PSCI 7136 (3) Public Policy and Behavioral Science

Public policy is usually designed with the assumption that we make optimal choices based on our own best interests. Findings from the behavioral sciences, however, challenge this traditional view and reveal that a wide array of factors influence our decisions. In this course, we will explore the gaps between how we assume individuals to behave and how people actually behave. With better knowledge of what motivates human behavior, we will examine and discuss how policy might be better designed and executed to improve outcomes in society.

Time series models; models which take advantage of variation over time in a single unit; and pooled time series (sometimes called cross-sectional time series or time series cross-sectional) models; which utilize variation across both time and spatial units; are very common in political science. While these models offer substantial leverage over important social science problems that use purely cross-sectional data, there are a number of pitfalls that are necessary to avoid during estimation.

RLST 3150 (3) Jerusalem: The Holy City in History, Legend, and Religious Thought

The history of Jerusalem and the stories that have given it prominence in the religious imagination continue to shape much of the world in which we live. In this class, we will survey approximately three millennia of the history of the city. We will ask methodological question, such as: What does it mean for a place to be conceived of as holy? How does this perceived holiness come about? What happens when holy places are destroyed and rebuilt? We will examine the biblical stories about Jerusalem not only as important sources themselves, but also for how they shape later religious traditions, specifically Judaism, Christianity, and Islam. As such, we will address what it means for the same place to be perceived as *holy* by differing, and often competing, groups. These contestations regarding Jerusalem will, then, allow us to engage issues of religious diversity and conflict both historically and in the present.
