.

Functional Materials research in the ChBE Department is concentrated in a diverse group of research areas including polymers, nanostructured materials, photovoltaic materials, ultrathin films, catalytic materials, computational materials science, self-assembled monolayers, and liquid crystalline materials. The department has strength in studying materials problems at the nanometer and sub-nanometer length scales.

Such fundamental investigations are directed toward technological applications.

Finally, the ChBE Department has an active program in renewable energy research. Studies range from the production and utilization of hydrogen to materials for photovoltaics to biorefining and biofuels research. A number of efforts focus on developing catalysts for converting water to hydrogen and CO₂ into fuels such as CO and methanol. Another area of focus is the study of novel photovoltaic materials and structures involving organic, inorganic, and hybrid structures for efficient solar energy harvesting.

Course code for this program is CHEN.

Master's Degree

- Chemical Engineering - Master of Science (MS) (p. 1423)

Doctoral Degree

- Chemical Engineering - Doctor of Philosophy (PhD) (p. 1425)
- Biological Engineering - Doctor of Philosophy (PhD) (p. 1424)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

CHEN 5090 (1) Seminar in Chemical Engineering

Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

CHEN 5128 (3) Applied Statistics In Research and Development

Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Department enforced prereq.: one introductory probability/statistics course.

CHEN 5150 (3) Biomolecular Kinetics, Transport, and Thermodynamics

Required for the Biological Engineering PhD. This course covers aspects of kinetics, transport, and thermodynamics as they relate to interactions between biomolecules and cells. These core subjects will be introduced within concepts common to cell biology, protein/genetic engineering, and signaling, among others. Undergraduate enrollment with instructor consent only.

Recommended: Prerequisites Introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, organic chemistry.

CHEN 5160 (3) Systems Analysis of Cells and Tissues

Required for the Biological Engineering PhD. This course explores how to describe signaling and regulation networks present at the cell and tissue level. Topics include gene expression, stem cell differentiation, homeostasis, and others.

CHEN 5210 (3) Transport Phenomena

Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat and mass transfer and their applications to engineering problems. Department enforced prerequisites: undergraduate courses in fluid mechanics, heat transfer, and differential equations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5360 (3) Catalysis and Kinetics

Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis.

Requisites: Requires corequisite course of CHEN 4330. Restricted to Chemistry (CHEM) or Chemical Engineering (CHEN) graduate students only.

CHEN 5370 (3) Intermediate Chemical Engineering Thermodynamics

Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures and solutions. Also looks at relations between thermodynamics and statistical mechanics. Department enforced prerequisite: an undergraduate course in chemical thermodynamics.

Requisites: Restricted to graduate students only.

CHEN 5390 (3) Chemical Reactor Engineering

Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution and diffusion effects. Department enforced prerequisite: undergraduate course in chemical reactor design/kinetics.

Requisites: Restricted to graduate students only.

CHEN 5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces

Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena.

Requisites: Requires prerequisite course of CHEN 3200 (minimum grade D-).

CHEN 5440 (3-4) Design of Materials

The course content includes introduction and study of important concepts in solid state physics (particularly those relevant for design of materials); origin, characterization and design of mechanical, electronic, optical, magnetic, thermal and electrochemical properties of materials; design of bulk and nanostructured composites; introduction to polymers and soft materials; fundamentals of colloids and interfaces; and nanoscale chemistry and physics for design or desired material properties.

Grading Basis: Letter Grade

CHEN 5450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4450

CHEN 5460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4460

CHEN 5470 (3) Functional Materials Chemistry

The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.

Recommended: Prerequisite Introductory course(s) in materials or organic chemistry.

CHEN 5630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4630

Requisites: Restricted to graduate students only.

CHEN 5650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Extra work required for graduate course.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4650

CHEN 5670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems.

CHEN 5730 (1) Mathematical Methods Short Course for Chemical Engineers

Determine and apply appropriate analytical methods, which may include linear and nonlinear algebraic equations, ordinary differential equations and partial differential equations, to solve an array of chemical engineering problems. Identify and interpret the differences between model predictions and experimental results.

Grading Basis: Letter Grade

CHEN 5740 (3) Analytical Methods in Chemical Engineering

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Department enforced requisite: working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5750 (3) Numerical Methods in Chemical Engineering

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers.

Requisites: Restricted to graduate students only.

CHEN 5800 (3) Bioprocess Engineering

Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes.

CHEN 5803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4803

Requisites: Requires prerequisite courses of APPM 2360 and CHEM 4731 or CHEM 4611 (all minimum grade C-).

CHEN 5805 (3) Biological Interactions to Biomaterials

Covers major classes of materials used in medical applications. Provide an in-depth view of advanced biomaterial concepts with a focus on biological interactions with materials that relate to protein and cell interactions, the innate and acquired immune response, blood interactions and infection.

Requisites: Restricted to graduate students only.

CHEN 5830 (1) Introduction to Modern Biotechnology

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

CHEN 5831 (2) Biotechnology Case Studies

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan.

Requisites: Requires prerequisite course of CHEN 5830 (minimum grade D-).

CHEN 5835 (3) Colloids and Interfaces

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others.

Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-).

CHEN 5836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4836

Requisites: Restricted to graduate students only.

CHEN 5838 (1-3) Special Topics in Chemical Engineering

Graduate-selected topics courses offered upon demand.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5840 (1-4) Independent Study

Allows multiple enrollment in term.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5900 (3) Pharmaceutical Biotechnology

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding.

Requisites: Restricted to graduate students only.

CHEN 5919 (1-5) Special Topics in CHBE

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEN 6210 (3) Microhydrodynamics of Suspensions and Colloids

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers.

Requisites: Requires prerequisite course of CHEN 5210 (minimum grade D-).

CHEN 6820 (3) Biochemical Engineering Fundamentals

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing.

Requisites: Restricted to Chemistry (CHEM), Chemical Engineering (CHEN) or Biological Sciences (MCDB) graduate students only.

CHEN 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

CHEN 6950 (1-6) Master's Thesis**CHEN 8990 (1-10) Doctoral Dissertation**

Chemical Engineering - Master of Science (MS)

The Master of Science degree in chemical engineering requires 30 hours of approved credit hours and successful completion of a comprehensive final exam or thesis defense.

For more information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

Note: The department does not accept students interested in a terminal master's degree except under special circumstances. Students generally obtain a master's degree in the course of fulfilling the requirements for the Chemical Engineering - Doctor of Philosophy (PhD) (p. 1425) or the Biological Engineering - Doctor of Philosophy (PhD) (p. 1424).

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU

Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Chemical Engineering - Bachelor of Science (BS) (catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/chemical-biological-engineering/chemical-engineering-bachelor-science-bs/#acceleratedmasterstext).

Requirements

Admission Requirements

General criteria for regular admission to the master's program include a bachelor's degree with a 3.25/4.00 or better overall GPA from a college or university of recognized standing, equivalent to the degree given at this university (or college work equivalent to that required for such a degree, at least 96 credit hours of which must be acceptable toward a degree at this university) # promise of ability to pursue advanced study and research, as judged by previous scholastic record or otherwise # and adequate preparation to begin graduate study in the chosen field.

Degree Requirements

The following course requirements are subject to change; for the most current information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

A candidate for the Master of Science degree in chemical engineering must complete at least 30 credits, including at least 24 credits of coursework and 4–6 credits of MS thesis credit (CHEN 6950).

Only courses 5000-level and above may be applied towards the MS degree. Moreover, only courses at the 5000-level and above in any department count toward the PhD degree. An advisor must approve all courses.

Only those courses for which the student receives a grade of B- or better will count toward the MS degree. The overall grade point average must be 3.00 or better.

A successful oral defense of the MS thesis is required.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CHEN 5090	Seminar in Chemical Engineering (Pass/Fail Course)	1
CHEN 5210	Transport Phenomena	4
CHEN 5370	Intermediate Chemical Engineering Thermodynamics	3
CHEN 5390	Chemical Reactor Engineering	3
Total Credit Hours		11

Additionally, 15 of the total required credits must be chemical and biological engineering courses, and pass/fail courses do not count toward the degree.

A degree plan must be prepared at the beginning of the academic program in consultation with an advisory committee. The student is urged to maintain close contact with this advisory committee during the entire course of study.

Residency and Time Limit

It is expected that a qualified student can complete the MS degree in two years or less. All work, including the thesis defense and filing of the thesis with the Graduate School, must be completed in the two-year requirement.

Biological Engineering - Doctor of Philosophy (PhD)

The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within ChBE include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials and renewable energy.

For additional information, visit the department's Biological Engineering (<https://www.colorado.edu/chbe/graduate-program/biological-engineering-phd-program/>) and Prospective Graduate Students (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

Requirements

Course Requirements

The student must work out an informal degree plan early in the PhD program with the aid of a research committee. This degree plan must include a total of at least 30 semester hours of 5000-level or above courses and at least 30 semester hours of Doctor Thesis credits. Biological Engineering PhD students are required to complete two core courses: CHEN 5150 Biomolecular Kinetics, Transport, and Thermodynamics and CHEN 5160 Systems Analysis of Cells and Tissues.

Students are expected to complete with distinction all work in the formal courses that apply toward the degree, and achieve an overall grade-point average of 3.00 or better. A course grade below B- will not be counted toward the minimum requirements for the PhD degree, but it will be considered in the overall grade-point average.

Preliminary Examination

A preliminary examination is required of all PhD candidates. This examination consists of an oral and written component to be completed in the third semester. In addition, all students entering the program without a degree closely related to chemical engineering must either take the FE exam or have completed four chemical engineering core undergraduate courses with a grade of B or better (Fluids/Heat, Mass Transfer, Thermodynamics, Kinetics, or the equivalent courses). The

graduate director or department chair will make assessments as to whether a degree is closely related to the chemical engineering degree.

Comprehensive Examination

Students must complete and pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This is followed by a group question-and-answer period with all committee members. The oral examination before the committee is based primarily on a written report the student provides to committee members two weeks in advance.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Chemical Engineering - Doctor of Philosophy (PhD)

The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within ChBE include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Civil Engineering

Graduate studies in civil engineering are offered up to the doctoral level through the Department of Civil, Environmental and Architectural Engineering (<http://www.colorado.edu/ceae/>). Fundamental and applied research areas pursued in the civil engineering program include geotechnical engineering and geomechanics, structural mechanics and engineering, construction management and engineering, environmental and geoenvironmental engineering, hydrology, environmental fluid mechanics, civil engineering systems, and engineering science. Together with relevant advanced coursework, graduates possess high competence and versatility to pursue a wide variety of careers in both engineering and non-engineering fields.

Course code for this program is CVEN.

Research Interests and Facilities

The Department has a variety of computational and experimental research facilities. It has multiple disciplinary computer labs as well as the CEAE Bechtel lab which houses dozens of workstations with a

wide range of professional engineering analysis software for teaching and research, and owns time and ready access to the university's supercomputer system. Physical experimental facilities for geotechnical engineering and geomechanics research include 3 geotechnical centrifuges, with one being a world-class 440g-ton centrifuge with a servo-controlled shake table for advanced physical simulations and soil model testing. For soil and rock mechanics research, analytical research can be conducted in the M.Y. Leung Computational Lab for Soils and Structures and its graduate experimental soil mechanics lab which houses multiple triaxial and cubical cells for simulating complicated 3D ascending and cyclic stress paths on geomaterials, consolidation devices with load-, deformation- and seepage-control, and special test cells for unsaturated soil mechanics testing. For structural mechanics and material engineering research, sophisticated testing for static and dynamic response of structures and their components is available by means of multiple high-speed high-force actuators, a large strong floor and a hydraulic shake table. Four uniaxial loading frames and MTS equipment for studies of mechanical and durability properties of structural and construction materials under combined load and environmental conditions are in use. Sophisticated real-time hybrid experimental-computational pseudo-dynamic testing of large-scale structures whose critical part is tested physically as a substructure with its measured response serving as input to a computer model of the rest of the structure which in turn computes the next load increment to be applied experimentally to the former in a coupled manner can also be set up.

The hydraulics and water resources research laboratories include excellent facilities in water quality and water resources management for which an advanced networked workstation environment for developing advanced decision support systems is available. For environmental fluid mechanics research and instruction, a state-of-the-art Ecological Fluid Dynamics Laboratory is available for fluid mechanics and studies of the interaction between biological processes and ecological systems from fluid stirring, mixing, and reactions, and how organisms evolved and adapt to their physical environment. The facility utilizes laser-based instrumentation for quantifying turbulence and transport of contaminants, microorganisms and odors. For environmental engineering research, the Sustainable Energy and Environmental Laboratories (SEEL) houses a variety of experimental facilities including multiple liquid chromatography mass spectrometers and an automated solid phase extraction system. They offer unique opportunities for studies of environmental microbiology, environmental chemistry, water quality, air quality, molecular biology, toxicology and field ecology with modern PCs in all laboratories for instrument control and data acquisition. For building energy and systems research and studies, the Illumination Laboratory is a special facility for testing and evaluating architectural lighting systems as well as daylighting and lighting control design. Its Larson Building Systems Laboratory (<https://www.colorado.edu/ceae/larsonlab/>) is a unique facility in the HVAC industry for both education and research purposes and is designed for dynamic testing of complete and full-scale commercial HVAC and building systems. The facility consists of a full-size commercial HVAC system, four representative commercial building zones, a system for producing repeatable and controllable loads on the HVAC system, and sophisticated data acquisition and control systems. The graduate program in construction engineering and management is well equipped in terms of computer hardware and software, and can arrange access to other unique lab facilities in the department.

To provide further synergy in research, the department operates several centers:

- The Center for Infrastructure, Energy and Space Testing (<https://www.colorado.edu/geotech-centrifuge/>) supports research and instructions in structural and geotechnical testing, characterization of the fundamental mechanical, structural, hydraulic, and thermal properties of materials relevant to the performance of infrastructural systems.
- The Design of Risk-reducing, Innovative-implementable Small-system Knowledge (DeRISK) Center aims to identify, develop, demonstrate and facilitate widespread acceptance and applicability of novel and innovative technologies and approaches to measure or treat groups of microbiological or chemical contaminants, or their precursors, apply novel new information technology systems and improve the sustainability of small drinking water systems.
- The Center for Environmental Mass Spectrometry (CEMS) is a laboratory that focuses on the detection of pharmaceuticals, hormones and other organic contaminants in water and evaluating the effectiveness of methods for removing these compounds.
- The Center for Advanced Decision Support for Water and Environmental Systems (CADSWES) is an interdisciplinary center of excellence that focuses on applying advanced computing techniques to provide decision makers with decision support systems (DSSs) to help them more effectively manage water and environmental systems.
- The Mortenson Center in Global Engineering focuses on promoting integrated and participatory solutions to humanitarian development by educating globally responsible engineering students and professionals to address pressing problems faced by developing communities worldwide, with the goal of transforming the understanding, application and evaluation of engineering globally.

Current research includes such topics as water and wastewater treatment, surface and subsurface contaminant transport, environmental processes, fluid mechanics, decision support systems, hydraulic research, land treatment, rapid infiltration and activated sludge processes. Cost prediction in construction projects, construction management, worker safety, energy conservation in buildings, solar applications and lighting systems are included. Active research is ongoing in advanced constitutive soil modeling and experimental characterization for geotechnical engineering, computational geomechanics, soil dynamics, seismic wave propagation and geophysics, geotechnical earthquake engineering, wave-based sounding, centrifugal modeling, geosynthetics and glaciology. Research in structures includes stability, damage and fracture, material microstructures, durability, temperature effects, finite element modeling, reinforced concrete, earthquake responses, reinforced masonry structures, prestressed concrete and dynamic control. In water resources and fluid mechanics, work is continuing in stochastic hydrology and hydroclimatology, physics of scalar transport, mixing and reactions and hydrodynamics of ecological flows. Research in engineering science includes theoretical, mathematical and computational mechanics with applications to solid and fluid dynamics, blast and shock loading, mathematical physics, heat transfer, earth science, and multi-scale multiphase material modeling. Making use of model-based analysis, experimental and past performance data of built and human environment, the civil systems program focuses on providing training of a systems approach for life-cycle design decisions, management and monitoring of civil infrastructure systems, accounting for engineering, social science, economics and public policies in design holistically.

Master's Degrees

- Civil Engineering - Master of Science (MS) (p. 1438)
- Civil Engineering - Professional Master of Science (MSCVE) (p. 1438)

Doctoral Degree

- Civil Engineering - Doctor of Philosophy (PhD) (p. 1440)

Certificates

- Architectural Lighting - Graduate Certificate (catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-applied-science/architectural-lighting-graduate-certificate/)
- Global Engineering - Graduate Certificate (p. 1440)
- Water Engineering and Management - Graduate Certificate (p. 1535)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

CVEN 5111 (3) Structural Dynamics

Focuses on the response of single- and multi-degree of freedom structures subjected to harmonic, impulsive and arbitrary loads (including earthquake base excitation). Sources and modeling of damping will be discussed. Analytical and numerical solutions will be considered for both linear and nonlinear structural systems. Elastic and inelastic response spectra will be discussed.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural, mechanical and geo-material behavior and continuum theories in mechanics. Topics: Cartesian tensors, formulation of continuum mechanics for small and large deformation, constitutive laws for elastic solids, energy principles, methods of potentials, formulations and solutions of 2D and 3D elastostatic and elastodynamic problems, analytical and numerical formulations.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4161.

Additional Information: Departmental Category: Mechanics

CVEN 5147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4147

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5157 (3) A Systems Approach to Global Engineering

Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

Equivalent - Duplicate Degree Credit Not Granted: EDEN 4147, CVEN 4157 and EDEN 5147

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

CVEN 5161 (3) Advanced Mechanics of Materials I

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4161

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5206 (3) Design Development

Provides an overview of the development process and proforma, investigates the interrelationship between design decisions and building costs, and evaluates the impact of each major building system on the development budget and schedule. Provides a simulated development experience where students respond to a Request for Proposal, including proformas, design, estimates and outline specifications. Department consent required. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5226 (3) Construction Safety

Comprehensively studies construction safety in the construction industry.

Focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, predictive analytics and learning. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5276 (3) Engineering Risk and Decision Analysis

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, and various types of multicriteria decision analyses. Culminates in a larger term project.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3227 and graduate standing or instructor consent required.

Additional Information: Departmental Category: Construction

CVEN 5286 (3) Design Construction Operations

Considers effective/efficient design of construction operations. Front end planning; construction labor relations; productivity management. Emphasizes construction productivity improvement by group field studies and discrete event simulation modeling. How overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5313 (3) Environmental Fluid Mechanics

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites APPM 2350 and APPM 2360 and CVEN 3313.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5323 (3) Applied Stream Ecology

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5333 (3) Physical Hydrology

Introduces hydrology as a quantitative science describing the occurrence, distribution and movement of water at and near the surface of the earth. Develops a quantitative understanding of atmospheric water, infiltration, evapotranspiration and surface runoff. Studies global climatology and large scale climate drivers of regional hydrology at interannual time scales. Solves engineering problems related to water resources.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4333.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5343 (3) Transport and Dispersion in Surface Water

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5346 (3) Managing Construction and Engineering Projects and Organizations

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5353 (3) Groundwater Hydrology

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 and APPM 2360.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5363 (3) Modeling of Hydrologic Systems

Introduces students to modeling techniques. Focus areas include physical hydrology and hydrometeorology; measurement and inference; climate change impacts; role of scale in hydrology; uncertainty analysis; and a case study project. Projects will examine hydrologic impacts of various drivers such as climate warming or land cover change, utilizing an assessment of historic conditions to better understand and model future disturbance scenarios.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5373 (3) Water Law, Policy, and Institutions

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5383 (3) Applied Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4383

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites APPM 2360 and CVEN 4353 or CVEN 5353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5393 (3) Water Resources System and Management

Introduces water resources planning and management as an integrated systems problem that satisfies multiple competing objectives under constraints and uncertainty. Includes problem formulation and solution using decision support systems, optimization with and without uncertainty, stochastic simulation, and multiobjective optimization. Introduces water resources economics and planning under uncertainties such as climate change and increasing urbanization.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5404 (3) Water Chemistry

Introduces chemical fundamentals governing the chemistry of natural and treated waters. Topics include thermodynamics and kinetics of acid and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5414 (3) Water Chemistry Laboratory

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems.

Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters.

Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-). Requires corequisite course of CVEN 5424.

Additional Information: Departmental Category: Environmental

CVEN 5423 (3) Water Resources Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4323

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical processes that impact the fate and transport of organic contaminants in natural and engineered systems. Emphasizes both equilibrium and kinetic aspects, including solubility, vapor pressure, air-water exchange, sorption, abiotic redox reactions, and photodegradation.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5434 (3) Environmental Engineering Design

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Department consent required.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 5524 or CVEN 5534 or CVEN 5474.

Additional Information: Departmental Category: Environmental

CVEN 5444 (3) Municipal Des Proj

Additional Information: Departmental Category: Environmental

CVEN 5454 (3) Statistical Methods for Natural and Engineered Systems

Applies traditional and modern probability and statistical methods to environmental, hydrological, climatological and engineering data analysis. Topics include: basic probability, data visualization, fitting univariate and multivariate distributions, Monte Carlo simulations, extreme value distributions, confidence intervals and hypothesis testing, nonparametric density estimators, linear regression, and Bayesian analysis. The data analysis tool, R, is used throughout the course.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and EVEN 4464

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4474

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5484 (3) Applied Microbiology and Toxicology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484 and EVEN 4484

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5494 (3) Surface Water Quality Modeling

Examines the relationships among air, water, and landpollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Department consent required.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4511

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5514 (3) Bioremediation

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4484 or CVEN 5424 or CVEN 5484.

Additional Information: Departmental Category: Environmental

CVEN 5524 (3) Drinking Water Treatment

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4464 or CVEN 5464 or graduate standing or instructor consent required.

Additional Information: Departmental Category: Environmental

CVEN 5525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4525

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Structures

CVEN 5534 (3) Wastewater Treatment

Covers the processes used to treat municipal wastewater, focusing on biological processes. Includes: design of aerobic, anoxic, anaerobic and suspended growth technologies to remove and transform pollutants; design and assessment of treatment approaches that recover energy, nutrients and water from wastewater; application of fundamental concepts of aquatic chemistry, environmental microbiology and computational models.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 5404 and CVEN 5484 and CVEN 5464.

Additional Information: Departmental Category: Environmental

CVEN 5537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4537

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5544 (3) Solid Waste Management and Resource Recovery

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 5554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Required for CVEN environmental engineering graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4554

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5564 (3) Water Profession: Communication and Utility Finance

Develops and improves the skills and tools needed for graduate students and young professionals. Focusing on highly effective leaders; leadership with impact; effective communication tools; and communicating with teams, city councils, governing boards, and the public.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Undergraduates may enroll with the permission of the instructor.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3227 or equivalent.

Additional Information: Departmental Category: Structures

CVEN 5574 (3) Water Utility Management: Current Issues and Future Challenges

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on management, leadership, communication and utility financial in the new water profession era. Undergraduate seniors may contact instructor for permission to enroll.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5575 (3) Advanced Topics in Steel Design

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Undergraduate may enroll with permission of the instructor.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4545.

Additional Information: Departmental Category: Structures

CVEN 5584 (3) Water Profession: Leadership and Management

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on financing water services, capital planning, rates, management planning, staffing and organization and critical thinking. Undergraduates may request instructor permission to enroll.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5585 (3) Advanced Topics in Reinforced Concrete Design

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Undergraduates may enroll with the permission of the instructor.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4555.

Additional Information: Departmental Category: Structures

CVEN 5594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4594

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3141 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5604 (3) UV Disinfection and Advanced Oxidation

Provides a fundamental basis for design of UV processes in water and wastewater treatment. Includes principles of photochemistry and photobiology. Applications to disinfection of water and degradation of chemical compounds in the environment. Design of UV disinfection systems and reactors and advanced oxidation processes. Environmental UV-based decay of pollutants.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3414 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5614 (3) Bioenergy & Bioresource Recovery

Introduces fundamental theories and applied technologies used in production and conversion of renewable biomass including waste materials into bioenergy and other value-added products. Conducts quantitative evaluations on conversion processes such as renewable biogas production, electricity generation, liquid fuels, metal and nutrients recovery and organic chemical production.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4484.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3708 and CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5708 (3) Soil Mechanics

Offers an advanced course in soil mechanics. Coverage includes basic principles of continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5718 (3) Mechanics and Dynamics of Glaciers

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4718

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4728

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5738 (3) Applied Geotechnical Analysis

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5748 (3) Design of Earth Structures

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems.

Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5758 (3) Flow Processes in Soils

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5768 (3) Introduction to Rock Mechanics

Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3708 and CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5788 (3) Computational Modeling in Geotechnical Engineering

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Recommended Prereq: CVEN 5708

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5798 (3) Dynamics of Soils and Structures

Covers fundamental characterization of soils, foundations and structures under general dynamic and earthquake loads. Principles of vibrations and wave propagation for 1D, 2D, 3D. In-situ and laboratory determination of dynamic soil properties; methods for site response analysis, foundation vibrations, dynamic soil-structure interaction and liquefaction problems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5818 (3) Geotechnical Earthquake Engineering

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 5798.

Additional Information: Departmental Category: Geotechnical

CVEN 5822 (3) Geographical Information Systems for Civil and Environmental Systems

Theory and use of geographical information systems in civil engineering, environmental studies, natural resources and other related disciplines.

Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 5830 (1-3) Special Topics for Seniors/Grads

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems

CVEN 5831 (3) Special Topics

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5833 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5834 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5835 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Structures

CVEN 5836 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5837 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

CVEN 5838 (1-3) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5849 (1-6) Independent Study

Available only through approval of graduate advisor. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Special Topics

CVEN 5919 (3) Global Development for Engineers

Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects.

Requisites: Restricted to students with sub-plan of Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.

Additional Information: Departmental Category: Special Topics

CVEN 5929 (3) Sustainable Community Development 2

Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development.

Requisites: Requires prerequisite course of CVEN 5919 (minimum grade C-). Restricted to students with Engineering Developing Communities (EDC) sub-plan or EDC certificate (ENDC-CERG).

Additional Information: Departmental Category: Special Topics

CVEN 5939 (3) Global Development Practicum

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in CVEN 5919 and CVEN 5929.

Requisites: Requires prerequisites courses of CVEN 5919 and CVEN 5929 (all minimum grade C-). Restricted to students with sub-plan of Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5969 (1-3) Water, Sanitation, and Hygiene

Studies the fundamentals behind effective hygiene and remediation processes and engineering solutions developed/developed for specific international problems. Approaches to hygiene, clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CVEN 3424 and CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 6161 (3) Advanced Mechanics of Materials 2

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques.

Recommended: Prerequisite CVEN 5161.

Additional Information: Departmental Category: Mechanics

CVEN 6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization.

Requisites: Requires a prerequisite course of CVEN 5333 (minimum grade C-).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6383 (3) Flow and Transport through Porous Media

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers.

Requisites: Restricted to graduate student Civil (CVEN) Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6414 (3) Aquatic Surfaces and Particles

Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics.

Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media

Covers constitutive modeling, multiphase mechanics, and finite element implementation of constitutive models and coupled solid-fluid mechanical governing equations for inelastic porous media at small strain. Considers transient and steady state conditions. Analyzes structural, geotechnical, geological, mechanical, biomechanical, and other related modern engineering problems. Uses general purpose finite element software program for implementation and analysis.

Additional Information: Departmental Category: Mechanics

CVEN 6525 (3) Nonlinear Analysis of Framed Structures

Explores theoretical underpinnings of nonlinear static and dynamic analysis of framed structures, along with exposure to the corresponding programming techniques in Matlab. Topics covered are: flexibility and fiber based beam-column element formulation; structural, section and fiber plasticity; geometric and material nonlinearities; nonlinear pushover and transient analysis of framed structures.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 6595 (3) Earthquake Engineering

Analyzes and designs structures for earthquake load covering: properties of earthquake ground motions, ground motion prediction equations, seismic hazard analysis, response spectra, response of linear and nonlinear structures, construction of design spectra, seismic design methods, and building code requirements.

Requisites: Requires prerequisite course of CVEN 5111 (minimum grade of C-). Restricted to graduate students only.

Additional Information: Departmental Category: Structures

CVEN 6830 (3) Special Topics

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Building Systems

CVEN 6831 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Mechanics

CVEN 6833 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6834 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads.

Requisites: Requires prerequisite course of CVEN 5111 (minimum grade C-).**Additional Information:** Departmental Category: Mechanics**CVEN 7141 (3) Plates and Shells**

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings.

Requisites: Requires prerequisite courses of CVEN 5131 or CVEN 5161 (minimum grade C-).**Additional Information:** Departmental Category: Mechanics**CVEN 7161 (3) Fracture Mechanics**

Includes three parts: 1) fundamentals through rigorous mathematical formulations of linear/nonlinear elastic fracture mechanics, 2) materials' theoretical strength, including metals, granular materials, polymers and steel, 3) numerical (finite element) methods in fracture mechanics. Heavy emphasis on project and independent work.

Additional Information: Departmental Category: Mechanics**CVEN 7511 (3) Computational Finite Inelasticity and Multiphase Mechanics**

Covers kinematics, thermodynamics, coupled balance equations and constitutive models, numerical time integration, and finite element implementation of finite strain inelasticity and multiphase mechanics. Kinematics of multiplicative decomposition, and finite strain mixture theory. Linearization for global nonlinear Newton-Raphson and solution algorithm of nonlinear constitutive models and coupled balance equations.

Recommended: Prerequisites CVEN 5131 and CVEN 5511 and CVEN 6511.**Additional Information:** Departmental Category: Mechanics**CVEN 7718 (3) Engineering Properties of Soils**

Emphasizes engineering aspects of soil mechanics. Implications of soil strength, volume change, consolidation behavior in engineering problems such as slope stability, deformation of retaining walls, surface subsidence due to tunneling. Time effects in soil/long-term bearing capacity of piles. Laboratory determination of constitutive parameters of soils. Field tests/their correlations with soil properties. Case studies using finite element software.

Requisites: Requires prerequisite course of CVEN 5708 (minimum grade of C-).**Additional Information:** Departmental Category: Geotechnical**CVEN 7788 (3) Soil Behavior**

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials.

Recommended: Prerequisite CVEN 3718.**Additional Information:** Departmental Category: Geotechnical**CVEN 7831 (1-3) Sp Tpc-Constitutive Mech****Repeatable:** Repeatable for up to 10.00 total credit hours. Civil Engineering - Master of Science (MS)

The department's objective is to produce engineers capable of identifying, preventing and solving building, construction and environmental problems. In addition to the well-established graduate programs in environmental, water resource and geotechnical engineering, students in the department may also choose to study in the emerging field of geoenvironmental engineering. Campus facilities, including a National Science Foundation-funded earthquake simulator, permit a case-study approach, which exposes students to real-world problems and allows experimentation, testing and analysis.

Areas of study within the Civil Engineering Department are:

- building systems engineering
- civil systems engineering
- construction engineering and management
- engineering science
- environmental engineering
- environmental fluid mechanics and hydraulic engineering
- geoenvironmental engineering
- geotechnical engineering and geomechanics
- global engineering
- structural engineering and structural mechanics
- hydrology and water resources management

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Architectural Engineering - Bachelor of Science (BS) (p. 735)
- Civil Engineering - Bachelor of Science (BS) (catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/civil-environmental-architectural-engineering/civil-engineering-bachelor-science-bs/#acceleratedmasterstext)
- Environmental Engineering - Bachelor of Science (BS) (catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/civil-environmental-architectural-engineering/environmental-engineering-bachelor-science-bs/#acceleratedmasterstext)

Requirements

Course Requirements

The Master of Science degree in civil engineering requires a total of 30 credit hours (including coursework and thesis hours) with a grade of B- or better and a cumulative GPA of at least 3.00. At least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in CVEN courses. In addition, specific focus area requirements must be met.

Students may apply up to 6 credit hours of approved 4000-level courses from departments outside CEAE to their master's degree if the courses fit with the student's degree plan.

Degree Plans

Plan I: Thesis Option

Students must complete 6 credit hours of MS thesis. Plan I culminates with an oral presentation and/or written report or oral examination.

Plan II: Non-Thesis Option

There are two non-thesis options:

- Students choosing Plan IIa must complete at least 30 credit hours of coursework, including a 3-credit independent study report.
- Students choosing Plan IIb must complete at least 30 credit hours of coursework and pass a final exam.

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one to two years.

Civil Engineering - Professional Master of Science (MSCVE)

The Department of Civil, Environmental and Architectural Engineering offers a professional master's degree tailored toward working engineers who desire to develop a new skill set. The programs are coursework based and result in a Master of Science degree.

Areas of Emphasis

Water Engineering and Management Emphasis

CU Boulder's professional Master of Science degree in civil engineering, with an emphasis in water engineering and management (WE&M), combines technical courses in environmental and civil engineering with highly-valued professional, non-technical skills in communication, leadership, management, utility finance and governance. The water engineering and management program provides students with leadership skills so they can effectively manage teams and initiatives typically faced in the water profession.

The water engineering and management professional master's program (PMP), designed for working professionals, provides the tools you need to produce results and solve increasingly complex problems in the water profession. Courses are delivered on campus and live streamed/recorded options over the internet, allowing working professionals from around the world to earn a graduate MS degree while continuing to put the learning into practice in their work.

Students are young and mid-career professionals working for utilities, consulting firms, government and regulatory agencies, looking to

advance their careers in the water industry. With faculty of senior water professionals from across the country, including those from utilities, consulting firms, and global professional organizations, students gain an opportunity to network and learn through real work case studies.

All of the graduate courses are available to distance and on campus students. All the students can come to class, watch the live classes over Zoom and/or the recorded Zoom classes.

The WE&M courses are available for a WE&M graduate certificate (<https://www.colorado.edu/ceae/water-engineering-management-certificate/>) or as an Professional MS degree (<https://www.colorado.edu/ceae/water-engineering-management-professional-masters-program/>).

Degree Options

The PMP program has three plans. Plan I includes a written thesis, with reduced course work. Plans IIa and IIb focus on coursework, with an option of including up to 2 semesters of independent study for a report. A vast majority of PMP students use plans IIa and IIb.

- **Plan I (Thesis Options):** This plan requires 24 hours of course credits and 6 hours of thesis credits. This is pursued under the direct supervision of a research advisor, and student must formally defend the thesis.
- **Plan IIa (Coursework Option):** This plan requires 30 credits. Thirty credits can be obtained with 10, 3 hour-credit courses. This plan has a wider variety of coursework.
- **Plan IIb (Report Option):** This plan requires 30 credits, but up to 6 hours of independent study may be included towards to 30-credit requirement. The independent study requires a report completed under the guidance of a faculty member.

For more information, visit the department's Water Engineering and Management (<https://www.colorado.edu/ceae/research/interdisciplinary-programs/water-engineering-management/>) webpage.

Global Engineering Emphasis

The Master of Science degree in civil engineering, with an emphasis in global engineering is a unique program offered by the Mortenson Center at CU Boulder. This degree is a professional track of the MS program in civil engineering. It is designed to offer students exposure to a breadth of knowledge in relevant areas such as global health, development economics and impact evaluation, while also building technical skills and providing the opportunity for further study in a specific area of interest within global engineering. In addition to classroom-based learning, students are required to complete a field practicum, embedded for six weeks to six months with a global development organization. These practicum placements have taken place in over 50 countries, partnering with over 80 organizations. Learn more about our practicum partnerships on the Mortenson Center (<https://www.colorado.edu/center/mortenson/education/practicum-placements/>) website.

Our graduates are able to provide technical expertise to development agencies or other firms by recognizing the many facets of community development that are critical to sustainable solutions. Students gain skills in data analysis, project management and systems thinking so they can help create and implement solutions to address worldwide needs.

For more information, visit the Mortenson Center in Global Engineering (<https://www.colorado.edu/center/mortenson/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Course Requirements

The following course requirements are subject to change; for the most current information, visit the department's Water Engineering & Management webpage or the Mortenson Center in Global Engineering (<https://www.colorado.edu/center/mortenson/>) webpage.

The professional master's degree requires a total of 30 credit hours, at least 24 of which must be completed at the 5000 level or above. At least 18 credit hours must be from coursework in CVEN.

Areas of Emphasis

Water Engineering & Management Emphasis

This emphasis requires at least 30 credit hours from the following categories.

Code	Title	Credit Hours
Environmental Engineering Core Courses		
CVEN 5464	Environmental Engineering Processes	3
CVEN 5404	Water Chemistry	3
CVEN 5484	Applied Microbiology and Toxicology	3
Choose one:		3
CVEN 5524	Drinking Water Treatment	
CVEN 5534	Wastewater Treatment	
CVEN 5474	Hazardous and Industrial Waste Management	
Water Engineering & Management Core Courses		
CVEN 5564	Water Profession: Communication and Utility Finance	3
CVEN 5574	Water Utility Management: Current Issues and Future Challenges	3
CVEN 5584	Water Profession: Leadership and Management	3
Electives & Master's Report and Seminar Courses		
Choose from the the following for a total of 9 credits:		9
Civil engineering electives (3-9 credits)		
Public affairs electives at CU Denver (0-3 credits)		
Master's Report and Seminar (2 credits)		
Additional courses to fulfill 30-credit minimum, if necessary.		
Total Credit Hours		30

Global Engineering Emphasis

This emphasis requires at least 30 credit hours distributed as follows.

Code	Title	Credit Hours
Required Core Courses		
CVEN 5919	Global Development for Engineers	3
CVEN 5939	Global Development Practicum	3
Global Engineering Series ¹		

MCEG offers courses as series of 5-week modules, with each module worth one credit-hour. In the Professional Master's in Global Engineering, students are required to complete 12 credit-hours from the series

Principles	
Project Management	
Field Methods	
Water, Sanitation and Hygiene (WASH)	
Humanitarian Aid	
Household Energy	
Option Area	
Students work with their faculty advisor to determine which courses to take in order to fulfill the remaining 12 required credit-hours.	12
Energy	
Environmental Health	
Construction	
Engineering Management Certificate	
Policy Issues	
Total Credit Hours	30

¹ Global Engineering Series course options can be found on the Mortenson Center (<https://www.colorado.edu/center/mortenson/graduate-education/professional-masters-degrees/>) website.

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework.

Civil Engineering - Doctor of Philosophy (PhD)

Students typically complete their PhD in civil, environmental and architectural engineering within 4 to 6 years, depending on whether they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program directly without a master's degree.

The primary focus of a PhD student is to perform novel research and support their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. PhD students are supported through research and teaching assistantships and are also encouraged to apply for their own sources of funding.

Areas of study within the Civil Engineering Department are:

- building systems engineering
- construction engineering and management
- environmental engineering
- geoenvironmental engineering
- geotechnical engineering
- civil systems engineering
- engineering science
- structural engineering and structural mechanics
- hydrology, water resources and environmental fluid mechanics

12 For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

Requirements

The PhD requires 30 credit hours of coursework, plus 30 hours of dissertation credit. PhD students are also required to successfully complete a preliminary exam, a comprehensive exam and a final dissertation defense.

Preliminary Examination

Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. The student must pass this examination in order to continue in the doctoral program. Specific format of the preliminary examination varies by the area of study, so the student should check with their advisor for additional details.

Comprehensive Examination

The comprehensive examination shall consist of a written and an oral examination. The exam may not be attempted until the student's last semester of formal coursework. At the comprehensive examination, the student shall present a plan for the dissertation research to the advisory committee for approval. Failure to pass the comprehensive examination may be remedied by repeating the examination after an interval of not less than four months. Specific format of the comprehensive examination varies by the area of study, so the student should check with their advisor for additional details.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Global Engineering - Graduate Certificate

The Mortenson Center in Global Engineering trains engineers to work in partnership with people from developing communities worldwide to create sustainable solutions to meet their basic needs.

The Mortenson Center in Global Engineering provides students with the opportunity to engage in education, research and practice that is focused on finding solutions to global development challenges. The graduate certificate consists of three specialized, classroom-based courses and a field practicum course. The field practicum integrates education and practice, with students applying their knowledge and skills to contribute to projects in more than 25 countries and tribal nations. Students also have the opportunity to take part in research funded by agencies such as the Bill & Melinda Gates Foundation, USEPA and most recently USAID. For more information, visit the Mortenson Center (<http://www.colorado.edu/mcedc/>) website.

Requirements

Eligibility

The Mortenson Center in Global Engineering offers a graduate certificate to degree-seeking graduate-level engineering students (including BS/MS students in their final year and MS or PhD students) enrolled in a department within the College of Engineering and Applied Science. It is primarily designed for students who want to learn about global development or who have an interest in possibly pursuing a career in the fields of community development or humanitarian engineering.

The global engineering graduate certificate requirements are separate from the graduate degree requirements established by each student's home department. Therefore, graduate students interested in completing the certificate need to contact their respective academic advisors to determine how the certificate courses will fit into their overall degree plan.

Program Requirements

Students earn the certificate by satisfactorily completing the four required courses listed below, with a grade of B- or higher in each course.

Code	Title	Credit Hours
Required Courses		
CVEN 5919	Global Development for Engineers	3
CVEN 5929	Sustainable Community Development 2	3
CVEN 5939	Global Development Practicum	3
CVEN 5837	Special Topics for Seniors/Grads (Fieldwork Methods for Development Engineers)	3
Total Credit Hours		12

Computer Science

The University of Colorado Boulder Computer Science graduate program is one of the top ranked programs in the *U.S. News & World Report* Best Graduate Schools issue among public universities. Students receive a strong education and conduct groundbreaking tier-one research. We have 60+ faculty members conducting fundamental and applied research in artificial intelligence, complex systems, robotics, computational biology, human centered computing, numerical & scientific computing, programming languages, software engineering, systems and networking, verification and theory of computing.

The department has also been awarded funds for national centers like the Pervasive Personalized Intelligence IUCRC, ASPIRE, NSF AI Institute for Students-AI Teaming.

Boulder is also home to research and development operations for many large companies and four federal research labs: the National Center for Atmospheric Research, the National Institute for Standards and Technology, the National Oceanic and Atmospheric Administration and the National Renewable Energy Laboratory.

Recent doctoral and master's graduates accepted employment at companies including, but not limited to, the following: Microsoft, Apple, Google, Facebook, Twitter, Cisco, Raytheon, HP, NASA, Amazon, Sandia National Laboratories, Northrop Grumman and Seagate. Many of our graduating PhD students also enter careers in academia.

For more information, visit the Computer Science (<http://www.colorado.edu/cs/>) website.

Master's Degrees

Brubaker, Jed Richards (https://experts.colorado.edu/display/fisid_156193/)
Assistant Professor; PhD, University of California, Irvine

Cai, Xiao-Chuan (https://experts.colorado.edu/display/fisid_100636/)
Professor; PhD, New York University

Chang, Bor-yuh evan
Associate Professor; PhD, University of California Berkeley

Chen, Lijun (https://experts.colorado.edu/display/fisid_149472/)
Assistant Professor; PhD, California Institute of Technology

Clauset, Aaron (https://experts.colorado.edu/display/fisid_147554/)
Associate Professor; PhD, University of New Mexico

Colunga, Eliana (https://experts.colorado.edu/display/fisid_129477/)
Associate Professor; PhD, Indiana University Bloomington

Constantine, Paul (https://experts.colorado.edu/display/fisid_159755/)
Assistant Professor, Associate Professor; PhD, Stanford University

Cox, Murray William (https://experts.colorado.edu/display/fisid_153192/)
Senior Instructor; PhD, Texas A&M University

Cox, Rachel (https://experts.colorado.edu/display/fisid_158450/)
Instructor

Curry, James H. (https://experts.colorado.edu/display/fisid_105730/)
Professor; PhD, University of California, Berkeley

D'Mello, Sidney (https://experts.colorado.edu/display/fisid_159117/)
Professor; PhD, University of Memphis

Dig, Danny
Associate Professor; PhD, University of Illinois at Urbana-Champaign

Do, Ellen Yi-Luen (https://experts.colorado.edu/display/fisid_159925/)
Professor; PhD, Georgia Institute of Technology

Dowell, Robin D. (https://experts.colorado.edu/display/fisid_147779/)
Associate Professor; DSc, Washington University

Fiesler, Casey Lynn (https://experts.colorado.edu/display/fisid_155950/)
Assistant Professor; PhD, Georgia Institute of Technology

Fischer, Gerhard
Professor Emeritus

Fleming, Ioana (https://experts.colorado.edu/display/fisid_154718/)
Instructor; PhD, Johns Hopkins University

Frew, Eric W. (https://experts.colorado.edu/display/fisid_134685/)
Professor; PhD, Stanford University

Frongillo, Rafael M. (https://experts.colorado.edu/display/fisid_156416/)
Assistant Professor; PhD, University of California, Berkeley

Gifford, Kevin K. (https://experts.colorado.edu/display/fisid_104361/)
Research Professor; PhD, University of Colorado Boulder

Grochow, Joshua A. (https://experts.colorado.edu/display/fisid_158240/)
Assistant Professor; PhD, University of Chicago

Gross, Mark D. (https://experts.colorado.edu/display/fisid_100095/)
Professor; PhD, Massachusetts Institute of Technology

Gruchalla, Kenny
Assistant Professor Adjunct

Grunwald, Dirk C. (https://experts.colorado.edu/display/fisid_102261/)
Faculty Director, Professor; PhD, University of Illinois at Urbana-Champaign

Ha, Sangtae (https://experts.colorado.edu/display/fisid_153246/)
Assistant Professor; PhD, North Carolina State University

Hall, David Matthew (https://experts.colorado.edu/display/fisid_147474/)
Assistant Professor Adjunct; PhD, University of California, Santa Barbara

Han, Richard (https://experts.colorado.edu/display/fisid_122947/)
Professor; PhD, University of California, Berkeley

Hansen, Aaron
Instructor; PhD, University of Tulsa

Hauser, Thomas
Associate Professor Adjunct; PhD, Technische Universität München (Germany)

Hayes, Bradley H. (https://experts.colorado.edu/display/fisid_159810/)
Assistant Professor; PhD, Yale University

Heckman, Christoffer (https://experts.colorado.edu/display/fisid_155294/)
Assistant Professor; PhD, Cornell University

Herman, C.J.
Instructor

Hoenigman, Rhonda (https://experts.colorado.edu/display/fisid_152997/)
Associate Dean, Senior Instructor; PhD, University of Colorado Boulder

Hunter, Lawrence (https://experts.colorado.edu/display/fisid_143568/)
Professor; PhD, Yale University

Izraelevitz, Joe (https://experts.colorado.edu/display/fisid_166042/)
Assistant Professor; PhD, University of Rochester

Jessup, Elizabeth R. (https://experts.colorado.edu/display/fisid_102065/)
Professor Emeritus; PhD, Yale University

Kaki, Gowtham
Assistant Professor; PhD, Purdue University

Kane, Shaun Kevin (https://experts.colorado.edu/display/fisid_154603/)
Associate Professor; PhD, University of Washington

Kann, Katharina
Assistant Professor; , University of Munich, Germany

Keegan, Brian (https://experts.colorado.edu/display/fisid_158122/)
Assistant Professor; PhD, Northwestern University

Keller, Eric Robert (https://experts.colorado.edu/display/fisid_151647/)
Assistant Professor; PhD, Princeton University

King, Roger A.
Professor Emeritus

Kolla, Alexandra (https://experts.colorado.edu/display/fisid_160001/)
Associate Professor; PhD, University of California, Berkeley

Larremore, Daniel B. (https://experts.colorado.edu/display/fisid_159893/)
Assistant Professor; PhD, University of Colorado Boulder

Layer, Ryan M. (https://experts.colorado.edu/display/fisid_163567/)
Assistant Professor; PhD, University of Virginia

Lehman, Tamara (https://experts.colorado.edu/display/fisid_165649/)
Assistant Professor; PhD, Duke University

Leithinger, Daniel (https://experts.colorado.edu/display/fisid_163356/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Lewis, Clayton H. (https://experts.colorado.edu/display/fisid_100307/)
Professor; PhD, University of Michigan Ann Arbor

Lv, Qin (https://experts.colorado.edu/display/fisid_145832/)
Associate Professor, Associate Chair; PhD, Princeton University

Martin, James H. (https://experts.colorado.edu/display/fisid_100495/)
Professor; PhD, University of California, Berkeley

Massey, Daniel (https://experts.colorado.edu/display/fisid_159491/)
Professor; PhD, University of California, Los Angeles

Mishra, Shivakant (https://experts.colorado.edu/display/fisid_118376/)
Professor, Associate Chair; PhD, University of Arizona

Monteleoni, Claire Elizabeth (https://experts.colorado.edu/display/fisid_163979/)
Associate Professor; PhD, Massachusetts Institute of Technology

Morrison, Rebecca E. (https://experts.colorado.edu/display/fisid_159999/)
Assistant Professor

Mozer, Michael C. (https://experts.colorado.edu/display/fisid_105922/)
Research Professor; PhD, University of California, San Diego

Mullen, Zachary
Instructor

Palen, Leysia A. (https://experts.colorado.edu/display/fisid_114604/)
Professor; PhD, University of California, Irvine

Palmer, Martha (https://experts.colorado.edu/display/fisid_138162/)
Professor; PhD, University of Edinburgh (Scotland)

Paradise, Alan (https://experts.colorado.edu/display/fisid_158849/)
Instructor; MS, Washington University in St. Louis

Paul, Michael J.
Assistant Professor; PhD, Johns Hopkins University

Peleg, Orit (https://experts.colorado.edu/display/fisid_159998/)
Assistant Professor; PhD, ETH Zürich (Switzerland)

Phillips, Caleb Timothy
Assistant Professor Adjunct

Rahimian, Abtin (https://experts.colorado.edu/display/fisid_159792/)
Assistant Professor; PhD, Georgia Institute of Technology

Reed, David P. (https://experts.colorado.edu/display/fisid_152458/)
Scholar in Residence; PhD, Carnegie Mellon University

Repenning, Alexander (https://experts.colorado.edu/display/fisid_104946/)
Research Professor; PhD, University of Colorado Boulder

Roncone, Alessandro (https://experts.colorado.edu/display/fisid_164509/)
Assistant Professor; PhD, Istituto Italiano di Tecnologia (Italy)

Roque, Ricarose (https://experts.colorado.edu/display/fisid_158315/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Rozner, Eric John (https://experts.colorado.edu/display/fisid_164185/)
Assistant Professor; PhD, University of Texas at Austin

Sanders, Bruce W.
Professor Emeritus

Sankaranarayanan, Sriram (https://experts.colorado.edu/display/fisid_147413/)
Associate Professor; PhD, Stanford University

Scaife, Nolan
Assistant Professor; PhD, University of Florida

Schnabel, Robert B. (https://experts.colorado.edu/display/fisid_100499/)
Professor, Faculty Director; PhD, Cornell University

Schreüder, Willem A. (https://experts.colorado.edu/display/fisid_143834/)
Assistant Professor Adjunct

Sumner, Tamara (https://experts.colorado.edu/display/fisid_105742/)
Professor; PhD, University of Colorado Boulder

Supriya, Naidu
Instructor

Szafir, Daniel J. (https://experts.colorado.edu/display/fisid_156420/)
Assistant Professor; PhD, University of Wisconsin–Madison

Thrall, Lloyd Gregory (https://experts.colorado.edu/display/fisid_163208/)
Associate Faculty Director; MA, University of London (England)

Trivedi, Ashutosh (https://experts.colorado.edu/display/fisid_156589/)
Assistant Professor; PhD, University of Warwick (UK)

Tufo, Henry (https://experts.colorado.edu/display/fisid_127040/)
Professor; PhD, Brown University

Voida, Amy Kathryn Mitchell (https://experts.colorado.edu/display/fisid_155855/)
Assistant Professor; PhD, Georgia Institute of Technology

Voida, Stephen A. (https://experts.colorado.edu/display/fisid_155856/)
Assistant Professor; PhD, Georgia Institute of Technology

Vu, Tam Ngoc (https://experts.colorado.edu/display/fisid_159772/)
Assistant Professor; PhD, Rutgers University

Waggoner, Bo
Assistant Professor; PhD, Harvard University

Ward, Wayne Hinson (https://experts.colorado.edu/display/fisid_114680/)
Research Professor; PhD, University of Colorado Boulder

Wustrow, Eric A. (https://experts.colorado.edu/display/fisid_156419/)
Assistant Professor; BE, University of Michigan Ann Arbor

Yeh, Tom (https://experts.colorado.edu/display/fisid_151584/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Zagrodzki, Maciej
Instructor; MSc, Colorado School of Mines

Zamani, Majid

Assistant Professor; PhD, University of California Los Angeles

Courses

CSCI 5000 (1) Introduction to the Computer Science Research-Based MS Program

Instructs new research-based MS students in Computer Science how to become an effective member in terms of research, teaching, and presentation, and potentially advancing to the PhD program. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.

Requisites: Restricted to graduate student Computer Sciences (CSEN) students only.

Additional Information: Departmental Category: General Computer Science

CSCI 5040 (3) Professional Masters Project 1

First class in a two semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The first semester focuses on design, requirements, and prototyping and is based on common waterfall project practices with gate reviews and project artifacts. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.

Requisites: Restricted to graduate student Computer Sciences (CSEN) students only.

CSCI 5050 (3) Professional Masters Project 2

Second class in a two-semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The second semester focuses on development, code construction, and delivery, using agile-based project management for development. Students work in both Scrum and Kanban agile project cycles. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.

Requisites: Requires prerequisite course of CSCI 5040 (minimum grade of B). Restricted to CSEN graduate students only.

CSCI 5100 (1) Computer Science Colloquium

Learn about innovative research and teaching in computer science by attending talks and discussions by leading researchers and educators. Learn professional presentation skills and etiquette of participating in scientific research presentations. Students may attend during any term but they need to be signed up for this course during the term they wish to earn that credit.

Requisites: Restricted to Computer Science (CSCI) MS students only.

CSCI 5113 (3) Linux System Administration

Introduces Linux system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up, using provided computing resources, and must maintain and secure these servers themselves. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5113 and CSCI 4113

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 3753 (minimum grade B).

CSCI 5114 (3) Practical Algorithmic Complexity

When coming across an algorithmic problem, how do we think about how hard it is? Beyond just how much time or memory it takes, computational complexity offers a plethora of concepts for understanding this fundamental question. This leads to the appropriate choice of algorithm for the job, the development of new algorithms, and understanding the role of algorithmic complexity in natural settings such as biology and physics.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4114

Requisites: Restricted to graduate students only.

CSCI 5135 (3) Computer-Aided Verification

Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon compilation.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5139

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ECEN 2703 and general proficiency in discrete mathematics and programming.

Additional Information: Departmental Category: Programming Languages

CSCI 5140 (2) CLASIC Capstone

In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master's program, we will review each student's internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.

Requisites: Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.

Recommended: It is recommended that this course be taken after the CLASIC internship has been completed.

CSCI 5160 (3) Introduction to Enterprise Networks

Provides direct experience with networking functions and equipment through experiments and demonstrations. Students learn the fundamental principles and techniques of voice and data switching and routing within an enterprise environment. Procedures require the use of actual commercial equipment (including Cisco, Juniper, and Arista) plus network services and observation using packet analyzers. Weekly experiments and exams are designed to reflect real-world networking scenarios and require an additional hours of lab work. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. Students are expected to spend 6 hours per week in the lab. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams. Recommended restriction: students are expected to know the OSI Model, principles of Ethernet Switching, IP Addressing and operation of protocols such as ARP, DHCP, DN

CSCI 5170 (3) IP Routing Protocols and Policies

Explores practical usage and conceptual underpinnings of link state and distance vector routing protocols. The course further explores a holistic view of how the Internet works from a technical routing aspect as well as policy and economics. The course is supplemented with frequent labs to fully explore the specific workings of the routing protocols RIP, OSPF, and BGP and the relationships between them in practical lab based routing scenarios. Formerly CYBR 5170.

Recommended: Prerequisite CYBR 5010.

CSCI 5180 (3) Network Management and Automation

Teaching both technical and soft skills, this course incorporates best practices and the key theories behind them such as understanding common services needed for network functionality, maintenance, and troubleshooting. The goal of this course is to equip students with the valuable skills and tools they need to hit the ground running in most network management, operation, automation, and DevOps roles within a company. By the end of the course, students will be competent in the technologies, services, and tools used to manage and automate complex networks. Formerly CYBR 5150.

Recommended: Prerequisite background in in Linux system administration, Python programming and computer network engineering/data communications.

CSCI 5190 (3) Voice Over IP: Voice Network Design and Implementation

Provides an in-depth immersion into the foundational theories and technologies of Voice Over IP (VoIP). This course supplements these theories with direct experience through real-world, hands-on lab experiments and demonstrations. The fundamentals of voice technologies, services, and tools used in industry to design, deploy and troubleshoot VoIP networks will be explored in detail, providing the student with a competitive advantage in the job market. Formerly CYBR 6140.

Requisites: Requires prerequisite course of CSCI 5170 or CSCI 5160 or CSCI 5180 (minimum grade B).

CSCI 5200 (3) Introduction to Wireless Systems

Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5200 and CSCI 4200

Recommended: Prerequisites CYBR 5010 and CYBR 5012.

CSCI 5229 (3) Computer Graphics

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4229

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graphics

CSCI 5239 (3) Advanced Computer Graphics

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4239

Requisites: Requires prerequisite course of CSCI 5229 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Graphics

CSCI 5240 (3) Introduction to Blockchain

Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5240 and CSCI 4240

Requisites: Restricted to graduate students only.

CSCI 5250 (3) Computer Science: The Canon

Explores the "great works" of computer science through intensive reading and discussion. Readings include works by Babbage, Turing, Von Neumann, Goedel, Shannon and Minsky, among others. Does not count toward breadth requirement for Computer Science MS/ME degree.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4250

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 5253 (3) Datacenter Scale Computing - Methods, Systems and Techniques

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4253

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5273.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5254 (3) Convex Optimization and Its Applications

Discuss basic convex analysis (convex sets, functions and optimization problems), optimization theory (linear, quadratic, semidefinite and geometric programming; optimality conditions and duality theory), some optimization algorithms (descent methods and interior-point methods), basic applications (in signal processing, control, communications, networks, statistics, machine learning, circuit design and mechanical engineering, etc.), and some advanced topics (distributed decomposition, exact convex relaxation, parsimonious recovery).

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5260 (3) Datacenter Networks

Covers design and configuration principles required to build highly scalable and highly redundant network solutions used by datacenters. Class makes use of commercial grade equipment to build network topologies and services. Students will work in teams to build a virtualized cluster, load balance application traffic between multiple server blades, assure high availability in Ethernet and IP layers, and able to prioritize important services using QoS. This lab-based course requires an average of 6 hours per week where the students are physically present in the CU Network Engineering Lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams. Formerly CYBR 6160.

Requisites: Requires prerequisite course of CSCI 5160 (minimum grade B).

CSCI 5270 (3) IP Network Design

Focuses on the design and implementation of network solutions according to the needs of a client. The course helps students develop skills to be a consultant and walks them through the complete life cycle of network project development as a member of a professional services team. Implement fundamentals of IP Routing Protocols and apply them directly to design based networking problems. Design scenarios will incorporate physical and logical design, financial analysis, and laboratory configuration. Formerly CYBR 6170.

Requisites: Requires prerequisite course of CSCI 5170 or CSCI 5160 (minimum grade B).

Recommended: Prerequisite strong familiarity with network protocol operation and implementation.

CSCI 5273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, architectures, client-server computing, software-driven networking, and other contemporary network hardware-software system design and programming techniques. Familiarity with C and Unix is required.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5273

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 4273 and CSCI 4573.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5280 (3) Software-Defined Networking

Provides an in-depth immersion into the foundational theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), and emerging technologies for computer networks. Supplements the theoretical knowledge learned through direct experience with real-world lab experiments and demonstrations. This knowledge will give students an advantage in the job market for this in-demand, constantly changing subject. Formerly CYBR 6150.

Requisites: Requires prerequisite course of CSCI 5180 (minimum grade B).

CSCI 5302 (3) Advanced Robotics

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4302

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 3302 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5303 (1) Cybersecurity Club Companion Course

Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5303 and CSCI 4303

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisites CSCI 5403 or CSCI 3403.

CSCI 5314 (3) Dynamic Models in Biology

Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4314

Requisites: Restricted to graduate students only.

Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.

Additional Information: Departmental Category: Theory of Computation

CSCI 5322 (3) Algorithmic Human-Robot Interaction

Creating autonomous systems that interact with humans requires the synthesis of insights from a variety of disciplines. This course aims to provide students with the algorithms, models, and frameworks that form the building blocks required for developing intelligent autonomous systems that perform useful tasks while interacting with, coordinating with, co-existing with, or otherwise assisting humans. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

CSCI 5340 (3) Startup Essentials: Entrepreneurial Projects in Computing

Provides students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept and be evaluated on product/market fit. CS coding concepts relevant for startups, including potentially cloud programming, mobile programming and agile software engineering, will be taught. Does not satisfy breadth requirement.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4348

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 5350 (3) Entrepreneurial Projects II

Follows CSCI 5340. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Does not satisfy breadth requirement.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4358

Requisites: Requires a prerequisite course of CSCI 5340 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 5352 (3) Network Analysis and Modeling

Examines modern techniques for analyzing and modeling the structure and dynamics of complex networks. Focuses on statistical algorithms and methods, and emphasizes model interpretability and understanding the processes that generate real data. Applications are drawn from computational biology and computational social science. No biological or social science training is required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 3104 and APPM 3570.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5360 (3) Internet Service Provider Networks

This course presents advanced networking design and implementation techniques through experiments with network measurement equipment, switches, router, and management interfaces. The course primarily focuses on Service Provider Transport technologies for capacity, scalability and fault tolerance. Students learn the essential network architectures of last mile and long haul network solutions used for public and private network traffic transport; implementation of SLAs, load balancing, first hop redundancy, and MPLS transport and L2/L3 VPN solutions. This course requires an average of 6 hours per week in the lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams. Formerly CYBR 6161.

Requisites: Requires prerequisite course of CSCI 5160 (minimum grade B).

Recommended: Prerequisite CSCI 5170.

CSCI 5380 (3) Network Virtualization and Orchestration

Provides an advanced, in-depth immersion into the theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), network virtualization/orchestration, and emerging technologies for computer networks. Expands on the real-world lab experiments and theoretical demonstrations learned from the course pre-requisite. The knowledge and critical thinking skills learned from this course will arm students with an advantage in the job market for this in-demand, constantly changing subject. Formerly CYBR 6151.

Requisites: Requires prerequisite of CSCI 5280 (minimum grade B).

CSCI 5402 (3) Research Methods in Human-Robot Interaction

Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5402

Requisites: Restricted to graduate students only.

CSCI 5403 (3) Cybersecurity

Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course, students should have a solid foundation in cybersecurity and hands-on experience.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5300

Requisites: Restricted to graduate students only.

CSCI 5413 (3) Computer Security and Ethical Hacking

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4413

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5417 (3) Information Retrieval Systems

Addresses practical issues in the design, implementation and analysis of modern information retrieval systems. The major focus is on Web-based applications including ad hoc retrieval, classification, and clustering. Introduces the use of open source retrieval systems, standard evaluation metrics and gold-standard evaluation collections.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Database Systems

CSCI 5423 (3) Biologically-inspired Multi-Agent Systems

Explores the principles and emergent properties of collective dynamics through computational modeling and theory. Focuses on multi-agent systems using insights from biology, like the self-assembly of cells and insect colony behavior. Topics include designing swarm intelligence, networked agents, cellular computing and self-assembly, optimization, synchronization, and evolutionary computation. Uses cross-discipline research developments to practice applied techniques. Biology background is not required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 2270 and basic knowledge of programming.

CSCI 5434 (3) Probability for Computer Science

This course will introduce computer science students to topics in probability and statistics that will be useful in other computer science courses. Basic concepts in probability will be taught from an algorithmic and computational point of view, with examples drawn from computer science.

Requisites: Requires prerequisite courses of APPM 1360 or MATH 2300 and CSCI 2824 or MATH 2001 or ECEN 2703 (all minimum grade B).

CSCI 5444 (3) Introduction to Theory of Computation

Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5446 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4446 and ECEN 4423 and ECEN 5423

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5448 (3) Object-Oriented Analysis and Design

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4448

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Software Engineering

CSCI 5454 (3) Design and Analysis of Algorithms

Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, probabilistic methods, advanced data structures, graph algorithms, etc. Lower bounds, NP-completeness, intractability.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 2270 or equivalent.

Additional Information: Departmental Category: Theory of Computation

CSCI 5502 (3) Data Mining

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4502

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5514 (3) Algorithms for Whole Genome Sequence Analysis

Explore the algorithms that have been developed to assemble and analyze genome sequencing data. Genome sequencing produces vast and complex data that are intractable without efficient algorithms. This course covers the core data structures and algorithms which form the basis for research in topics ranging from evolution to the cause and treatment of many diseases, including cancer. Topics include string matching, indexing, compression, and succinct data structures. No prior knowledge of biology, DNA, or genetics is required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite basic understanding of complexity analysis, core algorithms (for example, sort) and data structures (for example, graphs).

CSCI 5525 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students will build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4555 and ECEN 4553 and ECEN 5523

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 3155 and CSCI 2400 or ECEN 3350.

Additional Information: Departmental Category: Programming Languages

CSCI 5535 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5533

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 3155 or instructor consent required.

Additional Information: Departmental Category: Programming Languages

CSCI 5548 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections and modeling. Includes relation to RTS and object-oriented programming.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5543

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 1300 and CSCI 2270 or instructor consent required.

Additional Information: Departmental Category: Software Engineering

CSCI 5550 (3) Designing for Defense

Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams chosen by competitive selection work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment.

Equivalent - Duplicate Degree Credit Not Granted: COEN 5550 and CYBR 5550

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CSCI 5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5573

Requisites: Requires prerequisite course of CSCI 2400 and CSCI 3753 (all minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5576 (4) High-Performance Scientific Computing

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4576

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a machine and the design of cache memory systems. Also studies current and historically important computer architectures.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5593

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 4593 or instructor consent required.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5606 (3) Principles of Numerical Computation

Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 3656 and three semesters of calculus or equivalent.

Additional Information: Departmental Category: Numerical Computation

CSCI 5608 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ECEN 4583 and CSCI 5548 and CSCI 4318 or equivalent industrial experience.

Additional Information: Departmental Category: Software Engineering

CSCI 5616 (3) Introduction to Virtual Reality

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616, ATLS 4616, ATLS 5616

Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade C-). Restricted to graduate students only.

CSCI 5622 (3) Machine Learning

Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended.

Requisites: Requires prereq courses of CSCI 3104 and CSCI 2820 or APPM 3310 or MATH 2130 or CSCI 3022 or APPM 4570 or APPM 3570 or STAT 4250 or MATH 3510 or CVEN 3227 or ECEN 3810 or ECON 3818 or MCEN 4120 (all min grade B). Restricted to Graduate Students Only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5636 (3) Numerical Solution of Partial Differential Equations

Focuses on discretization techniques such as finite difference, finite element and finite volume methods, and parallel solution algorithms such as Krylov subspace methods, domain decomposition and multilevel methods.

Requisites: Requires prerequisite course of CSCI 2820 or CSCI 3656 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5646 (3) Numerical Linear Algebra

Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5654 (3) Linear Programming

Presents algorithms, simplex and modifications. Examines theory-duality and complementary slackness. Involves network flow algorithms. Introduces integer programming.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite linear algebra.

Additional Information: Departmental Category: Theory of Computation

CSCI 5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5673

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5573 or a course in computer networks.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5676 (3) Numerical Optimization

Focuses on computational methods for solution of unconstrained and some constrained optimization problems, nonlinear least-squares problems and systems of nonlinear equations. Formerly CSCI 6676.

Requisites: Requires prerequisite course of CSCI 2820 or CSCI 3656 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5714 (3) Formal Languages

Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5444 or instructor consent required.

Additional Information: Departmental Category: Theory of Computation

CSCI 5722 (3) Computer Vision

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite probability, multivariate calculus and linear algebra.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5753 (3) Computer Performance Modeling

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4753 and ECEN 4753 and ECEN 5753

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5802 (1) Data Science Team Companion Course

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4802

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4809 and ATLS 4809 and ATLS 5809

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graphics

CSCI 5817 (3) Database Systems

Provides an advanced treatment of basic database concepts.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 3753.

Additional Information: Departmental Category: Database Systems

CSCI 5822 (3) Probabilistic Models of Human and Machine Learning

Introduces a set of modeling techniques that have become a mainstay of modern artificial intelligence, cognitive science and machine learning research. These models provide essential tools for interpreting the statistical structure of large data sets and for explaining how intelligent agents analyze the vast amount of experience that accumulates through interactions with an unfamiliar environment.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite undergraduate course in probability and statistics.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5828 (3) Foundations of Software Engineering

Provides an introduction to software engineering concepts and techniques. Topics include the history of software engineering, fundamental software engineering principles and theory, software life cycles, software testing, and the design and implementation of concurrent and large-scale software systems.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Software Engineering

CSCI 5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

Equivalent - Duplicate Degree Credit Not Granted: LING 5832

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5839 (3) User-Centered Design and Development 1

Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graphics

CSCI 5849 (3) Input, Interaction, and Accessibility

Explores input and interaction techniques, with an emphasis on universal design and alternative interfaces. Students will explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students will conduct performance evaluations of existing techniques, and prototype new interaction methods. Students will design technologies to support people with varying abilities and disabilities.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4849

Requisites: Requires prerequisite of CSCI 3002 or CSCI 5839 (all require minimum grade of B). Restricted to graduate students only.

CSCI 5854 (3) Theoretical Foundations of Autonomous Systems

Covers techniques for modeling, design and verification of autonomous systems and application domains including automotive systems, robotics and medical devices. Modeling topics include timed systems, differential equations, switched systems, hybrid dynamical systems. Verification topics: reachability and stability verification. Temporal specifications. Synthesis of controllers. Applications: automotive systems, medical devices.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5880 (3) Interactive Machine Learning for Customizable and Expressive Interfaces

Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4889, ATLS 4889 and ATLS 5880

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5900 (1-6) Master's Level Independent Study

Provides opportunities for independent study at the master's level.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 5919 (3) HCC Survey and Synthesis: Foundations and Trajectories

Examines the interdisciplinary field of human-centered computing through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. Social computing, is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists, information scientists, social scientists, and business and media arts students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graphics

CSCI 5922 (3) Neural Networks and Deep Learning

Introduces modern approaches to machine learning using neural networks. Neural nets, popular in the early 1990s, have undergone a resurgence due to significant advances in computing power and the availability of very large data sets. Now rechristened 'deep learning', the field has produced state-of-the-art results in a range of artificial intelligence problems, including vision, speech and natural language processing.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Artificial Intelligence

CSCI 5929 (3) HCC Survey and Synthesis: New Disciplinary Directions

Studies recent advances in human-computer interaction through critical analysis of influential papers and self-guided research. Examines new paradigms in input, output, and visualization for technology design and interaction. Considers innovative methods to assess various population design and technological needs. Studies in computer-related fields, social science, business, media arts and communications benefit learning about human-centered computing research.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5919.

Additional Information: Departmental Category: Graphics

CSCI 6000 (1) Introduction to the Computer Science PhD Program

Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.

Requisites: Restricted to Computer Science (CSCI) PhD. students only.

Additional Information: Departmental Category: General Computer Science

CSCI 6100 (1) Computer Science Colloquium

Learn about innovative research and teaching in computer science by attending talks and discussions by leading researchers and educators. Learn professional presentation skills and etiquette of participating in scientific research presentations. Students may attend during any term but they need to be signed up for this course during the term they wish to earn that credit.

Requisites: Restricted to Computer Science (CSCI) PhD. students only.

CSCI 6114 (3) Computational Complexity Theory

Covers standard complexity classes including: time-bounded, space-bounded, nondeterministic, randomized, quantum, parallel, counting, and nonuniform classes. Covers standard relationships between these complexity classes, as well as landmark results in complexity theory. Additional topics may be covered depending on time and interest.

Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

Recommended: Corequisite CSCI 5444.

CSCI 6118 (3) Software Engineering for Scientists

Learn the core principles of software engineering and design to make scientific software more robust and reproducible. This class targets quantitative scientists with programming skills (in any language) who want to use software in their research. We will cover the version control, testing, benchmarking, data structures, algorithms, and pipelines. This course opens computing to a variety of student disciplines, and is an advanced course in computing geared toward STEM. Instructor approval required for CS majors and CS minors. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4118

Requisites: Restricted to graduate students. Restricted to Non-Computer Science students only.

Recommended: Prerequisites ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 2275 or ECEN 1310 or INFO 1201, knowledge of a programming language, preferably Python, and upper division STEM course recommended.

CSCI 6200 (1) Computer Science PhD Career Development

Learn how to make the most of your CS PhD by understanding and preparing for a career as a computer science research in academia, industry, and government. Students need to take this class once they complete Preliminary Exam and before their proposal defense.

Requisites: Requires prerequisite course of CSCI 6000 (minimum grade B). Restricted to Computer Science (CSCI) MS and PhD students only.

CSCI 6214 (3) Randomized Algorithms

Randomization is a powerful tool to design and analyze algorithms, and one that has played, and continues to play, a key role in the theory of algorithms and complexity. This course will give a technical foundation in common probabilistic tools to design and analyze algorithms, and use this foundation to cover several important randomized algorithms.

Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

CSCI 6268 (3) Foundations of Computer and Network Security

Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography and authentication protocols.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5550

Requisites: Requires prerequisite course of CSCI 5273 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Software Engineering

CSCI 6302 (3) Speech Recognition and Synthesis

Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 5832 or LING 5200 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 6314 (3) Algorithmic Economics

This course will survey the frontier of algorithmic economics: the study of incentives and strategic behavior through a computational lens. It will show how microeconomic theory applies to the design of algorithms, and conversely, how algorithmic thinking applies to economics. Other topics may include game theory, mechanism design / auction theory, forecasting mechanisms, and voting / social choice theory.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5454.

CSCI 6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 6454 (3) Advanced Algorithms

Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting.

Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 6502 (3) Big Data Analytics: Systems, Algorithms, and Applications

This course studies state-of-the-art practice and research on efficient and effective systems and algorithms design for managing and exploring massive amounts of digital data in various application domains. The course takes an integrated approach that studies all three aspects of big data analytics: systems, algorithms, and applications. Specifically, this course covers big data systems for MapReduce, NoSQL, stream processing, deep learning, mobile/wearable/IoT sensing, as well as practical use of indexing, sketching, recommendation, graph, and deep learning algorithms. Domain-specific data management and analysis, such as those in online social networks, scientific discovery, business intelligence, health informatics, urban computing, are also covered.

Requisites: Restricted to graduate students only.

CSCI 6622 (3) Advanced Machine Learning

Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5622 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 6644 (1) Theory of Computing Reading Group

Exposition of key results in major areas of Theory of Computing presented by graduate students. The topics are selected every semester by voting. Examples of topics from previous semesters include: Hardness of Approximation and PCPs, Unique Games Conjecture, and Optimal Inapproximability Results for Max Cut. Previously offered as a special topics course.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites Graduate-level courses in Algorithms and Complexity Theory.

CSCI 6686 (3) Numerical Methods for Constrained Optimization

Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems.

Requisites: Requires prerequisite course of CSCI 5606 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 6800 (1-6) Master of Engineering Project

Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Department enforced prerequisite: completion of 21 hours towards the ME degree.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate student Computer Sciences (CSEN) students only.

Additional Information: Departmental Category: General Computer Science

CSCI 6810 (1) Seminar in Computational Biology

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4810

Additional Information: Departmental Category: General Computer Science

CSCI 6930 (3) Professional Internship

This class provides a structure for CS graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in CS graduate programs.

CSCI 6940 (1) Master's Candidate for Degree

For students who need to be registered for the purpose of taking the master's comprehensive exam and who are not otherwise registered. Credit does not count toward degree requirements.

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General Computer Science

CSCI 6950 (1-6) Master's Thesis

Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

Additional Information: Departmental Category: General Computer Science

CSCI 7000 (1-4) Current Topics in Computer Science

Covers research topics of current interest in computer science that do not fall into a standard subarea.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 7123 (3) Topics in Operating Systems

Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 5573 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 7135 (1-3) Topics in Programming Languages

Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Programming Languages

CSCI 7143 (3) Topics in Computer Systems

Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 7154 (3) Topics in Theory of Computation

Selected topics of current interest in theory of computation.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 7176 (3) Topics in Numerical Computation

Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 7222 (3) Topics in Nonsymbolic Artificial Intelligence

Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CSCI 5622 or instructor consent required.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7412 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7422 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7565 (3) Computational Phonology and Morphology

Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.

CSCI 7717 (3) Topics in Database Systems

Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CSCI 5817 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Database Systems

CSCI 7772 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Artificial Intelligence

CSCI 7818 (3) Topics in Software Engineering

Studies selected topics of current interest in software engineering. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Software Engineering

CSCI 7900 (1-6) Doctoral Level Independent Study

For doctoral students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CSCI 8990 (1-10) Doctoral Dissertation

Investigates some specialized field of computer science. Approved and supervised by faculty members.

Repeatable: Repeatable for up to 30.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Computer Science

CYBR 5000 (1) Seminar in Technology, Cybersecurity and Policy

Introduces students to major topics and research at the interface of technology, cybersecurity, and policy by providing a weekly series of guest lectures with questions and discussion. These lectures will be followed by related readings, class discussions, and group work, which show the relationship of cybersecurity and new technology to policy.

Repeatable: Repeatable for up to 4.00 total credit hours.

Grading Basis: Letter Grade

CYBR 5010 (3) Fundamentals of Data Communication

Combining conceptual knowledge about data communications and core Internet technologies with hands-on labs that reinforce the conceptual knowledge, this course provides students with the ability to create innovative technology solutions in their discipline. Learning how the Internet works and being able to evaluate and operate an Internet network is a valuable skill; students in this course will have a competitive advantage in this foundational field.

Grading Basis: Letter Grade

CYBR 5013 (3) Fundamentals of System Administration and Virtualization

Introduces the basic use and administration of Unix and Linux systems. Topics include booting and system management, scripting, storage and logical volume management, filesystem configuration, account management and password security, process control, software installation, event logging and system auditing. Students will also develop familiarity with virtualization platforms such as VirtualBox and VMware to implement and test their system configurations.

Grading Basis: Letter Grade

CYBR 5113 (3) Linux System Administration

Introduces Linux system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up, using provided computing resources, and must maintain and secure these servers themselves. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5113 and CSCI 4113

Requisites: Restricted to Technology, Cybersecurity and Policy (CYBR) graduate students only.

Recommended: Prerequisite CSCI 3753 (minimum grade B).

CYBR 5200 (3) Introduction to Wireless Systems

Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5200 and CSCI 4200

Recommended: Prerequisites CYBR 5010 and CYBR 5012.

CYBR 5215 (3) Wireless and Cellular Systems

Studies technologies and architectures employed in modern cellular wireless systems. Major topics include radio propagation, multiple access techniques, analog and digital cellular telephony, and personal communications systems. Presents the necessary tools to understand the wireless industry, its technical details, and its business drivers. Topics include modeling, spectrum, weather, multipath, Doppler effect, and shadowing and covers important aspects of multiple access technologies such as CDMA and OFDMA. introduces modern radio standards including LTE. Formerly CYBR 6210.

Requisites: Requires prerequisite course of CYBR 5200 (minimum grade B-).

Grading Basis: Letter Grade

CYBR 5220 (3) Wireless Local Area Networks

Emphasis on the IEEE P802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will to analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified[®] programs, and will learn how to model and analyze WLAN traffic using industry standard tools.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5122

Requisites: Requires prerequisite course of CYBR 5010 or CSCI 5273 (minimum grade B-).

Recommended: Prerequisite CYBR 5200.

Grading Basis: Letter Grade

CYBR 5230 (3) Wireless Systems Lab

This Wireless Solutions Architecture course is designed to examine the core concepts of wireless architecture, design and implementation. The course will focus on architecting solutions unlicensed technology, specifically enterprise Wi-Fi networks. Students will learn how to design, implement, troubleshoot and operate enterprise wireless networks. Formerly TLEN 5560.

Requisites: Requires prerequisite course of CYBR 5200 (minimum grade D-).

Recommended: Prerequisite CYBR 5010.

CYBR 5240 (3) Introduction to Blockchain

Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5240 and CSCI 4240

Requisites: Restricted to graduate students only.

CYBR 5250 (2-4) Technology Law and Policy Clinic

Features technology law advocacy before administrative, legislative and judicial bodies in the public interest. Formerly TLEN 5250. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7809

Requisites: Restricted to CYBR/TLEN graduate students.

Grading Basis: Letter Grade

CYBR 5260 (3) Seminar: Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition and how intellectual property and antitrust rules should be developed. Formerly TLEN 5260.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8341

Requisites: Restricted to CYBR/TLEN graduate students.

CYBR 5300 (3) Introduction to CyberSecurity

Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). The course provides a cyber security foundation that will allow practitioners in other fields apply to understand cyber security trade-offs and will also provide interested students with a basis further study in cyber security. At the conclusion of the course, students should have a solid foundation in cybersecurity and hands-on experience.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5403

Recommended: for graduate students only.

Grading Basis: Letter Grade

CYBR 5303 (1) Cybersecurity Club Companion Course

Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5303 and CSCI 4303

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisites CYBR 5300 or CSCI 5403 or CSCI 3403.

CYBR 5310 (3) Immersive Cyber Defense

Immersive Cybersecurity Defense assumes familiarity with core cybersecurity concepts and applies them within a hands-on virtual environment. Students practice offensive skills such as password cracking and exploit development to understand vulnerabilities and then focus on defensive tactics to reduce cyber risk and respond to cyber-attacks. At the conclusion of the course, students will understand how to protect systems against a wide range of threats and have experience using real-world tools to implement these defenses. Previously offered as a special topics course.

Recommended: Familiarity with core cybersecurity concepts such as those covered in CYBR 5300 is recommended but not required, and students are expected to have an understanding of Windows, Linux and Networking fundamentals.

Grading Basis: Letter Grade

CYBR 5320 (3) Cybersecurity Network Analytics

This Cybersecurity Network Analytics course takes a hands-on approach to detecting malicious activity within network traffic. The course will first introduce methodologies for analyzing cyber data. This knowledge will then be used practically, as the students will be given the chance to test out approaches on real traffic. At the conclusion, students will have both a theoretical understanding of cyber algorithms and their use in a real-world setting.

Requisites: Requires prerequisite courses of CYBR 3300 or CYBR 5300 or CSCI 3403 or CSCI 5403 (minimum grade D-).

Recommended: Requisite C++ and Linux/Unix experience and knowledge of computer networking.

Grading Basis: Letter Grade

CYBR 5330 (3) Digital Forensics

Learn how to identify, collect, examine, analyze, and present digital evidence and the legal challenges associated with conducting digital forensics investigations. Explore various file system types and structures. Learn how to recovery and extract potential evidence from deleted files and directories. Learn how to capture and profile data residing in live memory. Analyze running processes and recover memory artifacts. Learn about various methods data can be hidden on a computing devices, storage media, and within covert communications channels.

Recommended: Prerequisites CYBR 3300, CYBR 5300, CSCI 3403 or CSCI 5403.

Grading Basis: Letter Grade

CYBR 5340 (3) VOIP Network Design

Focuses on VoIP network design and optimization. The emphasis is on the convergence of VoIP, PSTN and cell phone networks and signaling. Topics include voice processing as well as IP and SS7 signaling. In addition there will be a review of ISDN, DSL, Sonet, ATM, SIP and MPLS. There will be a case problem for sizing a VoIP network using silence suppression. Formerly TLEN 5340.

Requisites: Requires corequisite of CYBR 5001. Restricted to CYBR or BUSN graduate students.

CYBR 5350 (3) Security Auditing and Penetration Testing

This course is an introduction to the principles and techniques associated with security auditing and penetration testing. Topics covered include; planning, reconnaissance, scanning, enumeration, exploitation, post-exploitation, and reporting. Students discover how system vulnerabilities can be exploited. Students will develop an understanding of current cybersecurity issues and how user, administrator, and programmer errors can result in security breaches.

Recommended: Prerequisites CYBR 3300, CYBR 5300, CSCI 3403 or CSCI 5403.

Grading Basis: Letter Grade

CYBR 5410 (3) Telecommunications Law and Policy

Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular and other wireless systems and the Internet. Formerly TLEN 5240.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7241

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to CYBR or BUSN graduate Students

CYBR 5420 (3) Spectrum Management and Policy

Studies how spectrum policy is developed and implemented. A general framework is developed for understanding telecommunications law and regulatory objectives. Specifically analyzes international and domestic dimensions of spectrum policy. Considers how economics, administrative processes and innovative technologies affects management of the spectrum. Formerly TLEN 5230.

Requisites: Restricted to graduate students only.

CYBR 5480 (3) Future of Video: Technology, Policy, and Economics

Examines the issues that have been created by the shift from analog to digital technologies, the shift from narrowband/wideband systems to broadband systems, and the shift to converged networks (i.e. networks able to convey voice, data, image and video traffic on a common platform) based upon packet switching and Internet Protocol (IP) suite.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5380

Requisites: Requires prerequisite courses of CYBR 5400 (minimum grade D-). Restricted to graduate students only.

CYBR 5505 (3) Leading Oneself

Provides working engineers a background in leadership concepts and methods and enables students to develop practical leadership skills through numerous in-class exercises and experimentation based assignments. Topics include authentic leadership, motivating self and others, cultivating emotional intelligence, personal mastery, creating accountability, conflict resolution, leading change and organizational culture. Required for all Engineering Management degree students.

Requisites: Restricted to Leeds School of Business or College of Engineering graduate students only.

CYBR 5510 (3) Technology: Commercial Strategy and Operations

Working in groups of 2-4, students will leverage their technical skills to learn and apply commercial/business skills via the consideration of a hypothetical competitive technically-oriented business, including its strategy, long-term financial outlook, and operating platform. Upon successful course completion, students should expect to feel confident when speaking with (and ultimately moving into roles of) management and leadership, regarding all critical aspects of business, especially the creation of equity value through scale at pace, aligning interests of all key stakeholders. Open to undergraduates with instructor consent. Formerly TLEN 5130.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CYBR 5550 (3) Designing for Defense

Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams chosen by competitive selection work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment.

Equivalent - Duplicate Degree Credit Not Granted: COEN 5550 and CSCI 5550

Grading Basis: Letter Grade

CYBR 5700 (3) Graduate Projects I

This two-semester sequence includes CYBR 5700 Graduate Projects I and CYBR 5710 Graduate Projects II. Teaches students how to engineer a complex, inter/multidisciplinary design and implementation problem in a group environment.

Requisites: Restricted to ITP (TLEN-MS) students only.

Grading Basis: Letter Grade

CYBR 5830 (1-6) Special Topics

Current topics in Telecommunications. Formerly TLEN 5830.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

CYBR 5910 (1-6) Independent Study

Special projects agreed upon by student and instructor. Department consent required. Formerly TLEN 5920.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to CYBR/TLEN graduate students.

CYBR 6200 (3) Advanced Wireless Lab

Provides a comprehensive, hands-on set of laboratory exercises for the teaching and demonstration of key technical skills required to understand, build, test, and analyze both analog and digital wireless communications concepts. In conjunction with lecture-based content to provide a solid foundation in digital communication theory, SDR-based laboratory exercises enable the synthesis of several fundamental concepts utilizing the latest, modern communications systems technologies.

Requisites: Requires prerequisite course of CYBR 5200 (minimum grade D-).

Recommended: Prerequisites CYBR 5210 and CYBR 5220.

Grading Basis: Letter Grade

CYBR 6700 (3) Graduate Projects II

This two-semester sequence includes CYBR 5700 Graduate Projects I and CYBR 6700 Graduate Projects II. Teaches students how to engineer a complex, inter/multidisciplinary design and implementation problem in a group environment.

Requisites: Requires prerequisite course of CYBR 5700 (minimum grade B-).

Grading Basis: Letter Grade

CYBR 6940 (1) Master's Candidate for Degree

This course is for TCP Master's students who are approved candidates to receive their degree.

Requisites: Restricted to CYBR/TLEN graduate students.

Grading Basis: Pass/Fail

CYBR 6950 (1-6) Master's Thesis

Original and independent research conducted by a graduate student under the supervision of a faculty advisor. Formerly TLEN 6950.

Requisites: Restricted to CYBR/TLEN graduate students.

CYBR 8990 (1-10) Doctoral Dissertation

Investigates specialized topic or field in the area of telecommunications. Approved and supervised by faculty members. Formerly TLEN 8990.

Requisites: Restricted to CYBR/TLEN PhD students.

Computer Science - Master of Science (MS)

The Master of Science degree in computer science is a research-based option which permits graduate students the flexibility in defining specialized interdisciplinary fields that meet their professional needs. The research-based MS degree option is well-suited to students pursuing a career in academia or industry with a research component.

Students have two options under this degree:

- The thesis option, wherein students will have to complete *six* credits of MS thesis hours while working on a research problem and completing their thesis work. They work with a committee of *three* and have to defend their thesis.
- The non-thesis option, wherein students will have to complete *six* credits of MS independent study research hours, while working on research projects with individual faculty. These *six* hours may or may not be with the same faculty.

With support from the research advisor, students in this program have the option of smoothly transitioning in the PhD program. If students receive support from a research advisor, they do not have to apply to the PhD

program; the department processes the degree advancement based on the support.

Requirements

Admission Requirements

Applicants for graduate study in computer science must hold at least a bachelor's degree or its equivalent from an accredited institution. They should have programming experience, a number of computer science courses and sufficient mathematical maturity to understand pure mathematics courses at the upper division (junior/senior) level.

A minimum undergraduate GPA of 3.00 is required for admission to the master's program.

Mathematics Courses

A student's academic background should include at least three semesters of mathematics at the level of sophistication of calculus or above. Examples of such courses include calculus, differential equations, linear algebra, probability, statistics and abstract algebra. The courses should indicate that the student has achieved the mathematical maturity expected of an upper-level science, engineering or mathematics undergraduate.

Computer Science Courses

At least three one-semester courses in computer science that are beyond the introductory level are required for admissions. These are intended to demonstrate breadth of basic computer science knowledge in the areas of computer hardware, software and theory. The courses should include the equivalent of the following CU Boulder offerings:

- Hardware requirement: CSCI 2400 Computer Systems (Computer Systems)
- Software requirement: Either CSCI 3155 Principles of Programming Languages or CSCI 3753 Design and Analysis of Operating Systems
- Theory requirement: CSCI 2270 Computer Science 2: Data Structures and either CSCI 3104 Algorithms or CSCI 3434 Theory of Computation

More advanced versions of all courses are acceptable. The above courses are prerequisites to many of the graduate-level offerings, so it's important to complete these to be considered for graduate admissions. Admission without these prerequisites or their equivalents may be considered under extraordinary circumstances only.

Program Requirements

Degree Plans

While pursuing the traditional MS degree in CS, students have to complete a total of 30 credits of graduate level coursework and may select between two options.

Plan I: Thesis Option

The MS thesis option curriculum is designed to provide a balance between modern technological focus and disciplinary depth. Students must secure a thesis advisor for research and course guidance.

Under this option, students complete 24 credits of coursework and 6 thesis credits at the 5000-level or above. At least 24 credits (eight courses) must be completed in computer science, including three required breadth courses. Up to 6 credits (two courses) may be taken outside of the department with the approval of the Graduate Committee.

In addition to this, students must fulfill any other MS degree requirements as stated by the department. For more information, visit the Traditional

MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/>) webpage.

Plan II: Non-Thesis Option

Under this option, students complete 24 credits of coursework at the 5000-level or above. At least 24 credits (eight courses) must be completed in computer science, including three required breadth courses. Up to 6 credits must be independent study research hours. Up to 6 credits (two courses) may be taken outside of the department with the approval of the Graduate Committee.

In addition to this, students must fulfill any other MS degree requirements as stated by the department. For more information, visit the Traditional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/>) webpage.

Course Requirements

The following course requirements are subject to change; for the most current information, visit the department's Traditional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/>) webpage.

Code	Title	Credit Hours
Professional Development Series		
Complete three one-credit Professional Development courses. ¹		3
CSCI 5000	Introduction to the Computer Science Research-Based MS Program	
CSCI 5100	Computer Science Colloquium	
CSCI 5802	Data Science Team Companion Course	
Breadth Courses ²		
Students must complete one breadth course from each of the three bins listed below.		
<i>Bin One</i>		
Choose one:		3
CSCI 5229	Computer Graphics	
CSCI 5254	Convex Optimization and Its Applications	
CSCI 5434	Probability for Computer Science	
CSCI 5444	Introduction to Theory of Computation	
CSCI 5446	Chaotic Dynamics	
CSCI 5454	Design and Analysis of Algorithms	
CSCI 5576	High-Performance Scientific Computing	
CSCI 5606	Principles of Numerical Computation	
CSCI 5636	Numerical Solution of Partial Differential Equations	
CSCI 5646	Numerical Linear Algebra	
CSCI 5654	Linear Programming	
CSCI 5676	Numerical Optimization	
<i>Bin Two</i>		
Choose one:		3
CSCI 5302	Advanced Robotics	
CSCI 5322	Algorithmic Human-Robot Interaction	
CSCI 5352	Network Analysis and Modeling	
CSCI 5402	Research Methods in Human-Robot Interaction	

CSCI 5502	Data Mining	
CSCI 5616	Introduction to Virtual Reality	
CSCI 5622	Machine Learning	
CSCI 5722	Computer Vision	
CSCI 5822	Probabilistic Models of Human and Machine Learning	
CSCI 5832	Natural Language Processing	
CSCI 5839	User-Centered Design and Development 1	
CSCI 5849	Input, Interaction, and Accessibility	
<i>Bin Three:</i>		
Choose one:		3
CSCI 5135	Computer-Aided Verification	
CSCI 5253	Datacenter Scale Computing - Methods, Systems and Techniques	
CSCI 5273	Network Systems	
CSCI 5403	Cybersecurity	
CSCI 5413	Computer Security and Ethical Hacking	
CSCI 5448	Object-Oriented Analysis and Design	
CSCI 5525	Compiler Construction	
CSCI 5535	Fundamental Concepts of Programming Languages	
CSCI 5573	Advanced Operating Systems	
CSCI 5673	Distributed Systems	
CSCI 5753	Computer Performance Modeling	
CSCI 5854	Theoretical Foundations of Autonomous Systems	
Electives		
An additional 18 credits of approved graduate-level coursework are required to complete the degree, with restrictions. ^{3, 4}		18
Total Credit Hours		30

- ¹ The third one-credit course may be a repeat of CSCI 5100 or CSCI 5802, or any other one-credit approved graduate level coursework that is *not* an independent study research hour.
- ² For a list of breadth courses by category, visit the department's MS/ME Breadth Requirement (<http://www.colorado.edu/cs/current-students/graduate-students/msme-breadth-requirement/>) webpage.
- ³ Out of these credits, only 6 credits may be non-CS graduate courses.
- ⁴ Students must seek approval for any non-CS classes outside the College of Engineering and Applied Science or the following pre-approved departments: Applied Mathematics, Business, Geography, Information Science, Mathematics, Linguistics or Physics.

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students typically complete the degree requirements in two years.

Computer Science - Professional Master of Science (MSCPS)

The Professional Master of Science (MSCPS) is a degree program that offers possibilities for a wide range of students. Whether the student is

a working engineer or an undergraduate considering a career in industry, there are program options to meet their needs.

The department offers seven degree tracks, each of which result in a Professional Master of Science in Computer Science:

1. General
2. Data Science and Engineering
3. Human-Centered Computing
4. Intelligent Systems
5. Numerical Computation
6. Robotics
7. Software Systems and Cloud Computing

The Department of Computer Science has embraced this degree as an ideal opportunity to expand the high quality courses in the fields above into a wide array of courses leading to a full master's degree. The goal of the MSCPS program is to produce creative, workforce-ready graduates equipped with versatile specialized skills and technical leadership.

Adding several new subplan courses to the program now enables greater options for earning professional MS degree with a these subplans, while also offering plenty of courses to complete a full master's degree, principally with a subplan focus. Students pursuing this degree will also have access to many excellent graduate-level courses offered by the department's highly reputed faculty.

Subplans

General Track

Students opting for this track have the option to select classes from an approved list for the degree. The jobs these students get are also similar to other subplans. However, specializing in a subplan is more beneficial.

Data Science and Engineering

This subplan provides the skills to develop computer solutions that require expertise in data science and engineering. Students who complete the program receive both a master's degree in computer science and a specialization within data science and engineering. This combination is very attractive as technology companies are looking for developers that have experience in data science. Students complete both a set of core courses for the degree in addition to a set of data science courses.

Potential job titles include: Hadoop developer, BI developer, quantitative data engineer, search engineer, technical architect, big data analyst, solutions architect, data warehouse engineer, data science software engineer and ETL developer. Potential employers include Twitter, Google, Facebook, Amazon, Oracle, Uber, Microsoft and Apple.

Human-Centered Computing

In this track, students learn how to design, implement and evaluate user interfaces for a range of computing technology, and gain skills related to designing technologies to support the needs of real people. Topics covered include user-centered design, information visualization, universally accessible design and computer-supported cooperative work. Students will gain experience with the entire user-centered design process, from requirements gathering, prototyping, and qualitative and quantitative user evaluation. Many courses in this concentration are project-based and will involve user-centered research in the lab and in the field.

Potential job titles for graduates of this program include user experience researcher, user interface engineer, data scientist, interaction designer, front-end developer, accessibility specialist, mobile application developer. Potential employers include Facebook, Google, Microsoft, Twitter, Adobe, Autodesk, Sphero, Snap and Oculus.

Intelligent Systems and Robotics

The subplans in intelligent systems and robotics build expertise in algorithms and methods for developing autonomous systems, including robotics and cyber-physical systems. As part of this program, students will design and analyze systems which leverage computation to interact with the world around them through sensors and actuators. Machine learning, signal processing and control theory are all components to this program, where students become experts in creating the software for devices ranging from climate control systems to automobiles.

Potential job titles for graduates of this program focusing on *intelligent systems* include: software engineer, perception engineer, data scientist and research engineer. Potential employers include Lockheed-Martin, Amazon, Microsoft, Google and Facebook.

Potential job titles for graduates of this program focusing on *robotics* include: robotics engineer, perception engineer, control engineer and robotics scientist. Potential employers include: Amazon Robotics, Uber, Google, iRobot and DJI.

Numerical Computation

Ongoing improvements in computational capability and memory performance have increased the importance of high-fidelity simulations, optimization and data-driven science and engineering applications. Students in this subplan develop the skills to design robust and high-performance numerical methods for addressing real-world problems and develop production-grade implementations using state of the art software tools to target modern architectures and large-scale parallel computers.

Potential job titles: Computational scientist/engineer, numerical/data analyst, research scientist, software engineer, HPC developer and quantitative software engineer. Potential employers include national labs, universities, engineering ISVs (ANSYS, MSC, CD-adapco), aerospace (NASA, Boeing, ULA, SpaceX, Lockheed), exploration (Shell, Schlumberger, CMG), manufacturing (P&G, GE), technology (Amazon, Google, IBM, Motorola) and finance (HFT, mutual funds, credit card).

Software Systems and Cloud Computing

In this subplan, students learn about software systems and how they are applied to real world problems. They'll also discover how emerging cloud computing technologies can be used to implement some of the world's most popular services and applications.

For more information, visit the department's Professional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admission Requirements

Applicants for graduate study in computer science must hold at least a bachelor's degree or its equivalent from an accredited institution. They should have programming experience, a number of computer science courses and sufficient mathematical maturity to understand pure mathematics courses at the upper division (junior/senior) level. A minimum undergraduate GPA of 3.0 (on a scale of 4.0) is required for admission to the master's program.

Applicants are *not* required to submit GRE scores.

Mathematics Courses

A student's academic background should include at least three semesters of mathematics at the level of sophistication of calculus or above. Examples of such courses include calculus, differential equations, linear algebra, probability, statistics and abstract algebra. The courses should indicate that the student has achieved the mathematical maturity expected of an upper-level science, engineering or mathematics undergraduate.

Computer Science Courses

At least three one-semester courses in computer science that are beyond the introductory level are required for admissions. These are intended to demonstrate breadth of basic computer science knowledge in the areas of computer hardware, software and theory. The courses should include the equivalent of the following CU Boulder offerings:

- Hardware requirement: CSCI 2400 Computer Systems (Computer Systems)
- Software requirement: Either CSCI 3155 Principles of Programming Languages or CSCI 3753 Design and Analysis of Operating Systems
- Theory requirement: CSCI 2270 Computer Science 2: Data Structures and either CSCI 3104 Algorithms or CSCI 3434 Theory of Computation

More advanced versions of all courses are acceptable. The above courses are prerequisites to many of the graduate-level offerings, so it's important to complete these to be considered for graduate admissions. Admission without these prerequisites or their equivalents may be considered under extraordinary circumstances only.

Required Courses and Credits

The following requirements are subject to change; for the most current information, visit the department's Professional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/>) webpage.

Degree Requirements

Students must complete a total of 30 credit hours of approved graduate level course work with a grade of C or better and a cumulative GPA of at least 3.00. Students are allowed to take two non-CS courses and the rest must be CSCI courses. Students under this option are *not* allowed to take research hours or thesis option.

Code	Title	Credit Hours
Breadth Courses		
Students must complete one breadth course from each of the three bins listed below, for a total of 9 credits of breadth courses. Students must earn a grade of B or better in each of the three breadth courses.		
<i>Bin One</i>		
Choose one:		3
CSCI 5229	Computer Graphics	
CSCI 5254	Convex Optimization and Its Applications	
CSCI 5434	Probability for Computer Science	
CSCI 5444	Introduction to Theory of Computation	
CSCI 5446	Chaotic Dynamics	
CSCI 5454	Design and Analysis of Algorithms	
CSCI 5576	High-Performance Scientific Computing	
CSCI 5606	Principles of Numerical Computation	
CSCI 5636	Numerical Solution of Partial Differential Equations	
CSCI 5646	Numerical Linear Algebra	
CSCI 5654	Linear Programming	
CSCI 5676	Numerical Optimization	
<i>Bin Two</i>		
Choose one:		3
CSCI 5302	Advanced Robotics	
CSCI 5322	Algorithmic Human-Robot Interaction	
CSCI 5352	Network Analysis and Modeling	
CSCI 5402	Research Methods in Human-Robot Interaction	
CSCI 5502	Data Mining	
CSCI 5616	Introduction to Virtual Reality	
CSCI 5622	Machine Learning	
CSCI 5722	Computer Vision	
CSCI 5822	Probabilistic Models of Human and Machine Learning	
CSCI 5832	Natural Language Processing	
CSCI 5839	User-Centered Design and Development	1
CSCI 5849	Input, Interaction, and Accessibility	
CSCI 5922	Neural Networks and Deep Learning	
<i>Bin Three:</i>		
Choose one:		3
CSCI 5135	Computer-Aided Verification	
CSCI 5253	Datacenter Scale Computing - Methods, Systems and Techniques	
CSCI 5273	Network Systems	
CSCI 5403	Cybersecurity	
CSCI 5413	Computer Security and Ethical Hacking	
CSCI 5448	Object-Oriented Analysis and Design	
CSCI 5525	Compiler Construction	
CSCI 5535	Fundamental Concepts of Programming Languages	
CSCI 5573	Advanced Operating Systems	
CSCI 5673	Distributed Systems	

CSCI 5753	Computer Performance Modeling	
CSCI 5854	Theoretical Foundations of Autonomous Systems	
Project Courses		
Complete six credits of projects class from either of the following two options:		6
CSCI 5340 & CSCI 5350	Startup Essentials: Entrepreneurial Projects in Computing and Entrepreneurial Projects II	
CSCI 5040 & CSCI 5050	Professional Masters Project 1 and Professional Masters Project 2	
Additional Coursework		
An additional 15 credits are required to complete the degree, with restrictions. ^{1, 2}		15
Total Credit Hours		30

- ¹ Additional coursework may consist of no more than two non-CS classes, except for classes under subplans. (Classes listed under required sub-plans will not be considered against the two non-CS.)
- ² Students must seek approval for any non-CS classes outside the College of Engineering and Applied Science or the following pre-approved departments: Applied Mathematics, Business, Geography, Information Science, Mathematics, Linguistics or Physics.

Subplan Tracks

In addition to the above mentioned required courses, students enrolled in any the following subplans must also complete the required subplan courses as listed below.

Students must earn a grade of B or better all subplan courses. Students may count the same course towards their subplan and breadth requirements.

Data Science and Engineering (DSE) (<https://www.colorado.edu/cs/data-science-engineering-sub-plan-requirements/>)

CSCI 5828	Foundations of Software Engineering	

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in two years.

Dual Degree

MSCPS/EMEN in Computer Science and Engineering Management

Computer Science and Engineering Management (<https://www.colorado.edu/emp/>) have teamed up to offer an exciting dual degree (<https://www.colorado.edu/cs/current-students/graduate-students/ms-degree/dual-professional-ms-engineering-management/>) for MSCPS students. Student complete a total of 45 credits of graduate-level coursework. Of those, 24 credits are in CS courses and 21 credits are in EMEN courses. All degree requirements must be completed within four years of the date of commencing coursework.

Network Engineering - Master of Science (MSNE)

This coursework-only professional master's degree program prepares students to join the next generation of leaders in Internet, Intranet and cloud networking. Students will learn how to develop, build and maintain network solutions tailored to the diverse needs of your organization within both the private and public sectors.

Requirements

Admission Requirements

Applicants for graduate study in network engineering must hold at least a bachelor's degree or its equivalent from an accredited institution. We recommend that candidates have at least some experience in network engineering, system administration, or network programming.

A minimum undergraduate GPA of 3.0 (on a scale of 4.0) is required for admission to the master's program.

GRE scores are not required for admissions to this program.

Program Requirements

Required Courses and Credits

Students must complete a total of 30 credit hours of approved graduate-level coursework with a grade of C or better and a cumulative GPA of at least 3.00.

Students will take courses in the following categories: fundamentals (6 credits), core (6 credits), advanced electives (9 credits) and electives (9 credits).

Fundamentals

The courses in the Fundamentals category are designed to provide students with the background they need to succeed in this degree. Courses in this category cover the fundamental concepts of how the internet operates; how to develop network systems; and how to administer the machines (both physical and virtual) that deploy them.

Code	Title	Credit Hours
CSCI 5010		
CSCI 5020		
CSCI 5030		

Students are required to take two courses (6 credits) from the Fundamentals category unless they can demonstrate that they have acquired the necessary skills and knowledge via their undergraduate degree. Such students can petition to take two extra elective or advanced elective courses instead.

Core

The courses in the Core category begin to lay the foundation for exploring network engineering topics in depth. All aspects of network engineering from the management of network systems to the policies that govern traffic on the internet to the wireless systems that deliver information to devices on the edge are all covered.

Code	Title	Credit Hours
CSCI 5113	Linux System Administration	3
CSCI 5160	Introduction to Enterprise Networks	3
CSCI 5170	IP Routing Protocols and Policies	3
CSCI 5180	Network Management and Automation	3
CSCI 5200	Introduction to Wireless Systems	3
CSCI 5220		
CSCI 5230		

Students are required to take two courses (6 credits) from the Core category to help set the stage for taking courses in the Advanced Electives category. Students can be guided in their choice of Core courses by using the suggested tracks below to craft a curriculum plan that best meets their academic goals. If a student feels that they need to take more courses from the Core category, they can certainly do so by choosing to take additional Core classes and applying those credits towards meeting the credits associated with the Electives category.

Advanced Electives

The courses in the Advanced Electives category go in-depth on a variety of network engineering topics. Students are required to take three courses (9 credits) of advanced electives to graduate.

Code	Title	Credit Hours
CSCI 5190	Voice Over IP: Voice Network Design and Implementation	3
CSCI 5210		
CSCI 5260	Datacenter Networks	3
CSCI 5270	IP Network Design	3
CSCI 5280	Software-Defined Networking	3
CSCI 5360	Internet Service Provider Networks	3
CSCI 5380	Network Virtualization and Orchestration	3
CSCI 5620		
CSCI 5630		

Electives

The three courses (9 credits) associated with the Electives category allow students to customize the MS in Network Engineering degree to meet

their academic goals. These credits can include any of the following options:

- Any of the remaining Core courses
- Any of the remaining Advanced Electives Courses
- Any CS 5000-level course approved by petition
- At most three graduate-level courses from outside CS approved by petition

For the last two options, students are encouraged to submit petitions to the CS graduate committee *before* taking the courses they want to apply to the Electives category.

Suggested Tracks

The following sets of courses represent common tracks that students can take to target a particular area of network engineering in depth.

Network Design and Configuration

Code	Title	Credit Hours
CSCI 5160	Introduction to Enterprise Networks	3
CSCI 5260	Datacenter Networks	3
CSCI 5360	Internet Service Provider Networks	3

Network Programmability and Automation

Code	Title	Credit Hours
CSCI 5180	Network Management and Automation	3
CSCI 5280	Software-Defined Networking	3
CSCI 5380	Network Virtualization and Orchestration	3

Wireless Networking

Code	Title	Credit Hours
CSCI 5200	Introduction to Wireless Systems	3
CSCI 5220		
CSCI 5620		
CSCI 5630		

Comprehensive Networking Solutions

Code	Title	Credit Hours
CSCI 5160	Introduction to Enterprise Networks	3
CSCI 5170	IP Routing Protocols and Policies	3
CSCI 5190	Voice Over IP: Voice Network Design and Implementation	3
CSCI 5200	Introduction to Wireless Systems	3
CSCI 5270	IP Network Design	3

Technology, Cybersecurity and Policy - Master of Science (MS)

Technology, Cybersecurity and Policy (TCP) teaches cybersecurity from an interdisciplinary perspective which includes aspects of technology, engineering, leadership, policy and applications to emerging technology areas. Among the goals of TCP are to accelerate both research and learning in areas of technology, cybersecurity and policy; to provide relevant content with experiential learning; and to prepare students to be future leaders in these critical areas.

For more information, visit the MS in Technology, Cybersecurity, and Policy (<https://www.colorado.edu/cs/academics/graduate-programs/master-science-technology-cybersecurity-policy/>) webpage.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Applied Mathematics - Bachelor of Science (BS) (p. 704)
- Computer Science - Bachelor of Science (BS) (catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/computer-science-bachelor-science-bs/#acceleratedmasterstext)
- Electrical and Computer Engineering - Bachelor of Science (BS) (p. 788)

Requirements

Required Courses and Credits

The Master of Science in TCP requires 30 credit hours of coursework completed at the 5000 level or above. Students must complete the following course requirements: core (9 credit hours), depth area (15 credit hours), and capstone project, thesis or portfolio (6 credit hours). See below for additional details.

Students must complete a total of 30 credit hours of approved graduate level course work with a grade of C or better and maintain a cumulative GPA of at least 3.00.

Core Courses

The TCP program has three Core areas: (i) Technology, Thought Leadership and Policy, (ii) Networking and Secure Communications and (iii) Cybersecurity. These three areas form the cornerstones of the TCP degree, and students are required to complete the three courses listed below to explore each area. These areas cover the skills needed to become a leader in Technology, Cybersecurity and Policy and ensures graduates have the technical, policy and strategy skills to work in industry and advance to senior leadership levels. The three Core courses contribute 9 credit hours to the overall degree program.

Code	Title	Credit Hours
CYBR 5000	Seminar in Technology, Cybersecurity and Policy	1
CYBR 5010	Fundamentals of Data Communication	3
CYBR 5300	Introduction to CyberSecurity	3

TCP Depth Areas

TCP's advanced courses allow students to gain deeper knowledge and focus in the area of their choosing. Students must select a depth area and complete the 15 credit (5 course) requirement associated with that depth area. Three depth areas are currently available.

Cybersecurity Engineering

Code	Title	Credit Hours
Required Courses		
CYBR 5320	Cybersecurity Network Analytics	3
CYBR 5330	Digital Forensics	3
CYBR 5350	Security Auditing and Penetration Testing	3
Advanced Electives		
Choose two:		6
CYBR 5240	Introduction to Blockchain	
CYBR 5310	Immersive Cyber Defense	
CSCI 5413	Computer Security and Ethical Hacking	

Some TCP special topics classes (CYBR 5830) can be applied to the cybersecurity engineering depth area. For details, see the TCP student handbook or speak with the TCP graduate program advisor.

Secure Communications

Code	Title	Credit Hours
Required Courses		
CYBR 5200	Introduction to Wireless Systems	3
CYBR 5220	Wireless Local Area Networks	3
CYBR 5620		
CYBR 5630		
Advanced Elective Option		
Choose one:		3
CYBR 5230	Wireless Systems Lab	
CYBR 5240	Introduction to Blockchain	
CYBR 5420	Spectrum Management and Policy	

Custom

Students electing to take the Custom Depth Area option must first obtain approval from the TCP Program. Under the Custom Option, students must identify a sequence of 5 graduate courses that form a coherent whole that aligns with a student's academic goals and their current, and possibly longer-term, career objectives. Approval of the Custom option is not automatic and requires the student to submit a two-page proposal showing how the selected courses function as a depth area for the student.

The TCP Program is developing some recommended pathways for students who want to use the Custom depth area to specialize in combining knowledge in cybersecurity with other areas such as policy, leadership or management. Some of these pathways will become official depth areas in future years. Students are encouraged to contact the TCP Graduate Program Advisor for information about these pathways if interested.

Interdisciplinary Capstone, Thesis or Portfolio

Students in the MS in TCP program have three options for completing their degree: capstone, thesis or portfolio.

Interdisciplinary Capstone Option

Students work in teams across two semesters to complete an advanced project that builds on their Core and Depth Area courses. Projects are often done in conjunction with industry partners. Topics are selected based on the combined interests of the students, the faculty and external

partners such as industry and government. All students are required to take the first course of the sequence below. Most students will then move on to take the second course in the sequence but if a student is enrolled in the Designing for Defense class, they can choose to substitute it for the second capstone course (no petition needed). Thus, the three courses that can be used to meet the Interdisciplinary Capstone requirement are:

Code	Title	Credit Hours
CYBR 5700	Graduate Projects I	3
CYBR 6700	Graduate Projects II	3
CYBR 5550	Designing for Defense	3

Thesis Option

With faculty approval, students may elect to take 6 credits of thesis work (CYBR 6950) in place of the Interdisciplinary Capstone requirement. To complete a thesis, the student must get approval from a faculty member who will serve as their thesis advisor and find two additional faculty members who are able to serve on their thesis committee. Students will work with a faculty advisor to complete a thesis on a topic of mutual interest that includes aspects of the three Core areas. The three-member committee must be approved by the TCP Program and by the Graduate School. The student works primarily with the thesis advisor and provides both a written document and arranges a presentation (thesis defense/thesis exam) before the thesis examining committee. Examination Report Forms must be filed with the TCP Program at least two weeks prior to the date of the defense (exam). Students must be registered during the semester in which they defend their thesis. Additional information, rules, dates and deadlines, and thesis submission requirements can be found on the Graduate School (<https://www.colorado.edu/graduateschool/academic-resources/thesis-dissertation-submission/>) website.

Portfolio Option

A third capstone option is the portfolio option in which a student may petition the graduate committee to identify two courses that will help them customize their TCP degree in a way that will help them meet their academic and career goals. Students increase the chances of their portfolio petition being approved if the courses they select involve interdisciplinary and/or project-based work as defined by the syllabi from those courses. If a student's portfolio petition is not approved, they must then select either the capstone or thesis option. As a result, students must be submitting their petition for the portfolio option early in their second semester to have time to switch to one of the other two options if denied.

Taking Courses Outside of TCP

Students may take up to six credits of courses from areas outside of TCP to substitute courses within their depth area (both required courses or advanced elective courses). Students must gain approval for these two substitutions prior to completing them by submitting a petition to their graduate program advisor for review/approval by the CS graduate committee. Note: In line with standard practice for the CS graduate committee, courses from the following departments are automatically approved: Linguistics, Business, Geography, Physics, Mathematics, Applied Mathematics/STATS and Information Science.

Dual Degree Programs

The MS in TCP offers dual degree options with the following programs:

- Master of Business Administration (MBA) (p. 1341)
- Juris Doctor (JD) (p. 1668)

Students pursuing a technology, cybersecurity and policy dual degree must be admitted to both schools/programs under their respective admissions procedures and standards. For more information, visit the program's Concurrent & Dual Degrees (<http://www.colorado.edu/itp/dual-degree/>) webpage.

Computer Science - Doctor of Philosophy (PhD)

As a computer science PhD student at CU Boulder, students take part in tier one research, learning from nationally and internationally recognized faculty.

Computer Science faculty, staff, and students are engaged in cutting edge research projects that address some of the most important challenges facing society today. From harnessing the power of big data to modeling climate change to understanding the role of social media, advances in computer science today will change the world tomorrow. The department offers opportunities in seven main research areas (<https://www.colorado.edu/cs/research/>).

Students select from focus areas in artificial intelligence, robotics, computational biology, human-centered computing, numerical and scientific computing, programming languages, software engineering, systems and networking, security and theory of computing. The PhD program in computer science is available whether a student is entering graduate studies for the first time or if they already have a master's degree. While a master's is not required to enroll, our PhD students will typically earn one on the way to a PhD.

PhD students consult with a faculty advisor throughout the duration of their degree to review their research progress and course selection.

For more information, visit the department's PhD Degree (<http://www.colorado.edu/cs/current-students/graduate-students/phd/>) and Research (<http://www.colorado.edu/cs/research/>) webpages.

Requirements

Course Requirements

- 30 credit hours in courses numbered 5000 or above, including three breadth (<https://www.colorado.edu/cs/current-students/graduate-students/graduate-breadth-courses/>), three 1-credit professional development, and six depth courses.
- 30 credit hours of dissertation credit.
- A maximum of 21 credit hours of graduate coursework may be transferred from another accredited institution.
- All courses taken for the master's degree at the 5000-level or above at CU Boulder may be applied toward the doctoral degree at the university.

Preliminary Examination

The purpose of the area examination is to ensure that the student has sufficient depth to begin research in a selected area. Thus the exam tests knowledge of the general area of computer science that contains the research topic, deeper specialized knowledge of the specific research area that the student will be working in, and intellectual sophistication needed to conduct research in the area.

The area examination contrasts with the comprehensive exam, which is devoted to a focused research theme. It complements the coursework requirement of the preliminary exam, which is meant to build breadth

in Computer Science in general and general knowledge of the student's research area.

For more information, visit the department's PhD Area Exams (<https://www.colorado.edu/cs/current-students/graduate-students/phd/requirements/>) information.

Comprehensive Examination

After passing the preliminary examination, the student continues their coursework and prepares a written thesis prospectus within four years of their admission to the program. When ready, the student takes an oral comprehensive examination covering their graduate coursework and thesis prospectus. The oral examination is based primarily on a written proposal for the thesis research provided by the student to committee members in advance. This examination is conducted before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School.

For more information, visit the "PhD Comprehensive Exam/Proposal" section of the department's PhD Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/phd/requirements/>) webpage.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Technology, Cybersecurity and Policy - Doctor of Philosophy (PhD)

The technology, cybersecurity and policy PhD degree is designed for highly-motivated students seeking to conduct research at the intersection of many emerging technology and includes cybersecurity, policy and human factors. By working with cognate disciplines TCP students can achieve the PhD degree with focus areas such as: economics, linguistics, social sciences and policy disciplines more generally. Enrolled students develop the necessary skills to conduct research, along with a domain discipline focused study plan in the specific technical areas of their interests. Research foci often mirror one of the established areas of research in the program, such as wireless systems, policy and cybersecurity.

The profile of selected applicants may include those that have already earned a master's degree or have substantial work experience in the private or public sectors in the cybersecurity, information communications or telecommunications fields. The PhD program may also be of interest to academically qualified students coming straight from a range of undergraduate programs who will earn an MS degree as they progress toward the PhD degree. The future is open to interdisciplinary possibilities in technology, cybersecurity and policy.

The technology, cybersecurity and policy PhD degree program is an on-campus degree only.

For more information, visit the TCP Program (<https://www.colorado.edu/program/tcp/>) webpage.

Requirements

Course Requirements

Students must complete a total of at least 60 credits at the graduate-level (i.e., courses taken subsequent to receiving their MS and doctoral dissertation credits) in order to fulfill the requirements for a PhD degree.

The following course requirements are subject to change; for the most current information, see the department's TCP Program (<https://www.colorado.edu/program/tcp/>) webpage.

Code	Title	Credit Hours
Core Requirements		
CYBR 5300	Introduction to CyberSecurity	3
CYBR 5200	Introduction to Wireless Systems	3
CYBR 5400		3
CYBR 5510	Technology: Commercial Strategy and Operations	3
Electives		18
Options include:		
CYBR 5320	Cybersecurity Network Analytics	
CYBR 5330	Digital Forensics	
CYBR 5350	Security Auditing and Penetration Testing	
CYBR 5410	Telecommunications Law and Policy	
CYBR 5420	Spectrum Management and Policy	
CYBR 5550	Designing for Defense	
CYBR 5215	Wireless and Cellular Systems	
CYBR 5220	Wireless Local Area Networks	
CYBR 5230	Wireless Systems Lab	
CYBR 5260	Seminar: Law and Economics of the Information Age	
CYBR 5310	Immersive Cyber Defense	
Thesis Credit Hours		
CYBR 8990	Doctoral Dissertation	30
Total Credit Hours		60

Preliminary Examination

The preliminary examination consists of two components: a preliminary paper and successful demonstration of proficiency of TCP core courses. All students must complete both the prelim paper and all TCP core courses by their fourth semester (the spring semester of their second year, unless they have successfully petitioned the TCP PhD Preliminary Examination Committee for an exception by the end of the first month of the fall semester of their second year).

Comprehensive Examination

Students who have passed the preliminary examination at the PhD level and completed the required coursework (a total of 30 credits) are eligible to take the comprehensive examination the following year, roughly 12 months after the preliminary examination. The comprehensive exam consists of an oral presentation of a written thesis proposal that is reviewed and approved by the student's thesis committee. The thesis proposal should describe the problem statement, research methodology,

and proposed research plan, along with a brief review of the background of the topic and summary of early results. The research plan should break down the research into development phases and include a tentative schedule for the completion of each research phase.

PhD Dissertation

Following the semester in which the comprehensive exam is passed, the student must be continuously registered each fall and spring for dissertation hours until the student successfully defends his or her dissertation or formally withdraws from the program. These students are required to register for at least 5 credit hours per semester of dissertation research (on campus), or for at least 3 credit hours per semester if dissertation research takes place off campus (distance).

Cybersecurity - Graduate Certificate

The Technology, Cybersecurity and Policy (TCP) program offers a graduate certificate that provides foundational knowledge and technical skills for students seeking career opportunities in the growing area of cybersecurity. Credits earned in this certificate can be applied towards earning an MS in Technology, Cybersecurity and Policy.

Requirements

Required Courses and Credits

This certificate requires completion of 12 credit hours, as follows:

Code	Title	Credit Hours
Required Course		
CYBR 5300	Introduction to CyberSecurity	3
Elective Courses		
Choose three:		9
CYBR 5010	Fundamentals of Data Communication	
CYBR 5310	Immersive Cyber Defense	
CYBR 5320	Cybersecurity Network Analytics	
CYBR 5330	Digital Forensics	
CYBR 5350	Security Auditing and Penetration Testing	
Total Credit Hours		12

Additional Requirements

A student may petition the graduate committee to substitute one of the elective courses with a different graduate-level course. The petition must justify how the new course applies to a certificate in cybersecurity and/or how it supports the academic and career goals of the student.

A student may not have a course fulfill the requirements for multiple certificates.

To earn a certificate, students must receive a minimum grade of a C or higher in each course. Furthermore, the cumulative GPA for all courses applied to the certificate must be 3.0 or higher.

Wireless Network Engineering - Graduate Certificate

The Technology, Cybersecurity and Policy program (TCP) wireless networks and technologies graduate certificate offers students foundational knowledge and technical skills in the highly sought-after

job relevant area of wireless networking. Students seeking a certificate can also apply their TCP course credits toward a master's degree in the program. This ecosystem is evolving and many exciting things are happening in the wireless space including 5G research and deployment, space and aerospace applications, the deployment of the Internet of Things (IoT) and the associated policy and other issues.

For more information, visit the program's Graduate Certificates (<http://www.colorado.edu/itp/prospective-students/graduate-certificates/>) webpage.

Requirements

The wireless networks and technologies graduate certificate requires the completion of 12 credit hours and is currently offered on-campus only.

Code	Title	Credit Hours
CYBR 5010	Fundamentals of Data Communication	3
CYBR 5220	Wireless Local Area Networks	3
CYBR 5215	Wireless and Cellular Systems	3
CYBR 5830	Special Topics (Wireless Systems)	3
Total Credit Hours		12

Plan of Study

Course	Title	Credit Hours
Fall Semester		
CYBR 5010	Fundamentals of Data Communication	3
CYBR 5830	Special Topics (Wireless Systems)	3
Credit Hours		6
Spring Semester		
CYBR 5220	Wireless Local Area Networks	3
CYBR 5215	Wireless and Cellular Systems	3
Credit Hours		6
Total Credit Hours		12

Creative Technology and Design

Administered by the ATLAS Institute, graduate programs in creative technology and design are highly interdisciplinary, nurturing robust technical and design skills while giving students the maximum flexibility to explore and develop their creative visions.

ATLAS faculty interests are broad, including areas such as e-textiles, human-robot interaction, game design and engineering at the molecular level. Graduate students hail from a wide range of academic disciplines, including computer science, engineering, art, the humanities, the natural sciences, music and design.

Graduates of the professional MS program most often pursue careers in design, technology and social impact fields. PhD alumni work as researchers in industry and government, and as faculty members in academia.

For those seeking a graduate experience surrounded by a vibrant, interdisciplinary academic community of creative designers, engineers and inventors, ATLAS is the place.

For more information, visit the institute's Graduate Programs (<https://www.colorado.edu/atlas/academics/grad/>) webpage.

Course code for this program is ATLS.

Professional Master's Degree

- Creative Technology and Design - Master of Science (MS) (p. 1472)

Doctoral Degree

- Creative Technology and Design - Doctor of Philosophy (PhD) (p. 1474)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alistar, Mirela (https://experts.colorado.edu/display/fisid_164177/)
Assistant Professor; PhD, Technical University of Denmark

Alistar, Mirela
Assistant Professor; PhD, Danmarks Tekniske Universitet (Denmark)

Bethancourt, Matthew R. (https://experts.colorado.edu/display/fisid_156489/)
Senior Instructor, Faculty Director; MFA, Parsons School of Design

Black, Jonathan
Lecturer

Braha, Daniel
Lecturer; BA, Arizona State University

Bruns, Carson J. (https://experts.colorado.edu/display/fisid_159851/)
Assistant Professor; PhD, Northwestern University

Devendorf, Laura (https://experts.colorado.edu/display/fisid_158564/)
Assistant Professor; PhD, University of California, Berkeley

Do, Ellen Yi-Luen (https://experts.colorado.edu/display/fisid_159925/)
Professor; PhD, Georgia Institute of Technology

Dupré, Jill Van Matre (https://experts.colorado.edu/display/fisid_144395/)
Scholar in Residence, Associate Faculty Director; JD, University of Colorado Boulder

Gross, Mark D. (https://experts.colorado.edu/display/fisid_100095/)
Professor, Institute Director; PhD, Massachusetts Institute of Technology

Hales, Ian W. (https://experts.colorado.edu/display/fisid_134701/)
Instructor; MS, University of Denver

Hein, Arielle (https://experts.colorado.edu/display/fisid_157379/)
Instructor; MPS, New York University

Leithinger, Daniel (https://experts.colorado.edu/display/fisid_163356/)
Assistant Professor; PhD, Massachusetts Institute of Technology

Margaret, Annie (https://experts.colorado.edu/display/fisid_159961/)
Instructor; PhD, Northwestern University

Pierce, Aileen J. (https://experts.colorado.edu/display/fisid_134704/)
Senior Instructor, Associate Faculty Director; BS, Carnegie Mellon University

Rankin, Daniel (https://experts.colorado.edu/display/fisid_156453/)
Instructor; MS, University of Colorado Boulder

Rankin, Daniel W. (https://experts.colorado.edu/display/fisid_156453/)
Instructor; MS, University of Colorado Boulder

Rezvani, Sheiva
Instructor; MA, New York University

Schaal, David A. (https://experts.colorado.edu/display/fisid_114824/)
Senior Instructor; MFA, University of Colorado Boulder

Seltzer, Wayne
Lecturer; MA, Massachusetts Institute of Technology

Swanson, Joel E. (https://experts.colorado.edu/display/fisid_134311/)
Assistant Professor; MFA, University of California, San Diego

Szafir, Daniel J. (https://experts.colorado.edu/display/fisid_156420/)
Assistant Professor; PhD, University of Wisconsin–Madison

Szafir, Danielle N. (https://experts.colorado.edu/display/fisid_156317/)
Assistant Professor; PhD, University of Wisconsin–Madison

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/)
Associate Professor; PhD, University of California, San Diego

Zamore, Shaz (https://experts.colorado.edu/display/fisid_166083/)
Instructor; PhD, University of Washington

Courses

ATLS 5040 (3) Game Design

Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4040

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to the ATLAS (PATL) student group only.

ATLS 5120 (3) Mobile Application Development

Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4120

Grading Basis: Letter Grade

ATLS 5130 (3) Typography

This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4130

Requisites: Restricted to graduate students only.

ATLS 5140 (3) Game Development

Builds on concepts and processes learned in ATLS 4040/5040.

Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4140

ATLS 5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5150

Requisites: Restricted to CYBR/TLEN graduate students.

ATLS 5151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ARTF 5200

ATLS 5210 (3) Global Development I

Introduces students to the theories and policy of international development. Examines the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. Focuses on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques.

Requisites: Restricted to graduate students only.

ATLS 5214 (3) Big Data Architecture

Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4214

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5220 (3) Global Development II

Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development.

Requisites: Requires prerequisite courses of ATLS 5210 (minimum grade D-). Restricted to graduate students only.

ATLS 5230 (3) Case Studies in Social Impact

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4230

Requisites: Restricted to graduate students only.

ATLS 5240 (3) Technology for Social Impact Laboratory

Prepares students for the semester-long practicum. Students work in teams to design interventions that address unique socio-economic and environmental development issues. Teams will design a variety of interventions, including telehealth and distance education programs, communication networks, and pro-development policies. Topics will be chosen by teams and guided by program faculty and external domain experts.

Requisites: Requires prerequisite courses of ATLS 5230 (minimum grade D-). Restricted to graduate students only.

ATLS 5244 (3) Empathy and Technology

Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4244

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5250 (3) Technology for Social Impact Practicum

Introduces methods and models that can be employed in program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing initiatives.

Requisites: Restricted to graduate students only.

ATLS 5320 (3) Mobile Application Development: Advanced Topics

Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4320

Requisites: Requires prerequisite course of ATLS 5120 (minimum grade C).

Grading Basis: Letter Grade

ATLS 5380 (3) Future of Video: Technology, Policy, and Economics

Examines the issues that have been created by the shift from analog to digital technologies, the shift from narrowband/wideband systems to broadband systems, and the shift to converged networks (i.e. networks able to convey voice, data, image and video traffic on a common platform) based upon packet switching and Internet Protocol (IP) suite.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5480

Requisites: Requires prerequisite of CYBR 5001 (minimum grade C-).

Restricted to CYBR graduate students.

ATLS 5402 (3) Research Methods in Human-Robot Interaction

Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5402

Requisites: Restricted to graduate students only.

ATLS 5410 (3) Creative Technologies

This course gives students hands-on exposure to a wide range of technologies, including 3D printing, laser cutting, microcontrollers, sensors and programming. Through rapid prototyping and problem solving, students gain technical fluency and competence while identifying technology skills they wish to develop further.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5420 (3) Professional Seminar: Business of Creativity

This course was designed specifically to prepare students to make the most of their time in the CTD Master's Program, and to prepare them for a career within the creative technology and design professional landscape. The course helps students identify career goals and mentors, and helps them position themselves for industry through course-selection, portfolio development, and projects. There is also a survey element to the course which exposes students to creative technology professionals who discuss their career paths, offer advice, and provide insight into their individual design process.

Requisites: Restricted to Atlas (ATLS) graduate students only.

Grading Basis: Letter Grade

ATLS 5430 (3) Design Methods

In this course, students will learn to develop sense-making techniques as designers. This includes framing and structuring design research, making representations to generate insights, as well as documenting and communicating processes and outcomes. The class is structured around weekly discussions and activities anchored in real-world design challenges; and it will also offer tutorials on key design skills such as rapid prototyping and visual communication.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5440 (3) Design Studio

In this course students work with both faculty and industry expert mentors on developing a semester-long group project. In small teams, students learn to develop an interactive experience that combines project design and technical execution. The class is designed to reflect a real world interactive design project experience, in which students must present and deliver a large scale completed project for demonstration/exhibition at the end of the semester.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5519 (1-3) Advanced Special Topics in Creative Technology and Design

Analyzes special interest areas of multidisciplinary in creative technology and design research and practice.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATLS 5529 (1-3) Advanced Special Topics: Critical Perspectives in Technology

Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4529

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5606 (3) Critical Technical Practice

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships. Counts as Mastery in Information Science.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5610 (6) Startup Practicum

Presumes that entrepreneurship can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerses students in the daily leadership and innovation challenges of the startup environment and serves as a clinic in thinking, decision making and mental agility that will benefit any area of business—not just startups.

Requisites: Restricted to graduate students only.

ATLS 5616 (3) Introduction to Virtual Reality

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616, ATLS 4616, CSCI 5616

ATLS 5620 (3) User-Experience Design 1

Emphasizes that user-centered design is the first and primary consideration in the design process. UCD teaches how to design successful interactions from research into users' behaviors, attitudes and expectations via three key elements to designing successful user experiences: 1) Listen, Observe, and Research; 2) Concept and Design for Your Users; 3) Deliver/Launch.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5630 (3) Web Front-End Development

Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4630

Requisites: Restricted to graduate students only.

ATLS 5640 (4) Design Thinking

Explores design thinking and how it can be applied conceptually and practically to innovation in areas as diverse as business organization and product development to topics and areas including but not limited to, story, design, UX, interaction design, communication strategy and presentation. Fast-paced, project-based, and immersive, students will work in small teams to discover solutions to real-world problems.

Requisites: Restricted to graduate students only.

ATLS 5650 (3) Introduction to Programming

Provides a hands-on introduction to programming logic, environments, and execution using Ruby as the primary programming language. Covers basic programming principle, syntax, design patterns, and best industry practices while focusing on developing elegant, problem-solving skills through code.

Requisites: Restricted to graduate students only.

ATLS 5660 (3) Creative Code

Exposes students to front-end, web-based design and development processes and best practices. WordPress will be used as the back end CMS. Students will learn how to design and develop using WordPress as a framework. At the end of the semester, students will present a final project to illustrate what they have learned and the logic of their build.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites: exposure to HTML, CSS, JavaScript, PHP and MySQL and previous experience with WordPress for blogging and/or content publication.

ATLS 5670 (3) Content Strategies

Experiments with different frameworks on how to combine messaging with creative to communicate complex ideas, brand story, product, and finally measure success. Gain experience and expertise with the various content types and channels, with an understanding of how to apply them and the capabilities to do so in solving creative and business problems.

Requisites: Restricted to graduate students only.

ATLS 5680 (3) Creative Tech Studio

Emphasizes fundamentally, theoretically, and practically that technology and creativity are not opposing disciplines but rather a dynamic and complementary blending of idea and execution that is iterative and evolving through the dynamic exchange and interaction of ideas and tools. Each Studio will offer a different conceptual challenge, such as using technology to bridge physical and digital environments, game design, or storytelling.

Repeatable: Repeatable for up to 12.00 total credit hours.

Grading Basis: Letter Grade

ATLS 5720 (3) User-Experience Design 2

Expands on techniques and opportunities presented in User-Experience Design 1 with a deeper dive into research and prototyping practices as means to insight into user desires and preference, adoption, and execution of product and branded experiences in a variety of contexts and locations within the global experience economy.

Requisites: Requires prerequisite course of ATLS 5620 (minimum grade C).

ATLS 5730 (3) Front-End Development 2

Requires that students are proficient in front-end environment and ready for advanced front-end development using these tools - HTML 5, CSS3, JS - on weekly projects, a mid-term project, and a final project. This course develops more robust and elegant uses of the semantic use of elements as well as the benefits of using standards-based, valid code, CSS efficiencies, and JS and its libraries.

ATLS 5740 (3) Design Thinking 2

Presents visual thinking as a complex process that can be supported in every stage using specific design techniques. Provides practical, task-oriented information for designers and software developers charged with design responsibilities, including examples of integrated text and full-color data stories, all of which are robust in principles of "active vision," viewing graphic designs as cognitive tools.

ATLS 5809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4809 and CSCI 4809 and CSCI 5809

Requisites: Restricted to graduate students only.

ATLS 5880 (3) Interactive Machine Learning for Customizable and Expressive Interfaces

Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4889, CSCI 4889 and CSCI 5880

Requisites: Requires prereqs (CSCI 3022 or APPM 4570 or APPM 3570 or APPM 4520 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or MCEN 4120) (CSCI 3002 or CSCI 3202 or CSCI 4448) all min grade C-. Restricted to grad students in the ATLAS program.

Grading Basis: Letter Grade

ATLS 5900 (1-6) Masters Level Independent Study

Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATLS 6519 (1-3) Advanced Special Topics in Creative Technology and Design

Analyzes special interest areas of multidisciplinary in creative technology and design research and practice.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATLS 6910 (3-6) Social Impact Practicum

This practicum allows Social Impact MS students to synthesize what they have learned and test their readiness for a career in Social Impact. Practicum assignments are arranged under the supervision of the MS Program Director and involve work with a non-governmental organization, development agency or technology/policy entity. Successful completion is required for graduation from the Social Impact MS Program.

Requisites: Requires prerequisite courses of ATLS 5210 and ATLS 5220 and ATLS 5230 and ATLS 5240 and ATLS 5250 (all minimum grade D-).

ATLS 6920 (3) Creative Industries Final Project

This course allows MS-CTD students to synthesize what they have learned and test their readiness for a career in the creative technologies and design field. Through this class students work with an academic and/or industry mentor to create a capstone final project emblematic of their focus during their master degree studies. Students learn to propose and scope work, adhere to budget constraints and time schedules, communicate their work, and create a final end deliverable that is presented to the larger ATLAS community. This final project is meant to serve as a culminating portfolio project that helps position students for industry after graduation. Successful completion is required for graduation from the MS-CTD Program.

Requisites: Restricted to Tech, Media and Society (ATLS) master's degree students only.

ATLS 7000 (1) ATLAS Colloquium

This student/faculty seminar critically examines issues in technology, media and society from the multiple interdisciplinary perspective of the gathered participants. Topics may include: IT and business, security, ethics, globalization, digital divide, IT and education, human computer interaction and others. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

ATLS 7800 (2) Online Course Design for the Foreign Languages

Learn about the challenges and affordances of designing online foreign languages courses. Read research articles and book chapters pertaining to instructional design issues and online teaching strategies. Experiment with the latest forms of educational technologies. Students enrolled in the course will design and teach a two-week online language course. Department enforced prerequisite: two years of language teaching experience at the college level.

Grading Basis: Pass/Fail

ATLS 7900 (1-6) Doctoral Level Independent Study

Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 8990 (1-10) Doctoral Dissertation

Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Atlas (ATLS) graduate students only.

Creative Technology and Design - Master of Science (MS)

For more information, visit the ATLAS Institute's Graduate Programs (<https://www.colorado.edu/atlas/academics/grad/>) webpage.

Program Tracks

The professional master's degree (MS) in creative technology and design includes two tracks: Creative Industries and Social Impact.

Creative Industries

Through project-based learning, students in this track gain technical fluency, designing systems and products to realize their creative visions. Students learn more than design thinking; they graduate from the program as creative technologists equipped with robust portfolios of thoughtful projects and prototypes.

The program is driven by a unique and relevant core curriculum, flexibly shaped by student interest and guided by leaders at the cutting edge of industry.

The creative industries track connects students to the current and most relevant considerations of the field. Through hands-on workshops, visiting speakers, studios and classes, students work directly with leading professionals on real-world issues, gaining design expertise and technical skills as they learn the business of creativity.

Social Impact

The social impact track prepares students to leverage information and communication technology in support of underserved communities, in the U.S. and around the world.

Graduates are creative problem solvers tackling some of the world's biggest issues. Learning in the program prepares students to apply information and communication technologies (ICT) for the greatest social impact. Students understand that the most effective and culturally appropriate solutions balance technology and societal need; through a project-based curriculum, students learn to critically evaluate and apply both.

One of the program's greatest strengths is its diverse student cohort. A broad mix of talent leads to more thoughtful and thorough development projects and solutions.

A hallmark of the program is the final field-based practicum semester. Students are placed with non-governmental organizations (NGO), development agencies, foundations or technology companies, where they apply social impact interventions to real-world problems—experience that positions them favorably for careers in the field after graduation, sometimes with the same organizations.

Requirements

Creative Industries Track

The creative industries track requires a total of 33 credit hours, of which at least 27 must be completed at the 5000 level or above, including the mandatory core courses listed below. In addition, specific focus area requirements must be met. Students must receive a grade of B or higher in all coursework, maintaining a minimum overall GPA of 3.000.

For more information, visit the ATLAS Institute (<https://www.colorado.edu/atlas/academics/graduate/ms-technology-media-society/>) webpage.

Creative Technology and Design - Doctor of Philosophy (PhD)

The PhD program at CU Boulder's ATLAS Institute emphasizes out-of-the-box invention and radical inquiry, attracting students whose interests and knowledge span multiple disciplines and domains. Conducting compelling and relevant research, ATLAS PhD students are central to the institute's thriving academic community of engineers, artists and designers.

Structurally, the ATLAS PhD program is like any other research-based doctoral program: a student forms an advisory committee, takes courses, takes a qualifying examination, proposes a dissertation, performs research, writes a dissertation and defends it.

However, unlike most U.S. doctoral programs, the ATLAS PhD program has few required courses; instead, the curriculum is crafted individually, with students working with their advisory committees to identify the expertise needed to research their area of focus.

For more information, visit the ATLAS Institute's PhD Program (<https://www.colorado.edu/atlas/academics/graduate-programs/atlas-phd-program/>) webpage.

Requirements

Course Requirements

- A minimum of 30 credit hours of courses numbered 5000 or above where students earn a minimum of 3.00 GPA.
- A minimum of 30 credit hours of dissertation credit are required for the degree.
- Students must complete the following two courses: Research Methods and PhD Research Professional Seminar, and attend the ATLAS Colloquium three semesters over the span of their time in the PhD program.

Program Proposal

To maintain good standing in the program, all students must complete their academic program plan/program proposal by the end of the second semester. In general, ATLAS academic plan/program proposals include general research area and the courses to be taken and other research/disciplinarily appropriate activities planned.

Preliminary Examination

To maintain good standing in the program, all students must complete their preliminary examination by the end of the second year. The preliminary examination will demonstrate the student's preparation for scholarly work in his/her chosen area. Generally, this is a 3–5 page document that is approved by the advisor and the ATLAS graduate committee.

Comprehensive Examination

To maintain good standing in the program, all students must complete their comprehensive exam by the end of the second semester of their fourth year in the program. The comprehensive examination will outline the student's completed research and proposed research agenda. This includes both an oral and written exam delivered to their dissertation committee and open to the larger community.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all CU Boulder Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Electrical Engineering

Areas of focus in electrical engineering include photovoltaic, wind and renewable energy systems, power electronics systems, electromagnetic theory, microwave systems, antennas, remote sensing, bioelectronics and biomedical engineering, communications and signal processing, medical imaging, optoelectronics, nanophotonics and nanodevices, biophotonics, human/machine interfaces, controls theory, embedded systems engineering, and complex network systems.

With a highly regarded faculty and \$11 million awarded in new contract and grant funding in fiscal year 2020, the Department of Electrical, Computer and Energy Engineering (<http://www.colorado.edu/ecee/>) is the perfect place to take your education to the next level.

We offer several degree options tailored to both working engineers looking to advance their careers and to those looking to pursue a career in academia. Research is concentrated in six broad areas: optics, nanostructures and bioengineering; communications and signal processing; computer engineering; dynamics and controls; electromagnetics, RF and microwaves; and power electronics.

Course code for this program is ECEN.

Research Centers

Colorado Power Electronics Center (CoPEC)

Since it was founded in 1983, the power electronics group at the University of Colorado has maintained a tradition of innovative design-oriented and application-driven research. Colorado Power Electronics Center (CoPEC) activities now span the range of applications from high-efficiency milliwatt converters for portable battery-operated systems, to hundreds or thousands of watts for computer, data centers, telecommunications, aerospace, and medical applications, to hundreds of kilowatts for electrified transportation, solar photovoltaic and wind power systems.

Our current research activities include projects in high-efficiency, high-power converter technology, power electronics for portable, battery-operated systems, converter modeling and computer-aided analysis, high-efficiency modular and composite power conversion architectures utilizing wide bandgap power semiconductors, low harmonic rectifier technology for single-phase and three-phase applications, solar photovoltaic power systems, and advanced digital and mixed-signal control techniques. We collaborate with other research groups at the University of Colorado, including those in power and renewable energy systems, microelectronics packaging, RF/microwave systems, control and semiconductor devices. We also maintain collaborations with the National Renewable Energy Laboratory and within the NSF Engineering Research Center ASPIRE, which is focused on electrified transportation. For more information, call 303-492-7327 or visit the CoPEC (<http://ecee.colorado.edu/copec/>) website.

ASPIRE

Launched in 2020, **ASPIRE** (Advancing Sustainability through Powered Infrastructure for Roadway Electrification) is exploring a diverse range of electrified transportation questions, from electrified highways that energize vehicles to the placement of charging stations, data security and workforce development. Participating in ASPIRE are CU Boulder researchers in electrical, computer and energy engineering, including Colorado Power Electronics Center, Power and Renewable Energy Systems, Optimization, and Data Science, as well as researchers in computer science and mechanical engineering. The ASPIRE Engineering Research Center is funded by a \$26 million National Science Foundation (NSF) grant and led by Utah State University.

The University of Colorado Center for Environmental Technology (CET)

Understanding and managing the environment—whether for agriculture, health, water resources, disaster mitigation, energy generation, transportation, weather forecasting, climate modeling or biodiversity—requires accurate knowledge of many variables on a wide range of

time and space scales. Measurements for environmental purposes are made either using in situ or remote sensors, and rely upon a variety of different means, including acoustic and electromagnetic waves, point measurements and wide-area imaging and active and passive systems. A variety of different types of platforms can be used for environmental observation, including ships and submersibles, aircraft (both manned and unmanned), spacecraft and stationary sites.

Research and educational activities at the CU Center for Environmental Technology are focused on developing sensors, systems of sensors and associated hardware and algorithms for environmental observation with a focus on new remote and in situ techniques to meet contemporary scientific and applications goals. This is accomplished by direct involvement of CU faculty, CET engineering staff and undergraduate and graduate students on the development of sensing systems to meet the observational needs of a number of government and industry sponsors. CET training involves close interaction between students and experienced professional engineers, practicing scientists and CU faculty.

The CET was established in 2006 with a major donation of equipment from the NOAA Earth System Research Laboratory, and has members, associates and students from within the broad earth science and engineering communities of Colorado. For more information, contact the CET director at 303-492-9688 or visit the Center for Environmental Technology website.

Research and Instructional Equipment

The department's special equipment and facilities include a class 1000 clean room facility for epitaxial growth and fabrication of microwave and optical devices; an anechoic chamber; high-vacuum and vacuum deposition equipment for thin-films research; an integrated circuits laboratory; ion implantation equipment; crystal growing facilities; a modern systems laboratory; a laboratory for data storage research; a digital system design laboratory; a power electronics research laboratory; undergraduate laboratories in circuits, electronics; power electronics; digital signal processing and communications; embedded systems; microwaves; a holography and optics laboratory; an advanced optical metrology lab; numerous special purpose computers; a computer system development laboratory; a roof-mounted antenna range; a special microscope for laser manipulation of microorganisms in vivo; a bio-microwave laboratory; a solar power lab; photovoltaic device fabrication and characterization facilities; and bioelectronics fabrication and integration capabilities.

The Colorado Nanofabrication Laboratory (CNL) is an open user facility on campus. Our mission is to provide expertise, facilities, infrastructure and teaming environments to enable and facilitate interdisciplinary research in microelectronics, optoelectronics and MEMS.

The Department of Electrical, Computer and Energy Engineering has a large variety of computing equipment to support its research and instructional activities. In addition to specialized computing equipment, this includes several hundred PCs, Macs, a department server and a student server. These machines are connected to the campus-wide ethernet network.

Master's Degrees

- Electrical Engineering - Master of Engineering (ME) (p. 1487)
- Electrical Engineering - Master of Science (MS) (p. 1487)
- Electrical Engineering - Professional Master of Science (MSEE) (p. 1491)

Doctoral Degree

- Electrical Engineering - Doctor of Philosophy (PhD) (p. 1494)

Certificates

- Photonics - Graduate Certificate (p. 1494)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ECEN 5005 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5008 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5009 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5011 (1-4) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4011

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5012 (3) Special Topics

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5013 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Campus section restricted to ECEE graduate students in Academic subplans ESE or C-EEENP or C-ECENEEEP only.

Grading Basis: Letter Grade

ECEN 5016 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Optics

ECEN 5018 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5021 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Bioengineering

ECEN 5023 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering, Embedded Systems.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5024 (3) Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4024

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5028 (1-4) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5032 (3) Special Topics

Additional Information: Departmental Category: Bioengineering

ECEN 5053 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering - Embedded Engineering.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4053

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5100 (1) Graduate Seminar and Professional Development

Introduces graduate students to research topics and concepts as presented by guest speakers in the ECEE seminar series. Professional development topics such as grant writing, conducting research, communication skills, and ethics will also be covered. Weekly assessment will consist of essays or other assignments.

Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

ECEN 5104 (3) Passive Microwave Circuits

Building on fundamentals taught in a class such as ECEN 3410 (Electromagnetic Waves), this course teaches fundamentals of microwave passive circuit analysis using scattering parameters. Design of impedance matching networks, impedance transformers, couplers, filters, dividers/combiners and other typical circuits used at microwave frequencies are covered. Using an industry-standard CAD tool, design of microstrip circuits is emphasized. Assignments include theoretical and CAD approaches to analysis and design of passive microwave transmission-line circuits.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5107 (3) Electric Power Grid

Examines the electrical grid, including conventional generation, transmission/ distribution, and new renewable generation technologies. Issues including grid stability, the increase in variable generation on the grid, and how the electrical grid will change in the future will be addressed. Intended for students with an engineering background from outside electrical engineering who desire an introduction to the power grid.

Requisites: Excludes graduate students in Electrical Engineering or Electrical Engineering Concurrent degree plans.

Additional Information: Departmental Category: Power

ECEN 5110 (1-3) Graduate Teaching Practicum

Provides training and hands-on experience in teaching of ECEE courses. Students will work with an instructor of an ECEE course to carry out teaching activities such as lecturing, leading discussion sessions, writing homework and examination problems, and relevant grading.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 5114 (3) Advanced Electromagnetics

Building on fundamental electromagnetics undergraduate classes, such as ECEN 3400 and ECEN 3410 (Electromagnetic Fields and Waves), this graduate-level class covers the macroscopic theory of electromagnetism governed by Maxwell's equations, including their applications across the electromagnetic spectrum. The topics include, but are not limited to: boundary conditions; auxiliary potential functions; fundamental electromagnetic theorems; uniform and non-uniform plane waves; quasi-TEM waves, TE and TM waves in metal waveguides; wave modes in dielectric waveguides; Gaussian beams; as well as practical examples of these topics.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5122 (3) Wireless Local Area Networks

Emphasis on the IEEE 802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified programs, and will learn how to model and analyze WLAN traffic using industry standard tools.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5220

Requisites: Requires prerequisite course of ECEN 3810 or APPM 3570 or MATH 4510 (minimum grade D-).

Recommended: Prerequisite CYBR 5430.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5126 (3) Computational Optical Imaging

Covers the fundamentals of computational optical imaging modalities, namely systems in which the hardware (optics, sensors, illumination) is designed in conjunction with algorithms (implemented optically, electronically and via software) to deliver information about a scene. Students learn the analysis and design of modern imaging systems. Covers a variety of applications including biomedical imaging, nanoscopy, photography and space imaging.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ECEN 5133 (3) Fundamentals of Computer Security

Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).

Grading Basis: Letter Grade

ECEN 5134 (3) Electromagnetic Radiation and Antennas

This course is introduction to antenna theory and antenna applications in applied electromagnetics. Elements of electromagnetic theory are first reviewed through the discussion of fundamental antenna parameters. Topics such as input impedance, radiation pattern, gain, radar cross section, near- and far-field, antenna temperature, and others are discussed first. The theory of operation of electric and magnetic dipoles, small and large dipoles, monopoles, and loops, as well as impact of different grounds on their parameters are discussed next. Other antennas such as bicones, helices, Yagi-Uda, microstrip patches, horns, reflectors, slots, spirals, log-periodics, etc. are also discussed. The fundamentals of array theory inclusive of linear, planar and circular topologies, coupling, beamforming, as well as elements of array synthesis are also discussed. Students will be exposed to the commercial software tools used to design antennas and will work individually or in teams to accomplish different project assignments.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5138 (3) Control Systems Analysis

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Topics covered in this course will be investigated in more depth, require external readings, additional homework will be assigned, and the exams will be more difficult.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4138

Requisites: Restricted to graduate students in Electrical Engineering (EEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3300.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5139 (3) Computer-Aided Verification

Covers theoretical and practical aspects of verification of finite-state systems (hardware) and infinite-state systems (programs). Model checking: temporal logics, explicit-state and symbolic search, BDDs. Constraint solvers: SAT solvers, decision procedures. Program verification: invariants, partial vs. total correctness, abstraction. Department enforced requisite: general proficiency in discrete mathematics and programming.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5135

Requisites: Restricted to Electrical/Computer Engineering (EEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEN) or Electrical/Computer Engineering (C-ECEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite CSCI 2824.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5154 (3) Computational Electromagnetics

This course is introduction to the frequency domain methods used in computational electromagnetics (CEM) for solving complex radio-frequency (RF) problems. The course starts with the review of electromagnetic theory and mathematical concepts used in CEM, followed by the introduction to the partial differential and integral equation based methods. Specifically, the fundamentals behind the finite difference method, finite element method, and method of moments are discussed and implemented to solve problems such as shielded microstrip line, charge distribution on metallic objects, waveguide modes, wire antennas, etc. Students will work independently and in teams to develop their own codes to solve given boundary value problems. The implementation of different methods in commercial software tools is continuously emphasized. An understanding of electrostatics and electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5156 (3) Physical Optics

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5224 (3) High Speed Digital Design

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4224

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5244 (3) Stochastic / Environmental Signal Processing

Provides a baseline understanding for research and development in signal processing and analytics for environmental and other data-intensive applications. Topics include parameter estimation, transforms, linear and nonlinear estimation, data assimilation and detection. Applications include numerical weather prediction, GNSS sensing, ionospheric sounding, radar, radiometry, surveillance, target detection and tracking. Previous coursework in linear systems and electromagnetic waves recommended.

Grading Basis: Letter Grade

ECEN 5254 (3) Remote Sensing Signals and Systems

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5264 (3) Electromagnetic Absorption, Scattering, and Propagation

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

Recommended: Prerequisites ECEN 3400 and ECEN 3410.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5273 (3) Network Systems

Focuses on design and implementation of network programs and systems, including topics in network protocols, architectures, client-server computing, software-driven networking, and other contemporary network hardware-software system design and programming techniques. Familiarity with C and Unix is required.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5273

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5322 (3) Data and Network Science

The course covers the theory and design of algorithms that are used to model, analyze, and extract information from large scale datasets and networks. The course includes a project.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4322

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5341 (3) Bioelectromagnetics

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4341

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Bioengineering

ECEN 5345 (3) Introduction to Solid State Physics

Provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons and electrooptical effects. Makes use of quantum mechanical methods. Department enforced prerequisite: basic quantum mechanics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5355 (3) Principles of Electronic Devices 1

Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ECEN 3320.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5358 (3) Optimization and Optimal Control

Introduces the theory and practice of optimization and optimal control. Topics include basic theory, nonlinear system trajectories and regulation, function space operators and derivatives, optimality conditions, barrier functionals and Newton's method in function space.

Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 5448.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5407 (3) Renewable Energy and the Future Power Grid

This course will begin with an introduction to the power grid including planning and operations for the transmission and distribution level power grid. The course will reflect that while many of the solutions to the integration of variable generation are technical in nature, policy and economics play a large role in the changes that are occurring within the power system. After examining the technological specifications of the most important variable generation sources (wind power, solar photovoltaics, and solar thermal power), as well as traditional power generation sources, other aspects of power system planning and operations in the future power grid will be examined in detail.

Grading Basis: Letter Grade

ECEN 5417 (3) Power System Analysis

This course covers the basics of power system analysis techniques. Students will be introduced to the concepts behind the fundamental principles of traditional bulk power systems. The difference between single and three phase powers will be discussed. Students will learn how to model bulk power system components and the per unit system. Understanding the flow of power in the system will be examined in detail as students will learn about and apply both AC and DC powerflow formulations.

Recommended: Corequisite ECEN 5407.

Grading Basis: Letter Grade

ECEN 5423 (3) Chaotic Dynamics

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4423 and CSCI 4446 and CSCI 5446

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5427 (3) Power System Planning & Operations

This course will focus on bulk power system planning and operations, with special emphasis on systems with high variable renewable energy penetrations. Electricity markets will also be presented, and the differences with vertically integrated utilities will be discussed. Students will develop an understanding of electricity market dynamics in one of the course projects by participating in an electricity market game. The application of optimization problems in bulk power system operations will be discussed and applied by the students in another course project. They will develop a production cost model to simulate bulk power system operations of a test system under different scenarios.

Requisites: Requires prerequisite course ECEN 5407 (minimum grade B-).

Recommended: Prerequisite ECEN 5417.

Grading Basis: Letter Grade

ECEN 5437 (3) Distribution System Analysis

Fundamental aspects of the analysis of power distributions systems, including the traditional distribution grid, loads, components, topologies, operational aspects, and power flow analysis. Includes how the distribution system is changing with the introduction of distributed energy resources.

Requisites: Requires corequisite course of ECEN 5407.

Recommended: Corequisite ECEN 5417.

Grading Basis: Letter Grade

ECEN 5448 (3) Advanced Linear Systems

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5458 (3) Sampled Data and Digital Control Systems

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design.

Requisites: Restricted to College of Engineering graduate students only.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4517

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5523 (3) Compiler Construction

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4553 and CSCI 4555 and CSCI 5525

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5527 (3) Power Electronics Power Lab

Create, build, and debug an original design of a power converter to meet given a specification, project schedule, and related requirements. Lectures provide supporting information. Compliance to the specification is shown through a formal test report and demonstration to an instructor.

Requisites: Requires prerequisite courses of ECEN 5517 and ECEN 5797 (all minimum grade B-). Restricted to Electrical and Computer Engineering (ECEN) graduate students with Power Electronics (PPE) subplan only.

Grading Basis: Letter Grade

ECEN 5532 (3) Digital Signal Processing Laboratory

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4532

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5533 (3) Fundamental Concepts of Programming Languages

Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5535

Requisites: Requires prerequisite course CSCI 3155 (minimum grade D-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5543 (3) Software Engineering of Standalone Programs

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5548

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CSCI 1300 and CSCI 2270 (minimum grade C-).

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5555 (3) Principles of Energy Systems and Devices

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4555

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5573 (3) Advanced Operating Systems

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5573

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5593 (3) Advanced Computer Architecture

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems for such systems, and architectural features required for multicore processor designs. Also studies current and historically important computer architectures.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5593

Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

Recommended: Prerequisite ECEN 4593.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5603 (3) Software Project Management

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.

Requisites: Requires prerequisite courses ECEN 4583 and ECEN 5543 and CSCI 4318 (all minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5606 (3) Optics Laboratory

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms and experimentation of fiber optics and Fourier optics. Department enforced prerequisite: undergraduate optics course (e.g. PHYS 4510).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5606

Additional Information: Departmental Category: Optics

ECEN 5612 (3) Random Processes for Engineers

Deals with random time-varying functions and is therefore useful in the broad range of applications where they occur. Topics include review of probability, convergence of random sequences, random vectors, minimum mean-square error estimation, basic concepts of random processes, Markov processes, Poisson processes, Gaussian processes, linear systems with random inputs, and Wiener filtering. Applications range from communications, communication networks, and signal processing to random vibration/stress analysis, mathematical finance, physics, etc.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5613 (3) Embedded System Design

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented and presented. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5616 (3) Optoelectric System Design

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4616

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Optics

ECEN 5622 (3) Information Theory and Coding

Covers fundamental limits of data compression, reliable transmission of information and information storage. Topics include information measures, typicality, entropy rates of information sources, limits and algorithms for lossless data compression, mutual information, and limits of information transmission over noisy wired and wireless links. Optional topics include lossy data compression, limits of information transmission in multiple-access and broadcast networks, and limits and algorithms for information storage.

Requisites: Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5623 (3) Real-Time Embedded Systems

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5626 (3) Active Optical Devices

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ECEN 5355.

Additional Information: Departmental Category: Optics

ECEN 5632 (3) Theory and Application of Digital Filtering

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5634 (3) Microwave and RF Laboratory

This course is a hands-on introduction to RF and microwave topics, from fundamentals including vector network analyzer (VNA) calibration and operation, power measurements, and antenna characterization, to system-level topics such as RADAR systems and superheterodyne links. Students work in small groups on weekly experiments based on both coaxial and waveguide setups. An understanding of electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed.

Requisites: Requires a prereq course of ECEN 3410 (min grade D-). Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5638 (3) Control Systems Laboratory

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4638

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade D-). Restricted to graduate students only.

ECEN 5645 (3) Introduction to Optical Electronics

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5652 (3) Detection and Extraction of Signals from Noise

Introduces detection, estimation, and related algorithms. Topics in detection include simple/composite hypothesis testing, repeated observations and asymptotic performance and sequential detection. Topics in estimation include Bayesian estimation including minimum mean-square estimation and non-random parameter estimation. Topics in algorithms vary. Examples include algorithms for state estimation and smoothing in Hidden Gauss-Markov models and the expectation-maximization algorithm. Applications include communications, radar/sonar/geophysical signal processing, image analysis, authentication, etc.

Requisites: Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5672 (3) Digital Image Processing

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion).

Requisites: Requires prerequisite course ECEN 5632 (minimum grade C-).

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5673 (3) Distributed Systems

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5673

Recommended: Prerequisite CSCI 5573 or a course in computer networks.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5682 (3) Theory and Practice of Error Control Codes

Introduces error control coding techniques for reliable transmission of digital data over noisy channels. Topics include algebraic characterizations of cyclic codes, convolutional codes, modern graph codes, decoding algorithms for block codes, Viterbi algorithm and iterative decoding on graphs. Applications include modern digital communication and storage systems including deep space communications, satellite broadcasting, cellular networks, and optical disk storage.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5692 (3) Principles of Digital Communication

Introduces fundamental principles of efficient and reliable transmission of information used in wired and wireless digital communication systems including cable modems, smart phones/tablets, cellular networks, local area (wi-fi) networks, and deep-space communications. Topics include bandwidth and power constraints, digital modulation methods, optimum transmitter and receiver design principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5696 (3) Fourier Optics

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ECEN 3300 and ECEN 3410.

Additional Information: Departmental Category: Optics

ECEN 5713 (3) Advanced Embedded Software Development

Building on fundamentals taught in ECEN 5813 PES, this course teaches more advanced programming principles for embedded systems that are implemented with the use of an embedded operating system. Topics include Linux kernel space and user programming, driver design, multi-threaded programming, and operating systems fundamentals, software design patterns, sound development methods and practices, and use of debugging and performance tools to create applications and enhance operating systems' services embedded system prototypes and products.

Requisites: Requires prerequisite course of ECEN 5813 (minimum grade D-). Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec CmpElec Eng-Prof Degree (C-ECENEEEP) only.

Recommended: Prerequisites This course assumes students have direct coding and tool experience including C-programming Bare Metal Firmware Design, Compilation with GCC & Build Systems with GNU Make, Git, Linux command line operations, shell environment, compilation, Lab instruments, DVM, Logic Analyzer, Oscilloscope or demonstration of portable, maintainable, and testable software design.

ECEN 5720 (1) Practical Printed Circuit Board Design Accelerator

This course introduces students to the most important skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will learn the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with a custom board design project. A commercial EDA tool widely used in the electronics industry will be used for the project. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4730 or ECEN 5730 ECEN 4720

Recommended: Prerequisites ECEN 2250 and ECEN 2260 and ECEN 2270.

ECEN 5730 (3) Practical Printed Circuit Board Design and Manufacture

This course prepares students with all skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will master the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with three different board design projects with increasing challenge. A commercial EDA tool widely used in the electronics industry will be used for all projects. Previously offered as a special topics course. Degree credit not offered for this course and ECEN 4720 or ECEN 5720.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4730

Recommended: Prerequisites ECEN 2250 and ECEN 2260 and ECEN 2270.

ECEN 5737 (3) Adjustable-Speed AC Drives

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine).

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3170.

Additional Information: Departmental Category: Power

ECEN 5738 (3) Theory of Nonlinear Systems

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications. Formerly ECEN 7438.

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5753 (3) Computer Performance Modeling

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4753 and CSCI 4753 and CSCI 5753

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5763 (3) Embedded Machine Vision and Intelligent Automation

Introduces students to machine vision and machine learning methods used in automation, autopilots and security and inspection systems. Embedded and automation topics include implementation of algorithms with FPGA or GP-GPU embedded real time co-processing for autopilots (intelligent transportation), general automation and security including methods for detection, classification, recognition of targets for inspection, surveillance, search and rescue, and machine vision navigation applications.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5773 (3) Developing the Industrial Internet of Things

This course goes beyond consumer IoT hype to emphasize a much greater space for potential embedded system applications and growth: The Industrial Internet of Things (IIoT), also known as Industry 4.0. Cisco's CEO stated: "IoT overall is a \$19 Trillion market. IIoT is a significant subset including digital oilfield, advanced manufacturing, power grid automation, and smart cities". The course examines emerging markets, technology trends, applications and skills required for exploring career opportunities in this space.

Requisites: Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

Recommended: Prerequisites ECEN 5613, ECEN 5823, ECEN 5053, and ECEN 5133.

ECEN 5783 (3) Embedded Interface Design

This course deeply explores interface design approaches and architectures for creating embedded system prototypes and products. For both machine and user interfaces, we will examine best practices for the interface design process, including considerations of characteristics of the information to be transferred between devices or between a device and a user. Projects leverage the now standard Raspberry Pi 3 single-board computer (SBC), providing a strong foundation for exploring many elements of interface design.

Requisites: Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

Recommended: Prerequisites knowledge of programming, particularly Python, ECEN 2120, ECEN 2350, ECEN 1030, ECEN 1310, CSCI 1300.

ECEN 5797 (3) Introduction to Power Electronics

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4797

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Power

ECEN 5803 (3) Mastering Embedded Systems Architecture

Acquire an understanding of embedded systems architectures for the purpose of creating prototypes or products for a variety of applications. The salient issues in the decision making process will be examined, including trade-offs between hardware and software implementations, processor and operating system selection and IP creation or acquisition. Projects will involve the latest software development and tools and hardware platforms.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5807 (3) Modeling and Control of Power Electronic Systems

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, null-double injection techniques in linear circuits, input filter design, and low-harmonic rectifiers.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5813 (3) Principles of Embedded Software

Introduces principles around embedded software elements and software development needed for the Embedded Systems Engineering core curriculum. Student will write C program applications that employ efficient, high performance and robust software design techniques. Topics include bare-metal firmware, c-programming optimization and introductions to underlying embedded architecture. Sound testing and debug practices will be instilled and utilized in several application projects.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5817 (3) Resonant and Soft-Switching Techniques in Power Electronics

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, LCC, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched PWM converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits.

Requisites: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5821 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4821 and ASEN 4426 and ASEN 5426

Additional Information: Departmental Category: Bioengineering

ECEN 5823 (3) Internet of Things Embedded Firmware

Acquire firmware development skills to meet low energy and internet connectivity demands of embedded systems. Event-driven firmware techniques will be explored through programming assignments, transitioning to programming an Internet of Things RF Network Protocol such as Bluetooth Low Energy or Thread. The coursework will align with the latest industry firmware and embedded wireless protocol trends.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5827 (3) Analog IC Design

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4827

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Additional Information: Departmental Category: Power

ECEN 5830 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 5833 (3) Low Power Embedded Design Techniques

The course explores through weekly quizzes, assignments, and a course project, low energy hardware design concepts, selecting components to meet reliability goals, radio implementation, power supply design, product design, and system bring up. The programming of the microcontroller or SoC will most likely be ζ coding to the metal ζ to control individual microcontroller peripherals and utilizing them in the most energy efficient ways.

Requisites: Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

Recommended: Requisites Students should have knowledge of assembly and C programming, digital logic design, and embedded computer architecture, and have had at least one course in each of these subjects, such as ECEN 5813 or ECEN 5823, students should also have experience using a microcontroller Integrated Development Environment (IDE) and its associated tools including its debugger and register views.

ECEN 5837 (3) Mixed-Signal IC Design Lab

Software laboratory course extends the concepts developed in ECEN 5827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application.

Requisites: Requires prerequisite course of ECEN 5827 (minimum grade C-).

Additional Information: Departmental Category: Power

ECEN 5840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 5853 (3) Embedding Sensors and Motors

Introduces students to the design of sensors and motors, and methods that integrate them into embedded systems used in consumer and industrial products. Students will learn about sensor technologies and motors through lectures, recorded and online videos, online reading, and through laboratory experiments. Students will build systems that take sensor inputs, and sort, filter and evaluate the resulting data. They will also learn how to use sensor input to measure properties of motors.

Requisites: Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

Recommended: Prerequisites ECEN 1400, ECEN 2250, ECEN 2260 and ECEN 2440 or equivalent coursework.

ECEN 5863 (3) Programmable Logic Embedded System Design

Learn to design programmable systems on a chip for the purpose of creating prototypes or products for a variety of applications. Explore complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD). Implement synchronization and timing closure in these devices. Projects will involve the latest software and FPGA development tools and hardware platforms.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEENP.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5907 (3) Special Topics

Special topics class.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

ECEN 6016 (1-3) Special Topics

Additional Information: Departmental Category: Optics

ECEN 6139 (3) Logic Synthesis of VLSI Systems

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits.

Recommended: Prerequisites ECEN 5139 and CSCI 5454.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 6144 (3) Electromagnetic Boundary Problems

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics.

Requisites: Requires prereq course of ECEN 5114 or 5134 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.

Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 6800 (3) Master of Engineering Report

Additional Information: Departmental Category: General

ECEN 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: General

ECEN 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

ECEN 6960 (3) Master of Engineering Project

Additional Information: Departmental Category: General

ECEN 7840 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General

ECEN 7849 (1-6) Independent Study

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: VLSI CAD Methods

ECEN 8990 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 10.00 total credit hours.

Additional Information: Departmental Category: General

Electrical Engineering - Master of Engineering (ME)

At CU Boulder, the Department of Electrical, Computer & Energy Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-engineering/>) has focused our ME degree on professional master's programs that serve highly employable disciplines and provide skills based on industry needs.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

A minimum of 30 credit hours of academic work acceptable to the student's advisory committee and within the rules established by the College of Engineering and Applied Science and the Graduate School will be required for the ME degree (<http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-engineering/>).

- All 30 course credit hours in ECEN at the 5000-level or above or.
- Minimally, 15 in sufficiently technical ECEN 5000+ with remainder in related Engineering, Math, Science including up to 15 EMEN course credit hours upon permission from faculty advisor
- *Optionally*, maximally 6 credit hours may be at the 4000+ level. However, all course work from ECEN, TLEN/CYBR, EMEN and ATLS *must solely* be at the 5000+ level.

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework (if on campus) or six years (if working full-time and taking only one course, each semester). Most students complete the degree in 2 to 5 years (on-campus, full-time student vs. off-campus, full-time worker/part-time student, respectively).

Dual Degree Program

ME in Electrical, Computer & Energy Engineering and Engineering Management

The Department of Electrical, Computer & Energy Engineering also offers a dual ME degree with the Engineering Management Program. The dual degree requires 45 total credit hours, where 21 credits are from the Engineering Management Program (EMP) and 24 credits are from the Electrical, Computer & Energy Engineering Program.

For more information, visit the program's Electrical, Computer and Energy Engineering & ME Engineering Management Dual Degrees (<https://www.colorado.edu/emp/me-electrical-computer-and-energy-engineering-me-engineering-management/>) webpage.

Electrical Engineering - Master of Science (MS)

The Department of Electrical, Computer & Energy Engineering (ECEE) offers degree options tailored to both working engineers looking to advance their careers and to those looking to pursue a career in academia. Research is concentrated in six broad areas:

- optics, nanostructures and bioengineering
- communications and signal processing
- computer engineering
- systems and controls
- electromagnetics, RF and microwaves
- power electronics

For more information, visit the department's Prospective Students (<http://www.colorado.edu/ecee/graduate-program/prospective-students/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Coursera Option

The Master of Science in Electrical Engineering is also available as a completely online master's degree (<https://www.colorado.edu/ecee/msee/>) through the Coursera platform.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab (<https://www.colorado.edu/ecee/undergraduate-program/degrees/bachelors-accelerated-masters-degree/>) for the associated bachelor's degree(s):

- Electrical and Computer Engineering - Bachelor of Science (BS) (catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/electrical-computer-energy-engineering/electrical-computer-engineering-bachelor-science-bs/#acceleratedmasterstext)
- Electrical Engineering - Bachelor of Science (BS) (catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/electrical-computer-energy-engineering/electrical-engineering-bachelor-science-bs/#acceleratedmasterstext)

Requirements

- All MS students must complete a total of 30 credit hours of coursework (including thesis hours, if applicable) with a grade of C or better and a cumulative GPA of at least 3.00.
- At least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in sufficiently technical¹ ECEN courses.

- *Optionally*, maximally 6 credit hours may be at the 4000+ level. However, all course work from ECEN, TLEN/CYBR, EMEN and ATLS *must solely* be at the 5000+ level.

For more information, visit the department's Master of Science (<http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-science/>) webpage.

Degree Plans

Plan I: Thesis Option

Students must complete 4–6 credit hours of MS thesis. The total number of combined hours of independent study and thesis research shall not exceed 9 hours. The Plan I project culminates with an oral presentation and written thesis.

Plan II: Non-Thesis Option

A maximum of 6 credit hours of independent study can be used toward the 30-credit-hour requirement. No thesis is required, and there is no cumulative examination.

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in two years.

- ¹ "Sufficiently technical" usually means the course requires at least one technical pre-requisite course, and that its primary focus is engineering/mathematical problem-solving rather than having a policy-based focus.

Electrical Engineering - Master of Science (MS) Online

The online Master of Science in Electrical Engineering (MS-EE), hosted on the internationally acclaimed Coursera (<https://www.coursera.org/degrees/msee-boulder/>) platform, offers stackable graduate-level courses, graduate certificates, and a fully accredited master's degree in electrical engineering. The MS-EE on Coursera students earn the same credentials as our on-campus students. There are no designations on official CU transcripts, degrees, or certificates, that this is an online program.

Focus Areas

Embedded Systems

Embedded system engineering is used in industries such as aerospace and defense, energy, industrial automation, health care, networking and communication, security, transportation and more. Embedded systems also drive the Internet of Things (IoT), enabling countless human-to-machine and machine-to-machine applications including home automation, security and more.

The embedded systems engineering curriculum covers essential embedded technologies, synthesizes foundational principles, and directly applies them to current tools and trends. It is structured to provide you with a broad, versatile and highly competitive skill set. We emphasize practical, project-based learning across hardware and embedded software design that addresses numerous end markets, as well as multiple semiconductor technologies including sensors, controllers, programmable devices and development tools.

Power Electronics

Power electronics is a key enabling technology in essentially all electronic systems and is increasingly important in the grid interface of renewable energy sources and in efficient electrical loads. The necessity for power electronics technology in these rapidly expanding areas creates an increasing need for design engineers equipped with knowledge and skills to actively participate in multidisciplinary teams.

The power electronics curriculum addresses this demand for skilled power electronics design engineers, covering switching power supplies, DC-DC converters, inverters, power factor correction converters and LED lighting drivers. The power electronics curriculum emphasizes fundamentals and application in the power electronics field. This domain competency applies to end markets such as power management, portable power, computer systems, medical applications, spacecraft power systems, the automotive industry, renewable energy and the utilities.

Photonics & Optics

While 20th-century technology was defined by the growth of electronics, the 21st century belongs to photonics. LEDs will light households powered by photovoltaic panels and filled with displays and cameras communicating by optical fiber to distant owners wearing virtual reality glasses. Laser 3D printing will transform manufacturing. New microscopes and telescopes will peer into the depths of living cells and distant galaxies.

The photonics curriculum provides a firm theoretical foundation on the generation, modulation, radiative or guided transmission, sensing, and detection of optical signals. It also covers optical telecommunications, medical instrumentation, photovoltaic power generation, information processing, optical instruments and environmental sensing. While some of these industries are mature, photonics continues to grow into new industries such as LED lighting and on-chip silicon photonics for multi-core CPUs.

Control and Communications

The curriculum in digital communications helps lay the foundation for this wireless world. These courses prepare you for a career in reliable and high-speed data communications and data learning. Control techniques are used whenever a quantity (like speed, temperature or force, for instance) must be made to behave in some desirable way over time. In the modern world, the rapid evolution of technological demands imposes extremely challenging and widely varying control problems—problems we want to help you prepare to solve. The MS-EE controls curriculum explores topics such as developing controllers for aircraft, spacecraft, information storage systems, human-machine interfaces, manufacturing processes and power systems.

Electromagnetics, RF, Microwaves, and Remote Sensing

The electromagnetics, RF, microwaves and remote sensing curriculum in the MS-EE on Coursera invites you to explore an exciting electrical engineering field that engages topics such as active circuits and antennas for communications and radar, theoretical and numerical techniques for analysis of high-frequency circuits and antennas, RF photonics, artificial electromagnetic materials and electromagnetic remote sensing.

Computer Engineering

Computer engineering encompasses a wide range of topics surrounding this interaction between hardware and software. Computer engineers of the future will be versatile full-stack developers, comfortable with understanding the technical depths of software development

while also possessing a wide knowledge of the underlying hardware implementations. The MS-EE on Coursera curriculum in computer engineering emphasizes computer-aided verification and synthesis.

Program Policies

This specialized program does not align with standard campus policies. Please refer to the Specialized Programs (p. 1685) section of the catalog for more information.

Admission Requirements

The MS-EE program utilizes performance-based admissions for enrollment. There is no traditional application for admission to the degree. Students do not need to take the GRE or submit letters of recommendation or proof of language proficiency. Neither a prior degree nor university transcripts are required for admission. Because this is a purely online program, students do not need to complete a background check to enroll.

A student desiring admission to the MS-EE program must complete four required protocols:

1. Take one pathway specialization for credit with at least a grade of C in each course.
2. Achieve a computed pathway specialization grade-point average (GPA) of at least 3.00.
3. Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.
4. Declare their intention to seek the degree, which they can do before, during, or after any work in a pathway specialization.

Upon completion of these four steps the student is admitted to the MS-EE program. Students may successfully complete a designated pathway specialization and declare intent at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree. Non-degree seeking students may enroll in for-credit courses.

All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

Program Requirements

The diagram displayed on the Electrical Engineering (<https://www.colorado.edu/ecee/msee/>) website shows how the program's courses and certificates can be stacked into the full 30 credit hour degree.

Embedded Systems Track

Certificates

To earn a graduate certificate (9 credits), students must complete the required specializations.

Industrial Internet of Things - Graduate Certificate

Required specializations:

- Embedded Sensors and Motors Specialization
- Embedded Interface Design Specialization
- Developing Industrial Internet of Things Specialization

Embedded Programmable Logic - Graduate Certificate

Required specializations:

- FPGA Design for Embedded Systems Specialization
- Soft Processor Design for FPGAs Specialization
- Designing Domain Specific Architecture Processors Specialization

Specializations

Embedding Sensors and Motor Specialization

Electrical Engineering - Professional Master of Science (MSEE)

The professional Master of Science degree in electrical engineering is a professional degree composed of advanced courses relevant to working engineers.

The department offers four degree tracks, each of which result in a professional Master of Science degree in electrical engineering (MSEE).

Program Tracks**Embedded Systems Engineering (ESE) Track**

The Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>) (ESE) track provides comprehensive coverage of essential embedded technologies, current tools and trends. It is structured to provide students with a broad, versatile skill set and is coupled with industry input for continuous curriculum updates.

Through flexible core course options and electives, students enrolled in the ESE program pursue a 30-credit-hour MSEE degree. Many courses offer distance learning options through CU Boulder Connect.

Power Electronics (PPE) Track

Power Electronics (<http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/>) is a key enabling technology in essentially all electronic systems and is increasingly important in the grid interface of renewable energy sources and in efficient electrical loads. The necessity for power electronics technology in these rapidly expanding areas creates an increasing need for design engineers equipped with knowledge and skills to actively participate in multidisciplinary teams.

Through flexible core course options and electives, students enrolled in this program pursue a 30-credit-hour MSEE degree. The program is intended for students and engineers with a BS degree in electrical engineering or the equivalent. Entering students must have adequate knowledge of circuits and electronics, as taught in undergraduate courses intended for EE majors.

Photonics (PHO) Track

While 20th-century technology was defined by the growth of electronics, the 21st century belongs to photonics (<https://www.colorado.edu/ecee/graduate-program/degrees/photonics/>). LEDs will light households powered by photovoltaic panels and filled with displays and cameras communicating by optical fiber to distant owners wearing virtual reality glasses. Laser 3D printing will transform manufacturing. New microscopes and telescopes will peer into the depths of living cells and distant galaxies. Photonics graduates will

command skills in design, fabrication and laboratory practice to place them at the forefront of these industries and many more not yet invented.

Photonics is the electrical engineering sub-discipline concerned with the generation, modulation, radiative or guided transmission, sensing and detection of optical-frequency signals. Application areas include optical telecommunications, medical instrumentation, photovoltaic power generation, quantum information processing, optical instruments and environmental sensing. While some of these industries are mature, photonics continues to rapidly grow into new industries such as LED lighting and on-chip silicon photonics for multi-core CPUs.

Through flexible core course options and electives, students enrolled in this program pursue a 30-credit-hour MSEE degree. The program is intended for students and engineers with a BS degree in electrical engineering or the equivalent. Entering students must have adequate knowledge of photonics, as taught in undergraduate courses intended for EE majors.

Next-Generation Power and Energy Systems (PPS) Track

The Next-Generation Power and Energy Systems (<https://www.colorado.edu/ecee/graduate-program/degrees-programs/next-generation-power-and-energy-systems/>) (PPS) track offers five core courses and numerous electives for the 30-credit hour program to prepare students with the specialized knowledge required to practice grid integration of renewable energy into integrated energy systems, taught by instructors from CU Boulder's faculty and National Renewable Energy Laboratory (NREL) research programs

Through flexible core course options and electives, students enrolled in the PPS program pursue a 30-credit-hour MSEE degree. Many courses also offer distance learning options.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admission

A minimum undergraduate GPA of 3.00 is required for application to the master's program. Students who are interested in the PhD degree and have strong academics (including 3.50 or higher GPA) should apply directly to the PhD program (p. 1494).

Course Requirements

The following course requirements are subject to change; for the most current information, visit the department's Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>), Power Electronics (<http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/>), Photonics (<https://www.colorado.edu/ecee/graduate-program/degrees/photonics/>) or Next-Generation Power and Energy Systems (<https://www.colorado.edu/ecee/graduate-program/degrees-programs/next-generation-power-and-energy-systems/>) webpages.

Students must complete a total of 30 credit hours (including both course and thesis hours) with a grade of C or better and a cumulative GPA of at least 3.00. At least 24 credit hours must be completed at the 5000-level

or above, and at least 18 of those credits must be in sufficiently technical ECEN courses.

Program Tracks

Embedded Systems Engineering (ESE) Track (non-thesis)

Code	Title	Credit Hours
ESE Core Courses		
Choose five of the following:		15
ECEN 5613	Embedded System Design	
ECEN 5623	Real-Time Embedded Systems	
ECEN 5803	Mastering Embedded Systems Architecture	
ECEN 5813	Principles of Embedded Software	
ECEN 5823	Internet of Things Embedded Firmware	
ECEN 5833	Low Power Embedded Design Techniques	
ECEN 5853	Embedding Sensors and Motors	
ECEN 5863	Programmable Logic Embedded System Design	
ESE Program Electives		
Choose two of the following (or additional ESE core courses):		6
ECEN 5013	Special Topics (Advanced Printed Circuit Board Design for Signal Integrity)	
ECEN 5013	Special Topics (ASIP and IP Core Processor Design)	
ECEN 5133	Fundamentals of Computer Security	
ECEN 5224	High Speed Digital Design	
ECEN 5593	Advanced Computer Architecture	
ECEN 5713	Advanced Embedded Software Development	
ECEN 5763	Embedded Machine Vision and Intelligent Automation	
ECEN 5730	Practical Printed Circuit Board Design and Manufacture	
ECEN 5773	Developing the Industrial Internet of Things	
ECEN 5783	Embedded Interface Design	
Open 5000 Level Electives		
Choose three 5000-level electives from the ESE core, ESE electives, other ECEE courses, or courses in other departments, with approval of academic advisor.		9
Total Credit Hours		30

For more information, visit the department's Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>) webpage.

Power Electronics (PPE) Track

This curriculum is built around a core of three theory courses and two laboratory courses that provide practical laboratory and design experience of specific relevance to the practice of power electronics.

Code	Title	Credit Hours
Required Theory Courses		
ECEN 5797	Introduction to Power Electronics	3

ECEN 5807	Modeling and Control of Power Electronic Systems	3
ECEN 5817	Resonant and Soft-Switching Techniques in Power Electronics	3

Required Laboratory Courses

ECEN 5517	Power Electronics and Photovoltaic Power Systems Laboratory	3
-----------	---	---

Choose one 5000-level project laboratory in power electronics (offered every fall). 3

Electives

Select one of the following power electronics electives: 3

ECEN 5007	(Power Electronics for Electric Drivetrain Vehicles)	
ECEN 5737	Adjustable-Speed AC Drives (spring)	
ECEN 5827	Analog IC Design (fall)	
ECEN 5837	Mixed-Signal IC Design Lab (alternate spring semesters)	
ECEN 5XX8	Integrated Circuits and Devices for Power Electronics (alternate spring semesters)	

Grid Integration of Renewables

ECEN 5XX7	Control of Power Electronics in AC Systems and Microgrids	
ECEN 5XX7	Renewable Energy and the Future Power Grid	
ECEN 5XX7	Advances in Control and Optimization of Power Systems	
ECEN 5XX7	Power System Analysis	

Technical Electives

Choose three technical electives with advisor approval. 9
Recommended electives include courses in control systems, RF/microwaves and engineering management.

Open Elective

Choose an additional elective course. 3
Total Credit Hours 30

For more information, visit the department's Power Electronics (<http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/>) webpage.

Photonics (PHO) Track

Code	Title	Credit Hours
------	-------	--------------

PHO core courses*Offered in Fall:*

ECEN 5156	Physical Optics	3
ECEN 5696	Fourier Optics	3
ECEN 5345	Introduction to Solid State Physics	3

Offered in Spring:

ECEN 5616	Optoelectric System Design	3
ECEN 5606	Optics Laboratory	3
ECEN 5626	Active Optical Devices	3
ECEN 5355	Principles of Electronic Devices 1	3

PHO elective courses

Offered in variable semesters

ECEN 5005	Special Topics (Photovoltaic Devices)	3
-----------	---------------------------------------	---

ECEN 5015	(Nanophotonics)	3
ECEN 5016	Special Topics (Quantum Mechanics)	3
ECEN 5026	(Computational Imaging)	3
ECEN 6006	(Numerical Methods in Photonics)	3

For more information, visit the department's Photonics (<https://www.colorado.edu/ecee/graduate-program/degrees/photonics/>) webpage.

Next-Generation Power and Energy Systems (PPS) Track

Code	Title	Credit Hours
------	-------	--------------

Core Courses

ECEN 5797	Introduction to Power Electronics	3
ECEN 5407	Renewable Energy and the Future Power Grid (Renewable Energy and the Future Power Grid)	3
ECEN 5417	Power System Analysis (Power Systems Analysis)	3
ECEN 5427	Power System Planning & Operations (Power System Operations & Planning)	3
ECEN 5437	Distribution System Analysis (Distribution System Analysis)	3

Elective Courses

At least 3 credit hours of ECEN courses at the 5000 level or above.

AREN 5010	Energy System Modeling and Control	
AREN 5570	Building Electrical Systems Design 1 (Building Electrical Systems)	
AREN 5060	Distributed Electricity Generation	
AREN 5830	Architectural Engineering Special Topic (Grid-Connected Systems)	
ECEN 5007	(Data Analytics and Data-Driven Decision Making for Modern Power & Energy Systems)	
ECEN 5007	(Energy Systems Optimization)	
ECEN 5007	(Natural Gas Systems Modeling and Analysis)	
ECEN 5007	(Power Electronics for Electric Drivetrain Vehicles)	
ECEN 5007	(Power System Dynamics with Renewable Energy)	
ECEN 5517	Power Electronics and Photovoltaic Power Systems Laboratory	
ECEN 5807	Modeling and Control of Power Electronic Systems	
ENVM 5005	The Business of Sustainable Energy	
ENVM 5006	Energy Policy in the 21st Century	

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one-and-a-half to two years.

Electrical Engineering - Doctor of Philosophy (PhD)

The Doctor of Philosophy (PhD) is the terminal degree for those seeking a technical or research career in electrical engineering.

Students typically complete their PhD within 4 to 6 years, depending on whether they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program directly without a master's degree.
