The primary focus of a PhD student is to perform novel research and support their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. Most of our PhD students are supported through research and teaching assistantships, and are also encouraged to apply for their own source of funding. Others are self-funded.

For more information, visit the department's Prospective Students (<http://www.colorado.edu/ecee/graduate-program/prospective-students/>) webpage.

Requirements

Course Requirements

- A minimum of 30 credit hours of engineering, math and science courses numbered 5000 or above (at least 18 of these must be in sufficiently technical ECEN; none of these can be TLEN/CYBR, EMEN or ATLS) with a minimum of 3.00 GPA (with no lower than a B- in any single course).
- Included in these 30 credit hours, 2 credits of ECEN 5100: Graduate Seminar and Professional Development and 2 credits of ECEN 5110: Graduate Teaching Practicum are required for all students entering the PhD program in academic year 2021-2022 and beyond.
- 30 credit hours of dissertation credit are required for the degree.
- A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a PhD degree if approved by the graduate committee of the department and the Graduate School.
- All courses taken for the master's degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the university, however, the technical requirements in the first bullet point still apply.

Preliminary Examination

PhD students must take a preliminary examination within their first two years. They are given two chances to pass. If a student takes an exam in one research area on their first attempt and a different area on their second attempt, those comprise their two maximum attempts.

These prelim exams are given by faculty in respective research groups. Depending on the research area, the exam could consist of oral and written parts, or a literature search and an oral report, or some other form of exam. If a student passes one part on the first attempt, then they need only take and pass the remaining part during their subsequent attempt. The outcome of an exam can also be a conditional pass, in which the student is required to carry out additional activities such as problem solving or taking a course to build foundational knowledge. Those who do not pass after two attempts can earn a master's degree pending fulfilling the other academic requirements for that program. In exceptional cases,

a third attempt can be requested by petition to the Chair of Graduate Studies.

Comprehensive Examination

Students must pass an oral comprehensive examination before the student's doctoral committee of five or more graduate faculty members, three of which must be rostered in the ECEE department, chosen by the student and approved by the department and the Graduate School. The oral examination before the committee is based primarily on a written proposal for the thesis research provided by the student to committee members in advance.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework. Extensions beyond this timeline may be granted via petition to the Graduate College and approved by the ECEE Chair of Graduate Studies.

Photonics - Graduate Certificate

While 20th-century technology was defined by the growth of electronics, the field of photonics is coming of age in the 21st century. LEDs are lighting households powered by photovoltaic panels and connected to the internet via optical fiber. Holographic displays and virtual reality glasses are providing new forms of visualization. New microscopes are peering into living cells with resolutions that break previous limits. Photons are being used to interrogate atoms for quantum computations. Photonics graduates will command skills in theory, design, fabrication and laboratory practice to place them at the forefront of these industries and many more not yet invented.

Photonics is the electrical engineering sub-discipline concerned with the generation, modulation, radiative or guided transmission, sensing and detection of optical-frequency signals. Application areas include optical telecommunications and instrumentation, optical computing and data transmission, medical imaging, renewable energy, and environmental sensing. While some of these industries are mature, photonics continues to rapidly grow into emerging technologies such as quantum computing and cryptography, optogenetics, and virtual reality.

Photonics courses at CU Boulder engage high-caliber students from around the world. The courses typically run at a fast pace, often involving a mixture of fundamental theory, design in relevant industry standard CAD tools and individual projects.

For more information visit the department website (<https://www.colorado.edu/ecee/graduate-program/degrees/photonics/>).

Requirements

Admission to a graduate degree-seeking program in the ECEE department is not required for students pursuing the certificate.

Graduate students pursuing a photonics certificate are not required to matriculate into the program subplan through a master's degree,

although degree-seeking students enrolled in the program will be given course registration priority.

Photonics certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student. However, credit hours may not count toward both a BS and a master's degree.

Required Courses

Nine credit hours of graduate-level coursework, made up of any three of the six core photonics courses, will be required to complete the certificate program. Students must earn at least a B in each course and a minimum GPA of 3.0 is required to remain in good academic standing.

Code	Title	Credit Hours
Photonics Core Courses		
Choose three:		9
ECEN 5616	Optoelectric System Design	
ECEN 5606	Optics Laboratory	
ECEN 5156	Physical Optics	
ECEN 5696	Fourier Optics	
ECEN 5626	Active Optical Devices	
ECEN 5345	Introduction to Solid State Physics	
Total Credit Hours		9

Engineering & Applied Science Biomedical Engineering - Graduate Certificate

The graduate certificate in biomedical engineering trains next-generation professional engineers to interface engineering and medicine with design and problem solving to improve human health.

- Apply knowledge and skills to a broad range of biomedical fields, from the establishment of disruptive imaging technologies or fabrication of new biomimetic tissue replacements to conception of innovative medical devices.
- Engage with clinical, veterinary, and entrepreneurial partners at cutting edge institutions along the Front Range such as Anschutz Medical Campus, Colorado State University for veterinary medicine and local companies, such as Allosource, Medtronic and Terumo, among others.
- Gain unique experience in translational and applied medicine.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admission Requirements

Applicants must provide the following items for admission to the certificate program:

- Statement of purpose (1-2 pages) explaining how the graduate certificate in biomedical engineering will benefit their professional and/or personal interests.
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree in engineering or a related field.
- One letter of support from a professional supervisor or a faculty member.

For more information, please contact the graduate advisor (find contact information on this program's Overview (p. 1495) tab)

Required Courses and Credits

Nine credit hours of graduate level coursework will be required to complete the certificate program with a B grade or above in each course. A minimum GPA of 3.0 is required to remain in good academic standing.

Code	Title	Credit Hours
MCEN 5117	Anatomy and Physiology for Engineers	3
MCEN 5127	Biomedical Ultrasound	3
MCEN 5133	Intro to Tissue Biomechanics	3
MCEN 5228	Special Topics in Mechanical Engineering (Topics: Materials and Devices in Medicine; Biometric Materials; Mechanobiology; Mechanics of Soft Matter)	3
MCEN 6228	Special Topics	3

Embedded Systems Engineering - Graduate Certificate

Most of us will casually encounter dozens of embedded systems by mid-morning each day throughout our residences, roadways and workplaces. Fundamentally, an embedded system is some combination of hardware and software that is designed for a particular function. It senses a real-world condition, does some computing, then produces output data or control of some kind.

These intelligent machines are a permanent part of our global landscape, and are continuously being expanded and upgraded by a world of forward-thinking engineers and entrepreneurs. Application domains include aerospace and defense, energy, industrial automation, medical, networking and communication, security, transportation, and more. Also expected to fuel much more growth is an overarching megatrend referred to as the Internet of Things (IoT), which involves connecting more embedded systems to the internet, enabling countless human-to-machine and machine-to-machine applications ranging from home automation to security and many beyond.

Fueled largely by growth in cloud computing and convergence of wireless technologies, industry-wide estimates ranging from 20 to 50 billion connected devices by 2030 are common among major technology research companies. Of course, this trend ushers in greater hardware and software design challenges of effectively managing and securing connected devices, as well as capturing and harnessing the vast amounts of data the devices are meant to produce around their associated services. From whatever angle or perspective students prefer to examine,

the magnitude and breadth of opportunities is very clear across a multitude of end markets.

The embedded systems engineering certificate, which is offered by the Department of Electrical, Computer and Energy Engineering, provides students the competitive hardware and software knowledge and skills needed to design and implement these systems.

For more information, visit the department's Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Application Requirements

Applicants for the certificate program must have been or currently be enrolled for a baccalaureate degree from an accredited institution and have satisfied the prerequisites for each course through coursework or work experience. They need not be enrolled in a degree-granting program at CU Boulder.

Graduate students pursuing an ESE certificate are not required to matriculate into the ESE program subplan through a master's degree.

Admission to a graduate degree-seeking program in the ECEE Department is *not* required for students pursuing only the certificate.

Program Requirements

The embedded systems engineering (ESE) certificate curriculum consists of two core courses and one elective course from an approved list, totaling at least 9 credit hours. A grade of B- or better is required for each course applied toward the certificate, along with a cumulative GPA of 3.0 in certificate courses.

ESE certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student. However, credit hours may not count towards both a BS and a master's degree.

Code	Title	Credit Hours
Core Courses		
Choose two of the following: ¹		6
ECEN 5613	Embedded System Design	
ECEN 5623	Real-Time Embedded Systems	
ECEN 5803	Mastering Embedded Systems Architecture	
Elective		
Choose one course from the approved ESE course list. ²		3
Total Credit Hours		9

¹ Students may complete the certificate by taking all three core courses, rather than taking two core courses and an ESE elective.

² Embedded Systems course list (<https://www.colorado.edu/ecee/graduate-program/degrees-programs/professional-masters-programs/embedded-systems/embedded-systems/>).

Power Electronics - Graduate Certificate

Power electronics is a key enabling technology in essentially all electronic systems ranging from wireless communication devices, portable and desktop computers, to telecommunication infrastructure systems, renewable energy systems, and industrial systems. The necessity for power electronics technology in these rapidly expanding areas creates a rising need for design engineers equipped with knowledge and skills to follow sound engineering principles and actively participate in multidisciplinary teams. The power electronics field has evolved rapidly with the advances in technology and introduction of many new application areas. As a result, it is likely that the required knowledge and skills were not in the curricula when many of today's professionals were in college. This creates a strong ongoing demand for continuing education of the workforce in the area of power electronics. The certificate program addresses the ongoing demand for skilled power electronics design engineers.

This program offers an opportunity for electrical engineers to obtain the specialized knowledge required to practice power electronics. It is intended for students and engineers having a BS degree in electrical engineering or equivalent.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

The Power Electronics Certificate (<https://www.colorado.edu/ecee/academics/graduate-programs/professional-masters/power-electronics/>) program was initiated by the Colorado Power Electronics Center, and is operated through the Department of Electrical, Computer, and Energy Engineering (<http://www.colorado.edu/ecee/>) and through Boulder Connect (<http://www.colorado.edu/connect/>). A grade of C or better is required for each course applied toward the certificate, along with a cumulative GPA of 3.0 in certificate courses.

Power electronics certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student. However, credit hours may not count toward both a BS and a master's degree.

Required Courses and Semester Credit Hours

Code	Title	Credit Hours
ECEN 5797	Introduction to Power Electronics	3
ECEN 5807	Modeling and Control of Power Electronic Systems	3
ECEN 5817	Resonant and Soft-Switching Techniques in Power Electronics	3
Total Credit Hours		9

Engineering Management

The Lockheed Martin Engineering Management Program (EMP) is a technically based management and leadership program for the engineering and technical fields that prepares students for early to mid-career positions in a variety of industries. It is designed for students who are looking to advance in management, successfully contribute to the overall business or venture, and develop their leadership skills.

The program offers a Master of Engineering, four engineering dual degrees, graduate certificates and Six Sigma certification. Courses are offered both on campus and online (available in real-time distance class participation, as well as recorded videos for later viewing) to meet the needs of busy professionals. Courses are taught by faculty whose expertise in the engineering and technical industry and business leadership bring real-world experiences to the classroom.

For more information, visit the Lockheed Martin Engineering Management Program (EMP) (<http://www.colorado.edu/emp/>) website.

Course code for this program is EMEN.

Master's Degree

- Engineering Management - Master of Engineering (ME) (p. 1500)

Certificates

- Engineering Management in the Aerospace Industry (p. 1501)
- Innovation and Entrepreneurship in Engineering (catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-management/innovation-entrepreneurship-engineering-graduate-certificate/)
- Leadership and Management (p. 1501)
- Project Management (p. 1502)
- Managing Operational Excellence and Quality Systems (catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-management/managing-operational-excellence-quality-systems-graduate-certificate/)
- Six Sigma Statistical Practitioner (p. 1502)

Partnership Certificate

- Water Engineering and Management (p. 1535)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Angel, George
Instructor

Bozic, Christy L. (https://experts.colorado.edu/display/fisid_155482/)
Scholar in Residence, Endowed/Named Professor, Faculty Director; PhD, Purdue University

Buzzard, Frank
Instructor; MS, University of Houston

DeAndrea, Jay
Instructor; MBA, University of Colorado Boulder

Duren, Ron G. Jr. (https://experts.colorado.edu/display/fisid_157263/)
Instructor; MS, University of Colorado

Judah, Kyle
Instructor; MBA, Babson College

Kirschling, Wayne (https://experts.colorado.edu/display/fisid_123149/)
Professor Emeritus; DBA, University of Colorado Boulder

Leopold, Christie-Anne
Instructor; PhD, University of Colorado

Littlejohn, Ray Lynn (https://experts.colorado.edu/display/fisid_151752/)
Scholar in Residence; PhD, University of Oklahoma

Martin, Wendy Lynn (https://experts.colorado.edu/display/fisid_154942/)
Instructor; ME, University of Colorado Boulder

McCluskey, Alyssa
Instructor; PhD, University of Colorado

McDonald, Patricia
Instructor; MBA, Southern Illinois University Edwardsville

Mihelich, Daniel
Instructor; DM, Colorado Technical University

Moorer, Daniel F. Jr. (https://experts.colorado.edu/display/fisid_151590/)
Scholar in Residence; PhD, University of Colorado Boulder

Murray, Seth (https://experts.colorado.edu/display/fisid_148038/)
Instructor; ME, University of Colorado Boulder

Phillips, Brent
Instructor; MS, Regis University

Ravishankar, G. Ravi (https://experts.colorado.edu/display/fisid_144567/)
Instructor; MBA, Massachusetts Institute of Technology

Readey, Michael J. (https://experts.colorado.edu/display/fisid_157363/)
Scholar in Residence, Endowed/Named Professor, Associate Faculty Director; PhD, Case Western Reserve University

Roza, Eric
Instructor; MBA, Stanford University

Sherwinter, Daniel J.
Professor Adjunct

Svoboda, John D. (https://experts.colorado.edu/display/fisid_154884/)
Instructor; MS, University of California, Los Angeles

Tobey, Kathryn
Scholar in Residence; ME, University of Colorado Boulder

Van Atten, Bill
Instructor; MS, Johns Hopkins University

Wrobletz, Anne
Instructor; MS, University of Colorado Boulder

Courses

EMEN 5000 (3) Engineering Principles

Provides an appreciation, understanding, and perspective of the tasks and challenges faced in engineering disciplines. This introductory course offers non-engineers insight into how engineers think and approach problems. Explores different engineering disciplines by evaluating the tools used, main concepts, and how the discipline impacts daily life. Through a series of case studies, students will review successful and unsuccessful engineering projects.

Requisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN 5005 (3) Introduction to Applied Statistical Methods

Covers statistical reasoning and analysis in support of business and engineering decision making. Topics include: engineering and applied research, descriptive and inferential statistics to include estimation and hypothesis testing using both traditional parametric as well as nonparametric procedures for research situations involving one or two groups of treatment conditions. The R statistical analysis and programming system is used.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5010 (3) Introduction to Engineering Management

Learn concept, methods, activities and philosophies of business and be encouraged to utilize them in your professional activities. Interact with engineering management faculty who share what works based upon their engineering management experiences. Engage with our classmates on their business experience, thereby preparing you to interact more thoughtfully and knowledgeably with your professional colleagues.

Requisites: Restricted to Engineering Management (EMEN) graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5015 (3) Engineering Communication

Enables students to communicate their thoughts and ideas in written and oral form in professional environments. Understand and demonstrate the ability to write a correctly-formed document. Develop active listening skills, particularly when providing and receiving feedback. Learn to orally communicate ideas by speaking clearly, persuasively, energetically, and with appropriate non-verbal elements. Present in various environments and to various audiences.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5020 (3) Finance for Engineering Managers

Confidently engage in topics of financial performance, financial statements, time value of money and your own personal finances. The course focuses on areas relevant to engineering and technical managers, including product and process cost analyses, cost-volume-profitability calculations, discounted cash flow techniques for project selection, creating project and departmental budgets, valuation of intellectual property and entrepreneurial finance.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5030 (3) Fundamentals of Project Management

Provides an in-depth introduction to the project management discipline, including the concepts, tools and techniques used in the management and leadership of projects small and large alike. Key topics covered include the role of the project manager; project team selection and management; cost, schedule and risk management; quality in projects; introduction to creating and maintaining project plans through the project lifecycle.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5031 (3) Software Project Management

Introduces software project management as a critical element of software development activities throughout every area of human endeavor. Learn the software life cycle, software configuration management, code reviews, architectural influences and quality assurance with automated testing. Explore the impact on project success of the Capability Maturity Model (CMM) and United Modeling Language (UML).

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

Recommended: Prerequisite software development experience.

EMEN 5032 (3) Project Management Application and Execution

Emphasizes judgment-intensive decision-making and team leadership. Analyze and debate complex case studies drawn from multiple industries to illuminate best and worst practices that impact businesses, careers and lives. Advanced PM tools are reviewed and assessed for real-world utility. Students present a mini case drawn from a prominent event or their own experience.

Requisites: Requires prerequisite courses of EMEN 5030 or MBAX 6440 (all minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5041 (3) Performance Excellence for Business and Service

Focuses on the advanced study of methods designed to maximize excellence in business performance. Includes a model to understand process and product tradeoffs, interactions with supplies, integrated manufacturing systems and meeting customer requirements while maximizing profitability. These characteristics are addressed both strategically and tactically through the use of case analysis, field study and experiential learning for production and service sectors.

Requisites: Requires prerequisite course of EMEN 5005 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5042 (3) Data Science for Quality Improvement

Develop in-depth expertise in the concepts, tools and techniques used in the management and measurement of quality and productivity. Apply statistics and probability to the topics of process variation and statistical process control and capability analysis for process, product, and measurement systems. Explore an introduction to design of experiments (DOE) in business and industry to improve both quality and performance.

Requisites: Requires prerequisite course of EMEN 5005 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5043 (3) Systems for Quality Improvement

Advanced study of methods, tools, techniques and systems associated with advanced quality applications. Includes a survey of advanced process control technologies, control schemes and measurement system analysis.

Requisites: Requires prerequisite course of EMEN 5042 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5050 (3) Leading Oneself

Provides working professionals the framework to build leadership skills by first starting with oneself because the foundation for great leadership starts with personal excellence. Topics include accountability, authentic leadership, personal branding, self-awareness, growth mindset, emotional intelligence, personal mastery, feedback and communication skills.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5052 (3) Leading Others

Understand and apply leadership techniques that develop and sustain a high-powered technical organization. Specifically, students evaluate qualities associated with successful leaders, learn practical leadership skills such as defining roles and responsibilities, setting vision, coaching, and dealing with conflicts. The course then addresses team building, from hiring the right team members, to managing the team, and conducting effective team meetings.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5053 (3) Leading Technical Organizations

Examining relevant technical organization leadership skills using the context of stakeholder value creation is the basis of this course. The class explores how leaders multiply their abilities by leading through others, developing an accountable team, building enduring employees, managing customer and supplier relationships, exhibiting leadership presence, dealing with challenging situations and creating and executing strategies.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5065 (3) Global Topics in Aerospace

Examining current international space topics including civil, military, and commercial activities forms the basis for this course. The origins and evolution of space policy and laws, current organizational and governance structures, space economics, space sustainability, international human exploration strategies, the future of space exploration, deregulation and space traffic management and recent developments in the commercial space sector will be analyzed.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5080 (3) Ethical Decision-Making in Engineering Management

Learn how to recognize ethical issues and dilemmas affecting managers in the workplace. Understand various models and practices offering solutions to these issues and how to create a culture of ethics and integrity in supporting and/or building a profitable, healthy and responsible organization.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5090 (3) Marketing and Technology Ventures

Why do great products often lose in tech markets? This course analyzes processes for developing the customer bases essential for commercial success. Student teams develop strategic launch programs for actual tech startups of their choosing. Students will analyze and discuss real-world case studies and alternative strategies. Structured towards professional applicability for engineers in large enterprises as well as startups.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5094 (3) Entrepreneurship for Engineers

Explores the process of new venture creation as it relates to both launching a technology-based startup (entrepreneurship), and the introduction of new products and services within an existing firm (intrapreneurship). The course features a semester project that incorporates all elements of the new venture process, enabling engineers to transform their own innovative ideas into viable and sustainable business opportunities.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5215 (3) Principles & Practices of the Sustainable Enterprise

Provides students the tools to integrate sustainability into technology-intensive businesses. The course explores the sustainability imperative for today's businesses, and how sustainability is requiring engineers to have a deeper knowledge of how successful market solutions also impact society and the environment. The course addresses the engineer's role in developing sustainable products and packaging, the triple bottom line and circular economy.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5315 (3) Business Law for Engineering Managers

Provides engineering students an introduction to important areas of business law likely to be encountered as technology and engineering managers. Topics include fundamental legal concepts, intellectual property and strategy, contracts, data privacy and product liability. The course uses experiential and practical approaches and exercises to enable the student to identify and address critical legal issues in real-world business contexts.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering graduate students only.

EMEN 5316 (3) Engineering, Product Liability & The Litigation Process

Provides engineering students the experience of working through a product litigation case, beginning with understanding why products fail, to the various stages of the litigation process culminating in a mock trial where engineers are on the stand as expert witnesses. This course meets concurrently with LAWS 7343, engaging both engineering and law students in the same learning environment.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering graduate students only.

EMEN 5400 (3) Product Development and Design

Introduces contemporary methods of identifying and creating new products and services that both consumer and industrial customers really want. The course takes students on a project-based journey of ideation, concept development, prototyping, customer validation, costs and the new product launch process. Students ultimately showcase their products in a tradeshow-like setting. Environmental impact analyses and cradle-to-cradle design methods are also addressed.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5405 (3) Fundamentals of Systems Engineering

Examines the disciplined processes of designing and managing complex systems over their life cycle. Requirements engineering, reliability, logistics, team leadership, testing and evaluation, maintainability and other disciplines are examined with focus on the system engineering of small spacecraft.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5500 (3) Lean and Agile Management

Learn lean and agile concepts and tools to improve customer value, improve processes and reduce waste. Examine and apply lean and agile principles in diverse circumstances including hardware/software, product development/ongoing operations and manufacturing products/ providing services. Apply your learning to improving performance in current responsibilities, whether as an individual contributor or as a manager.

Equivalent - Duplicate Degree Credit Not Granted: OPIM 6080

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5610 (3) Advanced Statistical Methods for Engineering Research

Combines intermediate and advanced statistical methods (Two- and Three-Way ANOVA and post hoc analyses for a large variety of specific designs). Real data sets are employed permitting a focus on engineering research in support of business decision making through the integration of cost benefit analysis and process performance. Parametric as well as nonparametric methods of analysis are included.

Requisites: Requires prerequisite course of EMEN 5900 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5620 (3) Data Mining and Screening Experiments for Engineering Research

This advanced course focuses on: a) Regression Analyses (Simple and Multiple Linear Regression as well as Nonlinear Binomial and Multinomial Logistic Regression), b) Data Mining/Statistical Learning (Classification and Regression Decision trees) to include Neural Networks and c) Screening (aka Fractional Factorial) Experimental Designs. The R statistical analysis and programming language is used for all of the analyses in the course.

Requisites: Requires prerequisite course of EMEN 5610 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5710 (3) Enterprise Strategic Management

Student Teams launch a virtual company in a simulated tech-driven manufacturing industry. Plot your strategic direction and make tactical choices in product development, marketing, manufacturing, operations and finance. Present a business pitch and executive summary to secure venture capital or angel funding. The course focuses on the interplay among organizational functions. Targeted towards future general management and entrepreneurial roles.

Requisites: Requires prerequisite course of EMEN 5610 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5825 (3) Intrapreneurship & Innovation

Learn a comprehensive set of business concepts, skills and tools to launch and manage intrapreneurial ventures. Engage with faculty, classmates, guest speakers, industry professionals, potential customers and one's leadership team to help you launch your venture. Develop the necessary skills, tools and awareness to be successful colleagues, managers and leaders in scientific and engineering industries. Gain valuable business acumen using a hands-on and learning environment.

EMEN 5830 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5840 (1-3) Independent Study Project

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Non-EMP students require instructor permission.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN 5900 (3) Research Methods and Experimental Design

The analytical tools used in this course involve both Parametric and Nonparametric methods for one experimental factor, with a specific intense focus on the Analysis of Variance and accompanying post hoc analysis methods. The R statistical analysis and programming language is used for all of the analyses in the course.

Requisites: Requires prerequisite course of EMEN 5005 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 6805 (1) Capstone Preparation

Students determine capstone research question, conduct literature review, develop research methodology and project plan, write a proposal, and select capstone committee.

Requisites: Requires prerequisite course of EMEN 5825 or EMEN 5900 (minimum grade C+). Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN 6810 (3) Capstone

Students conduct agreed-upon research, critical review, business proposal, or project and present their work to the capstone committee for evaluation.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

Grading Basis: Letter Grade

EMEN 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

Grading Basis: Pass/Fail

Engineering Management - Master of Engineering (ME)

The Master of Engineering in engineering management is an excellent alternative to an MBA for engineers, scientists and technical professionals who want to move into management. The program facilitates technically minded people to learn and practice data-driven management, develop leadership capabilities and apply proven principles for business performance improvement.

The core curriculum addresses the business basics of engineering management, project management, finance and accounting, business communication and leadership. Elective courses provide in-depth skills in areas such as Six Sigma, quality management, product management, R&D, ethical decision-making, lean and agile management and entrepreneurship. Graduates of the program are prepared to lead people and organizations and respond to the challenges that go along with managing engineering and technology businesses.

For more information, visit the program's Master of Engineering in Engineering Management (<http://www.colorado.edu/emp/programs/graduate-degree/master-engineering-management/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

The following course requirements are subject to change; for the most current information, visit the program's Degree Requirements (<http://www.colorado.edu/emp/degree-requirements/>) webpage.

Degree Requirements

The ME degree requires 30 credit hours. Students have the option to complete coursework only, consisting of five core courses and five elective courses, or the capstone option. The capstone is a 3-credit course that replaces one of the five electives required for the degree.

Code	Title	Credit Hours
Required Courses		
EMEN 5005	Introduction to Applied Statistical Methods	3
EMEN 5015	Engineering Communication	3
EMEN 5020	Finance for Engineering Managers	3
EMEN 5030	Fundamentals of Project Management	3
or EMEN 5031	Software Project Management	
or EMEN 5405	Fundamentals of Systems Engineering	
EMEN 5050	Leading Oneself	3
Elective Courses		
15 credits of EMEN coursework 5000 level or above will count, except for EMEN 5000		15
Total Credit Hours		30

Dual Degree Programs

In addition to the Master of Engineering in engineering management, the Engineering Management Program also offers dual degrees in the following areas:

- Computer Science & Engineering Management
- Aerospace Engineering Sciences & Engineering Management
- Electrical, Computer, and Energy Engineering & Engineering Management
- Mechanical Engineering & Engineering Management

For more information, visit the program's Dual Graduate Degree Programs (<http://www.colorado.edu/emp/programs/graduate-degree/dual-degree-program/>) webpage.

Engineering Management in the Aerospace Industry - Graduate Certificate

The certificate in engineering management in the aerospace industry is designed for students enrolled in the MS in Aerospace Engineering or ME Engineering Management, as well as other master's degree programs (computer science, electrical engineering and mechanical engineering).

Learn leadership and program management skills widely employed by the aerospace industry in this jointly sponsored program between the Ann and H. J. Smead Aerospace Engineering Science Department and the Engineering Management Program.

For more information, visit the Engineer Management Program's Engineering Management in the Aerospace Industry Certificate (<https://www.colorado.edu/emp/programs/graduate-program/graduate-certificates/engineering-management-aerospace-industry/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
Required Courses		
EMEN 5030	Fundamentals of Project Management ¹	3
EMEN 5053	Leading Technical Organizations	3
EMEN 5065	Global Topics in Aerospace	3
EMEN 5830	Special Topics (Aerospace Program Management)	3
Total Credit Hours		12

¹ May be waived for another course with experience or PMP; see department.

Leadership and Management - Graduate Certificate

With the leadership and management graduate certificate from the Engineering Management Program, you'll gain an in-depth understanding of management, leadership and strategy deployment to improve performance quality; discover how to use natural strengths to become the best leader possible; learn to navigate ethical decisions and maintain integrity as a leader; and find the leverage points in an organization for delivering exceptional results.

For more information, see the program's Leadership and Management (<https://www.colorado.edu/emp/leadership-and-management/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
Required Courses		
EMEN 5020	Finance for Engineering Managers	3

EMEN 5030	Fundamentals of Project Management	3
or EMEN 5031	Software Project Management	
or EMEN 5405	Fundamentals of Systems Engineering	
EMEN 5050	Leading Oneself	3
or EMEN 5052	Leading Others	
or EMEN 5053	Leading Technical Organizations	
EMEN 5080	Ethical Decision-Making in Engineering Management	3
Total Credit Hours		12

Project Management - Graduate Certificate

Project management is the leadership and control of unique, limited-duration undertakings to produce a new service, product or other desired outcome. Projects typically entail the formation and oversight of a team comprised of highly diverse staff, perhaps varying in experience, skills, location and employer, as well as personal background. The project manager assumes responsibility for ensuring overall success of the endeavor given an array of challenges. Fundamental to those is of course the nature of limited resources, generally defined in terms of cost and time, with engineering projects aggregating additional factors of quality and scope.

Projects are fundamental to nearly all engineering sectors, including aerospace, civil, software, medical devices, electronics, materials science and environmental. Project managers apply their skill and knowledge, both of engineering process/systems as well as of team leadership, to ensure the successful progression and completion of the undertaking at hand. Successful PMs thrive in dynamic, complex environments under continual change. Many times PMs are tapped to lead organizations through significant crises. PMs have the talent and experience to lead ad-hoc groups towards an effective and strategic response, in real-time and under challenging demands.

Individuals who aspire to be agents of change and assume a central role in balancing many forces should consider a project management certificate towards entry into this thriving profession.

For more information, see the Engineering Management Program's Project Management (<http://www.colorado.edu/emp/programs/graduate-program/certificates/project-management/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
Required Courses		
Choose four:		12
EMEN 5030	Fundamentals of Project Management	
or EMEN 5031	Software Project Management	

EMEN 5032	Project Management Application and Execution	
EMEN 5405	Fundamentals of Systems Engineering	
EMEN 5830	Special Topics (Aerospace Program Management)	
EMEN 5830	Special Topics (Adv Proj, Prgm, Prtfllo Mgmt)	
Total Credit Hours		12

Six Sigma Statistical Practitioner - Graduate Certificate

The six sigma statistical practitioner graduate certificate is ideal for students who aspire to become a statistical facilitator, applied researcher or plant statistician, designing and conducting experiments to improve performance quality. Learn advanced statistical tools that support the Define, Measure, Analyze, Improve and Control methodology.

For more information, see the Engineering Management Program's Six Sigma Statistical Practitioner (<http://www.colorado.edu/emp/programs/graduate-program/certificates/six-sigma-statistical-practitioner/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
Required Courses		
EMEN 5005	Introduction to Applied Statistical Methods	3
EMEN 5900	Research Methods and Experimental Design	3
EMEN 5610	Advanced Statistical Methods for Engineering Research	3
EMEN 5620	Data Mining and Screening Experiments for Engineering Research	3
Total Credit Hours		12

Environmental Engineering

The Environmental Engineering Graduate Program (<http://www.colorado.edu/even/>) focuses on the fundamental and applied understanding of the processes which govern our natural and engineered environmental systems.

The program consists of over 35 research and instructional faculty members and about 70 graduate students, covers topics ranging from drinking and wastewater treatment, water reuse, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering. The program offers MS, Professional MS, and PhD degrees in environmental engineering.

For more information, visit the Environmental Engineering Program (<https://www.colorado.edu/even/prospective-students/>) website.

Course code for this program is EVEN.

Master's Degrees

- Environmental Engineering - Master of Science (MS) (p. 1504)
- Environmental Engineering - Professional Master of Science (MSENV) (p. 1505)

Doctoral Degree

- Environmental Engineering - Doctor of Philosophy (PhD) (p. 1506)

Certificate

- Architectural Lighting - Graduate Certificate (catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-applied-science/architectural-lighting-graduate-certificate/)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Environmental Engineering - Master of Science (MS)

The Master of Science in the Environmental Engineering Program focuses on fundamental and applied understanding of the processes that govern our natural and engineered environmental systems. The program of over 35 research and instructional faculty members and about 70 graduate students covers topics ranging from drinking and wastewater treatment, water re-use, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering.

For more information, visit the Environmental Engineering Program (<https://www.colorado.edu/even/prospective-students/>) website.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): BSEV in Environmental Engineering (p. 742)

Requirements

General Requirements

The following course requirements are subject to change; for the most current information, visit the Program's Curriculum and Courses (<http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/>) webpage.

Students must complete at least 30 credit hours.

For students who have undertaken prior graduate study, up to 9 hours of relevant graduate-level coursework may be transferred to meet the course requirements for the MS degree, following the rules established by the Graduate School for transfer credit.

Degree Plans

Requirements for the Master of Science in environmental engineering can be fulfilled in two ways.

Plan I: Thesis Option

In addition to 24 credit hours of coursework, candidates complete 4–6 credit hours of thesis credit with a sum of course and thesis credit of at least 30 hours. Additionally, the successful completion and defense of an MS thesis is required.

Plan II: Non-Thesis Option

In addition to 24 credit hours of coursework, candidates complete an additional 6 credit hours of elective courses or independent study.

Course Requirements

Code	Title	Credit Hours
Required Common Core		6
CVEN 5464	Environmental Engineering Processes	3
CVEN 5404	Water Chemistry	3
or CHEM 5151	Atmospheric Chemistry	
Emphasis Area		12-18
See list below		
Electives		0-9
Elective courses will be determined in consultation with the student's faculty advisor.		
Environmental Engineering Graduate Seminar		0
Two semesters of Environmental Engineering graduate seminar, a non-credit seminar requiring attendance at 2/3 of the seminars each semester for satisfactory completion.		
Plan I: Thesis Option		4-6
Thesis Credits		
Plan II: Non-Thesis Option		6
Additional elective or independent study credits		

Requirements for Recommended Emphasis Areas

Code	Title	Credit Hours
Emphasis in General Environmental Engineering		12
CVEN 5484	Applied Microbiology and Toxicology	
Select 3 credits from the following:		
CVEN 5524	Drinking Water Treatment	
CVEN 5534	Wastewater Treatment	
CVEN 5474	Hazardous and Industrial Waste Management	
Select 3 credits from the following:		
CVEN 5554	Fundamentals of Air Quality Management	

MCEN 5131	Air Pollution Control Engineering	
Select 3 credits from the following:		
CVEN 5537	Numerical Methods in Civil Engineering	
CVEN 5454	Statistical Methods for Natural and Engineered Systems	
Emphasis in Drinking Water, Wastewater and Water Reuse Treatment		12
CVEN 5484	Applied Microbiology and Toxicology	
CVEN 5524	Drinking Water Treatment	
CVEN 5534	Wastewater Treatment	
Select 3 credits from the following:		
CVEN 5537	Numerical Methods in Civil Engineering	
CVEN 5454	Statistical Methods for Natural and Engineered Systems	
Emphasis in Natural Waters		15
CVEN 5424	Environmental Organic Chemistry	
CVEN 5353	Groundwater Hydrology	
CVEN 5333	Physical Hydrology	
CVEN 5323	Applied Stream Ecology	
Select 3 credits from the following:		
CVEN 5537	Numerical Methods in Civil Engineering	
CVEN 5454	Statistical Methods for Natural and Engineered Systems	
Emphasis in Global Engineering		18
Select three one-credit modules offered by Mortenson Center ¹		
CVEN 5484	Applied Microbiology and Toxicology	
CVEN 5919	Global Development for Engineers	
CVEN 5939	Global Development Practicum	
CVEN 5969	Water, Sanitation, and Hygiene	
Select 3 credits from the following:		
CVEN 5524	Drinking Water Treatment	
CVEN 5534	Wastewater Treatment	
CVEN 5474	Hazardous and Industrial Waste Management	
CVEN 5554	Fundamentals of Air Quality Management	
MCEN 5131	Air Pollution Control Engineering	
Emphasis in Air Quality		12
Select 3 credits from the following:		
MCEN 5131	Air Pollution Control Engineering	
CVEN 5554	Fundamentals of Air Quality Management	
Select 3 credits from the following:		
MCEN 5021	Introduction to Fluid Dynamics	
CVEN 5313	Environmental Fluid Mechanics	
Select 3 credits from the following:		
MCEN 5141	Indoor Air Pollution	
MCEN 5161	Aerosols	
CVEN 5484	Applied Microbiology and Toxicology	
Select 3 credits from the following:		
CVEN 5537	Numerical Methods in Civil Engineering	
CVEN 5454	Statistical Methods for Natural and Engineered Systems	

Emphasis in Environmental Change Adaptation Engineering		12
CVEN 5565	Life-Cycle Engineering of Civil Infrastructure Systems	
Select 3 credits from the following:		
CVEN 5484	Applied Microbiology and Toxicology	
CVEN 5323	Applied Stream Ecology	
Select 3 credits from the following:		
CVEN 5353	Groundwater Hydrology	
CVEN 5333	Physical Hydrology	
GEOG 5321	Snow Hydrology	
Select 3 credits from the following:		
CVEN 5373	Water Law, Policy, and Institutions	
ENVS 5000	Policy, Science, and the Environment	
MCEN 5228	Special Topics in Mechanical Engineering	
ATOC 5000	Critical Issues in Climate and the Environment	

¹ Find course options on the Mortenson Center (<https://www.colorado.edu/center/mortenson/education/mortenson-center-courses/>) website.

Environmental Engineering - Professional Master of Science (MSENV)

The professional master's degree (MSENV) in environmental engineering is a coursework-only program that offers possibilities for a range of prospective students.

Whether a prospective student is a working engineer or an undergraduate considering widening their exposure to areas of environmental engineering, we have program options to meet their needs.

For more information, visit the department's Curriculum and Courses (<http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/>) webpage.

Requirements

General Requirements

The following course requirements are subject to change; for the most current information, visit the Program's Curriculum and Courses (<http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/>) webpage.

The professional master's degree requires 30 credit hours of graduate-level courses with a minimum cumulative GPA of 3.00.

For students who have undertaken prior graduate study, up to 9 semester credit hours of relevant graduate-level course work may be transferred to meet the course requirements for the MSENV degree, following the rules established by the Graduate School for transfer credit.

Program Tracks

General Environmental Engineering Track

Environmental Engineering - Doctor of Philosophy (PhD)

The Environmental Engineering Graduate Program (<http://www.colorado.edu/even/>) focuses on fundamental and applied understanding of the processes that govern our natural and engineered environmental systems. The program of over 35 research and instructional faculty members and about 70 graduate students covers topics ranging from drinking and wastewater treatment, water re-use, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering.

For more information, visit the Environmental Engineering Program (<https://www.colorado.edu/even/prospective-students/>) website.

Requirements

The PhD in environmental engineering requires 30 credit hours of relevant graduate-level coursework, plus 30 credit hours of thesis credit. PhD students are also required to successfully complete a preliminary exam, a comprehensive exam and a final dissertation defense.

Applicants for this degree must demonstrate the capability for both rigorous academic accomplishments and independent research.

All doctoral students must have completed the environmental engineering core courses (6 credit hours), and a quantitative analysis class (3 credit hours). Coursework must be completed with a minimum cumulative GPA of 3.00.

Graduates of the department's MS program may transfer up to 30 credit hours of relevant graduate-level courses, pending program approval. Up to 21 credit hours of previous graduate-level work from another institution may be transferred with advisor and Graduate School approval.

Preliminary Examination

Students must pass a preliminary examination based on MS degree-level coursework in environmental engineering topics. Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. The student must pass this examination in order to continue in the doctoral program.

Comprehensive Examination

By no later than the fifth semester, students must also take and pass a comprehensive examination. The comprehensive examination shall consist of a written and an oral examination. The exam may not be attempted until the student's last semester of formal coursework. At the comprehensive examination, the student shall present a plan for the dissertation research to the advisory committee for approval. Failure to pass the comprehensive examination may be remedied by repeating the examination after an interval of not less than four months.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member who is a member of the Environmental Engineering Program faculty.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Materials Science and Engineering

The Materials Science and Engineering Program offers tracks of study in electronic, magnetic and photonics materials, soft materials, structural materials, materials for energy, biomaterials and computational materials science.

Materials science and engineering (MSE) is an interdisciplinary program aimed at providing rigorous education in materials science and engineering and the fundamental physics, engineering, chemistry and biology that underlie this discipline. Educational goals are achieved through both coursework and training in cross-disciplinary research supervised by one or more science and engineering faculty members.

The program offers six unique tracks of study:

- electronic, magnetic and photonics materials
- soft materials
- structural materials
- materials for energy
- biomaterials
- computational materials science

The MSE program is directed by Professor Robert McLeod of the Department of Electrical, Computer and Energy Engineering. For more information, see the Materials Science & Engineering Program (<https://www.colorado.edu/mse/>) website.

Master's Degree

- Materials Science and Engineering - Master of Science (MS) (p. 1509)

Doctoral Degree

- Materials Science and Engineering - Doctor of Philosophy (PhD) (p. 1510)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor; PhD, Seoul National University (South Korea)

MacLennan, Joseph E. (https://experts.colorado.edu/display/fisid_104854/)
Professor

Maute, Kurt (https://experts.colorado.edu/display/fisid_113875/)
Professor; PhD, University of Stuttgart (Germany)

McGehee, Michael D. (https://experts.colorado.edu/display/fisid_163453/)
Professor; PhD, University of California, Santa Barbara

McLeod, Robert R. (https://experts.colorado.edu/display/fisid_107547/)
Professor; PhD, University of Colorado Boulder

Medlin, James William (https://experts.colorado.edu/display/fisid_122699/)
Professor; PhD, University of Delaware

Mickelson, Alan R. (https://experts.colorado.edu/display/fisid_100286/)
Associate Professor; PhD, California Institute of Technology

Model, Garret (https://experts.colorado.edu/display/fisid_105440/)
Professor; PhD, Harvard University

Murnane, Margaret (https://experts.colorado.edu/display/fisid_115333/)
Distinguished Professor; PhD, University of California, Berkeley

Murray, Todd W. (https://experts.colorado.edu/display/fisid_146549/)
Professor; PhD, Johns Hopkins University

Musgrave, Charles Bruce (https://experts.colorado.edu/display/fisid_144977/)
Professor; PhD, California Institute of Technology

Nagpal, Prashant (https://experts.colorado.edu/display/fisid_151726/)
Assistant Professor; PhD, University of Minnesota

Nair, Devatha P.
Assistant Professor; PhD, University of Colorado Boulder

Neogi, Sanghamitra (https://experts.colorado.edu/display/fisid_156773/)
Assistant Professor; PhD, Pennsylvania State University

Park, Won (https://experts.colorado.edu/display/fisid_122676/)
Professor; PhD, Georgia Institute of Technology

Pellegrino, John (https://experts.colorado.edu/display/fisid_130902/)
Research Professor; PhD, University of Colorado Boulder

Perkins, Thomas T. (https://experts.colorado.edu/display/fisid_124578/)
Associate Professor Adjunct; PhD, Stanford University

Raj, Rishi (https://experts.colorado.edu/display/fisid_108413/)
Professor; PhD, Harvard University

Regueiro, Richard A. (https://experts.colorado.edu/display/fisid_134705/)
Associate Professor; PhD, Stanford University

Reznik, Dmitry (https://experts.colorado.edu/display/fisid_147659/)
Associate Professor; PhD, University of Illinois at Urbana-Champaign

Rogers, Charles (https://experts.colorado.edu/display/fisid_101331/)
Professor; PhD, Cornell University

Rumbles, Garry (https://experts.colorado.edu/display/fisid_147479/)
Professor Adjunct; PhD, University of London (England)

Smalyukh, Ivan (https://experts.colorado.edu/display/fisid_144757/)
Professor; PhD, Kent State University

Song, Jeong-Hoon (https://experts.colorado.edu/display/fisid_154468/)
Assistant Professor; PhD, Northwestern University

Srubar, Wil V. III (https://experts.colorado.edu/display/fisid_153058/)
Assistant Professor; PhD, Stanford University

Stansbury, Jeffrey W.
Associate Dean; PhD, University of Maryland

Stoldt, Conrad R. (https://experts.colorado.edu/display/fisid_126290/)
Professor; PhD, Iowa State University

Tan, Wei (https://experts.colorado.edu/display/fisid_141464/)
Associate Professor; PhD, University of Illinois at Chicago

van de Lagemaat, Jao (https://experts.colorado.edu/display/fisid_148357/)
Assistant Professor

Vernerey, Franck J. (https://experts.colorado.edu/display/fisid_144760/)
Associate Professor; PhD, Northwestern University

Walba, David M. (https://experts.colorado.edu/display/fisid_105830/)
Professor; PhD, California Institute of Technology

Weimer, Alan W. (https://experts.colorado.edu/display/fisid_109152/)
Professor; PhD, University of Colorado Boulder

White, Timothy J. (https://experts.colorado.edu/display/fisid_163899/)
Professor; PhD, University of Iowa

Whiting, Gregory L. (https://experts.colorado.edu/display/fisid_159727/)
Associate Professor; PhD, University of Cambridge (England)

Xi, Yunping (https://experts.colorado.edu/display/fisid_110518/)
Professor; PhD, Northwestern University

Xiao, Jianliang (https://experts.colorado.edu/display/fisid_149777/)
Assistant Professor; PhD, Northwestern University

Yang, Ronggui (https://experts.colorado.edu/display/fisid_142640/)
Professor; PhD, Massachusetts Institute of Technology

Yin, Xiaobo (https://experts.colorado.edu/display/fisid_153484/)
Associate Professor; PhD, Stanford University

Yu, Liping
Assistant Research Professor

Zhang, Wei (https://experts.colorado.edu/display/fisid_146429/)
Professor; PhD, University of Illinois at Urbana–Champaign

Zunger, Alexander (https://experts.colorado.edu/display/fisid_149868/)
Research Professor; PhD, Tel Aviv Univ (Israel)

Courses

MSEN 5000 (1-3) Fundamentals of Materials Science and Engineering

Discusses fundamental topics in materials science and engineering.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MSEN 5064 (3) Soft Machines

Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4046 and MCEN 5046

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

Grading Basis: Letter Grade

MSEN 5370 (3) Materials Thermodynamics

Reviews thermodynamics fundamentals and applies them to understand the chemical, thermal and mechanical behavior of materials. Examines equations of state, solution theory, equilibrium diagrams and phase changes.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MSEN 5430 (3) Transmission Electron Microscopy in Materials Science & Engineering

This course provides a comprehensive introduction to transmission electron microscopy (TEM) as a powerful characterization tool in materials science. It is aimed at beginners and intermediate users of TEM and covers both the theoretical and practical aspects of advanced electron microscopy techniques. By taking this course, students will be able to interpret and analyze TEM data and understand electron microscopy publications. Students will learn the necessary theoretical basis for taking practical training on modern aberration-corrected TEMs. Previously offered as a special topics course. Recommended Prerequisite: Experience on electron microscopy is recommended but not necessary.

Requisites: Restricted to students with 87-180 credits (Senior, 5th Yr Senior) or graduate students only.

Grading Basis: Letter Grade

MSEN 5470 (3) Materials Composition and Structure

The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.

MSEN 5840 (1-6) Independent Study

Offers an opportunity for students to do independent work. Subject arranged to fit the needs of the student.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to MS and PhD students in the Materials Science and Engineering program (MTEN) only.

MSEN 5919 (1-5) Special Topics in MSE

Offers an opportunity for special topics in MSE. Subject arrangement to fit the needs of the program.

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MSEN 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to MS students in the Materials Science and Engineering program (MTEN) only.

MSEN 8990 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to PhD students in the Materials Science and Engineering program (MTEN) only.

Materials Science and Engineering - Master of Science (MS)

CU Boulder's Professional Master of Science degree in Materials Science and Engineering provides students with a wide range of knowledge within the broad industry of materials engineering. Students in the professional master's program complete 30 hours of coursework covering cutting-edge industry topics, such as traditional and emerging materials systems, experimental methods and advanced computational analyses.

For more information, visit the program's Professional Master's Degree (<http://www.colorado.edu/mse/professional-masters-degree/>) webpage.

Requirements

All Professional Master's students must declare a track by their second semester. Students enrolled in the professional master's program are not eligible to hold a teaching assistantship or research assistantship appointment. The following course requirements are subject to change; for the most current information, visit the department's coursework (<https://www.colorado.edu/mse/current-students/coursework/>) webpage.

Code	Title	Credit Hours
Required Core Courses for All Tracks		
MSEN 5919	Special Topics in MSE (Functional Materials Chemistry)	3
MSEN 5370	Materials Thermodynamics	3
MSEN 5919	Special Topics in MSE (Materials Characterization in Engineering)	3
Specialized Track Courses		12
Students must take four approved track-specific courses		
Breadth Electives		9
Students must select three breadth electives with approval of the MSE Graduate Advisor. Independent study and MSEN 5000 may count as breadth electives. Prof. MS students may also take up to 6 credit hours of Engineering Management courses.		
Total Credit Hours		30

Materials Science and Engineering - Doctor of Philosophy (PhD)

The Materials Science and Engineering (MSE) program is an interdisciplinary PhD program aimed at providing a rigorous education in materials science and engineering and the fundamental physics, engineering, chemistry and biology that underlie this discipline.

Educational goals are achieved through both coursework and training in cross-disciplinary research supervised by one or more science and engineering faculty members.

For more information, visit the Materials Science and Engineering (<http://www.colorado.edu/mse/>) website.

Requirements

All PhD students must declare a track by the second semester. With the approval of their advisor, the student can change tracks. The course program should represent a coordinated approach to the attainment of the student's ultimate goals, including class work, professional preparation and research.

The following course requirements are subject to change; for the most current information, visit the department's Coursework (<http://www.colorado.edu/mse/graduate-study/coursework/>) webpage.

Code	Title	Credit Hours
Required Core Courses for All Tracks		
MSEN 5919	Special Topics in MSE (Functional Materials Chemistry)	3
MSEN 5370	Materials Thermodynamics	3

MSEN 5919	Special Topics in MSE (Materials Characterization in Engineering)	3
Specialized Track Courses ¹		12
Students must take four approved track-specific courses		
Breadth Electives		9
Students must select three breadth electives with approval of the PhD research advisor and program. Independent study and MSEN 5000 may count as breadth electives.		
Total Credit Hours		30

¹ Required track-specific courses and approved track-specific electives are listed on the department's Coursework (<http://www.colorado.edu/mse/graduate-study/coursework/>) webpage.

Preliminary Examination

The preliminary exam will normally be given in the spring of the student's second year. If the first attempt is failed, a second attempt will be scheduled in the following months. The second prelim attempt should be completed before the beginning of the third academic year. Students who have a master's degree should complete the preliminary exam in the third semester of study. If a student fails their first attempt, then they must retake the exam at latest in the following semester. Two successive failures result in a terminal MS as the highest possible degree.

Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing course work.

Mechanical Engineering

CU Boulder's Mechanical Engineering Graduate Program (<http://www.colorado.edu/mechanical/prospective-students/graduate/>) is one of the top ranked programs in the U.S. News & World Report Best Graduate Schools issue among public universities. Students receive a strong education and conduct groundbreaking tier-one research. We have 50+ faculty members conducting fundamental and applied research in air quality, biomedical, materials, mechanics of materials, micro/nanoscale, robotics and systems design, and thermo fluid sciences.

Boulder is also home to research and development operations for many large companies and four federal research labs: the National Center for Atmospheric Research, the National Institute for Standards and Technology, the National Oceanic and Atmospheric Administration, and the National Renewable Energy Laboratory.

Recent doctoral and master's graduates accepted employment at companies including, but not limited to: ConocoPhillips, Ford, Google,

NASA Jet Propulsion Laboratory, Lockheed Martin, Nike, Sandia National Laboratories and Seagate. Many of our graduating PhD students also enter careers in academia.

Master's Degrees

- Mechanical Engineering - Master of Science (MS) (p. 1517)
- Mechanical Engineering - Professional Master of Science (MSME) (p. 1518)

Doctoral Degree

- Mechanical Engineering - Doctor of Philosophy (PhD) (p. 1518)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Affrunti, Andrew J. (https://experts.colorado.edu/display/fisid_149937/)
Instructor; MSEE, University of Illinois at Urbana–Champaign

Courses

MCEN 5010 (3) Microsystems Integration

A microsystem consists of microelectronic, optoelectronic, microwave, microelectromechanical and energy components interconnected. Thermal, electrical, fabrication and assembly issues for microsystems represented by iPhone series will be studied. The packaging and interconnection technologies used to establish the design and manufacturing infrastructure of microsystems will be reviewed. Other optoelectronic, MEMS and battery components for microsystems will also be studied.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4010

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

Grading Basis: Letter Grade

MCEN 5020 (3) Methods of Engineering Analysis 1

Studies selected topics from linear algebra, ordinary differential equations, and Fourier series. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Math

MCEN 5021 (3) Introduction to Fluid Dynamics

Focuses on physical properties of gases and liquids, and kinematics of flow fields. Analyzes stress; viscous, heat-conducting Newtonian fluids; and capillary effects and surface-tension-driven flow. Other topics include vorticity and circulation, ideal fluid flow theory in two and three dimensions, Schwartz-Christoffel transformations, free streamline theory, and internal and free-surface waves.

Requisites: Requires corequisite course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Fluids

MCEN 5022 (3) Classical Thermodynamics

First and second laws of thermodynamics. Entropy and availability. Cycle analysis. Thermodynamic properties of pure substances and mixtures. Property relations. Chemical reactions and chemical availability. Energy systems analysis.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Thermal

MCEN 5023 (3) Solid Mechanics 1

Introduces stress, strain and motion of a continuous system. Discusses material derivative; fundamental laws of mass, momentum, energy and entropy; constitutive equations and applications to elastic and plastic materials.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5012

Requisites: Requires coreq course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Solids

MCEN 5024 (3) Materials Chemistry and Structures

Provides graduate level students with a comprehensive overview of the chemistry and structure of material systems, with a focus on chemical bonding, the resulting material structures and their properties. This course is intended to become one of the four core courses offered in the new Materials Science curriculum. Course topics include: bonding in solids, crystalline and amorphous states, basic group theory, diffraction, metals and alloys, ceramics, and an intro to mat. characterization.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Materials

MCEN 5027 (1) Graduate Seminar

Offers weekly presentations by visiting speakers, faculty, and students.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Miscellaneous

MCEN 5032 (3) Sustainable Energy

Examines sustainability of our current energy systems, including transportation, using environmental and economic indicators. Uses systems analysis that addresses energy supply and demand. Explores the science and technology as well as environmental and economic feasibility of efficiency measures and renewable energy technologies. Additional emphasis is given to the global nature of the challenges and the potential for locally optimal solutions.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4032

Grading Basis: Letter Grade

Additional Information: Departmental Category: Thermal

MCEN 5034 (3) Thermodynamics of Materials

Provides a unified presentation of fundamental concepts applicable to the thermodynamics of engineering materials. Develops quantitative tools for understanding the physical principles that govern phase equilibrium and transformation. Generates binary and ternary phase diagrams and determine the resulting materials structures and corresponding physical and mechanical properties.

Recommended: Prerequisites MCEN 2024 and MCEN 3012.

Additional Information: Departmental Category: Materials

MCEN 5040 (3) Methods of Engineering Analysis 2

Studies selected topics from the theory of complex variables, integral transform methods, partial differential equations, and variational methods. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications.

Requisites: Requires prerequisite course of MCEN 5020 (minimum grade D-). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Math

MCEN 5041 (3) Advanced Fluid Mechanics 1

Highlights exact solution of Navier-Stokes equations and fundamentals of rotating fluids. Considers Low Reynolds number flow; similarity solutions; viscous boundary layers, jets, and wakes; and unsteady viscous flow.

Requisites: Requires corequisite course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Fluids

MCEN 5042 (3) Heat Transfer

Studies development of equations governing transport of heat by conduction, convection, and radiation, and their solution. Includes analytical and numerical solution of initial and boundary value problems representative of heat conduction in solids. Describes heat transfer in free and forced convection, including laminar and turbulent flow. Also involves radiation properties of solids, liquids, and gases and transport of heat by radiation.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Thermal

MCEN 5044 (3) Mechanical Behavior of Materials

This introductory-level graduate course incorporates relevant aspects of materials science, solid mechanics, thermodynamics and mathematics, and applies them to achieve a fundamental understanding of the mechanical behavior of crystalline and non-crystalline engineering materials.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Materials

MCEN 5045 (3) Design for Manufacturability

Topics include general design guidelines for manufacturability; aspects of manufacturing processes that affect design decisions; design rules to maximize manufacturability; economic considerations; value engineering and design for assembly. Presents case studies of successful products exhibiting DFMA principles. Priority enrollment for students admitted to the MS or BS/MS design track. Prerequisite of MCEN 4026 required for undergraduate students.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Materials

MCEN 5055 (3) Advanced Product Design

Introduces engineering design and development of consumer products. Includes learning sketching, brainstorming, idea generation, design thinking, user-centered design, product requirements and specifications, product constraints, human factors, aesthetics, industrial design, intellectual property, concept prototyping, idea selection, tolerancing, cost estimating, design for assembly, and materials selection. Entails a semester-long team re-design of a consumer product.

Additional Information: Departmental Category: Design

MCEN 5057 (3) Environmental Modeling

Enables students to develop and evaluate pollutant transport, fate, exposure, and risk models for air, water, and multi-media systems, with a special emphasis on air. Emphasizes the fundamental physics and chemistry that govern contaminant fate and transport and the basic mathematical equations and numerical approaches for describing these processes.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4057

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

MCEN 5064 (3) Soft Machines

Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4046 and MSEN 5046

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

Grading Basis: Letter Grade

MCEN 5065 (3) Graduate Design I

First part of a two-course graduate product design experience in mechanical engineering. Covers problem definition and specifications, determining design requirements, user feedback, alternative design concepts, engineering analysis, concept prototypes and CAD drawings. Students make several oral design reviews, a final design presentation and prepare a written report. Entails a team product design, fabrication and testing cycle of sponsored project.

Requisites: Requires prerequisite course of MCEN 5055 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Design

MCEN 5075 (3) Graduate Design II

Second part of two-course graduate product design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Entails a team product design, fabrication, and testing cycle of a sponsored project, leading to a fully-functional product.

Requisites: Requires prerequisite course of MCEN 5065 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Design

MCEN 5115 (3) Mechatronics and Robotics I

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum).

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4115

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Design

MCEN 5117 (3) Anatomy and Physiology for Engineers

Explores human physiological function from an engineering, specifically mechanical engineering, viewpoint. Provides an introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4117

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Miscellaneous

MCEN 5121 (3) Compressible Flow

Applies energy, continuity, and momentum principles to compressible flow. Topics include normal and oblique shocks; Prandtl-Meyer expansion; methods of characteristics; and one-, two-, and three-dimensional subsonic, supersonic, and hypersonic flows.

Requisites: Requires prerequisite course of MCEN 5021 (minimum grade D-). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Fluids

MCEN 5122 (3) Statistical Thermodynamics

Axiomatic formulation of macroscopic thermodynamics. Quantum mechanical description of atomic and molecular structure. Statistical mechanics description of thermodynamic properties of gases, liquids and solids. Elementary kinetic theory of gases and evaluation of transport properties. Department enforced requisite: undergraduate thermodynamics.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Thermal

MCEN 5125 (3) Optimal Design

This course focuses on linear optimization and will introduce non-linear optimization. Formulating engineering applications as optimization problems that can be solved using industry known solvers will be learned. Some of these applications will include minimum cost mechanical design, wind farm power maximization, minimum energy control, production control, and more. Previous programming experience required.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4125

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Design

MCEN 5127 (3) Biomedical Ultrasound

Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, acoustic lenses, pulse-echo imaging and cavitation dynamics, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; and a design project.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4127

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

MCEN 5131 (3) Air Pollution Control Engineering

Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4131

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Fluids

MCEN 5133 (3) Intro to Tissue Biomechanics

Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4133

Additional Information: Departmental Category: Materials

MCEN 5135 (3) Wind Energy and Wind Turbine Design

Focuses on understanding and applying principles related to current wind energy technology. Students will apply technical coursework from throughout the ME curriculum (fluids, dynamics, circuits, economics) to the process of designing a wind turning and determining whether their proposal is feasible from an economic standpoint.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4135

Requisites: Restricted to Mechanical (MCEN), Civil (CVEN) or Aerospace (ASEN) Engineering graduate students only.

Additional Information: Departmental Category: Design

MCEN 5137 (3) Anatomy and Physiology 2

Provides in-depth understandings of anatomy and physiology as well as introductions to transport phenomena, flow mechanics and solid mechanics in several organ systems: the cardiovascular, pulmonary, kidney, endocrine and digestive systems. Introduces artificial physiological systems to replace or assist physiological functions and introduce the concepts of physiological barriers that prevent diagnosis or effective therapeutics.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4137

Grading Basis: Letter Grade

Additional Information: Departmental Category: Miscellaneous

MCEN 5141 (3) Indoor Air Pollution

Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4141

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Fluids

MCEN 5147 (3) Mechanobiology

Studies how mechanical forces modulate the morphological and structural fitness of biological tissues. Current molecular mechanisms by which cells convert mechanical stimulus into chemical activity and the literature supporting them will be discussed. Students will acquire an understanding and expertise from the analysis of primary literature and completion of a synthesis project.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

Grading Basis: Letter Grade

MCEN 5151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, ARTF 5200, ATLS 4151 and ATLS 5151

Additional Information: Departmental Category: Fluids

MCEN 5152 (3) Introduction to Combustion

Focuses on the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety and combustion efficiency.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4152

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Thermal

MCEN 5154 (3) Biocolloids and Biomembranes

Covers the thermodynamics and mechanics of biological membranes and biomedical colloids. Considers intermolecular and surface forces, self-assembly and colloidal stability. Addresses structure-property relationships and design principles for biomedical applications. Focuses on monolayers, bilayers, micelles, filomicelles, liposomes, polymersomes, emulsions, microbubbles, polyplexes and polyelectrolyte multilayer capsules.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4154

Recommended: Prerequisites APPM 2360 and PHYS 1120.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Materials

MCEN 5161 (3) Aerosols

Introduces atmospheric aerosols and properties of their distributions, followed by fundamental descriptions of single particle dynamics, thermodynamics, nucleation, coagulation, mass transfer and populations dynamics. During the second half of the course, the focus will shift to sources and sinks of atmospheric aerosols, their impacts on atmospheric chemistry and radiation, and the impacts of these processes on air quality and climate.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Fluids

MCEN 5173 (3) Finite Element Analysis

Introduces the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua and heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4173

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Solids

MCEN 5174 (3) Failure of Engineering Materials

Examines the fundamental concepts regarding the failure of engineering materials. Case studies are used to integrate a basic understanding of material failure mechanisms with analysis techniques and tools. Topics include the elastic properties (isotropic and anisotropic materials) and the origin of elastic behavior, viscoelasticity, plasticity (dislocation mechanisms, yielding criteria, strengthening mechanisms), creep, fracture and fatigue.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4174

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Materials

MCEN 5183 (3) Mechanics of Composite Materials

Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4183

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Solids

MCEN 5194 (3) Electrochemical Energy Conversion and Storage

Presents the fundamentals, principles and experimental techniques of electrochemistry, the background of ionic or electronic conduction of metal, semiconductor, inorganic and polymer materials and applications in the areas of batteries, fuel cells, electrochemical double layer capacitors, electrochemical photonics, sensors and semiconductor electrochemistry.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4194

Recommended: Prerequisites MCEN 2024 and MCEN 3032.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Materials

MCEN 5208 (1-4) Special Topics

Credit hours and subject matter to be arranged.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Miscellaneous

MCEN 5228 (1-4) Special Topics in Mechanical Engineering

Subject matter to be selected from topics of current interest.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students in College of Engineering and Applied Science or to students with 57-180 credits (Junior or Senior) or Mechanical Engineering Concurrent Degree students.

Additional Information: Departmental Category: Miscellaneous

MCEN 5255 (3) Design for Mfg

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Design

MCEN 5258 (1-3) Sp Tpcs-Combustion Seminar

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Special Topics

MCEN 5636 (3) Micro-Electro-Mechanical Systems 1

Addresses issues of micro-electro-mechanical systems (MEMS) modeling, design, and fabrication. Emphasizes the design and fabrication of sensors and actuators due to significance of these devices in optics, medical instruments, navigation components, communications, and robotics. Department consent required.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Manufacturing and Systems

MCEN 5832 (3) Special Topics

Additional Information: Departmental Category: Special Topics

MCEN 5848 (1-6) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. May be repeated for up to 6 total credits.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering graduate students only.

Additional Information: Departmental Category: Miscellaneous

MCEN 5858 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 5868 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 5878 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 5888 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 6001 (3) Reacting Flows

Provides an introduction to reacting flows and combustion. Covers chemical kinetics, including global and detailed mechanisms and the variable density flow equations are derived. Relevant non-dimensional parameters and limiting behaviors are discussed. The Rankine-Hugoniot relations are presented and various aspects of diffusion, kinetically dominated and balanced combustion are outlined. Flame structures are discussed, including laminar and turbulent flames, and the Burke-Schumann solution is outlined. The turbulent forms of the motion equations are derived, and the reactive scalar transport equation and mixture fraction variable are presented. The flamelet progress variable approach is outlined, including a comparison of steady and unsteady flamelet models. Specific topics in spray combustion, triple flames, solid-gas reactors and detonations are discussed.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 6001

Requisites: Requires prerequisite course of MCEN 5021 (minimum grade C-). Restricted to College of Engineering and Applied Science graduate students or BS/MS Concurrent Degree Students only.

Additional Information: Departmental Category: Fluids

MCEN 6184 (3) Structure and Properties of Polymers

Emphasizes the relationship between molecular structure and macroscopic properties. Structural aspects include chain conformation, configuration, and the crystalline and amorphous states. Discusses physical and mechanical properties with a focus on solution and phase behavior, transitions of bulk polymers, and rubber and viscoelastic behavior. Requires background in basic material science and polymer related concepts.

Requisites: Restricted to College of Engineering graduate students only.

Additional Information: Departmental Category: Materials

MCEN 6228 (3) Special Topics

Subject matter to be selected from topics of current interest.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Special Topics

MCEN 6848 (1-6) Independent Study

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Miscellaneous

MCEN 6858 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 6868 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 6878 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 6888 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

MCEN 6949 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Thesis

MCEN 6959 (1-6) Master's Thesis

Additional Information: Departmental Category: Thesis

MCEN 7221 (3) Turbulence

Hydrodynamic stability theory, equations for turbulent flows, free shear flows and boundary layers, homogeneous and isotropic turbulence, overview of turbulent combustion, reaction kinetics, energy equation, Favre averaging, Pdfs, premixed and nonpremixed flame modeling, and recent developments.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Fluids

MCEN 7228 (3) Special Topics

Additional Information: Departmental Category: Special Topics

MCEN 8999 (1-10) Doctoral Dissertation

Additional Information: Departmental Category: Thesis

Mechanical Engineering - Master of Science (MS)

The Master of Science Thesis is a degree program that is well suited for students pursuing a career in academia or industry with a research component. MS Thesis students choose from focus areas in air quality, biomedical, design, energy and environment, materials, mechanics of materials, microsystems, and robotics/control. With support from the research advisor, students in this program have the option of smoothly transitioning into the PhD program.

If a student plans to earn a master's degree and then immediately continue on to a PhD, they can apply directly to the PhD program (p. 1518); it is not necessary to earn a master's degree separately.

For more information, visit the department's Master of Science Thesis (<https://www.colorado.edu/mechanical/current-students/graduate/master-science-thesis/>) webpage.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): BSEV in Environmental Engineering (p. 742)

Requirements

The mechanical engineering Master of Science Thesis curriculum is designed to provide a balance between a modern technological focus and disciplinary depth.

Students must complete at least 30 graduate-level credit hours, to include at least 18 credits in mechanical engineering, including 6 credits of thesis work. Up to 12 credits may be taken outside of the department.

Students must secure a thesis advisor for research and course guidance, and students must attend a select number of mechanical engineering graduate seminars.

For more information, visit the department's MS - Thesis Option (<http://www.colorado.edu/mechanical/current-students/graduate/master-science-msme/ms-thesis-option/>) webpage.

Mechanical Engineering - Professional Master of Science (MSME)

The Master of Science Professional is a degree program that offers possibilities for a wide range of prospective students. This coursework-focused degree program emphasizes both project-based and curriculum-driven learning. It is targeted at working engineers and undergraduates considering, or already pursuing, a career in industry, but can also be completed with the ultimate goal of matriculating in a PhD program.

A thesis is not required to earn this degree. If a student plans to earn a master's degree and then immediately continue on to a PhD, they can apply directly to the PhD program (p. 1518); it is not necessary to earn a master's degree separately.

For more information, visit the department's Master of Science Professional (<https://www.colorado.edu/mechanical/current-students/graduate/master-science-professional/>) webpage.

Requirements

Students must complete at least 30 graduate-level credit hours, to include at least 18 credits in mechanical engineering. Up to 12 credits may be taken outside of the department.

Students must attend a select number of mechanical engineering graduate seminars. A thesis is not required for this degree.

For more information, visit the department's Master of Science Professional (<https://www.colorado.edu/mechanical/current-students/graduate/master-science-professional/>) webpage.

Mechanical Engineering - Doctor of Philosophy (PhD)

Mechanical engineering PhD students at CU Boulder take part in cutting edge, tier-one research, learning from nationally and internationally recognized faculty.

Our research harnesses state-of-the-art experimental, theoretical and computational approaches to expand the frontiers of technology, while advancing fundamentals in the underlying disciplines of fluid and solid mechanics, thermal engineering and materials science and engineering.

PhD students choose from focus areas in air quality, biomedical, materials, mechanics of materials, micro/nanoscale, robotics and systems design, and thermo fluid sciences.

The PhD program in mechanical engineering is available to students entering graduate studies for the first time as well as those who already

have a master's degree. While a master's is not required to enroll, our PhD students will typically earn one on the way to a PhD. The best way to do that is by following an MS thesis curriculum (see the department's Master of Science - Thesis Option (<http://www.colorado.edu/mechanical/prospective-students/graduate/master-science-thesis-option/>) webpage).

PhD students consult with a faculty advisor throughout the duration of their degree to review their research progress and course selection.

For more information, visit the department's PhD (<http://www.colorado.edu/mechanical/prospective-students/graduate/phd/>) webpage.

Requirements

Course Requirements

The PhD requires a minimum of 30 credit hours of coursework in courses numbered 5000 or above, with a minimum GPA of 3.25, plus 30 credit hours of dissertation credit. More coursework may be required at the faculty advisor's discretion.

A maximum of 21 credit hours of graduate coursework may be transferred from another accredited institution. All courses taken for the master's degree at the 5000 level or above at CU Boulder may be applied toward the doctoral degree at the university.

For more information, visit the department's PhD (<http://www.colorado.edu/mechanical/prospective-students/graduate/phd/>) and Focus Areas (<http://www.colorado.edu/mechanical/research/focus-areas/>) webpages.

Preliminary Examination

Every student desiring to pursue the PhD degree must pass a preliminary examination. As a part of this evaluation, students must pass a written math examination, as well as two oral examinations designed to test research and fundamental mechanical engineering competency. Students must also pass a research presentation given to a committee of at least three faculty members. Overall performance in the required examinations will determine pass/fail status.

Comprehensive Examination

After passing the preliminary examination, students continue their coursework and prepare a written thesis prospectus. When ready, they take an oral comprehensive examination covering the graduate coursework and the thesis prospectus. The oral examination is based primarily on a written proposal for the thesis research provided by the student to committee members in advance. This examination is conducted before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All requirements for the mechanical engineering PhD must be completed within six years of the date of commencing coursework.

Interdisciplinary Programs

CU Boulder offers interdisciplinary master's degrees as well as graduate certificate programs to complement a traditional education.

New graduate certificates must be approved by the Graduate School's Executive Advisory Council (EAC). For an updated list of graduate interdisciplinary certificates, visit the Graduate School Admissions (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>) webpage.

Master's Degrees

- Computational Linguistics - Master of Science (MS) (p. 1519)
- Data Science - Master of Science (MS) (p. 1520)
- Data Science - Master of Science (MS) Online (p. 1522)
- Organizational Leadership - Master of Science (MS) (p. 1524)

Certificates

- Graduate Teacher Program - Graduate Certificate (p. 1525)
- Digital Humanities - Graduate Certificate (p. 1525)
- Earth Data Analytics - Foundations - Graduate Certificate (p. 1526)
- Hydrologic Sciences - Graduate Certificate (p. 1527)
- Interdisciplinary Quantitative Biology - Graduate Certificate (p. 1529)
- International Affairs - Graduate Certificate (p. 1529)
- Language Technology - Graduate Certificate (p. 1530)
- Native American and Indigenous Studies - Graduate Certificate (p. 1531)
- Quantitative Methods for Behavioral Sciences - Graduate Certificate (p. 1532)
- Satellite System Design - Graduate Certificate (p. 1533)
- Space Weather and Applications - Graduate Certificate (p. 1534)
- Water Engineering and Management - Graduate Certificate (p. 1535)

Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS)

This is a unique interdisciplinary degree that provides a solid foundation in both computer science and linguistics graduate coursework as well as several courses focused on data-driven linguistics, computational linguistics and information processing. The training is aimed at preparing students for careers in areas such as predictive text messaging, search engines, question-answering, interactive virtual agents and machine translation.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Due to the hands-on learning experience, some courses must be taken on campus. This is a hybrid program.

Requirements

Students must complete at least 32 hours of approved graduate study, including a 2-credit capstone course focused on a publishable research

project, which will run in conjunction with an internship or a CU-based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will also prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. A minimum course grade is a B and a minimum GPA for graduation is a 3.0.

To fulfill core requirements defined below, students must take graduate breadth courses in 3 different breadth bins. This includes core computer science (bins 1 and 3) and core CLASIC (bin 2).

Required Courses and Credits

Code	Title	Credit Hours
Core Linguistics Courses		9
Choose two of the following:		
LING 5030	Linguistic Phonetics	
LING 5420 or LING 6450	Morphology and Syntax Syntactic Analysis	
LING 5430	Semantics and Pragmatics	
Choose one:		
Any LING course at the 5000-, 6000- or 7000-level (subject to advisor approval)		
Core Computer Science Courses		6
Bin 1 (choose one) ¹		
Recommended options:		
CSCI 5454 or CSCI 5444 or CSCI 5714	Design and Analysis of Algorithms Introduction to Theory of Computation Formal Languages	
CSCI 5606 or CSCI 5646	Principles of Numerical Computation Numerical Linear Algebra	
Bin 3 (choose one) ¹		
Recommended options:		
CSCI 5253	Datacenter Scale Computing - Methods, Systems and Techniques	
CSCI 5448	Object-Oriented Analysis and Design	
CSCI 5535	Fundamental Concepts of Programming Languages	
CLASIC Capstone		
LING/CSCI 5140	CLASIC Capstone	2
Core CLASIC Courses		
CSCI/LING 5832	Natural Language Processing (Satisfies Bin 2 requirement)	3
CSCI 7000/ LING 7800	Current Topics in Computer Science (Computational Lexical Semantics)	3
CSCI/LING 7565	Computational Phonology and Morphology	3
Choose two of the following:		6
CSCI 5352	Network Analysis and Modeling	
CSCI 5502	Data Mining	
CSCI 5622	Machine Learning	
CSCI 5922	Neural Networks and Deep Learning	
CSCI 6622	Advanced Machine Learning	
CSCI 7000	Current Topics in Computer Science (Inference, Models & Simulation for Complex Systems)	

CSCI 7222	Topics in Nonsymbolic Artificial Intelligence (Probabilistic Models of Human & Machine Intelligence)
CSCI 7222	Topics in Nonsymbolic Artificial Intelligence (Representation Learning for Language)
LING 5200	Introduction to Computational Corpus Linguistics
LING 5800	Open Topics in Linguistics (Machine Learning and Linguistics)
LING 6300/3800	Topics in Language Use (Formal Models of Linguistics)
LING 6520	Topics in Comparative Linguistics (Computational Grammars)
PHIL 5440	Topics in Logic
PHIL 5460	Modal Logic
Any other CSCI or LING course at the 5000-, 6000- or 7000-level	
Any Core course listed above (not already taken)	
Total Credit Hours	32

¹ Visit the computer science department website (<http://www.colorado.edu/cs/current-students/graduate-students/graduate-breadth-courses/>) for a full list of course options in each of the 3 breadth bins. (Updated every two years.)

Learning Outcomes

The program is intended to:

- Provide a solid foundation in computer science, data-driven linguistics and natural language processing graduate coursework.
- Educate graduates to be specialists in the application of computers to the processing of natural languages, such as English, Chinese, Arabic and Urdu.
- Prepare students for jobs in the field of computational linguistics, also known as text analytics, natural language processing and informatics, a field critical to the success of mainstream global businesses who compete for employees qualified to address these needs.

Data Science - Master of Science (MS)

The on-campus Master of Science in Data Science program focuses on developing knowledge and skills in interdisciplinary and collaborative data science competencies including statistical analysis, data structures and algorithms, data mining, machine learning, big data architecture and data visualization.

Data science is a multidisciplinary field that focuses on the extraction of knowledge and insight from large datasets. Data scientists are tasked with using a range of skills in applied mathematics, statistics and computer science, and in domain applications such as information science, geography, business, media and the humanities.

The MS-DS provides learners with a strong foundation in acquiring, cleaning and managing data. Learners will learn to analyze large datasets using data mining and machine learning techniques. Students will also design, conduct and run statistical experiments and models; draw

rational conclusions from data using probability theory and statistics; and more.

Graduates of the MS-DS program will be well-prepared to apply data science skills to a specific domain area. Graduates will also be able to clearly communicate the results of data science analysis to a non-technical audience; structure effective meetings and projects using collaboration skills; and act ethically in the role of professional data scientist.

Topic Areas

Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics.

Computer Science

Computer science is an exciting and challenging field that impacts many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry and they advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

General Data Science

Data science is a multidisciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from structured and unstructured data.

Information Science

Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena and translate those findings to the design and development of useful and meaningful technology.

Requirements

Admission Requirements

Applicants are eligible to apply to the program if they have earned a bachelor's degree or its equivalent from a regionally accredited college or university.

Prerequisite Knowledge

Applicants should have 2 semesters of Calculus, Linear Algebra, and Python and R Programming. Applicants should be familiar with Differential Calculus, Integral Calculus, and have some experience with infinite sequences and series. Multivariate Calculus is preferred but not required.

Application Requirements

Applicants must have a minimum of a 3.0 cumulative GPA in their prior degree program.

To apply, applicants must submit the following:

- A completed graduate admission application and application fee.
- A copy of undergraduate transcripts and, if applicable, any graduate transcripts.
- A statement of purpose that includes the area the applicant wishes to specialize in.
- Three letters of recommendation.
- A current curriculum vitae or resume.

An applicant whose native language is not English must provide proof of English proficiency (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/international-students/english-proficiency-requirements/>). A TOEFL score of at least 80, an IELTS score of at least 6, or a Duolingo score of at least 100 is required. Applicants can request that the testing agency submit their scores directly to the Office of Admissions (<https://www.colorado.edu/admissions/>) and/or automatically submit their TOEFL scores to CU Boulder using institution code 4841. To report your official Duolingo scores, please click Send Results from inside the application, then choose University of Colorado Boulder - Undergraduate.

For information about application deadlines, please see the Graduate School's Admissions Deadlines (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>).

Program Requirements

The on-campus data science master's degree seeks to shape tomorrow's leaders by providing learners with the skills, competencies and knowledge necessary to fuel creative problem-solving, adaptability, and the capability to communicate effectively across diverse organizations.

The MS degree is a non-thesis degree, though students may have the opportunity to complete a capstone or project as part of the 30 required credit hours. Students must complete 21 credits of core coursework in statistics, computer science and general core concepts as well as 9 credits of elective coursework. The degree does not require a master's final/comprehensive examination.

Data Science - Master of Science (MS) Online

The online Master of Science degree in Data Science (MS-DS) is an interdisciplinary degree program offered through the University of Colorado Boulder and hosted online through Coursera's learning platform. With performance-based admissions and no application process, the MS-DS is ideal for individuals with a broad range of undergraduate education and/or professional experience in computer science, information science, mathematics and statistics.

Data science is a multidisciplinary field that focuses on the extraction of knowledge and insight from large datasets. Data scientists are tasked with using a range of skills in applied mathematics, statistics, and computer science, and in domain applications such as information science, geography, business, media and the humanities.

The MS-DS on Coursera provides learners with a strong foundation in acquiring, cleaning and managing data. Students will learn to analyze large datasets using data mining and machine learning techniques. Students will also design, conduct, and run statistical experiments and models; draw rational conclusions from data using probability theory and statistics; and more.

Graduates of the MS-DS on Coursera program will be well-prepared to apply data science skills to a specific domain area. Graduates will also be able to clearly communicate the results of data science analysis to a non-technical audience; structure effective meetings and projects using collaboration skills; and act ethically in the role of professional data scientist.

Topic Areas

General Data Science

Data science is a multidisciplinary field that uses scientific methods, processes, applications, algorithms and systems to extract knowledge and insights from structured and unstructured data.

Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics.

Computer Science

Computer science is an exciting and challenging field that has an impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

Information Science

Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms

of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena, and translate those findings to the design and development of useful and meaningful technology.

Program Policies

This specialized program does not align with standard campus policies. Please refer to the Specialized Programs (p. 1685) section of the catalog for more information.

Requirements

Admission Requirements

Performance-Based Admission

To be admitted to the MS-DS as a degree-seeking student, students must enroll in and complete a pathway specialization with a 3.0 GPA or better. The pathway is a series of 3 one-credit courses with a focus on either statistics or computer science—students choose the pathway that is right for them. The courses in their chosen pathway are part of the required curriculum, so students make direct progress toward their degree as they complete their pathway.

Prerequisite Knowledge

There are no formal prerequisites for the MS-DS, but students should be knowledgeable in the following:

- Python
- R programming
- Calculus including derivatives and integrals
- Linear algebra including matrix multiplication, matrix inversion and solving linear systems using matrices

If students do not yet feel ready to complete their pathway courses, the department suggests reviewing courses on the Coursera platform and/or enrolling in a pathway specialization as a non-credit learner, which gives them the option of previewing course content.

Required Courses and Credits

The MS-DS is a non-thesis degree that requires 30 credit hours of coursework. Students must complete 21 credits of core coursework in statistics, computer science, and general core concepts as well as 9 credits of elective coursework. Students will also participate in practical, hands-on projects that utilize cloud-based programming environments and Jupyter Notebooks. Coursework includes access to real-world big data sets to prepare students for their future careers.

Learner Journeys

Students may complete courses in any order, but are advised to follow one of the recommended learner journeys below.

Statistics Pathway

We recommend that students who are skilled in statistics complete their courses in the following order:

Code	Title	Credit Hours
Statistical Inference for Data Science Courses		3
DTSA 5001		
DTSA 5002		
DTSA 5003		
Core Concepts in Data Science Courses		3

DTSA 5301	
DTSA 5302	
DTSA 5303	
Core Courses	
Complete in any order	
Statistical Modeling for Data Science Courses	3
DTSA 5011	
DTSA 5012	
DTSA 5013	
Data Structures and Algorithms Courses	3
DTSA 5501	
DTSA 5502	
DTSA 5503	
DTSA 5304	
Data Mining Courses	3
DTSA 5504	
DTSA 5505	
DTSA 5506	
Machine Learning Courses	3
DTSA 5509	
DTSA 5510	
DTSA 5511	
Big Data Architecture Courses	2
DTSA 5507	
DTSA 5508	
Data Science Elective Courses	10
Total Credit Hours	30

Computer Science Pathway

We recommend that students who are skilled in computer science complete their courses in the following order:

Code	Title	Credit Hours
Data Structures and Algorithms Courses		3
DTSA 5501		
DTSA 5502		
DTSA 5503

Organizational Leadership - Master of Science (MS)

The Master of Science in organizational leadership is an interdisciplinary, fully online professional master's degree that prepares early- to mid-career professionals to succeed as tomorrow's dynamic leaders. Through coursework that blends business, communications and social sciences, the program develops the knowledge and skills students need to think critically about organizational challenges and how to address them using best practices. Students learn to align others around a shared vision, build and manage effective teams, and apply the leadership skills necessary to excel in an increasingly fast-paced and complex working world.

For more information, visit the Master of Science in Organizational Leadership (<http://msol.colorado.edu/>) webpage.

Requirements

Students must complete at least 30 credit hours of graduate coursework. The program is composed of 10 courses: six core courses and four specialized track courses.

Core Courses

Core courses ensure that students have the necessary understanding of the complexities of organizational leadership and the varied dimensions of change within the context of public, private and nonprofit organizations. The curriculum prepares graduates to be successful in understanding organizational cultures, anticipating and managing change, and enhancing performance and human capital management. Core courses include:

Code	Title	Credit Hours
ORGL 5005	Leadership and Organizations	3
ORGL 5010	Leading Change and Innovation	3
ORGL 5015	Analytics and Data-Driven Decision Making	3
ORGL 5020	Strategic Communication	3
ORGL 5025	Performance Management	3
ORGL 6830	Master's Capstone (MSOL)	3

The purpose of the capstone, the final course of the program, is for students to apply knowledge and skills acquired during their program to addressing actual challenges facing an organization. Students do

this—under the guidance of the instructor and other subject matter experts—by collecting, processing and analyzing data and information about the organization and applying appropriate analytic methods to develop, propose and substantiate their recommended solution to the organization's problem.

Specialized Track Courses

Students may choose to specialize in one of the following tracks.

Human Resources Track

This track is ideal for students who wish to enter or advance a career in Human Resources or who want to focus on enhancing employee satisfaction and organizational performance as they assume increasing management and leadership responsibilities. Courses include:

Code	Title	Credit Hours
ORGL 5105	Negotiation and Conflict Resolution	3
ORGL 5110	Human Resources Law	3
ORGL 5115	Total Rewards Strategies	3
ORGL 5120	Training and Development	3

Strategic Leadership Track

This track is geared for students who want to hone their ability to think, plan, and operate strategically, lead personnel in the allocation of organizational resources and accomplish organizational objectives in a deliberate and systematic manner. Courses include:

Code	Title	Credit Hours
ORGL 5205	Strategic Planning in Organizations	3
ORGL 5210	Competitive Analysis and Positioning	3
ORGL 5215	Organization and the Law	3
ORGL 5220	Operations and Designs of Organizations	3

Leading Innovation Track

The leading innovation track explores leadership at the intersection of business and innovation and helps students learn to drive strategic organizational transformation. It addresses the gap that exists between the aspirations of executives to innovate and their ability to execute. It focuses on the question: why and how should leadership, innovations and technologies be leveraged to shape and support strategic and entrepreneurial initiatives in the global competitive landscape. Courses include:

Code	Title	Credit Hours
ORGL 5305	Leadership and Intrapreneurship	3
ORGL 5310	Design Thinking	3
ORGL 5315	Strategy and Innovation	3
ORGL 5320	Building and Leading Innovative Work Teams	3

Organizational Communication Track

Communication is the key social process that creates and sustains all features of organizational life—including assumptions about power, knowledge, diversity, culture and teamwork that shape the practice of leadership. The organizational communication track offers a perspective that puts communication at the center of our understanding and

explanation of all organizational and leadership phenomena. Courses include:

Code	Title	Credit Hours
ORGL 5405	Diversity and Organizational Communication	3
ORGL 5410	Dynamics of Group Communication	3
ORGL 5415	Organizational Culture	3
ORGL 5420	Knowledge Management	3

Organizational Leadership (Broad Perspective) Track

This is a great track option for those who want to customize their degree to obtain broad exposure to the field of organizational leadership. Students select any four track courses from the offerings available under the other tracks (Human Resources, Leading Innovation, Organizational Communication and/or Strategic Leadership). With pre-approval, students also have the option of transferring in up to three relevant graduate courses from other programs and colleges.

Center for Teaching & Learning - Graduate Certificate

The Center for Teaching & Learning supports graduate students who teach on the CU Boulder campus and provides continued professional development opportunities as they move through their graduate programs. We prepare graduate students for success on the job market in higher education or in the private sector as professionals.

To that end, we offer:

- Comprehensive college teacher training (workshops on teaching, individual consultation on any aspect of the graduate experience, video consultation on teaching in labs, recitations, and courses).
- Workshops and guidance to support the scholarship of teaching and learning.
- Academic and nonacademic career preparation opportunities through conferences, seminars, poster sessions and individual consultations on curriculum vitae, job letters, teaching statements and interviewing skills.

Requirements

The Center for Teaching & Learning (CTL) offers graduate students the opportunity to pursue two certificates. Requirements for each are posted on the (<https://www.colorado.edu/center/teaching-learning/>)C (<http://www.colorado.edu/gtp/>)TL (<https://www.colorado.edu/center/teaching-learning/>) website:

- The certificate in college teaching (<https://www.colorado.edu/center/teaching-learning/programs/graduate-certificates/certificate-college-teaching/>) is designed for graduate students who teach laboratories, recitations or courses as instructor-of-record on the Boulder campus.
- The future faculty development certificate (<https://www.colorado.edu/center/teaching-learning/programs/graduate-certificates/future-faculty-development-certificate/>) (FFD) allows those who do not teach the chance to do a project to learn about postsecondary teaching or institutions.

CTL organizes and runs the Lead Graduate Teacher Network, which manages 50 lead graduate teachers in over 45 departments across the

university. Lead graduate teachers receive intensive training, provide video consultation on teaching for teaching assistants and GPTIs, and assist department faculty with discipline-specific TA training.

The CTL's Collaborative Preparing Future Faculty Network (COPFFN) links colleges and universities on the Front Range and provides opportunities to learn about various collegiate teaching environments. Graduate students may attend site visits to partner campuses, collaborate with a mentor on a partner campus, and attend the Spring Conference/COPFFN Forum, where COPFFN Network faculty speak about their careers.

The CTL collaborates with the University Libraries to offer Provost's Fellowships for the University Libraries to graduate students who wish to explore academic librarianship as a career.

Digital Humanities - Graduate Certificate

The digital humanities graduate certificate welcomes students from all disciplines, including the humanities and arts, social sciences, natural sciences, computational and mathematical sciences, engineering, and communication, media and information science. The certificate prepares students to:

- create, utilize and evaluate digital methods and tools for research;
- integrate methods and tools into their teaching;
- assess the diverse impacts of technologies on people and society; and
- leverage digital technologies for public outreach and engagement.

Through an interdisciplinary curriculum, the certificate provides graduate students from across campus the opportunity to explore the evolution and variety of digital humanities theories and practices and to study approaches in the field in-depth. Moreover, the certificate is intended to stimulate collaborations among graduate students in a range of fields, thus preparing them for work in a team-based environment.

For additional details, including the procedures to declare and complete the certificate, visit the Digital Humanities Graduate Certificate (<https://www.colorado.edu/crdds/dhgc/>) webpage.

Requirements

Required Course and Credits

The certificate consists of course requirements only, at least 9 credit hours at the graduate level with an average GPA of 3.0 (B) or better.

In addition to the core course, students must choose two elective courses to complete the certificate. Certain special topics courses also count as electives. For a full list, please visit the certificate website's Elective Courses (<https://www.colorado.edu/crdds/what-we-do/digital-scholarship/digital-humanities-graduate-certificate/elective-courses/>) webpage.

Code	Title	Credit Hours
Core Course		3
DHUM 5000	Introduction for Digital Humanities: Movements, Methods, and Tools

JRNL 5562	Digital Journalism
LING 5200	Introduction to Computational Corpus Linguistics
MDST 5001	Connected Media Practices
PSCI 7185	Political Network Analysis
STAT 5680	Statistical Collaboration
STAT 5700	Philosophical and Ethical Issues in Statistics

Total Credit Hours

9

Capstone Project

Though not required to complete the certificate, students may also complete a 1-3 credit Digital Humanities capstone project in collaboration with other students under the guidance of a faculty advisor.

Earth Data Analytics - Foundations - Graduate Certificate

The Earth Data Analytics - Foundations (https://www.colorado.edu/earthlab/earth-data-analytics-foundations-professional-certificate/?utm_source=course-catalog&utm_medium=website&utm_campaign=certificate-2019) professional certificate provides students with skills to launch or advance their careers in the rapidly expanding world of earth data science. The three-course (https://www.colorado.edu/earthlab/earth-analytics-certificate/earth-data-analytics-courses/?utm_source=course-catalog&utm_medium=website&utm_campaign=certificate-2019) program can be completed online at a student's own pace or in person in as little as ten months. Students do not need any background in programming or science to enroll.

Data are becoming increasingly available as technology grows and improves. This data can help address some of the world's most pressing environmental problems. As a result of this, earth and environmental scientists with data science expertise (earth data scientists) are now in high demand in the job market. All skills taught in the program are identified through market research on in-demand skills in industry and government.

Through this nine-credit program students will learn:

- Applied data science skills
- Skills needed to work with different types of data
- Interdisciplinary communication & collaboration techniques and approaches
- Skills needed to address scientific challenges using data

Students will emerge from the program with skills in:

- Scientific programming
- GIS and remote sensing
- Using APIs
- Creating automated workflows using data that anyone can use
- Open reproducible science
- And more

Visit the Earth Lab website (<https://www.earthdatascience.org/>) to explore lessons and tutorials related to this program.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

The professional graduate certificate requires three sequential courses beginning in the fall semester and ending in June, and can be completed entirely online.

Required Courses and Credits

Code	Title	Credit Hours
GEOG 5463	Earth Analytics Data Science Bootcamp	3
GEOG 5563	Earth Analytics	3

GEOG 5663	Earth Analytics Applications	3
Total Credit Hours		9

Plan of Study

The three certificate courses must be completed sequentially and can be completed in as little as ten months or up to three years. All certificate courses are offered once annually on the following schedule:

Course	Title	Credit Hours
Fall Semester		
GEOG 5463	Earth Analytics Data Science Bootcamp	3
Credit Hours		3
Spring Semester		
GEOG 5563	Earth Analytics	3
Credit Hours		3
Summer		
GEOG 5663	Earth Analytics Applications	3
Credit Hours		3
Total Credit Hours		9

Through completing the certificate, students will learn to:

- Apply data science skills to scientific challenges related to earth systems.
- Code using Python and Jupyter Notebooks.
- Use the command line and other tools to work with environmental and earth systems data.
- Use version control systems like Git and GitHub to work collaboratively as well as back-up and document workflows.
- Use different data types and formats including GIS, remote sensing, social media, text, time series, and more.
- Communicate and collaborate with people across different disciplines using different tools.
- Create fully automated and reproducible data workflows.

Environmental Justice - Graduate Certificate

Environmental justice (EJ) refers to the right to a safe and healthy environment for everyone, regardless of race, class, gender, ability or other considerations, as well as a place at decision-making tables. From this perspective, the environment is not separate from society, but includes spaces where people live, work, play, learn and/or pray.

The CU Boulder graduate certificate in environmental justice provides training in the interdisciplinary and dynamic field of environmental justice studies, as well as opportunities for engaged interactions with the challenges and solutions environmental justice communities face today.

The certificate program is open to CU Boulder graduate students from all units and programs, and seeks to include scholars and practitioners from diverse disciplinary and experiential backgrounds in its development.

For more information, visit the Graduate Certificate in Environmental Justice (<https://www.colorado.edu/certificate/ej/>) website.

Requirements

Students must complete 12 credits, including the 3-credit pillar course and three approved electives.

Code	Title	Credit Hours
Required Course		
ENVS 5100	Special Topics in Environmental Studies (Topic: Foundations of Environmental Justice)	3
Electives		
Choose three of the following:		9

HIST 6410	Readings in Environmental History	
PHIL 5240	Seminar in Environmental Philosophy	
PSCI 7024	Seminar: Selected Political Theories (Topic: Environment and Political Theory)	
SOCY/ENVS 6007	Foundations of Environmental Sociology	
SOCY 6017	Inequality, Democracy, and the Environment	
Total Credit Hours		12

Hydrologic Sciences - Graduate Certificate

The CU Boulder hydrologic sciences graduate certificate program focuses on quantitative studies of water in the environment including its role in geologic and biogeochemical processes, ecosystem functions and global elemental cycling. The program is interdisciplinary and interdepartmental. It is intended for science and engineering graduate students, both currently enrolled and prospective. It allows students to obtain recognition for their accomplishments in hydrologic sciences and demonstrates the quantitative multidisciplinary education desired by many prospective employers.

PhD students can choose to enroll for the hydrologic sciences subplan or certificate, and MS students can pursue a hydrologic sciences graduate certificate, while concurrently obtaining a doctoral or master's degree, respectively, in an associated academic department. Prerequisites and course requirements are identical for the PhD subplan and graduate certificate.

All hydrologic sciences program students are admitted through one of the participating departments: Atmospheric and Oceanic Sciences (ATOC); Civil, Environmental and Architectural Engineering (CEAE); Ecology and Evolutionary Biology (EBIO); Environmental Studies (ENVS); Geography (GEOG); or Geological Sciences (GEOL).

Students may apply for admission to the program after admission to a graduate program in one of the participating departments. The program is designed to encourage students with a variety of undergraduate backgrounds to enter the field.

Hydrologic sciences graduate students conduct research within participating departments, research institutes and centers (e.g., INSTAAR), or partner government agency labs in the Boulder area (e.g., USGS, NOAA). Primary supervision of the student's research may be provided by any faculty member approved by the department, though the program requires representation from program faculty on students' comprehensive exam (PhD) and defense committees.

For additional information, visit the program webpage (<https://www.colorado.edu/program/hydrosociences/>) or contact the Graduate Coordinator.

Requirements

Students must complete all hydrologic sciences required courses (and any courses taken to remedy deficiencies) with a grade of B or better.

The student's thesis/dissertation topic must include substantial use of hydrologic science, and the thesis committee must include at least one hydrologic sciences faculty member.

The certificate or subplan (for PhD) is not awarded until the student completes all degree requirements for their graduate degree.

Students are referred to the document "Graduate School Checklist for Graduation and Other Helpful Information" and the University Catalog for general information on requirements for their degree. In case of a conflict between those documents and the requirements stated here, the rules of the Graduate School apply.

Prerequisites

All students entering the program are expected to have advanced-level knowledge of mathematics, (full year of college level calculus including differential and integral calculus; linear algebra and differential equations are strongly encouraged). Students are expected to have completed one semester of college level physics (mechanics).

In addition, students are encouraged to work with their advisors and committees to identify and fulfill any other specialized degree and/or research-related required courses. For example, students interested in the physical aspects of hydrologic sciences are expected to have advanced-level knowledge of physics (mechanics and thermodynamics) and fluid mechanics. Similarly, students interested in the chemical aspects of hydrologic sciences may be expected to have advanced-level knowledge of organic and/or physical chemistry. Furthermore, students interested in the biological or ecological aspects of hydrologic sciences are expected to have an advanced-level knowledge of biology and/or ecology.

Students may also have to satisfy other specific undergraduate prerequisites of the home department.

Required Courses and Credits

A total of 5 courses are required, as follows:

- One course from List A
- One course from List A or B
- Three elective courses

Core Requirements

Choose two, at least one must be from the List A.

Code	Title	Credit Hours

Interdisciplinary Quantitative Biology - Graduate Certificate

The Interdisciplinary Quantitative Biology (IQ Biology) PhD Certificate Program is designed for students in life sciences, engineering, computer science, and applied mathematics who are interested in learning the essential competencies of researchers who work and collaborate effectively across disciplines. These competencies may be attained in a number of ways, including courses, lab rotations, internships and outreach activities.

Requirements

Core Courses

These courses cover cutting-edge quantitative techniques, and include one course in the fall and two courses in the spring. IQ Biology core courses count simultaneously toward a student's chosen academic department's electives. Core courses have included topics like quantitative optical imaging, mathematical and computational biology, bioinformatics and genomics, biologically-inspired multi-agent systems, and biophysics.

Gap-Filling Courses

Students take one to three courses outside of their primary discipline(s). These courses allow students to explore other areas of quantitative biology and fill any "gaps" in their background to benefit their future interdisciplinary research.

Lab Rotations

Students rotate through four different research labs in at least two different disciplines. These rotations allow students to explore their interests, learn new techniques and work with prospective thesis advisors.

Additional Coursework and Research

During the second year, students begin taking the courses required by their chosen academic department, and those advised by their departmental thesis committee.

Engagement

While pursuing the PhD degree, IQ biology student remain engaged with the IQ biology program by:

- Volunteering in academic outreach and teaching projects.
- Pursuing industry or government internships.
- Attending seminars with the IQ biology community, as well as meeting with the speaker.
- Developing and presenting research in a student-run IQ biology symposium on campus.
- Mentoring or tutoring new IQ biology students.
- Attending social gatherings held for the entire IQ biology community.

After completing all program requirements, graduating students will receive a certificate in Interdisciplinary Quantitative Biology in addition to their PhD from their chosen academic department.

International Affairs - Graduate Certificate

The graduate certificate in international affairs allows currently matriculated graduate students across CU Boulder to examine global issues and position their own graduate research in a global context. It will also allow graduate students in specific disciplines to study international affairs in an interdisciplinary way and with access to courses across the social sciences, humanities and natural sciences.

Requirements

Admission Requirements

Students must be enrolled in a graduate degree program at the University of Colorado Boulder. They may apply for the graduate certificate at any point in their graduate career by emailing the International Affairs Program at iafs@colorado.edu with the following:

- A brief essay indicating how their research, professional or creative work, or teaching will relate to international affairs
- A statement of approval from their graduate advisor or graduate program in their home department

Requirements fulfilled at CU prior to admission to the Graduate Certificate in International Affairs may be counted towards certificate requirements.

Required Courses and Credits

The certificate requires successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from our list of approved graduate courses. A maximum of 6 credits can be taken from any one discipline. This list is built upon our undergraduate interdisciplinary model and draws from our main cognate units in the Social Sciences, Arts & Humanities, and Natural Sciences divisions, and includes courses taught by faculty on the International Affairs Committee.

Students may request that the IAFS Graduate Director approve courses (including independent study courses) from outside this list, if the course contains significant international content and the student's completed work for that course is related to international affairs. The courses may be drawn from the Social Sciences, Arts & Humanities, or Natural Sciences divisions in the College of Arts of Sciences, as well as from other schools and colleges at CU Boulder.

In addition to the 9 credit hours of graduate coursework, the certificate requires participation in the International Affairs Colloquium. The colloquium is intended for graduate students to present their works-in-progress for discussion and feedback from faculty and participants. Works-in-progress encompass various aspects of intellectual and

professional life. Projects may include academic papers, thesis and dissertation chapters, grant proposals, conference presentations, or job applications. Two semesters of participation in the colloquium will be required. One semester of participation is defined as attendance at a colloquium session and presentation of a work in progress during that semester.

Code	Title	Credit Hours
Core Requirement		
International Affairs Colloquium

SOCY 6017	Inequality, Democracy, and the Environment

Language Technology - Graduate Certificate

The graduate certificate in language teaching with technology is offered by the the Division of Continuing Education at the University of Colorado Boulder. It is a 12-credit fully online graduate program. It is designed for language educators who wish to improve their technological, pedagogical and linguistic proficiency. The courses are fully online and taught by experienced language educators. Visit the Language Technology Graduate Certificate website for additional details.

Requirements

Students must complete 12 credits from the list of courses below in order to complete the certificate, not necessarily in the order listed below. Additional courses may be added as they become available. Visit the Language Technology Graduate Certificate (<http://www.colorado.edu/elevatecertificate/>) website for additional details.

Code	Title	Credit Hours
Required

LGTC 5040	Telecollaboration for Language Learning Foundations	
LGTC 5045	Language Teacher Proficiency Through Telecollaboration	

LGTC 5050	Language Technology Practicum
Total Credit Hours	11

Native American and Indigenous Studies - Graduate Certificate

The Center for Native American and Indigenous Studies (CNAIS) offers both a graduate and undergraduate certificate in Native American and Indigenous Studies (NAIS). These certificate programs offer students the opportunity to strengthen their interdisciplinary knowledge and experience in this increasingly important area. The rise of global and scholarly attention to issues of indigeneity signals a larger transformation in conceptions of nation, citizenship, and transnationalism in the context of globalization.

A founding principle of CNAIS is to value and expand upon the connections and interdisciplinary nature of Native American & Indigenous scholarly work. The issues facing Native American and Indigenous peoples today require expertise from multiple disciplines and draw from scholarship in a number of fields, including art & art history, anthropology, ethnic studies, environmental studies, geography, history, law, linguistics, literature, political science, religion and sociology.

CU Boulder has recruited an unprecedented number of faculty working in a wide array of areas related to NAIS, and already enjoys a high national and international reputation in several of these areas. In pursuing the NAIS certificate, students join a vibrant and growing community at CU Boulder, including graduate and undergraduate students and more than 40 professors.

For more information, visit the Center for Native American and Indigenous Studies (<http://www.colorado.edu/cnaais/>) website or contact cnaais@colorado.edu.

Requirements

This interdisciplinary certificate requires a total of four courses (12 credits). One introductory course (ETHN 6103) is required of all students; the other courses can be taken electively, with the provision that two of the four courses be outside the student's home department.

Required Courses and Semester Credit Hours

Code	Title	Credit Hours
Required Course		
ETHN 6103	Indigenous Thought and Theory: Foundations in NAIS	3
Electives ¹		9
At least three of the four required elective courses must be taken outside the student's home department.		
<i>Approved Anthropology Courses</i>		
ANTH 5020	Explorations in Anthropology	
ANTH 5045	Introduction to Museum Anthropology	
ANTH 5150	Human Ecology: Biological Aspects	
ANTH 5210	Southwestern Archaeology	
ANTH 5220	From Olmec to Aztec: The Archaeology of Mexico	
ANTH 5224	Archaeology of the Maya and Their Neighbors	

ANTH 5270	Plains Archaeology
ANTH 5470	Collections Research Practicum in Cultural Anthropology
ANTH 5630	Nomadic Peoples of East Africa

MUSC 5112	Proseminar in Ethnomusicology
MUSC 5142	American Indian Music
Approved Museum and Field Studies Courses	
MUSM 5045	Introduction to Museum Anthropology
MUSM 5912	Collections Research Practicum in Cultural Anthropology
Approved Religious Studies Courses	
RLST 5030	Religions in America
RLST 5300	Topics in Native American Religions
RLST 5350	Native American Religions: Regional Studies
<hr/>	
Total Credit Hours	12

¹ Elective courses not taught by CNAIS core or affiliate faculty must be approved by the CNAIS director.

Quantitative Methods for Behavioral Sciences - Graduate Certificate

The purpose of the graduate certificate in quantitative methods is fourfold:

- to strengthen interdepartmental links and communication among social and human science departments at CU Boulder, both in general and specifically with regards to quantitative research methodology and statistical analysis,
- to provide incentive and recognition to graduate students from a diverse set of departments who choose to cultivate expertise in quantitative research methods and methods of statistical analysis,
- to increase the visibility of and promote courses in quantitative research methods (possibly with the benefit that additional quantitative courses can be developed and taught), and
- as a consequence of all of the above, to improve the quality of quantitative training of graduate students at CU Boulder, increasing students' chances of employment upon completion of their graduate studies.

Requirements

Application Process

1. Review the course requirements below.
2. Complete the application form (<https://www.colorado.edu/education/node/3115/attachment/>) (see also example form (<https://www.colorado.edu/education/node/3113/attachment/>)).

3. Review application with the advisor to ensure the courses meet the advisor's expectations for expertise in quantitative methods training.
4. Submit the application electronically—along with all available syllabi and an unofficial transcript—to edadvise@colorado.edu. (allison.atteberry@colorado.edu)

Note: If a student's course plan meets the requirements and all courses have already been completed at the time of application, the student will receive approval for the certificate. If some of the intended coursework will take place in future semesters, then the student will be given "conditional" approval. Once all coursework is completed, the student must submit an updated application that includes an unofficial transcript showing that the courses were satisfactorily completed.

Applications will be reviewed once per semester. Deadlines are Nov. 1 and March 1.

Course Requirements

Students will be awarded the certificate if they complete a two-semester foundational sequence in statistics (e.g., EDUC 8230/8240, PSYC 5741/5751, SOCY 5111/6111) as well as a minimum of four additional courses from the approved list below, at least one of which must be outside the student's home department.

The guidelines serve as a minimum threshold for the application process. However, each student's advisor may require their students to take more than the minimum of 6 courses, or to decide that certain courses are not sufficiently rigorous to count towards the certificate. The application will then be reviewed by a cross-disciplinary committee to evaluate whether the course plan meets the certificate requirements.

Required Courses and Credits

Code	Title	Credit Hours
Foundational Sequence in Statistics		
Sequence examples: ¹		6
EDUC 8230 & EDUC 8240	Quantitative Methods I and Quantitative Methods II	
PSYC 5741 & PSYC 5751	General Statistics and General Statistics	
SOCY 5111 & SOCY 6111	Data 1: Introduction to Social Statistics and Data 2: Data Analysis	
Approved Electives		
Choose a minimum of four: ²		12
EDUC 7326	Quasi-Experimental Design in Causal Inference in Social Sciences	
EDUC 7386	Educational Evaluation	
EDUC 7456	Multilevel Modeling	
EDUC 7396	Categorical Data Analysis	
EDUC 8710	Measurement in Survey Research	
EDUC 8720	Advanced Topics in Measurement	
IPHY 5300	Statistical Genetics for Complex Traits	
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	
MKTG 7310	Design and Analysis of Experiments in Business	
ORMG 7830	Research Design and Methods in Management	
PSCI 7108	Special Topics	

PSCI 7155	Maximum Likelihood Estimation and Generalized Linear Models	
PSYC 5122	Quantitative Genetics	
PSYC 5242	Biometrical Methods in Behavioral Genetics	
PSYC 5541	Special Topics in Psychology	
PSYC 5761	Structural Equation Modeling	
PSYC 6200	Issues and Methods in Cognitive Science	
PSYC 6761	Topics in Advanced Structural Equations Modeling	
SOCY 5031	Research Design	
SOCY 7111	Data III–Advanced Data Analysis	
Total Credit Hours		18

¹ Students from a department that does not offer a two-semester sequence of this nature are welcome to take one of the three sequences listed above, and are encouraged to contact the instructors of those sequences to determine which of them would provide the best fit.

² At least one must be outside the student's home department.

Satellite System Design - Graduate Certificate

The certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in Satellite System Design (SSD). It blends courses from the Smead Department of Aerospace Engineering Sciences, Electrical, Computer and Energy Engineering and Engineering Management Departments. The certificate allows students to develop interdisciplinary skills in the area of satellite design and be more desirable to potential employers.

This certificate is available to degree-seeking and non-matriculated students. For the latter, please visit Continuing Education (<https://ce.colorado.edu/programs/access/>) to learn more about enrollment and costs. Additional certificate information can be found in the department's Satellite System Design Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/satellite-system-design-certificate/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Completed undergraduate degree from an institution accredited by and agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra, and differential equations, two semesters of undergraduate calculus-based physics, and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Submission of application form. Please visit the AES Certificates Page (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) for more details.

- For Continuing Education (non-matriculated) students, enrollment permission from teaching faculty for each course to take.

We are not able to evaluate transcripts or offer advice on remedial coursework. Please use our Undergraduate Curriculum (<https://www.colorado.edu/aerospace/current-students/undergraduates/curriculum/>) and Course Syllabi (<https://www.colorado.edu/aerospace/current-students/course-syllabi/>) as reference. Courses from already awarded degrees cannot be used to fulfill certificate requirements.

Certificate Requirements

Program Tracks

The certificate in satellite system design (SSD) offers two track options.

Track 1: Hands-on (recommended for on-campus students.)

Code	Title	Credit Hours
Required Courses		12
ASEN 5148	Spacecraft Design ¹	3
ASEN 5018	Graduate Projects I (Project must have a satellite or rocket focus)	3
ASEN 6028	Graduate Projects II (Project must have a satellite or rocket focus)	3
One elective course from list below		3

Track 2: Distance Compatible

Code	Title	Credit Hours
Required Courses		12
ASEN 5148	Spacecraft Design ¹	3
EMEN 5405	Fundamentals of Systems Engineering ¹	3
Two elective courses from list below (no more than one EMEN course)		6

Elective List

Students are required to meet course prerequisites. Questions should be directed to the course instructor.

To develop cross-disciplinary breadth, students are strongly encouraged, but not required, to choose elective courses outside of their major.

Code	Title	Credit Hours
Electives		
ASEN 5010	Spacecraft Attitude Dynamics and Control ^{1,2}	3
ASEN 5050 or ASEN 5052	Space Flight Dynamics ¹ Analytical Astrodynamics	3
ASEN 5053	Rocket and Spacecraft Propulsion ¹	3
ASEN 5067	Microavionics & Introduction to PIC Microcontrollers for Aerospace Systems ³	3
ASEN 5090	Introduction to Global Navigation Satellite Systems ¹	3
ASEN 5335	Aerospace Environment ¹	3
ECEN 5134	Electromagnetic Radiation and Antennas ¹	3
ECEN 5264	Electromagnetic Absorption, Scattering, and Propagation ¹	3

ECEN 5517	Power Electronics and Photovoltaic Power Systems Laboratory	3
ECEN 5613	Embedded System Design	3
ECEN 5623	Real-Time Embedded Systems	3
ECEN 5634	Microwave and RF Laboratory	3
ECEN 5692	Principles of Digital Communication	3
ECEN 5797	Introduction to Power Electronics ¹	3
ECEN 5813	Principles of Embedded Software	3
EMEN 5010	Introduction to Engineering Management ¹	3
EMEN 5030	Fundamentals of Project Management ¹	3
EMEN 5031	Software Project Management ¹	3
EMEN 5405	Fundamentals of Systems Engineering ¹	3

¹ Courses available via distance.

² Core ASN certificate courses. Cannot be counted for both certificates.

³ Course enrollment limited to non-Electrical Engineering students.

Space Weather and Applications - Graduate Certificate

This certificate provides students with interdisciplinary skills in the field of space weather of both fundamental processes in science and practical applications to space-based and ground-based technology.

The program is open to new and current degree-seeking engineering students, math, and sciences students. This certificate is not available to non-matriculated students.

Additional certificate information can be found in the department's Space Weather and Applications (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/space-weather-and-applications/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Be a matriculated graduate student at CU Boulder in an engineering, math or science department.
- Submission of application form. Please visit the AES Certificates (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) webpage for more details.

Required Courses and Credits

Students must complete 12 hours of graduate-level coursework with grades of B or better in each course. Students are required to complete ASEN 5335 and three elective courses as specified in the list below. At least one course must be from outside the student's home department.

Students also pursuing other graduate certificates cannot use the same courses to count for both certificates.

Code	Title	Credit Hours
Required Course		
ASEN 5335	Aerospace Environment	3
Tier 1 Foundational Electives ^{1,2}		
Choose two:		6
ASEN 6050	Space Instrumentation

ASEN 5158	Space Habitat Design	
ASEN 5168	Remote Sensing Instrumentation Design	
ASEN 5440/ ASTR 5780	Mission Design and Development for Space Sciences	
<i>Radiative Processes & Atmosphere Coupling</i>		
ASTR 5120	Radiative and Dynamical Processes	
ASTR/ATOC/GEOL 5810	Planetary Atmospheres	
ATOC/ASTR 5560	Radiative Processes in Planetary Atmospheres	
<i>Electromagnetics & Plasma</i>		
ASTR/PHYS 7160	Intermediate Plasma Physics	
<i>Data Science</i>		
APPM 5580	Introduction to Statistical Learning	
ASEN 6050	Space Instrumentation	
STAT 5250	Data Assimilation in High Dimensional Dynamical Systems	
<i>Selected Topics ³</i>		
ASEN 5519/6519	Selected Topics	
ASTR/ATOC/GEOL 5830	Topics in Planetary Science	
ASTR 7500	Special Topics in Astrophysical and Planetary Sciences ²	
Total Credit Hours		12

¹ Students are required to meet each course's prerequisites, though exceptions can be made by course instructors.

² If cross-listed in the student's home department, a course cannot count as the outside course within the certificate.

³ For courses with rotating topics, a particular offering must be on a topic relevant to space weather in order to count for this certificate. These courses will need approval from the program director.

Water Engineering and Management - Graduate Certificate

The water engineering and management (WE&M) graduate certificate provides students with the tools they need to produce results and solve increasingly complex problems in the water profession. Young and mid-career professionals can build non-technical competencies with courses on leadership, management, communication, finance and governance. Courses are delivered on campus and live streamed/recorded options over the internet, allowing working professionals and distance students from around the world to earn a graduate certificate while continuing to put the learning into practice in their work.

Current students include young and mid-career professionals working for utilities, consulting firms, government and regulatory agencies, and degree-seeking graduate students at CU Boulder. With faculty of senior water professionals from across the country, including those from utilities, consulting firms and global professional organizations, students gain an opportunity to network and learn through real work case studies.

Upon completion of the three core courses and an additional elective, students are granted a certificate by the WE&M program, from the University of Colorado, Department of Civil Environmental and Architectural Engineering. The certificate courses count towards the Civil Engineering - Master of Science (MS) (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/civil-engineering-master-science-ms/>) degree or the Engineering Management - Master of Engineering (ME) (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-management/engineering-management-master-engineering-me/>) degree.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

The certificate consists of three required courses plus one elective course, for a total of 12 credit hours.

Code	Title	Credit Hours
Required Courses

Total Credit Hours	12

¹ CU Denver course.

Media, Communication & Information

The College of Media, Communication and Information (CMCI) prepares students for careers as engaged and effective citizens endowed with deep understanding of the historical and contemporary context of human communication and expression. Mindful of the active role communication plays in shaping human relationships, CMCI trains graduates to study and practice constructive interaction among people, communities, industries and publics. The college equips students with the skills needed to produce, gather, archive, curate, analyze and evaluate the flood of information, messages, images, sounds and ideas that populate our complex and rapidly evolving global media landscape.

To these ends, CMCI resourcefully combines disciplines newly extended and empowered by digital media and the social and cultural transformations those media engender. These include established scholarly, creative and professional fields such as media studies, communication, the history and interpretation of film and television, journalism, advertising and video production in its cinematic, documentary and broadcast forms. But the college also houses both the fast-growing field of information science—a discipline that, through inquiry and innovation, tackles the problems and opportunities facing an increasingly networked society—and the emergent disciplines of intermedia art, design, music, writing and performance.

In giving these activities a collaborative home, CMCI facilitates innovative interactions among them. Its academic structure accordingly stimulates cross-disciplinary cooperation at all levels of curriculum, research and creative work. Further, CMCI promotes the transformational exchanges it nurtures within its own walls for campus-wide benefit. Its organization thus fosters outreach to—and student and faculty participation from—other schools, colleges, centers and facilities throughout CU Boulder and the wider Colorado community.

CMCI's collaborative character is even more visible at the graduate level and in terms of its faculty's scholarly and creative work. Examples include the doctoral program in information science (p. 1558), the master's in interdisciplinary documentary media practices (p. 1551), the doctoral program in intermedia art, writing and performance (p. 1559) and the doctoral program in media research and practice (p. 1567), which offers three PhD tracks, each lodged in a different yet related department. CMCI's signature spirit of collaboration is further reflected in the various centers the college contains:

- the Center for Environmental Journalism (CEJ)
- the Center for Media, Religion and Culture (CMRC)
- the Center for the Study of Conflict, Collaboration and Creative Governance (3CG)

It is also reflected in the close relations the new college hopes to entertain with centers elsewhere on campus—for example, with the

Center for Humanities and the Arts (CHA); the B2 Center for Media, Arts and Performance (B2); and the Stan Brakhage Center.

Statement of Core Skills, Competencies and Scholarly and Creative Initiatives

Given its mission, CMCI attracts students, faculty and industry and creative professionals from across the closely related fields of media, communication and information. All of those either rostered in or affiliated with the new college accordingly share a set of skills, competencies and scholarly and creative interests that form a common core. This core is expressed at all levels of the college, from undergraduate curriculum and graduate training to the research and creative work of its faculty and both internal and external affiliates.

The Graduate Experience and Faculty Research and Creative Work

CMCI's collaborative character is even more visible at the graduate level and in terms of its faculty's scholarly and creative work. A prime example is the doctoral program in media research and practice (p. 1567), which combines the emphases of the participating departments—advertising, public relations and design, journalism and media studies—and encourages students to develop research agendas that bridge disciplines and cross between academic research and professional practice. In addition to creating efficiencies by combining resources, the program underscores the shared technical and intellectual as well as logistical needs of the units involved, turning streamlined administration into scholarly and creative synergy.

Journalists learn from information scholars about the nature and uses of big data while sharing with them their skills in narrative and communication. Members of the communication faculty deepen colleagues' insights into the underlying forms and principles of organizational, interpersonal and public conversation that structure the worlds in which advertising and strategic communication operate while gaining access from colleagues in these areas to problems and case studies they might have overlooked. Meanwhile, faculty in media studies benefit from direct exposure to the technologies and creative processes explored by media production faculty, offering in return a deeper historical, social and theoretical insight into the way media shape, even as they are shaped by, the wider society they serve.

Centers like CMRC, CEJ and 3CG already harness CU's exceptional multidisciplinary resources in everything from cultural studies to environmental science and from journalism to media design in focused collaborative initiatives of all sorts. By bringing practitioners in all of these areas together with artists and researchers in information science, media production and intermedia art, writing and performance, CMCI provides the environment for many more such common enterprises in the future.

Programs of Study

Advertising, Public Relations and Media Design

The Department of Advertising, Public Relations and Media Design (APRD) strives to produce leaders in the area of strategic communication who have mastered a design-thinking process grounded in analytical and creative thought. We believe in amplifying our students' curiosity,

increasing their tolerance for risk and encouraging them to look at life and a career with an entrepreneur's eye for opportunity. APRD is committed to providing students the necessary tools and techniques to think critically, adapt, create and above all lead in a rapidly changing media world.

Our goal is to help students acquire the kind of in-depth expertise in at least one area of strategic communication and design that will enable them to generate ideas and solve problems for a variety of organizations, including but not limited to ad agencies, PR firms, publishing and design firms, nonprofits, start-ups and personal ventures. We produce graduates who are forward-looking and have a deep interest in and knowledge of diverse cultures both within the United States and throughout the world.

The department actively encourages students to enroll in courses offered both within and outside CMCI. Similarly, many of our courses are open to students in other units on the grounds that the design-thinking process can be used to solve problems in a wide variety of disciplines.

Course code for this program is APRD.

Master's Degrees

- Corporate Communication - Master of Arts (MA) (p. 1540)
- Strategic Communication Design - Master of Arts (MA) (p. 1541)

Doctoral Degree

- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1567)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Arnett, Trina D. (https://experts.colorado.edu/display/fisid_158869/)
Instructor; BS, Massachusetts Institute of Technology

Cheval, Melinda Kiger (https://experts.colorado.edu/display/fisid_108537/)
Senior Instructor; BS, West Virginia University

Doty, Dawn (https://experts.colorado.edu/display/fisid_158312/)
Instructor; MA, Johns Hopkins University

Duncan, Thomas R.
Professor Emeritus

Fisher, Jolene (https://experts.colorado.edu/display/fisid_158335/)
Assistant Professor; PhD, University of Oregon

Gangadharbatla, Harsha (https://experts.colorado.edu/display/fisid_153279/)
Associate Professor; PhD, University of Texas at Austin

Griffin, Glenn (https://experts.colorado.edu/display/fisid_159490/)
Associate Professor; PhD, University of Texas at Austin

Hopp, Toby (https://experts.colorado.edu/display/fisid_157745/)
Assistant Professor; PhD, University of Oregon

Labrecque, Joseph (https://experts.colorado.edu/display/fisid_165806/)
Instructor; MA, University of Denver

Lee, Seow Ting (https://experts.colorado.edu/display/fisid_157994/)
Associate Professor; PhD, University of Missouri–Columbia

Ligon, Dan (https://experts.colorado.edu/display/fisid_158313/)
Instructor; MFA, Brown University

Logan, Keltie Irene (https://experts.colorado.edu/display/fisid_147340/)
Associate Professor; PhD, University of Texas at Austin

Moriarty, Sandra E.
Professor Emerita

Robbs, Brett
Professor Emeritus

Schauster, Erin E. (https://experts.colorado.edu/display/fisid_156310/)
Assistant Professor; PhD, University of Missouri–Columbia

Slayden, David Lee (https://experts.colorado.edu/display/fisid_113297/)
Associate Professor; PhD, Indiana University Bloomington

Sriramesh, Krishnamurthy (https://experts.colorado.edu/display/fisid_163947/)
Professor; PhD, University of Maryland College Park Campus

St. John, Burton (https://experts.colorado.edu/display/fisid_163948/#teaching)
Professor; PhD, Saint Louis University

Vargo, Christopher (https://experts.colorado.edu/display/fisid_158320/)
Assistant Professor; PhD, University of North Carolina

Willis, Erin (https://experts.colorado.edu/display/fisid_156068/)
Associate Professor; PhD, University of Missouri–Columbia

Courses

APRD 5001 (3) Foundations of Strategic Brand Design

Focuses on the challenges of designing brands targeted to customer needs and desires. The course is structured around the process of identifying brand opportunities, idea generation, design, testing and launch opportunities. Through a series of projects, students address aspects of practice and theory, from brand adaptation of cultural values to maintenance of brand integrity and global design strategies. Where applicable, case studies will supplement studio execution.

Grading Basis: Letter Grade

APRD 5002 (3) Experience Design Foundations

Provides a comprehensive understanding of design thinking and its processes to design innovative branded experiences and exchanges in a variety of strategic communication contexts. Students learn design methods applications that can be applied not only to experiential design, but to a problem where design thinking is meaningful to branded experiences. They learn standard and currently practiced design methods and, through repeated application, internalize them into a personal design aesthetic.

APRD 5003 (3) Toward a Unified Theory of Brand Equity

Builds on and extends concepts and executions covered in Foundations of Brand Design. While Foundations of Brand Design grounds the students in core branding concepts and applications, this course expands both executional skillsets and conceptual frameworks through the development of a unified theory of branding that transforms objects into meaning bearers. Through research, strategic definition, identity, expression, communications and behavior study, students will learn how to create opportunities for complex, meaning centered relationships between people and things.

APRD 5004 (3) UX and the Digital Delivery of Products and Services

Builds on and extends concepts and applications introduced in Experience Design Foundations with a concerted focus on prototyping quickly and often the best way to both communicate and improve one's design. Integrates prototyping activities, along with research and testing techniques, into every stage of the design process. Students will learn how to choose the appropriate method to suit different dimensions of a design problem at different stages in the process and the pitfalls of each approach.

APRD 5005 (3) Foundations of Critical Making

Introduces students to the communication design possibilities of critical making by exploring the conceptual process, research and key questions framed through an iterative approach to problem solving. The learning experience includes hands-on, embodied approaches to problems that generate innovative solutions by crossing the divide between thinking and making and between the screen and physical environments.

APRD 5006 (3) Introduction to Designing for Entrepreneurism

Brings students' attention to design as a form of social innovation and develops awareness of the social, political and economic contexts of design. They become literate in re the often implicit narratives embedded in design products and services, then use scenarios and storytelling to generate new strategies, build and test prototypes and write a case study detailing what was learned.

Grading Basis: Letter Grade

APRD 5007 (3) Immersive Media Design Through Critical Making

Turns from software to a focus on hardware and physical computing by literally and figuratively disassembling objects: using prototyping, reverse engineering, hardware hacking and circuit bending, design fiction and electronics fabrication (i.e., Arduino, raspberry pi and more). All of this takes place in a shared, open learning environment where students and faculty critically engage with a range of digital production tools and integrates them into ordinary life.

Grading Basis: Letter Grade

APRD 5008 (3) Access to Tools for Entrepreneurism by Design

Develops awareness of and access to necessary tools, smart objects for example, that can enable complex dynamics among people, objects and information via a combination of physical and digital design methods, all with an eye to design driven innovation for social change. This course shifts the usual strategic communication design point of view from the typical perspective of "trend noise" and market driven models to identifying actual problems and providing possible design solutions to those problems.

Grading Basis: Letter Grade

APRD 5010 (3) Design Sprint

Executes a five-day, immersive process for answering critical business questions through design, prototyping and testing ideas with sponsoring industry partners. The outcome is a fully functional prototype that is demoed and evaluated on the final day of the sprint. This project based studio is team taught and process based. The tangible outcomes from the project, along with documentation of the process, will go into the students' professional portfolios.

APRD 5011 (1-6) Book Lab

Dedicated to building out an industry ready professional portfolio, this immersive studio consists of four client facing project sponsored by and developed in collaboration with the program's industry partners. In a series of three-week intensives, students will work from design briefs to concept, design and solve a variety of design problems for real world clients. Ranging from finished supercomps to functional prototypes - physical, video, projections mapping, etc. - students to market portfolios will demonstrate their command of strategic communication design across a range of media platforms.

Repeatable: Repeatable for up to 9.00 total credit hours.

Grading Basis: Letter Grade

APRD 5012 (3) Entrepreneurship and Product Innovation by Design

Results in learning how to both think like an entrepreneur and develop innovative products and experiences competitive with the most successful startups in Boulder. Taught by successful entrepreneurs sharing valuable insight into the skills, mindset, and culture that results in the design of innovative products and experiences.

Grading Basis: Letter Grade

APRD 5013 (3) Designing for Branded Experiences

Explores both the theory and the practices of identity and branding through the creation of a series of projects related to the senses. Most of our visual world is made up of one or more identity components—from the basic form and structure of something to the specific experience which a brand provides.

Grading Basis: Letter Grade

APRD 5014 (3) Advanced Practices and Tools of Experience Design

Introduces students to advanced practices and tools of the experience design profession. Topics vary to reflect current and emerging trends in the profession, but the core focus of the course consists of three broad themes: information design principles, understanding and defining user behaviors, and designing for emerging cross-channel experiences.

Grading Basis: Letter Grade

APRD 5015 (3) Brand Design for Sustainable Futures

Takes an in-depth look into engagement with challenges of designing for sustainability. Moves beyond the cradle to grave approach to designing for cradle to cradle with immersion into design ethics and the power of visual communication. Students are taken beyond the project brief to investigate why a brand or service should exist and the consequences of its existence.

Grading Basis: Letter Grade

APRD 5016 (3) Experience Design and Narratives of Interaction

Organizes our annual inquiry and execution of a real-world project around an essential question in design, such as "Can design make us empathetic problem solvers?" Curated by our faculty and executed in collaboration with our industry partners, Experience Design and Narratives of Interaction pairs students with teams from design-driven companies to develop advanced projects over the course of a full semester.

Grading Basis: Letter Grade

APRD 5017 (3) Parametric Product Design Through Critical Making

Employs advanced hands-on hardware practice for reflection, analysis, and comprehension of the physicality of computation and communications infrastructures. Through deconstruction of objects students will learn to interpret and intervene through formalized practices and techniques in the material layer of digital technologies, including: the use of prototyping, hardware hacking and circuit bending, the use of design fictions, reverse engineering, and electronics fabrication.

Grading Basis: Letter Grade

APRD 5019 (3) Physical Computing and the Design of Sustainable Change

Functions as a studio intensive to enable designers to conceive of objects as "interventions" and how artifact design can mediate interactions—between multiple audiences—making interaction a primary influence and component of the design. Students design an intervention of a public space that is unequivocally physical or elaborate through technologies with a goal of encouraging interaction, socialization, and sustainable change.

Grading Basis: Letter Grade

APRD 5841 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APRD 5851 (1-6) Graduate Professional Project

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

APRD 5931 (1-3) Internship

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

APRD 6342 (3) Digital Advertising

Covers both traditional and emerging digital advertising methods, the popular platforms used to execute ads, and the leading analytic tools that can be used to assess advertising performance. Core advertising platforms covered include search, display, social media, native advertising, sponsored content and mobile. This class focuses on best practices and Key Performance Indicators that go with each advertising platform. Department consent required.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors or MKAG-CERG students only.

Grading Basis: Letter Grade

APRD 6343 (3) Applications of Advanced Statistical Techniques in Advertising

Building upon prior data acquisition and analysis coursework, students will effectively and flexibly generate advanced statistical models in a digital advertising-specific context. This course will focus on data originating from a variety of digital advertising sources. In addition to technical skill acquisition, students will learn how to interpret results and present them to clients and management. Department consent required.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

APRD 6871 (1-3) Special Topics

Graduate special topics. Topics vary by instructor and semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APRD 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

APRD 6951 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

APRD 7001 (3) ProSeminar in Mass Communication Theory I

Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7001

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7002 (3) Research Design

Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7002

Requisites: Requires prerequisite courses of APRD 7003 and MDRP 7051 and MDRP 7061 (all minimum grade C-). Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7003 (3) ProSeminar in Mass Communication Theory II

Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion. Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.

Equivalent - Duplicate Degree Credit Not Granted: JRNL7003

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7004 (1) Doctoral Professionalization Seminar

Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7004

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7011 (3) Seminar in Strategic Public Relations

Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7011

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7012 (3) Ethnography and Media

Provides a ¿how to¿ concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7013 (3) Mixed Research Methods in Mass Communication

Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7013

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7014 (3) Experimental Design in Mass Communication

Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7014

Requisites: Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.

APRD 7020 (3) Controls of Media and Information

Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7020

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7021 (3) Environmental Journalism and Science Communication

Focuses on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7021

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7030 (3) Media Sociology

Examines a range of theories for how media messages and media institutions turn out the way they do. `Media sociology; refers to theorizing about the media as the `dependent variable; even though many of the `independent variables; explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7030

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7031 (3) Moral Psychology and Media Ethics

Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7031

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7034 (3) Media and Health Communication

Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7034

Requisites: Restricted to doctoral students.

APRD 7051 (3) Qualitative Methods in Mass Communication

Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7051

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7061 (3) Quantitative Research Methods

Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students for dissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7061

Grading Basis: Letter Grade

APRD 7133 (3) Digital Games

Seminar that explores digital games, analog games, and play, and looks at the relatively new field of game studies; the field has moved toward issues of culture and social justice.

Requisites: Restricted to doctoral students.

APRD 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APRD 7880 (3) Persuasion Theory

This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7880

Requisites: Restricted to graduate students only.

MDRP 7871 (3) Special Topics

Special topics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Corporate Communication - Master of Arts (MA)

Organizations of all types (for-profit corporations, government agencies and not-for-profits) need to build and maintain symbiotic relationships with their key stakeholders (publics). These stakeholders are both internal to an organization (such as employees and suppliers) and external (such as the mass media, government regulators, consumers, citizens and activist groups). The Master of Arts in Corporate Communication (MACC) provides students with the knowledge and skills to use communication in order to build and maintaining relationships with these strategic stakeholders (publics). In addition, students will also learn to measure the quality of these relationships and its effect on the reputation of their organizations.

The MACC program is especially designed for:

- Early and mid-career practitioners of corporate communication with a desire to increase their knowledge potentially for career advancement.
- Mid-career professionals from allied disciplines such as journalism, advertising and marketing who might want to switch to corporate communication given the increased demand in this sector.

This program equips students with the conceptual knowledge and practical skills to be effective communicators whether they work for for-profit corporations, not-for-profit organizations including Inter-governmental organizations (IGOs), or governments and their agencies.

Key program highlights:

- Corporate communication is fundamentally a practice, but scholarship built over the past fifty years has demonstrated that in order to be effective, this practice needs to be based on sound strategic knowledge. This program emphasizes that efficacious corporate communication blends sound strategies with techniques.
- The program emphasizes the need for corporate communication to take place in a global environment because ethnocentricity in communication results in ineffectiveness in communication. Cultural sensitivity also induces graduates of the program to navigate the ethical challenges that arise in their life as communicators no matter where they practice—in Colorado, within the U.S. or internationally.
- Another area of ethnocentricity that is evident in the communication field is the over-emphasis on communication by for-profit corporations. This program seeks to orient students to the diversity in values, stakeholders and communication needs of the two other types of organizations—governments and non-profits (including IGOs).

- Practicing strategic corporate communication is not possible without basing such practice on empirical evidence—whether the evidence is culled through qualitative or quantitative methods. The MACC program seeks to train students on sound methodological principles thereby preparing them to be thoughtful communicators. Evidence also reveals that organizational leaders appreciate, and value, such communicators and so graduates are seen as adding value to organizational activities.

For more information, visit the Master of Arts in Corporate Communication website (<https://www.colorado.edu/cmci/aprd/macc/>).

Requirements

Admission Requirements

The evaluation of applications is based on a set of criteria that seek to value several key qualities in students, such as professional background and experience, academic record, professional achievements, and career goals (based on a statement of purpose). The evaluation will also be guided by standards set by the Graduate School. The desired qualifications of successful applicants include:

- A baccalaureate degree from a regionally accredited college or university, or its equivalent.
- Professional experience in corporate communication or an allied field such as journalism, advertising or communication.
- An aptitude for corporate communication and potential to pursue academic and research-based work in the field.
- An undergraduate GPA of at least 2.75.

To apply for admission, applicants should submit:

- All academic transcripts.
- A resume or Curriculum Vitae that establishes at least 3–5 years of relevant work experience.
- A statement of purpose describing their preparation for the proposed study as well as future career path relevant to the study.
- Three letters of recommendation, including at least one professional reference.
- Evidence of proficiency in English (international students only).
- Optional: GRE or GMAT scores (even if they are older than 5 years).

Program Requirements

The Master of Arts in Corporate Communication requires 30 credits of coursework. The program consists of accelerated courses, allowing students to take only one course at a time while still completing two courses during the span of a regular semester.

CU Boulder's Master of Arts in Corporate Communication curriculum was strategically crafted not only to be flexible and serve working professionals around the world, but also to provide the knowledge, skills, and tools needed to practice corporate communication in a globalizing environment. The program offers a focused 10-course, 30-credit curriculum consisting of: five core courses (3 credits each) and five elective courses (3 credits each).

The courses are designed to provide students with a blend of conceptual and practical knowledge and skills that can be immediately applied in your day-to-day work.

The five core courses are required of all students because they cover the conceptual foundations of sound corporate communication. These

courses orient students to theories and frameworks in public relations and corporate communication.

The electives are designed to expose students to the variety of work handled by corporate communication practitioners. Corporate communication is a diverse practice with many specialties often divided based on the stakeholders involved: employees (internal publics who are key to an organization's success), investors (that often invest in for-profit corporations or donors to not-for-profit organizations), media, etc. The electives included in the list below will be offered at the outset and others will be added in the future.

Code	Title	Credit Hours
Core Courses		
	Strategic Corporate Communication Management	3
	Corporate Communication and Ethics	3
	Strategic Global Corporate Communication	3
	Strategic Global Corporate Communication	3
	Measurement for Corporate Communication	3
Electives		
	Internal Communication	3
	Issues Management and Public Affairs	3
	Risk and Crisis Communication	3
	Corporate Communication and Digital and Social Media	3
	Corporate Communication Techniques and Media Relations	3
Total Credit Hours		30

Learning Outcomes

Some of the learning objectives of this program are:

- To help increase students' ability to draw abstractions of reality and assess their professional activities with critical thinking.
- To use conceptual and critical skills to develop effective oral and written communication skills.
- To negotiate cultural diversity and operate effectively in a globalized environment.
- To base one's global communication practice on sound ethical principles and analysis thereby working for social good.
- To appreciate that effective communication is based on formative research, sound program planning, effective implementation of planned program, and sound program evaluation.
- To integrate multiple media for communication, including digital and social media.
- To develop collaboration skills and ability to work in groups.

Strategic Communication Design - Master of Arts (MA)

The master's program in strategic communication design (STCM) crosses traditional divides and champions the global value of innovation by design, pointing to a new way of working, seeing, making and thinking in the 21st century creative economy. It's not only that the boundaries between design disciplines are blurring. So are the boundaries between design and everyday life—between work, play, social innovation, leadership and management, along with an increasing awareness, evolution and dedication to value-driven efforts through and by design.

Students work in an open studio environment in transdisciplinary teams, consider issues from multiple perspectives, learn from community and industry leaders, and emerge with a portfolio of work that showcases design as a process for transforming social relations and contemporary life through the design of innovative products and experiences.

The paths that students travel from start to finish of the STCM can vary, depending on individual interests and goals. We have a required core curriculum that all students in STCM take. The core design curriculum functions as a through line, providing a common foundation for all students in the program. This common core curriculum is complemented by a variety of electives developed within our individual studios—experience design, brand design, design leadership, and critical making. Students can choose from a diverse range of elective courses that address their specific individual interests. The outcome? Our individual electives are designed to extend and build on the core curriculum; this arrangement allows students to design an individual degree path buttressed by a foundational core.

Requirements

Application Requirements

Applications are reviewed on a rolling admissions basis for the STCM master's. We evaluate applications as they are completed, and acceptances are meted out on a first-come, first-served basis for each prospective qualified student. We accept 18–24 students maximum for the program each year.

Once all materials and documents are submitted and an application is complete, we review it through the online portal and get back to the student within three weeks from the completion of their application.

The application deadline is April 15, 2020.

Applicants are expected to hold a baccalaureate (bachelor's) degree from an accredited college or university, and to have a minimum undergraduate grade point average of no less than 2.75.

How to Apply

The application is listed under Strategic Communication Design on the Graduate School (<https://grad.apply.colorado.edu/apply/>) website.

Required materials, a list of which can also be found in the application, are as follows:

- *Personal statement:* A single common thread connects all of our students. They are inspired by the transformational potential of design to effect change in the world and within their individual lives. They have a desire to become design-based leaders, thinkers, and doers. The personal statement is an essential part of the student's application. In a maximum of 1500 words, and should supply long-form answers to the following questions:
 - What attracts you to the program at this time? What do you envision as the most compelling opportunities for you as a designer and also a future leader?
 - What particular experiences—personal or professional—have prepared you for work in design?
 - Why is design important to you and how would you use it to change the world?
- *Three letters of recommendation:* These should come from professionals and/or professors. No personal recommendations please.

- *Unofficial transcripts.*
- *Writing sample:* A sample of the student's writing that they feel is exemplary and representative of their writing abilities.
- *Portfolio:* We will be happy to view a portfolio if provided, but submission of a portfolio is optional.
- *TOEFL score report:* International applicants must have a TOEFL score of at least 600 (IBT 100).
- *Application fee:* A nonrefundable application fee of \$60 is also required (\$80 for international).
- We do *not* require STCM applicants to take the GRE.

Contact

For questions regarding the application, please contact David Slayden (<http://www.colorado.edu/cmci/people/advertising-pr-and-media-design/david-slayden/>), executive director (slayden@colorado.edu).

Program Requirements

The STCM is a 39-hour professional masters degree program to be completed within a single calendar year—from August to August—over four semesters: Fall, Spring, Maymester and Summer Session D. We follow the CU Boulder calendar (<https://www.colorado.edu/academics/academic-calendar/>) and, in doing so, are guided by a year-long arc from **Foundations** (fall semester) to **Variations and Explorations** (spring semester), to **Solutions** (Maymester and Summer Session D).

The master's degree is awarded for successful completion of 39 credits over four contiguous semesters. Students must maintain a 3.0 cumulative grade point average and fulfill all requirements in a timely manner.

Plan of Study

Course	Title	Credit Hours
Year One		
Fall Semester		
Foundations		
CORE (required)		
APRD 5005	Foundations of Critical Making	3
APRD 5006	Introduction to Designing for Entrepreneurism	3
APRD 6871	Special Topics	3
ELECTIVES (required)		
APRD 5002	Experience Design Foundations	3
Credit Hours		12
Spring Semester		
Variations and Explorations		
CORE (required)		
APRD 5007	Immersive Media Design Through Critical Making	3
APRD 5008	Access to Tools for Entrepreneurism by Design	3
APRD 5017	Parametric Product Design Through Critical Making	3
APRD 6871	Special Topics	3
ELECTIVES		3
APRD 5001	Foundations of Strategic Brand Design	
APRD 5003	Toward a Unified Theory of Brand Equity	

APRD 5004	UX and the Digital Delivery of Products and Services	
APRD 5014	Advanced Practices and Tools of Experience Design	
Credit Hours		15
Summer		
Solutions		
CORE (required)		
APRD 5010	Design Sprint (Maymester)	3
APRD 6871	Special Topics	3
ELECTIVES		6
APRD 5013	Designing for Branded Experiences	
APRD 5015	Brand Design for Sustainable Futures	
APRD 5016	Experience Design and Narratives of Interaction	
APRD 5019	Physical Computing and the Design of Sustainable Change	
APRD 6871	Special Topics	
Credit Hours		12
Total Credit Hours		39

Ackerman, John Martin (https://experts.colorado.edu/display/fisid_144951/)

Associate Professor; PhD, Carnegie Mellon University

Ashcraft, Karen Lee (https://experts.colorado.edu/display/fisid_147453/)
Professor; PhD, University of Colorado Boulder

Boromisza-Habashi, David (https://experts.colorado.edu/display/fisid_145833/)

Associate Professor; PhD, University of Massachusetts at Amherst

Bowers, John Waite
Professor Emeritus

Campbell, Kathleen G.
Professor Emerita

Craig, Robert T.
Professor Emeritus; PhD, Michigan State University

Cruz, Joelle (https://experts.colorado.edu/display/fisid_157594/)
Assistant Professor; PhD, Texas A&M University

Darnell, Donald K.
Professor Emeritus

Deetz, Stanley A.
Professor Emeritus; PhD, Ohio University

Flores, Lisa A. (https://experts.colorado.edu/display/fisid_145474/)
Associate Professor; PhD, University of Georgia

Frey, Lawrence R. (https://experts.colorado.edu/display/fisid_125937/)
Professor; PhD, University of Kansas

Gries, Laurie Ellen (https://experts.colorado.edu/display/fisid_155951/)
Assistant Professor; PhD, Syracuse University

Hauser, Gerard A.
Professor Emeritus

Hickerson, Ruth Lynne (https://experts.colorado.edu/display/fisid_151159/)
Senior Instructor; PhD, University of Denver

Jahn, Jody L. (https://experts.colorado.edu/display/fisid_153426/)
Assistant Professor; PhD, University of California, Santa Barbara

Koschmann, Matthew A. (https://experts.colorado.edu/display/fisid_145807/)
Associate Professor; PhD, University of Texas at Austin

Kuhn, Tim (https://experts.colorado.edu/display/fisid_118144/)
Chair, Professor; PhD, Arizona State University

Motter, Jeffrey Brian (https://experts.colorado.edu/display/fisid_156154/)
Senior Instructor; PhD, Indiana University Bloomington

Na'puti, Tiara R. (https://experts.colorado.edu/display/fisid_157685/)
Assistant Professor; PhD, University of Texas at Austin

Pezzullo, Phaedra Carmen (https://experts.colorado.edu/display/fisid_156204/)
Associate Professor; PhD, University of North Carolina Chapel Hill

Communication

Graduate study in communication foregrounds the symbolic and material dimensions of social life, with special attention to the role communication plays in both transmitting messages and constituting relationships. Contexts of study include interpersonal interaction, workplaces and institutions, communities and public/civic life.

Graduate students pursue research within three main areas—community & social interaction, organizational communication, and rhetoric & culture—crafting unique programs of study to meet individual needs.

The master's program provides students with knowledge of key bodies of communication scholarship and develops their skills in analyzing complex communication situations. The program prepares graduates for positions in businesses, nonprofit institutions and community groups, in addition to doctoral study in communication.

The doctoral program provides students with opportunities to conduct theoretically grounded and methodologically rigorous research on pressing communication issues, while also traversing traditional academic boundaries. The program prepares graduates primarily for faculty positions at leading universities, although some graduates pursue positions in business, the nonprofit sector, social services or government.

Course code for this program is COMM.

Master's Degree

- Communication - Master of Arts (MA) (p. 1546)

Doctoral Degree

- Communication - Doctor of Philosophy (PhD) (p. 1548)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Shrikant, Natasha (https://experts.colorado.edu/display/fisid_157954/)
Assistant Professor; PhD, University of Massachusetts at Amherst

Simonson, Peter D. (https://experts.colorado.edu/display/fisid_143251/)
Professor; PhD, University of Iowa

Sims, Christy (https://experts.colorado.edu/display/fisid_148831/)
Director, Instructor; PhD, University of Colorado Boulder

Skerski, Jamie L. (https://experts.colorado.edu/display/fisid_149871/)
Senior Instructor; PhD, Indiana University Bloomington

Sprain, Leah M.H. (https://experts.colorado.edu/display/fisid_151292/)
Assistant Professor; PhD, University of Washington

Striphas, Theodore G. (https://experts.colorado.edu/display/fisid_156205/)
Associate Professor; PhD, University of North Carolina Chapel Hill

Taylor, Bryan Copeland (https://experts.colorado.edu/display/fisid_107421/)
Professor; PhD, University of Utah

Professor Emeritus; PhD, University of Wisconsin–Madison

White, Cindy Hagemeyer (https://experts.colorado.edu/display/fisid_107461/)
Associate Professor; PhD, University of Arizona

Courses

COMM 5000 (3) Organizational Culture

Focuses on theory and practice associated with the successful development of organizational culture. Topics covered include symbolic artifacts, beliefs, and assumptions that distinguish organizational, corporate, and occupational/professional identities. Related coverage of the communication practices (e.g., performance, ritual, etc.) through which the cultural elements of organizing are created, maintained and transformed. Special emphasis placed on issues of cultural leadership, cultural control, and cultural change in the contexts of contemporary globalization and technological innovation.

Requisites: Restricted to Organizational Leadership (ORGL-MS) students only.

Grading Basis: Letter Grade

COMM 5210 (3) Readings in Communication Theory

Provides a critical overview of influential theoretical traditions in communication studies. Emphasizes the discipline's social scientific and humanistic heritage, while also considering emerging trends. Introduces standards for evaluating and critiquing communication theories.

Requisites: Restricted to graduate students only.

COMM 5220 (3) Seminar: Functions of Communication

Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.

Equivalent - Duplicate Degree Credit Not Granted: COMM 4220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 5225 (3) Environmental Communication

Investigates key concepts in environmental communication and considers which theoretical frameworks and practical actions can inform the effects of various constituents to address environmental issues.

Requisites: Restricted to graduate students only.

COMM 5230 (3) Applied Communication

Examines the study of applications of communication concepts, theories, methods, interventions, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research.

Requisites: Restricted to graduate students only.

COMM 5300 (3) Seminar: Rhetoric

Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

COMM 5310 (3) Contemporary Rhetorical Criticism

Advanced critical analysis of rhetorical texts in terms of how they shape issues and appeals for judgment, create identities for speakers and their audiences, and construct perceptions of time, space, and the human condition.

Requisites: Restricted to graduate students only.

COMM 5320 (3) Readings in Rhetoric

Survey of classical and contemporary readings in rhetoric. Required for doctoral students in communication; optional for master's students.

Requisites: Restricted to graduate students only.

COMM 5425 (3) Readings in Discourse and Social Practices

Examines the way communicators' discourse expressions (language, talk, interactional devices, semiotic practices, written texts) reflect and construct interpersonal exchanges, societal activities, and institutional scenes, as well as how discourse expression varies across different speech communities.

Requisites: Restricted to graduate students only.

COMM 5435 (3) Readings in Community and Social Interaction

Focuses on how everyday communication practices shape and are shaped by community contexts. Contains theoretical and empirical readings that illustrate how interactions among group members negotiate and maintain distinct communities and how group communication practices reflect shared norms among community members. Also reviews methods to study everyday interactions among community members (e.g., discourse analysis, qualitative coding, surveys and applied approaches/methods).

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

COMM 5600 (3) Seminar: Organizational Communication

Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.

Equivalent - Duplicate Degree Credit Not Granted: COMM 4600

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 5610 (3) Organizational Ethnography

Focuses on the historical influence of the ethnographic tradition in organizational communication studies. Reviews landmark studies of organizational culture and power/control, emphasizing issues of ethics and politics associated with the writing and reading of organizational ethnography. Reviews trends in contemporary organizing such as neoliberal globalization and the adoption of artificial intelligence, and their implications for the future of ethnography.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

COMM 5620 (3) Readings in Organizational Communication

Survey of historical and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives.

Requisites: Restricted to graduate students only.

COMM 5720 (3) Readings in Communication and Technology

Survey of multidisciplinary research that examines various relationships between communication and technology. Students are encouraged to develop critical skills in perceiving assumptions and perspectives that motivate major theories in this area, and to examine how these phenomena have changed over time.

Requisites: Restricted to graduate students only.

COMM 5930 (1-6) Graduate Internship

Offers opportunities for graduate-level communication related work projects. Limited to 3 hours in spring and fall semesters, 6 hours in summer. The 6-hour limit at MA level and 9-hour limit at PhD level applies to any combination of independent study and internship credit.

Repeatable: Repeatable for up to 9.00 total credit hours.

COMM 6010 (3) Communication Research and Theory

Provides an introduction to graduate study of communication, offering an overview of the discipline and its scholarship. Required for MA and Ph.D. communication students.

Requisites: Restricted to Communication (COMM or COMN) graduate students only.

COMM 6020 (3) Quantitative Research Methods

Introduces students to the practice of quantitative research in communication: conceptualization and critique of research projects, measurements, methods (e.g., experimental and survey), statistical data analysis, and written reports.

Requisites: Restricted to graduate students only.

COMM 6030 (3) Qualitative Research Methods

Introduction to the epistemology, methodology, and representational practices associated with qualitative communication research. Fieldwork methods emphasized include participant observation, interviewing, and document/artifact analysis.

Requisites: Restricted to graduate students only.

COMM 6200 (3) Seminar: Selected Topics

Facilitates understanding of current and past theory and research on a selected topic in communication and the ability to develop new theory and research on that topic.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 6310 (3) Advanced Rhetorical Criticism

Reviews current critical methods and issues related to rhetorical criticism and rhetorical field methods.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites COMM 5310 and COMM 5320.

COMM 6320 (3) Rhetorical Theory

Reviews current theory and research on topics such as contemporary rhetorical theory, rhetoric and public life, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6330 (3) Rhetoric of Inquiry

Surveys foundational texts and contemporary research in the rhetoric of inquiry. Focuses on the role of persuasion in the production of knowledge. Critical analysis of major theoretical and methodological traditions and topics, with an emphasis on social dimensions of inquiry.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6340 (3) Rhetoric and Civic Community

Considers performances of public life as rhetorical inducements of civitas. Topics include negotiation of self-regulation among interdependent partners, rhetorical exclusions and/or counterpublics, and dialectical tensions of public/private as these contribute to and have civic consequences for publicness, community, and social will.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6350 (3) Seminar in Argumentation

Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6360 (3) Social and Cultural Theory

Traces select traditions in social and/or cultural theory, emphasizing how those traditions affect and are affected by the field of rhetoric studies. Examines the origins and resolutions of major debates in social and/or cultural theory from a rhetorical perspective.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5320.

COMM 6410 (3) Discourse Analysis

Acquaints students with the main types of discourse analysis: conversation analysis, critical discourse analysis, and rhetorically informed discourse approaches. Teaches how to conduct discourse analysis, including transcribing, selecting excerpts, documenting inferences, and linking findings to scholarly controversies.

Requisites: Restricted to graduate students only.

COMM 6420 (3) Interaction Analysis

Educates students in one of a selected set of methodological specializations used in the study of human interaction.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

COMM 6440 (3) Grounded Practical Theory

Examines theory, method, and application of grounded practical theory, an approach to building normative theory through description, critique, and theoretical reconstruction of situated communicative practices. Semester project involves analysis of a sample of discourse from a public or field observation setting.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5210.

COMM 6445 (3) Intercultural Communication

Focuses on cultural foundations of social interaction, with a special emphasis on ideology (including potentially contested cultural norms, values and premises) as a basic condition of meaningful interaction. Identities are discussed as culturally variable, historically embedded interactional accomplishments, constructed from communicative resources such as language and other types of signs, that serve the purpose of participation in communal life.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

COMM 6455 (3) Community-based Research Methods

Facilitates and supports graduate student-led community-based research. Working from multiple CBR traditions, students develop a thoughtful rationale for conducting CBR and practice a repertoire of CBR methods (e.g., group decision-making, managing ethical dilemmas, collaborative data collection and analysis, and communicating findings).

Grading Basis: Letter Grade

COMM 6460 (3) Ethnography of Communication

Introduces graduate students to the theory, methodology, and practice of the ethnography of communication. Students read existing literature in the tradition, and design and implement a field-based project that centers on culturally patterned forms and styles of communicative conduct. Prior graduate-level coursework in basic qualitative research methods is required.

Grading Basis: Letter Grade

COMM 6470 (3) Public Deliberation and Dialogue

Explores the theory, research and practices of deliberative democracy and dialogue. Considers "ideal" communicative conduct and common interactional troubles, cross-cultural differences and routine communication practices.

Requisites: Restricted to graduate students only.

COMM 6730 (3) Constitutive Approaches to Organizational Communication

Explores theory and research that explain how organizing processes are constituted through communication. Course themes might include collaboration, authority, identity, knowledge, risk/resilience, or socio-material arrangements.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites COMM 5620 and COMM 6010.

COMM 6740 (3) Theory and Philosophy of Organizing and Organizations

Reviews theory and philosophy of organizations and organizing where communication processes are seen as constitutive. Focuses on discursive and material practices in the formation and change of organizational structure, culture, and operation.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5620.

COMM 6750 (3) Critical-Cultural Approaches to Organizational Communication

Addresses critical and cultural approaches to communicating and organizing. Topics include relations of culture, power, resistance, identity, and difference as theorized in and around organizational life. Major theoretical works on these topics are highlighted throughout, although specific themes may vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite COMM 5620.

Grading Basis: Letter Grade

COMM 6780 (3) Roles, Relationships, and Identities in Interaction

Examines how social roles influence communicative practices, the development of relationships, and the impact of relationships on identity. Considers these processes in contexts, such as personal relationships and institutional settings. Topic varies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

COMM 6840 (1-3) Master's Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

COMM 6910 (1) Communication Research and Theory Practicum

Focuses primarily on the professionalization of graduate students new to CU's Department of Communication. Introduces them to the department, university, and discipline; develops practical skills related to professionalization (e.g., submitting to conferences, publishing research, and mentoring students); and considers the politics of professionalization. Runs concurrently with COMM 6010, "Communication Research and Theory."

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

COMM 6940 (1) Master's Candidate for Degree

Repeatable: Repeatable for up to 3.00 total credit hours.

Grading Basis: Pass/Fail

COMM 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

COMM 8840 (1-6) Doctoral Independent Study

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

COMM 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Communication - Master of Arts (MA)

The master's degree provides students with knowledge of communication scholarship and develops their ability to analyze complex

communication situations. The program is intended to serve two main groups of students: those planning to pursue the PhD degree and those seeking employment in businesses, nonprofit institutions and community groups.

MA students typically pursue studies in one or more of the department's three main areas:

- Community & social interaction
- Organizational communication
- Rhetoric & culture

Students may choose a thesis or comprehensive examination option.

Requirements

Students wishing to pursue graduate work toward this degree should carefully read the Graduate School requirements, review the coursework offered in this catalog, and attend to the detailed degree requirements on the department website.

Application Guidelines

Visit the department's Admissions (<http://www.colorado.edu/communication/graduate-degrees/admissions/>) webpage for details.

Course Requirements

To complete the MA, students are required to take COMM 6010, at least one methods course and at least two readings courses (see tables below).

For both the thesis option and the comprehensive examination option, coursework may include a maximum of 6 hours of independent study and/or internship combined. A maximum of 9 hours may be transferred from graduate work completed in/at other programs and/or institutions (including other CU campuses, such as CU Denver). A maximum of 9 credit hours of courses may be taken outside the department. Transfer and outside department courses combined may not exceed 12 credit hours. Courses in which a grade of C- or below is received are not counted toward the master's degree.

Degree Plans

Plan I: Thesis Option

Students pursuing the thesis option are required to complete a minimum of 30 graduate credit hours, including 24 credit hours of graduate-level coursework (at the 5000 level or higher) and 6 thesis hours (including oral defense of the thesis; additional thesis hours cannot be taken).

Code	Title	Credit Hours
Required Courses		
COMM 6010	Communication Research and Theory	3
COMM 6950	Master's Thesis	6
Electives		
At least one methods course:		3
COMM 6020	Quantitative Research Methods	
COMM 6030	Qualitative Research Methods	
COMM 6310	Advanced Rhetorical Criticism	
At least two readings courses:		6
COMM 5210	Readings in Communication Theory	
COMM 5320	Readings in Rhetoric	

COMM 5425	Readings in Discourse and Social Practices	
COMM 5435	Readings in Community and Social Interaction	
COMM 5620	Readings in Organizational Communication	
COMM 5720	Readings in Communication and Technology	
Four additional graduate-level courses		12
Total Credit Hours		30

Students choosing the thesis option should select a permanent graduate faculty advisor prior to completing 12 credit hours. In consultation with their advisor, students should select two additional committee members and, by the beginning of the second year (assuming a course load of 9 hours per semester), complete the MA Program of Study Form and a written thesis proposal (with the thesis designed such that it can be completed during student's final planned semester in residence).

After the committee has read the thesis, a final oral defense is conducted in conformity with the graduate school's rules. Students must have an affirmative vote from the majority of committee members to pass the thesis. Students who fail the thesis defense may attempt it once more after a period of time that is determined by the committee. Students who fail the second defense are dismissed from the master's program. The final submitted thesis must comply with the CU Boulder Graduate School rules regarding the formatting of theses and dissertations.

Plan II: Comprehensive Examination Option

Students pursuing the coursework with comprehensive examination option are required to complete a minimum of 30 graduate credit hours (at the 5000 level or higher), a written comprehensive examination and an oral defense of that written comprehensive examination.

Code	Title	Credit Hours
Required Course		
COMM 6010	Communication Research and Theory	3
Electives		
At least one methods course:		3
COMM 6020	Quantitative Research Methods	
COMM 6030	Qualitative Research Methods	
COMM 6310	Advanced Rhetorical Criticism	
At least two readings courses:		6
COMM 5210	Readings in Communication Theory	
COMM 5320	Readings in Rhetoric	
COMM 5425	Readings in Discourse and Social Practices	
COMM 5435	Readings in Community and Social Interaction	
COMM 5620	Readings in Organizational Communication	
COMM 5720	Readings in Communication and Technology	
Six additional graduate-level courses		18
Total Credit Hours		30

Master's students choosing the comprehensive examination option should select a permanent graduate faculty advisor prior to completing

12 credit hours. The associate chair of graduate studies automatically serves as a committee member. Students, in consultation with their advisor, select a third committee member.

By the beginning of the second year of graduate work (assuming a course load of 9 hours per semester), students should complete the MA Program of Study Form.

The comprehensive examination includes two standardized questions created by the associate chair of graduate studies that are completed by all master's students taking the examination at the same time that semester. One is about communication theory (90 minutes), and the other is about research methods (90 minutes). A third question, created by the student's advisor, is unique to the student's area of expertise (2 hours).

A one-hour oral defense must be held within two weeks of completing the written comprehensive examination. Students must have an affirmative vote from the majority of committee members to pass the comprehensive examination.

Should the majority of committee members judge the written and/or oral performance unsatisfactory, students may be required to retake relevant portions of the examination (with a maximum of one opportunity to retake the examination). Prior to retaking the comprehensive examination, students may be required to complete additional coursework and/or research projects. Retaking the comprehensive examination must include another oral defense. Students who retake the comprehensive examination but do not complete it in a satisfactory manner are dismissed from the master's program.

Communication - Doctor of Philosophy (PhD)

The PhD in communication typically serves students interested in pursuing academic careers. Students are admitted to the PhD program after having completed an MA degree or equivalent.

PhD students generally specialize in one or more of the department's three main areas:

- community & social interaction
- organizational communication
- rhetoric & culture

Depending on the extent of the student's prior academic work in communication and their rate of progress, the degree can be achieved in three to four years. PhD students are expected to complete all degree requirements within six years from the semester in which they begin coursework in the doctoral program.

Requirements Application Guidelines

For application guidelines, visit the department's Admissions (<http://www.colorado.edu/communication/graduate-degrees/admissions/>) webpage.

General Requirements

All PhD students are required to take COMM 6910 and two of three methods courses (COMM 5310, COMM 6020 and COMM 6030). PhD students entering without a background in communication must also take COMM 6010.

Beyond those specific requirements, PhD students develop expertise in four areas: broad-based background in communication, advanced expertise in a primary area of specialization, expertise in a secondary area of specialization and advanced expertise in a primary methodology.

Students' individual coursework requirements must be specified in a PhD plan of study document that is approved by their advisor and committee. A minimum of 54 graduate credit hours of coursework is required, plus 30 hours of dissertation credit, for a minimum total of 84 credit hours. At least 30 graduate credit hours of coursework must be in communication courses.

PhD students may transfer in a maximum of 12 credits from prior graduate coursework. Any graduate courses completed at CU Boulder (including courses completed for the master's in communication) can be applied to the PhD program if they are included in the student's approved PhD plan of study. Students may take a maximum of nine independent study and/or internship credit hours combined.

Students wishing to pursue graduate work toward this degree should carefully read the Graduate School requirements, review the coursework offered in this catalog and attend to the detailed degree requirements on the department website (<http://www.colorado.edu/communication/graduate-degrees/phd-communication/>).

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
<i>Research and Theory</i>		1-3
COMM 6010	Communication Research and Theory (required for students without a background in Communication)	
COMM 6910	Communication Research and Theory Practicum (required for students with a background in Communication)	
<i>Methods</i>		
Choose at least two:		6
COMM 5320	Readings in Rhetoric	
COMM 6020	Quantitative Research Methods	
COMM 6030	Qualitative Research Methods	
Primary Area of Specialization		
This requirement is satisfied by taking courses, seminars and/or independent studies (including those outside the department) in the primary specialty declared in the student's approved PhD plan of study.		
Secondary Area of Specialization		
This requirement is satisfied by taking courses, seminars and/or independent studies (including those outside the department) in the student's approved PhD plan of study.		
Primary Methodology		6
This requirement is satisfied by taking methodology courses in communication and/or cognate disciplines; methodological expertise also can be developed through independent studies and participation in research projects.		

Critical Media Practices

Critical media practices (CMDP) addresses the changing landscape of electronic media making by developing both analytical and production

skills across a wide range of platforms, practices and technologies while simultaneously placing them within the broader perspective of culture and history. The department explores cross-platform media production, computational media and creative ethnography, as well as other time-based media arts practices such as locative media and performance art. Our convergent approach to media spans a variety of media tools including digital photography, audio/video editing and single camera video production, open source programming and digital single lens reflex cameras, as well as emergent tools under development. With an emphasis on the interaction between critical theory and media production practices, students are encouraged to not only thoughtfully engage with the diversity of media cultures but to also become active entrepreneurial media producers, directors, writers, editors and scholars at the forefront of emerging cultural industries. CMDP prepares students to make productive use of the tools to engage creatively with the future trajectories of media, wherever they may lead.

CMDP students will be exposed to a variety of approaches concerning the study of media, information and communication through core CMCI classes. The undergraduate program is designed to provide basic hands-on grounding in production theory, aesthetics, techniques and approaches emphasizing innovative approaches to media making. As such, the department provides a rich and varied resource for cross-pollination and collaboration. At the graduate level, the program features a terminal MFA. The department also supports a practice-based PhD in emergent technologies and art practices. This innovative merger of theory and praxis, spanning undergraduate through graduate education, places CU on the cutting edge of institutions exploring innovative models for educating twenty-first-century students as well as publishing and disseminating scholarship.

Course code for this program is CMDP.

Master's Degree

- Interdisciplinary Documentary Media Practices - Master of Fine Arts (MFA) (p. 1551)

Doctoral Degree

- Emergent Technologies and Media Art Practices - Doctor of Philosophy (PhD) (p. 1551)

Certificate

- Emergent Technologies and Media Art Practices - Graduate Certificate (p. 1552)
- Interdisciplinary Documentary Media Practices - Graduate Certificate (p. 1553)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Auguiste, Reece Luke (https://experts.colorado.edu/display/fisid_149596/)

Associate Professor; PhD, University of Nottingham (England)

Biggs, Betsey (https://experts.colorado.edu/display/fisid_158344/)
Assistant Professor; PhD, Princeton University

Boord, Daniel Olin

Professor Emeritus; MFA, University of California, San Diego

Clark, Patrick Ryan (https://experts.colorado.edu/display/fisid_156499/)
Instructor; MFA, San Diego State University

Coombs Esmail, Eric (https://experts.colorado.edu/display/fisid_158305/)
Instructor; MFA, State University of New York at Buffalo

Espelie, Erin Marie (https://experts.colorado.edu/display/fisid_148671/)
Assistant Professor; MFA, Duke University

Hammons, Christian Stanford (https://experts.colorado.edu/display/fisid_152915/)
Instructor; PhD, University of Southern California

Knight, Tara (https://experts.colorado.edu/display/fisid_158318/)
Associate Professor; MFA, University of California, San Diego

Rueb, Teri Susan (https://experts.colorado.edu/display/fisid_163944/)
Professor; PhD, Harvard University

Young, Andrew P. (https://experts.colorado.edu/display/fisid_153434/)
Instructor; PhD, University of California, Los Angeles

Courses

CMDP 5100 (3) Research and Methodologies Seminar

Explores documentary media preproduction tactics and strategies, including basic research approaches, planning, pre-visualization, stylistic approaches, scheduling, working with archive and documentary materials, and documentary ethics.

Requisites: Restricted to graduate students only.

CMDP 5370 (3) Choreography, Cinematograph: Writing in Motion

Examine media and moving image aesthetics, tactic and strategies by creating work involving movement and expanded notions of choreography. Within this course students compose images and sounds, structuring them temporally as they explore narrative and non-narrative forms.

Requisites: Restricted to graduate students only.

CMDP 5450 (3) Contemporary Documentary Media

Explores cross platform documentary media practices and contemporary debates in documentary through a study of documentary history, genre, ethics and changing forms. It develops skills in critically analyzing documentary media.

Requisites: Restricted to graduate students only.

CMDP 5500 (3) Documentary Production Workshops

Workshopping and developing technical skills in documentary media production.

Requisites: Restricted to graduate students only.

CMDP 5600 (3) Documentary Lab Seminar

Explores and workshops documentary media projects and ideas from a variety of disciplines. A team-taught course, with affiliated faculty working in design groups within the documentary lab in one or more areas, such as Art and Art History, Anthropology or Geography. A total of 12 hours is required for IDMP MFA candidates.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

CMDP 5650 (3) Documentary Field Work

Explores distinctive and varied approaches to documentary field work and the uses of media for creative ethnography and other nonfiction practices. A team-taught course, with affiliated faculty from one or more areas such as Art and Art History, Anthropology and Geography.

Requisites: Requires a prerequisite course of CMDP 5100 (minimum grade C-). Restricted to graduate students only.

CMDP 5900 (3) Documentary Production Topics

Incorporates reflective study and practice in a course that consists of rotating topics in contemporary documentary practices, such as media essays, observation and participation, personal histories and voices, emergent technologies and documentary media, and interpretive ethnography.

Repeatable: Repeatable for up to 12.00 total credit hours.

CMDP 5910 (3) Individual Project Study

Requires students to conduct self-directed research and production in a seminar setting. Topics relate to individual projects

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CMDP 6500 (5) Producing Practicum

Explores advanced producing principles through the preproduction of the MFA thesis project, including the development of a professional project proposal.

Requisites: Requires a prerequisite course of CMDP 5650 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 6600 (5) Documentary MFA Thesis Seminar I

Explores production of MFA thesis product. Focus is on production strategies, ethical challenges and other practical production issues.

Requisites: Requires a prerequisite course of CMDP 6500 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 6650 (5) Documentary MFA Thesis Seminar II

Explores editing and post-production of the MFA thesis project. Emphasizes aesthetic choices (structure, narration and music), distribution, contracts and audience.

Requisites: Requires a prerequisite course of CMDP 6600 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 6841 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CMDP 6871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMDP 7100 (3) Historical Overview of Media Arts and Technology

Explores a survey of historical trends in art and technology from the Renaissance to the contemporary global scene. Students investigate how artistic disciplines inform one another and how parallel developments in technology have played a significant role in the history of the arts. This course locates media arts within this broader historical context.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CMDP 7150 (3) Theoretical Overview of Media Arts and Technology

Surveys major theories of art, culture and technology formulated by both practitioners and theoreticians and examines conversations among technology studies, media theory and artistic practice. Students will investigate a variety of approaches, locating media arts within a broad range of theoretical perspectives.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CMDP 7200 (3) Research and Methodologies I

Introduces students to modalities of research and methodological practices in the context of media arts and technology. Strategies from a variety of academic disciplines will be critically engaged to provide a foundation for future work.

Grading Basis: Letter Grade

CMDP 7300 (3) Theories of the Avant-Garde

Explores various manifestations of avant-garde and experimental literature, art and media performance in the 20th century such as Cubism, Futurism, Dada, Surrealism, Theatre of the Absurd, the Situationists, Fluxus, Oulipo and others. Media forms analyzed will include manifestos, sound poetry, theatre, the novel, happenings, cinema, installation and other forms of historical avant-garde art practices.

Grading Basis: Letter Grade

CMDP 7400 (3) Contemporary Practices

Provides students with access to contemporary practices and discourses in media art and culture. The class engages professional practitioners through performances, field work and workshop encounters that may be open to the public. Students research, coordinate and present on biweekly guest presentations, with alternating weeks for reflection and discussion. Readings complement guest presentations.

Grading Basis: Letter Grade

CMDP 7450 (3) Comprehensive Exam Seminar

Designed in a seminar format, this course reviews literature and concepts in all prior coursework and guides studies in their preparation for comprehensive exams. All ETMAP students must demonstrate their understanding of the fundamental concepts explored and developed in prior coursework in relation to individual areas of research.

Requisites: Requires prerequisite courses of CMDP 7100 and CMDP 7150 and CMDP 7250 and CMDP 7550 (all minimum grade C-).

Grading Basis: Letter Grade

CMDP 7500 (3) Production Methods I

Provides technical resources for students to work with emergent technologies in a media arts context. This is a team-taught, practice-based course addressing various production methods, from moving image and video to web and network media to computational media.

Repeatable: Repeatable for up to 9.00 total credit hours.

Grading Basis: Letter Grade

CMDP 7560 (3) Emergent Technologies: Theory and Practice

Explores how discreet modalities of media arts practices and their underpinning theoretical perspectives inform each other through the use of technology. Students investigate and develop theoretical perspectives on the exchange between art, technology and theory within their own research and the broader context of the contemporary social and cultural landscape.

Requisites: Requires a prerequisite course of CMDP 7150 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 7841 (1-9) Independent Study

Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMDP 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CMDP 8100 (3) Dissertation Development

Designed in a seminar format, this course guides students through the development of a practice-based dissertation in which constant critical thinking is required. Through intensive workshoping and close reading, this class guides students from the dissertation proposal to the opening stages of tangible, original research.

Grading Basis: Letter Grade

CMDP 8500 (3) Collaborative Studio Practice I

Explores approaches to media arts collaboration across disciplines. Through technological and social systems, students investigate the role of the artist. In analyzing contemporary work in an ongoing cycle of discussion, reading and art practice, students will respond to projects, texts and media in form of creative practice.

Requisites: Requires a prerequisite course of CMDP 7450 (minimum grade C-).

Grading Basis: Letter Grade

CMDP 8600 (1-6) Independent Studio Critique

Work under faculty supervision with individual and group critiques focusing on the development of a practice-based dissertation. Designed to be taken in conjunction with CMDP 8100.

Grading Basis: Letter Grade

CMDP 8991 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 40.00 total credit hours.

Requisites: Restricted to graduate students only.

Interdisciplinary Documentary Media Practices - Master of Fine Arts (MFA)

The MFA in Interdisciplinary Documentary Media Practices, a terminal degree, is a three-year program in which students learn and experiment with a variety of documentary media practices as they work toward the completion of a thesis project. The core of the program is the Documentary Lab, in which students from a wide range of disciplines develop and workshop projects at various stages of completion. The program also takes advantage of masterclasses and other opportunities offered by the Center for Documentary and Ethnographic Media.

Requirements

Admission Requirements

DCMP is not currently accepting applications for the MFA program. View the department website (<https://www.colorado.edu/cmci/dcmp/mfa/>) for updates.

Application Deadlines

For U.S. students, the application deadline is January 15. For international students, the application deadline is December 1.

Application Guidelines and Resources

MFA applicants must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university and provide transcripts from every institution attended.
- Have an undergraduate grade point average of at least 2.75.
- If international, provide TOEFL or IELTS scores.
- Provide three letters of recommendation.
- Provide a statement of purpose.
- Provide a portfolio of relevant media work, such as video, photographs, sound pieces, websites, and other media art projects. Format preference is Vimeo. Please include a link to your online portfolio in your personal statement.

In the online application, select IDMP-MFA as the academic plan.

Transcripts

For review and decision purposes, applicants are required to upload an unofficial copy of their transcript(s) in the online application. The program requires a copy of the scanned transcript from each undergraduate and graduate institution that you attended. This includes community colleges, summer sessions, and extension programs. While credits from one institution may appear on the transcript of another institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether or not courses were completed. *Failure to list and submit transcripts from all institutions previously attended is considered to be a violation of academic ethics and may result in the cancellation of a student's admission or dismissal from the university.*

Candidates will only need to provide official transcripts *only* after they are recommended for admission.

For more information about this program, visit the department website (<https://www.colorado.edu/cmci/dcmp/mfa/>) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

Program Requirements

The IDMP MFA is a three-year degree program requiring the successful completion of 60 credit hours of coursework, a first year review, second year review and thesis defense. The thesis consists of an original, media-based project and a written reflection that situates the project within the field of documentary media practices.

Emergent Technologies and Media Art Practices - Doctor of Philosophy (PhD)

The emergent technologies and media arts practices (ETMAP) PhD is a practice-led program of scholarly research and exploration of media practices, theories and innovations in art and technology. Students both experiment with and research the media and artistic practices that they study. The ultimate goal is a substantive dissertation and media-based project that situate media art making within broad cultural and art historical perspectives.

Designed to be completed in four years, the program requires 72 credit hours, a first year review, comprehensive exam, prospectus defense and dissertation defense. There is a high degree of flexibility in the curriculum, with students choosing up to 15 credit hours of guided electives and independent study, including courses and independent study with faculty in other departments. After admission to candidacy, students conduct scholarly and creative research over three semesters (30 credit hours),

culminating in a dissertation that makes a unique contribution to the field of media arts and technology.

The program takes seriously the balance of theory and practice. The dissertation consists of two equally important components: a written dissertation and a media-based project. Students are expected to be both scholars and creative artists.

Requirements

Admission Requirements

An overview of admission requirements may be found below. For additional information, view the program page on the department website (<https://www.colorado.edu/cmci/dcmp/phd/>).

Application Deadlines

For U.S. students, the application deadline is January 15. For international students, the application deadline is December 1.

Application Guidelines and Resources

PhD applicants must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university and provide transcripts from every institution attended.
- Have an undergraduate grade point average of at least 2.75.
- If international, provide TOEFL or IELTS scores.
- Provide three letters of recommendation.
- Provide a statement of purpose.
- Provide a portfolio of relevant media work, such as video, photographs, sound pieces, websites, and other media art projects. Format preference is Vimeo. Please include a link to your online portfolio in your personal statement.
- Provide a writing sample of at least 2500 words.

In the online application, select ETMAP-PHD as the academic plan.

Transcripts

For review and decision purposes, applicants are required to upload an unofficial copy of their transcript(s) in the online application. The program requires a copy of the scanned transcript from each undergraduate and graduate institution that you attended. This includes community colleges, summer sessions, and extension programs. While credits from one institution may appear on the transcript of another institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether or not courses were completed. *Failure to list and submit transcripts from all institutions previously attended is considered to be a violation of academic ethics and may result in the cancellation of a student's admission or dismissal from the university.*

Candidates will only need to provide official transcripts *only* after they are recommended for admission.

Program Requirements

The ETMAP PhD is a four-year degree program requiring the successful completion of 72 credit hours of coursework, a first year review, comprehensive exam, prospectus defense and dissertation defense.

In the comprehensive exam, students must demonstrate their proficiency and understanding of the fundamental historical and theoretical concepts explored and developed in prior coursework. Students advance to candidacy after the prospectus defense.

The dissertation must include practical as well as written theoretical components. Students are expected to publicly present their media-based project before the dissertation defense.

Required Courses

Code	Title	Credit Hours
ETMAP Fundamentals		
CMDP 7100	Historical Overview of Media Arts and Technology	3
CMDP 7200	Research and Methodologies I	3
CMDP 7300	Theories of the Avant-Garde	3
CMDP 7450	Comprehensive Exam Seminar	3
CMDP 7500	Production Methods I (x4)	12
Dissertation Development		
CMDP 8100	Dissertation Development	3
Guided Electives and/or Independent Study		15
Guided Elective, within or outside DCMP (repeatable)		
Independent Study, within or outside DCMP (repeatable)		
Dissertation		30
CMDP 8991	Doctoral Dissertation	
Total Credit Hours		72

Emergent Technologies and Media Arts Practices - Graduate Certificate

The graduate certificate in emergent technologies and media arts practices (ETMAP) is a 9-credit-hour certificate program that is open to any student pursuing a graduate degree in any department at CU Boulder. In the program, students integrate media practices, theories and innovations in art and technology into their research. Students both experiment with and research the media and artistic practices that they study. The program will be of particular interest to students whose media research is practice-led and students who wish to integrate media arts practices into their research.

Requirements

Application Guidelines

To be accepted into the program, students must be a graduate student in good standing with the Graduate School, submit a statement of interest to the Associate Chair of Graduate Studies and meet with the Associate Chair to discuss to their goals as a student in the program. Acceptance into the program is at the discretion of the Associate Chair.

For more information about this program, view the department website (<https://www.colorado.edu/cmci/dcmp/cert-etmap/>) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

Required Courses and Credits

The ETMAP certificate requires the successful completion of 9 credit hours in critical studies and media arts practices, as described below.

The certificate program can usually be completed in one to two years. After the course requirements are met, students must provide a transcript to the Associate Chair of Graduate Studies. The certificate will appear on the student's record at that time or upon graduation.

Code	Title	Credit Hours
Critical Studies		3
Choose one:		
CMDP 7100	Historical Overview of Media Arts and Technology	
CMDP 7300	Theories of the Avant-Garde	
CMDP 7871	Special Topics	
Media Arts Practices		6
Choose two:		
CMDP 7200	Research and Methodologies I	
CMDP 7500	Production Methods I (repeatable)	
CMDP 7871	Special Topics	
Total Credit Hours		9

Resources

Students have access to DCMP equipment, facilities and other resources as long as they are enrolled in a course that fulfills certificate requirements.

Interdisciplinary Documentary Media Practices - Graduate Certificate

The graduate certificate in interdisciplinary documentary media practices (IDMP) is a 12-credit-hour certificate program that is open to any student pursuing a graduate degree in any department at CU Boulder. In the program, students integrate documentary media practices into their research. The core of the program is the documentary lab, in which students from a wide range of disciplines develop and workshop projects at various stages of completion. The program also takes advantage of masterclasses and other opportunities offered by the Center for Documentary and Ethnographic Media.

Requirements

Application Guidelines

To be accepted into the program, students must be a graduate student in good standing with the Graduate School, submit a statement of interest to the Associate Chair of Graduate Studies, and meet with the Associate Chair to discuss to their goals as a student in the program. Acceptance into the program is at the discretion of the Associate Chair.

For more information about this program, view the department website (<https://www.colorado.edu/cmci/dcmp/cert-idmp/>) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

Required Courses and Credits

The IDMP certificate requires the successful completion of 12 credit hours of seminar courses, and production workshops and topics as described below.

The certificate program can usually be completed in one to two years. After the course requirements are met, students must provide a transcript to the Associate Chair of Graduate Studies. The certificate will appear on the student's record at that time or upon graduation.

Code	Title	Credit Hours
Seminar Courses		
CMDP 5100	Research and Methodologies Seminar	3
CMDP 5600	Documentary Lab Seminar	3
Production Workshop and Topics		
CMDP 5500	Documentary Production Workshops	3
CMDP 5900	Documentary Production Topics	3
Total Credit Hours		12

Resources

Students have access to DCMP equipment, facilities and other resources as long as they are enrolled in a course that fulfills certificate requirements.

Information Science

Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena, and translate those findings to the design and development of useful and meaningful technology.

The department will equip students with the conceptual machinery to succeed in a future characterized by new ways of working with information and communication technology.

The knowledge and skills of our graduates will enable them to participate in and shape new structures of enterprise. Customized, creative production—as in the "maker culture" movement—is expanding notions of the enterprise, as are distributed and mobile workforces.

The MS and PhD degrees align with standards set by other universities. Both include liberal arts education combined with empirical work and computing knowledge, and both incorporate the grant-driven, collaborative "lab model" research that characterizes the natural and engineering sciences.

Course code for this program is INFO.

Master's Degree

- Information Science - Master of Science (MS) (p. 1556)

Doctoral Degree

- Information Science - Doctor of Philosophy (PhD) (p. 1558)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Instructor; PhD, University of Colorado Boulder

Courses

INFO 5301 (3) Computation for Research in Information Science

Introduces principles of computational thinking through the manipulation, transformation and creation of data artifacts used in research. Students will be exposed to a high-level overview of algorithms, functions, data structures, recursion and object-oriented computer programming through a series of assignments that emphasize the use of computation as a means of scholarship.

Grading Basis: Letter Grade

INFO 5501 (3) Open Collaboration

Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3501

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

INFO 5502 (3) Online Communities

Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities.

Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants' motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3502

Grading Basis: Letter Grade

INFO 5503 (3) Everyday Information Behavior

Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information online. Students learn to analyze the informational dimensions that occur in their everyday lives.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3503

Grading Basis: Letter Grade

INFO 5504 (3) Digital Identity

Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3504

Grading Basis: Letter Grade

INFO 5505 (3) Designing for Creativity and Learning

Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3505

Grading Basis: Letter Grade

INFO 5506 (3) Online Fandom

Explores and analyzes fan communities in a digital context. Through applied research, students will investigate online spaces devoted to participatory and remix culture, media fandom, and fan creation. This class will draw concepts and methods from fan studies, social computing, ethnography, data science, and sociology to drive project-based inquiry.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3506

Grading Basis: Letter Grade

INFO 5507 (3) Data and the Humanities

Introduces students to foundational computing and statistical concepts for analyzing humanities data. This course discusses the influence of digitization and data on humanist inquiry and exposes students to techniques for working with data in different areas of the humanities, including literature, history, and art. The course emphasizes technical practices involved in humanist data analysis. Comfort with programming is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: INFO 3507

Grading Basis: Letter Grade

INFO 5601 (3) Ethical and Policy Dimensions of Information and Technology

Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction. Counts as Mastery in Information Science.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4601

Grading Basis: Letter Grade

INFO 5602 (3) Information Visualization

Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4602

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

INFO 5603 (3) Survey Research Design

Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4603

Grading Basis: Letter Grade

INFO 5604 (3) Applied Machine Learning

Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4604

Grading Basis: Letter Grade

INFO 5605 (3) Ethnographic Research in Applied Settings

Demonstrates the power of ethnography as an investigative approach that is useful in design, evaluation and question formation for information scientists across all workforce sectors. Teaches students how to be keen observers of the unusual as well as the everyday to reveal meaningful insights that elaborate information science projects.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4605

Grading Basis: Letter Grade

INFO 5606 (3) Critical Technical Practice

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships. Counts as Mastery in Information Science.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

INFO 5607 (3) Software Engineering for Data-Centered Systems

Explores design and engineering of systems for data storage and analysis. Introduces fundamental development concepts used in real-world data systems. By combining software engineering with knowledge from data science and human-centered computing, prepares students to develop systems, interpret and modify codebases, understand modern concepts for managing data at scale, and work in teams to create cutting-edge applications for consumer use.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4607

Requisites: Requires prerequisites of INFO 2201 or CSCI 2270 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior)

Grading Basis: Letter Grade

INFO 5608 (3) Community-Based Design

Surveys techniques in cooperative design with community members as collaborators rather than subjects. Students will explore approaches such as participatory design and co-design. Students will work in teams in partnership with community stakeholders to create tools, experiences, or systems that meet the needs of communities, contribute to social change, and/or lead to advancing academic knowledge. Counts as Mastery in Information Science.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4608

Grading Basis: Letter Grade

INFO 5609 (3) User-Centered Design

Surveys the theoretical and practical foundations of human-computer interaction and user-centered design. Students learn theories of interaction (including cognitive, organizational, collaborative, and task-based approaches), user interface design techniques, design guidelines, and usability testing in the context of developing technology. Course content is explored through a variety of interfaces (desktop, mobile, touch, vision, audio, etc.) and contexts (personal, organizational, cross-cultural, etc.).

Equivalent - Duplicate Degree Credit Not Granted: INFO 4609

INFO 5611 (3) Ubiquitous Computing Experience Design

Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4611

Grading Basis: Letter Grade

INFO 5613 (3) Network Science

Introduces theories and methods for analyzing relational data in social, information, and other complex networks. Students will understand the processes and theories explaining network structure and dynamics as well as develop skills analyzing and visualizing real-world network data. No math or statistics training required, but course will assume familiarity with Python.

Equivalent - Duplicate Degree Credit Not Granted: INFO 4613

Grading Basis: Letter Grade

INFO 5841 (1-3) Independent Study

Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

INFO 5871 (3) Special Topics

Topics will vary by semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

INFO 5931 (1-3) Internship

Internship

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

INFO 6101 (3) Theories and Concepts in Information Science

Surveys foundational theories and concepts in information science.

Students will learn to read and reflect critically about seminal texts, tracing their intellectual genealogies from a variety of originating disciplines to their appropriation by information science. Students will apply these theories to contemporary issues and problems.

Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.

Grading Basis: Letter Grade

INFO 6201 (3) Interdisciplinary Ways of Knowing

Introduces principles of research design and surveys the breadth of research methods appropriated by the field of information science.

Students will explore the diversity of epistemological orientations that make up the field, that influence the types of often mixed research methods applied and that shape the kinds of questions that are and are not explored.

Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.

Grading Basis: Letter Grade

INFO 6301 (3) Computation for Research in Information Science

Examines the diversity of roles that computation can play in information science research, ranging from an overview of some data-driven practices to prototyping and infrastructure development to computation-as-research-support. Provides students with a level of computational literacy to engage with the multiplicity of roles that computation serves in the different kinds of research work that is happening across the domain, including exemplars of different kinds of technical contributions and approaches.

Grading Basis: Letter Grade

INFO 6401 (3) Information and Ideas in Design Disciplines

Introduces fundamental principles and practices from user-centered design disciplines and examines how those principles and practices intersect with contemporary issues in information science. Theory, research and exemplary practices from interaction, graphic, product, communication and experience design are introduced through readings, problems and case histories. Projects provide direct experience with common design tools and exposure to leading practitioners.

Grading Basis: Letter Grade

INFO 6500 (1) Information Science Seminar

Enculturates graduate students in the discipline of Information Science through weekly seminar series that hosts guest speakers, internal faculty and graduate speakers and other community building and professional development activities.

Repeatable: Repeatable for up to 8.00 total credit hours.

Grading Basis: Letter Grade

INFO 6871 (3) Special Topics

Topics will vary by semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

INFO 6950 (1-6) Master's Thesis

Designing, researching and writing a master's thesis under the supervision of the student's advisors.

Repeatable: Repeatable for up to 6.00 total credit hours.

INFO 7000 (3) Introduction to Doctoral Studies in Information Science

Introduces students to practices associated with successful advancement in a doctoral program, rigorous scholarship in information science and more expert and early participation in their scholarly community of practice.

Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.

Grading Basis: Letter Grade

INFO 7841 (1-3) Independent Study

Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to PhD students only.

INFO 7871 (3) Special Topics

Topics will vary by semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to PhD students only.

INFO 8991 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 40.00 total credit hours.

Requisites: Restricted to PhD students only.

Information Science - Master of Science (MS)

The Master of Science degree in Information Science is are intended for BS students who desire additional study and experience conducting supervised research to make their résumés even more attractive to industry upon graduation, as well as students considering a PhD in Information Science but lacking either master's-level coursework in the field or demonstrated research experience at the graduate level.

There are two options under this degree:

- Thesis plan: 6 thesis hour credits, typically taken over two semesters (3 credit hours each). A thesis defense with 3 committee members and submission of the thesis to the Graduate School are required.
- Non-thesis plan: 6 credits taken as a graduate-level independent study over two semesters (3 credit hours each) with an INFO faculty member. Students will complete one or more in-depth research projects as part of this plan; however, a formal thesis document and oral presentation/defense are not required.

If an MS elects to continue as a PhD student Information Science—and is admitted, via an explicit and separate application to the program—then up to seven of the courses taken as part of this MS (a maximum of 21 credit hours) could be “rolled-up” to meet PhD curriculum requirements, pending approval of the student's PhD preliminary exam committee and the graduate director.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU

Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Information Science - Bachelor of Science (BS) (p. 904)

Requirements

Application Guidelines

Applicants must hold at least a bachelor's degree or its equivalent. They must also provide the following documents:

- A CV or resume
- An unofficial transcript from each college or university attended
- Scores from the general GRE are optional; international students must also have a TOEFL score of at least 600 (IBT 100)
- Three letters of recommendation from people qualified to judge the student's potential for success in graduate school (Note: The most compelling recommendation letters will provide specific observations about the candidate's promise in analytical thinking, oral and written scientific communication, and research and teaching, as well as demonstration of teamwork and collegiality)
- A statement of purpose (two pages maximum) that describes a question, problem or topic in information science the student has a passion to address; explains how the student's previous academic training, professional experience and/or personal passions led them to this question, problem or topic and drew them to this degree program; and identifies the faculty members with whom the student is interested in working and why
- Optional: A writing sample in addition to the statement of purpose

We encourage applications from individuals representing the broad range of disciplines. We welcome students that bring diverse skills and perspectives on the range of issues related to understanding and shaping the future of information science. All students admitted to the program will be expected to develop a breadth of competencies that are essential to being a researcher in this diverse, interdisciplinary field. One's ability and willingness to expand skill sets should be demonstrated in the statement of purpose.

Students are required to upload an unofficial copy of their transcript(s) in the online application. We require one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed. Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Only after a student is recommended for admission will they need to provide official transcripts.

Assistance with graduate programs is available by phone (303-492-7977) or email (cmcigrad@colorado.edu).

Required Courses and Credits

Refer to Plan of Study tab for sample plan of study by semester.

Code	Title	Credit Hours
Course Category A: Depth/Specialization		
<i>Methods Course</i>		3
Choose one:

Information Science - Doctor of Philosophy (PhD)

Information science considers the relationships between people, places and technology—as well as the information or data those interactions yield. It unites a number of interdisciplinary approaches for understanding and shaping a future characterized by pervasively available digital technology. Drawing on knowledge from social science, computer science, data science and the humanities, information scientists support the study and innovation of "socio-technical systems."

Information science takes as a core idea that data are a common denominator for both social and technical systems. By focusing on the transformation of data across systems of people, places, and technology in ways that then make data truly useful and meaningful, students will be in the best possible position to invent what society can do with technology, and what technology can do for society.

The PhD program offers an education that combines training in the liberal arts, empirical investigation and computing knowledge, and incorporates the collaborative "lab model" research that characterizes the natural and engineering sciences.

Requirements

Application Guidelines

PhD applicants must:

- Hold at least a bachelor's degree or its equivalent.
- Provide the following documents:
 - A CV or resume
 - An unofficial transcript from each college or university attended
 - Scores from the general GRE are optional; international students must also have a TOEFL score of at least 600 (IBT 100)
 - Three letters of recommendation from people qualified to judge the student's potential for success in graduate school (Note: The most compelling recommendation letters will provide specific observations about the candidate's promise in analytical thinking, oral and written scientific communication, and research and teaching, as well as demonstration of teamwork and collegiality)

- A statement of purpose (two pages maximum) that describes a question, problem or topic in information science the student has a passion to address; explains how the student's previous academic training, professional experience and/or personal passions led them to this question, problem or topic and drew them to this degree program; and identifies the faculty members with whom the student is interested in working and why
- Optional: A writing sample in addition to the statement of purpose

We encourage applications from individuals representing the broad range of disciplines. We welcome students that bring diverse skills and perspectives on the range of issues related to understanding and shaping the future of information science. All students admitted to the program will be expected to develop a breadth of competencies that are essential to being a researcher in this diverse, interdisciplinary field. One's ability and willingness to expand skill sets should be demonstrated in the statement of purpose.

Students are required to upload an unofficial copy of their transcript(s) in the online application. We require one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed. Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Only after a student is recommended for admission will they need to provide official transcripts.

Assistance with graduate programs is available by phone (303-492-7977) or email (cmcigrad@colorado.edu).

Twenty-one credit hours of graduate-level elective coursework must be taken. Elective specialization courses can be within or outside of INFO, under the guidance of the student's advisor and committee. Students will also take an additional 30 dissertation hours, typically after finishing their initial coursework.		21
Total Credit Hours		36

PhD Milestones

In addition to coursework, program requirements include the successful completion of the following PhD milestones: preliminary exam, comprehensive exam/dissertation proposal and dissertation.

Intermedia Art, Writing and Performance

The intermedia art, writing and performance (IAWP) program is an interdisciplinary digital arts and humanities research unit with a practice-based PhD. Faculty investigate past and present forms of digital art, writing and performance, offering graduate students an environment in which to practice and research emerging forms of creativity.

Course code for this program is IAWP.

Doctoral Degree

- Intermedia Art, Writing and Performance - Doctor of Philosophy (PhD) (p. 1559)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Amerika, Mark (https://experts.colorado.edu/display/fisid_116523/)
Faculty Director, Professor; MFA, Brown University

Carr, Julia Alice (https://experts.colorado.edu/display/fisid_143349/)
Professor; PhD, University of California, Berkeley

Ellsworth, Michelle (https://experts.colorado.edu/display/fisid_112060/)
Professor; MFA, University of Colorado Boulder

Emerson, Lori Ann (https://experts.colorado.edu/display/fisid_145834/)
Associate Professor; PhD, SUNY at Buffalo

Swanson, Joel E. (https://experts.colorado.edu/display/fisid_134311/)
Assistant Professor; MFA, University of California, San Diego

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/)
Associate Professor; PhD, University of California, San Diego

Courses

IAWP 6000 (3) Introduction to Practice-Based Research

Introduces students to practice-based research methods in intermedia art, writing and performance.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6100 (3) Theory and Practice of Doing

Introduces students to the theory of doing and making. Guiding questions include: what does it mean to place "doing" at the center of one's research agenda? What does it mean to do hands-on work in an art/design studio, a digital humanities lab, a media lab, a media archaeology lab, a makerspace or a hackerspace?

Grading Basis: Letter Grade

IAWP 6200 (3) Intermedia Collaboratory

Collaborative studio course in which students focus on emerging practices in intermediate art, writing and performance while collaboratively building art, writing and/or performance projects that are presented to the community as public events and programs including exhibitions, publications and performances.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6700 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6800 (3) Intermedia Seminar

Focuses on intermedia arts, writing and performance as they relate to digital media, communication and information.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

Grading Basis: Letter Grade

IAWP 6871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

IAWP 7841 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

IAWP 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

IAWP 8991 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 40.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Intermedia Art, Writing and Performance - Doctor of Philosophy (PhD)

The intermedia art, writing and performance (IAWP) program is an interdisciplinary digital arts and humanities research unit with a practice-based PhD.

Traditional scholarly and creative work outputs, such as the single-authored print book or conventional gallery exhibitions, have already been challenged by the emergence of Internet art sites, electronic literature, live audio/visual performance, multi-platform storytelling or transmedia narratives, software art, artificial intelligence, 3D animation, interactive installations for public spaces, virtual reality, video games, networked media activism and innovative art applications for mobile devices and tablets.

IAWP's internationally renowned and affiliated faculty collaborate with graduate students to probe the significance of a digitally expanded, process-based research environment located in a cluster of interdisciplinary research labs. The program provides a flexible pedagogical structure that will lead to the creation of new and hybridized forms of art, writing, performance, scholarship, theory, design, curation, exhibition and publication appropriate for our current cultural moment.

The program concentrates its curriculum on digital forms of creativity and cultivates cutting-edge investigations into the practice, theory, history and philosophy of intermedia art, and scholarship.

Requirements

Application Guidelines

Applicants to the PhD program in intermedia art, writing and performance (IAWP) are expected to hold a master's degree (MFA or MA preferred) or its equivalent from an accredited college or university, and must provide transcripts from every institution attended. In exceptional cases, applicants without a master's degree may be considered for admission.

The program encourages applications from interdisciplinary digital artists and/or humanists who have already started developing experimental modes of practice-based research in contemporary forms of artistic expression.

Domestic applications must be received by the program no later than Jan. 15 prior to the fall semester for which entrance is sought. International applications should be submitted by Dec. 1. Late applications may be considered under special circumstances.

Successful applicants typically meet or exceed the following criteria:

- Provide transcripts from all institutions the applicant has attended as an undergraduate and graduate.
- Have an undergraduate cumulative GPA of at least 3.2 and a cumulative GPA of at least 3.5 in previous graduate work.
- Provide three letters of recommendation.
- Provide a 1000-word artist statement and proposal for a practice-based research project.
- Provide a resume or CV that includes academic and employment experience.
- Provide a portfolio of intermedia artwork, such as Internet art sites, electronic literature, video and/or film work, sound works, digital humanities projects, creative writing, mobile and web applications, etc. Format preference is web-based and could include links to Vimeo, Soundcloud, online publication and/or exhibition sites, PDFs, personal websites, etc. DVDs or flash drives with QuickTime files, images, texts, etc., are also accepted.

Meeting these criteria does not guarantee acceptance into the program. The program accepts relatively few new doctoral students each fall; qualified applicants may exceed available openings.

For review and decision purposes, students are required to upload an unofficial copy of their transcript(s) in the online application. The program requires one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed.

Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Only after a student is recommended for admission will they need to provide official transcripts.

Graduate advising is available by phone (303-492-7977), email (cmcigrad@colorado.edu) or in person (Hellems 96D).

Program Overview

Doctoral students in the IAWP PhD program take 30 credit hours of required coursework in the first two years of the program, followed by 30 dissertation credit hours, for a total of 60 hours.

The required coursework will include an interdisciplinary set of IAWP classes that introduces students to collaborative, practice-based research processes in the digital arts and humanities. The coursework includes Introduction to Practice-Based Research (IAWP 6000), Intermedia Collaboratory (IAWP 6200), Theory and Practice of Doing (IAWP 6100) and the Intermedia Seminar (IAWP 6800). Students are also encouraged to take approved courses offered by departments inside and outside the College of Media, Communication and Information.

At the end of their second year, students will take their general examination. Once they have passed the general examination, their research will focus on the creation of an original and substantial project centered on practice-based research. The final outcome of their research will result in a creative work accompanied by a written dissertation.

Time Limit

Students are expected to complete the program and their practice-based research project in four years.

Journalism

The Department of Journalism is founded on the principle that a well-informed and engaged public is essential to democracy—perhaps more so now, at a time of dizzying change, than it has ever been—and that, in the face of this change, journalism retains a unique role in contributing to civic life and to the quality of public discourse.

We put this principle to work by helping students become constructive participants in an ever-evolving global media landscape, where distinctions between producers and consumers of content have blurred. More specifically, we prepare them, at both the undergraduate and graduate levels, for careers in journalism and other fields of public communication. We train students to gather information from a diversity of sources, to analyze it critically, and to report what is significant through stories and other media forms across multiple media platforms. We encourage ethical awareness so that students will think independently, being prepared to reflect on and to help shape media practices and norms rather than take them at face value.

We believe in the integration of classroom instruction with practical experience. Many of our students work for, and manage, campus online news and entertainment sites, television programs and a radio station. They intern at broadcast stations, newspapers, magazines, websites and social media companies. Lastly, as a faculty, and with the help of colleagues elsewhere in our College who are working on new and innovative forms of human communication, we are committed to improving journalism through pioneering research and creative work.

Course code for this program is JRNL.

Master's Degrees

- Journalism - Master of Arts (MA) (p. 1566)
- Journalism Entrepreneurship - Master of Arts (MA) (p. 1566)

Doctoral Degree

- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1567)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

JRNL 5001 (3) Media Technology Boot Camp

Offers a foundation in the technologies of journalistic storytelling across a variety of established and emerging media platforms, such as print, television, radio, online publications, blogs, social media and emerging forms of communication. Students will emerge from the course with basic competence in the technical tools they will need as journalists.

Requisites: Restricted to graduate students only.

JRNL 5011 (3) Newsgathering and Multimedia Storytelling

Develops skills in research and reporting on public issues and news events, and in the construction of narrative in the journalistic and documentary traditions, using a variety of media platforms.

Requisites: Restricted to graduate students only.

JRNL 5102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4102

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5201 (3) Principles of American Journalism

Acquaints students with concepts and functions of journalism in America. It will explore the underlying principles of journalism, relationships among journalism and other institutions, and current issues and problems facing journalists. Students will develop familiarity with how journalism works, as well as some perspective on how well (or not) journalism performs its function in American society.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 5211 (3) Funding Journalism in the 21st Century

Explores new business models and strategies that could sustain the news industry as it makes the transition to primarily digital platforms. The course examines both for-profit and nonprofit models in the United States, while also investigating projects around the world. The class answers the question: If journalism is funded this way, how can I use this in my own career?

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 5221 (3) Entrepreneurial Journalism

Study the practices of entrepreneurial journalistic ventures, both in start-ups to "intrapreneurial" undertakings at legacy media companies. Throughout the course, students will learn skills to enhance their own entrepreneurial journalism, from understanding freelance markets to seeking commercial and nonprofit funding for media ventures.

Requisites: Requires prerequisite course of JRNL 5211 (minimum grade D-).

Grading Basis: Letter Grade

JRNL 5231 (3) Video Newsgathering

Explores the principles and techniques involved in the preparation of mobile- and social-based video storytelling. Students will learn the basics of video journalism: gathering sound and picture simultaneously, the fundamentals of exposure and composition, the grammar of video, writing to picture, selecting sound bites, and the basic concepts of editing.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 5241 (3) Coding for Journalists

Prepare non-coders to work successfully with developers-for students to learn what they need to know to collaborate with technologists. Students will also learn the basics of front-end web development languages (HTML, CSS, Javascript), which will help them develop their own portfolios, and essentially become more marketable and versatile.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 5311 (3) Literary Journalism

Studies the contributions of American literary journalists from Sara Davidson, Joan Didion, Normal Mailer, Hunter S. Thompson and Tom Wolfe; to established writers of nonfiction, including Annie Dillard, Jon Krakauer, Jane Kramer, Adrian Nichole LeBlanc and Terry Tempest Williams; to the newest wave of long-form journalists. Explores the boundaries between fiction and nonfiction and the literary techniques that distinguish creative nonfiction and literary journalism from other reportorial and storytelling forms. Formerly JRNL 6321.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4311

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4344

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5402 (3) Journalism and Social Identity

Provides a discussion-based inquiry into the role of journalism and journalists in the representation of intersectional identities, focusing on race, gender, sexual expression and socioeconomic class in the United States. The study and practice of journalism in this course will address issues of trust, power, privilege and ethics inherent in reporting across difference.

Requisites: Restricted to graduate students only.

JRNL 5411 (3) Global Journalism and International News

This graduate course provides students with an overview of the field of international and global journalism with particular foci on comparative media research and international affairs reporting. The course seeks to expose students to theoretical foundations and key concepts in the news media systems and journalistic practices around the world. It also addresses the political, social, and economic consequences of global journalism and the challenges related to it.

JRNL 5502 (3) Newsgathering 2

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4502

Requisites: Requires prerequisite courses of JOUR 5511 and JRNL/JOUR 5552 (all minimum grade C-). Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5512 (3) In-Depth Reporting

Shows how to dig beneath the surface of issues and events. Focuses on research, interviewing, and writing.

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5514 (3) Newsgathering for Television

Teaches advanced principles and techniques involved in the preparation of news for broadcasting.

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5521 (3) Data Journalism

Instructs students in data-driven investigative reporting. Includes hands-on, in-depth instruction in gathering data from census reports, commercial databases, information networks, and other sources, and utilizing statistical analysis software and spreadsheets to analyze the information in ways that can help deepen and strengthen journalistic stories on a wide variety of subjects.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5551 (3) News Media Representation and Identity

Examines the role of race, gender, immigration status, religion, and other identities in journalistic representations. Students will apply the work of journalism scholars to historic and current case studies in print, broadcast, and online media. They will apply quantitative and qualitative research methods to more deeply investigate the role of journalism in constructing social identity.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 5552 (3) News Editing

Discusses principles and practice in copy editing and writing headlines for local and wire stories. Practice in page makeup, picture editing, and electronic editing.

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5562 (3) Digital Journalism

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4562

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5572 (3) News Corps

Provides students the opportunity to immerse themselves in an explanatory/investigative news project that gives students a chance to use in-depth research to produce content for Colorado news outlets and practice the skills they've learned in previous reporting classes. Students spend several weeks studying the subject in question before reporting and producing their stories.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 5602 (3) Opinion Writing

Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4602

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5624 (4) NewsTeam

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4624

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5634 (1-3) Broadcast Projects

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4634

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Broadcast Journalism

JRNL 5651 (3) Journalism Law & Ethics

Explores the legal and ethical frameworks of journalistic practice and media production. Covers historical as well as current frameworks used in examining the legal and ethical issues that arise in newsgathering and publication. Examines the relationships between ethics and the law in various media context.

Requisites: Restricted to graduate students only.

JRNL 5684 (3) The Art of Visual Storytelling

Teaches students how to raise the production value of their work based on standards used by professionals. Students learn how lenses, lights and contrast can affect an image; how to assemble their shots with pacing and rhythm; how to apply color grading techniques to give video a cinematic look; and how to create motion graphics for titles and lower thirds.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4684

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

JRNL 5702 (3) Arts/Cultural Reporting and Criticism

Emphasizes composition of criticism for the performing arts and other areas of entertainment.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4702

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5704 (3) Sports Journalism

Prepares students for the world of sport journalism. Combines the skills of a hard news reporter, the perspective of an entertainment reporter and the persuasive abilities of an editorial writer. The class focuses on how to cover sports from all angles.

Recommended: recommended for students in the Journalism Entrepreneurship (JRNL-MAJE) program.

JRNL 5802 (3) Feature Writing

Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4802

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5804 (3) Sports, Media and Society

Examines how sports and journalism intersect and impact society. Class focuses on how sports, specifically areas of sports such as law and politics, race, gender, sexuality and disability, impact culture and society as a whole.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 5812 (3) Science Writing

Helps students acquire the basic skills and knowledge required of science journalists. Also examines issues of scientific importance such as climate change, the nature of scientific knowledge, and how science is covered in various media.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5822 (3) Reporting on the Environment

Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic and cultural dimensions of environmental subjects.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 4822

Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Print Online Journalism

JRNL 5841 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5851 (1-6) Graduate Professional Project

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5871 (1-3) Special Topics

Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7001**Requisites:** Restricted to graduate students only.**Grading Basis:** Letter Grade**JRNL 7002 (3) Research Design**

Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7002**Requisites:** Requires prerequisite courses of JRNL 7003 or APRD 7003 (minimum grade C-). Restricted to graduate students only.**Grading Basis:** Letter Grade**JRNL 7003 (3) ProSeminar in Mass Communication Theory II**

Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion.

Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7003**Requisites:** Restricted to graduate students only.**Grading Basis:** Letter Grade**JRNL 7004 (1) Doctoral Professionalization Seminar**

Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7004**Repeatable:** Repeatable for up to 4.00 total credit hours.**Requisites:** Restricted to graduate students only.**Grading Basis:** Letter Grade**JRNL 7010 (3) Qualitative Interviewing as a Research Method**

Develops the necessary skills to conceptualize, plan, and execute interview-based research projects. Covers topics such as brainstorming and implementing a research idea, formulating research questions, designing a thorough research plan, navigating the IRB, recruiting participants, creating the interview guide, conducting interviews, and analyzing and writing up data. Course also examines reflexivity and ethical issues that are inherent in interview studies, especially ones involving certain populations.

Requisites: Requires prerequisite course of JRNL 7051 or APRD 7051 (all minimum grade D-). Restricted to graduate students only.**JRNL 7011 (3) Seminar in Strategic Public Relations**

Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7011**Requisites:** Restricted to graduate students only.**Grading Basis:** Letter Grade**JRNL 7012 (3) Ethnography and Media**

Provides a ¿how to¿ concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.

Requisites: Restricted to graduate students only.**Grading Basis:** Letter Grade

JRNL 7013 (3) Mixed Research Methods in Mass Communication

Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7013

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 7014 (3) Experimental Design in Mass Communication

Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7014

Requisites: Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.

JRNL 7020 (3) Controls of Media and Information

Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7020

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 7021 (3) Environmental Journalism and Science Communication

Focuses on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7021

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 7030 (3) Media Sociology

Examines a range of theories for how media messages and media institutions turn out the way they do. `Media sociology; refers to theorizing about the media as the `dependent variable; even though many of the `independent variables; explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7030

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 7031 (3) Moral Psychology and Media Ethics

Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7031

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 7034 (3) Media and Health Communication

Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7034

JRNL 7051 (3) Qualitative Methods in Mass Communication

Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7051

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

JRNL 7061 (3) Quantitative Research Methods

Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students for dissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7061

Grading Basis: Letter Grade

JRNL 7871 (3) Special Topics

Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

JRNL 7880 (3) Persuasion Theory

This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.

Equivalent - Duplicate Degree Credit Not Granted: APRD 7880

JRNL 8991 (1-10) Doctoral Dissertation

Working on dissertation.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

MDRP 7871 (3) Special Topics

Special topics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Journalism - Master of Arts (MA)

The master's degree in journalism prepares students for professional success in news outlets, digital and social media platforms, and corporate communications.

The program offers two options, both of which are designed for students with limited academic or professional experience in journalism.

The professional practice option is for students who wish to focus on quickly obtaining advanced journalistic skills. It can be completed with as few as 30 credits and in as little as two semesters plus a summer.

The area of expertise option is for students wishing not only to acquire advanced journalistic skills, but also to complement them with an area of expertise, such as environmental science and policy. This option can be completed with a minimum of 36 credits and in four semesters.

Regardless of option, the degree's focus is on multimedia training and experience. Students develop skills in information-gathering, storytelling and analysis across a variety of platforms and professional contexts, including video, online interactivity, social media, photography and, of course, the printed word. They produce in-depth reporting projects in collaboration with professional media outlets in Colorado, and they complete internships at award-winning radio and television stations, newspapers, magazines, websites and other news organizations nationwide.

Requirements

Application Guidelines

Applicants to the MA in journalism must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university
- Have an undergraduate grade point average of at least 2.75
- Have a GRE verbal score of at least 153 (62%). International applicants must also have a TOEFL score of at least 600 (IBT 100)
- Provide three letters of recommendation
- Provide a 500-word statement of purpose
- Provide a resume

Graduate advising is available by phone (303-492-7977), email (cmcigrad@colorado.edu) or in person (Hellems 96D).

Program Requirements

Professional Practice Option

This option can be completed with a minimum of 30 credits and in as little as two semesters plus a summer.

Journalism Entrepreneurship - Master of Arts (MA)

The online master's degree in journalism entrepreneurship prepares students for professional careers at news outlets, and in digital and social media platforms, corporate communications and the freelance market. It particularly focuses on entrepreneurship and preparing students for today's media environment, one in which skills in both journalism and business are essential.

This degree is designed for students with a limited range of experience in journalism. Courses are offered in differing online environments. The entire program can be completed in one calendar year with students starting classes in the Augmester, then continuing in the fall and spring semesters, and finishing their professional project over the summer. The Master of Arts in Journalism Entrepreneurship also offers flexibility in that its online courses can be taken at a student's own pace over a longer time period.

Regardless of schedule, the degree's focus is on multimedia journalism and business training. Students develop skills in information gathering, storytelling and analysis across a variety of platforms and professional contexts, including video, online interactivity, social media, photography

—and, of course, the printed word. They will also take conceptual courses concerning the journalism industry and the business of journalism.

Requirements

Application Guidelines

Applicants to the MA in journalism must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university
- Have an undergraduate grade point average of at least 2.75
- International applicants must also have a TOEFL score of at least 600 (IBT 100)
- Provide three letters of recommendation
- Provide a 500-word statement of purpose
- Provide a resume

Graduate advising is available by phone (303-492-7977), email (cmcigrad@colorado.edu) or in person (Hellems 96D).

Program Requirements

The program required is 30 credits. Students come to Boulder in early August for a one-week media boot camp in residency, which will include another two weeks of class work completed remotely. This 3-credit course begins the program. Students will then take up to 12 credits in the fall and another 12 in the spring semesters. These courses are a mixture of traditional 15-week classes and five-week terms; each is 3 credits. There are two tracks to choose from, Sports Journalism or Journalism Entrepreneurship. Out of the 30 credits required for the program, 6 of them are specific to the chosen track.

Media Research and Practice - Doctor of Philosophy (PhD)

The media research and practice (MDRP) PhD program is an umbrella that includes three distinct doctoral tracks in three separate departments in the College of Media, Communication and Information:

1. Strategic communication, offered by the Department of Advertising, Public Relations and Media Design.
2. Journalism studies, offered by the Department of Journalism.
3. Media studies, offered by the Department of Media Studies.

Program Tracks

Strategic Communication Track

The strategic communication PhD track offered by the Department of Advertising, Public Relations and Media Design is one of three separate and distinct tracks of the Media Research and Practice doctoral program within the College of Media, Communication and Information.

Strategic communication is a distinct track that is designed to provide students with rigorous training in theory and research. Students gain an understanding through coursework that explores theories and methods that shape strategic communication research. This program emphasizes how theory informs practice, critically analyzing how advertising and public relations operate in ways that can—or could—constructively contribute to the successful, ethical and resilient functioning of society.

The strategic communication and journalism studies tracks for the PhD are administered together by the departments of Advertising, Public Relations and Design and Journalism. Students in both tracks are taught by and have access to the faculties of both departments. The curriculum includes an overview of mass/public communication literature with specific modules and courses dedicated to advertising, journalism and public relations. Classes also focus on areas that straddle each industry such as social media, political communication, ethics, media organizations, health communication and video games. We welcome and appreciate both qualitative and quantitative approaches to research. Graduates pursue teaching and research positions at universities as well as work in the private sector.

Journalism Studies Track

The journalism studies PhD track focuses on exploring the intersection of journalism, journalism practice and society. Students gain a solid foundation through coursework that explores the theories and methods that shape mass communication research. The multidisciplinary program examines not only traditional journalism, but also the ever-increasing boundaries of the industry, including user-generated content, citizen journalism, the audience's impact on news production, the new technologies shaping practice, social media's role in news, new quasi-journalistic outlets, etc.

Students research institutions, content, audiences and publics—and they can approach these subjects through a multitude of methodologies and theoretical lenses: sociological, psychological, historical, cultural, political, economic, legal and more. Students are encouraged to develop their own approach (both theoretical and methodological) to the study of mass communication and journalism, all while learning and collaborating with faculty who have a diverse range of specialties. An integral part of our doctoral students' education is their participation in the department's

research and teaching missions through their assignments as research assistants, teaching assistants and graduate instructors.

The strategic communication and journalism studies tracks for the PhD are administered together by the departments of Advertising, Public Relations and Design, and Journalism. Students in both tracks are taught by and have access to the faculties of both departments. The curriculum includes an overview of mass/public communication literature with specific modules and courses dedicated to advertising, journalism and public relations. Classes also focus on areas that straddle each industry such as social media, political communication, ethics, media organizations, health communication and video games. We welcome and appreciate both qualitative and quantitative approaches to research. Graduates pursue teaching and research positions at universities as well as work in the private sector.

Media Studies Track

Drawing largely from contemporary cultural and critical theory, the media studies track focuses on interactions among the major components of modern communication—media institutions, their contents and messages, and their audiences—as a process by which cultural meaning is generated. It examines this process on an interdisciplinary basis through social, economic, political, historical, legal/policy/regulatory and international perspectives, with a strong emphasis on issues involving new communication technology and policy.

Students graduate from the program with broad knowledge of the intellectual history of media studies as an important interdisciplinary field of research—its origins; its perennial questions and controversies; its evolution in response to technological, political, economic and cultural change; the full range of methods it employs, both humanistic and social scientific—and a demonstrated capacity to design and execute original and socially significant research about media and their historical and contemporary power and importance. The program strives to produce graduates who demonstrate intellectual leadership, nationally and internationally, in the area(s) of research specialization they choose and/or pioneer, and an interest in and aptitude for generating public awareness and conversation about their scholarship. An important part of doctoral students' education is their participation in the department's research and teaching missions through their assignments as research assistants, teaching assistants and instructors.

Requirements

Application Guidelines

Applicants to the PhD program in media research and practice are expected to hold a master's degree or have completed equivalent graduate work. In exceptional cases, applicants without a master's degree may be considered for admission.

Completed domestic applications must be received by the program no later than Jan. 10 prior to the fall semester for which entrance is sought. International applications should be submitted by Dec. 1. Late applications may be considered under special circumstances.

Successful applicants typically meet or exceed the following criteria:

- Have a Graduate Record Examination (GRE) score of at least 301 (1100 pre-2011) on verbal and quantitative combined. The GRE requirement may be waived under special circumstances. International applicants must also have a TOEFL score of 625 (IBT 106).

- Have an undergraduate cumulative GPA of at least 3.2 and a cumulative GPA of at least 3.5 in previous graduate work.
- Provide three letters of recommendation, with at least two being academic references.
- Provide a 700-word statement of purpose.
- Provide a resume or CV that includes academic and employment experience.
- Provide a writing sample that exhibits the ability to undertake the conceptual and empirical studies required of doctoral students (e.g., a chapter from a master's thesis or graduate-level term paper).

Meeting these criteria does not guarantee acceptance into the program. The program accepts relatively few new doctoral students each fall; there may be more qualified applicants than there are available openings.

In the online application, select "Advertising, Public Relations and Design" as the department, select "Media Research & Practice" as the degree, and then select your chosen program track.

For review and decision purposes, students are required to upload an unofficial copy of their transcript(s) in the online application. The program requires one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed.

Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Only after a student is recommended for admission will they need to provide official transcripts.

Graduate advising is available by phone (303-492-7977), email (cmcigrad@colorado.edu) or in person (Hellems 96D).

General Requirements

Students take a minimum of 72 hours to complete their degrees, although they may take additional coursework if there is a justified need. Students are expected to complete their coursework and defend their dissertations in 4–5 years.

It is expected that students will devote their full time to the doctoral program and assistantship duties during the fall and spring semesters while enrolled in the program, unless other arrangements have been made with the department.

Program Tracks

Journalism Studies and Strategic Communication Tracks

Students are expected to complete the required courses listed below, in addition to 30 credits of electives.

Students are expected to take courses at the 6000 level or above. There are some exceptions to this in which doctoral students may receive permission to take 5000-level courses.

Students may take a maximum of two independent study courses in their course of study, either inside APRD and JRNL or outside of those home departments. Generally, these will be taken no earlier than the third semester of the program.

Electives		
Three additional graduate research methods courses (taken inside or outside the departments).		9
A minimum of 18 hours of coursework selected on the basis of the student's area(s) of research interest (taken inside or outside the departments).		18
Total Credit Hours		76

Media Studies Track

Students may take up to 15 credit hours of coursework outside the Department of Media Studies, through a required outside emphasis (9 hours), which complements the student's plan of study, and through advanced methods in media research and practice (6 hours), which may include relevant courses offered either inside or outside of the department.

In general, courses in the media studies track emphasize the following cross-cutting themes that are treated throughout the curriculum:

- sophistication in the treatment of theoretical issues
- rigor and high ethical standards in the collection, analysis and presentation of research
- thorough knowledge of the historical context of media institutions and practices
- sustained focus on issues of social and cultural diversity (race, ethnicity, gender, class, sexuality), and on issues arising due to the increase in transnational media and information flows and influences

Code	Title	Credit Hours

Advanced research methods		3
One additional graduate research methods course or one media practice course		3

Inside emphasis (4-5 Media Studies courses)	12-15
Outside emphasis (3-4 courses in other units)	12-9
Total Credit Hours	72

Comprehensive Examinations

Each doctoral student will be required to pass comprehensive examinations, consisting of four questions, which are generally administered after the last semester in which the student takes coursework. The examinations are individually tailored for each student and comprise both written and oral examinations.

Dissertation

A minimum of 30 hours of dissertation credit, JRNL 8991/MDST 8991, must be taken. Various restrictions apply to these hours, including:

- No more than 10 dissertation credit hours may be taken in any one semester
- No more than 10 dissertation credit hours may be taken prior to the semester in which comprehensive examinations are taken
- No more than 10 dissertation credit hours may be taken in the semester in which comprehensive examinations are taken
- After passing comprehensive examinations, student must enroll for at least 5 dissertation credit hours (full time) or 3 dissertation credit hours (part time) each semester until graduation

Typically students enroll for 10 dissertation hours in the semester in which they are taking comprehensive examinations and 10 dissertation hours each in the following fall and spring terms. Students must be aware of Graduate School rules (<http://www.colorado.edu/GraduateSchool/policies/>) regarding registration for dissertation hours.

Time Limit

Students are expected to complete the program and defend the dissertation in four years.

Media Studies

Contemporary media practitioners, both professional and amateur, influence the values and behaviors of national and global populations, challenging and shaping the authority, legitimacy and control exercised by governments and other powerful social institutions. Because of this, media and cultural studies are central to research about the complex intersections of culture, politics and economics from the local to the global levels. Appropriately, the Department of Media Studies emphasizes the history, nature and impact of mediated sounds, images and texts from a wide range of inter- and cross-disciplinary perspectives.

The Department of Media Studies examines ways of thinking about and conducting research into the intersection of media, communication and cultural practices in both historical and contemporary perspectives. Encompassing humanistic, social scientific and artistic approaches to the study of media and culture, and interdisciplinary in its theoretical and methodological approaches, the degree spans traditional boundaries between theory and practice. It fosters media "literacy" in the broadest sense by providing students with critical skills to analyze contemporary media and culture, along with technical, aesthetic and intellectual principles that facilitate strong media practices.

Course code for this program is MDRP and MDST.

Master's Degree

- Media and Public Engagement - Master of Arts (MA) (p. 1572)

Doctoral Degree

- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1567)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MDST 5001 (3) Connected Media Practices

Provides a crucial frame through which students understand the evolution of film, television and gaming in the digital era. Explores an impending revolution in how screen media are created, circulated and consumed. Relates to a larger trend across the media industries to integrate digital technology and socially networked communication with traditional screen media practices.

Requisites: Restricted to graduate students only.

MDST 5002 (3) Media Activism and Public Engagement

Explores politics of media activism. Relies on survey of existing theory and scholarship on media activism and close analyses of activist practices within both old and new media and on local, national and global scale. Special attention paid to questions of relativity and efficacy and value of media activism as both aesthetic and political activity.

Requisites: Requires a prerequisite course of MDST 5001 (minimum grade C-). Restricted to graduate students only.

MDST 5003 (3) Digital Media Production and Design

Introduces techniques, technologies of online development and online media presentation. Contextualizes the technical and social implications of the Internet through historical and critical perspectives. Students engage in online media projects designed to emphasize the affordances, conventions and usability considerations of effective online communication.

Equivalent - Duplicate Degree Credit Not Granted: MDST 4003

Requisites: Restricted to students with 55 or more hours.

Grading Basis: Letter Grade

MDST 5211 (3) Asian Media and Culture

Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world.

Equivalent - Duplicate Degree Credit Not Granted: MDST 4211

Requisites: Restricted to graduate students only.

MDST 5311 (3) Mass Communication Criticism

Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism. Texts from contemporary print and broadcast media.

Equivalent - Duplicate Degree Credit Not Granted: MDST 4311

MDST 5331 (3) Gender, Race, Class, and Sexuality in Popular Culture

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 5841 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MDST 5851 (1-6) Graduate Professional Project

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MDST 5871 (3) Special Topics

Special topics in Media Studies.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MDST 5931 (1-3) Internship

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

MDST 6051 (3) Media Theories

Studies theories and perspectives of mass and networked communication and explores the role of media in society.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6061 (3) Media Research

Introduces concepts, theoretical approaches and research methods of media research. Students apply these frameworks in research on mediated communication. Covers qualitative and quantitative methods of gathering and analyzing data.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6071 (3) Critical Theories of Media and Culture

Introduces students to critical theories and analysis of media and popular culture. Examines major theoretical traditions and/or theorists that significantly inform media studies (e.g., culturalism, structuralism, Marxism, critical theory, feminism, psychoanalysis, post-structuralism) and applies these to media analysis and criticism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6201 (3) Global Media and Culture

Explores the historical, cultural, social, political and economic dimensions of media systems in various parts of the world and their relationship with technological and cultural processes. Aims to provide a critical overview of the profound changes in media and culture in today's digitally connected/disconnected world. Formerly MDST 6201.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6211 (3) Communication and International Development

Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6301 (3) Communication, Media, and Concepts of the Public

Introduces students to historical and contemporary uses of fundamental concepts in research and theory about media institutions, particularly public, community, mass, publicity, public space, public opinion, public interest, and the public sphere.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6311 (3) Power, Politics and Mediated Culture

Examines various literatures that consider the role of power in shaping social orders and the social beings that constitute that order and the place of media in both processes.

Requisites: Restricted to graduate students only.

MDST 6341 (3) Children, Youth and the Media

Examines the concepts of children and childhood from the historical, social, cultural, economic and political perspectives, this course explores the interaction between mass media and the socialization and cultivation process of children and youth. Multiple theoretical traditions are used as a framework to study a variety of issues related to children and the media.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6351 (3) Media, Culture & Food Politics

Stresses intersections among media industries, food industries, and politics, with an emphasis on how public knowledge and activism about food relate to questions of a sustainable environment, human health and safety, and social justice for food producers and consumers. Examines a wide range of political discourses about food, the politics of food labeling, the globalization and hybridization of food, public policies governing food, food activism, the biopolitics of food, and food-related manifestations of cultural capital. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

MDST 6551 (3) Media and Communication Policy

Surveys historical and contemporary developments in media and communications policy, emphasizing social and cultural dimensions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6552 (3) Media and Public Scholarship

Historicizes the role of the public intellectual through readings and discussions of biographies of selected scholars and accounts of historical changes in the habitats & the spaces of politics & in which particular types of public engagement by intellectuals occurred in the past. The course will include a &media practicum& to enable students to understand what it means to become a scholar who has a public voice through direct and indirect engagement in a media-saturated age. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

MDST 6671 (3) Media, Myth, and Ritual

Explores cultural practices of media audiences. Addresses theoretical and methodological implications of studying audiences from a culturalist perspective, with particular focus on media audience practices. Students engage in field research projects related to course content. Formerly MDST 6671.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6711 (3) Media and Popular Culture

Introduces fundamental methods for understanding the construction of meaning in film, television, popular music and advertising. Traces the study of popular culture through film theory, mass media analysis and cultural studies. Surveys various strands of research that seek to understand popular culture and its effects.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6771 (3) History of Media and Communication

Examines history of communication, including the means (technologies) of communication, social practices (institutional, collective, individual) that intersect with the study of communication and media, and cultural forms (texts, products). Situates the study of media, technology, and culture within historical contexts, comparative historical research, media archaeology, genealogy and media history.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6781 (3) Economic and Political Aspects of Media

Examines economic problems and political issues relevant to media institutions and industries.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6871 (1-3) Special Topics

Special topics. May be repeated up to 15 total credit hours

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MDST 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

MDST 6951 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7001 (1) PhD Colloquium Series

Introduce the new doctoral students to the Media Research and Practice program and its faculty members and their research. The colloquium series will also include workshops on program planning, publishing, attending conferences, writing a dissertation, preparing and presenting a job talk, etc.

Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

MDST 7011 (3) Proseminar in Media Communication Theory 1

Introduces the principal concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Formerly MDST 7011.

Requisites: Restricted to doctoral students in Media Studies (MDST), Journalism (JRNL) or Advertising, PR and Media Design (APRD) only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7021 (3) Proseminar in Media and Communication Theory 2

Continues the introduction of principle concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Formerly MDST 7021.

Requisites: Requires prerequisite course of MDRP 7011 (minimum grade C-). Restricted to doctoral students in Media Studies (MDST), Journalism (JRNL) or Advertising, PR and Media Design (APRD).

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7051 (3) Qualitative Research Methods in Media

Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7061 (3) Quantitative Research Methods in Media

Examines various methods of quantitative data gathering methods and analysis in mass media and social media contexts.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7841 (1-6) Independent Study

Independent study.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 8991 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 40.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Core Curriculum and General Electives

MDRP 7871 (3) Special Topics

Special topics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Media and Public Engagement - Master of Arts (MA)

The Master of Arts in media and public engagement (MAPE) trains critical advocates for social change. It is a two-year, interdisciplinary program that spans traditional boundaries between theory and practice, offering opportunities for critical study of the history, institutions, economics and social implications of the media, both nationally and globally. It also offers practice-based media training geared toward civic engagement and community building. In addition to completing courses in media theory and other fields of interest, students learn how to create thoughtful and engaging projects using a variety of media practices, including online platforms, multimedia documentary, social media campaigns and other kinds of tools both longstanding and cutting-edge.

During their two years in the program, MAPE students will collaborate with faculty, community leaders, nonprofit organizations and companies to devise innovative interventions for social change. They may also choose to complete one of several subject-area certificate programs available through the university.

The MAPE prepares students for entering and transforming a variety of professions, both at the national and international level, in government, media, public relations, cultural organizations and the nonprofit sector.

Requirements

Application Guidelines

Students are admitted to the program based on the quality of their proposed project and their commitment to social change and the public good. Applicants to the MA in media and public engagement must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university.
- Have an undergraduate grade point average of at least 2.75.
- Have a GRE verbal score of at least 153 (62%). International applicants must also have a TOEFL score of at least 600 (IBT 100).
- Provide three letters of recommendation.
- Provide a 500-word statement of purpose.
- Provide a resume.

Graduate advising is available by phone (303-492-7977), email (cmcigrad@colorado.edu) or in person (Hellems 96D).

Program Requirements

Students in the MAPE program take a total of 30 credit hours, comprised of:

- 24 hours of coursework selected from a range of courses offered by the Media Studies department and/or courses crosslisted with other departments inside and outside the College of Media, Communication and Information (CMCI)
- 6 hours for a thesis project

¹ May consist of an internship or practicum.

² Students may take a wide range of electives, including graduate seminars in media studies, hands-on courses throughout CMCI and topical offerings throughout the university.

Music

The CU Boulder College of Music inspires artistry and discovery, together.

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers seven

undergraduate and graduate degrees in 24 fields of study, along with an array of interdisciplinary opportunities, including certificates in music technology, entrepreneurship and arts administration.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

Entrepreneurship Center

The Entrepreneurship Center for Music (ECM) is a national leader in professional development for musicians. The ECM equips today's music students with the skills and tools they need to create sustainable careers in the arts. ECM students are encouraged to develop entrepreneurial skills to explore the vast opportunities inherent in a changing marketplace, and to develop plans to implement career-enhancing ventures across the artistic spectrum. Offerings include courses for credit, an undergraduate Certificate in Music Entrepreneurship, workshops and internships with a wide range of arts organizations and businesses nationwide.

Facilities

The College of Music has several beautiful performance halls, including the 2,000-seat Macky Auditorium, the 500-seat Grusin Music Hall, the 270-seat Music Theatre and the 111-seat Recital Hall. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas, seminar facilities and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky Auditorium.

The college's outstanding Howard B. Waltz Music Library is considered to be among the nation's most comprehensive. The library contains over 150,000 volumes, scores, recordings and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching.

The college also features extensive facilities for music technology and electronic music study. The Computer-Assisted Music Laboratories (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard and a computer. The CRUNCH Lab is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano Laboratory is equipped with 12 digital pianos.

Performances

Each year the College of Music presents over 400 concerts by students, faculty and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public.

Other music programs presented by CU Presents include:

- Artist Series
- Eklund Opera Program
- Takács Quartet Series
- Holiday Festival

For a schedule of all College of Music performances, call 303-492-8008 or visit the College of Music (<http://www.colorado.edu/music/>) website.

Student Organizations

The student body of the College of Music has its own government, represented by the College of Music Student Government. Honorary music fraternities are Sigma Alpha Iota, Mu Phi Epsilon and Kappa Kappa Psi. Pi Kappa Lambda, a national music honor society, and the Music Teachers National Association both have active chapters within the College of Music. Music education majors are eligible for membership in student chapters of the National Association for Music Educators, the American Choral Directors Association and the American String Teachers Association. Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Policies & Requirements

Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music.

Graduate students must enroll as full-time students, maintaining a 3.00 GPA, and make adequate progress toward their degrees. The college offers approximately 100 graduate assistantships as well as graduate fellowships and a variety of endowed scholarships for graduate students.

Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery, or falsification of official records and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the

proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Students are expected to be acquainted with and abide by provisions of the University of Colorado Boulder Honor Code.

Scholastic Requirements

A student is required to maintain at least a B (3.0) grade point average in all work attempted while enrolled in the Graduate School, and a student must have at least an overall 3.0 average to receive a graduate degree. Courses in which grades below C (2.0) are received are not accepted for master's degree programs or for the removal of academic deficiencies.

Students whose cumulative grade point average falls below 3.0 at any time during their graduate career will be placed on probation by the Graduate School.

Music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory progress in their major (as determined by the faculty), demonstrate satisfactory proficiency in jury exams and auditions, enroll in ensemble and maintain a minimum cumulative GPA of 3.00. Students who have a cumulative GPA below 3.00 will be placed on scholarship probation for a maximum of two semesters (consecutive or cumulative), provided the GPA improves each semester. Students on scholarship probation who do not earn a cumulative GPA of 3.00 or higher by the end of the probationary period will have their scholarships revoked.

Admission Requirements

Admission requirements for specific degree programs that supplement the Graduate School requirements are discussed in the degree program descriptions that follow. Students are urged to take the general (verbal, quantitative, analytical) portions of the Graduate Record Examination (GRE). GRE scores are required as part of the application to the PhD programs and MM in music theory, and they are recommended for the DMA programs and Master of Music Education degree.

Preliminary Examinations

Just before the beginning of their first semester of work toward a master's or doctoral degree, students are given preliminary exams covering the major field, several areas of music theory and music history. Specific requirements vary with the student's degree and program. Students pursuing the master's and doctoral degrees in voice also must pass proficiency requirements in piano and diction (English, French, German and Italian).

Results from the major-field examination serve as one basis for recommending specific coursework in the program. The major-field examination in musicology includes essay questions, score analysis and identification of terms. Conducting majors should be knowledgeable in areas of repertoire, score analysis and conducting techniques. Performance majors are examined in the areas of technique, repertoire, stylistically informed performance and pedagogy. Students enrolled in the master's degree in Jazz Performance and Pedagogy must demonstrate knowledge of jazz theory and history and jazz keyboard proficiency.

College Teaching and Professional Development

Most graduate degrees in music require coursework in music pedagogy. Students who plan to teach at the college level are urged to be involved in the many offerings of CU Boulder's renowned Graduate Teacher Program. Workshops, observations, consultations and other professional

development opportunities are scheduled throughout the academic year. These include campus-level offerings as posted at the Graduate Teacher Program (<http://www.colorado.edu/gtp/>) website, as well as music-specific events organized by the Lead TAs in the College of Music. The GTP offers three certificates that graduate students may pursue during their studies at CU Boulder: the Certificate in College Teaching (CCT), Professional Development Certificate for Preparing Future Faculty (PDC:PFF) (<http://www.colorado.edu/gtp/certificates/professional-development-certificate-preparing-future-faculty/>), and Professional Development Certificate for Preparing Future Professionals in Business, Government, Industry and the Arts (PDC:BGIA). For details, see Graduate Teacher Program Certificates (<http://www.colorado.edu/gtp/certificates/>).

Financial Aid

In addition to the opportunities for financial aid described in the Graduate School section, the College of Music grants merit aid in the form of teaching assistantships and graduate part-time instructorships (GPTI) to numerous graduate students each year. The assistantships and instructorships, which are usually one-quarter time (25 percent), include both a stipend and the waiver of 5 or 6 credit hours of tuition each semester. There are also scholarships offered by the individual departments and external fellowships awarded through the Graduate School. All prospective students who have completed their applications by December 1 will automatically be considered for available scholarships and assistantships.

English Language Requirements

A student who is noticeably deficient in the use of the English language may not obtain an advanced degree from the University of Colorado. Satisfaction of this requirement depends not so much upon ability to pass formal tests, although these may be required, as upon the consistent use of good English in all oral and written work.

Therefore, the TOEFL exam is required of ALL international graduate applicants whose native language is not English. *This includes applicants who have already completed a degree or studied in an English-speaking country for any length of time.* An acceptable score must be reported directly to the CU Boulder Office of Admissions by the December 1 deadline in order for the applicant to be considered.

The College of Music has an additional requirement that all admitted students whose language is not English are required to take an English placement exam with the English as a Second Language (ESL) department upon arrival on campus and to abide by the recommendations made.

Graduate Auditions

Auditions are required for all performance and performance/pedagogy programs. A personal audition is strongly preferred, but students may be accepted into most programs by submitting a recorded audition. Note that some studios require a preliminary, recorded audition before a student may be invited to schedule an audition on campus. For specific information and audition dates, refer to the Prospective Graduate Students Auditions (<http://www.colorado.edu/music/admissions/prospective-graduate-students/auditions/>) website or contact the office of the associate dean for graduate studies at 303-492-2207 or gradmusic@colorado.edu.

Programs of Study

Music

The College of Music's renowned faculty will guide you through the Master of Music, Doctor of Musical Arts, Doctor of Philosophy in Music, or Artist Diploma programs, while a variety of ensembles are available for honing performance skills.

Visit the College of Music (<http://www.colorado.edu/music/>) website for more information about the school, academics, ensembles and more.

Master's Degree

- Music - Master of Music (MMus) (p. 1586)

Doctoral Degree

- Music - Doctor of Philosophy (PhD) (p. 1592)

Artist Diplomas

- Chamber Music Performance (p. 1593)
- Opera and Solo Vocal Performance (p. 1593)
- Orchestral Performance (p. 1594)
- Solo Instrumental Performance (p. 1594)
- String Quartet Performance (p. 1595)
- Vocal Coaching (p. 1595)

Certificates

- Arts Administration - Graduate Certificate (p. 1596)
- Music Theory - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/music/programs-study/music/music-theory-graduate-certificate/>)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Aaholm, Philip
Professor Emeritus

Arnett, Mark
Instructor; DMA, University of Colorado Boulder

Austin, James R. (https://experts.colorado.edu/display/fisid_103455/)
Professor; PhD, University of Iowa

Barnett, Michael T. (https://experts.colorado.edu/display/fisid_116467/)
Instructor; DMA, University of Colorado Boulder

Berg, Margaret H. (https://experts.colorado.edu/display/fisid_118371/)
Professor, Associate Dean; PhD, Northwestern University

Bernstein, Giora
Professor Emeritus

Bird-Arvidsson, Jennifer (https://experts.colorado.edu/display/fisid_147651/)
Associate Professor; MM, University of Michigan Ann Arbor

Brody, James M. (https://experts.colorado.edu/display/fisid_101948/)
Associate Professor; MM, Indiana University Bloomington

Bruns, Steven M. (https://experts.colorado.edu/display/fisid_103483/)
Associate Professor; PhD, University of Wisconsin–Madison

Caballero, Carlo (https://experts.colorado.edu/display/fisid_111681/)
Associate Professor, Faculty Fellow; PhD, University of Pennsylvania

Carthy, Nicholas R. (https://experts.colorado.edu/display/fisid_135356/)
Associate Professor; BA, Guildhall School of Music, London (England)

Chang, Philip C. (https://experts.colorado.edu/display/fisid_143541/)
Senior Instructor; PhD, University of Rochester

Chellis, Matthew Wren (https://experts.colorado.edu/display/fisid_154415/)
Associate Professor; MM, Manhattan School of Music

Conlon, Joan Catoni
Professor Emerita

Cooper, Peter W. (https://experts.colorado.edu/display/fisid_134522/)
Teaching Professor; BM, Northwestern University

Cooperstock, Andrew B. (https://experts.colorado.edu/display/fisid_115393/)
Professor; DMA, Peabody Institute of Johns Hopkins University

Cremaschi, Alejandro M. (https://experts.colorado.edu/display/fisid_134168/)
Professor; DMA, University of Minnesota Twin Cities

Davis, John S. (https://experts.colorado.edu/display/fisid_115443/)
Professor, Senior Associate Dean; DMA, University of Northern Colorado

Dockendorf, Matthew Paul (https://experts.colorado.edu/display/fisid_154511/)
Assistant Professor, Faculty Director; DMA, Michigan State University

Drumheller, John E. (https://experts.colorado.edu/display/fisid_103707/)
Senior Instructor; DMA, University of Colorado Boulder

Dunn, James M. (https://experts.colorado.edu/display/fisid_140593/)
Associate Professor; MM, Arizona State University

Dusinberre, Edward (https://experts.colorado.edu/display/fisid_101358/)
Faculty Fellow, Artist in Residence; Diploma, The Juilliard School

Eakin, Charles
Professor Emeritus

Eckert, Erika L. (https://experts.colorado.edu/display/fisid_101844/)
Associate Professor; BM, University of Rochester

Ellsworth, Oliver
Professor Emeritus

Erhard, Paul M. (https://experts.colorado.edu/display/fisid_100493/)
Professor; DMA, The Juilliard School

Farr, Elizabeth G.
Professor Emerita

Fejer, Andras (https://experts.colorado.edu/display/fisid_103923/)
Faculty Fellow, Artist in Residence; Diploma, Franz Liszt Academy of Music

Fink, Robert
Professor Emeritus

Galm, John
Professor Emeritus

Garland, Andrew B (https://experts.colorado.edu/display/fisid_159725/)
Assistant Professor; MM, University of Cincinnati

Gentry, Gregory R. (https://experts.colorado.edu/display/fisid_151707/)
Associate Professor, Faculty Director, Faculty Fellow; DMA, University of Missouri–Kansas City

Goode, Bradley M. (https://experts.colorado.edu/display/fisid_134686/)
Associate Professor; MM, DePaul University

Graham, Larry
Professor Emeritus

Gunther, John G. (https://experts.colorado.edu/display/fisid_141165/)
Professor, Faculty Director; PhD, New York University

Hata, Kuniaki
Professor Emeritus

Hayes, Deborah
Professor Emerita

Hayghe, Jennifer C. (https://experts.colorado.edu/display/fisid_155969/)
Associate Professor; DMA, The Juilliard School

Heil, Leila (https://experts.colorado.edu/display/fisid_149780/)
Associate Professor; PhD, University of Colorado Boulder

Hill, Robert Stephen (https://experts.colorado.edu/display/fisid_163943/)
Professor, Endowed Chair; PhD, Harvard University

Holman-Johnson, Leigh (https://experts.colorado.edu/display/fisid_141980/)
Associate Professor; DMA, University of Colorado Boulder

Ishikawa, Yoshiyuki (https://experts.colorado.edu/display/fisid_102125/)
Professor; DMA, University of Michigan Ann Arbor

Jackson, Dennis
Professor Emeritus

Jenkins, Jeff
Instructor; Studied, University of North Texas

Jennings, Christina A. (https://experts.colorado.edu/display/fisid_143545/)
Professor; MM, The Juilliard School

Kearns, William
Professor Emeritus

Keister, Jay (https://experts.colorado.edu/display/fisid_115734/)
Associate Professor; PhD, University of California, Los Angeles

Kim, Suyeon (https://experts.colorado.edu/display/fisid_153470/)
Instructor; DMA, University of Texas at Austin

Korevaar, David J. (https://experts.colorado.edu/display/fisid_118374/)
Distinguished Professor, Faculty Fellow; DMA, The Juilliard School

Lehnert, Doris Pridonoff
Professor Emerita

Lehnert, Oswald
Professor Emeritus

Leong, Daphne (https://experts.colorado.edu/display/fisid_115747/)
Associate Professor; PhD, University of Rochester

Lewis, Gary J. (https://experts.colorado.edu/display/fisid_145854/)
Professor, Endowed Chair; MM, Texas Tech University

Lin, Hsiao-Ling (https://experts.colorado.edu/display/fisid_149958/)
Instructor; DMA, Northwestern University

Malin, Jonathan (https://experts.colorado.edu/display/fisid_151714/)
Associate Professor; PhD, University of Chicago

Maloy, Rebecca (https://experts.colorado.edu/display/fisid_125582/)
Professor, Faculty Fellow; PhD, University of Cincinnati

Mason, Patrick C. (https://experts.colorado.edu/display/fisid_101840/)
Professor Emeritus

McCarthy, Kevin
Professor Emeritus

McDonald, Margaret M. (https://experts.colorado.edu/display/fisid_134703/)
Associate Professor; DMA, University of California, Santa Barbara

McKee, Paul (https://experts.colorado.edu/display/fisid_154465/)
Associate Professor; MM, University of Texas at Austin

McKinney, Donald J. (https://experts.colorado.edu/display/fisid_152974/)
Associate Professor, Faculty Director; DMA, University of Michigan Ann Arbor

McMurray, Allan
Professor Emeritus

Miranda, Martina L. (https://experts.colorado.edu/display/fisid_140091/)
Associate Professor; DMA, Arizona State University; PhD, Arizona State University

Moteki, Mutsumi (https://experts.colorado.edu/display/fisid_100992/)
Professor, Faculty Fellow; DMA, University of Michigan Ann Arbor

Myer, Tom R. (https://experts.colorado.edu/display/fisid_100922/)
Associate Professor; MM, East Texas State University

Nguyen, Alexandra (https://experts.colorado.edu/display/fisid_145847/)
Associate Professor; DMA, University of Rochester

Nims, Abigail Andrews (https://experts.colorado.edu/display/fisid_152977/)
Associate Professor; MM, Westminster Choir College

Nytch, Jeffrey C. (https://experts.colorado.edu/display/fisid_147341/)
Associate Professor, Faculty Director; DMA, Rice University

O'Neill, Richard
Artist in Residence, Faculty Fellow

Okigbo, Austin Chinagorom (https://experts.colorado.edu/display/fisid_151507/)

Associate Professor; PhD, Indiana University Bloomington

Pann, Carter N. (https://experts.colorado.edu/display/fisid_141461/)
Associate Professor, Faculty Fellow; DMA, University of Michigan Ann Arbor

Peterson, Patti H.
Professor Emerita

Pinkow, David
Professor Emeritus

Reger, Jeremy J. (https://experts.colorado.edu/display/fisid_156224/)
Assistant Professor, Faculty Director; DMA, University of Michigan Ann Arbor

Requiro, David (https://experts.colorado.edu/display/fisid_155785/)
Assistant Professor; MM, University of Michigan Ann Arbor

Rhodes, Harumi B. (https://experts.colorado.edu/display/fisid_155971/)
Associate Professor, Faculty Fellow, Artist in Residence; MM, New England Conservatory of Music

Riis, Thomas L.
Professor Emeritus

Roeder, Matthew J. (https://experts.colorado.edu/display/fisid_120180/)
Associate Professor, Associate Dean; DMA, University of Colorado Boulder

Romero, Brenda M. (https://experts.colorado.edu/display/fisid_106117/)
Professor Emerita

Sable, Barbara Kinsey
Professor Emeritus

Sampsel, Laurie (https://experts.colorado.edu/display/fisid_101802/)
Professor; PhD, University of Pittsburgh

Sawchuk, Terry M.
Associate Professor Emeritus; MM, University of Michigan Ann Arbor

Schranz, Karoly (https://experts.colorado.edu/display/fisid_103924/)
Senior Instructor; Diploma, Franz Liszt Academy of Music

Schut, Joel (https://experts.colorado.edu/display/fisid_165312/)
Instructor; DMA, Michigan State University

Scott, F. Wayne
Professor Emeritus

Seesholtz, John (https://experts.colorado.edu/display/fisid_163908/)
Associate Professor, Faculty Director; DMA, University of North Texas

Shay, Robert S. (https://experts.colorado.edu/display/fisid_154671/)
Professor; PhD, University of North Carolina Chapel Hill

Sher, Daniel
Professor; EdD, Columbia University

Silver, Daniel S. (https://experts.colorado.edu/display/fisid_115564/)
Professor; MM, University of Michigan Ann Arbor

Sim, Claude (https://experts.colorado.edu/display/fisid_164269/)
Assistant Professor; BM, Oberlin Conservatory

Smith, Jeremy L. (https://experts.colorado.edu/display/fisid_118265/)
Professor; PhD, University of California, Santa Barbara

Socolofsky, Annika
Assistant Professor; PhD, Princeton University

Spera, Nicolo Ruggero Ferruccio (https://experts.colorado.edu/display/fisid_148406/)
Assistant Professor; DMA, University of Colorado Boulder

Spillman, Robert
Professor Emeritus

Stanley, William J. (https://experts.colorado.edu/display/fisid_103616/)
Associate Professor; DMA, University of Illinois at Urbana–Champaign

Steinmetz, Branden (https://experts.colorado.edu/display/fisid_165415/)
Instructor; DMA, Michigan State University

Swadener, Marc
Professor Emeritus

Swanson, Elizabeth (https://experts.colorado.edu/display/fisid_159726/)
Assistant Professor, Faculty Director; DMA, Northwestern University

Teitelbaum, Benjamin Raphael (https://experts.colorado.edu/display/fisid_151338/)
Assistant Professor; PhD, Brown University

Tetreault, Michael
Instructor; MM, Royal Academy of Music

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/)
Associate Professor; PhD, University of California, San Diego

Thomas, Susan (https://experts.colorado.edu/display/fisid_163986/)
Professor, Faculty Director; PhD, Brandeis University

Thornton, Michael Robert (https://experts.colorado.edu/display/fisid_116318/)
Professor; BM, Temple University

Walter, Douglas W. (https://experts.colorado.edu/display/fisid_101811/)

Waters, Keith John (https://experts.colorado.edu/display/fisid_107518/)
Professor; PhD, University of Rochester

Weiss, Meta (https://experts.colorado.edu/display/fisid_164484/)
Senior Instructor; DMA, The Juilliard School

Wetherbee, Charles Tyler (https://experts.colorado.edu/display/fisid_151515/)
Associate Professor; BM, Curtis Institute of Music

Wolzien, Charles
Professor Emeritus

Courses

MUSC 5002 (3) Proseminar in Historical Musicology

Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5011 (2) 16th Century Counterpoint

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4011

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5012 (3) African Music

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4012 and MUEL 4012

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Offered fall terms only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5026 (2) Percussion Literature

In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Offered spring semester of odd numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5036 (2) Brass Literature

Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring term.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5041 (2) Advanced Orchestration

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5061 (3) Advanced Tonal Analysis

Surveys tonal repertory and analytical techniques. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5071 (3) Post-tonal Theory and Analysis I

Focuses on theory and analysis of post-tonal literature pre-1945. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4078

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite piano majors.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5081 (3) Applications in Music Technology

Presents advanced strategies for applying computer technology in music creation. Synthesis, DSP, MIDI and audio sequencing, as well as advanced music engraving, will be explored through the use of various software platforms including Logic, Reason, MAX and Finale. Offered fall term only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5091 (3) Contemporary Theory - Jazz and Modal Music

Studies the composition and improvisation of Herbie Hancock, Wayne Shorter, Chick Corea and their contemporaries. Broadly examines modality in jazz and its similarities to music of Ravel and Debussy, as well as systems of organization in Messiaen and others. Strategies for analysis and integration of the material into a personal vocabulary as a composer and improviser are explored. Offered spring of even-numbered years.

Requisites: Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5103 (3) Teaching General Music

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Offered fall of odd-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5112 (3) Proseminar in Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5121 (3) Advanced Topics in Music Technology

Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 5081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5136 (2) Advanced Conducting

Offers advanced work in conducting.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5142 (3) American Indian Music

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4142

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5143 (2) Topics in Choral Music Education

Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4143

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5151 (3) Topics in Music Analysis

Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies and produce original analyses. Student must have passed graduate preliminary exams or completed remediation before enrolling in this course.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 5061 or MUSC 5071 as appropriate to the topic, or instructor consent required.

Additional Information: Departmental Category: Theory and Composition

MUSC 5156 (2) Symposium in Choral Music

Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5168 (3) World Music Theories

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4168

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5176 (2) Conducting 3

This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4176

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Music Education (MMED) graduate students only.

Grading Basis: Letter Grade

MUSC 5183 (2) Research in Music Teaching

Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Offered fall of odd-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5203 (2) Topics in Music Education

Provides an in-depth examination of contemporary topics in music education. Students implement and design relevant projects.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5215 (1-2) Studies in Piano Teaching

Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisites: MUSC 5305 and MUSC 5315.

Additional Information: Departmental Category: Keyboard

MUSC 5246 (3) Jazz Improvisation and Analysis

Application of performance skills for the advanced improviser through specific harmonic, melodic and rhythmic techniques. Also includes analysis of transcriptions and varied harmonic contexts as well as a focus on the development of repertoire. Offered fall semester of odd-numbered years. Requires prerequisite course or instructor consent.

Requisites: Requires prerequisite course of MUSC 3071 (minimum grade D-). Restricted to Music (MUSC) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5256 (3) Jazz Studies Administration and Pedagogy

Surveys approaches, techniques, philosophies and materials available for teaching jazz at both pre-college and collegiate level. Subject areas covered include improvisation, composition and arranging, studio teaching and directing ensembles. Studies the organization and administration of collegiate jazz programs. Topics include curriculum, program philosophy, teaching techniques, funding, teacher training and evaluation. Offered fall terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 3253.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5273 (2) Comprehensive String Pedagogy

Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Offered fall of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5285 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the 16th century to the present.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4285

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5305 (2) Piano Pedagogy Group Techniques

Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5313 (3) Teaching Choral Music

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4313

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5315 (2) Piano Pedagogy: Intermediate Literature

Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5325 (2) Keyboard Literature 1

Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5335 (2) Keyboard Literature 2

Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring terms of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5336 (2) Brass Pedagogy

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring term.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4336

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5345 (2) Research: Piano Literature and Pedagogy

Looks at individual or group research related to piano pedagogy or literature for piano.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5346 (3) Woodwind Pedagogy

Provides the knowledge and skills to teach woodwind instruments in both individual studio and collegiate class settings. Considers pedagogical techniques for all levels of instruction. Offered fall terms of odd-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4346

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5356 (2) Jazz Studies Practicum

Implements independent, project-based studies for further developing knowledge and experience in jazz pedagogy, performance and composition. Student is assessed and guided by faculty to develop specific skills needed toward becoming a more effective jazz educator. Offered spring of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 5256.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5365 (2) Advanced Accompanying

An in-depth study of collaborative repertoire in individually assigned projects, coached by collaborative piano faculty and others.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5375 (2) Opera Coaching for Pianists

Teaches skills for opera coaches and rehearsal pianists.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5405 (2) Basso-Continuo Accompaniment

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4405

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion

Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered fall terms of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5435 (2) Collaborative Literature for Piano with Strings

Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered spring terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5443 (3) Teaching Instrumental Music

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4443

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5444 (2) Vocal Pedagogy

In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5446 (1) Supervised Teaching Practicum

Designed to provide supervised teaching experience that includes feedback on weekly teaching; weekly and longer-term planning; and reflection on the impact of teacher characteristics and actions on student development.

Requisites: Requires prerequisite course of MUSC 5273 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Grading Basis: Letter Grade

MUSC 5454 (2) Repertory for Young Voices

Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5464 (2) French Song Literature

Provides an extensive analytical and historical discussion of French song literature styles, from the 12th century to the present.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5484 (2) Graduate Seminar in Vocal Pedagogy

A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique.

Requisites: Requires prerequisite course of MUSC 5444 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5564 (2) German Song Literature

Provides an extensive analytical and historical discussion of German song literature styles, from the 18th century to the present. Offered fall terms only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5583 (2) Inclusive Music Classroom

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4583

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5608 (1) Graduate Studies in the Alexander Technique

Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception, physical coordination and mind-body awareness. Applies these contexts to specific musical activities. Analysis and research regarding Alexander's principles.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2608

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5642 (3) Jazz History and Literature

Studies musical trends and cultural forces influencing jazz, with analysis of improvisational styles, melodic and motivic variations, transcriptions and orchestrations from significant periods in its history. Offered spring terms only.

Requisites: Requires prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5666 (2) Chamber Music Literature: Woodwinds

Provides a stylistic-historical survey in various genres from Baroque era to present. Offered fall terms of even numbered years.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5708 (2) Introduction to Music Bibliography and Research

Explores basic informational sources about music and musicians; a study of citation formats, research methodologies and writing techniques employed in music research papers, theses and dissertations. Intended to increase students' information fluency. Required in all master's degree programs.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5712 (3) Renaissance Music

Provides a repertory and analysis of polyphonic music, 1400-1600.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4712

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5742 (3) Performance Practice of Early Music

Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4752

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5762 (3-4) History of Choral Literature

Provides a seminar in analysis of musical style and history of choral repertory. Those wishing review of literature and repertory may enroll for 4 credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5772 (3) History of Opera

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4772

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5802 (3) Studies in 20th Century Music

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4802

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5808 (1) Advanced Studies in the Alexander Technique

Continues investigation of the benefits of Alexander's principles regarding mind-body awareness begun in MUSC 5608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4608

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 5608 (minimum grade C-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5822 (3) Ancient and Medieval Music

Surveys sources from the ancient Greeks to the early Christian era and music from the 8th to the 14th century.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5832 (3) Studies in American Music

Offers intensified work in folk, popular, and art music of the United States.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5842 (3) Aesthetics of Music

Surveys various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics and historians.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4852

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5872 (3) Late 18th and 19th Century Music

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4872

Repeatable: Repeatable for up to 12.00 total credit hours.

Recommended: Prerequisite or corequisite MUSC 3812.

Additional Information: Departmental Category: Musicology

MUSC 5882 (3) Studies in 18th and 19th Century Music

Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5892 (3) Latin American Music

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4892

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4908

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5918 (2) Building Your Music Career

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2918

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5938 (3) Management and Leadership in the Arts

Presents leadership theories and management principles and their application to arts organizations. Examines concepts and approaches for leaders of small, medium and large arts organizations in both the for-profit and nonprofit sectors, including human resource management and effective communication.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Letter Grade

MUSC 5948 (3) Sustainable Arts Organizations: Forecasting and Fundraising

Equips students to create comprehensive fundraising plans rooted in strategic business planning for arts organizations, which depend on contributed income for sustainability. Students will learn the basics of planning, budgeting and forecasting, along with proven, effective fundraising strategies and techniques. Includes case studies and guest speakers with extensive professional expertise in the field.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Letter Grade

MUSC 5958 (2) Community Performances

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4958

Requisites: Requires prerequisite course of MUSC 5918 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5978 (3) Introduction to Arts Administration

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4978

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4988

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 5918.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 6041 (3) Advanced Orchestration

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

Requisites: Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 6051 (3) Pedagogy of Music Theory

Explores methods, materials, practical techniques for teaching undergraduate music theory, aural skills and analysis. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course. Offered spring of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 6113 (2) Foundations of Music Education

Surveys historical and philosophical bases of contemporary music education. Offered fall of even-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6133 (2) Comprehensive Musicianship through Performance

Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Offered spring terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6193 (1-3) Selected Studies in Music Education

Instructor consent required.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Music (MUSD) or Music Education (MMED-MMUE) students only.

Additional Information: Departmental Category: Music Education

MUSC 6203 (2) Psychology of Music Learning

Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Offered spring terms only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6213 (2) Assessment of Music Learning

Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Offered on a rotating basis during summer session.

Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6223 (2) Sociology of Music Education

Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Offered fall of even-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Recommended: Prerequisite MUSC 6113.

Additional Information: Departmental Category: Music Education

MUSC 6233 (2) Pedagogy of Music Teaching and Learning

Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers' lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring terms of odd numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 6113 and/or significant teaching experience.

Additional Information: Departmental Category: Music Education

MUSC 6243 (1) Applications of Music Pedagogy

Provides a structured, collaborative environment for graduate students with K-12 teaching duties to apply the content from music education courses to their current pedagogical environments. Students will apply inquiry strategies as they design and implement an applied project that synthesizes specific theoretical or conceptual areas. Offered fall term only.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Music Education

MUSC 6325 (2) Seminar in Piano Literature

Provides an intensive study of a selected area of repertoire or history. Offered fall terms only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 6801 (3) Advanced Topics in Music Theory

Intensive study of a specialized topics in theory and analysis through critical reading and analysis, class presentations and independent research. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 6822 (3) Advanced Studies in Musicology

Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 7046 (3) Seminar in Jazz Literature

Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. Offered spring semester only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Recommended: Prerequisites MUSC 5091 and MUSC 5642.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 7103 (3) Historical Research in Music Education

Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. Offered spring of even-numbered years.

Requisites: Restricted to Music Education (MMED-MMUE) doctoral students only.

Additional Information: Departmental Category: Music Education

MUSC 7113 (3) Quantitative Research in Music Education

Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Offered fall of even-numbered years.

Requisites: Restricted to Music Education (MMED-MMUE) students only.

Additional Information: Departmental Category: Music Education

MUSC 7138 (3) Contemporary Issues in College Teaching

Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered terms.

Requisites: Restricted to College of Music (MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 7143 (3) Qualitative Research in Music Education

Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Offered fall of odd-numbered years.

Requisites: Restricted to MUED students only.

Additional Information: Departmental Category: Music Education

MUSC 7203 (3) Doctoral Seminar in Music Education

Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Offered fall of even-numbered years.

Requisites: Restricted to MUED students only.

Additional Information: Departmental Category: Music Education

MUSC 7801 (3) Doctoral Seminar in Music Theory

Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

Requisites: Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to College of Music (MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 7822 (3) Seminar in Musicology

Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. Offered fall only.

Requisites: Restricted to Music (MUSD) graduate students only.

Additional Information: Departmental Category: Musicology

Music - Master of Music (MMus)

The Master of Music degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. The purpose of Master of Music degree work is to refine skills in music performance, music composition, research and writing, and pedagogy. There are numerous fields of study within the Master of Music program as listed below. The musicology program admits students only at the PhD level.

The Master of Music degree provides advanced studies in performance, performance/pedagogy, composition (with an optional emphasis in technology), music theory, and conducting (choral, orchestral and wind).

Areas of emphasis in performance and performance/pedagogy include all band and orchestral instruments, guitar, harp, harpsichord, jazz, piano and voice. Each of the MM degrees incorporates studies in the major area, support courses in music electives and thesis/recital work. The minimum credit hours required for a MM degree varies from 30 to 32 depending on the area of study. For specific major area requirements, see the list of Master of Music degrees (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>) at the College of Music website.

Brass, conducting, percussion, string, voice and woodwind majors are required to participate in a music ensemble. A student's ensemble placement will be determined by an audition during the first week of classes.

Requirements

Prerequisites

Students should have completed undergraduate preparation equivalent to that expected for the bachelor's degree at this university. Normally this is a bachelor of music degree in the proposed area of concentration.

Before admission, composition majors should upload representative scores and recordings (to the digital portfolio on the application) and a list of completed compositions. Theory majors should upload two scholarly writing samples that demonstrate ability in critical analysis, appropriate research techniques and skill in the cogent use of English. For further details, see the Application Process section of the website.

Program Requirements

The master of music (MM) degree, which the Graduate School considers a Plan II program, requires a minimum of 30–32 credit hours of graduate coursework, including thesis projects. Many students find it necessary to exceed this minimum in order to meet the musical and academic standards demanded by the MM preliminary examinations. Specific degree requirements (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>) for each program are available online at the College of Music website.

Each student's program is directed by a three-member advisory committee headed by the major advisor (the student's major professor). A second member is chosen from the major area; the third member is usually from outside the major area. (Major areas include: composition, music education, music theory and performance.) By the second semester of residence, the student should complete a tentative degree plan and obtain the approval of the advisory committee and the associate dean for graduate studies. Students must complete the master's degree within four years of matriculation into the program.

Examinations

In addition to preliminary examinations, master's degree students in music must take the Master's Qualifying Examination. The procedures, guidelines for registration and deadlines for taking these examinations are announced by the Music Graduate Office.

Recital/Thesis Requirements

The recital/thesis requirement for the MM in composition is a composition (during the period of graduate study) of several works of major proportion, at least one of which must receive a public performance. For the major in conducting, the requirement is a public practicum and a performance-related or other scholarly document. For the major in music theory, it is two thesis papers. For the major in performance, presentation of two public recitals fulfills the requirement.

For the major in performance and pedagogy, a full-length recital and a research document in pedagogy are required.

Required Courses and Credits

Composition

Code	Title	Credit Hours
Category I: Composition		
PMUS 5526	Composition (variable from 2-3 per semester) ¹	9
<i>Thesis</i>		
One major composition to be approved in advance by the composition faculty.		
TMUS 6956	Master's Thesis	2
TMUS 6957	Master's Thesis 2	2
Category II: Other Requirements in Music		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 5XX1	Electives in Music Theory	9
<i>Electives</i>		3
Maximum 2 credits of ensemble		
Total Credit Hours		30

¹ Regular attendance at composition seminar is expected.

Composition with an Emphasis in Music Technology

Code	Title	Credit Hours
Category I: Composition		
PMUS 5526	Composition (Emphasis in traditional techniques) ¹	3
PMUS 5526	Composition (Emphasis in Music Technology - variable 2 or 3 credits) ¹	6
<i>Thesis</i>		
One major composition for musical ensemble and electronic media to be approved in advance by the composition faculty		
TMUS 6956	Master's Thesis	2
TMUS 6957	Master's Thesis 2	2
Other Requirements in Music		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 5XX1	Electives in Music Theory	6
MUSC 5081	Applications in Music Technology	3
Electives (maximum 2 credits of ensemble)		3
Total Credit Hours		30

¹ Regular attendance at Composition Seminar is expected

Music Theory

Code	Title	Credit Hours
Category I: Music Theory		
MUSC 5151	Topics in Music Analysis (Schenkerian Analysis)	3
MUSC 5071	Post-tonal Theory and Analysis I	3

MUSC 5XX1	Electives in Music Theory	6
TMUS 6956	Master's Thesis ¹	2
TMUS 6957	Master's Thesis 2 ¹	2

Category II: Other Requirements in Music

MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 6051	Pedagogy of Music Theory	3
Music Electives outside of the major area ²		3

Category III: Free Electives

Free Electives ²		3
Total Credit Hours		30

¹ With the consent of the faculty advisory committee, the student may write a single, extended thesis for 4 credit hours (TMUS 6956 and TMUS 6957). The master's thesis project(s) culminates in an oral defense before the three members of the student's advisory committee. This is in addition to the MM Qualifying Oral Examination.

² Electives may include ensemble participation (limited to 3 credits for the degree) or private applied instruction. Free electives may be in or outside of the College of Music, but must be outside of the major area or germane to the program of study. Reading proficiency in a foreign language is strongly recommended.

Choral Conducting

Code	Title	Credit Hours
Category I: Choral Conducting		
MUSC 5156	Symposium in Choral Music	4
MUSC 5136	Advanced Conducting	2
PMUS 5536	Intermed Conducting (Intermediate Conducting - to be taken concurrently with Thesis Practicum where possible)	6
TMUS 6956	Master's Thesis ¹	2
TMUS 6957	Master's Thesis 2 ¹	2
Category II: Other Requirements in Music		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5712	Renaissance Music	3
PMUS 5726	Voice (Voice Pedagogy)	4
or MUSC 5444	Vocal Pedagogy	
or MUSC 5454	Repertory for Young Voices	
Electives		2
Maximum 2 credits of ensemble		
Total Credit Hours		30

¹ See degree plan for details on thesis projects

² Choral Ensemble (required each semester of residence; credit is attached to applied study)

Choral Conducting with an Emphasis in Voice Performance

Code	Title	Credit Hours
Category I: Choral Conducting		
MUSC 5156	Symposium in Choral Music	4

MUSC 5136	Advanced Conducting	2
PMUS 5536	Intermed Conducting ¹	6
TMUS 6956	Master's Thesis (Conducting Practicum) ²	2

Category II: Other Requirements in Music*Voice Performance* ³

PMUS 5726	Voice (Three semesters)	6
MUSC 5444	Vocal Pedagogy	2
TMUS 6957	Master's Thesis 2 (Voice recital or research paper) ⁴	2

Academic Courses

MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5712	Renaissance Music	3

Choral Ensemble required each semester of residence; credit attached to applied study

Total Credit Hours 32

¹ To be taken concurrently with Thesis Practicum where possible.

² See degree plan for details for the conducting practicum.

³ Acceptance for Emphasis in Voice requires an audition with the Voice Faculty.

⁴ A recital may be presented if the student regularly studies voice or an instrument at the 5000-level and if the particular applied Faculty approves the recital in preview.

Total Credit Hours		30

- ¹ Required each semester of residence up to four semesters; credit is attached to applied study. See Faculty Chair regarding the specific ensemble required.

Dual Degree Program

Master's Degree in Two College of Music Programs

Students may apply for a dual master's degree that combines any two master's programs in the College of Music. The student must apply separately and be admitted by the faculty in each of the degree programs under their respective admissions procedures and standards. The student must be accepted to both degree programs at the time of the initial application. With the exception of thesis credit hours, courses that fulfill requirements in both degree programs need only be taken once to be counted for both. A minimum of 45 credit hours must be earned. For most students, it is far preferable to pursue the DMA or PhD degree after completing a master's degree, rather than to pursue a dual master's degree.

Music - Doctor of Philosophy (PhD)

The PhD in Music emphasizes research in the principal areas of music education or musicology (either historical musicology or ethnomusicology). Each program plan is developed through collaboration between student and advisor, keeping the specific goals of each student in mind. The objective is to prepare the student for a career in research and college teaching. Minimum requirements for PhD degrees are: 60 credit hours beyond the bachelor degree for musicology and 75 for music education, including 30 hours of thesis credit. Graduate-level courses

taken at the University of Colorado Boulder for a master of music degree are automatically applied; graduate courses taken at another university may be considered for transfer (up to 21 credits).

Areas of Emphasis

The two principal areas of study are music education and musicology.

Music Education Emphasis

The Doctor of Philosophy degree in music, with music education as a field of specialization, is offered through the Graduate School for students who demonstrate both scholarly potential and a superior commitment to the music education profession.

This degree program requires that individuals think abstractly, generalize knowledge, apply research results to areas of specialization, and communicate effectively in both oral and written forms.

Coursework emphasizes the study of historical, philosophical, psychological and sociological foundations of music education; the theoretical and pedagogical principles of music teaching and learning; curriculum development; testing and assessment; and research techniques.

Graduates typically pursue careers in music education at the college level or supervisory positions in elementary and secondary schools.

Musicology Emphasis

For the musicology student, the Doctor of Philosophy in music degree is intended to emphasize research in music history, music theory, ethnomusicology or some other aspect of music in culture.

An advanced degree will not be conferred merely because a student completes a specified period of residence and passes a given number of courses. One should not expect to gain from formal courses all the training, knowledge, and understanding of ideas necessary to meet the requirements for an advanced degree. The culminating work on a PhD is the dissertation, a substantial document based upon original investigation and showing mature scholarship and critical judgment, as well as a command of the tools and methods of research in music.

Requirements

Prerequisites

Students applying to the PhD program should have a bachelor's degree or equivalent in a music field related to their intended area of study. Applicants for the PhD with an emphasis in music education should hold an MME degree.

Letters of recommendation, representative research papers and satisfactory scores on the GRE (the general test) are required elements of the student's application for the degree.

Upon entrance to the degree program, students must pass the preliminary examinations and begin working toward basic requirements.

Degree Requirements

Music Education Emphasis

Course Requirements

Students must complete a minimum of 45 credit hours of courses numbered 5000 or above, 15 of which may be transferred from the master's degree, and a minimum of 30 credit hours of doctoral dissertation credit.

Dissertation Requirements

Each candidate must complete a dissertation based on original investigation that demonstrates mature scholarship. Following successful completion of the comprehensive examination, the student designates a dissertation committee, develops a dissertation prospectus and presents it to the committee for approval. After the dissertation has been accepted, a final oral examination on the dissertation and related topics is conducted by the student's dissertation committee.

For more details, consult the PhD in Music Education (https://www.colorado.edu/music/sites/default/files/attached-files/phd_music_ed_2015.pdf) program description at the College of Music website.

Musicology Emphasis Course Requirements

Students must complete a minimum of 30 credit hours of courses numbered 5000 or above, although the minimum number is almost always exceeded. At least six doctoral seminars (7000 level) in musicology are required and must be taken at CU Boulder as part of PhD course work. Additionally, certain seminars in related disciplines, such as Music Theory and Analysis, Religious Studies, Anthropology, Sociology, and so on, may count in lieu of the former requirement, with the consent of the student's advisory committee. Students are expected to complete with distinction all work in the formal courses in which they enroll.

Students must also complete at least 30 credit hours of dissertation credit, with not more than 10 of those credit hours in any one semester. Furthermore, not more than 10 credit hours of dissertation credit earned prior to a student's advancement to candidacy may be applied toward the required 30 credit hours.

Up to 21 credit hours of graduate work taken at another institution may be considered for transfer. All requests for credit transfer, however, must be approved by the chair of the musicology faculty and other College and University officers as specified on a form for that purpose.

The College of Music requires proficiency in two foreign languages appropriate to the student's program of study. Normally, the language requirement is met by a translation examination scheduled through the graduate music office.

Dissertation Requirements

The dissertation should be an original and worthwhile contribution to knowledge in the field of musicology. It is expected that the student work closely with a major professor who will serve as the first reader and critic before the dissertation is submitted to the other dissertation committee members.

For more details, consult the PhD Musicology (https://www.colorado.edu/music/sites/default/files/attached-files/phd_musicology_2016_dec_16.pdf) program description at the College of Music website.

Artist Diploma: Chamber Music Performance - Graduate Certificate

This graduate program is for pre-professionals who exhibit potential for a national and/or international performing career.

The program offers exceptionally gifted instrumentalists the opportunity to deepen their artistry, broaden their musical perspective and refine their performance skills under the guidance of College of Music faculty. In

addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music. Students are provided both coaching and individualized instruction, with extensive opportunities for performance, in preparation for a performance career.

Requirements

Admission Requirements

An earned baccalaureate degree and a successful audition are required for admission into this program.

Required Courses and Credits

Code	Title	Credit Hours
Category I: Requirements in Music		
PMUS 6XX6	Applied Instruction (Four semesters required, one-hour weekly lesson plus weekly studio class)	8
EMUS 5507	Chamber Music (Four semesters required)	4

Electives		
Additional coursework in literature, pedagogy, entrepreneurship, musicology, ethnomusicology or music theory. ³		2
Total Credit Hours		24

¹ Pianists not participating in a conducted ensemble are required to take two extra credits of chamber music and/or accompanying.

² A maximum of two credits at the 4000-level may be used to fulfill requirements.

³ Students who wish to take academic classes at the 5000-level or above must pass the appropriate preliminary exam.

Artist Diploma: Opera and Solo Vocal Performance - Graduate Certificate

This program is designed to provide intensive performance studies for those who have the talent and potential for a career in opera, chamber and solo vocal performance.

Studies include individualized voice instruction, vocal coaching, and performance opportunities in opera, solo, oratorio and other concert work, with elective studies in entrepreneurship, as preparation for a performance career.

Requirements

Admission Requirements

Admissions requirements for this program include completing all required university graduate admission requirements, submitting a CU Boulder application, four letters of recommendation, a pre-screening recorded audition, and then performing a live on-campus audition and being interviewed by the faculty.

An earned baccalaureate degree in voice performance is the minimum requirement for admission into this program.

Required Courses and Credits

Total Credit Hours		22

¹ A maximum of two credits at the 4000-level may be used to fulfill certificate requirements.

² Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exam.

Artist Diploma: Solo Instrumental Performance - Graduate Certificate

This graduate program is for pre-professionals who exhibit potential for a national and/or international performing career.

The program offers exceptionally gifted instrumentalists the opportunity to deepen their artistry, broaden their musical perspective, and refine their performance skills under the guidance of College of Music faculty. In addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music. Students are provided both coaching and individualized instruction, with extensive opportunities for performance, in preparation for a performance career.

Requirements

Admission Requirements

An earned baccalaureate degree and a successful audition are required for admission into this program.

Required Courses and Credits

Code	Title	Credit Hours
Category I: Requirements in Music		
PMUS 6XX6	Applied Instruction (Four semesters required, one-hour weekly lesson plus weekly studio class)	8
TMUS 6956	Master's Thesis (Solo recital or two concerto performances)	2
TMUS 6956	Master's Thesis (Solo recital)	2
TMUS 6957	Master's Thesis 2 (Solo or chamber recital)	2
TMUS 6957	Master's Thesis 2 (Public performance with lecture/demonstration)	2
EMUS 5XX7	Conducted Ensemble (Two semesters required)	2
Category II: Other requirements in Music ¹		
Entrepreneurship (selected from the following)		2
MUSC 5918	Building Your Music Career	
MUSC 5908	Internship in Music Business	
MUSC 5988	The Entrepreneurial Artist	
MUSC 5978	Introduction to Arts Administration	
Electives		
Additional coursework in literature, pedagogy, entrepreneurship, musicology, ethnomusicology or music theory. ²		2
Total Credit Hours		22

¹ A maximum of two credits at the 4000-level may be used to fulfill certificate requirements.

² Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exam.

Artist Diploma: String Quartet Performance - Graduate Certificate

The professional certificate in string quartet performance is designed to provide intensive performance experiences and coaching for those that have the potential for a career in string quartet performance. An earned baccalaureate degree in performance is the minimum requirement for admission into this program.

Students are provided both coaching and individualized instruction, with extensive opportunities for performance, as well as elective studies in entrepreneurship, in preparation for a performance career. Although each student applies individually, quartets are normally expected to audition as a pre-formed ensemble for admission to this program. This is a two-year program with only one ensemble in residence at a time.

Requirements

Admission Requirements

Admissions requirements for this program include completing all required university graduate admission requirements, submitting a CU Boulder application, four letters of recommendation, a pre-screening recorded audition, performing a live audition and being interviewed by faculty.

Required Courses and Credits

Code	Title	Credit Hours
Requirements in Major Area		
PMUS 6696	Viola (two semesters for one year) ¹	4
or PMUS 6706	Violin	
or PMUS 6716	Violoncello	
TMUS 6956	Master's Thesis (chamber music recitals; two semesters) ²	4
TMUS 6957	Master's Thesis 2 (chamber music recitals; two semesters) ²	4
EMUS 5327	Symphony Orchestra (two semesters) ³	2
Other Requirements in Music		
Entrepreneurship (selected from the following) ⁴		2
MUSC 5918	Building Your Music Career	
MUSC 5988	The Entrepreneurial Artist	
MUSC 5978	Introduction to Arts Administration	
Electives		
Additional credits in the College of Music at the 4000- or 5000-level. ⁵		4
Total Credit Hours		20

¹ Applied string instruction. Registration for applied study is for two credit hours per semester, entitling each member of the quartet to one hour of private lessons per week.

² This four-recital requirement entitles the quartet to one hour of coaching per week. The string faculty will decide if one of these recitals should be a solo recital.

³ Two fall semesters as principals in the Chamber Orchestra (1 credit each).

⁴ A maximum of two credits at the 4000-level may be taken in fulfillment of the certificate requirements.

⁵ Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary examinations.

Artist Diploma: Vocal Coaching - Graduate Certificate

This graduate program is for pre-professionals who exhibit potential for a specialized career in vocal accompanying.

The program offers exceptionally gifted collaborative pianists the opportunity to deepen their artistry, broaden their musical perspective, and refine their performance skills under the guidance of College of Music faculty. In addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music. Students are provided both coaching and individualized instruction, with

extensive opportunities for performance, in preparation for a career as a professional vocal coach.

Requirements

Admission Requirements

An earned master of music degree in collaborative piano with commensurate language and diction training (or equivalent professional experience) and a successful audition are required for admission into this program.

Required Courses and Credits

Code	Title	Credit Hours
Category I: Requirements in Music		
PMUS 6636	Applied Instruction (Four semesters required, one-hour weekly lesson plus weekly studio class; to be divided equally between collaborative piano and vocal coaching)	8
TMUS 6956	Master's Thesis (Collaborative recital - instrumental)	2
TMUS 6956	Master's Thesis (Two collaborative recitals - vocal)	4
TMUS 6957	Master's Thesis 2 (Opera Scenes Performance)	2
MUSC 5157	Opera Practicum (Serve as rehearsal pianist and continuo player for all major operas, as well as outreach presentations and special events) ¹	0-4
Category II: Other Requirements in Music		
MUSC 5375	Opera Coaching for Pianists	2
Electives		
Additional coursework in collaborative literature, song literature, pedagogy, musicology, ethnomusicology or theory. ²		2
Total Credit Hours		20-24

¹ Student enrolls for variable credit according to faculty recommendation.

² Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exam.

Arts Administration - Graduate Certificate

CU Boulder's professional graduate certificate in arts administration provides students with the managerial skills and knowledge to work in the performing arts industry. Students will gain knowledge and insights into the opportunities and challenges facing today's arts administration professionals. This program offers the skills and education needed for a successful career in arts management in music, dance and theater.

Requirements

Admission Requirements

Applicants should have either an undergraduate degree in an arts discipline, or a bachelor's degree in any other discipline *plus* at least 3 years of professional experience working in an arts organization. This

certificate program is also open to all students already enrolled in a graduate degree in music, theatre or dance.

Required Courses and Credits

The graduate certificate in arts administration is comprised of three 3-credit courses:

Code	Title	Credit Hours
MUSC 5978	Introduction to Arts Administration	3
MUSC 5938	Management and Leadership in the Arts	3
MUSC 5948	Sustainable Arts Organizations: Forecasting and Fundraising	3

For application instructions and deadlines, please consult the Graduate School's Admissions (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>) webpage and the College of Music.

Music Theory - Graduate Certificate

The Graduate Certificate in Music Theory provides advanced studies in music theory and theory pedagogy without the full requirements of the master's degree in music theory. This credential enhances the professional training and future employment options for students in existing graduate degrees across the College of Music. The curricular requirements of the Music Theory Certificate are readily combined with theory coursework required in all MM and DMA degree programs.

Requirements

The Graduate Certificate in Music Theory requires 12 credit hours. Required coursework includes MUSC 6051 Pedagogy of Music Theory (3) and TMUS 5524 Special Study-Music Theory (3), which culminates in a research project and public presentation of research.

For the remaining 6 credit hours, students also must complete two of the three following 3-credit courses: MUSC 5151 Topics in Music Analysis-Schenkerian Analysis; MUSC 5071 Post-tonal Theory and Analysis I (3); and a further elective, either MUSC 5151 Topics in Music Analysis (3) for MM students, or Advanced Topics in Music Theory (MUSC 6801 Advanced Topics in Music Theory (3) for DMA and PhD students.

Any of the required courses listed here may also be applied toward theory coursework required in the student's major degree program.

Music Education

Students in this degree program complete advanced studies that are designed to refine their teaching philosophy and practices. These studies include courses in historical and philosophical foundations of music education, psychological theories of music learning, basic research methods, curriculum development and assessment. The minimum number of credit hours required is 30.

The college also offers a master of music education degree/certification with K-12 teaching for students who have completed an undergraduate degree in music, but in a major area other than music education. Coursework leads to a master's degree and a Colorado K-12 music teaching license. The entire program requires a minimum of 71 credit hours.

Master's Degree

- Music Education - Master of Music Education (MMusEd) (p. 1604)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Austin, James R. (https://experts.colorado.edu/display/fisid_103455/)
Professor; PhD, University of Iowa

Courses

MUSC 5002 (3) Proseminar in Historical Musicology

Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5011 (2) 16th Century Counterpoint

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4011

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5012 (3) African Music

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4012 and MUEL 4012

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5021 (2) 18th Century Counterpoint

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Offered fall terms only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5026 (2) Percussion Literature

In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Offered spring semester of odd numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5036 (2) Brass Literature

Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring term.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5041 (2) Advanced Orchestration

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5061 (3) Advanced Tonal Analysis

Surveys tonal repertory and analytical techniques. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5071 (3) Post-tonal Theory and Analysis I

Focuses on theory and analysis of post-tonal literature pre-1945. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5078 (1) Piano Technician for Pianists

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4078

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite piano majors.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5081 (3) Applications in Music Technology

Presents advanced strategies for applying computer technology in music creation. Synthesis, DSP, MIDI and audio sequencing, as well as advanced music engraving, will be explored through the use of various software platforms including Logic, Reason, MAX and Finale. Offered fall term only.
Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5091 (3) Contemporary Theory - Jazz and Modal Music

Studies the composition and improvisation of Herbie Hancock, Wayne Shorter, Chick Corea and their contemporaries. Broadly examines modality in jazz and its similarities to music of Ravel and Debussy, as well as systems of organization in Messiaen and others. Strategies for analysis and integration of the material into a personal vocabulary as a composer and improviser are explored. Offered spring of even-numbered years.

Requisites: Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5103 (3) Teaching General Music

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Offered fall of odd-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5112 (3) Proseminar in Ethnomusicology

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5121 (3) Advanced Topics in Music Technology

Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 5081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5136 (2) Advanced Conducting

Offers advanced work in conducting.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5142 (3) American Indian Music

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4142

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5143 (2) Topics in Choral Music Education

Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4143

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5151 (3) Topics in Music Analysis

Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies and produce original analyses. Student must have passed graduate preliminary exams or completed remediation before enrolling in this course.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 5061 or MUSC 5071 as appropriate to the topic, or instructor consent required.

Additional Information: Departmental Category: Theory and Composition

MUSC 5156 (2) Symposium in Choral Music

Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5168 (3) World Music Theories

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4168

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5176 (2) Conducting 3

This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4176

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Music Education (MMED) graduate students only.

Grading Basis: Letter Grade

MUSC 5183 (2) Research in Music Teaching

Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Offered fall of odd-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5203 (2) Topics in Music Education

Provides an in-depth examination of contemporary topics in music education. Students implement and design relevant projects.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5215 (1-2) Studies in Piano Teaching

Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisites: MUSC 5305 and MUSC 5315.

Additional Information: Departmental Category: Keyboard

MUSC 5246 (3) Jazz Improvisation and Analysis

Application of performance skills for the advanced improviser through specific harmonic, melodic and rhythmic techniques. Also includes analysis of transcriptions and varied harmonic contexts as well as a focus on the development of repertoire. Offered fall semester of odd-numbered years. Requires prerequisite course or instructor consent.

Requisites: Requires prerequisite course of MUSC 3071 (minimum grade D-). Restricted to Music (MUSC) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5256 (3) Jazz Studies Administration and Pedagogy

Surveys approaches, techniques, philosophies and materials available for teaching jazz at both pre-college and collegiate level. Subject areas covered include improvisation, composition and arranging, studio teaching and directing ensembles. Studies the organization and administration of collegiate jazz programs. Topic include curriculum, program philosophy, teaching techniques, funding, teacher training and evaluation. Offered fall terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 3253.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5273 (2) Comprehensive String Pedagogy

Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Offered fall of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5285 (3) Organ Survey

Survey of organ repertoire and the history of organ building from the 16th century to the present.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4285

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5305 (2) Piano Pedagogy Group Techniques

Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5313 (3) Teaching Choral Music

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4313

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5315 (2) Piano Pedagogy: Intermediate Literature

Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5325 (2) Keyboard Literature 1

Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5335 (2) Keyboard Literature 2

Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring terms of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5336 (2) Brass Pedagogy

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4336

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5345 (2) Research: Piano Literature and Pedagogy

Looks at individual or group research related to piano pedagogy or literature for piano.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5346 (3) Woodwind Pedagogy

Provides the knowledge and skills to teach woodwind instruments in both individual studio and collegiate class settings. Considers pedagogical techniques for all levels of instruction. Offered fall terms of odd-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4346

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5356 (2) Jazz Studies Practicum

Implements independent, project-based studies for further developing knowledge and experience in jazz pedagogy, performance and composition. Student is assessed and guided by faculty to develop specific skills needed toward becoming a more effective jazz educator. Offered spring of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 5256.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5365 (2) Advanced Accompanying

An in-depth study of collaborative repertoire in individually assigned projects, coached by collaborative piano faculty and others.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5375 (2) Opera Coaching for Pianists

Teaches skills for opera coaches and rehearsal pianists.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5405 (2) Basso-Continuo Accompaniment

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4405

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion

Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered fall terms of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5435 (2) Collaborative Literature for Piano with Strings

Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered spring terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 5443 (3) Teaching Instrumental Music

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4443

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5444 (2) Vocal Pedagogy

In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5446 (1) Supervised Teaching Practicum

Designed to provide supervised teaching experience that includes feedback on weekly teaching; weekly and longer-term planning; and reflection on the impact of teacher characteristics and actions on student development.

Requisites: Requires prerequisite course of MUSC 5273 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Grading Basis: Letter Grade

MUSC 5454 (2) Repertory for Young Voices

Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5464 (2) French Song Literature

Provides an extensive analytical and historical discussion of French song literature styles, from the 12th century to the present.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5484 (2) Graduate Seminar in Vocal Pedagogy

A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique.

Requisites: Requires prerequisite course of MUSC 5444 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5564 (2) German Song Literature

Provides an extensive analytical and historical discussion of German song literature styles, from the 18th century to the present. Offered fall terms only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Voice

MUSC 5583 (2) Inclusive Music Classroom

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4583

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 5608 (1) Graduate Studies in the Alexander Technique

Investigates the discoveries and writings of F. M. Alexander regarding kinesthetic perception, physical coordination and mind-body awareness. Applies these contexts to specific musical activities. Analysis and research regarding Alexander's principles.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2608

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5642 (3) Jazz History and Literature

Studies musical trends and cultural forces influencing jazz, with analysis of improvisational styles, melodic and motivic variations, transcriptions and orchestrations from significant periods in its history. Offered spring terms only.

Requisites: Requires prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5666 (2) Chamber Music Literature: Woodwinds

Provides a stylistic-historical survey in various genres from Baroque era to present. Offered fall terms of even numbered years.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5708 (2) Introduction to Music Bibliography and Research

Explores basic informational sources about music and musicians; a study of citation formats, research methodologies and writing techniques employed in music research papers, theses and dissertations. Intended to increase students' information fluency. Required in all master's degree programs.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5712 (3) Renaissance Music

Provides a repertory and analysis of polyphonic music, 1400-1600.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4712

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5742 (3) Performance Practice of Early Music

Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5752 (3) Women in Music

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4752

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5762 (3-4) History of Choral Literature

Provides a seminar in analysis of musical style and history of choral repertory. Those wishing review of literature and repertory may enroll for 4 credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5772 (3) History of Opera

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4772

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5802 (3) Studies in 20th Century Music

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4802

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5808 (1) Advanced Studies in the Alexander Technique

Continues investigation of the benefits of Alexander's principles regarding mind-body awareness begun in MUSC 5608. Increased emphasis on utilizing principles in specialized activity. Analysis and research regarding musical activities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4608

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires prerequisite course of MUSC 5608 (minimum grade C-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5822 (3) Ancient and Medieval Music

Surveys sources from the ancient Greeks to the early Christian era and music from the 8th to the 14th century.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5832 (3) Studies in American Music

Offers intensified work in folk, popular, and art music of the United States.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5842 (3) Aesthetics of Music

Surveys various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics and historians.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5852 (3) 17th and Early 18th Century Music

Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4852

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5872 (3) Late 18th and 19th Century Music

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4872

Repeatable: Repeatable for up to 12.00 total credit hours.

Recommended: Prerequisite or corequisite MUSC 3812.

Additional Information: Departmental Category: Musicology

MUSC 5882 (3) Studies in 18th and 19th Century Music

Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5892 (3) Latin American Music

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4892

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5908 (1-3) Internship in Music Business

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4908

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5918 (2) Building Your Music Career

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 2918

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5938 (3) Management and Leadership in the Arts

Presents leadership theories and management principles and their application to arts organizations. Examines concepts and approaches for leaders of small, medium and large arts organizations in both the for-profit and nonprofit sectors, including human resource management and effective communication.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Letter Grade

MUSC 5948 (3) Sustainable Arts Organizations: Forecasting and Fundraising

Equips students to create comprehensive fundraising plans rooted in strategic business planning for arts organizations, which depend on contributed income for sustainability. Students will learn the basics of planning, budgeting and forecasting, along with proven, effective fundraising strategies and techniques. Includes case studies and guest speakers with extensive professional expertise in the field.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Grading Basis: Letter Grade

MUSC 5958 (2) Community Performances

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4958

Requisites: Requires prerequisite course of MUSC 5918 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5978 (3) Introduction to Arts Administration

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4978

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5988 (3) The Entrepreneurial Artist

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4988

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 5918.

Additional Information: Departmental Category: Music Entrepreneurship

MUSC 6041 (3) Advanced Orchestration

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

Requisites: Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 6051 (3) Pedagogy of Music Theory

Explores methods, materials, practical techniques for teaching undergraduate music theory, aural skills and analysis. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course. Offered spring of odd-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 6113 (2) Foundations of Music Education

Surveys historical and philosophical bases of contemporary music education. Offered fall of even-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6133 (2) Comprehensive Musicianship through Performance

Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Offered spring terms of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6193 (1-3) Selected Studies in Music Education

Instructor consent required.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Music (MUSD) or Music Education (MMED-MMUE) students only.

Additional Information: Departmental Category: Music Education

MUSC 6203 (2) Psychology of Music Learning

Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Offered spring terms only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6213 (2) Assessment of Music Learning

Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Offered on a rotating basis during summer session.

Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.

Additional Information: Departmental Category: Music Education

MUSC 6223 (2) Sociology of Music Education

Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Offered fall of even-numbered years.

Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

Recommended: Prerequisite MUSC 6113.

Additional Information: Departmental Category: Music Education

MUSC 6233 (2) Pedagogy of Music Teaching and Learning

Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers' lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring terms of odd numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite MUSC 6113 and/or significant teaching experience.

Additional Information: Departmental Category: Music Education

MUSC 6243 (1) Applications of Music Pedagogy

Provides a structured, collaborative environment for graduate students with K-12 teaching duties to apply the content from music education courses to their current pedagogical environments. Students will apply inquiry strategies as they design and implement an applied project that synthesizes specific theoretical or conceptual areas. Offered fall term only.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Music Education

MUSC 6325 (2) Seminar in Piano Literature

Provides an intensive study of a selected area of repertoire or history. Offered fall terms only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Keyboard

MUSC 6801 (3) Advanced Topics in Music Theory

Intensive study of a specialized topics in theory and analysis through critical reading and analysis, class presentations and independent research. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 6822 (3) Advanced Studies in Musicology

Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 7046 (3) Seminar in Jazz Literature

Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. Offered spring semester only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Recommended: Prerequisites MUSC 5091 and MUSC 5642.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 7103 (3) Historical Research in Music Education

Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. Offered spring of even-numbered years.

Requisites: Restricted to Music Education (MMED-MMUE) doctoral students only.

Additional Information: Departmental Category: Music Education

MUSC 7113 (3) Quantitative Research in Music Education

Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Offered fall of even-numbered years.

Requisites: Restricted to Music Education (MMED-MMUE) students only.

Additional Information: Departmental Category: Music Education

MUSC 7138 (3) Contemporary Issues in College Teaching

Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered terms.

Requisites: Restricted to College of Music (MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 7143 (3) Qualitative Research in Music Education

Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Offered fall of odd-numbered years.

Requisites: Restricted to MUED students only.

Additional Information: Departmental Category: Music Education

MUSC 7203 (3) Doctoral Seminar in Music Education

Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Offered fall of even-numbered years.

Requisites: Restricted to MUED students only.

Additional Information: Departmental Category: Music Education

MUSC 7801 (3) Doctoral Seminar in Music Theory

Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

Requisites: Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to College of Music (MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 7822 (3) Seminar in Musicology

Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. Offered fall only.

Requisites: Restricted to Music (MUSD) graduate students only.

Additional Information: Departmental Category: Musicology

NCMU 5093 (0.2-3) Special Topics in Music

Repeatable: Repeatable for up to 3.00 total credit hours.

Music Education - Master of Music Education (MMusEd)

The Master of Music Education program addresses the professional development needs of music teachers in the field. Students are challenged to develop a greater understanding and mastery of music teaching-learning processes, to improve personal musicianship, and to become committed leaders within the music education profession.

Students in this degree program complete advanced studies that are designed to refine their teaching philosophy and practices. These studies include courses in historical and philosophical foundations of music education, psychological theories of music learning, basic research methods, curriculum development, and assessment. The minimum number of credit hours required is 30.

The college also offers a Master of Music Education degree/certification with K–12 teaching for students who have completed an undergraduate degree in music, but in a major area other than music education. Coursework leads to a master's degree and a Colorado K–12 music teaching license. The entire program requires a minimum of 71 credit hours.

Requirements

Code	Title	Credit Hours
Category I - Music Education		
MUSC 6113	Foundations of Music Education	2
MUSC 6203	Psychology of Music Learning	2
MUSC 5183	Research in Music Teaching	2
MUSC 6233	Pedagogy of Music Teaching and Learning (Required for Summer MME students; optional for AY students)	2
Music Education electives and workshops		4-6
Category II - Other requirements in music		
MUSC 5708	Introduction to Music Bibliography and Research	2

Courses accepted for this requirement include:	
5000- or 6000-level MUSC course	
IMUS 5093	²
PMUS 5536	Intermed Conducting ²
MUSC 5156	Symposium in Choral Music ²
MUSC 6243	Applications of Music Pedagogy ²
MUSC 6536	²
IMUS 5018	³
5000-level TMUS course	²
<i>Music Electives and Workshops (outside of major)</i>	4
Courses accepted for this requirement include:	
5000- or 6000- MUSIC course (except MUSC 5XX3 or MUSC 6XX3)	
5000-level PMUS course (Applied Lessons)	⁴
5000- or 6000-level EMUS course	⁴
IMUS 5093	⁴
5000-level TMUS course	⁴
Electives	
Elective courses and workshops/intensives. Courses accepted for this requirement include:	6
Any 5000- or 6000-level course (music or non-music)	
5000-level PMUS course	²
4000-, 5000- or 6000-level EMUS course	²
4000-level MUSC course	²
IMUS 5093	²
5000-level TMUS course	²
Total Credit Hours	30-32

¹ Summer MME: Technology, Musicology, Ethnomusicology, Conducting. Academic Year MME: Technology, Theory, Musicology, Ethnomusicology, Conducting, Performance, Performance & Pedagogy, Piano Pedagogy, Vocal Pedagogy, Jazz Studies.

² Repeatable up to 6 hours.

³ Repeatable up to 2 hours.

⁴ Repeatable up to 4 hours.

Prerequisites

Applicants are expected to provide evidence of undergraduate preparation equivalent to that required for the bachelor of music education degree at this university. Applicants also must possess a music teaching certificate/license or agree to work toward a Colorado music teaching license. GRE scores are not required for admission, but can be helpful in determining merit-based financial aid. Individuals who wish to pursue music performance or conducting as their cognate area must demonstrate at least senior-level proficiency on their particular medium through an audition.

Program of Study

Students earning the MMusEd degree must complete a minimum of 30 credit hours of course work, including 12 credit hours in music education, 12 credit hours in music and 6 credit hours of open electives in a specialization area or other areas of interest. Of the 12 credit hours in music, a 2-credit-hour course in bibliography and research is required, as well as 6 credit hours of study in a cognate area, which includes

musicology/ethnomusicology, music theory/music technology or performance (including conducting, pedagogy and jazz studies).

The music component of the degree should assist students in developing their musical knowledge and skills. One member of the student's graduate advisory committee should be from the cognate area, and it is assumed that at least some part of the student's study is with that faculty member. All music studies must be at the 5000 level or above. Under special circumstances, up to 6 credit hours at the 4000-level may be applied to the open electives portion of the degree.

Students typically complete the degree in two academic years, or one academic year plus two summers. Degree work must be completed within four years of the semester in which the student is accepted into a degree program and begins studies. A summers-only MMusEd program (completed in three summers) is also available; for details, see the Summer MMusEd webpage (<https://www.colorado.edu/music/summer-college-music/summer-mme/>) or contact the music education faculty. Because most master's level music education courses are offered in late afternoons, students who live within commuting distance can earn a significant portion of credit toward the degree while continuing to work full time.

Dual Degree Program

Master's Degree in Two College of Music Programs

Students may apply for a dual master's degree that combines any two master's programs in the College of Music. The student must apply separately and be admitted by the faculty in each of the degree programs under their respective admissions procedures and standards. The student must be accepted to both degree programs at the time of the initial application. With the exception of thesis credit hours, courses that fulfill requirements in both degree programs need only be taken once to be counted for both. A minimum of 45 credit hours must be earned. For most students, it is far preferable to pursue the DMA or PhD degree after completing a master's degree, rather than to pursue a dual master's degree.

Musical Arts

The faculty of the College of Music has modeled the DMA degree programs at CU Boulder after the guiding principles outlined by the National Association of Schools of Music (NASM). As defined by NASM, the Doctor of Musical Arts degree is intended for those seeking "the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works, or pedagogy... Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice" (*NASM Handbook*, 2009–10: 116).

Doctoral Degree

- Doctor of Musical Arts (DMA) (p. 1608)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Wolzien, Charles
Professor Emeritus

Musical Arts - Doctor of Musical Arts (DMA)

The DMA degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. As defined by the NASM, the Doctor of Musical Arts degree is intended for those seeking “the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works, or pedagogy... Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice” (*NASM Handbook*, 2016-17: 135).

This professional degree is intended for composers, conductors and performers who possess both creative and scholarly abilities. Graduates of this program go on to careers as composers and performers in solo, chamber music, opera, jazz or orchestra, or as choral, jazz, band and/or orchestral conductors. A particular focus of the DMA is the preparation for a career as a college, conservatory or university teacher. Students work closely with an advisor in developing a degree plan that reflects their needs and interests. This degree requires a minimum of 30 hours beyond the master’s level, including 12 hours in seminar and other coursework, and a minimum of 18 hours of performance and written projects (constituting the dissertation portion of the degree).

For outlines of specific programs, visit the college's Degrees (<http://www.colorado.edu/music/academics/graduate-advising/degrees/>) webpage or contact the Music Graduate Studies office.

Requirements

Prerequisites

Entrance requirements include a master’s degree in music or demonstrated background comparable to that of the master of music degree at this university. All graduate applicants must complete an audition, interview, or some other demonstration of their ability in the major field. If at all possible, a visit to the campus is strongly encouraged. As part of the application, composition majors should upload representative scores and recordings (to the digital portfolio tab on the application), and a list of completed compositions. Performance majors should submit a repertoire list and arrange for a personal audition and interview, if at all possible. Some areas require applicants to send a pre-audition screening recording of their performance. Conducting majors must upload a video of a performance. All DMA applicants must also submit a scholarly writing sample that demonstrates ability in critical thinking, appropriate research techniques, and skill in the cogent use of English. For full details concerning audition and application requirements, visit the college's Prospective Graduate Students (<http://>

www.colorado.edu/music/admissions/prospective-graduate-students/ webpage.

Course Requirements

Students must take a minimum of 30 credit hours of coursework, of which at least 18 credit hours are dissertation projects. Students take two doctoral topic classes (at the 6000 level), one each in musicology and music theory; prerequisites are stipulated by the theory and musicology faculties. Some areas require specific coursework prior to or in conjunction with work on dissertation projects. In other instances students may be advised to take coursework in preparation for the comprehensive examination. Applied music instruction may be elected for the duration of the residency requirement.

Advisory Committee

Each DMA program is directed by a five-member advisory committee headed by the major advisor, who is usually the student's main studio teacher. At least one member must hold the PhD degree in musicology, music theory, or music education.

Residence Requirements

The minimum residence requirement is six semesters of work beyond the attainment of an acceptable bachelor's degree. Two semesters of residence credit may be allowed for a master's degree from another institution of approved standing, but at least four semesters of residence credit, two of which must be consecutive in one academic year, must be earned for coursework and/or dissertation work taken at this university.

Not more than one-half semester of residence credit may be earned in a summer session. Students must be registered full-time to earn residence credit. For employed students, only those with one-fourth time or less in work that does not contribute directly to their degree program may earn full residence credit.

Continuous Registration

After the residence requirements for the doctor of musical arts program have been satisfied, a student must enroll for fall and spring semesters of each year until attaining the degree. If a student has enrolled in all required dissertation courses but has still to complete the work, he or she should enroll in TMUS 8019, or TMUS 8029, until the degree is completed.

Degree Plans

A degree plan approved by the advisory committee will be presented to the associate dean for graduate studies no later than the second semester of residence. The student's major professor is responsible for helping the student formulate this plan. The plan should include designated members of the student's doctoral committee, projected remedial and supporting coursework, proposed dissertation projects, and tentative dates for the comprehensive and final examinations.

The following degree plans are available for the doctor of musical arts degree:

- Brass Performance and Pedagogy
- Percussion Performance and Pedagogy
- Composition
- Conducting and Literature - Choral
- Conducting and Literature - Orchestral
- Conducting and Literature - Wind
- Jazz Performance
- Solo Piano - Thesis

- Solo Piano - Non-thesis
- Collaborative Piano
- String Performance
- Voice Performance and Pedagogy
- Woodwinds Performance and Pedagogy

Learn more about degree plans on the College of Music's Degrees webpage (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>).

Language Requirement

Each DMA student must satisfy a foreign language requirement, and the one foreign language used to satisfy the requirement must be approved by the student's advisory committee. Additional language work is required for voice, choral and collaborative piano students. The language requirement must be completed before students may take the comprehensive exam. Advanced competence in music technology may be approved as an alternative to the foreign language requirement. Appropriate courses and projects are prescribed by the college's music technology faculty. International students whose native language is not English are exempt from the requirement.

Dissertation

The DMA dissertation consists of a specified number of performances, projects, and documents. The student's permanent advisory committee must approve all dissertation projects.

Time Limit

DMA degree work must be completed within six years of first registration.

LAW

Welcome to Colorado Law. We are an engaged, diverse and inclusive community of students, faculty, staff and alumni who help one another succeed. Our selective admissions process keeps our student body small, enabling our faculty, staff, alumni and professional network to invest deeply in each student's success. Because we take our responsibility to educate and train future lawyers very seriously, our curriculum, research centers, and experiential learning opportunities are designed to prepare students for success in today's changing legal environment.

Our students have extraordinary credentials and life experiences (<http://www.colorado.edu/law/node/1759/>). In addition to being intelligent, congenial, hard-working and entrepreneurial, our students are engaged with the community. A plethora of active student organizations (<http://www.colorado.edu/law/node/239/>), rich externship opportunities (<http://www.colorado.edu/law/node/117/>) and a robust Public Service Pledge Program (<http://www.colorado.edu/law/node/123/>) enable our students to foster Colorado Law's tradition of service.

Our faculty (<http://lawweb.colorado.edu/profiles/allFaculty.jsp>) are leaders in their fields and are committed to helping Colorado Law students develop the legal knowledge, critical thinking, writing and problem-solving skills necessary for professional success. A deliberately low student-to-faculty ratio of 6.4 to 1 enables meaningful engagement between faculty and students, giving students abundant opportunities to develop deep substantive expertise and long-lasting professional relationships.

Our staff is devoted to helping students and alumni succeed. From the moment our students commit to attending Colorado Law and throughout their professional careers, we provide unwavering personal and professional support. Our admissions (<http://www.colorado.edu/law/node/1/>) office welcomes students to the Colorado Law community, and our student affairs (<http://www.colorado.edu/law/node/235/>) office provides support for students as they develop their professional identity and skills. Our career development office (<http://www.colorado.edu/law/node/177/>) helps students secure and retain rewarding employment. Those unsure about their field of interest can rely on our wealth of career exploration opportunities and resources.

Our alumni (<http://www.colorado.edu/law/node/255/>) represent Colorado Law in a variety of professional settings and fields across Colorado and nationwide. They thrive in a variety of professional domains: national law firms, regional law firms, government organizations (both at the federal and state levels), business organizations (often utilizing their legal skills in business roles), and public interest organizations. Not only do our alumni thrive professionally, but they also enthusiastically work with current Colorado Law students in a number of key ways that foster students' career success.

We are educating students for success. Our relevant and challenging curriculum prepares students to thrive in a variety of sectors and settings. Our three research centers enable students to develop unique connections and insights in today's most important fields, including:

- Natural Resources, Energy, and Environmental Law and Policy—the Getches Wilkinson Center (<http://www.colorado.edu/law/node/149/>).
- Technology and Entrepreneurship/Business—the Silicon Flatirons Center (<https://siliconflatirons.org/>).

- Public Law/Public Service—the White Center (<http://www.colorado.edu/law/node/135/>).

In addition, our Schaden Experiential Learning Program and Clinical Program (with nine clinics (<http://www.colorado.edu/law/node/53/>) representing a range of practice areas) allow students to develop and hone their legal skills through extensive real-world experiences while in school.

We invite you to learn more about what makes the Colorado Law experience (<http://www.colorado.edu/law/node/4079/>) so special. Please contact us (<http://www.colorado.edu/law/node/231/>) for more information or, even better, come visit us (<http://www.colorado.edu/law/node/219/>).

Thanks for taking the time to get to know us better.

Sincerely,

S. James Anaya (<http://lawweb.colorado.edu/profiles/profile.jsp?id=729>),
Dean

About Colorado Law

The University of Colorado Law School, established in 1892, has a long and proud history as a top public law school. The first students of color entered in 1898. The school became a charter member of the Association of American Law Schools, organized in 1901. The first woman graduated in 1908. And the school has been on the American Bar Association's list of accredited law schools since its first publication in 1923.

Today, Colorado Law, housed in the beautiful new "green" Wolf Law Building with one of the largest law libraries in the country, is also one of the most technologically advanced law schools in the country. Most importantly, it provides one of the best comprehensive legal educations in the nation, featuring:

- A favorable faculty-student ratio (6.4:1) that produces class sizes that encourage discussion
- 60 highly published resident faculty dedicated to interacting with students inside and outside the classroom
- First-year students who are placed in small sections for more class participation opportunities and to build relationships with classmates and professors
- Full-time, three-year Juris Doctor (JD) degree, one-year Master of Laws (LLM) degree, one-year Master of Studies in Law (MSL) degree, eight dual degrees, six certificates, three centers and three journals
- An Experiential Learning Program that integrates lawyering activities, including nine legal clinics, externships, public service pledge and trial and moot court competitions
- Comprehensive program to prepare students for a wide range of careers; many graduates obtain judicial clerkships

Law School Vision

With our roots in Colorado and a global outlook, we are a supportive and diverse community of scholars and students in a place that inspires vigorous pursuit of ideas, critical analysis and civic engagement in order to advance the rule of law in an open, sustainable society.

Our Mission

To be an outstanding public law school that: provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through

scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

Wolf Law Building

The five-story Wolf Law Building was completed in 2006 and was only possible through the financing of alumni, friends, law firms and 61 percent by students.

- Top "green" certification, from construction to operation, including 88 percent renewable energy and electricity, 40 percent water use reduction and 59 percent regionally manufactured materials
- Technologically advanced wireless networking, video conferencing, videotaping capabilities for distance learning and digital kiosks
- All classrooms have electrical outlets for each student and complete audio-visual equipment (LCD projectors, DVD, VHS, cable) with built-in touch-screen control systems
- Student commons with café and patio, study and interview rooms, individual lockers and mailboxes, law bookstore and courtyard with barbeque
- Suites and offices for centers, clinics, student organizations, journals and all faculty offices
- A 250-seat main courtroom with judge's chambers, 30-seat teaching courtroom with jury box and witness stand and a mock trial practice room for competition and clinic training

The three-story William A. Wise Law Library is housed in the Wolf Law Building.

- Most comprehensive law library in the 12-state Rocky Mountain region, one of the largest in the country, serving as a selective federal government depository
- Six computer stations, five group study rooms, 12 study pods, and 445 seats
- Access in print or online to 540,000 volumes

Student Life

Students who choose the University of Colorado Law School generally seek the very best all-around legal education combined with a great location, a supportive community, top specialties, interdisciplinary study, dedicated faculty, a public service tradition and so much more. Colorado Law is distinguished by the extraordinary quality of its students. As a competitively selective school, its students rank in the top tier, represent a rich blend of geographic and ethnic backgrounds and bring experiences of leadership, career achievement and community service. Although competitiveness among students with such elite qualifications is typical at many law schools, CU Law students have a proud history of putting collegiality first.

Commitment to Diversity

Colorado Law is proud to have been one of the earliest law schools in the nation to graduate lawyers of color. The first students of color entered the University of Colorado Law School in 1898 and the first woman graduated in 1908. Colorado Law's commitment to diversity is evident throughout the Law School. We seek students with not only the academic credentials to excel in a rigorous legal education program, but also a desire to join a diverse community of future lawyers committed to the service of others. Student organizations offer support and networking opportunities.

Academic Support

From the student's first day, Colorado Law invests in her or his academic success. Through the Rothgerber Academic Assistance Program, upper-division law students tutor first-year students in their courses, except Legal Writing. The program is open to all first-year students, and more than 50 percent of the class participates in this free opportunity.

Honor System

Members of the legal profession are held to the highest standards of ethical and professional conduct, and Law School faculty and students are expected to maintain the same level of professional competence and integrity in their work. The Colorado Law School Honor Code, subscribed to by all students, is a system of rules administered by student officers and demands the highest ethical conduct.

Legal Research and Writing

Colorado Law's Legal Research and Writing Program ensures that its graduates are proficient in legal research, analysis and writing, and capable of adapting these skills to varying contexts. All first-year Legal Writing courses are taught by resident legal writing faculty, and legal research and research strategy is guided by professional librarian instructors. Upper-division courses are designated as writing classes and students spend a seminar preparing a substantial paper requiring significant legal research and writing.

Journals

Colorado Law is home to three nationally respected student-led law journals. These journals provide legal research, writing, editorial and publishing experience to competitively chosen second- and third-year law students, with a select number of third-year students serving as prestigious Editorial Board members. Subscribers include government agencies, judicial courts, law school and government libraries, judges, attorneys, faculty and alumni.

- *University of Colorado Law Review* (founded in 1928)
- *Colorado Natural Resources, Energy and Environmental Law Review*
- *Journal on Telecommunications & High Technology Law*

Student Organizations

Colorado Law's student organizations reflect the diverse interests and concerns of its active student body. Students increase their knowledge in specific areas, gain leadership experience and work closely with fellow students, faculty, alumni and legal professionals with similar passions. The Student Bar Association serves as the school's student government, represents the interests of law students generally, allocates funding to other organizations and administers the school's honor code with the Honor Council.

- American Bar Association, Law Student Division
- American Civil Liberties Union
- American Constitution Society
- Asian Pacific American Law Students Association
- Black Law Students Association
- Business and Tax Law Association
- Cannabis Law League
- Christian Legal Society
- Colorado Law After School Support
- Colorado Law Outdoor Club
- Colorado Law Student Parents Group

- Silicon Flations Students Group
- Society for Work, Employment, and Labor Law at CU
- Spanish Speaking Law Students Association
- Sports and Entertainment Law Student Association
- Student Animal Legal Defense Fund
- Student Bar Association
- Women's Law Caucus

Career Development

Colorado Law prepares students for a wide variety of careers. The Office of Career Development offers students and alumni individualized career counseling and professional development advice to help them identify and achieve their career goals. The office has career counselors with JDs who have many years of experience in a wide range of law practice areas. It maintains state-of-the-art career development and job search resources and helps students prepare for and pursue job opportunities during and after law school.

Services and Programs

- **Career Counseling:** Each first-year student meets with a career counselor who helps with résumés and job search action plans.
- **Employer Outreach:** Counselors conduct extensive employer outreach in- and out-of-state.
- **Career Fairs/Symposia:** The office organizes employer networking opportunities on and off campus.
- **On-Campus Interviews:** Each year approximately 100 employers come on campus to interview students for summer clerkships, internships and associate attorney positions with law firms and government agencies.
- **Résumé Collections:** Résumés from interested students are sent to in- and out-of-state employers.
- **Brown Bag Speaker Series:** Practicing attorneys from the local and national legal community are regularly invited to speak to students during weekly lunch-hour informational sessions about what it's like to work in a variety of legal areas.
- **Job Postings:** Through a secure web-based system, students and alumni can review current job listings and an online resources library.
- **Mock Interviews:** Counselors set up appointments with students for practice interviews with the counselors or with volunteer attorneys. Students receive tips and feedback to help them improve.
- **Referrals:** Counselors help students connect with alumni and other legal professionals as resources for information about a field or practice area of law in Colorado or any other part of the country or world.
- **Mentoring and Community Involvement:** The office regularly helps students get involved in the legal community by referring them to mentor programs (including the Student Alumni Mentoring Program), bar associations, Inns of Court and other law-related organizations.

Job Opportunities

Colorado Law helps students pursue numerous job opportunities and helps connect them to valuable part-time and permanent legal positions, including:

- **Externships** are for students working unpaid in the legal community for academic credit, under the supervision of a field and faculty supervisor.
- **Honors programs** are prestigious programs for students and graduates to work within federal government agencies.
- **Judicial clerkships** are prestigious paid positions for new graduates working for judges in federal, state and appellate trial courts.
- **Summer law clerks** are paid part-time or full-time for first- or second-year students in law firms and other organizations.
- **Fellowships** provide funding for law students and graduates to work with public service organizations or academic programs.

Employment During Law School

The study of law is demanding and requires the highest level of concentration. Most students devote 50–70 hours a week to class time and study. Students may be employed for no more than 20 hours per week when enrolled in more than 12 credit hours, in accordance with ABA Rule 304(f).

Experiential Learning

Experiential education encompasses lawyering activities in which students receive experience outside the classroom—clinics, externships, appellate and trial competitions and voluntary public service work. Colorado Law's Experiential Learning Program gives greater coherence to our entire curriculum and builds linkages with faculty involved in experiential education and those involved in traditional classroom teaching.

Legal Clinics

Colorado Law's Clinical Education Program started in 1948 and now serves almost 900 clients each year. Clinics are courses that provide practical learning experiences for our students, much-needed assistance to those less fortunate in our community and invaluable service to the public good. By handling actual cases, students make the transition from legal theory to legal practice, enabling them to take classroom knowledge and turn it into real-world understanding. Under the supervision of expert clinical faculty, student practitioners take primary responsibility for understanding the goals of their clients, and working to represent those clients' interests persuasively and competently. Clinics are available to all interested students.

- American Indian Law Clinic
- Civil Practice Clinic

- Criminal Defense Clinic
- Criminal/Immigration Defense Clinic
- Entrepreneurial Law Clinic
- Juvenile and Family Law Clinic
- Natural Resources and Environmental Law Clinic
- Technology Law and Policy Clinic
- Sustainable Community Development Clinic

Public Service Pledge Program

Colorado Law is a public institution with a public spirit. The faculty and the students have a passion for and deep appreciation of a lawyer's civic responsibilities to serve the underprivileged and the community. Students who complete a voluntary pledge of at least 50 hours of law-related public service work, not for credit or other compensation, receive recognition on their transcripts. Such service provides students with valuable skills and values, such as legal research and writing, client interviewing and legal argument development. Students can perform pro bono work for any government agency engaged in legal work (administrative agencies, public defenders, district attorney offices and judiciary), nonprofits that provide legal services, public interest law firms or private firms on pro bono projects.

Trial Advocacy and Moot Court

Appellate advocacy, mock trials and moot court competitions help to develop skills in appellate brief writing and oral argument, and gain valuable trial practice experience. Colorado Law teams have consistently been extremely competitive and participate in and host more and more competitions each year. Coaching and support come from an experienced group of faculty, fellow students, alumni who recently competed and judges and lawyers in the community. Students may earn academic credit for their participation. Examples of recent competitions are:

- Constance Baker Motley National Moot Court Competition
- Emory Civil Rights and Liberties Competition
- Hispanic National Bar Association Moot Court
- Jessup International Law Moot Court Competition
- Jim R. Carrigan Trial Advocacy Competition
- Mardi Gras National Moot Court Competition
- National Moot Court Competition
- National Moot Court Competition in Child Welfare and Adoption Law
- National Student Trial Advocacy Competition
- National Telecommunications Moot Court Competition
- The National Trial Competition
- Native American Law Students Association Moot Court Competition
- Pace National Environmental Law Moot Court Competition
- Philip C. Jessup International Law Moot Court Competition:
- The Rothgerber Moot Court Competition
- Saul Lefkowitz National Moot Court Competition

Externships

Students may gain academic credit for performing substantive legal work with government agencies, public institutions and not-for-profit organizations. Students develop professional lawyering skills, gain insight into various aspects of the legal system and profession and cultivate a sense of professional responsibility. While uncompensated, students receive credit hours (1 credit hour per 50 hours of work) toward their degrees.

Research Centers

Widely recognized for its intellectual diversity and originality, the faculty at Colorado Law encompasses an array of prominent legal scholars. The faculty's record of scholarly publication is both extensive and frequently cited. Together with the faculty's commitment to public service, this work has positioned the faculty of Colorado Law to exert important and constructive influences on legal and public policy debates at the local, national, and international levels.

Colorado Law's three research centers have earned national prominence for their research, publications and leading conferences that debate legal and policy issues, foster practical solutions and innovative ideas, facilitate networking and produce scholarship. Students are an integral part of the centers. Students may work as volunteers, externs or research assistants on research projects, reports, newsletters and events. In addition, students will have unique access to national and local policymakers, researchers, scientists, entrepreneurs and legal practitioners in many areas of the law.

Byron R. White Center for the Study of American Constitutional Law

Named in honor of the retired Supreme Court Justice and CU alumnus, the Byron White Center (<http://www.colorado.edu/law/node/135/>) for the Study of American Constitutional Law was founded in 1990 to enhance the study and teaching of Constitutional law and stimulate public debate and understanding of our Constitutional system. Each year, the center gathers politicians, academics and practitioners for the Ira C. Rothgerber, Jr. Conference. Recent topics have included home rule, reapportioning Colorado, state initiatives, academic freedom and conscience and the free exercise of religion. The center is the cornerstone of Colorado Law's public service (<http://www.colorado.edu/law/node/1125/>) commitment.

Getches-Wilkinson Center for Natural Resources, Energy and the Environment

The Getches-Wilkinson Center (<http://www.colorado.edu/law/node/149/>) for Natural Resources, Energy, and the Environment is the 21st century name of the Natural Resources Law Center (NRLC) and crown jewel of Colorado Law's dedication to natural resources, energy, and the environment. The center is dedicated to serving the people of the American West, the nation and the world through creative, interdisciplinary research, bold, inclusive teaching and innovative problem solving in order to further true sustainability for our lands, waters and environment. The Getches-Wilkinson Center is building on the successful legacies not only of the NRLC, but also of other existing programs in natural resources, energy and the environment at Colorado Law.

The Getches-Wilkinson Center regularly hosts an array of conferences and distinguished speakers, including the Annual Martz Summer Conference, the Energy Innovation Speaker Series and various seminars for practitioners and the interested public. Students are invited to join these events and visit some of the center's ongoing projects, such as the longstanding work to improve western water management, to develop and deploy best management practices for oil and gas production and to develop practical strategies and solutions to provide appropriate sustainable energy technologies.

Silicon Flatirons Center for Law, Technology and Entrepreneurship

The Silicon Flatirons Center (<http://www.colorado.edu/law/node/151/>) for Law, Technology, and Entrepreneurship is Colorado Law's influential

foundation that supports and enables entrepreneurship in the technology community. The center is nationally recognized as a telecommunications law powerhouse. It hosts leading technology policy conferences with legal, technical, regulatory and business experts to elevate the debate around technology policy issues, facilitate networking and develop "human capital" in the Colorado technology community. Students assist on major research projects including the Software Regulation Clearing House and help organize 15–20 events a year on topics such as digital broadband migration, entrepreneurial law and startups, new technology, business plan competition, private equity, software patents and regulatory law and economics.

Academic Calendar & Exams

Academic Calendar

The campus operates year round, with fall and spring semesters of 16 weeks each, a winter session in between fall and spring semesters, and a summer term that includes two three-week sessions (Maymester and Augmester), two five-week sessions, an eight-week session, a 10-week session and two intensive (one- or more-week) sessions.

For a complete calendar of the Law School's academic and financial dates and deadlines, visit the CU Boulder Law School Registrar's Calendars and Schedules (<https://www.colorado.edu/law/academics/calendars-and-schedules/>) webpage. (<http://colorado.edu/registrar/>)

The University of Colorado at Boulder has a legal and moral obligation to accommodate all students who must be absent from classes or miss scheduled exams in order to observe religious holidays; and takes care to not inhibit or penalize these students for exercising their rights to religious observance. For further information, see the university policy on the Observance of Religious Holidays and Absences from Classes and/or Exams (<http://www.colorado.edu/policies/observance-religious-holidays-and-absences-classes-and-or-exams/>).

Final Examinations

For more information about final examinations, please see the Exam Procedures & Technology page (<https://www.colorado.edu/law/academics/courses-and-registration/exam-procedures-technology/>) of the CU Boulder Law website.

Academic Integrity

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish. The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

Honor Code

Academic Dishonesty includes any act in which a student gains, or attempts to gain, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Plagiarism.** Portrayal of another's work or ideas as one's own; improper citation of another's work, including, but not limited to, one's own previous work.
2. **Cheating.**

- a. **Unauthorized Use.** Use of prohibited notes or study aids; allowing another party to do one's work/exam and turning in that work/exam as one's own; copying another student's course work; collaborating on course work when prohibited; failing to abide by the specific written course instructions, including, but not limited to, exams, homework assignments, and syllabi; and/or use of electronic devices when not expressly permitted.
- b. **Clicker Fraud.** Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
3. **Fabrication.** Falsification or creation of data, research, or resources, altering graded work without the prior consent of the course instructor.
4. **Lying.** Deliberate falsification with the intent to deceive, as applied to an academic submission of information.
5. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, or, an assignment, or in the aiding of Academic Dishonesty.
6. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code violation, or in connection with any other form of Academic Dishonesty.
 - a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by SCCR staff.
7. **Unauthorized Access.** Gaining unauthorized access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; or secure information on an online server.
8. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course instructors involved.
9. **Aiding Academic Dishonesty.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
 - a. Sharing course materials, including but not limited to personal notes, in an unauthorized online bank or forum, whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code.

A student accused of violating the Honor Code has the right to due process through Student Conduct & Conflict Resolution. Students will receive notice through their Colorado.edu email address, and are encouraged to meet with a Conduct Coordinator to share their perspective on the allegations. Full details of the Honor Code adjudication process are on the Student Conduct & Conflict Resolution website (<https://www.colorado.edu/scrr/honor-code/>).

Academic Records

Diplomas

A diploma is issued for each degree earned at the University of Colorado Boulder. Diplomas are mailed to all graduating students approximately eight weeks after the close of the semester in which degree requirements

were completed and the student applied for graduation. All financial obligations with CU must be resolved before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (<http://www.colorado.edu/registrar/students/graduation/cediploma/>) for students who complete a university-approved certificate from Fall 2015 and onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. The hold prevents registration for future terms and prevents the release of the diploma and academic transcript. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (<http://www.heartlandecsi.com/>) website. Questions may be directed to University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar's Diplomas (<http://www.colorado.edu/registrar/alumni/diplomas/>) webpage.

Transcripts

Official Transcripts

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErX0); no IDentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

Transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (<https://buffportal.colorado.edu/>). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student's career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

Law School/Law Career Transcripts

The Law Registrar's Office can provide Law School/Law Career Transcripts for free for the Class of 1985 to the present. These transcripts are considered *unofficial* by university standards, but they will include all coursework taken specifically towards a degree at the University of Colorado Law School as well as Law School ranks, Public Service Pledge

awards, certificates and Order of the Coif and Dean's List notations, as applicable.

To order a Law School/Law Career transcript, students should send a request to lawreg@colorado.edu from their colorado.edu email address or scan and send a signed request to lawreg@colorado.edu (or fax the signed request to 303-492-1757, Attention: Law Registrar's Office). Requests for transcripts are processed in the order they are received and may take several business days during high volume periods. Please include the following information:

- Full name at graduation.
- Dates of attendance.
- Year of graduation (or intended year of graduation).
- Number of transcripts needed and whether you need transcripts in paper copy or as a PDF (please include the address if you need a paper version sent somewhere).

Admissions

Colorado Law values leadership, character, diversity and commitment to service in its students pursuing their Juris Doctor (JD). The small size of the incoming JD class—about 170 every fall—and the larger number of applicants require a very selective admissions process. In evaluating applications, the Admissions Committee relies on (1) the completed application form, (2) the report of LSAT scores, (3) undergraduate GPA and transcripts, (4) personal essay(s), and (5) recommendations. The Committee also conducts a holistic analysis of special qualities and individual circumstances such as motivation, undergraduate program, diversity in economic, social, or cultural background, employment or other experience (e.g., military), leadership, and perseverance in overcoming personal handicaps or disadvantages. Graduate level work is also considered. The Admissions Committee is also seeking evidence of character, leadership and diversity, which are the hallmarks of the Colorado Law student body.

Application Process

Regular admission applications with all required materials should be submitted starting Oct. 1. Find complete application instructions at www.lsac.org (<http://www.lsac.org/>) and on the Colorado Law (<http://www.colorado.edu/law/admissions/apply-colorado-law/>) website. The Admissions Committee considers regular decision applications beginning in October. Applicants are notified by letter of decisions from early fall until the class is filled. Admission from the waitlist, which is not ranked, can occur as late as August, and the number of offers varies from year to year.

International Students

International applicants have additional requirements as explained on the school's website, including transcripts showing completion of the equivalent of an American bachelor's degree, foreign degree verification and transcript translation, if applicable. The TOEFL is required of all students whose native language is not English, as a thorough and excellent command of written and spoken English is crucial to success in law school. After admissions, international students must submit a financial affidavit stating that they have the financial resources to support themselves while attending school in the United States, since the Colorado Law cannot offer loan assistance to international students.

Transfer Students

Students who have completed at least one full year of study (approximately 30 credit hours) at a law school accredited by the American Bar Association may apply for fall transfer admission to Colorado Law. Typically, applications for fall enrollment are accepted after May 1 and must be received by July 1. The number of transfer students admitted varies each year, and only those who have done very well in their law studies elsewhere have a substantial chance of admission.

Visiting Students

Colorado Law admits some students who are receiving their law degree from another law school to study here for the fall or spring semester or both. Admission as a visiting student is available to applicants who have completed one or two years of high-quality work at another law school and have demonstrated a compelling need to attend Colorado Law. Financial aid for visiting students is usually handled by a consortium agreement between Colorado Law and the degree-granting institution.

Credits & Grading

Grading System

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

Standard Grade Points per Hour of Credit

A	4.0 (Law School Numerical Grade 93 & Above)
A-	3.7 (Law School Numerical Grade 90-92)
B+	3.3 (Law School Numerical Grade 86-89)
B	3.0 (Law School Numerical Grade 83-85)
B-	2.7 (Law School Numerical Grade 80-82)
C+	2.3 (Law School Numerical Grade 76-79)
C	2.0 (Law School Numerical Grade 73-75)
C-	1.7 (Law School Numerical Grade 70-72)
D+	1.3 (Law School Numerical Grade 66-69)
D	1.0 (Law School Numerical Grade 63-65)
D-	0.7 (Law School Numerical Grade 60-62)
F	0.0 (Law School Numerical Grade 59 or Below)

Grading

Letter grades within the University's 12-step plus/minus grading system will be reported for all students in the JD degree program to the appropriate University administrative office. For each credit hour, the

letter grades shall have the credit point value shown above. Through the spring of 2012 for JD students who matriculated before the Fall 2010 semester, for Law School purposes only, a numerical system of grading shall be used in addition to the University's plus/minus grading system. For JD and LLM students who matriculate in the Fall 2010 semester or later, only letter grades shall be assigned.

Grade Symbols

I	incomplete; If the I grade is given, the instructor and the Dean's Office shall determine in writing the appropriate date for completion of the requirements of the course, such period not to extend beyond the end of the next regular (i.e., not summer) term. If the student fails to complete the requirements of the course by the assigned date, the I grade will be converted to an F. If, at the end of the next succeeding regular (i.e., not summer) term, the faculty member has not provided a new grade to the Law School Registrar, the I grade will be automatically converted to an F unless, prior to that time, the instructor and the Dean's Office have agreed that the grade of W is appropriate. The W grade should be given only where the circumstances preventing completion of course requirements are serious, unforeseeable, and beyond the student's control.
P	passing; pass-graded course shall mean that the grade of "pass" will be given when in the judgment of the instructor the quality and quantity of the work is such that on a graded basis such work would be equivalent to at least a C. Should the work not receive a grade of "pass," the work shall be assigned that letter grade between C- and F that the instructor determines is appropriate.
W	withdrew
***	class grades were not submitted when final grades were processed, or the student is currently enrolled in the course.

Explanation of an I (Incomplete) Grade

The grade I may be given if the instructor and the Dean's Office determine that 1) an incomplete grade is appropriate because of serious illness of the student or for other equally justifiable reason; or 2) the scope of the work involved in the course is such that it is appropriate to extend the time for its completion beyond the end of the semester.

Grade Point Average

The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, P+, ***, (grade not yet entered), W, and I are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/graded basis. Below is example GPA calculation for a hypothetical semester:

Grade Earned: A;	Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0
Grade Earned: A-;	Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8
Grade Earned: B+;	Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2
Grade Earned: P or P+;	Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)
Grade Earned: F;	Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0
Total of 15 credit hours with 44 credit points, so $44/15 = 2.93$ GPA	

For individual GPA calculations related to academic standing and graduation from a college or school, students should refer to their academic dean's office.

Credit Limits

For academic purposes, law students must be enrolled for a minimum of 10 credit hours to be considered full time in the fall and spring. For more information, visit the Colorado Law (<http://www.colorado.edu/law/>) website. Law students may apply a maximum of 18 credit hours toward a degree during the fall and spring semesters. Students who receive financial aid or veterans benefits or who live in university housing should check with the appropriate office regarding course-load requirements for eligibility purposes.

Graduation

Graduation

Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees are conferred at the close of fall semester, spring semester and summer session. Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar's Graduation & Commencement (<http://www.colorado.edu/registrar/students/graduation/>) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

Commencement

A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For details about the ceremony, visit CU Boulder's Commencement (<http://www.colorado.edu/commencement/>) website.

Diplomas

Please see the Academic Records (p. 1614) section.

Registration & Enrollment

Registration

Visit the Office of the Registrar's Academic Calendar (<http://www.colorado.edu/registrar/students/academic-calendar/>) webpage for specific academic and financial dates and deadlines. Students should also consult Colorado Law's Courses and Registration webpage (<https://www.colorado.edu/law/academics/courses-and-registration/>) for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (<http://www.colorado.edu/disabilityservices/>) website or call 303-492-8671.

When registering for courses, most Law School classes may be located searching under the subject code LAWS.

Student Portal

Student registration and other important information and services are available through the student portal (<https://www.colorado.edu/studentportal/>). Students access the portal using a secure CU login name and IdentityKey password. For more information and registration instructions, visit the Registration (<http://www.colorado.edu/registrar/students/registration/>) webpage.

Holds

A hold may be placed on a student's record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold in their student portal.

Special Registrations

University Employees and Dependents

CU Boulder offers a tuition benefit to eligible employees and their dependents. For current benefit information, visit Employee Services' Employee Tuition Waiver Benefit (<https://www.cu.edu/employee-services/employee-tuition-benefit/>) website.

Auditing

Individuals who have not been admitted to the university and who wish to attend regular classes may do so by obtaining auditor's status. Auditors must receive permission and obtain a signature from course instructors during the first week of class to be formally added to the roster.

Audited courses will not appear on any transcript, formal or informal, as no credit is awarded. Registered auditors receive class instruction, learning management system access and library privileges. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course and request to take the course as no-credit (https://www.colorado.edu/registrar/students/registration/register/edit/#what_it_is-1719). A course must be offered with the student option grading basis to be eligible for no-credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit.

Community Auditors

Community members age 18–54 can register for the Community Auditors program through Continuing Education by completing the Community Auditor Registration Form on the Community Auditors (<http://ce.colorado.edu/programs/community-auditors/>) webpage. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

Community auditors pay for three credit hours at the in-state undergraduate tuition rate in the College of Arts and Sciences. The cost is a flat rate and, with instructor permission, auditors may audit as many classes as desired. Nonrefundable payment is due at the time of enrollment.

Senior Auditors Program

Individuals 55 years and older can register for the Senior Auditors Program through the CU Boulder Alumni Association and qualify for reduced rates. Registration and eligibility information is available on the Senior Auditors (<http://www.colorado.edu/alumni/programs/senior-auditors/>) webpage. Contact the Alumni Association at 303-492-8484 for more information about this program.

Withdrawing from the Semester

A withdrawal from a Main Campus semester occurs if the student:

- Never registers for classes in a fall or spring semester
- Drops all classes for a semester
- Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar's Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage and review the current term's withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student's record. This hold prevents receipt of a diploma or an academic transcript of work at the university and registration for future terms. Students can

complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar's Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage. For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 62) or the Graduate Tuition and Fee Policies (p. 1001) sections.

Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (<https://www.colorado.edu/registrar/students/withdraw/>) webpage.

Law Student Withdrawal and Leave of Absence

A law student who desires to voluntarily withdraw from the university and drop all classes during the first (fall) semester must reapply for readmission, may only be readmitted to resume in a subsequent fall semester, and shall receive no readmission preference. Students who withdraw after completing the fall semester but before beginning on the second (spring) semester, must reapply for admission, shall normally be expected to wait until the next spring semester to resume their studies, and shall receive admission preference only in the next regularly scheduled spring semester. Law students *must* apply for a leave of absence (<https://www.colorado.edu/registrar/students/withdraw/leave-of-absence/>) or will be discontinued from the university. Department and college approval is required on the application.

Active Duty

Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/#military_personnel_amp_emergency_workers-466) webpage.

Student Affairs

Health & Wellness

Health and Wellness Services

Health and Wellness Services is a part of the CU Boulder Division of Student Affairs. As part of Student Affairs, we are collectively committed to the success and well-being of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings. To learn more, visit Health and Wellness Services (<http://www.colorado.edu/health/>).

Medical Services

Medical Services is the primary health care resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (<https://www.colorado.edu/healthcenter/>). (<https://www.colorado.edu/healthcenter/>)

Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus and online mental health and psychiatric services for a variety of concerns including academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (<http://www.colorado.edu/health/counseling/>).

Disability Services

Disability Services is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit Disability Services (<http://www.colorado.edu/disabilityservices/>).

CU Boulder Student Health Insurance Plan (SHIP)

All students are required to have health insurance while attending CU Boulder. Students may elect coverage through an individual health insurance plan, through a family member or employer or the CU Gold Student Health Insurance Plan (SHIP). Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process.

All students, regardless of their insurance plan, have **full access** to the services provided by Health and Wellness Services.

For more information, visit the Health Insurance Requirement (<http://www.colorado.edu/health/insurance/health-insurance/webpage>).

Note: Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (<http://connectforhealthco.com/>) website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (<https://www.healthcare.gov/>) website.

Housing

Off-Campus Housing

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie's List, CU's rental database, on the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu/>) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (<http://offcampushousing.colorado.edu/>) website or call 303-492-7053. Office hours are 8 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.

Graduate & Family Housing

The University of Colorado Children's Center provides child care for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing & Dining Services (<https://living.colorado.edu>) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office
1350 20th Street, #A10
University of Colorado Boulder
Boulder, CO 80302
T: 303-492-6384
graduatefamilyhousing@colorado.edu

Student Conduct & Colorado Creed

Student Conduct & Conflict Resolution

The mission of Student Conduct & Conflict Resolution is to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors.
- Promoting harm repair and responsible community membership.
- Cultivating the wellbeing and safety of the University of Colorado (CU) Boulder community.

Clarification of Values

1. The student will understand the effect of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy, and will commit no further violations of policy.
3. The student will gain understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through the Student Conduct & Conflict Resolution process, the student will be asked to reflect on their beliefs, ethics, and values.
 - a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.

6. The student will contribute positively to the university community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

Authority

Article 7, Part B, of the Laws of the Regents requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding behavioral problems should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, University of Colorado Boulder, 10 UCB Boulder, CO 80309, phone 303-492- 5550.

Jurisdiction

1. This document governs:
 - a. Student conduct that occurs on, or as it relates to, university property or at official functions and university-sponsored programs conducted away from the campus. University property is defined as land, buildings, digital space, and facilities in possession of or owned, used, or controlled by the university, or funded by university budgets.
 - b. Student conduct that occurs off university property is subject to this policy if it:
 - i. adversely affects the health, safety, or security of any member of the university community, including the student alleged to have violated university policy, or the mission of the university;
 - ii. involves any records or documents of the university;
 - iii. involves conduct that may be a violation of federal, state, or local law as determined by SCCR.
 - c. For purposes of this policy, the university's mission is broadly defined to include both its academic goals and the importance of developing civic responsibility in our students.
 - d. Wherever the Student Code of Conduct refers to "responding student", the same also applies to Recognized Student Organizations (RSOs). RSOs, as described in the Student Organization Handbook (<https://www.colorado.edu/involvement/>), are general student organizations recognized by the Center for Student Involvement (CSI) and the University. For additional information, see L.5 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
2. Actions taken under the conduct process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. The conduct process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the conduct officer. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and adjudicating an incident.

3. The unexcused failure of a responding student to appear and/or respond to the conduct process does not prevent the university from proceeding with or completing the conduct process.
4. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence, and gender/sex-based stalking), protected class discrimination, harassment, and any related retaliation, see Section L.1 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
5. For jurisdictional information pertaining to academic misconduct, see Section L.2 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
6. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to Student Conduct & Conflict Resolution or the Office of Admissions.

Student Conduct Process

Informal Resolution

This process may generally include, but is not limited to, a meeting with a conduct officer, completion of the agreement, and/or participation in the Restorative Justice program as is referenced in Section H.5 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).

During the meeting, if the conduct officer determines that the informal resolution process may be appropriate, the conduct officer will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational sanctions assigned by the conduct officer, then SCCR will consider the matter to be resolved informally.

Formal Resolution

This process generally includes: (i) written notice of the factual allegations and alleged violations of the Student Code of Conduct; (ii) the opportunity to meet with the conduct officer to address the allegations and provide information to the conduct officer; (iii) the conduct officer reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and (iv) written notice to the responding student of the conduct officer's determinations.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing Policies (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.

Actions taken under the conduct process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. The conduct process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the conduct officer. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and adjudicating an incident.

The unexcused failure of a responding student to appear and/or respond to the conduct process does not prevent the university from proceeding with or completing the conduct process.

Cases involving sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) policies. For more information, visit the OIEC (<https://www.colorado.edu/oiec/>) website or call 303-492-2127.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the Policies (<https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/>) webpage.

Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (<http://www.colorado.edu/creed/>) website.

Student Resources

The Division of Student Affairs (<http://www.colorado.edu/studentaffairs/>) offers many on-campus resources for our students. Visit our offices to learn more.

Student Life & Involvement

- Center for Student Involvement (<https://www.colorado.edu/involvement/>): Be involved! Find your group – and yourself – by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (<https://custudentgov.org/>): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (<https://www.colorado.edu/ecenter/>): Helping CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (<https://www.colorado.edu/greeks/>): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community of 28 chapters.
- Housing & Dining (<https://www.colorado.edu/living/>): Explore information about on-campus life, including residence halls, meal plans and dining options!

- New Student & Family Programs (<https://www.colorado.edu/orientation/>): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (<https://www.colorado.edu/offcampus/>): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.
- Residence Life (<https://www.colorado.edu/living/>): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (<https://www.colorado.edu/umc/>): Home to the CU Book Store and student offices, as well as plenty of entertainment and dining options.

Health & Wellness

- Counseling & Psychiatric Services (<https://www.colorado.edu/counseling/>): Offers confidential, on-campus mental health and psychiatric services including workshops, groups, individual counseling and medication management.
- CU Collegiate Recovery Center (<https://www.colorado.edu/recoverycenter/>): A supportive student community offering free support meetings, sober social events, recovery coaching and referrals for students.
- Health Promotion (<https://www.colorado.edu/health/promotion/>): Assists students in developing skills to make healthy decisions through outreach and education, including workshops, classes, events and conversations.
- Medical Services (<https://www.colorado.edu/healthcenter/>): Provides on-campus health and wellness services including medical care, nutrition, physical therapy, sexual and reproductive health and more.
- Office of Victim Assistance (<https://www.colorado.edu/ova/>): Offers free and confidential support, consultation, advocacy and counseling for students, staff and faculty who've experienced a traumatic, disturbing or life-disruptive event.
- Recreation Services (<https://www.colorado.edu/recreation/>): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and the Outdoor Program.

Student Support & Development

- Career Services (<https://www.colorado.edu/career/>): Find student and alumni jobs, fine-tune your resume, learn about your strengths, land that internship and make connections with employers.
- Student Conduct & Conflict Resolution (<https://www.colorado.edu/sccr/>): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (<https://www.colorado.edu/studentlegal/>): Offers accessible, low-cost legal advice and education to students regarding their rights, responsibilities and how to navigate the legal system.
- Students Support & Case Management (<https://www.colorado.edu/studentaffairs/sscm/>): Provides individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (<https://www.colorado.edu/veterans/>): Serves prospective and current student veterans and veteran dependents, including program information, policies, pay and support.

- Volunteer Resource Center (<https://www.colorado.edu/volunteer/>): Explore volunteer opportunities for CU Boulder students and staff throughout the greater Boulder community.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (<https://www.colorado.edu/registrar/students/records/ferpa/>) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (<https://www.colorado.edu/registrar/students/records/ferpa/glossary/>)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (<https://www.colorado.edu/registrar/students/records/ferpa/exceptions/>)
- To fulfill a request for data that CU Boulder defines as directory information (<https://www.colorado.edu/registrar/students/records/ferpa/directory-info/>)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (<https://www.colorado.edu/registrar/students/records/privacy/guest-access/>) and FERPA Consent to Release (<https://www.colorado.edu/registrar/students/records/privacy/consent/>). You may restrict the release of directory information by placing full privacy (<https://www.colorado.edu/registrar/students/records/privacy/full/>) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name¹
- hometown (city, state)
- campus email address²
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

¹ If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (<https://www.colorado.edu/registrar/students/graduation/>) for graduation and commencement materials.

² Campus email addresses are only disclosed to requestors who agree to not use them for solicitation.

Withholding Directory Information

Students have the right to withhold directory information from inquirers. To restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Confidential Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (<http://www.colorado.edu/registrar/students/records/privacy/>) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the

student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Student Finances

All admission decisions are made without regard to students' financial need. Financial assistance may be available in the form of federal and private educational loans, grants, work-study and scholarships. Students applying for financial aid, private law scholarships or grants based on financial need must complete and submit the Free Application for Federal Student Aid (FAFSA) (<https://studentaid.gov>) as soon as possible after admission. The recommended FAFSA deadline is February 15 in order to be considered for the maximum financial aid.

Eligible students are offered Federal Direct Unsubsidized Loans up to a maximum of \$20,500 per year. Federal Graduate PLUS loans are also available, but require a credit check. Private loans (<https://www.colorado.edu/financialaid/node/29/>) have interest rates and fees that vary according to the lender, the credit rating of the student and whether there is a co-signer. Both loan fees and interest rates may be higher than those of the Direct loans and there is no cap on interest rates.

Scholarships, Fellowships and Awards

A number of scholarships, fellowships and awards are given annually on a competitive basis for academic and financial considerations. All admitted first-year students are considered for scholarships, as recipients are selected by the Admissions and Financial Aid Committee after an offer of admission has been made. It is possible for scholarships to be awarded through August. Colorado Law also offers some scholarship money to second-year and third-year students each spring. These scholarships are awarded based on academic performance and other criteria, such as economic need and demonstration of assistance in advancing the diversity of the student body.

Tuition Classification

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. The University of Colorado does not have discretion to make exceptions to the rules as established by state law.

New students are classified as in-state or out-of-state residents for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to in-state status must submit a petition with documentation to have their status reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

Basic Requirement for Establishing Colorado Residency

To become eligible for in-state residency, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits. An individual who seeks to establish domicile while registered as a student is presumed to establish Colorado domicile solely for tuition purposes unless there is clear and convincing evidence to the contrary.

Colorado in-state tuition classification requires Colorado domicile for 12 consecutive months. A person must be 22 years of age or older, married, a graduate student or an emancipated minor to begin the 12-month period of establishing domicile in Colorado. Unemancipated minors qualify for in-state status if their parents have been domiciled in Colorado for at least one year.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, but individuals should take action on all factors that are appropriate in their circumstance.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with three years of Colorado high school and graduation
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage)

Requirements, including spouse and child eligibility, are detailed on the Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage.

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is someone under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who give false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

For more information on all requirements, see the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

University Policies

Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a

responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (<http://www.colorado.edu/aod/>) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
- **Safety:** Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (<http://www.colorado.edu/health/counseling/>) webpage or call 303-492-2277.

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (<http://www.colorado.edu/dontignoreit/>) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (<http://www.colorado.edu/police/>) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ <https://twitter.com/cuboulderpolice/>) CUBoulderPolice) and Facebook (CUBoulderPolice (<https://www.facebook.com/CUBoulderPolice/>)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (<http://www.colorado.edu/policies/student-e-mail-policy/>) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology's Messaging and Collaboration webpage (<https://oit.colorado.edu/node/237/>).

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common

consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (<http://www.colorado.edu/libraries/copyright-information/>) website.

Diversity & Nondiscrimination

Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning"—from the Guidelines for Diversity Planning (<https://www.colorado.edu/odece/diversity-plan/>).

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (<http://www.colorado.edu/oiec/>) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed in order to minimize disruptions to education or employment and to help keep the involved parties and

the campus safe. OIEC also offers education and assessment to identify areas in need of improvement and foster a more welcoming campus culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (<https://www.colorado.edu/oiec/>) website or call 303-492-2127.

Programs of Study

Colorado Law's curriculum provides students one of the best comprehensive legal educations in the nation, employing a solid foundation in the fundamentals of law, robust theoretical inquiry, doctrinal and policy analysis, real world experience, legal reasoning tools and professional skills. Our faculty members are passionate about teaching and are committed to providing a well-rounded learning experience that prepares students to serve wisely and with professionalism.

Graduate Degrees

- Law - Juris Doctor (JD) (p. 1665)
- Law - Master of Laws (LLM) (p. 1664)
- Law - Master of Studies in Law (MSL) (p. 1664)

Certificates

- American Indian Law (p. 1668)
- Energy, Environmental, and Natural Resources Law and Policy (catalog.colorado.edu/law/programs-study/natural-resources-law-policy-graduate-certificate/)
- Entrepreneurial Law (p. 1670)
- Health Law and Policy (p. 1671)
- International Law (p. 1672)
- Juvenile and Family Law (p. 1673)
- Tax Emphasis (p. 1673)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Aaronson, Norman F.
Professor Emeritus; JD, Boston University

Professor, Endowed/Named Professor; JD, Yale University

Wilkinson, Charles F.
Professor Emeritus; LLB, Stanford University

Courses

LAWS 5064 (1-2) Legal Analysis

Designed to help students develop the analytical skills necessary for success in law school and on the bar exam. Students will strengthen their core analytical skills, written communication skills, and ability to retain information. The ability to engage legal questions at the highest level is a skill that can be practiced and improved.

Requisites: Restricted to Professional Year 1 Law students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 5103 (1) Legal Ethics & Professionalism: What Kind of Lawyer Do You Want to Be?

Explores both the kind of law students might decide to practice and the ethical, personal and professional commitments central to the practice of law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5121 (4) Contracts

Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parole evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment and specific performance.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 5201 (1) Entrepreneurship, Innovation and Public Policy

Explores cutting edge questions around entrepreneurship, including being an entrepreneur, leadership and what makes a great founding team, building and scaling a business, entrepreneurial communities, financing entrepreneurial companies, leadership in government, entrepreneurship and innovation policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Business

LAWS 5203 (1) Legal Ethics, Professionalism and Creative Problem Solving

Developing reflective, creative problem solving and ethical legal professionals by touching a core set of issues facing lawyers, including the duty of confidentiality to clients and the hazard of conflicts of interest, providing students with an opportunity to confront these challenges in an interactive and engaged environment.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Electives

LAWS 5205 (3) Legislation and Regulation

Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way that implementing institutions, courts and administrative agencies, interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies and the courts.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 5211 (1) Framing and Legal Narrative

Thinking through the fundamental concepts that inform and animate different areas of law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

LAWS 5223 (2) Legal Writing II

Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5226 (2) Legal Writing I

Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 5303 (4) Civil Procedure

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5313 (3) Civil Procedure 2

Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5323 (1) Courtroom Observation Civil

An elective that requires 15 hours observing actual civil proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5425 (3) Torts

Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 5503 (4) Criminal Law

Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional limits upon it.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 5513 (1) Courtroom Observation Criminal

An elective that requires 15 hours observing actual criminal proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5624 (4) Property

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 5634 (2-3) Property 2

Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 5646 (1) Foundations of Legal Research

Designed to move students from the brief introduction to legal research offered in the first-year legal writing classes to the problem-centered research students will perform starting in the summer after their first year. Provides students with a conceptual understanding of the organization and connectivity of legal authority and with instruction in research methodology at both the project and resource levels.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 5803 (1) Courtroom Observation International

An elective that requires fifteen hours observing proceedings before an international tribunal(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. The proceedings observed will be available streaming online and the professor will provide information about how to gain access to them.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6001 (4) Commercial Transaction

Grading Basis: Letter Grade

LAWS 6002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife and wilderness resources on public lands.

Requisites: Requires prerequisite course of LAWS 6112 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6004 (3) Real Estate Transactions

Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 6005 (4) Constitutional Law

Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6007 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6700

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6008 (3) Foundations of International Legal Thought

Provides students with a broad historical and philosophical introduction to international law. Addresses changing conceptions of sovereignty between 1492 and World War II, the contexts of the Spanish conquest of the Americas, the international legality of the slave trade, relations between the Ottoman Empire and the "Great Powers", the Chinese opium wars and the rise of modern international institutions.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6009 (4) Legal Aid Civil Practice 1

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6011 (3) Payment Systems

Examines the methodology and policies of Articles 3 and 4 of the Uniform Commercial Code, dealing with such topics as negotiable instruments, bank deposits, collections, letters of credit and electronic fund transfers.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6019 (4) Civil Practice Clinic 2

Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills.

Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6021 (3) Secured Transactions

Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6024 (3) Real Property Security

Examines basic mortgage law, including use of mortgage substitutes (e.g., deeds of trusts and installment land contracts). Covers foreclosure and redemption and related problems; special priority problems in land acquisitions and construction financing; special financing devices, including variable-interest and wraparound mortgages; and problems relating to the transfer of the mortgagor's and mortgagee's respective interests.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property, Trust and Estate and Land Use

LAWS 6029 (4) Criminal and Immigration Defense Clinic

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6031 (2) Consumer Protection Laws and Policies

Focuses on deceptive trade practices and consumer rights. Reviews the law of deception/misrepresentation at common law, and federal and state laws regarding unfair acts and practices. Covers credit practices, environmental and health claims, and telecommunications and privacy. Discusses remedies, including governmental enforcement actions, and individual and class actions.

Grading Basis: Letter Grade

LAWS 6035 (3) White Collar Crime

Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection and victim notification and restitution options.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6039 (4) Criminal Defense Clinic 2

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.

Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6045 (3) Criminal Procedure

Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation and lineup identification.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6049 (4) Legal Assistance 1: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Grading Basis: Letter Grade

LAWS 6055 (3) Post-Conviction Criminal Procedure

Addresses sentencing process and schemes, direct appeals, probation modification and revocation, parole revocation, pardon and commutation processes, post-conviction litigation and appeal in both state and federal court, federal review of state convictions through habeas and/or the AEDPA, and ethical issues that arise in post-conviction proceedings.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6059 (2-3) Legal Aid and Defender

Grading Basis: Letter Grade

LAWS 6060 (3) White Collar Crime Practicum

Addresses the non-trial portion of white collar criminal law. Drawing examples and problems from wire fraud, securities fraud, health care, and computer fraud contexts, explores a white collar case's major investigative and charging phases, corporate and organizational issues, as well as pleas and punishment.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6065 (3) Media, Popular Culture, and the Law

Examines how the institutions, practices, and the very identity of the law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed is: to what extent, and how are the forms and methods of the new media, having an effect on the perception, role and identity of law?

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6069 (4) Immigration Clinic

Emphasizes practice skills in immigration cases. Includes litigation before Federal Immigration judges, Board of Immigration Appeals, and Federal Circuit Court of Appeals.

Requisites: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

Grading Basis: Pass/Fail

LAWS 6079 (4) Criminal Defense Clinic

Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy and evidence presentation. Concludes with full mock trial.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6089 (4) Legal Assistance 2: Federal Courts

Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

Grading Basis: Letter Grade

LAWS 6099 (4) Family Law Clinic

Represents low-income clients in family law cases in local state district court. Students will gain court-based experience in dissolution's and allocations of parental responsibilities. Seminar component includes instruction on substantive family law, related ethical issues, and theoretical backgrounds of poverty lawyering.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation, Negotiation and Dispute Resolution

LAWS 6103 (2-3) Legal Ethics Professionalism

Examines the legal profession as an institution, its history and traditions and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 6105 (2) Defending Immigrants in Criminal and Immigration Courts

Addresses legal procedures, pleadings and client advocacy matters involved in the representation of Spanish-speaking clients who have been arrested for criminal offenses and who have been issued a detainer by Immigration and Customs Enforcement for possible immigration removal proceedings. Provides overview of criminal defense concepts, and how criminal defense attorneys must be prepared to competently counsel their clients who are facing removal proceedings in the federal immigration system.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 6108 (3) Conflict of Laws

Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6109 (2) Trial Advocacy

Focuses on voir dire, opening statement, direct examination of witnesses and cross examination.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6112 (3) Foundations of American Natural Resources Law

Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6113 (2) Legal Ethics and Professionalism: Ethics and the Law of Lawyering

Continuation of LAWS 5103. Focuses on the Model Rules of Professional Conduct. Provides the nuts and bolts of the ethical rules needed to begin to explore externships, clinics, pro bono projects and other practice experiences during law school.

Requisites: Requires prerequisite course of LAWS 5103 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6114 (2) Construction Law

Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship and ADR in construction. Provides transactional-practice oriented exercises.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 6117 (3) Survey of Business Enterprise Tax

Makes a comparative survey of federal income taxation of C corporations, S corporations, and partnerships/limited liability companies, the principal entity choices for conducting business in the United States. Includes formation, operations, distributions, sales of interests, and liquidation. Suitable for students seeking introductory background for business or real estate practice, without the detail required for a tax specialist.

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 6119 (1) Deposition Skills

Provides valuable skills to assume active roles in the deposition process. Explores why and when to take depositions; drafting and objecting to deposition notices for individual deponents, non-party witnesses and corporate designees; drafting successful outlines, proper questions and objections; using exhibits; furthering case theory, making and using stipulations; using depositions in pretrial motions and at trial.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6122 (2) International Natural Resources Law and Policy

Examines the suite of policy issues and legal ramifications associated with sustainable natural resource development. Examines most recent research on the "resource curse" theory. Examines recent policy developments and discussions that have occurred among industry, NGOs, multilateral development agencies and governments. Examines issues related to bribery and corruption in developing country environments and dispute resolution mechanisms at national and local levels.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment Natural Resources

Departmental Category: International Comparative Law

LAWS 6123 (2) Legislative and Policy Drafting

Exposes students to the process of drafting and amending enacted legal texts such as statutes, regulations, and policies of both governmental and non-governmental entities. Students will critically examine lawyers' roles as counselors, advocates and experts in different legislative and policy-drafting contexts.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6128 (1-3) Statutory Interpretation

Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6138 (2-3) Federal Tax Politics

Studies the tax system as the nexus of politics and economics. Examines how various interests and entities use the many tools of political power to shape the tax system. Intended for those interested in politics and legislation, rather than for tax specialists.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6157 (3) Corporate Taxation

Examines the federal income taxation of \checkmark subchapter C \checkmark corporations and their shareholders. Topics may include choice of entity, operations, distributions, redemptions, formations, liquidations, taxable asset and stock acquisitions, and tax-free reorganizations (that is, mergers and acquisitions).

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6450

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6167 (3) Partnership Taxation

Examines the federal income taxation of partnerships and other pass-through entities, which represent most small businesses in the United States. Topics may include the allocation of operating income and deductions among owners, contributions and distributions of property, and acquisitions and dispositions of partnership interests by partners.

Requisites: Requires a prerequisite course of LAWS 6007 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 6170 (1) E-Discovery

Exposes students to the legal and practical challenges presented by E-discovery and how electronically stored information shapes litigation and the pretrial process. Students gain an understanding of how electronically stored information can impact an overall discovery strategy and how this complicates a lawyer's ethical and professional obligations.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6177 (1-2) Civil Tax Controversies

Explore critical rules that drive the administration of our tax system, as well as policy and strategic considerations in the application of these rules. This course would address return filing, statutes of limitations, and civil penalties; audit, deficiency assessments, and administrative appeals; litigation in U.S. Tax Court and U.S. District Court; and ethical considerations. This course would be relevant not only to students interested in litigation, but also to students with a transactional focus.

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 6179 (2) Trial Practice

Students apply the rules and doctrine of evidence in simulated trial settings. Must be taken with the corresponding section of Evidence. Satisfies the trial practice requirement and counts 2 hours toward the 14 credit hour maximum of clinical hours counted toward graduation.

Grading Basis: Letter Grade

LAWS 6201 (3-4) Agency, Partnership, and the LLC

Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs).

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6205 (3) Lawyers for Social Change

Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 6206 (3) Litigation Drafting

Examines the intersection of civil procedure and legal writing. Emphasizes the drafting of persuasive adversarial litigation documents, including complaints, answers, motions in limine, motions to dismiss, motions of summary judgment, and jury instructions. Intensive writing and workshop format.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6207 (2) Writing in the Regulatory State

Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.

Grading Basis: Letter Grade

LAWS 6209 (4) Sustainable Community Development Clinic

Provide legal and policy advice, guidance and representation related to sustainable development with a focus on fostering social enterprise, healthy communities and poverty reduction.

Grading Basis: Letter Grade

LAWS 6210 (2-3) Comparative Law

Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Topics include the role of lawyers, civil dispute resolution, criminal procedure and employment discrimination. Covers different legal systems in different years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6211 (3-4) Corporations

Covers formation of corporations and their management; relations among shareholders, officers and directors; the impact of federal legislation on directors' duties; the special problems of closed corporations.

Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6213 (2) Advanced Appellate Advocacy

Advanced study and practice of written and oral appellate advocacy. Builds on the first-year advocacy course, but provides more advanced techniques for brief writing, and preparing for and conducting oral argument. Students are required to write an appellate brief and participate in several oral arguments, and receive detailed, one-on-one critiques of work product.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6217 (3) Estate and Gift Tax Planning

Explores structural and planning aspects of the current federal wealth transfer tax system, including the federal tax code provisions governing estate and gift taxation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7217 or ACCT 6720

Requisites: Requires prerequisite course of LAWS 6104.

Recommended: Prerequisite LAWS 6007.

Grading Basis: Letter Grade

LAWS 6220 (3) Introduction to Jewish/Israeli Law

Outlines the history and basic principles of Jewish Law, Halakhic system that encompasses Biblical law and the Rabbinic law. Covers Legal Sources of the Jewish laws, interpretation, legislation, custom, precedence and legal reasoning. Explores the study of modern legal system of the state of Israel and examines the problematic nature of the incorporation of the Law of personal status in the Rabbinical and in general courts.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6221 (3) Compliance

Covers requirements for corporate compliance programs and key components of them, including the role of audit committee, internal audit and ethics and compliance. Looks closely at different compliance regimes, including Sarbanes Oxley, the privacy and security components of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), the evolution of other data privacy standards and the anti-corruption standards of the Foreign Corrupt Practices Act and the UK Bribery Act.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6223 (3) Research and Writing in the Regulatory State

Focus on developing in students the research, writing and analytical skills necessary to operate within any highly regulated field. Students will work broadly on research and writing skills required in a regulatory practice and narrowly on how that applies to particular areas of expertise, to gain an understanding of a particular area of the law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6226 (1-3) Advanced Legal Writing

Builds on skills learned in the first-year legal writing course to improve written legal analysis. Students will complete multiple written assignments and will receive individual feedback on their work. Sections vary significantly depending on the professor; please check the Legal Writing page of the Colorado Law website to read each professor's course description.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6228 (1) Writing in Context

Provides the opportunity to improve legal writing and analytical skills in a particular field of law. This course will be offered in conjunction with a doctrinal course, and the writing assignments will be based on the law taught in the doctrinal course. Students enrolled in this course will need to be concurrently enrolled in the doctrinal course.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to 2L or 3L students only.

Grading Basis: Letter Grade

LAWS 6236 (2) Judicial Opinion Writing

Considers the contemporary American judicial opinion in historical and comparative context. Examines institutional constraints and emerging challenges to judicial decision-making. Analyzes individual opinion authors' writing styles. Builds upon the first-year legal-writing curriculum. Challenges students to develop a personal style and approach to writing and editing opinions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6246 (2) Introduction to United States Legal System/Legal Reasoning, Research and Writing

Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. The course will provide a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. The course will also introduce students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.

Grading Basis: Letter Grade

LAWS 6270 (1-2) Law and Mathematics

Covers basic mathematical concepts frequently encountered in the practice of law. Examines the relationships between evidence, calculation, and truth. Intended especially for students who lack confidence in their math skills and/or have not previously studied statistics, but all are welcome.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 6271 (1-2) Special Topics: Deals Lab

Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite LAWS 6211.

Grading Basis: Letter Grade

LAWS 6280 (1) Intensive Intro to Financial Info, Accounting and the Law: Accounting Boot Camp

Exposes students to the basics of financial accounting and when and how lawyers encounter accounting problems. Students will leave the course with an understanding of the basic framework of accounting, including the double-entry method, balance sheets, income statements, and statements of cash flows; time value of money; discount rates; basic methods of business valuation; and risk and diversification concepts.

Grading Basis: Letter Grade

LAWS 6281 (3) Accounting Issues for Lawyers

Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6301 (3) Introduction to Intellectual Property Law

Provides an overview of our nation's intellectual property laws, including patents, copyrights, trademarks and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues and remedies.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5245

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6302 (3) Water Resources

Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed and protected.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6308 (2) Law and Neuroscience

Covers neuroscience basics and explores the relationship between the law and recent neuroscientific discoveries in domains including pain, memory, lie detection, psychopathy and criminal responsibility.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6311 (1) National Security and Privacy Law

Introduces national security and privacy law and relevant law, regulations, rules, policies, and guidelines.

Grading Basis: Letter Grade

LAWS 6315 (2) The Prosecutor's Role in the Criminal Justice System

Designed to familiarize students with the professional and ethical duties of the prosecutor in the criminal justice system, with the goal of encouraging students to think about the role that prosecutors play. While the focus of the materials and presentations will center on the Colorado criminal Justice system, the concepts and principles addressed translate to all state systems and the federal system. National trends and legislative policy decisions related to criminal law, and their potential impact on public safety and prosecution efforts will also be discussed.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Criminal

LAWS 6318 (3) Economic Analysis of Law

Introduces the basic elements of economic theory and emphasizes demand and utility, cost and optimality.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6321 (2-3) Computer Crime

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6328 (3) Financial Decision-Making

Applies concepts, ideas, insights and principles of modern finance to real-world situations that lawyers will face in many areas of law. Analyzes present discounted value (time value of money), risk versus return, asset diversification, portfolio theory, efficient markets hypothesis, arbitrage, financial options, real options, financial signals, human capital, behavioral finance, socially responsible investing, neurofinance, happiness finance and financial bubbles and crashes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6331 (1) The Technology of Privacy

Explores the escalating debates by policymakers, scholars, advocates and industry representatives about the growing spread of tracking and surveillance in society. Debates are being spurred by the pace of changes to technology and particularly of changes to Internet and mobile technology. Practitioners in information privacy law or technology policy must understand the past, present, and likely future, of the technology of privacy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6338 (1) Understanding the Global Financial Crisis

Explores the causes and consequences of the global financial crisis. Analyzes financial instruments and institutions at the heart of the crisis – including asset-backed securities, credit derivatives, government-sponsored entities, credit rating agencies, hedge funds, and financial conglomerates – and places them in the context of a larger "shadow banking system". Examines the building blocks of financial reform.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6353 (3) Evidence

Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6361 (2-3) Information Privacy and Cybersecurity

Explores the laws that regulate the basic technologies of the internet and the management of information in the digital age. It examines the most significant statutes, regulations and common law practices that comprise this emerging legal framework.

Grading Basis: Letter Grade

LAWS 6363 (5) Evidence and Trial Practice

Studies methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.

Grading Basis: Letter Grade

LAWS 6373 (3) Federal Litigation: Everything but the Trial

Litigates through all pretrial phases as plaintiff's counsel, a mock federal case: an employee's challenge to compensation and termination, with possible claims including breach of contract, breach of the implied covenant of good faith and fair dealing, violation of wage payment statutory and regulatory requirements, and fraudulent inducement to contract.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6383 (1) Applied Evidence

Provides the opportunity to improve the legal writing and analytical skills by practicing written analysis based on the law of Evidence. Professors Griffin and Bloom designed materials specifically for this course, which is designed to be taken concurrently with Professor Bloom's Evidence class. Student receive individual feedback on every exercise and assignment.

Requisites: Requires corequisite course of LAWS 6353.

Grading Basis: Letter Grade

LAWS 6400 (3) International Law

Examines the nature, structure and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6401 (1) Foreign Corrupt Practices, Anti-Bribery and Anti-Trafficking

Examines Foreign Corrupt Practices Act and similar legal regimes that target bribery and trafficking.

Grading Basis: Letter Grade

LAWS 6410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6415 (2-3) Drug Product Liability Litigation: Principles and Practice

Explores product liability lawsuits and litigation. Explores law of product liability and the tools necessary to successfully litigate these cases. Considers the theory and practice of lawsuits now and after the Supreme Courts landmark decision in Wyeth v. Levine (2009). Focuses on similarities and differences between the special context of FDA regulation. Considers the legal principles governing such lawsuits such as inadequate warning, the Learned intermediary Doctrine and medical causation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business and Commercial Law

LAWS 6420 (1) Law and the Holocaust

Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6430 (1-2) International Trade Litigation Lab

Examine international trade litigation as practiced in the U.S. This course will provide an overview of antidumping and countervailing duty law and regulations. Students will interpret and analyze case precedent and argue a hypothetical case in this area of law. Effects of trade cases on foreign governments and economies and on companies' business practices will be examined.

Requisites: Requires prerequisite of LAWS 6410 (minimum grade C-) or co-requisite of LAWS 6410.

Grading Basis: Letter Grade

LAWS 6458 (2) Creative Writing for Lawyers

Requires substantial writing and reading. Begins with participants bringing to class a piece of creative writing consisting of three to five thousand words. Each session consists of one hour of discussion and critique of an assigned writing exercise that everyone has prepared for the class, and one hour of workshop critique of each participant's longer work, in turn.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6501 (2-3) The Practice of Labor and Employment Law

Focuses on aspects of the practice of employment law, rather than the examination of legal doctrines. Discusses typical issues presented in advising and litigating on behalf of employers and employees. Topics include special attention to ethical issues.

Grading Basis: Letter Grade

LAWS 6502 (2) Wildlife and the Law

Examines the law that protects wildlife, its habitat and biodiversity. Explores human-caused threats including habitat destruction, illegal trade and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6503 (3) Law and Social Sciences

Explores disparities in criminal sentencing and death penalty cases; quality and effectiveness of legal representation for indigent criminal defendants; relationship between modifications in traditional steps in legal process; connection between alternative tort doctrines and volume of litigation, trial rates, plaintiff success rates and award size; impact of congressional statutes and US Supreme Court decisions on handling and outcomes of habeas corpus petitions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6508 (1) The Philosophy of Law

Questions the nature of law, characteristics and considerations of a legal system, rights and from where they come; thinking like a lawyer, basic techniques of legal reasoning, difference between doctrinal and normative legal analysis. Explores law's frontier and what distinguishes law from morality or politics. Focuses on influential texts from the end of WWII to the end of the Cold War.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6510 (2-3) International Environmental Law

Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6511 (3) Labor Law

Relates to labor unions and other collective aspects of employment, including the right of workers to form and join unions, to provoke collective bargaining and to strike and engage other forms of protest. Focuses on domestic law at the federal level and with a particular statute, the National Labor Relations Act, and the workings of particular agency, the National Labor Relations Board. Engages other sources of law, including constitutional law, as well as judicial decisions and other statutes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6513 (2) Crime Victims Rights and Victim Counseling and Advocacy

Involves highly experiential and participatory form of learning related to the rights and needs of victims of crime. Legal and constitutional aspects of crime victims' rights and advocacy are considered. Includes a training component by Moving to End Sexual Assault, a Boulder based organization. After training by MESA, students will complete 120 hours of volunteer service on the MESA hotline as well as attend various meetings.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 6518 (2-3) Introduction to Islamic Law & Jurisprudence

Develops student understanding of the internal working of Islamic law at its theoretical roots. Analyzes the various methodologies that are represented in Islamic legal literature, helping to enable the students to identify modern manifestations of these methodologies in contemporary Muslim discourses. Contextualizes the subject of Islamic law within various governmental and constitutional structures, beginning with the classical period, continuing through colonialism and reaching into the present day.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6521 (3) Employment Law

Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6525 (2-3) Elder Law

The counseling and legal representation of older persons and their representatives. Topics may include: legal aspects of health and long-term care planning, public benefits, surrogate decision making, legal capacity, the conservation, disposition, and administration of older persons' estates, the implementation of their decisions concerning such matters, and the broad ethical issues of representing clients in this field of practice.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 6528 (3) Capital Punishment in America

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6531 (3) Comparative Employment Law

In today's globalized world, lawyers are increasingly likely to encounter issues involving foreign employment. Provides substantive knowledge about foreign employment law and its relation to American law, as well as a comparative framework to assess the relative merits of the American approach to employment law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6540 (3) Global Law & Global Governance

Addresses contemporary theories of globalization. We will explore questions such as: What is globalization, and in particular, what is the globalization of law? What is the extent of legal globalization, and how can we know? Are global law and global governance good things? How are these categories any different from what has traditionally been called "international law"? Our search for answers will be guided by a selection of recent books from theorists of globalization and global governance, such as David Held, Immanuel Wallerstein, and David Kennedy.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 6541 (2) Colorado Worker's Compensation Theory and Practice

Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure and the Office of Administrative Courts Rules of Procedure.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6551 (3) Employee Benefits and Compensation Law

Examines past and present employee benefits and compensation practices among private and public employers. Covers ERISA and defined benefit, defined contribution, and welfare benefit plans; equity awards granted by corporations; equity awards granted by LLCs and partnerships; nonqualified deferred compensation and Section 409A of the Internal Revenue Code; golden parachutes and Sections 280G and 4999 of the Internal Revenue Code.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 6555 (2-3) Disability Rights

Explores the theories of disability, including whether disability is the product of society/social construction or medicine. The course will then explore some of the major federal protections for disability, including the Americans with Disabilities Act, which prohibits discrimination in employment and public accommodations, and the Individuals with Disabilities in Education Act.

Grading Basis: Letter Grade

LAWS 6601 (3) Corporate Transactions in Latin America

Introduces students to an overview of Latin American commercial and civil law systems, looking closely at Napoleonic and Chilean law. Explores the choice legal structures available for Latin American corporations; contract law that regulates business transactions in Latin America; and exploration of the way in which Latin American countries have joined international business trade agreements that pertain to Latin American nations such as the Vienna Convention and Gatt.

Grading Basis: Letter Grade

LAWS 6602 (3) Cultural Property Law

Concerns domestic and International regulation of property that expresses group identity and experience. Organized around traditional categories of property (real, personal and intellectual), covers historic preservation, archeological resources, art and museum law, with attention to indigenous people's advocacy on burial sites, traditional lands, ceremonies, music, symbols, ethnobotany, genetic information and language. May satisfy upper-level writing requirement.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6702 (1) Climate Justice

Introduces the field of climate justice and seeks to identify legal and policy tools for advancing fair outcomes in climate change decision making. Climate justice is concerned with the intersection of race and/or indignity, poverty, and climate change.

Grading Basis: Letter Grade

LAWS 6708 (1-3) Special Topics

Explores special topics in law.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes and the aftermath in the courts, Executive Branch and Congress.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments and the key federal statutes and regulatory regimes governing natural gas, electricity and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6732 (3) Renewable Energy Project Finance and Development

Examines renewable energy and how legal topics impact financing projects. Reviews structure, regulation, and functioning of electric energy industry and laws applicable to development, ownership and operation of renewable energy projects across technologies. Addresses legal policy, economic and financing issues associated with expansion and improvement of the transmission grid to support renewable energy development.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6801 (1) Anti-money Laundering Law

Explores domestic and foreign laws against money laundering, including know your customer and bank secrecy rules.

Grading Basis: Letter Grade

LAWS 6803 (3) Quantitative Methods

Equips students to deal effectively with experts, whether as consultants or as adverse witnesses, and to enable the identification of a quantitative issue. Helps students to become multi-dimensional in quantitative literacy. Enables students to be comfortable reading statistical arguments, performing basic analyses, writing about statistics, expressing quantitative ideas in graphs, questioning an expert, and understanding the power of computer programming.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 6808 (1) LILAC Symposium Course: Leadership in Law and Community

Addresses issues in law, community, and leadership, explored through multiple pedagogies in teaching and learning, in a symposium-style setting. After introductory classes on the theme of leadership in law and community, and related topics of professional responsibility and personal identity, social change, creative lawyering, the course will turn to spring service projects in law and community.

Repeatable: Repeatable for up to 4.00 total credit hours.

Grading Basis: Pass/Fail

LAWS 6813 (2) Problem-Solving, Professional Judgment, and Decision Making

Drawing from materials in psychology, behavioral economics, and mathematics, the course studies a range of patterns, fallibilities, and best practices concerning the complex problems commonly encountered by attorneys. Topics include general problem-solving strategies, techniques for operating in environments of uncertainty and complexity, empirically supported cognitive biases and errors, and strategies for recognizing and overcoming those errors.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6816 (1-2) Problem-Solving and Writing

Enhances students' ability to solve problems and writing concise coherent memos to clients or other legal documents outlining their legal analysis and strategic thinking. Uses diagnostic exams in which students are given multiple documents for fact patterns to begin their analysis.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6823 (1-2) Legal Reasoning

This course of seven 100-minute classes aims to present legal reasoning skills crucial to the crafting and criticism of legal arguments. The classes will cover seven topics: rules and standards, the art of the legal distinction, dealing with legal contradictions, facts and framing, level of abstraction, baselines, and legal interpretation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6836 (1) Special Topics in Legal Research

Builds upon first-year legal research problem solving skills by exposing students to the nuances of research topics in a specialized topic and tracking related doctrinal classes, e.g., environmental and natural resources law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6856 (2-3) Advanced Legal Research

Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources. Students will have several assignments and a final project.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6866 (1) Colorado Legal Research

Surveys resources and methods to effectively research Colorado law. Covers primary and secondary resources including Colorado statutes, cases and digests, regulations, and constitution and practice materials. Covers how to research Colorado municipal law and other Colorado topics.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6876 (2) Legal Research Skills for Practice

Focuses on preparing students to research in a transactional law legal practice. Students will learn how to research in transactional law subject areas using practitioner-focused research platforms, including Westlaw Practical Law, Lexis Practice Advisor, and Bloomberg Law. Students will also learn how to research corporate and industry data, property records and dockets as well as acquire other competencies and skills helpful for researching in a transactional law practice.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6886 (3) Advanced Legal Research and Analysis

Develops students' ability to think critically about and solve current legal problems. Evaluates the benefits and detriments of both print and on-line legal resources, and how to create an efficient research plan. Formulates and applies research strategies to real-world legal problems, and uses legal analysis to refine and improve research results. Note: students who have taken LAWS 6856 may not enroll in this course.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 6896 (3) Advanced Legal Research and Writing for Practice

Advances and improves legal research and writing skills learned in first year. Proposes variety of assignment types across substantive and procedural areas to prepare for experiences as summer associates or new attorneys.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 7003 (3) Federal Courts

Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7004 (3) Advanced Deals Lab: Real Estate Transactions

Using documents from actual real estate transactions, this course will focus on the drafting and negotiation skills required for the successful practice of real estate transaction law. Students will negotiate and draft actual real estate transactional documents.

Requisites: Requires prerequisite course of LAWS 6004 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 7005 (3) Internet and Media Law

Provides a survey of common, statutory, and regulatory law as applied to the media, including the internet. Topics include: the law as it affects the gathering of news; publisher liability online and offline; First Amendment issues; and related regulation of the internet and computer technologies.

Grading Basis: Letter Grade

LAWS 7011 (3) Creditors' Remedies and Debtors' Protections

Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles and exemptions and other judicial protections afforded debtors.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7013 (2) Supreme Court Decision Making

Students deliberate over several important cases as "Justices" of the Supreme Court. Class is divided into three "Courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7015 (3) First Amendment

Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence and the relationships between free exercise of religion and the separation of church and state.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7019 (1-3) Advanced Clinical Practicum

Enables a clinical student an optional 1-3 credits to complete advanced legal work in the Clinical Education Program. Course must follow enrollment in an existing clinical offering already successfully completed. Permission of the appropriate clinical faculty member required. For each credit taken, a clinical student must complete a minimum of 50 hours of legal work, all of which shall be graded pass/graded. A clinical student may complete 1-3 credits of work over the course of no more than two semesters. A clinical student may earn no more than 3 credits total over the student's law school career.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7021 (3-4) Bankruptcy

Briefly examines nonbankruptcy business rehabilitation devices, followed by basic principles of federal bankruptcy law and the bankruptcy court system. Concludes with attention to business reorganizations under Chapter 11 of the Bankruptcy Code.

Recommended: Prerequisites LAWS 6001 and LAWS 7011.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7023 (2) Jury Selection and History

Studies the history of the jury from ancient times through the implications of Apprendi, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7024 (2-3) Real Estate Planning

Considers various contemporary legal problems involved in the ownership, use, development, and operation of real estate, with particular emphasis on the federal income tax aspects of these issues. Topics may include sales, leases, and loans; choice of entity; leveraged partnerships; tax credit financing, foreign and tax-exempt investors; and real estate investment trusts.

Requisites: Requires prerequisite or corequisite course of LAWS 6007 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 7025 (3) Civil Rights

Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application, and their interrelationships as a discretely significant body of law of increasing theoretical interest and practical importance.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7029 (3) Appellate Advocacy Practicum

Enables students to represent parties in civil appeals before the United States Court of Appeals for the Tenth Circuit and the Colorado Court of Appeals under the guidance of an experienced appellate practitioner. Prior appellate advocacy experience will be helpful.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7031 (3) Regulation of Financial Institutions

Focuses on the core banking law and works outward to cover a broader spectrum of bank-like financial institutions. Covers bank licensing, restrictions on bank business, regulating safety and soundness of banks, consumer protection of depositors and other bank customers and regulatory examination and enforcement.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7045 (3) Criminal Procedure: Adjudicative Process

Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal and federal habeas corpus.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7051 (1-3) Transactional Drafting

Focuses on principles of contemporary transactional drafting. Skills gained will be applicable to transactional practice and will also be useful to litigators. Students will learn to translate, draft and review contracts, as well as how to add value to deals.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

LAWS 7055 (3) Education Law

Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools and questions of equal educational opportunities.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7058 (3) Conflict of Laws

Grading Basis: Letter Grade

LAWS 7061 (1) Contract Drafting

Begins with value creation by transactional lawyers and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps, and warranties, capitalized terms, definitions, indemnifications and escrow).

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Business

LAWS 7065 (3-4) Immigration and Citizenship Law

Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history and policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7071 (2-3) Advanced Transactional Drafting

Provides students with the opportunity to further develop skills gained in LAWS 7051 and put them to use in simulations and business contexts across various areas of practice. Students will be asked to draft industry specific contract provisions, revise existing contracts, counsel and negotiate on behalf of clients and work through ethical dilemmas encountered by transactional attorneys.

Requisites: Requires a prerequisite course of LAWS 7051 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 7079 (2) Wrongful Convictions

Focuses on the issues and remedies in cases of people who have been convicted, whose traditional appellate remedies have been exhausted, and who continue to claim actual innocence. Preference given to those who have taken or are taking more criminal procedure courses.

Grading Basis: Letter Grade

LAWS 7085 (2) Law and Religion

Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7095 (2) Women in Law

Explores the role of women in the legal system by looking at women as parties, jurors, witnesses, lawyers, law professors, and judges. Explores the relationship of law and society to women as victims and offenders. Investigates law and society's response to adoption, lesbian/gay issues, rape, surrogate and bad mothers, and sexual harassment.

Grading Basis: Letter Grade

LAWS 7100 (2-3) International Criminal Law: Theory and Practice

Exposes students to the rapidly growing body of jurisprudence, both international and national, wherein international humanitarian and human rights law are being applied for the purposes of prosecution, trial and punishment of individuals alleged to be responsible for the commission of war crimes, crimes against humanity, genocide and, more recently, terrorism.

Requisites: Requires prerequisite course of LAWS 6400 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7102 (2-3) Oil and Gas

Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7103 (2-3) Ethics and Compliance Capstone

Integrates skills and knowledge from the introductory compliance course and other courses in law school compliance curriculum as students develop a compliance program for an institution.

Requisites: Requires prerequisite course of LAWS 6221 (minimum grade D).

Grading Basis: Letter Grade

LAWS 7105 (3) Family Law

Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes and relations of parent and child.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7106 (1-2) Moot Court Competition

Offers an intensive involvement in legal research, appellate brief writing and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7111 (3) Contract Theory: Collisions of Contracting and Culture

Explores various contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, critical legal studies, law and society, relational theory, and others. Considers and critiques these theories as applied to particular contracting cultures, especially as applied to construction contracts.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7115 (3) Juvenile Justice

Covers a wide array of issues dealing with the legal rights of the unborn, children and juveniles. Covers the legal status of parent-child abuse, delinquency and crime, and emancipation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7116 (1) Barristers Council

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

LAWS 7121 (3) Advanced Contracts: Commercial Transactions

Studies Article 2 and Article 2A of the Uniform Commercial Code, together with the Convention and the International Sale of Goods. Advanced contracts topics are explored in depth. Among other subjects, warranties, title, remedies and risk of loss in the sale of lease of goods will be studied.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7122 (2-3) Mining and Mineral Development Law

Addresses major issues affecting the development of mineral resources through mining activity. Includes the regulation of the impacts of mining on the environment on both public and private land. Covers the Mining Law of 1872, the Federal Coal Leasing Amendments and state regulation of the impacts of mining on the environment.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7125 (2) Advanced Domestic Relations

Offers advanced study of several domestic relations subjects, including both theoretical and lawyering issues. Tentative subjects include discovery, client interviewing and deposition preparation, asset valuation, working with expert witnesses, children as clients, and alternative dispute resolution.

Recommended: Prerequisite LAWS 7105.

Grading Basis: Letter Grade

LAWS 7126 (1-2) Transactional Competition

Covers a broad array of topics, including, but far from limited to, contract negotiation, health law, mergers and acquisitions, and client counseling. A valuable opportunity for students to gain experience outside the classroom and develop tactics for interacting with clients, negotiation, techniques, and transactional drafting skills. Provides great opportunities for networking. A division of Barristers' Council.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7128 (2-4) Jurisprudence

Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8128

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7132 (3) Energy, Insecurity, Sustainable Law

Examines why national security deals not only with armed aggression and the ability to thwart military invasions or subversion, but also includes critical threats to vital national and international support systems such as the economy, energy and the environment.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7135 (3) Parent, Child, and State

Examines the legal rights of parents and children in a constitutional framework, as well as the state's authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation and culture in defining the family.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7138 (3) Legal Philosophy

Grading Basis: Letter Grade

LAWS 7145 (3) Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the US as they affect children, families, and work. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7154 (3) Land Use Planning

Explores mechanisms for public control of private land uses, such as planning, zoning, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 7159 (2) Advanced Trial Advocacy

Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7164 (2) Land Conservation Law

Focuses on private land conservation efforts in the United States, and particularly Colorado, also considers public land conservation programs. Analyzes real property principles and instruments used to protect land, and the development and acceptance of conservation easements in gross as a mechanism for protection, financing mechanisms for land conservation, including direct government funding and indirect funding through tax incentives at the federal, state and local levels. Understanding of Real Property and Tax concepts helpful.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 7169 (2) Motions Advocacy

Provides practical training in preparing and arguing pretrial, post-trial and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to students with interest in trial advocacy and willingness to participate in confrontational exercises.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7200 (3) Anthropology of Law

Reviews the relationship between the social and cultural features of both developed and developing country societies and the formal and informal legal institutions within them. Considers the nature of social control and constraint, judicial reasoning, fact finding, conciliation, mediation and arbitration, and legal discourse.

Grading Basis: Letter Grade

LAWS 7201 (3) Antitrust

Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance and territorial confinement of dealers. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7202 (3) Environmental Law

Examines and analyzes important federal pollution control statutes, including the National Environmental Policy Act, the Clean Air Act and Clean Water Act, Solid Waste Act, and Superfund. Considers related economic theory, ethics and policy issues.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7205 (3) Administrative Law

Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7207 (3) Federal Estate and Gift Tax

Analyzes the federal estate and gift taxation of inter vivos and testamentary transfers, introduces the federal income taxation of estates and trusts, and explores elementary estate planning. Students may receive credit for this course and either Estate Planning (LAWS 7217) or Estate and Gift Tax Planning (LAWS 6217), but not for both LAWS 7217 and LAWS 6217.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7209 (4) Natural Resources and Environmental Law Clinic

Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative advocacy, legislative drafting, and the conduct of complex negotiations and settlements.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7211 (3) Business Planning

Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling.

Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization and dissolution are considered.

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).

Recommended: Prerequisite or corequisite LAWS 6201 or LAWS 6211.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7212 (2) Environmental Litigation

Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen's suits.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7217 (2) Estate Planning

Deals with the practical application of estate planning principles to various client situations, including certain federal wealth transfer taxation issues. Students may not receive credit for both Estate Planning (LAWS 7217) and Estate and Gift Tax Planning (LAWS 6217).

Requisites: Requires prerequisite course of LAWS 7207 (minimum grade D-).

Recommended: Prerequisites LAWS 6007 and LAWS 6104.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7218 (2-3) Legal History

Grading Basis: Letter Grade

LAWS 7221 (2-3) Government Regulation of Business

Covers themes that explore the nature of the regulatory state and the realities of how businesses react to regulation. Provides an understanding of regulatory institutions; the tools of governmental regulation; a critical perspective on regulation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 6222

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7228 (2) Intellectual Origins of the Constitution

Examines the views of the Constitution's framers as expressed in contemporaneous and antecedent writings and debates. Offered in alternate years.

Grading Basis: Letter Grade

LAWS 7232 (3) Global Energy Justice

Establishes why nearly a third of the world populated by the energy oppressed poor, presents a major national and international "legislative" or socio political problem calling for answers from governments and civil societies in the developed and developing world. Explains and elucidates the concept of energy justice, its jurisprudential heritage and its meaning and relevance in contemporary society. Case studies present problem solving frameworks spanning the political, social, behavioral, engineering, natural sciences and law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7241 (3) Telecommunications Law and Policy

Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular and other wireless systems and the Internet.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5410

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7242 (3) Environmental Justice and Law

Examines issues of unequal environmental protection across various contexts, including air and water pollution, siting of toxic and hazardous waste, noxious land uses, and access to environmental goods such as public lands. The course will explore the role that U.S. law has played in constructing the unequal distribution of environmental harms and benefits. It will then examine efforts within the U.S. to use law and other tactics to redress environmental injustice.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

LAWS 7248 (3) History of Criminal Justice

Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.

Grading Basis: Letter Grade

LAWS 7251 (3) Non-Profit Law

Examines the legal and policy issues raised by non-profits. Topics may include the formation of a non-profit, qualification for federal tax exemption, the rise and role of private foundations, fiduciary duty issues, restrictions on political activity and private benefit, and the unrelated business income tax. Also focuses on broader social questions raised by giving, charities, and philanthropy.

Grading Basis: Letter Grade

LAWS 7255 (3) Local Government

Studies state legislative and judicial control of the activities, powers and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money and condemn private property for public uses). Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7261 (3) Corporate Finance

Examines a variety of important legal issues related to the funding and financing corporations including creditor protection laws, the Trust Indenture Act of 1939, fiduciary duties, bond indenture provisions, securities laws and rights of equity holders. Covers efficient capitalization structures, corporated valuation techniques, capital markets and the efficient market theory and cost of capital concept.

Requisites: Requires prerequisite course of LAWS 6211 or LAWS 6251 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7271 (3) Venture Capital and Private Equity

Provides overview of the legal and financial principles to represent privately held companies, their founders and managers and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA and tax law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7285 (2-3) Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers and critical thinkers and provides an opportunity to grow as colleagues and teammates.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7055.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Government and Public

LAWS 7300 (2-3) International Litigation

Examines the special issues that arise in litigation in U.S. courts when one or more of the parties is a foreign individual, corporation, or government, or when the subject of the litigation concerns events occurring wholly or partly outside of this country. Includes personal jurisdiction over foreign defendants, extraterritorial service of process and evidence gathering, choice of forum, foreign sovereign immunity, the act of state doctrine, extraterritorial application of U.S. law, and recognition of enforcement of foreign judgments.

Grading Basis: Letter Grade

LAWS 7301 (2-3) Copyright

Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas and misappropriation of trade values, that supplement federal copyright.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7302 (2) Advanced Oil and Gas

Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environment regulation, and the interplay between federal, state and local regulation.

Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7303 (3) Complex Civil Litigation

Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel and judicial management in such suits. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7307 (3) Taxation of Natural Resources

Considers the federal income tax aspects applicable to the exploration for, the development of, and the operation of natural resources, as well as the financing thereof. Also considers oil and gas, hard minerals, timber, and water.

Recommended: Prerequisite LAWS 6007.

Grading Basis: Letter Grade

LAWS 7309 (2-4) American Indian Law Clinic

Offers a clinical education course involving participation in the representation and advocacy of Indian causes – land or water claims, Indian religious freedom, job or other discrimination based on race and issues implicating tribal sovereignty.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7310 (3) International Dispute Settlement

Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7311 (2-3) Patent Law

Covers selected topics, such as patentable subject matter, patentability and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7312 (2) Advanced Water Law

Builds on the study of basic water law principles for those interested in practicing in this field. Explores in more detail the highly developed legal and administrative system of water law in Colorado and other states, including the use of special courts to adjudicate the existence of water rights and approve changes of use.

Requisites: Requires prerequisite course of LAWS 6302 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7315 (3) Criminal Justice Policy and Practice

Focuses on policy and practice issues rather than case law. Examines how American criminal justice is (and has been) dispensed in the vast majority of cases that never reach trial. Devotes attention to systemic issues rather than case-specific problems. Studies policy behavior, prosecutorial charging and bargaining discretion, the provision of defense services, bail and preventive detention, plea negotiation, and sentencing— aspects of the criminal process that affect huge volumes of cases and require thought in global terms.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Criminal

LAWS 7318 (3) Economics of the American Legal System

Explores the economics of the American legal system. Topics include the cost of producing lawyers, the market for legal services, the practical challenges of running small and large law firms and the government's role in making legal services available.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7320 (3) International Criminal Law

Surveys international human rights law and international crime and punishment. Addresses idea of rights from a historical, philosophical, conceptual and analytical perspective; explores the "Primary rules of conduct" as well as adjudication and remedies, and selected rights from a comparative perspective.

Recommended: Prerequisite LAWS 6400.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7321 (1-2) Patent Drafting and Prosecution

Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; emerging issues. Gives students essential tools to draft and analyze technology contracts.

Requisites: Requires prerequisite course of LAWS 6301 or 7301 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7322 (1) Field Trip of Upper Colorado River Basin for Advanced Water

Spend a week out in the basin meeting and talking with key leaders directly involved in Colorado River Basin water matters, visiting major water projects such as storage facilities and observing their operations, visiting major water users such as irrigation districts and cities, visiting and talking with tribal leaders and touring projects aimed at recovering populations of endangered fish.

Requisites: Requires corequisite course of LAWS 7312.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7323 (2-3) Patent Litigation

Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses and trial strategy. Of interest and useful to those interested in intellectual property generally, not just patents or in litigation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7325 (3) Election Law

Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7331 (2) Sports Law

Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7333 (2) Advanced Evidence: Forensic Science and the Criminal Courts

Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7335 (1) The Law of Presidential Elections

Examines the laws and regulations that uniquely shape presidential selection, analyzing practical applications as well as the broader constitutional and policy considerations. A combination of federal, state, and local laws shapes how Americans select their president. But more than ever before, Americans are questioning the rules that influence presidential selection, such as the major party primary system, ballot access, presidential campaign financing, and the electoral college.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public Law

LAWS 7341 (3) Trademark and Unfair Competition Law

Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7343 (2) Technical & Engineering Knowledge in Litigation

Teaches law students and engineering students to work with each other in varied legal disputes implicating technical matters (accidents, trade secrets, pollution, etc.), covering expert witness law and practice, use of empirical methods in litigation, and more broadly the roles of lawyers and of engineers in such disputes. Experiential learning-based assignments may include initial investigations, witness testimony, and legal writings that include engineers' expert witness reports and lawyers' complaints and motions.

Grading Basis: Letter Grade

LAWS 7345 (2) Comparative Criminal Procedure

Takes an in-depth look at some of the basic features of modern criminal justice systems that share the civil law tradition with the hope that such study will provide a vehicle for a deeper understanding of the strengths and weaknesses of the American system of criminal justice.

Requisites: Requires prerequisite course of LAWS 6045 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 7350 (2-3) Analytical Strategies

Develops analytical, writing and problem-solving skills necessary to pass the bar exam and succeed in practice. Designed for third-year law students in their final semester. Students will improve their techniques for analyzing, organizing and writing responses to essay and performance test questions through frequent written exercises and individual feedback on those exercises.

Grading Basis: Letter Grade

LAWS 7361 (2) Cybersecurity

Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7365 (2) Comp Constitutional Law

Grading Basis: Letter Grade

LAWS 7371 (3) Standardization and Standards Wars

Examines current issues in the standardization of telecommunications and information technologies. Covers the importance of standards, government and private sector perspectives and the impact of information age technologies on standards of development. Emphasizes key national and international organizations.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7375 (3) U.S. Races and Justice Systems

Examines the unique but related legal, social, and economic problems and accomplishments of those persons in this country whose ancestry originated in Africa, Asia, Latin America, or North America, and explores the developing literature on whites and whiteness.

Grading Basis: Letter Grade

LAWS 7381 (3) Intellectual Property Counseling and Licensing

Introduces strategic development and procurement of IP, including patents, trademarks, copyrights, and trade secrets. Evaluates the latest cases and legal trends from a practical and strategic perspective. Focuses on widely accepted best practices and critical thinking in these areas.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property, Technology Telecomm

LAWS 7401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7402 (2) The Law of Toxic and Hazardous Wastes

Examines the EPA's federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA "Cradle-to-grave" hazardous waste program and addresses the evolving CERCLA liability scheme and cleanup process.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7405 (2-3) Health Law 2: Medical Malpractice and Quality Regulation

Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Health Sciences Center; will include field trips there.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7406 (1) International Moot Court Competition

Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7407 (1-3) Tax Policy

Explores current issues in tax policy. Topics may include the tax legislative process, consumption taxes, taxes and distributive justice, the tax exemption for nonprofits, carbon taxes, corporate taxes and integration, and taxes and entrepreneurship. There are no required prerequisites, but Federal Income Tax will be helpful.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7411 (2-3) Mergers, Acquisitions and Reorganizations

Studies the planning of corporate mergers, acquisitions and reorganizations, examining the application and integration of state corporate law, federal securities law, accounting principles, tax law, labor law, products liability law, environmental law, ERISA and antitrust law.

Equivalent - Duplicate Degree Credit Not Granted: BADM 6900

Requisites: Requires prerequisite LAWS 6211 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7415 (2) Bioethics and Law

Grading Basis: Letter Grade

LAWS 7418 (2) Legal Imagination

Advanced course in reading and writing for law students. Varied literary and other works are read. May be of interest to the student interested in the question: Does my choice to become a lawyer mean the sacrifice of my ambitions to be a serious writer (or person)?

Grading Basis: Letter Grade

LAWS 7420 (2) European Union Law

Covers all the essential aspects of the EU law: EU institutions, competences, the making and the application of EU law, and the content of the fundamental principles of EU law and the common market.

Grading Basis: Letter Grade

LAWS 7421 (2-3) Business and Human Rights

Examine the role of international human rights law in regulating or influencing businesses enterprises, along with relevant policy considerations.

Grading Basis: Letter Grade

LAWS 7425 (2-3) Health Law and Policy: Access, Cost, Quality, Choice

Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social and political considerations. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7426 (2) Health Care Compliance

Introduces students to a number of primary laws and regulations that give rise to the vast majority of serious fraud and abuse cases. The primary statutes and regulations implementing them will then be viewed from the context of common problems in the health care industry such as: up-coding, unbundling, worthless services/quality of care, medically unnecessary care, over-utilization, joint ventures with referral physicians, off-label marketing.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7428 (3) Bioethics Law and Literature

Interdisciplinary study of law, medicine, and bioethics. Addresses such issues as confidentiality in medical treatment, rejecting life-sustaining treatment, death and dying, reproductive law and genetic technology, human experimentation, and access to health care.

Grading Basis: Letter Grade

LAWS 7429 (2) Alternative Dispute Resolution

Examines a variety of dispute resolution processes, such as mediation, arbitration, minitrials and court-annexed settlement procedures, as alternatives to traditional court adjudication.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7431 (3) Corporate Finance

Grading Basis: Letter Grade

LAWS 7433 (3) Remedies

Examines the types of relief available to vindicate various rights. Covers damages, specific performance, injunctions, and restitution. Emphasizes the planning aspect of enforcement, in view of the limitations and problems of proof associated with specific remedies.

Grading Basis: Letter Grade

LAWS 7439 (2-3) Mediation

Explores mediation, one of the more important methods of alternative dispute resolution and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7440 (3) International Human Rights and Humanitarian Law

Surveys international human rights both in law and in philosophy, both current and historical.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7445 (2) Insurance Law

Grading Basis: Letter Grade

LAWS 7449 (2-4) Juvenile and Family Law Clinic

Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing.

Repeatable: Repeatable for up to 8.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7450 (2) Regional Human Rights Protection for JD Students

Examines how human rights law and policy is created, interpreted and enforced within regional systems. Explores the main sources of human rights law including treaties, international customary law, constitutional law, municipal law, comparative law and principles; the jurisprudence of regional courts and tribunals, the institutions that support human rights advocacy and the cultural perspectives of affected communities and peoples.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

LAWS 7451 (3) Law and Finance for Entrepreneurs

Studies unique legal problems faced by entrepreneurs, including formation issues (choice of entity, rights of the founders, initial investors), operation issues (governance, key employees, intellectual property, financing), IPOs and buy-outs.

Equivalent - Duplicate Degree Credit Not Granted: BADM 6910

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7458 (2) Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final eight page paper are required.

Grading Basis: Letter Grade

LAWS 7461 (1) Dispute Resolution in the Digital Age

Explores the need for expanded and equalized access to remedies in consumer cases, and how the internet opens doors to online dispute resolution ("ODR") systems that utilize cost-effective negotiation, mediation, and arbitration processes for resolving complaints. This course will look at the various systems currently used by major companies, as well as the rules and treaty developments in global markets.

Grading Basis: Letter Grade

LAWS 7465 (2) Public Health Law and Ethics

Explores the legal and ethical dimension of public health. Focuses on topics that generate legal and ethical controversies, including governmental duties to protect citizens, nature and the extent of the government's ability to regulate conduct and responses to epidemics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7471 (3) Securities Litigation and Enforcement

Covers the provisions of the Securities Exchange Act of 1934 and related federal statutes, concentrating on the arbitration of private securities claims; SEC enforcement actions; international securities regulation; securities manipulation and fraud; self-regulatory organizations; and regulation of attorneys and accountants practicing before the SEC.

Grading Basis: Letter Grade

LAWS 7475 (2) Advanced Torts

Studies selected tort actions and theories. Topics covered may include "Dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7505 (2) Sexuality and the Law

Examines the regulation of sexuality in local, state, and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7507 (2-3) State and Local Taxation

Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6760

Grading Basis: Letter Grade

LAWS 7509 (1) Mock Trial Competition

Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7512 (2) Advanced Environmental Law: Air Pollution

Provides an examination of efforts to regulate air pollution in the United States under the Clean Air Act. Covers key provisions, basic approach of cooperative federalism, role of science and risk assessment establishing health-based standards, implications of instrument choice and regulatory design on innovation and economic growth, development of 'first generation' climate policies, and new approaches to compliance and enforcement.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7513 (3) Domestic Violence

Explores the law, policy, history and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7515 (3) Poverty Law

Explores the legal and policy responses to poverty in the United States and addresses how the law shapes the lives of poor people and communities. Examines the extent of poverty in the United States, the root causes and the historical development of social welfare policy. Focuses on the rights-based aspect of poverty law and various policies that attempt to ameliorate poverty.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7520 (3) Food Law and Practice

Surveys the basic regulatory landscape of food law with insight into critical legal issues facing industry and consumers. Covers federal, state and municipal regulation, litigation, government incentives, international standards and soft-law. Combines doctrinal approaches with simulation and problem solving to introduce systems-level thinking. No prerequisites or prior knowledge if required, though interest in food law and corporate law are helpful.

Grading Basis: Letter Grade

LAWS 7523 (2) Juvenile Law

Takes a critical look at the juvenile justice system and how it responds to the needs of juveniles who are either delinquents and/or victims of abuse. Issues include the rights and responsibility of parents, parental responsibility programs, delinquents, and the future of our juvenile courts.

Grading Basis: Letter Grade

LAWS 7525 (3) Race and American Law

Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans and Chicana/os.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7529 (1) Appellate Advocacy Competition

Gives students the opportunity to participate in an intermural appellate advocacy competition, in which a brief must be filed and reviewed, critiqued, and deemed credit-worthy by a member of the faculty. (Law School Rule 3-2-9 (b) should be consulted prior to enrollment.)

Grading Basis: Pass/Fail

LAWS 7531 (3) Wage Law and Litigation

Teaches federal and state wage statutes, common-law claims for unpaid wages (e.g., fraud, contract/quasi-contract, etc.), and complex statutes outside employment law (racketeering, antitrust, etc.) that creative wage litigators sometimes use. Coverage of the limits of wage law scope may include non-employee contractors (both traditional and gig economy workers), undocumented workers, students, volunteers, and/or prisoners. Teaches litigation practice and strategy, including class/collective action practice, plus experiential learning assignments that may include deposition-taking/client-interviewing, claim-strategizing, damages-calculating, and/or motion-writing.

Grading Basis: Letter Grade

LAWS 7535 (2) Poverty, Health and Law 1

Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, health, violence, and immigrants. Students will also help with intake of clinic patients and support client representation by the attorney of record.

Grading Basis: Letter Grade

LAWS 7541 (2-3) Employment Discrimination

Examines statutory and constitutional prohibitions of discrimination in employment on the basis of race, gender, age, religion, national origin and disability.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7545 (2) Poverty, Health and Law Practicum

A service learning course in which students draw from the substantive materials studied in LAWS 7535 to develop competency in case planning, problem solving, cooperative decision making, and client counseling. Students will staff cases under the supervision of a CO Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS.

Requisites: Requires prerequisite course of LAWS 7535 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7551 (2) Trade Secrets

Examines law of trade secrets and how companies and entrepreneurs use this field to protect intellectual property in conjunction with other forms of legal protection (e.g., patent, copyright and trademark).

Grading Basis: Letter Grade

LAWS 7555 (4) Poverty, Health, and Law Practicum

Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, and health. Students will also staff cases under the supervision of a Colorado Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS, and will develop competency in case planning, problem solving, cooperative decision making, and client counseling.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7565 (3) Corporate Transactions in Health Law

Introduces key corporate and regulatory issues impacting the delivery of health care. Focus will be transactional, with students gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7601 (2-3) Business Transactions

Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7605 (2-3) Refugee and Asylum Law

Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7609 (1-2) Law Practice Management

Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7611 (2-3) International Business Transactions

Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods and international intellectual property protection. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7615 (4) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7181

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7617 (3) International Taxation

Explores the United States income taxation of international activities, principally U.S. persons doing business abroad and foreign persons doing business in the United States. This course focuses on the Internal Revenue Code as well as tax treaties.

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 7618 (1) Marijuana Law and Policy

Covers three distinct but interwoven topics: substantive law governing marijuana; policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. The objective is to prepare to handle legal issues that arise in practice but also to provide informed counsel on proposed or future reforms to the law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 7619 (3-4) Entrepreneurial Law Clinic

Provides law students with practical experience in transactional law while offering valuable legal services without charge to local startup businesses lacking access to legal resources. Enrollment priority is given to third year law students. The ELC professor may set forth additional requirements to ensure that students are qualified to provide services to ELC clients.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7621 (4) Business Associations

Covers the law of agency, partnerships, limited liability companies and corporations. It includes principles of agency, formation and operation of business entities, fiduciary duties of the actors in business entities, and the relevant federal and state laws related to those entities.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

LAWS 7629 (1) Introduction to the In-House Practice of Law

Explores cutting edge questions around the practice of law as an employee of a business. Demonstrates how the combination of law and business can be valuable to businesses and also innovative, challenging and rewarding to legal professionals. Legal services to corporate America is changing dramatically with more entities relying on in-house counsel, compared to private practitioners, to obtain legal advice and counsel.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7709 (3) Advanced Legal Negotiation

Deepens students' understanding of the economic, psychological, cultural, and critical literatures related to legal negotiation and bargaining, provides students an advanced set of negotiations, experiences and simulations that introduce new dynamics and problems not dealt with in the core course, and deepens students' self-understanding and ability to learn from experience.

Requisites: Requires prerequisite course of LAWS 7409 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7710 (2-3) Space Law and Policy

Examines the role of international law in the regulation of outer space activities. Topics include current and potential future uses of outer space, law-making process related to space activities, legal regime of outer space and celestial bodies, legal status of spacecraft, liability for damage caused by space activities, settlement of space-related disputes.

Grading Basis: Letter Grade

LAWS 7715 (3) Indigenous Peoples in International Law

Studies developments in the substance and procedure of international human rights law pertaining to indigenous peoples, examining these developments through varying perspectives, doctrinal and political, pragmatic and critical. Students will become familiar with indigenous peoples' involvement in the human rights movement both before and after WWII, and corresponding developments in the United Nations, Organization of American States, and other institutions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7718 (2) The Regulation of Marijuana

Covers three distinct but interwoven topics: substantive law governing marijuana, policy rationales behind and outcomes produced by different approaches to regulating the drug and the legal authority to regulate the drug. Prepares one to handle legal issues that arise in practice, but also to provide informed counsel on proposed and future reforms to law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7725 (3) American Indian Law I

Investigates the federal statutory, decisional and constitutional law that bears upon American Indians, tribal governments and Indian reservation transactions.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management.

Requisites: Requires prerequisite course of LAWS 7725 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7745 (2-3) Jurisdiction in Indian Country

Examines the current state of the justice system within Indian nations today. Includes understanding the respective roles of tribal and state law enforcement authorities, as well as the Bureau of Indian Affairs' Office of Justice Services, the Federal Bureau of Investigation, and the Drug Enforcement Administration. Examines relationship between federal and tribal courts; substantive laws; and advocates who appear before them.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7751 (3) Arbitration

Discusses the nature of arbitration, enforcement of arbitration agreements and awards, complexities of multi-party arbitrations, fairness and efficiency of the arbitral process and other issues related to arbitration's prevalence in contexts ranging from corporate to consumer and employment disputes.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7765 (3) Gender and Justice

Grading Basis: Letter Grade

LAWS 7775 (1) Gender Law and Public Policy

Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and material on such topics as violence against women, prostitution, pornography, and discrimination in education and athletics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7801 (1) Tech Policy Advocacy

Provides an intensive, one-week look at the substance, strategy, tactics, and import of technology policy advocacy. Each year, we will study one particular theme or conflict and examine it in-depth. The point of studying one particular episode is to learn lessons about the practice of technology policy advocacy that apply beyond this one historical moment. This class is meant to combine traditional doctrinal approaches with an experiential focus.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7809 (2-4) Technology Law and Policy Clinic

Features technology law advocacy before administrative, legislative and judicial bodies in the public interest.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5250

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7846 (1-3) Independent Legal Research

Involves independent study and preparation of a research paper under faculty supervision. Students produce a research paper equivalent to a seminar research paper. A draft is submitted, subjected to critique by the faculty member, and redrafted. Available during or after the fifth semester of law school. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 7896 (1) Journal: University of Colorado Law Review

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the University of Colorado Law Review.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7906 (2) Journal: University of Colorado Law Review

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7916 (1) Journal: CO Natural Resources, Energy & Environmental Law Review

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7926 (2) Journal: CO Natural Resources, Energy & Environmental Law Review

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7936 (1) Journal: Colorado Technology Law Journal

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Journal of Telecommunications and High Technology Law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7939 (1-10) Extern Program

Extern credit may be earned for uncompensated work for a sponsor, which may be any lawyer, judge, or organization that employs lawyers or judges and is approved by the Academic and Student Affairs Committee. Work is done under the direction of a field instructor (a lawyer or judge as the sponsor) and a member of the law faculty. Requires a substantial writing component and 50 hours of working time per credit hour.

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7946 (2) Journal: Colorado Technology Law Journal

Gives students the opportunity to participate in the research, writing and editing activities involved in publishing the Journal of Telecommunications and High Technology Law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Research and Writing

LAWS 7949 (2) Remote Externship Course Component

Accompanies remote externship placements and provides and opportunity for structured and interactive reflection on the educational experience afforded by the externship placement.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 8003 (2) Seminar: Lawyers and Leadership

Analyzes challenges and responsibilities of serving in leadership roles, with particular emphasis on utilizing law as a vehicle to change organizations and societies. Topics include characteristics, models, styles, and theories of leadership, charisma, civil and human rights, conflict management, decision-making, diversity, ethical responsibilities, forms of influence and persuasion, innovation, mindfulness, organizational dynamics, positive organizational scholarship, and scandal. Materials will include cutting-edge research, case histories, exercises, problems, simulations, and video clips from popular culture and media.

Grading Basis: Letter Grade

LAWS 8005 (2) Seminar: Advanced Constitutional Law Equality and Privacy

Addresses "Equal Protection" rights under the Fourteenth Amendment and "Privacy" rights to personal autonomy. Analyzes varied constitutional grounds for recognizing or rejecting abortion rights; limits on Congressional power to pass civil rights laws granting broader rights than the Fourteenth Amendment does; treatment of sexual orientation-related laws and government actions as "Privacy" versus "Equality" matters; and "Benign"/"remedial" race- and sex-based government decisions such as affirmative action and same-sex schools.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8011 (1-3) Seminar: Humanizing Contracts: Service Learning

Examines contract theory and policy, while providing community-based service. Students analyze and discuss readings exploring doctrinal and theoretical bases of contract law, and see "Contracts in action" through participating in a service project. Requires a final paper linking theory and doctrine with service experiences. Note: this is a year-long seminar (2 credits per semester); students must enroll in both semesters but receive only one grade at the end of the year. Students participate in a service project that may include off-campus and weekend participation.

Grading Basis: Letter Grade

LAWS 8013 (2) Seminar: Habeas Corpus: The Great Writ of Liberty

Includes readings on the history of the writ, its constitutional status, and its use as a civil rights remedy, as well as case studies of important Supreme Court decisions, and a review of contemporary jurisdictional and procedural issues.

Grading Basis: Letter Grade

LAWS 8015 (1-3) Seminar: Constitutional Theory

Aims at thinking broadly about the challenges, and problems of constitutionalism in the U.S. What are the fundamental tensions that attend the constitutional enterprise; internally, externally? What relations does the Constitution have to democracy and liberalism? Readings will be taken from legal theory, social theory, philosophy and occasionally judicial opinions. Emphases will differ slightly each year as announced.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8021 (2-3) Seminar: Consumers and the Law

Expands understanding and analysis of contracts beyond the basic concepts learned in the first-year contracts course. Explores norms, goals and functions of consumer law and also observes the law "in action" through a class blog and outreach with the Boulder County Department of Housing and Human Services ("BCDHHS"), who assists people throughout Boulder County with an array of financial, housing and other consumer issues.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8025 (2) Seminar: Advanced Topics in Federalism

Explores the development of "Our Federalism", the relationship between federal and state governments, from the founding period of the US Supreme Court's recent New Federalism jurisprudence. Studies historical material, commentary, and case law and addresses how federalism is defined; the values that federalism serves; the role of federalism in our interconnected, global society; the Supreme Court's boundaries of federalism; the direction of New Federalism.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8035 (2) Seminar Speech, Religion, and Equality: Constitutional Values in Tension

Addresses past and continuing debates involving potential tensions between antidiscrimination principles and free speech, free exercise and establishment clause values. Examines constitutional protections under the First Amendment and the equal protection clause, together with an array of existing and proposed federal and state antidiscrimination laws regulating employment, housing, and public accommodations, among other areas.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8036 (2-3) Seminar: Special Topics in Intellectual Property

Applies copyright doctrine to the digital music contexts. Topics may include but are not limited to radio, compulsory licensing, performance rights, sampling, user generated content, term extension, termination rights, "open-access" and the public domain, emerging technologies and infringement, social implications of copyright legislation, digital fair use and the first sale doctrine and moral rights for users and artists.

Requisites: Require a prerequisite course of LAWS 6301 or LAWS 7301 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 8045 (2) Seminar: Comparative Constitutional Law

Examines legal structures and concepts typically found in constitutions, including judicial review, distinction between legislative and executive authority, federalism and the principle of subsidiarity, the relationship between church and state, free speech and press, and social welfare rights. Examines differences between constitutional law and other domestic law, role of comparative constitutional law in domestic constitutional law adjudication. Emphasizes American and Swedish perspectives.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8055 (1-2) Seminar: Media, Popular Culture, and the Law

Examines how the institutions, practices and the very identity of law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this seminar: to what extent and how are the forms and methods of the new media having an effect on the perception, role and identity of law? This is a year-long seminar.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8060 (3) Seminar: Poverty and Inequality in Comparative Perspective

Investigates the nature, causes, consequences and major responses to persistent poverty and inequality in the United States and several other countries. Students are expected to write short response papers for each assignment as well as a substantial research paper on a topic selected in discussion with the instructor.

Grading Basis: Letter Grade

LAWS 8065 (2) Sem White Collar Crime

Grading Basis: Letter Grade

LAWS 8075 (2) Seminar: Race, Racism, and American Law

Focuses on issues of race reform law, in particular the group of issues dealing with Black Americans. (Students of all hues and persuasions are welcome.) Offers an interpretive or critical dimension, rather than a litigation-oriented one. Helps students understand how race reform law works and how attitudes and historical forces have shaped that body of law.

Grading Basis: Letter Grade

LAWS 8085 (2) Sem Crit Race Theory

Grading Basis: Letter Grade

LAWS 8095 (2) Seminar: Problems in Constitutional Law

Explores, in depth, various topics in U.S. constitutional law. Examines history, societal impacts, and challenges raised by those topics. The coverage of the seminar varies from year to year, depending on the instructor's interests and expertise.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8101 (3) Seminar: Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8103 (2) Seminar: Alternative Dispute Resolution Ethics

Explores the ethics of mediators and other alternative dispute resolvers and facilitators, of attorneys representing clients in alternative dispute resolution processes, and of judges serving in alternative roles. Issues include confidentiality, providing appropriate notice to those concerned, and avoidance of conflicts of interest.

Grading Basis: Letter Grade

LAWS 8104 (2) Seminar: Cities, Suburbs, and the Law

Explores dynamics that play out in the relationship between cities, suburbs, exurbs and other patterns of urban development. Explores the nature of local power, relations between local jurisdictions, and metropolitan and regional approaches to governance. Includes fiscal disparities, ethnic and racial segregation, sprawl and growth controls, affordable housing, transportation, and the urban/rural divide.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 8105 (3) Seminar: Comparative Family Law

Examines and critiques law, legal institutions and traditions of the country of focus and the U.S. as they affect children, families and work. Enhances research and writing skills, including field and international research. Contributes to the host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8110 (2) Seminar: Fascism and the Liberal State

Explores fascist legal theory and its critiques of the liberal democratic state. Readings of major conservative, liberal, fascist, Nazi and Marxist theorists including Marx, Gentile, Fuller, Neumann, Schmitt, Agamben, Hayek and Mill. Understand from a variety of perspectives, the structure and character of the liberal democratic state, its strengths and weaknesses as well as its susceptibility of fascism.

Grading Basis: Letter Grade

LAWS 8111 (3) Sem: National Security Law and US Foreign Policy

Explores the legal frameworks influencing the development of national security policy and U.S. foreign policy. Students will be introduced to applicable U.S. Foreign Relations Law, U.S. National Security Law and International Law before considering how such apply and interact in response to current threats to national security.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8112 (2-3) Seminar: Advanced Natural Resources Law

Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip, and requires additional field trip expenses. Department enforced prerequisites or corequisites: any two of the following: LAWS 6002 or LAWS 6112 or LAWS 6302 or LAWS 7725.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite LAWS 6112.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8115 (2) Seminar: Child Abuse and the Law

Explores legal responses to child abuse by examining the constitutional framework for legal proceedings, effective strategies for preventing child abuse and punishing offenders, alternatives to the current system, and cultural aspects of child abuse and the legal response to it. Examines physical abuse and neglect, and focuses on sexual abuse.

Grading Basis: Letter Grade

LAWS 8120 (2-3) Special Topics in Constitutional Law

Offers students the opportunity for in-depth discussion and study on an important topic of constitutional law. Topics may vary from year to year.

Grading Basis: Letter Grade

LAWS 8122 (2) Seminar: Mineral Development

Deals with legal and policy issues surrounding mineral development and its environmental impacts. Emphasizes the problems associated with hard rock minerals and coal development, with some treatment of oil and gas leasing and development issues. Focuses on western public lands with some discussion of international and private lands issues.

Grading Basis: Letter Grade

LAWS 8125 (2) Seminar: Law and the Politics of Family Law

Examines issues that have been raised under the United States Constitution with respect to state regulation of families. Topics include questions of family and individual privacy, the status of children, procreation, marriage and divorce, the definition of family relationships, and problems of federalism and the role of the Supreme Court in the regulation of families.

Grading Basis: Letter Grade

LAWS 8128 (2-3) Seminar: Jurisprudence

Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7128

Grading Basis: Letter Grade

Additional Information: Departmental Category: Legal Theory, Jurisprudence Social Policy

LAWS 8135 (2) Seminar: Gender, Work, and Family

Explores the social and legal problems that develop at the intersection of work and family, and considers legal/non-legal solutions that have been and could be used to accommodate both women and men in their efforts to deal with these problems.

Grading Basis: Letter Grade

LAWS 8138 (2) Seminar: The Rhetoric of Law

Considers how Anglo-American law operates rhetorically, how it persuades, builds character, offers proof, approximates the truth, establishes legitimacy, and makes things happen. It will also explore the ethics of rhetoric and note the relationship of rhetoric to other bodies of legal scholarship (e.g., law and literature, legal pragmatism, law and culture). It will hone student advocacy skills, prepare students to anticipate and defend against the rhetorical stratagems of different legal actors, and enrich students' sense of professional identity.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

LAWS 8154 (2) Seminar: Land Use Planning

Discusses public control of private land uses through planning, zoning, and regulation of land development, including consideration of constitutional and statutory limitations on legislatively created techniques. Offered in alternate years.

Grading Basis: Letter Grade

LAWS 8202 (2) Seminar: Environmental Policy

Examines issues of environmental justice, including the disparate impacts of pollution and land use controls on certain communities and ethnic groups. Topics may include concentration of waste facilities in neighborhoods occupied by poor and minority populations, adequate protection of migrant farmworkers from the impacts of pesticide hazards, and environmental controls that inhibit economic growth and development sought by Indian tribes.

Grading Basis: Letter Grade

LAWS 8205 (3) Seminar: Law and Democratic Governance

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7171

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7325.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8210 (2) Seminar: Comparative Law

Studies discrete topics in Jewish law such as family law, commercial law, criminal law, etc., using the text *Jewish Law: Cases and Materials*, and other sources such as guest lectures. The collection of books that we received from the Touro Law Center will provide a valuable resource for student research.

Grading Basis: Letter Grade

LAWS 8211 (2) Sem: Comp Constitutional Law: US, UK and Australia

Takes a comparative law approach to the constitutional law of the United States, the United Kingdom, and Australia. The seminar's intellectual purpose is to understand all three nations more deeply (especially our own) by seeing what they do similarly, what they do differently, what the advantages and disadvantages of each nation's approach appear to be, and whether any lessons learned in one place could profitably be transferred to another.

Grading Basis: Letter Grade

LAWS 8212 (2) Seminar: Environmental Law Practice and Policy

Focuses on the translation of environmental policies and purposes into environmental law and practice. Investigates policy issues on prevention of significant deterioration of air quality (PSD), the particulate matter national ambient air quality standard (PM NAAQS), and global climate changes. Emphasizes legal structure issues, including the role of national, state, and local governments in implementing environmental law and policy as well as counterpart global structures and mechanisms for responding to global or transboundary environmental problems.

Requisites: Requires prerequisite course of LAWS 7202 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 8222 (2) Seminar: Environmental Philosophy and Law

Investigates the changing philosophical underpinnings of U.S. environmental law and policy and how philosophy and legal institutions interact.

Grading Basis: Letter Grade

LAWS 8235 (2) Seminar: Advanced Topics In Family Law

Explores a variety of current issues related to family law: topics will change to reflect emerging issues and will draw from legal and social science scholarship as well as relevant statutes and cases. Possible topics include reproductive technology, children's rights, the role of religion in family law, and political theories of the family.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8242 (2) Seminar: Funding Climate Action

Explores the menu of legal and policy options that can be used to fund climate change mitigation, as well as adaptation to climate risks already underway. Robust climate action will require investment on an enormous scale and an increasingly tight timeline. How to fund these investments is one of the central questions of climate policy today.

Grading Basis: Letter Grade

LAWS 8251 (2) Seminar: Advanced Corporate Law

Explores current issues in corporate and securities law, including developments in fiduciary duties of officers and directors, corporate governance, executive compensation, revisions to the model business corporation act, and state and federal litigation reform.

Grading Basis: Letter Grade

LAWS 8252 (2-3) Seminar: Policy and Climate Change In The Mont Blanc Region

Explore the Mont Blanc region including the history and culture, along with the political and economic forces that have shaped it. Attention to the environmental and land use issues and climate change impact. Consideration of the opportunities and obstacles for regional political leaders in adapting to changes in the regional climate. Review techniques to monitor and understand baseline conditions and how climate change may be impacting those conditions. Field work on site required.

Grading Basis: Letter Grade

LAWS 8285 (2-3) Seminar: Education and the Constitution

Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers, and provides an opportunity to grow as colleagues and teammates. Requires extra time outside of class.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7055.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8300 (3) Seminar: International Adjudication

Focuses on writing briefs and memoranda of law suitable for practice before tribunals such as the International Courts of Justice. Emphasis will be on students writing, legal analysis, and presentation of oral arguments. Instruction identifies how to research and analyze international materials, such as treaties, covenants, and international customary law.

Grading Basis: Letter Grade

LAWS 8301 (2) Seminar: Innovation, Network Theory, Social Entrepreneurship

Covers topics related to the legal and public policy implications of innovation, entrepreneurship, and social networks including normative ideals of entrepreneurship, the concept of regional advantage, whether startups should be subsidized and the design of such subsidies, the role of universities in commercializing ideas, impact of the tax code on entrepreneurship, the role of corporate responsibility in startups, and more.

Grading Basis: Letter Grade

LAWS 8302 (2) Seminar: Advanced Problems in Water Resources Law

Explores the use of watersheds as geographic and political entities for addressing water-related issues and how laws and institutions facilitate or impede watershed-based problem solving.

Grading Basis: Letter Grade

LAWS 8303 (2) Seminar: Advanced Oil and Gas

Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environmental regulation, and the interplay between federal, state and local regulation.

Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8310 (2) Seminar: International Crimes Punishment

Addresses issues in international criminal law in three parts: 1) basic contents of international law, 2) international criminal tribunals that enforce international criminal law, 3) national efforts to bring international criminal prosecutions.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisites LAWS 6400 and LAWS 7440.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8311 (2) Seminar: Computer Crimes

Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront with the recent explosion in computer related crime. Includes Fourth Amendment in cyberspace, law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal and state relations in enforcement of computer crime laws, and civil liberties online.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8312 (3) Seminar: The Law of the Colorado River

Addresses the many areas of law and policy that affect management of the Colorado River and the communities that depend on it. The seminar will also include material and presentations from experts in other disciplines, including conservation biology, climate science, anthropology, geology, and hydrology. The centerpiece of the class will be a two-week raft trip through the Grand Canyon.

Grading Basis: Letter Grade

LAWS 8315 (2) Seminar: Advanced Criminal Justice

Studies policy and practice issues rather than case law. Focuses primarily on how American criminal justice is dispensed in cases that do not reach trial, including police behavior, prosecutorial discretion, defense services, bail, plea bargaining, and sentencing.

Grading Basis: Letter Grade

LAWS 8318 (2) Seminar: Law and Economics

Introduces the uses and limitations of microeconomic theory for understanding and resolving legal problems. Emphasizes concepts prominent in the law and economics literature such as cost, transaction costs, utility, and rational self interest.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8320 (2-3) Seminar: Oil and International Relations

Addresses the extent to which the international community of nations is oil dependent. Assesses the impact and the geopolitical dangers to international relations arising from the expanding demand for scarce oil from developing, as well as developed, economies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8321 (2) Seminar: Computers and Law

Explores a range of topics surrounding the juxtaposition of computers and law. Most are aware of the impact that law has on computers through the myriad of regulations that govern computers and related technologies. Less well known is the impact that computer technology is having on governance and on the practice of law. Explores both sides of this dynamic interplay between law impacting computing, and computing impacting law.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8322 (3) Seminar: Environmental Decision Making

Explores the foundational issues that underlie agency decision making, including environmental ethics, cost benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Grading Basis: Letter Grade

LAWS 8325 (2) Seminar: Reforming Criminal Trials

Starts from the premise that reform of our criminal trial system to make it less complicated, less expensive, and more reliable should be considered. Examines trial systems in other countries and U.S. changes over recent decades. Student papers make and defend proposals for reform.

Grading Basis: Letter Grade

LAWS 8331 (2) Seminar: Equality in Sports

Examines equality law and theory as applied to sports. Focuses on sex/gender/identity but includes treatment of disability, race, and class. Compares and contrasts the formal regime of legal equality, primarily in the form of Title IX, with equality norms developed in the larger society and within sports organizations themselves. Considers how the meaning of equality shifts across contexts, such as whether sport is treated as a business, as pure competition, or as an opportunity/public accommodation.

Grading Basis: Letter Grade

LAWS 8335 (2) Seminar: Advanced Criminal Procedure

Focuses on a particular topic in criminal procedure. Topics include the privilege against self-incrimination, juries and defense and prosecution ethics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 8341 (3) Seminar: Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition and how intellectual property and antitrust rules should be developed.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5260

Requisites: Requires prerequisite course of LAWS 7201 or LAWS 7241 or LAWS 7301 (minimum grade D-).

Grading Basis: Letter Grade

LAWS 8345 (2) Sem Comp Crim Pro

Grading Basis: Letter Grade

LAWS 8351 (2) Seminar: Law and Economics of Utility Regulation

Discusses economics of regulation and matters ranging from neoclassical economic analysis to public choice theory to new institutional economics. Discusses several regulatory domains, including antitrust law, telecommunications regulation and energy regulation. Highlights both economic and non-economic goals, including universal service, sustainability (e.g., renewable energy) and architecture (e.g., free speech concerns with regard to telecommunications networks).

Requisites: Requires prerequisite course of LAWS 6301 or 7201 or 7241 (minimum grade D-). Restricted to Law (LAWS) or Telecommunications (TELE) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8355 (2) Seminar: Sentencing Law and Policy

Studies sentencing law against the backdrop of criminal justice policy and concerns of public policy. Covers theories of punishment, the merits of indeterminate sentencing, sentencing guidelines, and nonincarcerative sanctions. Confronts problems of race, class, and other disparities in criminal sentencing.

Grading Basis: Letter Grade

LAWS 8361 (2) Seminar: Advanced Information Privacy

Explores current issues in information privacy law and cybersecurity law at depth. Topics will change to reflect subjects that emerge each time that the seminar is offered. Some examples include: federal consumer protection law, federal sectoral privacy statutes, state privacy laws, cybersecurity regulation, and European and comparative data privacy law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8375 (2) Seminar: Advanced Immigration and Citizenship

Explores the law and policy of citizenship in the United States, starting with legal questions regarding acquisition and loss of citizenship as well as the consequences of citizenship, but also examines the fundamental premises underlying American citizenship and the concept of citizenship generally.

Grading Basis: Letter Grade

LAWS 8385 (2) Sem Law & Religion

Grading Basis: Letter Grade

LAWS 8395 (2) Seminar: Separation of Powers

Explores the constitutional relationships among the three branches of the federal government in the sphere of domestic matters, omitting foreign affairs and war. Develops topics including executive orders, Congressional control of the executive and the courts, appointment and removal of officers, impeachment, executive privilege, use of military tribunals, and the election of 2000. A seminar paper will be required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8400 (2) Seminar: Special Topics in International Law

Provides in-depth coverage of particular issues in international law and exposes students to intellectual concepts in the field. Students write seminar length papers and develop critical thinking through writing and research.

Grading Basis: Letter Grade

LAWS 8401 (2) Seminar: Securities Litigation and Enforcement

Designed for students interested in studying topics related to securities litigation. Covers civil liability under the Securities Act of 1933, proxy fraud, class actions (with special emphasis on the Private Securities Litigation Reform Act and the Securities Litigation Uniform Standards Act), market manipulation, SEC enforcement actions, enforcement issues involving attorneys and accountants, criminal enforcement, international securities fraud and securities arbitration.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8405 (2) Seminar: Public Health Law and Ethics

Explores rules of law pertaining to the American public health care system and the ethical issues raised by the government's effort to protect the health of the American people. Held at the Anschutz Medical Campus.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8407 (2) Seminar: Tax Law, Economics and Policy

Explores current issues in tax policy. Topics may include equity, efficiency, and distributive justice; choice of tax base, including consumption taxes; social policy in the Internal Revenue Code; corporate taxation and tax incidence; and the tax legislative process, legal transitions, and tax reform. This two-credit seminar does satisfy the graduation requirement.

Requisites: Requires prerequisite or corequisite course of LAWS 6007 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 8409 (2) Seminar Special Problems in Conflict Resolution and Management

Develops a comprehensive description of dispute; creates a conflict assessment of the stakeholders in and dynamics of dispute; assess obstacles to and opportunities for mediation; recommend strategy for addressing and managing the dispute.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 8412 (2) Seminar: Critical Law and Economics

Explores some of the more successful and enduring critiques of Chicago Law and Economics. Starts with an introduction to economic analysis, including basic analytic tools like rational actor theory, supply and demand, efficiency notions, and cost concepts. Later classes will explore more advanced works in the area.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8415 (2) Seminar: Bioethics and Law

Focuses on legal, moral, and economic analyses of problems posed or soon to be posed by advances in biomedical technologies.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8421 (2) Seminar: Duties of the Professional Advisor

Studies ethical and legal regulation of lawyers, auditors, and investment bankers, who have been described as "Gatekeepers" to the investment markets. Considers changes in ethical and legal regulation that can be adopted to restore a sense of integrity for these professionals.

Grading Basis: Letter Grade

LAWS 8425 (2) Seminar: Advanced Torts

Explores how dignitary interests have influenced the development of and have been incorporated into law, using the common law of torts and the constitutional rights of life and liberty as a general (but not exclusive) focal point of discussion.

Grading Basis: Letter Grade

LAWS 8426 (2) Seminar: The Law of Pandemics

Develops student understanding of the numerous ways in which the law must reckon with, regulate, and regulate around, pandemics. Shows how, while public health law primarily engages with pandemic to stop its spread, secondary legal regimes must also take pandemics into account in order to ensure the operation of law. This includes the laws of contract, tort, property, finance, welfare, and the like. Situates reading and format within ongoing pandemics to the degree appropriate.

Grading Basis: Letter Grade

LAWS 8428 (2) Seminar: Women in Law and Literature

Considers both legal and literary depictions of women and their legal and extralegal situations. Topics may include women as mothers, women as sexual beings, women's silence, women's violence and women as criminals, women at work, and women as the "Other" in law and literature.

Grading Basis: Letter Grade

LAWS 8430 (2) Seminar: Comparative Public Health Law and Ethics

Compares public health law systems to those in other countries. Studies the goals, legal structures, and services provided, together with such issues of coercion as quarantines, monitoring, mandates and prohibitions, and forcing pharmaceutical companies to make available inexpensive generic drugs.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8440 (2) Seminar: International Human Rights

Exposes students to a variety of human rights issues and the responses by international institutions. In the fall, the seminar will meet for several sessions in a colloquium format, featuring guest speakers from around the world. In the spring semester, students will complete a paper that satisfies the law school's seminar writing requirement.

Grading Basis: Letter Grade

LAWS 8450 (2) Seminar: Law and Economic Development

Explores past and present debates over the role of the legal order in economic development. Studies the relationships among economic ideas, legal ideas and the development policies pursued at the national and international level in successive historical periods, beginning in the Seventeenth Century to the present. Focuses on the potential for an alliance of various traditions from economics, law and other disciplines to understand development.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Comparative Law

LAWS 8455 (2) Seminar: Gender and Criminal Justice

Explores the intersection of gender and criminal justice in such areas as police and prosecutorial discretion, the investigation and prevention of crimes, the definition of offenses and defenses, factors contributing to criminality, criminal sentencing and the experience of punishment, and the societal ramifications of incarcerating children's caregivers.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8458 (2) Seminar: Law and Literature

Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal and a final paper will be required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 8505 (2) Sem Interdisciplinary Perspectives on Law and Social Change

Introduces legal institutions engaged in social change, from courts, to Congress, to bureaucracies and organizations. Posits tension between tasks of dispute resolution and public policy development and institutional adaptations. Considers the role of public opinion and the classics of legal formalism to more critical accounts. Considers postmodern theory and empirical legal scholarship. Presents alternatives to court-centered approaches to change, including community lawyering and organizing, law and social movements, and legislation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8508 (2) Seminar: Constitutional Foundations Core Ideas

Focuses on core ideas in U.S. constitutional law, such as means/ends analysis, institutional competence, rights definitions, and juridical techniques for limiting governmental powers. Draws from historical writings, contemporary press accounts, learned treatises, oral arguments, law review articles, and key judicial opinions such as *McCullough v. Maryland*, *Lochner v. New York*, *Brown v. Board of Education*.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8511 (2) Seminar: Wal-Mart

Examines issues raised by Wal-Mart's size, power, and business model. Considered issues bring numerous areas of law into play, including employment and labor law, social welfare legislation, class actions, antitrust, zoning, international labor and human rights regulation, and international trade. The course will show how different areas of the law are integrated in practice.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business and Commercial Law

LAWS 8515 (2) Seminar: Forced Labor

Reviews several regimes of compulsory labor that have been central to the American experience: Black chattel slavery in the antebellum South; debt peonage, criminal surety, and related institutions of agricultural involuntary servitude; convict leasing and other forms of compulsory inmate labor; "White slavery" and prostitution; and forced labor among immigrants. Emphasizes the complicated role that the law has played, and in some respects continues to play, in both supporting and undermining such institutions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8521 (2) Seminar: Comparative Labor Law

Explores the laws and economic transformations that affect labor relations on a global scale.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8531 (2) Seminar: Labor and Employment in Transportation

Explores legal, social, and economic issues arising from labor relations in the industries transporting goods and people by road, rail, air, and water, among the most critical sectors of the economy.

Grading Basis: Letter Grade

LAWS 8533 (2) Seminar: Criminal Law in Context: Legal and Social Images of Victims and Perpetrators

Contextualizes criminal law by engaging in an in depth study of the legal and social characterizations of victims and perpetrators in U.S. law, politics and popular culture.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 8535 (2) Seminar: Class and Law

Explores issues relating social class to such areas as labor relations, law enforcement, controls on radical movements and the distribution of wealth and power. Considers problems defining social class.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8538 (2) Seminar: Modern Legal Theory Core Ideas

Explores key ideas that have shaped American law and legal thought, such as Holmes' bad man, the Coase Theorem, the "Hunch" theory of law, and others. Focuses on researching and writing many short papers.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8545 (2-3) Seminar: Food Law and Policy

Introduces students to the laws and regulations that govern our food supply. The focus is federal law provided by the U.S. Food and Drug Administration, with additional readings, videos and speakers. Topics to be covered include legal definitions for food, rules on food labeling, standards for food safety, biotechnology, international trade, organic and environmental regulation, hunger, farmer's markets and obesity.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8548 (1-2) Seminar: Theory of Punishment

Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system and focuses on the death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8555 (2) Seminar: Race, Education and American Law

Explores issues of equity, access and reform in American public education, particularly as it pertains to race, including desegregation, diversity, equal protection and public education, tracking and high-stakes testing, courts or the political branches, charters and vouchers.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 7525.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8565 (1-3) Seminar: Citizenship and Equality

The concept of citizenship connects immigration with studies of race, international human rights, gender, criminality and many others. It has been receiving growing attention in many scholarly disciplines. Examines the notion of citizenship in recent scholarship spanning law, political science, sociology and history.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8605 (3) Seminar: Regulation and Innovation

Explores two related questions: first, what role does regulation play in encouraging (or inhibiting) innovation? Second, what kinds of innovation approaches to regulation itself are being employed or might be employed and how might these strategies improve the environment for private innovation?

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 8608 (2) Seminar: Power, Ethics, and Professionalism

Examines critically the possibility and character of ethical reasoning within the legal profession in light of its institutional structures. Explores descriptive/normative accounts of the profession's structure, "Professionalism," and individual conscience. Put simply, the seminar explores whether it is possible to be a good lawyer and ethical person.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8611 (2) Seminar: US National Security and Foreign Relations in a Time of Change

Explores the legal frameworks influencing the development of national security policy and US foreign policy. Students will be introduced to applicable US Foreign Relations Law, US National Security Law and International Law and will engage in analysis about current policy approaches to emerging national security threats.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 8613 (2) Seminar: Civil Liberties Litigation

Studies issues unique to the prosecution and defense of civil liberties lawsuits. Discusses litigation strategies with reference to lawsuits currently pending in the federal courts.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public Law

LAWS 8628 (2) Seminar: Law, Power, and Politics

Draws upon various works of political theory, social theory, and jurisprudence to examine different conceptualizations of politics, power, law, and their relations.

Grading Basis: Letter Grade

LAWS 8645 (3) Seminar: Law and Politics Colloquium: Race in America

A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7191

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8648 (2) Seminar: The Law of Politics

Examines the legal framework that governs the political process, including such topics as the political question doctrine, the "Right to vote," the 2000 presidential election controversy, term limits, bicameralism and presentment, campaign finance, direct democracy, and the interpretation of the legislative product (i.e., statutes).

Grading Basis: Letter Grade

LAWS 8650 (3) Seminar: Conflict of Laws

This seminar addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.

Grading Basis: Letter Grade

LAWS 8665 (2) Seminar: Sexuality, Gender Identity, and Law

Examines the regulation of sexuality and gender identity in local, state, and federal law. Explores how sexuality and gender identity shape, and are shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.

Grading Basis: Letter Grade

LAWS 8701 (2) Seminar: Counseling Families in Business

Explores the legal aspects of owning, managing and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business and conflict resolution.

Recommended: Prerequisites LAWS 6104 and LAWS 6157 and LAWS 6211 and/or LAWS 7409.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8705 (2) Seminar: Affordable Housing

Explores the policy, legal and practical dynamics that drive the development and preservation of privately owned, government subsidized affordable housing. Investigates the nature of the market for housing, with particular emphasis on multifamily rental housing and debates about market failure in that context and then outline and contrast the major regulatory responses to such market failure. Explores how subsidy programs work in practice, focusing on model documents to frame sample transactions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8718 (2) Seminar: Modern Theorists and Law

Considers the work of Levi-Strauss, Steven Lukes, Pierre Bordieu, Alfred Schutz, Anthony Giddens, Culler, David Harvey, Denis Cosgrove, Michel Foucault, and Emily Martin with respect to social control and law. Focuses on the way in which social control is exercised through the organization of space, time, and the human body. Topics include consideration of meaning, intersubjectivity in the law, social construction of time, and the body as a real and cultural artifact.

Grading Basis: Letter Grade

LAWS 8722 (2-3) Seminar: Advanced Energy Law

Provides an opportunity for students to further develop their knowledge of the field and to engage in a substantial writing project. Examples of possible topics include hydraulic fracturing, regulation of air emissions from power plants, the smart grid, transmission siting and development, the ratemaking process, design and regulation of electricity markets, energy finance or comparative study of energy regulation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8725 (2) Seminar: Advanced Topics in American Indian Law

Examines a variety of current issues related to American Indian Law. Topics will change to reflect the subjects that emerge at each time that the seminar is offered. Some examples of topics considered include legal protections for American Indian religion and culture, cultural property, Tribal law, gaming law, and Native American natural and cultural resources law. Department enforced corequisite: LAWS 7725.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8728 (2) Seminar: Critical Theory Colloquium

Surveys critical legal theory; introduces the discipline of analytical engagement with law review literature; feminist legal theory, and critical race theory. Offers a deeper understanding of the purposes behind legal reforms, the interaction between law on the books and law in action, how different groups experience the law in different ways and difficult yet rewarding nature of working through seemingly intractable and emotionally charged race, sex and class issues.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8755 (2) Seminar: Higher Education and the Law

Examines the goals, governance, norms, and ideals of American institutions of higher education, and how those policies are shaped by the legal system. Examines the legal relationship between institutions of higher education and its various constituents: faculty, presidents, governing boards, students, alumni, and staff. Spans several traditional doctrinal categories, including contract, torts, employment law, constitutional law, intellectual property, tax, and antitrust.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 8765 (2) Seminar: Gender, Law, and Public Policy

Introduces students to various schools of feminist theory and examines the relationship between feminist theories and concrete problems in such areas as constitutional law, education law, employment discrimination, family law and criminal law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8775 (2) Seminar: Advanced Topics in Health Law and Policy

Addresses advanced legal issues in representing physicians, long-term care institutions, hospitals, and other health providers. Issues range from economic policy, distributive justice, and bioethical questions to antitrust and regulatory issues. To be taught at Health Sciences Center.

Recommended: Prerequisite LAWS 7425.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Health Law

LAWS 8785 (2-3) Seminar: Access to Justice

Explores the scholarship that has developed around the provision of legal services - or the lack of legal services - for those who cannot afford market prices for attorneys. The seminar will also examine recent efforts to provide empirical support for the range of political claims that are made about access to the legal system.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Electives

LAWS 8795 (2) Seminar: Special Topics in Law and Feminism

Provides an introduction to core concepts of human rights, women's rights and feminism. Examination of particular fields of law through feminist lenses, issues of gender and human rights, and feminist legal approaches in other countries or in comparative/cross-cultural perspectives.

Grading Basis: Letter Grade

LAWS 8808 (2) Seminar: Rhetoric and the Art of Persuasion

Explores recent work in rhetoric to identify the principles and techniques of effective persuasion in law. Examines the ways in which cognition, language, imagery, metaphor, narrative, and scene setting shape the ways in which lawyers and judges strive to persuade each other.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 9002 (3) Public Land Law

Deals with the legal status and management of resources on federal lands, including national forests, parks and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife and wilderness resources on public lands.

Requisites: Requires prerequisite course of LAWS 6112 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9003 (3) Ethical Organizations and Professionals

Provides students, particularly those in the Master of Studies in Law (MSL) in Ethics and Compliance program, the opportunity to examine what drives ethical behavior within organizations and the role that ethics and compliance professionals play in promoting ethical behavior. Investigates ethical challenges and decision making, methods to assess ethical organizational culture and qualities of ethical leadership.

Grading Basis: Letter Grade

LAWS 9005 (3) Introduction to U.S. Law for MSL Students

Provides an overview of the US legal system and will help MSL students begin to 'think like lawyers'. Students will be provided with the necessary vocabulary and skills to use legal resources and legal reasoning in academic and professional environments, including reading and analyzing cases, statutes and regulations, doing legal research, and applying existing law to the issue at hand to predict answers to legal questions.

Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Electives

LAWS 9025 (2-3) Introduction to U.S. Law For LLM Students

Reviews the fundamentals of the U.S. legal system, including an overview of the U.S. Constitution, federalism, the structure and function of courts, sources of legal authority, and common-law methodology.

Requisites: Restricted to students in the LLM program.

Grading Basis: Letter Grade

LAWS 9061 (1) Contract Drafting

Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps and warranties, capitalized terms, definitions, indemnifications and escrow).

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9101 (4) Deals: Engineering Financial Transactions

Explores the business lawyer's role in creating value by helping clients identify, assess and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9103 (1) Ethics of Patent Practice

Patent agents are not licensed to practice law in any state and therefore courts, clients and practitioners are often faced with uncertainty in defining the ethical obligations of a patent agent and the consequences of failure to fulfill those obligations.

Grading Basis: Letter Grade

LAWS 9104 (3) Wills and Trusts

Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Property

LAWS 9111 (4) Business Law Colloquium

Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9112 (2-3) Advanced Natural Resources Law

Provides in-depth study and analysis of current problems in natural resources law, using historical, literary and scientific materials. Includes field-trip and requires additional field trip expenses.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to Law (LAWS) students only.

Recommended: Prerequisite LAWS 6112 or students must have taken or be currently enrolled in any three of the following, LAWS 6002, LAWS 6112, LAWS 6302 or LAWS 7725.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9167 (3) Partnership Taxation

Examines the federal income taxation of partnerships and other pass-through entities, which represent most small businesses in the United States. Topics may include the allocation of operating income and deductions among owners, contributions and distributions of property, and acquisitions and dispositions of partnership interests by partners.

Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Taxation

LAWS 9209 (4) Natural Resources Law Clinic

Engages in litigation and advocacy aimed at protecting the natural resources of the Rocky Mountain region. Students will represent clients in matters involving public lands, wildlife, and other resources. The seminar component will focus on practical aspects of environmental litigation, including administrative practice and decision-making, client representation, citizen suits and ethical issues.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 9221 (2) Advanced Applied Compliance

Enables students to discover what it takes to transform a company's compliance program beyond a "paper program." The class will explore the elements of a strong, effective and mature Compliance program. Taught by an experienced compliance professional with the support of several expert guests, the class will investigate how the best Compliance programs augment compliance policies with processes, controls and continuous monitoring.

Grading Basis: Letter Grade

LAWS 9222 (1-2) Topics in Compliance

Learn how to assess allegations of wrongdoing and recognize situations in which internal investigations are appropriate. Students will learn how to develop an investigation plan and will be introduced to the primary steps in an investigation including the following: initiating an investigation, locating and gathering evidence, conducting interviews, analyzing evidence, articulating conclusions and drafting investigative reports.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Studies in Law (MSL) or Law-JD students only.

Grading Basis: Letter Grade

LAWS 9223 (1-2) Investigations

Learn how to assess allegations of employee wrongdoing and recognize situations in which internal investigations are appropriate. They will learn how to develop an investigation plan and will be introduced to the primary steps in an investigation including the following: initiating an investigation, locating and gathering evidence, conducting interviews, analyzing evidence, articulating conclusions and drafting investigative reports.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

LAWS 9226 (1-3) Communications for Compliance Professionals

Develops the tools students will need to thrive in the law school's MSL program. Deepens students' understanding of the United States legal system and develops their ability to communicate effectively and appropriately in writing and orally to their intended audience, and research, organize and explain their ideas clearly, using appropriate writing conventions.

Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 9246 (2-3) Intro to U.S. Legal Practice: Legal Writing, Research and Analysis

Assist LL.M. students develop their legal writing skills as well as teach practical skills needed in the U.S. legal environment including locating cases, statutes and other legal source materials, citing legal authority correctly, and checking the validity of case citations.

Requisites: Restricted to students in the LLM program.

Grading Basis: Letter Grade

LAWS 9341 (3) Law and Economics of the Information Age

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "Unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed.

Requisites: Requires prerequisite course of LAWS 7201 or 7241 or 7301 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9401 (3) Securities Regulation

Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9409 (3) Legal Negotiation

Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 9410 (3) International Trade Law

Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 9450 (2) Regional Human Rights Protection for MSL and LLM Students

Examines how human rights law and policy is created, interpreted and enforced within regional systems. Explores the main sources of human rights law including treaties, international customary law, constitutional law, municipal law, comparative law and principles; the jurisprudence of regional courts and tribunals, the institutions that support human rights advocacy and the cultural perspectives of affected communities and peoples.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

LAWS 9701 (2) Counseling Families in Business

Explores the legal aspects of owning, managing and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Recommended prerequisites: LAWS 6104 and LAWS 6157 and LAWS 6211 and/or LAWS 7409

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 9712 (3) Climate Change Law and Policy

Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007 decision in *Massachusetts v. EPA*, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9722 (3) Energy Law and Regulation

Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail completion.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9735 (3) American Indian Law II

Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom and tribal natural resource and environmental management.

Requisites: Requires prerequisite course of LAWS 7725 (minimum grade D-). Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9846 (1-2) LLM Seminar

LLM students study academic legal writing in this 1-credit per semester yearlong course. Topics covered will include: the purpose of academic legal writing; how academic legal writing differs from other forms of legal writing; topic selection; legal research (methods and ethics); first drafts; editing; academic workshops; and publishing. In addition, guest speakers will talk to LLM students about career planning and job seeking. International LLM students will learn about the American legal system.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

LAWS 9856 (1-4) LL.M Thesis

Provides eligible LL.M students the option to enroll in this two-credit LLM Thesis course. The course requires a significant work of original research on a topic chosen in consultation with a faculty supervisor and other law school faculty with set assignments for topic selection, drafts, and a workshop. In exceptional circumstances and only after pre-approval, an LLM student may enroll for a third or fourth credit.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Research and Writing

Law - Master of Laws (LLM)

Colorado Law offers a one-year, full-time LLM degree in the following areas:

- Natural Resources, Energy & Environmental Law
- International Law & Human Rights
- Indigenous Peoples Law & Policy
- Entrepreneurship & Business Law
- Intellectual Property, Technology and Telecommunications Law
- US Law for Foreign Lawyers

Colorado Law's LLM degree program is global in scope and is for talented lawyers from diverse backgrounds and countries. The LLM program fully immerses students in Colorado Law and offers inclusive access to programming, courses/modules, and the greater CU Boulder campus; our JD and LLM students learn side-by-side and from each other. At Colorado Law, we recognize that each of our LLM students have unique and diverse backgrounds and experiences, backgrounds and experiences that can enrich our community of scholars and students and help to advance Colorado Law's intellectual leadership in the world.

LLM program course options are diverse, and LLM students has the ability to design a program of study suited to his or her academic and professional interests. While students complete most courses at the law school, they also have the opportunity to complement their legal studies

with graduate-level courses in other departments within the greater university.

Requirements

The Master of Laws requires 24 credits.

For more information, contact Director of International Programs, Jimmy Ilseng at jimmy.ilseng@colorado.edu.

Learning Outcomes

Colorado Law's mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.
- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

Law - Master of Studies in Law (MSL)

Colorado Law's Master of Studies in Law (MSL) degree is a one-year, 28-credit, no-LSAT-required program that enables students who hold at least an undergraduate degree to obtain legal training short of a full Juris Doctor (JD). Increasingly, emerging job markets have openings that require some legal knowledge and employers are assigning a number of legal tasks traditionally performed by lawyers to non-lawyers. Colorado Law's MSL will prepare students to obtain and excel in those positions. MSL students will be admitted into either ethics and compliance or human rights law tracks.

Ethics and Compliance Curriculum

The ethics and compliance track trains students to become compliance and ethics officers at large corporations, as well as at nonprofit entities, such as colleges, universities, and hospitals. These organizations are subject to an increasing number of legal requirements and need trained professionals to lead effective in-house programs to ensure compliance with statutes and regulations.

This track prepares students to develop, improve, and manage ethics and compliance programs and help organizations obey the law, reduce the risk of fraud, other law-breaking, and misconduct, and mitigate their firms' legal liability and reputation risk. Students have the opportunity to focus on specific fields of law, such as privacy/cybersecurity, healthcare and financial services.

Human Rights Curriculum

The human rights track trains students in international human rights law and policy for professionals from a wide variety of academic backgrounds. During this one-year degree program, MSL students will take 28-credits of courses, including core and elective courses on a range of topics related to the international human rights system. The program of study includes a special topics course that features a series of speakers who are well-known academics from other universities or practitioners in human rights NGOs or international institutions.

Requirements

Colorado Law's Master of Studies in Law (MSL) in Human Rights is an advanced degree program that offers training in international human rights law and policy for professionals from a wide variety of academic backgrounds. The MSL in ethics and compliance is designed to prepare prospective ethics and compliance officers in privacy/cybersecurity, health care and financial services.

All MSL students will take courses designed specifically for MSL students—one that introduces them to the American legal system, and one that introduces them to legal research, writing and analysis. In addition to those introductory courses, MSL students will take required and elective courses, alongside JD students, relevant to their specialty track.

Learning Outcomes

Colorado Law's mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.
- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

Law - Juris Doctor of Laws (JD)

Colorado Law's three-year, full-time Juris Doctor (JD) degree provides a strong, well-rounded legal education with a rich mixture of theory, policy, doctrinal analysis and professional skills. Students have broad flexibility to meet their individual interests and needs.

Areas of Academic Strength

Environmental, Energy and Natural Resources Law

Ranked consistently among the very best in the country, environmental and natural resources law has been a key focus of the Colorado Law curriculum for more than half a century, and is one of the strongest and deepest programs of its kind.

Technology and Intellectual Property Law

Colorado Law has developed one of the nation's most comprehensive legal programs oriented around information technology. Technology lawyers address interesting policy challenges and novel legal issues, and rank among the most satisfied within the legal profession. Colorado Law is the right place at the right time for those interested in exploring the frontiers of entrepreneurial law, technology policy and intellectual property.

Entrepreneurial and Business Law

Colorado Law provides a robust curriculum in business law, tailored for aspiring deal lawyers in Boulder, Denver and beyond. Boulder has a vibrant entrepreneurial community with many start-up and emerging companies. We place students in small law firms that serve small business and emerging companies, as well as in larger law firms who serve traditional larger corporate clients. In recent years, we have placed students in interesting and fulfilling in-house positions.

American Indian Law

At Colorado Law, we believe that American Indians deserve the very best lawyers and that we have an obligation to train them. Our American Indian Law Program faculty, including the nation's top scholars and practitioners in the field, offers a full slate of introductory and advanced classes in the field to prepare students for all aspects of Indian law practice, and we now have dozens of successful alumni practicing Indian law in tribal government, federal agencies and at law firms. Colorado Law graduates are equally prepared to work on impact litigation, economic development, policy advocacy, individual legal services and tribal governance in Indian law. Our American Indian Law Program also appeals to many students with broader practice interests in natural resources, public lands, property, museum and art law, technology, entrepreneurship, family law and beyond. Indeed, because American Indian law raises questions regarding the rule of law and legal pluralism, the contours of sovereignty and governance, cross-cultural representation and minority rights and interdisciplinary study and practice, it offers important intellectual development opportunities for all Colorado Law students.

Juvenile and Family Law

Juvenile and family law covers a broad range of practice areas, such as marriage, divorce, custody, visitation, family support, child abuse and neglect, delinquency, adoption, estate planning, education law and elder law. The Juvenile and Family Law Program (JFLP) provides students with opportunities to acquire specialized knowledge in this field, develop a network of, and foster collaboration between, students, academics, and practitioners and engage in interdisciplinary work in the study and practice of the field. The Program includes specialized courses, research projects, externships and clinical opportunities.

Requirements

First Year

First-year courses lay the foundation and all JD candidates take these courses to learn to "think like a lawyer." Common law courses taught

in the Socratic Method allow students to develop legal reasoning and critical thinking skills.

Fall Semester

- **Civil Procedure (LAWS 5303):** Rules governing pleading, joinder of parties, discovery, jurisdiction of courts, right to jury trial, appeals and res judicata and collateral estoppel, with emphasis on the Federal and State Rules of Civil Procedure.
- **Contracts (LAWS 5121):** Contract liability, offer and acceptance, consideration, frauds statute, contract remedies, the parol evidence rule, contract performance, conditions, changed circumstances.
- **Legal Writing I (LAWS 5226):** Legal analysis and document preparation, objective legal analysis techniques, legal rule synthesis, authority use to explain rules and rule application to case facts.
- **Legislation and Regulation (LAWS 5205):** Statutory interpretation, architecture of the administrative state and interpretation and review of regulation.
- **Torts (LAWS 5425):** Nonconsensual allocation of losses for civil wrongs, focusing on negligence and strict liability.

Spring Semester

- **Legal Writing II (LAWS 5223):** Appellate brief and document preparation, oral arguments before a three-judge mock court, techniques of persuading a court to accept a client's view of the law and facts, professional judgments within ethical boundaries and lawyer credibility.
- **Constitutional Law (LAWS 6005):** Constitutional structure, including judicial review, federalism, separation of powers and constitutional rights of due process and equal protection.
- **Criminal Law (LAWS 5503):** Statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, constitutional limits.
- **Property (LAWS 5624):** Personal property, estates and interests in land, landlord-tenant, basic land conveyancing and private land use controls.

Second and Third Years

The elective program in the second and third years builds upon the foundation laid in the first-year curriculum. Students must take Evidence (LAWS 6353) and Legal Ethics Professionalism (LAWS 6103) courses and a seminar (labeled as a LAWS 8000-level course).

Experiential Learning

Students who start law school in the fall 2016 semester or later also have to complete six credit hours of experiential courses. Experiential courses are simulation courses, law clinics and externships. At least two of these credits must be obtained in courses with regularly scheduled class sessions as specified in Miscellaneous Rule 36(A). Externships do not qualify as courses with regularly scheduled class sessions, and Law School Rules generally cap credits that may be earned in externships at 4 credits. The registrar's office will post which courses in a given semester meet the definition of simulation courses before registration begins for that semester.

No student shall receive more than 14 credit hours toward the JD degree from co-curricular activities such as journals, moot court and trial competitions; Independent Legal Research; courtroom observation courses; externships; or coursework completed in another department, school or college of the university or at another institution of higher learning.

Students must complete eighty-nine (89) total credit hours with a numerical GPA of at least 2.0 and all other requirements as laid out in the Law School Rules to receive the Juris Doctor.

Elective Courses

Business

- Accounting Issues for Lawyers
- Agency, Partnership and the LLC
- Antitrust
- Bankruptcy
- Business Planning
- Business Transactions
- Corporate Finance
- Corporations
- Deals
- Deals Lab: Advanced Venture Capital
- Law Practice Management
- Mergers, Acquisitions and Reorganizations
- Secured Transactions
- Securities Regulation
- Venture Capital and Private Equity

Criminal

- Capital Punishment in America
- Criminal Procedure: Investigative Phase
- Criminal Procedure: Adjudicative Process
- Post Conviction Criminal Procedure
- White Collar Crime

Family, Gender and Health

- Domestic Violence
- Family Law
- Gender, Law, and Public Policy
- Health Law I: Finance, Administration and Organization of Health Care
- Health Law II: Medical Malpractice Litigation
- Juvenile Justice
- Parent, Child and State
- Sexuality and the Law

Government and Public Interest

- Administrative Law
- Education Law
- Election Law
- Employment Discrimination
- Employment Law
- Federal Courts
- First Amendment
- Labor Law
- Legislation
- Local Government
- Race and American Law

Intellectual Property, Technology and Telecommunications

- Computer Crimes
- Copyright
- Introduction to Intellectual Property Law

- IP Counseling
- IP and Technology Contracting
- Patent Law
- Patent Litigation
- Privacy and Security in the Digital Age
- Telecommunications Law and Policy
- Trademark and Unfair Competition

International

- Conflict of Laws
- Law and Development
- Immigration and Citizenship Law
- International Business Transactions
- International Dispute Resolution
- International Environmental Law
- International Human Rights
- International Law
- International Trade Law
- Refugee and Asylum Law

Jurisprudence and Perspective

- Class and Law
- Critical Theory Colloquium
- Economic Analysis of Law
- Gender and Law
- Jurisprudence

Litigation

- Advanced Appellate Advocacy
- Advanced Evidence
- Complex Civil Litigation
- Federal Litigation: Everything but the Trial
- Motions Advocacy
- Trial Advocacy

Natural Resources, Energy and Environmental Law

- American Indian Law I
- American Indian Law II
- Climate Change Law and Policy
- Energy Insecurity and Sustainable Law
- Energy Law and Regulation
- Environmental Law
- Foundations of Natural Resources Law and Policy
- Mining and Energy Law
- Oil and Gas
- Public Land Law
- Toxic and Hazardous Waste
- Water Law
- Wildlife and the Law

Practice—Clinical

- American Indian Law Clinic
- Civil Practice Clinic
- Criminal Defense Clinic
- Criminal and Immigration Defense Clinic
- Entrepreneurial Law Clinic

- Extern Program
- Juvenile and Family Law Clinic
- Natural Resources, Energy, and Environmental Law Clinic
- Sustainable Community Development Clinic
- Technology Law and Policy Clinic

Practice—Simulation

- Advanced Trial Advocacy
- Alternative Dispute Resolution
- Appellate Advocacy Competition
- Arbitration
- Legal Negotiation
- Mediation
- Motions Advocacy
- Trial Advocacy
- Trial Competition

Property

- Advanced Real Estate Transactions
- Construction Law
- Estate Planning
- Land Use Planning
- Real Estate Planning
- Real Estate Transactions
- Wills and Trusts

Research and Writing

- Advanced Legal Research
- Advanced Legal Writing
- *Colorado Natural Resources, Energy and Environmental Law Review*
- *Colorado Technology Law Journal*
- *Law Review*
- Judicial Opinion Writing

Taxation

- Civil Tax Controversies
- Corporate Taxation
- Estate and Gift Tax Planning
- Federal Estate and Gift Tax
- Federal Tax Politics
- Income Taxation
- International Taxation
- Partnership Tax
- Seminar: Tax, Law Economics and Policy
- Tax Policy

Seminars

- Seminar: Advanced American Indian Law
- Seminar: Advanced Criminal Procedure
- Seminar: Advanced Natural Resources Law
- Seminar: Speech, Religion, and Equality: Constitutional Values in Tension
- Seminar: Class and Law
- Seminar: Comparative Constitutional Law
- Seminar: Computers and the Law
- Seminar: Constitutional Theory

- Seminar: Consumer Empowerment
- Seminar: Counseling Families in Business
- Seminar: Gender Law
- Seminar: Information Privacy
- Seminar: Jurisprudence
- Seminar: Law and Economics of Utility Regulation
- Seminar: Law and Literature
- Seminar: Oil and International Relations
- Seminar: Tax Policy
- Seminar: Theory of Punishment

Note: Not all courses are offered each semester. This is a composite list.

Dual Degree Programs

Colorado Law students take advantage of an array of rich opportunities for interdisciplinary study through other CU schools and colleges, in addition to the University of Alberta. Students apply separately to and are admitted by the two schools under their respective admissions requirements.

The schools work in cooperation to select courses for the programs that allow students to earn the dual degrees in less time than it takes to earn each degree separately. Only credit hours earned after law school enrollment count toward the JD degree, and the first year of the JD curriculum must be taken exclusively at Colorado Law.

For additional information, see the Dual Degrees and Certificates (<https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/>) page on the Colorado Law website.

Dual Degrees with CU Boulder Programs

- Juris Doctor/Master of Business Administration (p. 1341) (JD/MBA) with the Leeds School of Business
- Juris Doctor/Master of Science in Environmental Studies (p. 1120) (JD/MS) with the Environmental Studies Program
- Juris Doctor/Doctorate in Environmental Studies (p. 1123) (JD/PhD) with the Environmental Studies Program
- Juris Doctor/Master of Science in Technology, Cybersecurity & Policy (p. 1464) (JD/MS) with the Technology, Cybersecurity and Policy Program

Dual Degrees with Other CU Programs

- Juris Doctor/Doctor of Medicine (JD/MD) with CU Denver's School of Medicine on the Anschutz Medical Campus in Aurora
- Juris Doctor/Master of Public Administration (JD/MPA) with CU Denver's School of Public Affairs
- Juris Doctor/Master of Urban and Regional Planning (JD/MURP) with CU Denver's College of Architecture and Planning

Dual Degrees with Other Universities

- Juris Doctor/Bachelor of Laws (JD/LLB) with the University of Alberta Faculty of Law, Canada

Learning Outcomes

Colorado Law's mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas,

and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.
- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

American Indian Law - Graduate Certificate

Colorado Law offers an American Indian law certificate demonstrating the completion of a concentrated course of study in the legal issues facing Native peoples and American Indian tribes. This certificate is attractive to legal, tribal and governmental employers, as well as employers seeking to do business with tribes and tribal members.

Requirements

Registration

To register for the American Indian law certificate, students should complete the following steps:

1. Consult with the Director of the American Indian Law Program about their planned selection of courses.
2. Complete the registration form (https://cuboulder.qualtrics.com/SE/?SID=SV_eWlrnYp0baHDCf3) when registering for the second year of law school, indicating the classes they plan to take for the certificate. Students are not bound to the plan submitted, and there is no penalty (other than not receiving the certificate) for failing to complete the program.

Note: Students are strongly encouraged to submit the registration form when registering for the second year. It helps both the student and the program to plan for the student's successful completion of the program. However, students can still receive the certificate if they submit this form late but complete the required coursework.

Program Requirements

Students must complete at least 92 credit hours (89 credit hours are required for the JD), at least 18 of which are in designated Indian law and related courses.

A student who satisfies all of the course requirements shall be awarded the certificate if the student earned a grade of at least C. A student who satisfies all of the course requirements for a certificate program would be awarded the certificate "with honors" if the student earned at least an A-average in courses designated by the student as satisfying the certificate requirements.

Visit the Rules of the Law School (<http://www.colorado.edu/law/about/rules/>) for complete details.

¹ Approval of the AILP Director required.

Entrepreneurial Law - Graduate Certificate

The entrepreneurial law certificate coordinates Colorado Law's strengths and business-law related assets in the areas of entrepreneurial and technology law, such as the Silicon Flatirons Center (<https://siliconflatirons.org/>), the Entrepreneurial Law Clinic (<https://www.colorado.edu/law/academics/clinics/entrepreneurial-law-clinic/>) and the *Colorado Technology Law Journal*. It is awarded to law students who complete coursework reflecting a concentrated study of issues typically faced by transaction-side lawyers, and signals to prospective employers that a student possesses a skill set with applicability across issues of transactional law.

Requirements

Certificate requirements include:

1. at least 92 credit hours (89 is required for the J.D.), and
2. at least 21 of the 92 credit hours in the area of entrepreneurial law.

This includes at least 3 credit hours in a Business School course and participation in an Experiential Offering relevant to the certificate. Visit the Rules of the Law School (<https://www.colorado.edu/law/about/rules/>) webpage for complete details, including a full list of relevant electives to be used to satisfy the 21 credit-hour requirement.

Required Courses and Credits

Code	Title	Credit Hours
Required Doctrinal Core Courses		
Choose one:		
LAWS 6211	Corporations	
LAWS 6201	Agency, Partnership, and the LLC	
Venture Capital Courses		
Choose one:		
LAWS 7271	Venture Capital and Private Equity	
LAWS 7101	Deals: Engineering Financial Transactions

Or any CU Leeds School of Business Finance course		
Required Skills Courses		
Choose two or more of the following to complete 4 credit hours:		
LAWS 7051	Transactional Drafting	
LAWS 7061	Contract Drafting	
LAWS 7409	Legal Negotiation	

LAWS 7709 Advanced Legal Negotiation

Any section of a Deals Lab such as LAWS 6271 or LAWS 7004 or those approved and offered by the Law School

Required Domain Expertise Courses

Choose one graduate-level course at the Leeds School of Business:¹

MBAX 6100	Entrepreneurship
MBAX 6110	Entrepreneurial Finance
MBAX 6170	New Venture Creation

Experiential Offering

Completion of at least one of the following: (i) participation in the New Venture Challenge; (ii) membership in the Deming Center Venture Fund; (iii) participation in the Transactional LawMeet; (iv) participation in the Venture Capital Investment Competition; or (v) another experiential offering as approved by the Program Advisor.

Required Professional Practice Course or Transactional Experience

LAWS 7619 Entrepreneurial Law Clinic

A transactional internship or externship approved by the program advisor.

¹ If circumstances warrant, the MBA requirement may be waived after consultation with the program advisor and completion of a substitute course (certificate participants should ensure their compliance with Law School Rule 22 as it applies to Business School offerings).

Environmental, Natural Resources and Energy Law - Graduate Certificate

The University of Colorado Law School has a proud tradition as a leader in the field of natural resources law, and it consistently ranks among the best programs in that field. The environmental, natural resources and energy law certificate recognizes the strength of the law school's natural resources program by affording law students the opportunity to design an educational program that provides a solid foundation in natural resources law, even while ensuring that they receive a well-rounded legal education. The certificate also offers prospective employers evidence of a student's interest and commitment to the study of natural resources law.

Requirements

At least 92 total credit hours in law school courses or in graduate-level courses approved for the certificate program by the Dean's Office, in consultation with the environmental, natural resources and energy law certificate advisor.

A student who satisfies all of the course requirements for the environmental, natural resources and energy law certificate will be awarded the certificate with honors if the student earned an average of at least an A- for classes designated by the student that satisfy the requirements for the certificate. A grade of C is required for all certificate courses to count towards completion.

At least 18 credit hours in natural resources law and policy courses, in addition to administrative law, as set forth below.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
LAWS 7205	Administrative Law	3
LAWS 8112	Seminar: Advanced Natural Resources Law (or any other natural resources law-related seminar approved by the Program Advisor for the Environmental, Natural Resources, and Energy Law Certificate.)	2-3
Electives		
Choose at least three of the following:		9
LAWS 7202	Environmental Law	
LAWS 6112	Foundations of American Natural Resources Law	
LAWS 6722	Energy Law and Regulation	
LAWS 6002	Public Land Law	
LAWS 6302	Water Resources	
Choose at least two of the following:		6
LAWS 6712	Climate Change Law and Policy	
LAWS 7122	Mining and Mineral Development Law	
LAWS 7132	Energy, Insecurity, Sustainable Law	
LAWS 8320	Seminar: Oil and International Relations	
LAWS 7102	Oil and Gas

LAWS 6502	Wildlife and the Law	
LAWS 7154	Land Use Planning	
LAWS 7209	Natural Resources and Environmental Law Clinic	
LAWS 7916	Journal: CO Natural Resources, Energy & Environmental Law Review	
LAWS 7939	Extern Program (externship with Natural Resources law focus)	
Any environmental, natural resources, or energy-related course in a non-law department (e.g. ENVS) approved for the certificate program by the Certificate Advisor.		
Optional fourth and/or fifth course from the first set of elective courses (under "choose at least three" above).		
Total Credit Hours		20-21

Health Law and Policy - Graduate Certificate

Law students may demonstrate to employers that they are prepared to practice health law and lead in the administration financing, organization policy-making and delivery of health care by earning a health law & policy certificate (HLP).

The HLP certificate not only prepares students to practice law in areas such as health care administration, organization, financing, public interest advocacy and public health, but also allows students to take advantage of the wealth of resources and courses related to health and health care in the Law School and throughout the University of Colorado system.

Colorado Law surveyed health law employers and heard from them that the HLP certificate will move law graduate resumes to the top of the applicant pile.

For more information, contact the program director.

Requirements

To qualify for the HLP certificate, a student must earn 92 credit hours—three more than required for a regular JD degree—and at least 20 credit hours must be earned in courses approved in the health law and policy curriculum. Students awarded the health law & policy certificate will carry the notation of their concentration on their Law School transcripts. Moreover, students may earn the "Certificate With Honors" notation by earning a cumulative average grade of at least A- in the designated courses.

A full list of the designated courses and HLP certificate requirements may be found in Law School Rules (https://www.colorado.edu/law/about/rules/#_Toc385575490).

¹ Additional courses of ANTH 5290, HSMP 6604, ANTH 5300, HBSC 6320, HBSC 7120, HSMP 6606, ANTH 5014 and ANTH 5080 available through Colorado School of Public Health or Health and Behavioral Sciences at CU Denver.

² At least 4 credits, approvals required.

³ Note that Civil Practice Clinic is a year-long course.

International Law - Graduate Certificate

The international law certificate program is designed to ratify a student's completion of a concentrated course of study in international law. This certificate will provide students with a grounding in the foundations of private and public international law, and also reflects the interdisciplinary nature of the ever growing international law practice, from international business transactions to international human rights. This certificate signals to potential employers and others that the student has engaged in a sustained course of study regarding international law and practice.

Requirements

Law students who wish to participate in the international law certificate program should contact the Law School Registrar and the certificate program advisor.

The international law certificate requires completion of the normal requirements for the JD, and the additional 3 credit hours that are required (total of 92 credit hours). The program can be completed within the normal three-year law degree if a student takes a somewhat heavier than average course load in each semester after the first year of study.

Students must earn a grade of at least a C in each required course. A student who satisfies all of the course requirements for a certificate program would be awarded the certificate "with honors" if the student earned at least an A- average in courses designated by the student as satisfying the certificate requirements.

Required Courses and Credits

A minimum of 18 credit hours must be obtained in the area of international law as follows:

Code	Title	Credit Hours
Core Courses		
One of the following:		3
LAWS 6008	Foundations of International Legal Thought	
LAWS 6400	International Law	
Three of the following:		9
LAWS 6108	Conflict of Laws	
LAWS 7421	Business and Human Rights	
LAWS 6008	Foundations of International Legal Thought	
LAWS 6540	Global Law & Global Governance	
LAWS 7611	International Business Transactions	
LAWS 7310	International Dispute Settlement	
LAWS 6510	International Environmental Law	
LAWS 7440	International Human Rights and Humanitarian Law	
LAWS 6400	International Law	
LAWS 6410	International Trade Law	
LAWS 7617	International Taxation	
LAWS 7450	Regional Human Rights Protection for JD Students	
Other courses approved by the program advisor		
International Law Seminar		
One of the following:		2
LAWS 8440	Seminar: International Human Rights	
LAWS 8320	Seminar: Oil and International Relations	
LAWS 8400	Seminar: Special Topics in International Law	
LAWS 8450	Seminar: Law and Economic Development	
LAWS 8548	Seminar: Theory of Punishment	
Other seminars approved by the program advisor		
Electives		

Electives with an international or comparative law component approved by the program advisor	4
Total Credit Hours	18

The certificate program advisor may approve additional classes as they reasonably fit within the framework of the program requirements below. In the event that a required course is not taught during an academic year, the program advisor shall have discretion to authorize a reasonable substitute course as satisfying a program requirement.

Juvenile and Family Law - Graduate Certificate

Juvenile and family law covers a broad range of practice areas, such as marriage, divorce, custody, visitation, family support, child abuse and neglect, delinquency, adoption, estate planning, education law and elder law. The juvenile and family law program (JFLP) provides students with opportunities to acquire specialized knowledge in this field, develop a network of, and foster collaboration between students, academics and practitioners, and engage in interdisciplinary work in the study and practice of the field. The program includes specialized courses, research projects, externships and clinical opportunities.

Requirements

Admission Requirements

Interested students should submit a completed Certificate Application (https://cuboulder.qualtrics.com/SE/?SID=SV_a5IGEoglyAxINyZ).

Required Courses Credits

Colorado Law offers a juvenile and family law certificate, demonstrating a student's completion of a concentrated course of study in juvenile and family law.

Students must earn 92 total credits, which must include 18 in the field of juvenile and family law.

A student who satisfies all of the course requirements for the certificate will be awarded the certificate if the student earned at least a C in each course designated by the student as satisfying the certificate requirements. A student who satisfies all of the course requirements for the certificate would be awarded the certificate "with honors" if the student earned a cumulative grade point average of at least an A- in courses designated by the student as satisfying the certificate requirements.

Visit Rules of the Law School (<http://www.colorado.edu/law/about/rules/>) for complete details.

LAWS 7515	Poverty Law	
LAWS 7505	Sexuality and the Law	
LAWS 8235	Seminar: Advanced Topics In Family Law	
LAWS 6104	Wills and Trusts	
Other course(s) with significant application to the field of juvenile and family law (approved by the Program Directors)		
Additional Practice Opportunities ¹		0-2
Externships in the field of juvenile and family law, including acting as a research assistant for a professor working in this field (1-2 credits)		
Participation in a national moot court competition (1 credit)		
Total Credit Hours		18

¹ Consistent with law school limitations on practice credit hours and subject to the approval of the Program Advisor, participants may earn up to 2 credit hours toward the Certificate requirements through additional practice opportunities as defined in this section.

Tax Emphasis - Graduate Certificate

The Law School offers a program of law study that leads to a Juris Doctor degree with an emphasis in taxation. The program signifies tax law experience beyond that normally obtained by law graduates, but not as extensive as that obtained in a master's of taxation degree program.

Requirements

Program Requirements

Students must earn at least 92 credit hours (89 are required for the JD) with at least 18 of the credits in taxation.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
LAWS 6007	Income Taxation	4
LAWS 7207	Federal Estate and Gift Tax	3

Business Entity Taxation 3

Choose at least one:

LAWS 6157	Corporate Taxation
LAWS 6167	Partnership Taxation
LAWS 6117	Survey of Business Enterprise Tax

Planning 2-3

Choose at least one:

LAWS 7217	Estate Planning
LAWS 7211	Business Planning
LAWS 7024	Real Estate Planning

Tax Policy 2-3

One course in tax policy at the Law School or the Leeds School (2 or 3 credits), or Public Finance in the Economics Department (3 credits)

Additional Electives 2-4

May consist of tax courses (at the Law School) or from graduate tax offerings (at the Leeds School of Business) approved for law credit.¹

Total Credit Hours	18
--------------------	----

¹ In the event that a required course is not taught during an academic year, the program advisor shall have discretion to authorize a reasonable substitute course as satisfying a program requirement.

Business school and economics department courses taken for Law School credit under the tax emphasis program are limited to 6 semester credit hours and must have received prior approval from the faculty. Students may take more than the required 18 credit hours of tax courses.

Students must receive at least a B in the business school course or in the public finance course to count for Law School credit. The business school or public finance courses will be treated as pass/fail courses for the Law School transcript; that is, these courses will count toward the 92 hours required for the degree, but will not be taken into account in computing a law student's grade point average.

Graduating in Three Years

Students can complete the program within the normal three-year law degree period if they take a somewhat heavier than average load in each semester after the first year of law study. Law students who wish to participate in the program should submit an online enrollment form to both the program director and the law school registrar. See law school website for details.

CONTINUING EDUCATION CATALOG

The mission of the Division of Continuing Education is to provide quality, innovative, lifelong learning opportunities to a diverse student population by extending the educational resources of the University of Colorado Boulder. Continuing Education collaborates with departments across campus to offer a variety of evening and online courses for university credit, graduate certificates, and degree programs. The division facilitates nondegree enrollment in main campus classes for visiting students, high school students and auditors. (Nondegree refers to students who have not been formerly admitted to a CU Boulder degree program.) Continuing Education is also involved in the administration of CU Boulder's Summer Session. Only university-approved faculty teach in Continuing Education programs.

ACCESS

In conjunction with CU Boulder academic departments, ACCESS (<http://ce.colorado.edu/programs/access/>) (Available Credit Courses for Eligible Special Students) enables nondegree students to enroll in Boulder main campus undergraduate and graduate credit courses after degree-seeking students have registered.

Applied Music Program

The Applied Music Program (<http://ce.colorado.edu/programs/applied-music/>) offers non-music majors the opportunity to earn CU credit for beginning or continuing music lessons on guitar, piano, voice, winds, brass, drums, percussion or strings. Instruction is available in individual or group sessions depending on the instrument.

Bachelor of Arts in Interdisciplinary Studies

The Bachelor of Arts in Interdisciplinary Studies (<https://catalog.colorado.edu/undergraduate/colleges-schools/education/programs-study/interdisciplinary-studies-bachelor-arts-ba/>) is an online bachelor's degree supported by a partnership between the School of Education and Continuing Education. This major has an interdisciplinary emphasis with a broad, liberal arts core addressing the arts and humanities, social and behavioral studies, and the natural sciences and mathematics. Three foundation courses in interdisciplinary studies are required, as well as two interdisciplinary areas of emphasis, one of which must be in education. The 100% online modality is offered to support motivated and qualified nontraditional learners who otherwise may not have access to the university.

CE Evening Credit Program

Offered in conjunction with CU Boulder's academic departments, the CE Evening Credit Program (<http://ce.colorado.edu/programs/evening-credit/>) provides credit courses in the evening on the Boulder campus. These smaller-sized classes are provided through various departments.

CE Online Credit Program

The CE Online Credit Program (<http://ce.colorado.edu/programs/online-credit/>) offers online versions of approved CU Boulder courses from 35 departments on campus. Online courses hold the same breadth, depth and rigor as face-to-face courses while offering students more control over when and where they complete their coursework. A rich

collaboration among faculty and instructional designers with expertise in learning technology focuses on ongoing enhancements of quality and innovation. Courses range from traditional semester-long courses to shorter intensive terms and online flexible courses.

CU Complete

The goal of CU Complete (<http://ce.colorado.edu/programs/cu-complete/>) is to assist former CU Boulder students in the completion of their degrees. Advisors work with each student individually and offer a degree analysis, recommendations, resources and assistance in completing remaining requirements.

Extraordinary Program

The Extraordinary Program offers alternative solutions to meet unique needs of academic programs and departments across campus in terms of special student populations, customized schedules and specific financial arrangements. Over 200 courses are offered annually, ranging from one-day workshops to courses that span multiple semesters. The program benefits the goals of 30 different departments and serves a wide variety of special populations and students.

High School Dual Enrollment

Colorado high school juniors and seniors interested in the challenge of university coursework may enroll in ACCESS as part of the High School Dual Enrollment Program (<https://ce.colorado.edu/programs/high-school-dual-enrollment/>). In addition to earning college credit, students may also earn credit toward high school graduation requirements.

Individualized Instruction

Individualized Instruction provides an opportunity for students to receive credit for university courses by meeting with faculty members outside the regular classroom setting. This option may be used when the student cannot reasonably be expected to enroll in the main campus course.

International English Center

The International English Center (<http://iec.colorado.edu/>) (IEC) offers a range of comprehensive English language and culture programs designed for international pre-collegiate, undergraduate and graduate students, working professionals, au pairs and special groups. Students build and refine their communication skills through engaging classroom instruction, experiential learning, extended practice and cultural activities. Full and part-time programs are available. Students can choose from classroom, hybrid and online formats. Programs include intensive English, ESL academic bridge (for conditionally admitted CU Boulder students), ESL credit for undergraduate and graduate students, EducationUSA Academy for international high school students, test preparation, language and culture for au pairs, global professional English, military English and leadership communication, teacher training and customized options for special groups. The IEC is authorized to issue a form I-20 for qualified students seeking to study full-time on an F-1 visa. For some programs, qualified exchange visitors may request a form DS-2019 from the IEC to apply for a J-1 visa.

Language Technology Certificate

The Language Technology Certificate (<http://www.colorado.edu/languagetechnologyprogram/>) is a 12-credit, fully online graduate program designed for language educators who wish to advance their technological, pedagogical, and linguistic skills. Language educators learn to leverage today's technology to improve their students' proficiency

and develop intercultural competence. The certificate curriculum provides tools and strategies to effectively and confidently navigate the evolving language teaching profession.

Master of Science in Organizational Leadership

Offered through a partnership with the Graduate School, the Master of Science in Organizational Leadership (<https://catalog.colorado.edu/graduate/colleges-schools/interdisciplinary-programs/organizational-leadership-master-science-ms/>) is an interdisciplinary, fully online professional master's degree that prepares early- to mid-career professionals to succeed as tomorrow's dynamic leaders. Through coursework that blends business, communications, and social sciences, the program develops the knowledge and skills students need to think critically about organizational challenges and how to address them using best practices. Students learn to align others around a shared vision, build and manage effective teams, and apply the leadership skills necessary to excel in an increasingly fast-paced and complex work world. Visit the Master of Science in Organizational Leadership website (<http://msol.colorado.edu/>) to learn more.

Post-Baccalaureate Health Professions Program

The Post-Baccalaureate Health Professions Program (<https://www.colorado.edu/ceprehealth/>) is a partnership between the College of Arts and Sciences and the Division of Continuing Education. It is designed for career changers who were academically successful as undergraduates but have not completed the prerequisite science courses needed to apply to graduate medical programs. Students enter the program in a cohort and take all coursework together. The program provides in-depth pre-health advising, academic advising, group and individual tutoring, peer mentors, and social events.

Science Discovery

Science Discovery (<https://www.colorado.edu/sciencediscovery/>) is a science education outreach organization designed to heighten student interest and increase literacy in science, technology, engineering and math (STEM). Science Discovery connects K–12 students and teachers to CU science through a broad array of virtual, in-person and hybrid programs including summer camps, summer high school enrichment, out of school time classes, homeschool programs, in-school programs, teacher professional development workshops and Teen Science Cafés. Programs capitalize on CU Boulder's scientific resources, facilities and expertise (including CU graduate and undergraduate students) in order to excite participants about STEM, expose them to a variety of STEM careers and professionals, and inspire a future generation of scientists and engineers. Science Discovery reaches more than 30,000 students and teachers throughout Colorado and beyond.

Winter Session

Winter Session (<http://www.colorado.edu/winter/>) occurs during the winter break between fall and spring semesters, and allows students to take intensive online courses in a short period of time. Winter Session credits count toward the spring semester.

Summer Session

Summer Session (<http://www.colorado.edu/summer/>) offers more than 600 courses and enrolls about 8,000 students between the months of

May and August. Courses in a variety of formats are available to students who wish to enhance or accelerate their academic progress. Courses are also open to students visiting from other colleges, teachers, high school students or others interested in pursuing their professional development or enrichment. Special three- and five-week sessions are offered throughout the summer to provide intense, accelerated courses for those who need academic credits in an abbreviated time period.

Visit the Summer Session (<https://www.colorado.edu/summer/>) website to learn more about summer at CU Boulder.

Auditing

Auditing allows interested individuals the opportunity to attend university classes for no academic credit. Auditors must receive permission and obtain a signature from course instructors during the first week of class to be formally added to the roster.

Audited courses will appear on a special non-academic credit transcript; however, no academic credit is awarded. Registered auditors receive class instruction, access to online course materials and library privileges only. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course for no credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit.

Community Auditors

Community members age 18–54 can register for the Community Auditors program through Continuing Education by completing the Community Auditor Registration Form on the Community Auditors (<http://ce.colorado.edu/programs/community-auditors/>) webpage. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

With instructor permissions, community auditors pay a set rate to audit as many classes as desired. Nonrefundable payment is due at the time of enrollment.

Senior Auditors Program

Individuals 55 years and older can register for the Senior Auditors Program through the CU Boulder Alumni Association and qualify for a reduced auditing rate. Registration and eligibility information is available on the Senior Auditors (<http://www.colorado.edu/alumni/programs/senior-auditors/>) webpage. Contact the Alumni Association at 303-492-8484 for more information about this program.

Office for Outreach and Engagement

Public outreach and community engagement are crucial to the University of Colorado Boulder's role as a comprehensive public research university and are vital to the Division of Continuing Education's mission. The Office for Outreach and Engagement (<http://www.colorado.edu/outreach/oeo/>) serves the CU Boulder campus and the state by helping to connect research, teaching and creative work with public needs and interests. The office administers the CU Boulder Outreach Awards for faculty-led outreach and engagement projects and office grants, manages the campus-wide Community Outreach and Engagement Programs (<http://www.colorado.edu/outreach/>) website, assists with program and proposal design, leads strategic outreach initiatives, organizes the CU

on the Weekend lecture series and provides outreach communications support.

CU on the Weekend

CU on the Weekend (<https://www.colorado.edu/outreach/ooe/cu-weekend/>) is a series of free public lectures offered through the Office for Outreach and Engagement. The series runs during the fall and spring semesters each year and features some of CU Boulder's most dynamic faculty. This program's delivery may be virtual depending on university guidance/policy.

Academic Integrity

The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish. The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

Honor Code

Academic Dishonesty includes any act in which a student gains, or attempts to gain, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. **Plagiarism.** Portrayal of another's work or ideas as one's own; improper citation of another's work, including, but not limited to, one's own previous work.
2. **Cheating.**
 - a. **Unauthorized Use.** Use of prohibited notes or study aids; allowing another party to do one's work/exam and turning in that work/exam as one's own; copying another student's course work; collaborating on course work when prohibited; failing to abide by the specific written course instructions, including, but not limited to, exams, homework assignments, and syllabi; and/or use of electronic devices when not expressly permitted.
 - b. **Clicker Fraud.** Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.
3. **Fabrication.** Falsification or creation of data, research, or resources, altering graded work without the prior consent of the course instructor.
4. **Lying.** Deliberate falsification with the intent to deceive, as applied to an academic submission of information.
5. **Bribery.** Providing, offering, or taking rewards in exchange for a grade, or, an assignment, or in the aiding of Academic Dishonesty.
6. **Threat.** Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code violation, or in connection with any other form of Academic Dishonesty.
 - a. **Retaliation.** Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by SCCR staff.
7. **Unauthorized Access.** Gaining unauthorized access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; or secure information on an online server.
8. **Resubmission.** Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course instructors involved.
9. **Aiding Academic Dishonesty.** Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
 - a. Sharing course materials, including but not limited to personal notes, in an unauthorized online bank or forum, whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code.

A student accused of violating the Honor Code has the right to due process through Student Conduct & Conflict Resolution. Students will receive notice through their Colorado.edu email address, and are encouraged to meet with a Conduct Coordinator to share their perspective on the allegations. Full details of the Honor Code adjudication process are on the Student Conduct & Conflict Resolution website (<https://www.colorado.edu/sccr/honor-code/>).

Student Affairs

Health & Wellness

Health and Wellness Services

Health and Wellness Services is a part of the CU Boulder Division of Student Affairs. As part of Student Affairs, we are collectively committed to the success and well-being of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings. To learn more, visit Health and Wellness Services (<http://www.colorado.edu/health/>).

Medical Services

Medical Services is the primary health care resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (<https://www.colorado.edu/healthcenter/>). (<https://www.colorado.edu/healthcenter/>)

Counseling and Psychiatric Services

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus and online mental health and psychiatric services for a variety of concerns including academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (<http://www.colorado.edu/health/counseling/>).

Disability Services

Disability Services is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests,

implementation, guidance and general information. To learn more, visit Disability Services (<http://www.colorado.edu/disabilityservices/>).

CU Boulder Student Health Insurance Plan (SHIP)

All students are required to have health insurance while attending CU Boulder. Students may elect coverage through an individual health insurance plan, through a family member or employer or the CU Gold Student Health Insurance Plan (SHIP). Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process.

All students, regardless of their insurance plan, have **full access** to the services provided by Health and Wellness Services.

For more information, visit the Health Insurance Requirement (<http://www.colorado.edu/health/insurance/health-insurance/webpage>).

Note: Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (<http://connectforhealthco.com/>) website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (<https://www.healthcare.gov/>) website.

Student Conduct & Colorado Creed Student Conduct & Conflict Resolution

The mission of Student Conduct & Conflict Resolution is to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- Fostering reflection on the impact of their behaviors.
- Promoting harm repair and responsible community membership.
- Cultivating the wellbeing and safety of the University of Colorado (CU) Boulder community.

Clarification of Values

1. The student will understand the effect of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy, and will commit no further violations of policy.
3. The student will gain understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through the Student Conduct & Conflict Resolution process, the student will be asked to reflect on their beliefs, ethics, and values.
 - a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the university community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

Authority

Article 7, Part B, of the Laws of the Regents requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding behavioral problems should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, University of Colorado Boulder, 10 UCB Boulder, CO 80309, phone 303-492- 5550.

Jurisdiction

1. This document governs:
 - a. Student conduct that occurs on, or as it relates to, university property or at official functions and university-sponsored programs conducted away from the campus. University property is defined as land, buildings, digital space, and facilities in possession of or owned, used, or controlled by the university, or funded by university budgets.
 - b. Student conduct that occurs off university property is subject to this policy if it:
 - i. adversely affects the health, safety, or security of any member of the university community, including the student alleged to have violated university policy, or the mission of the university;
 - ii. involves any records or documents of the university;
 - iii. involves conduct that may be a violation of federal, state, or local law as determined by SCCR.
 - c. For purposes of this policy, the university's mission is broadly defined to include both its academic goals and the importance of developing civic responsibility in our students.
 - d. Wherever the Student Code of Conduct refers to "responding student", the same also applies to Recognized Student Organizations (RSOs). RSOs, as described in the Student Organization Handbook (<https://www.colorado.edu/involvement/>), are general student organizations recognized by the Center for Student Involvement (CSI) and the University. For additional information, see L.5 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
2. Actions taken under the conduct process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. The conduct process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the conduct officer. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and adjudicating an incident.
3. The unexcused failure of a responding student to appear and/or respond to the conduct process does not prevent the university from proceeding with or completing the conduct process.
4. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence, and gender/sex-based stalking), protected class discrimination, harassment, and any related retaliation, see Section L.1 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).

5. For jurisdictional information pertaining to academic misconduct, see Section L.2 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
6. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to Student Conduct & Conflict Resolution or the Office of Admissions.

Student Conduct Process

Informal Resolution

This process may generally include, but is not limited to, a meeting with a conduct officer, completion of the agreement, and/or participation in the Restorative Justice program as is referenced in Section H.5 of the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).

During the meeting, if the conduct officer determines that the informal resolution process may be appropriate, the conduct officer will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational sanctions assigned by the conduct officer, then SCCR will consider the matter to be resolved informally.

Formal Resolution

This process generally includes: (i) written notice of the factual allegations and alleged violations of the Student Code of Conduct; (ii) the opportunity to meet with the conduct officer to address the allegations and provide information to the conduct officer; (iii) the conduct officer reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and (iv) written notice to the responding student of the conduct officer's determinations.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing Policies (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.

Actions taken under the conduct process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. The conduct process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the conduct officer. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and adjudicating an incident.

The unexcused failure of a responding student to appear and/or respond to the conduct process does not prevent the university from proceeding with or completing the conduct process.

Cases involving sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) policies. For more information, visit the OIEC (<https://www.colorado.edu/oiec/>) website or call 303-492-2127.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons

convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the Policies (<https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/>) webpage.

Colorado Creed

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (<http://www.colorado.edu/creed/>) website.

Student Resources

The Division of Student Affairs (<http://www.colorado.edu/studentaffairs/>) offers many on-campus resources for our students. Visit our offices to learn more.

Student Life & Involvement

- Center for Student Involvement (<https://www.colorado.edu/involvement/>): Be involved! Find your group – and yourself – by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (<https://custudentgov.org/>): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (<https://www.colorado.edu/ecenter/>): Helping CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (<https://www.colorado.edu/greeks/>): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community of 28 chapters.
- Housing & Dining (<https://www.colorado.edu/living/>): Explore information about on-campus life, including residence halls, meal plans and dining options!
- New Student & Family Programs (<https://www.colorado.edu/orientation/>): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (<https://www.colorado.edu/offcampus/>): Explore off-campus rentals on Ralphie's List, register your party and learn about the legal aspects of off-campus living.

- Residence Life (<https://www.colorado.edu/living/>): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (<https://www.colorado.edu/umc/>): Home to the CU Book Store and student offices, as well as plenty of entertainment and dining options.

Health & Wellness

- Counseling & Psychiatric Services (<https://www.colorado.edu/counseling/>): Offers confidential, on-campus mental health and psychiatric services including workshops, groups, individual counseling and medication management.
- CU Collegiate Recovery Center (<https://www.colorado.edu/recoverycenter/>): A supportive student community offering free support meetings, sober social events, recovery coaching and referrals for students.
- Health Promotion (<https://www.colorado.edu/health/promotion/>): Assists students in developing skills to make healthy decisions through outreach and education, including workshops, classes, events and conversations.
- Medical Services (<https://www.colorado.edu/healthcenter/>): Provides on-campus health and wellness services including medical care, nutrition, physical therapy, sexual and reproductive health and more.
- Office of Victim Assistance (<https://www.colorado.edu/ova/>): Offers free and confidential support, consultation, advocacy and counseling for students, staff and faculty who've experienced a traumatic, disturbing or life-disruptive event.
- Recreation Services (<https://www.colorado.edu/recreation/>): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and the Outdoor Program.

Student Support & Development

- Career Services (<https://www.colorado.edu/career/>): Find student and alumni jobs, fine-tune your resume, learn about your strengths, land that internship and make connections with employers.
- Student Conduct & Conflict Resolution (<https://www.colorado.edu/sccr/>): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (<https://www.colorado.edu/studentlegal/>): Offers accessible, low-cost legal advice and education to students regarding their rights, responsibilities and how to navigate the legal system.
- Students Support & Case Management (<https://www.colorado.edu/studentaffairs/sscm/>): Provides individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (<https://www.colorado.edu/veterans/>): Serves prospective and current student veterans and veteran dependents, including program information, policies, pay and support.
- Volunteer Resource Center (<https://www.colorado.edu/volunteer/>): Explore volunteer opportunities for CU Boulder students and staff throughout the greater Boulder community.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it's important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (<https://www.ferpa.gov/>)

www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (<https://www.colorado.edu/registrar/students/records/ferpa/glossary/>)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you've applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (<https://www.colorado.edu/registrar/students/records/ferpa/exceptions/>)
- To fulfill a request for data that CU Boulder defines as directory information (<https://www.colorado.edu/registrar/students/records/ferpa/directory-info/>)

Student data that is *not* directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (<https://www.colorado.edu/registrar/students/records/privacy/guest-access/>) and FERPA Consent to Release (<https://www.colorado.edu/registrar/students/records/privacy/consent/>). You may restrict the release of directory information by placing full privacy (<https://www.colorado.edu/registrar/students/records/privacy/full/>) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name¹
- hometown (city, state)
- campus email address²
- dates of attendance
- previous educational institutions attended

- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

¹ If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student's primary name. When communicating with outside third parties, including parents, the university generally uses a student's primary (legal) name. Students may also select a diploma name (<https://www.colorado.edu/registrar/students/graduation/>) for graduation and commencement materials.

² Campus email addresses are only disclosed to requestors who agree to not use them for solicitation.

Withholding Directory Information

Students have the right to withhold directory information from inquirers. To restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Confidential Information

Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (<http://www.colorado.edu/registrar/students/records/privacy/>) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information

Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena

and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Tuition Classification

In-State and Out-of-State Tuition Classification

Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. The University of Colorado does not have discretion to make exceptions to the rules as established by state law.

New students are classified as in-state or out-of-state residents for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to in-state status must submit a petition with documentation to have their status reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

Basic Requirement for Establishing Colorado Residency

To become eligible for in-state residency, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits. An individual who seeks to establish domicile while registered as a student is presumed to establish Colorado domicile solely for tuition purposes unless there is clear and convincing evidence to the contrary.

Colorado in-state tuition classification requires Colorado domicile for 12 consecutive months. A person must be 22 years of age or older, married, a graduate student or an emancipated minor to begin the 12-month period of establishing domicile in Colorado. Unemancipated minors qualify for in-state status if their parents have been domiciled in Colorado for at least one year.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver's license or Colorado ID card within 120 days of move to Colorado.

- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, but individuals should take action on all factors that are appropriate in their circumstance.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with three years of Colorado high school and graduation
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage)

Requirements, including spouse and child eligibility, are detailed on the Residency Exceptions for Domicile (<http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/>) webpage.

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is someone under age 23 who demonstrates total financial and residential independence. This means the student's parents and all others have entirely surrendered the right to the student's care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have

a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who give false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

For more information on all requirements, see the Tuition Classification (<http://www.colorado.edu/registrar/students/state-residency/>) webpage.

University Policies Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual's actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (<http://www.colorado.edu/aod/>) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (<https://www.colorado.edu/sccr/student-conduct/>).
- **Safety:** Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (<http://www.colorado.edu/health/counseling/>) webpage or call 303-492-2277.

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and

educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

Campus Safety

Personal Safety on Campus

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (<http://www.colorado.edu/clery/>). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (<http://www.colorado.edu/dontignoreit/>) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (<http://www.colorado.edu/police/>) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@ <https://twitter.com/cuboulderpolice/>) CUBoulderPolice) and Facebook (CUBoulderPolice (<https://www.facebook.com/CUBoulderPolice/>)).

Communication

Student Email

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (<http://www.colorado.edu/policies/student-e-mail-policy/>) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information

Technology's Messaging and Collaboration webpage (<https://oit.colorado.edu/node/237/>).

Copyright & Fair Use

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (<http://www.colorado.edu/libraries/copyright-information/>) website.

Diversity & Nondiscrimination

Commitment to Diversity

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning"—from the Guidelines for Diversity Planning (<https://www.colorado.edu/odece/diversity-plan/>).

Nondiscrimination Statement

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

Equity & Compliance

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination

and harassment. The Office of Institutional Equity and Compliance (OIEC) (<http://www.colorado.edu/oiec/>) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed in order to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also offers education and assessment to identify areas in need of improvement and foster a more welcoming campus culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (<https://www.colorado.edu/oiec/>) website or call 303-492-2127.

SPECIALIZED PROGRAMS CATALOG

CU Boulder offers a number of specialized graduate degree and certificate programs to complement a traditional education.

Due to the nature of these program offerings, these specialized programs do not align with some standard campus policies. Learn more by reviewing the related sections in the Specialized Programs Catalog.

Master's Degrees:

- Data Science - Master of Science (MS) Online (p. 1522)
- Electrical Engineering - Master of Science (MS) Online (p. 1488)
- Teacher Leadership - Master of Arts (MA) Online (p. 1384)

COURSES A-Z

About the Course Descriptions

The courses listed here are included in the Boulder campus catalog during the 2021–22 academic year. This listing does not constitute a guarantee that any particular course will be offered during this year. Consult specific programs and major requirements within each school and college for more information. Also see the online Guest Course Search (<http://www.colorado.edu/academics/course-search/>) for details about specific class offerings and schedules.

Course Numbering

Consult specific departments and programs within schools and colleges for restrictions, requirements and permissions. (<http://www.colorado.edu/catalog/node/448/>)

- **1000–2000 courses** are usually intended for lower-division students (freshmen and sophomores).
- **3000–4000 courses** are intended for upper-division students (juniors and seniors), and may require instructor consent.
- **5000 courses** usually require graduate-student status, but may be open to qualified undergraduates with instructor consent. Consult the program or department.
- **6000, 7000 and 8000 courses** are usually open to graduate students only.

Abbreviations

Coreq.	Corequisite
Lab.	Laboratory
Lect.	Lecture
Prereq.	Prerequisite
Rec.	Recitation
CE/SL	Civic engagement/service learning component

Course Credits

Course credits are stated in semester units.

Subjects

Accounting (ACCT)

Courses

ACCT 3220 (3) Corporate Financial Reporting 1

First of a two-course sequence intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information.

Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3225 (6) Corporate Financial Reporting

Intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information. Builds and extends detailed knowledge of preparation, analysis, and use of financial statements. No credit granted for this course and ACCT 3220 and ACCT 3230.

Requisites: Requires prerequisite of BASE 2104 (minimum grade of D-), or BCOR 2000 (minimum grade of D-), and BCOR 2200

ACCT 3230 (3) Corporate Financial Reporting 2

Second in a two-course sequence building and extending detailed knowledge of preparation, analysis and use of financial statements.

Requisites: Requires a prerequisite course of ACCT 3220 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ACCT 3320 (3) Cost Management

Provides cost analysis for the support of management decision making. Analyzes activities, cost behavior, role of accounting in planning, financial modeling, and managerial uses of cost data.

Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3440 (3) Income Taxation of Individuals

Examines concepts and structure of the United States income tax system. Focuses on concepts affecting all taxpayers, with emphasis on individual taxation.

Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3700 (3) Accounting in a Global Economy

This London-based global seminar introduces undergraduate students to transfer pricing, International Financial Reporting Standards (IFRS) and the impact of foreign exchange rates on financial reporting. Includes an IASB headquarter experience and presentations from multinational corporations and public accounting firms. It also includes experiential-based accounting learning in continental Europe.

Requisites: Requires a prerequisite course of ACCT 3220 (minimum grade D-). Restricted to Business (BUSN) majors only.

ACCT 4240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5240

Requisites: Requires prerequisite course of ACCT 3220 and ACCT 3230 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) or Finance (FNCE) majors with 52-180 units completed.

ACCT 4250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5250

Requisites: Requires a prerequisite course of ACCT 3220 or 3225 and ACCT 3230 (minimum grade D-). Restricted to Accounting (ACCT), Finance (FNCE) or Accounting Concurrent Degree majors only with 52-180 units completed.

ACCT 4540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5540

Requisites: Requires a prerequisite course of ACCT 3220 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) majors with 52-180 units completed.

ACCT 4620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5620

Requisites: Requires a prerequisite course of ACCT 3230 (minimum grade D-). Restricted to Accounting (ACCT) majors 52-180 units completed.

ACCT 4821 (3) Experimental Seminar: Financial Report for Complex Transactions

Focuses on topics related to major financial events in the life of an organization (IPOs, mergers and acquisitions). Enhance the ability to understand the economic essence of important complex business transactions as linked to the financial reporting and tax issues surrounding these deals. Many fascinating and recent transactions will be examined in depth.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5821

Requisites: Requires a prerequisite course of ACCT 3230 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ACCT 4850 (3) Senior Seminar - Accounting Ethics

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets.

Requisites: Requires prerequisite course of ACCT 3230 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) majors with 102-180 units completed.

ACCT 4900 (1-3) Independent Study

Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes equity valuation and risk analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5450 (3) Income Taxation of Business Entities

Examines the income tax consequences of business entities. Focuses on regular corporations, partnerships, limited liability companies and S corporations.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting

Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-).

Grading Basis: Letter Grade

ACCT 5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6000 (1-3) Academic Internship in Accounting

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

Grading Basis: Pass/Fail

ACCT 6220 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes credit scoring, risk analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710

Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290

Recommended: restricted to ACCT-MS and ACTX-MS students.

Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation

Studies and applies the method used in tax research and tax planning, with the goal of developing tax research, technical writing and tax planning skills. Topics include examining primary and secondary sources of federal tax law, evaluating the hierarchy of these sources and developing technical writing skills using deductive legal reasoning.

Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167

Requisites: Requires prerequisite course of ACCT 5450 (min grade D-).

Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157

Requisites: Requires corequisite courses of ACCT 6420 and ACCT 6700.

Restricted to Bus Admin, Acct, Acct-Tax, Acct-Info Syst, Fnce Acct Tax, Acct Acct Tax, Mgt Sci-Info Syst, Fnce, Mktg, Taxation or Master of Business Admin graduate students only.

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

Requisites: Requires a prereq course of ACCT 5620 (min grade C).

Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007

Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207

Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 6900 (1-6) Independent Study

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6940 (1) Master's Candidate for Degree

Departmental form required.

Requisites: Restricted to Business (BUSN) graduate students only.

Grading Basis: Pass/Fail

ACCT 6950 (1-4) Master's Thesis

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study

Instructor consent required and departmental form (taught as doctoral seminar).

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation

Requisites: Restricted to Business (BUSN) graduate students only.

Advertising, PR and Media Design (APRD)

Courses

APRD 1003 (3) Principles of Strategic Communication

Introduces the foundations, nature, and practices of advertising and public relations and the various industry functions - including account management, market research, account planning, media planning, creative strategy, creative execution, branding, image reputation and crisis management. This course offers historical, organizational, financial, creative and critical perspectives concerning strategic communication.

Requisites: Restricted to students with 65 units or less completed.

Grading Basis: Letter Grade

APRD 1004 (1) Fundamentals of Grammar

Teaches students the basic rules of grammar, punctuation, word choice and sentence structure so that they can write clear and concise messages that convey a desired meaning, apply punctuation in an accurate and effective manner, and differentiate between style conventions.

Grading Basis: Letter Grade

APRD 2001 (3) Strategic Thinking in Advertising and Public Relations

Reviews historical and contemporary views of critical and strategic thinking, as well as strategic practices utilized in advertising, branding, and public relations through the use of readings, exploration of case studies, lectures, individual and group exercises, and client projects.

Requisites: Requires a prerequisite course of APRD 1003 or APRD 1000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 2004 (3) Introduction to Research Methods and Insights

Provides students with the fundamental skills necessary to develop research-based strategies to address challenges faced by advertising, public relations, and marketing professionals in their efforts to address client communication needs.

Requisites: Requires a prerequisite course of APRD 1003 or APRD 1000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 2005 (3) Strategic Communication Writing

Introduces students to strategic writing across multiple media platforms and demonstrates the different forms of writing used in the strategic communication subfields. Students will learn strategies for crafting and delivering effective messages to target audiences.

Requisites: Requires prerequisite courses of APRD 1004 and APRD 1001 and APRD 1002 or APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 2006 (3) Software and Design Applications

Equips students with the practical knowledge and critical skills necessary to effectively employ visual design in advertising and public relations practice. Students will be introduced to both the fundamental principles of graphic design and the technical tools used to bring design ideas to life.

Requisites: Requires prerequisite courses of APRD 1004 and APRD 1001 and APRD 1002 or APRD 2001 and APRD 2004 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3000 (3) Intermediate Creative Concepts

Explores both strategic and creative thinking and examines approaches to narrative storytelling as a tool for telling overarching brand stories. Students use the foundation to develop creative briefs and advertising campaigns. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of APRD 2003 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

APRD 3001 (3) Visual Design

Students are introduced to design elements and principles, research and visual storytelling. They are challenged to communicate intellectual, sensory and emotional concepts by learning a visual vocabulary of type, color, and form expressed in a variety of mediums and dimensions.

Requisites: Requires prerequisite courses of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

APRD 3002 (3) Communication Platforms

Concentrates on strategies and tactics advertisers and marketers use to communicate their brand stories to their desired audiences. These include traditional media planning and placement - TV, print, radio, and out-of-home - as well as new areas like digital, social, and experiential approaches to communications. Students will learn how to create, develop, and present communication plans and campaigns in an interactive and fast-paced environment.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

Grading Basis: Letter Grade

APRD 3003 (3) Strategic Communication Research Methods

Provides an opportunity to use and master quantitative and qualitative research methods. Students conduct research and analyze data to determine the targets relationship with specific product categories and identify the emotional and practical needs that create brand relationships.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

APRD 3004 (3) Account Management

Examines managerial and decision making processes of advertising and related brand communication functions. Emphasis on determining opportunities, integrating with other elements of the promotion mix, setting objectives, establishing budgets, and measuring advertising and communication effectiveness.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

APRD 3005 (3) Content Strategy and User Engagement

Explore and understand the importance of content as a brand building tool. Students will gain the ability to use analytics to create strategy that allows the brand to have meaningful and cohesive conversation with its community.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

Grading Basis: Letter Grade

APRD 3006 (3) History of Advertising

Explores the critical moments in advertising history from the start of the Industrial Revolution through the current post digital era.

Requisites: Requires a prerequisite course of APRD 1000 or APRD 1003 (minimum grade C-).

Grading Basis: Letter Grade

APRD 3007 (3) Curiosity for Strategists

Introduces students to the practice of curiosity as the basis of creative problem solving. Students will participate in exercises and exploration based projects to increase productive curiosity, critical thinking and creative products, which will inform the development of integrated marketing communication campaigns.

Requisites: Requires a prerequisite course of APRD 2000 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Grading Basis: Letter Grade

APRD 3008 (3) Qualitative Research Methods

Exposes students to the principles and methods of qualitative methodology including interviews, focus groups and ethnography. Explores how these methods inform the practice of strategic communication.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors with subplans of Advertising (ADV) or Public Relations (PRL) only.

Grading Basis: Letter Grade

APRD 3009 (3) Brand Solutions

Explains the value of a brand in a marketing and advertising environment: how to build, manage, and protect a brand. Specific areas covered include what a brand is and why it matters, how a brand creates value, ways to measure and understand the value of a brand, managing new and established brands, and the role of consumer insight in managing a brand.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

Grading Basis: Letter Grade

APRD 3010 (3) Consumer Insights

Teaches students how to determine the emotional as well as the practical needs that drive the use of a particular category of products or services. Using a variety of qualitative research methods, as well as survey research, students will learn how to identify consumer insights and brand insights for purposes of building a creative strategy.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan only.

Grading Basis: Letter Grade

APRD 3100 (3) User Experience & User Interface Design

Explores how to create and produce effective and engaging designs for dynamic information across a variety of screens while maintaining brand identity. Extending the design principles learned in previous classes, the student will concept for user interfaces (UI) and navigational frameworks that optimize usability and accessibility.

Requisites: Requires prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

APRD 3102 (3) Story Design I

Explores the development of interactive concepts that meet the strategic brief's brand objectives. Emphasis is placed first on developing strong digital ideals. Students also master the styles appropriate for different digital media and then use those skills.

Requisites: Requires prerequisite of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

APRD 3103 (3) Strategic Writing for Public Relations

Emphasizes communication tactics: How to plan, write, and produce public relations tools; select audience and media; utilize print and electronic media. Focuses on Associated Press style and advanced writing techniques.

Requisites: Requires prerequisite courses of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3104 (3) Digital Storytelling for Public Relations

Provides students a new skill set in digital storytelling ideas, production, and analysis. Students will develop the skills to produce creative online stories that will reach strategic audiences. We will look at the changing roles of the storyteller in news, promotion, and public relations while discussing and analyzing media consumption habits that encourage a seamless transition from consumer to creator. This course is designed for public relations students within the strategic communication major.

Requisites: Requires prerequisite courses of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3105 (3) Public Relations Strategy and Implementation

Exposes students to concepts in strategic planning and implementation of public relations efforts. Students will come to understand the organization's internal and external communications and identify potential crises in the development of public relations strategy. This class provides an overview of the public relations process and its application to the development of strategy. Students will also understand implementation and evaluation of strategy.

Requisites: Requires prerequisite courses of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3112 (3) International Public Relations

Introduces students to the cultural, social and economic issues relevant to strategic communication in the global arena. Provides students with the foundational tools necessary to both understand and effectively navigate the often complex world of strategic intercultural communication. Specific topics will include exploration of the contextual factors that influence public relations practice in different nations/regions, discussion of the various theoretical models that govern global PR practice and critical evaluation of international PR case studies/campaigns.

Requisites: Requires a prerequisite course of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3300 (3) Crisis Communication in Public Relations

Explores theories and research related to public relations communication before, during and after a crisis; examines the fundamentals of organizational communication, crisis management and strategic planning.

Requisites: Requires prerequisite course of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3301 (3) Social Media Strategies

Emphasis on how social media and internet marketing influence public relations; understand the fundamentals and best practices in social media management, visual communication and mobile applications.

Requisites: Requires prerequisite courses of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors with subplans of Advertising (ADV) or Public Relations (PRL) only.

Grading Basis: Letter Grade

APRD 3302 (3) Case Studies in Public Relations

Designed to help develop and refine critical thinking in selecting, creating and applying tools, techniques and principles of public relations to a variety of managerial cases and problem situations.

Requisites: Requires prerequisite course of APRD 2002 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 3400 (3) Concept Design

Introduces students to Design Thinking and the techniques for designing ideas into concepts. This course will lead students through the design thinking process of 1) Empathize, 2) Define, 3) Ideate, 4) Concept, 5) Prototype, 6) Test. The emphasis will be on the first four steps.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan only.

Grading Basis: Letter Grade

APRD 3401 (3) Concept Design II

Building on the fundamentals mastered in APRD 3400 (Concept Design), this course takes design thinking for strategic communication purposes to the next level. Students will tackle projects of greater complexity, designing concepts for: mobile applications, social platforms, interactive experiences, and others. This class prepares the foundation for - and ladders into - APRD 4600 Media Design Portfolio I.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 and APRD 3400 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

APRD 3402 (3) Video Design

Building upon the fundamentals of the three required Media Design classes (Concept Design, Visual Design, and Story Design), Video Design teaches students how to work within a specific timeline to deliver video for strategic communication purposes that demonstrates understanding of pace, structure, and tempo. Previously offered as a special topics course.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 and APRD 3400 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

Recommended: Prerequisites APRD 3500 or APRD 3001.

APRD 3500 (3) Story Design II

Explores the uses of story and how the design of story must adapt to different platforms and genres, including both short- and long-form narratives, visual narrative, film, personal essay and advertising copy writing.

Requisites: Requires prerequisite course of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

Grading Basis: Letter Grade

APRD 3501 (1) Software Applications 2

Equips students with the critical skills necessary to effectively employ intermediate design software skills in advertising and public relations practice. Students will expand upon existing creative software skills and explore concepts and techniques when working with visual design and media content, motion design, animated compositions, audio and video production, and additional intermediate level topics.

Requisites: Requires prerequisite course of APRD 2006 (minimum grade D-). Requires corequisite course of APRD 3503. Restricted to Strategic Communication (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Pass/Fail

APRD 3503 (3) Concepting

Teaches techniques and develops personal discipline inherent to the generation of novel, sophisticated creative work based on a solid concept; the distinctive, guiding idea that drives campaign messages. Assignments are evaluated in group critiques and each student completes a final portfolio by semester's end.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Requires corequisite course of APRD 3501.

Restricted to Strategic Communication (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Letter Grade

APRD 3504 (1) Software Applications 3

Equips students with the critical skills necessary to effectively employ advanced design software skills in advertising and public relations practice. Students will expand upon prior creative software skills and explore advanced concepts and techniques when working with general visual media design, 3D compositing, interactive motion design, user interface design, animation concepts, data-driven visuals, and will explore additional media platforms not covered in previous courses.

Requisites: Requires prerequisite courses of APRD 2006 and APRD 3501 (minimum grade D-). Restricted to Strategic Communication (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Pass/Fail

APRD 3523 (3) The Art and Strategy of Science Communication:**Branding Climate Change**

Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).

Equivalent - Duplicate Degree Credit Not Granted: EBIO 3523 and ATLS 3523

Grading Basis: Letter Grade

APRD 3700 (1-3) Field Study in Strategic Communication

Creates an immersive experience for students in regards to the history, business practices and current thinking of top industry companies. Students will first complete course work at CU Boulder and then travel to major industry hubs to visit advertising, design, PR and other marketing communication companies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of APRD 1000 (minimum grade C-). Restricted College of Media, Communication Information (CMCI) or Business (BUSN) majors only with 60-180 units completed.

Grading Basis: Letter Grade

APRD 4000 (3) Public Relations Event Planning

Introduces students to the planning and execution of special events. Specifically, the course will locate special event planning within the broader context of organizational strategy and will introduce students to project management through proposal development, scheduling, budgeting and evaluation components that underlie successful event production. Will culminate in the execution of a full-scale event near the end of the semester.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 4010 (3) Strategic Health Communication

Introduces students to theory, research and contemporary concerns in health communication. Focuses on strategic communication for public service and public education campaigns related to health. Includes advertising and health promotion, community relations, public service programs, advocacy, online communities and social media management.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only.

Grading Basis: Letter Grade

APRD 4100 (3) Brands and Culture

Explores the intersection between culture and marketing communication. Students will examine brand communities, brand and category culture as well as popular culture and the impact on and within marketing communication. The goal is for students to become more aware of the importance of culture in the ability of communication to disrupt the status quo within a market.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communications (STCM) majors with a subplan of Advertising (ADV) or Public Relations (PRL) and at least 70 credits only.

Grading Basis: Letter Grade

APRD 4101 (3) Advertising Media Planning

Examine how owned, earned and paid (or traditional and non-traditional) media campaigns are planned, budgeted, executed and evaluated.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) subplan and at least 70 credits only.

Grading Basis: Letter Grade

APRD 4102 (3) Sustainable Brand Practices: Ethics Cases in Advertising and PR

Explore contemporary issues and ethics cases in advertising and public relations and how these practices impact the long-term success of a brand. Students will explore branding concepts and theories of ethics to examine some of the current controversies in which advertising and public relation campaigns are involved and how these issues can be dealt with in an ethical and socially responsible manner.

Requisites: Requires prerequisite course of APRD 2000 or APRD 2002 or APRD 2005 and APRD 2006 (all minimum grade C-). Restricted to Strategic Communications (STCM) majors with a subplan of Advertising (ADV) or Public Relations (PRL) and at least 70 credits only.

Grading Basis: Letter Grade

APRD 4300 (3) Strategic Communication Analytics and Metrics

Provide students with a base knowledge of analytics and metrics used in strategic communication. Students will learn how to obtain and clean big data, how to analyze and turn it into insights and how to present and communicate insights into actionable recommendations.

Requisites: Requires a prerequisite course of APRD 2005 and APRD 2006 or APRD 2000 or APRD 2002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with a minimum of 70 hours and a subplan of Advertising (ADV) or Public Relations (PRL) only..

Grading Basis: Letter Grade

APRD 4301 (3) Social Media Listening

Provides the practical understanding and application of strategic social media listening from the brand perspective in advertising and public relations, focusing on critical thinking and the ethics of using social media data. Provides students with hands-on experience in industry leading listening tools including Brandwatch, Social Studio, Meltwater and Hootsuite. Equips students with the skills needed to find relevant conversations, uncover insights then apply their perspectives to management for business impact.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

Grading Basis: Letter Grade

APRD 4302 (3) Marketing Data Visualization

Teaches students how to use data visualization to tell business stories based upon the analysis of marketing and business data. Students will learn basic data concepts, types, and uses. They will explore, summarize, and analyze the data using various techniques and best practices with Tableau Software.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans only.

Grading Basis: Letter Grade

APRD 4303 (3) Search Advertising Strategies

Build, manage and evaluate digital advertising campaigns for a non-profit organization. Teams of students are assigned a local non-profit and will evaluate, develop, and execute search advertising campaigns for their use. The course also provides a general overview of the search advertising landscape, "paid search." Course prepares students for careers in advertising agencies, media agencies, marketing departments and search consultancies.

Requisites: Requires prerequisite courses APRD 2005, APRD 2006, and APRD 3002 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising Strategy (ADV) subplan only.

Recommended: Prerequisite APRD 4300.

APRD 4403 (4) Strategic Communication Campaigns

Gives students the opportunity to work in small groups to develop material for an actual client. Examines basic principles of group dynamics and effective teamwork while conducting research, developing strategies and creating a multimedia campaign. All work is presented to the client.

Requisites: Requires prerequisite course of APRD 3001 or APRD 3002 or APRD 3003 or APRD 3004 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with a minimum of 85 credits only.

Additional Information: Departmental Category: Advertising Media Design

APRD 4404 (3) Advanced Ad Campaigns NSAC

Work and design an ad campaign for a real world client through the National Student Advertising Competition (NSAC). Students in the course commit to the fall and spring semesters in the same academic year for 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of APRD 3001 or APRD 3010 or APRD 3105 or APRD 4506 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only with a minimum of 80 hours completed.

Grading Basis: Letter Grade

APRD 4405 (4) Strategic Communication Capstone

Puts into practice knowledge from previous coursework to plan and execute a strategic communication campaign. Students work with others, operating as an agency. Students will develop one or more strategic communication campaigns. In addition, students will practice organizational and leadership skills; design and layout skills; produce a plans book; and pitch the proposed campaigns to the class and the client.

Requisites: Requires prerequisite courses of APRD 3001 or APRD 3010 or APRD 3105 or APRD 4506 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with 85 or more credits.

Grading Basis: Letter Grade

APRD 4406 (3) Advanced PR Campaigns BATEMAN COMPETITION

Offers students the opportunity to develop a PR campaign for the Bateman Competition, PRSSA's national study competition for public relations students. Previously offered as a special topics course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of APRD 3103 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Public Relations (PRL) subplan only and who have completed at least 80 credit hours.

APRD 4453 (3) Advertising and Society

Examines criticisms and contributions of advertising in society and the economy.

Requisites: Restricted to College of Media, Communication, and Information (CMCI) students with a minimum of 73 hours taken.

Additional Information: Departmental Category: Advertising Media Design

APRD 4501 (3) Design for Social Innovation

Provides an introduction to design thinking as a means to drive social change and solve real-world problems. This studio class is project based and asks students to experiment with new behaviors of work and learning, including: collaboration, iteration, prototyping, empathizing, craft and inference. Field work and collaboration with teammates are required.

Requisites: Requires prerequisite course of APRD 2003 or APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan only.

Grading Basis: Letter Grade

APRD 4503 (3) Portfolio 1

Enhances student conceptual abilities and generates both print and integrated multimedia campaigns. Students work in teams to develop an extensive body of work that's exhibited in an awards show judged by advertising professionals. Instructor consent required.

Requisites: Requires a prerequisite course of APRD 3000 or JOUR 3503 (minimum grade C-). Restricted to Strategic Communication (STCM) majors only.

Additional Information: Departmental Category: Advertising Media Design

APRD 4504 (3) Copywriting Seminar

Offers an intensive exploration of the craft across a variety of genres. Students gain an understanding of the power of words and the use of distinctive voices, with implications for strategic advertising copywriting. Students are also expected to research and write creative briefs. Copywriters take this course with APRD 4506 - Advertising Track Portfolio I.

Requisites: Requires prerequisite course of APRD 3503 (minimum grade C-) and corequisite course of APRD 4506. Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Letter Grade

APRD 4505 (3) Art Direction Seminar

Offers an in-depth examination of formal graphic design principles and their application in advertising via lectures, reading assignments, and projects. Topics include color theory, typography, and layout as well as applied skills associated with an art director's daily work. Art directors take this course with APRD 4506 - Creative Track Portfolio I.

Requisites: Requires prerequisite course of APRD 3503 (minimum grade C-) and corequisite course of APRD 4506. Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Letter Grade

APRD 4506 (3) Creative Track Portfolio Development I

Focuses on the development and execution of portfolio pieces reflecting the pursuit of sound strategic and conceptual thinking. All work is done by art director/writer teams, and finished executions are produced as the process of portfolio building begins. This work is reviewed by a jury of creative professionals at an end-of-semester critique.

Requisites: Requires prerequisite course of APRD 3503 (minimum grade C-) and corequisite course of APRD 4504 or APRD 4505. Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Letter Grade

APRD 4507 (3) Creative Track Portfolio Development II

Focuses on the continued development and professional-level execution of a complete advertising portfolio reflecting the mastery of strategic and conceptual thinking. Each creative team's work is prepared and evaluated according to the highest industry standards and reviewed by a jury of creative professionals at an end-of-semester critique. Students are also advised regarding job search strategies and personal branding. Students must be admitted to the advertising creative track. The course may be repeated as a directed study with instructor permission.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of APRD 4506 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Advertising Creative (ADC) subplan only.

Grading Basis: Letter Grade

APRD 4523 (3) Portfolio 2

Gives students an opportunity to develop an extensive body of work. Students create integrated campaigns, which include print, digital and guerilla ideas. Final portfolios are critiqued by both faculty and outside reviewers. Instructor consent required.

Requisites: Requires a prerequisite course of APRD 4503 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.

Additional Information: Departmental Category: Advertising Media Design

APRD 4543 (3) Strategic Brand Management

Examines the theory of branding: what brands are, how brands are created and measured, as well as strategies for managing brands and brand communication.

Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with Advertising (ADV) or Public Relations (PRL) subplans and a minimum of 85 credits only.

Additional Information: Departmental Category: Advertising Media Design

APRD 4600 (3) Media Design Portfolio I

Develop a variety of design concepts and execute them at a professional level. Students are assigned projects typical of those handled by design firms to demonstrate their ability in areas such as branding, product design, interaction design, etc. Students will also design their own online portfolio. Creative work is presented in a juried show at the end of the semester. Department requisite: students must apply with a portfolio, the quality will determine enrollment.

Requisites: Requires a prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan.

Grading Basis: Letter Grade

APRD 4601 (3) Media Design Portfolio II

Refine the skills learned in APRD 4600 and further development of work at a professional level. With help from visiting professionals, students continue to develop a body of work that provides their mastery of user-centered design and branding across a variety of real-world assignments. The final portfolio is judged in the student creative show, juried by design professionals. Department requisite: students must apply with a portfolio, the quality will determine enrollment.

Requisites: Requires a prerequisite course of APRD 3001 (minimum grade C-). Restricted to Strategic Communications (STCM) majors with Media Design (DSN) subplan.

Grading Basis: Letter Grade

APRD 4700 (3) Advertising Intensive

Immerses students in the process of creating successful communication and deepens their understanding of current industry standards and practices. Students will learn, develop and execute all aspects of the communication process under the guidance of professionals. Offered Maymester only.

Requisites: Requires a prerequisite course of APRD 1003 (minimum grade C-). Restricted to Strategic Communication (STCM) majors with 57-180 credits (Junior or Senior) only.

Grading Basis: Letter Grade

APRD 4841 (1-4) Undergraduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

APRD 4873 (1-3) Special Topics

Special Topics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Strategic Communication (STCM) majors only with 57-180 credits (Juniors or Seniors)

Additional Information: Departmental Category: Advertising Media Design

APRD 4931 (1-6) Internship

Internship course.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of APRD 3001 or APRD 3002 or APRD 3103 or APRD 3503 (all minimum grade C-).

Grading Basis: Pass/Fail

APRD 5001 (3) Foundations of Strategic Brand Design

Focuses on the challenges of designing brands targeted to customer needs and desires. The course is structured around the process of identifying brand opportunities, idea generation, design, testing and launch opportunities. Through a series of projects, students address aspects of practice and theory, from brand adaptation of cultural values to maintenance of brand integrity and global design strategies. Where applicable, case studies will supplement studio execution.

Grading Basis: Letter Grade

APRD 5002 (3) Experience Design Foundations

Provides a comprehensive understanding of design thinking and its processes to design innovative branded experiences and exchanges in a variety of strategic communication contexts. Students learn design methods applications that can be applied not only to experiential design, but to a problem where design thinking is meaningful to branded experiences. They learn standard and currently practiced design methods and, through repeated application, internalize them into a personal design aesthetic.

APRD 5003 (3) Toward a Unified Theory of Brand Equity

Builds on and extends concepts and executions covered in Foundations of Brand Design. While Foundations of Brand Design grounds the students in core branding concepts and applications, this course expands both executional skillsets and conceptual frameworks through the development of a unified theory of branding that transforms objects into meaning bearers. Through research, strategic definition, identity, expression, communications and behavior study, students will learn how to create opportunities for complex, meaning centered relationships between people and things.

APRD 5004 (3) UX and the Digital Delivery of Products and Services

Builds on and extends concepts and applications introduced in Experience Design Foundations with a concerted focus on prototyping quickly and often the best way to both communicate and improve one's design. Integrates prototyping activities, along with research and testing techniques, into every stage of the design process. Students will learn how to choose the appropriate method to suit different dimensions of a design problem at different stages in the process and the pitfalls of each approach.

APRD 5005 (3) Foundations of Critical Making

Introduces students to the communication design possibilities of critical making by exploring the conceptual process, research and key questions framed through an iterative approach to problem solving. The learning experience includes hands-on, embodied approaches to problems that generate innovative solutions by crossing the divide between thinking and making and between the screen and physical environments.

APRD 5006 (3) Introduction to Designing for Entrepreneurism

Brings students' attention to design as a form of social innovation and develops awareness of the social, political and economic contexts of design. They become literate in re the often implicit narratives embedded in design products and services, then use scenarios and storytelling to generate new strategies, build and test prototypes and write a case study detailing what was learned.

Grading Basis: Letter Grade

APRD 5007 (3) Immersive Media Design Through Critical Making

Turns from software to a focus on hardware and physical computing by literally and figuratively disassembling objects: using prototyping, reverse engineering, hardware hacking and circuit bending, design fiction and electronics fabrication (i.e., Arduino, raspberry pi and more). All of this takes place in a shared, open learning environment where students and faculty critically engage with a range of digital production tools and integrates them into ordinary life.

Grading Basis: Letter Grade

APRD 5008 (3) Access to Tools for Entrepreneurism by Design

Develops awareness of and access to necessary tools, smart objects for example, that can enable complex dynamics among people, objects and information via a combination of physical and digital design methods, all with an eye to design driven innovation for social change. This course shifts the usual strategic communication design point of view from the typical perspective of "trend noise" and market driven models to identifying actual problems and providing possible design solutions to those problems.

Grading Basis: Letter Grade

APRD 5010 (3) Design Sprint

Executes a five-day, immersive process for answering critical business questions through design, prototyping and testing ideas with sponsoring industry partners. The outcome is a fully functional prototype that is demoed and evaluated on the final day of the sprint. This project based studio is team taught and process based. The tangible outcomes from the project, along with documentation of the process, will go into the students' professional portfolios.

APRD 5011 (1-6) Book Lab

Dedicated to building out an industry ready professional portfolio, this immersive studio consists of four client facing project sponsored by and developed in collaboration with the program's industry partners. In a series of three-week intensives, students will work from design briefs to concept, design and solve a variety of design problems for real world clients. Ranging from finished supercomps to functional prototypes - physical, video, projections mapping, etc. - students to market portfolios will demonstrate their command of strategic communication design across a range of media platforms.

Repeatable: Repeatable for up to 9.00 total credit hours.

Grading Basis: Letter Grade

APRD 5012 (3) Entrepreneurship and Product Innovation by Design

Results in learning how to both think like an entrepreneur and develop innovative products and experiences competitive with the most successful startups in Boulder. Taught by successful entrepreneurs sharing valuable insight into the skills, mindset, and culture that results in the design of innovative products and experiences.

Grading Basis: Letter Grade

APRD 5013 (3) Designing for Branded Experiences

Explores both the theory and the practices of identity and branding through the creation of a series of projects related to the senses. Most of our visual world is made up of one or more identity components—from the basic form and structure of something to the specific experience which a brand provides.

Grading Basis: Letter Grade

APRD 5014 (3) Advanced Practices and Tools of Experience Design

Introduces students to advanced practices and tools of the experience design profession. Topics vary to reflect current and emerging trends in the profession, but the core focus of the course consists of three broad themes: information design principles, understanding and defining user behaviors, and designing for emerging cross-channel experiences.

Grading Basis: Letter Grade

APRD 5015 (3) Brand Design for Sustainable Futures

Takes an in-depth look into engagement with challenges of designing for sustainability. Moves beyond the cradle to grave approach to designing for cradle to cradle with immersion into design ethics and the power of visual communication. Students are taken beyond the project brief to investigate why a brand or service should exist and the consequences of its existence.

Grading Basis: Letter Grade

APRD 5016 (3) Experience Design and Narratives of Interaction

Organizes our annual inquiry and execution of a real-world project around an essential question in design, such as "Can design make us empathetic problem solvers?" Curated by our faculty and executed in collaboration with our industry partners, Experience Design and Narratives of Interaction pairs students with teams from design-driven companies to develop advanced projects over the course of a full semester.

Grading Basis: Letter Grade

APRD 5017 (3) Parametric Product Design Through Critical Making

Employs advanced hands-on hardware practice for reflection, analysis, and comprehension of the physicality of computation and communications infrastructures. Through deconstruction of objects students will learn to interpret and intervene through formalized practices and techniques in the material layer of digital technologies, including: the use of prototyping, hardware hacking and circuit bending, the use of design fictions, reverse engineering, and electronics fabrication.

Grading Basis: Letter Grade

APRD 5019 (3) Physical Computing and the Design of Sustainable Change

Functions as a studio intensive to enable designers to conceive of objects as "interventions" and how artifact design can mediate interactions—between multiple audiences—making interaction a primary influence and component of the design. Students design an intervention of a public space that is unequivocally physical or elaborate through technologies with a goal of encouraging interaction, socialization, and sustainable change.

Grading Basis: Letter Grade

APRD 5841 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APRD 5851 (1-6) Graduate Professional Project

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

APRD 5931 (1-3) Internship

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

APRD 6342 (3) Digital Advertising

Covers both traditional and emerging digital advertising methods, the popular platforms used to execute ads, and the leading analytic tools that can be used to assess advertising performance. Core advertising platforms covered include search, display, social media, native advertising, sponsored content and mobile. This class focuses on best practices and Key Performance Indicators that go with each advertising platform. Department consent required.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors or MKAG-CERG students only.

Grading Basis: Letter Grade

APRD 6343 (3) Applications of Advanced Statistical Techniques in Advertising

Building upon prior data acquisition and analysis coursework, students will effectively and flexibly generate advanced statistical models in a digital advertising-specific context. This course will focus on data originating from a variety of digital advertising sources. In addition to technical skill acquisition, students will learn how to interpret results and present them to clients and management. Department consent required.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

APRD 6871 (1-3) Special Topics

Graduate special topics. Topics vary by instructor and semester.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APRD 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

APRD 6951 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

APRD 7001 (3) ProSeminar in Mass Communication Theory 1

Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7001

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7002 (3) Research Design

Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7002

Requisites: Requires prerequisite courses of APRD 7003 and MDRP 7051 and MDRP 7061 (all minimum grade C-). Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7003 (3) ProSeminar in Mass Communication Theory II

Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion. Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.

Equivalent - Duplicate Degree Credit Not Granted: JRNL7003

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7004 (1) Doctoral Professionalization Seminar

Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7004

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7011 (3) Seminar in Strategic Public Relations

Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7011

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7012 (3) Ethnography and Media

Provides a ¿how to¿ concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7013 (3) Mixed Research Methods in Mass Communication

Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7013

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7014 (3) Experimental Design in Mass Communication

Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7014

Requisites: Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.

APRD 7020 (3) Controls of Media and Information

Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7020

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7021 (3) Environmental Journalism and Science Communication

Focuses on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7021

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7030 (3) Media Sociology

Examines a range of theories for how media messages and media institutions turn out the way they do. `Media sociology; refers to theorizing about the media as the `dependent variable; even though many of the `independent variables; explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7030

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7031 (3) Moral Psychology and Media Ethics

Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7031

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7034 (3) Media and Health Communication

Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7034

Requisites: Restricted to doctoral students.

APRD 7051 (3) Qualitative Methods in Mass Communication

Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7051

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7061 (3) Quantitative Research Methods

Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students for dissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7061

Grading Basis: Letter Grade

APRD 7133 (3) Digital Games

Seminar that explores digital games, analog games, and play, and looks at the relatively new field of game studies; the field has moved toward issues of culture and social justice.

Requisites: Restricted to doctoral students.

APRD 7871 (3) Special Topics

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APRD 7880 (3) Persuasion Theory

This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7880

Requisites: Restricted to graduate students only.

Aerospace Engineering (ASEN)

Courses

ASEN 1000 (1) Introduction to Aerospace Engineering Sciences

Introduces aerospace history, curriculum, ethics, and the many areas of emphasis within aerospace engineering. Academic and industry speakers are invited to address various aerospace topics.

Requisites: Restricted to students with 0-26 credits (Freshmen)

Aerospace Engineering (ASEN) or Engineering Open Option majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1022 (3) Materials Science for Aerospace Engineers

Covers prerequisite chemistry topics for materials science and introduces material types, properties and behavior for aerospace engineers.

Topics include review of chemistry; atomic bonding; crystals; diffusion; mechanical/thermal properties; phase diagrams; heat treatment; failure mechanisms; materials selection; and a general introduction to modern materials for aerospace engineering applications including composites and materials with engineered properties. Lab project or tensile testing is included.

Requisites: Requires prerequisite or corequisite courses of APPM 1350 or MATH 1300 or APPM 1340 or APPM 1345 and ASEN 1320 or CHEN 1310 or CSCI 1300 or CSCI 1310 or CSCI 1320 or ECEN 1310 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 1320 (4) Aerospace Computing and Engineering Applications

Uses problems and tools from Engineering. Teaches techniques for writing computer programs in higher level programming languages to solve problems of interest in Engineering and other domains. Appropriate for students with little or no prior experience in programming.

Requisites: Requires a prerequisite or corequisite course of APPM 1235 or APPM 1340 or APPM 1345 or APPM 1350 or MATH 1150 or MATH 1300 or MATH 1310 (all minimum grade C-). Restricted to College of Engineering or Pre-Engineering Arts and Science (PREN) majors only.

ASEN 1400 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 2500

Requisites: Restricted to College of Engineering students with a maximum of 50 credit hours.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 1403 (3) Introduction to Rocket Engineering

Introduces students to the engineering profession through completion of a team-based project. Students design, build, and static test-fire a liquid-solid hybrid rocket motor. Topics explored include: pressure vessels, combustion, ideal fluid behavior, systems engineering, data acquisition, and model verification. Learned skills will include technical writing, teamwork, computer modelling and analysis tools, 3D printing and prototyping technologies.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 1400 or GEEN 1400

Requisites: Restricted to College of Engineering students with 50 credits or fewer completed.

Grading Basis: Letter Grade

ASEN 1969 (3) Pathway to Space

Explore the many paths one can take to be a part of a space-related career in a unique, engaging and interactive course. Students will learn about the following topics: space science and exploration, human spaceflight and life sciences, aeronautics and near space, launch and spacecraft systems, climate and environment, space business, policy and politics, space arts, media, and history.

Additional Information: Departmental Category: Specialized Courses

ASEN 2001 (4) Aerospace 1: Introduction to Statics, Structures, and Materials

Introduces models and analytical/numerical methods for statics and structural analysis. Topics include force/moment equilibrium, truss analysis, beam theory, stress/strain, failure criteria, and structural design. Matlab proficiency required.

Requisites: Requires prereqs PHYS 1110 APPM 1360 or MATH 2300 CSCI 1300 or 1310 or 1320 or ASEN 1320 or CHEN 1310 or ECEN 1310 (all minimum grade C). Requires prereqs or coreqs ASEN 2012 APPM 2350 or MATH 2400. Restricted to Aerospace Engineering (ASEN) mjrs.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 2002 (4) Aerospace 2: Introduction to Thermodynamics and Aerodynamics

Introduces the fundamental principles and concepts of thermodynamics and fluid dynamic systems. Emphasizes the synthesis of basic science (physics), mathematics and experimental methods that form the basis for quantitative and qualitative analyses of general aerospace technology systems. Proficiency in Matlab required.

Requisites: Requires prereqs PHYS 1110 and (APPM 1360 or MATH 2300) and CSCI 1300 or 1310 or 1320 or ASEN 1320 or CHEN 1310 or ECEN 1310 (all min C). Requires prereq or coreq of ASEN 2012 and (APPM 2350 or MATH 2400). Rstr to Aero Eng (ASEN) mjrs.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 2003 (5) Aerospace 3: Introduction to Dynamics and Systems

Introduces the principles of particle and planar rigid body dynamics, systems, and controls. Topics include kinematics, kinetics, momentum and energy methods, system modeling, and simple feedback control. Class includes experimental and design laboratory exercises for aerospace applications of dynamic principles.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2012 and APPM 2350 or MATH 2400 (all minimum grade C). Requires prerequisite or corequisite course of APPM 2360. Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 2004 (5) Aerospace 4: Aerospace Vehicle Design and Performance

Introduction to design and analysis of aircraft and spacecraft. Aircraft topics include cruise performance, wing design, propulsion, stability, control, and structures. Spacecraft topics include rocket staging, orbit selection, launch systems, and spacecraft subsystems. Includes laboratory experiments and team design exercises.

Requisites: Requires prerequisite courses of ASEN 2002 and ASEN 2012 and APPM 2350 or MATH 2400 (all minimum grade C). Requires prerequisite or corequisite course of APPM 2360. Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 2012 (2) Experimental and Computational Methods in Aerospace Engineering Sciences

Introduces statistical, experimental, and computational methods used in aerospace engineering sciences. Usage of MatLab is extensive.

Requisites: Requires prereqs PHYS 1110 and APPM 1360 or MATH 2300 and CSCI 1300 or 1310 or 1320 or ASEN 1320 or CHEN 1310 or ECEN 1310 (all minimum grade C). Requires coreq APPM 2350 or MATH 2400. Restricted to Aerospace Engineering (ASEN) majors.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 2519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the lower-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisites: varies.

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 2849 (1-3) Independent Study

Study of special projects agreed upon by student and instructor. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 3036 (3) Introduction to Human Spaceflight

Introduces students to the challenges of human space flight. Historical and current space programs and spacecraft are discussed with emphasis on those systems specific to sustaining human crews. Other topics include space environment with respect to sustaining human life and health, physiological and psychological concerns in a space habitat, astronaut selection and training, anomalies, mission operations motivation, costs rationale for human space exploration, and future program directions. Not accepted as a Professional Area Elective for ASEN majors.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3046 (3) Introduction to Humans in Aviation

Investigates the history of manned aviation accomplished through a review of the history of flight, the physiological and psychological limitations facing aviators, and investigates the human related causal factors in aviation accidents. The course also looks at the social and economic impacts of aviation in modern society. Not accepted as a Professional Area Elective for ASEN majors.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 3111 (4) Aerodynamics

Develops the fundamental concepts of aerodynamics and provides a working knowledge for their application to the design of aircraft and launch vehicles operating at various speeds and altitudes, as well as the atmospheric forces on satellites.

Requisites: Requires prerequisite courses of ASEN 2002 and ASEN 2004 and APPM 2360 or (MATH 3430 and MATH 2130) and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 3112 (4) Structures

Teaches Mechanics of Materials methods of stress and deformation analysis applicable to the design and verification of aircraft and space structures. It offers an introduction to matrix and finite element methods for truss structures, and to mechanical vibrations.

Requisites: Requires prerequisite courses of ASEN 2001 and ASEN 2003 and APPM 2360 or MATH 3430 and MATH 2130 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 3113 (4) Thermodynamics and Heat Transfer

Focuses on the applications of the first and second laws of thermodynamics to control volumes and teaches the fundamental concepts of different modes of energy and heat transfer. Learn to use these concepts in gas dynamics, high-speed vehicle spacecraft design, environmental systems, and energy analysis.

Requisites: Requires prerequisite courses of ASEN 2002 and APPM 2360 or MATH 3430 and MATH 2130 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 3128 (4) Aircraft Dynamics

Develops the fundamental concepts of aircraft dynamics. Covers flight mechanics, performance, dynamics and control of aircraft and how they impact aircraft design.

Requisites: Requires prerequisite courses of ASEN 2002 and ASEN 2003 and ASEN 2004 and APPM 2360 or MATH 3430 and MATH 2130 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 3200 (4) Orbital Mechanics/Attitude Dynamics and Control

Presents the fundamentals of orbital mechanics, 3D rigid body dynamics and satellite attitude dynamics and controls.

Requisites: Requires prerequisite courses of ASEN 2003 and ASEN 2004 and APPM 2360 or MATH 3430 and MATH 2130 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 3300 (4) Aerospace Electronics and Communications

Provides the fundamentals of electronics and communications widely used in aerospace engineering. Includes analog instrumentation electronics, data acquisition, digital electronics and radio communication.

Requisites: Requires prerequisite courses of ASEN 2003 and PHYS 1120 and APPM 2360 or MATH 3430 and MATH 2130 and APPM 2350 or MATH 2400 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 3519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite: varies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 3930 (6) Aerospace Engineering Cooperative Education

Students will participate in a previously arranged, department-sponsored cooperative education program with a government agency or industry. 0.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Aerospace Engineering (ASEN) majors only.

Recommended: Prerequisite GPA above 3.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Specialized Courses

ASEN 4013 (3) Foundations of Propulsion

Describes aerothermodynamics and design of both rocket and air-breathing engines. Includes ramjets, turbojets, turbofans, and turboprop engines, as well as liquid, solid, and hybrid rockets.

Requisites: Requires prerequisite courses of ASEN 3113 and APPM 2360 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4018 (4) Senior Projects 1: Design Synthesis

Focuses on the synthesis of technical knowledge, project management, design process, leadership, and communications within a team environment. Students progress through the design process beginning with requirements development, then preliminary design and culminating with critical design. Offered fall only.

Requisites: Requires prereq courses of ASEN 1022, 3111, 3112, 3113, 3128, 3200 and 3300 (all min grade C). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engr (ASEN) Aerospace or Engr-Concurrent Degree (C-ASEN) students majors only

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4028 (4) Senior Projects 2: Design Practicum

Focuses on the fabrication, integration, verification and validation of designs produced in ASEN 4018. Students work within the same teams from ASEN 4018. Offered spring only.

Requisites: Requires prerequisite course of ASEN 4018 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4057 (3) Aerospace Software

Provides an overview of prevalent software and hardware computing concepts utilized in practice and industry. Establishes the background necessary to tackle programming projects on different computing platforms with various software tools and programming languages.

Requisites: Requires prerequisite course of CSCI 1320 or ECEN 1310 or CHEN 1310 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 4067 (3) Microavionics & Introduction to PIC Microcontrollers for Aerospace Systems

Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. The goal of this course is to learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students "learn by doing" through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo. Previously offered as a s

Requisites: Requires prerequisite courses of (ASEN 1320 or CSCI 1300 or CSCI 1310 or CHEN 1310 or ECEN 1310) and ASEN 3300 (all minimum grade C).

ASEN 4090 (3) Global Positioning Systems Applications

Focuses on GPS technology, software development, and applications. Lectures will cover the principal concepts used in GPS, and weekly laboratories will apply that knowledge. Culminates in student design projects using GPS.

Requisites: Requires prerequisite courses of APPM 2360 and CHEN 1310 (all minimum grade C).

Recommended: Prerequisite junior/senior standing in engineering.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 4114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5114

Requisites: Requires prerequisite courses of ASEN 3128 and ASEN 3200 (all minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 4123 (3) Vibration Analysis

Highlights free and forced vibration of discrete and continuous systems. Examines Lagrange's equation, Fourier series, Laplace transforms, and matrix and computational methods. Applies knowledge to practical engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4123

Requisites: Requires prerequisite course of ASEN 3112 or MCEN 3030 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 4128 (3) Human Factors in Engineering and Design

Introduces the field of human factors engineering and investigates human psychological, physiological and performance limitations in complex systems and why it is vital for engineers to understand human operational limitations when designing complex systems. Course includes studies of real accidents caused by human error, good and bad designs, latent conditions and accident-producing designs. Goal is an understanding of how to conduct engineering design with consideration of human factors.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4138 (3) Aircraft Design

Two lectures and one lab per week. Examines principles of aircraft configuration and design to meet given performance specifications, taking into account aerodynamic, stability and control, and flying quality considerations, as well as airworthiness regulations. Includes preliminary design of the major elements of an aircraft.

Requisites: Requires prerequisite course of ASEN 3128 (minimum grade C). Restricted to Aerospace Engineering (ASEN) or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5218

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Aerospace Engineering (ASEN) or Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 4338 (3) Computer Analysis of Structures

Covers basic structural design concepts and finite element modeling techniques. Emphasizes use of finite element static and dynamic analysis to validate and refine an initial design. Introduces basic design optimization and tailoring. Proficiency in Matlab required.

Requisites: Requires prerequisite course of ASEN 3112 (minimum grade C). Restricted to Aerospace Engineering (ASEN) majors only

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 4519 (1-3) Special Topics

Studies specialized aspects of the aerospace engineering sciences or innovative treatment of required subject matter at the upper-division level. Course content is indicated in the online Schedule Planner. Department enforced prerequisite varies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Specialized Courses

ASEN 4849 (1-6) Independent Study

Special projects agreed upon by student and instructor. Department consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 4859 (1-6) Undergraduate Research

Assigns a research problem on an individual basis. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 5007 (3) Introduction to Finite Elements

Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite matrix algebra.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5010 (3) Spacecraft Attitude Dynamics and Control

Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5012 (3) Mechanics of Aerospace Structures

Applies fundamental concepts of continuum mechanics, theory of elasticity and energy methods to the analysis of structures.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5023

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites APPM 2360 and ASEN 2001 and ASEN 2003 and ASEN 3112 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5014 (3) Linear Control Systems

Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Systems and Control

ASEN 5016 (3) Space Life Sciences

Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5018 (3-6) Graduate Projects I

Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5158 or instructor consent required.

ASEN 5022 (3) Dynamics of Aerospace Structures

Applies concepts covered in undergraduate dynamics, structures and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements and dynamic stability.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5012 or ASEN 5227 or MATH 2130 or APPM 3310 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5034 (3) Stochastic Methods for Systems Engineering

Development of stochastic models used in aerospace and other systems engineering and optimization problems. Review of probability theory, stochastic models used in decision theory, random processes, queuing theory, information theory, reliability and quality control. Computer solutions required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5044 (3) Statistical Estimation for Dynamical Systems

Introduces theory and methods of statistical estimation for general linear and nonlinear dynamical systems, with emphasis on aerospace engineering applications. Major topics include: review of applied probability and statistics; optimal parameter and dynamic state estimation; theory and design of Kalman filters for linear systems; extended/unscented Kalman filters and general Bayesian filters for non-linear systems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 5047 (3) Probability and Statistics for Aerospace Engineering Sciences

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes and quality control, including software models of same.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5050 (3) Space Flight Dynamics

Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5052

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5051 (3) Fundamentals of Fluid Dynamics

Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5052 (3) Analytical Astrodynamics

Introduction to astrodynamics with an emphasis on analytical approaches. The primary subjects covered are the general solution of the 2-body problem; orbital trajectories, transfers, targeting, and time of flight; orbit perturbations and averaging analysis; and the restricted 3-body problem. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5050

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

ASEN 5053 (3) Rocket and Spacecraft Propulsion

An in depth presentation of the theory, analysis, and design of modern rocket and spacecraft propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5063 (3) Aircraft Propulsion

Designed to teach the theory, analysis and design of engines used for aircraft propulsion. Will deal with engine selection, engine performance, analysis and design of various components of modern aircraft engines, with emphasis on recent developments.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5067 (3) Microavionics & Introduction to PIC Microcontrollers for Aerospace Systems

Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. The goal of this course is to learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students "learn by doing" through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo. Previously offered as a s

ASEN 5090 (3) Introduction to Global Navigation Satellite Systems

Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 5098 (3) System Engr and Design

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5111 (3) Introduction to Aeroelasticity

Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3111 or MATH 2130 or APPM 3310 and MATH 3430 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4114

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3128 and ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Systems and Control

ASEN 5121 (3) Boundary Layers and Convection

This course presents an introduction to the principles of viscous fluid flow and methods for performing engineering calculations of quantities such as skin friction and heat transfer rates in boundary layers. The first portion of the course material will focus on basic principles of fluid mechanics. We will derive the Navier-Stokes equations and discuss some simple solutions to these equations. The second portion of the course will concentrate on the application of these principles to boundary layers. We will derive the boundary layer equations and discuss their approximate and almost exact solutions. Formerly offered as a special topics course.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors.

Recommended: Prerequisite ASEN 3111 and/or ASEN 5051.

ASEN 5122 (3) Control of Aerospace Structures 1

Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5148 (3) Spacecraft Design

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft.

Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5151 (3) Compressible Flow

Provides aerodynamic theory applicable to the high speed flight of subsonic, transonic, and supersonic aircraft, and hypersonic vehicles. Topics include linear theory of subsonic and supersonic speeds, the nonlinear theories of transonic and hypersonic speeds, and compressible boundary layers.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5158 (3) Space Habitat Design

Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5168 (3) Remote Sensing Instrumentation Design

Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5188 (3) Fundamentals of Systems Engineering

Examines the disciplined processes of designing and managing complex systems over their life cycle. Requirements engineering, reliability, logistics, team leadership, testing and evaluation, maintainability and other disciplines are examined with focus on the system engineering of small spacecraft.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5210 (1) Remote Sensing Seminar

Covers subjects pertinent to remote sensing of the Earth and space, including oceanography, meteorology, vegetation monitoring, geology, geodesy and space science, with emphasis on techniques for extracting geophysical information from data from airborne and spaceborne platforms. Course requirement for Remote Sensing Certificate. Formerly ASEN 6210.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 5212 (3) Composite Structures and Materials

Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4218

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4222

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3112 and ASEN 4012 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5227 (3) Mathematics for Aerospace Engineering Sciences 1

Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5235

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite one year of calculus-based physics and math up through differential equations.

Additional Information: Departmental Category: Remote Sensing

ASEN 5245 (3) Radar and Remote Sensing

Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 5307 (3) Engineering Data Analysis Methods

Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5321 (3) Computational Fluid Dynamics Structured Grid

Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Formerly ASEN 6327.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5417 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5325 (3) Small Scale Processes in Geophysical Fluids

Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5331 (3) Computational Fluid Dynamics Unstructured Grid

Focuses on unstructured grid computational approaches to solve the Navier-Stokes equations. Assumes a basic knowledge of the solution of partial differential equations with numerical methods with focus finite element/volume methods (FEM/FVM but primarily FEM). These issues include: the discrete formulation, non-linear equation iterator, linear equation formation, boundary condition prescription and linear equation solution.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5335 (3) Aerospace Environment

Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite Senior or graduate standing in engineering or related physical sciences.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5347 (3) Math Methods in Dynamics

Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Department consent required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5417 (3) Numerical Methods in Engineering and Science

Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or Matlab.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite APPM 2360 or equivalent or instructor consent required.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4426 and ECEN 4821 and ECEN 5821

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5440 (3) Mission Design and Development for Space Sciences

Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5780

Grading Basis: Letter Grade

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5506 (1-2) Bioastronautics Seminar

Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5519 (1-3) Selected Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite varies.

Additional Information: Departmental Category: Specialized Courses

ASEN 5849 (1-6) Independent Study

Study of special projects.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 5940 (3-6) Engineering Research Internship

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6008 (3) Interplanetary Mission Design

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5050 or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6009 (1-2) Special Topics Seminar

Presents research and developments in each department's focus areas.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6010 (3) Advanced Spacecraft Dynamics and Control

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann-Hamel equations) to model a hybrid rigid/flexible spacecraft system.

Requisites: Requires prerequisite course of ASEN 5010 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6011 (3) Experimental Fluid Mechanics

This course presents an intermediate level introduction into the theory and practice of performing experimental measurements in fluid mechanics. The fundamental principles and definitions associated with instrumentation, measurement procedures, data analysis, and uncertainty quantification will be discussed. A specific focus will be placed on the application of a variety of measurement techniques in low-speed aerodynamic environments. A selection of measurement techniques will be extensively studied and applied including: classical pressure and temperature measurements, thermal (hot-wire) anemometry, laser doppler anemometry, particle image velocimetry, surface and field flow visualization techniques, schlieren and shadowgraph photography techniques. Undergraduates may enroll with instructor permission. Previously offered as a special topics course.

Requisites: Requires prerequisite or corequisite course of ASEN 5051 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors.

ASEN 6013 (3) High Speed Propulsion

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 6014 (3) Spacecraft Formation Flying

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5050 or instructor consent required.

Additional Information: Departmental Category: Systems and Control

ASEN 6015 (3) Space Vehicle Guidance and Control

The course gives a comprehensive view of guidance systems used in space vehicles, and methods for analyzing the performance of these systems. The types of guidance systems that will be covered are launch vehicle ascent, intercept/rendezvous, interplanetary, orbit station-keeping, atmospheric re-entry, lander, and low-thrust. The mathematical foundation of these systems will be derived and discussed. Real world applications will be presented by reviewing selections from published literature. Course work will emphasize the analysis of the guidance system performance to achieve stated goals. Previously offered as a special topics course.

Requisites: Requires prerequisite courses of ASEN 5014 and ASEN 5050 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

ASEN 6020 (3) Optimal Trajectories

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 5050 and ASEN 5014 or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6021 (3) Viscous Flow

Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6024 (3) Nonlinear Control Systems

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov and Describing Function methods.

Requisites: Requires prerequisite course of ASEN 5014 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 6028 (3) Graduate Projects II

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5018 or ASEN 5158 or instructor consent required.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6037 (3) Turbulent Flows

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Formerly ASEN 5037.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and GEOL 6050

Requisites: Requires prerequisite course of ASEN 5335 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6055 (3) Data Assimilation & Inverse Methods for Earth & Geospace Observations

Covers a selection of topics in probability theory, spatial statistics, estimation theory, numeric optimization, and geophysical nonlinear dynamics that form the foundation of commonly used data assimilation and inverse methods in the Earth and Space Sciences. Hands-on computational homework and projects provide opportunities to apply classroom curricula to realistic examples in the context of data assimilation.

Requisites: Requires prerequisite course of ASEN 5044 (minimum grade B-). Restricted to graduate students.

Grading Basis: Letter Grade

ASEN 6060 (3) Advanced Astrodynamics

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5050 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6061 (3) Molecular Gas Dynamics and DSMC

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6070 (3) Satellite Geodesy

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6080 (3) Statistical Orbit Determination

Course on orbit and advanced estimation techniques. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination.

Requisites: Requires prerequisite course of ASEN 5044 (minimum grade D-). Restricted to Aerospace Engineering (ASEN) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5090 or instructor consent required.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5090.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 6107 (3) Nonlinear Finite Element Methods

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5007 or equivalent or instructor consent required.

Additional Information: Departmental Category: Specialized Courses

ASEN 6116 (3) Spacecraft Life Support Systems

Study the environmental control and the life support systems and technologies that keep people alive and healthy in spacecraft and habitats. Students will learn about thermal control systems, air revitalization processes, water reclamation and treatment, waste handling and the reuse of materials, and food and nutrition. Expect to develop analytical models from first principles and perform hands-on laboratory experiments. Formerly ASEN 5116.

Requisites: Requires prerequisite course of ASEN 5158 (minimum grade D-). Requires corequisite course of ASEN 5016. Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 6265 (3) Fundamentals of Spectroscopy for Optical Remote Sensing

Provides a comprehensive overview of the fundamentals of quantum physics, atomic spectroscopy, molecular spectroscopy and laser spectroscopy. Exposes students to the spectroscopy applications in modern optical and laser remote sensing. Assists students to develop the fundamental knowledge and skills for independent learning.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

ASEN 6337 (3) Remote Sensing Data Analysis

Covers some of the most commonly used machine learning techniques in remote sensing data analysis, specifically for clustering, classification, feature extraction and dimensionality reduction, and inverse methods used to retrieve geophysical information from remote sensing data. Hands-on computational homework and group and individual projects provide opportunities to apply classroom curricula to real remote sensing data.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 6365 (3) Lidar Remote Sensing

Provides a comprehensive, yet easily understandable, up-to-date understanding of lidar principles, technologies and applications. Contains approaches for quantitative lidar simulation, lidar sensitivity and error analysis, lidar data retrieval, lidar system design and performance analysis. Gives students opportunities to see and operate real state-of-the-art lidar systems and make connections to lidar experts in the nation and world.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids

Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation and numerical solutions of problems modeled as plates, shells and solids. Includes an overview of advanced variational formulations.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite introductory graduate level course in FEM and familiarity with linear algebra.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6412 (3) Uncertainty Quantification

This advanced topics course provides an exploration of techniques for representation and propagation of uncertainty in PDE/ODE-based systems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites APPM 5570 and ECEN 5612 (all minimum grade B) or equivalent courses with instructor consent.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6427 (3) Advanced Computational Fluid Dynamics

Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5417 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6517 (3) Computational Methods In Dynamics

Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5022 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite varies.

Additional Information: Departmental Category: Specialized Courses

ASEN 6800 (3) Master of Engr Project

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6849 (1-6) Independent Study

Studies special projects agreed upon by student and instructor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 6949 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Specialized Courses

ASEN 6950 (1-6) Master's Thesis

Additional Information: Departmental Category: Specialized Courses

ASEN 8990 (1-10) Doctoral Dissertation

Additional Information: Departmental Category: Specialized Courses

Air Force Aerospace Studies - ROTC (AIRR) Courses

AIRR 1010 (1) Heritage and Values I

This course provides an introduction to the Air Force, encourages students to pursue an AF career or seek additional information to be better informed about the role of the USAF. The course allows students to examine general aspects of the Department of the Air Force, AF Leadership, Air Force benefits, and opportunities for AF officers. The course also lays the foundation for becoming an Airman by outlining our heritage and values.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1020 (1) Heritages and Values II

A continuation of AIRR 1010. This course provides a historical perspective including lessons on war and the US military, AF operations, principles of war, and airpower. This course also provides students with an understanding for the employment of air and space power, from an institutional, doctrinal, and historical perspective. The students are introduced to the Air Force way of life and gain knowledge on what it means to be an Airman.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 1234 (0) Leadership Laboratory

All AFROTC cadets must attend leadership lab (two hours per week). The laboratory involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities and the life and work of an Air Force junior officer. Students (cadets) seeking a commission must take this lab in conjunction with their AIRR lecture/course. "Special Students" NOT seeking a commission, are not required or allowed to attend LLAB (Leadership Lab).

Grading Basis: Pass/Fail

AIRR 2010 (1) Team and Leadership Fundamentals 1

This course is designed to provide a fundamental understanding of both leadership and team building. This course teaches students that there are many layers to leadership, including aspects that are not always obvious. Such things include listening, understanding themselves, being a good follower, and problem solving efficiently.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 2020 (1) Team and Leadership Fundamentals 2

A continuation of AIRR 2010. This course is designed to discuss different leadership perspectives when completing team building activities and discussing things like conflict management. This course also provides students with the ability of demonstrating their basic verbal and written communication skills. Active cadets will apply these lessons at Field Training, which follows the AS200 level.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3010 (3) Leading People and Effective Communication 1

This course is designed to build on the leadership fundamentals taught in the AS200 level. The cadets will have the opportunity to utilize their skills as they begin a broader leadership role in the detachment. The goal is for cadets and students to have a more in-depth understanding of how to effectively lead people and provide them with the tools to use throughout their detachment leadership roles.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 3020 (3) Leading People and Effective Communication 2

A continuation of AIRR 3010. This course is designed to help cadets hone their writing and briefing skills. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and a supervisor.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4010 (3) National Security, Leadership Responsibilities/Commissioning Preparation 1

This course is designed to address the basic elements of national security policy and process. The cadet will comprehend the air and space power operations as well as understand selected roles of the military in society and current domestic and international issues affecting the military profession.

Additional Information: Departmental Category: Air Force Aerospace Studies

AIRR 4020 (3) National Security/Leadership Responsibilities/Commissioning Preparation 2

A continuation of AIRR 4010. This course is designed to prepare cadets for life as a second lieutenant. Cadets should comprehend the responsibility, authority, and functions of an Air Force commander and selected provisions of the military justice system.

Additional Information: Departmental Category: Air Force Aerospace Studies

Anthropology (ANTH)

Courses

ANTH 1030 (3) Principles of Anthropology 1

Evolution of humanity and culture from beginnings through early metal ages. Covers human evolution, race, prehistory, and rise of early civilizations. This course is taught through Continuing Education.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Social Science

ANTH 1040 (3) Principles of Anthropology 2

Surveys the world's major culture areas. Covers components of culture, such as subsistence, social organization, religion, and language. This course is taught through Continuing Education.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
MAPS Course: Social Science

ANTH 1100 (3) Exploring a Non-Western Culture: The Tamils

Surveys the social and economic patterns, ideas and values, and aesthetic achievements of the Tamils, a Hindu people who live in South India and Sri Lanka.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Asia Content

ANTH 1105 (3) Exploring a Non-Western Culture: Tibet

Introduction to Tibetan culture, history, religion, and society from an anthropological perspective, including traditional as well as contemporary dimensions. Topics will include Tibetan Buddhism, politics, nomadism, gender, refugee issues, and the global Tibetan diaspora, all framed within the larger methods and concepts of cultural anthropology.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Asia Content

ANTH 1115 (3) The Caribbean in Post-Colonial Perspective

Introduces the student to the varied peoples and cultures in the Caribbean region, emphasizing the historical, colonial, and contemporary political-economic contexts of their social structure and cultural patterns.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1120 (3) Exploring a Non-Western Culture: Pueblo Indians of the Southwest

Examines the geography, kinship, politics and religious values of Pueblo Indian peoples of the US Southwest in historical and contemporary context through an anthropological perspective. Specific details of Pueblo Indian languages, cultures, and histories are used to illustrate basic ideas and debates in anthropology including: the concept of culture, the influence of language on thought, the grounding of culture in human biology, religion and reason, the nature of oral traditions, and archaeological interpretation.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-U.S. Perspective

ANTH 1125 (3) Exploring Cultural Diversity in the U.S.

Examines the geography, kinship, politics and religious values of various cultures in the United States in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Diversity-U.S. Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1140 (3) Exploring a Non-Western Culture: The Maya

Explores the culture of the Maya of Central America, emphasizing their material adaptations, social organizations, ideals and values, and artistic achievements in the past and the present.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1141 (3) Indigenous Imperialism on the Andes: The Inca Realm and its People

Uses archaeological and anthropological approaches to the study of non-Western imperialism examining the origins of inequality and marginalization in Indigenous pre-European empires and their maintenance during European colonialism. We will use the Inca Empire, the largest Indigenous political system of the American continent by 1530 AD. Learning about the Indigenous and Spanish cultural heritage of South America will equip the students to appreciate present-day Latin America societies with an anthropological perspective.

ANTH 1143 (3) Civilization, The Early Years: Ancient Mesopotamia in the Second Millennium BC

Introduces you to the peoples and cultures of ancient Mesopotamia during the second millennium B.C. In conjunction with the political history of shifting dynasties, wars, and power struggles, we will examine a number of issues in various cultural contexts. These include the interplay of texts and archaeological data in reconstructing the past; societal 'collapse'-what it is and what it isn't; legitimization of power; Mesopotamian mythology, and the role of women. Previously offered as a special topics course.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1145 (3) Exploring a Non-Western Culture: The Aztecs

Explores the culture of the Aztec people of Central Mexico: their subsistence, society, religion, and achievements, as well as the impact of the Aztec empire in Mesoamerica. Also reviews the clash of a non-western society with the western world with the arrival of the Spanish conquistadors.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1150 (3) Exploring a Non-Western Culture: Regional Cultures of Africa

Explores a small number of cultures in a specific sub-region of Africa from an integrated holistic viewpoint, emphasizing material adaptations, social patterns, ideas and values, and aesthetic achievements.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1155 (3) Exploring Global Cultural Diversity

Examines the geography, kinship, politics and religious values of various cultures globally in historical and contemporary context through an anthropological perspective. Check with department for semester offerings.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1156 (3) Class and Consumption: Global Cultures of Inequality, Anxiety, and Shopping

Introduces students to the cultural contours of the political and economic conditions that generate social class. Students learn about classical theories of social class that have traditionally focused on labor, production, education or status, and adds consumption to these analyses. By inviting students to think anthropologically about how consumption facilitates and generates class differentiation, the course equips them to recognize and analyze the ways that class is experienced and reproduced.

ANTH 1170 (3) Exploring Culture and Gender through Film

Explores the concepts of culture and gender from an anthropological perspective, using films and other media, as well as written texts. By analyzing media about other ways of life, students will learn the basic concepts of cultural anthropology and be able to apply them to any society. In addition, students will learn to think critically about documentary and ethnographic media.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1180 (3) Maritime People: Fishers and Seafarers

Explores important milestones in the development of human societies and cultures that live from the sea. Emphasizes the evolution of maritime adaptations associated with fishing and seafaring from more than 10,000 years ago through the present.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 1190 (3) Origins of Ancient Civilizations

Examines origins of the world's first civilizations in Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Covers archaeology of ancient cities, trade, economy, politics, warfare, religion, and ideology. Seeks insights into general processes of cultural evolution.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 1200 (3) Culture and Power

Compares contemporary sociopolitical systems across cultures, from non-Western tribal groups to modern states. Introduces students to anthropological approaches for understanding and analyzing political forces, processes, and institutions that affect cultures such as colonialism, warfare, violence, ethnicity, migration, and globalization.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2010 (3) Introduction to Biological Anthropology 1

Detailed consideration of human biology, the place of humans in the animal kingdom, primate ecology and fossil evidence for human evolution. Required for ANTH majors.

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec
Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

ANTH 2020 (3) Human Biological Variation and Adaptation

Introduction to human biology, variation, and adaptation. Explores humans as a species through an understanding of biological variation and adaptation.

Recommended: Prerequisite ANTH 2010.

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec
Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2030 (1) Laboratory in Biological Anthropology 1

Lab in human osteology and musculoskeletal system emphasizing comparative primate morphology, adaptation, and the fossil record documenting the natural history of primates. Meets the MAPS requirement for natural science: lab, when taken with ANTH 2010.

Recommended: Corequisite ANTH 2010.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

MAPS Course: Natural Science Lab or Lab/Lec

ANTH 2040 (1) Laboratory in Human Biological Variation and Adaptation

Experiments and hands-on exercises designed to enhance understanding of human genetics, anatomy, and function of the principles and concepts presented in ANTH 2020. One two-hour class per week.

Recommended: Corequisite ANTH 2020.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec
Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2070 (3) Bones, Bodies, and Disease

Studies the human skeleton and introduces techniques used to evaluate demographic variables. Applies techniques through evaluation of photographic images of an excellently preserved mummified skeletal population from ancient Nubia to reconstruct prehistoric patterns of adaptation and biocultural evolution. Offered through Continuing Education only.

Recommended: Prerequisite ANTH 2010.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 2100 (3) Introduction to Cultural Anthropology

Covers current theories in cultural anthropology and discusses the nature of field work. Explores major schools of thought and ethnographic fieldwork in a range of cultures studied by anthropologists. Required for Anthropology majors.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 2200 (3) The Archaeology of Human History

Where do we come from? This course provides a brief introduction to the practice of archaeology and then emphasizes the evidence for major events/transitions in human history over the last 2.5 million years. Required for ANTH majors.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2210 (1) Laboratory Course in Archaeological Methods

Studies analytical methods in archaeological research including those employed both in the field and in the laboratory. Deals with practical exercises illustrating many of the theoretical principles covered in ANTH 2200.

Recommended: Corequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 2525 (3) Environmental Anthropology

Examines the impacts of human impacts on the planet from a cross-cultural perspective. This course will explore how different cultures have impacted their environments, and the diverse responses that cultures make to ecosystem changes. Also studies what different human groups have done, and are doing, to mitigate and adapt to ecological degradation, biodiversity loss, and climate change.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 3000 (3) Primate Behavior

Surveys naturalistic primate behavior. Emphasizes social behavior, behavioral ecology, and evolution as they lead to an understanding of human behavior.

Requisites: Requires a prerequisite course of ANTH 2010 or EBIO 1220 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior).

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 3009 (3) Modern Issues, Ancient Times

Considers issues of vital importance to humans, both now and in ancient times. Topics such as food, death, sex, family, literacy, or power are explored to consider how ancient societal norms and attitudes evolved and how they relate to modern culture. Draws on material and literary evidence to develop an understanding of the complexities of ancient life.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 3009

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 3010 (3) The Human Animal

Identifies genetic, anatomical, physiological, social, and behavioral characteristics humans share with other mammals and primates. Explores how these characteristics are influenced by modern culture.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2010.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 3100 (3) Africa: Peoples and Societies in Change

Examines culture and politics in Africa through works by anthropologists and historians, as well as novels, films, and journalistic accounts. Special attention is devoted to the ways in which various African cultures have creatively and resiliently responded to the slave trade, European colonialism, and post-colonialism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3110 (3) Ethnography of Mexico and Central America

A broad overview, focusing on Mexico and Guatemala. Major topics include ethnohistory, indigenous and mestizo peoples, and contemporary problems and issues.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3119 (3) The Archaeology of Death

Consider Death. It is a universal human phenomenon. Humans across time and space have caused, planned for, reacted to, and carried out death practices in extraordinarily different ways. Mortuary practice provides a fascinating insight into human history and culture in both the modern and ancient world.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 3119

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3160 (3) Peoples of the South Pacific

Surveys traditional island cultures and contemporary changes in the Pacific, focusing on how the Pacific Islands were first settled, some of the great anthropologists who studied the islanders, and how current environmental changes, such as global warming, threaten the future existence of the islands.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3170 (3) America: An Anthropological Perspective

Historical and contemporary aspects of American life are considered from an anthropological perspective.

Additional Information: Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3180 (3) Gender, Culture, and Sexuality

Focuses on gender, that is, the making of men and women, and how gender is culturally constructed in different societies. Gender describes many areas of behavior, feelings, thoughts, and fantasies that cannot be understood as primarily biologically produced. Sexuality and sexual systems are sometimes viewed as products of particular gendering practices, but recent theories suggest that sexual systems themselves constitute gender.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3300 (3) Elements of Religion

Explores universal components of religion, as inferred from religions of the world, ranging from smaller-scale oral to larger-scale literate traditions.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 3301

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 3760 (3) Exploring Culture and Media in Southeast Asia

Introduces students to the ethnographic method and critical media practices through immersion in the cultural politics of Indonesia. Students will learn to conduct ethnographic research and to use media-making as a research method. Students will learn the ethnography of Southeast Asia by focusing on the cultural diversity of Indonesia, with special attention to religious and political issues among marginalized groups.

Repeatable: Repeatable for up to 9.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Social Sciences

Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 3770 (3) Primates of Vietnam: Conservation in a Rapidly Developing Country

Immersive global seminar that will take place in southern and central Vietnam. We will travel to Ho Chi Minh City to begin an exploration into the conservation of primates in this country. Vietnam is home to 25 primate species and a rapidly growing human population. This course will examine challenges, success, and failures in the conservation of these creatures within the context of development within the historical context of Vietnam.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4000 (3) Quantitative Methods in Anthropology

Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5000

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ANTH 2010 and ANTH 2020.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4020 (3) Explorations in Anthropology

Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4045 (3) Introduction to Museum Anthropology

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5045 and MUSM 5045

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4050 (3) Anthropology of Jews and Judaism

Explores topics in Jewish anthropology. Uses the lens of anthropological inquiry to explore, discover and analyze different concepts within Jewish culture. Topics explored will include customs, religious practices, languages, ethnic and regional subdivisions, occupations, social composition, and folklore. Explores fundamental questions about the definition of Jewish identity, practices and communities.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4050

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4060 (3) Nutrition and Anthropology

Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5060

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ANTH 2010 and ANTH 2020 or EBIO 1210 and EBIO 1220 or EBIO 1030 and EBIO 1040.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4070 (3) Methods in Biological Anthropology

Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5070

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 2030 and ANTH 2040 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ANTH 4080 (3) Anthropological Genetics

Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5080

Requisites: Requires prerequisite courses of ANTH 2010 and 2020 or EBIO 1210 and 1220 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4110 (3) Human Evolutionary Biology

Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5110

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4120 (3) Advanced Biological Anthropology

Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5120

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2010 or ANTH 2020 or EBIO 1210 or EBIO 1220.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective

Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5125

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5129 and ARTH 4129 and CLAS 4129 and CLAS 5129

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4130 (3) Advanced Osteology

Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5130

Recommended: Prerequisites ANTH 2010 and ANTH 2020 and ANTH 4000 and students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4160 (3) Early Hominin Paleoeecology

Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5160

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4170 (3) Primate Evolutionary Biology

Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5170

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2010 or EBIO 1210.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4180 (3) Anthropological Perspectives: Contemporary Issues

Students read, discuss, and write critical evaluations of contemporary publications in anthropology. Identifies basic themes that inform major anthropological perspectives. Students then bring these perspectives to bear on issues currently facing the human species.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4210 (3) Southwestern Archaeology

Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5210

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4220 (3) From Olmec to Aztec: The Archaeology of Mexico

Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5220

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4224 (3) Archaeology of the Maya and Their Neighbors

Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5224

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4235 (3) Landscape Archaeology

Explores how humans and the environment have influenced each other throughout history. Considers what landscapes are, how archaeologists study them, and why such study is important. Examines the most prominent theoretical and methodological approaches to the study of landscapes and explores a series of different types of landscapes, including sacred landscapes, political landscapes, and landscapes of movement. Previously offered as a special topics course.

Recommended: Prerequisite ANTH 2200.

ANTH 4240 (3) Geoarchaeology

Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5240

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ANTH 4245 (3) Ceramics in Archaeology

Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5245

Requisites: Requires prerequisite of ANTH 2200 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4270 (3) Plains Archaeology

Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5270

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4330 (3) Human Ecology: Archaeological Aspects

Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5330

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4340 (3) Archaeological Method and Theory

Surveys archaeological theories and methods within the context of the history of archaeology. Includes archaeological approaches to data recovery, analysis, and interpretation as well as an overview of cultural resources management and ethical issues in contemporary archaeology.

Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4350 (2-6) Archaeological Field and Laboratory Research

Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5350

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisites ANTH 2200 and students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4380 (3) Lithic Analysis and Replication

Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5380

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4390 (3) Research Methods in Archaeology I

Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines. Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5390

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2200.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4465 (3) The Archaeology of Inequality

Examines the theoretical and archaeological literature to understand how inequality develops, how it is maintained over time, and how it is negated. Presents an understanding of, and critically evaluates, the most prominent paradigms for understanding socially unequal relationships, and considers the vital role archaeology plays in understanding inequality.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4470 (3) Collections Research Practicum in Cultural Anthropology

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5470 and MUSM 4912 and MUSM 5912

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4500 (3) Cross-Cultural Aspects of Socioeconomic Development

Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5500

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4505 (3) Globalization and Transnational Culture

Covers the historical foundations for contemporary global change, addressing colonialism, global outsourcing, and cultural imperialism, with a particular emphasis on gender, class, and consumerism.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4525 (3) Global Islams

Examines the historical formation of Islam in Indonesia and Southeast Asia so as to situate contemporary Islamic practices in a global context.

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ANTH 4530 (3) Theoretical Foundations of Sociocultural Anthropology

Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5530

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4570 (3) Anthropology of Fishing

Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5570

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4580 (3) The Holocaust: An Anthropological Perspective

Focuses on the Holocaust during the Third Reich, which involved the murder of millions of people, including six million Jews. Reviews the Holocaust's history, dynamics and consequences as well as other genocides of the 20th century, using an anthropological approach.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4580

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ANTH 4605 (3) Anthropology of Neuroscience

Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5605

Grading Basis: Letter Grade

ANTH 4610 (3) Medical Anthropology

Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5610

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4615 (3) Kinship: Being and Belonging

Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Prerequisite ANTH 2100.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4620 (3) Nationalism and Cultural Citizenship

Explores the nature of ethnic conflict, nationalism, and cultural citizenship in different contexts, including the United States. Is the nation-state dead? What effect do extranational and transnational organizations/institutions (e.g., European Union) have on the development of nationalism? Through the exploration of contemporary theory and case studies, this class will address these important contemporary concerns.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4630 (3) Nomadic Peoples of East Africa

Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5630

Recommended: Prerequisite students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4690 (3-6) Anthropology of Tibet

Explores the culture of Tibet in both historical and thematic manners, considering the long-term development of Tibetan cultural practices and institutions as well as many of the abrupt changes introduced to Tibet in the 20th century. Topics covered include region, politics, gender, warfare, poetry and literature, and life under Chinese rule and as refugees around the world.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4700 (3) Practicing Anthropology

Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5700

Requisites: Requires prerequisite course of ANTH 2100 (minimum grade B). Restricted to students with 87-180 credits (Junior or Senior) Anthropology (ANTH) majors only.

Grading Basis: Letter Grade

ANTH 4710 (3) Departmental Honors in Anthropology 1

Course work built around theme of research design as a means of integrating previous training in the field of anthropology as well as providing an opportunity to perform creative scientific investigations. Prepares students to write an honors thesis in ANTH 4720. Required of students doing Anthropology departmental honors.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sciences Honors Course

ANTH 4720 (3) Departmental Honors in Anthropology 2

Continuation of ANTH 4710.

Recommended: Prerequisite ANTH 4710.

Additional Information: Arts Sciences Honors Course

ANTH 4730 (3) Latin American Politics and Culture through Film and Text

Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5730

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4735 (3) Contemporary Cuban Culture: Race, Gender and Power

Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5735

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4740 (3) Peoples and Cultures of Brazil

Thematically surveys theoretical and ethnographic issues that have been important in understanding Brazil. Read and write critically about textual and visual representations of Brazil presented in the course.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisites ANTH 2100 and three or more cultural anthropology courses.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4745 (3) Science, Technology and Society

Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5745

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4750 (3) Culture and Society in South Asia

Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5750

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4755 (3) Cultures of Expertise: Science, Power and Knowledge

Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5755

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4760 (3) Ethnography of Southeast Asia and Indonesia

Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5760

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ANTH 4770 (3) Anthropology of Tourism

Introduces students to anthropological theories on tourism and considers those theories in the contexts of the varied sites and forms of tourism practiced around the world today. We will ask: why do people tour? Where do they go? And most centrally: how do the hosts to tourism feel about these outside visitors? Having been exposed to questions of globalization, development, belonging, race, gender, and desire, students will then be asked to reflect upon and theorize their own touristic experiences.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite ANTH 2100.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4800 (3) Language and Culture

Principles of language structure and how language and culture interrelate, how language and language use are affected by culture and how culture may be affected by use of, or contact with, particular languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4800

Recommended: Prerequisites ANTH 2100 or LING 1000 or LING 2400 and students with 57-180 credits (Junior or Senior) only.

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ANTH 4840 (1-8) Independent Study

For upper-division undergraduate students.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ANTH 4910 (1-3) Teaching Anthropology

Practicum by special arrangement only. Students learn to teach anthropology by serving as recitation leaders or tutors in introductory courses or as small group leaders in advanced courses.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

ANTH 4919 (3) Collections Research Practicum: Archaeology

Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 5919 and ANTH 5919

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

ANTH 4930 (1-6) Anthropology Internship

Provides academically supervised opportunities for junior and senior anthropology majors to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 5930

Repeatable: Repeatable for up to 9.00 total credit hours.

Recommended: Prerequisites ANTH 2010 and ANTH 2100 and ANTH 2200 and students with 57-180 credits (Junior or Senior) Anthropology majors, with a minimum 3.25 GPA.

ANTH 5000 (3) Quantitative Methods in Anthropology

Surveys ways of deriving meaning from anthropological data by numerical means, including but not confined to basic statistical procedures.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4000

Requisites: Restricted to graduate students only.

ANTH 5020 (3) Explorations in Anthropology

Special topics in cultural and physical anthropology, as well as archaeology. Check with the department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ANTH 5045 (3) Introduction to Museum Anthropology

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and MUSM 5045

Requisites: Restricted to graduate students only.

ANTH 5060 (3) Nutrition and Anthropology

Overview of the evolution of human diet and ecological and cultural factors shaping modern diets. Introduces fundamentals of nutrition and analysis of nutritional status. Analyzes ecological, social, and cultural factors leading to hunger and undernutrition, as well as biological and behavioral consequences of undernutrition.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4060

Requisites: Restricted to graduate students only.

ANTH 5070 (3) Methods in Biological Anthropology

Provides laboratory-based research experience in selected areas of biological anthropology. Research designs, methods and applications will be used to develop research skills. Students will read original research papers and carry out a research project of their own design. Area of emphasis within biological anthropology will depend on instructor.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4070

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5080 (3) Anthropological Genetics

Considers data and theory of human genetics. Emphasizes analytical techniques relating to a genetic analysis of individual, family, and populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4080

Requisites: Restricted to graduate students only.

ANTH 5110 (3) Human Evolutionary Biology

Detailed consideration of the fossil evidence for human evolution. Covers the discovery of important fossils and interpretations; descriptive information about the fossils; and data and theory from Pleistocene studies relating to ecology, ecological and behavioral data on modern apes and molecular studies that have bearing on the study of human evolution.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4110

ANTH 5120 (3) Advanced Biological Anthropology

Selected topics in physical anthropology emphasizing faculty specialties. Topics may include population genetics and its application to understanding modern human diversity, human population biology, and primate ecology and evolution. Check with department for semester offerings.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4120

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ANTH 5125 (3) Evolution and the Human Life Cycle: A Primate Life History Perspective

Surveys primate biology, behavior and ecology using a life history approach. Using a comparative approach, explores life history as mammals, as primates and as humans by focusing on evolutionary decisions that occur during different life stages.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4125

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ANTH 5129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ARTH 4129 and CLAS 4129 and CLAS 5129

ANTH 5130 (3) Advanced Osteology

Detailed study of the human skeleton with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4130

ANTH 5150 (3) Human Ecology: Biological Aspects

Discusses role of human populations in local ecosystems, factors affecting population growth, and human adaptability to environmental stress. Detailed consideration of case studies of small-scale societies in different ecosystems.

ANTH 5160 (3) Early Hominin Paleoecology

Explores current thinking about the diets, environments and lives of early human ancestors and their close kin. Strong emphasis on the methods used to construct such knowledge.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4160

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ANTH 5170 (3) Primate Evolutionary Biology

Focuses on the fossil record of primates excluding the Hominini). Special emphasis is placed on delineating the origins of the order Primates, the origins of the primate suborders Strepsirhini and Haplorhini and the adaptations of extinct primates in light of our understanding of the modern primate adaptive radiations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4170

ANTH 5210 (3) Southwestern Archaeology

Explores the prehistory of the American Southwest from the earliest entry of humans into the area to the Spanish entrada. Focuses on important themes in cultural development: the adoption of agricultural strategies, sedentism, population aggregation, population movement, and social complexity.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4210

ANTH 5220 (3) From Olmec to Aztec: The Archaeology of Mexico

Examines the archaeology of Mexico from the initial peopling of the Americas to the Spanish conquest of the Aztec empire. Studies origins of complex societies; ancient Mexican cities, states and empires; religion and politics; trade and interaction; ecology and economy; and social organization.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4220

Requisites: Restricted to graduate students only.

ANTH 5224 (3) Archaeology of the Maya and Their Neighbors

Begins with the environment and describes the earliest inhabitants and the Olmec civilization, then shifts to the earliest Maya and the emergence and collapse of classic Maya civilization. Compares and contrasts the societies of lower Central America.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4224

Requisites: Restricted to graduate students only.

ANTH 5240 (3) Geoarchaeology

Applies geological principles and instruments to help solve archaeological problems. Focuses on site formation processes, soils, stratigraphy, environments, dating, remote sensing and geophysical exploration. Environmental and ethical considerations are included.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4240

Requisites: Restricted to graduate students only.

ANTH 5245 (3) Ceramics in Archaeology

Examines how archaeologists use ceramics to reconstruct the past. Topics include: the relationship between form and function; typology and classification; chronology and seriation; compositional analysis; production and exchange; social, cognitive and ideological aspects of style; and ethnoarchaeological studies of pottery use in contemporary societies. Includes two hours of lecture and two-hours of hands-on laboratory practicum per week.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4245

ANTH 5270 (3) Plains Archaeology

Archaeological evidence for Native American ways of life on the North American Great Plains from the initial peopling of the region into the 19th century.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4270

ANTH 5330 (3) Human Ecology: Archaeological Aspects

Surveys archaeological approaches to ecology, economy and landscape: glaciation, geomorphology and other physical processes creating and affecting sites and regions; environmental reconstruction; theories of human-environment interaction; landscape formation by forager, agricultural and complex societies; and ideologically structured landscapes.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4330

Requisites: Restricted to graduate students only.

ANTH 5345 (3) Archaeological Theory

Provides an advanced introduction to the history of archaeological theory from the late 19th century to the present. Topics include culture history, cultural evolution, systems ecology, behavioral archaeology, analogy and middle range theory, collective action, ecology, agency, practice, gender, identity, landscape, epistemology, materiality and memory.

Requisites: Restricted to graduate students only.

ANTH 5350 (2-6) Archaeological Field and Laboratory Research

Students participate in archaeological field research or conduct laboratory analysis of archaeological materials and data. Students work with faculty on archaeological research projects with a field or lab focus, depending on the project undertaken.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4350

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 5380 (3) Lithic Analysis and Replication

Uses diversity of approaches to the analysis of ancient stone tools, including fracture mechanics, lithic technology, materials, heat treatment and functional analysis. Percussion and pressure-flaking experiments are performed.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4380

Requisites: Restricted to graduate students only.

ANTH 5390 (3) Research Methods in Archaeology I

Method and theory of archaeology, emphasizing the interpretation of materials and data and the relationship of archaeology to other disciplines.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4390

Requisites: Restricted to graduate students only.

ANTH 5400 (3) Research Methods in Archaeology 2

Focuses on the design of research including constructing empirical arguments and testing them, data gathering, site formation processes, field strategies (archival resources, mapping, field survey, surface collecting/recording, excavation and preliminary analysis) and artifact analysis as it relates to research design.

ANTH 5455 (3) Epistemology in Archaeology

Examines the logic of scientific inference in general and important issues in inference in archaeology specifically. It focuses on the fundamental problem of arguing from evidence based on the things people left behind to the lives those people led, the fundamental problem in archaeology. We examine general topics to start, including analytic bias, constructing and borrowing theory, and the development of archaeological interpretation over time, using recent and older literature. We then turn to analysis of published case studies and finish with cases from specific research topics the students are working on. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ANTH 5460 (3) Archaeology and Contemporary Society

Explores the intellectual climate in which archaeology is practiced and how it influences archaeological research and reconstruction, laws, regulations, and ethical issues. Explores public use of and engagement with archaeology.

Requisites: Restricted to graduate students only.

ANTH 5470 (3) Collections Research Practicum in Cultural Anthropology

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4470 and MUSM 4912 and MUSM 5912

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

ANTH 5500 (3) Cross-Cultural Aspects of Socioeconomic Development

Examines goals of international agencies that support development in underdeveloped countries. Anthropological perspective is provided for such issues as urban planning, health care and delivery, population control, rural development and land reform.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4500

Requisites: Restricted to graduate students only.

ANTH 5530 (3) Theoretical Foundations of Sociocultural Anthropology

Critically examines the pivotal schools of 20th century social theory that have shaped modern sociocultural anthropology, including the ideas of cultural evolutionism, Marxism, Durkheim, Weber, Freud, structuralism, postmodernism and contemporary anthropological approaches. Includes primary readings and seminar-style discussion.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4530

Requisites: Restricted to graduate students only.

ANTH 5570 (3) Anthropology of Fishing

Examines fishing methods, peoples, societies and cultures, emphasizing anthropology's role in shaping fisheries management and development policy.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4570

Requisites: Restricted to graduate students only.

ANTH 5605 (3) Anthropology of Neuroscience

Examines the connections between the production and social uptake of neuroscientific knowledge, and explores how transformations in neuroscience shape understandings of human nature. Focusing on anthropological, philosophical, and popular literature, this course addresses the following themes through a cultural and anthropological lens: subjectivity and neuroimaging, "disability" and "neurodiversity," child development, gender, "risk" and neoliberal governance, and the production of scientific expertise.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4605

Grading Basis: Letter Grade

ANTH 5610 (3) Medical Anthropology

Examines health, illness, disease and treatment across a diversity of cases, all of which involve political economic inequalities, individual and collective experiences of medical systems and the historical and contemporary treatment of distinct populations. A demanding upper-level cultural anthropology course in the field of Medical Anthropology, a subfield of cultural anthropology, designed for advanced undergraduate students and early graduate students with an emphasis on the intersections of science, medicine and populations.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4610

ANTH 5630 (3) Nomadic Peoples of East Africa

Examines the issues of current concern in the study of East African pastoral peoples. First half of the course is devoted to historical perspectives and the second half explores the transition from subsistence to market oriented economies.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4630

Requisites: Restricted to graduate students only.

ANTH 5700 (3) Practicing Anthropology

Learn ethnographic methods in the classroom and implement these skills in placements with community organizations, where students pursue an applied research project. This course teaches students how to use anthropological theory and methods to investigate social problems, and to consider how ethnographic research techniques can be applied to positively impact society.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4700

Requisites: Restricted to Anthropology (ANTH) graduate students only.

Grading Basis: Letter Grade

ANTH 5730 (3) Latin American Politics and Culture through Film and Text

Introduces students to the political cultures and societies of Latin America. Through historical and ethnographic text and documentary and non-documentary cinema, this course will explore class relations, ideology and resistance from the conquest to the present.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4730

ANTH 5735 (3) Contemporary Cuban Culture: Race, Gender and Power

Ground students' understanding of contemporary Cuba within the global context. How do those outside the island imagine Cuba and why? What are the realities? In a world of U.S. dominated globalization, only recently have we relaxed a forceful economical blockade on the island: what does the U.S. mean in the Cuban imaginary, both in the past and present? To attend to global processes as they affect local (Cuban) experience, texts from anthropology, history, policy, literature, film and music will be drawn upon. Students will learn how long-standing patterns regarding race, color, class and gender relations have evolved into the socialist and now the "post-socialist" context.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4735

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ANTH 5745 (3) Science, Technology and Society

Explores the cultural work of science and technology in contemporary societies. The course will focus on anthropological studies of technoscientific works ranging from high-energy particle physics and marine biology to hackathons and space exploration. Discussion topics include the relationship between science, technology and political power; scientific controversies; paradigm shifts and scientific revolutions; and ideas of objectivity, representation and abstraction.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4745

Grading Basis: Letter Grade

ANTH 5750 (3) Culture and Society in South Asia

Intensive analysis of major issues in anthropological research on South Asia (India, Pakistan, Bangladesh, Nepal and Sri Lanka), including kinship, gender, marriage, caste system, religion and ritual, ethnic conflict and social change.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4750

Additional Information: Departmental Category: Asia Content

ANTH 5755 (3) Cultures of Expertise: Science, Power and Knowledge

Examines the expertise as a cultural category. Students will consider the historical and cultural contexts of various forms of expertise and the social roles of experts from car mechanics to civil engineers, doctors and scientists. Students will be given opportunities to reflect analytically on their own experiences with increasingly specialized education as they develop "professional vision" in their chosen fields.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4755

Grading Basis: Letter Grade

ANTH 5760 (3) Ethnography of Southeast Asia and Indonesia

Introduces the historical, political, and cultural dimensions of Southeast Asia, focusing primarily on Malaysia, the Philippines, Singapore and Indonesia, with some coverage of mainland Southeast Asia.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4760

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

ANTH 5770 (3) Core Course---Archaeology

Provides a graduate-level overview of analytic issues relevant to all phases of archaeological research and of the diversity of theoretical perspectives within the field as a whole. Course is required for all first-year graduate students in anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5780 (3) Core Course-Cultural Anthropology

Provides an intense, graduate-level introduction to the discipline of cultural anthropology, with an emphasis upon critically assessing those methods, theories, and works that have shaped the field from the 19th century to the present time. Required of all first-year graduate students in anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5785 (3) Advanced Seminar in Cultural Anthropology

Details the history of theory and practice in contemporary cultural anthropology, considering the development of major theoretical schools of thought and the integration of general social theory within anthropology. Required of masters students in cultural anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5790 (3) Core Course---Biological Anthropology

Discusses how biological anthropologists use evidence and concepts from evolutionary theory, human biology, and ecology to understand the evolution, diversification, and adaptation of human populations. Required of all first-year graduate students in anthropology.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

ANTH 5795 (3) Proseminar in Anthropology

Introduces incoming first-year graduate students to the history and current state of scholarship in anthropology from across the subdisciplines, through introduction to the research of individual faculty in the department. Required of all incoming graduate students.

Requisites: Restricted to graduate students only.

ANTH 5840 (1-6) Guided Study

Directed individual research based on a specific area of specialization.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 5919 (3) Collections Research Practicum: Archaeology

Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4919 and MUSM 5919

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ANTH 5930 (1-6) Anthropology Internship

Provides academically supervised opportunities graduate students to work in public and private sectors on projects related to students' career goals. Relates classroom theory to practice. Requires at least 48 hours on the job per credit hour and evidence (paper, employer evaluation, work journal) of significant learning.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4930

Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and HIST 6150 and ARTH 6150

Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.

ANTH 6320 (3) Linguistic Anthropology

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

Equivalent - Duplicate Degree Credit Not Granted: LING 6320

Requisites: Restricted to graduate students only.

ANTH 6500 (3) Issues in Indigenous Languages

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

Equivalent - Duplicate Degree Credit Not Granted: LING 6500

Grading Basis: Letter Grade

ANTH 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

ANTH 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7000 (3) Seminar: Current Research Topics in Cultural Anthropology

Discusses current research and theoretical issues in the field of cultural anthropology.

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to graduate students only.

ANTH 7010 (3) Seminar: Contemporary Theory in Cultural Anthropology

Addresses current theoretical perspectives in cultural anthropology and controversies surrounding them. Discusses science, history, interpretation, and postmodernism. Includes the relationship between theory and method as well as the production of ethnography.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ANTH 7015 (3) Kinship: Being and Belonging

Explores interpersonal relationships as foundational objects of analysis. This course takes a comparative approach to examine both large-scale social movements and intimate practices, examining how the ideologies and practices of relatedness intersect with and are shaped by gender and sexuality, national identity and state building, race and ethnicity, embodiment, ways of understanding signs in the world (semiotics), the law, and economic relationships. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

ANTH 7020 (3) Seminar: Physical Anthropology

In-depth discussion of selected topics in physical anthropology with emphasis on recent research.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ANTH 7030 (3) Seminar: Archaeology

Intensive examination of selected theoretical or methodological topics in archaeology. Topics vary with current research emphasis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ANTH 7140 (3) Seminar: Archaeology of Selected Areas

Considers archaeology of a specified area, either geographical or topical. Areas selected in accordance with current research interests. May be repeated up to 9 total credit hours.

Repeatable: Repeatable for up to 9.00 total credit hours.

ANTH 7200 (3) Bridging Seminar

Addresses important topics with current theoretical perspectives from at least two anthropological subdisciplines. This provides an interdisciplinary approach across the sub-disciplines of Anthropology: Archaeology, Biological, and Cultural enabling students to better understand and appreciate a holistic approach to anthropological inquiry. Graduate students from other departments may be allowed to take the course if room permits and they have an appropriate background by instructor's permission.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Anthropology (ANTH) graduate students only.

Grading Basis: Letter Grade

ANTH 7300 (3) Seminar: Research Methods in Cultural Anthropology

Repeatable: Repeatable for up to 6.00 total credit hours.

ANTH 7600 (3) Human Ecology: Cultural Aspects

Reviews and critically examines the major theoretical perspectives for understanding the relationship between human social behavior and the environment developed in the social sciences, especially anthropology, over the last 100 years. Formerly ANTH 5600.

ANTH 7620 (3) Seminar: Ethnography and Cultural Theory

Explores how ethnographic writing has evolved over the past century to incorporate different forms of cross-cultural representation and to accommodate new theoretical paradigms. Includes ethnographic authority and reflexivity, as well as embedded theories and blurred genres of cultural research.

ANTH 7840 (1-6) Independent Research

Research aimed at developing a solution to an originally conceived research problem.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ANTH 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the graduate school section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Applied Math (APPM)

Courses

APPM 1235 (4) Pre-Calculus for Engineers

Prepares students for the challenging content and pace of the calculus sequence required for all engineering majors. Covers algebra, trigonometry and selected topics in analytical geometry. Prepares students for the calculus courses offered for engineering students. Requires students to engage in rigorous work sessions as they review topics that they must be comfortable with to pursue engineering course work. Structured to accustom students to the pace and culture of learning encountered in engineering math courses. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor. Formerly GEEN 1235.

Equivalent - Duplicate Degree Credit Not Granted: MATH 1021 or MATH 1150

Requisites: Requires an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

APPM 1236 (1) Precalculus Work Group

Develops and enhances problem solving skills for students enrolled in APPM 1235. Course is conducted in a collaborative learning environment with students working in groups under the guide of a facilitator.

Requisites: Requires enrollment in corequisite course of APPM 1235.

Grading Basis: Pass/Fail

APPM 1340 (4) Calculus 1 with Algebra, Part A

Studies selected topics in analytical geometry and calculus: rates of change of functions, limits, derivatives and their applications. This course and APPM 1345 together are equivalent to APPM 1350. The sequence of this course and APPM 1345 is specifically designed for students whose manipulative skills in the techniques of high school algebra and precalculus may be inadequate for APPM 1350. For more information about the math placement referred to in the "Enrollment Requirements", please contact your academic advisor.

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into pre-calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1345 (4) Calculus 1 with Algebra, Part B

Continuation of APPM 1340. Studies selected topics in calculus: derivatives and their applications, integration, differentiation and integration of transcendental functions. Algebraic and trigonometric topics are studied throughout, as needed.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1350 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of APPM 1340 (minimum grade C-).

APPM 1350 (4) Calculus 1 for Engineers

Topics in analytical geometry and calculus including limits, rates of change of functions, derivatives and integrals of algebraic and transcendental functions, applications of differentiations and integration. Students who have already earned college credit for calculus 1 are eligible to enroll in this course if they want to solidify their knowledge base in calculus 1. For more information about the math placement referred to in the "Enrollment Requirements", contact your academic advisor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 1345 or ECON 1088 or MATH 1081 or MATH 1300 or MATH 1310 or MATH 1330

Requisites: Requires prerequisite course of APPM 1235 or MATH 1021 or MATH 1150 or MATH 1160 or MATH 1300 (minimum grade C-) or an ALEKS math exam taken in 2016 or earlier, or placement into calculus based on your admissions data and/or CU Boulder coursework.

Additional Information: GT Pathways: GT-MA1 - Mathematics
Arts Sci Core Curr: Quant Reasn Mathmat Skills
Arts Sci Gen Ed: Quantitative Reasoning Math

APPM 1351 (1) Calculus 1 Work Group

Provides problem-solving assistance to students enrolled in APPM 1350. Student groups work in collaborative learning environment. Student participation is essential.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Requires enrollment in corequisite course of APPM 1350 or APPM 1345.

Grading Basis: Pass/Fail

APPM 1360 (4) Calculus 2 for Engineers

Continuation of APPM 1350. Focuses on applications of the definite integral, methods of integration, improper integrals, Taylor's theorem, and infinite series.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2300

Requisites: Requires prerequisite course of APPM 1345 or APPM 1350 or MATH 1300 (minimum grade C-).

APPM 1361 (1) Calculus 2 Work Group

Provides problem solving assistance for students enrolled in APPM 1360. Conducted in a collaborative learning environment. Student work groups solve calculus problems with assistance of facilitator.

Requisites: Requires enrollment in corequisite course of APPM 1360.

Grading Basis: Pass/Fail

APPM 1390 (1) A Game for Calculus

Coaches students to implement study strategies geared specifically toward APPM Calculus in a structured, supportive, small group environment. Department consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

APPM 1650 (4) Python for Mathematical and Statistical Applications

Uses Python to teach the fundamentals of computer programming with an emphasis on mathematical and statistical applications. Topics will include data types, data structures, iteration, visualization, and simulations. Techniques covered will be applicable to many scientific and technical fields. No prior programming experience is required.

Requisites: Requires prerequisite or corequisite courses of APPM 1350 or APPM 1345 or MATH 1300 or MATH 1310 (all minimum grade C-).

APPM 2340 (4) Calculus 3 for Statistics and Data Science

Covers vectors and vector analysis, partial derivatives and the multivariable Taylor theorem, and multiple integrals. Introduces matrices and statistical applications.

Requisites: Requires prerequisite courses APPM 1360 or MATH 2300 (both minimum grade C-).

APPM 2350 (4) Calculus 3 for Engineers

Covers multivariable calculus, vector analysis, and theorems of Gauss, Green, and Stokes.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2400

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2351 (1) Calculus 3 Work Group

Provides problem solving assistance to students enrolled in APPM 2350. Conducted in a collaborative learning environment. Student work groups solve calculus problems with the assistance of a facilitator.

Requisites: Requires enrollment in corequisite course of APPM 2350.

Grading Basis: Pass/Fail

APPM 2360 (4) Introduction to Differential Equations with Linear Algebra

Introduces ordinary differential equations, systems of linear equations, matrices, determinants, vector spaces, linear transformations, and systems of linear differential equations.

Equivalent - Duplicate Degree Credit Not Granted: both MATH 2130 and MATH 3430

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

APPM 2450 (1) Calculus 3 Computer Lab

Selected topics in analytic geometry and calculus with a focus on symbolic computation using Mathematica.

Requisites: Requires a corequisite course of APPM 2350.

Grading Basis: Pass/Fail

APPM 2460 (1) Differential Equations Computer Lab

Selected topics in differential equations and linear algebra with a focus on symbolic computation using MATLAB.

Requisites: Requires enrollment in a corequisite course of APPM 2360.

Grading Basis: Pass/Fail

APPM 2720 (1-3) Open Topics in Lower Division Applied Mathematics

Provides a vehicle for the development and presentation of new topics that are accessible to lower division Applied Mathematics students. These topics have the potential to be incorporated into the core APPM curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

Grading Basis: Letter Grade

APPM 2750 (4) Java: Training, Mathematical Algorithms, and Mobile Apps

Preparatory course for Java programming. Provides necessary background for Java language: basic object-oriented concepts, analysis, and design. Learn to create Java applets, applications and mobile apps, create graphic context, and identify the key features of Java foundation classes as well as other Java-related technology. Material is taught in the context of mathematical algorithms from calculus. Department enforced requisite, knowledge of a programming language.

Requisites: Requires prerequisite course of APPM 1350 or MATH 1300 (minimum grade C-).

APPM 3010 (3) Chaos in Dynamical Systems

Introduces undergraduate students to chaotic dynamical systems. Topics include smooth and discrete dynamical systems, bifurcation theory, chaotic attractors, fractals, Lyapunov exponents, synchronization and networks of dynamical systems. Applications to engineering, biology and physics will be discussed.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3050 (3) Scientific Computing in Matlab

Topics covered include: approximations in computing, computer arithmetic, interpolation, matrix computations, nonlinear equations, optimization, and initial-value problems with emphasis on the computational cost, efficiency, and accuracy of algorithms. The problem sets are application-oriented with examples taken from orbital mechanics, physics, genetics, and fluid dynamics.

Requisites: Requires prerequisite course of APPM 2360 or MATH 3430 (minimum grade C-).

APPM 3170 (3) Discrete Applied Mathematics

Introduces students to ideas and techniques from discrete mathematics that are widely used in science and engineering. Mathematical definitions and proofs are emphasized. Topics include formal logic notation, proof methods; set theory, relations; induction, well-ordering; algorithms, growth of functions and complexity; integer congruences; basic and advanced counting techniques, recurrences and elementary graph theory. Other selected topics may also be covered.

Requisites: Requires a prerequisite of APPM 1360 or MATH 2300 (all minimum grade C-).

APPM 3310 (3) Matrix Methods and Applications

Introduces linear algebra and matrices with an emphasis on applications, including methods to solve systems of linear algebraic and linear ordinary differential equations. Discusses vector space concepts, decomposition theorems, and eigenvalue problems.

Equivalent - Duplicate Degree Credit Not Granted: MATH 2130 and MATH 2135

Requisites: Requires prerequisite course of APPM 2350 or APPM 2360 or MATH 2400 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 3350 (3) Advanced Engineering Calculus

Extends the treatment of engineering mathematics beyond the topics covered in Calculus 3 and differential equations. Topics include non-dimensionalization, elementary asymptotics and perturbation theory, Reynold's transport theorem and extensions of Leibnitz's rule, as applied to continuum conservation equations, Hamiltonian formulations, Legendre and Laplace transforms, special functions and their orthogonality properties.

Requisites: Requires prerequisite course of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

APPM 3570 (3) Applied Probability

Studies axioms, counting formulas, conditional probability, independence, random variables, continuous and discrete distribution, expectation, joint distributions, moment generating functions, law of large numbers and the central limit theorem.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 3810 or MATH 4510 STAT 3100

Requisites: Requires a prerequisite or corequisite course of APPM 2350 or MATH 2400 (prereq minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5120 and MATH 4120 and MATH 5120

Requisites: Requires a prerequisite course of APPM 3310 or MATH 2130 or MATH 2135 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4320 (3) Introduction to Dynamics on Networks

Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5320

Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).

Grading Basis: Letter Grade

APPM 4350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Reviews ordinary differential equations, including solutions by Fourier series. Physical derivation of the classical linear partial differential equations (heat, wave, and Laplace equations). Solution of these equations via separation of variables, with Fourier series, Fourier integrals, and more general eigenfunction expansions.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5350

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5360

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4370 (3) Computational Neuroscience

Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5370

Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 (all minimum grade C-).

Recommended: Prerequisite APPM 3570/STAT 3100, STAT 2600 or CSCI 3022.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5380

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-).

Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5390

Requisites: Requires prerequisite courses of APPM 2360 and APPM 3310 or MATH 3130 or MATH 3135 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4440 (3) Undergraduate Applied Analysis 1

Provides a rigorous treatment of topics covered in Calculus 1 and 2. Topics include convergent sequences; continuous functions; differentiable functions; Darboux sums, Riemann sums, and integration; Taylor and power series and sequences of functions.

Requisites: Requires prerequisite courses of APPM 2350 or MATH 2400 and APPM 2360 (all minimum grade C-) and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135 (prereq minimum grade C-).

APPM 4450 (3) Undergraduate Applied Analysis 2

Continuation of APPM 4440. Study of multidimensional analysis including n-dimensional Euclidean space, continuity and uniform continuity of functions of several variables, differentiation, linear and nonlinear approximation, inverse function and implicit function theorems, and a short introduction to metric spaces.

Requisites: Requires prerequisite course of APPM 4440 or MATH 3001 (minimum grade C-).

APPM 4490 (3) Theory of Machine Learning

Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.

Requisites: Requires prerequisite course of APPM 4440 (minimum grade C-).

Recommended: Prerequisite CSCI 5622 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4510 (3) Data Assimilation in High Dimensional Dynamical Systems

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5510, STAT 4250 and STAT 5250

Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4515 (3) High-Dimensional Probability for Data Science

Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5515

Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570 (minimum grade C-).

APPM 4530 (3) Stochastic Analysis for Finance

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5530, STAT 4230 and STAT 5230

Requisites: Requires prerequisite courses of APPM 3310 and APPM 3570, or STAT 3100, or MATH 4510 (all minimum grade C-).

APPM 4560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5560 and STAT 4100

Requisites: Requires prerequisite courses of APPM 3570 or STAT 3100 or MATH 4510 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4565 (3) Random Graphs

Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyi model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5565

Requisites: Requires prerequisite APPM 3570 or MATH 4510 (both minimum grade C).

APPM 4570 (3) Statistical Methods

Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5570

Requisites: Requires prerequisite course of APPM 1360 or MATH 2300 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4590 (3) Statistical Modeling

Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5590

Requisites: Requires prerequisite course of APPM 4520 or APPM 4570 or MATH 4520 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

APPM 4650 (3) Intermediate Numerical Analysis 1

Focuses on numerical solution of nonlinear equations, interpolation, methods in numerical integration, numerical solution of linear systems, and matrix eigenvalue problems. Stresses significant computer applications and software. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4650

Requisites: Requires a prerequisite course of MATH 3430 or APPM 2360 and APPM 3310 (minimum grade C-).

APPM 4660 (3) Intermediate Numerical Analysis 2

Continuation of APPM 4650. Examines numerical solution of initial-value problems and two-point boundary-value problems for ordinary differential equations. Also looks at numerical methods for solving partial differential equations. Department enforced prerequisite: knowledge of a programming language.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4660

Requisites: Requires prerequisite course of APPM 4650 or MATH 4650 (minimum grade C-).

APPM 4720 (1-3) Open Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 5720

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

APPM 4840 (1-3) Reading and Research in Applied Mathematics

Introduces undergraduate students to the research foci of the Department of Applied Mathematics. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 9.00 total credit hours.

APPM 4950 (1-3) Seminar in Applied Mathematics

Introduces undergraduate students to the research foci of the program in applied mathematics. It is also designed to be a capstone experience for the program's majors. Department enforced prerequisite: variable depending on the topic.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

APPM 5120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4120 and MATH 4120 and MATH 5120

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

APPM 5320 (3) Introduction to Dynamics on Networks

Introduces modern approaches to model and analyze dynamical processes on complex networks. Many dynamical processes such as epidemic propagation, opinion formation, synchronization, and cascading processes take place on complex social or technological networks. This course will introduce the tools to understand the interplay between network structure and the outcome of these dynamical processes. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4320

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 5350 (3) Methods in Applied Mathematics: Fourier Series and Boundary Value Problems

Department enforced prerequisite courses: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course: APPM 3310 or MATH 2130 or MATH 2135.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4350

Requisites: Restricted to graduate students only.

APPM 5360 (3) Methods in Applied Mathematics: Complex Variables and Applications

Introduces methods of complex variables, contour integration and theory of residues. Applications include solving partial differential equations by transform methods, Fourier and Laplace transforms and Reimann-Hilbert boundary-value problems, conformal mapping to ideal fluid flow and/or electrostatics. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360 and a prerequisite or corequisite course of APPM 3310 or MATH 3130 or MATH 3135.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4360

Requisites: Restricted to graduate students only.

APPM 5370 (3) Computational Neuroscience

Applies mathematical and computational methods to neuroscience. Techniques from linear algebra, differential equations, introductory dynamical systems, probability, stochastic processes, model validation, and machine learning will be learned and used. Neuroscience topics include neural spiking, network dynamics, probabilistic inference, learning, and plasticity. Will learn how the brain uses computational principles to enact decision making, vision, and memory. Recommended background includes linear algebra, differential equations, probability, and programming. Students will hone programming skills in MATLAB/Python and TensorFlow.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4370

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 2360 and APPM 3310 and STAT 4000 or equivalent courses.

APPM 5380 (3) Modeling in Applied Mathematics

An exposition of a variety of mathematical models arising in the physical and biological sciences. Students' modeling projects are presented in class. Topics may include: GPS navigation, medical imaging, ocean waves, and computerized facial recognition. Department enforced prerequisites: APPM 2350 or MATH 2400 and APPM 2360.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4380

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 3310 and APPM 4350 and APPM 4650.

APPM 5390 (3) Modeling in Mathematical Biology

Investigates how complex systems in biology can be studied using applied mathematics. Examines several case studies which include topics from microbiology, enzyme reaction kinetics, neuroscience, ecology, epidemiology, physiology and bioengineering. Department enforced prerequisites: APPM 2360 and APPM 3310 or MATH 2130 or MATH 2135 or instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4390

Requisites: Restricted to graduate students only.

APPM 5430 (3) Methods in Applied Mathematics: Applications of Complex Variables

Reviews basic ideas of complex analysis, including solutions of ODEs and PDEs of physical interest via complex analysis; conformal mapping, including Schwarz-Christoffel transformations and generalizations; computational methods; Riemann-Hilbert problems; topics in asymptotic methods. Department enforced prerequisite: APPM 4360 or APPM 5360.

Requisites: Restricted to graduate students only.

APPM 5440 (3) Applied Analysis 1

Discusses the elements of basic real and complex analysis, Banach spaces, L_p spaces and many relevant inequalities. Includes applications of existence and uniqueness of solutions to various types of ordinary differential equations, partial differential equations, and integral equations. Department enforced prerequisites: APPM 4440 and APPM 4450.

Requisites: Restricted to graduate students only.

APPM 5450 (3) Applied Analysis 2

Continuation of APPM 5440. Department enforced prerequisite: APPM 5440.

Requisites: Restricted to graduate students only.

APPM 5460 (3) Methods in Applied Mathematics: Dynamical Systems and Differential Equations

Introduces the theory and applications of dynamical systems through solutions to differential equations. Covers existence and uniqueness theory, local stability properties, qualitative analysis, global phase portraits, perturbation theory and bifurcation theory. Special topics may include Melnikov methods, averaging methods, bifurcations to chaos and Hamiltonian systems. Department enforced prerequisites: APPM 2360 and APPM 3310 and APPM 4440.

Requisites: Restricted to graduate students only.

APPM 5470 (3) Methods of Applied Mathematics: Partial Differential and Integral Equations

Studies properties and solutions of partial differential equations. Covers methods of characteristics, well-posedness, wave, heat and Laplace equations, Green's functions and related integral equations. Department enforced prerequisites: APPM 4350 or MATH 4470 and APPM 4360 or MATH 3450.

Requisites: Restricted to graduate students only.

APPM 5480 (3) Methods of Applied Mathematics: Approximation Methods

Covers asymptotic evaluation of integrals (stationary phase and steepest descent), perturbation methods (regular and singular methods, and inner and outer expansions), multiple scale methods and applications to differential and integral equations. Department enforced prerequisite: APPM 5470.

Requisites: Restricted to graduate students only.

APPM 5490 (3) Theory of Machine Learning

Presents the underlying theory behind machine learning in proofs-based format. Answers fundamental questions about what learning means and what can be learned via formal models of statistical learning theory. Analyzes some important classes of machine learning methods. Specific topics may include the PAC framework, VC-dimension and Rademacher complexity.

Recommended: Prerequisites APPM 4440 and CSCI 5622.

APPM 5510 (3) Data Assimilation in High Dimensional Dynamical Systems

Develops and analyzes approximate methods of solving the Bayesian inverse problem for high-dimensional dynamical systems. After briefly reviewing mathematical foundations in probability and statistics, the course covers the Kalman filter, particle filters, variational methods and ensemble Kalman filters. The emphasis is on mathematical formulation and analysis of methods.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4510, STAT 4250 and STAT 5250

Requisites: Restricted to graduate students only.

APPM 5515 (3) High-Dimensional Probability for Data Science

Provides students with an exposition of the most recent methods of high-dimensional probability for the analysis of high dimensional datasets. Applications include randomized algorithms and high-dimensional random models of datasets.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4515

Recommended: Prerequisites APPM 3310 and APPM 3570, or equivalent.

APPM 5530 (3) Stochastic Analysis for Finance

Studies mathematical theories and techniques for modeling financial markets. Specific topics include the binomial model, risk neutral pricing, stochastic calculus, connection to partial differential equations and stochastic control theory.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4530, STAT 4230 and STAT 5230

Requisites: Restricted to graduate students only.

APPM 5560 (3) Markov Processes, Queues, and Monte Carlo Simulations

Brief review of conditional probability and expectation followed by a study of Markov chains, both discrete and continuous time, including Poisson point processes. Queuing theory, terminology and single queue systems are studied with some introduction to networks of queues. Uses Monte Carlo simulation of random variables throughout the semester to gain insight into the processes under study.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4560, STAT 4100 and STAT 5100

Requisites: Restricted to graduate students only.

APPM 5565 (3) Random Graphs

Introduces mathematical techniques, including generating functions, the first- and second-moment method and Chernoff bounds to study the most fundamental properties of the Erdos-Renyi model and other celebrated random graph models such as preferential attachment, fixed degree distribution, and stochastic block models.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4565

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 5570 (3) Statistical Methods

Covers basic statistical concepts with accompanying introduction to the R programming language. Topics include discrete and continuous probability laws, random variables, expectation and variance, central limit theorem, testing hypothesis and confidence intervals, linear regression analysis, simulations for validation of statistical methods and applications of methods in R.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4570

Requisites: Restricted to graduate students only.

APPM 5580 (3) Introduction to Statistical Learning

Consists of applications and methods of statistical learning. Covers multiple linear regression, classification, regularization, splines, tree-based methods, support vector machines and unsupervised learning.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4580

Requisites: Requires prerequisite course of APPM 4570 or APPM 5570 (minimum grade C-). Restricted to graduate students only.

APPM 5590 (3) Statistical Modeling

Introduces methods, theory and applications of statistical models, from linear models (simple and multiple linear regression), to hierarchical linear models. Topics such as estimation, residual diagnostics, goodness of fit, transformations, and various strategies for variable selection and model comparison will be discussed in depth. Examples and exercises will be demonstrated using statistical software. Department enforced prerequisite: APPM 4570 or APPM 4520 or MATH 4520 or instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4590

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 5600 (3) Numerical Analysis 1

Solution of nonlinear algebraic equations, interpolation, integration, approximation, and numerical linear algebra. Department enforced prerequisite: APPM 3310 or MATH 2130 and experience with a scientific programming language.

Requisites: Restricted to graduate students only.

APPM 5610 (3) Numerical Analysis 2

Numerical linear algebra, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: APPM 5600 or MATH 5600.

Requisites: Restricted to graduate students only.

APPM 5620 (3) Numerical Linear Algebra

Develops and analyzes methods for the solution of square nonsingular linear systems, linear least squares problems, eigenvalue problems, and rank estimation. Direct and iterative methods are covered, as well as methods for dense and sparse problems. Requires solid background in linear algebra and proficiency with scientific computing.

Requisites: Restricted to graduate students only.

APPM 5650 (3) Randomized Algorithms

Investigates modern randomized methods that are used in scientific and numerical computing, in particular randomized matrix approximation methods. Other topics may include stochastic gradient methods and variance reduced versions, compressed sensing, and locality sensitive hashing.

Equivalent - Duplicate Degree Credit Not Granted: STAT 5650

Requisites: Restricted to graduate students only.

Recommended: Prerequisite APPM 4440 or equivalent.

APPM 5720 (1-3) Open Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics that may be incorporated into the core courses in applied mathematics. Department enforced prerequisite: variable, depending on the topic, see instructor.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4720

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APPM 6470 (3) Advanced Partial Differential Equations

Continuation of APPM 5470. Advanced study of the properties and solutions of elliptic, parabolic, and hyperbolic partial differential equations. Topics include the study of Sobolev spaces and variational methods as they relate to PDEs, and other topics as time permits. Department enforced prerequisite: APPM 5470.

Requisites: Restricted to graduate students only.

APPM 6520 (3) Mathematical Statistics

Emphasizes mathematical theory of statistics. Topics include distribution theory, estimation and testing of hypotheses, multivariate analysis, and nonparametric inference, all with emphasis on theory. Department enforced prerequisite: APPM 5520 or MATH 5520.

Requisites: Restricted to graduate students only.

APPM 6550 (3) Introduction to Stochastic Processes

Systematic study of Markov chains and some of the simpler Markov processes including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences.

Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560 or instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: MATH 6550

Requisites: Restricted to graduate students only.

APPM 6560 (3) Measure-Theoretic Probability

Introduces a series of fundamental concepts and results in probability theory, using rigorous measure-theoretic language. Provides a solid foundation for further studies and research in probability, stochastic processes, statistics, and data science.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites Undergraduate analysis at the level of APPM 4440.

APPM 6570 (3) Stochastic Differential Equations

Devoted to a comprehensive investigation of stochastic differential equations, as well as their important applications in Finance, Physics, and Engineering. Consists of three main topics: stochastic integration, the theory of stochastic differential equations (SDEs), and applications of SDEs.

Recommended: Prerequisite APPM 6560 or MATH/APPM 6550.

APPM 6610 (3) Introduction to Numerical Partial Differential Equations

Covers finite difference, finite element, finite volume, pseudo-spectral, and spectral methods for elliptic, parabolic, and hyperbolic partial differential equations. Department enforced prerequisite: APPM 5600.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite APPM 5610 or graduate numerical linear algebra.

APPM 6640 (3) Multigrid Methods

Develops a fundamental understanding of the principles and techniques of the multigrid methodology, which is a widely used numerical approach for solving many problems in such diverse areas as aerodynamics, astrophysics, chemistry, electromagnetics, hydrology, medical imaging, meteorology/oceanography, quantum mechanics, and statistical physics.

Requisites: Restricted to graduate students only.

APPM 6900 (1-6) Independent Study

Introduces graduate students to research foci of the Department of Applied Mathematics.

Requisites: Restricted to graduate students only.

APPM 6930 (1-3) Professional Master's Culminating Experience

Provides an opportunity for an Applied Mathematics Professional Master's student to complete their Culminating Experience (CE) project with an advisor. Before enrolling, the student is expected to have an advisor who has agreed to guide a proposed CE project.

Requisites: Restricted to Applied Mathematics professional master's degree (AMEN-MSAM) students only.

Grading Basis: Letter Grade

APPM 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

APPM 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

APPM 7100 (3) Mathematical Methods in Dynamical Systems

Covers dynamical systems defined by mappings and differential equations. Hamiltonian mechanics, action-angle variables, results from KAM and bifurcation theory, phase plane analysis, Melnikov theory, strange attractors, chaos, etc.

Requisites: Requires prerequisite course of APPM 5460 (minimum grade D-). Restricted to graduate students only.

APPM 7300 (3) Nonlinear Waves and Integrable Equations

Includes basic results associated with linear dispersive wave systems, first-order nonlinear wave equations, nonlinear dispersive wave equations, solitons, and the methods of the inverse scattering transform. Department enforced prerequisites: APPM 4350 and APPM 4360.

Requisites: Restricted to graduate students only.

APPM 7400 (1-3) Topics in Applied Mathematics

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the core courses in applied mathematics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

APPM 7900 (1-3) Independent Study

Introduces graduate students to research foci of the Department of Applied Mathematics.

Requisites: Restricted to graduate students only.

APPM 8000 (1) Colloquium in Applied Mathematics

Introduces graduate students to the major research foci of the Department of Applied Mathematics.

Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8100 (1) Seminar in Dynamical Systems

Introduces advanced topics and research in dynamical systems.

Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8300 (1-3) Nonlinear Waves Seminar

Introduces the core methods in the analysis of nonlinear partial differential and integral equations or systems to graduate students. Provides a vehicle for the development, presentation, and corporate research of new topics in PDE and analysis.

Requisites: Requires prerequisite course of APPM 5440 (minimum grade D-). Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8400 (1) Mathematical Biology Seminar

Introduces advanced topics and research in mathematical and computational biology. Instructor consent required.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 8500 (1) Statistics, Optimization and Machine Learning Seminar

Research-level seminar that explores the mathematical foundations of machine learning, in particular how statistics and optimization give rise to well-founded and efficient algorithms.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APPM 8600 (1) Seminar in Computational Mathematics

Introduces advanced topics and research in computational mathematics.

Requisites: Restricted to Applied Mathematics (APPM) graduate students only.

APPM 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. No more than 10 credit hours may be taken in any one semester.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Arabic Languages (ARAB)

Courses

ARAB 1010 (5) Beginning Arabic 1

Introduces students to speaking, listening, reading, and writing skills in the standard means of communication in the Arab world. This course is proficiency-based. All activities within the course are aimed at placing the student in the context of the native-speaking environment from the very beginning.

Additional Information: Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 1011 (3) Introduction to Arab and Islamic Civilizations

Provides an interdisciplinary overview of the cultures of the Arabic-speaking peoples of Southwest Asia and North Africa from the rise of Islam in the 7th century to the present. Readings include historical, religious, literary and cultural texts from both the medieval and modern eras. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 1020 (5) Beginning Arabic 2

Continuation of ARAB 1010.

Requisites: Requires prerequisite course of ARAB 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 2110 (5) Intermediate Arabic 1

Proficiency-based course emphasizes speaking, listening, reading, and writing. Covers a variety of topics. Students give classroom presentations and write short essays in Arabic. Speaking ability is assessed through an oral proficiency interview.

Requisites: Requires prerequisite course of ARAB 1020 (minimum grade C).

Additional Information: GT Pathways: GT-AH4 - Arts Hum: Foreign Languages

Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Asia Content

ARAB 2120 (5) Intermediate Arabic 2

Continuation of ARAB 2110.

Requisites: Requires prerequisite course of ARAB 2110 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 2231 (3) Love, Loss and Longing in Classical Arabic Literature

Surveys Arabic literature from the sixth through the eighteenth centuries. It offers an introduction to Arabic literature, namely prose and poetry, through its key texts as well as the range of themes and techniques found in this literature, and it lays the groundwork for contextualizing the literature in the framework of other literary traditions. Taught in English.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 2320 (3) The Muslim World, 600-1250

Focusing on the history of the Muslim World in the age of the caliphates, this course takes an interdisciplinary, comparative approach to the development of Islamic society, focusing on social structure, politics, economics and religion. Students will use primary and secondary sources to write a research paper, and make in-class presentations to cultivate critical thinking, research and writing skills. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RLST 2320

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3110 (3) Advanced Arabic 1

Designed to train students further in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.

Requisites: Requires prerequisite course of ARAB 2120 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 3120 (3) Advanced Arabic 2

Continues training in the four language skills (writing, speaking, reading, listening/comprehension) at an advanced level. Enables students to acquire a better and broader understanding of Arabic culture and texts drawn from various genres of Arabic letters.

Requisites: Requires prerequisite course of ARAB 3110 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 3220 (3) Arabian Nights, Arabian Days: Popular Literature in the Arab World and Beyond

Explores the development of popular literature in Arabic, studying the Arabian Nights and related genres including tribal epics, poetry, and plays. We will interrogate the cultural, class, and textual boundaries between popular literature and courtly, elite works across time. We will also explore the modern, Western enterprise of ¿discovering¿ and engaging with Arabic literary works, examining how global excitement for texts like the Nights has created new possibilities for cultural production and exchange.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARAB 3221 (3) The Making of Middle Eastern Identities: Arabs and Their ¿Others¿

Who is ¿Arab,¿ anyway? When did Arabs first develop a sense of ethnic identity, and out of what raw materials did it grow and take shape? How did this identity play off of, merge with, or get challenged by contact with different peoples as the horizons of the Arab world grew and changed, and how does this manifest in literature and the historical record? This course offers a discussion-oriented, upper-level seminar that focused on sources in which the author, protagonists, or intended audience engage with ethno-racially non-Arab cultures.

Recommended: Prerequisite Intro to Religion or other course focusing on Islam and/or Middle Eastern history or culture.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARAB 3230 (3) Islamic Culture and the Iberian Peninsula

Examines Islamic, especially Arab, culture and history as it relates to the Iberian Peninsula from 92 Ah/711 Ce to the present. Taught in English.

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3231 (3) In the Footsteps of Travelers: Travel Writing in Arabic Lit

Offers an excursion into the role and significance of travel and travel writing in Arabic literature in translation. We will read and discuss a range of literary works written by, about, and for travelers. More broadly, this course will offer an opportunity for undergraduates to expand their understanding of literature and the arts. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3241 (3) Art in Islamic Cultures

Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 3241

Additional Information: Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

ARAB 3330 (3) The Arabic Novel

Focusing on the origins and development of the novel genre in the Arabic tradition, this course examines both the aesthetic qualities of the genre as an artistic form and the ways that it has depicted and intervened in the modern social, political, and cultural upheavals that have shaped the Arab world in the 20th century. Authors include Najib Mahfuz, Abd al Rahman Munif, Hanan al-Shaykh, and Ghassan Kanafani. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3331 (3) Arabic Poetry

Introduces students to the vibrant world of Arabic poetic production, which has defined the cultural landscape of the Arab world and the broader Middle East for over one thousand years and continues to play a central part in the Arabic literary scene today. Some of this poetry has been translated into English, and translated Arabic poetry will serve as our gateway to better understanding why poetry is the diwan, or record, of the Arabs.

ARAB 3340 (3) Representing Islam

Explores the cultural politics of representations of the Arab and Islamic worlds both with an emphasis on literary representations of the Islamic world in travel narratives and novels from both the West and the Arab world. Examines historical, anthropological, and visual texts to consider how Islam has been narrated in colonial European imaginings about the Islamic world as well as contemporary representations. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3350 (3) Narrating the City: Literary Mappings of the Urban Landscape

Examines literary narratives primarily from the Arabic tradition through focusing on the relationship of literature to the development and transformations of cities and urban spaces in the modern period. Begins with readings of 19th century European narratives that chronicle the changing space of the modern city followed by urban narratives from the Arabic literary tradition in order to comparatively examine how "universal" processes of modernization, development, and globalization in the modern world have been narrated. Writers include Mahfouz, Munif, al-Takarli, al-Aswani, Celik, Abu Lughod. Taught in English.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 3360 (3) Tradition, Authenticity, and Reform in Islam

Introduces students to the Islamic genre of hadith, or Prophetic traditions. The main concern of the course is to develop an understanding of how prophetic religious authority was understood and communicated in written form and what the relationship of the hadith form has been to alternative claims on prophetic authority in Islam. Finally, the course examines the role that the Prophetic hadith – and their contestation – have played in Islamic reform movements during the modern period.

Recommended: Prerequisite ARAB 1011.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARAB 3410 (3) Gender, Sexuality and Culture in the Modern Middle East

Examines the issues of gender and sexuality in the modern Middle East and North Africa from the colonial period to the present, focusing on how feminist movements, Arab women's writing, and constructions of gender and sexuality have been shaped by local, national and international factors. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: WGST 3410

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Arabic Courses in English

Departmental Category: Asia Content

ARAB 4200 (3) Advanced Readings in Arabic

Develops student proficiency and communication in modern standard Arabic at the advanced (4th year) level. Emphasis placed on developing reading comprehension, speaking, and writing skills.

Requisites: Requires prerequisite course of ARAB 3120 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 4250 (3) Arabic Media

Designed to provide students with advanced Arabic language skills for use in the media. By negotiating authentic materials in Arabic, students will gain a perspective on global issues in the Arab and Islamic world and will attain a better awareness of Arab and Islamic culture.

Requisites: Requires prerequisite course of ARAB 3120 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arabic

Departmental Category: Asia Content

ARAB 4840 (1-3) Independent Study

Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Arabic

Departmental Category: Asia Content

Architectural Engineering (AREN) Courses

AREN 1027 (3) Engineering Drawing

Introduces engineering drawing including sections and dimensioning, print readings, computer 3D, and building information modeling (BIM).

Requisites: Restricted to Engineering Physics (EPEN), Architectural (AREN), General Engineering (GEEN) or Civil (CVEN) Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

AREN 1316 (1) Introduction to Architectural Engineering

Surveys the broad subject of architectural engineering and professional practices. Includes professional design services, design documents, methods of construction delivery, materials for construction, codes and standards, life safety, professional ethics, structural systems, mechanical systems, electrical systems, and building systems integration.

Requisites: Restricted to students with 0-56 (Freshmen or Sophomore) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

AREN 2050 (3) Building Materials and Systems

Covers the broad subject of building materials and systems. Includes a practical approach to assembly details, methods of construction, codes, foundations, steel, concrete, masonry, cladding, doors and windows, interiors, finishes, mechanical, plumbing, electrical, life safety and conveyance. Includes investigation of an existing facility along with a team presentation trends in commercial building construction.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Civil (CVEN) or Architectural (AREN) or GEEN (General) or Applied Mathematics (AMEN) majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 2110 (3) Thermodynamics

Explores fundamental principles of thermodynamics, including first and second law of thermodynamics, thermophysical properties, power and refrigeration cycles, gas mixtures and psychrometrics.

Requisites: Requires a prereq course of PHYS 1110 (min grade C-) and a prereq or coreq course of APPM 1360 or MATH 2300 (min grade C-).

Restricted to AREN, CVEN, EVEN, GEEN, or AMEN majors only.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

Departmental Category: Building Systems Engineering

AREN 2120 (3) Fluid Mechanics and Heat Transfer

Explores fundamental principles of fluid mechanics and heat transfer.

Topics include fluid statics, momentum and energy conservations; laminar and turbulent viscous flows; conduction, convection and radiation heat transfer. Emphasizes topics and problems that are important to Architectural Engineers including flow of fluids in pipes and ducts, heat transfer in buildings and building systems.

Requisites: Requires corequisite courses of (APPM 2350 or MATH 2400) and (APPM 2360 or (MATH 2130 and 3430)) and prerequisite course of (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002) (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 2121 (1) Heat Transfer

This is an elective course for students who want to obtain an AREN BS degree and have taken Fluid Mechanics course but not heat transfer. This course will fulfill their curriculum requirement and allow them to take the following courses that require heat transfer knowledge. Previously offered as a special topics course.

Requisites: Requires corequisite courses of (APPM 2350 or MATH 2400) and (APPM 2360 or (MATH 2130 and 3430)) and prerequisite course of (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002) (all minimum grade C-). Restricted to College of Engineering majors only.

AREN 2830 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Special Topics

AREN 3010 (3) Energy Efficient Buildings

Lecture course on the analysis and design of buildings and their systems to satisfy the requirements for a comfortable and healthy indoor environment. Examines psychrometrics, thermal comfort, building heating and cooling loads, fluid flow basics, and HVAC components and systems.

Requisites: Requires prerequisite courses of AREN 2120 or MCEN 3021 and 3022 and AREN 2050 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 3040 (3) Circuits for Architectural Engineers

This course will cover the basics of DC and AC circuit theory relevant to the modeling, design, and control of residential and commercial building systems, including Kirchhoff's laws, Thevenin/Norton theorems, transient analysis of DC systems, three phase analysis, induction and synchronous motors, AC power (including real and reactive power analysis), power factor correction, and transformers.

Requisites: Requires prerequisite courses of (APPM 2360 or (MATH 2130 and 3430)) and PHYS 1120 (all minimum grade C-). Restricted to AREN, CVEN, and EVEN majors only.

AREN 3080 (3) Architectural Design Studio 1

Learn about the fundamentals of architectural design and the ways in which it compliments architectural engineering. This introductory studio welcomes students to explore the strategies and techniques through which architects design and communicate. As a studio, the course culminates in a small-scale architecture project through which students will explore and become trained in the architectural design process.

Requisites: Requires prerequisite of AREN 1027 (minimum grade C-). Restricted to Sophomores, Juniors, and Seniors.

AREN 3140 (3) Illumination Laboratory

Introduces the measurement of photometric and psychophysical quantities used in lighting. Experience is acquired in using light measurement instruments to evaluate lighting equipment and luminous environments. Taught intermittently.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 3430 (3) Architectural (Interior) Lighting Design

Studies the fundamentals of architectural illumination with an emphasis in design and application. Introduces and applies basic principles and vocabulary to problems in the lighting of interior environments for the performance of visual work, the proper interaction with architecture, and compliance of energy requirements.

Requisites: Restricted to sophomore and above ENVD majors only.

AREN 3440 (3) Architectural Daylighting Design

Enables students to develop sufficient working facility with the core principles and practices of architectural daylighting to allow for meaningful integration into future design work. Students work in active project-based environments to explore both quantitative and qualitative aspects of primary daylighting issues and precepts. Previously offered as a special topics course.

Requisites: Restricted to sophomore and above ENVD majors only.

Recommended: Prerequisite AREN 3430.

AREN 3540 (3) Illumination I

Studies the fundamentals of architectural illumination. Introduces and applies basic principles and vocabulary to elementary problems in the lighting of environments for the performance of visual work and the proper interaction with architecture.

Requisites: Requires prerequisite courses of (CHEN 1310 or CSCI 1300 or ASEN 1320 or ECEN 1310) and (APPM 2350 or MATH 2400) (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4010 (3) Energy System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5010

Requisites: Requires prerequisite course of AREN 4110 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4080 (2) Architectural Design Studio 2

Provide an architectural design studio to accompany the integrated capstone design experience for architectural engineering students. In teams, students will build upon their architectural design knowledge to define the architectural program, analyze the site, and produce a schematic level architectural design for a commercial building.

Requisites: Requires prerequisite of AREN 3080 (minimum grade C-) and corequisite of AREN 4318.

AREN 4110 (3-4) HVAC System Design

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5110

Requisites: Requires prerequisite course of AREN 3010 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4130 (3) Optical Design for Illumination and Solid State Lighting

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5130

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4315 (3) Design of Masonry Structures

Covers modern masonry construction; properties and behavior of the reinforced masonry component materials, clay and concrete masonry units, mortar, grout, and steel reinforcement; vertical and lateral load types and intensities; and design of reinforced masonry walls, beams and columns by the strength design method.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

AREN 4318 (3) Architectural Engineering Design 1

Provides a capstone experience to AREN students. Students design a modest commercial building and complete an integrated engineering design of the building systems executed for the conceptual and schematic design phases. Students' teams work on structural, mechanical, electrical/lighting, and construction engineering management design. Each stage produces a professional-quality design document. Faculty and industry mentors participate in the teaching and evaluation.

Requisites: Requires Prerequisites of AREN 4110 or AREN 4506 or CVEN 4545 or CVEN 4555 (all minimum grades C-). Requires Co-requisites of AREN 4080 and AREN 4570.

AREN 4319 (2) Architectural Engineering Design 2

Continues the capstone experience for AREN students. Student teams continue their design of a modest commercial building through the Design Development phase with support from faculty and industry mentors. Additionally, topics of professionalism, engineering ethics, and life-long learning are covered.

Requisites: Requires prerequisites AREN 4318 and AREN 4080 (both minimum grade C-).

AREN 4440 (3) Lighting Design Capstone

Synthesizes and applies knowledge and skills from previous lighting design courses in the Lighting Design Certificate. Students work on a real-world lighting design project following industry-standard phases of design while learning about lighting design professional practice, current design topics, trends, and industry issues.

Requisites: Requires prerequisites of AREN 3430, 3440, and 4530 (all minimum grade C). Restricted to students in the Lighting Design Certificate (LGHT-CERU plan).

AREN 4506 (3) Pre-construction Estimating and Scheduling

Covers project management estimating and scheduling methods with an emphasis on the techniques used to create pre-construction estimates and schedules for architectural and civil engineering projects.

Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Architectural (AREN), Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

AREN 4530 (3) Advanced Lighting Design

Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course.

Requisites: Requires prerequisite courses of (AREN 3540 and AREN 4550) (all minimum grade C-) or AREN 3430 (minimum grade C). Restricted to AREN majors or students in the Lighting Design Certificate (LGHT-CERU).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5540

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Recommended: Prerequisite AREN 4550.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4550 (3) Illumination 2

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4560 (3) Luminous Radiative Transfer

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5570

Requisites: Requires prerequisite course of AREN 3040 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar and sky modeling, luminous radiative transfer, design methods, and controls for integration with electric lighting systems.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4590 (3) Computer Graphics in Lighting Engineering

Studies the numerical methods and computer implementation of computer graphics visualization for architectural lighting engineering and design. Implements finite element radiative transfer and ray-tracing in computer programs. Studies the use of computer graphics visualization in lighting analysis. Taught intermittently.

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4560 (minimum grade C-).

Additional Information: Departmental Category: Building Systems Engineering

AREN 4606 (3) Construction Project Execution and Control

Integrates project execution and control techniques for construction scope, cost and schedule. Includes progress measurement, resource planning, earned value methods, productivity, risk management methods and key contract clauses.

Requisites: Requires prerequisite courses of CVEN 3246 and AREN 4506 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Architectural (AREN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

AREN 4620 (3) Adaptive Lighting Systems

Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5620

Requisites: Requires prerequisites AREN 3540 and AREN 4550 (both minimum grade C-).

Recommended: Prerequisite AREN 4130.

AREN 4830 (1-3) Special Topics for Seniors/Grads

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Special Topics

AREN 4849 (1-3) Independent Study

Offers an independent, in-depth study, research or design in a selected area of architectural engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

AREN 4890 (3) Sustainable Building Design

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5890

Requisites: Requires a prerequisite course of AREN 3010 (minimum grade C-). Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering students only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 4990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

Equivalent - Duplicate Degree Credit Not Granted: AREN 5990

Requisites: Requires prerequisite courses of AREN 2120 and (APPM 2360) or (MATH 2130 and 3430)) (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) College of Engineering majors only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5001 (3) Building Energy Systems: Thermal, Electrical & Lighting Sys

Prepares graduate students with general knowledge and skills that are required by advanced AREN technical courses. Covers three parts of materials: 1) building thermal systems, 2) building lighting systems, 3) building electrical systems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Building Systems Engineering

AREN 5010 (3) Energy System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4010

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 4140.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings.

Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5050 (3) Advanced Solar Design

Predicts performance and analyzes economics of low-temperature, high-temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5060 (3) Distributed Electricity Generation

Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Building Systems Engineering

AREN 5070 (3) Thermal Analysis of Buildings

Examines response factors, conduction transfer functions and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal gains and infiltration analysis as modeled in hourly simulations. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure.

Requisites: Requires prerequisite course of AREN 4110 or AREN 5110 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5110 (3-4) HVAC System Design

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4110

Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5130 (3) Optical Design for Illumination and Solid State Lighting

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4130

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3540.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5510 (3) Architectural Lighting I

Teaches the fundamentals of architectural lighting systems and the human responses to those systems. Describes the properties of light sources, how light interacts with architectural elements, and how light affects human visual and non-visual responses. Provides a broad overview of the holistic effects of light on building occupants, as well as the implications for building energy use and sustainability. Previously offered as a special topics course.

Requisites: Restricted to non-degree (NDGR) graduate students only.

AREN 5520 (3) Architectural Lighting II

Builds on the fundamentals taught in AREN 5500 with a detailed look at how technical information about lighting systems can be used for design concepts and analyses. Provides an examination of daylighting in buildings. Describes the latest research and design standards for color rendering, glare, flicker, circadian rhythms, and alerting effects. Concludes by considering case studies of various project types.

Requisites: Open to Non-degree, Non sponsored Students only.

AREN 5530 (3) Architectural Lighting Capstone

Concludes the nine-credit Professional Graduate Certificate in Architectural Lighting with an immersive hands-on experience. Concepts learned in the two prior online courses will be demonstrated and experienced using facilities and equipment available on the CU Boulder campus. A culminating, comprehensive project submittal that includes content developed during the entire three-course sequence will be submitted following the on-campus experience.

Requisites: Requires prerequisite courses of AREN 5510 and AREN 5520 (all minimum grade C-). Restricted to non-degree (NDGR) graduate students only.

AREN 5540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4540

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites AREN 3540 and AREN 4550.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4570

Requisites: Requires prerequisite course of AREN 5001 (minimum grade D-).

Recommended: Prerequisite AREN 3030.

AREN 5580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

AREN 5620 (3) Adaptive Lighting Systems

Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4620

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4550 (minimum grade D-).

Recommended: Prerequisite AREN 4130.

AREN 5650 (3) Forensic Engineering

Identify and explore the physical, chemical, mechanical, and biological deterioration mechanisms in the most common construction materials; concrete, masonry, metals, wood, polymers, and fiber-reinforced composites. Course topics include an introduction to failure analysis; materials science; ion diffusion; electrochemistry (corrosion); fracture, fatigue, and creep; and diagnostic, retrofit, and rehabilitation strategies for extended service life.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

AREN 5660 (3) Embodied Carbon in Buildings

Introduces students to whole building life cycle assessment (LCA) and embodied carbon in buildings. Topics include LCA methodologies, whole-building LCA tools, materials science of low-carbon and carbon-storing building materials, and strategies for reducing embodied carbon.

Requisites: Restricted to graduate students only, or BAM students with C-AREN, C-CVEN, or C-ARENCVEN subplan.

AREN 5830 (1-3) Architectural Engineering Special Topic

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

AREN 5849 (1-3) Independent Study in Architectural Engineering

The topics and the goals of this course are tailored to fit the needs of the student in various areas related to the Architectural Engineering program. These topics and goals, documented in the course agreement form at the start of the semester, include but are not limited to areas of building energy engineering, building illumination systems, construction engineering and management, building materials and resources, and building electrical systems.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

AREN 5890 (3) Sustainable Building Design

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4890

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4990

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites AREN 2120 and APPM 2360.

Additional Information: Departmental Category: Building Systems Engineering

AREN 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Building Systems Engineering

AREN 6950 (1-6) Master's Thesis

Additional Information: Departmental Category: Building Systems Engineering

AREN 6960 (1-3) Master's Report

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Building Systems Engineering

AREN 8990 (1-10) Doctoral Dissertation

A minimum of 30 credit hours is required.

Additional Information: Departmental Category: Building Systems Engineering

Architecture (ARCH)

Courses

ARCH 2100 (6) Studio 1: Foundations of Architecture

The beginning of the architectural specialization sequence, this course introduces students to the basic strategies and techniques of architectural design. This studio focuses on concepts of medium-scale building design, siting, and climate. Through multiple design exercises, students learn how these factors assist in shaping buildings.

Requisites: Requires prerequisite course of ENVD 1120 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

Recommended: Corequisite ARCH 2115.

ARCH 2115 (3) Architecture Materials and Methods

An introduction to both standard and innovative building materials this course exposes students to the elements and processes used to in constructing buildings. Through lecture, technical drawing, material research and exposure to practicing professionals, students build a foundation of knowledge necessary to approach the specification and design of materials as well as to foster a curiosity in the innovative frontiers of assembly, aesthetics and sustainable life-cycle considerations.

Requisites: Restricted to Program in Environmental Design (ARPLU) students.

Recommended: Corequisite ARCH 2100.

ARCH 3100 (6) Studio 2: Intermediate Architecture

Dealing with problems at an intermediate level of complexity this architecture studio emphasizes the interaction of form, programmatic use, human behavior and context in creating structure. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Students work across analog and digital platforms to produce high quality and portfolio-worthy work.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARCH 2100 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

Recommended: Corequisite ARCH 3114.

ARCH 3114 (3) History and Theory of Architecture 1

Focusing on buildings, this lecture is a survey of the built environment starting with some of the first structures built by humans and moving through time to the Industrial Revolution. The course focuses on the development of major styles, influential people, and the drivers of building form.

Requisites: Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to Program in Environmental Design (ARPLU) students or restricted to Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).

Recommended: Corequisite ARCH 3100.

ARCH 3214 (3) History and Theory of Architecture 2

Picking up after the Industrial Revolution and continuing through to today's Contemporary Architecture this course is the sequel to History and Theory I. History be taught thematically and cover important structures, key figures, and movements that have shaped our modern world.

Requisites: Requires prerequisite course of ENVD 1024 (minimum grade C-) and restricted to Program in Environmental Design (ARPLU) students or restricted to Architectural Engineering (AREN) majors only with 57-180 credits (Junior or Senior).

Recommended: Prerequisite ARCH 3114 with a C- or better.

ARCH 4010 (5) Architectural Appreciation and Design

Introduces basic processes and principles of architectural design.

Provides a basis for understanding and evaluating architecture.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Architectural Engineering (AREN) majors only.

ARCH 4100 (6) Studio 3: Capstone in Architecture

The capstone of the studio sequence, this course investigates building technology, structural systems, user experience, and environmental sustainability. Studio options may include a client-based community engaged project, real world applications, and/or result in a physical product. Outcomes include well developed structures designed with a high level of craft, resulting in sophisticated and exhibit-worthy presentations.

Requisites: Requires prerequisite course of ARCH 3100 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

ARCH 4115 (3) Architecture Building Technology

Through experimentation and testing, the fundamentals of building physics and climate science are taught in this interactive seminar. Students learn the concepts related to structural and mechanical systems necessary for proper building function by first studying and then implementing the key systems through hypothetical building assignments. This class covers active and passive green building systems that are necessary when designing structures for an evolving climate.

Requisites: Requires prerequisite course of ARCH 2115 or ENVD 3115 (minimum grade C-). Restricted to Program in Environmental Design (ARPLU) students.

Art Film Studies (ARTF)

Courses

ARTF 5000 (3) Advanced Digital Postproduction

Explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio and optical effects treatments.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4000

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5003 (3) Film and Literature

Explores similarities and differences between literature and film as narrative arts. Studies novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4003

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4004 and HUMN 4004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of CINE 3051 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5010 (1-3) Topics in Film Production

Prepares students for advanced cinema production courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4010

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5013 (3) Film, Photography and Modernism

Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4013

Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).

Recommended: Prerequisite FILM 3051.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5021 (3) Directing/Acting for the Camera

Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4021

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4023

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to graduate students only.

Recommended: Prerequisites CINE 3051 and CINE 3061.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4024

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CINE 3051 and CINE 3061.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5040 (3) Advanced Analog Alchemy

Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4040

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Art Practices (ARTF) students only.

ARTF 5043 (1-3) Topics in Cinema Critical Studies

Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4043

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5105 (3) Advanced Screenwriting

Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4105

Recommended: Prerequisites CINE 3051 and CINE 3061.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5200 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ATLS 5151

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5400 (3) Digital Post-Production

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4400

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5453 (3) History of Avant-Garde Film

Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4453

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5500 (3) Cinema Production 2

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4500

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5604 (3) Colloquium in Film Aesthetics

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.

Equivalent - Duplicate Degree Credit Not Granted: FILM 4604

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5610 (3) Image-makers Graduate Seminar

Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5717 (1-3) Graduate Studio Critique

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5846 (1-3) Graduate Independent Study-Video

Participate in graduate independent study.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 5857 (1-3) Graduate Independent Study

Participate in graduate independent study.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

ARTF 6959 (1-6) Master's Thesis

Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAM in Cinema Studies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTF 5004 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Film Courses

Art History (ARTH)

Courses

ARTH 1300 (3) History of World Art 1

Surveys major art styles from the Paleolithic period through the Renaissance, including European, Asian, and the Pre-Columbian/Islamic world. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 1400 (3) History of World Art 2

Surveys major art styles from about 1600 to the present, including Europe, Asia, the Islamic world, the Americas and Africa. Emphasizes comparison of Western and non-Western visual expressions as evidence of differing cultural orientations.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 1500 (3) Global Art and Visual Culture

Introduces critical issues in the study and interpretation of the arts and visual cultures of Africa, the Americas, Asia, Europe, and Oceania. This course serves as a complement to U.S. Art Across Cultures (ARTH 1600). Themes explored include the conceptual and social status of the artist, cultural exchange, the environment, gender, and power. In lecture and in recitations sections, you will be introduced to methods of object-based research and principles of museum exhibition curation. You will leave this class with an understanding of key concepts and methods in the history of art, as well as familiarity with an array of global visual cultures.

Recommended: Corequisite ARTH 1600.

Additional Information: Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Arts Humanities

ARTH 1509 (3) Trash and Treasure, Temples and Tombs: Art and Archaeology of the Ancient World

Introduces the art and archaeology of ancient Egypt, Mesopotamia, Greece and Rome, examining various ancient approaches to power, religion, death and the human body. Analyzes art, architecture and everyday trash to learn about ancient humanity.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 1509

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Additional Information: Arts Sci Core Curr: Historical Context

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Art History

ARTH 1600 (3) U.S. Art Across Cultures

Examines historical and contemporary issues in American arts and visual culture, emphasizing issues of race, gender, class, cross-cultural interactions, diversity of artistic traditions, and the global position of the United States in the modern world. We will focus on key monuments, objects, artists, and concepts relevant to the American context and impactful across geopolitical borders, ethnic groups, and genders.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective

ARTH 1709 (3) Freshmen Seminar: Critical Introduction to Art History

Provides a broad introduction to understanding and appreciating art and art history within a critical lecture seminar and discussion format. The focus of this course is a selected Particularity directed to nonmajors.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2029 (3) Art and Archaeology of Ancient Egypt

Emphasizes the origin of the Egyptian culture, its importance and its impact on other cultures. In addition, the different points of view of various scholars are discussed with a comparative study of the ancient Egyptian culture and modern culture of Egypt and the Middle East. Formerly ANTH 1160.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2029

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 2039 (3) Greek Art and Archaeology

Covers prehistoric Aegean through the fourth century B.C.E., considering architecture, pottery, painting, sculpture, and personal ornament. Societal customs such as use of space and burial patterns are considered as well as art and its uses, to help understand developments in Greek culture.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2039

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2049 (3) Introduction to Roman Art and Architecture

Introduces the monuments and sites of the ancient Roman world from the foundation of Rome (753 B.C.E.) to Constantine (306-307 C.E.). Emphasizes the relationship of art, architecture, and artifacts to the political, social, and religious institutions of Italy and the provinces.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 2049

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 2409 (3) Intro to Asian Art

Designed for those having no previous experience in the study of Asian art. Traces development of sculpture, painting, architecture, and the other visual arts of South Asia, the Far East, and Southeast Asia, with a synopsis of developments from 1453 through the 18th century.

Additional Information: GT Pathways: GT-AH1 - Arts Hum: Arts Expression
Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 3009 (3) Critical Thinking in Art History

Through structured discussions, selected readings, and written assignments provides an understanding of how art history has evolved as an academic discipline and how art historians evaluate complex issues of style, form, content, and theory in the visual arts.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3019 (3) Pompeii and the Cities of Vesuvius

Introduces the towns and villas buried by the eruption of Mt. Vesuvius in 79 C.E. Explores the layout and decoration of ancient Roman houses, the variety of artifacts uncovered as evidence for daily life and the history of the excavations.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 3019

Additional Information: Arts Sci Core Curr: Historical Context
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3079 (3) Medieval Art Survey

Surveys the history of Western art from Constantine to around the year 1300, including Carolingian, Ottonian, Anglo-Saxon, Romanesque, and Gothic. Considers "Barbarian," Byzantine, and Islamic influences.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3109 (3) Art in Contemporary Society

Examines writings by philosophers and art critics as they address the question: What is art for? Readings focus on the 19th and 20th centuries, including current theories and some non-Western theories. Students are encouraged to develop their own responses to the question.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3209 (3) Art, Culture, and Gender Diversity, 1400--1600:**Renaissance Art Out of the Canon**

Studies the rising status of painting, sculpture, and architecture in Europe and how Europeans perceived non-Western art during the early modern period. Introduces history of race/ethnicity, gender, and class concerns embodied in the European category visual arts. Emphasizes new methods for interpreting history without imposing Eurocentric viewpoints.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 3241 (3) Art in Islamic Cultures

Offers an overview of art in Islamic cultures. Discusses a range of literary texts and images in order to understand these cultures. Offers an opportunity for undergraduates to expand their understanding of literature and art history. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: ARAB 3241

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3329 (3) Art in France: Revolution to 1870

Covers major art movements and theories in France from 1793 to 1870 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.

Recommended: Prerequisites ARTH 1300 and second semester sophomore, junior or senior standing.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3339 (3) Art in France: 1870-1970

Covers major art movements and theories in France from the Paris Commune through 1970 on location in Paris. Students study ceramics, painting, sculpture, photography and some architecture. Political and cultural events are considered for their influence on art: excavations at Pompeii, colonial expansion in Middle East and Africa, influx of Asian art, exploration of Americas and various technical inventions.

Recommended: Prerequisite ARTH 1300 and second semester sophomore, junior or senior standing.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3359 (3) Art in Spain: Goya to 1900

Explores the scope of Goya's works in context of his contemporaries and antecedent, Velazquez; Moorish influences, genre painting costumbrismo, Romanticism and historical narratives are considered in relation to Enlightenment ideals, French Neoclassicism, Romanticism, Orientalism and the Napoleonic invasion. Teaching occurs mostly on site: Alhambra, Prado, Bellas Artes, Palacio Real, Museo de Romanticismo; seminars and tests are in Madrid classrooms.

Recommended: Prerequisite ARTH 1300.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3369 (3) Art in Spain: 1900-1990

Covers Gaudi, Picasso and artists of Modernismo movement as well as Dali are studied in Barcelona; Dada and Surrealism are explored through works of Picasso, Gonzalez, Gris, Varo, Dali, Bunuel and others. Photography and film of Spanish Civil War and thereafter are studied in seminar in Madrid classroom; students experience flamenco performances and Q&A with performers. Tests administered in class.

Recommended: Prerequisite ARTH 1300.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3419 (3) Modern Art Survey

Surveys the loss of beauty in art and discusses whether or not that loss is regrettable. Questions the function and historical meaning of modern and postmodern art: is it all hype and strategic positioning by artists for fame and fortune? Is it serious? Are the fine arts still fine?

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 3509 (3) American Art

Surveys American art and material culture from the precolonial era to the present day. Considers cultural and artistic interaction, ethnic expressions, patronage, European and non-Western influences, and the struggle to develop a uniquely American artistic identity.

Additional Information: Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 3519 (3) Modern Architecture, 1780--1960

Introduces the major movements and developments in European and American architecture from Neoclassicism to Postmodernism. Considers the impact of exhibitions, expositions, and vernacular architecture.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 3539 (3) Contemporary Art

Examines contemporary art and theory in the transition from modern to postmodern expression. Discusses painting, sculpture, installations, performance, video, photography, and architecture with attention to historical context and criticism. Considers neoexpressionist, feminist, minority, political, and public art.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 3619 (3) The Arts of China

Surveys Chinese painting, sculpture, architecture, and other arts from neolithic to modern times.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

Departmental Category: Asia Content

ARTH 3629 (3) The Arts of Japan

Offers an appreciation and chronological development of the arts of Japan. Emphasizes the arts of Shintoism and Buddhism as well as the particular Japanese aesthetic from prehistoric times to the present.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

Departmental Category: Asia Content

ARTH 3719 (3) History of Media Arts

Surveys the development of technological media both as sources of information and as art. Photography and related media, film, video, holography, and electronic imaging systems are surveyed as art and as technologies, emphasizing major artists, movements, exhibitions, and other productions in the 19th and 20th centuries.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 3729 (3) Foundations in Latin American Art

Examines Latin America's cultural pluralism and visual production beginning in Pre-Colombian times and following through to the present day. Considers the various functions of art as well as the relationship between objects, artists, and the cultures from which they come.

Focuses on how visual objects and images communicate across cultures including in times of political and social conflict. Provides students with a broad frame of reference for many historical periods, cultural/ethnic groups, and equips students to evaluate images and objects and their proper cultural contexts.

Recommended: Prerequisites ARTH 1500 and/or ARTH 1600.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 3929 (1-3) Special Topics in Art History

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4029 (1) Art History Research Methods

In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.

Equivalent - Duplicate Degree Credit Not Granted: LIBR 4029 and ARTH 5029

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4069 (3) Medieval Manuscripts

Surveys decorated books from late antiquity to the advent of the printing press. Examines the various roles manuscripts played within different medieval communities.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4089 (3) Romanesque and Gothic Art

Examines major artistic trends in Europe between the years 1000 and 1300, a period that witnessed, among others, the development of gothic cathedrals and the rise of the professional artist. Particular attention will be given to exchange with other cultures.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4099 (3) Ancient Greek Sculpture

Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5099, CLAS 4099 and ARTH 5099

ARTH 4109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5109 and CLAS 4109 and CLAS 5109

Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4119 (3) Roman Sculpture

Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5119 and CLAS 4119 and CLAS 5119

Recommended: Prerequisite ARTH 1300 or CLAS 2049.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4129 and ANTH 5129 and CLAS 4129 and CLAS 5129

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5139 and CLAS 4139 and CLAS 5139

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and CLAS 5149

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5169 and CLAS 4169 and CLAS 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4189 (3) Medieval Art

Focuses on one area of medieval art. Topics vary, but may include Carolingian, Ottonian, Romanesque, or Gothic art. Emphasizes critical thinking, methods of scholarly research, and development of writing skills.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4199 (3) Roman Architecture

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and CLAS 5199

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4209 (6) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and CLAS 5209

Repeatable: Repeatable for up to 12.00 total credit hours.

Recommended: Prerequisites CLAS 1509 or ARTH 1509 or CLAS/ARTH 2039 or CLAS/ARTH 2049.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 4420.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5229 and CLAS 4229 and CLAS 5229

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5269 and CLAS 4269 and CLAS 5269

Recommended: Prerequisite CLAS 1509 or ARTH 1509.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History
Departmental Category: Asia Content

ARTH 4279 (3) Michelangelo (1475-1564)

Focuses on Michelangelo's long career, marked by outstanding achievements in sculpture, painting, architecture and poetry. Emphasizes his projects and achievements in light of 16th century artistic theory, including relationships to his contemporaries in the arts and literature.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4309 (3) Neoclassicism and Romanticism: 1760-1840

Surveys painting and sculpture in England and France from the last quarter of the 18th century through the first half of the 19th century.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4319 (3) European Art from 1830 to 1886

Surveys the major movements in painting in France and England from the Revolution of 1830 to the impressionist crisis of 1886. Emphasizes and discusses painting and major expressions in sculpture and architecture.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4329 (3) Modern Art 1

Provides an in-depth study of the fin de siècle, stressing postimpressionism, art nouveau and symbolism. Concludes with fauvism in France and the expressionist movement in Germany.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4339 (3) Modern Art 2

Begins with early Picasso and cubism, including analytic and synthetic cubism and emphasizing the various isms of the 20th century. Also studies Italian futurism, de Stijl and the Bauhaus, dada and surrealism.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4419 (3) The Arts of Colonial Mexico and Peru

Examines important works, artists, and themes that comprise the artistic production of colonial Mexico and Peru. Focuses on the intermingling, convergence, and conflict of European, Amerindian, Creole, mestizo, and African groups, which established the foundation of Latin America's cultural pluralism.

Recommended: Prerequisites ARTH 1500, ARTH 1600, ARTH 3729.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4449 (3) Arts of India and Southeast Asia

Surveys Indian painting, sculpture and architecture from its earliest phases in the Indus Valley through the Mughal Empire. Encompasses Hindu, Buddhist and Islamic art of the subcontinent and Southeast Asia, as well as Himalayan cultures directly impacted by India's artistic legacies. Department enforced prerequisite: one 3000-level art history course (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4459 (3) Precolumbian Art of Mesoamerica

Introduces students to the art, architecture, and cultures of Mesoamerica, a region that encompasses modern-day Mexico, Guatemala, Belize, and parts of El Salvador, and Honduras. Focuses on major Pre-Columbian art objects and monuments to learn about the societies and cultures from which they came. Also considers the various roles that the visual arts and architecture played in these societies. Covers Olmec through Aztec civilizations.

Recommended: Prerequisite ARTH 3729.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4559 (3) Twentieth-Century Architecture

Examines the major movements and development in European and American architecture, 1900-1960's. Considers the major styles, as well as cultural interactions, race/ethnicity, gender and class concerns as they relate to both the practice and profession of architecture.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4569 (3) United States Architecture

Examines architecture as it developed in the area now defined as the continental United States from early cultures to the present. Considers the major styles and issues of cultural interaction, race/ethnicity, gender and class concerns as they relate to the practice, theory, and profession of architecture.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4599 (3) Contemporary Architecture

Examines the history and theory of contemporary architecture. In the field of architecture, theory and history differ in that the former describes and analyzes past work, while theory offers alternative solutions or new strategies for approaching the discipline. Both of these components are key to understanding contemporary architecture, and this course will work between the two modes of understanding.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4609 (3) Critical Issues in Photography

Examines the history and theory of photography and the relationship of photography to the other arts, as well as to literary, political, social and philosophical issues. Analyzes the critical issues that inform photography through the writings of critics, historians, and photographers using both thematic and chronological approaches.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4639 (3) Manet Seminar

Introduces current Manet studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles. Fulfills requirement for ARTH 4919, Capstone Seminar.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4649 (3) Impressionism & Post-Impressionism

Fosters creative study of the background and foundation in modern art. Considers 19th-century European painting and, to a lesser degree, sculpture, in relation to social, cultural, and political history from 1863 to 1900. Focuses on France, but gives attention to other countries as well.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4669 (3) Romanticism & Realism

Fosters creative study of the background and foundation of modern art. Considers 19th-century European (and, to a lesser degree, American) painting and sculpture in relation to social, cultural, and political history from 1789 (the French Revolution) to 1863 (the Salon des refusés). Focuses on France, but gives attention to other countries as well.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4689 (3) Post-Impressionism Seminar

Introduces current Post-Impressionism studies and research methods by drawing upon recent books, exhibition catalogues, and scholarly journal articles.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4699 (3) The Idea of Art

Studies contemporary critiques of historical ideas about the twin institutions of the university and the museum and the role of art history in the cultural mission of both. Explores fundamental questions about the role of art in society through weekly discussions of readings, a class presentation, and final research. Fulfills ARTH 4919 capstone seminar required for art history majors.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4739 (3) The Intellectual Roots of Italian Renaissance Art

Studies critical issues raised in the literature on art, focusing on Renaissance interpretations of key historical themes such as imitation and decorum. Carefully examines the language used in primary sources (available in English).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4749 (3) Italian Renaissance Art: Studies in the Exchange between Theory and Practice

Addresses how artists developed new compositional procedures, graphic techniques and audiences, and how these procedures were theorized in an age when artists' intellectual and social status rose dramatically. Explores reception of new graphic technology. Studies specific commissions and primary texts in depth.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4769 (3) Gender Studies in Early Modern Visual Culture

Examines 15th and 16th century European ideas about women from a variety of feminist perspectives. Focuses on recent contributions to history of women as they intersect with the visual arts.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4769

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective
Departmental Category: Art History

ARTH 4909 (1-3) Independent Study---Art History

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Art History

ARTH 4919 (3) Capstone Seminar: Topics in Art History

Seminar course dealing with selected areas or problems within the history of art. Consult current online Schedule Planner for seminar topic.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Art History

ARTH 4929 (1-3) Special Topics in Art History

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5929

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Art History

ARTH 4939 (3-6) Art Museum Internship

Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5939

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 4959 (3) Art History Honors Thesis

May be elected during the final semester. Consists of a substantial, original written thesis. Requires faculty sponsorship. Does not guarantee a student will receive honors.

Additional Information: Arts Sciences Honors Course

Departmental Category: Art History

ARTH 5029 (1) Art History Research Methods

In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and LIBR 4029

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5099 (3) Ancient Greek Sculpture

Understanding the Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4099, CLAS 4099, and CLAS 5099

Grading Basis: Letter Grade

ARTH 5109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and ARTH 4109 and ARTH 5109

Additional Information: Departmental Category: Art History

ARTH 5119 (3) Roman Sculpture

Examines ancient Roman sculpture with emphasis on the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4119 and CLAS 4119 and CLAS 5119

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4139 and CLAS 4139 and CLAS 5139

Additional Information: Departmental Category: Art History

ARTH 5159 (3) Hellenistic Art and Archaeology

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5159

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4169 and CLAS 4169 and CLAS 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periclean period, considering ways in which it developed from earlier times and influenced later ones in Athens.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5179

Additional Information: Departmental Category: Art History

ARTH 5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescos and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 5189

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4229 and CLAS 4229 and CLAS 5229

Additional Information: Departmental Category: Art History

ARTH 5269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4269 and CLAS 4269 and CLAS 5269

Additional Information: Departmental Category: Art History
Departmental Category: Asia Content

ARTH 5909 (1-3) Graduate Independent Study---Art History

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5929 (1-3) Special Topics in Art History

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4929

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 5939 (3-6) Art Museum Internship

Focuses on opportunities at the Denver Art Museum, working with individual curators and master teachers in selected areas, such as audience interpretation, interpretive research files, and public school curriculums. Introduces students to the professional culture and activities of art museums.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 4939

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Art History

ARTH 5949 (3) Visiting Scholars Seminar

Brings speakers to campus to work with seminar students, usually four guest scholars per semester, subjects vary. Students read scholar's work and discuss methodological issues. Focuses on the research and insight of scholars who are currently shaping the field and defining research agendas. Required for all MA art history students, open to others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 5959 (3) Introduction to Critical Theory for Visual Studies

Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly discussions leading to research papers, presentations, and projects. Class fulfills critical theory requirement for MFA and MA students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and HIST 6150 and ANTH 6150

Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6559 (3) Power & Visuality After the Conquest

Examines how artistic production was informed by, and participated in, Latin America's colonial experience (16th to 19th centuries). With a critical eye and decolonial approach, students examine the complex strategies and objectives of visual culture in an ethnically/racially diverse colonial setting. Focus on historiography, visual culture, artists, patrons, hybridity, extinction, conquest, conversion, materiality, literacy, and global networks. Emphasis on colonial Mexico and Peru and their Indigenous populations. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

ARTH 6929 (3) Seminar: Theories of Art History

Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. Required for MA (art history) students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 6939 (3) Graduate Seminar: Open Topics in Art History

Subjects and topics vary.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.

Additional Information: Departmental Category: Art History

ARTH 6949 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Art History

ARTH 6959 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art History

ARTH 6969 (1-6) Master's Project (Art History)

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Art History

ARTH 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 60.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students in the AAAH-PHD program, and who have completed a minimum of 30 credit hours.

Art Studio and Non-Studio (ARTS) Courses

ARTS 1002 (3) Beginning Drawing 1

Formal visual elements are presented through a study of spatial relationship. Built around a series of related problems, each of which is designed to develop fluency in drawing, offer experience in handling media, foster self-confidence and promote an understanding of the visual elements and their role in the development of pictorial space.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1003 (3) Printmaking for Non-Majors

Emphasizes processes involved with both nonmultiple and multiple methods, including but not limited to metal plate etching (intaglio), lithography, collagraph, woodcut, linoleum cut, Xerox transfer, and monotype. Places equal emphases on developing drawing skills and understanding design principles.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 1010 (3) Introduction to Studio Art

Presents creative activity conceptually, and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Fine arts majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1012 (3) Drawing for Non-Majors

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1020 (3) Introduction to Studio Art 2

Presents creative activity conceptually and art history thematically, with an interdisciplinary, experimental, and multicultural focus. Art and art history majors explore visual literacy and culture through presentations and student-centered projects that emphasize individual development.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1030 (3) Principles of Color

Introduces the relative effects of color as used by the artist. Emphasizes the practice of color relations including basic characteristics, mixtures, illusions, optical mixture, color intervals, and color quantity. May not be repeated.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Foundations

ARTS 1171 (3) Photography for Non-Majors

An introduction to contemporary photographic practice. The course introduces photographic technique, history, and image evaluation while emphasizing visual literacy, conceptual development and personal expression.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 2171

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 1202 (3) Basic Painting

The aim of this course is to develop the basic skills, techniques and processes of painting with an understanding of basic colour principles. This integration of paint application and colour principle will develop awareness that painting and colour are used, not only as mediums for representation, but also as mediums for expressive purposes. Demonstrations, lectures, group and individual critiques will be given throughout the course.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1212 (3) Painting for Non-Majors

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. May not be repeated.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 1514 (3) Sculpture for Non-Majors

Offers an orientation involving three-dimensional form and application. Studies expressive and conceptual problems based on non-objective form relationships in various sculptural materials. May not be repeated.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 1875 (3) Ceramics for Non-Majors

Encompasses broad and fundamental uses of clay. Basic instruction and demonstration of throwing, hand building, and other clay forming methods. Investigates utility, function, and ceramics in the broader context of contemporary art. Slide presentations explore historical and contemporary attitudes involving ceramics.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 2004 (3) Participatory Objects (Sculpture and Post-Studio Practice)

Looks at the tendency in contemporary sculpture to create interactive objects and experiences for the viewer. Students in this course are required to create hands-on projects, participate in group critiques and develop presentations and research projects.

Recommended: Prerequisite ARTS 2504.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2022 (3) Beginning Drawing

Emphasizes proportion and perspective through observation based drawing. Students are introduced to various drawing materials and learn to translate what they see into drawing media using two basic subjects: still-life and the figure.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 2085 (3) Ceramics 2: Handbuilding

Introduces techniques of hand-built clay forms as they relate to function and nonfunction. Various clay techniques, glazing and firing procedures are explored. Emphasizes ceramics in the broader context of contemporary art. May not be repeated.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 2095 (3) Ceramics 2: Wheelthrowing

Introduces techniques of wheel-thrown forms as they relate to function and nonfunction. Explores various glazing and firing methods. May not be repeated.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 2104 (3) Colossal Objects (Sculpture and Post-Studio Practice)

Focuses on the conception, design and production of art works that are larger than human scale. Each object will be the result of individual and team design collaboration. Primarily focuses on sculpture constructed and engineered from metal although other materials are welcome.

Recommended: Prerequisite ARTS 2504.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2126 (3) Digital Art 1

An introductory course in the use of the personal computer to create and process images in the visual arts.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 2171 (3) Photography 1

An introduction to contemporary photographic practice. The course introduces photographic technique, history, and image evaluation while emphasizing visual literacy, conceptual development and personal expression.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 1171

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 2191 (3) Photography 2

Explores more sophisticated technical and conceptual skills to the creative process.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 2222 (3) Beginning Painting

Emphasizes color and descriptive mark making through observation based painting. Students are introduced to various painting materials and learn to translate what they see into painting media using two basic subjects: still-life and the figure.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 2244 (3) Drawing for Sculpture (Sculpture and Post-Studio Practice)

Explores and examines many relationships between sculpture and drawing. Projects will explore 2-D drawing and mixed media projects through the lens of sculptural practice. Scale, materials and styles will be researched along with topics such as the artists proposal, investigative processes, drawing and sculptural installations.

Recommended: Prerequisite ARTS 2504.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2284 (3) Nothing Flat 1: Project a Week (Sculpture & Post-Studio Practice)

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTS 2303 (3) Beginning Relief

Emphasis on introductions to the concepts and techniques of relief processes, including white line, black line and four color reductive processes. Students will gain a working knowledge of fundamental relief processes, plus safe and appropriate use of all materials and equipment in the studio.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Freshmen or Sophomore Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2384 (3) Fleeting and Found 1: Ephemeral Sculpture 1

Focuses on introductory level processes of creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy, and degradation will be explored. This course will include lectures, readings and discussions, writing assignments, studio projects, and visual presentations.

Requisites: Requires prerequisite of ARTS 1010 (minimum grade C).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2403 (3) Beginning Intaglio

Emphasizes an introduction to techniques of intaglio and a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials/concepts. Emphasizes interrelationship of process, materials and ideas/aesthetics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2413 (3) Beginning Lithography

Exploration into stone lithography and aluminum plate is presented in this class. Individual direction and development of conceptual focus and studio techniques are important objectives in this class. Safer ways to make lithographs is highlighted and the toxic traditional methods are left behind.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2423 (3) Beginning Screenprinting

Exploration into screenprinting at the basic level, using stencil-making processes for screenprinting with acrylic-based screenprinting inks. Emphasis is placed on exploring and developing challenging concepts, mastering basic techniques and creating compositions and visual images that successfully convey your concept and challenge the viewer. Course is focused on the art of fine art printing on paper.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2433 (3) Beginning Alternative Printmaking

Presents creative development of concepts in printmaking beyond the traditional two-dimensional image on paper that is contained in a portfolio or frame. Focus will be made on expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2453 (3) Beginning Monotype

Introduces the monoprint and monotype methods. Students will learn the about making non-editioned prints using a variety of four or more technical approaches. These processes will be discussed and demonstrated in depth. Students will develop a portfolio of finished prints during the semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 1010 (minimum grade C-). Restricted to Freshman or Sophomore Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 2504 (3) Basic Sculpture: Materials and Techniques

Introduces the basic properties of metal, wood and mold making. Students will explore and demonstrate an understanding of basic fabrication methods involved in each element. Students will investigate both traditional and non-traditional working methods and will consider how materials and techniques inform sculptural concepts.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 2524 (3) Visual Thinking (Sculpture and Post-Studio Practice)

Explores ideas concerning the structure and nature of visual thinking and their relationship to the creative thought process. Investigates form in terms of the organizing principles of three-dimensional design and its application to contemporary sculpture. Includes lecture and studio projects.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3002 (3) Drawing Alternative Process/Materials

Continuation of Drawing 2. Offers creative possibilities in drawing and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information. May be repeated once.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2002 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)

Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3012 (3) Figure Drawing

Explores varied drawing techniques and media. Introduces concepts relevant to the understanding of drawing and the creative process. May not be repeated. Formerly ARTS 2002.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

Recommended: Students are also eligible to take this class with instructor permission if they have taken a non-majors class in Drawing.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)

Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, this course provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio arts courses that cannot be offered on a regular basis. Information concerning the topics in any given semester is available prior to pre-registration from the department of Art and Art History.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 3022 (3) Intermediate Drawing

In addition to being a continuation of Beginning Drawing, Intermediate Drawing will focus on a non-traditional approach to making images encouraging conceptual development, experimentation and research. Moving beyond observation based drawings multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.

Requisites: Requires prerequisite courses of ARTS 1010, 1020 and 2022 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3054 (3) Sculpture: Modules and Multiples 2

Exposes students to the practice of creating large works through smaller multiples and modules. By learning about the practices of artists such as Andy Warhol, Joseph Beuys, Rachel Whiteread and Robert Gober, along with many others, students will generate an understanding and appreciation for the module and multiple in contemporary art practice. Students will learn to cast using plaster and other type of molds, will be introduced to jigs as a way to streamline production of multiple objects and will work with found objects. Students will be required to complete 3 projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3085 (3) Ceramics 3

Deals with further exploration of techniques approached in ARTH 2085 and ARTH 2095. Students are encouraged to develop personal concentration in relation to medium.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 2085 and ARTS 2095 (all minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 3097 (1-3) Special Topics - Non-Studio

Introduces timely subjects in fine arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the Department of Art and Art History.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C-). Restricted to Studio Arts (AASA) or Fine Arts-Studio (BASA and BFAS) or Fine Arts-Art History (BAAH) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 3124 (3) Intervention, Exchange, and Duration (Sculpture & Post-Studio Practice)

Focuses on the production of works of art outside of the traditional studio, museum and gallery. Projects will be designed to interrupt, intervene, co-opt, provide a service, exist for a defined amount of time, or engage a site, community or situation. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3184 (3) Nothing Flat: Project a Week (Sculpture & Post-Studio Practice)

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produce a wide range of work over 15 weeks. Formerly ARTS 2184.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.

Recommended: Prerequisite ARTS 2504.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3191 (3) Photography 3

Continues the exploration of the possibility of individual photographic expression. Students are encouraged to discover and develop a personal position in relation to the medium.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2191 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 3196 (3) Photo-Imaging

Introduces techniques, software, and related concepts of digital photography as art. Emphasizes digital photography as a means to formal and expressive ends.

Requisites: Requires prerequisite course of ARTS 1171 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 3202 (3) Painting Alternative Process/Materials

Continuation of Painting 2. Offers creative possibilities in painting and related media. Emphasizes experimentation and individual expression. Content varies by semester according to instructor; contact individual instructor for more information.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3212 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3212 (3) Figure Painting

Explores varied painting techniques. Introduces concepts relevant to the understanding of painting and the creative process. Student is also eligible to take this class if they have taken a Non-Majors class in Drawing. Please contact the instructor for permission. May not be repeated. Formerly ARTS 2202.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3222 (3) Intermediate Painting

In addition to being a continuation of Beginning Painting, this course focuses on a non-traditional approach to making paintings encouraging conceptual development, experimentation and research. Moving beyond observation based painting multiple thematic possibilities will be explored. Emphasis will be placed equally on ideas and technical execution.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 2222 (all minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3224 (3) Picturing Sculpture

Explores the many ways photography and other forms of imagery have been utilized in the field of sculpture. Students will start from the sculptural, but those objects and installations will function as an intermediary to creating final work that will rest in the image. Include lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3236 (3) Electronic Arts Survey

Explores the development of video as an art form through tape screenings, readings, lectures, and discussions. Prerequisite for further studies in video production.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 3284 (3) Nothing Flat 2: Project a Week (Sculpture and Post-Studio Practice)

Provides students the opportunity to work with a range of sculptural materials through a series of quick projects (e.g. installation, objects, writing). Students will learn to generate ideas quickly, engage issues and formats particular to sculpture, and produces a wide range of work over 15 weeks. This course builds on ideas introduced in Nothing Flat 1.

Requisites: Requires prerequisite course of ARTS 1020 and prerequisite or corequisite course of ARTS 2504 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ARTS 3303 (3) Relief 1

Continued exploration of relief processes: various techniques of the collage process in combination with the art and process of the collograph. Examining the collage aesthetic, creating collages and collograph prints from found materials and objects. Other skills to be focused on include registration methods, blend rolls and the experimentation with rubbings.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2303 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 3354 (3) Bend, Build, Burn: Sculpture in Wood

Focuses on the production of works of art in wood. Class projects explore building, bending, and burning with wood. Focuses on sculptural constructed objects although possibilities of installation, site-specific and public art will also be explored.

Requisites: Requires prerequisite course of ARTS 1020 (minimum grade C-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3384 (3) Fleeting and Found 2: Ephemeral Sculpture 2

Focuses on creating sculpture projects which are ephemeral and temporary. Themes of process, lifespan, migration, tension, entropy and degradation will be explored. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite of ARTS 1010 (minimum grade C).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3403 (3) Intaglio 1

Exploration into techniques of Intaglio with a focus on working with copper and ferric chloride. Historical approaches and use through contemporary materials and concepts. Emphasis is placed on mastering basic techniques, creating compositions and visual images, and exploring and developing concepts that challenge the viewer.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2403 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 3413 (3) Lithography 1

Introduces the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Not available to freshmen. Taught with ARTS 4413 and ARTS 5413.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 3423 (3) Screen Printing 1

Introduces the study of silkscreen techniques, emphasizing creativity, individual development, and experimentation in contemporary silkscreen processes.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 3433 (3) Alternative Printmaking 1

Continued exploration into the development of alternative techniques and materials, methods of extending the print beyond 2-dimensions and expanding the concept of what is a print will be explored in relation to each student's studio practice and interests.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2433 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 3434 (3) Collaboration: Art and Collective Action

Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3453 (3) Monotype 1

A continued exploration in the monoprint and monotype methods. Use of a varied grouping of matrixes will be the focus of this class. Students will develop a portfolio of finished prints during the semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2453 (all minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 3504 (3) Sculpture 3: Experiments 1

Explores materials, methods, and techniques through a series of assignments emphasizing individual ideas and their relationship to contemporary aesthetics.

Requisites: Requires prerequisite courses of ARTS 2504 and ARTS 2524 (minimum grade C-). Restricted to Studio Arts (AASA) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3514 (3) Sculpture 3: Experiments 2

Explores individual concepts and ideas and their relationship to contemporary issues and aesthetics. a series of assignments are worked out with the instructor based on individual interest.

Requisites: Requires prerequisite course of ARTS 3504 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3604 (3) Beyond the Studio: Post-Studio Art Practice

Overview of post-studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3614 (3) Lost in Space: Installation Art

Students learn how to develop ideas in relation to installation art, exhibition spaces, and explore practical skills to help carry out their ideas. Includes lectures, readings and discussion, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3702 (3) Special Focus in Painting and Drawing

Offers varied focus and special topics in painting, drawing, and related media to explore specialized directions and creative possibilities.

Emphasizes experimentation. Content varies by semester; contact individual instructor for more information.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ARTS 2002 or ARTS 2202 (minimum grade C-).

Recommended: Prerequisite ARTS 3002 or ARTS 3202.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 3714 (3) Experimental Structures (Sculpture and Post-Studio Practice)

Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 3841 (1-3) Undergraduate Independent Study---Photography

Reserved only for special projects in photography, not offered in the curriculum. Requires a detailed proposal, instructor's signature and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3191 or ARTS 4161 (minimum grade C-).

Additional Information: Departmental Category: Photography

ARTS 3842 (1-3) Undergraduate Independent Study---Painting

Reserved for special projects in painting not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3202 (minimum grade C-).

Additional Information: Departmental Category: Painting/Drawing

ARTS 3845 (1-3) Undergraduate Independent Study---Ceramics

Reserved for special projects in ceramics not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ARTS 3085 (minimum grade C-).

Additional Information: Departmental Category: Ceramics

ARTS 3847 (1-3) Independent Study

Reserved for special projects not offered in the curriculum. Department enforced prerequisite: detailed proposal, instructor sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 3906 (1-3) Undergraduate Independent Study---Video

Reserved for special projects in video not offered in the curriculum. Requires a detailed proposal, instructor's sponsorship, and departmental approval.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 4246 (minimum grade C-).

Additional Information: Departmental Category: Media Arts

ARTS 3937 (1-6) Internship

Gives upper-division students the opportunity to work in public or private organizations on assignments relating to their career goals, and allows them to explore the relationship between theory and practice in their major.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 4002 (3) Advanced Drawing/Portfolio

Continuation of Drawing 3. Advanced studio class in drawing for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 2022 and ARTS 3022 (all minimum C-). Restricted to Junior and Senior Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 4004 (3) Land and Environmental Art (Sculpture and Post-Studio Practice)

Covers land and environmental art, providing an historical survey along with hands on projects in the landscape. Focusing on themes of site, environment, landforms, weather, and earth materials, students will design and realize art projects on the land. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite or corequisite course of ARTS 1020 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4014 (3) Art and Social Practice (Sculpture and Post-Studio Practice)

Covers social art practice, providing an historical survey along with hands on projects in social environments. Focusing on issues of public space, economic and cultural marginalization and political causes, provides students a forum for expressions of social reality. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5017

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTH 1300 or ARTH 1400 (all minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4024 (3) Public Art

Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5024

Requisites: Requires a prerequisite or corequisite course of ARTS 1020 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Recommended: Prerequisites ARTS 2504 and ARTS 2524 and ARTS 3504.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4085 (3) Ceramics 4

Develop a personal creative practice through self-generated, independent projects. The focus is on developing an individual studio discipline through experimentation, research, reading and writing and examining the work in individual critiques.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 4087 (3) Selected Topics in Contemporary Art

Selectively studies significant areas of visual art of the last decade including major critical opinions.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5087

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite of 20 units of ARTS or ARTH coursework completed (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4095 (3) Special Topics in Ceramics

Designed for students majoring in ceramics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5095

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3085 (minimum grade D). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Ceramics

ARTS 4097 (1-3) Special Topics-Non-Studio

Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5097

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4104 (3) Performance/Installation

Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5104

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 4126 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4107 (1-3) Special Topics

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4117 (3) BFA Seminar

For students intending to pursue graduate work and/or a professional career in art. Emphasizes the development of a critical overview of their work and interests and how they relate to the problems of professional activity.

Requisites: Restricted to Studio Arts (AASF) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4118 (3) Visiting Artist Program

Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts. Department enforced prerequisite: portfolio review.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5118

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior) Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Visiting Artist Program

ARTS 4126 (3) Digital Art 2

Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5126

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4127 (3) Art from Nature

Provides an opportunity for advanced students to create nature based art. Studio work and/or appropriate on-site works will be generated through readings and individual and group experiences of nature.

Requisites: Requires prerequisite of one 4000-level ARTS course (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4130 (3) Integrated Media

Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5130

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Integrated Arts

ARTS 4154 (3) Metalsmithing 1

Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5154

Requisites: Requires prerequisite courses of ARTS 1010, 1020, at least one 2000-level ARTS course, and at least one 3000-level ARTS course (all minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4161 (3) Photography 4

Explores advanced techniques and concepts of photography as art. Emphasizes photography as a means to formal and expressive ends.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3191 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 4171 (3) New Directions in Photography

Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5171

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ARTS 3191 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Photography

ARTS 4176 (3) New Directions in Digital Art

Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5176

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 2126 and ARTS 4126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4196 (3) Advanced Photo-Imaging

Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output and individual growth and development.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5196

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 2191 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4202 (3) Advanced Painting/Portfolio

Continuation of Painting 3. Advanced studio class in painting for creative expression and individual portfolio development. Emphasis varies by semester; contact individual instructor for more information.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 1010 and 1020 and 2222 and 3222 (minimum grade C-). Restricted to Junior and Senior Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Painting/Drawing

ARTS 4217 (3) Art and Race/Ethnicity

Examines the impact of race and ethnicity on the art world. Examines the art of Native Americans, Chicanos, Puerto Ricans, Cuban Americans, Latin Americans, African Americans, Asian Americans and ethnic and cultural mixing. Grounded in Critical Multicultural Theory and Postcolonial Theory.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5217

Recommended: Prerequisites ARTS 1300 and ARTS 1400 (minimum grade C-) or instructor consent required.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4226 (3) Advanced Computer Imaging

Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5226

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 4126 (minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4236 (3) Electronic Arts Survey 2

Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5236

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4246 (3) Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5246

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4303 (3) Relief 2

Continued exploration into the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 and ARTS 3303 (all minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4316 (3) History and Theory of Digital Art

Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5316

Requisites: Requires prerequisite course of ARTS 2126 (minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Media Arts

ARTS 4327 (3) Biennial Art

Covers art represented in the most current international biennials (Documenta, Venice Biennale, Sao Paulo Biennial, Havana Biennial, Gwanju Biennial and the Istanbul Biennial). Art will be analyzed by applying postmodern theory, postcolonial theory and international theoretical perspectives that have not yet been integrated into Western thought.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5327

Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4403 (3) Intaglio 2

Continued exploration of techniques of intaglio process, including non-acid and ferric chloride techniques with copper as the main matrix being used. Possible processes focused on include: photo etching using solar plates and introduction to printing ala poupee wiping, chine colle and basic color. Building a unified body of work is the main focus. .

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 3403 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4413 (3) Lithography 2

Continues the study of stone and metal plate lithography, emphasizing individual creative development in black and white and further development in color printing processes. Digital imaging and nontoxic processes are emphasized as much as possible. Taught with ARTS 3413 and ARTS 5413.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3413 (minimum grade D-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4423 (3) Screen Printing 2

Introduces advanced screen printing technology, emphasizing individual creativity and the ability to resolve problems of two-dimensional form.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 3423 (minimum grade C-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4433 (3) Alternative Printmaking 2

Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5433

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 1020 and ARTS 3433 (minimum grade C-). Restricted to Studio Arts (AASA/AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4434 (3) Collaboration: Art & Collective Action

Covers both historical background and hands on projects that are collaborative in nature. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4444 (6) Art and Rural Environments Field School

Puts students in touch with various rural landscapes in Colorado. Takes place off campus each summer during Maymester. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5444

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

Recommended: Prerequisite ARTS 2504.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4453 (3) Monotype 2

Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5453

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Printmaking

ARTS 4457 (3) Sound Art Seminar

Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5457

Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4504 (3) Advanced Sculpture Studio

Students in this course will be required to complete projects, participate in group critiques of projects, produce a slide presentation on a contemporary artist whose work/practice fits within the theme of the course and prepare a final portfolio. Studio work and demonstrations will be augmented by readings and discussions on contemporary art.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Requires prerequisite courses of ARTS 3504 and ARTS 3514 (all minimum grade C-). Restricted to Studio Arts (AASA or AASF) or Art History (AAAH) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4604 (3) Beyond the Studio: Post-Studio Art Practice

Overview of Post-Studio art practice and covers the historical landscape of artists and projects that have pushed "beyond the studio" since 1970. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4607 (3) Art and Social Change

Examines how art is used as an agent for social change. Among topics addressed by artists interested in social change are: immigration, HIV/AIDS, illness/disease, ecology/the environment, feminism, gay and lesbian issues, war, violence, racial and ethnic minorities, etc.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5607

Requisites: Requires prerequisite courses of ARTH 1300 and ARTH 1400 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4641 (3) String Instrument Building

As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5641

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4714 (3) Experimental Structures (Sculpture and Post Studio Practice)

Explores the interface of sculpture and architecture. Looks at individuals and collectives that have become renowned for their work with experimental structures and students will have the opportunity to build hands-on experiments. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Requisites: Requires prerequisite courses of ARTS 1010 and ARTS 1020 (all minimum grade C-).

Recommended: Prerequisites ARTS 2504 and ARTS 2524.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Sculpture

ARTS 4717 (1-3) Studio Critique

Consists of consultations with faculty on individual studio problems and projects. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Seminars/Special Topics

ARTS 4934 (3) Art, Design, and Engineering: Thinking and Making

Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 5934

Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) majors or minors with a minimum of 50 credits only.

Recommended: Prerequisites ARTS 1010, ARTS 1020, ARTH 1300, ARTH 1400, COEN 1400, COEN 3930.

Grading Basis: Letter Grade

ARTS 5017 (1-3) Special Topics in Studio Arts

Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4017

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5024 (3) Public Art

Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4024

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Sculpture

ARTS 5075 (3) Graduate Ceramics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ceramics

ARTS 5087 (3) Selected Topics in Contemporary Art

Selectively studies significant areas of visual art of the last decade including major critical opinions.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4087

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5095 (3) Special Topics in Ceramics

Designed for students majoring in ceramics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4095

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ceramics

ARTS 5097 (1-3) Special Topics-Non-Studio

Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4097

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5104 (3) Performance/Installation

Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4104

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5107 (1-3) Special Topics

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5117 (3) Graduate Art Seminar

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5118 (3) Visiting Artist Program

Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4118

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Visiting Artist Program

ARTS 5126 (3) Digital Art 2

Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4126

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5130 (3) Integrated Media

Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4130

Additional Information: Departmental Category: Integrated Arts

ARTS 5140 (3) Integrated Arts Studio

Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Integrated Arts

ARTS 5150 (3) Graduate Integrated Arts

Investigates the conjunction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. A curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.

Repeatable: Repeatable for up to 18.00 total credit hours.

Additional Information: Departmental Category: Integrated Arts

ARTS 5154 (3) Metalsmithing 1

Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4154

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5161 (3) Graduate Photography

Repeatable: Repeatable for up to 18.00 total credit hours.

Additional Information: Departmental Category: Photography

ARTS 5171 (3) New Directions in Photography

Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculpture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4171

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Photography

ARTS 5176 (3) New Directions in Digital Art

Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4176

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5196 (3) Advanced Photo-Imaging

Offers an in-depth exploration of digital imaging in the context of the history, aesthetics, and tradition of photography as contemporary art. Emphasis is on digital manipulation, output and individual growth and development.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4196

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Media Arts

ARTS 5202 (3) Graduate Painting

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Painting/Drawing

ARTS 5217 (3) Art and Race/Ethnicity

Examines the impact of race and ethnicity on the art world. Examines the art of Native Americans, Chicanos, Puerto Ricans, Cuban Americans, Latin Americans, African Americans, Asian Americans and ethnic and cultural mixing. Grounded in Critical Multicultural Theory and Postcolonial Theory.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4217

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5226 (3) Advanced Computer Imaging

Explores advanced techniques and concepts of digital image-making. Emphasizes the creative application of computer imaging in the production of visual art through individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4226

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ARTS 5126 (minimum grade D-).

Additional Information: Departmental Category: Media Arts

ARTS 5236 (3) Electronic Arts Survey 2

Continuation of electronic arts survey. Explores the development of video as an art form. Prerequisite for further studies in video production.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4236

Additional Information: Departmental Category: Media Arts

ARTS 5246 (3) Graduate Beginning Video Production

Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4246

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5303 (3-18) Graduate Relief

Continues the study of the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages. Students with limited experience in relief processes will be given an overview in those practices.

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Printmaking

ARTS 5316 (3) History and Theory of Digital Art

Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4316

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5327 (3) Biennial Art

Covers art represented in the most current international biennials (Documenta, Venice Bienale, Sao Paulo Biennial, Havana Biennial, Gwanju Biennial and the Istanbul Biennial). Art will be analyzed by applying postmodern theory, postcolonial theory and international theoretical perspectives that have not yet been integrated into Western thought.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4327

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5346 (3) Graduate Intermediate Video Production

Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4346 and FILM 4340

Requisites: Requires prerequisite course of ARTS 4246 or ARTS 5246 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5403 (3) Graduate Intaglio

Continuation of the study of expressive and formal aesthetics of Intaglio processes. Studio practice and investigation of artistic attitudes as exemplified through historical perspectives, traditional, and contemporary usages. Building a body of work in this course is the goal. Taught with ARTS 3403 and ARTS 4403.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5413 (3) Graduate Lithography

Taught with ARTS 3413 and ARTS 4413.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5423 (3) Graduate Screen Printing

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5433 (3) Alternative Printmaking 2

Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4433

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5444 (6) Art and Rural Environments Field School

Puts students in touch with various rural landscapes in Colorado. Takes place off campus each summer during Maymester. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place, and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4444

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5446 (3) Graduate Advanced Video Production

Continuation of intermediate video production. Explores advanced technical skills to control the quality of the video image in production, postproduction, and distribution. Emphasizes self-motivated independent projects, conceptual realization of advanced student work and basic working knowledge of distribution and life as a media artist. Promotes further theoretical understanding of video as an art form.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4446 and FILM 4440

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Media Arts

ARTS 5453 (3) Monotype 2

Continued research into developing techniques of using a varied grouping of matrixes will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4453

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Printmaking

ARTS 5457 (3) Sound Art Seminar

Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4457

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5500 (3) Art, Design, and Engineering: Thinking and Making

Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities.

Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.

Recommended: Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.

Grading Basis: Letter Grade

ARTS 5504 (3) Graduate Sculpture

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sculpture

ARTS 5540 (3) Generative Art

Attends to the interdisciplinary pursuits of scientists, humanists and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Integrated Arts

ARTS 5607 (3) Art and Social Change

Examines how art is used as an agent for social change. Among topics addressed by artists interested in social change are: immigration, HIV/AIDS, illness/disease, ecology/the environment, feminism, gay and lesbian issues, war, violence, racial and ethnic minorities, etc.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4607

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5641 (3) String Instrument Building

As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4641

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Sculpture

ARTS 5717 (1-3) Graduate Studio Critique

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5857 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5901 (1-3) Graduate Independent Study---Photography

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Photography

ARTS 5934 (3) Art, Design, and Engineering: Thinking and Making

Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4934

Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.

Recommended: Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.

Grading Basis: Letter Grade

ARTS 6957 (1-6) Master of Fine Arts Creative Thesis

Additional Information: Departmental Category: Seminars/Special Topics

Arts and Sciences Courses (ARSC) Courses

ARSC 1000 (3-4) Expository Writing

Develops college-level reading, writing, and thinking. Students are asked to read critically, then construct written responses that are revised and crafted into more formal essays and position papers. Offered through the Student Academic Services Center. Department enforced prerequisite: program coordinator consent required.

Additional Information: Departmental Category: Writing

ARSC 1080 (4) College Writing and Research

Introduces academic and professional genres through the research and inquiry process. Students practice close reading, oral presentation, drafting, synthesis, analysis and research skills in discussion, writing workshops, and one-on-one conferences.

Additional Information: Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Written Communication-Lower

Departmental Category: Writing

MAPS Course: English

ARSC 1081 (1) SASC Coseminar: College Writing and Research

One-credit seminar provides extended instruction in written composition for students enrolled in ARSC 1080. Graded assignments enrich students' understanding of genre, organization, research skills, and grammar.

Department enforced corequisite: ARSC 1080.

Additional Information: Departmental Category: Writing

ARSC 1150 (3) Writing in Arts and Sciences

Emphasizes the development of effective writing skills with instruction provided in expository and analytical writing. Reviews basic elements of grammar, syntax, and composition as needed.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Written Communication-Lower

Departmental Category: Writing

MAPS Course: English

ARSC 1200 (1-3) Topics in Arts and Sciences

Various topics from within the College of Arts and Sciences.

Additional Information: Departmental Category: Special Curricula

ARSC 1400 (1) SASC Coseminar: Chemistry 1 & 2

Supplements and strengthens student experiences in chemistry. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1420 (1) SASC Coseminar: Introduction to EEB

Designed to supplement and strengthen student experiences in EBIO 1210 and EBIO 1220. Allows particularly gifted students an opportunity to extend their understanding of the subject and possible careers in science.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1432 (1) SASC Coseminar: Economics

Designed to supplement and strengthen student experiences in microeconomics. Allows particularly gifted students an opportunity to extend their understanding of the subject and to explore possible careers in social science.

Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1440 (1) SASC Coseminar: Mathematics

Offers an unusual and essential opportunity for students to receive small-group enrichment and reinforcement. Supplements and strengthens student experiences in mathematics, allowing particularly gifted students an opportunity to extend their understanding of the subject in a supportive environment, and to explore possible careers in science.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1450 (3) Intro to STEM Research Method: In the Field and at the Bench

Uses experiential learning as a strategy to teach STEM science concepts. Lectures in STEM sciences provide background information on science concepts while the hands-on, inquiry-based and research-based lab activities are designed to allow students to explore the scientific method as it is applied to CU STEM research. Topics will highlight the interdisciplinary aspect of STEM research.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1460 (1) SASC Coseminar: Biology

Supplements and strengthens student experiences in introductory IPHY courses. Students work through course material that cannot be covered in detail during lecture.

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1470 (1) MASP Natural Science Seminar

Enhances students' knowledge and appreciation of the natural sciences. Readings, discussions, cooperative learning exercises and outside activities explore the richness of scientific discovery related to core natural science concepts. Emphasizes the scientific method and the history and people making scientific discoveries. Department consent required.

Repeatable: Repeatable for up to 4.00 total credit hours.

ARSC 1480 (1) MASP Social Science Seminar

Fosters an appreciation of the social sciences. Readings, discussions, cooperative learning exercises, and outside activities illustrate the interconnections between different bodies of knowledge. Emphasizes relationships between the social sciences and the real world. Department consent required.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1490 (1) MASP Humanities Seminar

Enhances students' knowledge and appreciation of the humanities. Readings, discussions, cooperative learning exercises, workshoping papers and presentation, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis is on actively using knowledge of humanities in a variety of ways. Department consent required.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1492 (1-3) MASP Research Seminar

Enhances students' knowledge and appreciation of the humanities, the social sciences or STEM-related fields. The course's readings, discussions, cooperative learning exercises, work-shopping papers and presentations, guest speakers, and outside activities are designed to enhance both students' appreciation of the subject matter and their performance in their regular courses. Emphasis will be placed on actively using knowledge of humanities, social sciences or STEM fields in a variety of ways. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 1520 (1) Health, Society, and Wellness in COVID-19 Times

The novel coronavirus pandemic has disrupted nearly every aspect of society around the world. The pandemic has resulted in the infection of millions and death of hundreds of thousands of people worldwide. The economic, social, and mental health impacts of the pandemic are unprecedented and have laid bare and exacerbated long standing inequalities and disparities. College students will benefit from an academic course that provides scientific, humanistic, and social scientific perspectives on disease and society broadly and the coronavirus crisis in particular. The course will offer students empirically proven strategies for maintaining wellness, which is especially important at a moment of pervasive uncertainty, heightened anxiety, and mental health vulnerability.

Grading Basis: Pass/Fail

ARSC 1550 (1) Making the Self: Tools for Well-Being and Success in College

Helps first-year Arts and Sciences students build the skills, learning techniques and agency needed for success at CU and beyond. Taught in an experiential, workshop-format, this course focuses on developing a student's critical and analytical skills along with their practices of investigation and creative problem-solving. Using materials in a variety of media (text, visual, moving image, etc.), the course will explore different ways of knowing and learning. In an active small-group setting, students you will examine and define the concepts that lay the foundation for their college education.

Requisites: Restricted to Arts and Sciences students.

Grading Basis: Pass/Fail

ARSC 1600 (1) The University of Colorado Experience

Provides an effective transition to the university by giving students a solid base for developing scholarship, citizenship, decision making, and involvement in their university community. Topics include academic and campus resources, safety, health, and diversity.

Additional Information: Departmental Category: Special Curricula

ARSC 1710 (1) SASC Coseminar: Mathematics

Provides motivated pre-calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in pre-calculus courses due to time constraints. Mastery of material is emphasized. Department enforced prerequisite: proficiency in high school mathematics.

Additional Information: Departmental Category: Special Curricula

ARSC 1720 (1) SASC Coseminar: Calculus Work Group

This 1-credit seminar provides motivated calculus students with more in-depth and more challenging coverage of material assumed in calculus. Students complete advanced problems that cannot be covered in calculus courses due to time constraints. Mastery of material is emphasized. Department enforced requisites: proficiency in pre-calculus mathematics and an A/B average in pre-calculus sequence. Department enforced corequisite: MATH 1300.

Additional Information: Departmental Category: Special Curricula

ARSC 1800 (3) Methods of Inquiry

Introduces students to methodologies used in different academic disciplines, e.g., how a paleographer dates a manuscript. Course is team-taught. Students must also enroll in two of four corequisite course sections, all in different areas of the core curriculum. The corequisite course sections are listed in the online Schedule Planner.

Additional Information: Departmental Category: Special Curricula

ARSC 2000 (3) Ways of Knowing: Constructions of Knowledge in the Academy and Beyond

This course asks students to interrogate natural learning tendencies, how they know what they know, and how to cultivate other ways of knowing beyond intellectual. They analyze how knowledge is created, discovered, and interpreted. They'll explore what faculties are involved in learning, seeing, understanding and knowing; how revolutions in knowledge arise; the relationship between knowledge and power; and what wisdom is. Students draw on different ways of expressing knowledge, including the intellect, intuition, and more. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: NRLN 2000

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Special Curricula

ARSC 2274 (3) Peer Counseling

Introduction to basic peer education and counseling theory and techniques. Students learn experientially by practicing a variety of skills in an informal atmosphere. The material learned is valuable to students professionally (as employee or supervisor in any field or as helping professional) regardless of career path. Students increase self-awareness and apply it to their own lives. Offered Fall semesters only.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Departmental Category: Special Curricula

ARSC 2400 (1) SASC Coseminar: Organic Chemistry

Supplements and strengthens student experiences in organic chemistry. Allows gifted students an opportunity to extend their understanding of the subject and to explore possible careers in science.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 2470 (1) SASC Coseminar: Physics 1 and 2

Supplements and strengthens student experiences in physics. Allows particularly gifted students an opportunity to extend their understanding of the subjects and to explore possible careers in science.

Repeatable: Repeatable for up to 2.00 total credit hours.

Additional Information: Departmental Category: Miramontes Arts and Sciences Program (MASP)

ARSC 3001 (6) Social Engagement & Human Rights: The South Africa Model

Examines the concept of reconciliation from a multidimensional and multidisciplinary approach as it specifically contributes to subjects of difference,

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Special Curricula

ARSC 3100 (3) Multicultural Perspective and Academic Discourse

Teaches students how to write academic papers related to race, class, gender, sexuality, and other areas of cultural identity. Students acquire expertise on issues through readings, guided discussion, and research and practice oral presentation skills, drafting, and workshopping of papers. Department enforced prerequisite: lower level writing course(s) or waiver.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Written Communication-Upper

Departmental Category: Writing

ARSC 3600 (3) Diversity Issues: Higher Education

Uses Internet dialogue, computing, and media technology to improve communication and develop research and inquiry skills and critical thinking. Race, class, gender, and sexual orientation issues are addressed to foster understanding of university codes of inquiry and modes of interaction in scholarly communities. Department enforced prerequisite: admission to McNair Program, junior standing, minimum GPA of 2.50, and strong interest in graduate school.

Additional Information: Departmental Category: Special Curricula

ARSC 3650 (3) Diversity Issues in Graduate Education

Guides students through research on diversity and retention issues in graduate education. Participants use Tinto's work on academic and social integration as a conceptual framework. Further, students investigate how specific institutions support diversity goals in their graduate programs. Department enforced prerequisite: admission to McNair Program (minimum 2.50 GPA, three recommendation letters, personal statement, strong interest in graduate school).

Additional Information: Departmental Category: Special Curricula

ARSC 3700 (1-5) McNair Seminar: Research Design

Multidisciplinary course guiding critical thinking as students design a formal investigation. Includes presenting and writing a prospectus. Students revise the prospectus, creating a proposal for funding the research as well as HRC proposals. Department enforced prerequisite: admission to McNair Program (junior standing, minimum GPA of 2.50, and a strong interest in graduate school).

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Curricula

ARSC 3935 (1-6) Internship

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Curricula

ARSC 4000 (3) Multimedia Applications in Foreign/Second Language Education

Focuses on knowledge and skills in accessing, evaluating and integrating technology assisted, mediated material in the teaching and learning of foreign languages. Focuses on hands-on design and production of instructional software for foreign languages.

Equivalent - Duplicate Degree Credit Not Granted: ARSC 5000

Recommended: Prerequisite a language-teaching methodology course.

Additional Information: Departmental Category: Special Curricula

ARSC 4040 (1-3) Arts and Sciences Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ARSC 5040

Additional Information: Departmental Category: Special Curricula

ARSC 4700 (1-5) The McNair Seminar: Research Practices and Procedures

Within the range of scholarly modes, student researchers examine discipline-specific rationales for evidence and analysis. Lecturers distinguish popular concepts of investigation from scholarly research. Students learn to take great care describing and discussing methods, findings, interpretations, assertions, and conclusions. Department enforced prerequisite: admission to McNair Program (junior standing, meeting TRIO guidelines, strong interest in graduate school).

Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Curricula

ARSC 4750 (3-4) Social Foundations of Professional Life in Washington DC

In this course, students will gain deep exposure to the historical, cultural, and socio-economic traditions and pressures that drive domestic and international policy making in Washington D.C. Students will read widely, prepare papers, and lead discussions on fundamental aspects of Washington's professional life. Course takes place in the nation's capital and is taken in conjunction with a professional internship. Restricted to CU in D.C. program participants.

Additional Information: Departmental Category: Special Curricula

ARSC 4909 (2-6) Senior Thesis for Individually Structured Major

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Curricula

ARSC 4910 (1) McNair Practicum: Principles and Practices of University Teaching

Teaches the core principles of pedagogy at the university level and provides students guidance and feedback on constructing a teaching session in collaboration with a faculty mentor. Using the instructional practices of their discipline, students discuss issues university faculty encounter in their quest toward teaching excellence. The expertise of the Graduate Teacher Program, the Preparing Future Faculty Network and the Faculty Teaching Excellence Program will be drawn upon for supplemental resources, seminars and workshops. Department enforced prerequisite: ARSC 4700 and restricted to McNair Program Students.

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Special Curricula

ARSC 5000 (3) Multimedia Applications in Foreign/Second Language Education

Focuses on knowledge and skills in accessing, evaluating and integrating technology assisted, mediated material in the teaching and learning of foreign languages. Focuses on hands-on design and production of instructional software for foreign languages.

Equivalent - Duplicate Degree Credit Not Granted: ARSC 4000

Recommended: Prerequisite a language-teaching methodology course.

Additional Information: Departmental Category: Graduate-Level Courses

ARSC 5040 (1-3) Arts and Sciences Special Topics

Equivalent - Duplicate Degree Credit Not Granted: ARSC 4040

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate-Level Courses

ARSC 5050 (3) Graduate Seminar on Applied Behavior Science 1

The first part of a two-semester sequence designed to introduce graduate students in the social sciences to interdisciplinary theory, concepts, and methods as applied to important social problems. Department enforced prerequisite: completion of first year of graduate work in a social science department.

Additional Information: Departmental Category: Graduate-Level Courses

ARSC 5060 (3) Graduate Seminar on Applied Behavior Science 2

The second part of a two-semester sequence designed to introduce graduate students in the social sciences to interdisciplinary theory, concepts, and methods as applied to important social problems.

Department enforced prerequisite: ARSC 5050.

Additional Information: Departmental Category: Graduate-Level Courses

Asian Studies (ASIA)

Courses

ASIA 1000 (3) Origins of Contemporary Southeast Asia

Explores the dynamic present of Southeast Asia in light of its complex past. Introduces the shared historical experiences that have shaped diverse Southeast Asian societies, with a focus on the continuing effects of colonialism, nationalism, and globalization in the region. Examines key issues facing contemporary Southeast Asian communities, including current debates around gender, faith, human rights, democracy, development, etc. Engages with Southeast Asian literature, film, art, journalism, and museum collections from a transdisciplinary perspective.

Recommended: Prerequisite students may find some prior coursework in history, anthropology, or Asian Studies to be helpful, but this is not required.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-Global Perspective

ASIA 1700 (3) Introduction to Tibetan Civilization

Explores the dynamic history of Tibet from its early empire to the present. Offers interdisciplinary perspectives on Tibetan civilization, including arts and literature, religion and politics, society and culture. Topics include the role of Buddhism in Tibetan society from its early establishment up through the rule of Dalai Lamas, forms of myths and rituals to create a Tibetan past and sense of shared identity, the adaptation of Indic literary models, sectarian tensions and ecumenical projects, and modern identity, art and literature.

ASIA 2000 (3) Gateway to Modern Asia: Exploring Regional Connections

Introduces main themes, intellectual approaches used in Asian Studies through a transdisciplinary perspective that focuses on interactions and links between geographic regions and national boundaries. Presents Asia as a concept, a powerful imaginary geography, and historically dynamic construct that has shaped / been shaped by global patterns of economic development, nation building, war and diplomacy, colonialism and aspirations for better lives.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Social Sciences

Departmental Category: Asia Content

ASIA 2852 (3) Contemporary Southeast Asia: Environmental Politics

Examines globally pressing questions of environmental sustainability, regional inequality and development in the dynamic and heterogeneous landscapes of contemporary Southeast Asia. Focuses on interactions between histories of uneven development and contemporary debates over energy and infrastructure, food security, governance and access to land, forest and water-based resources.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 2852

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences
Arts Sci Gen Ed: Diversity-Global Perspective

ASIA 3300 (3) Sex and Gender in Asian Film and Literature

Explores issues of sex and gender in traditional and contemporary Asian cultures by looking at how sex and gendered roles are configured and play out in Asian cultures. Employs film and literary sources which reflect, subvert and act as agents of change in the dominant cultures.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

ASIA 3900 (3) Discovering Urban China: Tradition, Modernity, Nostalgia

Explores the ways Chinese cities, especially Beijing and Shanghai, are depicted in scholarly articles, films, literature and population culture in terms of tradition, modernity and nostalgia. Begins by defining the terms then discusses texts dealing with these themes. Discussions are linked to what the students observe first-hand as they explore the cities. Takes place in China.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences
Departmental Category: Asia Content

ASIA 4001 (1) Advanced Language Co-Seminar Arts and Humanities

Acts as a Co-Seminar for advanced Asian Studies students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ASIA 4002 (1) Advanced Language Co-Seminar Social Sciences

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 4200 (3) Politics of Memory and Heritage in Asia

Explores the uses of memory and heritage in the present-day politics of Asia. Examines how the past ¿ historical events, heritage sites, shared memories ¿ fuels nationalist movements, diplomatic disputes, grassroots activism, nostalgic tourism, and popular media. Delves especially into the legacies of colonialism and conflict in the region, highlighting how communities today seek justice and reconciliation in the wake of historical trauma. Engages with films, graphic novels, public art, photography, museums, monuments, archaeological sites, and more.

Recommended: Prerequisite Familiarity with Asian history, social science or humanities courses.

Grading Basis: Letter Grade

ASIA 4300 (3) Open Topics in Asian Studies

Examines selected texts on a particular topic in the Arts & Humanities. Taught by regular or visiting faculty. Topics change each term.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

ASIA 4400 (3) Open Topics in Asian Studies

Explores special social science topics in Asian Studies, including, but not limited to, social, political, economic, cultural, and international relations topics. Taught by regular or visiting faculty. Topics change each term.

Repeatable: Repeatable for up to 6.00 total credit hours.

ASIA 4448 (3) World War II in Southeast Asia

Examines World War II in Southeast Asia, emphasizing the political, social, economic, cultural, and ideological impact of the conflict. How can we define ¿Southeast Asia¿? In what ways did conflict affect men and women, soldiers and civilians, and ethnic, religious, and sexual communities? How can we understand the war as a local, regional, and global experience, with legacies for today?

Equivalent - Duplicate Degree Credit Not Granted: HIST 5448 and HIST 4448

ASIA 4500 (3) Urban Asia: Tradition, Modernity, Challenges

Explores change in urban Asia, the representation of Asian cities, and the challenges of urban life through a transdisciplinary and thematic approach using academic articles, documentaries, and literary materials. The class discusses the role of tradition, concepts of modernity, the impact of tourism, rural to urban migration, poverty, the effects of war, legacies of colonialism, and environmental challenges.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

ASIA 4830 (3) Senior Seminar in Asian Studies

Participates in a discussion seminar on topics in Asian Studies, conducts research and writes a final paper or creates a final project on an approved Asian topic, following guidelines established by the program director. Required for an Asian Studies major but open to non-Asian Study majors.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Asia Content

ASIA 4840 (1-3) Independent Study

Provides an independent study opportunity, by special arrangement with Asian Studies faculty, for students with particular Asian Studies interests.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Asian Studies (ASIA) majors only.

Additional Information: Departmental Category: Asia Content

ASIA 4842 (3) Global Frontiers in Southeast Asia

Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4842 and GEOG 5842

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

ASIA 4930 (1-6) Engage Asia: Internship in Asian Studies

Matches students with supervised internships relevant to academic topics in Asian studies. Students work with CAS faculty and internship supervisors, i.e., intern with companies or non-profits doing Asia-related business or project.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Recommended: Requisite Asian language and culture courses.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Asia Content

Astrophysical and Planetary Sciences (ASTR)

Courses

ASTR 1000 (3) The Solar System

Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1010, but without lab ASTR 1010 or ASTR 1030

Requisites: Restricted to non- Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

ASTR 1010 (4) Introductory Astronomy 1

Introduction to the night sky, planets, moons and the life in our solar system. Highlights the latest discoveries from space. For non-science majors. Some lectures may be held at Fiske Planetarium. Requires nighttime observations at Sommers-Bausch Observatory. Degree credit granted for only one of ASTR 1000 or ASTR 1010.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000, but with additional lab

Requisites: Restricted to non- Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

ASTR 1020 (4) Introductory Astronomy 2

Non-science majors learn the nature and workings of the Sun, stars, neutron stars, black holes, galaxies, quasars, structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities for nighttime observations at Sommers-Bausch Observatory. Includes recitation. Sequence link ASTR 1010. Credit granted for only one of ASTR 1020, ASTR 1200, and ASTR 1040.

Requisites: Restricted to non-Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 1030 (4) Accelerated Introductory Astronomy 1

Covers principles of modern astronomy summarizing our present knowledge about the Earth, Sun, moon, planets and origin of life. Requires nighttime observation sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Like ASTR 1000 and 1010, but taught at a higher intellectual level, including a significant amount of quantitative analysis.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1000 or ASTR 1010

Requisites: Requires prerequisite or corequisite course of MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physcal Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 1040 (4) Accelerated Introductory Astronomy 2

Covers principles of modern astronomy summarizing our present knowledge about the Sun, stars, birth and death of stars, neutron stars, black holes, galaxies, quasars, and the organization and origins of the universe. May require nighttime observing sessions at Sommers-Bausch Observatory. Required in ASTR major/minor. Includes a recitation. Taught at a higher intellectual level including a significant amount of quantitative analysis.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 and ASTR 1200

Requisites: Requires prerequisite course of ASTR 1010 or ASTR 1030 and MATH 1300 or APPM 1350 or APPM 1340 and APPM 1345 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physicl Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 1200 (3) Stars and Galaxies

Non-science majors are introduced to the nature and workings of the Sun, stars, neutron stars, black holes, interstellar gas, galaxies, quasars, plus structure and origins of the universe. Some lectures may be held at Fiske Planetarium. Offers opportunities to attend nighttime observation sessions at Sommers-Bausch Observatory.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 1020 and ASTR 1040

Requisites: Restricted to non- Astronomy (ASTR) majors only.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

ASTR 2000 (3) Ancient Astronomies of the World

Documents the numerous ways in which observational astronomy and cosmology have been features of ancient cultures. Includes naked eye astronomy, archaeoastronomy, ethnoastronomy, concepts of time, calendrics, cosmogony, and cosmology.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Diversity-Global Perspective

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

ASTR 2010 (3) Modern Cosmology-Origin and Structure of the Universe

Introduces modern cosmology to nonscience majors. Covers the Big Bang; the age, size, and structure of the universe; and the origin of the elements and of stars, galaxies, the solar system, and life.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2020 (3) Space Astronomy and Exploration

Covers physical principles of performing astronomy from space for science and exploration. The basic design of launch vehicles and spacecraft, orbital dynamics, and instruments will be described in the context of specific space missions (e.g. Hubble Telescope, Mars rovers) as well as prospects for future space observatories in orbit and on the Moon.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2030 (3) Black Holes

Black holes are one of the most bizarre phenomena of nature. Students are introduced to the predicted properties of black holes, astronomical evidence for their existence and formation, and modern ideas about space, time, and gravity.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2040 (3) The Search for Life in the Universe

Introduces the scientific basis for the possible existence of life elsewhere in the universe. Includes origin and evolution of life on Earth and the search for evidence of life in our solar system, including Mars and Jupiter's moon Europa. Discusses the conditions necessary for life and whether they might arise on planets around other stars. Credit only for this course or ASTR 3300.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 2040

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2050 (3) The Sun and Society: Living with an Active Star

Introduces non-science majors to the many ways our Sun influences life and society. Covers how the Sun generates energy, how it evolves over billions of years, how it affects Earth's climate and biology, how it produces dangerous "space weather", how we can harness its power and how life in other solar systems would depend on the properties of their Suns.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
MAPS Course: Natural Science

ASTR 2100 (3) Fundamental Concepts in Astrophysics

Covers topics in modern physics required for upper-level astrophysics and planetary science courses, including quantum mechanics, electromagnetic spectra, atomic and nuclear physics, and thermodynamics, in the context of astrophysics, planetary and space sciences. Also introduces key topics in mathematics to support these topics.

Requisites: Requires prerequisite course of PHYS 1120 or PHYS 1125 and APPM 1360 or MATH 2300 (minimum grade C-).

Grading Basis: Letter Grade

ASTR 2500 (3) Gateway to Space

Introduces the basics of atmosphere and space sciences, space exploration, spacecraft design, rocketry and orbits. Students design, build, and launch a miniature satellite on a high altitude balloon. Explores the current research in space through lectures from industry.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 1400

Requisites: Restricted to Astronomy (ASTR) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2600 (3) Introduction to Scientific Programming

Introduces principles, methods and tools of scientific programming commonly used in research. Topics include an introduction to programming in Python, data structures, numerical methods for calculus and data manipulation/visualization. Techniques covered are relevant to many technical fields but emphasis is placed on application to problems in astronomy and planetary science. Class time is split between lectures and in-lab tutorials.

Requisites: Requires prerequisite course of MATH 1300 or APPM 1350 and PHYS 1110 or PHYS 1115 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 2840 (1-3) Independent Study

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

ASTR 3300 (3) Extraterrestrial Life

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes origin and evolution of life on Earth; possibility of life elsewhere in the solar system, including Mars; and the possibility of life on planets around other stars. Department enforced prerequisite: one-year sequence in a natural science. Credit only for this course or ASTR 2040.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3300

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3400 (3) Research Methods in Astronomy

Introduces research methods in astronomy and engages students in an active research project. The research projects will vary and may include astronomical observations, data analysis, scientific programming, theoretical models and statistical inference. As part of their research, students will read scientific papers, attend local seminars and prepare oral and written research proposals and reports. Elective for ASTR majors.

Requisites: Requires prerequisite courses of ASTR 1040 and PHYS 1125 or 1120 (all minimum grade C-). Requires co-requisite or prerequisite of ASTR 2600 (minimum grade C-). Restricted to ASTR majors.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3510 (4) Observations and Instrumentation 1

Lab course in astronomical observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, basic optical design and instrumentation and statistical analysis of data, with emphasis on imaging applications. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.

Requisites: Requires a prerequisite or corequisite core of APPM 1360 or MATH 2300 and ASTR 1020 or ASTR 1040 and PHYS 1120 (all minimum grade C-). Restricted to Astrophysics (ASTR) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3520 (4) Observations and Instrumentation 2

Lab course in observation and instrumentation. Hands-on exercises include obtaining and analyzing multi-wavelength data, optical design and instrumentation, and statistical analysis, with emphasis on spectroscopy. A significant number of night time observation sessions are required. Elective for APS majors. Elective for APS minors on space available basis.

Requisites: Requires a prerequisite course of ASTR 3510 (minimum grade C-). Restricted to Astrophysics (ASTR) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3560 (3) Astronomical Instrumentation Laboratory

Teaches students aspects of astronomical instrument design in a hands-on setting. Students will learn elementary principles of geometrical optics, diffraction, light detection, signal conditioning, data acquisition and motion control, and mechanical design. Students will apply these principles working in groups to design and build optical spectrometers.

Requisites: Requires prerequisite courses of ASTR 1040 and MATH 2300 or APPM 1360 and PHYS 2170 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ASTR 3710 (3) Formation & Dynamics of Planetary Systems

Covers the origin of planetary systems and their dynamical evolution. Topics include the physics and chemistry of planetary formation, orbital mechanics and extrasolar planets. This course and ASTR 3720 and ASTR 3750 may be taken in any order. Elective for APS major and minor.

Requisites: Requires prerequisite course of PHYS 1120 and MATH 2300 or APPM 1360 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3720 (3) Planets and Their Atmospheres

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3720

Requisites: Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3730 (3) Astrophysics 1 - Stellar and Interstellar

Provides a quantitative introduction to the radiative and gravitational physics relevant to stellar and galactic astrophysics, as applied to understanding observations of stars, stellar evolution, stellar remnants and the structure of the Milky Way. Elective for APS major and minor.

Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3740 (3) Cosmology and Relativity

Special and general relativity as applied to astrophysics, cosmological models, observational cosmology, experimental relativity and the early universe. Elective for APS major and minor.

Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3750 (3) Planets, Moons, and Rings

Approaches the physics of planets, emphasizing their surfaces, satellites, and rings. Topics include formation and evolution of planetary surfaces, history of the terrestrial planets, and dynamics of planetary rings. This course and ASTR 3720 may be taken for credit in any order. Elective for APS major and minor.

Requisites: Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3760 (3) Solar and Space Physics

Explores the physical processes linking the Sun and planets, emphasizing solar radiative and particulate variability and the response of planetary atmospheres and magnetospheres. Topics include the solar dynamo, solar wind, coronal mass ejections, cosmic ray modulation, magnetospheres, aurora, the space environment, and climate variability. Elective for APS major and minor.

Requisites: Requires prerequisite courses of PHYS 2130 or PHYS 2170 or ASTR 2100 (all minimum grade C-).

Recommended: Prerequisite PHYS 3310.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3800 (3) Introduction to Scientific Data Analysis and Computing

Introduces scientific data analysis from a practical perspective. Covers statistical analysis, model fitting, error analysis, theoretical compliance and image analysis with examples from space-based and ground-based astronomy. Elective for APS major. Opened to qualified non-majors with instructor consent.

Requisites: Requires prerequisite course of ASTR 2600 and prerequisite or corequisite courses of ASTR 1020 or ASTR 1040 and PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 3830 (3) Astrophysics 2 - Galactic and Extragalactic

The second semester of a year-long introduction to astrophysical processes. The physical processes developed in ASTR 3730 are applied to topics in extragalactic astronomy, including galaxies, supermassive black holes, galaxy clusters and cosmology. Elective for APS major and minor.

Requisites: Requires prerequisite courses of ASTR 3730 and PHYS 2130 or PHYS 2170 and APPM 2350 or MATH 2400 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: upper-division undergraduate standing in physical science and upper-division undergraduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5330 and GEOL 4330 and GEOL 5330

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4500 (1-3) Special Topics in Astrophysical and Planetary Sciences

Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4800 (3) Space Science: Practice and Policy

Exposes students to current controversies in science that illustrate the scientific method and the interplay of observation, theory, and science policy. Students research and debate both sides of the issues, which include strategies and spin-offs of space exploration, funding of science, big vs. small science, and scientific heresy and fraud.

Recommended: Prerequisite one year of college level astronomy or physics.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ASTR 4840 (1-3) Independent Study

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

ASTR 4841 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

ASTR 5110 (3) Atomic and Molecular Processes

Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules.

Requisites: Restricted to graduate students only.

ASTR 5120 (3) Radiative and Dynamical Processes

An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems.

Requisites: Restricted to graduate students only.

ASTR 5140 (3) Astrophysical and Space Plasmas

Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5141

Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

ASTR 5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5150

Requisites: Restricted to graduate students only.

ASTR 5300 (3) Introduction to Magnetospheres

Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.

Requisites: Restricted to graduate students only.

ASTR 5330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 4330 and GEOL 4330 and GEOL 5330

Requisites: Restricted to graduate students only.

ASTR 5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400 and PHYS 5400

Requisites: Restricted to graduate students only.

ASTR 5410 (3) Fluid Instabilities, Waves, and Turbulence

Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary and astrophysical applications. Studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Department enforced prerequisite: ASTR 5400 or ATOC 5060.

Requisites: Restricted to graduate students only.

ASTR 5540 (3) Mathematical Methods

Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5540

Requisites: Restricted to graduate students only.

ASTR 5550 (3) Observations, Data Analysis and Statistics

Introduces multi-wavelength observational techniques, their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.

Requisites: Restricted to graduate students only.

ASTR 5560 (3) Radiative Processes in Planetary Atmospheres

Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite or corequisite: ASTR 5110.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5560

Requisites: Restricted to graduate students only.

ASTR 5700 (3) Stellar Astrophysics

Explores stellar interiors, evolution and atmospheres, with the Sun and its heliosphere being used as the closest and best-studied example of a star. Covers energy generation, transport, principles of stellar structure, stellar rotation, pulsation and evolution to supernova and compact object stages. Includes radiation transport in stellar photospheres, chromospheres, coronas, winds. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ASTR 5120.

ASTR 5710 (3) High-Energy Astrophysics

Studies astrophysics of UV, x-ray, gamma-ray and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5720 (3) Galaxies

Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble's Law, the cosmic distance scale, and the intergalactic medium. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5730 (3) Stellar Atmospheres and Radiative Transfer

Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field and solar wind. Department enforced prerequisites: ASTR 5110 and undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5740 (3) Interstellar Astrophysics

Highlights structure, dynamics and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Department enforced prerequisite: ASTR 5110.

Requisites: Restricted to graduate students only.

ASTR 5760 (3) Astrophysical Instrumentation

Covers the fundamentals underlying the design, construction and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Department enforced prerequisite: senior level undergraduate physics.

Requisites: Restricted to graduate students only.

ASTR 5770 (3) Cosmology

Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.

Requisites: Restricted to graduate students only.

ASTR 5780 (3) Mission Design and Development for Space Sciences

Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5440

Grading Basis: Letter Grade

ASTR 5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5800

Requisites: Restricted to graduate students only.

ASTR 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres - past and future.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5810 and GEOL 5810

Requisites: Restricted to graduate students only.

ASTR 5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including proto-planetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5820 and GEOL 5820

Requisites: Restricted to graduate students only.

ASTR 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and GEOL 5830

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and GEOL 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 5920 (1-6) Reading and Research in Astrophysical and Planetary Sciences

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 6000 (1) Seminar in Astrophysics

Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

ASTR 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 6050 and GEOL 6050

Grading Basis: Letter Grade

ASTR 6610 (3) Earth and Planetary Physics 1

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and PHYS 6610

Requisites: Restricted to graduate students only.

ASTR 6620 (3) Earth and Planetary Physics 2

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6620 and PHYS 6620

Requisites: Restricted to graduate students only.

ASTR 6630 (3) Earth and Planetary Physics 3

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and PHYS 6630

Requisites: Restricted to graduate students only.

ASTR 6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and PHYS 6650

Requisites: Restricted to graduate students only.

ASTR 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

ASTR 6950 (1-6) Master's Thesis**ASTR 7160 (3) Intermediate Plasma Physics**

Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 7160

Recommended: Prerequisite PHYS 5150.

ASTR 7500 (1-3) Special Topics in Astrophysical and Planetary Sciences

Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ASTR 7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ASTR 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

ATLAS (ATLS)

Courses

ATLS 1100 (3) Design Foundations

Introduces foundational principles, practices and methods of design. Emphasizes design as an expressive and creative problem solving tool. This course engages with design from a broad perspective including visual, computational, physical and auditory design practices. Through lectures, discussions and creative projects, students will gain a familiarity with the diverse applications of creative technology through design.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors only.

ATLS 1300 (4) Computational Foundations 1

Instructs non-computer science students in analyzing problems and synthesizing programs for the solution, emphasizing good engineering practices for program construction, documentation, testing, and debugging. Uses Java for programming projects. Formerly ATLS 2010.
Requisites: Restricted to TMEN, AMEN or MTAM students only.

ATLS 1710 (3) Tools and Methods for Engineering Computing

Designed for students with little or no programming background. Students learn procedural and object-oriented programming through development of games, simulations, and animations using Flash/Actionscript, VB/Excel, Java, MATLAB, and real-world applications. Activities are oriented toward smaller projects that address topics in beginning science, engineering, and mathematics courses. Students gain practical, applicable skills.

ATLS 2000 (3) The Meaning of Information Technology

Surveys the history of information technologies and modern techniques of information production, storage, transmission, and retrieval. Emphasizes understanding not only the technological transformations in interpersonal, organizational, and mass communication, but also the technological, social and political changes that underlie the movement toward a digital society.

Equivalent - Duplicate Degree Credit Not Granted: ENES 2020

Requisites: Restricted to Technology, Arts and Media (TMEN) majors, GEEN, AMEN, or (MTAM-MIN) minors or ATLAS (PATL) student group.

ATLS 2001 (3) Design Technologies: Toolkit

Introduces students to the fundamentals of creative design through digital media production. Throughout the semester, students explore a number of disciplines related to digital media including imaging, web development, animation, video production, and more. Class sessions are in lecture format and are aimed at helping students attain a strong conceptual and technical understanding of creative design.

Requisites: Requires prerequisite or corequisite course of ATLS 2000 (minimum grade C-). Restricted to PATL students.

ATLS 2002 (3) Design Technologies: Process

Introduces foundational principles, practices and methods relating to the process of creative design. Emphasis on the pre-production process as a creative problem-solving tool in order to produce innovative and interesting creative work. Through lectures, discussion and creative projects, students will gain a familiarity with diverse applications and practices related to creative technology and design.

Requisites: Requires prerequisite or corequisite courses of ATLS 2000 and ATLS 2001. Restricted to PATL students.

ATLS 2036 (3) Introduction to Media Studies in the Humanities

Serves as an introduction to media studies specifically from a humanities perspective. Studies both histories and theories of media from the 20th and 21st centuries. Touches on methodologies for undertaking media studies (including distant reading and media archaeology). Objects of study may include such topics as film, radio, social media platforms and games, as well as digital art and literature.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 2036

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ATLS 2100 (3) Image

Introduces techniques, technologies and concepts of digital image making and manipulation through lectures, projects and critiques. Focuses on digital photography, digital animation and digital video as a means to formal and expressive ends. This course also contextualizes practices and methodologies of digital imaging with historical and critical perspectives.

Requisites: Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

Grading Basis: Letter Grade

ATLS 2200 (3) Web

Introduces techniques, technologies and concepts of web design and development through lectures, projects and critiques. Focuses technically on HTML, CSS and JavaScript as the primary web technologies. Contextualizes the technical and societal implications of the Internet through historical and critical perspectives.

Requisites: Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 2300 (3) Text

Introduces technologies, terminology and histories related to the design of text within digital and analogue media. Students will learn the fundamentals of design, typography and layout through lectures, projects and critiques. The curriculum surveys significant theoretical perspectives, historical periods and significant practitioners that influence the practice of typographic design.

Requisites: Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 2519 (1-4) Special Topics in Creative Technology and Design

Analyzes special interest areas of multidisciplinary technology, arts and media research and practice.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 3100 (3) Form

Teaches the fundamentals of 3D modeling, 3D animation and 3D printing / rapid prototyping from a conceptual and sculptural perspective. Through topical lectures, technical demonstrations and creative projects the course will introduce students to the potentials of thinking and working within 3-dimensional spaces.

Requisites: Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 3110 (3) Motion

An animation-based projects course that advances student understanding of motion design in today's culture. Through active production and critical analysis, students will create new media projects and critically examine the history, social implications, and impacts of these forms of mass media.

Requisites: Requires prerequisite course of ATLS 2100 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 3173 (3) Creative Climate Communication

We generate multimodal compositions on the subject of climate change and engage with various dimensions of issues associated with sustainability. We work to deepen our understanding of how issues associated with climate change are or can be communicated, by analyzing previously created expressions from a variety of media (interactive theatre, film, fine art, television programming, blogs, performance art, for example) and then be creating our own work.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3173 and THTR 4173

Recommended: Prerequisite ENVS 1000.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Distribution-Social Sciences

ATLS 3200 (3) Sound

Introduces techniques, technologies and concepts of digital sound through lectures, projects and critiques. Focuses technically on digital sound creation, production, synthesis and interactivity. Explores various approaches to digital sound production through historical and conceptual perspectives.

Requisites: Requires prereq courses of ATLS 1100 and ATLS 1300 or INFO 1201 or CSCI 1200 or CSCI 1300 or CSCI 1320 (all min grade C). Requires prereq or coreq course of ATLS 2000 or HUEN 2020 or ENES 2020. Restricted to TMEN, GEEN, AMEN, EPEN MTAM majors or minor

ATLS 3300 (3) Object

Introduces the fundamentals of physical computing. This class is an exploration of computing that starts from the perspective that humans are fundamentally physical beings. Students will design projects that interact with humans and the physical world and will learn to integrate sensors, motors, and simple electronics into creative projects. Projects will include interactive installations, art projects, games, and audio controllers.

Requisites: Requires prerequisite courses of ATLS 1100 and ATLS 2000 and ATLS 1300 or ATLS 3000 or CSCI 1300 or CSCI 1320 (all minimum grade C). Restricted to TMEN students only.

Grading Basis: Letter Grade

ATLS 3500 (1-3) Client Projects in Creative Technology and Design

Allows undergraduate students to work on collaborative projects with faculty and with external organizations under faculty supervision. Focuses on teamwork, conceptual planning, technical design and development and working within real-world client environments. Critical skills include project research, planning, design, development, troubleshooting and presentation.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C).

ATLS 3519 (1-3) Special Topics in Creative Technology and Design

Analyzes special interest areas of multidisciplinary creative technology and design research and practice.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 3523 (3) The Art and Strategy of Science Communication: Branding Climate Change

Integrating the science of climate change and science communication with the research, strategy and execution practices of strategic communication (e.g., advertising and public relations).

Equivalent - Duplicate Degree Credit Not Granted: APRD 3523 and EBIO 3523

Grading Basis: Letter Grade

ATLS 3529 (1-3) Special Topics in Critical Perspectives in Technology

Analyzes critical perspectives in creative technology and design. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 4000 (3) Research Methods and Professional Practice

Research Methods and Professional Practice lays the foundation for students to produce culminating work in their major. In this course, students will engage in domain exploration, learn to define a research problem, utilize tools and methods for professional design research, refine presentation skills, and engage in iterative and collaborative work. This course is focused on domain research, idea validation, and prototyping in order to prepare students for a culminating semester-long Capstone project based on this research. Formerly offered as a special topics course.

Requisites: Restricted to Technology, Arts and Media (TMEN) majors only.

ATLS 4010 (4) Capstone Projects

The focus of this advanced practicum course is the development of an individual thesis project. Specific class sessions will feature a combination of lectures, demonstrations, guest speakers, lab sessions, and critiques. This course also entails group work, portfolio development, critical theoretical readings, and a significant written component.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Requires prerequisite course of ATLS 4000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors only.

ATLS 4040 (3) Game Design

Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5040

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 4112 (3) Neurohacking

Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.

Requisites: Requires prerequisite ATLS 2000 (minimum grade C). Restricted to TMEN or MTAM students.

ATLS 4120 (3) Mobile Application Development

Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5120

Requisites: Requires prerequisite course of ATLS 3000 or ATLS 1300 or CSCI 1300 or CSCI 1320 (minimum grade C-). Restricted to Technology, Arts and Media (TMEN) majors, MTAM minors or the ATLAS (PATL) student group only.

ATLS 4130 (3) Typography

This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5130

Requisites: Requires prerequisites ATLS 2200 and ATLS 2300 (both minimum grade C). Restricted to TMEN and MTAM students.

ATLS 4140 (3) Game Development

Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5140

Requisites: Requires prerequisite ATLS 4040 (minimum grade C). Restricted to MTAM or TMEN students.

ATLS 4141 (3) Color

Examines the generation and perception of colors in the context of physics, chemistry, biology, and psychology as a foundation for making. Explores the synthesis and applications of color dyes and pigments in art and design through lectures, readings, experiments, and projects.

Requisites: Requires Prerequisite ATLS 2000 (minimum grade C).

ATLS 4151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5200, MCEN 4151, MCEN 5151, CINE 4200 and ATLS 5151

Requisites: Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

ATLS 4214 (3) Big Data Architecture

Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5214

Requisites: Requires prerequisite course of CSCI 2270 or CSCI 2275 (minimum grade D-). Restricted to TMEN, MTAM, CSEN, CSCI, and ATLAS (PATL) student group only.

ATLS 4230 (3) Case Studies in Information and Communication Technology for Development

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5230

ATLS 4244 (3) Empathy and Technology

Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5244

Recommended: Prerequisite ATLS 2000.

Grading Basis: Letter Grade

ATLS 4320 (3) Mobile Application Development: Advanced Topics

Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5320

Requisites: Requires a prerequisite course of ATLS 4120 (minimum grade D-). Restricted to College of Engineering (ENGRU) undergraduates only.

ATLS 4519 (1-4) Advanced Special Topics in Creative Technology & Design

Analyzes special interest areas of multidisciplinary creative technology and design research and practice.

Repeatable: Repeatable for up to 32.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

ATLS 4529 (1-3) Advanced Special Topics: Critical Perspectives in Technology

Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5529

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to Technology, Arts and Media (TMEN) majors and (MTAM) minors, or the ATLAS (PATL) student group only.

Grading Basis: Letter Grade

ATLS 4606 (3) Critical Technical Practice

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships. Counts as Mastery in Information Science.

Equivalent - Duplicate Degree Credit Not Granted: INFO 5606, INFO 4606, and ATLS 5606

ATLS 4616 (3) Introduction to Virtual Reality

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616

ATLS 4630 (3) Web Front-End Development

Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5630

Requisites: Requires prerequisite courses of ATLS 2200 and ATLS 1300 or ATLS 3000 or CSCI 1300 or CSCI 1320 (all minimum grade C).

ATLS 4809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 5809 and CSCI 4809 and CSCI 5809

Requisites: Restricted to Technology, Arts and Media (TMEN) majors, MTAM minors, or the ATLAS (PATL) student group only.

ATLS 4889 (3) Interactive Machine Learning for Customizable and Expressive Interfaces

Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students learn to process a wide variety of input data (e.g. video and accelerometer streams) using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. Students complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5880, CSCI 4889 and ATLS 5880

Requisites: Requires prereqs of (APPM 3570 or APPM 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or MATH 4510 or MCEN 3047 or STAT 3100 or STAT 4000 or STAT 4520) and (CSCI 3002 or CSCI 3202 or CSCI 4448) (all minimum grade C-).

Grading Basis: Letter Grade

ATLS 4900 (1-3) Undergraduate Independent Study

Provides opportunities for independent study at the upper-division undergraduate level. Students work on research or a creative project guided by faculty. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of ATLS 3010 and 3020 (all minimum grade D-).

ATLS 5040 (3) Game Design

Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4040

Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to the ATLAS (PATL) student group only.

ATLS 5120 (3) Mobile Application Development

Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4120

Grading Basis: Letter Grade

ATLS 5130 (3) Typography

This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4130

Requisites: Restricted to graduate students only.

ATLS 5140 (3) Game Development

Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4140

ATLS 5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world.

Equivalent - Duplicate Degree Credit Not Granted: TLEN 5150

Requisites: Restricted to CYBR/TLEN graduate students.

ATLS 5151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ARTF 5200

ATLS 5210 (3) Global Development I

Introduces students to the theories and policy of international development. Examines the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. Focuses on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques.

Requisites: Restricted to graduate students only.

ATLS 5214 (3) Big Data Architecture

Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4214

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5220 (3) Global Development II

Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development.

Requisites: Requires prerequisite courses of ATLS 5210 (minimum grade D-). Restricted to graduate students only.

ATLS 5230 (3) Case Studies in Social Impact

Serves as foundation course for MS-ICTD program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of ICTD as an emerging area of academic focus.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4230

Requisites: Restricted to graduate students only.

ATLS 5240 (3) Technology for Social Impact Laboratory

Prepares students for the semester-long practicum. Students work in teams to design interventions that address unique socio-economic and environmental development issues. Teams will design a variety of interventions, including telehealth and distance education programs, communication networks, and pro-development policies. Topics will be chosen by teams and guided by program faculty and external domain experts.

Requisites: Requires prerequisite courses of ATLS 5230 (minimum grade D-). Restricted to graduate students only.

ATLS 5244 (3) Empathy and Technology

Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4244

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5250 (3) Technology for Social Impact Practicum

Introduces methods and models that can be employed in program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing initiatives.

Requisites: Restricted to graduate students only.

ATLS 5320 (3) Mobile Application Development: Advanced Topics

Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4320

Requisites: Requires prerequisite course of ATLS 5120 (minimum grade C).

Grading Basis: Letter Grade

ATLS 5380 (3) Future of Video: Technology, Policy, and Economics

Examines the issues that have been created by the shift from analog to digital technologies, the shift from narrowband/wideband systems to broadband systems, and the shift to converged networks (i.e. networks able to convey voice, data, image and video traffic on a common platform) based upon packet switching and Internet Protocol (IP) suite.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5480

Requisites: Requires prerequisite of CYBR 5001 (minimum grade C-).

Restricted to CYBR graduate students.

ATLS 5402 (3) Research Methods in Human-Robot Interaction

Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5402

Requisites: Restricted to graduate students only.

ATLS 5410 (3) Creative Technologies

This course gives students hands-on exposure to a wide range of technologies, including 3D printing, laser cutting, microcontrollers, sensors and programming. Through rapid prototyping and problem solving, students gain technical fluency and competence while identifying technology skills they wish to develop further.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5420 (3) Professional Seminar: Business of Creativity

This course was designed specifically to prepare students to make the most of their time in the CTD Master's Program, and to prepare them for a career within the creative technology and design professional landscape. The course helps students identify career goals and mentors, and helps them position themselves for industry through course-selection, portfolio development, and projects. There is also a survey element to the course which exposes students to creative technology professionals who discuss their career paths, offer advice, and provide insight into their individual design process.

Requisites: Restricted to Atlas (ATLS) graduate students only.

Grading Basis: Letter Grade

ATLS 5430 (3) Design Methods

In this course, students will learn to develop sense-making techniques as designers. This includes framing and structuring design research, making representations to generate insights, as well as documenting and communicating processes and outcomes. The class is structured around weekly discussions and activities anchored in real-world design challenges; and it will also offer tutorials on key design skills such as rapid prototyping and visual communication.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5440 (3) Design Studio

In this course students work with both faculty and industry expert mentors on developing a semester-long group project. In small teams, students learn to develop an interactive experience that combines project design and technical execution. The class is designed to reflect a real world interactive design project experience, in which students must present and deliver a large scale completed project for demonstration/exhibition at the end of the semester.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5519 (1-3) Advanced Special Topics in Creative Technology and Design

Analyzes special interest areas of multidisciplinary in creative technology and design research and practice.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATLS 5529 (1-3) Advanced Special Topics: Critical Perspectives in Technology

Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4529

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5606 (3) Critical Technical Practice

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships. Counts as Mastery in Information Science.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ATLS 5610 (6) Startup Practicum

Presumes that entrepreneurship can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerses students in the daily leadership and innovation challenges of the startup environment and serves as a clinic in thinking, decision making and mental agility that will benefit any area of business—not just startups.

Requisites: Restricted to graduate students only.

ATLS 5616 (3) Introduction to Virtual Reality

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616, ATLS 4616, CSCI 5616

ATLS 5620 (3) User-Experience Design 1

Emphasizes that user-centered design is the first and primary consideration in the design process. UCD teaches how to design successful interactions from research into users' behaviors, attitudes and expectations via three key elements to designing successful user experiences: 1) Listen, Observe, and Research; 2) Concept and Design for Your Users; 3) Deliver/Launch.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 5630 (3) Web Front-End Development

Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4630

Requisites: Restricted to graduate students only.

ATLS 5640 (4) Design Thinking

Explores design thinking and how it can be applied conceptually and practically to innovation in areas as diverse as business organization and product development to topics and areas including but not limited to, story, design, UX, interaction design, communication strategy and presentation. Fast-paced, project-based, and immersive, students will work in small teams to discover solutions to real-world problems.

Requisites: Restricted to graduate students only.

ATLS 5650 (3) Introduction to Programming

Provides a hands-on introduction to programming logic, environments, and execution using Ruby as the primary programming language. Covers basic programming principle, syntax, design patterns, and best industry practices while focusing on developing elegant, problem-solving skills through code.

Requisites: Restricted to graduate students only.

ATLS 5660 (3) Creative Code

Exposes students to front-end, web-based design and development processes and best practices. WordPress will be used as the back end CMS. Students will learn how to design and develop using WordPress as a framework. At the end of the semester, students will present a final project to illustrate what they have learned and the logic of their build.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites: exposure to HTML, CSS, JavaScript, PHP and MySQL and previous experience with WordPress for blogging and/or content publication.

ATLS 5670 (3) Content Strategies

Experiments with different frameworks on how to combine messaging with creative to communicate complex ideas, brand story, product, and finally measure success. Gain experience and expertise with the various content types and channels, with an understanding of how to apply them and the capabilities to do so in solving creative and business problems.

Requisites: Restricted to graduate students only.

ATLS 5680 (3) Creative Tech Studio

Emphasizes fundamentally, theoretically, and practically that technology and creativity are not opposing disciplines but rather a dynamic and complementary blending of idea and execution that is iterative and evolving through the dynamic exchange and interaction of ideas and tools. Each Studio will offer a different conceptual challenge, such as using technology to bridge physical and digital environments, game design, or storytelling.

Repeatable: Repeatable for up to 12.00 total credit hours.

Grading Basis: Letter Grade

ATLS 5720 (3) User-Experience Design 2

Expands on techniques and opportunities presented in User-Experience Design 1 with a deeper dive into research and prototyping practices as means to insight into user desires and preference, adoption, and execution of product and branded experiences in a variety of contexts and locations within the global experience economy.

Requisites: Requires prerequisite course of ATLS 5620 (minimum grade C).

ATLS 5730 (3) Front-End Development 2

Requires that students are proficient in front-end environment and ready for advanced front-end development using these tools - HTML 5, CSS3, JS - on weekly projects, a mid-term project, and a final project. This course develops more robust and elegant uses of the semantic use of elements as well as the benefits of using standards-based, valid code, CSS efficiencies, and JS and its libraries.

ATLS 5740 (3) Design Thinking 2

Presents visual thinking as a complex process that can be supported in every stage using specific design techniques. Provides practical, task-oriented information for designers and software developers charged with design responsibilities, including examples of integrated text and full-color data stories, all of which are robust in principles of "active vision," viewing graphic designs as cognitive tools.

ATLS 5809 (3) Computer Animation

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4809 and CSCI 4809 and CSCI 5809

Requisites: Restricted to graduate students only.

ATLS 5880 (3) Interactive Machine Learning for Customizable and Expressive Interfaces

Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.

Equivalent - Duplicate Degree Credit Not Granted: ATLS 4889, CSCI 4889 and CSCI 5880

Requisites: Requires prereqs (CSCI 3022 or APPM 4570 or APPM 3570 or APPM 4520 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or MCEN 4120) (CSCI 3002 or CSCI 3202 or CSCI 4448) all min grade C-. Restricted to grad students in the ATLAS program.

Grading Basis: Letter Grade

ATLS 5900 (1-6) Masters Level Independent Study

Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATLS 6519 (1-3) Advanced Special Topics in Creative Technology and Design

Analyzes special interest areas of multidisciplinary in creative technology and design research and practice.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATLS 6910 (3-6) Social Impact Practicum

This practicum allows Social Impact MS students to synthesize what they have learned and test their readiness for a career in Social Impact. Practicum assignments are arranged under the supervision of the MS Program Director and involve work with a non-governmental organization, development agency or technology/policy entity. Successful completion is required for graduation from the Social Impact MS Program.

Requisites: Requires prerequisite courses of ATLS 5210 and ATLS 5220 and ATLS 5230 and ATLS 5240 and ATLS 5250 (all minimum grade D-).

ATLS 6920 (3) Creative Industries Final Project

This course allows MS-CTD students to synthesize what they have learned and test their readiness for a career in the creative technologies and design field. Through this class students work with an academic and/or industry mentor to create a capstone final project emblematic of their focus during their master degree studies. Students learn to propose and scope work, adhere to budget constraints and time schedules, communicate their work, and create a final end deliverable that is presented to the larger ATLAS community. This final project is meant to serve as a culminating portfolio project that helps position students for industry after graduation. Successful completion is required for graduation from the MS-CTD Program.

Requisites: Restricted to Tech, Media and Society (ATLS) master's degree students only.

ATLS 7000 (1) ATLAS Colloquium

This student/faculty seminar critically examines issues in technology, media and society from the multiple interdisciplinary perspective of the gathered participants. Topics may include: IT and business, security, ethics, globalization, digital divide, IT and education, human computer interaction and others. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

ATLS 7800 (2) Online Course Design for the Foreign Languages

Learn about the challenges and affordances of designing online foreign languages courses. Read research articles and book chapters pertaining to instructional design issues and online teaching strategies. Experiment with the latest forms of educational technologies. Students enrolled in the course will design and teach a two-week online language course. Department enforced prerequisite: two years of language teaching experience at the college level.

Grading Basis: Pass/Fail

ATLS 7900 (1-6) Doctoral Level Independent Study

Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 8990 (1-10) Doctoral Dissertation

Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Atlas (ATLS) graduate students only.

Atmospheric and Oceanic Sciences (ATOC)

Courses

ATOC 1050 (3) Weather and the Atmosphere

Introduces principles of modern meteorology for nonscience majors, with emphasis on scientific and human issues associated with severe weather events. Includes description, methods of prediction, and impacts of blizzards, hurricanes, thunderstorms, tornadoes, lightning, floods, and firestorms.

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science

ATOC 1060 (3) Our Changing Environment: El Nino, Ozone, and Climate

Discusses the Earth's climate for nonscience majors, focusing on the role of the atmosphere, oceans, cryosphere and land surface. Describes the water cycle, atmospheric circulations and ocean currents, and how they influence global climate, El Nino and the ozone hole. Discusses human impacts from climate change.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 1060

Recommended: Prerequisite ATOC 1050.

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 1070 (1) Weather and the Atmosphere Laboratory

Illustrates fundamentals of meteorology with laboratory experiments. Covers collection, analysis and discussion of data related to local weather. Uses computers for retrieval and interpretation of weather data from Colorado and across the U.S. Optional lab for ATOC 1050.

Recommended: Prerequisite or corequisite ATOC 1050.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

ATOC 2050 (3) Introduction to Atmospheric Research

Uses real world data to investigate the basic physical processes that drive the coupled atmosphere-ocean system (e.g., energy distribution, phase changes, stability, winds and currents). Students will apply logic to predict how processes are impacted as different environmental characteristics change and develop skills in graphical literacy, investigative thinking, societal and personal relevancy, and communication.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 2500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Lower Division

Acquaints students at the lower division level with current research in atmospheres, oceans and climate (Topics may vary each semester). Students may register for more than one section of this course in the same semester. Recommended restriction: students with 0-56 credits (Freshmen or Sophomores).

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite or corequisite will vary depending on topic.

ATOC 3050 (3) Principles of Weather

Explores the processes that influence middle latitude weather including atmospheric thermodynamics, cloud and precipitation processes, atmospheric dynamics, air masses and fronts, and mid-latitude cyclones. Recitations and homework assignments will allow students to apply these concepts to real weather data through analysis of weather maps, thermodynamics diagrams and conceptual models.

Recommended: Prerequisites ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3070 (3) Introduction to Oceanography

Explores Earth's dynamic oceans. Discusses the disciplines of oceanography including marine geology, chemistry, biology and physical oceanography with emphasis on global change. Specific topics may include: tectonics, currents, biogeochemical cycles, ecology and global warming.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 3070

Recommended: Prerequisite any 1000-level ATOC or GEOL course or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3180 (3) Aviation Meteorology

Familiarizes students with a wide range of atmospheric behavior pertinent to air travel: rudiments of aerodynamics; aircraft stability and control; atmospheric circulation, vertical motion, turbulence and wind shear; fronts, clouds and storms.

Recommended: Prerequisite ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3300 (3) Analysis of Climate and Weather Observations

Discusses instruments, techniques and statistical methods used in atmospheric observations. Covers issues of data accuracy and analysis of weather maps. Provides application to temperature and precipitation records, weather forecasting and climate change trends. Uses computers to access data sets and process data.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3301

Recommended: Prerequisites ATOC 1050 or ATOC 1060 or ATOC 3600 or GEOG 3601 or ENVS 3600 or GEOG 1001 and one semester calculus.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ATOC 3500 (3) Air Chemistry and Pollution

Examines the composition of the atmosphere and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3151

Recommended: Prerequisite one semester of college-level chemistry or one year of high school chemistry.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3600 (3) Principles of Climate

Describes the basic components of the climate system: the atmosphere, ocean, cryosphere and lithosphere. Investigates the basic physical processes that determine climate and link the components of the climate system. Covers the hydrological cycle and its role in climate, climate stability and global change.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 3601 and ENVS 3600

Recommended: Prerequisites one semester of calculus and ATOC 1060 or ATOC 3300 or GEOG 3301 or GEOG 1001 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 3720 (3) Planets and Their Atmospheres

Explores the physics and chemistry of the atmospheres of Mars, Venus, Jupiter, Saturn, and Titan. Examines evolution of the atmospheres of Earth, Venus, and Mars; and the escape of gases from the Galilean satellites, Titan and Mars; the orbital characteristics of moons, planets, and comets. Uses recent results of space exploration. Elective for APS major and minor.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 3720

Requisites: Requires prerequisite courses of PHYS 1120 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior) Astronomy (ASTR) or Atmospheric Oceanic Sciences (ATOC) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4020 (1) Seminar in Atmospheric and Oceanic Sciences

Explores current research areas; students read selected papers, give presentations and participate in discussions; fellowship and internship opportunities; discussion on practical skills necessary for academic and professional life; career-building activities with outside speakers from academia and industry. May be repeated for a total of 6 credit hours within the degree as long as the topic is different. May be repeated for a total of 3 credit hours within a semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ATOC 4200 (3) Biogeochemical Oceanography

Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5200

Recommended: Prerequisites one semester of calculus and one semester of chemistry.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4500 (1-3) Special Topics in Atmospheric and Oceanic Sciences - Upper Division

Acquaints students at the upper division level with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Recommended restriction: students with 57-180 credits (Juniors or Seniors).

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites and corequisites: will vary depending on topic.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4550 (3) Mountain Meteorology

Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5550

Recommended: Prerequisite ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4700 (3) Weather Analysis & Forecasting

Utilizing a range of operational weather observations to analyze current weather conditions, providing hands-on experience interpreting observations and relating those observations to the physical principles that govern atmospheric behavior is the course emphasis. It focuses on how to read weather reports, analyze observations, and how to prepare weather maps to analyze current conditions and how to interpret numerical weather forecasts.

Recommended: Prerequisite ATOC 1050 or ATOC 1060 or ATOC 4720 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4710 (3) Introduction to Atmospheric Physics

Provides a fundamental overview of the physics of Earth's atmosphere. Topics include atmospheric composition and structure, atmospheric radiation and optics (rainbows, halos and other phenomena), atmospheric thermodynamics, cloud physics and atmospheric electricity and lightning. Including both descriptive and quantitative approaches to the subject material. Where applicable, observations from the ATOC Skywatch Observatory will be introduced.

Recommended: Prerequisite one year of calculus and one year of physics with calculus.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4720 (3) Atmospheric Dynamics

Introduces the fundamental physical principles that govern the atmospheric circulations across a range of spatial and temporal scales and provides a quantitative description and interpretation of a wide range of atmospheric phenomena. Topics include atmospheric forces, governing equations, balanced and unbalanced flows, atmospheric waves and mid-latitude cyclones.

Recommended: Prerequisite one year of calculus and one semester of physics with calculus.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4730 (3) Physical Oceanography and Climate

Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5730

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4750 (3) Desert Meteorology and Climate

Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5750

Recommended: Prerequisites one semester of calculus and ATOC 1050 or ATOC 1060 or ATOC 3600 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4770 (3) Renewable Energy Meteorology

Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5770

Recommended: Prerequisite ATOC 1050 or ATOC major.

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4780 (3) Ice Sheets and Climate

Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5780

Recommended: Prerequisite Basic programming experience (python, Matlab, or equivalent), basic knowledge of calculus, basic knowledge of algebra and at least one ATOC course at the 1000, 2000, or 3000 level with a grade of C- or higher.

ATOC 4800 (3) Policy Implications of Climate Controversies

Examines controversial issues related to the environment, including climate change. Covers scientific theories and the intersection between science and governmental policy. Includes discussion, debate and critical reading of textual materials. Department enforced prerequisite: ATOC 1060 or ATOC 3600.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5000 and ENVS 5830

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4815 (3) Scientific Programming, Data Analysis and Visualization Laboratory

Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5815

Recommended: Requisites prior experience with Python or a basic programming course such as CSCI 1300 or equivalent, basic knowledge of calculus and algebra.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4830 (3) Remote Sensing Lab

Fundamentals of remote sensing of the atmosphere and ocean including fundamentals of atmospheric radiation and inverse methods for deriving geophysical variables from measurements. Principles of satellite and ground-based active (lidar and radar) and passive remote sensing methods, instrumentations, and applications. Lectures will include both descriptive and quantitative approaches to the subject material and include in-class demonstrations and measurements and data from the ATOC Skywatch Observatory and NASA satellites.

Recommended: Prerequisites one year of calculus and one year of physics with calculus.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ATOC 4840 (3) Field Observations and Measurements Laboratory

This course introduces students to all aspects of observing the atmospheric state including issues associated with observational and instrument errors, planning and executing measurement campaigns and analyzing and presenting results based on data collected during field campaigns. During the semester students will plan, conduct and analyze data from two atmospheric field campaigns conducted near Boulder, CO using a suite of meteorological sensors.

Recommended: Prerequisites ATOC 1050 or ATOC 3050.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ATOC 4850 (3) Numerical Methods Laboratory

Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5850

Recommended: Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

ATOC 4870 (3) Climate Modeling Laboratory

Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy. This course is aimed at upper level undergraduate students.

Recommended restriction: Junior or Senior ATOC students.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5870

Recommended: Prerequisite Experience with programming, Calculus, Differential Equations and Linear Algebra.

ATOC 4875 (3) Weather Modeling Laboratory

In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Recommended restriction: Junior or Senior class standing. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5875

Requisites: Requires prerequisite course of ATOC 1050 or ATOC 3050 or ATOC 4700 or ATOC 4710 or ATOC 4720 (all minimum grade C-).

Recommended: Prerequisite Experience with computer science and data visualization such as ATOC 4815 and some experience with Unix/Linux.

ATOC 4880 (3) Mesoscale Meteorology

Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course. Recommended restriction: Senior or Fifth-Year Senior standing.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5880

Recommended: Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one ATOC fundamental or core course, preferably ATOC 3050 or ATOC 4720.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

ATOC 4890 (3) Synoptic Dynamic Meteorology

Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Recommended restriction: Junior and Senior-level students.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5890

Recommended: Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

ATOC 4900 (1-3) Independent Study

Department enforced prerequisite: instructor consent.

Repeatable: Repeatable for up to 6.00 total credit hours.

ATOC 4950 (1-3) Honors Thesis

Students work independently on a research topic under the guidance of a faculty member. A written thesis and an oral presentation of the work are required. Registration by arrangement and with consent of faculty mentor. Department enforced prerequisite: minimum 3.00 GPA.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sciences Honors Course

ATOC 4990 (1-3) Internship

This course is designed to provide junior and senior ATOC majors with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work. 0.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Students should have junior or senior standing (at the time of the internship) and have a minimum cumulative GPA of 2.

ATOC 5000 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ENVS 5830

Requisites: Restricted to graduate students only.

ATOC 5050 (3) Atmospheric Thermodynamics and Dynamics

Covers atmospheric thermodynamics and dynamics and the underlying governing laws and mathematical and physical principles. Topics include atmospheric composition and thermodynamics, conservation laws and atmospheric governing equations, geostrophic balance and balanced flows, vorticity dynamics and boundary layers. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one year of calculus-based physics and math through differential equations.

ATOC 5051 (3) Introduction to Physical Oceanography

Provides fundamental knowledge of observations, theory, dynamics and modeling in physical oceanography. Promotes critical thinking and the development of skills for data analysis and interpretation. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites one year of calculus-based physics and math up through differential equations.

ATOC 5060 (3) Dynamics of the Atmosphere and Oceans

Examines large-scale motions in a stratified rotating atmosphere and ocean, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations and boundary layer processes.

Ageostrophic motions, including Kelvin waves, internal gravity waves and the theory of frontogenesis are also considered. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 5050, one year of calculus-based physics and math up through differential equations.

ATOC 5061 (3) Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms

Explores the existing theories of the El Niño and Southern Oscillation (ENSO) ocean-atmosphere coupled mechanisms, theory of the thermocline in a quasi-geostrophic system, and dynamics of the Atlantic Meridional Overturning Circulation (AMOC). Covers physical mechanisms, associated mathematical equations, and numerical model simulations. Discusses their direct research applications in understanding the past, present and future climate variability and change. Offered once per year.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ATOC 5400, ATOC 5051 or ATOC 5060 and one year of calculus-based physics and math including differential equations.

ATOC 5151 (3) Atmospheric Chemistry

Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere and global climate change. ATOC graduate core course.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5151

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one semester of college-level chemistry.

ATOC 5152 (3) Advanced Atmospheric Chemistry

Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5152

Recommended: Prerequisite CHEM 5151 or ATOC 5151.

Grading Basis: Letter Grade

ATOC 5200 (3) Biogeochemical Oceanography

Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4200

Requisites: Restricted to graduate students only.

ATOC 5215 (3) Descriptive Physical Oceanography

Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.

Requisites: Restricted to graduate students only.

ATOC 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Department enforced prerequisites: one year of calculus-based physics, and math up through differential equations.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5235

Requisites: Restricted to graduate students only.

ATOC 5300 (3) The Global Carbon Cycle

Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate.

Requisites: Restricted to graduate students only.

ATOC 5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5400 and PHYS 5400

Requisites: Restricted to graduate students only.

ATOC 5500 (1-3) Special Topics in Atmospheric and Oceanic Sciences

Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Formerly ATOC 7500.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATOC 5540 (3) Mathematical Methods

Applied mathematics course; provides necessary analytical background for courses in plasma physics, fluid dynamics, electromagnetism, and radiative transfer. Covers integration techniques, linear and nonlinear differential equations, WKB and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5540

Requisites: Restricted to graduate students only.

ATOC 5550 (3) Mountain Meteorology

Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4550

Requisites: Restricted to graduate students only.

ATOC 5560 (3) Radiative Processes in Planetary Atmospheres

Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite: ATOC 5235.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5560

Requisites: Restricted to graduate students only.

ATOC 5600 (3) Physics and Chemistry of Clouds and Aerosols

Examines the physics and chemistry of clouds and aerosols in the planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing and weather. Applies basic microphysical, radiative and chemical processes affecting particles to issues in current literature. ATOC graduate core course.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one semester of college-level chemistry and calculus-based physics and math up through differential equations.

ATOC 5730 (3) Physical Oceanography and Climate

Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4730

Requisites: Restricted to graduate students only.

ATOC 5750 (3) Desert Meteorology and Climate

Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4750

Requisites: Restricted to graduate students only.

ATOC 5770 (3) Wind Energy Meteorology

Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4770

Requisites: Restricted to graduate students only.

ATOC 5780 (3) Ice Sheets and Climate

Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4780

Requisites: Restricted to graduate students only.

Recommended: Prerequisites Basic knowledge of calculus, algebra and programming experience (python, Matlab, or equivalent).

ATOC 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Also includes origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres past and future.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5810 and GEOL 5810

Requisites: Restricted to graduate students only.

ATOC 5815 (3) Scientific Programming, Data Analysis and Visualization Laboratory

Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4815

Requisites: Restricted to graduate students only.

ATOC 5820 (3) Origin and Evolution of Planetary Systems

Reviews protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets and asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the orbital evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5820 and GEOL 5820

Requisites: Restricted to graduate students only.

ATOC 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5830 and ASTR 5830

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

ATOC 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5835 and GEOL 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

ATOC 5850 (3) Numerical Methods Laboratory

Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4850

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of/interest in atmospheric, oceanic, climatic, or cryospheric physics.

ATOC 5860 (3) Objective Analysis Data Laboratory

Teaches the extraction of information from data using statistical methods via a computer program. The goals of this course are: 1) to learn and apply tools to objectively analyze atmospheric and oceanic data, 2) to critically evaluate research using these tools. The course covers hypothesis testing, compositing, regression, principal component analysis, time series analysis, filtering, and data assimilation. This learning-by-doing course is aimed at advanced graduate students conducting ATOC-related research.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 4810 or 5810, and familiarity with linear algebra, basic calculus, github and jupyter.

ATOC 5870 (3) Climate Modeling Laboratory

Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4870

Requisites: Restricted to graduate students only.

ATOC 5875 (3) Weather Modeling Laboratory

In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4875

Requisites: Restricted to graduate students only.

Recommended: Prerequisite Experience with computer science and data visualization and some experience with Unix/Linux is recommended.

ATOC 5880 (3) Mesoscale Meteorology

This course provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4880

Requisites: Restricted to graduate students only.

Recommended: Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one fundamental ATOC course.

ATOC 5890 (3) Synoptic Dynamic Meteorology

Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4890

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

ATOC 5900 (1-6) Independent Study

Students may register for more than one section of this course in the same semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATOC 5930 (1-3) Internship

This course is designed to offer ATOC graduate students with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite Minimum of 3.00 cumulative GPA.

ATOC 6020 (1) Seminar in Atmospheric and Oceanic Sciences

Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ATOC 6100 (3) Modeling Weather and Climate

Discusses background theory and procedures used for modeling climate on a variety of space and time scales. Includes numerical simulation of weather and climate with models in a hierarchy of complexity, assessments of error growth, prediction of circulations and impact of radiative and other influences. Explores various numerical methods, develops core computing skills and considers data handling and visualization. Consists of a combination of lectures and laboratory.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 5050 or calculus.

ATOC 6700 (1) Weather Forecasting and Discussion

Explores the techniques used to make short-term weather forecasts in the mid-latitudes using real-time weather observations, numerical forecast model output and conceptual models of mid-latitude weather phenomena. Students will be required to develop and defend conceptual models of the short-term evolution of the weather and will conduct detailed post-forecast analysis of successful and unsuccessful forecasts.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite ATOC 5050.

ATOC 6800 (3) Scientific Writing

Writing is the core of how we communicate our scientific findings. Successful science writing tells a compelling story and makes it easy for the reader to understand our results and their implications. In this hand-on class, student use their own research results to work on developing scientific writing skills that will increase the impact of their papers as well as make writing more enjoyable by learning how to approach the writing and editing process. Department enforced requisite: Students need to have their own research results first and at least one main conclusion from it in order to take this class.

Requisites: Restricted to graduate students only.

ATOC 6940 (1) Master's Candidate for Degree

Master's Candidate for Degree

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

ATOC 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

ATOC 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to graduate students only.

Baker Residential Academic Program (BAKR)

Courses

BAKR 1500 (3) Colorado: History, Ecology, and Environment

Studies the Colorado environment from multiple aspects of history and ecology. Presents historical events in their environmental context and examines lingering environmental consequences. Presents major habitats within Colorado and relates their historical and present uses. Lecture and field trips.

Additional Information: Arts Sci Core Curr: United States Context
Arts Sci Gen Ed: Distribution-Arts Humanities

BAKR 1600 (3) Creating a Sustainable Future

Explores opportunities for moving toward a sustainable 21st century U.S. society. Evaluates socio-economic institutions, values and forces in late 20th century U.S. society that are unsustainable, given 21st century environmental, economic and social challenges. Contemplates societal progress from reflective perspectives and leading visionaries, including CU-generated documents. Explores actions you can adopt now that empower you to live a more sustainable lifestyle.

Additional Information: Arts Sci Core Curr: Contemporary Societies
Arts Sci Gen Ed: Distribution-Social Sciences

BAKR 1800 (3) Exploring Opportunities in the Natural and Environmental Sciences

Engaging students to explore and discover exciting internships, careers, and research opportunities in fields associated with natural science and environmental studies. The class will include seminars, lectures, student presentations, and the exploration of places like the Denver Zoo, natural science museums (Denver and CU campus), Mountain Research Station, Campus Greenhouse, Butterfly Pavillion and Rocky Mountain National Park.

BCOR Applied Semester Experience (BASE)

Courses

BASE 2104 (6) BCOR Applied Semester Experience

Focuses on major business decisions integrating across business functional areas. Students complete multiple business projects drawing on knowledge and tools from previous BCOR courses.

Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all minimum grade D-). Restricted to BUSN majors with 26-180 units completed.

Recommended: Corequisites BCOR 2301 2302, 2303 and 2304.

Grading Basis: Letter Grade

Biochemistry (BCHM)

Courses

BCHM 1020 (1) A Path to Success: Introduction to the Biochemistry Major

This course will help students navigate their first year of college and develop the skills needed for academic success as Biochemistry majors. Students will improve academic strategies (i.e. time management, problem-solving and study skills), identify available campus resources, learn how to get involved in clubs and gain research experience, and explore career opportunities as a biochemistry graduate. This is a first-year elective course specifically designed for first year and other students exploring their educational and career opportunities.

Recommended: New BCHM majors.

Grading Basis: Pass/Fail

BCHM 1041 (3) Biotechnology and Society

Covers recent advances in biotechnology and how those impact society. Content and discussion will focus on both the science behind technological advances, their impact on society, and the ethical issues raised by new technologies. Topics change each semester but can include: GMO crops, genome editing, drug discovery and development, stem cell therapies, development and use of new cancer treatments, human genome sequencing and its impact on diagnosis and treatments, human microbiome, neurodegenerative diseases. Formerly CHEM 1041.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 1701 (1) Biochemistry Program for Research Exploration and Planning

Biochem PREP is focused on developing first and second year student interest and engagement in undergraduate research. The program is designed to present participants with mentorship and opportunities to identify whether research is an opportunity students wish to participate in, and if so, get students connected to potential research opportunities. Participants will be provided with a cohort of their peers to explore and plan for research together through preparation workshops, research information sessions, and mentorship. The ultimate goal of the program is for participants to understand their research interests, possess the necessary skills to identify and obtain a research opportunity, and develop community with their peers and the Department of Biochemistry at large.

Requisites: Restricted to Biochemistry (BCHM) majors and minors only.

Grading Basis: Pass/Fail

BCHM 2700 (4) Foundations of Biochemistry

Covers chemistry of aqueous solutions; energetics in biology; structure of proteins, nucleic acids, carbohydrates, and membranes; protein evolution; macromolecular interactions; enzyme kinetics, mechanism and regulation. Will be taught from a strong chemical perspective and mastery of basic concepts of general and organic chemistry will be required. Familiarity with basic concepts of molecular and cellular biology encouraged. Formerly CHEM 4700.

Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-). Restricted to Biochemistry (BCHM) majors and minors only.

BCHM 3491 (4) Organic Chemistry 2 for Biochemistry Majors

Covers amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanism. Department enforced corerequisite: CHEM 3341 or CHEM 3381. Formerly CHEM 3491.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 and CHEM 3331

Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4312 (3) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4312, MCDB 5312 and BCHM 5312

Grading Basis: Letter Grade

BCHM 4400 (4) Core Concepts in Physical Chemistry for Biochemists

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Department enforced prerequisite or corequisite: PHYS 1120 or PHYS 2020. Formerly CHEM 4411.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5400 and CHEM 4511

Requisites: Requires prerequisite courses BCHM 2700 or BCHM 4611 or BCHM 4700 or and PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4491 (3) Modern Biophysical Methods

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic physical); physics; calculus.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5491

Requisites: Requires prerequisite courses of PHYS 1110 or PHYS 2010 and MATH 2300 or APPM 1360 and BCHM 2700 or BCHM 4700 or BCHM 4611 (all minimum grade C).

Recommended: Prerequisite or corequisite BCHM 4400 or CHEM 4531.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4611 (3) Principles of Biochemistry

One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry. Formerly CHEM 4611.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5611

Requisites: Requires prerequisite course of CHEM 3311 or CHEM 3451 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4621 (3) Genome Databases: Mining and Management

Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4621, MCDB 5621 and BCHM 5621

Requisites: Requires prerequisite course of BCHM 2700 or BCHM 4700 or CSCI 3104 or MCDB 3500 (minimum grade C-).

Recommended: Prerequisite MCDB 3135 or CSCI 3104 or BCHM 2700 and recommended corequisite of CSCI 2270.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4631 (3) Statistical and Computational Analysis of the Human Genome

This lab course covers fundamental statistical and computational approaches to large scale data. Students will learn the unix command line to: access public human genome data, learn what statistics apply to which types of data and apply them to study specific regions of the human genome involved in development and disease. This lab course will cover fundamental aspects of Virtual computing, Container analysis pipelines (e.g. NextFlow, GitHub) in an intuitive and practical learning framework.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5631

Requisites: Requires prerequisite course of BCHM 4740 or MCDB 3135 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4720 (4) Metabolic Pathways and Human Disease

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 4720.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5720

Requisites: Requires prerequisite courses of BCHM 2700 and CHEM 3331 or CHEM 3471 or BCHM 3491 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4740 (4) Biochemistry of Gene Transmission, Expression and Regulation

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 4740.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5740

Requisites: Requires a prerequisite course of BCHM 2700 or CHEM 4700 (minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4751 (3) Current Topics in Biochemical Research

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Formerly CHEM 4751.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5751

Requisites: Requires prerequisite courses of MCDB 3135 or BCHM 4700 or BCHM 2700 and BCHM 4740 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4761 (3) Biochemistry Laboratory

Two 4-hour periods per week. Introduction to modern biochemical techniques. Topics include enzymology, spectrophotometry, electrophoresis, multi-step protein purification, recombinant DNA techniques and molecular cloning. Formerly CHEM 4761.

Requisites: Requires prerequisite courses of BCHM 2700 or CHEM 4700 and CHEM 3341 or 3381 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

BCHM 4901 (1-6) Independent Study in Biochemistry

For undergraduate study. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

BCHM 5312 (3-4) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5312, MCDB 4312 and BCHM 4312

Grading Basis: Letter Grade

BCHM 5341 (3) Chemical Biology and Drug Design

Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical and other research-oriented industries as well as in academia. Department enforced prerequisites: introductory organic chemistry and general biochemistry. Formerly CHEM 5341.

Requisites: Restricted to graduate students only.

BCHM 5400 (4) Core Concepts in Physical Chemistry for Biochemists

Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5400.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4400 and CHEM 4511

Requisites: Restricted to graduate students only.

BCHM 5491 (3) Modern Biophysical Methods

Covers the basic theory of biophysical methods widely employed in biochemistry and biology, including: electrophoresis, mass spec, calorimetry, evanescent waves, plasmon resonance, X-ray diffraction, absorbance and fluorescence spectroscopy, magnetic resonance, electron and optical microscopy and single molecule methods. Discusses ways to maximize rigor and reproducibility in biophysical studies. Department enforced prerequisites: undergraduate chemistry (general, organic, physical), biochemistry, physics, calculus.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4491

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

BCHM 5611 (3) Principles of Biochemistry

One-semester overview of the main themes of modern biochemistry: biomolecular structure/function, metabolism, biosynthesis, DNA from genome to proteome and cellular signaling. For biology and engineering majors and others wanting an overview of biochemistry.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4611

BCHM 5621 (3) Genome Databases: Mining and Management

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5621, MCDB 4621 and BCHM 5621

Requisites: Restricted to graduate students only.

BCHM 5631 (3) Statistical and Computational Analysis of the Human Genome

This lab course covers fundamental statistical and computational approaches to large scale data. Students will learn the unix command line to: access public human genome data, learn what statistics apply to which types of data and apply them to study specific regions of the human genome involved in development and disease. This lab course will cover fundamental aspects of Virtual computing, Container analysis pipelines (e.g. NextFlow, GitHub) in an intuitive and practical learning framework.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4631

BCHM 5661 (3) Advances in Molecular Biophysics

Discuss recent literature concerning biophysical studies of macromolecular structure and mechanism, including DNA, RNA, proteins, and their interactions.

Recommended: Prerequisites one year of physical chemistry or quantum mechanics, one year of biology, graduate standing, or instructor consent.

BCHM 5720 (4) Metabolic Pathways and Human Disease

Covers energy metabolism and anabolic/catabolic pathways; metabolism of carbohydrates, lipids, amino acids, and nucleic acids; photosynthesis; special topics on human diseases with pathologies and metabolic pathways. Formerly CHEM 5720.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4720

Requisites: Restricted to graduate students only.

BCHM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation

Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 5740.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4740

Requisites: Restricted to graduate students only.

BCHM 5751 (3) Current Topics in Biochemical Research

Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required. Formerly CHEM 5751.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4751

Requisites: Restricted to graduate students only.

BCHM 5770 (3) Fundamentals of Biochemistry I

Analysis of topics in biochemistry including DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, and protein structure and dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with BCHM 5771 covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5770.

BCHM 5771 (5) Advanced General Biochemistry I

Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Formerly CHEM 5771.

BCHM 5776 (1) Scientific Ethics and Responsible Conduct in Research

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 5776

Requisites: Requires prerequisite course of BCHM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

BCHM 5780 (3) Fundamentals of Biochemistry II

Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5780.

Requisites: Requires prerequisite course of BCHM 5770 (minimum grade B-). Restricted to graduate students only.

BCHM 5781 (5) Advanced General Biochemistry 2

Lect. Detailed consideration of contemporary topics in biochemistry, including protein structure (primary, secondary, tertiary, and quaternary), methods of structure determination and prediction, protein folding (kinetics, thermodynamics, denaturation, and renaturation), and protein dynamics (internal motions and methods of analysis). Formerly CHEM 5781.

Requisites: Requires prerequisite course of BCHM 5771 (minimum grade B-). Restricted to graduate students only.

BCHM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation

Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression. Formerly CHEM 5801.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210 or MCDB 5220.

BCHM 5811 (3) Advanced Methods in Protein Sequencing and Analysis

Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required. Formerly CHEM 5811.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210.

BCHM 5821 (1) Special Topics in Signaling and Cell Regulation

Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required. Formerly CHEM 5821.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 6601 (1) Biochemistry Seminar

Restricted to and required for all currently funded NIH/CU Biophysics trainees and current NIH/CU Biophysics affiliates. Credit is deferred until presentation of satisfactory seminar. Formerly CHEM 6601.

Requisites: Restricted to graduate students only.

BCHM 6711 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6711.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 6731 (3-6) Advanced Topics in Biochemistry

Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6731.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 6901 (1-6) Research in Biochemistry

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 6941 (1) Master's Candidate for Degree

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

BCHM 6951 (1-6) Master's Thesis

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

Requisites: Restricted to graduate students only.

BCHM 7601 (2) Seminar: Nucleic Acid Chemistry

Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution

Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required. Formerly CHEM 7611.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction

Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Formerly CHEM 7621.

Requisites: Restricted to graduate students only.

BCHM 7651 (2) Seminar: Environmental Biochemistry

Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7651.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7661 (1) Structure/Function of Human Mediator Transcription Complexes

Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Formerly CHEM 7661.

Requisites: Restricted to graduate students only.

BCHM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7671.

Requisites: Restricted to graduate students only.

BCHM 7691 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins

Discusses recent results and current literature in the areas of the mechanism of sensory proteins, internal motions of proteins, and protein folding. Department consent required. Formerly CHEM 7691.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics

Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotope trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7701.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7711 (1) RNA Mediated Inorganic and Organic Reactions

Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7711.

Requisites: Restricted to graduate students only.

BCHM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation

Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required. Formerly CHEM 7741.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7751 (1) Seminar: Protein Structure and Folding

Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required. Formerly CHEM 7751.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation

Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required. Formerly CHEM 7761.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BCHM 7781 (1) Seminar: Topics in Structural Biology

Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Formerly CHEM 7781.

Requisites: Restricted to graduate students only.

BCHM 7791 (1) Seminar: Topics in Ribonucleoprotein Assemblies

Studies aspects of the biochemical and structural analysis of ribonucleic acid (RNA) and its interactions with proteins and assemblies into functional ribonucleoprotein (RNP) enzymes. Techniques focus on x-ray crystallography, spectroscopic methods, and biochemical probing. Formerly CHEM 7791.

Requisites: Restricted to graduate students only.

BCHM 8991 (1-10) Doctoral Dissertation

All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Biomedical Engineering (BMEN)

Courses

BMEN 1000 (1) Exploring Biomedical Engineering

Introduces the biomedical engineering profession, curriculum, career pathways, ethics and responsibilities, and research opportunities. Academic and industry speakers are invited to address various biomedical engineering topics.

Requisites: Restricted to Biomedical Engineering (BMEN) majors only.

Recommended: Students in second semester of Biomedical Engineering curriculum or higher.

BMEN 1025 (4) Computer-Aided Design & Fabrication

Introduces engineering drawing techniques through an modern computer aided design (CAD) software, and fabrication of some of these designs. The course will begin with an introduction of spatial visualization skills, then an in-depth introduction to Solidworks, an industry standard CAD software tool, along with introduction to fabrication processes including laser cutting, 3D printing, casting and injection molding, and 3D scanning will be completed. Additional topics include geometric design and tolerancing techniques and design for manufacturing.

Requisites: Restricted to Biomedical Engineering (BMEN) majors only.

BMEN 2000 (3) Introduction to Biomedical Engineering

Reviews concepts from molecular and cellular biology. Establishes important aspects of human physiology and engineering principles to develop a basic understanding of the biomedical engineering field. Introduces topics such as biomechanics, bioinstrumentation, bioimaging and biotechnology.

Requisites: Restricted to Biomedical Engineering (BMEN) majors and minors only. Requires prerequisite or corequisite course(s) of MCDB 1150 or CHEN 2810 or EBION 1210 EBIO 1220 (minimum grade C-).

BMEN 2010 (3) Biomaterials

Introduces the science and engineering of biomaterials, with an emphasis on biomechanical aspects. Addresses the design, fabrication, testing, applications and performance of synthetic and natural materials that are used in a wide variety of biomedical prosthetics, implants and devices. In addition to attending lectures, students will conduct a laboratory experiment and a case study.

Requisites: Requires prerequisite course of CHEN 1201 or CHEN 1211 (minimum grade C-). Restricted to Biomedical Engineering (BMEN) majors only.

Recommended: Students in fourth semester of Biomedical Engineering curriculum or higher.

BMEN 3010 (3) Biotransport

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. Includes the conservation of mass and momentum; rheology of Newtonian and non-Newtonian fluids; steady and transient diffusion in reacting systems; dimensional analysis; homogeneous versus heterogeneous reaction systems; and physiological transport systems, including oxygen and drug transport.

Requisites: Requires prerequisite of BMEN 2000 and CHEN 1310 or CSCI 1300 or ECEN 1310 and PHYS 1110, and pre or corequisite of APPM 2360 or MATH 2130 and 3430 (all minimum grade C-). Restricted to Biomedical Engineering (BMEN) major students.

Recommended: for students in fifth semester of Biomedical Engineering curriculum or higher.

BMEN 4840 (1-3) Independent Study

Provides opportunities for independent study at the undergraduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN) majors only.

BMEN 5840 (1-6) Independent Study

Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN-MS) graduate students only.

BMEN 6950 (1-6) Master's Thesis

Work with a faculty advisor on a masters thesis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN-MS) graduate students only.

BMEN 8990 (1-10) Doctoral Dissertation

Work with a faculty advisor on a doctoral dissertation.

Repeatable: Repeatable for up to 60.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

Business Administration (BADM) Courses

BADM 1250 (1.5) Designing Your Leeds

Designing Your Leeds is a class about customizing your college experience to get the most out of it. Using a process rooted in Design Thinking, the course equips students with tools to design and prototype a college experience that best aligns with who they are and what they hope to get from college. Students will explore the purpose of college, reflect on personal values and strengths, learn about educational and career opportunities, and create a prototype of their 4 year experience. Through in-class activities and out of class assignments, students will also learn and practice professional and self-leadership skills.

Requisites: Restricted to Business (BUSNU) majors only.

Grading Basis: Pass/Fail

BADM 1260 (2) First-Year Global Experience

In today's world of increased mobility, globally aware students have more choices for employment upon graduation and are immediately ready to contribute in global environments. They are aware of global issues and cultural differences, and their global mindset allows them to recognize good ideas from whenever they might come and new market/product opportunities wherever they might exist. This course is the first step toward the development of a global mindset. It provides a meaningful global experience to first-year business students through an in-depth perspective of a specific country or region outside the United States and a short academic trip to the region.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 2010 (1) Excel in Business

Teaches beginner to intermediate level Excel skills, emphasizing efficient use of Excel to make sense of substantial data sets. The course is designed to increase students' proficiency with Excel through a series of hands-on workshops. The workshops have a business problem solving orientation and use real data from Leeds' corporate partners. The workshops emphasize the most important skills that employers value.

Requisites: Restricted to Business (BUSNU) Majors or students with a Business Minor (BUSM-MIN)

Grading Basis: Pass/Fail

BADM 2020 (3) Fundamentals of Quantitative Analysis

Focuses on the application of calculus and statistics in financial analysis with emphasis on theory and problem solving in excel. Calculus topics covered in the class will include: series, limits and continuity, calculating derivatives, graphing and optimization. Descriptive statistics will be reviewed in the context of financial data. Applications to finance will include portfolio optimization, calculation and graphing of historical stock returns, along with calculation of bond prices, returns, and duration.

Requisites: Restricted to students with the Business Minor (BUSM-MIN) plan.

BADM 2050 (3) Honors/Special Topics

Variable topics in business, drawing from a variety of disciplines.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: At least a 3.50 cumulative GPA is required.

Additional Information: Arts Sciences Honors Course

BADM 2880 (3) Special Topics

Explores historical developments, contemporary issues, industry trends and best practices pertinent to the business of sports. Examines how sports enterprises are managed and the impacts that such enterprises have on the economic and social fabric of communities. Designed to provide sufficient background for educated consumption of this literature and pursuit of further study if desired.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

BADM 2900 (1-3) Independent Study

Department consent and departmental form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 3100 (1) Professional Development

Designed to provide opportunities to understand and develop professional competencies for successful careers in business. Designed to increase knowledge of job search strategies and formulate a career management plan for transitioning to the workplace. Topics such as resumes, cover letters, personal branding, job search strategies, internships, career choices, networking and social media will be covered. A Self-Marketing Plan will be developed to help focus on long-term career goals.

Requisites: Restricted to Leeds School of Business majors only.

Grading Basis: Pass/Fail

BADM 3200 (1.5) Internship Accelerator

Three-week intensive seminar focused on developing competencies critical to a successful transition into the workplace. Discusses interpersonal communication, situational awareness, giving and receiving constructive feedback, maximizing networking opportunities, deciphering professional expectations, and adaptability in the workplace. Several modules will be taught by industry professionals. Also includes a 2.5 day "micro" internship at a top Boulder-area company.

Requisites: Restricted to Business (BUSN) majors.

Grading Basis: Pass/Fail

BADM 3880 (3) Special Topics

Introduces students to the many facets of the marketing of sport and marketing through sport. Theoretical and practical applications of marketing sport are examined. Provides students with an understanding of current marketing concepts and best business practices, related to sports enterprises and a foundation for pursuit of further study and work in sports and event marketing.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 3900 (1) Independent Study

Department consent and departmental form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 3930 (1-6) Internship

Student training and participation in government or industry environment under faculty supervision. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of BCOR 1000 and BCOR 1020 and BCOR 2000 and BCOR 2400 (all minimum grade D-). Restricted to students with 57-180 credits (Juniors or Seniors).

Grading Basis: Pass/Fail

BADM 4820 (1-6) Special Topics

Variable topics in business drawing from a variety of business disciplines.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Business (BUSN) majors with 52-180 units completed.

BADM 4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Business Administration.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BADM 4830 (1-3) Special Topics

Various topics in business and society drawing from a variety of business disciplines.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 4900 (1-3) Independent Study

Intended only for exceptionally well qualified business seniors. Department form required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Business (BUSNU) majors only.

BADM 4910 (2) VITA-Volunteer Tax Assistance

Offers students the opportunity to gain professional work experience in an accounting position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential.

Requisites: Requires prerequisite courses of BCOR 2000 and ACCT 3440 or ACCT 5440 (all minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

Grading Basis: Pass/Fail

BADM 6202 (1.5) Principles of Finance

Focuses on the role of finance in small and large businesses. Topics covered include financial statement analysis, time value of money, bonds and stocks (both their markets and their valuation), capital budgeting analysis, and investor expectations regarding risk and return.

Requisites: Requires prerequisite course of BADM 6702 (minimum grade D-).

Grading Basis: Letter Grade

BADM 6302 (1.5) Marketing Principles

Course imparts the core marketing toolkit important for success as a general business manager, including an understanding of the following critical principles of marketing: market exchange, strategic planning, market research, segmentation, targeting, positioning, and the marketing mix (design of product, place, promotion, and price to create exchanges).

Grading Basis: Letter Grade

BADM 6502 (1.5) Introduction to Leadership

This course provides an opportunity to examine leadership from the executive perspective in various organizations, including private and public sector firms, and non-profits. Builds graduate students' understanding of leadership theories, concepts, processes, and behavior while also helping them identify, develop, and build their own leadership capabilities. Enables students to enhance their readiness for leadership positions in business, government, and non-profit organizations and to embark on paths of personal leadership development.

Requisites: Requires prerequisite course of BADM 6302 (minimum grade D-).

Grading Basis: Letter Grade

BADM 6702 (1.5) Introduction to Accounting

Accounting is the language of business and involves the accumulation, presentation, and analysis of relevant financial data of a company to serve the needs of creditors, investors, other external decision makers as well as internal decision makers. We will explore the judgment involved in accounting as well as the rationale behind some of the principles.

Requisites: Requires prerequisite course of BADM 6502 (minimum grade D-).

BADM 6820 (1-3) Topics in Business Administration

Offered irregularly to provide opportunity to investigate new topics in business administration.

BADM 6940 (3) Land Use Law

Examines Federal, state and local regulations governing land use in the U.S. and surveys the basic principles of urban planning and public finance. Describes basic tools governments use to control land use: Euclidean zoning, nuisance law, police power, eminent domain and takings, Planned Urban Developments, historic preservation, wetlands and flood zones, airports, endangered species, view restrictions, and environmental law.

Requisites: Restricted to Master of Business Administration (MBAD), MBA with dual degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

Business Core (BCOR)

Courses

BCOR 1015 (3) The World of Business

Provides an overview of the nature business in a global economy. In addition to exploring the economic, governmental, social and environmental context in which businesses operate, students will discover how business creates value and takes advantage of opportunities and challenges. Using examples, cases and projects, students will learn about the business functions in an integrated format. Weekly discussion of current events will focus on entrepreneurship, ethics, international business, business and society, and other topics.

Requisites: Restricted to Leeds School of Business majors only.

BCOR 1025 (3) Statistical Analysis in Business

Covers sampling concepts, graphical and numerical data summaries, basic probability theory, discrete and continuous probability models, sampling distributions, hypothesis testing, correlation and both simple and multiple regression analysis. Students learn decision making and solving business problems by using data. Uses statistical features of Excel. Course requirements: laptop with Excel 2013 or newer; clickers.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 1020

Requisites: Requires a prerequisite or corequisite course of MATH 1112 (minimum grade D-). Restricted to Business (BUSN) majors only.

BCOR 1030 (3) Communication Strategy

Helps develop basic communication skills to prepare you for success in the business world. This communication and social science theory-based, skill-building course is framed in Fiske and Cuddy's person perception theory that all people are perceived on two dimensions, competence and warmth. You will learn how to use communication skills to strategically demonstrate those dimensions.

Requisites: Restricted to Business (BUSN) majors with 0 - 59 units completed.

BCOR 2201 (1.5) Principles of Marketing

Focuses on developing a core marketing toolkit for future business professionals. The tools help identify, reach, motivate, and satisfy customers. The course includes both the strategic perspective and the tactical execution of the 4 Ps-place, price, product, and promotion. Students will learn about the breadth of what marketers do to facilitate exchange between buyers and sellers and about the quantitative analysis that supports those exchanges.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 2400, BCOR 2001

Requisites: Requires prerequisites of BCOR 1015 and ECON 2010 and BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all minimum grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2202 (1.5) Principles of Organizational Behavior

Focuses on the fundamentals of management. Students will learn the basic concepts and best practices in the behavioral sciences that can improve their abilities to lead and manage in organizations. Frameworks for individual, team, and organizational behavior are presented and discussed. Topics include personality traits, culture, decision making, teams, planning, motivation, leadership, well-being and human resources. A group project provides practice in teamwork and in applying the frameworks in practice.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 2300, BCOR 2001

Requisites: Requires prerequisites of BCOR 1015 and ECON 2010 and BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all minimum grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2203 (1.5) Principles of Accounting I

The course builds a basic understanding of how information regarding a firm's resources and obligations is conveyed to decision makers outside the firm. Students will be exposed to both a user-perspective (how to read and analyze financial accounting reports) and a preparer-perspective (how business transactions affect the financial statements). Particular emphasis will be placed on understanding the accounting cycle, or the system with which businesses process and record their business events to create the financial statements.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 2000, BCOR 2002

Requisites: Requires prerequisites of BCOR 1015 and ECON 2010 and BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all minimum grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2204 (1.5) Principles of Financial Management

Will develop student's understanding of the role of finance in business venture. Effective financial management, whether performed by the general manager in a small business or by a finance professional in a large corporation, is necessary for a venture to succeed and grow. Topics covered include financial statement analysis, time value of money, bonds and stocks (both their markets and their valuation), capital budgeting analysis, and investor expectations regarding risk and return.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 2200, BCOR 2002

Requisites: Requires prerequisites of BCOR 1015 and ECON 2010 and BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all minimum grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2205 (1.5) Introduction to Information Management and Analytics

Focuses on the fundamentals of managing information in a data driven business environment. Students will learn the basic concepts and best practices in Information Management that can improve their abilities to lead and manage in organizations. The class teaches cutting-edge tools and approaches to the analysis of data, including "big data," for effective decision-making. It creates data connoisseurs through hands-on exposure to supervised machine learning. Application areas covered include human resources, marketing, finance, and supply chain. At the end of class, all students should be able to formulate common business problems in terms addressable through machine learning, and use automated machine learning tools to conduct the analysis and present deep insights to business leaders. Course requirements: clickers.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 2500

Requisites: Requires prerequisites of BCOR 1015 and ECON 2010 and BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all minimum grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2206 (1.5) Principles of Operations Management

Introduces the student to the common activities performed by an operations manager and sets the stage for the student to operate as a member of a cross-functional team responsible for adding value for the customer. These common activities include planning and designing goods and services, sourcing materials and supplies, producing the goods and delivering the services, and dealing with product end-of-life requirements.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 2500, BASE 2101

Requisites: Requires prerequisites of BCOR 1015 and ECON 2010 and BCOR 1025 or MATH 2510 or PSYC 2111 or PSCI 2075 or SOCY 2061 (all minimum grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2301 (1.5) Business Law

Provides an introduction to the U.S. legal system including its various sources of law and their interplay. Additionally, the court system, both its structure and process, is explored. Finally, contract law and its role in business is examined in detail.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 3000, BCOR 2003

Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2302, 2303 and 2304 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2302 (1.5) Business Ethics and Social Responsibility

Throughout this course students will consider the interconnectedness of law, ethics, values, public policy and regulation. Emphasis will be placed on the importance of individual and organizational responsibility for business. Allows students to consider the relationship between business and ethics in the broader social context, which is necessary to successfully navigate an increasingly complex, global business environment. Duplicate degree credit not granted for BCOR 3010, BCOR 2003.

Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2301, 2303 and 2304 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2303 (1.5) Principles of Accounting II

This course provides an introduction to various uses of accounting information that are available to managers. Specifically, students will be exposed to decision-making models aimed at assisting managers in planning, operating, and controlling business functions. Topics include job costing, cost-volume analysis, budgeting, cash flows, performance evaluation/compensation, break-even analysis, and relevant costs.

Equivalent - Duplicate Degree Credit Not Granted: BCOR 2000

Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2301, 2302 and 2304 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

BCOR 2304 (1.5) Strategic and Entrepreneurial Thinking

Provides students with a set of critical thinking skills and theoretical tools to enhance students' abilities at strategic and entrepreneurial thinking. We examine the following topics: (1) What is Strategy and Entrepreneurship, (2) External Analysis and Porter's 5 Forces, (3) Internal Analysis and the Resource Based View, (4) SWOT Analysis, (5) Differentiation, Cost Leadership, and Blue Ocean Strategy.

Equivalent - Duplicate Degree Credit Not Granted: BASE 2101

Requisites: Requires prerequisite courses of BCOR 2201, BCOR 2202, BCOR 2203, BCOR 2204, BCOR 2205, and BCOR 2206 (all min grade D-). Prereq or coreq of BCOR 2301, 2302 and 2303 (min grade D-). Restricted to BUSN majors with 26-180 units completed.

Business Environment and Policy (BPOL)

Courses

BPOL 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

BPOL 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

BPOL 7500 (3) Doctoral Seminar: Strategic Management 1

Provides an overview of the literature, including classic articles and books, in business strategy and policy (strategic management). Brings the student up to date on schools of thought, research issues, and practical applications in strategic management.

Repeatable: Repeatable for up to 6.00 total credit hours.

BPOL 7530 (3) Doctoral Seminar: Strategic Management 2

Continuation of BPOL 7500.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of BPOL 7500 (minimum grade D-). Restricted to Business Administration (BUAD) graduate students only.

BPOL 7560 (3) Entrepreneurship, International Business and Technology Management

Provides doctoral students with an understanding of strategic management and entrepreneurship theory, as applied to international business and technology management literatures. Additionally, students are exposed to research methods in the strategy and entrepreneurship arenas.

Requisites: Requires prerequisite courses of BPOL 7500 and BPOL 7530 (all minimum grade D-).

BPOL 8900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

BPOL 8990 (1-10) Doctoral Dissertation

Business Law (BSLW)

Courses

BSLW 4120 (3) Advanced Business Law

Continuation of BCOR 3000. Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 5120

Requisites: Requires a prerequisite course of BASE 2104 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

BSLW 4820 (1-3) Topics in Business Law

Experimental course offered irregularly for purpose of presenting new subject matter in business law.

BSLW 4825 (3) Experimental Seminar

Offered irregularly to provide opportunity for investigation of new frontiers in Business Law.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

BSLW 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

BSLW 5120 (3) Advanced Business Law

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120

Requisites: Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

BSLW 6900 (1-6) Independent Study

Requisites: Restricted to Business (BUSN) graduate students only.

Business Minor (BUSM) Courses

BUSM 2010 (1.5) Principles of Marketing

Introduces students to marketing concepts used in many types of organizations. Marketing activities are useful throughout business and society, for identifying, reaching, motivating, and satisfying people. The course covers both strategy and tactics. Marketing tactics include the well-known 4 P's framework: place, price, product, and promotion.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 2001

Requisites: Requires corequisite of BUSM 2011. Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 2011 (1.5) Principles of Management

Focuses on the knowledge and skills needed to effectively lead and manage in the workplace.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 2001

Requisites: Requires corequisite of BUSM 2010. Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 2020 (1.5) Principles of Accounting

Focuses on the development and interpretation of external financial reports. Topics range from the fundamentals of bookkeeping, to more complex accounting issues such as intangible assets, impairments and stock-based compensation.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 2002

Requisites: Requires prerequisites or corequisites of BUSM 2010 and BUSM 2011 (all minimum grade D-). Requires corequisite of BUSM 2021. Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 2021 (1.5) Principles of Finance

Focuses on the role of finance in large and small businesses. Topics include financial statement analysis, time value of money, stocks and bonds, capital budgeting analysis and investor expectations regarding risk and return.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 2002

Requisites: Requires prerequisites or corequisites of BUSM 2010 and BUSM 2011 (all minimum grade D-). Requires corequisite of BUSM 2020. Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 3006 (3) Leading and Managing Across Cultures in Northern Europe

Explains cultural differences in international management as it covers communication, organizational culture, strategy, negotiation and more in a multidisciplinary context. Gives students the opportunity to understand these topics through visits to companies, organizations and institutions in this region of Europe. These activities will be supplemented by formal lectures before and after meeting with international professionals.

Equivalent - Duplicate Degree Credit Not Granted: INBU 3333

Requisites: Requires prerequisite courses of BUSM 2001 and BUSM 2002 (all minimum grade D-). Restricted to Business Minors (BUSM-MIN) with a cumulative GPA of 2.50.

BUSM 3007 (3) Business Solutions for the Developing World

Conducted in Panama, the role of large and small businesses, the government, non-profit organizations and social enterprises, including those that support small businesses in developing countries as a means of eliminating poverty will be studied. Students will become immersed in the culture through home stays which will expedite their understanding of community culture, needs and opportunities.

Requisites: Requires prerequisite courses of BUSM 2001 and BUSM 2002 (all minimum grade D-). Restricted to Business Minors (BUSM-MIN) with a cumulative GPA of 2.50.

BUSM 3010 (1.5) Innovation & Entrepreneurship I

Examines structures that support organizational innovation and change. Focuses on effective teamwork and tools needed during new product development to improve success.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 3001

Requisites: Requires prerequisite of BUSM 2010, 2011, 2020 and 2021 (all minimum grade D-). Requires corequisite of BUSM 3011. Restricted to students with Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 3011 (1.5) Innovation & Entrepreneurship II

Examines structures that support organizational innovation and change. Focuses on effective teamwork and tools needed during new product development to improve success.

Requisites: Requires prerequisite of BUSM 2010, 2011, 2020 and 2021 (all minimum grade D-). Requires corequisite of BUSM 3010. Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 3020 (1.5) Business and Financial Analytics I

Focuses on the use of quantitative tools to interpret and solve important problems in business and finance. Makes use of spreadsheet modeling, analysis and mini-cases to present material. Ideal for those interested in quantitative methods and modeling.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 3002

Requisites: Requires prerequisite of BUSM 2010, 2011, 2020 and 2021 (all minimum grade D-). Requires corequisite of BUSM 3021. Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 3021 (1.5) Business and Financial Analytics II

Focuses of quantitative tools to interpret and solve important problems in business and finance. Makes use of spreadsheet modeling, analysis and mini cases to present material. Ideal for those interested in quantitative methods and modeling.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 3002

Requisites: Requires prerequisite of BUSM 2010, 2011, 2020 and 2021 (all minimum grade D-). Requires corequisite of BUSM 3020. Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 3031 (3) Business Leadership

This course is about leaders, leading and you. It is designed to help you think broadly about leadership and prepare you for leadership positions in a variety of careers. The course introduces management theories and how to apply them in the real world. We also engage in conversations about how generation shifts, technology changes, and recent economic and political trends influence the workplace. To translate theoretical concepts into practice, we use a mix of learning activities to ultimately provide useful guidelines for how best to lead throughout your career.

Requisites: Requires prerequisite courses of BUSM 2010, 2011, 2020 and 2021 (all minimum grade D-). Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 3040 (3) Doing Business in Europe

Provides a meaningful global experience through an in-depth perspective of local business practices. Must apply through CU Education Abroad.

Requisites: Requires prerequisite courses of BUSM 2010, 2011, 2020 and 2021 (all minimum grade D-). Restricted to Business Minors (BUSM-MIN) with minimum cumulative GPA of 2.5 or greater.

Grading Basis: Letter Grade

BUSM 3050 (3) Introduction to Real Estate

Surveys a variety of real estate topics including real estate transaction law, real estate markets and valuation, real estate finance and investments, real estate development, real estate sustainability and real property and asset management. Concentrates on applying economic and finance concepts to real estate problems. Students comfortable with fundamental economic principles and with the mathematics of finance will do well in this class.

Requisites: Requires prerequisites of BUSM 2010, 2011, 2020 and 2021 (all minimum grade D-). Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

BUSM 4010 (3) Professional Business Plan Development

The Business Minor capstone focuses on the development of an entrepreneurial business plan using principles learned in earlier Business Minor courses. The course supplements business plan development with segments on professionalism and corporate social responsibility.

Equivalent - Duplicate Degree Credit Not Granted: BUSM 4001

Requisites: Requires prereq of BUSM 2010, 2011, 2020 2021. Requires prerequisite or corequisite of 3-credit BUSM 3000-level course BUSM 3010/3011 or BUSM 3020/3021 or BUSM 3030 or 3031 or 3040 or 3050 (all min grade D-). Restricted to Business Minors (BUSM-MIN).

Grading Basis: Letter Grade

Career Services (CSVC)

Courses

CSVC 1000 (1) Work Internship

A one credit pass/fail course, opened to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any UCB school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.

Repeatable: Repeatable for up to 3.00 total credit hours.

Grading Basis: Pass/Fail

CSVC 5000 (1-3) Work Internship

A one, two or three credit pass/fail course, open to students in good academic standing, whose internship employers require that they receive course credit. The student must first seek to obtain academic credit through their major department. Will not count toward degree requirements in any UCB school or college. No appeals for credit toward degrees or for letter grades in the course will be entertained.

Repeatable: Repeatable for up to 3.00 total credit hours.

Grading Basis: Pass/Fail

Center for Western Civilization (CWCV)

Courses

CWCV 2000 (3) The Western Tradition

Encourages a historical and critical investigation into the formative influences on what is often called Western culture, including religious, political, social and economic factors, and contemporary interpretations and critiques of these developments and concepts. Designed as the foundation course for the Center for Western Civilization.

Additional Information: Arts Sci Core Curr: Ideals and Values

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arts Sciences Special Courses

CWCV 2840 (1-3) Independent Study

Requires sophomore standing.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors).

CWCV 3840 (1-3) Independent Study

Requires junior standing.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-86 credits (Junior).

CWCV 4000 (3) Foundations of Western Civilization

Offers in-depth consideration of one or more foundational traditions in Western civilization.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Arts Sciences Special Courses

CWCV 4840 (1-3) Independent Study

Requires senior standing.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior).

Center of the American West (CAMW)

Courses

CAMW 2001 (3) The American West

Students tour the cultural, social, and natural features of the American West, based on readings and presentations by guest speakers from the CU faculty and from important professions and positions in the West. Designed as the foundation course in the Western American Studies certificate program.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomores).

Additional Information: GT Pathways: GT-HI1 - History

Arts Sci Core Curr: United States Context

Arts Sci Gen Ed: Distribution-Arts Humanities

CAMW 3939 (1-3) Center of the American West Internship

Work for public and private organizations on projects that enhance the understanding of various Western American topics and issues (environmental, cultural, public policy, etc.), and which foster students' development as community leaders working for a sustainable West.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CAMW 2001.

CAMW 4001 (3) Seminar on the American West

Interdisciplinary capstone seminar for the Western American Studies certificate program. Applies a selected natural science, social science, or humanities topic to the American West and addresses how westerners can make and sustain viable landscapes and communities.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CAMW 2001 and completion of Western American Studies certificate electives.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

CAMW 4840 (1-4) Independent Study: The American West

Requisites: Requires prerequisite course of CAMW 2001 (minimum grade B). Restricted to students with 57-180 credits (Junior or Senior).

Central and East European Studies (CEES)

Courses

CEES 1623 (3) Introduction to Central and East European History since 1770

Examines major themes and events in the history of East-Central Europe from the late 1700s to the present. Themes include the impacts of nationalism, fascism, liberal democracy and communism in shaping the history of the region. Topics include World War I, World War II and the Holocaust, the Cold War, the fall of Communism, the Ukrainian revolution and more.

Equivalent - Duplicate Degree Credit Not Granted: HIST 1623

Additional Information: Arts Sci Core Curr: Historical Context

Departmental Category: Arts Sciences Special Courses

Chemical Engineering (CHEN)

Courses

CHEN 1201 (4) General Chemistry for Engineers 1

Designed to meet the general chemistry requirement for some engineering students and serve as part one for students whose academic plans require advanced work in chemistry. Topics include components of matter, stoichiometry, electron configuration, chemical bonding, molecular shapes, covalent bonding, classes of reactions, thermochemistry, gases, atomic structure, organic compounds, intermolecular forces, and phase equilibria. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisites: High school Algebra, one year of high school Chemistry or CHEM 1021 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: CHEN 1211, CHEM 1113, CHEM 1400 and MCEN 1024

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Recommended: Not recommended for students with grade below B- in CHEM 1021.

CHEN 1203 (2) General Chemistry for Engineers 2

Designed for students whose academic plans require advanced work in chemistry. Topics include kinetics, solubility/solubility equilibria, acid-bases, buffers and titrations, thermodynamics, and electrochemistry. Examples and problems illustrate the application of chemistry to engineering sub-disciplines.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 1211 and CHEM 1133

Requisites: Requires prerequisite courses of CHEN 1201 or CHEM 1113 (all minimum grade C-). Restricted to College of Engineering undergraduates (ENGRU) only.

Recommended: Corequisite CHEM 1221.

CHEN 1211 (4) Accelerated Chemistry for Engineers

One-semester lecture and recitation course designed for engineering students with more advanced chemistry backgrounds. Topics include stoichiometry; thermodynamics; gases, liquids, and solids; equilibrium; acids and bases; bonding concepts; kinetics; reactions; and materials science. Examples and problems illustrate the application of chemistry to engineering sub-disciplines. Department enforced prerequisite: 3, 4 or 5 on the AP Chemistry exam or equivalent IB scores or passing placement exam score. Duplicate Degree Credit Not Granted: CHEM 1113 or CHEM 1400 or CHEN 1201 or CHEN 1203 or MCEN 1024.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 1300 (1) Introduction to Chemical Engineering

Meets for one lecture per week. Introduces chemical engineering emphasizing history of the profession, curriculum, chemical industry, and industrial chemistry. Includes industry visits, oral presentations, faculty and professional meetings, and development of a goals statement.

Requisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

CHEN 1310 (3) Introduction to Engineering Computing

Introduces the use of computers in engineering problem solving, including elementary numerical methods. Teaches programming fundamentals, including data and algorithm structure, and modular programming. Software vehicles include Excel/Vba and Matlab. Formerly GEEN 1300 and COEN 1300.

Requisites: Requires prerequisite or corequisite course of APPM 1340 or 1345 or 1350 or GEEN 3830 or MATH 1300 (all minimum grade C-). Restricted to College of Engineering majors or Pre-Engineering Arts and Sciences (PREE) students only.

CHEN 1400 (3) Drugs, Driving and Dynamic Processes

Project-based course that applies the principles of chemistry, biology, mechanics and electronics to the production and application of sustainable commodities (fuels, drugs, chemicals, and energy). Examples include student-developed green vehicles, sustainable nutraceuticals, or renewable electrical generation.

Requisites: Restricted to College of Engineering students with a maximum of 50 credit hours.

CHEN 2120 (3) Chemical Engineering Material and Energy Balances

Provides a basic understanding of chemical engineering calculations involving material and energy balances around simple chemical processes.

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1133 and CHEN 1310 or GEEN 1300 or COEN 1300 (all minimum grade C-). Restricted to College of Engineering majors only

CHEN 2810 (3) Biology for Engineers

Develops a basic understanding of the science of biology, including an introduction to the disciplines of biochemistry, cell organization, metabolism, genetics, genomics, molecular biology, recombinant DNA technology and evolution. Provides a basic introduction to several key techniques used in biological engineering laboratories. Uses examples of complex and creative structures engineered by natural processes.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 2840 (1-4) Independent Study

Available to sophomores with approval of Department of Chemical Engineering. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours.

CHEN 3010 (3) Applied Data Analysis

Teaches students to analyze and interpret data. Topics include engineering measurements, graphical presentation and numerical treatment of data, statistical inference, and regression analysis.

Requisites: Requires prerequisite course of CHEN 1310 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering students only.

CHEN 3200 (3) Chemical Engineering Fluid Mechanics

Introduces fluid mechanics and momentum transfer, emphasizing the application of these principles to chemical engineering systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 3313 and MCEN 3021

Requisites: Requires prereq courses of APPM 2350 or MATH 2400 (min grade C-) and MCEN 2023 or CHEN 2120 (min grade C). Requires prereq or coreq course of APPM 2360 or MATH 2130 and MATH 3130 (min grade C-). Restricted to College of Engineering majors only.

CHEN 3210 (4) Chemical Engineering Heat and Mass Transfer

Examines conservation and transfer of mass and thermal energy. Focuses on conduction and convection of heat in the context of chemical processes and heat exchangers. Addresses radiation. Also studies mass transfer rate processes, including diffusion, microscopic material balances, and correlations for mass transfer coefficients.

Requisites: Requires prerequisite course of either CHEN 3200 or MCEN 3021 (minimum grade C-). Restricted to College of Engineering majors only

CHEN 3220 (3) Chemical Engineering Separations

Studies separation methods including distillation, absorption, extraction, and membranes, and graphical and computer-based solutions to separation problems. Applies mass transfer rate theory to packed and tray columns.

Requisites: Requires prerequisite courses of CHEN 3210 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3320 (3) Chemical Engineering Thermodynamics

Applies thermodynamic principles to nonideal systems, phase equilibrium, chemical equilibrium, power generation, refrigeration, and chemical processes.

Requisites: Requires prerequisite courses of CHEN 2120 (minimum grade C) and (CHEN 4521 or a prerequisite or corequisite of CHEM 4531) (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3660 (3) Energy Fundamentals

Explains the most important energy technologies and systems; provides tools to analyze performance using science and engineering principles. This course will investigate important energy concepts from sources and extraction to utilization, storage and efficiency. Topics include fossil fuels, hydropower, renewable energy, biofuels, carbon capture and waste disposal.

Requisites: Requires prerequisite courses of CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and PHYS 1110 and APPM 1360 or MATH 2300 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 3840 (1-4) Independent Study

Available to juniors with approval of the Department of Chemical Engineering. Subject arranged to fit needs of the student.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 3930 (6) Chemical Engineering Cooperative Education

Students enrolled in this course participate in a previously arranged, department-sponsored cooperative education program.

Requisites: Requires prerequisite course of CHEN 2120 (minimum grade C). At least a 2.85 cumulative GPA is required. Restricted to College of Engineering majors only.

Recommended: Prerequisite 3.00 GPA or higher.

CHEN 4010 (2) Chemical Engineering Senior Thesis 1

Provides an opportunity for advanced students to conduct exploratory research in chemical engineering.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4020 (2) Chemical Engineering Senior Thesis 2

Continuation of CHEN 4010. This course and CHEN 4020 can substitute for CHEN 4130.

Requisites: Requires prerequisite course of CHEN 4010 (minimum grade C-). Restricted to College of Engineering students only.

CHEN 4090 (1) Undergraduate Seminar

Provides chemical engineering career and professional information, facilitates contact with faculty and industry representatives, and improves communication and leadership skills. Consists of a series of seminars and field trips and requires a research project involving a written and oral report.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to Chemical (CHEN) Engineering or Chemical and Biological (CBEN) Engineering majors only.

CHEN 4130 (3) Chemical Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, separations, and chemical reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports, and oral presentations.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3220 and CHEN 3320 and CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4330 (3) Chemical Engineering Reaction Kinetics

Introduces chemical kinetics and chemical reactor design. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, and multiple steady states in reactors.

Requisites: Requires prerequisite courses of CHEN 3320 CHEN 3210 and APPM 2360 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4440 (3) Chemical Engineering Materials

Introduces materials engineering, including properties of polymers, metals, ceramics, and semiconductors, especially as related to chemical engineering processes.

Requisites: Requires prerequisite courses of CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5450

Requisites: Requires prerequisite courses of CHEN 4830 or CHEN 4330 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5460

Requisites: Requires prerequisite courses of CHEM 3311 and CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4520 (3) Chemical Process Synthesis

Studies applied chemical process design including equipment specification and economic evaluation.

Requisites: Requires prerequisite courses of CHEN 3010 and CHEN 3210 and CHEN 3220 and CHEN 4330 or CHEN 4830 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4521 (3) Physical Chemistry for Engineers

Examines the laws of classical thermodynamics followed by physical transformations of pure substances, the thermodynamics of simple mixtures and chemical equilibrium. Applies quantum theory to atomic and molecular structure. Presents the concepts and applications of statistical thermodynamics. Introduces rates of chemical reactions, reaction dynamics and catalysis.

Requisites: Requires prereq courses of APPM 2350 or MATH 2400 and CHEN 1211 or CHEN 1203 or CHEM 1133 (all min. grade C-). Requires a prereq or coreq course of APPM 2360 or MATH 2130 and MATH 3430 (min. grade C-). Restricted to College of Engineering majors only.

CHEN 4530 (2) Chemical Engineering Design Project

Provides a team-based capstone design experience for chemical engineering students. Projects are sponsored by industry and student design teams collaborate with industrial consultants. Projects consider chemical process and product design with emphasis on economic analysis. Deliverables include an oral mid-project design review, a final oral presentation and final written design report.

Requisites: Requires prerequisite course of CHEN 4520 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4570 (4) Instrumentation and Process Control

Examines principles of controls theory and controls application to chemical processes. Focuses on feedback, feedforward and distributed control systems. Laboratory sessions cover measurement fundamentals, signal transmission, dynamic testing, control system synthesis, and implementation and adjustment.

Requisites: Requires prerequisite courses of CHEN 3220 and CHEN 4330 or CHEN 4830 and PHYS 1120 and APPM 2360 or MATH 2130 and MATH 3430 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5630

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 4650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5650

Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CHEN 3200 or MCEN 3021 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4801 (3) Pharmaceutical Biotechnology

Focuses on the engineering needed to bring therapeutic products derived from living organisms (e.g., proteins, peptides, DNA, RNA) from the production plant to the patient. Covers the challenges of keeping these products "active" as they are stored, shipped, and administered to patients.

Requisites: Requires prerequisite courses of CHEN 3320 and prerequisite or corequisite courses of CHEN 4830 or CHEN 4330 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4802 (3) Tissue Engineering and Medical Devices

The purpose of this course is to develop a basic understanding of quantitative and qualitative aspects of tissue engineering and medical devices. Particular emphasis will be placed on topics of potential importance and significance to chemical and biological engineers. Students will be introduced to important professional, societal and entrepreneurial issues in the field by examining case studies in which drugs and medical products have been developed or are being considered for FDA approval and clinical use.

Requisites: Requires prerequisite course of CHEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 (minimum grade C-). Requires prerequisite or corequisite course of CHEN 3320. Restricted to College of Engineering students only.

CHEN 4803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5803

Requisites: Requires prerequisite course of BCHM 4611 or CHEM 4611 or CHEM 4700 and prerequisite or corequisite course of CHEN 3320 (all minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4805 (3) Biomaterials

Provides an overview of biomaterials. Covers major classes of materials used in medical applications, properties, degradation mechanisms, and characterization methods, foreign body response, methods to control physiological response to biomaterial surfaces, biocompatibility, biomaterials used in soft and hard tissue replacements, drug delivery devices and tissue engineering, and design criteria for developing a material for a given biological application.

Requisites: Requires prerequisite courses of CHEN 2810 or MCDB 1150 or EBIO 1220 and CHEN 3320 and CHEM 3311 (all minimum grade C-). Restricted to College of Engineering students only.

Recommended: Prerequisite CHEM 3331.

CHEN 4810 (3) Biological Engineering Laboratory

Involves planning and execution of chemical engineering experiments on mass transfer operations, bioseparations, and biological reactors. Interprets experimental data with theoretical principles and statistical analysis. Emphasizes communication with written memos, full reports and oral presentations.

Requisites: Requires prerequisite courses of CHEN 2810 or MCDB 1150 or EBIO 1210 and EBIO 1220 and CHEN 3010 and CHEN 4830 (all minimum grade C-). Requires a corequisite course of CHEN 4820. Restricted to College of Engineering majors only.

CHEN 4820 (3) Biochemical Separations

Lect. and lab. Presents purification methods, mass transfer coefficients, problems specific to biologicals, and scale-up of processes. Also covers chromatography, phase extraction, supercritical fluids, sedimentation, precipitation, electrophoresis, dialysis, affinity techniques, cell separation, application of separations to bioreactors, and comparison of batch and continuous processes.

Requisites: Requires prerequisite course of CHEN 3220 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4830 (3) Chemical Engineering Biokinetics

Introduces chemical kinetics, chemical reactor design, and biological kinetics. Involves mass and energy balances for steady-state and transient reactor systems. Also covers residence time distribution, mass transfer, catalytic reactions, multiple steady states in reactors, enzyme kinetics, metabolic networks, and cell growth kinetics.

Requisites: Requires prerequisite course of CHEN 3320 and CHEN 3210 (minimum grade C-). Restricted to College of Engineering majors only.

CHEN 4836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 5836

Requisites: Require prerequisite or corequisite of CHEN 3320 (minimum grade C-). Restricted to College of Engineering students only.

CHEN 4838 (1-3) Special Topics in Chemical Engineering

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CHEN 4840 (1-4) Independent Study

Available to seniors with approval of chemical engineering department. Subject arranged to fit needs of student.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

CHEN 5090 (1) Seminar in Chemical Engineering

Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

CHEN 5128 (3) Applied Statistics In Research and Development

Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Department enforced prereq.: one introductory probability/statistics course.

CHEN 5150 (3) Biomolecular Kinetics, Transport, and Thermodynamics

Required for the Biological Engineering PhD. This course covers aspects of kinetics, transport, and thermodynamics as they relate to interactions between biomolecules and cells. These core subjects will be introduced within concepts common to cell biology, protein/genetic engineering, and signaling, among others. Undergraduate enrollment with instructor consent only.

Recommended: Prerequisites Introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, organic chemistry.

CHEN 5160 (3) Systems Analysis of Cells and Tissues

Required for the Biological Engineering PhD. This course explores how to describe signaling and regulation networks present at the cell and tissue level. Topics include gene expression, stem cell differentiation, homeostasis, and others.

CHEN 5210 (3) Transport Phenomena

Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat and mass transfer and their applications to engineering problems. Department enforced prerequisites: undergraduate courses in fluid mechanics, heat transfer, and differential equations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5360 (3) Catalysis and Kinetics

Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis.

Requisites: Requires corequisite course of CHEN 4330. Restricted to Chemistry (CHEM) or Chemical Engineering (CHEN) graduate students only.

CHEN 5370 (3) Intermediate Chemical Engineering Thermodynamics

Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures and solutions. Also looks at relations between thermodynamics and statistical mechanics. Department enforced prerequisite: an undergraduate course in chemical thermodynamics.

Requisites: Restricted to graduate students only.

CHEN 5390 (3) Chemical Reactor Engineering

Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution and diffusion effects. Department enforced prerequisite: undergraduate course in chemical reactor design/kinetics.

Requisites: Restricted to graduate students only.

CHEN 5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces

Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena.

Requisites: Requires prerequisite course of CHEN 3200 (minimum grade D-).

CHEN 5440 (3-4) Design of Materials

The course content includes introduction and study of important concepts in solid state physics (particularly those relevant for design of materials); origin, characterization and design of mechanical, electronic, optical, magnetic, thermal and electrochemical properties of materials; design of bulk and nanostructured composites; introduction to polymers and soft materials; fundamentals of colloids and interfaces; and nanoscale chemistry and physics for design or desired material properties.

Grading Basis: Letter Grade

CHEN 5450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4450

CHEN 5460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4460

CHEN 5470 (3) Functional Materials Chemistry

The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.

Recommended: Prerequisite Introductory course(s) in materials or organic chemistry.

CHEN 5630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4630

Requisites: Restricted to graduate students only.

CHEN 5650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Extra work required for graduate course.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4650

CHEN 5670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems.

CHEN 5730 (1) Mathematical Methods Short Course for Chemical Engineers

Determine and apply appropriate analytical methods, which may include linear and nonlinear algebraic equations, ordinary differential equations and partial differential equations, to solve an array of chemical engineering problems. Identify and interpret the differences between model predictions and experimental results.

Grading Basis: Letter Grade

CHEN 5740 (3) Analytical Methods in Chemical Engineering

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Department enforced requisite: working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5750 (3) Numerical Methods in Chemical Engineering

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers.

Requisites: Restricted to graduate students only.

CHEN 5800 (3) Bioprocess Engineering

Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes.

CHEN 5803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4803

Requisites: Requires prerequisite courses of APPM 2360 and CHEM 4731 or CHEM 4611 (all minimum grade C-).

CHEN 5805 (3) Biological Interactions to Biomaterials

Covers major classes of materials used in medical applications. Provide an in-depth view of advanced biomaterial concepts with a focus on biological interactions with materials that relate to protein and cell interactions, the innate and acquired immune response, blood interactions and infection.

Requisites: Restricted to graduate students only.

CHEN 5830 (1) Introduction to Modern Biotechnology

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

CHEN 5831 (2) Biotechnology Case Studies

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan.

Requisites: Requires prerequisite course of CHEN 5830 (minimum grade D-).

CHEN 5835 (3) Colloids and Interfaces

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others.

Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-).

CHEN 5836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4836

Requisites: Restricted to graduate students only.

CHEN 5838 (1-3) Special Topics in Chemical Engineering

Graduate-selected topics courses offered upon demand.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5840 (1-4) Independent Study

Allows multiple enrollment in term.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5900 (3) Pharmaceutical Biotechnology

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding.

Requisites: Restricted to graduate students only.

CHEN 5919 (1-5) Special Topics in CHBE

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEN 6210 (3) Microhydrodynamics of Suspensions and Colloids

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers.

Requisites: Requires prerequisite course of CHEN 5210 (minimum grade D-).

CHEN 6820 (3) Biochemical Engineering Fundamentals

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing.

Requisites: Restricted to Chemistry (CHEM), Chemical Engineering (CHEN) or Biological Sciences (MCDB) graduate students only.

CHEN 6940 (1) Master's Candidate for Degree

Grading Basis: Pass/Fail

CHEN 6950 (1-6) Master's Thesis**CHEN 8990 (1-10) Doctoral Dissertation**

Chemistry (CHEM)

Courses

CHEM 1011 (3) Environmental Chemistry 1

Introduces basic principles of chemistry with applications to current environmental issues including toxic chemicals, air and water pollution, energy sources and their environmental impact, and climate change resulting from the greenhouse effect. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Chemistry

MAPS Course: Natural Science

MAPS Course: Physics

CHEM 1021 (4) Introductory Chemistry

For students with no high school chemistry or a very weak chemistry background. Remedies a deficiency in natural science MAPS requirements and prepares students for CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401. No credit given to chemistry or biochemistry majors for this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher. Department enforced prerequisite: one year high school algebra or concurrent enrollment in MATH 1011.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Non-Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

MAPS Course: Natural Science Lab or Lab/Lec

CHEM 1031 (4) Environmental Chemistry 2

Applications of chemical principles to current environmental issues including acid rain, stratospheric ozone depletion, the Antarctic ozone hole, solar energy conversion and fuel cells, and the environmental consequences of nuclear war. Laboratory experience is included. No credit given to chemistry or biochemistry majors this course if students already have credit in any college-level chemistry course numbered 1113/1114 or higher.

Requisites: Requires prerequisite course of CHEM 1011 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1113 (4) General Chemistry 1

Intended for first-semester students whose academic plans require advanced work in chemistry. Subjects: components of matter, stoichiometry, classes of reactions, gases, thermochemistry, atomic structure, electron configuration, chemical bonding, molecular shapes, covalent bonding, organic compounds, intermolecular forces, equilibrium. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1114. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1400 or CHEN 1211

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1114 (1) Laboratory in General Chemistry 1

Lab. Intended for first-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1113. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (min grade C-); high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisites: CHEM 1113. Not open to engineering students with exception of EPEN majors.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1401 or CHEM 1221

Requisites: AMEN, AREN, ASEN, CHEN, CSEN, CVEN, ECEN, EEEN, EVEN, MCEN, OPEN or CBEN majors are not allowed to take this class.

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1133 (4) General Chemistry 2

Intended for second-semester students whose academic plans require advanced work in chemistry. Subjects: acid-base equilibria, buffers and titrations, thermodynamics, redox reactions, electrochemistry, transition elements and their coordination compounds, solubility/solubility equilibria, crystal field theory, kinetics, nuclear chemistry. Department enforced corequisite: CHEM 1134.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 2100

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC2 -Natural Physical Sci:Lec Crse w/o Req Lab

Arts Sci Core Curr: Natural Science Sequence

Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1134 (1) Laboratory in General Chemistry 2

Intended for second-semester students whose academic plans require advanced work in chemistry. Instruction in experimental techniques which coordinate with lecture topics in CHEM 1133. Department enforced corequisite: CHEM 1133.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 2101

Requisites: Requires prerequisite courses of CHEM 1113 and CHEM 1114 or CHEM 1400 and CHEM 1401 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: GT Pathways: GT-SC1 - Natural Physical Sci:Lec Crse w/ Req Lab

Arts Sci Core Curr: Natural Science Lab

Arts Sci Gen Ed: Distribution-Natural Sci Lab

Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1221 (1) Engineering General Chemistry Lab

Meets general chemistry laboratory requirement for engineering students. Designed to illustrate chemical concepts and introduce basic techniques in chemical measurement and synthesis. Department enforced prerequisites: one year of high school chemistry or CHEM 1021 (min. grade C-) and high school algebra; B- in CHEM 1021 recommended.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1114 or CHEM 1401

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1133 (minimum grade C-), or corequisite course of CHEN 1211 or CHEM 1133. Restricted to undergraduate engineering students only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1400 (4) Foundations of Chemistry

Covers core concepts in chemistry: nature of matter (atomic and molecular structure, bonding and macroscopic properties), transformations of matter (chemical reactivity), and quantifying chemical transformations (thermochemistry, thermodynamics and kinetics). Emphasizes critical thinking and cultivate core problem solving skills utilized by scientists. Intended for first semester CHEM/BCHM majors. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1401.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1113

Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 1401 (1) Foundations of Chemistry Lab

Coordinates with lecture topics in CHEM 1400. Intended for first-semester CHEM and BCHM majors. Emphasizes the development of hands-on practical laboratory skills, experimental design, data interpretation, problem solving and open inquiry. Department enforced prerequisites: one year high school chemistry or CHEM 1021 (minimum grade C-) and high school math through pre-calculus. Not recommended for students with grades below B- in CHEM 1021. Department enforced corequisite: CHEM 1400.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1114 or CHEM 1221

Requisites: Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 2100 (4) Foundations of Chemistry 2

Covers the energetic principles that determine when chemical reactions occur and the dynamic principles that determine how rapidly they will occur. Applications include ionic equilibria in solution (acids and bases, buffers and titrations), oxidation-reduction reactions, electrochemistry and chemical kinetics. These applications will be situated in a context of current research problems in areas such as renewable energy and atmospheric chemistry. Department enforced corequisite: CHEM 2101.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1133

Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).

Additional Information: Arts Sci Core Curr: Natural Science Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 2101 (1) Laboratory in Foundations of Chemistry 2

Coordinates with the lectures topics in CHEM 2100. Emphasizes the acquisition of more advanced laboratory skills, experimental design, data interpretation and analysis. Department enforced corequisite: CHEM 2100.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 1134

Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 (minimum grade C-) or CHEM 1113 and CHEM 1114 (minimum grade B) and prerequisite or corequisite of MATH 2300 or APPM 1360 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Arts Sci Core Curr: Natural Science Lab
Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3151 (3) Air Chemistry and Pollution

Examines the composition of the atmosphere, and sources of gaseous and particulate pollutants: their chemistry, transport and removal from the atmosphere. Applies general principles to acid rain, smog and stratospheric ozone depletion. Department enforced prerequisite: two semesters of chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 3500

Additional Information: Arts Sci Core Curr: Natural Science Non-Sequence
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3251 (3) Sustainable Energy from a Chemistry Perspective

Explores qualitative and quantitative chemical aspects of energy systems (production, transmission, storage, utilization) including fossil, wind, solar, nuclear and biomass energy. Applies chemical principles including composition, structure, bonding, physical properties, thermodynamics, equilibrium and kinetics to energy systems and sustainability, especially environmental implications. Describes the importance of energy to the chemical industries and society as a whole.

Requisites: Requires prerequisite course of CHEM 1133 and 1134 or CHEM 2100 and 2101 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

CHEM 3311 (4) Organic Chemistry 1

Intended primarily for nonmajors. Topics include structure and reactions of alkanes, alkenes, alkynes, alkyl halides, and aromatic molecules; nomenclature of organic compounds; stereochemistry; reaction mechanisms and dynamics. Department enforced corequisite: CHEM 3321 or CHEM 3361.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3451

Requisites: Requires prerequisite course of CHEM 1133 and CHEM 1134 or CHEM 1400 and CHEM 1401 or CHEM 2100 and CHEM 2101 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3321 (1) Laboratory in Organic Chemistry 1

Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, and aromatic compounds. Stereochemical modeling and the identification of organic unknowns by spectroscopic and chemical methods are also introduced. Department enforced corequisite: CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3361

Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 2100 or CHEM 1400 and CHEM 1401 or CHEM 2100 and CHEM 2101 or CHEN 1211 and CHEM 1221 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3331 (4) Organic Chemistry 2

Lect. and rec. Intended primarily for nonmajors. Topics include structure and reactions of alkyl halides, alcohols, ethers, carboxylic acids, aldehydes, ketones, and amines; introduction to the chemistry of heterocycles, carbohydrates, and amino acids; nomenclature of organic compounds; synthesis; and reaction mechanisms. Department enforced corequisite: CHEM 3341 or CHEM 3381.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3471 or BCHM 3491

Requisites: Requires prerequisite courses of (CHEM 3311 or CHEM 3451) and (CHEM 3321 or CHEM 3361) all minimum grade C-.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3341 (1) Laboratory in Organic Chemistry 2

Lab. For biochemistry and nonchemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing reactions involving alcohols, ketones, carboxylic acids, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 3361 (2) Laboratory in Organic Chemistry 1 for Chemistry Majors

Required course for chemistry majors. Instruction in experimental techniques of modern organic chemistry emphasizing chemical separations and reactions of alkanes, alkenes, alcohols, ketones, and alkyl halides. Explores stereochemical modeling and the chemical identification of organic unknowns. Department enforced corequisite: CHEM 3311 or CHEM 3451.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3321

Requisites: Requires prerequisite courses of CHEM 1133 and CHEM 1134 or CHEM 1400 and CHEM 1401 or CHEM 2100 and CHEM 2101 or CHEM 1211 and CHEM 1221 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3381 (2) Laboratory in Organic Chemistry 2 for Chemistry Majors

Lab. Required course for chemistry majors. Instruction in experimental techniques of modern chemistry, emphasizing reactions involving alcohols, ketones, carboxylic acids, aromatic compounds, and their derivatives. Multistep syntheses are also introduced. Department enforced corequisite: CHEM 3331 or CHEM 3471 or CHEM 3491.

Requisites: Requires prerequisite courses of CHEM 3311 or CHEM 3451 and CHEM 3321 or CHEM 3361 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 3451 (4) Organic Chemistry 1 for Chemistry and Biochemistry Majors

Covers bonding, acidity, reaction mechanisms, nomenclature of organic compounds; stereochemistry; structure and reactions of aldehydes, ketones, and carboxylic acids and derivatives. Department enforced corequisite: CHEM 3361 or CHEM 3321.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3311

Requisites: Requires prerequisite courses of CHEM 1400 and CHEM 1401 or CHEM 1133 and CHEM 1134 or CHEM 2100 and CHEM 2101 or CHEM 1211 and CHEM 1221 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 3471 (4) Organic Chemistry 2 for Chemistry Majors

Covers Amines, alkylation reactions, additions to unsaturated C-C bonds, aromaticity, and aromatic reactivity, organic materials, biomolecules, nomenclature of organic compounds, reaction mechanisms. Department enforced corequisite: CHEM 3381 or CHEM 3341.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 3331 or BCHM 3491

Requisites: Requires prerequisite courses of CHEM 3451 and CHEM 3361 or CHEM 3321 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4011 (3) Modern Inorganic Chemistry

Required course for chemistry majors. Introduces modern inorganic chemistry for undergraduates. Includes atomic structure, chemical periodicity, structure and bonding in molecules and crystals, reaction mechanisms, chemistry of selected main group and transition elements, and emphasis on catalyst, materials, bioinorganic, and organometallic systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5011

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4021 (3) Inorganic Laboratory

One lect. and two 3-hour labs per week. Instruction in experimental techniques of modern inorganic chemistry. Includes syntheses and spectroscopic characterizations of transition metal and main group compounds, experience in manipulation of air sensitive compounds, and techniques involving unusual conditions of pressure or temperature.

Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 4141 (3) Environmental Water and Soil Chemistry

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5141

Requisites: Requires prerequisite course of CHEM 2100 and CHEM 2101 or CHEM 1133 and CHEM 1134 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4171 (3) Instrumental Analysis - Lecture and Laboratory 1

Two Lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis to address problems in chemistry, biochemistry, industrial chemistry and environmental chemistry.

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 3341 or CHEM 3381 and PHYS 1140 or CHEM 4400 or CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sci Lab
Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4181 (3) Instrumental Analysis - Lecture and Laboratory 2

Two lect. and 3 hours of lab per week. Instruction and experience in using instrumental methods of chemical analysis. Builds on material learned in CHEM 4171.

Requisites: Requires prerequisite course of CHEM 4171 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 4251 (3) Materials Chemistry and Properties

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5251

Requisites: Requires prerequisite course of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4521 or CHEM 4531 (all minimum grade grade C-).

CHEM 4261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5261

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade grade C-).

CHEM 4271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5271

Requisites: Requires prerequisite courses of CHEM 3331 or CHEM 3471 or CHEM 3491 and CHEM 4531 (all minimum grade grade C-).

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4511 (3) Physical Chemistry 1

Chemical thermodynamics and kinetics. Includes study of laws of thermodynamics, thermochemistry, entropy, free energy, chemical potential, chemical equilibria, and the rates and mechanisms of chemical reactions. Department enforced prereq or coreq., PHYS 1120 (minimum grade C-).

Equivalent - Duplicate Degree Credit Not Granted: BCHM 4400 and BCHM 5400

Requisites: Requires prereq courses of CHEM 1133 CHEM 1134 or CHEM 2100 CHEM 2101 or CHEM 1211 CHEM 1221 and MATH 2400 or APPM 2350 and PHYS 1110 or PHYS 1115 or PHYS 2020 (all minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4531 (3) Physical Chemistry 2

Lect. Introduces the quantum theory of atoms, molecules and chemical bonding, and statistical thermodynamics. Includes principles of quantum mechanics and their application to atomic structure, molecular spectroscopy, symmetry properties, and the determination of molecular structure. Also includes principles of statistical mechanics and their applications to properties of gases, liquids, and solids.

Requisites: Requires prerequisite courses of CHEM 4511 and PHYS 1120 or PHYS 2020, and MATH 2400 or APPM 2350 (all minimum grade C-).

Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

CHEM 4555 (4) Theoretical and Computational Chemistry

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations. Not recommended for students with a grade below B- in the prerequisite course.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 5555

Requisites: Requires prerequisite course of CHEM 4531 (minimum grade C-).

Grading Basis: Letter Grade

CHEM 4581 (1) Physical Chemistry Lab 1

One 3-hour lab per week. Instruction in experimental techniques of modern physical chemistry. Experiments illustrate the fundamental principles of thermodynamics and chemical kinetics. Illustrates the material discussed in CHEM 4511.

Requisites: Requires prerequisite or corequisite course of CHEM 4511 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 4591 (2) Physical Chemistry Lab 2

One lect. and one 3-hour laboratory every two weeks. a continuation of CHEM 4581, but may be taken concurrently with CHEM 4531. Experiments illustrate the principles of quantum chemistry and spectroscopy discussed in CHEM 4531.

Requisites: Requires prerequisite courses of CHEM 4511 and CHEM 4581 (all minimum grade C-). Requires prerequisite or corequisite course of CHEM 4531 (minimum grade C-). Restricted to Chemistry (CHEM) or Biochemistry (BCHM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences

Arts Sci Gen Ed: Distribution-Natural Sci Lab

CHEM 4901 (1-6) Independent Study in Chemistry

For undergraduate study. Department consent required. Repeatable up to 8 total credit hours.

Repeatable: Repeatable for up to 8.00 total credit hours.

CHEM 5011 (3) Advanced Inorganic Chemistry 1

Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4011

Requisites: Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.

CHEM 5061 (3) Advanced Inorganic Chemistry 2

Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.

Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

CHEM 5131 (3) Computer Programming and Data Analysis for Chemists

Provides an introduction to computer programming and data analysis skills that are a fundamental part of graduate research. The programming section of the course introduces the coding skills necessary for simulating, analyzing and visualizing data using IGOR Pro and for acquiring data and analyzing data using LabVIEW. Basic concepts in statistics and error analysis are also covered.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 4511 or CHEM 4171.

Grading Basis: Letter Grade

CHEM 5141 (3) Environmental Water and Soil Chemistry

Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4141

Requisites: Restricted to graduate students only.

CHEM 5151 (3) Atmospheric Chemistry

Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5151

Requisites: Restricted to graduate students only.

Recommended: Prerequisite one semester of college-level chemistry.

CHEM 5152 (3) Advanced Atmospheric Chemistry

Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5152

Recommended: Prerequisite CHEM 5151 or ATOC 5151.

CHEM 5161 (3) Analytical Atmospheric Spectroscopy

Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5171 (3) Electroanalytical Chemistry

Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Department enforced prerequisite: undergraduate physical chemistry or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5181 (3) Mass Spectrometry, Chromatography, and Computer Programming

Covers mass spectrometry, including instrumentation, ionization techniques, and interpretation of spectra. Analytical separation methods such as gas and liquid chromatography, ion mobility, and capillary electrophoresis. Introduction to atmospheric chemistry applications. Computer programming (Igor and LabVIEW) and simulation of instrumentation and processes. Department prerequisite: basic computer programming (or willingness to work hard on it), and undergraduate physics, statistics, and physical chemistry.

Requisites: Restricted to graduate students only.

CHEM 5251 (3) Materials Chemistry and Properties

Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4251

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5261 (3) Organic Materials: Structures and Functions

Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4261

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5271 (3) Chemistry of Solar Energy

Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4271

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5281 (3) Semiconductor Processing and Device Fabrication

Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5311 (3) Advanced Synthetic Organic Chemistry

Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Department enforced prerequisite: one year of organic chemistry or graduate standing.

CHEM 5321 (3) Advanced Physical Organic Chemistry

Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry

Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5501 (3) Advanced Topics in Physical Chemistry

Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5531 (3) Statistical Mechanics

Lect. Fundamental concepts of quantum and classical statistical mechanics. Applications to properties of gases, liquids, solids, spin and polymer systems. Reaction, fluctuation, nucleation and relaxation phenomena. Department enforced prerequisite: undergraduate physical chemistry.

Requisites: Restricted to graduate students only.

CHEM 5541 (3) Chemical Dynamics

Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.

Requisites: Restricted to graduate students only.

CHEM 5555 (4) Theoretical and Computational Chemistry

Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4555

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

CHEM 5571 (3) Surface Science

Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5581 (3) Introductory Quantum Chemistry

Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 5591 (3) Advanced Molecular Spectroscopy

Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.

Requisites: Restricted to graduate students only.

CHEM 6001 (1) Seminar: Inorganic Chemistry

Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6021 (1-3) Special Topics in Inorganic Chemistry

Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6031 (3) Special Topics in Nanoscience

Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy.

Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.

CHEM 6101 (1) Seminar: Analytical Chemistry

Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.

Requisites: Restricted to graduate students only.

CHEM 6111 (1-3) Special Topics in Analytical Chemistry

Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6301 (1-3) Seminar in Organic Chemistry

Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.

Requisites: Restricted to graduate students only.

CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry

Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.

Requisites: Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.

CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry

Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.

Requisites: Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.

CHEM 6401 (1-3) Seminar: Physical Chemistry

Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.

Requisites: Restricted to graduate students only.

CHEM 6411 (1-3) Advanced Topics in Physical Chemistry

Lect.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6801 (0) Departmental Research Seminar

Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry.

Requisites: Restricted to graduate students only.

CHEM 6901 (1-6) Research in Chemistry

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 6941 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

CHEM 6951 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

CHEM 7021 (2) Seminar: Structural Inorganic Chemistry

Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structure of transition metal complexes. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7101 (2) Seminar: Chromatography and Trace Analysis

Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7111 (2) Seminar: Electrochemistry

Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry

Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites CHEM 5151 and CHEM 5181.

CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry

Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis

Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.

Requisites: Restricted to graduate students only.

CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry

Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7231 (1) Seminar: Reactive Intermediates

Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7241 (1) Seminar: Synthetic Organic Chemistry

Series of seminars on directed total synthesis. Emphasizes modern synthetic methodology and applications to total synthesis of natural products. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7251 (1) Selected Topics in Chemical Genetics

Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions

Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7281 (1) Seminar: Molecular Self-Assembly

Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7291 (1) Seminar: Physical Organic Chemistry

Modern experimental techniques and theoretical models in physical organic chemistry are discussed in relation to the development of new materials, such as molecular size tinkertoys to the development of novel photochemical systems and their spectroscopies. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry

Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7311 (1) Selected Topics in Organic Materials

Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7401 (1) Seminar in Photochemical Reaction Control

Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7421 (2) Seminar: Negative Ion Chemistry

Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7431 (1) Seminar: Topics in Theoretical Chemical Physics

Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7441 (2) Research Seminar: Theoretical Chemistry

Studies theoretical description of molecular dynamics as related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry

Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.

Requisites: Restricted to graduate students only.

CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins

Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry

Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7491 (1) Seminar: Molecular Vibrational Dynamics

Topics pertaining to vibrational dynamics of small molecules are discussed, with particular emphasis upon IR laser spectroscopy, van der Waals' clusters, vibrationally induced dipole moments, and predissociation. Discussion of current research and recently published literature. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7501 (1) Seminar: Theoretical Molecular Dynamics

Variety of topics in theoretical chemical physics, emphasizing dynamics of molecules in dissipative environments or in radiation fields. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases

Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry

Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth

Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 7551 (1) Selected Topics in Ion Spectroscopy

Treats current topics in the spectroscopy of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEM 8991 (1-10) Doctoral Dissertation

All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Chinese (CHIN)

Courses

CHIN 1010 (5) Beginning Chinese 1

Introduces modern Chinese (Mandarin), developing all four skills (speaking, listening, reading and writing) and communicative strategies. Students learn both traditional full-form characters and the principles for converting them into simplified characters.

Additional Information: Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 1012 (4) Introduction to Chinese Civilization

An interdisciplinary introduction from ancient to modern times. Arts, literature, politics, social relations, religion, and material culture are studied in terms of significant themes and ideas pertaining to the civilization of China. Taught in English.

Additional Information: Arts Sci Core Curr: Human Diversity

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Diversity-Global Perspective

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 1020 (5) Beginning Chinese 2

Continuation of CHIN 1010.

Requisites: Requires prerequisite course of CHIN 1010 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 1051 (3) Masterpieces of Chinese Literature in Translation

Surveys Chinese thought and culture through close reading and discussion of selected masterworks of Chinese literature in translation. Texts include significant works of poetry, fiction, and drama, as well as philosophical and historical writings from various eras. Taught in English.

Additional Information: Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 2110 (5) Intermediate Chinese 1

Emphasizes reading, speaking, and writing modern Chinese, including continued study of both full-form and simplified characters. Introduces dictionaries and principles of character formation.

Requisites: Requires prerequisite course of CHIN 1020 (minimum grade C).

Additional Information: Arts Sci Core Curr: Foreign Language

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Foreign Language

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 2120 (5) Intermediate Chinese 2

Continuation of CHIN 2110.

Requisites: Requires prerequisite course of CHIN 2110 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 2441 (3) Film and the Dynamics of Chinese Culture

Through studying a group of Chinese films in light of modern Chinese history and literature, students examine a series of cultural dilemmas and issues in 20th century China and develop skills in analyzing literary and filmic texts. Taught in English.

Additional Information: GT Pathways: GT-AH2 - Arts Hum: Lit Humanities

Arts Sci Core Curr: Literature and the Arts

Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3110 (5) Advanced Chinese 1

Surveys a variety of authentic-language materials, including films, plays, newspaper articles, essays, and short stories. Emphasizes proficiency-oriented approach to reading, writing, and oral communication.

Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 3120 (5) Advanced Chinese 2

Continuation of CHIN 3110.

Requisites: Requires prerequisite course of CHIN 3110 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 3200 (3) Adv Wrtg Topics on Chinese & Japanese Literature and Civilization

Provides an introduction to the academic study of Chinese and Japanese literature and culture with a focus on writing skills in English through a survey of standard academic writing conventions. Review and assessment of selected textual materials, class presentation, critique, and revision. Recommended for majors. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: JPNS 3200

Requisites: Restricted to students with a minimum of 45 credits completed.

Additional Information: Arts Sci Core Curr: Written Communication

Arts Sci Gen Ed: Distribution-Arts Humanities

Arts Sci Gen Ed: Written Communication-Upper

Departmental Category: Japanese Courses in English

Departmental Category: Asia Content

CHIN 3311 (3) The Dao and the World in Medieval China

An interdisciplinary examination of the role of Daoist and Buddhist philosophical and religious concepts and images in medieval Chinese civilization, including literature and the arts. Focuses on the personal aspects of this period of religious and intellectual ferment, tracing the representation of these ideas in Chinese poetry, prose, painting and the plastic arts as well as their role in philosophical and religious speculation. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese Courses in English

Departmental Category: Asia Content

CHIN 3321 (3) Political Thought in Ancient China

Focuses on the political, religious, philosophical and literary aspects of ancient Chinese civilization (1500 B.C.-A.D. 200). Special attention is paid to foundational works that influenced later developments in Chinese culture. All readings are in English and taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3321

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3331 (3) Culture and Literature of Late Imperial China

The late imperial period was marked by growth of great metropolitan areas, expanded urban entertainments, and an extensive popular culture. Focuses on the literature and artifacts of this urban culture as well as the hegemonic culture of the state and of traditional social codes and their literary manifestations. Also considers growing contacts with the West and the transition to the modern period. All readings are in English. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3334 (3) Chinese Narrative Tradition

Examines the major works of Chinese narrative tradition from the fourth to the nineteenth century. Emphasizes the reading and analysis of selected texts and understanding of the cultural and social contexts of text production and circulation. Text selections vary from year to year. Taught in English.

Recommended: Prerequisite CHIN 1012.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3341 (3) Literature and Popular Culture in Modern China

Surveys 20th century Chinese literature and popular culture against the historical background of rebellion, revolution and reform. Emphasizes close and critical reading skills and an understanding of how aesthetic texts reflect and critically engage with historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films and scholarly articles. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3341

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3342 (3) Sinophone Literature in the Contemporary World

A survey of Chinese literature with a focus on exiled, diaspora, colonial, and semi-colonial writers. Students will be asked to discern how Chinese literature has made an intervention in world literature and how it has engaged with the world. Emphasizes close and critical reading skills and an understanding of how aesthetic texts critically engage within historical and cultural experiences. Assignments include novels, essays, short stories, poems, plays, songs, films, and scholarly articles. Taught in English.

Recommended: Prerequisite CHIN 1012 or CHIN 1051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3351 (3) Reality and Dream in Traditional Chinese Literature

Explores the role of dreams in pre-modern Chinese literature from the beginnings in the 2nd millennium B.C.E. to the 19th century. The source texts will range from religious, philosophical, medical and historical writings to poetry to various genres of fictional prose and drama. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3361 (3) Women and the Supernatural in Chinese Literature

Explores the relationship between the worlds of women and the supernatural in Chinese literature, from ancient to modern times. Focuses on selected significant works of classical and vernacular fiction, religious texts, and poetry. Taught in English.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 3371 (3) Topics in Chinese Film

Offers in-depth, critical analysis of key issues in Chinese culture as represented in Chinese film. Focuses on various topics, such as specific directors, regions, representation of gender in Chinese film, historical periods, etc. Varies from year to year. Requires no knowledge of Chinese. Taught in English.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CHIN 1051 or CHIN 2441.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese Courses in English
Departmental Category: Asia Content

CHIN 4110 (3) Advanced Readings in Modern Chinese 1

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4120 (3) Advanced Readings in Modern Chinese 2

Surveys a wide variety of 20th- and 21st-century texts that are of recognized literary or cultural importance. Focuses on translation, including discussion of content and style.

Requisites: Requires prerequisite course of CHIN 3120 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 4210 (3) Introduction to Classical Chinese

Introduces the classical language based on texts from the pre-Han and Han periods. Stresses precise knowledge of grammatical principles and exactitude in translation—the basis for all further work in classical Chinese.

Requisites: Requires prerequisite course of CHIN 2120 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4220 (3) Readings in Classical Chinese

Close reading of selected texts of ancient and medieval literature.

Readings in both prose and poetry. Emphasizes a disciplined, philological approach to the texts, with proper attention to diction, tone, and nuance.

Requisites: Requires prerequisite course of CHIN 4210 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4300 (3) Open Topics: Readings in Chinese Literature

Studies selected texts on a particular topic taught by regular or visiting faculty. Topics change each term.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 5750 and RLST 4750 and RLST 5750

Requisites: Requires prerequisite course of RLST 3800 (minimum grade C).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4900 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4950 (3) Honors Thesis

Additional Information: Arts Sciences Honors Course

Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 4980 (1) Practical Issues in Chinese Language Pedagogy

Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses.

Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 5980

Requisites: Requires prerequisite course of CHIN 4120 (minimum grade C).

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5010 (3) Sinological Methods

Provides training in research methods for graduate work in Sinology.

Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory

Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5070 (1) Graduate Academic Writing

Considers the act of academic writing both in terms of mechanics and in terms of habits of effective writers themselves, so that students, building upon a base knowledge of the expectations of the academy, develop approaches to help themselves gain the confidence to excel at the writing required of them in graduate school and beyond.

Requisites: Restricted to graduate students only.

CHIN 5120 (3) History of Literature through the Ninth Century

Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century

Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content

CHIN 5210 (3) Ancient Prose

Studies selected pre-imperial and Han prose texts important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on works such as the Lun yu, Mengzi, Zhuangzi, Huainanzi, Shiji, Hanshu, and Lunheng. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5220 (3) Ancient Poetry

Studies selected pre-imperial and Han poetic works important in their own time and for the influence they exercised on the later development of Chinese literary history. Focuses on the Shijing and the Chu ci, as well as the fu and shi of Han writers. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5230 (3) History of Early Chinese Thought

Introduces early Chinese philosophy, mostly "Masters' Literature" of the 5th–1st c. BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5280 (3) Topics in Ancient Literature

Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language's relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5410 (3) Medieval Prose

Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900 AD) prose that played an important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5420 (3) Medieval Poetry

Studies works of early medieval (ca. 200-600 AD) poetry. Writers and topics vary ranging from surveys of specific genre, shi or fu, or shared subject such as religious or commemorative verse, or specific periods, to focused studies of particular major figures Cao Zhi, Tao Qian, Li Bo, or Du Fu. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5430 (3) Medieval Thought and Religion

Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5480 (3) Topics in Medieval Literature

Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5610 (3) Early Modern Prose

Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5620 (3) Early Modern Poetry

Studies Song, Yuan, Ming and Qing poetry. Stresses major figures, stylistic variations, various poetry schools, new directions in shi verse, and the rise and development of ci. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5630 (3) Early Modern Fiction

Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as *Xiyou ji*, *Sanguo yanyi*, *Shuihu zhuan*, *Jin Ping Mei*, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5680 (3) Topics in Early Modern Literature

Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5750 (3) Daoism

Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 4750 and RLST 4750 and RLST 5750

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5810 (3) Modern Literature

Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5820 (3) Contemporary Literature

Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5830 (3) History of Chinese Film

Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5880 (3) Topics in 20th Century Literature

Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5890 (3) Topics in Chinese Film

Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5900 (1-3) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy

Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses.

Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.

Equivalent - Duplicate Degree Credit Not Granted: CHIN 4980

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6900 (1-6) Independent Study

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6940 (1) Master's Candidate for Degree

Requisites: Restricted to graduate students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 6950 (1-6) Master's Thesis**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content**CHIN 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to graduate students only.**Additional Information:** Departmental Category: Chinese
Departmental Category: Asia Content

Cinema Studies & Moving Image Arts (CINE)

Courses

CINE 1002 (3) Film Analysis for Non-Majors

Introduces the critical study of film, exploring theoretical, historical and technical concerns while presenting a survey of important film periods and genres. Students will hone critical-thinking, close-analysis, and writing skills. Covers a wide variety of films, approaching them from numerous perspectives, considering both the effects films have on individual viewers and their ability to reflect culture. Formerly FILM 1002.

Additional Information: Departmental Category: Genre and Movements**CINE 1502 (3) Introduction to Cinema Studies**

Introduces basic media literacy by exploring the technical and aesthetic principles behind the production, analysis and interpretation of films. Explores comprehension and thinking about movies critically as technological, cultural and artistic products. Study of films in different social and historical contexts and discussion of the importance of movies as cultural products. Formerly FILM 1502.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements**CINE 2000 (3) Moving Image Foundations I**

Introduces students to basic image making technology, aesthetics and methods. Fundamentals of film/video production in Super 8mm film, Digital ProRes 422 and other analog and digital image making, editing and management formats. May emphasize personal, experimental or narrative approaches with individual exercises, according to instructor. Basic competencies include composition, lighting, basic audio, basic editing, studio critique, file management, web upload, etc. Formerly FILM 2000.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).**Grading Basis:** Letter Grade**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production**CINE 2001 (3) Space Odysseys: Astrophys/Astronomy via Cinema/Arts**

Understanding representation of space in cinematic arts, as well as the underlying science. What are the political, societal, scientific and commercial motives in attempting to show our species venturing beyond Earth? These adventures highlight our hopes and fears for the future, while simultaneously clarifying contemporary anxieties. From the director G. Melies to the screenwriter B. Marling. Formerly FILM 1003.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities**CINE 2002 (3) Recent International Cinema**

Familiarizes students with current trends and major directors in international cinema. Students attend specific films screened in class and/or offered in the International Film Series, and read and write about these films. Formerly FILM 2002.

Recommended: Prerequisite CINE 1502 or 6 hours humanities courses involving critical writing.**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements**CINE 2003 (3) Film Topics**

Varying topics on important individuals, historical developments, groupings of films, film directors, critical and theoretical issues in film. Formerly FILM 2003.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics**CINE 2004 (3) CU Cinema Studies Seminar: The Telluride Film Festival**

Offers students a unique first-hand understanding of the significance of the film festival circuit in the context of global film culture and scholarship. Students will attend Telluride Film Festival screenings, discussions and Q&A sessions. After the festival, weekly screenings of select films from the previous year's festival offer insight into the festival's influence on box-office and the industry's award season. Formerly FILM 2004.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses**CINE 2005 (3) Form, Structure, and Narrative Analysis**

Analyzes the form and structure of narrative, experimental non-narrative, and documentary films. Familiarizes students with the general characteristics of the classic three-act structure, principles of adaptation, form and content of experimental films, structural approaches, and the basic formal, narrative, and rhetorical strategies of documentary filmmaking. Formerly FILM 2005.

Requisites: Requires prerequisite or corequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies majors only.**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops**CINE 2010 (3) Moving Image Computer Foundations**

Provides students with artistic foundational hands-on experience in integrated use of media software in both the PC and Mac creative imaging making digital working environments. Includes fundamentals in general computer maintenance, creative and practical audio editing, image management and manipulation, and creative moving image practice. Formerly FILM 2010.

Requisites: Restricted to Cinema Studies majors only.**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production**CINE 2105 (3) Introduction to the Screenplay**

Explores, through close reading and original student work, the form and structure of the screenplay. Students will learn to analyze structural and character elements of classic screenplays, and breaking down such elements as character, motivation, and arc. Students may learn some very basics of screenwriting form, develop a treatment, explore formal and technical issues, etc. Formerly FILM 2105.

Requisites: Requires prerequisite or corequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies majors only.**Additional Information:** Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 2203 (3) American Indians in Film

Surveys the image of American Indians in American (especially Hollywood) film with an emphasis on "revisionist," or breakthrough films. It follows the creation of "the Hollywood Indian" from early literature to contemporary motion pictures. Films are analyzed within historical, social, and artistic contexts, and examined in terms of the impact their images have exerted upon American society at large, as well as Native communities. Near the end of the course we will look at what happens when Native Americans write, direct, and act in their own independent films.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 2203

CINE 2300 (3) Beginning/Intermediate Filmmaking

Covers basic camera, editing, and splicing techniques for Super-8 film. Equipment is available at the film studies office for a modest rental fee. Formerly FILM 2300.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2312 (3) Film Trilogies

Study of films designed as trilogies, drawing on a wide range of international cinema. Films include Satyajit Ray's Apu Trilogy (India), Krzysztof Kieslowski's Three Colors Trilogy (Poland), Francois Truffaut's Antoine Doinel cycle (France), and Abbas Kiarostami's Iran Trilogy (Iran). Non-majors will need instructor's consent. Formerly FILM 2312.

Requisites: Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 2500 (3) Moving Image Foundations II

Instructs students in developing a technical and aesthetic understanding of the principles of analog and digital cinematography. Technical, creative and studio critique emphasis on the Bolex 16mm RX and Black Magic Pocket Cinema cameras, advanced composition, grammar and mechanics of cinema editing, film/digital lighting (exposure, latitude) multi-format origination and file management, non-sync sound techniques, etc. Formerly FILM 2500.

Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 (all minimum grade C). Restricted to Cinema Studies majors only.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2513 (3) Major Asian Filmmakers

Surveys the major Asian directors from China, India, Japan, Taiwan, and Vietnam. Non-majors will need instructor's consent. Formerly FILM 2513.

Requisites: Restricted to Cinema Studies majors only.

Recommended: Prerequisite CINE 1502.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics
Departmental Category: Asia Content

CINE 2521 (3) Classics of the Foreign Cinema: 1960s to Present

Surveys the classics of international cinema from the 1960s to the present. Non-majors will need instructor's consent. Formerly FILM 2521.

Requisites: Restricted to Cinema Studies majors only.

Recommended: Prerequisite CINE 1502.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 2610 (3) Animation Production

Includes analysis of independent and experimental animation and an introduction to various animation techniques (object, line, collage, sand or paint on glass, Xerox, cameraless, pixellation, etc.). Students produce exercise films and a final film exploring these techniques. Formerly FILM 2610.

Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 2900 (3) Lighting

Covers the basics of "why you need lighting", color temp, as well as camera techniques, lighting theory, and lighting set-ups for still and motion picture film video. Emphasizes hands on as well as theory. Formerly FILM 2900.

Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-). Restricted to Cinema Studies majors only.

Recommended: Prerequisite CINE 1502.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3002 (3) Major Film Movements

Historical-aesthetic survey dealing with various styles, movements, genres or national cinemas. Can be taught in conjunction with the appropriate language department. Typical offers are in the French, the German or the Russian films, etc. Also offers detailed approaches to specific styles, subjects or genres: film comedy, melodrama, the Western, women filmmakers, German expressionist cinema, Italian neorealism, etc. Formerly FILM 3002.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3003 (3) Major Film Directors

Focuses on the work of a single director or a group of related directors. Course content varies each semester. Consult the online Schedule Planner for specific topic. Non-majors need instructor consent. Formerly FILM 3003.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Cinema Studies majors only.

Recommended: Prerequisite students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3004 (3) Alfred Hitchcock: The American Films

Intensive survey of Hitchcock's American films from 1940 (Rebecca) to 1964 (Marnie). We will concentrate on in-depth analysis of the most influential and significant films made by the most important movie director of the Hollywood era. We will pay special attention to Hitchcock's deep understanding of the intricacies of film language, style and form in relation to the themes and subjects that interested him: guilt, sex, gender relations, crime and punishment, "mothers". Non-majors will need instructor's consent. Formerly FILM 3004.

Requisites: Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 3010 (1-3) Film Production Topics

Offers students both theoretical and practical experience in various specialized areas of cinematic production. Topics vary but include production in the documentary, fictional narrative, animation, computer animation, and experimental genres. Formerly FILM 3010.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CINE 2000 or CINE 2300 (minimum grade D-). Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3012 (3) Documentary Film

Provides a historical and theoretical introduction to the documentary film. Examines the historical beginnings of documentary film as well as exploring contemporary documentary practice. Canonical moments of documentary history and lesser known examples of documentary film work will be explored. Formerly FILM 3012.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Recommended: Prerequisite CINE 3051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3013 (3) Women and Film

Examines the representation of women in film, the role of women in the filmmaking process, and the contributions made by women as critics and scholars of the cinema. Its orientation is therefore both historical and theoretical. Organized chronologically, the course examines how women have been addressed and "constructed" as spectators in and through cinema over the last 120 years, the relationship between cinema and social history, how films express ideology, and how feminist film scholarship has changed from the 1970's to the present day. The course focuses on American and international narrative, documentary, and experimental films from 1895 to present directed by or about women. Formerly FILM 3013.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) only.

Additional Information: Arts Sci Core Curr: Human Diversity
Arts Sci Gen Ed: Distribution-Arts Humanities
Arts Sci Gen Ed: Diversity-U.S. Perspective
Departmental Category: Topics

CINE 3020 (3) Filmmaking Abroad: Acting & Directing Internationally

Offers an intensive three-week production seminar to realize a short narrative film. Students immerse themselves in a city abroad, in collaboration with fellow CU students and the host population, as they scout locations and film their projects. Requires production responsibilities on both sides of the camera. A Global Seminar offered during Maymester through CU International Education.

Equivalent - Duplicate Degree Credit Not Granted: THTR 3020

CINE 3030 (3) Analog Alternatives

Introduction to small gauge analog moving image formats and technologies with a focus on process and experimentation through hands-on exploration and demonstrations. This process-oriented class will utilize DIY methods and Alternative Process Photography approaches to work creatively with silver based holographic mediums. Students will create moving image works with Super 8mm and 16mm film while exploring the implications and possibilities of working with these mediums within our current digital paradigm. Formerly FILM 3030.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 (all minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3033 (3) Color and Cinema

Examines color and cinema from historical, technological, aesthetic and theoretical perspectives. Students will be required to complete both creative and scholarly assignments. Formerly FILM 3033.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3041 (3) Environmental Cinema

Interrogates how fiction and nonfiction filmmakers, writers, cinematographers, and moving-image editors have creatively responded to discoveries made in the field of environmental science. Using books by Rachel Carson and Scott MacDonald as a framework, we will examine a broad spectrum of filmmakers (e.g. Wes Anderson, Todd Haynes, Jennifer Baichwal, Bruce Conner, Percy Smith) alongside the most pressing environmental issues. Formerly FILM 3041.

Requisites: Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies or Environmental Studies (ENVS) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 3042 (3) Horror Film: History, Contexts, Aesthetics

Surveys the most exemplary and significant films in the Horror film genre from the 1920s to the present. With a historical emphasis, the course explores the ways in which the Horror genre has evolved in response to shifting social anxieties and cultural developments, and its reflections on society in various national or international contexts. Expect disturbing content and images. Formerly FILM 3042. Non-majors will need department consent to enroll.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies (FILM) majors and minors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3043 (3) Topics in Critical Film Studies

Prepares students for advanced Film Critical Studies work. Subject matter varies from semester to semester. Formerly FILM 3043.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3051 (4) Film History 1

Intensive introduction to film history from 1895 to 1959. Topics covered include the beginnings of motion picture photography, the growth of narrative complexity from Lumiere to Griffith, American silent comedy, Soviet theories of montage, German expressionist films, and the transition to sound. Formerly FILM 3051.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 3061 (4) Film History 2

Starts in 1959 and follows the historical growth and evolution of film aesthetics to the present. Studies Italian neorealist, French new wave, and recent experimental films, as well as the films of major auteur figures such as Bergman, Kurosawa, Fellini, Hitchcock, Bunuel, Antonioni, and Coppola. Formerly FILM 3061.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Recommended: Prerequisite CINE 3051 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 3081 (3) Contemporary American Cinema: 1980 to Present

Examines the relationship between American films from 1980 to the present and their cultural and historical context. Includes films by Bigelow, Fincher, Scorsese, Lee, Linklater, Lynch, Stone, the Coen brothers, and Jenkins. Assumes some film knowledge but is not restricted to majors. This course is open to Cinema Studies majors and non-majors, sophomores, juniors and seniors. Non-majors need instructor consent to enroll. Formerly FILM 3081.

Requisites: Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3104 (3) Film Criticism and Theory

Surveys the range and function of film criticism, introduces major positions and concepts of film theory and focuses on students' abilities to write about film.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 3104

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies or Humanities (HUMN) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 3211 (3) History of Russian Cinema

Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 3211

Requisites: Requires prerequisite course of CINE 1502 or RUSS 3211 (minimum grade D-).

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3400 (3) Cinema Production I

Exploration of creative cinema production through short production and post-production projects. A short final project will be required.

Focuses on the tactics and strategies of independent cinema production, examining a variety of approaches to genre. Explores a range of film and digital technologies. Formerly FILM 3400.

Requisites: Requires prerequisites courses of CINE 1502 (minimum grade C) and CINE 2000 and CINE 2500 (both minimum grade of B-). Requires corequisite courses of CINE 3515 and CINE 3525. Restricted to Cinema Studies majors only.

Recommended: Prerequisites CINE 2005 or 2105.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3402 (3) European Film and Culture

Studies the relationships between European film, art and culture. Offered each summer in a different European city (Rome, Paris, London, Athens, Barcelona). There will be regular in-class lectures, film screenings, field trips and on-site teaching. Formerly FILM 3402.

Repeatable: Repeatable for up to 12.00 total credit hours.

Recommended: Prerequisite introductory film and art history courses.

Additional Information: Arts Sci Core Curr: Literature and the Arts
Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3422 (3) The Hollywood Musical

Second only to jazz, some critics regard the Hollywood musical as the greatest American popular art form of the 20th century. Proposes a historical, formal and theoretical approach to the musical through its several iterations, from the classical, to the revisionist, to the unusual, placing the changes in the genre's form, structure, and ideology in the context of America's changing social, political and religious values. Formerly FILM 3422.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Recommended: Prerequisite CINE 3051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Genre and Movements

CINE 3503 (3) German Film Through World War II

History and theory of Weimar and Nazi film with sociocultural emphasis. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3503

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3513 (3) German Film and Society 1945-1989

Introduces issues in German society through film during the Cold War. Focus on East and West Germany, though some other German language films may be included. Emphasis is on reading films in their social, historical and political contexts. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 3513

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3515 (3) Lights, Camera, Action

In this practical and technical lecture course, students will gain an understanding of a variety of models for creative use of camera, lighting, and sound equipment. A broad survey of production topics, including mise-en-scene, single-camera cinematography, multi-camera cinematography, cinematic lighting design, and sync-sound capture will be introduced/outlined in support of CINE 3400. Formerly FILM 3515.

Requisites: Requires prerequisites courses of CINE 1502 (minimum grade C) and CINE 2000 and CINE 2500 (both minimum grade of B-). Requires corequisite courses of CINE 3400 and CINE 3525. Restricted to Cinema Studies majors only.

Recommended: Prerequisites CINE 2005 or 2105.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 3525 (3) Post Production Lecture

Covers the essentials of working with captured material to produce crafted art and messages in conjunction with CINE 3400. We will look at: the technical aspects of managing a wide range of digital formats; how to balance and mix audio; how to work with color and picture adjustments and how to use graphics and animation. The class leads students through all the steps to produce technically proficient material and gives students the tools, concepts and workflows to understand how to solve common production problems in filmmaking and video. Formerly FILM 3525.

Requisites: Requires prerequisites courses of CINE 1502 (minimum grade C) and CINE 2000 and CINE 2500 (both minimum grade of B-). Requires corequisite courses of CINE 3400 and CINE 3515. Restricted to Cinema Studies majors only.

Recommended: Prerequisites CINE 2005 or 2105.

Grading Basis: Letter Grade

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 3563 (3) Producing the Independent Film

Introduces the role of the producer from development through production and sales, distribution. Students will practice pitching, develop pitch decks and apply for funding for one project. The role of labs, residencies, markets and film festivals will be addressed as well as modes of financing including crowd funding, tax incentives, equity finance, pre-sales, co-productions and gap financing. Formerly FILM 3563.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3603 (3) Sound and Vision

Historical and aesthetic overview of sound in relation to film, ranging from Hitchcock's *Blackmail* to Mailick's *The Thin Red Line*. Pursues issues in sound design, mixing film scores, voiceovers, and film/sound theory in narrative, experimental, and documentary films. Among the filmmakers to be studied are Vertov, Welles, Altman, Brakhage, Lipsett, Eisenstein, Coppola, Scorsese, Stone, Leone, Godard, Nelson. Also explores a limited practicum using Pro Tools for sound design. Formerly FILM 3603.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Recommended: Prerequisite CINE 3051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 3620 (3) Experimental Digital Animation

Explores boundaries of traditional animation construction and delve into contemporary animation history. Small projects will involve experimentation with animation techniques that integrate with analog animation, frame-by-frame digital processes and live-action footage. Ideal for students who have taken CINE 2010 or CINE 2610 or CINE 3525. Students familiar with animation and digital imaging or those eager to explore the process are encouraged to enroll. Formerly FILM 3620.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3700 (3) Cinema Audio Design

Studies and applies Pro Tools as a post-production audio toolbox. Applied techniques include sound recording, field recording, foley, vocal recording and editing, plug-in generated sound creation, MIDI, basic scoring principles, audio sweetening and audio mixing. Students will be required to complete regular editing assignments in addition to a final soundscape project. Formerly FILM 3700.

Requisites: Requires prerequisite course of CINE 2010 or CINE 2500 (minimum grade D-). Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3900 (1-3) Independent Study (Production)

Limit of 3 credit hours per semester. Formerly FILM 3900.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Production

CINE 3901 (1-3) Independent Study (Critical Study)

Limit of 3 credit hours per semester. Formerly FILM 3901.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: History

CINE 3920 (1-3) Professional Seminar

Learning aspects of professional development in the field of cinema. Through workshops and assignments students will learn of the many opportunities found within all areas of production. Guests will help inform the students of professional options and expectations. Topics will include: crew work, fund raising, marketing festivals, low budget filmmaking, and alternative venues. Students may have an internship concurrently with this course. Formerly FILM 3920.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of CINE 2500 (minimum grade D-).

Recommended: Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 3940 (1-6) Cinema Studies Internship

Provides students with professional internship experiences with film, video, new media production companies, governmental agencies, production units, audio recording studios and new media industries. Students will be responsible for securing their own internship position. Formerly FILM 3940.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Cinema Studies majors only.

Recommended: Prerequisite CU GPA of at least 2.00 and upper-division standing and a 3.00 GPA as a BA or BFA Cinema Studies major.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Production

CINE 3990 (1) Film Practicum

Offers creative and technical experience in aspects of film, video and media production for students in the BFA track and BA production emphasis. Students earn credit by working in any number of "crew" positions for Upper Division Production, MFA productions or faculty projects under the supervision of the course instructor. Formerly FILM 3990.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Production

CINE 4000 (3) Advanced Digital Postproduction

Through projects, discussions and screenings, explores the advanced practices and aesthetics of computer-based moving-image art editing. Topics include how to edit and manage a postproduction cycle, how to use digital editing systems and capabilities such as compositing, digital audio, and optical effects treatments. Cannot be taken simultaneously with CINE 3400 or CINE 4400.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5000

Requisites: Requires prerequisite courses CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 and CINE 3400 or CINE 4400 (all minimum grade D-). Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which racial, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and ETHN 5001

Requisites: Requires prerequisite course of ETHN 2001 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 4003 (3) Film and Literature

Explores similarities and differences between literature and film as narrative arts. Studies several novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5003

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4004 (3) Topics in Film Theory

Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write "position" papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4004 and ARTF 5004

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies or Humanities (HUMN) majors only.

Recommended: Prerequisite CINE 3051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 4005 (3) Screenwriting Workshop: Short Form

A writing intensive course that focuses on the art of the short form screenplay. Students will complete regular writing exercises, presentations, and several short scripts. Formerly FILM 4005.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of CINE 1502 and CINE 2005 or CINE 2105 (all minimum grade D-). Restricted to students with 27-180 credits (Sophomores, Juniors or Seniors) Cinema Studies (CINE or CINM) majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 4010 (1-3) Topics in Film Production

Prepares students for advanced Cinema Studies production courses.

Subject matter varies each semester. Formerly FILM 4010.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5010

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of CINE 1502 and CINE 2000 or CINE 2300 and CINE 2500 (all minimum grade D-). Restricted to students with 57-180 credits (Junior or Senior) Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4021 (3) Directing/Acting for the Camera

Offers an intensive production seminar to prepare actors and directors to work collaboratively and effectively for the medium of the camera. Directing vocabulary, script interpretation, film terminology and acting techniques are applied. Explores situations in which actors and directors interact, from auditions to rehearsals to filming. Requires attendance, textbook readings, research and production responsibilities on both sides of the camera. Formerly FILM 4021.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5021

Recommended: Prerequisite CINE 1502.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: History

CINE 4023 (3) Topics in International Cinema

Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis. Formerly FILM 4023.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5023

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to Cinema Studies (CINE or CINM) or Fine Arts - Creative Arts (ARTC) majors only.

Recommended: Prerequisite CINE 3051.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4024 (3) Advanced Research Seminar

Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0. Formerly FILM 4024.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5024

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisites CINE 3051 and CINE 3061.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 4040 (3) Advanced Analog Alchemy

Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5040

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of CINE 3030 (minimum grade D-). Restricted to Cinema Studies majors only.

CINE 4043 (1-3) Topics in Cinema Critical Studies

Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester. Formerly FILM 4043.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5043

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4105 (3) Advanced Screenwriting

Introduces professional screenwriting in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5105

Requisites: Requires prerequisite course of CINE 4005 (minimum grade D-).

Recommended: Prerequisites CINE 3051 and CINE 3061 and an approved writing sample.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 4200 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4151, ATLS 4151, ATLS 5151, CINE 5200 and ARTF 5200

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4400 (3) Digital Post-Production

Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing. Formerly FILM 4400.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5400

Requisites: Requires prerequisite course of CINE 3525 (minimum grade D-). Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4453 (3) History of Avant-Garde Film

Survey course tracing the history, aesthetics and contexts of the American avant-garde cinema in light of contemporary art movements till today. Viewing key cultural works of film, video, and moving image arts. Includes Dada and Surrealist precursors, the mythopoetics of Deren, Anger and Brakhage, Abstraction and Animation, Mekas's lyrical diaries, Conner, collage and the Beats, Warhol and Pop Art, Nam Jun Paik and the pioneering video artists, Kuchar and camp, Schneeman's radical body politics and performance, AIDS activist media, and current works from the myriad marginal voices that drive avant-garde art practices. Formerly FILM 4453.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5453

Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Topics

CINE 4500 (3) Cinema Production 2

Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production leading to the completion of a BFA thesis project exploring either documentary, experimental, or narrative genres. Formerly FILM 4500.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5500

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite courses of CINE 3400 and CINE 3515 and CINE 3525 (all minimum grade C). Restricted to Cinema Studies majors only.

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Production

CINE 4505 (3) Screenwriting Workshop: Long Form

Creative writing workshop in which students plan and write a feature-length screenplay with emphasis on format, dialogue, characterization, and story.

Requisites: Requires prerequisite course of CINE 1502 and CINE 2000 (all minimum grade D-).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Workshops

CINE 4604 (3) Colloquium in Film Aesthetics

Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film. Department enforced prerequisite: restricted to students with 57-180 credits (Juniors or Seniors) with a minimum GPA of 3.0 or instructor consent required. Formerly FILM 4604.

Equivalent - Duplicate Degree Credit Not Granted: ARTF 5604

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Arts Sci Gen Ed: Distribution-Arts Humanities
Departmental Category: Intensive and Small Courses

CINE 4959 (3-6) Honors Senior Thesis

For exceptional Film Studies majors who wish to write an honors thesis based on independent research or creative work under the direction of a faculty member. Formerly FILM 4959.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Arts Sciences Honors Course

Departmental Category: Intensive and Small Courses

Civil Engineering (CVEN) Courses

CVEN 1027 (3) Civil Engineering Drawing

Develops drawing and drafting skills for civil engineering projects in both hand drawing and software tools. Students will learn to read and interpret design and construction drawings.

Requisites: Restricted to Civil Engineering (CVEN) majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 1317 (1) Introduction to Civil and Environmental Engineering

Surveys the broad subject of civil and environmental engineering and professional practice. Includes the subdisciplines of structures, water resources, geotechnics, transportation, environment, and construction. Discusses professional ethics, important skills for engineers, and the engineering design process as it fulfills multiple objectives.

Requisites: Restricted to students with 0-56 credits (Freshmen or Sophomore) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 1837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Miscellaneous

CVEN 2012 (3) Introduction to Geomatics

Presents basic techniques of land and construction surveying, including measurement of position, elevation, orientation and length of lines, area, volume and layout calculations. Optical, GPS and GIS equipment and methods are included.

Requisites: Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 2121 (3) Analytical Mechanics 1

Applies mechanics to the study of static equilibrium of rigid and elastic bodies. Includes composition/resolution of forces; moments/couples; equivalent force systems; free-body diagrams; equilibrium of particles and rigid bodies; forces in trusses/beams; frictional forces; first/second moments of area; moments and products of inertia.

Equivalent - Duplicate Degree Credit Not Granted: GEEN 2851 and MCEN 2023

Requisites: Requires a prereq course of PHYS 1110 (min grade C-).

Requires a prereq or coreq course of APPM 2350 or MATH 2400 (min grade C-). Restricted CVEN or EVEN or AREN or AMEN or EPEN or GEEN majors with a CIV, ENR or ARC subplan.

Additional Information: Departmental Category: Mechanics

CVEN 2837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Miscellaneous

CVEN 3022 (3) Construction Surveying

Studies construction and highway surveying, horizontal and vertical curves, earthwork, and analysis of data.

Requisites: Requires prerequisite course of CVEN 2012 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3032 (3) Photogrammetry

Familiarizes students with characteristics of aerial photographs.

Measures and interprets aerial photos for planimetric, topographic, hydrological, soil, and land use surveys. Analyzes and presents field measurements over extensive reaches.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3111 (3) Analytical Mechanics 2

Studies the motion (kinematics) of particles and rigid bodies, and the forces that cause the motion (kinetics). Newton's laws as well as energy methods are used to study the motion of particles and rigid bodies in two and three dimensions.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 2043

Requisites: Requires prerequisite courses of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all minimum grade C-). Restricted to AREN, CVEN, EVEN, or GEEN majors only.

Additional Information: Departmental Category: Mechanics

CVEN 3141 (2) Engineering Materials Lab

Additional Information: Departmental Category: Mechanics

CVEN 3161 (3) Mechanics of Materials 1

Addresses concepts of stress and strain; material properties, axial loading, torsion, simple bending, and transverse shear; analysis of stress and strain; and deflections of beams. Includes selected experimental and computational laboratories.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 2063

Requisites: Requires prereq CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all min grade C-). Requires coreq APPM 2360 or (MATH 2130 3430). Restricted to Arch (AREN) or Civil (CVEN) or Environ (EVEN) or General (GEEN) Eng majors with a CIV, ENR or ARC subplan.

Additional Information: Departmental Category: Mechanics

CVEN 3227 (3) Probability, Statistics and Decision

Introduces uncertainty based analysis concepts and applications in the planning and design of civil engineering systems emphasizing probabilistic, statistics, and design concepts and methods.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Miscellaneous

CVEN 3246 (3) Introduction to Construction

Provides a broad view of concerns, activities, and objectives of people involved in construction: the owner, architect/engineer, contractor, labor and inspector. Interactive gaming situation relates these people to the construction contract, plans/specifications, estimates/bids, scheduling, law and financial management. Students with a Business School Real Estate emphasis may be considered for this course.

Requisites: Restricted to junior or senior Civil (CVEN) or Architectural (AREN), Environmental (EVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

CVEN 3256 (3) Construction Equipment and Methods

Integrated study of construction equipment, methods, and economics. Topics include equipment productivity, equipment selection, and construction engineering design within economic constraints. Examples include earthmoving, concrete formwork, and temporary construction.

Requisites: Requires prerequisite course of CVEN 3246 (minimum grade C-). Restricted to Architectural (AREN) or Civil (CVEN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Construction

CVEN 3313 (3) Theoretical Fluid Mechanics

Basic principles of fluid mechanic. Covers fluid properties, hydrostatics, fluid flow concepts, including continuity, energy, momentum, dimensional analysis and similitude and flow in closed conduits.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 3200 and MCEN 3021

Requisites: Requires prerequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 (all minimum grade C-). Restricted to Civil (CVEN) or Environmental (EVEN) majors, or General (GEEN) Engineering majors with a CIV or ENR subplan.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3323 (3) Hydraulic Engineering

Studies hydraulic engineering theory and applications. Topics include incompressible flow in conduits, pipe system analysis and design, open channel flow, flow measurement, analysis and design of hydraulic machinery.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or GEEN 3853 or AREN 2120 or CHEN 3200 (all minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN) or General (GEEN) Engineering majors only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 3414 (3) Fundamentals of Environmental Engineering

Emphasizes chemical, ecological and hydrological fundamentals and importance of mass and energy balances in solving environmental engineering problems related to water quality, water and wastewater treatment, air pollution, solid and hazardous waste management, sustainability and risk assessment.

Requisites: Requires prereq courses CHEN 1201 or CHEN 1211 or CHEM 1113 or MCEN 1024 and APPM 1360 or MATH 2300 (all min grade C-). Restricted to CVEN, AREN, EVEN, MCEN, CHEN, GEEN or AMEN majors only.

Additional Information: Departmental Category: Environmental

CVEN 3424 (3) Water and Wastewater Treatment

Introduces design and operation of facilities for treatment of municipal water supplies and wastewater. Provides an engineering application of physical, chemical, and biological unit processes and operations for removal of impurities and pollutants. Involves an integrated design of whole treatment systems combining process elements.

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 3434 (3) Introduction to Applied Ecology

Emphasizes the integration of physical, chemical and biological processes in controlling terrestrial and aquatic ecosystems. Ecosystem concepts are applied to current environmental and water quality problems. Includes field trips and a group project.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 3434

Requisites: Requires prereq courses of (CHEN 1201 or CHEN 1211 or CHEM 1113 or CHEM 1400) and (CHEM 1114 or CHEM 1221) (all min grade C-). Restricted to students with 57-180 credits (Junior or Senior) Civil (CVEN), Environ (EVEN) or Arch Eng (AREN) or (GEEN) majors

Additional Information: Arts Sci Gen Ed: Distribution-Natural Sciences
Departmental Category: Environmental

CVEN 3525 (3) Structural Analysis

Studies structural analysis of statically determinate and indeterminate systems, deflections, energy methods, and force and stiffness methods.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematics (AMEN) majors only.

Additional Information: Departmental Category: Structures

CVEN 3602 (3) Transportation Systems

Introduces the principles of transportation systems with a focus on highway engineering and traffic analysis. Provides the basic skill set that will allow students to solve transportation problems related with highway design and traffic control and analysis. Provides an introduction to technology, operating characteristics, and relative merits of highway, airway, waterway, railroad, pipeline, and convey or transportation systems.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Surveying and Transportation

CVEN 3698 (3) Engineering Geology

Highlights the role of geology in engineering minerals; rocks; surficial deposits; rocks and soils as engineering materials; distribution of rocks at and below the surface; hydrologic influences; geologic exploration of engineering sites; geologic hazards; mapping; and geology of underground excavations, slopes, reservoirs and dam sites.

Requisites: Requires a prerequisite or corequisite course of CVEN 2121 or GEEN 2851 or ASEN 2001 or MCEN 2023 and APPM 2350 or MATH 2400 (all minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3708 (3) Geotechnical Engineering 1

Covers basic engineering characteristics of geological materials; soil and rock classifications; site investigation; physical, mechanical, and hydraulic properties of geologic materials; the effective stress principle; soil and rock improvement; seepage analysis; stress distribution; and consolidation and settlement analyses. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to Civil (CVEN), Environmental (EVEN), Architectural (AREN), General (GEEN) or Applied Mathematics (AMEN) majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3718 (3) Geotechnical Engineering 2

Covers stress analysis and plastic equilibrium, shear strength of soil, bearing capacity, lateral earth pressures, slope stability and underground construction. Analysis and design of shallow and deep foundations, retaining walls and other earth and rock structures. Selected experimental and computational laboratories.

Requisites: Requires prerequisite course of CVEN 3708 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Geotechnical

CVEN 3837 (1-3) Special Topics

Supervised study of special topics of interest to student under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Miscellaneous

CVEN 4147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5147

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 4157 (3) A Systems Approach to Global Engineering

Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

Equivalent - Duplicate Degree Credit Not Granted: EDEN 4147, CVEN 5157 and EDEN 5147

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

CVEN 4161 (3) Mechanics of Materials 2

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5161

Requisites: Requires prerequisite course of CVEN 3161 (minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4323 (3) Water Resources Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5423

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4333 (3) Engineering Hydrology

Studies engineering applications of principles of hydrology, including hydrologic cycle, rainfall and runoff, groundwater, storm frequency and duration studies, stream hydrography, flood frequency, and flood routing.

Requisites: Requires prerequisite course of CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 (all minimum grade C-).

Requires prerequisite or corequisite course of CVEN 3227 or APPM 4570 or MCEN 3047 or MCEN 3208 or CHEN 3010.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4353 (3) Groundwater Engineering

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Requires prerequisite course of CVEN 3313 or MCEN 3021 or CHEN 3200 or GEEN 3853 (minimum grade C-).

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4383 (3) Applied Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5383

Recommended: Prerequisite CVEN 4353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4404 (3) Water Chemistry

Introduces chemical fundamentals of inorganic aqueous compounds and contaminants in lecture and laboratory. Lecture topics include thermodynamics and kinetics of acids and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction and sorption.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4404

Requisites: Requires prerequisite course of (CHEN 1203 or CHEN 1211 or CHEM 1133) and (CHEM 1221 or CHEM 1134) (all minimum grade C-). Requires corequisite course of CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 4414 (1) Water Chemistry Laboratory

Reinforces chemical fundamentals of inorganic aqueous compounds and contaminants from CVEN/EVEN 4404 in laboratory experiments and reports. Topics include acids and bases, carbonate chemistry (alkalinity) and other water chemistry characteristics (hardness, dissolved oxygen); precipitation, complexation and oxidation-reduction reactions; and laboratory techniques and reporting.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4414

Requisites: Requires prerequisite courses of CHEN 1211 or CHEM 1113 and CHEM 1133 (all minimum grade C-). Requires corequisite course of CVEN 4404. Restricted to Civil (CVEN) or Environmental (EVEN) Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical transformations affecting the fate and transport of organic contaminants in natural and treated waters. Emphasizes quantitative approach to solubility, vapor pressure, air-water exchange, sorption, hydrolysis and redox reactions, and photodegradation.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4424

Requisites: Requires prerequisite course of CHEN 1211 or CHEM 1113 or CHEM 2100 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4434 (4) Environmental Engineering Design

Examines the design of facilities for the treatment of municipal water and wastewater, hazardous industrial waste, contaminated environmental sites and sustainable sanitation in developing countries. Economic, societal and site specific criteria impacting designs are emphasized.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4434

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5464 and EVEN 4464

Requisites: Requires prerequisite or corequisite courses of CVEN 3414 and CVEN 3313 or CHEN 3200 or GEEN 3853 or MCEN 3021 or AREN 2120 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5474

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Environmental

CVEN 4484 (3) Introduction to Environmental Microbiology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5484 and EVEN 4484

Requisites: Requires prerequisite courses of CHEN 1211 and CHEM 1221 or CHEM 1113 and CHEM 1114 and APPM 2350 or MATH 2400 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5511

Requisites: Requires prerequisite courses of CVEN 3161, CVEN 3525 and (APPM 2360 or (MATH 2130 and 3430)) (all minimum grade C-).

Additional Information: Departmental Category: Mechanics

CVEN 4525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5525

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4535 (1-3) Construction Materials

Introduces material science of engineering materials, such as atomic and crystal structures, defects and phase diagrams; discusses in detail three construction materials: steel, Portland cement concrete and asphalt concrete including classification and composition, engineering properties and testing methods (with three lab sessions). Covers basic of three materials: wood, fiber reinforced polymers and masonry.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of CVEN 3161 or MCEN 2063 (minimum grade C-). Restricted to College of Engineering majors only.

Additional Information: Departmental Category: Structures

CVEN 4537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5537

Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) College of Engineering majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 4545 (3) Steel Design

Applies basic principles of structural engineering and mechanics to design of steel structures; design of tension members, columns, beams, open-web joists, steel decks, bolts, bolted connections, welding processes, and welded connections.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Elective for the EVEN air quality track or an environmental concentration course for CVEN.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5554

Requisites: Requires prerequisite courses of APPM 2360 or MATH 2130 and MATH 3430 and CVEN 3313 or CHEN 3200 or MCEN 3021 (all minimum grade C-).

Additional Information: Departmental Category: Environmental

CVEN 4555 (3) Reinforced Concrete Design

Applies basic principles of structural engineering and mechanics to the design of reinforced concrete structures, including design of beams, columns, slabs, and footings; continuous beams and frames; cast-in-place buildings.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4565 (3) Design of Wood Structures

Applies basic principles of structural engineering and mechanics to the design of wood structures, including the design and analysis of columns, trusses, beams and connections using dimensional lumber, glulam and cross-laminated timber.

Requisites: Requires prerequisite course of CVEN 3525 (minimum grade C-).

Additional Information: Departmental Category: Structures

CVEN 4594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5594

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to College of Engineering students with 57-180 credits (Juniors or Seniors).

Recommended: Prerequisite CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 4718 (3) Mechanics and Dynamics of Glaciers

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5718

Requisites: Requires prereq course of (APPM 2350 or MATH 2400) and (APPM 2360 or (MATH 2130 and 3430)) and (AREN 2110 or GEEN 3852 or MCEN 3012 or ASEN 2002) and (CHEN 1310 or CSCI 1200 or CSCI 1300 or ASEN 1320 or ECEN 1310) (all min. grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4728 (3) Foundation Engineering

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 5728

Requisites: Requires prerequisite course of CVEN 3718 (minimum grade C-).

Additional Information: Departmental Category: Geotechnical

CVEN 4833 (1-3) Special Topics

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students with 57-180 credits (Junior or Senior) College of Engineering students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 4834 (1-3) Special Topics

Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGRU) undergraduates only.

Additional Information: Departmental Category: Environmental

CVEN 4835 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.

Additional Information: Departmental Category: Structures

CVEN 4836 (1-3) Special Topics

Offers a supervised study of special topics, under instructor guidance.

Repeatable: Repeatable for up to 3.00 total credit hours.

CVEN 4837 (1-3) Special Topics

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous

CVEN 4838 (1-3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Geotechnical

CVEN 4839 (3-6) Special Topics for Seniors

Offers a supervised study of special topics, under instructor guidance. Department consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4849 (1-3) Independent Study

Involves an independent, in-depth study, research, or design in a selected area of civil or environmental engineering. Offerings are coordinated with individual faculty. Students should consult the Department of Civil, Environmental, and Architectural Engineering.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Topics

CVEN 4897 (2) Professional Issues in Civil Engineering

Educates students about the knowledge and skills required for professional civil engineers. Students learn about the path to a professional license, prepare for the FE exam, analyze a situation involving multiple conflicting ethical interests, identify aspects of sustainability in civil engineering projects, and understand the role of project management, public policy, business and public administration, and leadership in civil engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) Civil (CVEN), Environmental (EVEN), or Architectural Engineering (AREN) majors only.

Additional Information: Departmental Category: Miscellaneous

CVEN 4899 (4) Civil Engineering Senior Project Design

Provides a simulated real world design and construction planning experience where teams integrate across multiple civil engineering sub-disciplines to create a solution that satisfies multiple constraints, including design, client requirements, budget, schedule, technical, regulatory, and societal. Final deliverables include: detailed design drawings, specifications, cost estimate, project schedule, construction plan, oral and written presentation.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to students with 87-180 credits (Senior) Civil (CVEN) or General (GEEN) engineering majors only.

Additional Information: Departmental Category: Special Topics

CVEN 4969 (3) Water and Sanitation in Developing Countries

Studies the design and fundamentals behind effective treatment processes and engineering solutions targeted for developing countries. Approaches to clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

Equivalent - Duplicate Degree Credit Not Granted: EVEN 4969

Requisites: Requires prerequisite course of CVEN 3414 (minimum grade C-). Restricted to students with 57-180 credits (Juniors or Seniors).

Additional Information: Departmental Category: Environmental

CVEN 5111 (3) Structural Dynamics

Focuses on the response of single- and multi-degree of freedom structures subjected to harmonic, impulsive and arbitrary loads (including earthquake base excitation). Sources and modeling of damping will be discussed. Analytical and numerical solutions will be considered for both linear and nonlinear structural systems. Elastic and inelastic response spectra will be discussed.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural, mechanical and geo-material behavior and continuum theories in mechanics. Topics: Cartesian tensors, formulation of continuum mechanics for small and large deformation, constitutive laws for elastic solids, energy principles, methods of potentials, formulations and solutions of 2D and 3D elastostatic and elastodynamic problems, analytical and numerical formulations.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4161.

Additional Information: Departmental Category: Mechanics

CVEN 5147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4147

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5157 (3) A Systems Approach to Global Engineering

Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

Equivalent - Duplicate Degree Credit Not Granted: EDEN 4147, CVEN 4157 and EDEN 5147

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

CVEN 5161 (3) Advanced Mechanics of Materials I

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4161

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5206 (3) Design Development

Provides an overview of the development process and proforma, investigates the interrelationship between design decisions and building costs, and evaluates the impact of each major building system on the development budget and schedule. Provides a simulated development experience where students respond to a Request for Proposal, including proformas, design, estimates and outline specifications. Department consent required. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5226 (3) Construction Safety

Comprehensively studies construction safety in the construction industry. Focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, predictive analytics and learning. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5276 (3) Engineering Risk and Decision Analysis

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, and various types of multicriteria decision analyses. Culminates in a larger term project.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3227 and graduate standing or instructor consent required.

Additional Information: Departmental Category: Construction

CVEN 5286 (3) Design Construction Operations

Considers effective/efficient design of construction operations. Front end planning; construction labor relations; productivity management. Emphasizes construction productivity improvement by group field studies and discrete event simulation modeling. How overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction

CVEN 5313 (3) Environmental Fluid Mechanics

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites APPM 2350 and APPM 2360 and CVEN 3313.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5323 (3) Applied Stream Ecology

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5333 (3) Physical Hydrology

Introduces hydrology as a quantitative science describing the occurrence, distribution and movement of water at and near the surface of the earth. Develops a quantitative understanding of atmospheric water, infiltration, evapotranspiration and surface runoff. Studies global climatology and large scale climate drivers of regional hydrology at interannual time scales. Solves engineering problems related to water resources.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4333.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5343 (3) Transport and Dispersion in Surface Water

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5346 (3) Managing Construction and Engineering Projects and Organizations

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5353 (3) Groundwater Hydrology

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 and APPM 2360.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5363 (3) Modeling of Hydrologic Systems

Introduces students to modeling techniques. Focus areas include physical hydrology and hydrometeorology; measurement and inference; climate change impacts; role of scale in hydrology; uncertainty analysis; and a case study project. Projects will examine hydrologic impacts of various drivers such as climate warming or land cover change, utilizing an assessment of historic conditions to better understand and model future disturbance scenarios.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5373 (3) Water Law, Policy, and Institutions

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5383 (3) Applied Groundwater Modeling

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4383

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites APPM 2360 and CVEN 4353 or CVEN 5353.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5393 (3) Water Resources System and Management

Introduces water resources planning and management as an integrated systems problem that satisfies multiple competing objectives under constraints and uncertainty. Includes problem formulation and solution using decision support systems, optimization with and without uncertainty, stochastic simulation, and multiobjective optimization. Introduces water resources economics and planning under uncertainties such as climate change and increasing urbanization.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5404 (3) Water Chemistry

Introduces chemical fundamentals governing the chemistry of natural and treated waters. Topics include thermodynamics and kinetics of acid and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5414 (3) Water Chemistry Laboratory

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters.

Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-). Requires corequisite course of CVEN 5424.

Additional Information: Departmental Category: Environmental

CVEN 5423 (3) Water Resources Engineering Design

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4323

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5424 (3) Environmental Organic Chemistry

Examines the fundamental physical and chemical processes that impact the fate and transport of organic contaminants in natural and engineered systems. Emphasizes both equilibrium and kinetic aspects, including solubility, vapor pressure, air-water exchange, sorption, abiotic redox reactions, and photodegradation.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5434 (3) Environmental Engineering Design

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Department consent required.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 5524 or CVEN 5534 or CVEN 5474.

Additional Information: Departmental Category: Environmental

CVEN 5444 (3) Municipal Des Proj

Additional Information: Departmental Category: Environmental

CVEN 5454 (3) Statistical Methods for Natural and Engineered Systems

Applies traditional and modern probability and statistical methods to environmental, hydrological, climatological and engineering data analysis. Topics include: basic probability, data visualization, fitting univariate and multivariate distributions, Monte Carlo simulations, extreme value distributions, confidence intervals and hypothesis testing, nonparametric density estimators, linear regression, and Bayesian analysis. The data analysis tool, R, is used throughout the course.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5464 (3) Environmental Engineering Processes

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and EVEN 4464

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5474 (3) Hazardous and Industrial Waste Management

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4474

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5484 (3) Applied Microbiology and Toxicology

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484 and EVEN 4484

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5494 (3) Surface Water Quality Modeling

Examines the relationships among air, water, and landpollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Department consent required.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5511 (3) Introduction to Finite Element Analysis

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4511

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5514 (3) Bioremediation

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4484 or CVEN 5424 or CVEN 5484.

Additional Information: Departmental Category: Environmental

CVEN 5524 (3) Drinking Water Treatment

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4464 or CVEN 5464 or graduate standing or instructor consent required.

Additional Information: Departmental Category: Environmental

CVEN 5525 (3) Matrix Structural Analysis

Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with Matlab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4525

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Structures

CVEN 5534 (3) Wastewater Treatment

Covers the processes used to treat municipal wastewater, focusing on biological processes. Includes: design of aerobic, anoxic, anaerobic and suspended growth technologies to remove and transform pollutants; design and assessment of treatment approaches that recover energy, nutrients and water from wastewater; application of fundamental concepts of aquatic chemistry, environmental microbiology and computational models.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 5404 and CVEN 5484 and CVEN 5464.

Additional Information: Departmental Category: Environmental

CVEN 5537 (3) Numerical Methods in Civil Engineering

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4537

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5544 (3) Solid Waste Management and Resource Recovery

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3414.

Additional Information: Departmental Category: Environmental

CVEN 5554 (3) Fundamentals of Air Quality Management

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Required for CVEN environmental engineering graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4554

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5564 (3) Water Profession: Communication and Utility Finance

Develops and improves the skills and tools needed for graduate students and young professionals. Focusing on highly effective leaders; leadership with impact; effective communication tools; and communicating with teams, city councils, governing boards, and the public.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Undergraduates may enroll with the permission of the instructor.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3227 or equivalent.

Additional Information: Departmental Category: Structures

CVEN 5574 (3) Water Utility Management: Current Issues and Future Challenges

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on management, leadership, communication and utility financial in the new water profession era. Undergraduate seniors may contact instructor for permission to enroll.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Environmental

CVEN 5575 (3) Advanced Topics in Steel Design

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Undergraduate may enroll with permission of the instructor.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4545.

Additional Information: Departmental Category: Structures

CVEN 5584 (3) Water Profession: Leadership and Management

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on financing water services, capital planning, rates, management planning, staffing and organization and critical thinking. Undergraduates may request instructor permission to enroll.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environmental

CVEN 5585 (3) Advanced Topics in Reinforced Concrete Design

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Undergraduates may enroll with the permission of the instructor.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4555.

Additional Information: Departmental Category: Structures

CVEN 5594 (3) Water Reuse and Reclamation

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4594

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3141 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5604 (3) UV Disinfection and Advanced Oxidation

Provides a fundamental basis for design of UV processes in water and wastewater treatment. Includes principles of photochemistry and photobiology. Applications to disinfection of water and degradation of chemical compounds in the environment. Design of UV disinfection systems and reactors and advanced oxidation processes. Environmental UV-based decay of pollutants.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3414 and CVEN 3424.

Additional Information: Departmental Category: Environmental

CVEN 5614 (3) Bioenergy & Bioresource Recovery

Introduces fundamental theories and applied technologies used in production and conversion of renewable biomass including waste materials into bioenergy and other value-added products. Conducts quantitative evaluations on conversion processes such as renewable biogas production, electricity generation, liquid fuels, metal and nutrients recovery and organic chemical production.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 4484.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environmental

CVEN 5628 (3) Seepage and Slopes

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisites CVEN 3708 and CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5678 (3) Soil Improvement and Reinforcement

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite CVEN 3718.

Additional Information: Departmental Category: Geotechnical

CVEN 5688 (3) Environmental Geotechnics

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Geotechnical

CVEN 5708 (3) Soil Mechanics

Offers an advanced course in soil mechanics. Coverage includes basic principles of continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling.
