The Department of Art and Art History offers three graduate degrees—the MFA in art practices, the MA in art history and the PhD in the Arts of the Americas—as well as the MFA/MBA and MA/MBA dual degrees in collaboration with the Leeds School of Business.

The MA in art history is intended to give students a broad general knowledge of art history in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in art history as well as other careers requiring an MA in art history or an equivalent degree.

The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools. During the two-and-a-half-year program, students focus on one of several fields, including: ceramics, IMAP (photography, digital media, video, integrated arts), painting and drawing, printmaking, sculpture and post-studio practice, and film (in collaboration with the Department of Cinema Studies and Moving Images Arts).

The MFA/MBA and MA/MBA program requires candidates to submit separate applications to the Department of Art and Art History as well as the Leeds School of Business. In addition to the required coursework, MFA and MA students gain additional insights about their respective fields through the Visiting Artist Program and Visiting Scholars Program, both of which invite distinguished artists and scholars to CU for talks, seminars and individual meetings with students.

The PhD in arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings Art History into dialogue with Anthropology, History, Ethnic Studies, Women's and Gender Studies, Religious Studies, and other disciplines in the humanities, social sciences, and natural sciences. Our accelerated PhD program is ideal for students who already have an MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

The faculty are highly active in their respective fields, from publishing important articles and books on historical and contemporary art to exhibiting in galleries and museums to establishing nontraditional artist venues and opportunities. The faculty are also committed teachers and mentors who work closely with graduate students, helping them to realize their individual visions as artists and historians.

Students who are accepted to the MA, MFA, MFA/MBA, MA/MBA and PhD programs join the CU Boulder Graduate School, which serves the community of graduate students, faculty and staff, one of the nation's premier comprehensive research universities. The Graduate School offers guidance on a wide array of academic, social and financial issues, and can assist in navigating the often complex world of graduate education.

Serving as an umbrella organization since 1892, the Graduate School currently oversees 100 graduate and professional programs. The Graduate School works to guarantee a standard of quality and cohesion across all disciplines, ensuring the continuing integrity and value of a CU Boulder graduate degree. The Graduate School also helps make possible the many connections between the campus and outside constituencies, in the state, the nation and the world.

Course codes for these programs are ARTF, ARTH and ARTS.
Special Programs

The CU Art Museum

The CU Art Museum is a cultural gateway to CU Boulder, facilitating engagement with larger societal issues through a greater understanding of the arts in a global context. The CU Art Museum is committed to enhancing understanding and appreciation of the visual arts within the academic community and among regional, national and international audiences. It provides access to art of the highest quality through exhibitions, publications and related educational events that reflect diversity, critical thinking and creative research. The museum also facilitates student training in museum practices. As a collecting institution, the CU Art Museum promotes the excellence, preservation, scholarly interpretation, exhibition and growth of its comprehensive permanent collection, which includes artworks from numerous time periods, artistic traditions and cultures. The 25,000-square-foot CU Art Museum contains five galleries, including permanent collection galleries, changing exhibition galleries and a video gallery. The CU Art Museum also includes a collections study center, allowing students, faculty and researchers the opportunity to schedule appointments to view, research and study works in its permanent collection.

The CU Art Museum's Permanent Collection

The Permanent Collection of the CU Art Museum contains over 8,800 works of art. The collection includes works from numerous time periods and cultures including ancient Greek pottery, Roman Glass, ancient Iranian pottery, Southwestern and South American santos, Southeast Asian pottery, African sculpture, Old Master works on paper, British 18th century prints, 19th and 20th century American prints and paintings, Japanese *ukiyo-e* prints, 19th century photography, Pop art, Minimalist works on paper and modern and contemporary ceramics, sculpture, works on paper, paintings, photography, video and new media art.

Visiting Scholar Program

This program is organized to explore the discipline of art history—its cultural connections, methodological pursuits and its changing nature—by focusing extensively on the research and insights of individual academic experts. Three to five highly regarded art historians and/or art critics speak at a public lecture, presenting current research and published papers.

Visiting Artist Program

Artists of national and international reputation interact with graduate and advanced undergraduate students and discuss their studio work at seminar meetings. Artists present a public lecture during their visit, providing continuous input of significant developments and a comprehensive view of contemporary issues in the arts.

Visual Resources Center (VRC)

The mission of the VRC is to provide and facilitate access to images, imaging and related information resources for teaching and research in the Department of Art and Art History. This includes: 1) a departmental image collection and support for other important image resources; 2) resources, training and support in digital imaging and image presentation software; and 3) equipment for use in creative work, documentation and classrooms within the department. The digital image collection contains works by faculty, MFA thesis recipients, visiting artists and other contemporary and historical works. Digital imaging resources include slide and flatbed scanning stations, with training available in digitization standards and best practices. VRC equipment includes laptops, data projectors, digital SLR cameras, video cameras, tripods and other equipment for use in the department. The VRC also circulates its collection of DVDs containing lectures and interviews from the department’s Visiting Artist Program. Visit the department’s Visual Resources Center webpage for more information.

For a full list of departmental resources, visit the department’s Resources webpage.

Master's Degrees

- Art History - Master of Arts (MA) (p. 1095)
- Art Practices - Master of Fine Arts (MFA) (p. 1096)

Doctoral Degree

- Arts of the Americas - Doctor of Philosophy (PhD) (p. 1099)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Alhadeff, Albert (https://experts.colorado.edu/display/fisid_100711/)
Associate Professor; PhD, New York University

Ambrose, Kirk T. (https://experts.colorado.edu/display/fisid_115914/)
Professor; PhD, University of Michigan Ann Arbor

Amerika, Mark (https://experts.colorado.edu/display/fisid_116523/)
Professor; MFA, Brown University

Brown, Marilyn Ruth (https://experts.colorado.edu/display/fisid_143782/)
Professor Emerita; PhD, Yale University

Chamberlin, H. Scott (https://experts.colorado.edu/display/fisid_105456/)
Professor; MFA, New York State College of Ceramics at Alfred University

Chong, Albert (https://experts.colorado.edu/display/fisid_100586/)
Professor; MFA, University of California, San Diego

Christie, Matt (https://experts.colorado.edu/display/fisid_149143/)
Instructor

Cline, Clinton C.
Professor Emeritus

Cohen, Brianne Caitlin (https://experts.colorado.edu/display/fisid_159724/)
Assistant Professor; PhD, University of Pittsburgh

Cordova, James M. (https://experts.colorado.edu/display/fisid_146415/)
Associate Professor, Associate Chair; PhD, Tulane University

Day, Robert E.
Professor Emeritus

de Stecher, Annette W. (https://experts.colorado.edu/display/fisid_155095/)
Assistant Professor, Associate Chair; PhD, Carleton University

Dickey, Kimberly (https://experts.colorado.edu/display/fisid_115735/)
Professor; MFA, New York State College of Ceramics at Alfred University
Duresse-Stimilli, Francoise (https://experts.colorado.edu/display/fisid_144418/)
Associate Professor; MFA, Temple University

Ecker, Robert R.
Professor Emeritus

Farago, Claire Joan
Professor Emerita

Forsman, Charles S.
Professor Emeritus

Foster, Suzanne R.
Professor Emeritus

Frost, Steven (https://experts.colorado.edu/display/fisid_156502/)
Instructor; MFA, School of Art Institute of Chicago

Geck, Francis J.
Professor Emeritus

Gregorio, Alvin P. (https://experts.colorado.edu/display/fisid_143596/)
Associate Professor; MFA, Claremont Graduate School

Haynes, Deborah J.
Professor Emerita

Iwamasa, Ken
Professor Emeritus

Kassianidou, Marina (https://experts.colorado.edu/display/fisid_157948/)
Assistant Professor; PhD, Chelsea College of Arts (UK)

Kunkel, Jerry W.
Professor Emeritus

Liotta, Jeanne M. (https://experts.colorado.edu/display/fisid_145808/)
Associate Professor; BFA, New York University

Miller, Kay
Professor Emerita

Minor, Vernon H.
Professor Emeritus

Nauman, Robert (https://experts.colorado.edu/display/fisid_106835/)
Senior Instructor; PhD, University of New Mexico

Potter, Thomas J.
Professor Emeritus

Qualley, Charles A.
Professor Emeritus

Quinn, Jeanne (https://experts.colorado.edu/display/fisid_111658/)
Professor, Chair, MFA, University of Washington

Rivera, George F. Jr. (https://experts.colorado.edu/display/fisid_103055/)
Professor; PhD, SUNY at Buffalo

Roth, Yumi J. (https://experts.colorado.edu/display/fisid_126287/)
Associate Professor; MFA, SUNY College at New Paltz

Sampson, John Franklin
Professor Emeritus

Saxton, Richard W. (https://experts.colorado.edu/display/fisid_144756/)
Associate Professor; MFA, Indiana University Bloomington

Shell, Hannah Rose (https://experts.colorado.edu/display/fisid_163199/)
Associate Professor; PhD, Harvard University

Stevens, Charlene (https://experts.colorado.edu/display/fisid_143589/)
Associate Professor; MFA, Indiana University Bloomington

Su, Stephanie Wenhui (https://experts.colorado.edu/display/fisid_164186/)
Assistant Professor; PhD, University of Chicago

Sweetman, Alex John (https://experts.colorado.edu/display/fisid_100531/)
Associate Professor; MFA, SUNY at Buffalo

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/)
Associate Professor; PhD, University of California, San Diego

Tsouhlarakis, Georgianna (https://experts.colorado.edu/display/fisid_165957/)
Assistant Professor; MFA, Yale University

Valdovino, Luis Hector (https://experts.colorado.edu/display/fisid_101863/)
Professor; MFA, University of Illinois at Urbana–Champaign

Vandersall, Amy L.
Professor Emerita

Walker, Melanie (https://experts.colorado.edu/display/fisid_101750/)
Associate Professor; MFA, Florida State University

Wilson, John B.
Professor Emeritus

Wolfe, Lynn Robert
Professor Emeritus

Womack, Mike Fitzgerald (https://experts.colorado.edu/display/fisid_148502/)

Courses

Art Film Studies

ARTF 5000 (3) Advanced Digital Postproduction
The world of video changes with blinding speed. This class lays the groundwork to keep up with the changing technology and all the technical details of working in commercial post. We will look at distributed rendering, color grading, film scanning, multi-editor collaboration, live production virtual reality and distribution. Every week students will have a technological challenge and work as a team to solve it. Strong familiarity with Adobe, Avid and DaVinci is recommended.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4000
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses
ARTF 5003 (3) Film and Literature
Explores similarities and differences between literature and film as narrative arts. Studies novels, short stories and plays and films made from them. Examines problems in point of view, manipulation of time, tone, structure, and setting.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4003
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5004 (3) Topics in Film Theory
Provides topic-centered analyses of controversial areas in film theory. Students read extensive materials in the topic area, analyze and summarize arguments as presented in the literature, write “position” papers and make oral presentations in which they elaborate their own arguments about specific assigned topic, establishing critical dialogue with the primary materials.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4004 and HUMN 4004
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of CINE 3051 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5010 (1-3) Topics in Film Production
Prepares students for advanced cinema production courses. Subject matter varies each semester.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4010
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5013 (3) Film, Photography and Modernism
Provides interdisciplinary study of film, photography and modernism, focusing on issues such as dystopia, alienation, sexuality, subjectivity and self-referentiality. Photographs by Stieglitz, Strand, Weston, Evans, Cartier-Bresson, Kertesz and Moholy-Nagy. Films by Dziga-Vertov, Eisenstein, Resnais, Antonioni, Bergman, Bunuel and Bertolucci.
Equivalent - Duplicate Degree Credit Not Granted: FILM 4013
Requisites: Requires prerequisite course of FILM 1502 (minimum grade D-).
Recommended: Prerequisite FILM 3051.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5021 (3) Directing/Acting for the Camera
Offers an intensive workshop that provides students with experience directing dramatic material, acting before a camera, and interpreting or adopting dramatic material for film. No experience in directing or acting required. Attendance, research, and papers required.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4021
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5023 (3) Topics in International Cinema
Focuses on major international filmmakers who have had a decisive impact on world cinema. Students will learn how directors create their own innovative body of work with specific formal and thematic patterns and will also learn to place such work within multiple frameworks that will cover film history, theory, aesthetics, philosophy and social and cultural analysis.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4023
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of CINE 1502 (minimum grade D-). Restricted to graduate students only.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5024 (3) Advanced Research Seminar
Focuses on a specific topic, director, or genre chosen by the professor. Research skills and critical thinking are emphasized. With faculty guidance, students determine individual projects and present them to the class. Class participation is mandatory. Each student submits a thorough and original research paper for a final grade.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4024
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5040 (3) Advanced Analog Alchemy
Investigating, developing, and re-interpreting historical approaches and processes involved in the creation of Analog motion picture works. Students will work with Analog mediums in alternative modes and unestablished ways and develop their personal process towards the goal of producing a unique moving image work to be presented in a final analog format for exhibition.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4040
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Art Practices (ARTF) students only.

ARTF 5043 (1-3) Topics in Cinema Critical Studies
Prepares students for advanced Cinema Studies critical studies courses. Subject matter varies each semester.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4043
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ARTF 5105 (3) Advanced Screenwriting
Introduces professional screenwriting, in the form of a creative writing workshop. Admission by portfolio (see film department). Students write scenes and scripts for short films, feature treatments, etc., and are graded on a final portfolio. Department enforced prerequisite: approved writing sample.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4105
Recommended: Prerequisites CINE 3051 and CINE 3061.
Additional Information: Departmental Category: Graduate Film Courses
ARTF 5200 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, MCEN 5151, ATLS 4151 and ATLS 5151
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5211 (3) History of Russian Cinema
Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 5211 and RUSS 4211 and CINE 4211
Requisites: Restricted to graduate students only.

ARTF 5400 (3) Digital Post-Production
Through projects, discussions, and screenings, this class explores the practices and aesthetics of computer-based moving-image art editing.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4400
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5453 (3) History of Avant-Garde Film
Traces the history and aesthetics of avant-garde/experimental films in light of similar ideas found in the other arts, particularly painting, poetry, photography and music. Topics covered include Dada and the early avant-garde; surrealism and psychodramas; Brakhage and abstract expressionism; feminist arts and film since the 1980s; the idea of the sublime in painting, music and film; landscape in painting, photography and film; post-modernism and the cinema; queer theory, gender/identity politics and aesthetics of recent films; and specific multiple disciplinary artists such as Andy Warhol, Michael Snow, Helen Levitt and Gunvor Nelson.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4453
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5500 (3) Cinema Production 2
Advanced exploration of creative cinema production through short production and post-production projects. Course focuses on the tactics and strategies of independent cinema production exploring either documentary, experimental, or narrative genres.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4500
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5604 (3) Colloquium in Film Aesthetics
Seminar for the serious round table discussion and critique of film as an art form, emphasizing development of appropriate verbal and written language skills for description of film.
Equivalent - Duplicate Degree Credit Not Granted: FILM 4604
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5610 (3) Image-makers Graduate Seminar
Explores advanced graduate studio work in a seminar setting. Focuses on the development of ideas and activities which advance creative image making.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5717 (1-3) Graduate Studio Critique
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5846 (1-3) Graduate Independent Study-Video
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 5857 (1-3) Graduate Independent Study
Participate in graduate independent study.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

ARTF 6599 (1-6) Master's Thesis
Preparation, research, writing of critical studies Master's thesis in fulfillment of concurrent BAM in Cinema Studies.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ARTF 5004 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Film Courses

Art History
ARTH 5029 (1) Art History Research Methods
In this class we will investigate how art scholarship is formed and organized; learn to expertly navigate the vast array of art research resources; and explore advanced techniques for searching both online and offline sources of art information. We will work to develop a critical understanding of our own research processes and reflect on the tools and techniques that lead to both expert research and successful participation in art discourse.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4029 and LIBR 4029
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4099, CLAS 4099, and CLAS 5099
Grading Basis: Letter Grade
ARTH 5109 (3) Ancient Italian Painting
Explains the problems, theories and methods for understanding the
iconography, styles, topologies, contexts and techniques of fresco wall
painting in ancient Italy from the 6th century B.C.E. to the 4th century
C.E. Topics covered include Etruscan tomb paintings, late Republican
early imperial fresco paintings from Rome and Campania and
later Roman wall paintings, including the painted images in ancient
catacombs. Previous coursework on ancient Italy or the history of pre-
modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5109 and
ARTH 4109 and ARTH 5109
Additional Information: Departmental Category: Art History

ARTH 5119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display,
iconography, and production of private and public monuments in
the Roman Empire. Explores sculpture as evidence for historical
developments, societal and gender attitudes, and state ideologies in the
ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4119 and
CLAS 4119 and CLAS 5119
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5109 (3) Hellenistic Art and Archaeology
Examines the activities of art museums.
Focuses on opportunities at the Denver Art Museum, working with
individual curators and master teachers in selected areas, such as
audience interpretation, interpretive research files, and public school
curriculums. Introduces students to the professional culture and
activities of art museums.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4229 and
CLAS 4229 and CLAS 5229
Additional Information: Departmental Category: Art History

ARTH 5129 (3) Ancient Egyptian Art and Archaeology
Examines civilizations of the Iran-Iraq region from the rise of urbanism
in Mesopotamia through the era of the first 'world empire,' Achaemenid
Persia. Emphasizes the material record of religious and state institutions
of the ancient Near East, especially monuments that illustrate concepts
of kingship. Explores notions of style, symbolism, visual rhetoric, text-
image synthesis, patronage, creativity and roles of artists.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4269 and
CLAS 4269 and CLAS 5269
Additional Information: Departmental Category: Art History

ARTH 5189 (3) Hellenistic Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture.
Topics vary and may include ancient wall painting, Greek sculpture,
artists and patrons, the ancient Near East, Egyptian art and archaeology,
or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and
CLAS 5169
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple
enrollment in term.
Additional Information: Departmental Category: Art History

ARTH 5179 (3) City of Athens
Explores in detail the architecture, sculptures, coins, frescos and other
material evidence alongside the political and social history of Augustan
Rome. Emphasis is on ways in which the textual and archaeological
evidence complement and/or contradict one another. Explores the impact
of the early imperial period on later Roman phases of urban design and
image making in the capital city.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5189
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5229 (3) Ancient Egyptian Art and Archaeology
Research agendas. Required for all MA art history students, open to others.
ARTH 5229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history
of excavations of the different sites; and the art of ancient Egypt through
time. Formerly ANTH 5420.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4229 and
CLAS 4229 and CLAS 5229
Additional Information: Departmental Category: Art History

ARTH 5509 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture.
Topics vary and may include ancient wall painting, Greek sculpture,
artists and patrons, the ancient Near East, Egyptian art and archaeology,
or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and
CLAS 5169
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple
enrollment in term.
Additional Information: Departmental Category: Art History

ARTH 5179 (3) City of Athens
Explores in detail the architecture, sculptures, coins, frescos and other
material evidence alongside the political and social history of Augustan
Rome. Emphasis is on ways in which the textual and archaeological
evidence complement and/or contradict one another. Explores the impact
of the early imperial period on later Roman phases of urban design and
image making in the capital city.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5189
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history
of excavations of the different sites; and the art of ancient Egypt through
time. Formerly ANTH 5420.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4229 and
CLAS 4229 and CLAS 5229
Additional Information: Departmental Category: Art History

ARTH 5269 (3) Art and Archaeology of the Ancient Near East
Examines civilizations of the Iran-Iraq region from the rise of urbanism
in Mesopotamia through the era of the first 'world empire,' Achaemenid
Persia. Emphasizes the material record of religious and state institutions
of the ancient Near East, especially monuments that illustrate concepts
of kingship. Explores notions of style, symbolism, visual rhetoric, text-
image synthesis, patronage, creativity and roles of artists.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4269 and
CLAS 4269 and CLAS 5269
Additional Information: Departmental Category: Art History

ARTH 5299 (1-3) Special Topics in Art History
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4299
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple
enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 5399 (3-6) Art Museum Internship
Focuses on opportunities at the Denver Art Museum, working with
individual curators and master teachers in selected areas, such as
audience interpretation, interpretive research files, and public school
curriculums. Introduces students to the professional culture and
activities of art museums.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 4399
Repeatability: Repeatable for up to 18.00 total credit hours. Allows multiple
enrollment in term.
Requisites: Restricted to graduate students or Art History Concurrent
Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH)
students only.
Additional Information: Departmental Category: Art History

ARTH 5499 (3) Visiting Scholars Seminar
Brings speakers to campus to work with seminar students, usually four
guest scholars per semester, subjects vary. Students read scholar's work
and discuss methodological issues. Focuses on the research and insight
of scholars who are currently shaping the field and defining research
agendas. Required for all MA art history students, open to others.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History
ARTH 5959 (3) Introduction to Critical Theory for Visual Studies
Provides overview for critical theory from Marx to contemporary writers with emphasis on their relevance to visual studies. Addresses issues that underlie a wide range of academic discussion in arts and sciences. Foucault, Derrida, Said, Lacan and other authors will be subject to weekly discussions leading to research papers, presentations, and projects. Class fulfills critical theory requirement for MFA and MA students.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 6150 (3) Critical and Theoretical Issues in Museums
Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and HIST 6150
Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 6559 (3) Power & Visuality After the Conquest
Examines how artistic production was informed by, and participated in, Latin America's colonial experience (16th to 19th centuries). With a critical eye and decolonial approach, students examine the complex strategies and objectives of visual culture in an ethnically/racially diverse colonial setting. Focus on historiography, visual culture, artists, patrons, hybridity, extinction, conquest, conversion, materiality, literacy, and global networks. Emphasis on colonial Mexico and Peru and their Indigenous populations. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

ARTH 6779 (3) Visualizing Gender Before and After the Conquest
Examines issues of gender and power in Pre-Columbian and Colonial Latin American visual culture. Special focus on women’s social roles and the nature and function of their images in pre-Hepanic and colonial times. Course readings and discussions draw from a variety of art-historical, ethnohistorical, literary, and anthropological sources. The interdisciplinary scope provides an intellectually diverse framework that accounts for historical and contemporary assumptions about art, representation, race/ethnicity, and gender.
Requisites: Restricted to graduate students only.

ARTH 6929 (3) Seminar: Theories of Art History
Provides a systematic critical overview of the development of art history as a discipline beginning with 18th century theories of aesthetics and ending with current interdisciplinary models of critical interpretation. Weekly readings, discussions, reports, and written papers constitute the format of this seminar in methodology. Topics vary from semester to semester. Required for MA (art history) students.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
Additional Information: Departmental Category: Art History

ARTH 6939 (3) Graduate Seminar: Open Topics in Art History
Subjects and topics vary.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or Art History Concurrent Degree (C-AAAH) or Film Art History Concurrent Degree (C-FILMAAAH) students only.
Additional Information: Departmental Category: Art History

ARTH 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 6959 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art History

ARTH 6969 (1-6) Master's Project (Art History)
Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Art History

ARTH 6990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 60.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to students in the AAAH-PHD program, and who have completed a minimum of 30 credit hours.

Art Studio and Non-Studio
ARTS 5017 (1-3) Special Topics in Studio Arts
Introduces timely subjects in studio art courses that cannot be offered on a regular basis. Information on topics in any given semester is available prior to pre-registration in departmental office.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4017
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5024 (3) Public Art
Focuses on the two areas 1) lecture/discussion, both based on political, historical and the aesthetic evolution regarding examples of public art and 2) current practice, in reference to how to use such information to generate new more innovative and original ideas regarding public art and its application. Includes lectures, readings and discussions, writing assignments, studio projects and visual presentations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4024
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Sculpture
ARTS 5050 (3) Writing Across the Arts: Culture Writing in the 21st c
In this culture writing class, we'll listen in on and contribute to the conversation, touching on many forms of expression, from fine art to pop culture. Art, of course, does not exist solely in a museum or gallery, and we will consider, both in our reading and in written assignments--its social context as well as, more personally, art's capacity to challenge us, to incite empathy or self-scrutiny, to provoke and inspire.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4050
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ARTS 5060 (3) Art Writing As Practice
This seminar is designed for visual artists in pre-thesis, supporting them in building a regular writing practice that will allow them to reflect upon and lend critical context to their creative work. Through written prompts, presentations and discussions—as well as looking to the example of artists we count as influences—we'll craft a narrative about our work and where it fits into larger conversations about art, identity, history, and our own times. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4060
Grading Basis: Letter Grade

ARTS 5075 (3) Graduate Ceramics
Seminar includes group and individual critiques and individual studio visits. Explores different approaches to studio and post studio art practices, research, reading and writing as it relates to your own art practice and contemporary art. May be repeated for up to 18 total credit hours.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ceramics

ARTS 5087 (3) Selected Topics in Contemporary Art
Selectively studies significant areas of visual art of the last decade including major critical opinions.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4087
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5095 (3) Special Topics in Ceramics
Designed for graduate students in art practices or art history. Covers many subjects related to contemporary art practice and ceramics. Topics change from semester to semester from the raw material science behind ceramics to the relation between object making and poetic practice, to food and contemporary art explorations, to political and social art movements, to many other relevant subjects for those interested in the arts. May be repeated for up to 9 total credit hours.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4095
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5097 (1-3) Special Topics-Non-Studio
Introduces timely subjects in the visual arts that cannot be offered on a regular basis. Information concerning the topics offered in any given semester is available prior to preregistration from the fine arts department.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4097
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5104 (3) Performance/Installation
Primarily focuses upon personal imagery as a live situation occurring in either an invented constructed reality or real environment. Work may be individual or group configuration and may also take on the visual linguistic form of a solo performance or of a multimedia presentation.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4104
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5107 (1-3) Special Topics
Repeatable: Repeatable for up to 7.00 total credit hours.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5117 (3) Graduate Art Seminar
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Seminars/Special Topics

ARTS 5118 (3) Visiting Artist Program
Artists of national and international reputation, interacting with graduate and advanced undergraduate students, discuss their studio work at seminar meetings and at public lectures or events. Provides continuous input of significant developments and a comprehensive view of contemporary issues in the arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4118
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5126 (3) Digital Art 2
Offers studio experience using personal computer in the generation and processing of imagery in the visual arts.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4126
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Visiting Artist Program

ARTS 5130 (3) Integrated Media
Encourages experimentation with media and integration of traditional areas of drawing, painting, sculpture and photography. Covers two- and three-dimensional collage/assemblage, correspondence art, artist's books, site-specific, performance, audio and video art.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4130
Additional Information: Departmental Category: Integrated Arts

ARTS 5140 (3) Integrated Arts Studio
Explores the creative process through a series of conceptually-based studio exercises. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Includes individual and collaborative studio projects, as well as reading and writing about the course themes.
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Integrated Arts

ARTS 5150 (3) Graduate Integrated Arts
Investigates the conjuction of interdisciplinary concepts in the creation of art. Looks beyond traditional media to new sources for art-making. a curious intellect, combined with exceptional research skills, will be the basis for original writing and rigorous discussion.
Repeatable: Repeatable for up to 18.00 total credit hours.
Additional Information: Departmental Category: Integrated Arts
ARTS 5154 (3) Metalsmithing 1
Introduces students to the fundamental techniques used in metalsmithing, including cold and hot fabrication techniques, forming and coloring. Through projects, discussions, readings and demonstrations, students will learn how to create, analyze, understand and critique contemporary metalwork. Projects will focus on design and concept development, while enhancing students' technical and problem-solving skills.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4154
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sculpture

ARTS 5161 (3) Graduate Photography
Explores the creative process through lens-based conceptual work with a concentration on individual critique. Students are encouraged to work across traditional media boundaries as they address themes such as identity, place, spirituality, politics, and consumerism. Possibilities include individual and collaborative studio projects, as well as relevant readings and writings. May be repeated for up to 18 total credit hours.
Repeatable: Repeatable for up to 18.00 total credit hours.
Additional Information: Departmental Category: Photography

ARTS 5171 (3) New Directions in Photography
Investigates the use of the photographic image in new, antique, or nonstandard ways including nonsilver, photosculture, various color processes, photolanguage, photoinstallations, electronic media, performance, filmmaking, electrostatic art (copy machine), photobooks, photocollage, and audio/visual art. Course content changes each semester.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4171
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Photography

ARTS 5176 (3) New Directions in Digital Art
Investigates the use of digital art in various contexts including digital narrative, web publishing, Internet art, multimedia performance, animation, conceptual art, information art, sound art, language art and network installations.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4176
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Photography

ARTS 5202 (3) Graduate Painting
This course is an intense inquiry into contemporary studio practices. Students will be expected to consider and communicate the context (social, political, personal, philosophical, etc.) underpinning studio work as well as the decisions that go into making that work. Specific themes of inquiry will vary by semester, depending on the instructor. Coursework may include readings, group discussions, group and individual critiques, written assignments, and projects. May be repeated for up to 18 total credit hours.
Repeatable: Repeatable for up to 18.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Painting/Drawing

ARTS 5246 (3) Graduate Beginning Video Production
Presents a studio course on basic single camera video production strategies and concepts. Through class screenings, projects, demonstrations, discussions, and readings, students gain an introductory familiarity with camera, lighting, sound, editing and the organization and planning involved in a video project. Explores a basic theoretical understanding of video as an art form and its relationship to television, film, art, history, culture.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4246
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5303 (3-18) Graduate Relief
Continues the study of the expressive/formal aesthetics of relief processes. Studio practice/investigation of artistic attitudes as exemplified through historical perspectives, traditional/contemporary usages. Students with limited experience in relief processes will be given an overview in those practices.
Repeatable: Repeatable for up to 18.00 total credit hours.
Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Printmaking

ARTS 5316 (3) History and Theory of Digital Art
Explores the history and theory of digital art. Discussion topics include the emergence of Internet art, hypertext, new media theory, online exhibitions, web publishing, virtual reality and the networked interface. Includes collaborative and individual projects.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4316
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5346 (3) Graduate Intermediate Video Production
Continuation of beginning video production. Extends the knowledge of single camera video production strategies and concepts. Expands the concept of montage (editing) and strategies to develop a video project through class screenings, projects, discussions and readings. Furthers theoretical understanding of video as an art form.
Equivalent - Duplicate Degree Credit Not Granted: ARTS 4346 and FILM 4340
Requisites: Requires prerequisite course of ARTS 4246 or ARTS 5246 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Media Arts

ARTS 5403 (3) Graduate Intaglio
Continuation of the study of expressive and formal aesthetics of Intaglio processes. Studio practice and investigation of artistic attitudes as exemplified through historical perspectives, traditional, and contemporary usages. Building a body of work in this course is the goal. Taught with ARTS 3403 and ARTS 4403.
Repeatable: Repeatable for up to 18.00 total credit hours.
Requisites: Restricted to Studio Arts or Art History (AASA or AAAH) graduate students only.
Additional Information: Departmental Category: Printmaking
ARTS 5413 (3) Graduate Lithography
Graduate students are expected to edition Lithographs that are conceptually relevant and technically proficient. Projects are proposed and developed with the instructor. Students with limited experience in aluminum plate or stone lithography will be given an overview in those practices. The development of concepts and personally significant imagery leading to thesis work is required. May be repeated for up to 9 total credit hours. Taught with ARTS 3413 and ARTS 4413.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

ARTS 5423 (3) Graduate Screen Printing
Screen print for creative expression with a focus on studio practice. Developing personal visual language/aesthetics. Focus on the complexities and multi-disciplinary activities of printmaking. Development of concepts leading to thesis work is a focus. Historical/contemporary awareness, evolving technologies/strategies. Students with limited experience in screen print processes will be given an overview in those practices. May be repeated for up to 9 total credit hours.
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

ARTS 5433 (3) Alternative Printmaking 2
Continued research into developing a sharper critical response, both aesthetically and conceptually, to their own work, as well as the work of other artists. Various alternative printmaking methods will be introduced and each student is expected to explore and examine these processes through a body of work. Emphasis is put on the interrelationship of processes, materials and ideas/aesthetics.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4433
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

ARTS 5444 (6) Art and Rural Environments Field School
Puts students in touch with various rural landscapes in Colorado. Takes place off campus each summer during Maymester. Focuses on site-based approaches to art creation and is designed as an experiential course, meaning that students learn through the experience of place, and then by the process of making. After introductions to each site, students will be responsible for a site interpretation piece utilizing various mediums including photography, drawing, land art and collaboration.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4444
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sculpture

ARTS 5453 (3) Monotype 2
Continued research into developing techniques of using a varied grouping of matrices will be the focus of this class. Students will be expected to develop sharper critical responses both aesthetically and conceptually, to their own work, as well as the work of other artists.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4453
**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Printmaking

ARTS 5457 (3) Sound Art Seminar
Covers the history of sound art from Luigi Russolo and his noise machine during the Futurist Movement to today's experimental music/sound art contributions. Students will listen to sound art works by artists in all areas of sound art, as well as read about theoretical views on sound art.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4457
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

ARTS 5500 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities.
**Requisites:** Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
**Recommended:** Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
**Grading Basis:** Letter Grade

ARTS 5504 (3) Graduate Sculpture
Through readings, discussions, critiques, and one-on-one meetings, Graduate Sculpture will provide a forum for students to explore and develop their work and practice. Additionally, when possible, students will plan a research-based class field excursion in consultation with the faculty teaching the course.
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Sculpture

ARTS 5540 (3) Generative Art
Attends to the interdisciplinary pursuits of scientists, humanists and anyone interested in creating works of visual art according to step by step procedures as in musical compositions, mathematical formulae, linguistic rules, computer programs, etc. Includes collaborative and individual projects.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Additional Information:** Departmental Category: Integrated Arts

ARTS 5641 (3) String Instrument Building
As a prelude to sculptural art making processes, this course explores a variety of materials, methods and techniques and their application to the making of a musical string instrument, i.e. planning, designing, material selection and a wide variety of woodworking processes. We will also cover theoretical discussions into what is being made.
**Equivalent - Duplicate Degree Credit Not Granted:** ARTS 4641
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Sculpture

ARTS 5717 (1-3) Graduate Studio Critique
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics

ARTS 5857 (1-3) Graduate Independent Study
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Seminars/Special Topics
ARTS 5901 (1-3) Graduate Independent Study---Photography
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Photography

ARTS 5934 (3) Art, Design, and Engineering: Thinking and Making
Examines the aesthetics, design, and engineering of sculpture, installation, and public art. Through research presentations, readings, and field trips, students learn about the process of making art. In addition to classroom learning, students engage in internships with artists and art fabricators. Highlights national and international hybrid art, design, and engineering advanced degree programs and additional art-related internships and job opportunities. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ARTS 4934
Requisites: Restricted to Art History (AAAH) or Engineering and Applied Science (COEN) graduate students only.
Recommended: Prerequisite Prior courses or real-life experience in conceptualizing and creating objects, products, or art.
Grading Basis: Letter Grade

ARTS 6957 (1-6) Master of Fine Arts Creative Thesis
Additional Information: Departmental Category: Seminars/Special Topics

Art History - Master of Arts (MA)
The art history program at CU Boulder gives students an interdisciplinary foundation in the history of art to prepare them for careers as scholars, museum professionals and related creative professions in the history of art. Its main objective—through graduate seminars, teaching opportunities, museum internships and scholarly fieldwork—is to foster critical thinking about contemporary and historical forms of art as well as visual and material culture.

Students develop their specialized interests from a combination of individual mentoring and collaborative approaches to intellectual inquiry. The program offers a supportive environment committed to debate and experimentation applicable to a variety of career choices. Graduates typically regard their two years in the art history master’s program as a formative period of intellectual growth and professional experience.

Our diverse faculty offers a constantly changing curriculum of seminar topics geared to highlight current research, and a strong foundation in critical historiography and contemporary critical theory. Students in our interdisciplinary program also take advantage of exciting course offerings in cultural anthropology, classics, history, a wide range of literature programs, ethnic studies, gender and women’s studies, art practices, and new media.

Our intimate atmosphere offers exceptional opportunities to work with permanent faculty and distinguished art historians from other institutions through our Visiting Scholars program. This longstanding feature of our graduate curriculum brings four to six leading scholars to campus every year to present their current work in a graduate seminar, public lecture and informal events.

Areas of specialization include: African/Diasporic Visual Studies, medieval art, early modern art, Pre-Columbian art, Colonial Latin American art, Asian art, Native North American art, modern art and architecture, contemporary art and critical theory/museology. When available, ancient art may constitute an area.

For more information please see the department’s Art History area page and the MA Art History degree page (https://www.colorado.edu/artandarthistory/degrees/ma-art-history/).

Requirements
Required Courses and Credits
A minimum of 30 credits must be completed, of which 21 must be completed in residence on the Boulder campus. No more than 8 credits of independent study credit may be applied toward the MA degree. A limit of 9 credits of transfer credits may be applied toward the MA degree.

Electives
Students are required to take five 3-credit 5000 or 6000- level art history courses, for a total of 15 credit hours. Students may choose their five courses from four out of the following areas: Medieval Art; African/Diasporic Visual Studies; Early Modern/ Renaissance Art; Pre-Colombian/Colonial Latin American Art; Native North American Art; Asian Art; Modern Art and Architecture; Contemporary Art; Critical Theory/Museology. In consultation with your advisor and when available, Ancient Art may constitute an area.

At least one 3-credit, 3000-level or above course in a department outside the Department of Art and Art History that supplements the major or minor areas of specialization.

Additional courses to meet the 30-credit minimum. 3-5

Total Credit Hours 30

\(^1\) Must be taken during the first semester, and may be taken twice for up to 6 credits.

Foreign Language Proficiency
The candidate for the MA degree in art history is required to demonstrate an adequate reading knowledge of a foreign language relevant to the field of study during their first year of the program. The language requirement may be met by either having taken three consecutive foreign language classes at the undergraduate level (passing with a B or above), or by taking a language exam with a faculty member during the first year.

First-Year Review
During the last two weeks of April, students are evaluated during the first-year review. It focuses on a review of student coursework and performance, on selecting the major and minor areas of study in preparation for the comprehensive exam (see below) and on the selection of a thesis topic, if applicable.

Comprehensive Exam
This exam is given in October of the second year to measure the graduate student’s knowledge of art history at the MA level. It consists of essay questions pertinent to the student's major and minor areas of study. The comprehensive exam consists of two essays: a two-hour essay in the major area and a 90-minute essay in the minor area. Students must pass the comprehensive exam in order to be eligible to register for thesis credit hours.
Thesis Abstract ("Pre-Thesis Review")
By the end of the semester preceding the student's thesis semester, the student will prepare an abstract of approximately 1–2 typewritten pages, with attached bibliography, outlining the thesis topic and method of inquiry. The thesis abstract must be approved by the student's pre-thesis review committee in order for the student to register for thesis hours.

Thesis Defense
In consultation with the thesis advisor, the student will select a thesis committee that consists of not less than three members of the art history graduate faculty, including the thesis advisor. The student will then schedule the thesis defense and prepare all necessary paperwork. The thesis must be submitted to all members of the thesis committee at least one week before the thesis defense. Graduate School guidelines ("specifications") must be used to prepare the MA thesis. Upon successful defense, the thesis is submitted to the Graduate School in the electronic form specified by the Graduate School, in accordance with the Graduate School's deadlines. A hard copy of the signature page, complete with the thesis committee members' signatures, is submitted to, and remains in, the Graduate School.

Time Limit
It is expected that the MA program be completed within two years.

No more than 8 credits of independent study credit may be applied toward the MA degree. A limit of 9 credits of transfer credits may be applied toward the MA degree.

Learning Outcomes
The MA in art history is intended to give students a broad general knowledge of art history in a two-year program. Students who have achieved a distinguished record in this MA program should be well prepared for acceptance into a doctoral program in art history as well as other careers requiring an MA in art history or an equivalent degree.

Dual Degree
MA/MBA in Art History
To support the university's mission of advancing knowledge across disciplines, and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business and Department of Art and Art History endorse a dual degree program in which both a Master of Business Administration and a Master of Fine Arts (or Master of Arts in art history) is awarded to those students who satisfy the requirements outlined below. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially.

Students must apply to and meet the application requirements for each program separately. Admitted students spend their first year in one of the two programs, the second year in the other program and the third year is a combination of the two. MFA students are required to complete 43 credits of MBA coursework and 45 credits of AAH coursework. MA (art history) students are required to complete 43 credits of MBA coursework and 30 credits of art history coursework. Both degrees must be awarded simultaneously.

Note: Residents of Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program. For more information, visit the "Western Regional Graduate Program" section on the Office of the Registrar's Exceptions to One-Year Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

Art Practices - Master of Fine Arts (MFA)
The MFA in art practices is a rigorous program intended for artists committed to pursuing a professional life in the arts and prepares students for careers as practicing artists and arts professionals as well as teachers in colleges, universities and art schools. MFA students in the Department of Art and Art History are given private studio spaces and access to many of the department’s facilities in the Visual Arts Complex.
and are eligible for a variety of awards, assistantships and teaching opportunities.

During the two-and-a-half year program, students focus on one of several areas, including:

- ceramics
- IMAP (digital, integrated arts, photography, video)
- painting and drawing
- printmaking
- sculpture and post-studio practice
- film (in collaboration with the Department of Cinema Studies & Moving Image Arts (https://www.colorado.edu/cinemastudies/)).

For more information about the MFA program, visit the department's MFA in Art Practices (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/) webpage.

### Tracks

#### Sculpture and Post-Studio

Sculpture and Post Studio Practice (SPS) requires that MFA students enroll in ARTS 5504 Graduate Sculpture every semester that it is offered. Additionally, SPS strongly recommends that MFA students enroll in ARTS 5444 Art and Rural Environments Field School at least once during their time in the program.

#### Drawing and Painting

Drawing and Painting (D/P) requires that MFA students enroll in ARTS 5202 Graduate Painting every semester that it is offered; this includes any extra semesters a student remains in the program. All D/P area graduate students will be allowed to petition the area to stay one extra semester should they be interested in extending their time in the program.

### Requirements

#### Advising

Upon admission, students are assigned a tenured or tenure-track faculty member to serve as an academic advisor in the student’s home area.

#### Required Courses and Credits

A minimum of 54 credit hours (of which 36 credit hours must be taken in residence on the Boulder campus) of acceptable graduate work must be completed beyond the bachelor’s degree.

Procedures for transferring credit from other graduate programs are governed by the regulations of the Graduate School. Transfer credit, not to exceed 18 credit hours for studio arts or 9 credit hours for art history, must first be approved by the student’s academic advisor, associate chair and the Graduate School.

Students who wish to change their area of concentration after admission must petition the art practices curriculum committee.

#### Code | Title | Credit Hours
--- | --- | ---
**Required Courses**  
ARTS 5117 | Graduate Art Seminar (Should be taken in the first semester) | 3  
ARTS 5118 | Visiting Artist Program (should be taken in the second semester) | 3

ARTS 5176 | New Directions in Digital Art |  
ARTS 5246 | Graduate Beginning Video Production |  
**Electives** | | 21  
Studio and non-studio; up to 6 credit hours may be taken in an allied field, at the 3000 level and above |  
**Art History** | 3  
**Theory Requirement** | 3  
Additional course in Art History, Theory or Film | 3  
**Total Credit Hours** | | 54

### Degree Requirements

#### First-Semester and First-Year Reviews

In consultation with the advisor, the student will establish the membership of his or her committee, consisting of a minimum of three faculty members and one second-year graduate student, and schedule the first-semester review; its purpose is to give feedback to the student with regard to progress toward the degree. At the end of the first year, the committee is convened for a first year review; its purpose is to evaluate the student’s progress in the program and to determine if she or he will continue in the program.

#### Pre-Thesis Review

At the end of the semester preceding the graduating semester, the pre-thesis review takes place. Its purpose is for the graduate student to present the focus of his or her written thesis and exhibition, to review and evaluate the student’s progress in the program, and to determine if the student is ready to register for thesis hours.

#### Thesis/Exhibition/Defense

The MFA thesis defense must be conducted while the student’s work is on view during the MFA Exhibition. The MFA thesis must be submitted in its final draft form to all the thesis committee members two weeks prior to the scheduled thesis defense. After the defense, two copies of
the thesis, with the required signatures on the signature sheet, must be turned into the graduate program coordinator. One of these is cataloged in the Norlin Library, and a digital copy is submitted to CU Scholar, Norlin Library’s digital repository.

**Time Limit**

It is expected that the MFA program be completed within two-and-a-half years. Under certain circumstances and in consultation with the candidate’s primary area and advisor, a candidate may petition for an additional semester of study.

**Graduation**

Before registering for thesis hours, ARTS 6957, students must have a pre-thesis review with their faculty advisor and thesis committee. Art practices thesis work must take the form of original creative work of acceptable professional standards. The oral defense exam must be done in conjunction with the thesis exhibition, and the candidate must provide a critical written statement (creative thesis) concerning the work. The candidate’s written creative thesis becomes part of Norlin Library’s digital repository (https://scholar.colorado.edu/art_mfa/), and digital documentation of thesis work is housed within the department’s Visual Resources Center (https://www.colorado.edu/artandarthistory/vrc/) digital image collection.

For further information see MFA guidelines (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193) on the department’s website.

Learning Outcomes

• To encourage depth and refinement of students’ artistic practices.
• To expose students to varied modes of contemporary art practice and thinking through coursework and individual study.
• To prepare students for careers as practicing artists and arts professionals, as well as teachers in colleges, universities and art schools.

Dual Degree Program

MBA/MFA in Art Practices

To support the university’s mission of advancing knowledge across disciplines and in recognition that business education and training has relevance to many academic fields, the Leeds School of Business (http://leeds.colorado.edu/) and the Department of Art and Art History endorse a dual degree program in which both MBA and MFA degrees are awarded. This opportunity will appeal to students with career aspirations in gallery or museum management, or in starting entrepreneurial ventures combining their business and artistic talents. This three-year program offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequential.

Students must apply to and meet the application requirements for each program separately. Please see the MFA degree requirements page (https://www.colorado.edu/artandarthistory/degrees/mfa-art-practices/#mfa_degree_requirements-193) and MFA application page (https://www.colorado.edu/artandarthistory/apply/mfa-art-practices-application/) for more information on satisfying the MFA application and degree requirements. Admitted students spend their first year in one of the two programs, the second year in the other program, and the third year is a combination of the two. Both degrees must be awarded simultaneously. To learn more, visit the department’s MBA/MFA (https://www.colorado.edu/artandarthistory/apply/mamba-or-mfamba/) webpage.

Arts of the Americas - Doctor of Philosophy (PhD)

The PhD in Arts of the Americas emphasizes the cross-cultural circulation of visual culture in the Americas from ancient to contemporary times. Our program encourages students to think across subfields (e.g., Pre-Columbian Art, Colonial Latin American Art, Modern and Contemporary Latin American Art, Native North American Art, Modern and Contemporary American Art, etc.) and to situate American visual culture in the fluid circuits of cross-cultural exchange, as well as global intellectual and trade networks. This interdisciplinary approach brings art history into dialogue with anthropology, history, ethnic studies, women and gender studies, religious studies, and other disciplines in the humanities, social sciences and natural sciences. Our accelerated PhD program is ideal for students who already have an MA in art history or an equivalent degree, including professionals in the art field seeking an opportunity to advance in their career by earning a PhD.

CU Boulder is uniquely situated as a center for studies in the arts of the Americas due to resources on campus, as well as those in the Boulder–Denver region. On campus, the Center for Native American and Indigenous Studies (CNAIS), the Latin American Studies Center (LASC), and the Center of the American West provide resources, support and a network of scholars and students who are dedicated to interdisciplinary and cultural studies of the Americas. The CU Art Museum and CU Museum of Natural History have rich material resources of the highest caliber to support the new degree program. In addition, a number of academic units on CU Boulder’s campus currently provide relevant courses for students in our proposed PhD program, including anthropology, film studies, French and Italian, history, music, sociology, Spanish and Portuguese, ethnic studies, and the program in museum studies. Locally, the Denver Art Museum is a leading, internationally recognized research institution and a major resource for the study and exhibition of the arts of the Americas. Other important regional resources include the Clyfford Still Museum, the Denver Public Library, History Colorado, the Kirkland Museum and the Museo de las Americas.

Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above.

Furthermore, distribution requirements (of 12 credit hours) must be met during MA or PhD work as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARTH 6929</td>
<td>Seminar: Theories of Art History</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Course with significant pre-1900 content</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Two courses in student’s interdisciplinary field</td>
<td>6</td>
</tr>
</tbody>
</table>

The remaining 18 credit hours of coursework are elective graduate courses in AAH. Courses taken toward degree requirements may not be taken pass/fail. The department may require students with gaps in their academic preparation to take additional courses. Lastly, all students must complete 30 hours of dissertation credits.

Interdisciplinary Concentration

All PhD students will develop an interdisciplinary area of concentration, which will consist of at least 6 credits that provide a coherent complement to their primary field of study and which will be designed by students in close consultation with their advisors and approved by the director of graduate studies for art history. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, philosophy, comparative culture studies, gender studies, film studies, history, anthropology, geography, religious studies and environmental studies.

Foreign Language Requirement

In addition to demonstrating a high level of proficiency in their primary research area, students earning the PhD must demonstrate moderate proficiency in an additional foreign language by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

• Completing a fourth-semester (second-semester sophomore) college language course with a grade of B or better.
• Completing a proficiency exam administered at CU.
• Presenting other evidence of moderate proficiency to the director of graduate studies for art history.

Students should consult with the director of graduate studies for art history at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before the student can advance to candidacy.
**Graduate Program Guidelines**

**Qualifying Exam**
The qualifying exam equips students to demonstrate critical historiographical knowledge of major, minor and interdisciplinary fields, and to situate their research interests within these fields. Qualifying examinations should be taken no later than the first semester after the completion of all coursework requirements and any grades of Incomplete must be completed before scheduling the Qualifying Exam. One year before the qualifying exams are taken, the student meets with the major and minor advisors as well as the Director of Graduate Studies. With their guidance, the student will then form an Examination Committee, which will be composed of the major and minor advisors as well as an advisor from the student’s interdisciplinary field of concentration (usually a faculty member from another department at CU).

Reading lists: Students will compose reading lists for the major, minor and interdisciplinary fields to be reviewed and approved by each advisor. The reading lists should include the “staple” readings in each field, other important sources that navigate through the major issues in the field, as well as a body of scholarship that pertains to the student’s focus of study. Reading lists should include roughly 50 titles (books and articles) for the major field, 30 for the minor field, 30 for the interdisciplinary field and one paragraph (up to 300 words) providing a rationale for the selection of this content. The PhD Reading List and Prospectus Approval Form must be submitted to the Graduate Program Coordinator at least one month before the exam.

Prospectus: For the written portion of the exam, students will write a double-spaced, 20-25 page prospectus (not including the necessary notes, illustrations and bibliography) outlining the major themes and issues of the proposed dissertation. The Prospectus should consist of three parts: 1) the topic, argument, methodology and statement of scholarly contribution; 2) a description of method and of existing relevant scholarship; and 3) a brief chapter-by-chapter summary. The bibliography should contain full citations of all works referenced in the Prospectus and all of these titles should appear on one of the student’s Reading Lists.

Students must submit a final draft of their Prospectus to all committee members two weeks prior to the date of the Oral Exam.

Oral Exam: If the examination committee finds the reading lists and prospectus acceptable, then the student will proceed to take a one-hour oral examination with all of the examination committee members present. The oral exam will consist of a one-hour question-and-answer period on the student’s prospectus and reading lists, their knowledge of the major, minor and interdisciplinary fields, and their close-reading abilities. All committee members must be present in person or via teleconference for the oral exam. A positive vote from at least two of the committee members is required to pass.

At least two weeks before the date of the oral exam a Doctoral Examination Report Form must be submitted by the Graduate Program Coordinator to the Graduate School for approval. Please see the Graduate Program Coordinator for assistance with this process.

**Advancement to Candidacy**
Upon passing the oral exam and pending approval by the Graduate School, the student will advance to PhD Candidacy (D Status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful qualifying exam may be retaken only once and must be retaken within six months. “Retaken” means that the second exam covers the same material and includes the same committee members as the first.

Following the successful completion of the Qualifying Exam, a Candidacy Application for an Advanced Degree must be endorsed by the Director of Graduate Studies and sent to the Graduate School for approval. The Graduate Program Coordinator will submit this application to the Graduate School on the student’s behalf; please consult the Graduate Program Coordinator for more information.

**Forming a Dissertation Committee**
The dissertation, which should be a work of viable scholarship, typically takes the form of a monograph. The dissertation is written in close consultation with the Dissertation Committee and Director of Graduate Studies.

The Dissertation Committee consists of five members: at least two Art History faculty members as well as a faculty member from another department of the student’s choice. This committee is often but not always drawn from members of the student’s Comprehensive Examination Committee. The dissertation should be between 250 and 350 pages long, the length of a scholarly monograph.

**Grant Opportunities**
The student is encouraged to apply for grants as soon as s/he advances to candidacy. General fellowship information is available on the Graduate School (https://www.colorado.edu/graduateschool/funding/) website. The Latin American Studies Center (https://www.colorado.edu/lasc/funding/) also provides a small amount of grants for graduate students.

Grants vary in the documents that they require. These may include transcripts, curricula vitae, proposals, budgets, itineraries, autobiographies, statements of progress and letters of reference. No application will ask for all of these, but the list is a fair representation of what the student may be called upon to provide.

The following list identifies grants and fellowships relevant to art history. This will be extremely helpful, but student should not expect it to include every grant for which they should consider applying. Additional resources are available on the websites of other departments and centers, the College Art Association (http://www.collegeart.org/) and more.

**Fellowships & funding for art history graduate students**

**Internal Funding**
- Graduate School Student Travel Grant
- Graduate School Dissertation Completion Fellowship
- Arts and Humanities Dissertation Fellowship
- Latin American Studies Center: small grants for graduate students

**External Funding: Fall 1**
- American Association of University Women Dissertation Fellowship (ABD, DW)
- American Association of University Women International Fellowship (INTL, MULTI)
- Smithsonian Institution Fellowship (ABD, INTL)
- CASVA Predoctoral Fellowship (ABD, INTL, ABROAD, SOME MULTI)
- CLIR/Mellon Fellowship for Dissertation Research in Original Sources (ABD, ABROAD, INTL)
- DADD Year-Long Research Grants in Germany (ABROAD, INTL)
- Dedalus Foundation Dissertation Fellowship (ABD, INTL, N)
- Dolores Zohrab Liebmann Fellowship (MULTI, N)
- Ford Foundation Predoctoral Fellowship (MULTI)
• Ford Foundation Dissertation Fellowship (ABD, DW)
• Fulbright US student Fellowship (ABROAD)
• Getty Foundation Predoctoral Fellowship (DW, ABD, INTL)
• Graham Foundation Carter Manny Award (ABD, ABROAD, INTL, N)
• Kress History of Art Institutional Fellowships (ABD, ABROAD, INTL, N)
• Mellon/ACLS Dissertation Completion Fellowship (ABD, DW, INTL)
• Metropolitan Museum of Art Junior Fellowships (ABD, INTL)
• Smithsonian Fellowship at the Archives of American Art (ABD, INTL)
• SSRC International Dissertation Research Fellowship (ABD, ABROAD, INTL)

External Funding: Spring
• Joan and Stanford Alexander Award (ABD, INTL)
• Mellon-CES Dissertation Completion Fellowships in European Studies (ABD, INTL)
• Fulbright-Hays Doctoral Dissertation Research Abroad (ABD, ABROAD)
• Kress Fellowship for Language Study in European Art History (INTL, LANG)
• Schiff Foundation Fellowship (INTL, N)

Other Resources
• CU Boulder Graduate Student Funding (https://www.colorado.edu/graduateschool/funding/) webpage

1 Please note the following:
• ABD: required by start of grant
• DW: dissertation write-up
• INTL: open to international students
• LANG: language training
• MULTI: multi-year or renewable
• N: must be nominated to apply
• ABROAD: international research

Dissertation Defense
The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule the dissertation defense (an oral examination and discussion lasting about 90 minutes). The student should deliver copies of the dissertation to their committee members at least one month prior to their defense date. The student must also file a Doctoral Examination Report and a Doctoral Defense Leaflet with the Graduate School at least two weeks prior to their defense. Consult the Graduate Program Coordinator for assistance with this process.

All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School’s Graduation Requirements (https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/) webpage. A satisfactory vote from at least three committee members is required to pass the defense. If unsuccessful, the defense may be retaken only once after completion of changes or additions determined by the committee and must be retaken within six months. “Retaken” means that the second exam covers the same material and includes the same committee members as the first.

Doctoral Checklist for Graduation
The Doctoral Checklist for Graduation includes the Graduate School’s requirements for the doctoral degree. The major department should be consulted about specific additional requirements.

Asian Languages and Civilizations

The Department of Asian Languages and Civilizations offers the Bachelor's-Accelerated Master's (BAM), MA, Dual MA and PhD graduate degrees with specializations in Chinese or Japanese. Celebrating a history of over 30 years, the department offers small class sizes that allow ALC graduate students the opportunity to work closely with faculty who are noted scholars in their fields.

For more information about the Department of Asian Languages and Civilizations, please visit the department website (https://www.colorado.edu/alc/graduate/admissions/).

Course codes for these programs are CHIN and JPNS.

Master's Degree

- Asian Languages and Civilizations - Master of Arts (MA) (p. 1107)

Doctoral Degree

- Asian Languages and Civilizations - Doctor of Philosophy (PhD) (p. 1109)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; PhD, University of California, Berkeley

Courses

CHIN 5010 (3) Sinological Methods
Provides training in research methods for graduate work in Sinology. Regular exercises require students to use standard bibliographic sources and tools, such as leishu, congshu, specialized dictionaries, dynastic histories, geographical treatises, gazetteers, and private historiography. Knowledge of Classical Chinese at the level of CHIN 4220 is required.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chinese

Departmental Category: Asia Content
CHIN 5030 (3) Readings in Pre-Modern Chinese Literary Theory
Introduces the field of pre-modern Chinese literary theory and its relevance in Chinese intellectual history. Based on the close reading of primary sources, i.e. typically on selected core texts of Chinese literary thought, as well as on the reading of secondary literature. Texts and topics vary from year to year.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5070 (1) Graduate Academic Writing
Considers the act of academic writing both in terms of mechanics and in terms of habits of effective writers themselves, so that students, building upon a base knowledge of the expectations of the academy, develop approaches to help themselves gain the confidence to excel at the writing required of them in graduate school and beyond.
Requisites: Restricted to graduate students only.

CHIN 5120 (3) History of Literature through the Ninth Century
Surveys, with readings in primary and secondary sources, major landmarks in various areas of ancient and medieval literature. Focuses on the classic and most influential works of the Zhou through Tang dynasties. Gives attention to matters of historical fact and actuality as well as to textual and interpretive history.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5130 (3) History of Chinese Literature from the Tenth to the Nineteenth Century
Survey of Chinese literature from the tenth to the nineteenth century, with readings in primary and secondary sources. Focuses on the major literary works, genres, figures, and movements of the Song through the Qing dynasties.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5140 (3) History of Chinese Thought
Introduces early Chinese philosophy, mostly “Masters’ Literature” of the 5th–1st c. BCE, which is foundational for all later Chinese philosophy and political thought. Close reading of primary sources will be combined with an introduction to secondary scholarship in English and modern Chinese, both articles on individual texts/philosophers and comprehensive histories of early Chinese philosophy.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5210 (3) Ancient Prose
Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900 AD) prose that played an important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5220 (3) Ancient Poetry
Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5230 (3) Medieval Thought and Religion
Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5240 (3) Medieval Poetry
Studies works of early medieval (ca. 200-600 AD) poetry. Writers and topics vary ranging from surveys of specific genre, shi or fu, or shared subject such as religious or commemorative verse, or specific periods, to focused studies of particular major figures Cao Zhi, Tao Qian, Li Bo, or Du Fu. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5280 (3) Topics in Ancient Literature
Examines a specific problem or issue in ancient Chinese literature, e.g., early views of language’s relationship to reality, or the commentary tradition and the emergence of allegorical and metaphysical approaches to interpreting texts. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5410 (3) Medieval Prose
Studies works of early medieval (ca. 200-600 AD) and/or late medieval (600-900 AD) prose that played an important role in development of Chinese literature. Writers and topics vary, ranging from surveys of specific genre, literary essays, proto-fiction, or historical writings, to focused studies of major figures Liu Zhiji, Han Yu, or Liu Zongyuan. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5430 (3) Medieval Thought and Religion
Studies selected works of early medieval (ca. 200-600 AD) and/or late medieval (600-900) religious importance. Selections vary from fundamental texts of both literary and religious value, Daoist and Buddhist canons, the Huangting jing, Zhen gao, Miaofa lianhua jing, and Tan jing, particular topics of social or cultural importance, character assessment, arcane learning, or methods of commentary. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content
CHIN 5480 (3) Topics in Medieval Literature
Examines a specific problem or issue in medieval literature, e.g., the role of encyclopedias and anthologies in literary training, or the place and forms of literary composition at the imperial court. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5610 (3) Early Modern Poetry
Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5620 (3) Early Modern Prose
Studies Song, Ming, and Qing prose texts selected for their inherent literary merit and for their significance in the Chinese literary tradition. Typically focuses on works by major authors such as Ouyang Xiu, Su Shi, and Yuan Hongdao. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5630 (3) Early Modern Fiction
Explores selected vernacular and classical fiction of the Ming and Qing periods. Normally focuses on long novels such as Xiyou ji, Sanguo yanyi, Shuihu zhuan, Jin Ping Mei, as well as short stories by Feng Menglong and Ling Mengchu. Texts and selections vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5680 (3) Topics in Early Modern Literature
Examines a specific problem or issue in early modern literature (e.g., the relationships among religion, folklore, and early fiction; the issue of genre and traditional fiction); the role of elite versus popular cultures in the composition of fiction; or the relationship of the state and censorship and the southern philosophical schools to the publication of fiction. Topics vary from year to year. Knowledge of Classical Chinese at the level of CHIN 4220 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5750 (3) Daoism
Detailed examination of scriptures, liturgies, precept codes and hagiographies of Daoism, China's indigenous organized religion. Focusing on origins and development, ethical teachings, ritual activities and world view. Topics include the relationship of Daoism to popular religion, practice of alchemy and self-cultivation, beliefs concerning death and afterlife and structure of the Daoist pantheon.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4750 and RLST 4750 and RLST 5750
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5810 (3) Modern Literature
Examines selected texts in various genres of Chinese literature from the May Fourth period (beginning 1917) to the establishment of the People's Republic of China (1949). Focuses on major and influential works produced in this fertile period of experimentation with Western, modernist types of literature. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5820 (3) Contemporary Literature
Examines selected texts in various genres of Chinese literature from 1949 (the establishment of the People's Republic of China) to the present. Focuses on major works from the very different literary worlds of Taiwan and mainland China. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5830 (3) History of Chinese Film
Examines the development of narrative film in China from the early twentieth century to today, covering the major periods, styles, and themes developed in Chinese cinema. Texts and selections vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content

CHIN 5880 (3) Topics in 20th Century Literature
Examines a specific problem or issue in 20th century literature, e.g., feminist fiction in China, modernism in fiction and poetry, or the role of literary criticism in modern literature. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese
Departmental Category: Asia Content
CHIN 5890 (3) Topics in Chinese Film
Examines a specific problem or issue in Chinese film, e.g. 5th generation filmmakers, early film, genre (martial arts, melodrama, Hong Kong action, etc.), Taiwan New Cinema, Hollywood crossover. Topics vary from year to year. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5900 (1-3) Independent Study
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 5980 (1) Practical Issues in Chinese Language Pedagogy
Focuses on practical issues in Chinese language pedagogy for students who will serve as teaching assistants in Chinese language courses. Examines the connection between theory and practice as well as practical methods for teaching Chinese. Equips students with basic Chinese linguistic knowledge. Discusses the use of Communicative Approach in teaching Chinese as a second language. Knowledge of Modern Chinese at the level of CHIN 4120 is required.
Equivalent - Duplicate Degree Credit Not Granted: CHIN 4980
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 6900 (1-6) Independent Study
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 6950 (1-6) Master's Thesis
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 6990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

CHIN 8990 (1-3) Independent Study
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chinese Departmental Category: Asia Content

JPNS 5020 (3) Methods of Teaching Japanese
Surveys pedagogical theory and methods for the teaching of Japanese as a second language, including issues of presentation, interaction, and evaluation.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5050 (3) Japanese Sociolinguistics: Japanese Language and Society
Issues of Japanese sociolinguistics in areas such as speech varieties, language behaviors and attitudes, linguistic contact and change and language policy. Incorporating critical perspectives of sociolinguistics into analyses of Japanese literature and Japanese language education.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5070 (3) Second Language Acquisition of Japanese
Studies language acquisition theories and research on Japanese as a second language (JSL). Covers the issues in JSL from linguistic, cognitive and sociolinguistic perspectives: orthography, grammar, phonology and vocabulary in the contexts of teaching and learning JSL.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 4070
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5080 (3) Kanji in Japanese Orthography
Covers the issues in kanji research from historical, sociolinguistic, linguistic, cognitive perspective and vocabulary acquisition theories in the context of teaching and learning the Japanese language.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 4080
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5150 (3) Japanese Literary Translation
Explores theories and practice of translation of literary texts as applied to Japanese-English translation; strategies for handling a variety of texts; and professional standards and ethics.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese Departmental Category: Asia Content

JPNS 5170 (3) Japanese for Sinologists
An accelerated course in modern scholarly Japanese for students with a basic foundation in Japanese and an advanced knowledge of Chinese. Focus is on materials in Japanese that relate to Chinese civilization and includes an introduction to kanbun.
Requisites: Restricted to graduate students only.
Recommended: one year of modern Japanese (minimum grade C), graduate-level command of Chinese, or instructor consent.
Additional Information: Departmental Category: Japanese
**JPNS 5210 (3) Classical Prose Literature**
Examines selected prose works and authors from the Classical, or Heian, period (784-1185). Texts may include selections from diaries, tale literature, and zuihitsu such as Izumi Shikibu Nikki, Genji Monogatari, and Makura no Soshi. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatale for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5220 (3) Waka, Renga, and Haiku**
Studies the three most important poetic forms in Japanese literary history. Emphasizes the reading and analysis of selected texts and authors that best represent these genres. Readings include selections from the first eight imperial poetry anthologies (hachidaishu), famous renga sequences (Minase Sangin Hyakuin, for example), and the haiiku of Basho. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatale for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5280 (3) Topics in Classical Japanese Literature**
Studies a specific problem or issue in classical (eighth through twelfth century) Japanese literature, e.g., the development of specifically Japanese theories of literature or the concept of genre in the Japanese tradition. Topics vary from year to year.

**Repeatable:** Repeatale for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5310 (3) Advanced Classical Japanese 1**
Focuses on stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras. Knowledge of Classical Japanese at the level of JPNS 4310 is required.

**Repeatable:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5320 (3) Advanced Classical Japanese 2**
Advanced analysis of stylistic, grammatical, and orthographic variations in texts of the classical, medieval, and early modern eras, including kanbun and hentaigana; translation and explication of texts.

**Repeatable:** Requires prerequisite course of JPNS 5310 (minimum grade C). Restricted to graduate students only.

**Additional Information:**

**JPNS 5410 (3) Medieval Prose Literature**
Focuses on selected prose works and authors from the medieval, or Kamakura and Muromachi periods (1185-1600). Texts may include selections from a variety of war tales, histories, courtly fiction, diaries, memoirs, short prose narratives (otogi-zoshi), Noh plays, and Buddhist literature such as Heike Monogatari, Towazugatari, Izayoi Nikki, Tsurezuregusa, and Shaseikishu. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatale for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5420 (3) Japanese Buddhism and Literature**
Studies selected works from the Japanese literary tradition in which Buddhism plays a significant thematic role. Focuses on texts such as the Nihon Ryoki, Buddhist poetry (Shakkyo-Ka) from the imperial poetry anthologies, Heike Monogatari, Hojoki, the poetry of Saigyo and Basho, and selected Noh plays. Texts and selections vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatale for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5480 (3) Topics in Medieval Literature**
Focuses on a specific problem or issue in medieval literature, e.g., the spread of literary composition beyond the court. Topics vary from year to year.

**Repeatable:** Repeatale for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5610 (3) Japanese Dramatic Literature**
Examines major writers and texts of the no, kyogen, kabuki, and bunraku theaters, including the plays and critical writings of such authors as Kannami Kiyotsugu, Zeami Motokiyo, Konparu Zenchiku, and Chikamatsu Monzaemon. Texts and secondary readings vary from year to year. Knowledge of Classical Japanese at the level of JPNS 4320 is required.

**Repeatable:** Repeatale for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5620 (3) Early Modern Japanese Literature and Culture**
Examines the literature, arts, drama and culture of Japan's early modern period in the original language, as well as secondary scholarship and methodologies for pursuing work on early modern materials. Genres covered include kana-zoshi, ukuyo-zoshi, dangibon, yomihon, sharebon, kibyoshi, ninjobon, kokkelbon, gokan, halkai, senryo, kyoka, joruri, kabuki, and literary thought.

**Repeatable:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5810 (3) Modern Japanese Literature and Culture**
Studies selected texts in Japanese literature from the Meiji Restoration (1868) to the end of the Pacific War. Surveys various literary genres, emphasizing the development of the modern novel as an aspect of Japan's response to Western cultural forms. The unique cultural politics of each of the periods (Meiji, Taisho, and Showa) are illuminated through the filter of both canonical and more marginalized texts. Specific selections vary from year to year.

**Repeatable:** Repeatale for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**

**JPNS 5820 (3) Contemporary Japanese Literature**
Covers developments in Japanese prose fiction and/or other literary genres from the end of the Pacific War in 1945 to the present.

**Repeatable:** Repeatale for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**
JPNS 5830 (3) Readings in Modern and Contemporary Japanese Thought and Culture
Examines central issues in Japanese culture and society since the Meiji Restoration (1868) through selected readings of the works of major writers in the fields of literature, anthropology, feminism, political science, and religion, among others. Provides a broad context for cultural studies in modern and contemporary Japan by positioning the most important commentators within their historical and social situations.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5900 (1-6) Independent Study
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5920 (3) Topics in Modern Literature and Culture
Close study of a specific problem or issue in modern or contemporary literature or culture: e.g., transwar literary nationalism.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 5980 (1) Practical Issues in Japanese Language Pedagogy
Focuses on practical issues in Japanese language pedagogy for students who will serve as teaching assistants in Japanese language class. Examines the connection between theory and practice as well as practical methods for teaching Japanese. Discusses how to teach Japanese as a second language in a communicative approach and how to assess student language learning. Knowledge of Modern Japanese at the level of JPNS 4120 is required.
Equivalent - Duplicate Degree Credit Not Granted: JPNS 4980
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6900 (1-6) Japanese Independent Study
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6940 (1) Master’s Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 6950 (1-6) Master’s Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

JPNS 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatability: Repeatable for up to 30.00 total credit hours.
Additional Information: Departmental Category: Japanese
Departmental Category: Asia Content

Asian Languages and Civilizations - Master of Arts (MA)
The MA program specialization in Chinese is designed to offer students maximum general exposure to the long sweep of Chinese literary and cultural history, as well as the opportunity to delve into the study of a particular period, field, topic or genre. With six professors covering literature and culture from early China through the medieval era to the early modern period and contemporary China, the program is truly comprehensive in scope. The program focuses especially on preparing students for PhD study and careers in sinology. Since 1991, more than seventy graduates of the Chinese MA program have gone on to doctoral study here or at other first-rank institutions in the U.S.

The MA program specialization in Japanese offers students the opportunity to engage in advanced-level study of Japanese literature and culture, with the aim of preparing students for doctoral study in Japanese literature as well as providing firm foundational knowledge for those seeking Japan-related professional careers. The program is composed of four professors with specializations in the literatures of classical, medieval, early modern, and modern Japan. In recent years graduates of the Japanese MA program have gone on to PhD programs in Japanese literature and Japanese studies at this and numerous other first-rank institutions in the U.S.

For more information, please visit the department website (https://www.colorado.edu/alc/graduate/admissions/).

Bachelor’s–Accelerated Master’s Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s):
- Chinese - Bachelor of Arts (BA) (p. 147)
- Japanese - Bachelor of Arts (BA) (p. 150)

Requirements
The MA in Asian Languages and Civilizations offers specializations in Chinese or Japanese.

All entering students in the Chinese program must take CHIN 5010 at the earliest opportunity. Students employed as teaching assistants also must take CHIN 5980 or JPNS 5980. Selection of courses beyond these is made in consultation with the director of graduate studies in Chinese or Japanese.
Prospective graduates will be required to present at least 30 hours of approved coursework or, in exceptional cases, 24 hours of coursework plus a thesis. The 24 hours must be completed at the 5000-level or above. Up to six credits from other departments may be completed at the 3000- or 4000-level at the discretion of the department.

Specific requirements for the MA specializations in Chinese and in Japanese, as well as a full list and description of graduate courses (https://www.colorado.edu/alc/courses/) offered, are available on the department website.

### Specialization in Chinese

Typical course sequence for this specialization consists of CHIN 5010, CHIN 5980 and one seminar in the first semester, followed by two seminars each over five subsequent semesters.

### Dual Degree Programs

#### Dual MA in Asian Languages and Civilizations and History or Religious Studies

The Department of Asian Languages and Civilizations participates in a dual master’s program with the Departments of History (http://www.colorado.edu/history/graduate-students/ma-programs/dual-ma-programs/) and Religious Studies (http://www.colorado.edu/rlst/graduate/dual-ma/). Students admitted to the MA programs in these departments may apply to complete a second MA in one of the other programs. Such degrees serve the needs of students who seek a truly interdisciplinary experience among intellectually affiliated
departments. Students interested in exploring this option should contact the director of graduate studies in Chinese or Japanese for specific requirements.

**Asian Languages and Civilizations - Doctor of Philosophy (PhD)**

The PhD in Asian Languages and Civilizations offers extensive training in the modern and premodern literatures of China and Japan for students seeking to pursue research and teaching careers at the collegiate level.

For more information, please visit the department website (https://www.colorado.edu/alc/graduate/admissions/).

**Requirements**

The PhD in Asian Languages and Civilizations offers specializations in Chinese or Japanese with concentrations in literary and/or cultural studies of either the premodern or modern periods.

The PhD requires a minimum of 45 credits in graduate courses numbered 5000 or above in Chinese or Japanese, and 30 credits of dissertation work beyond the required coursework. Selection of courses should be made in consultation with the Director of Graduate Studies in Chinese or Japanese (see the department’s Graduate Advising webpage). Academic preparation is expected in both classical and modern language.

Some graduate or advanced undergraduate coursework from related fields may also be included, in accordance with Graduate School rules. Additionally, some coursework completed for the MA degree at CU or other similarly rigorous institutions may count toward the 45 credits required. PhD students may transfer to the department up to 21 hours of acceptable graduate-level credit.

Visit the department’s PhD specialization in Chinese and PhD specialization in Japanese webpages for specific requirements, as well as a full list and description of graduate courses (https://www.colorado.edu/alc/courses/) offered.

**Asian Studies**

The Center for Asian Studies was established in 1999 to advance knowledge of Asia through undergraduate and graduate education, faculty research and outreach programs for the broader community. The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies. In addition, a number of departments and schools provide graduate coursework in Asia-related topics.
The Center is committed to managing and expanding study of Asia by providing graduate student fellowships, scholarships and study opportunities such as the Edward G. Seidensticker Japan Summer Research Grant and the Japanese Studies Scholarship Fund; investing in faculty research and professional development; providing support for building Asia-related resources on the CU Boulder campus; developing academic exchanges with Asia-based colleagues and students; and engaging the local community with Asia-related programs and events.

Finally, the center serves as a link and community-building resource for faculty and students across the university.

Course code for this program is ASIA.

Certificate

• Asian Studies - Graduate Certificate (p. 1110)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Collins, Lauren (https://experts.colorado.edu/display/fisid_147078/) Instructor, Program Director; PhD, University of Denver

Rinaldo, Rachel Ann (https://experts.colorado.edu/display/fisid_156309/) Faculty Director; PhD, University of Chicago

Asian Studies - Graduate Certificate

The Center for Asian Studies is pleased to offer the graduate certificate in Asian studies. It enables students with intellectual or professional interest in Asia who are not focused primarily on Asia within their own degree program to acquire an official credential indicating that they have expertise in some aspect of Asian knowledge or practice.

For more information, visit the Center for Asian Studies’ Asian Studies Graduate Certificate (http://www.colorado.edu/cas/academics/asian-studies-graduate-certificate/) webpage.

Requirements

Admission Requirements

The certificate is available to all graduate students and post-BA students in the professional schools currently enrolled at CU Boulder, and to non-degree-seeking ACCESS students with a bachelor’s degree.

How to Apply

• Write to the Certificate Director (lauren.collins@colorado.edu)

• Upon acceptance, meet with the Certificate Director to approve a plan for coursework and meeting the language requirement

• Upon completion, submit transcript to the Center for Asian Studies for review by the Certificate Director

Course Requirements

Students must complete 12 credit hours of approved graduate courses with a grade of B or higher, 3 credits of which may be in an approved undergraduate course, and 9 credits of which must be at or above the 5000 level.

• Specialization allowed in East Asia, South Asia, Central Asia, Southeast Asia or West Asia/Middle East.

• 2 courses in a single discipline or department.

• 2 courses from outside of that discipline or department.

• Thematic courses that have at least 50% Asia content may also be counted, dependent on approval by the Certificate Director.

• Up to 3 credits may be taken as independent study on an Asia-related topic at the 5000 level or higher with approval from the Certificate Director.

• 9 credits must be at or above the 5000 level.

• Two years’ college-level proficiency in an Asian language relevant to specialization (does not count toward the certificate credit hours).

Note: Students may take 3 credits of independent study on an Asia-related topic at the 5000 level or higher with a CAS Faculty Affiliate from outside of their home department; students may not take both a theory class and an independent study for the certificate.

Approved Undergraduate Courses

These courses must be outside the student’s home department and can be chosen from the upper-division courses (at 3000 or 4000 level) listed as requirements on the Asian Studies - Bachelor of Arts (BA) (https://catalog.colorado.edu/undergraduate/colleges-schools/arts-sciences/programs-study/asian-studies/asian-studies-bachelor-arts-ba/#requirements) page under Modern Asian Civilizations and Electives.

Graduate Courses with a Theory Focus

If a student takes one of these courses, they may not also take an Independent Study course for the certificate; the course must be taught by a CAS Faculty Affiliate and the student must complete written assignments/projects on an Asia-related topic.

Astrophysical and Planetary Sciences

The curriculum and research in the department emphasizes three major areas: astrophysics, planetary sciences, and solar and space physics.

Those wishing to pursue graduate work in APS leading to candidacy for an advanced degree should carefully read the Master's Degree Requirements (p. 1043) and the Doctoral Degree Requirements (p. 1045).

Course code for this program is ASTR.

**Doctoral Degree**

- Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD) (p. 1116)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ASTR 5110 (3) Atomic and Molecular Processes
Explores the application of quantum physics and statistical mechanics to problems in astrophysics, space physics and planetary science, with an emphasis on radiative processes and spectroscopy of atoms and molecules.
Requisites: Restricted to graduate students only.

ASTR 5120 (3) Radiative and Dynamical Processes
An introduction to radiative and dynamical processes aimed at graduate students in astrophysics, space physics and planetary science. Covers transport phenomena, the macroscopic treatment of radiation fields, magnetohydrodynamics and dynamical processes associated with planetary orbits and N-body systems.
Requisites: Restricted to graduate students only.

ASTR 5140 (3) Astrophysical and Space Plasmas
Teaches magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5141
Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

ASTR 5150 (3) Introductory Plasma Physics
Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzmann equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory).
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5150
Requisites: Restricted to graduate students only.

ASTR 5141 (3) Astrophysical and Space Plasmas

ASTR 5150 (3) Introductory Plasma Physics

Requisites:

ASTR 5300 (3) Introduction to Magnetospheres
Introduces solar and stellar winds, and planetary and stellar magnetospheres. Acquaints students with the guiding center theory for particle motion, magnetospheric topology, convection, radiation belts, magnetic storms and substorms, and auroras.
Requisites: Restricted to graduate students only.

ASTR 5330 (3) Cosmochemistry
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 4330 and GEOL 4330 and GEOL 5330
Requisites: Restricted to graduate students only.
ASTR 5400 (3) Introduction to Fluid Dynamics
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400 and PHYS 5400
Requisites: Restricted to graduate students only.

ASTR 5410 (3) Fluid Instabilities, Waves, and Turbulence
Involves linear and nonlinear analyses of small-scale waves and instabilities in stratified fluids, with effects of rotation. Studies internal gravity and acoustic waves with terrestrial, planetary and astrophysical applications. Studies thermal and double-diffusive convection, homogeneous and stratified shear flow instabilities. Examines these topics from the onset of small amplitude disturbances to their nonlinear development and equilibration. Department enforced prerequisite: ASTR 5400 or ATOC 5060.
Requisites: Restricted to graduate students only.

ASTR 5540 (3) Mathematical Methods
Presents an applied mathematics course designed to provide the necessary analytical and numerical background for courses in astrophysics, plasma physics, fluid dynamics, electromagnetism, and radiation transfer. Topics include integration techniques, linear and nonlinear differential equations, WKBJ and Fourier transform methods, adiabatic invariants, partial differential equations, integral equations, and integrodifferential equations. Draws illustrative examples from the areas of physics listed above.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5540
Requisites: Restricted to graduate students only.

ASTR 5550 (3) Observations, Data Analysis and Statistics
Introduces multi-wavelength observational techniques, their limitations and effects of various noise sources. Describes basic data handling, error analysis, and statistical tests relevant to modeling. Topics include probability distributions, model-fitting algorithms, confidence intervals, correlations, sampling and convolution. Students derive physical measurements and uncertainties with hands-on analysis of real datasets. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
Requisites: Restricted to graduate students only.

ASTR 5560 (3) Radiative Processes in Planetary Atmospheres
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth’s atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite or corequisite: ASTR 5110.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5560
Requisites: Restricted to graduate students only.

ASTR 5700 (3) Stellar Astrophysics
Explores stellar interiors, evolution and atmospheres, with the Sun and its heliosphere being used as the closest and best-studied example of a star. Covers energy generation, transport, principles of stellar structure, stellar rotation, pulsation and evolution to supernova and compact object stages. Includes radiation transport in stellar photospheres, chromospheres, coronas, winds. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ASTR 5120.

ASTR 5710 (3) High-Energy Astrophysics
Studies astrophysics of UV, x-ray, gamma-ray and cosmic-ray sources, including fundamentals of radiative and particle processes, neutron stars, black holes, pulsars, quasars, supernovas and their remnants; stellar flares; accretion disks; binary x-ray sources; and other cosmic x-ray sources. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5720 (3) Galaxies
Highlights the classification, structure, content, dynamics, and other observational properties of galaxies, active galaxies, and clusters of galaxies. Discusses Hubble’s Law, the cosmic distance scale, and the intergalactic medium. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5730 (3) Stellar Atmospheres and Radiative Transfer
Explores stellar atmospheres: basic stellar atmospheres, spectral line formation, interpretation of stellar spectra and model atmospheres. Examines solar physics: the Sun as a star, solar cycle, chromospheric and coronal structure, energy balance, magnetic field and solar wind. Department enforced prerequisites: ASTR 5110 and undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5740 (3) Interstellar Astrophysics
Highlights structure, dynamics and ecology of the interstellar medium, stressing the physical mechanisms that govern the thermal, ionization and dynamic state of the gas and dust; observations at all wavelengths; star formation; relation to external galaxies. Department enforced prerequisite: ASTR 5110.
Requisites: Restricted to graduate students only.

ASTR 5760 (3) Astrophysical Instrumentation
Covers the fundamentals underlying the design, construction and use of instrumentation used for astrophysical research ranging from radio-wavelengths to gamma rays. Topics include Fourier transforms and their applications, optical design concepts, incoherent and coherent signal detection, electronics and applications, and signal acquisition and processing. Department enforced prerequisite: senior level undergraduate physics.
Requisites: Restricted to graduate students only.

ASTR 5770 (3) Cosmology
Studies the smooth universe, including Friedmann-Robertson-Walker metric, Friedmann equations, cosmological parameters, inflation, primordial nucleosynthesis, recombination, and cosmic microwave background. Also studies the lumpy universe, including linear growth of fluctuations, power spectra of CMB and galaxies, dark matter, and large scale flows. Covers galaxy formation and intergalactic medium. Department enforced prerequisite: senior level undergraduate physics or instructor consent will be required.
Requisites: Restricted to graduate students only.
ASTR 5780 (3) Mission Design and Development for Space Sciences
Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5440
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5800 (3) Planetary Surfaces and Interniors
Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5800
Requisites: Restricted to graduate students only.
Repeatable: Repeatable for up to 4.00 total credit hours.

ASTR 5830 (3) Topics in Planetary Science
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and GEOL 5830
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5835 (1) Seminar in Planetary Science
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and GEOL 5835
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 5920 (1-6) Reading and Research in Astrophysical and Planetary Sciences
Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 6000 (1) Seminar in Astrophysics
Studies current research and research literature on an astrophysical topic. Students and faculty give presentations. Subjects vary each semester. May be repeated for a total of 4 credit hours to meet candidacy requirements.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

ASTR 6050 (3) Space Instrumentation
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 6050 and GEOL 6050

ASTR 6610 (3) Earth and Planetary Physics 1
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and PHYS 6610
Requisites: Restricted to graduate students only.

ASTR 6620 (3) Earth and Planetary Physics 2
Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6620 and PHYS 6620
Requisites: Restricted to graduate students only.

ASTR 6630 (3) Earth and Planetary Physics 3
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and PHYS 6630
Requisites: Restricted to graduate students only.

ASTR 6650 (1-3) Seminar in Geophysics
Advanced seminar studies in geophysical subjects for graduate students.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and PHYS 6650
Requisites: Restricted to graduate students only.

ASTR 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

ASTR 6950 (1-6) Master's Thesis
Recommended: Prerequisite PHYS 5150.

ASTR 7160 (3) Intermediate Plasma Physics
Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 7160

ASTR 7500 (1-3) Special Topics in Astrophysical and Planetary Sciences
Acquaints students with current research in astrophysical and planetary sciences. Topics vary each semester.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ASTR 7920 (1-6) Reading and Research in Astrophysical and Planetary Sciences
Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
**ASTR 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

---

**Astrophysical and Planetary Sciences - Doctor of Philosophy (PhD)**

Students pursuing a PhD from the Department of Astrophysical and Planetary Sciences generally specialize in the areas of astrophysics or planetary science.

The department does not offer a terminal, stand-alone master’s degree program. Students enrolled in the doctoral program may earn their master’s degree as they progress toward their PhD.

The program successfully integrates astrophysics, planetary science, Solar physics, and space instrumentation with strong observational and theoretical components. These assets facilitate interaction and collaboration between the disciplines and enable students to explore a wide variety of research areas.

The Sommers–Bausch Observatory, conveniently located on campus, provides excellent hands–on experience with telescopes and observing, while the world–class Fiske Planetarium, supported by our department, offers a unique opportunity for public outreach. These campus resources are complemented by other affiliated research organizations in Boulder.

For more information, visit the department’s Prospective Students ([http://www.colorado.edu/aps/prospective-students/](http://www.colorado.edu/aps/prospective-students/)) webpage.

**Requirements**

A minimum of 37 credit hours of coursework (including 4 credit hours of graduate seminars) in courses numbered 5000 or above is required; however, the overall emphasis is on independent study and research. A minimum of 30 credit hours of PhD dissertation credit hours are required.

Students in the PhD program are required to remove any deficiencies identified at the preliminary interview; to pass a comprehensive examination composed of writing a research paper based on a semi-independent research project, then an oral exam on that paper and related topics within the field; and to satisfactorily defend the PhD thesis before a faculty committee.

During the first year of graduate study, students generally obtain a broad background in courses regarded as basic to all three areas in addition to more specialized studies. Many students take graduate-level courses in other departments (e.g., Departments of Physics, Atmospheric and Oceanic Sciences, Geological Sciences, Applied Mathematics, or Aerospace Engineering), depending upon their particular interests or participation in interdisciplinary programs (see below).

**Electives: Planetary Sciences Focus**

As planetary sciences is an interdisciplinary field, students can obtain degrees from the Departments of Astrophysical and Planetary Sciences, Atmospheric and Oceanic Sciences, Geological Sciences, Physics or Aerospace Engineering. Boulder is also home to a division of the Southwest Research Institute, with over 25 planetary scientists, many of whom work with CU students. Research and courses related to the physics and dynamics of the atmospheres of other planets, planetary surfaces and interiors, and other solar system studies are available.

Graduate-level courses related to the physics and dynamics of the Earth’s atmosphere are offered in the following subjects:

**Research Opportunities**

**Observational and Theoretical Astrophysics**

Research in this field is conducted in the following areas:

- Stellar atmospheres, radiative transfer, stellar winds of hot/cool stars
- Formation of stars and planetary systems
Departments of Geological Sciences, Physics, and Aerospace as well as jointly with academic and research units, such as the Graduate research opportunities exist with individual faculty members, Research in this field is conducted in the following areas: Theoretical, Observational and Laboratory Atmospheric and Astrophysics and Space Astronomy (CASA), and JILA. Laboratory for Atmospheric and Space Physics (LASP), the Center for Opportunities for graduate research also are found with the university's observations, as well as for instrument and detector development. Cassegrain telescopes through Sommers-Bausch Observatory. These Locally, APS operates a 24-inch Cassegrain-Coude and two 20-inch Spectrograph.

Research is carried out with the ARC 3.5m Apache Point telescope, the Sloan Digital Sky Survey-V and these national telescopes and laboratories and international collaborators: High Altitude Observatory (HAO) in Boulder (Solar physics); National Optical Astronomical Observatories in Tucson and Chile (optical astronomy); National Radio Astronomy Observatory (NRAO); the Very Large Array (VLA); the Green Bank Telescope (GBT); the Hubble Space Telescope (HST); the Chandra, SWIFT, and XMM X-ray telescopes; the Fermi Gamma-Ray Space Telescope; and the Daniel K. Inouye Solar Telescope (DKIST) through collaboration with National Solar Observatory (NSO). CU Boulder also is involved with the Messenger (Mercury), MAVEN (Mars), JUNO (Jupiter), Cassini (Saturn), and New Horizons (Pluto) missions, as well as the HST Cosmic Origins Spectrograph.

Locally, APS operates a 24-inch Cassegrain-Coude and two 20-inch Cassegrain telescopes through Sommers-Bausch Observatory. These are available for photographic, photometric, and spectrographic observations, as well as for instrument and detector development. Opportunities for graduate research also are found with the university's Laboratory for Atmospheric and Space Physics (LASP), the Center for Astrophysics and Space Astronomy (CASA), and JILA.

**Theoretical, Observational and Laboratory Atmospheric and Planetary Science**

Research in this field is conducted in the following areas:

- Planetary disks, Kuiper Belt objects, extra-solar planets
- Dynamics and chemistry of planetary atmospheres, planetary clouds and planetary climates; evolution of planetary atmospheres; comparison of planetary and terrestrial atmospheres
- Planetary aeronomy, airglow and aurora, UV and IR spectroscopy, noctilucent clouds, structure and composition of planetary atmospheres (Venus, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto), planetary magnetospheres, and cometary physics
- Satellite monitoring of the Earth's atmosphere and environment, including remote sensing of mesospheric ozone, stratospheric trace species, convection, outgoing radiation and magnetospheric dynamics
- Planetary geology, planetary interiors and surfaces, and planetary geophysics

Graduate research opportunities exist with individual faculty members, as well as jointly with academic and research units, such as the Departments of Geological Sciences, Physics, and Aerospace Engineering, as well as the Department of Atmospheric and Oceanic Sciences (ATOC), the National Center for Atmospheric Research (NCAR), the National Oceanic and Atmospheric Administration (NOAA), and the Laboratory for Atmospheric and Space Physics (LASP). The latter is involved in space investigations of the Earth, Sun and planets. Financial support is available in connection with all of the above research activities.

**Atmospheric and Oceanic Sciences**

The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Graduate students admitted to ATOC are eligible to receive an advanced degree in atmospheric and oceanic sciences. Graduate students outside of ATOC can pursue the graduate certificate in atmospheric and oceanic sciences while earning a graduate degree from another department at CU Boulder, or while taking coursework as a non-degree-seeking student through Continuing Education's ACCESS Program provided they have already earned a bachelor's degree and meet the course prerequisites. In addition, students inside and outside the department may pursue a graduate certificate in oceanography. For more information on graduate certificate programs, see the Graduate School/Interdisciplinary Programs section.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the Atmospheric and Oceanic Sciences (http://www.colorado.edu/atoc/) website.

**Course code for this program is ATOC.**

**Master's Degree**

- Atmospheric and Oceanic Sciences - Master of Science (MS) (p. 1121)

**Doctoral Degree**

- Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD) (p. 1123)

**Certificates**

- Atmospheric and Oceanic Sciences - Graduate Certificate (p. 1123)
- Oceanography - Graduate Certificate (p. 1124)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Brown, Derek Philip (https://experts.colorado.edu/display/fisid_150027/)
Teaching Assistant Professor; PhD, University of Colorado Boulder

Cassano, John J. (https://experts.colorado.edu/display/fisid_121781/)
Professor; PhD, University of Wyoming

Friedrich, Katja (https://experts.colorado.edu/display/fisid_133607/)
Associate Chair, Professor; PhD, Ludwig-Maximilians-Universität München (Germany)
Han, Weiqing (https://experts.colorado.edu/display/fisid_115493/)
Professor; PhD, Nova University

Hart, John E.
Professor Emeritus

Jahn Hall, Alexandra (https://experts.colorado.edu/display/fisid_155096/)
Assistant Professor; PhD, McGill University

Karnauskas, Kristopher Benson (https://experts.colorado.edu/display/fisid_155094/)
Associate Professor; PhD, University of Maryland, College Park

Kay, Jennifer E. (https://experts.colorado.edu/display/fisid_153815/)
Associate Professor; PhD, University of Washington

Keen, Richard A.
Instructor Emeritus

Lemone, Margaret Anne (https://experts.colorado.edu/display/fisid_115199/)
Professor Adjoint

Lovenduski, Nicole Suzanne (https://experts.colorado.edu/display/fisid_147557/)
Associate Professor; PhD, University of California, Los Angeles

Lundquist, Julie Kay (https://experts.colorado.edu/display/fisid_147838/)
Associate Professor; PhD, University of Colorado Boulder

Moriarty, Julia (https://experts.colorado.edu/display/fisid_165830/)
Assistant Professor; PhD, William & Mary/Virginia Institute of Marine Science

Pilewskie, Peter Andrew (https://experts.colorado.edu/display/fisid_134466/)
Professor; PhD, University of Arizona

Randall, Cora Einterz (https://experts.colorado.edu/display/fisid_102010/)
Distinguished Professor Emeritus; PhD, University of California, Santa Cruz

Sanchez, Sara
Assistant Professor; PhD, University of California- San Diego

Schmidt, Sebastian (https://experts.colorado.edu/display/fisid_140121/)
Associate Professor; PhD, Leipzig University (Germany)

Toohey, Darin W. (https://experts.colorado.edu/display/fisid_110652/)
Professor; PhD, Harvard University

Toon, Owen Brian (https://experts.colorado.edu/display/fisid_110521/)
Professor; PhD, Cornell University

Wang, Zhien (https://experts.colorado.edu/display/fisid_164340/)
Professor; PhD, University of Utah

Weiss, Jeffrey B. (https://experts.colorado.edu/display/fisid_102145/)
Chair; Professor; PhD, University of California, Berkeley

Winters, Andrew (https://experts.colorado.edu/display/fisid_165835/)
Assistant Professor; PhD, University of Wisconsin–Madison

## Courses

### ATOC 5000 (3) Critical Issues in Climate and the Environment
Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

**Equivalent - Duplicate Degree Credit Not Granted:** ATOC 4800 and ENVS 5830

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite one year of calculus-based physics and math through differential equations.

### ATOC 5050 (3) Atmospheric Thermodynamics and Dynamics
Covers atmospheric thermodynamics and dynamics and the underlying governing laws and mathematical and physical principles. Topics include atmospheric composition and thermodynamics, conservation laws and atmospheric governing equations, geostrophic balance and balanced flows, vorticity dynamics and boundary layers. ATOC graduate core course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite one year of calculus-based physics and math up through differential equations.

### ATOC 5051 (3) Introduction to Physical Oceanography
Provides fundamental knowledge of observations, theory, dynamics and modeling in physical oceanography. Promotes critical thinking and the development of skills for data analysis and interpretation. ATOC graduate core course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite one year of calculus-based physics and math up through differential equations.

### ATOC 5060 (3) Dynamics of the Atmosphere and Oceans
Examines large-scale motions in a stratified rotating atmosphere and ocean, and quasi-geostrophic flow, barotropic and baroclinic instabilities, cyclogenesis, global circulations and boundary layer processes. Ageostrophic motions, including Kelvin waves, internal gravity waves and the theory of frontogenesis are also considered. ATOC graduate core course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ATOC 5050, one year of calculus-based physics and math up through differential equations.

### ATOC 5061 (3) Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms
Explores the existing theories of the El Niño and Southern Oscillation (ENSO) ocean-atmosphere coupled mechanisms, theory of the thermocline in a quasi-geostrophic system, and dynamics of the Atlantic Meridional Overturning Circulation (AMOC). Covers physical mechanisms, associated mathematical equations, and numerical model simulations. Discusses their direct research applications in understanding the past, present and future climate variability and change. Offered once per year.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ATOC 5400, ATOC 5051 or ATOC 5060 and one year of calculus-based physics and math including differential equations.
ATOC 5151 (3) Atmospheric Chemistry
Reviews basic kinetics and photochemistry of atmospheric species and stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidation capacity of the atmosphere and global climate change. ATOC graduate core course.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5151
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one semester of college-level chemistry.

ATOC 5152 (3) Advanced Atmospheric Chemistry
Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 5152
Recommended: Prerequisite CHEM 5151 or ATOC 5151.
Grading Basis: Letter Grade

ATOC 5200 (3) Biogeochemical Oceanography
Provides a large-scale synthesis of the processes impacting ocean biogeochemistry. Transforms theoretical understanding into real-world applications using oceanographic data and models. Topics include: chemical composition, biological nutrient utilization and productivity, air-sea gas exchange, carbonate chemistry, ocean acidification, ocean deoxygenation, iron fertilization, biogeochemical climate feedbacks and more.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4200
Requisites: Restricted to graduate students only.

ATOC 5215 (3) Descriptive Physical Oceanography
Introduces descriptive and dynamical physical oceanography, focusing on the nature and dynamics of ocean currents and their role in the distribution of heat and other aspects of ocean physics related to the Earth's climate. Dynamical material limited to mathematical descriptions of oceanic physical systems.
Requisites: Restricted to graduate students only.

ATOC 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing
Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget. ATOC graduate core course. Department enforced prerequisites: one year of calculus-based physics, and math up through differential equations.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5235
Requisites: Restricted to graduate students only.

ATOC 5300 (3) The Global Carbon Cycle
Covers the role of the ocean, terrestrial biosphere, and atmosphere in the global carbon cycle. Specific topics include marine carbonate chemistry, biological production, terrestrial fluxes, anthropogenic emissions, and the evolution of the global carbon cycle in a changing climate.
Requisites: Restricted to graduate students only.

ATOC 5400 (3) Introduction to Fluid Dynamics
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5400 and PHYS 5400
Requisites: Restricted to graduate students only.

ATOC 5500 (1-3) Special Topics in Atmospheric and Oceanic Sciences
Acquaints students with current research in atmospheres, oceans, and climate. Topics may vary each semester. Students may register for more than one section of this course in the same semester. Formerly ATOC 7500.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 5540 (3) Mathematical Methods
Follows Graduate Atmospheric Chemistry (ATOC 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5540
Requisites: Restricted to graduate students only.

ATOC 5550 (3) Mountain Meteorology
Investigating main processes that control weather and climate in the western United States and other mountain ranges around the world is the emphasis of this course. Provides an advanced survey of synoptic, mesoscale, and microscale meteorology in complex terrain including orographically modified cyclone evolution, front-mountain interactions, terrain and thermally driven flows, mountain waves, downslope winds, and orographic precipitation.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5550
Requisites: Restricted to graduate students only.

ATOC 5560 (3) Radiative Processes in Planetary Atmospheres
Application of radiative transfer theory to problems in planetary atmospheres, with primary emphasis on the Earth's atmosphere; principles of atomic and molecular spectroscopy; infrared band representation; absorption and emission of atmospheric gases; radiation flux and flux divergence computations; radiative transfer and fluid motions; additional applications such as the greenhouse effect, inversion methods and climate models. Department enforced prerequisite: ATOC 5235.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5560
Requisites: Restricted to graduate students only.

ATOC 5600 (3) Physics and Chemistry of Clouds and Aerosols
Examines the physics and chemistry of clouds and aerosols in the planetary atmospheres, where they impact climate, atmospheric chemistry, remote sensing and weather. Applies basic microphysical, radiative and chemical processes affecting particles to issues in current literature. ATOC graduate core course.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one semester of college-level chemistry and calculus-based physics and math up through differential equations.
ATOC 5730 (3) Physical Oceanography and Climate
Introduces the field of physical oceanography, with emphasis on the ocean's interaction with the global atmosphere. Analysis of the ocean's heat, salt, and momentum budgets, wind-driven and thermohaline circulations, climate cycles including El Nino, and the ocean's role in climate change. Theory complemented by state-of-the-art observations and models. Department recommended prerequisites: ATOC 1060 or ATOC 3070 or ATOC 3600 and one semester of calculus.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4730
Requisites: Restricted to graduate students only.

ATOC 5740 (3) Dynamics of Past Climate Changes: Lessons for the Future
Studies past changes in the Earth's climate and their application to predict future climate changes. Combines theoretical understanding of the climate system, computer models, and records of past changes from geological archives to understand drivers of past and future changes in climate. Emerging and inter-disciplinary area in climate research including paleoclimatology, climate theory, and modelling. Students work individually and in groups to formulate hypotheses that can be tested using paleoclimate records and model simulations. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4740
Recommended: Prerequisites At least two of the following courses - ATOC 5050, ATOC 5051, ATOC 5060, ATOC 5300, ATOC 5730, ATOC 5870, GEOL 5060, GEOL 5305, GEOL 5430, or GEOL 5675.

ATOC 5750 (3) Desert Meteorology and Climate
Introduces students to the dynamic causes of deserts in the context of atmospheric processes and land-surface physics. Discusses desert severe weather, desert microclimates, human impacts and desertification, inter-annual variability in aridity (drought), the effects of deserts on global climate and the impact of desert climate on humans.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4750
Requisites: Restricted to graduate students only.

ATOC 5770 (3) Wind Energy Meteorology
Explores the complex interactions of the atmosphere and wind energy generation. Surveys wind turbine designs. Explores planetary boundary layer dynamics, traditional and novel wind measurement methods, forecasting methods, wind turbine and wind farm wakes, wind farm optimization, sound propagation from wind plants, climate change impacts on wind resources and the impacts of wind plants on local environments.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4770
Requisites: Restricted to graduate students only.

ATOC 5780 (3) Ice Sheets and Climate
Covers the role of ice sheets in the climate system over a range of time (millions of years ago to the long-term future) scales, and presents the interactions between ice sheets, the ocean, and the atmosphere. Students will be introduced to, and work with, observational and modeling methods and data that conceptualize ice sheet climate and related topics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4780
Requisites: Restricted to graduate students only.
Recommended: Prerequisites Basic knowledge of calculus, algebra and programming experience (python, Matlab, or equivalent).

ATOC 5815 (3) Scientific Programming, Data Analysis and Visualization Laboratory
Teaches programming in python, as well as analysis skills for accessing, analyzing and visualizing data that are commonly used in the atmospheric and oceanic sciences. Basic data analysis includes curve fitting and re-gridding/aggregation of satellite observations or meteorological data for global climatologies. The course content is primarily conveyed through hands-on code development. A final project, involving the independent analysis and visualization of a scientific data set, integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5830 and ASTR 5830
Repeatable: Repeatable for up to 9.00 total credit hours.

ATOC 5830 (3) Topics in Planetary Science
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5830
Repeatable: Repeatable for up to 4.00 total credit hours.

ATOC 5850 (3) Numerical Methods Laboratory
Teach students how to convert physical descriptions of the earth system into numerical models. Students will learn how to make assumptions to simplify complex systems, how to discretize and code mathematical equations so they can be solved on a computer, and how to assess if the results are reasonable. The course content is primarily conveyed through hands-on code development in python. A final project integrates skills acquired throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4850
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ATOC 4815 or ATOC 5815, Calculus 1, Calculus 2, Differential Equations, Linear Algebra, and a basic knowledge of interest in atmospheric, oceanic, climatic, or cryospheric physics.

ATOC 5860 (3) Objective Data Analysis Laboratory
Teaches the extraction of information from data using statistical methods via a computer program. The goals of this course are: 1) to learn and apply tools to objectively analyze atmospheric and oceanic data, 2) to critically evaluate research using these tools. The course covers hypothesis testing, compositing, regression, principal component analysis, time series analysis, filtering, and data assimilation. This learning-by-doing course is aimed at advanced graduate students conducting ATOC-related research.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 4810 or 5810, and familiarity with linear algebra, basic calculus, github and jupyter.
ATOC 5870 (3) Climate Modeling Laboratory
Climate models solve equations describing the earth system. This course provides an overview of climate modeling. Standard climate model approaches and experiments are presented, and then used in companion exercises. This course will provide students with real-world experience running a climate model used internationally for climate science and policy.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4870
Requisites: Restricted to graduate students only.

ATOC 5875 (3) Weather Modeling Laboratory
In this laboratory course, students simulate the atmosphere using a numerical weather prediction model (WRF) and explore the physical and numerical basis of the system of equations that underpin numerical weather prediction models. In addition to developing technical skills with WRF and visualizing its output with python, students explore applications of numerical modeling of the atmosphere, such as land-sea breezes, hurricanes, mesoscale convective systems, and the daily cycle of the boundary layer. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4875
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Experience with computer science and data visualization and some experience with Unix/Linux is recommended.

ATOC 5880 (3) Mesoscale Meteorology
Provides a comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena on the mesoscale, which have horizontal scales ranging from a few to several hundred kilometers. Topics include land/sea breezes, horizontal convective rolls, drylines, deep convective storms, outflow boundaries, tornadoes, mesoscale convective systems, terrain induced airflows, mountain waves and the mesoscale aspects of extratropical cyclones. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4880
Requisites: Restricted to graduate students only.
Recommended: Prerequisites One year of Calculus, one year of Physics with Calculus, and at least one fundamental ATOC course.

ATOC 5890 (3) Synoptic Dynamic Meteorology
Weather conditions at middle latitudes are characterized by complex interactions between air masses, fronts, cyclones, and anticyclones. These interactions are governed by a set of elegant mathematical equations that describe the behavior of the atmosphere. Students will manipulate and apply these equations in real time in order to diagnose the development and evolution of a variety of synoptic-scale weather systems, including fronts, jet streams, and extratropical cyclones. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4890
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 3050, ATOC 4720, one year of Calculus, and one semester of Physics with Calculus.

ATOC 5900 (1-6) Independent Study
Students may register for more than one section of this course in the same semester.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 5930 (1-3) Internship
This course is designed to offer ATOC graduate students with the opportunity to work hands-on in the community and to gain practical knowledge and experience in both research and industry. Participation in the program requires both on-site and academic work.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite Minimum of 3.00 cumulative GPA.

ATOC 6020 (1) Seminar in Atmospheric and Oceanic Sciences
Studies an area of current research in the atmospheric and oceanic sciences. Students read selected papers from the literature. Students and faculty give presentations and participate in discussions. May be repeated for a total of 6 credit hours within the degree. May be repeated for a total of 3 credit hours within a semester.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATOC 6100 (3) Modeling Weather and Climate
Discusses background theory and procedures used for modeling climate on a variety of space and time scales. Includes numerical simulation of weather and climate with models in a hierarchy of complexity, assessments of error growth, prediction of circulations and impact of radiative and other influences. Explores various numerical methods, develops core computing skills and considers data handling and visualization. Consists of a combination of lectures and laboratory.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 5050 or calculus.

ATOC 6700 (1) Weather Forecasting and Discussion
Explores the techniques used to make short-term weather forecasts in the mid-latitudes using real-time weather observations, numerical forecast model output and conceptual models of mid-latitude weather phenomena. Students will be required to develop and defend conceptual models of the short-term evolution of the weather and will conduct detailed post-forecast analysis of successful and unsuccessful forecasts.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ATOC 5050.

ATOC 6800 (3) Scientific Writing
Writing is the core of how we communicate our scientific findings. Successful science writing tells a compelling story and makes it easy for the reader to understand our results and their implications. In this hands-on class, student use their own research results to work on developing scientific writing skills that will increase the impact of their papers as well as make writing more enjoyable by learning how to approach the writing and editing process. Department enforced requisite: Students need to have their own research results first and at least one main conclusion from it in order to take this class.
Requisites: Restricted to graduate students only.

ATOC 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.

ATOC 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

ATOC 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Requisites: Restricted to graduate students only.

Atmospheric and Oceanic Sciences - Master of Science (MS)
The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research
environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

Students can earn a master's degree with either a thesis or an exam. Students considering master's study in atmospheric and oceanic sciences should carefully read the Master's Degree Requirements (p. 1043) section of this catalog, as well as the department's Prospective Graduate Students (http://www.colorado.edu/atoc/academics/prospective-graduate-students/) and Current Graduate Students (http://www.colorado.edu/atoc/academics/current-graduate-students/) webpages.

Requirements

Course Requirements

Students must complete at least 30 credit hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including the four ATOC core courses.

- Up to 6 credit hours of approved 3000- and 4000-level coursework from engineering, math, physics, chemistry or biology may be applied toward the MS degree. No credit will be given toward the MS degree for ATOC coursework below the 5000 level.
- A minimum of 15 credit hours from regular ATOC courses (independent study courses cannot be used to satisfy this requirement).
- All MS students are required to take the following four ATOC core courses or their equivalent.

<table>

</tbody>
</table>

Total Credit Hours 12

- Up to 3 credit hours of Independent Study (ATOC 5900), Weather Forecasting and Discussion (ATOC 6700) and/or Seminar in Atmospheric and Oceanic Sciences (ATOC 6020) may be used toward the 30 hours of regular coursework in the degree requirements.
- Up to 9 credit hours may be transferred from another accredited institution and applied toward an MS degree. Transfer credit for ATOC core coursework must be approved by the graduate advisor.
- A student is required to maintain at least a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the MS, a course mark below C is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

Degree Plans

The master's degree will be a Master of Science in atmospheric and oceanic sciences. The master's thesis is not constrained by choice of track.

Plan I: Thesis Option

Students must complete a minimum of 4 (but no more than 6) thesis hours, which can be counted toward the total 30 hours of coursework and the 15 hours of ATOC coursework requirements. Students must successfully complete an MS thesis and oral final examination based on the thesis.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not requirement for advancement to the PhD program.

Thesis Guidelines

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the research advisor. The thesis topic must be related to the major field, and:

- Represent the equivalent of 4 to 6 credit hours of coursework.
- Receive the approval of the major department at least 30 days before commencement at which the degree is to be conferred.
- Be completed at the time the final examination is held.
- Comply with the University of Colorado Graduate School Thesis and Dissertation Specifications.
- Be filed with the Graduate School by posted deadlines for the semester for which the degree is to be conferred.

Thesis Exam Committee

The examination committee for the MS thesis final exam will consist of three graduate faculty members, at least two of whom must be ATOC core faculty members. The examination consists of a 30-minute oral presentation given by the candidate on the thesis subject, followed by a period of questions for the candidate by the committee. The oral presentation is open to anyone who wishes to attend. The full examination typically does not exceed two hours in duration.

Any student with a research advisor outside of ATOC (e.g., an advisor who is from another department or is a full-time employee at NCAR, NOAA, etc.), must also have an academic advisor who is an ATOC core faculty member. The academic advisor should be identified by the student in collaboration with their research advisor as soon as possible, and no later than one month after research begins. Once an ATOC faculty member agrees to act as academic advisor, it is their responsibility to communicate ATOC policies and requirements to the research advisor, and to ensure that the student is meeting all ATOC requirements and making good academic progress toward the degree.

Plan II: Non-Thesis/Final Exam Option

The requirements for an MS degree non-thesis/final exam option include the following:

- 30 semester hours of coursework, of which 24 must be from courses numbered 5000 or above, and at least 15 must be from ATOC graduate courses, including four of the core ATOC courses.
- Successful completion of a written final examination based on ATOC regular coursework. The ATOC Comprehensive Exam I is typically used to satisfy this requirement.

Note: Students planning to pursue a PhD degree may elect to obtain the MS degree, but this is not a requirement for advancement to the PhD program.
Time Limit
Students are expected to complete all degree requirements within four years of the date of commencing coursework, but normally in two years. Students may petition the Graduate School for extension(s).

Atmospheric and Oceanic Sciences - Doctor of Philosophy (PhD)
The Department of Atmospheric and Oceanic Sciences (ATOC) is an interdisciplinary program that provides an educational and research environment to examine the dynamical, physical and chemical processes in the atmosphere, ocean and land surface, and the manner in which they interact. A major theme is the establishment of a physical basis for understanding, observing and modeling climate and global change.

ATOC attracts many of the most outstanding graduate students in the field. Our students receive a significant number of fellowships and nationally recognized awards each year, provide excellent instruction to CU Boulder's undergraduates as teaching assistants, and make scientific advances while conducting innovative research. Our graduates go on to successful careers in academia, national research institutes and private industry.

Graduate students, research staff and faculty work together on a wide range of research themes:

- atmospheric & oceanic dynamics
- atmospheric chemistry & physics
- chemical & physical oceanography
- clouds & aerosols
- planetary atmospheres
- radiative transfer & remote sensing
- regional, boundary layer & wind energy meteorology

For more information about programs and application procedures, contact the ATOC office.

Requirements
Admission Requirements
Academic Preparation
An undergraduate degree in mathematics, physics, engineering, chemistry or another natural science is recommended. The general prerequisites expected of incoming graduate students include undergraduate courses in calculus, linear algebra, differential equations and computer programming, as well as one-year sequences of undergraduate calculus-based physics and chemistry. Upper-division undergraduate courses in physics, chemistry, engineering and mathematics are strongly recommended. Undergraduate courses in atmospheric and oceanic sciences are useful, but not expected, as part of the undergraduate background.

Program Requirements
Academic Standards
A student is required to maintain a 3.00 (B) average in all work attempted while enrolled in the Graduate School. For the PhD, a course grade of C+ or below is unsatisfactory and will not be counted toward fulfilling requirements for the degree.

Course Requirements
A total of 36 credit hours of coursework are required, including 18 credit hours in ATOC core courses, as well as a graduate-level course in applied or computational mathematics. In addition, 30 dissertation hours are required. Other specific course requirements are covered in the ATOC Graduate Handbook.

Examinations
Students must pass a two-part comprehensive examination before admission into candidacy. Part I of the comprehensive examination is a written exam based on course material and is normally taken just prior to the second year. Part II of the comprehensive examination is normally taken in the third year and is an oral examination based on an original research paper prepared by the student. After a preliminary copy of the dissertation has been accepted for defense by the student's committee, a final examination on the dissertation and related topics is conducted.

Atmospheric and Oceanic Sciences - Graduate Certificate
Current CU Boulder graduate students and students with a bachelor’s degree who are nondegree ACCESS students may pursue the graduate certificate in atmospheric and oceanic sciences.

For more information about ATOC programs and application procedures, call the ATOC office at 303-492-6633 or visit the department’s Certificate in Atmospheric and Oceanic Sciences (http://www.colorado.edu/atoc/academics/graduate-certificate-programs/certificate-atmospheric-and-oceanic-sciences/) webpage.
Requirements

Prerequisites
Students must meet course prerequisites prior to enrollment. Most of the ATOC Graduate Certificate courses require at least one year of calculus and one year of calculus-based physics.

Program Requirements
Students who wish to obtain the graduate certificate in atmospheric and oceanic sciences (ATOC) must satisfactorily complete 12 credit hours: four ATOC graduate-level courses (those above the 5000 level) or their cross-listed equivalents (e.g., ATOC 5151 or CHEM 5151), provided the cross-listed equivalents are not offered through the student’s home department(s). To satisfactorily complete a course, students must earn a grade of B or better.

NOTE: ATOC 5000 Critical Issues in Climate and the Environment cannot be applied toward the graduate certificate in atmospheric and oceanic sciences requirements.

During the final semester of coursework or upon completion of the ATOC Graduate Certificate requirements, students should contact the ATOC Graduate Program Assistant (atocasst@colorado.edu).

Oceanography - Graduate Certificate

Graduate students can pursue the a graduate certificate while earning a normal graduate degree (MS or PhD) at CU Boulder or while taking coursework as a nondegree seeking student through Continuing Education’s ACCESS Program, provided they have already earned a bachelor’s degree and meet the course prerequisites.

Graduate certificates are noted on the official CU Boulder transcript.

Requirements
Students who wish to obtain the graduate certificate in oceanography must complete at least three oceanography core courses (see below) passed with a letter grade of B or better. In addition, students may take an independent study course to replace one of the core courses.

Tracks
A few sample tracks satisfying the Certificate in Oceanography requirements:

- Astrophysical and planetary sciences student: ATOC 5051 Introduction to Physical Oceanography, ATOC 5060 Dynamics of the Atmosphere and Oceans, ASTR 5400 Introduction to Fluid Dynamics and GEOL 5270 Marine Chemistry and Geochemistry.
- Applied math hydrodynamicist: ATOC 5051 Introduction to Physical Oceanography, ASTR 5400 Introduction to Fluid Dynamics, ATOC 5060 Dynamics of the Atmosphere and Oceans and ASTR 5410 Fluid Instabilities, Waves, and Turbulence.
- Aerospace engineer remote sensing of the ocean: ATOC 5051 Introduction to Physical Oceanography, ATOC 5730 Physical Oceanography and Climate and ATOC 5061 Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms.
- Geology paleoceanographer: GEOL 5270 Marine Chemistry and Geochemistry, ATOC 5051 Introduction to Physical Oceanography, GEOL 5430 Paleoceanography and Paleoclimatology and ATOC 5061 Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms.
- Ocean geographer: ATOC 5730 Physical Oceanography and Climate, GEOL 5270 Marine Chemistry and Geochemistry and ATOC 5051 Introduction to Physical Oceanography.

Behavioral Genetics

The Institute for Behavioral Genetics (IBG) is an organized research unit of the CU Boulder Graduate School dedicated to conducting and facilitating research on the genetic and environmental bases of individual differences in behavior.

Founded in 1967, IBG is one of the top research facilities in the world for genetic research on behavior. Data collection and analysis are ongoing for several internationally renowned studies including the Colorado Adoption Project, the Colorado Twin Registry, the National Youth Survey Family Study, the Colorado Learning Disabilities Research Center, the National Longitudinal Study of Adolescent Health, and the Adolescent Brain and Cognitive Development Study. IBG is home to one of the nation's largest DNA repositories for research on human behavior, as well as housing a wide array of behaviorally and genetically defined lines of selected, recombinant inbred, transgenic and knockout-gene mice. Current research includes studies of aging, neurodegenerative disease, psychopathology, reading and learning disabilities, cognition, substance abuse, behavioral development and evolution.

Certificate

• Behavioral Genetics - Graduate Certificate (p. 1124)

Behavioral Genetics - Graduate Certificate

The Institute for Behavioral Genetics (IBG) offers a training program in behavioral genetics. The goal of the program is to train scientists in the study of genetic contributions to individual differences in behavior. This is accomplished by requiring students to obtain strong training in a primary academic discipline, by providing training in the interdisciplinary field of behavioral genetics, and by providing an atmosphere in which close interactions among scholars with different perspectives may be established.
Requirements

Admission Requirements
To train at IBG, students must be admitted to a PhD program at the University of Colorado (Boulder or Denver). To be considered for admission, the Graduate School requires an undergraduate GPA of at least 2.75. Additionally, the most competitive applicants should have verbal and math GREs >85th percentile. Subject GRE scores are not required but will be considered if they have been completed. We carefully consider all components of the application including undergraduate grades, letters of recommendation, previous research experience and GRE scores.

Required Courses and Credits
Deviation from the IBG certificate requirements may be requested by petition to the student’s advisory committee. Specific requests for course substitution, resolution of an ambiguity, etc., should be made by written petition. A petition may be approved by a majority vote of both the advisory committee and the IBG Training Committee. Disapproval of a petition may be changed to approval by a majority vote of the IBG faculty. Students with sufficient backgrounds may also test out of required courses 1–2 (i.e., pass the final exam for the course).

Total Credit Hours 22

1 Other graduate-level course in statistics (of at least one semester) approved by the student's advisory committee.

NOTE: As some courses can only be taught every other year, it is each student’s responsibility to take relevant courses when offered. Some equivalent courses may be offered at the Health Sciences Center or other venues. Course substitutions may be requested.

Teaching Requirements
Each of the students in the IBG Training Program must TA for at least one semester in a course judged by their advisory committee to be relevant to their professional specialty. (As part of their general responsibilities for the development of the student, advisory committees may sometimes require additional teaching.)

General Requirements
IBG students are required to conduct their doctoral dissertation research on topics of direct relevance to animal or human behavioral genetics, under the supervision of an IBG faculty member. A training file for each student is maintained in the IBG office for tracking progress toward completion of program requirements. Each student is to assist in updating this file at least once per year.

Specific departmental and Graduate School requirements in addition to those listed here are the responsibility of each student, in consultation with his/her advisory committee.

Examinations
Each student in the training program must complete the comprehensive/examining dissertation exam requirements of their academic department (e.g. IPhy, PSYC, MCDB). Depending upon the academic program in which the student is enrolled, they may also have additional
exam requirements including a dissertation proposal. Students are advised to check their academic department for specific requirements.

**Annual Presentations at IBG Orientation**

All continuing students are required to present a poster describing their research activity of the past year at the annual IBG Orientation—held each year in August (the last Friday before the beginning of the fall semester). Students are also expected to present their research at the annual IBG mini-conference held each spring.

**Exit Colloquium**

All students are expected to do an exit colloquium at the conclusion of their training program. This presentation should be modeled as a “job talk,” not a repeat of the final defense.

**Biochemistry**

The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational Biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, Chemistry, and Physics, and with research institutes and agencies such as the BioFrontiers Institute, Joint Institutes of Laboratory Astrophysics (JILA), the Renewable and Sustainable Energy Institute.

Course code for this program is BCHM.

**Master's Degree**

- Biochemistry - Master of Science (MS) (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/biochemistry-master-science-ms/)

**Doctoral Degree**

- Biochemistry - Doctor of Philosophy (PhD) (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/biochemistry-doctor-philosophy-phd/)

**Certificate**

- Molecular Biophysics - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/molecular-biophysics-graduate-certificate/)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Ahn, Natalie (https://experts.colorado.edu/display/fisid_106044/)
Distinguished Professor; PhD, University of California, Berkeley

Aydin, Halil (https://experts.colorado.edu/display/fisid_167398/)
Assistant Professor; PhD, University of Toronto

Batey, Robert T. (https://experts.colorado.edu/display/fisid_122668/)
Professor; PhD, Massachusetts Institute of Technology

Cameron, Jeffrey C. (https://experts.colorado.edu/display/fisid_156473/)
Assistant Professor; PhD, Washington University

Caruthers, Marvin H. (https://experts.colorado.edu/display/fisid_103328/)
Distinguished Professor; PhD, Northwestern University

Cech, Thomas R. (https://experts.colorado.edu/display/fisid_103252/)
Distinguished Professor; PhD, University of California, Berkeley

Falke, Joseph J. (https://experts.colorado.edu/display/fisid_101970/)
Professor; PhD, California Institute of Technology

Goodrich, James (https://experts.colorado.edu/display/fisid_109239/)
Professor, Chair; PhD, Carnegie Mellon University

Kasinath, Vignesh (https://experts.colorado.edu/individual/fisid_167418/)
Assistant Professor; PhD, University of Pennsylvania

Khanal, Akhil
Instructor; PhD, University of Delaware

Kuchta, Robert (https://experts.colorado.edu/display/fisid_100844/)
Professor; PhD, Brandeis University

Kugel, Jennifer F. (https://experts.colorado.edu/display/fisid_109472/)
Research Professor; PhD, University of Colorado Boulder

Liu, Xuedong (https://experts.colorado.edu/display/fisid_118458/)
Professor; PhD, University of Wisconsin–Madison

Mchenry, Charles
Professor Emeritus; PhD, University of California, Santa Barbara

Palmer, Amy E. (https://experts.colorado.edu/display/fisid_141901/)
Professor; PhD, Stanford University

Pardi, Arthur
Professor Emeritus; PhD, University of California, Berkeley

Professor; PhD, Yale University

Schnizer-Luger, Karoline (https://experts.colorado.edu/display/fisid_156579/)
Endowed Chair, Professor; PhD, Univ of Basel (Switzerland)
BCHM 5312 (3-4) Quantitative Optical Imaging
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 5312, MCDB 4312
Grading Basis: Letter Grade

BCHM 5341 (3) Chemical Biology and Drug Design
Develop knowledge base and skills in the interdisciplinary field of chemical biology, including aspects of chemistry and biology, and integrating both with respect to hierarchical levels of structure (atomic, molecular, cellular). Students will receive training that helps to develop their careers in biotech, pharmaceutical and other research-oriented industries as well as in academia. Department enforced prerequisites: introductory organic chemistry and general biochemistry. Formerly CHEM 5341.
Requisites: Restricted to graduate students only.

BCHM 5400 (4) Core Concepts in Physical Chemistry for Biochemists
Introduces thermodynamics, kinetics and spectroscopy, emphasizing macromolecule and biochemical applications. Includes thermodynamics, chemical and physical equilibria, solution chemistry, rates of chemical and biochemical reactions, chemical bonds and principles and selected examples of spectroscopies applied to biological systems. Formerly CHEM 5400.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4400 CHEM 4511
Requisites: Restricted to graduate students only.
BCHM 5740 (4) Biochemistry of Gene Transmission, Expression and Regulation
Covers biosynthesis and function of macromolecules including DNA, RNA and proteins; molecular basis of replication, transcription and translation; biochemistry of subcellular systems; signaling and regulation of gene expression in eukaryotes; and special topics. Formerly CHEM 5740.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4740
Requisites: Restricted to graduate students only.

BCHM 5751 (3) Current Topics in Biochemical Research
Lec. Covers current topics in modern biochemical research through lectures, reading recent research articles, critical thinking and class discussion. Topics include protein and nucleic acid structure and function, biomolecular interactions, enzyme function and cellular signaling and regulation. Department consent required. Formerly CHEM 5751.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4751
Requisites: Restricted to graduate students only.

BCHM 5770 (3) Fundamentals of Biochemistry I
Introduction to conducting research in Biochemistry, including covering foundational topics in Biochemistry that include concepts such as protein structure and function, experimental approaches to study biochemical processes, and analysis and interpretation of data. Topics will be taught through the perspective of the scientific literature with an emphasis on critical analysis of research. Additional subject areas will include discussions of aspects of conducting biochemical research in academic and industrial settings. Intended for entering Biochemistry graduate students. Formerly CHEM 5770.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5771 (5) Advanced General Biochemistry 1
Lect. In-depth analysis of DNA structure and replication, RNA synthesis and processing, protein synthesis, enzyme function and mechanism, protein structure, protein dynamics, and physical chemistry of macromolecules. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Formerly CHEM 5771.

BCHM 5776 (1) Scientific Ethics and Responsible Conduct in Research
Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.
Equivalent - Duplicate Degree Credit Not Granted: MCDB 5776
Requisites: Requires prerequisite course of BCHM 5771 or CHEM 5271 (minimum grade B-). Restricted to graduate students only.

BCHM 5780 (3) Fundamentals of Biochemistry II
Analysis of topics in biochemistry including protein structure, methods of structure determination and prediction, protein folding, and protein dynamics. Intended as a comprehensive treatment of areas central to modern biochemistry for entering graduate students. Lectures concurrent with CHEM 5781, covering the same topics except for the requirement of a written research proposal. Formerly CHEM 5780.
Requisites: Requires prerequisite course of BCHM 5770 (minimum grade B-). Restricted to graduate students only.

BCHM 5781 (5) Advanced General Biochemistry 2
Detailed consideration of contemporary topics in biochemistry. Formerly CHEM 5781.
Requisites: Requires prerequisite course of BCHM 5770 or BCHM 5771 (minimum grade B-). Restricted to graduate students only.
Grading Basis: Letter Grade

BCHM 5801 (3) Advanced Signal Transduction and Cell Cycle Regulation
Lect. Advanced discussion of current research and literature in signal transduction, including ligands, receptors, and intracellular signaling pathways, as well as control on transcription, chromatin structure, DNA replication, mitosis, and cell cycle progression. Formerly CHEM 5801.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210 or MCDB 5220.

BCHM 5811 (3) Advanced Methods in Protein Sequencing and Analysis
Lect. Advanced discussion of current methods in protein sequencing, sequence analysis, and posttranslational modifications, emphasizing techniques of mass spectrometry, use of protein databases, sequence alignment and motifs, structure prediction, and modeling of signaling pathways. Department consent required. Formerly CHEM 5811.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5771 and CHEM 5781 and MCDB 5210.

BCHM 5821 (1) Special Topics in Signaling and Cell Regulation
Lect. Reviews and evaluates literature on subjects of current interest in signal transduction transcription, cell cycle progression, and cell regulation. Primarily for graduate level presentation of special topics by students, faculty, and research staff. Department consent required. Formerly CHEM 5821.
Repeatable: Repeatable for up to 5.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 5850 (3) Chemistry and Biology of Nucleic Acids
A comprehensive course in advanced topics in nucleic acid chemistry and biology. Topics will include the chemical properties of nucleic acids, chemical and biological synthesis, structure, biology of ribozymes and ribonucleic complexes, protein recognition, nucleic acids as targets and therapeutics and diagnostic and other applications of nucleic acids.
Equivalent - Duplicate Degree Credit Not Granted: BCHM 4850
Requisites: Requires prerequisite course of BCHM 2700 or BCHM 4611 (minimum grade C-).
Grading Basis: Letter Grade

BCHM 6601 (1) Biochemistry Seminar
Restricted to and required for all currently funded NIH/CU Biophysics trainees and current NIH/CU Biophysics affiliates. Credit is deferred until presentation of satisfactory seminar. Formerly CHEM 6601.
Requisites: Restricted to graduate students only.

BCHM 6711 (3-6) Advanced Topics in Biochemistry
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6711.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
BCHM 6731 (3-6) Advanced Topics in Biochemistry
Detailed study of current literature relative to one main topic is undertaken each semester. Topics covered on a rotating basis include enzyme kinetics and mechanisms; lipids and lipoproteins; chemistry and enzymology of nucleic acids; biochemistry of nucleic acids in eukaryotic cells; protein chemistry. Presentations include faculty lectures and student reports. Department enforced prerequisite: one year of biochemistry courses. Department consent required. Formerly CHEM 6731.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6901 (1-6) Research in Biochemistry
Repeatable for up to 15.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 6941 (1) Master's Candidate for Degree
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
Requisites: Restricted to graduate students only.

BCHM 6951 (1-6) Master's Thesis
Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.
Requisites: Restricted to graduate students only.

BCHM 7001 (1) Seminar: Enzyme Mechanisms and Kinetics
Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotopic trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7001.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7011 (1) RNA Mediated Inorganic and Organic Reactions
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7011.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7111 (1) Seminar: Protein Structure and Folding
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7111.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7501 (1) Seminar: Protein Dynamics and the Mechanism of Sensory Proteins
Studies experimental approaches to understand the mechanisms of sensory proteins, internal motions of proteins, and protein folding. Department consent required. Formerly CHEM 7501.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7541 (1) Seminar: Signal Transduction and Protein Phosphorylation
Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required. Formerly CHEM 7541.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7561 (2) Seminar: Environmental Biochemistry
Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7561.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7601 (2) Seminar: Nucleic Acid Chemistry
Topics in various aspects of current research; emphasizes student readings and presentations. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7611 (1) Seminar: Structures and Dynamics of Biopolymers in Solution
Discussion of experimental and theoretical approaches for probing structures and dynamics of proteins, peptides, and nucleic acids; and computations in molecular dynamics simulation, modeling, and geometry. Department consent required. Formerly CHEM 7611.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7621 (1) Seminar: Biochemistry and Molecular Biology of Signal Transduction
Discusses and reviews the current literature and experimental results in signal transduction, cell cycle and tumor suppressor gene regulation. Emphasizes the understandings of molecular and biochemical mechanisms of the origin of human tumor cells. Formerly CHEM 7621.
Requisites: Restricted to graduate students only.

BCHM 7651 (2) Seminar: Environmental Biochemistry
Topics in various aspects of current biochemical and environmental research. Department consent required. Formerly CHEM 7651.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7661 (3) Seminar: Structure/Function of Human Mediator Transcription Complexes
Study of the mechanisms of eukaryotic gene expression with an emphasis on the structure and function of human mediator transcription complexes. Formerly CHEM 7661.
Requisites: Restricted to graduate students only.

BCHM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7671.
Requisites: Restricted to graduate students only.

BCHM 7671 (1) Seminar: Topics in Designing Probes for Signaling Reactions
Discussion of advances and developments in biomolecular dynamics, with emphasis on experimental studies via ultrafast laser spectroscopy. The connection of protein dynamics with function will also be considered. Formerly CHEM 7671.
Requisites: Restricted to graduate students only.

BCHM 7691 (1) Seminar: Enzyme Mechanisms and Kinetics
Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotopic trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7691.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7701 (1) Seminar: Enzyme Mechanisms and Kinetics
Studies experimental approaches to understand the mechanisms of enzymic catalysis. Techniques include steady-state and pre-steady-state kinetics, isotopic trapping and partitioning, inhibition by substrate analogues, and covalent modification of proteins. Department consent required. Formerly CHEM 7701.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7741 (1) Seminar: Signal Transduction and Protein Phosphorylation
Devoted to experimental methods for understanding mechanisms of signal transduction in mammalian cells through pathways involving regulation of protein phosphorylation. Department consent required. Formerly CHEM 7741.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7751 (1) Seminar: Protein Structure and Folding
Studies structure and folding of proteins and protein complexes using biophysical methods, including nuclear magnetic resonance (NMR), circular dichroism, and fluorescence spectroscopies. Department consent required. Formerly CHEM 7751.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7761 (1) Seminar: Eukaryotic Transcriptional Regulation
Studies the regulation of transcription by RNA Polymerase II from human promoters. Department consent required. Formerly CHEM 7761.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

BCHM 7781 (1) Seminar: Topics in Structural Biology
Discussion of advances and developments in structural biology with emphasis on new methods for protein expression, purification and crystallization; and structure solution implementation. Formerly CHEM 7781.
Requisites: Restricted to graduate students only.
Biochemistry - Master of Science (MS)

Students are not admitted for the master's degree but may be transferred to the MS plan if they are unable to meet the demands of the PhD program.

Requirements

Language Requirement
The department does not require foreign language proficiency for the master’s degree.

Examinations
Administration of preliminary examinations varies, depending on the student's entering field. Candidates opting for MS Plan I must pass a master's thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

Course Requirements
There are two methods of obtaining a master's degree from the Department of Biochemistry. Both plans are available only with departmental approval.

Plan I: Thesis
This plan requires 30 credit hours, including 15 credit hours of formal coursework, 15 credit hours in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

Plan II: Research Report
This plan requires 30 credit hours including 21 credit hours of formal coursework plus 9 credit hours of research/seminar and presentation of a research report, but no thesis.

Biochemistry - Doctor of Philosophy (PhD)

The Department of Biochemistry is internationally recognized for its research and education and offers a world-class interdisciplinary research environment in a beautiful mountain setting. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including:

- Computational biology
- Nucleic acids
- Gene expression
- Cell signaling
- Membranes
- Proteins and enzymology
- Molecular biophysics
- Structural biology
- Systems biology

Graduate students enjoy extensive scientific collaboration with biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, Chemistry, and Physics, and with research institutes such as the BioFrontiers Institute, Joint Institutes of Laboratory Physics (JILA), the Renewable and Sustainable Energy Institute (RASEI).

Requirements

Course Requirements
Sixty credit hours of coursework is required, consisting of 30 hours of research in BCHM 8991, at least 15 hours in formal courses and the remainder in other courses, such as lecture and seminar courses, group meeting courses and research in BCHM 6901. All students are required to take a 1-credit course in Scientific Ethics and Responsible Conduct in Research BCHM 5776.

A minimum grade of B- is required in all courses counting for the PhD degree; students must maintain a cumulative GPA of 3.0 in all formal courses and an overall grade point average of 3.0 or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Students on probation will not have a high priority for financial support.

Plan of Study
The plan of study varies by student. See the Plan(s) of Study (p. 1131) section for a sample course plan.

Research Requirements
During the course of the PhD thesis work, students will arrange annual meetings with a thesis advisory committee composed of their research advisor and two to four other biochemistry faculty. The purpose of these advisory meetings is to ensure the student is making adequate
progress on a suitable PhD thesis project. The final annual meeting should be scheduled about one year from the end of the thesis work. For this meeting, the advisory committee will be expanded to five faculty members: the thesis advisor, three biochemistry faculty and one faculty member from another department. This committee will become the examination committee that evaluates the results of a completed research program submitted as a thesis for the final examination as described above.

**Examination Requirements**

Each PhD student is required to satisfy a preliminary examination and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

**Preliminary Examinations**

The Biochemistry preliminary examination will be conducted at the beginning of the student's third semester. The record of each student, including undergraduate preparation, performance in graduate coursework, TA performance and performance in laboratory rotations will be reviewed, and a recommendation will be made on the qualification of the student to continue in the PhD program. Outcomes may include recommendation for additional coursework, delay in joining a research lab or a recommendation to leave the program. Students who are considering interdivisional work should consult the Biochemistry Graduate Committee for advice on the preliminary examination requirement.

**Comprehensive Examinations**

The Comprehensive Examinations are made up of three parts: a Written Examination, an Oral Examination and the evaluation of an original research proposal. The oral examination and the research proposition evaluation shall be conducted by a five member examining board, according to the rules of the Graduate School. The Comprehensive Examinations are considered passed, and the student can advance to Candidacy when the requirements of all parts have been met.

**Final Examination**

A doctoral student must write a dissertation based upon original investigation, demonstrating mature scholarship and critical judgment, as well as familiarity with tools and methods of research, conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

**Time Limit**

All degree requirements must be completed within six years of the date of commencing coursework.

**Plan(s) of Study**

Below is a sample course plan for first and second year students. In their third through sixth years, students typically complete dissertation research (BCHM 8991, repeatable for up to 30 credit hours) and finish elective coursework.

**Molecular Biophysics - Graduate Certificate**

This program introduces graduate students to the field of biophysics, its methodologies and the state-of-the-art biophysical research efforts being carried out in diverse laboratories and departments on the CU Boulder campus. It creates interdepartmental connections that provide the breadth of training needed to develop biophysical scholars.

Students must be admitted through the regular admissions process to a PhD program in one of the following departments:

- Biochemistry
- Chemical and Biological Engineering
- Chemistry
- Molecular, Cellular and Developmental Biology
- Physics

They must satisfy all of their home department's requirements to receive a PhD as well as the additional requirements of the certificate program. For more information, visit the program's Molecular Biophysics Training Program: Certificate Option (http://www.colorado.edu/biophysics/certificate/) webpage.

**Requirements**

- Participation in one to three laboratory rotations outside the thesis lab, which provide experience with a range of biophysical methods. Subsequently the student joins one of the member laboratories of the training program for thesis work.
- Completion of two courses chosen from the list of approved courses below.
- Annual meeting with a faculty advisory committee that provides helpful feedback on the thesis research.
- Students are expected to take part in a seminar series, which presents internationally renowned speakers and their research. They also are required to participate in supergroup meetings and symposia, which provide forums for them to present their own research in front of their colleagues and advisory committee.

### Chemistry

The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry and biochemistry faculty, with other departments such as Molecular, Cellular and Developmental Biology, and Physics, and with research institutes and agencies such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA) and the National Oceanic and Atmospheric Administration (NOAA).

#### Course code for this program is CHEM.

### Master's Degree

- Chemistry - Master of Science (MS) (p. 1137)

### Doctoral Degrees

- Chemistry - Doctor of Philosophy (PhD) (p. 1140)
- Chemical Physics - Doctor of Philosophy (PhD) (p. 1138)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ziemann, Paul Jeffrey (https://experts.colorado.edu/display/fisid_153281/)
Professor; PhD, Pennsylvania State University

Courses

CHEM 5011 (3) Advanced Inorganic Chemistry 1
Inorganic chemistry based on principles of bonding, structure, reaction mechanisms, and modern synthetic methods. Chemistry and general properties of representative and transition elements and their compounds.

Equivalent - Duplicate Degree Credit Not Granted: CHEM 4011

Requisites: Requires prerequisite courses of CHEM 4011 and CHEM 4531 (all minimum grade B-) or graduate standing.
CHEM 5061 (3) Advanced Inorganic Chemistry 2
Lectures in physical inorganic chemistry with an emphasis on topics for understanding modern solar energy conversion to electricity and fuels. Includes a description of bonding and properties of coordination compounds in terms of the ligand field and molecular orbital theories. The primary research literature will be used to motivate exploration of relevant themes including spectroscopy, electron transfer, energy transfer, bioenergetic conversion, and small-molecule activation.
Requisites: Requires prerequisite course of CHEM 4011 (minimum grade C-) or graduate standing.

CHEM 5131 (3) Computer Programming and Data Analysis for Chemists
Provides an introduction to computer programming and data analysis skills that are a fundamental part of graduate research. The programming section of the course introduces the coding skills necessary for simulating, analyzing and visualizing data using IGOR Pro and for acquiring data and analyzing data using LabVIEW. Basic concepts in statistics and error analysis are also covered.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 4511 or CHEM 4171.
Grading Basis: Letter Grade

CHEM 5141 (3) Environmental Water and Soil Chemistry
Application of basic chemical principles to understanding the processes that determine the chemical composition of oceans, lakes, rivers, soils and sediments. Topics include air-water exchange; acid-base, redox, coordination, precipitation and dissolution, ion exchange and sorption reactions; nutrient chemistry; and the use of simple equilibrium and kinetic models for describing the chemistry of inorganic and organic species in air-water-soil systems.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4141
Requisites: Restricted to graduate students only.

CHEM 5151 (3) Atmospheric Chemistry
Lect. Basic kinetics and photochemistry of atmospheric species. Stratospheric chemistry with emphasis on processes controlling ozone abundance. Tropospheric chemistry focusing on photochemical smog, acid deposition, oxidative capacity of the atmosphere and global climate change.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5151
Requisites: Restricted to graduate students only.
Recommended: Prerequisite one semester of college-level chemistry.

CHEM 5152 (3) Advanced Atmospheric Chemistry
Follows Graduate Atmospheric Chemistry (CHEM 5151) and explores advanced topics in atmospheric chemistry, such as secondary aerosol formation, oxidant formation, the chemistry of global climate change and/or design of advanced laboratory experiments.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5152
Recommended: Prerequisite CHEM 5151 or ATOC 5151.

CHEM 5161 (3) Analytical Atmospheric Spectroscopy
Optical spectrochemical analysis, atmospheric transmittance, including atomic and molecular spectroscopy, line-by-line spectral databases such as HITRAN, absorption, emission, fluorescence, scattering processes of gases, surface enhancements, aerosols, optical spectroscopic instrument components, and techniques, and their applications to atmospheric, and environmental problems. Department enforced prereq., undergraduate physical chemistry or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5171 (3) Electroanalytical Chemistry
Lect. Establishes a background for understanding electrochemical systems through a review of the relevant thermodynamic, kinetic and electronic principles. Compares classical and modern electrochemical methods of analysis. Several special topics are discussed in depth. Department enforced prerequisite: classical and modern electrochemical methods of analysis. Several special topics are discussed in depth.
Requisites: Restricted to graduate students only.

CHEM 5181 (3) Mass Spectrometry, Chromatography, and Computer Programming
Covers mass spectrometry, including instrumentation, ionization techniques, and interpretation of spectra. Analytical separation methods such as gas and liquid chromatography, ion mobility, and capillary electrophoresis. Introduction to atmospheric chemistry applications. Computer programming (Igor and LabVIEW) and simulation of instrumentation and processes. Department prerequisite: basic computer programming (or willingness to work hard on it), and undergraduate physics, statistics, and physical chemistry.
Requisites: Restricted to graduate students only.

CHEM 5251 (3) Materials Chemistry and Properties
Lec. Understanding of materials from chemistry perspective including metals, oxides, semiconductors and polymers. Basic description of chemical preparation of materials. Overview of fundamental properties of materials including structural, chemical, mechanical, thermal, electrical, and optical properties. Description of behavior of materials and various applications in modern technology. Discussion of materials characterization methods.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4251
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5261 (3) Organic Materials: Structures and Functions
Overview of the preparation and functioning mechanism of novel organic materials that have recently been developed, including conductive polymers, 2-D macrocyclic structures, 3-D molecular cages, molecular machines/muscles/switches, fullerene derivatives and carbon nanotube composites. Emphasizes the use of organic and physical chemistry as tools to develop novel materials and probe their structure-property relationship.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4261
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5271 (3) Chemistry of Solar Energy
Chemical principles of conversion of solar energy into electricity and fuels in molecular and semiconductor-based systems. Overview of solid-state electronic structure of materials and interfaces, light-matter interactions, principles of harvesting photoexcited currents and useful chemical species. Description of processes utilized in established and emerging solar energy technologies.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4271
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4531 (all minimum grade C-) or graduate standing.

CHEM 5281 (3) Semiconductor Processing and Device Fabrication
Understanding of semiconductor processing and device fabrication from chemistry perspective. Overview of processing steps used to fabricate inorganic semiconductor devices including deposition, patterning and etching techniques. Description of process integration during device fabrication. Discussion of key issues facing advanced semiconductor fabrication.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
CHEM 5311 (3) Advanced Synthetic Organic Chemistry
Lect. Surveys synthetic transformations emphasizing important functional group transformations and carbon-carbon, bond-forming reactions. Required of all organic chemistry graduate students. Department enforced prerequisite: one year of organic chemistry or graduate standing.

CHEM 5321 (3) Advanced Physical Organic Chemistry
Lect. Modern concepts of physical organic chemistry and their use in interpreting data in terms of mechanisms of organic reactions and reactivities of organic compounds. Required of all organic chemistry graduate students. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5331 (3) Advanced Spectroscopic Techniques in Organic Chemistry
Lect. Advanced spectroscopic techniques for structure and determination in organic chemistry. Emphasizes proton and carbon-13 NMR spectroscopy. Department enforced prerequisites: one year of organic chemistry and one year of physical chemistry or graduate standing.

CHEM 5501 (3) Advanced Topics in Physical Chemistry
Covers various topics in physical chemistry focusing on their mathematical and physical background. Topics include the application of classical mechanics and electrodynamics in chemistry, the classical mechanics background for the description of atoms and molecules, the use of vector spaces in wave mechanics and quantum mechanics and the classical description of spectroscopy in terms of interaction of light and matter. Department enforced prerequisites: undergraduate physical chemistry, graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5531 (3) Statistical Mechanics
Requisites: Restricted to graduate students only.

CHEM 5541 (3) Chemical Dynamics
Lect. Discussion of mechanism and rate of chemical reactions from a fundamental point of view. Discusses nature of collision and develops concepts of cross section and rate constant. Theories of elementary bimolecular and decay processes are critically examined. Department enforced prerequisite: undergraduate physical chemistry.
Requisites: Restricted to graduate students only.

CHEM 5555 (4) Theoretical and Computational Chemistry
Explores computational methods to understand chemical systems. Topics include: atomic and molecular electronic structure calculations, Monte Carlo and molecular dynamics simulations and thermodynamic calculations.
Equivalent - Duplicate Degree Credit Not Granted: CHEM 4555
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CHEM 5571 (3) Surface Science
Lect. Principles of surface science with emphasis on fundamental surface phenomena, surface techniques and surface chemistry. Basic description of surfaces, adsorbate-surface interactions, surface kinetics and methods of surface analysis. Surface science of heterogeneous catalysis, semiconductor processing, and environmental interfaces. Department enforced prerequisites: undergraduate physical chemistry and graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5581 (3) Introductory Quantum Chemistry
Lect. Basic principles and techniques of quantum mechanics with applications to questions of chemical interest. Quantum dynamics of atoms, molecules and spin; electronic structure of atoms and molecules. Department enforced prerequisite: two semesters of physical chemistry and graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 5591 (3) Advanced Molecular Spectroscopy
Lect. Rotational, vibrational and electronic spectra of molecules, and their interpretation in terms of the quantum theory of molecular structure. Department enforced prerequisites: two semesters of physical chemistry and graduate standing or instructor consent.
Requisites: Restricted to graduate students only.

CHEM 6001 (1) Seminar: Inorganic Chemistry
Student, faculty, and guest presentations and discussions of current research in inorganic chemistry and related topics (transition element and main group element compound properties, inorganic compound in biological, industrial, and materials applications). Required of all inorganic chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
Requisites: Restricted to graduate students only.

CHEM 6021 (1-3) Special Topics in Inorganic Chemistry
Lect. Subjects of current interest in inorganic chemistry. Primarily used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6031 (3) Special Topics in Nanoscience
Introduces the synthesis, physical properties, and applications of nanometer-scale materials and devices. Includes synthesis of metal and semiconductor nanoparticles and nanowires, optical and electronic properties of nanoscale systems, and applications in biotechnology and energy.
Requisites: Requires prerequisite course of CHEM 4431 or CHEM 4511 (all minimum grade B-) or graduate standing.

CHEM 6101 (1) Seminar: Analytical Chemistry
Student, faculty, and guest presentations and discussions of current research in analytical chemistry. Required of all analytical chemistry graduate students. Credit deferred until presentation of satisfactory seminar.
Requisites: Restricted to graduate students only.

CHEM 6111 (1-3) Special Topics in Analytical Chemistry
Lect. Subjects of current interest in analytical chemistry. Used for graduate-level presentations of special topics by visiting and resident faculty. Variable class schedule.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
CHEM 6301 (1-3) Seminar in Organic Chemistry
Discussions principally concerned with recent literature in organic chemistry. Required of all organic chemistry graduate students.
Requisites: Restricted to graduate students only.

CHEM 6311 (1-3) Special Topics in Synthetic Organic Chemistry
Lect. Selected topics in synthetic organic chemistry, encompassing both methods and/or total synthesis of complex molecules.
Requisites: Requires prerequisite course of CHEM 5311 (minimum grade B-). Restricted to graduate students only.

CHEM 6321 (1-3) Special Topics in Physical Organic Chemistry
Lect. Selected topics in physical organic chemistry, which may include photochemistry, carbene chemistry, free radical chemistry, molecular orbital methods, organic materials, or gas phase ion chemistry.
Requisites: Requires prerequisite course of CHEM 5321 (minimum grade B-). Restricted to graduate students only.

CHEM 6401 (1-3) Seminar: Physical Chemistry
Student, faculty, and guest presentations of current research in physical chemistry. Discussion of research topics related to the subject of weekly physical chemistry/chemical physics seminar and appropriate journal articles.
Requisites: Restricted to graduate students only.

CHEM 6411 (1-3) Advanced Topics in Physical Chemistry
Lect.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6801 (0) Departmental Research Seminar
Lectures by visiting scientists and occasionally by staff members and graduate students on topics of current research. Meets once a week. Required for all graduate students in chemistry.
Requisites: Restricted to graduate students only.

CHEM 6901 (1-6) Research in Chemistry
Repeatable: Repeatable for up to 15.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 6941 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.

CHEM 6951 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

CHEM 7021 (2) Seminar: Structural Inorganic Chemistry
Current research in the area of structural inorganic chemistry. Concerns topics related to electronic and molecular structures of transition metal complexes. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7101 (2) Seminar: Chromatography and Trace Analysis
Student and faculty discussions and reports on research advances in chromatography, trace analysis and environmental chemistry. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7111 (2) Seminar: Electrochemistry
Student and faculty discussions and reports on research advances in electrochemistry. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7131 (1) Seminar in Atmospheric Aerosol Chemistry
Discusses advances in atmospheric aerosol chemistry, with emphasis on new methods for analysis and their application to laboratory and field studies.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CHEM 5151 and CHEM 5181.

CHEM 7161 (1) Seminar: Heterogeneous Atmospheric Chemistry
Topics in atmospheric chemistry emphasizing the structure and reactivity of atmospheric particulates. Presentations on current research and critical evaluations of recent literature. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7211 (1) Seminar: Topics in Synthetic Methodology and Natural Product Synthesis
Discussion of contemporary synthetic organic chemistry with a focus on new methodology and total synthesis of natural products.
Requisites: Restricted to graduate students only.

CHEM 7221 (1) Seminar: Photochemistry and Free Radical Chemistry
Current research in areas of organic free radical chemistry, photochemistry, and related topics are presented and discussed. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7231 (1) Seminar: Reactive Intermediates
Application of contemporary ideas of chemical physics to organic molecules. Special attention to structures and bonding in organic ions and radicals. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7241 (1) Seminar: Synthetic Organic Chemistry
Discussion of recent research in synthetic organic chemistry. Emphasizes relationship between current theoretical developments and experiments. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7251 (1) Selected Topics in Chemical Genetics
Discusses the brief history of the emerging field of chemical genetics, and focuses on the recent development of concepts, techniques, applications, and its impact on both science and human health.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7271 (1) Seminar: Picosecond Dynamics of Reactions
Includes development and application of picosecond laser spectroscopy to organic and organometallic reactions. Emphasizes relationship between current theoretical developments and experiments. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7281 (1) Seminar: Molecular Self-Assembly
Discusses current topics and recent advances in molecular self-assembly, with emphasis on new liquid crystal designs and applications.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to graduate students only.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7301 (1) Seminar: Synthetic and Mechanistic Chemistry
Discusses particularly the synthesis of complex organic molecules and the mechanism of reagents used in organic synthesis. Includes a study of transition metal mediated organic reactions. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7311 (1) Selected Topics in Organic Materials
Current research in the area of organic/materials chemistry. Concerns topics related to organic materials synthesis, carbon nanotube functionalization, artificial photosynthesis, gas storage and catalysis. Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7401 (1) Seminar in Photochemical Reaction Control
Discusses progress towards control of molecular reactivity using light, including synthetic methods for creating control subjects. Emphasizes new methods to achieve coherent control.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7411 (1) Seminar: Topics in Theoretical Molecular Dynamics
Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7421 (2) Seminar: Negative Ion Chemistry
Chemistry of negative ions; experimental methods and designs; laser spectroscopy of ions; theoretical methods; reactive dynamics of ions in the gas phase. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7431 (1) Seminar: Topics in Theoretical Chemical Physics
Seminars presented on a variety of topics in theoretical chemical physics. Molecular collisions and unimolecular dynamics predominantly featured. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7441 (2) Research Seminar: Theoretical Chemistry
Studies theoretical description of molecular dynamics related to rate processes. Focuses on chemical reactions in liquids, absorption-desorption on surfaces, nucleation reactions, and energy flow in molecules. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7461 (1) Seminar: Gas Phase Ion Chemistry
Studies gas phase ion chemistry relevant to thermochemical measurements and atmospheric, interstellar, and biomedical applications.
Requisites: Restricted to graduate students only.

CHEM 7471 (1) Seminar in Ultrafast Spectroscopy of Proteins
Discusses advances and developments in biomolecular dynamics, and considers the connection of protein dynamics with function. Emphasizes experimental studies via ultrafast laser spectroscopy.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7481 (2) Seminar: Molecular Spectroscopy and Photochemistry
Discussion and presentation of current research in spectroscopy and photochemistry of organic as well as organometallic systems. Reviews state of the art techniques available for the theoretical and experimental characterization of excited states. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7511 (1) Seminar: Reaction Dynamics in Condensed Phases
Studies elementary steps in chemical reactions and their observation by ultrafast spectroscopy. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7521 (1) Seminar: Atmospheric Kinetics and Photochemistry
Discusses laboratory studies of degradation mechanisms. Applies these studies to atmospheric phenomena such as global warming and stratospheric ozone loss. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7531 (1) Seminar: Surface Chemistry and Thin Film Growth
Topics in surface chemistry and thin film growth with focus on atomic layer deposition (ALD) and molecular layer deposition (MLD). Properties of thin films grown using ALD and MLD. Applications of thin films in areas including flexible displays, energy storage and catalysis. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 7551 (1) Selected Topics in Ion Spectroscopy
Discussion and presentation of current research in spectroscopy and photochemistry of ions. Seminar lectures are given by graduate students on their research and on literature topics, and the results of both in-house and external research groups are studied. Additionally, ideas for interesting directions of research and new experiments are proposed and discussed.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to graduate students only.

CHEM 8991 (1-10) Doctoral Dissertation
All doctoral students must register for 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.

Chemistry - Master of Science (MS)

Students are not admitted to the master’s degree program but may transfer to an MS degree plan if they are in good academic standing.
for the MS program and have made sufficient progress toward the MS degree. This is an option for graduate students who are not in good academic standing for the PhD program or who have decided to leave the program.

Requirements

Language Requirement

The department does not require foreign language proficiency for the master’s degree.

Examinations

Administration of preliminary examinations varies, depending on students' entering field. Candidates opting for MS Plan I must pass a master’s thesis defense examination at the time they complete their work. MS Plan II does not require a final oral examination.

Required Courses and Credits

There are two methods of obtaining a master’s degree from the Department of Chemistry and Biochemistry. Both plans are available only with departmental approval.

Plan I: Thesis

This plan requires 30 credits, including 15 credits of formal coursework, 15 credits in research/seminar courses, the completion of a research investigation and the presentation of a thesis.

Plan II: Research Report

This plan requires 30 credits, including 21 credits of formal coursework plus 9 credits of research/seminar and presentation of a research report, but no thesis.

Chemical Physics - Doctor of Philosophy (PhD)

Chemical physics is a discipline at the interface between chemistry and physics. Chemical physics applies physical methods and theory to study molecular and collective properties of matter. The focus is on understanding complex phenomena from gas phase molecular dynamics, to nanoscale, mesoscale and biological phenomena, through model systems and fundamental physical principles.

The chemical physics program allows students to strike a balance between core courses and courses that are better suited to address the student's specific research goals and interests. Students must consult with the chemical physics graduate advisors in their parent departments, either chemistry or physics, to plan their formal coursework.

This program is administered by an interdepartmental committee. For more information, contact the graduate program manager in either the Department of Chemistry (chemgrad@colorado.edu) or the Department of Physics (Jeanne.nijhowne@colorado.edu).

Requirements

Program Admissions

Graduate students in good standing in either the chemistry or physics PhD program may declare their intent to work toward a PhD in chemical physics. The department that originally admitted a student is referred to as their home department. Newly admitted students with an interest in the chemical physics PhD should consult with both their home departmental advisor and their chemical physics graduate advisor for advice on initial course selection. Advanced students must be in good standing in their home department and able to complete the chemical physics PhD within the time limit set by the Graduate School to declare their intent to work toward the chemical physics PhD. Once they have been accepted by the Graduate Advisor in chemical physics to enroll for candidacy in the PhD program in chemical physics, the graduate advisor will notify the graduate secretary in their home department to have their major code changed to CPHY.

Once a student has declared their intent to work toward a PhD in chemical physics, the preliminary examination shall be conducted by the chemical physics graduate advisor. The exam shall review all completed courses, undergraduate and graduate, related to chemical physics. The student must also earn grades of B or better in at least six credit hours of University of Colorado graduate courses that have been approved for the PhD in chemical physics by the graduate advisor. Students must pass the preliminary examination within two semesters of declaring their intent to work toward a PhD in chemical physics. Students are formally admitted to the chemical physics PhD program when they pass the preliminary examination.

Courses

General Requirements

Students must complete a program of formal courses (see "Selection of Formal Courses" below) approved by their PhD thesis advisor and the Committee on Chemical Physics. Students must file an approved degree plan of courses already taken, in progress and planned for future semesters with the Graduate School by the end of their fourth semester. The 30 doctoral dissertation credit hours required by the Graduate School may be completed in either CHEM 8991 or PHYS 8990.

A minimum grade of B# is required in all courses counted for the PhD degree. Students must maintain both a cumulative grade point average of 3.0 in their program of formal courses and an overall grade point average of 3.0.

Selection of Formal Courses

The chemical physics program makes the distinction between formal and graduate level courses. All students will be required to complete an approved program of formal courses that contains at least 6 credit hours of formal coursework. Formal courses are graded based on individual coursework. Many graduate level courses are not considered formal courses in the context of the chemical physics PhD requirements, but may be counted toward Graduate School course requirements. Each student's degree plan for coursework must be approved by the student's PhD thesis advisor and a chemical physics graduate advisor. The formal courses shall be chosen to develop the student’s competency in classical mechanics, quantum mechanics, thermodynamics and statistical mechanics, electricity and magnetism, chemical kinetics, and in their area of thesis research.

Transfer of Credit

Up to 10 credit hours of graduate level, formal coursework may be transferred from another school, subject to demonstrated proficiency in the subject(s), approval by the Chair of the Committee on Chemical Physics, and approval by the Graduate School. Forms for this purpose can be obtained from the graduate program manager.

Formal Application for Admission to Candidacy for the PhD Degree

All students must make formal application for admission to candidacy for the PhD degree by the fourth semester. The required forms can be
obtained from the graduate program manager. This Graduate School requirement should be fulfilled even if the student has not completed all the courses required by their degree plan. To satisfy Graduate School requirements, the degree plan may include graduate-level courses that are not approved as formal courses in chemical physics, but the degree plan must include the student’s approved program of formal courses in chemical physics. After filling in the form, indicating graduate courses taken and to be taken, it should be approved and signed by the student’s PhD thesis advisor and then by the Chair of the Committee on Chemical Physics.

Examination Requirements

Each student is required to pass a preliminary examination before admission to the program. Each student in the program is required to pass a comprehensive examination to advance to candidacy. After completing all graduate school and course requirements, the candidate must then submit a dissertation and pass a final dissertation defense to be awarded the PhD in chemical physics.

Language Requirements

Foreign Language Requirement
The program does not require proficiency in a foreign language for the PhD degree.

English Language Proficiency
The English language proficiency required for an advanced degree by the Graduate School will be assessed for each student through written coursework and in the oral portion of the comprehensive examination.

Advancement to Candidacy

Advancement to candidacy for the PhD in chemical physics requires that the student select a PhD thesis advisor, complete a program of courses approved by the PhD thesis advisor and the Committee on Chemical Physics, write a proposal describing their proposed PhD thesis research, and pass a comprehensive examination covering chemical physics and the proposed thesis research. The oral examination should normally be completed by the end of the second year.

The comprehensive examination shall be conducted by a five-member Comprehensive Exam Committee (CEC), according to the rules of the Graduate School. The CEC shall consist of graduate faculty from the Department of Chemistry and the Department of Physics; there must be at least one member from each department. One member of the CEC shall be the student’s thesis advisor. The membership of the CEC shall be selected by the student, but must be approved by the PhD thesis advisor, the graduate advisor, and the Graduate School.

In order to attempt the oral examination, the student must demonstrate satisfactory progress toward completing their approved program of courses and submit an application for candidacy to the Graduate School at least two weeks in advance of the scheduled oral examination. Students are responsible for arranging the examination date, time and place with their CEC and should notify the chemical physics program chair and their departmental graduate secretary at least two weeks prior to the scheduled date. The candidate must schedule the exam so that all members of the board are available for a full two hours.

One week in advance of the oral examination, the student should submit a written proposal to their CEC that demonstrates suitability of the project for a PhD thesis, adequate background knowledge of chemical physics, the field of research and the relevant literature. The oral examination will assess the student’s competence in the core areas of chemical physics: elementary physics and chemistry, quantum mechanics, chemical kinetics, thermodynamics and statistical mechanics, electricity and magnetism, as well as the student’s research plans. The research advisor is strongly encouraged to attend the oral examination, but is recused from final discussion and voting on the outcome. Three (out of four) passing votes are needed for the CEC to approve the written proposal and the oral examination. A pass may be conditional or unconditional.

If the student does not pass the oral examination, the committee may recommend additions to the approved program of courses in chemical physics or that the student complete the MS or PhD program in their home department (note that there is no MS degree program in chemical physics). A student who does not pass has the right to attempt the examination once more after a period of time set by the CEC. Advancement to candidacy occurs when all examination requirements and conditions have been met.

Annual Progress Review

Students in chemical physics must complete the annual progress review required in the third year and beyond.

Dissertation Defense

This examination is primarily a defense of the candidate’s thesis. The examining committee consists of the student’s PhD thesis advisor as chair and four other faculty members, at least three of whom must be from the Department of Chemistry and the Department of Physics, with at least one from each department. These committee members are selected by the program chair upon request by and after consultation with the student and must be approved by the Graduate School two weeks in advance.

The student must arrange for one of these other committee members to be the “second reader” of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date, time and location for the defense, notifying their home department’s graduate program manager in time for the appropriate approvals by the Graduate School, and distributing copies of the dissertation to the committee members at least two weeks before the defense.

Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the dissertation defense. A passing defense requires an affirmative vote from at least four out of five committee members. A student who does not pass has the right to attempt to defend the dissertation once more after a period of time set by the examining committee.

Dissertation Requirements

A doctoral student writes a dissertation based upon their own original investigation. The dissertation must demonstrate mature scholarship, critical judgment and a familiarity with the tools and methods of research.

• Every dissertation presented in partial fulfillment of the requirements for an advanced degree must represent the equivalent of at least 30 credit hours of work.
• The student is responsible for notifying the Graduate School of the exact title of the dissertation on or before the posted deadlines during the semester in which the doctoral degree is to be conferred.
• The dissertation must comply in mechanical features with the specifications for theses and dissertations available in the Graduate School.
• The dissertation must be submitted electronically before the posted deadline in order to graduate in a given semester. It should be submitted to http://www.etdadmin.com/colorado. (http://www.etdadmin.com/colorado/) A signature page with at least two original signatures must also be turned in to the Graduate School office by the end of the business day on or before the dissertation deadline.

• The final grade is withheld until the dissertation is completed. In progress (IP) grades are assigned during each semester until the defense is successfully completed. The final copy of the dissertation is accepted by the examination committee, at which time the final grade for all dissertation hours is submitted to the Graduate School on a final grade card.

Chemistry - Doctor of Philosophy (PhD)

The Department of Chemistry is internationally recognized for its research and education. As part of a commitment to continuing this tradition of excellence, the department provides a graduate program that integrates opportunities for cutting-edge creative research and study across a wide range of areas, including analytical, atmospheric, biochemistry, biophysical, chemical physics, environmental, organic, materials and nanoscience, and physical chemistry.

Graduate students enjoy extensive scientific collaboration with chemistry faculty; with other departments, such as Physics, Biochemistry, Molecular, Cellular and Developmental Biology; and with research institutes and agencies, such as the Cooperative Institute for Research in Environmental Sciences (CIRES), Joint Institutes of Laboratory Astrophysics (JILA), the National Oceanic and Atmospheric Administration (NOAA), Renewable & Sustainable Energy Institute (RASEI), and Materials Science and Engineering (MSE).

The coursework for this program is tailored to the individual student’s research interests and needs. Although course offerings vary each year, approximately 40 graduate-level courses are offered annually, covering topics of important and contemporary interest in all areas of chemistry. Students are also given the chance to familiarize themselves with faculty research by attending seminars by faculty on their research and research group meetings, and by individual meetings with faculty members.

PhD program students complete a number of other requirements, including a Comprehensive Examination, which consists of a original Research Proposition, an Oral Examination, and a research proposal. Most students graduate with their PhD in approximately five to six years.

Requirements

Examination Requirements

Each PhD student is required to satisfy divisional preliminary examinations and pass a series of Comprehensive Examinations to be advanced to candidacy. The candidate must then pass a final thesis defense examination to be awarded the PhD degree. Interdisciplinary students should adhere to specific program requirements.

Preliminary Examinations

The Graduate School requires that the department administer preliminary examinations in order to “satisfy itself (by examination or other means) that students who signify intent to undertake the PhD degree are qualified to do so.” The format of the departmental preliminary examination of each student will be a responsibility of the division that admits them. The preliminary examination will be completed before the end of the second semester of study. Students will be required to follow the format of the preliminary examination of the division that admits them. Students who are uncertain of their division or who are considering an interdivisional major should consult the graduate advisor for advice on the preliminary examination requirement.

Language Requirements

The Graduate School rules state that “a student who is noticeably deficient in the written and/or oral use of the English language cannot obtain an advanced degree from CU Boulder.” The department assesses the English language proficiency of each PhD student in the Oral Comprehensive Examination. The department does not require proficiency in a foreign language for the PhD degree.

Comprehensive Examinations

The comprehensive examinations are made up of three parts: a thesis research proposition, an oral examination and evaluation of a research proposal. The oral examination and the research proposition evaluation shall be conducted by a five-member examining board, according to the rules of the Graduate School. One member of this board shall be the student’s research advisor, and one member shall be from outside the primary field of study of the student. The membership of this board shall be selected by the Graduate Advisor, in consultation with other faculty members as necessary. The comprehensive examinations are considered passed when the requirements of all parts have been met. Students must be registered during the semester that the comprehensive examinations are considered passed.

Research Proposition

At least one week before the oral examination date, students will present a short thesis research proposition (approximately five pages) of their thesis research plan to each committee member. This overview will outline clearly the direction of the student’s thesis, will provide the committee with some advance idea of the thesis research area and will describe promising research results (if any). Students might be asked at the time of the exam to describe and defend alternate experimental approaches to their research goals.

Oral Comprehensive Examination

Students must take the Oral Comprehensive Examination no later than the end of the fourth semester. Master’s degree students in this department who wish to continue for a PhD degree must take the Oral Examination no later than the end of the fifth semester even if they have not completed the master’s degree.

This examination will include questioning on (i) the student’s research, and (ii) general topics. Students are expected to demonstrate a clear understanding of their thesis research and fundamental knowledge in chemistry, and show the ability to think creatively. Students are strongly advised to spend time reviewing material from chemistry and biochemistry courses they have taken as undergraduates and graduates, since this material is often the subject of questioning during the examination.

The oral examination committee consists of three of the five faculty members appointed to the examining board selected by the Graduate Advisor. The student’s research advisor, while a member of the examining board, may not be a member of this committee. The decision of this committee shall be determined by a simple majority of the members. The committee shall determine whether the student is capable of (a) PhD degree work, (b) master’s degree work, or (c) no advanced degree work.
The committee may require that the student repeat the examination, and/or may require the student to take additional courses. The committee may require that the student complete a thesis master's degree before continuing on to the PhD; in this case the committee will decide if it is necessary for the student to repeat the Oral Comprehensive examination at some time during the completion of the master's degree research. The committee may also require that a student complete a master's degree (thesis or coursework MS), and then leave the graduate program. As described in the Graduate School rules, students who fail the examination have the right to request a second attempt; in this case the student should contact the Graduate Scholastic Committee. Students are responsible for arranging the examination date with their committee and should notify the graduate secretary two weeks prior to the scheduled date.

Research Proposal
Each student shall submit a research proposal to the two members of the examination board who were not members of the oral examination committee. The proposal may have been submitted as part of a graduate fellowship application, may be written as a part of any graduate course in the department where written proposals are required, or may be written as a part of a group meeting activity. The proposal must obtain the approval of both the members of the research proposition committee. In the event of a dispute between the two members, the proposal will be referred to the full examination board for a decision.

Upon satisfactory completion of all three examination requirements, the five members of the examination board shall recommend the student for advancement to candidacy for the PhD degree.

Final Examination
This examination is primarily a defense of the candidate's thesis. The examining committee consists of the student's thesis advisor as chair and four other faculty members, at least one of whom is rostered outside of the department. These committee members are selected by the graduate advisor upon request and after consultation with the student. The student must arrange for one of these other committee members to be the "second reader" of the thesis. The second reader will carefully review the thesis with the candidate. The student is responsible for arranging the date of the examination and notifying the Graduate Program Administrator at least two weeks prior to the date, and is responsible for distributing copies of the dissertation to the committee members — after it has been approved by the thesis advisor — at least two weeks before the examination. Failure to meet this latter deadline is a legitimate reason for any thesis committee member to postpone the examination.

Course Requirements
General Requirements
Sixty credit hours of courses are required, consisting of 30 hours of research in CHEM 8991, at least 15 hours in formal courses (see next section), and the remainder in other courses, such as summer courses, seminar courses, group meeting courses and research in CHEM 6901.

A minimum grade of B- is required in all courses counting for the PhD degree; students should also be aware that they must maintain a cumulative grade point average of 3.0 in all formal courses and an overall grade point average of 3.0, or they will be placed on academic probation. Students may also be placed on probation if they are not making satisfactory progress in their research. Probationary status must be removed within two semesters or a student will become ineligible to receive a PhD degree from the Department of Chemistry. Students on probation will not have a high priority for financial support.

A degree plan of courses taken and yet to be taken must be filed with the Graduate School by the end of the student's third semester.

Selection of Formal Courses
All students will be required to take a minimum of 15 credit hours of formal courses. Formal courses are regularly scheduled, examined and graded; courses such as summer courses, seminar courses, group meeting courses and research in CHEM 6901 are not considered formal courses. Each student's program plan for coursework must be approved by the student's research advisor and the departmental graduate advisor. These formal courses must be approved prior to the end of the second semester, and students are encouraged to complete formal course requirements within their first three semesters.

Transfer of Credit
Up to 10 credit hours of graduate-level, formal coursework may be transferred from another higher education institution, subject to demonstrated proficiency in the subject(s) and written approval by the graduate advisor. Forms for this purpose can be obtained from the Graduate Program Administrator.

Formal Application of Admission for Candidacy for the PhD Degree
All students must submit a formal application for admission to candidacy for the PhD degree by the end of the third semester on forms that can be obtained from the Graduate Program Administrator. This Graduate School requirement should be fulfilled even though students have not completed all their formal coursework. After filling in the form indicating graduate courses taken and to be taken, it should be approved and signed by the student's research advisor and then the graduate advisor.

PhD students shall have passed their Cumulative Exams and the Oral Comprehensive Examination before they may be admitted to candidacy for the PhD degree. Students should note that the approved research proposal must be filed in order for a student to be advanced to candidacy.

Research Requirements
The results of a completed research program are submitted as a thesis for the final examination described above. Some students may pursue their PhD research in a laboratory outside of the department (e.g., JILA, NOAA, etc.) with the approval of the graduate advisor. In this case, the student must find a surrogate advisor in the department who agrees to monitor the activity of the student. It is recommended that meetings between the surrogate advisor, student and day-to-day advisor be frequent, perhaps in the form of a group meeting.

Time Limit
Students should note the time limit specified in the Graduate School rules: "All doctoral students are expected to complete all degree requirements within six years from the date of the start of coursework in the program." Information on extensions is available in the Doctoral Degree Requirements (p. 1046) section.

Classics
The Department of Classics is home to one of the most vibrant programs at the University of Colorado Boulder. Students at every level in the department are challenged to acquire a set of skills in the analysis and
presentation of diverse forms of evidence that stand to serve them in their daily, civic and professional lives.

The field of Classics is multicultural; it involves the study of the civilizations of ancient Greece and Rome, but also of the many peoples with whom the Greeks and Romans interacted in central and eastern Europe, north Africa, Egypt and the Middle East.

The field of Classics is interdisciplinary because faculty and students in the department cross the boundaries of literature, philosophy, material and visual culture, history and religion to study the world of antiquity. Classics also covers area studies because of the broad sweep of the Mediterranean basin and the regions that border it that our field encompasses. The department offers courses in language and literature, ancient history, philosophy, and art and archaeology within several programs of study at the undergraduate and graduate levels.

Course codes for this program are CLAS, GREK and LATN.

Master's Degree

- Classics - Master of Arts (MA) (p. 1146)

Doctoral Degree

- Classics - Doctor of Philosophy (PhD) (p. 1148)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

CLAS 5021 (3) Athens and Greek Democracy
Studied Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and HIST 4021
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5031 (3) Alexander the Great and the Rise of Macedonia
Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and HIST 4031
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History
CLAS 5041 (3) Classical Greek Political Thought
Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and HIST 4041 and PHIL 4210
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5061 (3) Twilight of Antiquity
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4061 and HIST 4061 and HIST 5061
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5071 (3) Seminar in Ancient Social History
Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and HIST 4071
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5081 (3) The Roman Republic
Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and HIST 4081
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5091 (3) The Roman Empire
Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and HIST 4091
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 5099 (3) Ancient Greek Sculpture
Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4099, ARTH 4099 and ARTH 5099
Grading Basis: Letter Grade

CLAS 5101 (3) Greek and Roman Slavery
Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4101 and HIST 4101

CLAS 5109 (3) Ancient Italian Painting
Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4109 and ARTH 4109 and ARTH 5109
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5110 (3) Greek and Roman Epic
Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and HUMN 4110
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5119 (3) Roman Sculpture
Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4119 and ARTH 4119 and ARTH 5119
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology
CLAS 5120 (3) Greek and Roman Tragedy
Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and HUMN 4120
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5129 (3) Aegean Art and Archaeology
Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4129 and ANTH 4129 and ANTH 5129 and ARTH 4129
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5130 (3) Greek and Roman Comedy
Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and HUMN 4130
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5139 (3) Greek Vase Painting
A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4139 and ARTH 4139 and ARTH 5139
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5140 (3) The Greek and Roman Novel
Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genre of Greek prose fiction. Ancient texts in English translation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and HUMN 4131
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5149 (3) Greek Cities and Sanctuaries
Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and ARTH 4149
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5159 (3) Hellenistic Art and Archaeology
Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5189
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology
In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and ARTH 4169 and ARTH 5169
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5179 (3) City of Athens
Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periklean period, considering ways in which it developed from earlier times and influenced later ones in Athens.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5179
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5189 (3) City of Rome
Explores in detail the architecture, sculptures, coins, frescoes and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.
Equivalent - Duplicate Degree Credit Not Granted: ARTH 5189
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5199 (3) Roman Architecture
Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and ARTH 4199
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology
CLAS 5209 (6) Classical Archaeological Field Methods
Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and ARTH 4209
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.
Additional Information: Departmental Category: Art and Archaeology

CLAS 5229 (3) Ancient Egyptian Art and Archaeology
Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4229 and ARTH 4229 and ARTH 5229
Additional Information: Departmental Category: Art and Archaeology

CLAS 5269 (3) Art and Archaeology of the Ancient Near East
Examines civilizations of the Iran-Iraq region and Anatolia from the rise of urbanism in Mesopotamia through the era of the first ‘world empire,’ Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of power and communication. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity, trade, religion, gender, identity and roles of artists. May be repeated twice for credit if the topic is different.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 5269 and ARTH 4269 and ARTH 5269
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

Departmental Category: Asia Content

CLAS 5761 (3) Roman Law
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: CLAS 4761 and HIST 4761 and HIST 5761
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

Departmental Category: Ancient History

CLAS 5840 (1-3) Graduate Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 6109 (3) Topics in Critical Theory and Ancient Art and Archaeology
Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 6952 (1-6) Master’s Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Classical Philology

CLAS 7011 (3) Seminar in Ancient History
Examines topics in ancient Greek and Roman history at an advanced seminar level.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Ancient History

CLAS 7012 (3) Graduate Seminar
Topic specified in online Schedule Planner.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Classical Philology

CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology
Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 7840 (1-3) Graduate Independent Study
No Greek or Latin required.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Art and Archaeology

CLAS 8992 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Additional Information: Departmental Category: Classical Philology

GREK 5013 (3) Topics in Greek Prose
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).
Equivalent - Duplicate Degree Credit Not Granted: GREK 4013
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

GREK 5023 (3) Topics in Greek Poetry
Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).
Equivalent - Duplicate Degree Credit Not Granted: GREK 4023
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek
Grek 5093 (3) Survey of Greek Literature
Greek literary history in ancient Greek from Homer to the Hellenistic age.
Equivalent - Duplicate Degree Credit Not Granted: Greak 4093
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

Grek 6003 (3) Graduate Reading
Author or topic specified in the online Schedule Planner.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

Grek 6843 (1-3) Graduate Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

Grek 7013 (3) Graduate Seminar in Greek Literature
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Greek

Latn 5014 (3) Topics in Latin Prose
Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).
Equivalent - Duplicate Degree Credit Not Granted: Latn 4014
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 5024 (3) Latin Prose Composition
Reviews grammar and syntax. Introduces Latin prose style and composition. Formerly CLAS 5024.
Equivalent - Duplicate Degree Credit Not Granted: Latn 4024
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 5044 (3) Topics in Latin Poetry
Author or topic in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).
Equivalent - Duplicate Degree Credit Not Granted: Latn 4044
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 5084 (3) Survey of Roman Literature Part 2: Imperial
Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.
Equivalent - Duplicate Degree Credit Not Granted: Latn 4084
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 5094 (3) Survey of Roman Literature Part 1: Republican to Augustan
Introduces Roman literary history from its origins to the 30s BCE. Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.
Equivalent - Duplicate Degree Credit Not Granted: Latn 4094
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 5404 (3) Special Project: Teaching
Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Formerly CLAS 5404.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 5824 (3) Latin Teaching Methods: Open Topics
Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.
Equivalent - Duplicate Degree Credit Not Granted: Latn 4824
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 6004 (3) Graduate Reading
Author or topic specified in the online Schedule Planner. Formerly CLAS 6004.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Latn 6844 (1-3) Graduate Independent Study
Formerly CLAS 6844.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Latin

Classics - Master of Arts (MA)
Candidates will choose one of the following five concentrations: (1) Greek, (2) Latin, (3) Classical Art and Archaeology, (4) Classical Antiquity, or (5) Teaching of Latin.

It is expected that students opting for the teaching of Latin either have achieved accreditation at the secondary level or are planning to do so through the School of Education. The MA degree alone does not satisfy the state requirements for certification.

For more information, visit the department's Graduate Degrees in Classics (http://www.colorado.edu/classics/graduate/graduate-degrees-classics/) webpage.

Bachelor's–Accelerated Master's Degree Program
Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Classics - Bachelor of Arts (BA) (p. 229).

Requirements
The degree requirements listed here are subject to change. Students wishing to pursue graduate work in classics should visit the department
website (https://www.colorado.edu/classics/graduate/) for the most up-to-date degree requirements.

Students must complete 30 credit hours of graduate (5000 level or above) coursework, at least 21 of which must be taken at CU Boulder. At least 24 credit hours of coursework must be taken in Classics; courses outside the department must be approved by the Associate Chair for Graduate Studies. Students may earn the MA degree in classics through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (http://www.colorado.edu/graduateschool/academics/graduation-requirements/) webpage).

Students will meet with the Associate Chair for Graduate Studies at least twice a year to guarantee that they are on track to meet these requirements.

**Electives**
The following is a comprehensive list of classics graduate courses, any of which can serve as electives depending on concentration.

<table>

**Concentrations**

Students may earn an MA in classics with a concentration in one of the following options below.

**Greek or Latin**

**Plan I**

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 18 hours in Greek and/or Latin.
  - 6-9 hours of student’s choice (including classes outside of the department, in consultation with the graduate advisor).
  - 4-6 hours of thesis credit.

- **Thesis** (to be completed during 4th semester of graduate study)

- **Comprehensive Examination** (upon submission of thesis): 4 hour written examination, consisting of translation and analysis of texts in the major language. This will be followed by a one-hour oral examination based upon the thesis. The translation examination will consist of two out of three prose passages and two out of three verse passages for a total of c. 100 lines. All passages will be drawn from the relevant (Greek or Latin) MA reading list. Students may fail the exam once.

**Plan II**

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in eliminating the 4-6 thesis hours and requiring instead 21 hours of Greek and/or Latin (5000-level or above) and 9 hours of the student’s choice. The written portion of the Comprehensive
Examination is the same as in Plan I; the oral portion of the exam covers the range of Greek or Latin literature represented by the reading list and tests the candidate’s general knowledge of the primary sources and literary history.

Classical Antiquity

Plan I

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
  - 6 hours of Ancient History or Classical Archaeology
  - 6 hours of Greek and/or Latin
  - 12-15 hours of student’s choice
  - 4-6 hours of thesis credit
- Thesis (to be completed during 4th semester of graduate study)
- Comprehensive Examination (upon submission of thesis): 3 hours of written examination on two of the following special fields: a) Greek history, b) Roman history, c) Roman art and archaeology, d) Greek art and archaeology, e) Greek religion and mythology, f) Roman religion and mythology, g) philosophy and political theory, h) Greek translation, or i) Latin translation, and one-hour oral examination based upon the thesis. The special field examinations of 90 minutes each are based on reading lists published in the Graduate Handbook and on the department’s website. The examination committee serves in an advisory capacity, in addition to setting and grading the written examinations. Students electing Greek or Roman archaeology as a special field must pass a thirty-minute slide identification exam before taking the Comprehensive Examination.

Plan II

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient history or classical archaeology for the 4-6 thesis hours of Plan I. The written portion of the Comprehensive Examination is the same as in Plan I (as above), except that the oral examination focuses on understanding of theories, methods, and material culture gained through coursework and the reading lists rather than a thesis.

The faculty strongly recommend that students planning to apply for PhD programs in classical archaeology attain graduate-level proficiency in both Greek and Latin. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

Teaching of Latin

Plan II only

Note: Students entering the MA in classics with a concentration in the teaching of Latin program who have not yet received teaching certification at the secondary level are encouraged to do so through the School of Education (https://www.colorado.edu/education/). Classes in the program can be taken concurrently with classes in the School of Education. Generally, it takes three years to fulfill the requirements of both qualifications, if they are embarked upon concurrently. The MA in classics alone does not satisfy the state’s requirements for certification. Many students elect to pursue certification after completing the degree. Students should contact the Office of Student Services in the School of Education for further information about teaching certification. For information about licensure through the School of Education, see the Secondary Latin Teacher Licensure Program Form (https://www.colorado.edu/classics/sites/default/files/attached-files/pba_edit_9.27.2016.pdf).

- A minimum of 30 hours of 5000-level credit or above, to be distributed as follows:
  - 12 hours of Latin
  - 3 hours of workshop in Latin Teaching Methods.
  - 3 hours of Roman History
  - 9 hours of student’s choice
  - 3 hours of Special Teaching Project covering the planning, teaching, and evaluation of a sequence of approximately 10 to 15 lessons.
- Special Teaching Project (to be completed during the 4th semester of graduate study). This may be extended if the student is pursuing teaching certification concurrently.
- Comprehensive Examination (upon submission of Special Project): A three hour written Latin translation examination, and a one-hour oral comprehensive examination on teaching methods and the special project.

Classics - Doctor of Philosophy (PhD)

The PhD in classical languages and literatures is founded on mastery of Greek and Latin, develops the student’s ability to pursue independent scholarly research through seminars and advanced work on special topics, and culminates with the dissertation.
Students take courses and seminars on major ancient authors and genres, Greek and/or Latin prose composition, and such special topics as literary criticism, epigraphy, paleography and numismatics.

For more information, visit the department's Doctor of Philosophy in Classics (http://www.colorado.edu/classics/graduate/graduate-degrees-classics/phd/) webpage.

Requirements
Candidates for the PhD in classics must meet the following requirements:

1. A minimum of 42 credit hours of coursework at the 5000 level or above (excluding thesis and accelerated courses). Coursework completed in the MA program at the University of Colorado, or up to 21 credit hours of graduate credit transferred from another institution, may be applied toward this requirement. Courses should be distributed as follows:
   a. Four 7000-level graduate seminars (at least one each in Greek and Latin).
   b. Two courses in ancient history and/or classical archaeology.
   c. One course in either Greek or Latin prose composition.
   d. Two courses in special fields such as epigraphy, law, linguistics, literary theory, medieval studies, palaeography, papyrology, philosophy or religion, as approved by the associate chair for graduate studies.

2. A minimum of 30 credit hours of doctoral dissertation with no more than 10 of these credit hours in any one semester. No more than 10 dissertation credit hours may be taken preceding the semester of taking the oral comprehensive examination. Up to 10 credit hours may be taken during the semester in which the student passes the comprehensive examination.

3. A reading knowledge of German and one other modern foreign language (normally Italian or French). Proficiency is tested by a one-hour written translation test using a dictionary. Students may take a foreign language exam at any time by arrangement with the associate chair for graduate studies. Students are encouraged to pass both modern language exams before the end of the second semester in the PhD program.

4. Preliminary Examinations in Greek and Latin. Two written examinations of four hours each, each consisting of translation and analysis of texts. The translation portion of each exam will consist of two out of three prose passages and two out of three verse passages for a total of about 100 lines. All passages will be drawn from the PhD reading list. Each written examination will be followed by a one-hour oral examination that covers the range of Greek or Latin literature represented by the reading list and tests the candidate’s general knowledge of the primary sources and literary history. There will be two administrations of each exam per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student’s chosen specialization, which should coincide with the student’s intended dissertation topic. Students are encouraged to complete these exams by the end of their fourth semester in the PhD program.

5. Comprehensive Examination. Two written examinations of three hours each on two topics or authors, chosen in consultation with faculty members selected by the student and approved by the graduate committee, to be chosen from the following broad areas: language and literature, ancient history, archaeology, philosophy or religion. In selecting the topics for these examinations, students are required to demonstrate balance in the fields of Greek and Roman culture, as determined by the graduate committee. The written comprehensive examinations will be administered twice per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student’s chosen specialization, which should coincide with the student’s intended dissertation topic. Students are encouraged to complete these exams by the end of their fourth semester in the PhD program.

6. Dissertation Prospectus. To be approved as described in the PhD requirements, preferably by the end of the fifth semester in the PhD program.

7. Dissertation. To be completed by the end of the tenth semester in the PhD program.

Cognitive Science

Cognitive Science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of Cognitive Science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth markets. While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Cognitive Science - Doctor of Philosophy (PhD) (p. 1151)

Certificates

- Cognitive Science - Graduate Certificate (p. 1250)
- Human Language Technology - Graduate Certificate (p. 1252)

Faculty

Cognitive Science

Cognitive Science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of Cognitive Science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education, and multimedia services.

The Institute of Cognitive Science (ICS) currently offers two graduate certificate programs: one has a general science focus, the other focuses on human language technology. The cognitive science academic certificate programs are interdisciplinary programs for graduate students in the following departments (see the undergraduate Cognitive Science (p. 230) page for certification at the undergraduate level):

- Psychology & Neuroscience
- Philosophy
- Linguistics
- Education
- Speech, Language and Hearing Sciences
- Computer Science
- Architecture, Planning and Design (Denver Campus)

- Information Science
- Integrative Physiology

For more information, visit the Institute of Cognitive Science (https://www.colorado.edu/ics/graduate-programs/) website or call Donna Caccamise at 303-735-3602.

Cognitive Science - Doctor of Philosophy (PhD)

The Institute of Cognitive Science Academic Program includes a combined PhD degree between cognitive science and a core discipline, as well as a combined PhD plan of study tailored for students interested in cognitive neuroscience. These programs are administered by CU Boulder’s Institute of Cognitive Science (ICS).

Graduate students in cognitive science are admitted to graduate programs in participating departments that have ICS faculty, and must meet the requirements for admission and degree completion in their home department.

Students wishing to attain a degree or certificate in cognitive science must formally apply to the director of academic programs of ICS. To be admitted, they must be a student affiliate of ICS, which requires being a graduate student in good standing in a member department, and they must be sponsored by an ICS faculty fellow. Students who enter the Graduate School without a master's degree may be admitted to the program upon completion of their first year of study; students with a master's degree may be admitted during their first year.

The degree and certificate programs in cognitive science require students to demonstrate acceptable performance in interdisciplinary coursework and courses outside their home department. The courses must be offered by the following departments: Computer Science; Education; Integrative Physiology; Linguistics; Philosophy; Information Science; Psychology and Neuroscience; Speech, Language, Hearing Sciences; Architecture and Planning; or a department in which there is an ICS faculty fellow.

Details about requirements for the degree and certificate programs can be obtained through the director of academic programs for ICS or by contacting the ICS main office.

Requirements
Combined PhD Requirements
Students must complete 30 credit hours of cognitive science courses, including 9 credit hours of required core courses and 21 credit hours of elective courses.

For more program information, visit the institute’s Cognitive Science Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/) webpage.

Cognitive Neuroscience Combined PhD

For a list of specific available courses, visit the institute’s Course Catalog (http://www.colorado.edu/ics/graduate-programs/course-catalog/) webpage.

Interdisciplinary Thesis
The original contributions of the dissertation research should exploit state-of-the-art methods from the perspective of at least two disciplines. Students are encouraged to have their doctoral research co-supervised by two ICS fellows representing different disciplines.

Dissertation
Students must complete 30 hours of dissertation research.

Triple PhD Requirements
Students must complete 28–34 credit hours, including 11–14 credit hours of required core courses, 6–9 credit hours of depth courses and at least 11 credit hours of courses in a related discipline specialization.

For a list of specific available courses, visit the institute’s Course Catalog (http://www.colorado.edu/ics/graduate-programs/course-catalog/) webpage.

Comprehensive Examination
In accordance with the graduate school requirements, students will be required to take a comprehensive exam, which they must pass in order to advance to doctoral candidacy status. Successful completion (grade of B- or better) of the Introduction to Neuroscience I (NRSC 5100) and Introduction to Neuroscience II (NRSC 5110) courses will fulfill the neuroscience component of the comprehensive exam.

In addition, the student must pass a comprehensive exam in their area of specialization. The format of this specialty comprehensive exam will be determined by the student’s advisor and will be appropriate for the advisor’s department/program of affiliation, but must also be interdisciplinary in nature to fulfill the cognitive science component of the comprehensive exam.
**Thesis**

All cognitive neuroscience PhD students will be required to complete a doctoral thesis with a primary cognitive neuroscience focus. The thesis/dissertation will represent original state-of-the-art research of quality suitable for publication in a reputable scientific journal. The student’s thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. In addition, the student’s thesis committee must include at least one additional neuroscience faculty member and one cognitive science faculty member from outside the student’s area of specialization. In accordance with the requirements of the Graduate School, the student’s committee must be comprised of a minimum of five faculty members that have graduate faculty appointments. The committee will be formed by the student’s advisor, upon approval of the slate of members by the academic directors of the neuroscience and cognitive science combined PhD programs.

**Dual Degree Program**

**Cognitive Science Combined PhD**

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a degree can significantly enhance a student’s academic knowledge and career choices. Review the course requirements, application for admission and program completion checklist for further information.

For more information, visit the institute’s Cognitive Science Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/) webpage.

**Triple Degree Program**

**Cognitive Neuroscience Combined PhD**

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science, neuroscience and their core discipline:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Architecture and Planning

Students interested in the combined PhD with cognitive science and neuroscience must meet course and thesis requirements. The student’s thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. To enroll in this triple degree, you must enroll in the neuroscience program and the cognitive science program.

For more information, visit the institute’s Cognitive Neuroscience Combined PhD (http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd/) webpage.

**Ecology and Evolutionary Biology**

The EBIO graduate program provides advanced training in a wide variety of biological disciplines ranging from biogeochemistry to community ecology to evolutionary genetics. The goal of the EBIO graduate program is to produce scientists, educators and citizens who are equipped with skills to build careers that advance knowledge about life on Earth. Graduates of the EBIO program are well-positioned to pursue a wide range of careers that include academia, science education, wildlife biology, conservation biology, resource management, environmental consulting and environmental law.

Our disciplinary strengths include behavior, ecology, genetics, morphology and systematics. Roughly half of the faculty focus on the adaptation and functioning of organisms in the context of environment, while the other half study higher levels of organization, including populations, communities and ecosystems. Our research programs have relevance for global change, conservation biology, and revealing fundamental mechanisms underlying the structural and functional adaptations of organisms.

Please contact ebiograd@colorado.edu for additional information.

Course code for this program is EBIO.

**Master’s Degree**

- Ecology and Evolutionary Biology · Master of Arts (MA) (p. 1157)

**Doctoral Degree**

- Ecology and Evolutionary Biology · Doctor of Philosophy (PhD) (p. 1158)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Professor; PhD, University of Kansas

Buchwald, Robert (https://experts.colorado.edu/display/fisid_148439/)
Instructor; PhD, University of Colorado Boulder

Carpenter, J. Harrison (https://experts.colorado.edu/display/fisid_115915/)
Senior Instructor; MS, Michigan Technological University

Clauset, Aaron (https://experts.colorado.edu/display/fisid_147554/)
Associate Professor; PhD, University of New Mexico

Corwin, Lisa A. (https://experts.colorado.edu/display/fisid_157940/)
Assistant Professor; PhD, University of California, Davis

Crumpacker, David W.
Professor Emeritus

Cundiff, Milford F.
Associate Professor Emeritus

Davies, Kendi F. (https://experts.colorado.edu/display/fisid_142304/)
Associate Professor; PhD, Australian National Univ (Australia)

Dee, Laura (https://experts.colorado.edu/display/fisid_166130/)
Assistant Professor; PhD, University of California, Santa Barbara

Demmig-Adams, Barbara (https://experts.colorado.edu/display/fisid_105649/)
Professor; Dr habil, University of Wurzburg (Germany)

Emery, Nancy Christine (https://experts.colorado.edu/display/fisid_156291/)
Assistant Professor; PhD, University of California, Davis

Evans, Luke M. (https://experts.colorado.edu/display/fisid_156753/)
Assistant Professor; PhD, Northern Arizona University

Fierer, Noah (https://experts.colorado.edu/display/fisid_142240/)
Professor; PhD, University of California, Santa Barbara

Flaxman, Samuel M. (https://experts.colorado.edu/display/fisid_145698/)
Associate Professor; PhD, Cornell University

Johnson, Pieter T.J. (https://experts.colorado.edu/display/fisid_143590/)
Professor; PhD, University of Wisconsin–Madison

Kane, Nolan Coburn (https://experts.colorado.edu/display/fisid_151238/)
Associate Professor; PhD, Indiana University Bloomington

Kelly, Caitlin (https://experts.colorado.edu/display/fisid_155528/)
Instructor; PhD, University of Colorado Boulder

Kociolek, John Patrick (https://experts.colorado.edu/display/fisid_145728/)
Professor; PhD, University of Michigan

Lewis, William M. Jr. (https://experts.colorado.edu/display/fisid_102314/)
Professor; PhD, Indiana University Bloomington

Li, Jingchun (https://experts.colorado.edu/display/fisid_157561/)
Assistant Professor; PhD, University of Michigan

Linhart, Yan B.
Professor Emeritus

Lynch, Carol B.
Professor Emeritus

Martin, Andrew (https://experts.colorado.edu/display/fisid_113238/)
Professor; Chair; PhD, University of Hawaii at Manoa

Mayer, Stephanie Susan (https://experts.colorado.edu/display/fisid_114948/)
Senior Instructor; PhD, University of California, Berkeley

McAdam, Andrew Graham (https://experts.colorado.edu/display/fisid_166624/)
Associate Professor; PhD, University of Alberta (Canada)

McCain, Christy (https://experts.colorado.edu/display/fisid_145010/)
Associate Professor; PhD, University of Kansas

McKenzie, Valerie J. (https://experts.colorado.edu/display/fisid_142951/)
Associate Professor, Associate Chair; PhD, University of California, Santa Barbara

Medeiros, Daniel Meulemans (https://experts.colorado.edu/display/fisid_145697/)
Associate Professor; PhD, California Institute of Technology

Melbourne, Brett Andrew (https://experts.colorado.edu/display/fisid_144966/)
Associate Professor; PhD, Australian National University

Mitton, Jeffry B. (https://experts.colorado.edu/display/fisid_101058/)
Professor; PhD, SUNY at Stony Brook

Monson, Russell K.
Professor Emeritus

Nichols, Harvey
Professor Emeritus

Quandt, Catherine Alisha (https://experts.colorado.edu/display/fisid_159414/)
Assistant Professor; PhD, Oregon State University

Resasco, Julian (https://experts.colorado.edu/display/fisid_153799/)
Assistant Professor; PhD, University of Florida

Safran, Rebecca J. (https://experts.colorado.edu/display/fisid_145518/)
Assistant Professor; PhD, Cornell University

Schmidt, Steve (https://experts.colorado.edu/display/fisid_103713/)
Professor; PhD, Cornell University
Courses

EBIO 5000 (1) EBIO Colloquia
All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology.
Repeatable: Repeatable for up to 2.00 total credit hours.

EBIO 5030 (3) Limnology
Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4030
Requisites: Restricted to graduate students only.

EBIO 5040 (3) Speciation
The process by which new species arise is fundamental to understanding life's diversity, with implications for how we define and protect species.
In this class, we will explore models of adaptive and non-adaptive speciation and how we test, find evidence for, and distinguish among these. Each class will include both a short lecture and discussion. Students will be able to choose and work on independent projects on any area of speciation research.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4040
Requisites: Restricted to graduate students only.
Recommended: Prerequisites EBIO 1220 and EBIO 3080.

EBIO 5050 (4) Fish Biology
Explores the tremendous diversity of this group, which includes eyeless catfish named after Satan and cast out of underground aquifers by artesian wells, loaches that cling to rocks in mountain torrents with fin-derived suction cups, lungfish in mud cocoons that metabolize their own muscles while waiting for the rains to return, degenerate male anglerfish that parasitize their mates in the blackness of ocean depths, and flying fish that glide above the surface of the open sea to escape the slashing bills of sailfish below. Lectures will cover form and function, evolution, the fossil record, reproduction and development, genetics, behavior, ecology, distribution, and conservation of fishes. The laboratory will stress fish identification, anatomy, and development.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4050
Requisites: Restricted to graduate students only.

EBIO 5060 (3) Landscape Ecology
Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4060
Requisites: Restricted to graduate students only.

EBIO 5080 (4) Freshwater Phycology
Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4080
Requisites: Restricted to graduate students only.

EBIO 5100 (3) Advanced Ecology
Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4100
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

EBIO 5120 (2-4) Advanced Ecology
Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4120
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 5150 (1-2) Techniques in Ecology
Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geocology.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4150
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
EBIO 5155 (3) Ecosystem Ecology
Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4155, ENVS 5155 and ENVS 4155  
Requisites: Restricted to graduate students only.  
Grading Basis: Letter Grade

EBIO 5190 (1) Diversity and Inclusion
Topics have included: implicit bias, privilege, inclusive pedagogy, inclusive hiring practices, inclusive mentoring, barriers facing undergraduate students, barriers facing graduate students, fairness of the GRE.  
Repeatable: Repeatable for up to 8.00 total credit hours.  
Requisites: Restricted to graduate students only.

EBIO 5240 (3) Advanced Topics in Animal Behavior
Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues.  
Recommended: Prerequisite EBIO 3240.

EBIO 5270 (3) Population Genetics
Provides an in-depth introduction to population genetics. Lectures, discussions and labs will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. While learning basic population genetic theory we will investigate current topics in the field and work with simulated and real data.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4270  
Grading Basis: Letter Grade

EBIO 5290 (4) Phylogenetics and Comparative Biology
Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4290  
Requisites: Restricted to graduate students only.  
Grading Basis: Letter Grade

EBIO 5320 (3) Current Topics in Evolutionary Biology
Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery.  
Requisites: Restricted to graduate students only.

EBIO 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest
Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a ‘biodiversity-in-crisis’ setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4340 and ENVS 4340 and ENVS 5340  
Recommended: Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.  
Grading Basis: Letter Grade

EBIO 5360 (3) Lifestyle Medicine
Student will self-select a semester-long personalized project for researching and learning about a topic they are passionate about in the context of the impact of environment and lifestyle on human health and wellbeing. Students will have continuous access to one-on-one instructor support and feedback, and credit will be given for completion of specific milestones throughout the semester.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4360

EBIO 5370 (3) Genetically Engineered Organisms
Explores the genetic engineering of microorganisms, fungi, plants, animals, coral reefs, and humans from the many demonstrated and anticipated benefits to the various concerns that have been raised by the explosive growth of research in this area. The course will be largely student-driven, in that each student will pursue different areas to research and present to the class. Students are encouraged to pursue a topic about which an interest and/or passion can be developed! Previously offered as a special topics course.

EBIO 5410 (4) Biological Statistics
Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4410  
Requisites: Required to graduate students only.

EBIO 5420 (3) Computational Biology
Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4420  
Grading Basis: Letter Grade

EBIO 5440 (4) Animal Developmental Diversity
Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilatarian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4440 and MCDB 4441 and MCDB 5441  
Requisites: Restricted to graduate students only.

EBIO 5460 (1-5) Special Topics
Familiarizes students with specialized areas of biology.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4460  
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.

EBIO 5500 (4) Plant Biodiversity and Evolution
Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.  
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4500
EBIO 5510 (4) Plant Anatomy and Development
Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4510

EBIO 5511 (3) Microbial Ecology
Aims to gain an understanding of the critical roles that microbes play in the biosphere, and why they play those roles. We start with with fundamental concepts (e.g. microbial physiology and evolution) and build up to an understanding of how the biosphere functions (e.g. biogeochemistry and nutrient dynamics at the ocean-sediment interface) by reading both current and classical literature in the field.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4511

EBIO 5520 (4) Plant Systematics
Explores principles and techniques in modern plant systematics from lichens and non-vascular plants to lycophytes, ferns, gymnosperms and angiosperms. Framework is evolutionary and ecological, with emphasis on taxonomy of major lineages and families of plants. No prerequisites, but coursework in evolutionary biology, genetics, phylogenetics and/or other botany classes is strongly encouraged.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4520

EBIO 5560 (4) The Lichen Biome
Focuses on lichens as biologically diverse hubs of interactions, and will cover numerous dimensions of diversity within the symbiosis (algae, bacteria, and ecological and evolutionary relationships therein) and beyond it (diversity of lichen symbioses in nature, their functions, and conservation).
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4560

EBIO 5600 (4) Evolutionary Ecology
Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4600

EBIO 5660 (4) Insect Biology
Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4660

EBIO 5700 (3) Quantitative Genetics
Explores how the differences at the DNA level impact variability within and among individuals, and how that variation is shaped by interactions with environments. Quantitative genetics covers a range of topics, but in this course we will focus on the methods and approaches to investigate complex traits, those influenced by many genes and environmental factors, emphasizing the evolutionary forces that shape variation. We will analyze real genetic data (human, plant, mouse, etc.), and prepare our findings as written manuscripts or oral presentations. Some familiarity with basic genetic principles is assumed. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4700

EBIO 5740 (3) Biology of Amphibians and Reptiles
Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4740

EBIO 5750 (4) Ornithology
Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4750

EBIO 5760 (4) Mammalogy
Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4760 and MUSM 5760

EBIO 5800 (3) Critical Thinking in Biology
Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4800
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

EBIO 5820 (1) Graduate Writing Seminar
Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Department enforced requisite, basic proficiency in English as a written language.

EBIO 5840 (1-6) Independent Study (Master's Level)
Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

EBIO 6000 (1) Seminar: Introduction to Biological Research
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5000

EBIO 4500 (1) Seminar: Introduction to Biological Research
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5000

EBIO 4660 (1) Seminar: Introduction to Biological Research
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5000

EBIO 5500 (1) Seminar: Introduction to Biological Research
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5000

EBIO 5740 (1) Seminar: Introduction to Biological Research
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5000

EBIO 5750 (1) Seminar: Introduction to Biological Research
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5000

EBIO 5760 (1) Seminar: Introduction to Biological Research
Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 5000
The EBIO department offers programs leading to the Master of Arts in Ecology and Evolutionary Biology – Bachelor of Arts (MA) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others. Modern laboratory facilities for graduate study are located in the Ramaley building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVIS) and the Departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Admission information is provided on the EBIO website (http://www.colorado.edu/ebio/graduate/ma-phd-programs/#MASTERS). International student applications are due by Dec. 1, and U.S. domestic applications by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test. Applicants are encouraged to communicate with potential faculty sponsors well before the application deadline. Applications for spring semester admission are not accepted. Students are required to have a bachelor’s degree in biology or an equivalent.

Bachelor’s–Accelerated Master’s Degree Program

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Ecology and Evolutionary Biology - Bachelor of Arts (BA) (p. 244).

Requirements

Degree Plans

Plan I: Thesis Option

The EBIO MA I program (with thesis) is intended to be a two year course of study that prepares students for admission to PhD programs, teaching positions or a variety of forms of employment as professional biologists. MA I students’ studies are focused on a research project culminating in a thesis. Prospective students are urged to consult with faculty advisors to determine whether application for the MA I or PhD program is more appropriate. Applications for the MA I program are considered on a competitive basis; the department only admits students for whom financial support is available. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000 level or above, including 4–6 hours of thesis credit. The thesis topic is presented to the thesis committee as a written research proposal in the second semester of the program, and the committee administers in the third semester an examination on general knowledge in ecology and/or evolutionary biology. The final examination consists of the thesis defense, which should be scheduled during the second year for full-time students.

Plan II: Non-Thesis Option

A non-thesis master’s degree is offered through the EBIO department’s MA II program for students interested in furthering their knowledge of ecology and/or evolutionary biology but not in graduate training.
Beyond the MA. This program is suitable for secondary school teachers and others whose career choices do not require a research thesis. Applicants are required to attain sponsorship from a faculty member prior to submitting application materials. Applicants are considered on a competitive basis; financial support is not guaranteed for MA II students. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000 level or above, including 4 credit hours of independent research leading to a paper to be presented to the faculty sponsor. An examination on general knowledge in ecology and/or evolutionary biology is administered by the advisory committee in the third semester, and this committee may also require a final oral examination.

Ecology and Evolutionary Biology - Doctor of Philosophy (PhD)

The EBIO department offers a doctor of philosophy (PhD) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others.

The PhD is a research degree, involving the production of a major piece of original research (the dissertation). The program is intended to be a five-year course of study that produces graduates who subsequently teach and conduct research at colleges or universities or hold research or leadership positions at other private or government institutions.

Students are expected to form a dissertation committee of five faculty members (including one from outside EBIO) after beginning their studies. This committee aids the student in designing a research program and choosing relevant coursework. In addition to the final examination upon completion of the dissertation, the dissertation committee administers an examination (typically in the third semester) on general knowledge in ecology and/or evolutionary biology and a comprehensive examination (typically in the fifth semester) on a written research proposal submitted by the student.

Modern laboratory facilities for graduate study are located in the Ramaley Biology building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Requirements

Admissions

International student applications are due by Dec. 1, and U.S. domestic applications are due by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test.

Course Requirements

A total of 30 credit hours of coursework must be taken, although independent study credit may be included in this total. In addition, a total of 30 credit hours of dissertation must also be taken. PhD students are required to teach for at least one academic year, typically as a teaching assistant for one of the many laboratory courses offered by the department.

Economics

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

Course code for this program is ECON.

Master’s Degree in Economics

The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

Doctoral Degree

- Economics - Doctor of Philosophy (PhD) (p. 1162)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahtman, Francisca Marie (https://experts.colorado.edu/display/fisid_144606/)

Associate Professor; PhD, Stanford University

Barham, Tania C.J. (https://experts.colorado.edu/display/fisid_140077/)

Associate Professor; PhD, University of California, Berkeley

Boileau, Martin (https://experts.colorado.edu/display/fisid_113872/)

Courses

**ECON 7010 (3) Microeconomic Theory 1**
This course applies mathematical methods and optimization theory to study the foundation of modern microeconomic theory. The topics covered include theory of demand, theory of the firm, choice under uncertainty, equilibrium under alternative market structures, and welfare economics. Instructor consent required.

**Additional Information:** Departmental Category: Theory and History of Economic Thought

**ECON 7020 (3) Macroeconomic Theory 1**
This course applies the mathematical methods of continuous-time and discrete-time dynamic optimization theory and dynamical systems to study the foundation of modern macroeconomic theory. The topics covered include economic growth, the business cycle, and the determinants of consumption and investment. Instructor consent required.

**Additional Information:** Departmental Category: Theory and History of Economic Thought
ECON 7030 (3) Microeconomic Theory 2
Continuation of ECON 7010. Develops mathematical foundations of game theory and models of asymmetric information. Analyzes classical game-theoretic settings using analytical optimization techniques with emphasis on methodology, equilibrium concepts, theory of adverse selection and moral hazard, and principal-agent framework. Instructor consent required.
Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7040 (3) Macroeconomic Theory 2
Continuation of ECON 7020. Develops the mathematical foundations of dynamic optimization and applies numerical methods to study dynamic and stochastic general equilibrium macroeconomic models. Topics covered include the business cycle, real and nominal rigidities, search and matching frictions, and financial frictions. Instructor consent required.
Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7818 (3) Introduction to Probability and Asymptotic Theory
Introduces fundamental concepts and results from probability and asymptotic theory needed for a rigorous study of the limiting behavior of estimators and test statistics that emerge from the study of statistical/econometric models. Topics include the construction of probability measures, abstract integration, conditional expectation, stochastic convergence, laws of large numbers and central limit theorems. Instructor consent required.
Additional Information: Departmental Category: Quantitative Economics

ECON 7828 (3) Econometrics
An introduction to estimation and inference for linear and nonlinear parametric models of regression, including least squares, method of moments and maximum likelihood estimation. Instructor consent required.
Additional Information: Departmental Category: Quantitative Economics

ECON 8010 (3) Economics of Risk and Time
Develops the mathematical tools necessary to analyze optimal decision-making by individual households and firms over time and in the face of risk. This is a building block for general equilibrium models, statistical models of behavior and theoretical analyses of economic policy.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 8020 (3) Business Cycle Theory and Monetary and Fiscal Policy
Develops key skills for understanding monetary, fiscal and financial stability policy: (a) deep mathematical analysis of business cycle models, including the mechanisms within models, their comparative statics and comparative dynamics, and the difference parameter values make to the behavior of business cycle models, (b) comparing model predictions to statistical data analyses, and (c) understanding real-world policy debates.
Requisites: Restricted to graduate students only.

ECON 8030 (3) Advanced Economic Theory
This course introduces students to recent advances in economic theory. Topics include foundations of price theory, pass-through, price discrimination, differential pricing, non-linear pricing, vertical price control, imperfect information, platform markets, and consumer search. The course will focus on developing the intuition and skills to formulate research questions and to build/analyze economic models. Formerly ECON 7050.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 809 (3) Economics Research Methods Workshop 1
Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8219 (3) Economics Research Methods Workshop 2
Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8221 (3) Public Economics 1
This course studies the theory of public economics. It presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence. Emphasis will be placed on optimization and the development of mathematical models required for public policy analysis. The course can be taken independently or in conjunction with 8221 to make a two-semester sequence in public economics.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Public Economics

ECON 8413 (3) International Economics 1
This course introduces students to the theories of international trade using an optimization approach. We discuss core trade theories and their empirical applications. We also explore recent advances that focus on the firm’s decision to export and investigate the role of heterogeneity in firm productivity on patterns of trade. The course can be taken independently or in conjunction with 8433 to make a two-semester sequence in international economics.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: International Trade and Finance

ECON 8423 (3) International Macroeconomics
Explores recent advances in international macroeconomics and international finance. The course focuses on the application of the mathematical tools and quantitative analysis of dynamic macroeconomics to examine the role of international financial markets for the behavior of the current account, the international transmission of the business cycle, and the determination of exchange rates.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: International Trade and Finance
ECON 8433 (3) International Economics 2
This course focuses on advanced quantitative topics in international economics. The course covers topics in applied econometrics and quantitative models to analyze income growth and inequality, demographic change, industrialization, international trade, capital and labor mobility, infrastructure, and technological change. The course can be taken independently or in conjunction with ECON 8545 to make a two-semester sequence in economic history.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Economic History

ECON 8534 (3) History of Economic Growth - US
This course covers topics in the economic history of the United States. The course focuses on the tools of modern empirical economics to understand the growth of the American economy. This includes using applied econometrics and quantitative models to analyze income growth and inequality, demographic change, industrialization, international trade, capital and labor mobility, infrastructure, and technological change. The course can be taken independently or in conjunction with ECON 8545 to make a two-semester sequence in economic history.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Economic History

ECON 8535 (3) Environmental Economics 1
This course considers the allocation of society’s scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation. Incorporates static and dynamic optimization techniques to formally model environmental and resource outcomes and policy instrument choice. The course can be taken independently or in conjunction with ECON 8545 to make a two-semester sequence in environmental economics.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8545 (3) Environmental Economics 2
This course provides advanced study of current research in environmental economics and explores opportunities for new research. Instruction in empirical research including experimental design, numerical analysis, econometric and statistical approaches. Theoretical analysis of economic problems including optimization, cost/benefit analysis and economic modeling of current environmental policies. The course can be taken independently or in conjunction with ECON 8535 to make a two-semester sequence in environmental economics.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8676 (3) Labor Economics 1
This course focuses on 1) deriving testable and quantifiable hypotheses from mathematical economic models relating to prominent policy-relevant issues in the labor market; 2) ascertaining the statistical patterns that permit identification of the parameters that govern these models; and 3) forming estimators that permit statistical inference of these parameters. The models considered are drawn from a variety of labor market contexts: static and dynamic labor supply and demand decisions, human capital investment decisions, spatial equilibrium in labor markets, and worker-firm matching with heterogeneous workers and firms.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Labor and Human Resources

ECON 8686 (3) Labor Economics 2
This course focuses on using state-of-the-art econometric techniques, often identified by natural experiments, to 1) quantify causal effects predicted by economic models of the labor market and 2) evaluate the causal impact of labor market policies. Topics include the economics of immigration, the minimum wage, the economics of discrimination, and information constraints and bounded rationality in human capital investment. As a final project, students gather data and perform initial statistical analysis to determine whether a proposed data analysis strategy will successfully lead to a credible answer to a novel causal question in labor economics.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Labor and Human Resources

ECON 8747 (3) Industrial Organization 1
This course studies the theory of industrial organization. Topics include research method in industrial organization, monopoly, oligopoly competition, vertical organization, markets with search and switching costs, online platforms, and innovation economics. Emphasis will be placed on the development of mathematical models for industry and policy analysis. The course can be taken independently or in conjunction with ECON 8757 to make a two-semester sequence in industrial organization.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Industrial Organization

ECON 8757 (3) Industrial Organization 2
This course introduces the fundamental quantitative and econometric methods required for empirical research in industrial organization. The emphasis is on using theory to construct testable hypotheses and specifying empirical models for estimating structural parameters. Topics include differentiated products, market power, collusion, merger analysis and regulation. The course can be taken independently or in conjunction with ECON 8747 to make a two-semester sequence in industrial organization.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Industrial Organization

ECON 8764 (3) History of Economic Development
This course covers topics in economic development. It focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, human capital development and long-run effects, environment and health, labor markets and migration, social capital and networks, micro-credit, and women's empowerment. The course can be taken independently or in conjunction with ECON 8784 to make a two-semester sequence in economic development.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Economic Development
ECON 8784 (3) Economic Development 2
Focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, distribution of resources within households, environmental and natural resources, as well as migration and gender issues relevant for developing countries. The course can be taken independently or in conjunction with 8774 to make a two-semester sequence in economic development.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Economic Development

ECON 8828 (3) Econometric Theory 1
Estimation and inference for micro-econometric models. Topics may include semi- and non-parametric econometric/statistical models; Bayesian estimation and inference; models for high dimensional data; simulation-based estimation methods. The course can be taken independently or in conjunction with 8838 to make a two-semester sequence in econometric theory.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Quantitative Economics

ECON 8838 (3) Econometric Theory 2
Estimation and inference for models for dependent data. Topics may include linear and non-linear time series, spatial and network models. The course can be taken independently or in conjunction with 8838 to make a two-semester sequence in econometric theory.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Quantitative Economics

ECON 8848 (3) Applied Microeconometrics
Presents a "user's guide" to conducting empirical research and program evaluation in applied microeconomics. Begins with a primer on an industry-standard econometric software package and a review of linear regression as a statistical technique for summarizing conditional mean relationships in data. Discusses multiple advanced econometric techniques as alternative research strategies including matching methods, difference-in-differences, panel data methods, IV, and regression discontinuity. Concludes with a research project requiring a replication and extension of an existing published paper that uses one or more of these statistical techniques.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Quantitative Economics

ECON 8858 (3) Computational and Structural Estimation Methods
Presents a data-oriented introduction to conducting quantitative research in computational economics. Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or structural estimation techniques, and employs the resulting models to conduct policy simulations.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Quantitative Economics

ECON 8909 (1-3) Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours.
Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8999 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Independent Study and Other Courses

Economics - Doctor of Philosophy (PhD)
Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

Master's Degree in Economics
The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

Requirements
Admission Requirements

An applicant for admission as a regular degree student must:

- Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for such a degree and equivalent to the degree given at this university. The undergraduate GPA must be at least 2.75 (2.00=C).
- Have completed intermediate microeconomic and macroeconomic theory courses, 6 credit hours of calculus at the university level or equivalent, and statistics.
- Submit Graduate Record Examination (GRE) scores for aptitude (verbal and quantitative). International applicants whose native language is not English must also submit a TOEFL score with a speaking component, even if they have attended college in an English-speaking country.
- Arrange for the submission of three letters of recommendation.

Graduate study in economics is quantitative and analytical. Students should be comfortable with basic calculus (derivatives and integration), linear algebra, matrix algebra and basic statistics.

The university deadline for international applications is Dec. 1 for the following fall semester. The department encourages international applicants to comply with this deadline. Late applications may be considered; however, they may be at a disadvantage with respect to the award of financial aid. Domestic applicants who wish to be considered for financial assistance should apply by Jan. 15. Students must begin the program in a fall semester.

Degree Requirements

Students are expected to complete all requirements for the PhD degree within five years of entering the program (the maximum time allowed by the Graduate School is six years). The schedule of required courses is centered on this expectation. Failure to make timely and satisfactory
progress toward the degree may result in loss of financial assistance or dismissal from the program.

**Course Requirements**

1. Prior to beginning the program, students must demonstrate an acceptable degree of competence in differential and integral calculus and optimization techniques. (This requirement is in addition to the six credit hours of calculus required to apply to the program.) Such competence is normally demonstrated by taking ECON 7800 (an intensive, three-week preparatory course offered immediately prior to each fall semester) and passing its final examination with a grade of B- or better. Students who fail this examination must enter into extensive consultation with the director of graduate studies (DGS). Other methods by which the required competence may be demonstrated:
   - obtain written approval from the DGS to waive the requirement for ECON 7800 due to sufficient mathematical preparation in prior studies, or
   - pass the final examination in ECON 7800 at a level of B- without taking the course.

2. There are seven core courses in the PhD program: ECON 7010, ECON 7020, ECON 7030, ECON 7040, ECON 7050, ECON 7818 and ECON 7828. Course requirements beyond the core courses include:
   - Six elective courses at the 8000 level. Basic fields are econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics. Ordinarily, a student would take two elective courses in a basic field of specialization in preparation for a dissertation.
   - 6 credit hours in a research colloquium.
   - At least 30 credit hours of dissertation.

3. At least four of the core courses must be taken on the Boulder campus. Courses transferred for credit must be approved by the DGS. After entry into the PhD program, all remaining courses must be taken on the Boulder campus.

4. All courses for PhD credit taken on the Boulder campus must be passed with a grade of B- or better. A student who receives a grade of C+ or lower in a core course must retake that course the following academic year.

5. No more than 12 credit hours (exclusive of dissertation credit hours) from a single faculty member may be counted toward PhD requirements. Independent study is allowed only to satisfy elective requirements. No more than 6 credit hours of independent study may be applied to the PhD degree and no more than 3 credit hours of independent study may be taken from a single faculty member. In consultation with the DGS, students may choose to take up to two graduate offerings in other departments as elective courses.

6. See the Plan of Study tab for course recommendations.

**Preliminary Examinations**

Written preliminary examinations in microeconomic theory, macroeconomic theory and econometrics must be taken in the examination period following the successful completion of core courses in these areas. Under most circumstances this period would be in August prior to the second year. An examination attempted and failed must be taken again and passed in the next examination period. A second failure results in dismissal from the program, subject to appeal to the GCRC under extraordinary circumstances. In no case are attempts beyond the third granted.

Students who have failed any of the core courses are ineligible to take the preliminary examination in the area of failure. These students must retake the failed course(s) in the following year and attempt the relevant preliminary examination in the first scheduled examination period after they pass.

Students who fail to pass all three preliminary examinations within two-and-one-half years of beginning the PhD program must exit the program.

**MA Degree**

An MA degree will be awarded to students who have successfully completed all core courses in the PhD program, completed 30 hours of graduate credit with a 3.00 GPA and performed satisfactorily within two attempts on at least two out of three preliminary examinations.

**Third-Year Research Colloquium**

Third-year students are expected to register for 3 credit hours per semester in the research colloquium, which will meet weekly under the direction of a faculty member. The purpose of the colloquium is to provide students the opportunity and guidance to complete the required third-year paper and to facilitate progress toward the dissertation stage.

**Comprehensive Examination**

Students must take an oral comprehensive examination before admission to PhD candidacy. This examination may occur either at the time of the student’s research presentation in ECON 8219 or at a later date, and will encompass the materials in the presentation and all relevant coursework completed by the candidate. Students who fail this comprehensive examination will be given a second chance during the following semester. For those students for whom the presentation in ECON 8219 does not serve as the oral comprehensive examination, a separate oral examination must be scheduled before admission to candidacy. Students who do not pass this exam by the end of their fifth year must exit the program.

**Admission to Candidacy and Dissertation Requirements**

Students are formally admitted to candidacy for the PhD degree after completing all course requirements and all preliminary and comprehensive examinations and after earning four semesters of residency (see the Doctoral Degree Requirements (p. 1045) section of this catalog for details). After admission to candidacy, students must register each fall and spring semester for dissertation credit (ECON 8999) until attaining the degree; the accumulated credit for the thesis must total at least 30 credit hours to attain the degree. A student must prepare a written dissertation and successfully pass an oral examination before a dissertation committee and other interested persons on its content before receiving the degree. The minimum residence requirement for the PhD degree is six semesters of scholarly work beyond the bachelor's degree.

**Administration: Examining Committees for Examinations**

Examining committees for preliminary examinations consist of three members of the economics department who teach in the relevant area. Examining committees for comprehensive examinations consist of at least three members of the economics department.

**Preliminary Examinations**

1. Written examinations are numbered so that insofar as possible the identity of the student is unknown. Each faculty member grades independently and writes no comments in the examination booklet. A meeting of the graders is called by the chair of the examination committee and the committee grade is submitted to the graduate
program manager. The possible grades include "High Pass," "Pass" and "Fail."

2. In cases where there is a question of pass or fail on any exam, if two of the members of the examination committee vote affirmatively, a grade of pass will be recorded; if two of the members of the grading committee vote negatively, a grade of fail will be recorded. If the vote of the grading committee is tied and the third member is absent (but will be available within seven days), the decision to pass or to fail is to be made by the reconvened grading committee. If fewer than two members of the grading committee are present and voting, or if the vote of the grading committee is tied and the third member is not available within seven days, the decision to pass or fail will be made by the Graduate Curriculum and Review Committee; in such circumstances the grade is reported as pass or fail, based on a majority vote.

3. When examination results are reported, a student who failed should have an opportunity to discuss their performance with a member of the examining committee.

**Dissertation Guidelines**

1. In the spring term of the academic year following the research colloquium, each student must submit a written dissertation proposal and conduct an oral defense of that proposal before his or her basic committee. A dissertation proposal form must be signed by each member of the basic committee and submitted to the graduate program manager. The basic committee consists of the student's faculty supervisor and three other faculty members from the department. An acceptable proposal must include a statement of purpose and a justification for the importance of the work; a full literature review and a statement of how this research will contribute to the literature; and a detailed description of the methodologies to be used and of the data bases, if appropriate.

2. Normally students are expected to complete their dissertation by the end of their fifth academic year. The graduate program manager provides details on submission of the dissertation and arrangements for the oral defense. The final defense is conducted before a basic committee of four faculty members from the department plus one outside member. After the defense, minor changes are agreed upon between candidate and supervisor before the final dissertation is submitted.

**English**

The English Department offers a Master of Arts degree (MA) in literature, a Master of Fine Arts degree (MFA) in creative writing and a Doctor of Philosophy degree (PhD) in literature.

For more information, visit the department's Graduate Studies (https://www.colorado.edu/english/current-students/graduates/) webpage.

Course code for this program is ENGL.

**Master's Degrees**

• Creative Writing - Master of Fine Arts (MFA) (p. 1168)
• English - Master of Arts (MA) (p. 1170)

**Doctoral Degree**

• English - Doctor of Philosophy (PhD) (p. 1172)
Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Associate Professor; PhD, Yale University

Courses

**ENGL 5000 (3) Introduction to Applied Shakespeare**
Provides an introduction to the life, work and world of William Shakespeare to prepare students for the Applied Shakespeare Professional Masters Certificate two-week intensive. Students will gain a background in the social, cultural and political context of Renaissance theater, will be introduced to the conventions of Shakespearean drama and will explore key concerns impacting our understanding of Shakespeare's works. Department consent required.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5003 (3) Old English 1: Introduction to Old English**
Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of early medieval Britain. Provides an introduction to grammar and to the history of the English language.
**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4003

**ENGL 5013 (3) Old English 2: Intermediate Old English**
Continues to develop skills in Old English reading and translation. Focusses on shorter canonical texts in verse and prose. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of verse in the original language. Graduate students will read and present on secondary scholarship and produce original research.
**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4013

**ENGL 5019 (3) Survey of Contemporary Literary and Cultural Theory**
Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5023 (3) Old English 3: Beowulf**
Continues to develop students' proficiency in Old English through the translation and literary study of the heroic poem _Beowulf_. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of the poem. Graduate students will read and present on secondary scholarship and produce original research. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ENGL 4023

**ENGL 5029 (3) British Literature and Culture Before 1800**
Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5059 (3) British Literature and Culture After 1800**
Introduces graduate level study of Romantic, Victorian, Modern and Postmodern writing. Emphasizes a wide range of genres, forms, historical background and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5109 (3) Literature and Culture of the United States**
Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5139 (3) Global Literature and Culture**
Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5169 (3) Multicultural/Postcolonial Studies**
Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5199 (3) Studies in Special Topics**
Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses

**ENGL 5229 (3) Poetry Workshop**
Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to English Creative Writing (CRWR) graduate students only.
**Additional Information:** Departmental Category: Graduate Courses
ENGL 5239 (3) Fiction Workshop
Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor’s approval of an application manuscript.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to English Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5259 (3) Nonfiction Workshop
Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor’s approval of an application manuscript.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5279 (3) Studies in Poetry
Addresses contemporary poetry, and/or literary works important for contemporary poetry.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5299 (3) Studies in Fiction
Addresses contemporary fiction, and/or literary works important for contemporary fiction. May be repeated for up to 6 total credit hours.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5309 (3) Playwriting
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5319 (3) Studies in Literary Movements
Studies styles, trends, innovations and major writers in significant literary movements, particularly those after 1900, such as modernism and postmodernism.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5459 (3) Introduction to the Profession
Introduces purposes, methods and techniques of professional scholarship in English. Provides an overview of the discipline, including traditional areas of research and recent developments. Teaches students how to use research, bibliographic, and reference tools to prepare papers for conferences and publication. Required of all MA students in English.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5529 (3) Studies in Special Topics 1
Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5549 (3) Studies in Special Topics 2
Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5559 (3) Studies in Special Topics 3
Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 5849 (1-6) Independent Study (Graduate Level 1)
Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 6959 (1-9) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 7019 (3) Advanced British Literature and Culture Before 1800
Studies special topics in medieval and early modern writing through the long 18th Century. Topics will vary.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses
ENGL 7059 (3) Advanced British Literature and Culture After 1800
Studies special topics in romantic, Victorian, modern and postmodern writing. Topics will vary.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 7119 (3) Advanced Literature and Culture of the United States
Studies special topics in writing of the United States.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 7149 (3) Advanced Global Literature and Culture
Studies special topics in recent writing in English from around the world.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 7179 (3) Advanced Multicultural/Postcolonial Studies
Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 7489 (3) Advanced Special Topics
Studies special topics in theory, culture, and literature of any period. Topics will vary.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.
Additional Information: Departmental Category: Graduate Courses

ENGL 7849 (1-3) Independent Study (Graduate Level 2)
Repeatability: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Graduate Courses

ENGL 8999 (1-10) Doctoral Dissertation
All doctoral students must register for at least 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatability: Repeatable for up to 30.00 total credit hours.
Additional Information: Departmental Category: Graduate Courses

Creative Writing - Master of Fine Arts (MFA)
The MFA in creative writing is a three-year degree program that values literary study, innovation and writing that tests the limits of conventional forms.

The program challenges students to write in a variety of genres and to study literature from the point of view of a working writer. Recent graduates have become not only published authors of fiction, nonfiction, poetry, plays and screenplays, but also journalists, editors, publishers, and college-level and secondary-level teachers.

The degree program culminates in the submission and oral defense of a creative thesis in poetry or fiction. Students may develop custom programs in nonfiction and scriptwriting with available faculty with secondary interests in those genres.

- WRTG 5050: Graduate Studies in Writing and Rhetoric

**Thesis**

**General Requirements**

All students must complete a thesis as part of the degree requirements. The thesis should be a book of poetry, short stories, literary/creative nonfiction or a substantial portion of a novel, play or screenplay. It may also be a combination of these genres. The thesis should be at least 70 pages in length, though most students write between 70 and 150 pages. The bulk of work used in a thesis should have been written while the student was enrolled in the creative writing MFA program, and it should be in a form acceptable to the committee. The thesis must include an abstract (1 to 3 pages) that states the writer’s aims and explains how the thesis reflects those aims.

Students take a total of 9 thesis hours in one or more semesters. The student should select a committee of three faculty (the advisor, who is a faculty member in the Creative Writing Department; one other creative writing faculty member; and a faculty member in literary studies) during the semester prior to that in which they will defend the thesis. A rough draft of the thesis should be made available to the advisor prior to the defense so that problems may be discussed at an early enough date to enable the student to work on them. The advisor will work with the student to advise them on manuscript length, suggestions for improvement and general compilation. The advisor and the student will also agree on a reading list about which the student may be questioned at the defense.

See the index in the Graduate Student Handbook (https://www.colorado.edu/english/current-students/graduates/forms-additional-information/) for the MFA-CRWR Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

A thesis defense must take place before the semester’s deadline for completing defenses (see the Graduate School’s website (https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/) for a list of semester deadlines). A student must give their completed thesis to their entire committee and file a Master’s Examination Report at least two weeks in advance of the defense. The
defense is an oral examination of the thesis that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once; the second exam covers the same material and includes the same committee members as the first.

**Thesis Submission and Format**

The final draft of the MFA thesis must be submitted to the Graduate School by the applicable deadline and must comply with the Graduate School's specifications for theses and dissertations as described on the Graduate School's Master Graduation Information - Thesis Plan (http://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/master-graduation-information-thesis-plan/) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy (gradinfo@colorado.edu).

**Candidacy and Diploma Applications for MFA**

Students must submit their Candidacy Application for an Advanced Degree (https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (p. 1048) section for more information.

**Time Limit**

MFA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, students must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the English Department's associate chair for creative writing. Extensions may be granted for up to one year.

**English - Master of Arts (MA)**

The MA in Literature program is a two-year degree program focused on giving students a broad understanding of American and British Literature, and the current themes and methodologies in criticism and theory.

**Requirements**

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English literature should visit the department’s Graduate Studies (https://www.colorado.edu/english/current-students/graduates/) webpage for the most up-to-date degree requirements.

**Program Requirements**

Students must complete 30 credit hours of coursework (10 courses), at least 21 of which must be taken at CU Boulder. All courses must be at the 5000 level or above. Subject to approval by the Associate Chair for Graduate Studies, up to 6 hours of coursework may be taken in departments other than English. Students may earn the MA degree in literature through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School’s requirements for graduation (see the Graduation Requirements (http://www.colorado.edu/graduateschool/academics/graduation-requirements/) webpage).

Students will meet with the graduate program assistant at least once a year to guarantee that they are on track to meet these requirements. If a student is enrolled in a certificate program, some of these categories may be met by taking courses in other departments that are required for the certificate (with approval from the associate chair for graduate studies).

**Distribution Requirement**

The courses required for the MA should be distributed as follows:

- Two courses before 1800 (courses should survey a broad range of literature from two different periods prior to 1800).
- Two courses after 1800 (courses should survey a broad range of literature from two different periods after 1800).
- One multicultural and/or postcolonial course (may overlap with req. 1 or 2).
- One poetry intensive course (may overlap with req. 1 or 2).

**Degree Plans**

**Plan I: Thesis Option**

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

work with the student to guide and develop their thesis. Committee members may be from another department. The student must establish their department, and 2) two other members of the graduate faculty, one of whom must be a member of the graduate faculty of the English Department, and 2) two other members of the graduate faculty, one of whom may be from another department. The student must establish their committee early in the thesis-writing process so committee members can work with the student to guide and develop their thesis.

A master’s thesis is 50–75 pages in length, and represents an original work of literary analysis that is supported by extensive research into primary and secondary sources. It includes an abstract of 250–350 words and a bibliography, exclusive of the page length for the body of the thesis.

A master’s thesis is optional for the MA in literature; however, there are several benefits to writing a thesis:

- The student continues to develop their skills as a writer and take pleasure in literature.
- The student has the opportunity to work directly with a faculty member of their choice in an area of the student’s choosing.
- If the student plans to apply to doctoral programs in English, they can use part of their thesis as a writing sample. Since the student completes a thesis at the end of their degree program, this capstone project may reflect their current strengths as a writer better than their earlier seminar papers. Students who apply to PhD programs can also use a seminar paper or the paper revised in the professionalization seminar as their writing sample.

The decision to write a thesis must be made by the end of the student’s first year of study. After deciding to write a thesis, the student will put together a three-person committee that includes: 1) their thesis director, who must be a member of the graduate faculty of the English Department, and 2) two other members of the graduate faculty, one of whom may be from another department. The student must establish their committee early in the thesis-writing process so committee members can work with the student to guide and develop their thesis.

It takes two semesters (each with three credits) to research and write an MA thesis. During each of these two semesters, the student’s thesis hours replace elective courses necessary to complete the degree. At least two weeks before the thesis defense, the student must give their completed thesis to their committee members and file a Master’s Examination Report with the Graduate School. See the graduate program assistant for help with this process.

See the index in the Graduate Student Handbook (https://www.colorado.edu/english/current-students/graduates/forms-additional-information/) for the MA-LIT Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

The thesis defense is an oral examination that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once, and the second exam must cover the same material and include the same committee members as the first.

Plan II: Non-Thesis Option
Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

English - Doctor of Philosophy (PhD)

Program Requirements

The PhD program offers rigorous training in critical analysis and research for professional placement. Applicants must hold either an MA or BA degree. Those with a BA who apply directly to the PhD program may also be considered for the MA program.

Requirements

Admission

The PhD program prepares Ph.D. students to write a successful dissertation and to teach effectively in their area of specialty. Students should enroll in graduate seminars serving those ends in English or related fields. The sole requirement for coursework for the PhD is that students take a minimum of 30 credits of graduate study. All courses must be at the 5000 level or above. Students should plan their coursework in close consultation with their director, the graduate program assistant or the associate chair for graduate studies. The student's first and second years in the PhD program are usually dedicated to coursework.

Years 1 & 2: Coursework

Coursework prepares Ph.D. students to write a successful dissertation and to teach effectively in their area of specialty. Students should enroll in graduate seminars serving those ends in English or related fields. The sole requirement for coursework for the PhD is that students take a minimum of 30 credits of graduate study. All courses must be at the 5000 level or above. Students should plan their coursework in close consultation with their director, the graduate program assistant or the associate chair for graduate studies. The student’s first and second years in the PhD program are usually dedicated to coursework.

Students with a master's degree can transfer up to 15 credit hours of coursework from their master’s toward the 30 credit hours of coursework required for the PhD.

Students must take one Poetry Intensive course. The course may overlap with ENGL 5029 or ENGL 5059. The course topic each semester will determine whether or not a course will be counted as a Poetry Intensive.

Language Requirement

Students earning the MA in literature must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to the semester in which they intend to graduate. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student's choice.
2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:
   a. have been taken within the last three years,
   b. be equivalent to a 2000-level language course at CU Boulder, and
   c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

Advancement to Candidacy

Students must submit their Candidacy Application for an Advanced Degree (https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/) section for more information.

Time Limit

MA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the associate chair for graduate studies. Extensions may be granted for up to one year.

English - Doctor of Philosophy (PhD)

Students pursuing a Ph.D. in Literature delve deeply into language and literature, exploring answers to important literary and cultural questions. Doctoral students may choose a concentration in any area of English-language literature and pursue focused study and original scholarship in their area of specialization.

The PhD program is a five-year curriculum, including five years of funding, that comprises a language requirement and three basic components:

• coursework
• a qualifying examination
• a dissertation

For more information, visit the English Department (http://www.colorado.edu/english/) website.

Sometime during the student’s first year of study, they should identify a faculty member to become their director. The student and director should inform the graduate program assistant of their agreement to work together. By the student’s third semester of study, they and their director should begin working on plans for the student’s comprehensive exam (e.g., prospectus topics and possible texts for the reading lists).

See the index in the Graduate Student Handbook (https://www.colorado.edu/english/current-students/graduates/forms-additional-information/) for the PhD-Literature Action Item Checklist, which includes deadlines and a suggested schedule for years 1–5.

**Language Requirement**

Students earning the PhD in literature must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to attempting the Comprehensive Examination. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student’s choice.
2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:
   a. have been taken within the last three years,
   b. be equivalent to a 2000-level language course at CU Boulder, and
   c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

**Year 3: Comprehensive Examination**

The comprehensive examination is a two-hour oral exam. The exam will be conducted by the student’s director and the rest of the examining committee. The student will be tested on the reading lists and the dissertation prospectus. Typically, one hour of the exam is devoted to the prospectus and one to the reading lists. The order will be decided by the student’s examining committee prior to the exam.

**Examining Committee**

With the support of their dissertation director, the student should ask faculty to be part of their examining committee no later than one semester in advance of the term in which they plan to take the examination. The student's examining committee will consist of five members: the student’s director, two English faculty members, a faculty member from another department of the student’s choice, and the associate chair for graduate studies. If the associate chair for graduate studies is already a regular member of the student’s committee, another English faculty member will serve in their place. The director and examining committee will work with the student to finalize the reading lists and prospectus. Both the director and examining committee should play an active role in helping the student write the prospectus and prepare for the comprehensive exam.

If the student’s area of interest benefits from working with a particular instructor who is rostered in the English department, the student can petition the Graduate Committee to authorize that instructor to substitute for a faculty member of the examining committee. The instructor must also be approved by the Graduate School (see the graduate program assistant for details).

**Reading Lists**

The two reading lists cover the following topics:

- **field**, or the broad context (e.g., historical, thematic, generic, technological) pertinent to the student’s dissertation project; and
- **methods/texts**, literary and critical work germane to the project.

Each reading list should comprise between 25 and 40 titles and a paragraph (up to 300 words) providing a rationale for this content. The reading lists should be approved by the student’s director and examination committee, and the PhD Reading List and Prospectus Approval Form should be submitted to the graduate program assistant at least one month before the exam.

**Prospectus**

The prospectus presents the student’s proposed dissertation project in 25 pages or less, plus notes and bibliography. Twenty-five pages is the maximum length limit; anything longer will be returned for editing. The prospectus should consist of three parts:

1. the topic, argument and statement of scholarly contribution;
2. a description of the student’s method and of existing relevant scholarship; and
3. a brief chapter-by-chapter summary.

The bibliography should contain full citations of all works referenced in the prospectus, and all of these titles should appear on one of the student’s reading lists. The student must submit a final draft of their prospectus to all committee members two weeks prior to the date of the comprehensive exam.

**Comprehensive Exam**

The comprehensive exam will consist of a one-hour Q&A on the student’s prospectus and a one-hour Q&A on the student’s lists, knowledge of their field and close-reading abilities. All committee members must be present in person or via teleconference for the comprehensive examination. A positive vote from at least three of the committee members is required to pass. Upon passing the comprehensive exam and pending approval by the Graduate School, the student will advance to PhD candidacy (D status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful comprehensive exam may be retaken only once, and must be retaken within six months. The second exam must cover the same material and include the same committee members as the first.

Any grades of incomplete (I) must be completed before the student schedules the comprehensive exam.

At least two weeks before taking the exam, the student must submit the Candidacy Application for an Advanced Degree (https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf) and the Doctoral Examination Report (https://www.colorado.edu/english/sites/default/files/attached-files/
Years 4 & 5: Dissertation
The dissertation, which should be work of professionally viable scholarship, will typically take the form of a monograph. It may contain such elements as practice-based research, curatorial or internet exhibition, fieldwork, etc. In some instances, it can combine critical and creative elements. The dissertation is written in close consultation with the student’s director and dissertation committee.

The dissertation committee consists of five members: the student’s director, three English faculty members, and a faculty member from another department of the student’s choice. This committee is often but not always drawn from members of the student’s comprehensive examination committee.

The dissertation should be at least 150 pages long, the length of a scholarly monograph.

The first chapter of the dissertation project is due to the student’s director and dissertation committee no later than one semester after passing the comprehensive exam. The candidate and full committee will then meet to discuss it and create a clear itinerary for completing the dissertation. Failure either to schedule and pass the comprehensive exam or to submit the first chapter of the dissertation within the semester following the exam will result in withdrawal of teaching support and suspension from the PhD program.

Dissertation Defense
The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule a dissertation defense: an oral examination and discussion lasting about 90 minutes. The student should deliver copies of their dissertation to their committee members at least one month prior to the defense date. The student must also file a Doctoral Examination Report (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_examination_report.pdf) and a Doctoral Dissertation Defense Leaflet (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_defense_leaflet.pdf) with the Graduate School at least two weeks prior to the defense. All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School’s Current Students (http://www.colorado.edu/graduateschool/current-students/) webpage.

A satisfactory vote from at least four committee members is required to pass the defense. If unsuccessful, the student may retake the defense once after completion of changes or additions determined by the committee. The second exam must cover the same material and include the same committee members as the first.

Dissertation Submission & Format
The student must submit a final copy of their dissertation to the Graduate School by the applicable deadline for that semester, and must comply with the Graduate School’s specifications for dissertations. For detailed instructions and to download an example of a formatted dissertation, go to the Graduate School’s Thesis and Dissertation Specifications (http://www.colorado.edu/graduateschool/thesis-and-dissertation-specifications/) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy (gradinfo@colorado.edu).

Dissertation Hours
A PhD student must complete at least 30 dissertation hours to receive the degree. Dissertation hours may be taken in any semester, including before the student passes the comprehensive examination (at least 1 dissertation hour must be taken prior to passing the comprehensive exam). However, no more than 10 dissertation hours taken before the semester in which the comprehensive examination is passed will count toward the 30 dissertation hours required for the degree.

Beginning the semester after the student passes the comprehensive examination and extending through the semester in which the dissertation is successfully defended, a PhD student is required to register continuously as a full-time student for a minimum of 5 dissertation hours in the spring and fall semester of each year. A PhD student must be registered for a minimum of 5 dissertation hours in the semester (including summer semester, if applicable) in which the dissertation defense is held. A PhD student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

A PhD student who does not have to maintain full-time status and does not have to use campus facilities may claim off-campus status, which allows for registration of credits rather than the full-time 5 dissertation credits. Off-campus status is considered part-time. Students should check with the Office of Financial Aid to see how part-time status will impact them, including the ability to receive new student loans.

Annual Reports
PhD students in their second year or beyond are required to submit an annual report on the progress of their PhD work by Oct. 31 of each year. These reports should be no more than one page in length and should describe both the student’s dissertation project and the steps taken to advance it (e.g., courses, research, prospectus). The report must be signed by the student’s director (or by the associate chair for graduate studies if the student doesn’t yet have a director) prior to its submission. Students who don’t have a current report on file cannot be considered in good standing. Reports should be submitted via email to the graduate program assistant.

Time Limit
PhD students are expected to complete all degree requirements within five years from the semester in which they are admitted and begin coursework in the doctoral program. To continue beyond five years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. The dissertation director and the English department’s associate chair for graduate studies must endorse such petitions. Extensions may be granted for up to one year. For additional time, the student must file another petition for extension. There is no guarantee of department funding after the fifth year.

Environmental Studies
Meeting the environmental challenges of the 21st century requires research, education and training that spans traditional disciplinary boundaries and emphasizes the interconnections of social and natural sciences, policy and the ethics and other social underpinnings of decision making. With numerous focal areas and connections to research centers both in and out of the academic world, ENVS provides the resources and experiences needed by students seeking to contribute to environmental research and problem solving.
The Department of Environmental Studies awards three graduate degrees: MS, MENV and PhD. In addition to research-based MS and PhD programs, we also offer three dual degrees: an MS/MBA in collaboration with the CU Business School, and an MS/Juris Doctor and PhD/Juris Doctor in collaboration with the CU Law School.

The program is flexibly structured, giving students the opportunity to pursue diverse areas of interest, especially those that do not fall neatly within disciplinary boundaries. Opportunities for interdisciplinary graduate studies and original research leading to the MS and PhD degrees are available with a variety of emphases, including sciences, policy and values, and theory. Particular programs of study are limited only by course offerings and faculty expertise.

For updated information, visit the department’s Graduate Students webpage.

Course codes for this program are ENVS, ENVM and OREC.

**Master's Degrees**

- Environmental Studies - Master of Science (MS) (p. 1180)
- Environmental Studies - Masters of the Environment (MENV) (p. 1178)
- Outdoor Recreation Economy - Master of Science (MS) (p. 1181)

**Doctoral Degree**

- Environmental Studies - Doctor of Philosophy (PhD) (p. 1185)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

- Bailey, Karen (https://experts.colorado.edu/display/fisid_164881/)
  Assistant Professor; PhD, University of Florida
- Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562/)
  Professor, Faculty Director; PhD, University of California, Santa Cruz
- Brooks, Cassandra (https://experts.colorado.edu/display/fisid_159275/)
  Assistant Professor; PhD, Stanford University
- Burgess, Matthew (https://experts.colorado.edu/display/fisid_164178/)
  Assistant Professor; PhD, University of Minnesota
- Carrie, Amanda R. (https://experts.colorado.edu/display/fisid_153054/)
  Associate Professor; PhD, Vanderbilt University
- Ciplet, David (https://experts.colorado.edu/display/fisid_156064/)
  Assistant Professor; PhD, Brown University

  Associate Professor; PhD, University of Virginia

**Courses**

**ENVS 5000 (3) Policy, Science, and the Environment**

Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst. **Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.

**ENVS 5003 (3) The Theoretical Foundations of Environmental Methods**

Addresses basic theoretical questions underlying common methods employed by those conducting research in environmental science, values, and policy. The course provides a broad overview of the conceptual background relevant to work and research in environmental studies, with an emphasis on understanding many debates that have informed and challenged disciplinary research and, in so doing, shaped the interdisciplinary field of environmental studies. **Requisites:** Restricted to Environmental Studies (ENVS) graduate students only.

**Grading Basis:** Letter Grade
ENVS 5004 (3) Research Design in Environmental Studies
Offers a conceptual understanding of the diverse methodological traditions used in empirical environmental research, when and why methods are deployed, and their relative strengths and weaknesses. Designed for students pursuing interdisciplinary environmental careers or those looking for a broad foundation prior to specializing. Emphasizes foundational research skills of developing a research question, scientific writing, interdisciplinary collaborations, and science communication. Formerly offered as a special topics course.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ENVS 5050 (3) Theories of the Policy Process
Examines the public policy process, including the influences and actors that shape policy outcomes. Focuses on the major theories, frameworks, and models of policy change, along with emerging scholarship that challenges, refines, and advances the theory.
Requisites: Restricted to graduate students only.

ENVS 5100 (1-3) Special Topics in Environmental Studies
A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ENVS 5110 (1-3) Topics in Environmental Social Science and Humanities
Covers various topics in the social sciences and humanities in environmental studies.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5120 (1-3) Topics in Quantitative Methods
Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals or probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.

ENVS 5155 (3) Ecosystem Ecology
Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.
Equivalent - Duplicate Degree Credit Not Granted: EBIO 4155, EBIO 5155 and ENVS 4155
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ENVS 5240 (3) Environmental Philosophy
A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy and in the philosophy of biology and ecology.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 5240
Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

ENVS 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest
Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a "biodiversity-in-crisis" setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 4340, EBIO 4340 and EBIO 5340
Recommended: Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.
Grading Basis: Letter Grade

ENVS 5510 (1) Environmental Studies Colloquia Series
All first year ENVS graduate students are required to attend the ENVS Colloquia Series. Speakers from around the world and within the department cover topics in all areas of Environmental Studies.
Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Environmental Studies (ENVS) graduate students only.
Grading Basis: Pass/Fail

ENVS 5520 (1-3) Seminar in Environmental Studies
Addresses current topics in Environmental Studies. Provides forum for students to critically evaluate the primary literature on a particular theme.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ENVS 5701 (3) Policy, Politics and Management: Foundations
Examines concepts related to policy and regulatory processes, institutions and management of the environment and natural resources. Explores environmental laws at the international, national, state and local levels as well as how the processes and institutions at various levels of government help shape laws and their implementation. Focuses on policy tools including property rights, regulation, voluntary compliance and market-based mechanisms.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ENVS 5702 (3) Environmental Governance: Actors and Institutions
Provides an examination of environmental governance issues across scales, from local to global. Focuses on foundational theory while critically examining empirical case studies of success and failure in managing common pool resources. Emphasizes understanding the role of diverse actors and institutions in driving environmental outcomes. Students will obtain practical tools and skills towards facilitating environmental sustainability of natural resources across scales.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ENVS 5740 (3) Context-Sensitive Research Methods
Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.
Equivalent - Duplicate Degree Credit Not Granted: PSCI 7116
Requisites: Restricted to graduate students only.
ENVS 5750 (3) Climate Politics and Science-Policy
Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750, GEOG 5750 and SOCY 5750
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ENVS 5760 (2) Inclusive Pedagogy
Classroom instructors have a critical role in promoting student success through inclusive teaching approaches. This graduate seminar will prepare graduate students in key areas of inclusive teaching. Students will explore questions like: How can you foster a class climate that supports a sense of belonging for all students? How can clear and transparent learning outcomes promote student success for all students? How can course assignments and teaching strategies contribute to inclusive teaching? Students will also examine the literature on inclusive teaching and create a teaching statement that integrates aspects of inclusivity.
Grading Basis: Letter Grade

ENVS 5810 (3) Water Resources and Environmental Sustainability
Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management.
Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5820 (3) Energy Policy in the 21st Century
Examines energy policy and the problem of sustainability through a variety of disciplinary and topical perspectives: historical, political, behavioral, techno-economic and legal. A critical approach is applied to arguments about energy policy processes, systems and desired outcomes, with special emphasis on the role of renewable and sustainable energy in the changing global system.
Requisites: Restricted to graduate students only.

ENVS 5830 (3) Critical Issues in Climate and the Environment
Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ATOC 5000

ENVS 5840 (3) Global Biogeochemical Cycles
Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft and measurement networks.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 5305
Requisites: Restricted to graduate students only.
Recommended: Prerequisite general chemistry, some organic chemistry.
ENVS 5909 (1-3) Independent Study
Only 3 hours of independent study can be used towards degree requirements.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ENVS 5930 (2) Internship
Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

ENVS 6007 (3) Foundations of Environmental Sociology
Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 6007

ENVS 6201 (3) Qualitative Research Methods for Environmental Studies
Introduces students to research design, data collection and analysis methods. Exploration of the rationale underlying the use of various methods, the skills needed to employ qualitative method and the process of designing a research protocol will provide graduate students with a sound foundation to begin their own thesis research.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ENVS 6222 (2-3) Environmental Decision-Making
Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7222
Grading Basis: Letter Grade

ENVS 6301 (3) Environmental and Energy Economics
Introduces non-economists to the study of energy markets, environmental externalities, economic regulation and public policy. This applied course uses examples from electricity generation, renewable energy, manufacturing, transportation and other energy intensive industries. A variety of policy instruments will be studied, including: technology standards, subsidies, environmental mandates, rate-based policies, emissions taxes and cap-and-trade systems.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
**ENVS 6302 (3) Sustainable Landscapes, Sustainable Livelihoods**
Examines rural transformation and the adoption of recreation economies in communities across the U.S. West in response to burgeoning recreation industry and interest in public lands. Students will evaluate different approaches for developing and managing recreation economies in small towns that consider diverse social, cultural, economic, and environmental constraints as well as opportunities in a time of rapid change. Project-based course. Students learn techniques to gather and synthesize data that support solution development.
Equivalent - Duplicate Degree Credit Not Granted: ENVM 6302
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

**ENVS 6303 (3) Transportation and Sustainable Cities**
Examines the problem of organizing transportation systems from a variety of perspectives and explores how transportation decisions get made at a variety of scales, from local to national. Covers some of the dramatic changes coming from technological innovation in arenas like vehicle electrification, autonomous vehicles and the potential shift from individual vehicle ownership to shared mobility.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

**ENVS 6304 (3) Introduction to Food Systems Internationally**
Introduces students to contemporary food system challenges at the global scale, the course will first identify key historic and projected trends, to set the scene for the remainder of this specialization. Second it will draw on international case studies to explore some of the institutional, technological and market responses to food system challenges across the globe.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

**ENVS 6305 (3) Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions**
Explores the evidence and ideas underlying some of the most important contemporary food system debates. We will ask: in enhancing the environmental sustainability of food systems, what do the data tell us about the roles that can be played by genetically engineered food, organic agriculture, local food systems, changes to animal agriculture, and reductions in food waste? Students will draw on peer-reviewed research to address the science, policy, and ethical dimensions of these topics.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

**ENVS 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**ENVS 6950 (1-6) Master's Thesis**

**ENVS 7118 (3) Foundations of Environmental Justice**
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 7118, COMM 7118 and PSCI 7118
Requisites: Restricted to graduate students only.

**ENVS 8990 (1-10) Doctoral Dissertation**
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

---

**Environment - Master of the Environment (MENV)**

The Master of the Environment (MENV) Graduate Program at the University of Colorado Boulder is an innovative, interdisciplinary professional master's degree that equips students with the knowledge, skills and experience necessary to address the complex environmental challenges of the 21st Century. This 21-month, immersive, cohort-based graduate program develops students into leaders in a wide range of careers in conservation, consulting, energy, natural resources, planning, policy, sustainability and more.

The MENV program focuses on application and problem solving, and the curriculum is comprised of four components:

- Core courses
- Required specialization courses in one of five specializations
- Electives
- Capstone project

Throughout the program, students develop and hone their skills and leadership capacities through experiential learning, theory and foundational knowledge building, professional development opportunities, career mentoring, and capstone project in lieu of a thesis.

Students become conversant in the language, knowledge, theory, techniques, and methodologies of various disciplines while developing general analytical skills, problem-solving abilities, and the adaptability that is indispensable to professional and career success.

MENV provides a foundation of multidisciplinary knowledge and communication and analytical skills that enable students to address increasingly complex sustainability challenges in a wide range of professional careers.

In addition, the MENV program values a diversity of backgrounds, experiences, and perspectives and is deeply committed to diversifying our student body, faculty, and staff; improving the equity of our systems; and creating an inclusive culture in the program, on CU Boulder's campus, and in the environmental sector at-large.

For more information, visit the Master of the Environment (http://www.colorado.edu/menv/) website.

**Requirements**

**Application Requirements**
To be considered for the MENV program, students must have a four-year bachelor's degree from an accredited U.S. institution or the international equivalent. We recommend a minimum of one year of professional experience or applicable training prior to applying. The MENV program selects students who we believe will achieve academic and professional success while adding value to the graduate community. The MENV program selects talented and diverse candidates through a holistic review of the application materials. Decisions are based on academic and professional backgrounds, as well as individuals' potential to contribute both inside and outside of the classroom.

**Program Requirements**
Students must complete at least 48 credit hours of coursework during the 24-month program, to include:
- Core courses
- Required specialization courses in one of five specializations
- Electives
- Capstone project

**Total Credit Hours**: 48

### Capstone Project

All MENV students complete a nine-month capstone project. These projects provide students with hands-on experiences embedded within an external sponsoring organization while also providing client organizations with specific solutions to identified environmental, sustainability, and business challenges. Deliverables might include management plans, models, analyses, prototypes, or proof-of-concept projects.

### Program Tracks

**Environmental & Natural Resources Policy** (https://www.colorado.edu/menv/academics/specializations/environmental-natural-resources-policy/)

Students learn how to identify and apply the best processes and tools to solve environmental and natural resource problems using a combination of theory, case studies, and practice.

Learning Outcomes

MENV students will develop an understanding of the interconnections and feedback loops within human and natural systems. Specific learning goals will be to:

- Develop a place-based understanding. Students will understand and apply different approaches to thinking about places and their identities, specifically considering how context affects thinking about environmental issues and creation of appropriate solutions.
- Learn and practice new methods and techniques in a wide array of environmental applications.
- Apply understanding of the dominant structures, processes, and dynamics within and between environmental, social and economic systems.
- Analyze contemporary concerns about the environment.
- Create and evaluate new ideas to promote their own or others’ engagement in the environment and to find solutions to today’s pressing problems.

Environmental Studies - Master of Science (MS)

The ENVS Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges. MS students complete coursework that can span the natural and social sciences, values and ethics. Students gain specialized research skills by writing and defending an original master’s thesis.

To earn an MS in Environmental Studies, students must complete 36 hours of coursework and successfully defend an original master’s thesis or research paper in front of a committee of three faculty members. The master’s degree must be completed within four years. Most students complete the MS degree with two and a half years. In option I, students must complete a Masters’ thesis that presents original research. In option II, the student writes a research paper and defends it, but does not present original research. The major milestones are as follows.

Guidance Committee Meeting

During the first six weeks of a student’s first semester, a guidance committee of at least three faculty members will examine a student’s past academic and professional record and recommend a program of coursework for that student.

Degree Plans

Plan I: Thesis Option

Thesis Proposal Meeting

Students must assemble a thesis committee of three faculty members and propose an original research project that will form the basis of the student’s thesis. The thesis proposal meeting is typically held at the end of the student’s first academic year.

Thesis Defense Meeting

The student will present the findings from their thesis project and respond to questions from the committee. The thesis defense meeting is typically held at the end of the student’s fourth semester.

Plan II: Non-Thesis Option

Independent Research Paper

The student will write a paper (i) describing either their own research conducted during the course of their graduate career in ENVS, or (ii) reviewing a related topic of interest to them. The student must obtain approval for the topic of this paper from all three faculty members on their advisory committee and the Associate Graduate Chair for ENVS. The paper should cover the conceptual background of their topic and also detail work done by the student while a graduate student or alternatively present a clear plan of analysis for how the topic could be addressed.

Required Courses

In addition to the courses recommended by their guidance committee, students in both degree options will complete the following required courses:

- ENVS 5000 Policy, Science, and the Environment
- ENVS 5003 The Theoretical Foundations of Environmental Methods

Plan(s) of Study

The Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges. MS students complete coursework that can span the natural and social sciences, values and ethics. Students gain specialized research skills by writing and defending an original master’s thesis.

For additional information and resources for ENVS graduate students, visit the Environmental Studies Program website (https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/).
While this paper should meet high scholarly standards, it is not expected to be as long or comprehensive as a research MS thesis.

**Final Oral Exam**
The student must schedule two hours for this exam, which is conducted by their three member advisory committee that meets Graduate School examination committee requirements. This exam will consist of questions pertaining to the independent research paper, including content of the paper and background ideas and theory. The exam may also cover coursework.

**Dual Degree Programs**

**MS/MBA in Environmental Studies and Leeds School of Business**
The ENVS Masters of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges, this includes skills in business management and entrepreneurship. For these reasons, the Leeds School of Business and the Environment Studies Program collaborate to offer a dual MS/MBA degree program.

This dual degree program requires 36 credit hours of graduate coursework in environmental studies and 43 credit hours of MBA coursework (with 12 credit hours of environmental studies coursework applying toward the required 55 credit hours for the MBA). The MBA program will be considered the student’s primary program. For more information, visit the Business School’s MS/MBA (https://www.colorado.edu/business/mba/full-time-mba-program/curriculum/dual-degrees/) webpage.

**MS/JD or PhD/JD in Environmental Studies and Colorado Law**

Those who wish to pursue advanced degrees across these fields have the option of two dual degree programs: MS/JD and PhD/JD. Students will complete coursework in the core areas of the law, the natural and social sciences, values and ethics, and policy. Graduates of the dual degree program in law and environmental studies have the skills to impact future policies in government, industry and nonprofits or to pursue research-focused careers.

This dual degree is offered in conjunction with the Law School. The Law School will grant credit for acceptable performance in graduate-level environmental studies courses toward the JD degree for up to 9 (for MS students) or 12 (for PhD students) credit hours of the required 89 credit hours for the JD degree. Environmental studies will grant up to 9 (for MS students) or 12 (for PhD students) credit hours of acceptable performance in law courses. The JD program will be considered the student’s primary program. For more information, visit the Law School’s MS/Juris Doctor and PhD/Juris Doctor (https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/) webpage.

**Internship Options for MS/MBA & MS/JD Students**

Students pursuing one of the dual degree programs complete 36 graduate credit hours, including a 2-credit Internship for which a substantial internship report is written. A thesis is not required; however, dual degree students may opt to complete one.

Students who opt for this degree plan must complete the candidacy application (https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf) by the posted Graduate School deadline. These forms require the signatures of the student’s advisor and graduate director. Copies of the forms must be filed with the graduate coordinator. Both degrees must be completed simultaneously.

**Learning Outcomes**

Among the knowledge and skills that we seek to provide to every student are:

- The ability to evaluate environmental policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.
- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state and federal decision processes that shape environmental issues.
- Familiarity with international governance and decision-making frameworks.
- The ability to think critically, creatively and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

**Outdoor Recreation Economy - Master of Science (MS)**

The Master of Science in Outdoor Recreation Economy (MORE) is an interdisciplinary, applied master’s degree that prepares professionals to become creative, thoughtful leaders across the outdoor recreation economy sector. The program leverages University of Colorado Boulder’s academic excellence and experience in professional graduate education, as well as the State of Colorado’s deep connection with the outdoor recreation economy. The program is industry responsive, creates widespread access, and provides innovative, fully online learning opportunities.

The program provides skills and knowledge to students and learners from a variety of backgrounds who are interested in the outdoor industry, community building, and the public lands and natural resources policy sectors. The scope of the MORE curriculum addresses five key overlapping areas:

1. Outdoor recreation industry: Wholesalers, manufacturers, tour operators, and guides provide hardware and services for people to take advantage of open spaces and recreate. Increasingly, the outdoor industry can motivate consumer spending toward sustainability and public lands stewardship. Students who complete this focus will receive a background in sustainability, resilience, outdoor recreation, and business fundamentals.
2. Public lands policy: Policies and regulations that govern access and sustainable use are imperative for the appropriate use, conservation, and enjoyment of public lands. Students who complete this focus will emerge with knowledge and practical experience in these areas, ready to address the new policy challenges facing public lands.
3. Building resilient communities through outdoor recreation: How can communities ensure that development is not something that just
happens to them, but rather is something that is instigated from within? How can communities ensure that development builds upon community strengths and assets and reflects the needs and wants of all its members? What skills, knowledge, and tools do communities need to have at their disposal to inspire action and take charge of their future and become more livable, resilient and sustainable? Students who complete this focus will gain the knowledge and skills to advance in the important role that outdoor recreation can play to support communities in building their capacity for change and taking proactive steps to improve their economic prospects and quality of life.

4. Sustainable leadership: Businesses in the outdoor recreation economy that develop sustainable, innovative products, services and inclusive practices are positioned to lead the next generation of leaders and enthusiasts in a dynamic and fast-growing sector in the economy. Students gain the knowledge and skills necessary to successfully integrate purpose-driven leadership, business acumen, inclusivity and sustainability into outdoor recreation industry operations and entrepreneurial ventures.

5. Inclusivity in the outdoor recreation: Starting with a safe space for deep learning, honest exploration and open dialogue, this certificate focuses on developing a more welcoming and inclusive outdoor recreation economy and expanding access to the outdoors to everyone. Students who complete this focus will gain tools, resources, strategies, and best practices to effectively lead the transition to a more equitable outdoor industry.

In addition to knowledge specific to outdoor recreation, public lands policy, and resilient communities, students will gain career-relevant skills in project management, communication, and systems thinking. The knowledge and skills gained in the MORE program will immediately prepare students to advance in their current careers or gain employment in the outdoor industry.

For more information, visit the Master of Science in Outdoor Recreation Economy (https://www.colorado.edu/program/ore/) website.

Requirements
Admissions Requirements
Admission to the Master of Outdoor Recreation Economy degree will conform to the requirements set by the Graduate School. No coursework may be transferred into this program.

Required Courses and Credits
The master’s degree requires a minimum of 30 credits hours of graduate level coursework, with a minimum cumulative GPA of 3.0. Students must complete three certificates at 10 graduate level credit hours each. All students must complete the foundational (Introduction) certificate and two additional certificates to earn their degree.

Each certificate has a distinct curriculum, and courses may not be double counted toward more than one certificate. Students may take the certificates in any order. For students who are new to the outdoor recreation economy, it is recommended to start with the Introduction certificate, which provides foundational knowledge in the areas of policy, sustainability and community development.

For this degree, students are not required to complete a thesis, capstone project or final examination. A 2-credit, synchronous (remote, live) project course is required to complete each of the three certificates. This project course represents a culmination of the certificate where students apply
The MORE degree offers a foundational (Introduction) certificate taken by all students, and a range of additional topic-focused certificates from which students must complete two. Each certificate consists of four asynchronous subject courses and one synchronous (live, remote) project course related to the relevant content areas, skills, tools, and leadership practices of the sector. Students may complete certificates in parallel or sequentially. In addition, students may finish certificates as they are able, and may stack the certificates to complete the degree. Students may also elect to continue and complete additional certificates.

Certificates

Introduction to the Outdoor Recreation Economy - Graduate Certificate

In the Master of Outdoor Recreation Economy (MORE) graduate degree program, the outdoor recreation economy is viewed holistically. It links public lands, the communities that sit alongside them, and the outdoor recreation industry. This certificate explores the interaction between these nodes of the outdoor recreation economy and lays the foundation for the MORE degree program. Courses in the certificate will provide an introduction to public lands and natural resources policy, challenges and opportunities for community economic development, and inclusive leadership skills for the outdoor recreation industry. This certificate is required for attainment of the MORE degree.

Public Lands and Natural Resources Policy - Graduate Certificate

With over 640 million acres of land in the United States owned by the federal government, and significant holdings by both state and local governments, public lands are a venue ripe for opportunity and conflict. This certificate examines critical and emerging issues on public lands and natural resources management across the U.S. Following an overview of the structure of public lands management, including federal land management designations and agencies and major laws and policies relevant to public lands management, the certificate transitions into issue-based discussions of challenges facing public lands management. The certificate also explores how stakeholders, such as interest groups, non-governmental organizations, and the general public, influence the policy process.

Leading a Sustainable Business in the Outdoor Recreation Economy - Graduate Certificate

The outdoor recreation industry sector includes outdoor recreation product manufacturers, supply chains, retailers, lodging and transportation services, guides, and resort operators, among a host of others. Demand for advanced outdoor technical apparel, footwear and equipment drives innovation and entrepreneurship. It creates jobs for highly skilled workers in diverse fields such as technology, product design, manufacturing, sustainability and global commerce. In addition to product and service innovation, the sector needs a talent pipeline that understands policy, community economic development and sustainability. Many parts of the industry are committing more resources to social responsibility, community support and environmental sustainability—but do not have the talent sophistication to effectively integrate these objectives. This certificate will provide the knowledge and tools to better integrate sustainability into outdoor recreation industry operations.

Inclusivity in the Outdoor Recreation Economy - Graduate Certificate

The Inclusivity in the ORE graduate certificate focuses on developing a more welcoming and inclusive outdoor recreation economy and expanding access to the outdoors to everyone by offering students tools and strategies to effectively lead the transition to a more equitable outdoor industry. Students enrolled in the certificate will learn global best practices in inclusivity through coursework, resources and access to thought leaders who are guiding global organizations to a more diverse and inclusive future. The certificate has the intention to create a safe space for deep learning, honest exploration and open dialogue.

Additional coursework for this certificate will be offered in the Fall 2023 semester.

Introduction to the Outdoor Recreation Economy - Graduate Certificate

Knowledge & skill outcomes

- Be versed in major topics related to the outdoor recreation economy.
- Understand the importance of context and place-based, cultural, social, economic and ecological differences when looking for solutions.
- Understand the systems connections of the constituent elements of the outdoor recreation economy.

Public Lands and Natural Resources Policy - Graduate Certificate

Knowledge & skill outcomes:

- Understand contemporary issues in public lands and natural resources management.
- Understand the policy and statutory context in which debates regarding public lands policy are situated.
- Understand stakeholder dynamics and coalition building with regards to public lands and natural resources management.

Community Economic Development and the Outdoor Recreation Economy - Graduate Certificate

Knowledge & skill outcomes:

- Understand social, cultural, and economic foundations of outdoor recreation economy communities.
- Develop knowledge of the macro- and micro-economic factors behind economic transitions in communities.
- Learn about community economic and business development theory and practice.
- Develop an understanding of the strategies and tactics to successfully transition local economies, including the tools to do so.
- Learn the skills to build community capacity and strengthen civic engagement to assist communities take greater control of their future.

Leading a Sustainable Business in the Outdoor Recreation Industry - Graduate Certificate

Knowledge & skill outcomes:

- Gain knowledge of leadership skills for the outdoor recreation industry sector.
- Gain an understanding of circular economy and sustainable business practices.
- Learn tools for tracking and measuring sustainability.

Inclusivity and Leadership in the Outdoor Industry - Graduate Certificate

Knowledge & skill outcomes:

- Communicate the importance of diversity, equity, inclusion and access within the outdoor recreation economy.
- Identify opportunities for increasing access and inclusion within the outdoor recreation economy.
- Lead outdoor industry organizations in developing diverse and inclusive recruiting and hiring practices.
- Recognize and champion the outdoor recreation economy’s role in addressing issues of diversity, equity, inclusivity and outdoor access in all communities.
- Play a leadership role in creating a natural environment where all people feel not only welcome but encouraged to become active
participants as outdoor enthusiasts, industry professionals and stewards dedicated to the protection of the land.

Environmental Studies - Doctor of Philosophy (PhD)

The doctoral program in ENVS gives students the opportunity to pursue a research-based degree situated in a program that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. PhD students are trained to become independent researchers, usually working closely with one or more faculty advisors and committee members. PhD students complete coursework that spans the natural and social sciences, values and ethics, and policy. Students develop an independent line of research through their dissertation project and other collaborations over the course of their graduate career. Students within the program conduct research in a variety of environmental fields, usually working closely with one or more faculty advisors and committee members.

While a student’s research project shapes much of their graduate career, coursework, colloquia and other activities are also key parts of the graduate experience. This is particularly important in ENVS as all these endeavors provide the breadth of knowledge that is key for those seeking to contribute to environmental research and management.

For more information, visit the program’s PhD webpage. (https://www.colorado.edu/envs/graduate-studies/graduate-programs/phd-program/) View the department website for additional graduate student resources (https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/).

Requirements

Degree Requirements

To earn a PhD in Environmental Studies, students must complete 32 hours of coursework plus an additional 30 hours of dissertation credit hours. Major milestones are outlined below.

Guidance Committee Meeting

During the first six weeks of a new student’s first semester, a guidance committee of at least three faculty members will examine a student’s past course record (from undergraduate and past graduate work) and devise a program of coursework for that student.

Required Coursework

In addition to the courses recommended by their guidance committee, students will complete the following required courses:

- ENVS 5003 Policy, Science, and the Environment
- ENVS 5003 The Theoretical Foundations of Environmental Methods

Preliminary Examination

This written exam tests a student’s understanding of material from the ENVS core classes, as well as the breadth and depth of their knowledge in their chosen fields of inquiry. The preliminary exam is typically taken in the student’s fourth or fifth semester.

Prospectus Defense

The prospectus defense is designed to evaluate a student’s dissertation research plan. At the prospectus defense meeting, the committee also will review the student’s completion of coursework assigned in previous committee meetings. The prospectus defense should be scheduled in the student’s fifth or sixth semester.

Dissertation Defense

A doctoral student writes a dissertation based upon original investigation and showing mature scholarship and critical judgment as well as familiarity with tools and methods of research. The defense consists of both a public presentation and a closed door meeting with the committee.

Learning Outcomes

Among the knowledge and skills that we seek to provide to every student are:

- The ability to evaluate policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.
- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state, and federal decision processes that shape environmental issues.
- The ability to think critically, creatively, and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

Dual Degree Program

PhD/JD in Environmental Studies and Colorado Law

In today’s politically influenced world, it is especially important to understand both the sciences necessary to protect and improve the environment as well as environmental laws and policies. This dual degree brings together the social, economic and political realities that will so dramatically affect the future of our natural world. This program seeks to ensure that environmental studies will have its due impact on the formation of future policies and will not remain on the sidelines as crucial new decisions are being made.

Graduates of the dual degree program in law and environmental studies are well prepared to work in government, in industry or with special programs. Students should review the requirements to complete a JD degree as outlined by the School of Law. (https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/)

For more information visit the Environmental Studies programs Dual Degree webpage. (https://www.colorado.edu/envs/graduate-studies/graduate-programs/dual-degrees-msjd-and-phdjd/)

Degree Requirements

A student enrolled in the dual degree program may commence studies under the program in either school. However, a student is required by the Law School to take the first year of the JD curriculum as a unit exclusively in the Law School. To complete the PhD portion of the degree, students must complete 32 hours of coursework (including the required courses listed above) plus an additional 30 hours of dissertation credit hours. Students must complete both degrees simultaneously.
Ethnic Studies

The Department of Ethnic Studies at the University of Colorado Boulder is dedicated to centering the epistemologies, histories and lived experiences of marginalized communities of color and Indigenous nations in order to challenge and critique all forms of oppression and to advance emancipatory, self-determining futures for all people. Ethnic Studies is an interdisciplinary field that is built upon four core disciplinary pillars of scholarship: Africana studies, Native American & Indigenous studies, Asian American studies and Chicana/Latina studies. Our department stresses the unique contributions and perspectives of each pillar, while training our students to think and research across them in transdisciplinary, intersectional and critical ways. We draw upon our strengths in engaged scholarship and culturally-sustaining pedagogy to examine how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion, dis/ability and legal status impact the past and present lives of people locally, regionally and globally.

Course code for this program is ETHN.

Doctoral Degree

- Critical Ethnic Studies - Doctor of Philosophy (PhD) (p. 1189)

Certificate

- Critical Ethnic Studies - Graduate Certificate (p. 1190)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Professor Emeritus

Courses

ETHN 5001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland
Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropoles of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and CINE 4001

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5009 (3) Chicana/os and Education
Chicana/o and Mexican-origin communities make up the largest and oldest of U.S. Latinx peoples. In many urban school districts across the country they make up the majority of the school enrollment; yet they are grossly underrepresented in higher education. This course will examine the socio-historical, cultural, and political contexts that have shaped the educational experiences of Chicana/os in the U.S. including issues of race, language learning and identity formation as they intersect with nation building. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4009

Requisites: Restricted to graduate students only.

ETHN 5102 (3) Special Topics in Africana Studies
Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4102

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies
ETHN 5106 (3) Special Topics in Chicana and Chicano Studies
Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4106
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chicana/o Studies

ETHN 5116 (3) Spoken Word Latinx Poetics and Poetry
This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4116
Recommended: Requisite 6 credits in any ETHN class.
Additional Information: Departmental Category: Chicana/o Studies

ETHN 5233 (3) Native American and Indigenous Environmental Issues
Explores the unique knowledges, practices and perspectives of Native American and Indigenous peoples with regard to environmental issues, and how they both contrast with and complement dominant ways of knowing. Views central themes of Land, Plants, Animals, and Air/Water through political-ecological lenses. Critically assesses historical and contemporary Indigenous environmental matters in the contexts of colonial histories and tribal sovereignty.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4233
Recommended: Prerequisite ETHN 1023 or ETHN 2013.
Additional Information: Departmental Category: American Indian Studies

ETHN 5272 (3) W.E.B. Du Bois Seminar
Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4272
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: African American Studies

ETHN 5306 (3) The Chicana and Chicoano and U.S. Social Systems
Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4306
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Chicana/o Studies

ETHN 5353 (3) Indigenous Traditions and Law: A Global Perspective
Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway, and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4353 and RLST 4353 and RLST 5353
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop
Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4552 and HUMN 4552
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Africana Studies

ETHN 5553 (3) Indigenous Representations in the United States
Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples' communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4553
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: American Indian Studies

ETHN 5632 (3) Frantz Fanon Seminar
Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4632
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Africana Studies

ETHN 5714 (3) Sport for Social Justice
Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4714
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5951 (3) Senior/Graduate Seminar in Ethnic Studies
Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 4951
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6000 (3) Foundations of Critical Ethnic Studies
Examines theories of race, ethnicity, gender, sexuality, colonialism and globalization, especially from the perspectives of communities most impacted by these categories and processes. This is the introductory course for graduate work in Critical Ethnic Studies.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Crosscultural/Comparative Studies
ETHN 6001 (3) Research Methods in Critical Ethnic Studies
Examines various humanistic and social science research methodologies and applies critical frameworks (including feminist, queer, Indigenous and decolonial theories) to research through an intersectional lens committed to analyzing race, class, gender and sexuality as interconnected, knowledge-producing systems of power. Examines how Ethnic Studies scholars can engage with social justice projects by producing knowledge in cutting edge ways.

Requisites: Requires prerequisite course of ETHN 6000 (minimum grade C). Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6002 (1) Professionalization Seminar in Comparative Ethnic Studies
Provides graduate students with professionalization skills, including how to prepare a national fellowship application, how to give a successful job talk, how to publish refereed journals and book volumes and how to approach the academic job market.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to Ethnic Studies (ETHN) graduate students only.
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6011 (3) Race and Sexuality Studies
Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldua, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6014 (3) Gender, Race, Class, and Crime
Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 7014
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6100 (3) Race and Citizenship in U.S. History and Culture
Examines how the cultural and legal bounds of U.S. citizenship have been linked to race, gender, labor, class, and sexuality. Analyzes the experiences of racialized and gendered groups to explore the racial formations, exclusions and contradictions inherent with the institution of citizenship.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6101 (1-6) Topics: Specialized Comparative Studies
Focuses on a variety of advanced interdisciplinary studies. Themes include: Race and Sports, Critical Whiteness Studies, Race and Masculinity, Applied Community Engagement, Black Women in the Diaspora, US/Mexico Border Cultures, Criminalization and Latinas/os, Race, Violence and Film, and Cuba and Tourism.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Requisite ETHN coursework.
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6103 (3) Indigenous Thought and Theory: Foundations in NAIS
Introduces the theoretical landscapes of Native American and Indigenous Studies. Explores debates, methodologies and concerns that ground the field and provides critical engagement with Indigenous communities and knowledges. Teaches standards for evaluating scholarly sources based on criteria derived from the most outstanding recent scholarship in the field. Requires writing and thinking critically about issues of concern for global indigenous communities.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: American Indian Studies

ETHN 6109 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands
Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: RLST 6110
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Chicana/o Studies

ETHN 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands
Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: RLST 6110
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Chicana/o Studies

ETHN 6501 (3) Decolonial/Postcolonial Theory
Offers an overview of the origins and evolution of Decolonial/Postcolonial Theory. Critically compares and contrasts decolonial discourse with postcolonial theory. Exposes students to the ways in which decolonial and postcolonial theory conceptually interconnect via Cultural Studies, Critical Race Studies and Ethnic Studies-derived discourses such as racial colonialism, the critique of European imperialism, transnationalism, feminism, Indigenousity/Indigenous Studies, Diaspora Studies and Subaltern Studies.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6501 (3) Critical Race Theory: Soc Socn Explrtn/Intrvntn into Crit Race St
Offers an overview of the origins and evolution of Critical Race Theory (CRT). Critically compares and contrasts legal and extralegal social science approaches to CRT. Examines students to the ways in which CRT and Critical Ethnic Studies conceptually interconnects via CRT-derived discourses such as Critical Race Feminism, Critical White Studies, TribalCrit, LatCrit, AsianCrit, DesiCrit, QueerCrit and Decolonial/Postcolonial Critical Race Theory.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Crosscultural/Comparative Studies
Critical Ethnic Studies - Doctor of Philosophy (PhD)

The PhD program in critical ethnic studies offers an innovative path to provide students with broad training to enable them to research and analyze the intersectional and relational workings of race, ethnicity, culture, indigeneity, gender, class, sexuality, religion, dis/ability and legal status in local, regional and global contexts. It provides flexibility for students to pursue their individual research interests, while ensuring that they are grounded in both the foundational and cutting-edge theories in ethnic studies.

The department is dedicated to interrogating the relational nature of race and its attendant categories, particularly gender and sexuality, using frameworks that account for the increasingly global ways that these categories are constructed, resisted and inhabited. However, we believe that rigorous critical as well as relational analyses can only grow out of deep groundings in the particular areas of Africana, Asian American, Chicanx/Latinx, and Native American/Indigenous studies. Methodologically and theoretically, our faculty members possess training and expertise in interdisciplinary fields, including ethnic studies; women, gender and sexuality studies; environmental studies; critical sports studies; critical and intersectional criminology; cultural studies; literary and film studies; border studies; and American studies; as well as traditional disciplines, including anthropology, history, education, religious studies and sociology.

Requirements

Doctoral students are expected to demonstrate an ability to independently carry out original field research, acquire original data, make appropriate analyses and prepare reports of publishable caliber. Students must demonstrate proficiency in a broad subject of learning and the ability to critically evaluate work in ethnic studies. The PhD program is comprised of three basic components: coursework, a comprehensive examination and the dissertation.

A master's degree in ethnic studies or a cognate field (e.g., American studies, English, history, sociology, women's and gender studies, or other related disciplines and interdisciplinary fields) from an accredited university is required for admission into the PhD program.

Transfer of Credit

Students will be permitted to transfer a maximum of 9 credit hours. The Associate Chair of Graduate Studies (ACGS) will examine the academic transcripts of admitted students to determine transfer credits where appropriate. Students must submit a syllabus for each course to be considered for transfer, and follow the steps listed in the department’s Graduate Student Handbook.

Required Courses and Credits

Students must complete 60 credit hours, with a minimum of 30 credit hours of graduate-level coursework (including any transferred graduate credit from the completed master's degree referenced above). At least 18 of the 30 credit hours of graduate-level coursework must come from the Department of Ethnic Studies.

All doctoral students are required to complete the fall and spring sequence, ETHN 6000/ETHN 6001: Foundations in Comparative Ethnic Studies and Methods in Comparative Ethnic Studies (6 credits total, 3 per semester). The introductory, two-semester course will prepare doctoral students for interdisciplinary studies on race, ethnicity, gender, class, indigeneity, sexuality, and culture. The first semester will be a theoretical introduction, and the second semester will examine research methodologies and application of theories to research.

In addition to the two introductory courses, students will be required to enroll in a 1-credit professionalism seminar (ETHN 6002), which is a two-semester course offered by the Ethnic Studies Department that meets once a month during the academic year.

The remaining required credit hours of graduate-level coursework will be selected in consultation with the student's advisor from among ETHN graduate offerings, graduate courses in other units, and approved transfer credit up to 9 credit hours.

Areas of Specialty

The department encourages, but does not require, that students complete a minimum of 9 credits of graduate-level coursework in an area of specialty. Depending on their research interests, students will create an area of study which may include, but is not limited to: Native American & Indigenous studies, Africana studies, Asian American studies, Chicanx/Latinx studies, and criminology. Thematic subfields allow students to develop a thematic framework (e.g. “Decolonial Theory,” “Diaspora and Labor Migration,” or “Borderlands”) in which they will specialize. Students will work in consultation with their advisor to develop an area of specialty, which will be highly individualized to suit students’ particular research interests.

Dissertation Credits

In addition to the 30 credit hours of graduate-level coursework, students must complete a minimum of 30 dissertation credits in total: 5–10 during comprehensive examination preparation and 5–10 per semester when defending the prospectus and writing the dissertation. Students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the comprehensive exam/dissertation defense is held. Students are not permitted to register for more than 10 credit hours of dissertation credit per semester, per Graduate School rules.

Language Requirement

The department encourages, but does not require, non-English language proficiency, especially for students conducting research in contexts that extend beyond their existing abilities. Proficiency will be demonstrated by passing (with a grade of C or better) the fourth semester of a non-English
language course, earning a passing score on the Graduate School Foreign Language Test (GSFLT), or by an alternative mode of assessment agreed to by the Graduate Committee. Credits earned for language proficiency will not apply toward the doctoral degree. The goals of the language requirement are to ensure that doctoral scholars can research materials in other languages besides English. The department will work with the Graduate School to ensure that the language requirements are in parity with other interdisciplinary doctoral programs at CU Boulder.

Continuous Registration
A PhD student is required to register continuously as a full-time, regular degree-seeking student at CU Boulder for a minimum of five credit hours in the fall and spring semesters of each year. Students must be registered for a minimum of 5 dissertation hours per semester beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

For additional details, visit the department’s PhD Program (http://www.colorado.edu/ethnicstudies/grad/phd_program.html) webpage and download the Graduate Student Handbook.

Critical Ethnic Studies - Graduate Certificate
The 12-credit graduate certificate in critical ethnic studies is an interdisciplinary course of study designed to complement the MA or PhD curriculum required by the student’s home department within CU Boulder. The Department of Ethnic Studies (DES) offers the certificate to provide specialized training in Africana studies, Chicana/Latina studies, Native American and Indigenous studies, decolonial feminist studies, comparative ethnic studies, race and sexuality studies, and transnational/hemispheric ethnic studies to students pursuing degrees in various disciplines on the CU Boulder campus.

Requirements
Application Requirements
Students must submit an unofficial transcript and a two-page statement of purpose describing how their graduate interests will be enhanced by our course offerings and mentoring (in the statement of purpose, please identify classes already taken in DES).

To participate in the ethnic studies certificate program, applicants must maintain good academic standing with their home unit within the Graduate School. Their home unit must also indicate its support for the student enrolling in the certificate program.

Materials should be sent to grad.ethnst@colorado.edu.

Program Requirements
A total of 12 credit hours of graduate-level coursework is required for this certificate, nine of which must be from courses in the Department of Ethnic Studies (ETHN 6000 and two electives). Certificate program students must maintain a minimum GPA of 3.3.

Total Credit Hours 12

French and Italian
The Department of French and Italian at the University of Colorado Boulder enjoys a national reputation, and is the only PhD granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding record of placing its MA and PhD recipients in desirable positions of employment. The graduate program typically counts an enrollment of 20 to 25 students, drawn from both the
U.S. and several foreign countries, pursuing interests from the Middle Ages to 20th c. and Francophone literatures.

Graduate Study in French
The Department of French and Italian at the University of Colorado Boulder offer master's and doctoral French graduate programs. Students wishing to pursue graduate work in French leading to candidacy for an advanced degree should read the Degree Requirements (p. 1043) sections carefully.

Master's Degree
- French - Master of Arts (MA) (p. 1193)

Doctoral Degree
- French - Doctor of Philosophy (PhD) (p. 1194)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ardizzoni, Michela (https://experts.colorado.edu/display/fisid_145152/)
Associate Professor, Associate Chair; PhD, Indiana University Bloomington

Barchilon, Jacques
Professor Emeritus

Bloomfield, Elisabeth Marie Arnould (https://experts.colorado.edu/display/fisid_125576/)
Associate Professor; PhD, University of California, San Diego

Braider, Christopher (https://experts.colorado.edu/display/fisid_100300/)
Professor Emeritus, Chair; PhD, Trinity College, Dublin

Craven, Priscilla (https://experts.colorado.edu/display/fisid_108033/)
Teaching Professor of Distinction, Senior Instructor; MA, University of Colorado Boulder

Frey, Julia B.
Professor Emerita

Kilbane, Aimee (https://experts.colorado.edu/display/fisid_153823/)
Assistant Teaching Professor; PhD, University of California, Santa Barbara

Assistant Teaching Professor; MA, University of Notre Dame

Yamashita, Masano (https://experts.colorado.edu/display/fisid_147343/)
Associate Professor, Associate Chair; PhD, New York University

Courses
No Italian courses are offered at the graduate level.

FREN 5110 (3) French Special Topics
Different topics are offered and, in a number of cases, cross-listed with other departments.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5120 (3) French Special Topics
Different topics are offered and, in a number of cases, cross-listed with other departments.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5170 (3) Francophone African Literature
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French
FREN 5250 (3) Medieval and Renaissance Readings
Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France. Readings in French. May be taught in English to accommodate students in other programs.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5310 (3) 17th Century French Tragedy and Poetry
Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama’s role as a symptom and agent of early modern French social and intellectual history. Readings in French, but may be taught in English.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5320 (3) 17th Century French Prose
Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnetete and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchical absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5330 (3) Moliere and 17th Century French Comedy
Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy’s role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L’ecole des femmes and Tartuffe. Readings in French, but may be taught in English.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5350 (3) French Enlightenment
Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d’alembert’s Encyclopedie, Voltaire and Diderot’s philosophical tales and dialogues, Rousseau’s Discours, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5360 (3) 18th Century French Literature
Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/ writer and their significance as representatives of the century’s changing society and culture.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5420 (3) 19th Century French Literature
A survey of principal works and movements, intended as an introductory course.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5440 (3) Literary Ludics
Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5445 (3) Literary Theory, Part I
Covers Western literary theory from Plato to Latour as the first part of a two-semester literary theory course investigating the Western tradition from the Greeks on to post-colonial and empire studies. This initial course follows the history of criticism and its philosophical underpinning up to 20th century trends but does not cover cultural and post-colonial studies.
Requisites: Restricted to graduate students only.

FREN 5450 (3) Proust and Modernity
Introduces Proust’s masterpiece “In Search of Lost Time” in its English translation. The class offers an overview of the work’s structure, themes and context. Particular attention is given to Proust’s role as a major theoretician of modernity in philosophy, literature and visual arts.
Formerly offered as a special topics course.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

FREN 5470 (3) 20th Century French Theatre and Poetry
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 5770 (2-3) Methods of Teaching French as a Foreign Language
Familiarizes students with current methodology and techniques in foreign language teaching.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 6840 (1-3) Independent Study
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French

FREN 6940 (1) Master’s Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 6.00 total credit hours.

FREN 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: French
**French - Master of Arts (MA)**

The MA program in French offers students the opportunity to pursue their interest in literature and culture, working with faculty members who produce distinguished scholarship in a broad variety of fields. Students are encouraged to take courses in many of those fields and to become acquainted with a diversity of critical and theoretical approaches. The program consists of coursework and a comprehensive examination.

**Bachelor’s–Accelerated Master’s Degree Program**

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): French - Bachelor of Arts (BA) (p. 303).

**Requirements**

**Admission Requirements**

Prerequisites for admission to the French MA studies:

- An undergraduate major in French or its equivalent with a grade average of at least B in all French courses.
- Good pronunciation in French as evidenced by a recording submitted with the application.
- Students are required to submit a statement of purpose and one paper of their choice done for an undergraduate French course.
- Recommendations from three professors with whom the student has worked.

**Course Requirements**

Degree requirements are subject to change. Students wishing to pursue graduate work in French should visit the department's MA Guidelines (http://www.colorado.edu/frenchitalian/graduate/ma-guidelines/) for the most up-to-date degree requirements.

The following summary of minimum requirements is expressed in terms of courses. Each course represents a graduate seminar carrying two or three credit hours. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Master’s Degree Requirements (p. 1043) section of this catalog.

Master’s students are not normally permitted to take independent study courses. However, in exceptional circumstances, and with the approval of the Associate Chair for Graduate Studies, they may register for one and at the very most two such courses.

**Language Requirement**

All MA candidates must acquire a reading knowledge of a language other than French and English. The language should be related to the student’s academic program. The requirement may be fulfilled by taking a translation exam offered by the department in the language in question or by passing coursework either at CU or prior to arrival on campus equivalent to a fourth semester (2120 at CU) college course.

Early in their first semester in the MA program, each student should meet individually with the Associate Chair for Graduate Studies to discuss their overall plan of study, including the ways in which they will satisfy the language requirement.

**MA Comprehensive Examination**

This examination will be based on a reading list in literature, culture, and theory prepared by the Graduate Faculty. It will be administered by an Examination Committee composed of the Associate Chair for Graduate Studies and two other members of the Graduate Faculty, appointed by the Chair. The examination will consist of three essays of three hours each, based on questions formulated by the Examination Committee, and a one-hour oral examination designed to test the student’s overall knowledge of the reading list. Normally the three essays will be written within a six-day period, and the one-hour oral exam will normally follow

---

1. Students planning to apply for the doctoral program should remember that PhD candidates are expected to take three courses in a related field at the 5000 level or above. Courses in a related field at the 4000 level will normally not count toward this total.
within two weeks. Two of the three essays must be written in French, but should students decide to exercise the option of writing one in English, they are entirely free to choose which one it shall be. The Comprehensive Examination must be taken during the fourth semester of the MA program.

**Two-Year Plan of Study**
The MA degree is intended to be completed in two years. The normal pattern of courses would be as follows:

<table>
<thead>
<tr>
<th>Year One</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall Semester</td>
<td></td>
</tr>
<tr>
<td>Two seminars</td>
<td>6</td>
</tr>

**French - Doctor of Philosophy (PhD)**
The Department of French and Italian at CU Boulder enjoys a national reputation and is the only PhD-granting department in the Rocky Mountain region. The department offers courses that cover the historical and geographic range of French and Francophone literature and has an outstanding record of placing its PhD recipients in desirable positions of employment. Our students pursue interests from the Middle Ages to 21st-century and Francophone literatures.

**Requirements**

**Prerequisites**
Doctoral candidates should possess excellence in reading, speaking, writing and understanding spoken French; general knowledge of French literature and civilization; and knowledge of one language other than English and French.

**Program Requirements**
The PhD program in French literature consists of coursework, a comprehensive examination, a doctoral dissertation and an oral defense of the doctoral dissertation.

Degree requirements are subject to change. Students should visit the department's PhD Guidelines (http://www.colorado.edu/frenchitalian/graduate/phd-guidelines/) webpage for the most up-to-date degree requirements.

**Required Courses and Credits**
The following summary of minimum requirements is expressed in terms of courses. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Doctoral Degree Requirements (p. 1045) section of this catalog.

</tr>
</tbody>
</table>

Students must also have 30 hours of Dissertation Guidance (Graduate School requirement) with no more than ten hours taken before the completion of the PhD Comprehensive Examination.

PhD students are normally allowed to take two independent studies courses, subject to the approval of the Associate Chair for Graduate Studies. However, they may not take more than two (including any taken at the master’s level) except in exceptional circumstances and with the approval of the Associate Chair for Graduate Studies.

Provided that such courses are taught, students must also have taken at least one course (5000-level and above) in seven of the eight major periods of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature and film. Students continuing from the MA program at CU will normally have fulfilled this requirement as part of their MA degree.

Students entering the PhD program with an MA in French or equivalent from another university can count five of their previous MA courses toward the 15-course requirement; they must take 10 courses during the first two years of candidacy, up to two of which may be in a related field. Such students must take courses covering four of the eight fields of French literature. Previous coursework will be evaluated, and if at least seven of the fields were not covered at the MA level, courses will be required to attain this coverage.

In summary, for students entering from other MA programs, the requirements are: 1) at least four courses within the department to cover four fields, with these at the candidate’s discretion except for the requirement to cover gaps from the MA program; 2) up to two courses in related fields; 3) four additional courses within the department at the discretion of the student.

Students entering the PhD program without an MA in French must consult with the Associate Chair for Graduate Studies.

**Language Requirement**
A sound reading knowledge of one modern language other than English and French is required. Such reading knowledge must be certified by the student passing a reading examination in the language. The examination...
normally consists of a timed translation of a literary text or a text dealing with literature (e.g., literary criticism). A dictionary is permitted. This language should be relevant to the student’s academic program.

**Examination/PhD Comprehensive Examination**

As students are finishing their required coursework, they should have a good idea of the way their courses and ideas are coalescing around a given general field and a specific problem within that field. Courses taken outside the department, as well as work in the related field, should fit into this pattern. As this specification of interest toward the area of the dissertation takes place, the student should constitute a Doctoral Committee consisting of five graduate faculty members (one of whom must come from outside the student’s department) who will guide the student’s work. One of these faculty members will serve as the Director and take responsibility for co-coordinating the work of this ad hoc Doctoral Committee. Once the Doctoral Committee is formed and approved by the Graduate School, the student will begin to prepare for the PhD Comprehensive Examination. Working in consultation with the Director and other members of the Doctoral Committee, the student will formulate a dissertation topic. The students will prepare a list of primary texts pertaining to that topic, and a further list of secondary materials composed of critical and theoretical texts intended to inform the student’s approach to the dissertation topic. Those two lists will be circulated to the Doctoral Committee before the Comprehensive Examination. The examination itself will consist of one substantial essay (the equivalent of a 30-page seminar paper) followed by an oral examination. The essay will focus on the dissertation topic. The student will have two weeks to write the essay. Once that essay is written, the Doctoral Committee will conduct the oral part of the examination as a discussion of material covered in the essay, material on the two reading lists, as well as matters pertaining to the general direction of the dissertation and the approach that the student propose to take therein. Normally the Comprehensive Examination should be taken at the end of the student’s second year in the PhD program (for students continuing from CU’s MA program) or at the end of the third year in the program (for students entering from other MA programs). In both cases, that allows the student a full year of independent study after the conclusion of course requirements. Upon successful completion of the PhD exams, students normally spend the next two years writing a dissertation.

**PhD Dissertation**

The PhD dissertation must be based upon original scholarship and demonstrate mature scholarship and critical judgment as well as familiarity with the tools and methods of research. It should make a worthwhile contribution to knowledge in the student’s special field. Students are advised to familiarize themselves thoroughly with the various Graduate School rules governing the format and deadlines for the dissertation. The dissertation is normally written in English but it is also possible to write in French; the language of the dissertation should be approved by the student’s committee.

**Oral Defense of the Dissertation**

After the dissertation has been accepted, a final oral examination on the dissertation and related topics will be held. The examination will be conducted by a five-member committee, appointed by the dean of the Graduate School, which will consist of representatives of areas in which the student has worked. At least one member of the committee will be from outside the student’s field of study. The committee should be approved by the Graduate School at least two weeks prior to the oral defense. More than one negative vote will disqualify the candidate in the oral defense.

---

**Plans of Study**

**Typical Six-Year Structure for Entering MA Students**

The PhD degree is intended to be completed in six years. The MA would normally be awarded after two years in the program. The standard sequence of courses is as follows:

<table>

Total Credit Hours 60-66

Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography, and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population, and urban geography. Environment and society geography includes political ecology, natural hazards, and conservation practice. Physical geography includes climatology, geomorphology, hydrology, and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing, and cartography. The Department also offers internationally focused courses on mountain geography and geographies of China, Latin America, Africa, Middle East and South Asia. To complement its curriculum, the Department also offers internships opportunities for geography majors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read carefully the requirements for advanced degrees in the Graduate School section. Additional information should be obtained from the Department of Geography.

The course code for this program is GEOG.

**Master's Degree**

- Geography - Master of Arts (MA) (p. 1201)

**Doctoral Degree**

- Geography - Doctor of Philosophy (PhD) (p. 1202)

**Certificates**

- Development Studies - Graduate Certificate (p. 1203)
- Hydrologic Sciences - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/)
- Population Studies - Graduate Certificate (p. 1204)

**Interdisciplinary Program**

- Earth Data Analytics - Foundations - Graduate Certificate (p. 1621)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Abdalati, Waleed (https://experts.colorado.edu/display/fisid_145800/)
Professor; PhD, University of Colorado Boulder

Balch, Jennifer Kakareka (https://experts.colorado.edu/display/fisid_154464/)
Associate Professor; PhD, Yale University

Barnard, Holly Rene (https://experts.colorado.edu/display/fisid_147417/)
Associate Professor, Associate Chair; PhD, Oregon State University

Blanken, Peter David (https://experts.colorado.edu/display/fisid_114026/)
Professor; PhD, University of Colorado Boulder

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562/)
Associate Professor Adjunct; PhD, University of California, Santa Cruz
Courses

GEOG 5003 (4) Elements of Geographic Information Systems
Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography.

Requisites: Restricted to graduate students only.
Recommended: Prerequisite some experience with Mac or Windows.
Additional Information: Departmental Category: GIScience

GEOG 5023 (4) Advanced Quantitative Methods for Spatial Data
Reviews fundamental statistical and quantitative modeling techniques and introduces more advanced statistical techniques widely used in geography today. Emphasizes geographic examples and spatial problems teaching hands-on skills in statistical programming. Topics covered include generalized linear models, spatial autocorrelation, spatial regression methods, and working with complex datasets.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4023

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methods
GEOG 5043 (4) Advanced Geovisualization and Web Mapping
Advanced technical course in web-based cartography and geovisualization stressing the important role digital cartography plays in cyberspace and society. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects demonstrating skills in geovisualization and cartographic practice.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4043
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methods

GEOG 5093 (4) Remote Sensing of the Environment
Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4093 and GEOL 4093 and GEOL 5093
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methods

GEOG 5100 (1-4) Special Topics: Geography
Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty. Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

GEOG 5103 (4) Geographic Information Science: Spatial Analytics
Explores advanced topics in geospatial databases, spatial analytics and geoprocessing in a Geographic Information System (GIS). Emphasizes how geographic concepts are linked to methodological frameworks for recording, transforming, storing/retrieving, analyzing, and processing geographic data as well as various forms of uncertainty. Exercises demonstrate the application of GIS-based methods to real world scenarios in interdisciplinary settings.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4103
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: GIScience

GEOG 5113 (3) Seminar: Geographic Information Systems
Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite GEOG 4103 or GEOG 5103 or instructor consent required.
Additional Information: Departmental Category: GIScience

GEOG 5152 (3) History and Theory of Geography
History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography.
Requisites: Restricted to Geography (GEOG) graduate students only.

GEOG 5161 (3) Research Design in Geography
The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas.
Requisites: Restricted to Geography (GEOG) graduate students only.
Additional Information: Departmental Category: Physical Geography

GEOG 5203 (4) Geographic Information Science: Spatial Modeling
Focuses on the use and development of advanced models for human and environmental applications in a geospatial environment integrating raster and vector data models. Covers terrain and hydrologic modeling, geostatistical modeling, dasymetric modeling, as well as multi-criteria modeling. Group projects critically design, implement and test spatial models to develop independent skillsets in a chosen problem setting.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4203
Requisites: Restricted to graduate students only.
Recommended: Prerequisite GEOG 4103 or GEOG 5103 or working knowledge of GIS software or instructor consent required.
Additional Information: Departmental Category: Methods

GEOG 5211 (3) Seminar: Physical Climatology
Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Physical Geography

GEOG 5221 (3) Synoptic and Dynamic Climatology
Examines global climates from the standpoint of synoptic and dynamic climatology.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Physical Geography

GEOG 5241 (1-3) Topics in Physical Geography
Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Physical Geography

GEOG 5251 (4) Fluvial Geomorphology
Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4251
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Physical Geography

GEOG 5271 (3) The Arctic Climate System
Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4271
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Physical Geography
GEOG 5292 (3) Migration, Immigrant Adaptation, and Development  
Focuses on historical and current patterns of migration with an emphasis on international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4292  
**Requisites:** Restricted to graduate students only.

GEOG 5303 (4) Geographic Information Science: Spatial Programming  
Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data using open source tools. Covers concepts, principles and techniques of programming and solving spatial problems in natural and social science settings. Group projects will foster skillsets in implementing solutions to complex spatial problems.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4303  
**Requisites:** Restricted to graduate students only.  
**Recommended:** Prerequisite GEOG 4203/5203.  
**Additional Information:** Departmental Category: GIScience

GEOG 5321 (3-4) Snow Hydrology  
Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4321  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Physical Geography

GEOG 5331 (3-4) Mountain Climatology  
Surveys and analyzes climatic characteristics of mountain environments worldwide.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4331  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Physical Geography

GEOG 5371 (3) Forest Geography: Principles and Dynamics  
Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4371  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Physical Geography

GEOG 5391 (3) Seminar: Biogeography  
Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Topics vary.  
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Physical Geography

GEOG 5401 (3) Soils Geography  
Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4401  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Physical Geography

GEOG 5403 (3) Geographic Information Science: Space Time Analytics  
Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands-on, flipped classroom approach with in-class development of technical skills.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4403  
**Requisites:** Restricted to graduate students only.

GEOG 5463 (3) Earth Analytics Data Science Bootcamp  
Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4463  
**Requisites:** Restricted to graduate students only.  
**Grading Basis:** Letter Grade

GEOG 5501 (3) Water Resources and Water Management of Western United States  
Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4501  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Environment-Society Geography

GEOG 5503 (3) Geographic Information Science: Project Management  
Managing a geospatial project encompasses problem identification, project design, analysis and supporting team dynamics. The class mixes lectures and class exercises with student-selected projects and works through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4503  
**Requisites:** Requires prerequisite course of GEOG 5103 (minimum grade C-).

GEOG 5563 (3) Earth Analytics  
Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (http://www.colorado.edu/grandchallenges/) to use our expertise in space-based observation to address our world's most pressing problem. Compare programming course work may be substituted for GEOG 5463 with instructor approval.  
**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 4563  
**Requisites:** Requires prerequisite course of GEOG 5463 (min grade B-)  
**Grading Basis:** Letter Grade
GEOG 5603 (3) GIS in the Social and Natural Sciences
Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4603

GEOG 5622 (3) City Life
Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4622
Requisites: Restricted to graduate students only.

GEOG 5632 (3) Development Geography
Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4632
Requisites: Restricted to graduate students only.

GEOG 5642 (3) Seminar: Urban Geography
Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.
Requisites: Restricted to graduate students only.

GEOG 5652 (3) Introduction to Social Theory
Surveys theoretical paradigms in the social sciences. Includes canonical works from the history of the social sciences as well as contemporary theorists. Appropriate for beginning to advanced graduate students doing qualitative research.
Requisites: Restricted to graduate students only.

GEOG 5662 (3) Seminar: Topics in Economic Geography
Covers selected topics emphasizing faculty specialties. Topics vary with instructor. Check with department for semester offerings.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOG 5663 (1-3) Earth Analytics Applications
Develop expertise in finding, organizing, managing and processing large, heterogeneous, spatio-temporal data to address a real-world problem. Students will work collaboratively on semi-guided science project. Students gain critical skills required to understand data structures, utilize APIs, extract insight from data and understand how uncertainty propagates. Culminates with a formal presentation of project results.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires prerequisite course of GEOG 5463 and GEOG 5563 (min grade B-) Restricted to graduate students only.
Grading Basis: Letter Grade

GEOG 5712 (3) Political Geography
Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4712
Requisites: Restricted to graduate students only.

GEOG 5722 (3) Field Methods in Human Geography
Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4722
Requisites: Restricted to graduate students only.

GEOG 5732 (3) Population Geography
Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4732
Requisites: Restricted to graduate students only.

GEOG 5750 (3) Climate Politics and Science-Policy
Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics under-girding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750,
ENVS 5750 and SOCY 5750
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

GEOG 5782 (3) Sustainable Development: Critique
Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development.
Requisites: Restricted to graduate students only.

GEOG 5832 (3) Geography of Tibet
Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4832
Requisites: Restricted to graduate students only.

GEOG 5840 (1-3) Graduate Independent Study
Offers independent research for master’s students only. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
GEOG 5842 (3) Global Frontiers in Southeast Asia
Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4842 and ASIA 4842
Requisites: Restricted to graduate students only.

GEOG 5852 (3) Health and Medical Geography
Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 4852
Requisites: Restricted to graduate students only.

GEOG 5930 (3) Advanced Internship
Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

GEOG 5961 (3) Theories of Climate and Climate Variability
Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate.
Requisites: Restricted to graduate students only.

GEOG 5962 (3) Seminar: Cultural Geography
Examines emerging patterns of identity, economy, cultural politics, STS and post-structural theory. Emergence of several points of view in the development of cultural geography.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOG 6402 (3) Seminar: Political Ecology
Critically examines the politics of human-environment relationships across cultures and societies. Focuses on environmental degradation, change and management from the perspectives including political economy, cultural politics, STS and post structural theory.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOG 6723 (3) Formal Population Geography: Analysis and Forecasting
In-depth introduction to formal demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration and forecasting/ projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite GEOG 5023.

GEOG 6742 (3) Seminar: Cultural Geography
Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOG 6750 (1-6) Master’s Thesis
Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOG 7118 (3) Foundations of Environmental Justice
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: COMM 7118, ENVS 7118 and PSCI 7118
Requisites: Restricted to graduate students only.

GEOG 7840 (1-3) Graduate Independent Study
Offers independent research for doctoral students only. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

GEOG 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Instructor consent required.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.

Geography - Master of Arts (MA)
The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Master’s Degree Requirements (p. 1043) section carefully.
Requirements
Prerequisites
For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

General Requirements
The minimum requirements for an MA in geography may be fulfilled by completing 30 credit hours of graduate work (5000 level or above), including 4 to 6 credit hours of thesis work. Master’s students may, with the written approval of their advisor, use a maximum of 6 hours of 3000- or 4000-level coursework to reach the required 30 hours.

Students are encouraged to have some background in college math and computer skills. Students are also required to have proficiency in basic statistics. This requirement may be met by having taken an undergraduate course in statistics.

Electives
Select at least 14 additional hours of coursework at the 5000 level or above to meet the 30-credit minimum.

Total Credit Hours 30

Geography - Doctor of Philosophy (PhD)
The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Doctoral Degree Requirements (p. 1045) section carefully.

Requirements
Prerequisites
For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the PhD program’s required core classes.

General Requirements
The PhD degree is not conferred merely upon the satisfactory completion of a course of study. The candidate must also demonstrate proficiency in some broad subject of learning, and be able to critically evaluate work in the field, show the ability to work independently in the chosen field and make an original contribution of significance to the advancement of knowledge.

The minimum requirements are 30 credit hours of coursework numbered 5000 or above and 30 credit hours of dissertation. Ordinarily the number of coursework hours and dissertation hours will be greater than 30 each. At least 20 of these hours must be taken at the University of Colorado; up to 10 credit hours from another institution may be transferred upon approval.

A 3.00 (B) average or higher must be maintained in all coursework.

Six semesters of residence are required, of which four must be at the University of Colorado. With department approval, students with a University of Colorado master’s degree in geography may apply all credit hours from 5000-level courses or above (except thesis credits) to the PhD requirements.

Language Requirement
The department’s minimum language requirement is a demonstration of proficiency in one foreign language. Ways in which this requirement may be satisfied are determined by the student’s Advisory Committee and may include timed translation, publication in the language and/or coursework. If more than the minimum proficiency is needed for library and/or field research, the choice and number of languages, as well as the required level of skill and methods of testing these skills, are determined and approved by the student’s Advisory Committee. The language requirement must be satisfied before the comprehensive exam is taken.

Preliminary Exam
The Graduate School requires that all students in the doctoral program successfully pass a preliminary exam. In geography, this requirement is met by obtaining a grade of B or better in each of the three required courses:

<table>
<thead>
<tr>
<th>Code</th>

<td>Advanced Quantitative Methods for Spatial Data</td>
<td>4</td>
</tr>
<tr>
<td>or GEOS 5722</td>
<td>Field Methods in Human Geography</td>
<td>3</td>
</tr>
</tbody>
</table>

Following completion of the preliminary exam requirement, students undertake preparation for comprehensive exams.

Comprehensive Exams
Following successful completion of the preliminary exam, doctoral students must pass a comprehensive exam for advancement to candidacy for the doctoral degree. The comprehensive exam consists of two parts, including an exam on three subfields of geography with written and oral components, and completion of a written dissertation proposal and oral defense. Working together, the student and an Advisory Committee of three to five faculty set the subfield topics. The
student creates a reading list for each subfield, and usually spends a semester reading and preparing for the subfields exam. The Advisory Committee sets the subfields exam questions and evaluates the written and oral responses, as well as the proposal defense. Upon successful completion of the comprehensive exam, a student can turn full attention to dissertation research and writing.

Dissertation
In addition to the minimum of 30 hours of coursework required for the doctorate, a student must register for a total of at least 30 hours of dissertation credit, with a maximum of 10 hours in any one semester. Coursework and work on the dissertation may proceed concurrently throughout the PhD program, but at no time shall a doctoral student register for more than 15 hours of 5000-level courses and above.

Following successful completion of comprehensives and admission to candidacy, students must register continuously. Students admitted to candidacy for degree will register for and be charged for a minimum of five dissertation hours each semester. Students may also register for classes in addition to the five dissertation hours.

After admission to candidacy, those not making use of campus facilities may register for three dissertation hours (part-time status). Continuous registration during the academic year will be required until completion of the dissertation defense. It is expected that the student and advisor will consult each semester as to the number of hours for which the student will register, consistent with the classifications described above.

Development Studies - Graduate Certificate
The Department of Geography offers a graduate certificate in development studies. Development studies is a well-established, interdisciplinary field of research with institutional centers at a number of major universities and several scholarly journals dedicated to its study. The certificate provides training in development studies to graduate students through a structured yet flexible program built around courses taught by CU faculty in a number of social science departments.

Because development issues such as agrarian change, labor migration, new social movements, industrial growth, urban planning and natural resource use cut across disciplinary divides, the study of development demands interdisciplinary approaches.

For more information, visit the department's Graduate Certificate in Development Studies (https://www.colorado.edu/geography/graduate-certificate-development-studies/) webpage.

Requirements
Admission Requirements
Currently enrolled graduate students at CU and nondegree ACCESS students with bachelor's degrees may pursue the development studies certificate by completing the four required courses with a grade of B or higher.

For more information, please contact the certificate director, Jennifer Fluri (Jennifer.Fluri@colorado.edu) or visit the department website (https://www.colorado.edu/geography/graduate-certificate-development-studies/).

Required Courses and Credits
The certificate requires the completion of 12 credits (four courses), at least two but not more than three of which should be taken in the Department of Geography.

Courses include credits, dependent upon status as MA, MS or PhD student. The required in addition, the graduate certificate in population studies requires 9-12 course requirements, please consult departmental staff. For more in addition to coursework, the graduate certificate on population studies requires participation in extracurricular offerings relevant to population studies. For MA or MS students, 10 hours of participation in extracurricular activities are required. For PhD students, 15 hours of participation in extracurricular activities are required. Such offerings can include:

- Attendance at the bi-weekly Population & Health workshop in IBS.
- Attendance at CUPC research presentations in IBS, typically one-hour sessions; check IBS website for schedule.
- Participation in methodological short courses and workshops, typically ranging from 4-40 hours.

Plan(s) of Study
For more information, visit the department's Graduate Certificate in Development Studies (https://www.colorado.edu/geography/graduate-certificate-development-studies/) webpage.

Population Studies - Graduate Certificate
Offered through the Population Program of the Institute of Behavioral Science (IBS), the graduate certificate in population studies recognizes master's and doctoral degree students for interdisciplinary work in issues related to population dynamics and its components, composition, distribution and change. The population program, which is international in scope and has an applied and policy-oriented focus, fosters research on population trends and patterns and provides training in population analysis. Students who are earning graduate degrees through the departments of geography, sociology or economics and are interested in majoring in population studies are eligible to petition for admission to the program.

Questions about the certificate program in population studies should be directed to cupc@colorado.edu

Requirements
Admission Requirements
All graduate degrees are awarded through departments and, therefore, graduate students wishing to pursue the Graduate Certificate in Population Studies must be first admitted into a departmental program. As certificates are only conferred with a degree, students must also make sure they satisfy all departmental degree requirements. For more information, please consult departmental staff.

Course Requirements
In addition, the graduate certificate in population studies requires 9-12 credits, dependent upon status as MA, MS or PhD student. The required courses include:

- Two required core courses that focus on population studies theory, methods and issues.
- For MA or MS students: an additional two courses with substantial population studies content (list below). One course must be outside the student's home discipline.
- For PhD students: an additional three courses with substantial population studies content (list below). Two courses must be outside the student's home discipline.

Footnotes:
1 For courses not included in this list, please check with the Director of the certificate program to assure sufficient demographic content.

Extracurricular Requirements
In addition to coursework, the graduate certificate on population studies requires participation in extracurricular offerings relevant to population studies. For MA or MS students, 10 hours of participation in extracurricular activities are required. For PhD students, 15 hours of participation in extracurricular activities are required. Such offerings can include:

- Attendance at the bi-weekly Population & Health workshop in IBS.
- Attendance at CUPC research presentations in IBS, typically one-hour sessions; check IBS website for schedule.
- Participation in methodological short courses and workshops, typically ranging from 4-40 hours.
• ICPSR offers summer workshops in Boulder each year; check their schedule.

• IBS Center for Research and Computing Services offers these on occasion; check IBS events.

• Annual conference on "Integrating Genetics and Social Sciences" (IGSS) typically held in the Fall; check IBS events or contact Jason.Boardman@colorado.edu.

• Annual Migration-Climate-Health workshops typically held in May; check IBS events or contact Lori.Hunter@colorado.edu.

• IBS’ graduate student Professionalization Seminars ("ProSem"); check IBS events or contact Stefanie.Mollborn@colorado.edu.

• CARTSS dissertation writing workshop; check IBS events or contact Carew.Boulding@colorado.edu.

• Many institutions outside of CU offer workshops as well. For example, check websites for Stanford, Berkeley.

Students should alert the Certificate Director (Lori.Hunter@colorado.edu) of their intention to participate in such events for certificate credit.

For more information, see the center’s Graduate Certificate Program in Population Studies (https://behavioralscience.colorado.edu/unit/population/graduate-certificate-in-population-studies/) webpage.

Plan(s) of Study

For more information, see the center’s Graduate Certificate Program in Population Studies (https://www.colorado.edu/ibs/cupc/grad_cert.html) webpage.

Geological Sciences

With one of the most successful graduate programs in the nation, the Department of Geological Sciences has enjoyed a reputation of excellence for more than 100 years. Our doctoral program is ranked among the top 10 percent of U.S. geology programs by the National Research Council, and CU Boulder is ranked as one of the top two universities in the world for geosciences by U.S. News and World Report.

Graduate students have an opportunity to work with over 35 tenured and tenure-track faculty who support a wide range of interdisciplinary research programs in such areas as: cosmochemistry and planetary geology; Earth science education; economic and energy resources; geobiology and astrobiology; geochemistry; geochronology and thermochronology; geodynamics, geophysics, and remote sensing; geomorphology and cryosphere; global change; hydrology; natural hazards; paleoclimate and paleoceanography; paleontology and paleobiology; petrology and mineralogy; sedimentology and stratigraphy; and structure and tectonics.

The graduate degrees offered include Master of Science (MS) and Doctor of Philosophy (PhD).

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the Geological Sciences (http://www.cugeology.org/) website.

Professional Licensure

The State of Colorado does not require individuals working in Geology or the Geological Sciences to obtain Professional Geology Licensure, however many states require professional geologists to pass the ASBOG Fundamentals of Geology (FG) and/or Practice of Geology (PG) examinations. Information regarding ASBOG examination specifications can be found on the ASBOG (https://www.asbog.org/) website.

Students planning to seek professional licensure or certification for employment in a state other than Colorado, are strongly recommended to contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how the education received at CU Boulder may assist the student in their efforts to gain licensure in that state.

Course code for this program is GEOL.

Master's Degree

• Geology - Master of Science (MS) (p. 1212)

Doctoral Degrees

• Geology - Doctor of Philosophy (PhD) (p. 1213)

• Geophysics - Doctor of Philosophy (PhD) (p. 1213)

Certificates

• Geophysics - Graduate Certificate (p. 1214)

• Hydrologic Sciences - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Abbott, Lon D. (https://experts.colorado.edu/display/fisid_145044/)
Senior Instructor; PhD, University of California, Los Angeles

Professor; PhD, University of California, Los Angeles
Courses

**GEOL 5001 (3) Physics and Chemistry of the Solid Earth**
Reviews the physical and chemical characteristics of the solid earth, from the core to the crust, and the processes that govern behavior through the earth. Lectures are supplemented with readings from the recent literature. Topics include convection, phase transitions, melt generation, forces of plate tectonics, origin of continents and lithosphere, continental tectonics, and earthquakes.

**Requisites:** Restricted to graduate students only.

**Recommended:** Require a course in basic chemistry and a course in physics.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5002 (3) Physics, Chemistry, and Biology of Sedimentary Systems**
Reading and discussion of current issues and themes in the stratigraphic sciences, including stratigraphic and facies analysis, spatial heterogeneity and self-organization, numerical modeling; origin, evolution, mass extinctions, and megatrajectories of life; and paleoceanographic and paleoclimatic signals in sedimentary rocks. Goal is to diversify students’ understanding of the role of physics, chemistry, and biology in attacking research problems in sedimentary systems.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Course

**GEOL 5003 (2) Graduate Writing Seminar**
Aims at improving graduate student writing, editing, and reviewing skills, while meeting student writing goals. Includes discussion of materials about effective writing, and peer-editing of text that students are producing for their graduate research endeavors.
GEOL 5021 (4) Petrology: Evolution of Crustal and Mantle Rocks
Origin, physical, and chemical properties of igneous and metamorphic rocks. This course develops a thermodynamic framework for the interpretation of geologic processes from observed mineral assemblages and rock textures. Laboratory component emphasizes the study of rocks in thin section and hand samples to understand earth processes in the mantle and crust.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4021
Requisites: Restricted to graduate students only.

GEOL 5042 (3) Computational Tools in Geosciences
Scientific research and teaching in geological sciences and related disciplines relies increasingly on computational tools. This class aims to introduce graduate students in the geological, geophysical and biogeochemical sciences to a wide range of commonly used concepts and open source data tools to empower them to find the right tool for their computational needs in research and teaching. Previously offered as a special topics course.
Repeatable: Repeatable for up to 6.00 total credit hours.
Recommended: Prerequisite Prior experience with at least one programming language is recommended.

GEOL 5060 (4) Oceanography
Examines the ocean as a system influencing the Earth’s surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal, shallow, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4060
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5080 (1-3) Advanced Hydrogeology and Modeling Concepts
Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification and prediction. Department enforced prerequisite: MATH 2300 or Fortran.
Additional Information: Departmental Category: Graduate Course

GEOL 5093 (4) Remote Sensing of the Environment
Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4093 and GEOG 4093 and GEOG 5093
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5101 (1) Introduction to Geological Sciences Faculty I
Welcomes and introduces all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week’s geology colloquium is discussed. Tutorials from staff introduce how the university works, what funding opportunities exist, and how and when to apply for such funding.
Grading Basis: Letter Grade

GEOL 5102 (1) Introduction to Geological Sciences Faculty II
Continues to introduce all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week’s geology colloquium is discussed. In addition, students craft reports on their intended research.
Grading Basis: Letter Grade

GEOL 5110 (3) Geomechanics
Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth’s surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Department enforced prerequisite: restricted to graduate students only and a course in calculus.
Grading Basis: Letter Grade

GEOL 5111 (3) Rheology: Fracture and Flow of Rocks
Focuses on the elastic and plastic deformation of planetary materials (e.g. rocks and minerals, melts, tectonic plates, etc.). Topic include stress and strain, failure criterion, fracture propagation, creep (dislocation and diffusion), and deformation of multilayered materials. Prior coursework in basic chemistry, physics, mineralogy/petrology, and structure/geometry is recommended.
Requisites: Restricted to graduate students only.

GEOL 5120 (3) Advanced Structural Geology and Tectonics
Provides valuable exposure to theory and applications related to deformation (rheology) of solid Earth materials as well as the structural and geophysical characteristics of the world’s major orogenic belts. The processes that will be covered span a wide range of Earth’s depths, from compaction in sedimentary rocks and flow of ice/salt near Earth’s surface to cataclastic mechanisms in fault rocks to plastic flow of deep crust and mantle rock. The course will involve lectures, some in-class and take home problem sets, some local field exercises and field data analysis, classic and modern paper discussions, and a research term project (written and oral presentation).
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4120
Recommended: Prerequisite GEOL 3120.
Grading Basis: Letter Grade

GEOL 5123 (3) Teaching and Learning in Post-Secondary Science Education
Introduces the science of learning and research-based instructional strategies. Open to students in any STEM discipline considering a career that involves college-level teaching. Students apply research on learning and teaching to the development of instructional materials for a target course they envision teaching at the college level in the future. Recommended: Prerequisite at least one semester teaching/TAing undergraduate courses (waived with instructor approval).

GEOL 5125 (3) Communicating Earth Science with the Public
Introduces research on science communication and discusses examples drawn from geoscience. Students apply research on science communication to conceptualizing how to communicate about their specific geoscience research to the public in different contexts. Students should be familiar enough with their area of graduate research in geoscience to apply different models of science communication to it. Requisites: Restricted to graduate students only.

GEOL 5150 (2) Planetary Field Geology
Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4150
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course
GEOL 5185 (3) Geomicrobiology
Examines how microbial and chemical processes interact on the Earth's surface today and have shaped the planet throughout its history. Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4185, ENVS 4185, and MCDB 4185
Grading Basis: Letter Grade

GEOL 5215 (2) Geochronology and Thermochronology
Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4215
Additional Information: Departmental Category: Graduate Course
Repeatable: Repeatable for up to 5.00 total credit hours.

GEOL 5216 (1) Geochronology Reading and Discussion Seminar
The goals of this reading and discussion seminar are to: 1) learn key aspects of a selected geochronology topic, 2) read, critically evaluate, and discuss peer-reviewed scientific papers that include geochronology data, methods, and interpretations, and 3) set up a framework and appropriate environment in which participants will discuss the next steps to address the big problems associated with each theme. This course will focus on a different geochronology theme each time that it is offered. A theme will be selected based on conversations among interested participants. At the beginning of the semester, weekly discussion topics and associated papers will be chosen to systematically work through concepts associated with that theme. Previously offered as a special topics course.

Repeatable: Repeatable for up to 5.00 total credit hours.

GEOL 5225 (3) Stable Isotope Fractionation in Biogeochemical Processes
Investigates the origins of stable isotope fractionation in geochemical systems with special emphasis on the role of biological catalysts as key drivers of isotopic effects during biogeochemical transformations. The class will cover a wide range of topics relevant to isotope fractionation including partition functions, diffusional, enzymatic and equilibrium isotope effects, open and closed system behavior, Rayleigh distillation, reservoir effects, enzymatic catalysis, physiological drivers and signal preservation.

Recommended: Prerequisites MATH 1300 or APPM 1350.

GEOL 5270 (3) Marine Chemistry and Geochemistry
Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO2; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4270
Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5280 (3) Aqueous and Environmental Geochemistry
Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations and microbial geochemistry. Department enforced prerequisite: GEOL 3320 or 2 year of college chemistry.

Additional Information: Departmental Category: Graduate Course

GEOL 5305 (3) Global Biogeochemical Cycles
Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global-scale measurements of element fluxes from satellites, aircraft and measurement networks. Department enforced prerequisite: restricted to graduate students only, general chemistry and some organic chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5840
Additional Information: Departmental Category: Graduate Course

GEOL 5330 (3) Cosmochemistry
Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4330 and ASTR 4330 and ASTR 5330
Additional Information: Departmental Category: Graduate Course

GEOL 5341 (3) The Cryosphere: Earth's Icy Environments
Serves as an advanced introductory course in to the cryosphere. The course covers the nature of ice and the icy component of the Earth System, and how changing ice affects society. The course will not cover sea ice.

Requisites: Restricted to graduate students only.

GEOL 5380 (3) Fundamentals of Stable Isotope Geochemistry
This course teaches students the fundamental principles of stable isotope fractionation during physical and biological processes, and the application of these behaviors to a wide range of important geologic questions. The course will use classic case studies from the geologic record to illustrate these principles.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4380
Requisites: Restricted to graduate students only.

GEOL 5420 (3) Quaternary Dating Methods
Features in-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course
GEOL 5430 (3) Paleoceanography and Paleoclimatology
Examines scientific tools, data, and theories related to the dramatically varied past climate of the Earth. Focus will be on marine records of climate change and ocean circulation, but ice cores and other continental archives will also be discussed. Course covers the Cenozoic Era (66 Ma to present), but with particular emphasis on the Quaternary ice age cycles.
Recommended: Prerequisites Introductory geology and introductory oceanography or atmospheric science.
Additional Information: Departmental Category: Graduate Course
GEOL 5432 (3) Active Tectonics
Considers the physical processes that drive coseismic and interseismic strain in the upper crust on Earth. It is focused on recognition and interpretation of surface strain produced by active faulting, folding and flexure at a range of timescales. This includes defining how coseismic strain cycles act to build geologic structures while considering methods of analysis with rapidly emerging remotely sensed and geochronologic datasets to quantify strain rates for seismic hazard assessment. Previous coursework in structural geology, geomorphology and remote sensing is recommended.
Repeatability: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade
GEOL 5474 (4) Vertebrate Paleontology
Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and MUSM 5474
Additional Information: Departmental Category: Graduate Course
GEOL 5555 (3) Topics in Macroevolution
Macroevolution extends beyond the limits of microevolution by including processes that encompass many species, in both recent and fossils organisms. Some of the topics include evolutionary novelty and innovation, developmental evolution, disparity and diversity dynamics, and extinction. We will survey case studies, methods, and the current literature.
Repeatability: Repeatable for up to 9.00 total credit hours.
GEOL 5611 (3) Organic Geochemistry
Explores the *biomarker concept* as a tool to elucidate microbial, biogeochemical, and climatic processes in natural systems through three fundamental goals: a) characterization and classification of organic molecules in complex, natural mixtures; b) biosynthesis, transport, transformation, preservation and destruction of organic matter in nature; c) application of lipid biomarkers and their stable isotope composition to study biological, biogeochemical, and climatic processes in modern and ancient systems.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4611
Recommended: Prerequisites CHEM 1113 or equivalent from undergraduate degree and GEOL 5270 or GEOL 5280 or GEOL 5305 or GEOL 5675.
GEOL 5612 (3) Techniques in Organic Geochemistry
Explores the techniques in analytical chemistry and organic geochemistry for the study of lipid biomarkers in the environment, which include the following topics: a) Extraction of environmental samples and separation of lipid classes; b) Analysis of apolar lipids using gas chromatography-mass spectrometry (GC-MS); c) Determine the stable isotope composition of lipids using GC-isotope ratio-MS (GC-IR-MS); d) Analysis of polar lipids using high performance liquid chromatography-mass spectrometry (HPLC-MS). Requires previous coursework in general chemistry and Organic Geochemistry.
Recommended: Prerequisites Introductory or advanced courses in organic chemistry, biochemistry, biogeochemistry, geochemistry, geomicrobiology, paleoclimate, or geology.
GEOL 5660 (3) Sedimentology & Geobiology of Carbonates
Carbonate sedimentary rocks are a significant component of the geobiological rock record, capturing a history of organisms and the environments they inhabit. This course will focus on how carbonate sediments are formed, deposited, and lithified and what influences the preservation and alteration of textural and geochemical signals. We will cover facies identification, interpreting depositional environment, and carbonate geochemistry, with a particular emphasis on recent advances and unanswered questions at the intersection of carbonates and geobiology, including the role of microbial carbonate precipitation and/or dissolution in the formation and degradation of stromatolites, carbonate muds, ooids, etc.
Recommended: Prerequisite prior coursework in Sedimentology.
GEOL 5670 (3) Isotope Geology
Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiocemistry, and petroleum genesis.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4670
Additional Information: Departmental Category: Graduate Course
GEOL 5675 (3) Stable Isotopes in Paleoclimate and Paleocoeology
Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4675
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Course
GEOL 5690 (3) Tectonic History of the Western United States
Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarometry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class.
Requirements: Requires prerequisite courses of GEOL 3120 and PHYS 1110 (all minimum grade D-).
Additional Information: Departmental Category: Graduate Course
GEOL 5700 (1-4) Geological Topics Seminar
Offers seminar studies in geological subjects of special current interest. Primarily for graduate students, as departmental staff and facilities permit. Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term. Requisites: Restricted to graduate students only. Additional Information: Departmental Category: Graduate Course

GEOL 5701 (2) Super-Problems in Quaternary Climate
Investigates major problems in the study and understanding of Quaternary climate variation, in seminar format. Each year one major topic will be addressed, such as: the physics and chemistry of the Ice Age ocean circulation; the theory and mechanics of glacial/interglacial atmospheric CO2 change; the origins of the 20, 40, and 100 kyr orbital (Milankovitch) climate cycles. Recommended: Prerequisites Introductory geology and climatology, oceanography, paleoclimatology, or paleoceanography. Additional Information: Departmental Category: Graduate Course

GEOL 5702 (1-3) Geomorphology Seminar
Explores the dynamics and forms of the earth's surface through critical reading and discussion of both classical and modern literature. Repeatable: Repeatable for up to 10.00 total credit hours. Requisites: Restricted to graduate students only. Additional Information: Departmental Category: Graduate Course

GEOL 5703 (1) Seminar in Tectonics
Focuses on a wide variety of topics related to crust, mantle and whole earth tectonics. Published papers from recent peer-reviewed literature are read and discussed. The format and specific topics will vary each semester (e.g., a relatively focused theme or open format) and will in part be determined by the makeup of enrolled students. Department enforced prerequisite: restricted to graduate students only. Repeatable: Repeatable for up to 6.00 total credit hours. Grading Basis: Letter Grade Additional Information: Departmental Category: Graduate Course

GEOL 5704 (1) Carbonates Seminar
Focuses broadly on the topic of carbonates, including sedimentology, geochemistry, and geobiology of carbonates. Each semester will have a distinct theme under these sub-topics. Students will be responsible for leading discussion on individual readings and will be able to provide input on both the theme and the individual reading selections. Upper-level GEOL majors can register with instructor approval. Repeatable: Repeatable for up to 10.00 total credit hours.

GEOL 5705 (1-3) Seminar in Paleoclimate
Investigates major problems in the study and understanding of past climate variations as preserved in the geologic record. Course format is a seminar-style critical reading and discussion of journal articles in paleoclimatology and paleoceanography. Topical focus varies from year to year. Prior coursework in geology, climate science, and/or paleoclimate is recommended. Repeatable: Repeatable for up to 9.00 total credit hours.

GEOL 5711 (1-3) Igneous and Metamorphic Field Geology
Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and GEOL 3020. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term. Additional Information: Departmental Category: Graduate Course

GEOL 5712 (1-3) Structural Field Geology
Methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and GEOL 3020. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term. Additional Information: Departmental Category: Graduate Course

GEOL 5714 (2) Field Geophysics
Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic and electrical measurements. Department enforced prerequisite: restricted to graduate students only and GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term. Additional Information: Departmental Category: Graduate Course

GEOL 5715 (1-3) Field Techniques in Surficial Geology and Geohydrology
Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements and using field data for water budget analysis. Department prerequisite: GEOL 2001 or GEOL 2700. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term. Additional Information: Departmental Category: Graduate Course

GEOL 5716 (1-3) Environmental Field Geochemistry
Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters and atmospheric particulates. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and CHEM 1011 and CHEM 1031 or CHEM 1113 or CHEM 1133 and GEOL 3320. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term. Additional Information: Departmental Category: Graduate Course

GEOL 5717 (2) Field Seminar in Geology and Tectonics
Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and at least one of the following: GEOL 3120 or GEOL 3320 or GEOL 3430. Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term. Additional Information: Departmental Category: Graduate Course
GEOL 5719 (2) Field Analysis and Tectonics of Crystalline Rocks
Introduces basic and advanced mapping tools and concepts for structural and tectonic analysis of solid-state and magmatic deformation, metamorphism, and fluid flow in igneous and metamorphic rocks. Includes some digital mapping concepts using smartpad and smartphone applications, and computer-based analysis of structure data. Includes multi-day mapping projects in the Front Range, and in western Colorado, southern Wyoming, or northern New Mexico. Also includes introductions to Precambrian tectonic history of western North America and mineral resources of Colorado.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4719
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

GEOL 5725 (1-4) Field Based Special Topics in Geoscience
Explores selected geological subjects of special interest in a field setting.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4725
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Course

GEOL 5755 (2) Field Geobiology
Provides students technical fieldwork skills in the interdisciplinary field of geobiology, spanning modern environments and to ancient environments in preserved in rock record, and spanning techniques from geochemistry, environmental microbiology, and sedimentology.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4755
Repeatable: Repeatable for up to 8.00 total credit hours.

GEOL 5775 (3) Introduction to Numerical Modeling in Geoscience
Numerical models play an essential role across the geosciences, with applications that include hypothesis exploration, data interpretation, and prediction. This course provides a hands-on introduction to numerical modeling. Students learn scientific programming and modeling concepts by iterating through a series of model-development assignments in Python and Matlab. Applications span a range of topics in the geosciences, with emphasis on physical processes that involve mass, energy, and/or momentum transport.

GEOL 5800 (3) Planetary Surfaces and Interiors
Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5800
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Course

GEOL 5830 (3) Topics in Planetary Science
Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and ASTR 5830
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Graduate Course

GEOL 5835 (1) Seminar in Planetary Science
Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and ASTR 5835
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5840 (1-3) Independent Study-Quaternary Geology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Course

GEOL 5841 (1-3) Independent Study-Economic Geology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5842 (1-3) Independent Study-Petrology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5843 (1-3) Independent Study-Sedimentology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5844 (1-3) Independent Study-Structure/Tectonics
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5845 (1-3) Independent Study-Geochemistry
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5846 (1-3) Independent Study-Geophysics
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5847 (1-3) Independent Study-Hydrology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5848 (1-3) Independent Study-Paleontology
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5849 (1-3) Independent Study-Paleoclimate
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5850 (1-3) Independent Study-Quaternary Geosciences
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

GEOL 5851 (1-3) Independent Study-Sediment Petrology
Repeatable: Repeatable for up to 7.00 total credit hours.

GEOL 5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences
Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.
Additional Information: Departmental Category: Graduate Course
GEOL 5862 (1-4) Geology Independent Study
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4862
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

GEOL 5910 (3) Geothermodynamics
Provides a solid foundation in chemical thermodynamic concepts and calculations as applied to geochemistry and geobiology.

GEOL 6050 (3) Space Instrumentation
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and ASEN 6050
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Course

GEOL 6060 (4) Petroleum Geology of Turbidite Systems
Covers the exploration and production aspects of petroleum submarine fans and turbidite systems.
Requisites: Requires prerequisite course of GEOL 6330 (minimum grade B).
Additional Information: Departmental Category: Graduate Course

GEOL 6310 (3) Sedimentary Petrology
Covers interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Department enforced prerequisites: GEOL 3010 and GEOL 3020 and GEOL 3430 or equivalents.
Additional Information: Departmental Category: Graduate Course

GEOL 6330 (4) Applied Sequence Stratigraphy and Basin Analysis
Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop and their applications to basin analysis in petroleum exploration. Department enforced prerequisite: restricted to graduate students only and introductory undergraduate physics and sedimentology/stratigraphy.
Additional Information: Departmental Category: Graduate Course

GEOL 6610 (3) Earth and Planetary Physics 1
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 6610 and PHYS 6610
Additional Information: Departmental Category: Graduate Course

GEOL 6620 (3) Earth and Planetary Physics 2
Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 6620 and PHYS 6620
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Course

GEOL 6630 (3) Earth and Planetary Physics 3
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 6630 and PHYS 6630
Additional Information: Departmental Category: Graduate Course

GEOL 6650 (1-3) Seminar in Geophysics
Advanced seminar studies in geophysical subjects for graduate students.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 6650 and PHYS 6650
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Course

GEOL 6655 (3) InSAR Processing and Interpretation
Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 6655
Grading Basis: Letter Grade

GEOL 6760 (2) Geophysical Inverse Theory
Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations. Department enforced prerequisites: a course in calculus and a course in computer programming (any language).
Equivalent - Duplicate Degree Credit Not Granted: PHYS 6760
Additional Information: Departmental Category: Graduate Course

GEOL 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Course

GEOL 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Graduate Course

GEOL 6960 (1-3) Plan II Master's Research
The Plan II program requires at least 3 credit hours of GEOL 6960 (Plan II Master's Research) under the supervision of the advisory committee.
Additional Information: Departmental Category: Graduate Course

GEOL 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Additional Information: Departmental Category: Graduate Course

Geology - Master of Science (MS)
Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARc). Related areas of study include geography, astrophysical and planetary sciences, atmospheric and oceanic sciences,
chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (https://www.colorado.edu/geophysics/geophysics-graduate-certificate/), oceanography (https://www.colorado.edu/atoc/certificate/), and hydrological sciences (https://www.colorado.edu/program/hydrosciences/). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the Geological Sciences website (https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/).

**Requirements**

**Admission Requirements**

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests and letters of recommendation. The Graduate Record Examination (GRE) is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

**Prerequisites**

**Program Requirements**

Candidates for the master's degree in geological sciences must complete at least 30 hours of graduate credits either with a thesis (Plan I) or without a thesis (Plan II). The only specifically required classroom courses are GEOL 5101 Introduction to Geological Sciences Faculty I and GEOL 5102 Introduction to Geological Sciences Faculty II (1 credit each).

A maximum of 6 credit hours may be completed at the 3000- or 4000-level to count toward the 30 hours. A maximum of 9 graduate-level credits may be transferred from another university. Both types of substitution are at the discretion of the student's principal advisor and the department's Associate Chair for graduate studies.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the department's Information for Prospective Graduate Students (https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/) webpage.

**Plan I: Thesis Option**

Students must complete a minimum of 4, but no more than 6, credit hours of Master's Thesis (GEOL 6950) as part of the 30 credit hour requirement.

**Plan II: Non-thesis Option**

The Department of Geological Sciences typically does not admit students into a Plan II (non-thesis) master's program, but Plan I or PhD candidates occasionally transfer into this option. Students must complete 3 credit hours of Plan II Master's Research (GEOL 6960) under the supervision of the student's advisory committee, as part of the 30 credit hour requirement.

**Geology - Doctor of Philosophy (PhD)**

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARC). Related areas of study include geography, atmospheric and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (https://www.colorado.edu/geophysics/geophysics-graduate-certificate/) and oceanography (https://www.colorado.edu/atoc/certificate/), and a subplan in hydrological sciences (https://www.colorado.edu/program/hydrosciences/). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the department's Graduate Degree Programs (https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/) webpage.

**Requirements**

**Admission & Prerequisites**

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests, and letters of recommendation. The Graduate Record Examination is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program. Entering students normally have completed at least 24 credit hours of basic courses in geological sciences and two semesters each of chemistry, physics and calculus. In some cases, undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological sciences.

**Program Requirements**

Candidates for the doctoral degree must complete at least 30 credit hours of coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder. The only specifically required courses are GEOL 5101 and GEOL 5102, Introduction to Geological Sciences Faculty 1 (1 credit each). In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation (GEOL 8990), with not more than 10 of these taken before the semester during which the comprehensive examination is passed, and not more than 10 taken in any one semester.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration, and degree requirements on the department's Information for Prospective Graduate Students (https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/) webpage.

**Geophysics - Doctor of Philosophy (PhD)**

The interdisciplinary doctoral program in geophysics encourages students with a variety of undergraduate backgrounds to pursue graduate study in the physics of the Earth, with special emphasis on the interior of the planet. Students specialize in one of the subfields of geophysics while gaining a broad, general background in the discipline and in-depth education in the relevant aspects of the parent fields of geology, physics and engineering.
Students enter the program by applying for admission to one of the following departments:

- aerospace engineering sciences
- astrophysical and planetary sciences
- civil, environmental and architectural engineering
- electrical and computer engineering
- geography
- geological sciences
- mechanical engineering
- physics

Upon satisfactory performance on the doctoral preliminary examination given by the home department, the student may formally apply for admission to the geophysics doctoral program.

The program is administered by the geophysics graduate program committee, which includes representatives from each of the participating departments. The comprehensive examination and the dissertation defense are directed by this committee, with a faculty member of the home department normally chairing these procedures.

For more information, visit the Geophysics Studies Program (http://www.colorado.edu/geophysics/) website.

### Requirements

#### Candidates for the doctoral degree

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder.

In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed.

Completion with a grade of B or better of a total of three geophysics core courses and one credit hour for the Seminar in Geophysics.

A certificate in geophysics will be awarded upon the student’s completion of degree requirements in their home department. Upon request from a student, the program director and the student’s advisor will determine whether a student has met the requirements for the certificate and will generate a letter to the appropriate department head and dean. The certificate is not intended as a substitute for a degree and will be awarded only upon completion of a graduate degree.

### Additional courses compatible with the student’s research interests to complete the 60-credit minimum.

For a list of approved elective courses, visit the Geophysics PhD Program (https://www.colorado.edu/geophysics/academics/geophysics-phd-program/) webpage.

### Geophysics - Graduate Certificate

The geophysics graduate certificate offers a coherent curriculum in geophysics that can complement and supplement a student’s regular degree program and encourages multi-disciplinary education in the area of geophysics. The geophysics certificate program allows students to obtain recognition for their accomplishments in geophysics without having to switch into the geophysics degree program.

### Requirements

#### Admission Requirements

A student wishing to be considered for a certificate in geophysics must be pursuing a graduate degree in one of the participating graduate departments (ASEN, APS, CEAE, ECEN, GEOG, GEOL, MCEN, PHYS). Students from outside the participating departments can apply for entry to the geophysics certificate program by submitting a letter addressed to the Geophysics Graduate Program Committee.

A student must have a course background that includes mathematics through three semesters of calculus and four undergraduate science or engineering courses.

### Program Requirements

All students must take at least three geophysics core courses and the Seminar in Geophysics. At least one of the three geophysics core courses must be from the earth and planetary physics (EPP) series, and another must be from outside the student’s home department. Most geophysics core courses are offered once every two years.

Completion with a grade of B or better of a total of three geophysics core courses (at least one from the EPP sequence) and one credit hour for the Seminar in Geophysics.

A certificate in geophysics will be awarded upon the student’s completion of degree requirements in their home department. Upon request from a student, the program director and the student’s advisor will determine whether a student has met the requirements for the certificate and will generate a letter to the appropriate department head and dean. The certificate is not intended as a substitute for a degree and will be awarded only upon completion of a graduate degree.

1 Or equivalent in home department.
Germanic and Slavic Languages and Literatures

As a department of foreign languages, literatures and cultural studies, the Department of Germanic and Slavic Languages and Literatures prepares students for life and careers in an increasingly global world. Our programs in German, Russian, East European and Eurasian and Nordic Studies enable students to combine their language training with interdisciplinary study of the regions where their language is spoken. The cultural legacies of the Germanic and Slavic countries continue to shape fields such as literature, art, music, film, philosophy and political science.

Course codes for these programs are GRMN, GSLL, RUSS, REES, SCAN and SWED.

Courses

GRMN 5010 (3) Theory and Practice of German Studies  
Provides a graduate-level introduction to German Studies, with emphasis on theoretical approaches and current trends in German Studies. Special attention will be given to developing the tools necessary for advanced criticism: close-reading skills, mastery of critical terminology, and training in a range of theoretical approaches. The main goals of this course are (1) to introduce students to critical approaches to literature/art/film and recent theoretical trends in German literary and cultural studies, (2) to give students the opportunity to deepen interpretive skills through close reading and discussion of representative texts, and (3) to encourage students to explore theoretical approaches to literary and cultural material.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: German Graduate Courses

GRMN 5020 (3) Applied Linguistics and Foreign Language Teaching Methodology  
Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: German Graduate Courses

GRMN 5030 (3) Foundations of Critical Theory  
An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: German Graduate Courses

GRMN 5051 (3) Critical Theory of the Frankfurt School  
Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.  
Equivalent - Duplicate Degree Credit Not Granted: GRMN 4051  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: German Graduate Courses

GRMN 5210 (3) Seminar: The Age of Enlightenment  
Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: German Graduate Courses

GRMN 5220 (3) Seminar: Topics in the Age of Goethe  
Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include Sturm und Drang as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: German Graduate Courses

GRMN 5231 (3) The Invention of Sexuality  
Traces the development of various concepts of sexuality, from ideas inherited from antiquity to the modern "invention" of "homosexuality" by German and Austrian sexologists and psychoanalysts, up to and including contemporary queer critiques. Students will also gain an understanding of how cultural beliefs and biases about queer sexualities are rooted in both the history of science and changing/persisting gendered norms. Explores the intersecting philosophical, literary, and ideological underpinnings of process(es) of marginalization of both women and queer sexualit(ies). Taught in English.  
Equivalent - Duplicate Degree Credit Not Granted: GRMN 4231  
Additional Information: Departmental Category: German Graduate Courses

GRMN 5301 (3) Gender, Race, and Immigration in Germany and Europe  
Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.  
Equivalent - Duplicate Degree Credit Not Granted: GRMN 4301 and WGST 4301  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: German Graduate Courses
GRMN 5310 (3) Seminar: Topics in the 19th Century
Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5320 (3) Seminar: The German Novel from 1901--1956
Beginning with T. Mann's Buddenbrooks, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5330 (3) Seminar: German Intellectuals and Society Between the Wars
Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5410 (3) Seminar: Topics in Early 20th Century German Society
Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5420 (3) Seminar: Topics in Contemporary German-speaking Societies
Analyzes artistic and literary engagement with major discussions and debates in contemporary German-speaking societies. Course also provides an introduction to theoretical approaches relevant to the topic. See specific topic description for more details.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5504 (3) Goethe's Faust
Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English.
Equivalent - Duplicate Degree Credit Not Granted: GRMN 4504 and HUMN 4504
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5510 (3) Seminar: Open Topics in German Civilization
Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5520 (3) Seminar: Current Issues in German Literature and Media
Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 5900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 6900 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 7010 (1-3) Writing Colloquium
Prepares students for the qualifying examination paper and dissertation, and equips students with the skills needed to transform seminar papers into publishable work. Includes sessions on dissertation writing, publishing journal articles, preparing a reading list, and conducting archival research. Required for students in the German Studies PhD program. Cannot be satisfied through transfer credit.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to German Studies PhD students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: German Graduate Courses

GRMN 7990 (1-6) Independent Study
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: German Graduate Courses
GRMN 7930 (1-6) Internship
Provides an academically supervised opportunity for doctoral students to earn credit while working for public or private organizations. Students supplement their work experience through directed readings and assignments. Students interested in applying for an internship must complete the Arts & Sciences Internship Application at http://advising.colorado.edu/sites/default/files/Internshipcredit.pdf. 1-6 hours;
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to German Studies graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GRMN 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements of the degree. For detailed information regarding doctoral dissertation credit, refer to Graduate School rules.
Repeatable: Repeatable for up to 100.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: German Graduate Courses

GSLL 5900 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Germanic and Slavic Courses

REES 5110 (3) Slavic Culture and Society
Examines important ideologies and myths in Slavic societies, with emphasis on contemporary movements and their reinterpretation of history. Acquaints students with major tools for study of cultures of Eastern Europe and the post-Soviet states: research methods, bibliography, transliteration, critical thinking and writing skills. Required for Russian MA. Taught in English. Formerly RUSS 5110.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5120 (3) Russia after Communism: Post-Soviet Politics and Culture
Explores the process of the re-invention and re-shaping of Russian national identity after the collapse of Communism. Topics will include the formation of a neoconservative and neo-imperialist agenda (as demonstrated by the Ukraine crisis), the growth of anti-Western attitudes, and the anti-Putin protest movement. Taught in English. Formerly RUSS 5120.
Equivalent - Duplicate Degree Credit Not Granted: REES 4120
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5210 (3) Topics in Russian, East European and Eurasian Culture
Selected topics in Russian, East European and Eurasian culture. No knowledge of Russian required. Taught in English. Formerly RUSS 5210.
Equivalent - Duplicate Degree Credit Not Granted: REES 4210
Repeatable: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5211 (3) History of Russian and Soviet Cinema
Surveys Russian cinema in historical and cultural context from early 20th century to the present. Taught in English. Formerly RUSS 5211.
Equivalent - Duplicate Degree Credit Not Granted: ARTF 5211 and REES 4211 and CINE 4211
Requisites: Restricted to graduate students only.

REES 5220 (3) Topics in Russian, East European and Eurasian Culture (in Russian)
Selected topics in Russian culture and society. Taught all or partly in Russian. Formerly RUSS 5220.
Equivalent - Duplicate Degree Credit Not Granted: REES 4220
Repeatable: Repeatable for up to 6.00 total credit hours.

REES 5221 (3) Stalinism: Culture and Society
Examines Soviet society and culture of the Stalin period (1929-1953). The Great Terror, Communist ideology, commercial practices, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English. Formerly RUSS 5221.
Equivalent - Duplicate Degree Credit Not Granted: REES 4221

REES 5251 (3) Russian and Soviet Queer Culture
Explores the contributions to Russian/Soviet literature, film, and the performing arts by such LGBTQ cultural icons as Nikolai Gogol, Marina Tsvetaeva, Sergei Eisenstein, and Pyotr Tchaikovsky. The course also surveys the history of social and legal restrictions on non-heteronormative behaviors in Russia from the medieval period to the present, with an emphasis on the emergence of LGBT rights activism and the reactionary rise of homophobia as a tool of nationalist politics in Putin's Russia. Taught in English. Formerly RUSS 5251.
Equivalent - Duplicate Degree Credit Not Granted: REES 4251

REES 5301 (3) American-Russian Cultural Relations
Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English. Formerly RUSS 5301.
Equivalent - Duplicate Degree Credit Not Granted: REES 4301
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5321 (3) Mythological Russia
Examines folklore, popular culture, and everyday life in contemporary Russia and Ukraine to reveal beliefs, ideals, and ideologies. Subjects include witchcraft, shamanism, healing, death, remembrance, nostalgia, collective memory, obscenity. Students will learn to analyze artifacts, photographs, interviews, memoirs, songs, stories, and rituals. Taught in English. Formerly RUSS 5321.
Equivalent - Duplicate Degree Credit Not Granted: REES 4321

REES 5352 (3) Russian Novel: Theory and Practice
Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. Formerly RUSS 5352.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5431 (3) Dostoevsky
Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English. Formerly RUSS 5431.
Equivalent - Duplicate Degree Credit Not Granted: RUSS 4431
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English
REES 5441 (3) Tolstoy
Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English. Formerly RUSS 5441.
Equivalent - Duplicate Degree Credit Not Granted: REES 4441
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5451 (3) Chekhov
Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Formerly RUSS 5451.
Equivalent - Duplicate Degree Credit Not Granted: REES 4451
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5471 (3) Women in 20th-21st Century Russian, East European and Eurasian Cultures
Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English. Formerly RUSS 5471.
Equivalent - Duplicate Degree Credit Not Granted: REES 4471 and WGST 4471
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present
Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English. Formerly RUSS 5481.
Equivalent - Duplicate Degree Credit Not Granted: REES 4481 IAFS 3621
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5821 (3) 20th Century Russian Literature and Art
Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism. Taught in English. Formerly RUSS 5821.
Equivalent - Duplicate Degree Credit Not Granted: REES 4821 AND HUMN 4821
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5830 (3) Topics in Literature and History
Taught in English. Formerly RUSS 5830.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5831 (3) Contemporary Russian Literature
Acquaints students with the most representative works of Russian writers after the collapse of the Soviet regime. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are in English. Taught in English. Formerly RUSS 5831.
Equivalent - Duplicate Degree Credit Not Granted: REES 4831
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5850 (4) Russian Film and Society
Examines topics in Russian film and TV series from sociohistorical and cultural perspectives, while simultaneously developing students' auditing, comprehension, and speaking skills in Russian language. Critical thinking and analytical approaches will be key to working through the course's material. Screenings, discussions, and written assignments are in Russian. Taught in Russian. Formerly RUSS 5850.
Equivalent - Duplicate Degree Credit Not Granted: REES 4850
Repeatable: Repeatable for up to 8.00 total credit hours.
Additional Information: Departmental Category: Russian

REES 5851 (3) Critical Thinking: Russian Film and Society (taught in English)
Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English. Formerly RUSS 5851.
Equivalent - Duplicate Degree Credit Not Granted: REES 4851
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5861 (3) Absurd and Supernatural in Russian Literature
Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharns, Bulgakov, Sinyavsky, Petrushevskaya and Pelevin within the contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Taught in English. Formerly RUSS 5861.
Equivalent - Duplicate Degree Credit Not Granted: REES 4861
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian Courses Taught in English

REES 5900 (1-6) Independent Study
See department for registration information. Department enforced requisite: graduate standing. Formerly RUSS 5900.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Russian

REES 6940 (1-3) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Formerly RUSS 6940.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian

REES 6950 (1-6) Master's Thesis
Formerly RUSS 6950.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Russian
The department offers an interdisciplinary MA in German studies, focusing on German-speaking central European society from the Enlightenment to the present. In addition to expertise in German literature, the faculty’s interdisciplinary strengths include comparative literature, philosophy, social and political theory, film, cultural studies, intellectual history, art history, gender studies, Jewish studies, and translation. To get a better idea of the department’s areas of specialization, prospective students are encouraged to consult the list of recent graduate seminars and the profiles of the graduate faculty and expanded graduate faculty. The faculty works closely with students to design their own course of study. Most German MA students receive a teaching assistantship and tuition waiver. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the MA in German studies, please visit the program’s website (https://www.colorado.edu/gsll/german-program/).

Students wishing to pursue the interdisciplinary master’s in German studies should read the requirements tab (p. 1220) of this catalog carefully.

**Education Abroad**

**Universities of Göttingen and Regensburg**

One year (10 months) of study, from mid-October to the end of July.

- Number of positions: One at each university.
- Benefits: Matriculation plus a monthly stipend for living expenses, and housing in a dorm.
- Note: German citizens are not eligible for the Regensburg exchange program, but are eligible for the Göttingen exchange program.

For more information on graduate exchange programs in Germany, visit the department webpage (https://www.colorado.edu/gsll/german/graduate/ma/).

For more information on any Education Abroad programs, scholarships and application information, contact Education Abroad, UCB 123, Boulder, CO 80309, (303) 492-7741 or visit the Education Abroad (http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=6E1E909F-9011-F4D1-DA01962CC1E53067) website.

**Requirements**

**Program Requirements**

Students applying to the MA degree are expected to have a BA or equivalent in German or BA-level proficiency in German with a BA in a related field, and should have a general knowledge of the German-speaking countries’ literature, history and culture.

The master’s degree requires either 24 credit hours of approved coursework and a master’s thesis (6 credit hours) or 30 credit hours of coursework without thesis, and reading knowledge of one foreign language in addition to German and English.

All German MA students must take Theory and Practice of German Studies (GRMN 5010). All German teaching assistants must also take Applied Linguistics and Foreign Language Teaching Methodology (GRMN 5020). For specific requirements, visit the department’s German MA (http://www.colorado.edu/gsll/german/graduate/ma/) webpage.

**Degree Plans**

**Plan I: Thesis Option (Standard Option)**

The thesis option requires 30 credit hours, including 24 hours of coursework and 6 thesis hours. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study

**German Studies - Master of Arts (MA)**

The department offers an interdisciplinary MA in German studies, focusing on German-speaking central European society from the Enlightenment to the present. In addition to expertise in German literature, the faculty’s interdisciplinary strengths include comparative literature, philosophy, social and political theory, film, cultural studies, intellectual history, art history, gender studies, Jewish studies, and translation. To get a better idea of the department’s areas of

**RUSS 5010 (4) Advanced Russian Seminar**

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4010

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**RUSS 5020 (4) Advanced Russian Seminar 2**

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4020

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**RUSS 5050 (4) Professional Russian**

Introduces graduate and advanced undergraduate students to various stylistic registers of Russian (business, politics, the Internet, TV, etc.). Develops new vocabulary and idiomatics, with a special focus on fluency of speech and written communication skills. Along with language training, the course offers an immersion into the world of contemporary Russian media, politics and culture. Taught in Russian.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4050

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Additional Information:** Departmental Category: Russian

**RUSS 5230 (3) Russian Cultural Idioms**

Analyzes Russian cultural discourse through Russian idioms. Taught in Russian. Formerly GSLL 5230.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4230

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian

**RUSS 5841 (3) History of Modern Russian Drama**

Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western dramatic theory. Surveys most influential directorial styles from Stanislavsky’s "method" to contemporary verbatim theatre. All readings are in English. Taught in English. Formerly GSLL 5841.

**Equivalent - Duplicate Degree Credit Not Granted:** RUSS 4841

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Russian Courses Taught in English
coursework may be taken with the approval of the associate chair of graduate studies.

**Dual Degree Program**  
**MBA/MA in German Studies**

To support the university’s mission of advancing knowledge across disciplines, the Leeds School of Business and the Department of Germanic and Slavic Languages and Literatures offer a dual degree, Master of Business Administration and Master of Arts in German studies. In most cases, students should be able to complete the dual degree in three years with a total of 70 credit hours.

Prospective students must apply to and meet the application and admission requirements for each program separately. See the Department of Germanic and Slavic Languages and Literatures (http://www.colorado.edu/gsll/german/graduate/) website to apply to the German studies MA program, and the Leeds School of Business (http://www.colorado.edu/business/mba/) website to apply to the MBA program.

**Russian Studies - Master of Arts (MA)**

The department offers an interdisciplinary professional MA in Russian, East European and Eurasian Studies (REEES) focusing on Russian language proficiency as well as Russian, East European and Eurasian cultures. The MA program is strongly interdisciplinary and students can pursue connections between Russian, East European and Eurasian history, politics and culture from the 19th through the 21st centuries. The faculty’s strengths include literature, cinema, folklore, literary/cultural theory, cultural studies, gender and sexuality studies, minority studies, nationalism, environmental humanities, sociolinguistics and pedagogy.

The faculty works closely with students to design their own course of study. Some REEES MA students receive a teaching assistantship and tuition waiver.

For contact information and more general information on the MA in Russian, East European and Eurasian studies, visit the REEES Program (http://www.colorado.edu/gsll/russian-program/) website or email gsll@colorado.edu.

**Requirements**  
**Course Requirements**

Russian MA students may take up to 12 credit hours in an outside area. Students frequently choose business, political science, geography, women and gender studies, education, history, linguistics, film studies, Jewish studies, religious studies, fine arts, and theater and dance, but students may pursue other options. All outside area courses must be approved by the Director of Russian Graduate Studies.

Upon approval of the Director of Russian Graduate Studies, students may take up to six credit hours of 3000- or 4000-level courses toward their MA degree.

Students interested in independent study should obtain an informational sheet and an Independent Study Contract from the department. Once the contract is approved by the chair, a staff member will enroll the student in the course. MA students may not take more than a total of 7 hours of independent study.

Transfer credit from accredited institutions is accepted by CU Boulder only after approval by the Director of Russian Graduate Studies and the Graduate School. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. MA students are allowed a maximum of 9 hours of transfer credit.

All students must pass the Russian language proficiency exam, consisting of written and oral components, during their final semester. Educated native Russian speakers are exempt from the language proficiency exam.

**Degree Plans**  
**Plan I: Thesis Option**

Students must complete at least 30 credit hours, including 24 hours of coursework and 6 thesis hours. Students must submit a thesis and pass an one-hour oral defense.

---

### German Studies - Doctor of Philosophy (PhD)

The German PhD offers close mentorship and a vibrant intellectual exchange between students and faculty. Graduate students work closely with leading scholars of modern literature, culture, philosophy and the arts from the Enlightenment to the present. PhD students are encouraged to conduct interdisciplinary research in German studies and a secondary concentration (i.e. classics, environmental science, art history, Jewish studies). To see the wide range of subjects covered in the German program, consult the research and publication profiles of the faculty and graduate students.
PhD students work and study with established scholars of German studies whose fields of expertise include aesthetics, literary criticism and theory, gender and sexuality studies, critical theory, cultural studies and contemporary art. In combination with advising in German literature and culture, students might seek advising in law, popular culture, media and other fields. Students participate in student-centered colloquia, regular speaker-events and workshops. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the PhD in German studies, please visit the program’s website (https://www.colorado.edu/gsll/german-program/). A timeline for the German Studies PhD (https://www.colorado.edu/gsll/timeline-german-studies-phd/) can be found on our German Program webpage.

**Requirements**

**Academic Preparation**

If a student has gaps in their academic preparation, the department may require them to take additional courses.

**Course Requirements**

The PhD program requires 30 hours of coursework at the 5000 level or above. Students who have completed an MA degree may be able to apply up to 21 hours toward this requirement.

In addition to coursework, students must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed. Students must be enrolled in a minimum of 5 dissertation hours during the semester in which they defend their dissertation (including summer session, if the defense is held over the summer).

Transfer credit from accredited institutions may be accepted by CU Boulder after approval by the graduate associate chair and the graduate school. PhD students are allowed a maximum of 21 hours of transfer credit. Thesis hours may not be transferred. All courses accepted for school. PhD students are allowed a maximum of 21 hours of transfer credit until the student has completed at least six credit hours of coursework from the MA. Students take the exam in the spring semester. The exam is based on a reading list the student assembles in close consultation with the members of their committee. Credit may not be transferred until the student has completed at least six credits of CU graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Thesis hours do not count toward the required 30 hours and cannot be used as transfer credit.

30

1 Students design this concentration in close consultation with their faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Examples of interdisciplinary concentrations include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics, and international affairs.

**Secondary concentration**

As a German studies PhD student, you will develop an interdisciplinary area of concentration. This secondary field will consist of at least 6 credit hours. You will design this concentration in close consultation with your faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics, and international affairs.

**Language Requirement**

In addition to demonstrating a high level of proficiency in German, you must demonstrate moderate proficiency in an additional foreign language. You can do this by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- completing a fourth-semester (second-semester sophomore) college language course with a grade of “pass,”
- completing a proficiency exam administered at CU, or
- presenting other evidence of moderate proficiency to the graduate associate chair.

Students should consult with the graduate associate chair at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before or during the semester in which the student advances to candidacy.

**Comprehensive PhD Examination**

The comprehensive exam tests a student's knowledge in areas of specialization appropriate for their anticipated dissertation topic. The exam takes place in the second or third year, depending on whether the student entered the program with a BA or MA and, if the latter, how many coursework credits were applied from the MA. Students take the exam in the spring semester. The exam is based on a reading list the student assembles in close consultation with the members of their committee. It consists of a take-home written exam followed by a two-hour-long oral examination that concentrates on the written exam, but may also address texts and topics on the reading list that are not covered in the written exam. The composition of the comprehensive exam committee follows the guidelines of the prospectus & dissertation committee composition below.
For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/) webpage.

**Prospectus & Dissertation Committee**
After successful completion of the comprehensive examinations, the student forms a dissertation committee and prepares a dissertation prospectus, to be followed by its defense a week later. The dissertation committee should be finalized and a dissertation prospectus submitted no later than the end of the fifth week of the semester following the successful completion of the comprehensive examination.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/) webpage.

**Dissertation**
The student formally begins to write their dissertation after successfully completing the comprehensive exam and defending the dissertation prospectus. The student should work closely with their dissertation advisor and committee members while writing the dissertation. In particular, students are advised to submit draft copies of each chapter to all members of their committee. Any subsequent changes to the student’s "timeline for completion" need to be circulated to the committee for approval. A final draft must be submitted to the committee members at least three weeks before the defense.

Students are required to register continuously for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive exam and extending through the semester in which the student successfully defends their dissertation.

A student who fails to register continuously for dissertation credit hours after passing the comprehensive exam must retake and pass the exam, and validate any coursework more than five years old, to regain status as a student in good standing with the graduate school.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (http://www.colorado.edu/gsll/comprehensive-examination-and-dissertation/) webpage.

**Recommended Coursework**

**Internships**
Students are strongly encouraged to complete at least one internship during their doctoral studies. Three hours of internship credit can count toward the 30 required hours of coursework for the PhD. GSLL graduate students have completed internships with businesses, nonprofit agencies and schools, and at locations including Colorado, Germany and Washington, DC. Internship offerings vary by semester. To enroll in a graduate internship, see the associate chair for graduate studies.

**Graduate Exchange Opportunities**
Students are recommended to spend one academic year abroad during their doctoral studies, on either a CU graduate exchange or an exchange funded by an agency such as the German Academic Exchange Service (DAAD) or the Fulbright Commission. For more information concerning DAAD, Fulbright and other grants, see the department's Scholarships & Awards (http://www.colorado.edu/gsll/scholarships-awards/) webpage.

In partnership with CU’s Office of International Education, GSLL offers funded graduate exchanges at the University of Göttingen and the University of Regensburg. These exchanges offer matriculation at the host institution for one academic year (10 months), plus a monthly stipend for living expenses. One position is offered per year at each institution. To qualify for an exchange, the student must demonstrate fluency in German and evidence of superior academic work.

Students interested in either program should notify the graduate associate chair by December 1 for study abroad the following academic year and formally apply by February 15.

**Graduate Certificate Programs**
Students are also encouraged to consider completing a graduate certificate program at CU. GSLL offers a critical theory graduate certificate (p. 1225). Other graduate certificates include the women and gender studies graduate certificate (p. 1352) and the comparative ethnic studies graduate certificate (http://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/ethnic-studies/comparative-ethnic-studies-graduate-certificate/).

**Critical Theory - Graduate Certificate**
This certificate offers students a background in philosophical foundations of critical theory. Drawing on disciplines such as philosophy, psychoanalysis, Marxism, literary criticism and sociology, critical theory develops analytical tools for describing and evaluating modern society and cultural production.

**Requirements**

**Procedures**
To complete the certificate program a student must:

1. Enroll in the certificate program by emailing the Certificate Director (https://www.colorado.edu/gsll/contact-us/) and the Graduate Program Assistant, Karen Hawley (gsll@colorado.edu).
2. Once a student has completed the requirements for the certificate, they should complete the Certificate Completion Worksheet (https://www.colorado.edu/gsll/critical-theory-completion-worksheet/) and submit it to the Graduate Program Assistant, Karen Hawley (gsll@colorado.edu). (gsll@colorado.edu) Note: Worksheet should be submitted the semester the student completes the certificate requirements (or any semester thereafter); certificate is awarded when the student completes their graduate program. Once the director has approved the worksheet, and once student completes their graduate program, the certificate will be added to the student’s transcript.

**Graduate Certificate Forms and Links**
- Certificate Elective Courses List (https://www.colorado.edu/gsll/graduate-certificate-program-critical-theory-elective-courses/)
- Affiliated Faculty List (https://www.colorado.edu/gsll/affiliated-faculty/)
- Certificate Completion Worksheet (https://www.colorado.edu/gsll/critical-theory-completion-worksheet/)

For more information contact the Certificate Director (https://www.colorado.edu/gsll/contact-us/) or the Graduate Program Assistant, Karen Hawley (Karen.Hawley@colorado.edu), (303) 492-3529.

**Required Courses and Credits**
A total of 12 credit hours are required for completion of the certificate. Of those, 6 credits are earned through a two-course core sequence designed to provide the intellectual history and philosophical foundations for contemporary research directions in critical theory. Students must also take two electives in theory. These courses may be from the list below,
and students can also request that the director approve other theory courses.

Students must obtain a grade of B or above in each course taken toward the certificate.

**Total Credit Hours**: 12

---

**History**

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All history graduate students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history); and
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses.

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

For more information, visit the department’s Graduate Students ([https://www.colorado.edu/history/graduate-program/](https://www.colorado.edu/history/graduate-program/)) webpage.

**Course code for this program is HIST.**

Professor; PhD, University of Massachusetts at Amherst

Courses

HIST 5000 (3) Historical Methods: Introduction to the Professional Study of History

Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

HIST 5012 (3) Graduate Colloquium in European History

Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. Department enforced requisite: admission to the graduate program in history.  
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Europe: Modern

HIST 5013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.  
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4013  
**Requisites:** Restricted to graduate students only.  
**Recommended:** Prerequisite HIST 1011 or HIST 1113.  
**Grading Basis:** Letter Grade  
**Additional Information:** Departmental Category: Europe: Specific Countries

HIST 5053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.  
**Equivalent - Duplicate Degree Credit Not Granted:** HIST 4053  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Europe: Specific Countries
HIST 5061 (3) Twilight of Antiquity
Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4061 and CLAS 4061 and CLAS 5061
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5106 (3) Graduate Colloquium in United States History
Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology. Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5116 (3) History of U.S. Foreign Relations, 1865-1940
Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II. Instructor's permission required for non-history graduate students.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4116
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5125 (3) Early American History to 1763
Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4125
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Chronological Periods

HIST 5126 (3) History of U.S. Foreign Relations Since 1941
Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4126
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5128 (3) The History of Modern Mexico Since 1821
Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4128
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5129 (3) Colloquium in Modern Asian History
Introduces major topics and themes in Asian history. Analyzes readings related to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution. Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General Departmental Category: Asia Content

HIST 5205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776
Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).
Equivalent - Duplicate Degree Credit Not Granted: HIST 4205
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Chronological Periods

HIST 5215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801
Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4215
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Chronological Periods

HIST 5222 (3) War and the European State, 1618-1793
Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).
Equivalent - Duplicate Degree Credit Not Granted: HIST 4222
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Modern

HIST 5223 (3) The French Revolution and Napoleon
Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades or revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4223
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Specific Countries

HIST 5235 (3) Jacksonian America
Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4235
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Chronological Periods
HIST 5303 (3) Venice and Florence during the Renaissance
Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.
Equivalent - Duplicate Degree Credit Not Granted: HIST 5303
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Specific Countries

HIST 5328 (3) The Modern Middle East, 1600 to the Present
Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4328
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5339 (3) Borderlands of the British Empire
Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4339
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 5343 (3) Spain and Portugal during the Golden Age
Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 5064.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4343
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Topical

HIST 5349 (3) Decolonization of the British Empire
Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4349
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General

HIST 5422 (3) World War I in Europe
Examines the origins of World War I, the military, social, and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the twentieth-century world.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4422
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Modern

HIST 5448 (3) Wars of Liberation in Southeast Asia
Uses the contemporary nations of Indonesia, Myanmar, and Singapore as case studies to examine the making and unmaking of European and Japanese colonialism in Southeast Asia in the years surrounding World War II. In what ways did different communities understand and narrate imperialism and independence? How can we understand wars of liberation as local, regional, and global experiences, with legacies for today?
Equivalent - Duplicate Degree Credit Not Granted: HIST 4448 and ASIA 4448
Grading Basis: Letter Grade

HIST 5538 (3) History of Modern India
Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4538
Requisites: Restricted to graduate students only.
Recommended: Prerequisite 6 hours of any history coursework.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5544 (3) History of Yiddish Culture
Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and JWST 4544
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

HIST 5548 (3) History of Modern India
Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4548
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content
HIST 5616 (3) History of Gender and Sexuality in the United States to 1870
Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4616
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5619 (3) Women in East Asian History
Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4619
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 5628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949
Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics a Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4628
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States
Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics, and queer cultural resistance.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4636
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5638 (3) Contemporary China: Radicalism and Reform, 1949 to Present
Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rising as a world power.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4638
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5658 (3) China and Islam from the 7th Century to the 20th Century
Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4658
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5728 (3) Modern Japanese History
Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4728
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5738 (3) History of Early Modern Japan (1590-1868)
Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).
Equivalent - Duplicate Degree Credit Not Granted: HIST 4738
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 5761 (3) Roman Law
Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.
Equivalent - Duplicate Degree Credit Not Granted: HIST 4761 and CLAS 4761 and CLAS 5761
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5840 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5841 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5842 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Modern

HIST 5843 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Specific Countries

HIST 5844 (1-3) Independent Study-Europe/Topical
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Topical
HIST 5845 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Chronological Periods

HIST 5846 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5847 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 2

HIST 5848 (1-3) Independent Study
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5849 (1-3) Independent Study
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6000 (3) Teaching History in the University
Introduces graduate students to basic pedagogy with special attention to discipline-specific methods, practices, and challenges in teaching history at the college level. In touching upon and integrating the several stages of teaching in a graduate student's career and after, this course provides a solid foundation for students to continue their pedagogical development as their instructional experience and skills become more advanced.
Requisites: Restricted to graduate students only.

HIST 6012 (3) Readings in Modern European History
Graduate Readings in Modern European History will explore a facet of Modern European History in depth. Topic will very by instructor.
Requisites: Restricted to History (HIST) graduate students only.
Additional Information: Departmental Category: Europe: Modern

HIST 6013 (3) Readings in English History to 1714
Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethno genesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6015 (3) Readings in American Colonial History
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Chronological Periods

HIST 6016 (3) Readings in American Diplomatic History
Requisites: Restricted to graduate students only.
Recommended: Requisite undergraduate work in American history.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6020 (3) Modern Empires: Readings in Imperial History
Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6028 (3) Readings in Modern Latin American History
Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite HIST 5128.
Additional Information: Departmental Category: World Areas: Specific Regions

HIST 6030 (3) Readings: Frontiers and Borderlands in the Americas
Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethno genesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6109 (3) Readings in Asian History
Explores a specific theme in Asian History in depth. Topic may vary each semester.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 6113 (3) Readings in English History to 1714
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Specific Countries

HIST 6115 (3) Readings in American Colonial History
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Chronological Periods

HIST 6116 (3) Readings in American Diplomatic History
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6123 (3) Readings in English History Since 1688
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Specific Countries

HIST 6150 (3) Critical and Theoretical Issues in Museums
Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and ARTH 6150 and ANTH 6150
Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-).
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6212 (3) Readings in 17th Century Europe
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Modern

HIST 6317 (3) Readings in the American West
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 2
HIST 6326 (3) Readings in United States Intellectual History
Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse.
Requisites: Restricted to History (HIST) graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6329 (3) Readings in Comparative Ethnohistory
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6330 (3) History of Sex and Sexuality
Examines major historical trends in the study of meanings and practices of sex and sexuality. Focuses on emergence and negotiation of sexual matters in circumstances where sex and identity were not coterminous.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6349 (3) Decolonization in Transnational Perspective: The End of the British Empire in S Asia & Middle East
Examines Britain's withdrawal from South Asia and the Palestine mandate. Topics include collaboration, anticolonial resistance, Indian and Palestinian nationalisms, zionism, transcolonial connections, counter insurgency, and partition.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Comparable and General
Departmental Category: Asia Content

HIST 6410 (3) Readings in Environmental History
Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Formerly HIST 6417.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6413 (3) Readings in Modern German History
Requisites: Restricted to graduate students only.
Recommended: Requisite general background in European history.
Additional Information: Departmental Category: Europe: Specific Countries

HIST 6414 (3) Readings in European Intellectual History
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Topical

HIST 6420 (3) Memory and History in Transnational Perspective
Engages in debates about historical methods and how the past is represented. Central topics will include memory and the forces of nationalism and war; commemoration and monuments; the role of memory in the construction of race and ethnicity; personal past and cultural remembrance; and the relationships between academic, public, and popular histories.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6427 (3) Readings in African American History
Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 2

HIST 6511 (3) Readings in Medieval History
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 6526 (3) Readings in U.S. Social History, 1880--1940
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6528 (3) Reading in South Asian History
Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: World Areas: Specific Regions
Departmental Category: Asia Content

HIST 6540 (3) Readings in Cultural History and Theory
Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6610 (3) Readings in Gender History
Examines the field of gender history that includes an understanding of women's and/or men's experience as lived and socially or culturally constructed. Regional or national focus and time period to be determined by the faculty member teaching the course in any given semester.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6616 (3) Readings in the History of American Women
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6756 (3) Race and Nationalism
Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: United States: Topical Courses 1
HIST 6790 (3) Readings in Digital History
Re-conceptualizes topics surrounding traditional theories, methods, and practices of writing history in the digital age. Topics revolve around collating big data, curating digital exhibits, copyright and image preparation for digital/print publications, website development/design, cartography, sustainability and preservation, among other themes. Lab work provides conceptual and technical recommendations required to conceive, launch, and preserve online digital history projects.

**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

HIST 6800 (3) Readings in Global History
Explores various topics, regions, and methods in history and historical writing by utilizing a global/thematic approach. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

HIST 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

HIST 6950 (1-6) Master's Thesis

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

HIST 7052 (3) Seminar: Modern European History

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

HIST 7110 (3) Research Seminar in Atlantic History 1500-1800
Discusses the concepts and methods that inform the field of Atlantic history in the early modern era. Readings and research papers explore the interactions of peoples from Europe, Africa, and the Americas, including the exchange of ideas, peoples, commodities, and cultural practices.

**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Methodological, Comparative, and Global

HIST 7119 (3) Graduate Research Seminar in Asian History
Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials.

**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite background in Asian history
**Additional Information:** Departmental Category: World Areas: Comparable and General

HIST 7153 (3) Seminar: English History, 800--1688

**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite background in English or European history.
**Additional Information:** Departmental Category: Europe: Specific Countries

HIST 7155 (3) Seminar: Early American History

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

HIST 7156 (3) Seminar: American Diplomatic History

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

HIST 7252 (3) Seminar: Early Modern Europe, 16th to 18th Centuries
Introduces graduate students to various research approaches and methods in early modern European historiography and requires them to produce a substantial and original research paper using both primary and secondary sources. Specific topics will vary.

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Modern

HIST 7257 (3) Seminar: History of the American Frontier

**Requisites:** Restricted to History (HIST) graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 2

HIST 7326 (3) Seminar: U.S. Intellectual History

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1

HIST 7415 (3) Graduate Seminar in Modern United States History
Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources.

**Repeatable:** Repeatable for up to 9.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

HIST 7424 (3) Research Methods in Medieval/Early Modern European History
Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU’s microfilmed collections of manuscripts, and write a research paper based on the manuscript materials.

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Europe: Topical

HIST 7485 (3) Seminar: United States History, 1948-Present

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Chronological Periods

HIST 7556 (3) Seminar: American Society and Thought

**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: United States: Topical Courses 1
HIST 7581 (3) Latin Paleography
Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts.

Requisites: Restricted to graduate students only.
Recommended: Requisite reading knowledge of Latin.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 7800 (3) Research Seminar in Global History
Discusses various topics, themes and methods which inform the field of Global History. Readings and research papers will explore transnational and global historical interactions, including the exchange of ideas, peoples, commodities, and cultural practices. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to History (HIST) graduate students only.

HIST 7840 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7841 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 7842 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7843 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 7844 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical Courses 1

HIST 7845 (1-3) Independent Study
Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7846 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7847 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 7848 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 7849 (1-3) Independent Study
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 8990 (1-10) Doctoral Dissertation
All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Methodological, Comparative, and Global

History - Master of Arts (MA)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All MA students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should carefully read the Master’s Degree Requirements (p. 1043) section carefully. For more information, visit the department’s Graduate Students webpage.
Requirements

Admission Requirements
A Graduate Record Examination (GRE) score is no longer required for admission to the program.

Prerequisites
As general preparation for graduate work in history, a broad liberal arts education, as well as a major in history, are desirable, though not specifically required. Candidates for graduate degrees may be required to pursue such fundamental courses in history as the department deems necessary to provide a suitable historical background.

Degree Requirements
The following are special departmental requirements. For more information, visit the department’s Graduate Students [https://www.colorado.edu/history/graduate-program/] webpage.

Most MA coursework will be at the 5000, 6000 and 7000 levels. With the approval of a student’s academic advisor and the endorsement of the department’s director of graduate studies, a maximum of 6 credit hours of upper-division (4000-level) undergraduate history coursework may be counted toward the MA degree. All courses completed at CU Boulder must be taken in the Department of History, except for courses recommended by the advisor and approved by the director of graduate studies.

All MA students must complete the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 5000</td>
<td>Historical Methods: Introduction to the Professional Study of History</td>
<td>3</td>

<td>Graduate Colloquium in European History (&quot;To 1789&quot; and &quot;Since 1789&quot;)</td>
<td>6</td>
</tr>
<tr>
<td>HIST 5129</td>
<td>Colloquium in Modern Asian History (&quot;South Asia&quot; and &quot;East Asia&quot;)</td>
<td>6</td>
</tr>
</tbody>
</table>

Degree Plans

Plan I: Thesis Option
Thesis-track MA students must complete a total of 24 credit hours of coursework, plus 6 credit hours of MA thesis credit (HIST 6950). Of those, a minimum of 12 credit hours must come in each of a student’s two fields, regional/national and global/thematic. A thesis must be successfully defended before a faculty committee as the final requirement for the degree.

Plan II: Non-Thesis Option
Non-thesis track MA students must complete 30 credit hours of coursework, including a minimum of three hours of 7000-level research seminar. Students must complete 12 credit hours in each of their two fields (regional/national and global/thematic). A final examination must be passed in the field of study before the degree is granted.

Language Requirement
For students working in fields of history that require the use of foreign languages, their advisory committees may require a demonstration of language proficiency.

History - Doctor of Philosophy (PhD)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All PhD students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should read the Doctoral Degree Requirements (p. 1045) section carefully. For more information, visit the department’s Graduate Students [https://www.colorado.edu/history/graduate-program/] webpage.

Requirements

Admission
A Graduate Record Examination (GRE) score is no longer required for admission into the History graduate program.

Prerequisites
Students who wish to work toward the PhD degree in history must indicate acquaintance with the fundamental tools of historical scholarship and the ability to do original work with historical primary sources. The PhD program does not require the completion of a master's
degree, but directly admits those qualified applicants, who have been recommended by the graduate admissions committee.

**Degree Requirements**
A total of 45 post-baccalaureate credit hours (39 coursework hours plus 6 portfolio hours) before advancing to candidacy, at least 36 of which must be taken at this university, and a dissertation are required for the degree. A minimum of one foreign language is required; however, students must be able to use those languages essential to research and advanced study in their respective fields. In addition, as required by the Graduate School, those students pursuing a PhD should complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement. The total number of required hours including required coursework, elective coursework, portfolio, and dissertation, is 69 hours.

After completion of the coursework requirements, each candidate for the PhD degree must assemble and defend a PhD portfolio before proceeding to the dissertation stage of the program. The dissertation must be an original contribution to the discipline. An oral defense of the dissertation must be successfully completed in order for the degree to be conferred.

Visit the History Graduate Studies website (https://www.colorado.edu/history/graduate-studies/) for a more detailed explanation of our program.

One additional colloquium course (5000-level) in a field outside of one’s own national/regional field. (The additional colloquium course will ordinarily count toward the student’s required global/thematic course hours.)

At least 6 hours of coursework at the 7000 level. 7000-level research seminars may fill required hours for either the “regional/national” or the “global/thematic” field, depending on the subject area(s) of the course(s).

Additional graduate-level courses to meet the 39 course credit hour minimum. Out of the total required coursework credit hours, a minimum of 18 credit hours must come in each of a student’s two fields: regional/national and global/thematic. Courses are chosen in consultation with the student’s faculty advisor.

6 portfolio hours plus 24 additional dissertation hours

**Total Credit Hours** 69

**Residence**
At least three years of graduate study, two of which must be spent in residence, are required for the PhD degree.

**Learning Outcomes**
For the department’s learning outcomes philosophy, visit the department website (https://www.colorado.edu/history/about/history-teaching-learning-project/student-learning-objectives/).

**Integrative Physiology**
The Department of Integrative Physiology offers a variety of graduate study opportunities that range from a coursework-only master’s degree option to MS and PhD research-intensive options. To facilitate maximal flexibility in the design of a student’s program, the Department has established a minimum number of required courses that must be completed by all graduate students and the remainder of the program can be individualized to meet the long-term goals of the student.

A graduate degree in integrative physiology provides opportunities for careers in academia, industry, and the health professions. The placement list of PhD and MS graduates (https://www.colorado.edu/iphy/graduate/placement-recent-phd-and-ms-graduates/) indicates some of the jobs and educational programs that our graduate students have found after completion of the PhD or MS degree.

**Course code for this program is IPHY.**

**Master’s Degree**

- Integrative Physiology - Master of Science (MS) (p. 1241)

**Doctoral Degree**

- Integrative Physiology - Doctor of Philosophy (PhD) (p. 1242)

**Faculty**
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

IPHY 5010 (1) Graduate Student Research Forum
Special topics spanning the broad scope of integrative physiology are covered in a seminar-style format. Presentations by current IPHY faculty are augmented by graduate student presentations of thesis and dissertation work.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5100 (2) Colloquium in Integrative Physiology
Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5102 (2) Introduction to Physiology Genomics
Covers recent developments in genomics: a body of revolutionary new approaches that deal with the analysis of all the DNA sequence in the cell. Relies on a genomics text and student presentation/discussion aided by a study guide.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200.

IPHY 5200 (3) Physiological Genetics and Genomics
Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and PSYC 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5262 (3) Application of Bioinformatics and Genomics
Explore public websites, databases, and bioinformatic tools that can be used for analysis of genomic data. These include NCBI Resources, genome databases, gene expression databases, tools for nucleotide and algorithms analyses and protein databases. Students develop a mini-grant proposal that is required to incorporate use of some of the tools covered.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200 and IPHY 5102.

IPHY 5300 (3) Statistical Genetics for Complex Traits
Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5440 (4) Endocrinology
Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4440

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5540 (5) Biomechanics
Applies the principles of physics and physiology to analyze the movement of humans and other animals. Assesses the mechanical properties of muscles, tendons, ligaments and bones. Quantitatively analyzes forces, torque, mechanical energy, power impulses and momentum associated with human movement.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4540

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisite one semester of physiology and one semester of general physics (lecture + lab).

IPHY 5550 (3) Exercise Biochemistry
Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise including carbohydrate, fat, and protein metabolism. The interaction of key biochemical alterations as it relates to disease (diabetes, obesity, and aging) and exercise will be addressed.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650 and one year of general chemistry (lecture + lab).
IPHY 5880 (4) Advanced Statistics and Research Methods in Integrative Physiology
Introduces advanced statistical techniques important for analyzing data rising in biomedical research, including physiology. Statistical reasoning will be emphasized through problem solving and applications using statistical software packages.
Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.
Recommended: Prerequisite IPHY 2800.

IPHY 5840 (1-6) Graduate Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5880 (3) Advanced Data Analysis in Biomedical Research
Provides advanced training on statistics and scientific reasoning in laboratory and clinical research. Conceptual foundations of classical and modern statistical techniques is reviewed. Multiple class projects consist of written reports on statistical analysis of data representative of the student's field of interest. The use of statistical packages, primarily R, is required.
Equivalent - Duplicate Degree Credit Not Granted: IPHY 4880
Requisites: Requires prerequisite course of IPHY 5800 (minimum grade B).
Grading Basis: Letter Grade

IPHY 5900 (3) Data Literacy in Biomedical Research
Provides a platform to develop a deeper understanding of quantitative biomedical research, current trends, challenges, and limitations. The course complements graduate statistical training by introducing topics relevant to open science and data literacy, including reproducibility, data privacy challenges, and the importance of good data management. Challenges in advanced statistical data evaluation and analysis in biomedical research settings will be discussed.
Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.
Recommended: Prerequisite IPHY 5800.
Grading Basis: Letter Grade

IPHY 6010 (1-3) Seminar
Presents special topics in integrative physiology.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6650 (3) Cellular Cardiovascular Physiology
Focuses on the cellular control of cardiac and smooth muscle contraction, at rest and in response to acute and chronic exercise. Addresses certain pathophysiological and physiological adaptive mechanisms.
Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.
Recommended: Prerequisite IPHY 4650.

IPHY 6660 (3) Locomotion Energetics and Biomechanics
Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion.
Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.
Recommended: Prerequisites IPHY 4540 and IPHY 4650.
IPHY 6670 (2) Hypothesis Testing in Locomotion Biomechanics
Focuses on the scientific process including formulating and testing hypotheses in studies of locomotion. Students analyze primary articles to determine whether the studies tested hypotheses and to generate new hypotheses that logically follow from previous studies.
**Requisites:** Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 6680 (3) Matlab for Physiological and Biomechanical Research
Introduces Matlab programming skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.
**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6830 (3) Professional Skills for the Research Scientist
Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring and other professional skills.
**Requisites:** Restricted to Integrative Physiology (IPHY) doctoral students only.

IPHY 6840 (1-3) Research Project
Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required.
**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6940 (1) Master’s Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6950 (1-6) Master’s Thesis
Must have 4 credit hours and may be repeated up to 6 total credits.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Requisites:** Restricted to Integrative Physiology (IPHY) doctoral students only.

**Integrative Physiology - Master of Science (MS)**

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. A graduate degree in the Department of Integrative Physiology at the University of Colorado Boulder provides opportunities for careers in academia, industry and the health professions.

**Bachelor’s–Accelerated Master’s Degree Program**

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Integrative Physiology - Bachelor of Arts (BA) (p. 411)

**Requirements**

**Admission Requirements**

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in integrative physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

**Deficiencies**

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

**Course Requirements**

Master’s candidates entering the graduate program must complete 30 credits to graduate. They may select one of three options:

- Coursework only plan: 30 required credits to graduate
- Research project plan: 3 research project hours as part of the 30 required credits to graduate
- Thesis plan: 4 to 6 thesis hours as part of the 30 required credits to graduate

It is possible, however, to change from one option to another during the program of study.

Students must have a minimum cumulative grade point average of 3.0 in all graduate work taken, and must perform satisfactorily on the comprehensive exam.

30
Integrative Physiology - Doctor of Philosophy (PhD)

The objectives of the doctoral program in the Department of Integrative Physiology at the University of Colorado Boulder are to:

- Provide an academic foundation for understanding how humans and other animals function at the level of genes, cells, tissues, organs and systems.
- Develop the professional skills required to become a research scientist.

Requirements

Admission Requirements

To obtain materials for application and for any additional information, visit the Integrative Physiology (http://www.colorado.edu/intphys/grad/) website.

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in Integrative Physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

Deficiencies

If the undergraduate preparation of a prospective graduate student is not adequate, the student may be allowed to pursue graduate study with the understanding that identified deficiencies will be completed. The graduate admissions committee will determine the nature and extent of these deficiencies.

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

Jewish Studies

The Program in Jewish Studies, which is open to all students of all backgrounds, Jewish and non-Jewish, explores Jewish culture, history, religion, society, and thought from a broad, interdisciplinary perspective, training graduate students for diverse career paths.

With a faculty of engaged scholars and teachers working in fields across the humanities, arts, and social sciences, the Program supports the research, teaching, and professional development of graduate students pursuing a master’s or doctoral degree in a diverse and growing array of departments, including history, religious studies, English, Germanic and Slavic languages and literature, linguistics, art and art history, and critical media practices. Students receive intensive mentoring through the graduate colloquium, and/or to complete a graduate certificate.

Course code for this program is JWST.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Boyd, Samuel L. (https://experts.colorado.edu/display/fisid_155484/) Associate Professor; PhD, University of Chicago

Goodman, Nan (https://experts.colorado.edu/display/fisid_100633/) Professor; PhD, Harvard University

Kalismian, Hilary Falb (https://experts.colorado.edu/display/fisid_164096/) Endowed/Named Professor; PhD, University of California, Berkeley

Kaplan, Thomas Pegelow Endowed Chair, Professor; PhD, University of North Carolina- Chapel Hill

Malin, Jonathan (https://experts.colorado.edu/display/fisid_151714/) Associate Professor; PhD, University of Chicago

Mehta, Samira (https://experts.colorado.edu/display/fisid_165972/) Assistant Professor, Director, Associate Faculty Director; PhD, Emory University; MDiv, Harvard University

Rivlin, Eyal Ofer (https://experts.colorado.edu/display/fisid_151100/) Teaching Associate Professor, Endowed/Named Professor; MA, Naropa Institute

Weber, Beverly Marie (https://experts.colorado.edu/display/fisid_144523/) Professor; PhD, University of Massachusetts Amherst

Certificate

- Jewish Studies - Graduate Certificate (p. 1243)
Courses

**JWST 5200 (3) Religion and Reproductive Politics in the United States**
Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4200, JWST 4200, WGST 5200

**JWST 5348 (3) Graduate Topics in Jewish History**
Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**JWST 5800 (3) Ethics, Medicine and the Holocaust: Legacies in Health and Society**
Engages the disturbing fact that German health care professionals actively participated in the architecture and machinery of the Third Reich; explores the implications of these facts for contemporary health care ethics; expands beyond the Holocaust to consider the ramifications for our understanding of the problem of evil in general.
Equivalent - Duplicate Degree Credit Not Granted: JWST 4800
Grading Basis: Letter Grade

**JWST 5900 (1-6) Graduate Independent Study in Jewish Studies**
Working with a faculty member in Jewish Studies on an independent study research project provides graduate students with an opportunity to learn outside the formal classroom structure with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term).
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

Jewish Studies - Graduate Certificate

This certificate program allows graduate students across campus who are interested in Jewish studies to explore Jewish culture, history, society, and thought in a number of disciplines. Jewish studies also provides intensive mentoring of graduate research and writing projects through the Jewish Studies Graduate Student Colloquium.

Requirements

Admission Requirements
This graduate certificate is open to all currently matriculated graduate students. Students may apply for the graduate certificate at any point in their graduate career at CU. For more information, view the Jewish Studies website (https://www.colorado.edu/jewishstudies/certificate/).

Course Requirements
Successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from Jewish Studies’ list of approved graduate courses, issued every semester, which comprises graduate courses crosslisted in the Program in Jewish Studies as well as approved courses taught by faculty in the Program in Jewish Studies. If you think a course is missing from this list, please contact the Director of Graduate Studies.

Students may petition the graduate studies committee to have a maximum of one graduate level course (including independent study courses) from outside this list, if that course contains significant Jewish Studies content and the student’s completed work for that course is related to Jewish Studies.

Colloquium

The certificate requires two semesters of participation in the Program in Jewish Studies Graduate Student Colloquium, which meets three times per semester. Participation will be defined as attendance at two colloquium sessions in a given semester and presentation of a work in progress during that semester.

Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible for us to construe another person’s ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the
way people’s brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

**Purpose of the MA Program**

The goal of the MA program in linguistics is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career and prepares students who decide to do so to apply to the PhD program at CU or at other institutions.

The main component of the MA program is 30 credits of coursework (at least 24 of them in linguistics). Students may also choose to write an MA thesis. Students on both the thesis plan and non-thesis plan must take and pass the comprehensive exam in the fourth semester of study in order to receive the MA degree. By meeting additional requirements, MA students may also obtain the MA with a certificate in cognitive science, human language technology, teaching English to speakers of other languages (TESOL), or culture, language and social practice (CLASP).

**Purpose of the MS Program**

The program is intended to provide students with a solid background in both theoretical linguistics and computer science. Graduates of the program will be specialists in the application of computers to the processing of natural languages, such as English, Chinese, Arabic and Urdu. The field of computational linguistics, also known as text analytics, natural language processing and informatics, is burgeoning and has become critical to the success of mainstream global businesses who compete for employees qualified to address these needs. The interdisciplinary nature of CLASIC is a significant market strength, because success in this developing field of natural language processing requires a strong foundation in both linguistics and computer science. The training will prepare students for careers in predictive text messaging, search engines, question-answering, interactive virtual agents and machine translation.

CLASIC students will complete a two-year degree (32 credits of approved graduate study in linguistics and computer science), including a 2-credit capstone project that will run in conjunction with an internship or CU based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. For more information, visit the department’s Computational Linguistics (CLASIC) MS (https://www.colorado.edu/linguistics/current-students/graduates/computational-linguistics-clasic-ms/) webpage.

**Purpose of the PhD Program**

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations. We encourage doctoral students to begin engaging in research projects early, as these will contribute to developing the research program that will lead to the thesis project. Early projects not only lead to preliminary exam topics and/or publishable papers, but also enable students to pilot methods that will be usable for the dissertation project. Early projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Doctoral students complete a core of required courses that provide a firm foundation in linguistic theory and methods. These courses are supplemented by advanced courses and individual work related to an area of specialization in a field where this department offers research strengths (e.g., description of Native American and Indigenous languages, sociolinguistics, interaction and grammar, computational linguistics, psycholinguistics, first-language acquisition, phonetics, laboratory phonology, functionally-oriented syntax). Doctoral students may complete the CLASP or human language technology certificates. Additionally, students may apply to pursue a joint PhD in linguistics and cognitive science.

Course codes for this program are LING and ESLG.

**Master’s Degrees**

- **Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS)** (p. 1611)
- **Linguistics - Master of Arts (MA)** (p. 1249)

**Doctoral Degree**

- **Linguistics - Doctor of Philosophy (PhD)** (p. 1248)

**Certificates**

- **Cognitive Science - Graduate Certificate** (p. 1250)
- **Culture, Language and Social Practice - Graduate Certificate** (p. 1250)
- **Human Language Technology - Graduate Certificate** (p. 1252)
- **Teaching English to Speakers of Other Languages (TESOL) - Graduate Certificate** (p. 1253)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Senior Instructor Emerita

Courses

**LING 5030 (3) Linguistic Phonetics**
Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.  
**Requisites:** Restricted to graduate students only.

**LING 5140 (2) CLASIC Capstone**
In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master’s program, we will review each student’s internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.  
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5140  
**Requisites:** Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLASI) program only.  
**Recommended:** It is recommended that this course be taken after the CLASIC internship has been completed.

**LING 5200 (3) Introduction to Computational Corpus Linguistics**
Covers computer methods for doing linguistics with on-line corpora. Includes extensive introduction (with lab) to the Python programming language, UNIX corpus tools, concordance programs, syntactic treebanks, propbanks, and corpora for discourse and phonology research.  
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4200  
**Requisites:** Restricted to graduate students only.

**LING 5300 (3) Research in Psycholinguistics**
After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production and theories of brain specialization for language, are explored.  
**Requisites:** Restricted to graduate students only.  
**Recommended:** Prerequisite at least one graduate-level course in LING, PSYC or CSCI.

**LING 5410 (3) Phonology**
Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis.  
**Requisites:** Restricted to graduate students only.  
**Recommended:** Prerequisite LING 5030.

**LING 5420 (3) Morphology and Syntax**
Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world’s languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.  
**Equivalent - Duplicate Degree Credit Not Granted:** LING 4420  
**Requisites:** Restricted to graduate students only.

**LING 5430 (3) Semantics and Pragmatics**
Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure.  
**Requisites:** Restricted to graduate students only.  
**Recommended:** Prerequisite LING 5420.

**LING 5570 (3) Introduction to Diachronic Linguistics**
Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time.  
**Requisites:** Restricted to graduate students only.  
**Recommended:** Prerequisite LING 5410.
LING 5610 (3) Pedagogical Grammar for Teachers of English to Speakers of Other Languages
Provides an introduction to the study of English grammar from the perspective of the nonnative learner and user of English. The focus is on understanding the form, meaning, and use of grammatical constructions and on how to teach these constructions in an ESL/EFL context.
Equivalent - Duplicate Degree Credit Not Granted: LING 4610
Requisites: Restricted to graduate students only.

LING 5620 (3) Teaching Second Language (L2) Oral Skills and Communication
Provides teaching and learning principles and practices for developing nonnative speakers’ oral English proficiency and intercultural communication skills. Examines the sound system of American English (including prosody), listening and pronunciation, lexical considerations, and discourse functions and grammar, and how these contribute to speaking fluency, accuracy and communicative effectiveness. Focuses on teaching applications and includes one-on-one sessions with English learners.
Equivalent - Duplicate Degree Credit Not Granted: LING 4620
Requisites: Restricted to graduate students only.
Recommended: Prerequisite LING 3100 or LING 5030 and LING 5410.
Grading Basis: Letter Grade

LING 5622 (3) Statistical Analysis for Linguistics
Aims to acquaint students with the fundamentals of quantitative analysis in linguistics and provide a practical introduction to the R statistical computing environment. Topics that will be covered include examining and manipulating data, tests for independence, regression modeling, mixed models, measures of association, and data visualization. It is suitable for students with no prior experience with statistics or statistical software packages.
Equivalent - Duplicate Degree Credit Not Granted: LING 4622

LING 5630 (3) TESOL and Second Language Acquisition: Principles and Practices
Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally.
Equivalent - Duplicate Degree Credit Not Granted: LING 4630
Requisites: Restricted to graduate students only.
Recommended: Prerequisite LING 5610 or LING 5620.
Grading Basis: Letter Grade

LING 5700 (3) Conversation Analysis and Interactional Linguistics
Provides an introduction to the theories and methods of Conversation Analysis (CA) and Interactional Linguistics (IL), which aim to uncover the procedural infrastructure of language use in social interaction. The course emphasizes hands-on experience in analyzing naturally-occurring interactional data. Topics may include: turn-taking, sequence and preference organization, repair, reference, epistemics, and identity.
Equivalent - Duplicate Degree Credit Not Granted: LING 4700
Grading Basis: Letter Grade

LING 5800 (3) Open Topics in Linguistics
Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors. Contact the department office for information.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

LING 5832 (3) Natural Language Processing
Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5832
Requisites: Restricted to graduate students only.

LING 5900 (1-3) Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

LING 5910 (3) TESOL Practicum
Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process.
Equivalent - Duplicate Degree Credit Not Granted: LING 4910
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of LING 4630 or LING 5630 (minimum grade C). Restricted to graduate students only.
Recommended: Prerequisite LING 4610 or LING 5610.

LING 6200 (3) Issues and Methods in Cognitive Science
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and PHIL 6310 and PSYC 6200 and SLHS 6402
Requisites: Restricted to graduate students only.
Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

LING 6300 (3) Topics in Language Use
Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.
Requisites: Restricted to graduate students only.

LING 6310 (3) Sociolinguistic Analysis
Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.
Requisites: Restricted to graduate students only.

LING 6320 (3) Linguistic Anthropology
Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 6320
Requisites: Restricted to graduate students only.
LING 6450 (3) Syntactic Analysis
Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs.
Requisites: Restricted to graduate students only.

LING 6500 (3) Issues in Indigenous Languages
Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 6500
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

LING 6510 (3) Language Structures
Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites LING 5410 and LING 5420.

LING 6520 (3) Topics in Comparative Linguistics
Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 6560 (3) Language Acquisition
Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites LING 5410 and LING 5420 and LING 5430.

LING 6632 (3) Machine Learning and Linguistics
Is an introduction to machine learning, with a focus on linguistic applications. It is oriented toward students who want to understand the basics of machine learning and apply well-known techniques to address problems related to language and linguistics. The main goal is to achieve a practical grasp of the fundamental and most successful concepts in machine learning and to be equipped with techniques to apply this knowledge in linguistic domains. The course is also intended to provide a perspective on natural language acquisition and learning, namely, insight into what types of language acquisition problems are truly difficult, and what types of learning problems can be solved by fairly straightforward pattern recognition techniques.

LING 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course
This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).
Equivalent - Duplicate Degree Credit Not Granted: SOCY 6861
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

LING 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.

LING 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

LING 7030 (3) Phonetic Theory and Analysis
Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites LING 5030 and LING 5410.

LING 7095 (1-6) Seminar in Social Sciences Methods
Repeatable:
Grading Basis: Letter Grade

LING 7100 (3) Field Methods 1
Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites LING 5410 and LING 5420.

LING 7310 (3) Social Semiotic Theory
Introduces students to semiotics, the study of the use and interpretation of signs. Engages with key topics and concepts in the study of semiotic theory, e.g., indexicality, iconicity, enregisterment, embodiment, agency, and how these topics bear on research in sociolinguistics and linguistic anthropology.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite LING 6310 or LING 6320.

LING 7350 (3) Language and Gender in Cultural Perspective
Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.
Requisites: Restricted to graduate students only.
LING 7410 (3) Phonological Theory
Provides an introduction to phonetic and morphophonological representations, with a focus on distinctive features; segments; prosodic structures; morphological structures; phonological processes and their interaction; naturalness conditions.

Requisites: Restricted to graduate students only.
Recommended: Prerequisite LING 5410.

LING 7415 (2) Cognitive Science Research Practicum
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Department enforced prerequisites: CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and PHIL 7415 and PSYC 7415 and SLHS 7418
Requisites: Restricted to graduate students only.
Recommended: Prerequisite EDUC 6505.

LING 7420 (3) Syntactic Theory
Covers various topics in syntactic theory.
Repeatable: Repeateable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite LING 5420.

LING 7425 (2) Cognitive Science Research Practicum 2
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and PHIL 7425 and PSYC 7425 and SLHS 7428
Requisites: Restricted to graduate students only.
Recommended: Prerequisite LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506.

LING 7430 (3) Semantic Theory
Explores current developments in the theory of linguistic semantics. Potential topics include truth-conditional and set-theoretic theories of meaning; cognitive semantics; semantic typology; social semantics; the syntax-semantics interface; and the interaction between meaning conventions and conventions of usage.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite LING 5430.

LING 7565 (3) Computational Phonology and Morphology
Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422
Recommended: Prerequisites LING 5410 and LING 5420.

LING 7570 (3) Advanced Diachronic Linguistics
Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items and its relation to theories of grammar and of language variation.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 7775 (1) Topics in Cognitive Science
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

LING 7800 (3) Open Topics in Linguistics
Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

LING 7900 (1-5) Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

LING 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.

Linguistics - Doctor of Philosophy (PhD)

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations.

We encourage doctoral students to begin engaging in research projects early, as this engagement contributes to the development of the research program that will lead to the thesis project. Early projects may also lead to preliminary exam topics and/or publishable papers, and importantly, they may enable students to pilot the methods they'll use for the dissertation project. Projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Students should select a specialization and begin their own research as early as possible. The department offers specializations in:

- sociolinguistics
- phonetics
- semantics
- syntax
- morphology
- laboratory phonology
- conversation analysis
- historical linguistics
- typological comparison
- Native American and Indigenous linguistics
• linguistic anthropology
• psycholinguistics
• corpus linguistics
• language development
• cognitive linguistics
• computational modeling of language knowledge

Students wishing to pursue graduate work in linguistics should carefully read the Doctoral Degree Requirements (p. 1045) section of this catalog and the detailed degree requirements available from the department office.

Requirements
Admission Requirements
Applicants should hold a recognized baccalaureate degree. They should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level. GRE scores are optional. TOEFL or IELTS scores are normally required from foreign applicants.

To be admitted to the PhD program, students must have completed coursework equivalent to 4 of the following:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>LING 5030</td>
<td>Linguistic Phonetics</td>

Language Requirement
All PhD students must demonstrate the ability to read linguistic literature in a language other than English.

Preliminary Examination
As a PhD preliminary examination, students submit a data-based research paper early in the second year in the PhD program.

Comprehensive Examination
The university comprehensive examination requirement is completed in two steps: the completion of a synthesis paper followed by the defense of a dissertation prospectus.

Doctoral Thesis Credits
To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. These are distinct from the 30 credit hours of coursework that are required for the PhD. A student may not register for more than 10 dissertation credit hours in any one semester. A minimum of 5 credits must be taken each semester following passing of the comprehensive exam.

Linguistics - Master of Arts (MA)

The goal of this master's program is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations, where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career, and prepares students who decide to do so to apply to the PhD program at CU (p. 1248) or at other institutions.

Students wishing to pursue graduate work in linguistics should carefully read the master's degree requirements (p. 1043) section of this catalog, as well as the detailed degree requirements available on the departmental website (https://www.colorado.edu/linguistics/current-students/graduates/masters-program/).

Bachelor’s–Accelerated Master’s Degree Program

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated Bachelor’s degree(s): Linguistics - Bachelor of Arts (BA) (p. 448)

Requirements
Admission Requirements
Applicants should hold a recognized baccalaureate degree, and should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level.
GRE scores are optional. TOEFL or IELTS scores are normally required from international applicants.

**Degree Requirements**
The master’s degree calls for a minimum of three semesters of study, though most students require four semesters. Courses are normally taken at the 5000 level or above.

All students must pass a comprehensive written examination covering general topics in linguistics.

**Degree Plans**
**Plan I: Thesis Option**
Students in this plan must complete a total of 30 credit hours, at least 24 of which must be in linguistics, including 4–6 thesis credit hours.

**Electives**
Three cognitive science courses of 2 credit hours or more
One interdisciplinary course

**Total Credit Hours** 30

**Culture, Language and Social Practice - Graduate Certificate**
Tailored to the individual student’s area of interest, the cognitive science curriculum for this certificate is designed to provide broad as well as in-depth training in the cognitive sciences.

Graduate students in good standing in one of the following participating academic units may apply to earn a graduate certificate in cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a certificate can significantly enhance a student’s academic knowledge and career choices.

To learn more about the certificate, visit the ICS website (https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/).

**Requirements**
The graduate certificate consists of course requirements only.

To learn more about the program, visit the department’s Cognitive Science Graduate Certificate (https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/) webpage.
variation and change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

The program currently has over twenty affiliated faculty members from a variety of schools and departments, among them anthropology, communication, education, French and Italian, German and Slavic, linguistics, political science, Spanish and Portuguese, sociology and speech, language and hearing science.

For more information on the application process and program requirements, visit the CLASP: Culture, Language & Social Practice (http://www.colorado.edu/clasp/) website.

Requirements

Twelve credit hours of graduate-level coursework are required for the graduate certificate in culture, language and social practice. Three credit hours must come from the list of approved core courses (Group A); six credit hours must come from the list of elective courses (Group B); and the three remaining credit hours must come from a course in either social theory or research methods (Group C), subject to approval by the CLASP curriculum committee. The course chosen to fulfill the Group C requirement, while not necessarily language-related, should be a methodological or theoretical course that informs the student's research interests in the relationship between language and society. At least one of the three selected courses from Lists A and B must be from outside the student's home department.

A student may opt to substitute a CU Boulder MA thesis on the subject of culture, language and social practice for one of the Group B courses, if approved by the curriculum committee, which is constituted by the CLASP faculty advisor and CLASP director. An independent study may also be substituted for a formal course, if approved by the committee.

A number of new and unlisted seminars on the subject of language and society are taught within individual departments each year. Students should check with the CLASP program director each semester for a list of additional courses that fulfill the requirements. Students wanting to substitute an unapproved course for one of the courses listed below must receive approval from the CLASP curriculum committee.

The acquisition of a CLASP certificate is dependent on the successful completion of all courses in the academic curriculum with a grade of B or higher.

### Required Courses and Credits

#### Code  Title  Credit Hours

**Group A: Core Courses**

Students will choose one core course from the list below.

- ANTH/LING 6320  Linguistic Anthropology  3
- COMM 6410  Discourse Analysis
- COMM 6445  Intercultural Communication
- COMM 6460  Ethnography of Communication
- LING 5700  Conversation Analysis and Interactional Linguistics
- LING 6310  Sociolinguistic Analysis
- LING 6320  Linguistic Anthropology
- EDUC 5615  Second Language Acquisition

**Group B: Elective Courses**

Students will choose two elective courses. Recently offered courses that fulfill this requirement include:

- ANTH 6320  Linguistic Anthropology
- COMM 5210  Readings in Communication Theory
- COMM 5435  Readings in Community and Social Interaction
- COMM 6410  Discourse Analysis
- COMM 6445  Intercultural Communication
- COMM 6460  Ethnography of Communication
- EDUC 5425  Introduction to Bilingual/Multicultural Education
- EDUC 5455  Literacy for Linguistically Different Learners
- EDUC 5615  Second Language Acquisition
- EDUC 5635  Education and Sociolinguistics
- EDUC 5645  Introduction to ELD/Bilingual and Special Education
- EDUC 5635  Education and Sociolinguistics
- EDUC 5615  Language Issues in Education Research
- LING 6310  Sociolinguistic Analysis
- LING 6320  Linguistic Anthropology
- LING 7350  Language and Gender in Cultural Perspective
- SPAN 5450  Introduction to Hispanic Linguistics

**Group C: Courses in Social Theory and Research Methods**

Choose one course in either social theory or research methods that is appropriate for research goals, in consultation with their CLASP faculty advisor.

Examples of social theory courses include:

- ANTH 5530  Theoretical Foundations of Sociocultural Anthropology
- ANTH 5605  Anthropology of Neuroscience
- ANTH 5610  Medical Anthropology
- ANTH 5730  Latin American Politics and Culture through Film and Text
- ANTH 5745  Science, Technology and Society
- ANTH 5755  Cultures of Expertise: Science, Power and Knowledge
- ANTH 5780  Core Course-Cultural Anthropology
- ANTH 5785  Advanced Seminar in Cultural Anthropology
- ANTH 7010  Seminar: Contemporary Theory in Cultural Anthropology
- ANTH 7620  Seminar: Ethnography and Cultural Theory
- COMM 6360  Social and Cultural Theory
- EDUC 5075  Sociology of Education
- EDUC 6325  Anthropology of Education
- GEOG 6742  Seminar: Cultural Geography
- HIST 6330  History of Sex and Sexuality
- PSCI 7004  Seminar: Political Theory
Human Language Technology - Graduate Certificate

The explosive growth of the web and the vast improvements in computing power in the last decade have led to a strong need for education and research in human language technology. Human language technology is an interdisciplinary field that includes the following key technological and scientific areas:

- Computer speech recognition and understanding
- Natural language understanding and generation
- Text-based information retrieval
- Web-based dialog agents

CU Boulder’s interdisciplinary certificate in human language technology, offered jointly by the Institute of Cognitive Science; the Department of Computer Science; the Department of Linguistics; and the Department of Speech, Language and Hearing Sciences, provides a rich and broad background for students interested in computational tools for human language processing.

To learn more about the certificate, visit the Institute of Cognitive Science (https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/) website.

Required Courses and Credits

The curriculum for the certificate consists of five different courses, as shown in the course table below. Three of these five required courses must be taken at the graduate level.

Teaching English to Speakers of Other Languages - Graduate Certificate

The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is a 14-15 credit post-baccalaureate program. It is designed for individuals who wish to gain, or continue to develop, the professional knowledge, skills and dispositions that qualify them to teach learners of English as an additional language in the U.S. and/or abroad. This graduate certificate prepares teacher candidates to teach young learners, adolescents and adults in a number of contexts, domestic and abroad, including community-based programs, private language institutes, intensive English programs and after school programs.

Coursework prepares students with foundational knowledge in the structure of the English language including the grammar, phonological systems and concepts related to sociopragmatics, semantics and morphology. Required linguistics (TESOL) courses prepare students to design activities and lesson plans that target specific learning objectives fostering the development of English language learners' macro- and micro-language skills (macro: listening, speaking, reading, writing; micro: fluency, pronunciation, vocabulary, comprehension). Field placements (praxis) allow for students to develop their identities as reflective practitioners as they make connections between theory and classroom practice.

Requirements

Admission Requirements

Students interested in the graduate certificate should complete the application form on the Department of Linguistics (https://www.colorado.edu/linguistics/graduate-certificate-tesol/) website. This is an in-house form that the department uses to admit and track students in the program. Interested post-baccalaureate degree and non-degree students students may contact the Academic Program Director Dr. Rai Farrelly (Raichle.Farrelly@colorado.edu?subject=TESOL%20Certificate) with any questions. The Director will also advise students on their course plans and successful certificate completion.

Note: Non-matriculated students will need to enroll through Continuing Education (https://ce.colorado.edu/) (CE) to acquire a student ID and an identikey, which provides access to course enrollment, a student email account, tuition bill and more. Learn more about enrollment options for graduate certificate programs at the Department of Linguistics (https://www.colorado.edu/linguistics/graduate-certificate-tesol/) website.

Required Courses and Credits

To earn the certificate, students must meet the following course requirements and receive a grade of B- or better in all certificate courses.

<table>

</table>

Total Credit Hours: 14-15

1 LGTC courses are shorter, 2-credit courses taught online. Students pursuing the graduate certificate alongside the MA in Linguistics will be one credit short by taking an LGTC course as an elective.

Mathematics

PhD Program

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes and topology. For more information, see the Department of Mathematics (https://www.colorado.edu/math/) website.

MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the bachelor’s-accelerated master’s (p. 1259) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Course code for this program is MATH.

Master’s Degree

- Mathematics - Master of Arts (MA) (p. 1259)

Doctoral Degree

- Mathematics - Doctor of Philosophy (PhD) (p. 1260)
Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses

**MATH 5000 (3) Foundations of Mathematics**
Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Gödel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation. Department enforced prerequisites: MATH 2130 and MATH 3140.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4000
Requisites: Restricted to graduate students only.

**MATH 5001 (3) Analysis 2**
Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).
Equivalent - Duplicate Degree Credit Not Granted: MATH 4001
Requisites: Restricted to graduate students only.

**MATH 5030 (3) Intermediate Mathematical Physics 1**
Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5030
Requisites: Restricted to graduate students only.

**MATH 5040 (3) Intermediate Mathematical Physics 2**
Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory and Fourier analysis. Department enforced prerequisite: MATH 5030.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5040
Requisites: Restricted to graduate students only.

**MATH 5120 (3) Introduction to Operations Research**
Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.
Equivalent - Duplicate Degree Credit Not Granted: APPM 4120 and MATH 4120 and APPM 5120
Requisites: Restricted to graduate students only.
Recommended: Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.
MATH 5140 (3) Abstract Algebra 2
Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra. Department enforced prerequisite: MATH 3140.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4140
Requisites: Restricted to graduate students only.

MATH 5150 (3) Linear Algebra
Highlights vector spaces, linear transformations, eigenvalues and eigenvectors, and canonical forms. Department enforced prerequisite: MATH 2130 or MATH 2135. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 5200 (3) Introduction to Topology
Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4200

MATH 5230 (3) Differential Geometry of Curves and Surfaces
Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4230
Requisites: Restricted to graduate students only.

MATH 5240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics
Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4240
Requisites: Restricted to graduate students only.

MATH 5330 (3) Fourier Analysis
The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics. Department enforced prerequisite: MATH 4001.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4330
Requisites: Restricted to graduate students only.

MATH 5430 (3) Ordinary Differential Equations
Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems. Department enforced prerequisites: MATH 2130 and MATH 3001. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 5440 (3) Mathematics of Coding and Cryptography
Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed; prepares students for the more advanced ECEN 5682.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4440
Requisites: Restricted to graduate students only.

MATH 5470 (3) Partial Differential Equations
Studies initial boundary and eigenvalue problems for the wave, heat and potential equations. Solution by separation of variables, Green's function, and variational methods. Department enforced prerequisite: MATH 3430 or MATH 5430. Instructor consent required for undergraduates.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4470
Requisites: Restricted to graduate students only.

MATH 5510 (3) Introduction to Probability Theory
Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4510
Requisites: Restricted to graduate students only.

MATH 5520 (3) Introduction to Mathematical Statistics
Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4520 and MATH 4520 and STAT 5520
Requisites: Restricted to graduate students only.
Recommended: Prerequisite previous coursework equivalent to APPM 3570 or STAT 3100 or MATH 4510; minimum grade of C- for all.

MATH 5540 (3) Introduction to Time Series
Studies basic properties, trend-based models, seasonal models, modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: MATH 4520 or MATH 5520 or APPM 4520 or APPM 5520.
Equivalent - Duplicate Degree Credit Not Granted: STAT 4540 and MATH 4540 and STAT 5540
Requisites: Restricted to graduate students only.
Recommended: Prerequisite previous coursework equivalent to STAT 4520 or MATH 4520 or STAT 5520 or MATH 5520; minimum grade of C- for all.

MATH 5600 (3) Numerical Analysis 1
Solution of nonlinear algebraic equations, interpolation, approximation theory and numerical integration. Department enforced prerequisites: MATH 2130 or MATH 2135 or APPM 3310 and experience with a scientific programming language. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 5610 (3) Numerical Analysis 2
Solution of linear systems, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: MATH 5600 or APPM 5600. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 5730 (3) Set Theory
Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4730
MATH 5810 (1-3) Special Topics in Mathematics
Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4810
Requisites: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to graduate students only.

MATH 5820 (3) History of Mathematical Ideas
Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.
Equivalent - Duplicate Degree Credit Not Granted: MATH 4820
Requisites: Restricted to graduate students only.
Recommended: Requisite completion of upper division Written Communication requirement.

MATH 5905 (1) Mathematics Teacher Training
Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Department enforced prerequisite: current employment as a teaching assistant.
Requisites: Restricted to graduate students only.

MATH 6000 (3) Model Theory
Proves the compactness theorem, showing the essential finiteness of logical implication. Proves many basic properties of theories, showing how the syntactic form of statements influences their behavior w.r.t., different models. Finally, studies properties of elements that cannot be stated by a single formula (the type of the element) and shows it can be used to characterize certain models.
Requisites: Restricted to graduate students only.

MATH 6010 (3) Computability Theory
Studies the computable and uncomputable. Shows that there are undecidable problems and from there builds up the theory of sets of natural numbers under Turing reducibility. Studies Turing reducibility, the arithmetical hierarchy, oracle constructions and end with the finite injury priority method. Department enforced prerequisite: MATH 6000.
Requisites: Restricted to graduate students only.

MATH 6110 (3) Introduction to Number Theory
Examines divisibility properties of integers, congruences, diophantine equations, arithmetic functions, quadratic residues, distribution of primes and algebraic number fields. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6120 (3) Algebra 1
Studies group theory and ring theory. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6130 (3) Algebra 2
Studies modules, fields and Galois theory. Department enforced prerequisite: MATH 6130. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6140 (3) Commutative Algebra
Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals and Noetherian rings. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6150 (3) Commutative Algebra
Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals and Noetherian rings. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6160 (3) Algebraic Geometry
Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6170 (3) Algebraic Geometry
Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6180 (3) Algebraic Number Theory
Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function and the prime number theorem. Department enforced prerequisites: MATH 6110 and MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6190 (3) Analytic Number Theory
Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function and the prime number theorem. Department enforced prerequisites: MATH 6110 and MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6210 (3) Introduction to Topology 1
Introduces elements of point-set topology and algebraic topology, including the fundamental group and elements of homology. Department enforced prerequisites: MATH 2130 and MATH 3140 and MATH 4001. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6220 (3) Introduction to Topology 2
Continuation of MATH 6210. Department enforced prerequisite: MATH 6210. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6230 (3) Introduction to Differential Geometry 1
Introduces topological and differential manifolds, vector bundles, differential forms, de Rham cohomology, integration, Riemannian metrics, connections and curvature. Department enforced prerequisites: MATH 2130 and MATH 4001. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6240 (3) Introduction to Differential Geometry 2
Continuation of MATH 6230. Department enforced prerequisite: MATH 6230. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6250 (3) Theory of Rings
Studies semi-simple Artinian rings, the Jacobson radical, group rings, representations of finite groups, central simple algebras, division rings and the Brauer group. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.
MATH 6260 (3) Geometry of Quantum Fields and Strings
Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories. Department enforced prerequisites: MATH 6230 and MATH 6240 and PHYS 5250 and PHYS 7280. Instructor consent required for undergraduates.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 6260
Requisites: Restricted to graduate students only.

MATH 6270 (3) Theory of Groups
Studies nilpotent and solvable groups, simple linear groups, multiply transitive groups, extensions and cohomology, representations and character theory, and the transfer and its applications. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6280 (3) Advanced Algebraic Topology
Covers homotopy theory, spectral sequences, vector bundles, characteristic classes, K-theory and applications to geometry and physics. Department enforced prerequisite: MATH 6220. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6290 (3) Homological Algebra
Studies categories and functors, abelian categories, chain complexes, derived functors, Tor and Ext, homological dimension, group homology and cohomology. If time permits, the instructor may choose to cover additional topics such as spectral sequences or Lie algebra homology and cohomology. Department enforced prerequisites: MATH 6130 and MATH 6140.
Requisites: Restricted to graduate students only.

MATH 6310 (3) Introduction to Real Analysis 1
Develops the theory of Lebesgue measure and the Lebesgue integral on the line, emphasizing the various notions of convergence and the standard convergence theorems. Applications are made to the classical L^p spaces. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6320 (3) Introduction to Real Analysis 2
Covers general metric spaces, the Baire Category Theorem, and general measure theory, including the Radon-Nikodym and Fubini theorems. Presents the general theory of differentiation on the real line and the Fundamental Theorem of Lebesgue Calculus. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite MATH 6310.

MATH 6350 (3) Functions of a Complex Variable 1
Focuses on complex numbers and the complex plane. Includes Cauchy-Riemann equations, complex integration, Cauchy integral theory, infinite series and products, and residue theory. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6360 (3) Functions of a Complex Variable 2
Focuses on conformal mapping, analytic continuation, singularities and elementary special functions. Department enforced prerequisite: MATH 6350. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6340 (3) Topics in Mathematical Probability
Offers selected topics in probability such as sums of independent random variables, notions of convergence, characteristic functions, Central Limit Theorem, random walk, conditioning and martingales, Markov chains and Brownian motion. Department enforced prerequisite: MATH 6310. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6550 (3) Introduction to Stochastic Processes
Systematic study of Markov chains and some of the simpler Markov processes, including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560. Instructor consent required for undergraduates.
Equivalent - Duplicate Degree Credit Not Granted: APPM 6550
Requisites: Restricted to graduate students only.

MATH 6730 (3) Set Theory
Presents cardinal and ordinal arithmetic, and basic combinatorial concepts, including stationary sets, generalization of Ramsey's theorem, and ultrafilters, consisting of the axiom of choice and the generalized continuum hypothesis. Department enforced prerequisites: MATH 4000 or MATH 5000 and MATH 4730 or MATH 5730. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6740 (3) Forcing
Presents independence of the axiom of choice and the continuum hypothesis, Souslin's hypothesis and other applications of the method of forcing. Introduces the theory of large cardinals. Department enforced prerequisite: MATH 6730. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 6900 (1-3) Independent Study
Instructor consent required for undergraduates.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

MATH 6950 (1) Master's Candidate for Degree
This course is for students preparing for the no-thesis option for a master’s degree. The content is set by the students' advisors.
Requisites: Restricted to graduate students only.

MATH 6950 (1-6) Master’s Thesis

MATH 8114 (3) Topics in Number Theory
May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory. Department enforced prerequisite: MATH 6110. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 8174 (3) Topics in Algebra I
Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.
MATH 8234 (3) Topics in Differential Geometry
Presents advanced topics in Differential Geometry, such as index theory, partial differential equations on manifolds, exterior differential systems, and Cartan's methods.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of MATH 6230 and MATH 6310 (minimum grade D-). Restricted to graduate students only. Instructor consent required for undergraduates.

MATH 8250 (3) Mathematical Theory of Relativity 1
Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups; metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Instructor consent required.
Requisites: Restricted to graduate students only.

MATH 8304 (3) Topics in Analysis 1
For the MS degree in applied mathematics, 6–12 credit hours must be completed at the 5000 level or above. A maximum of six credit hours may be completed at the 3000 or 4000 level if approved by the department. Students must take two 2-semester sequences. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher excluding MATH 5820.

MATH 8330 (3) Functional Analysis 1
Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisite: MATH 6310 and MATH 6320. Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.

MATH 8340 (3) Functional Analysis 2
Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisite: MATH 6330. Instructor consent required for undergraduates. See also MATH 8340.
Requisites: Restricted to graduate students only.

MATH 8370 (3) Harmonic Analysis 1
Requisites: Restricted to graduate students only.

MATH 8714 (3) Topics in Logic 1 and 2
Requisites: Restricted to graduate students only.

MATH 8815 (1-3) Ulam Seminar
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

MATH 8900 (1-3) Independent Study
Instructor consent required for undergraduates.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

MATH 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.
Requisites: Restricted to graduate students only.

Mathematics - Master of Arts (MA)

MA/MS Program
Students may obtain an MA/MS degree as either an undergraduate student through the Bachelor’s–Accelerated Master’s (BAM) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in Mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Bachelor’s–Accelerated Master’s Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Mathematics - Bachelor of Arts (BA) (p. 460).

Requirements

Admission Requirements
Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements
Students must complete 30 hours of approved credit. At least 24 credit hours must be completed at the 5000 level or above. A maximum of six credit hours may be completed at the 3000 or 4000 level if approved by the department. Students must take two 2-semester sequences. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher excluding MATH 5820.

For the MS degree in applied mathematics, 6–12 credit hours must be in an approved minor program outside the mathematics department, and at least 18 credit hours must be approved inside the mathematics department.

Students should read carefully the materials describing the university requirements in the Graduate School section. The student is responsible for satisfying these requirements at the proper time.

Examinations
To earn an MA degree, a student must pass a master’s examination based on the particular program of the student.
Thesis
For the MA degree in mathematics, students can pursue a thesis option, which requires 4–6 credit hours of thesis work, and a thesis defense.

Mathematics - Doctor of Philosophy (PhD)
The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes, and topology.

For more information, visit the Department of Mathematics (http://www.colorado.edu/math/) website.

Requirements
Admission Requirements
Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements
Students must complete at least 30 credit hours of approved graduate coursework and 30 credit hours of thesis work.

Before being admitted to candidacy for the PhD degree in mathematics, a student must take two graduate courses each in algebra, real analysis and geometry/topology en route to passing two out of three preliminary exams in these fields. In addition, the student must take a course in complex analysis. The student must then pass a comprehensive exam.

Students should read the Doctoral Degree Requirements (p. 1045) section carefully. The student is responsible for satisfying these requirements at the proper time.

Molecular, Cellular and Developmental Biology
In view of the strong research orientation of the fields involved, the department does not accept applications from students seeking the MA as a terminal degree. The master of arts degree, either with a thesis (Plan I) or without (Plan II), is awarded under special circumstances.

Course code for this program is MCDB.

Doctoral Degree
- Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD) (p. 1264)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Abbott, Lois A.
Senior Instructor Emerita

Anseth, Kristi S. (https://experts.colorado.edu/display/fisid_103471/)
Distinguished Professor; PhD, University of Colorado Boulder

Arnoult, Nausica Christine (https://experts.colorado.edu/display/fisid_164094/)
Assistant Professor; PhD, Pierre and Marie Curie University (France)

Betterton, Meredith D. (https://experts.colorado.edu/display/fisid_125396/)
Professor; PhD, Harvard University

Blumenthal, Thomas (https://experts.colorado.edu/display/fisid_143346/)
Professor, Visiting Professor; PhD, Johns Hopkins University

Boswell, Robert E. (https://experts.colorado.edu/display/fisid_100196/)
Professor; PhD, University of Colorado Boulder

Brumbaugh, Justin J. (https://experts.colorado.edu/display/fisid_164025/)
Assistant Professor; PhD, University of Wisconsin-Madison

Cech, Thomas R. (https://experts.colorado.edu/display/fisid_103252/)
Distinguished Professor; PhD, University of California, Berkeley

Chen, Zhe (https://experts.colorado.edu/display/fisid_148754/)
Assistant Research Professor; PhD, University of Colorado Boulder

Copley, Shelley (https://experts.colorado.edu/display/fisid_104067/)
Professor; PhD, Harvard University

DeDecker, Brian S. (https://experts.colorado.edu/display/fisid_143934/)
Senior Instructor; PhD, Yale University

Detweiler, Corrella Scott (https://experts.colorado.edu/display/fisid_128240/)
Professor; PhD, University of California, San Francisco

Donaldson, Zoe (https://experts.colorado.edu/display/fisid_157087/)
Assistant Professor; PhD, Emory University

Dowell, Robin D. (https://experts.colorado.edu/display/fisid_147779/)
Associate Professor; DSc, Washington University

Dubin, Mark W.
Professor Emeritus

Espinosa, Joaquin Maximiliano (https://experts.colorado.edu/display/fisid_134378/)
Visiting Associate Professor; PhD, Univ of Buenos Aires (Argentina)

Fillman, Christy L. (https://experts.colorado.edu/display/fisid_145115/)
Senior Instructor; PhD, University of Colorado Boulder

Garcia, Robert L. (https://experts.colorado.edu/display/fisid_146103/)
Professor; MD, University of California, San Francisco

Gold, Lawrence (https://experts.colorado.edu/display/fisid_100581/)
Professor; PhD, University of Connecticut

Guild, Nancy Ann (https://experts.colorado.edu/individual/fisid_111361/)
Professor Attendant Rank; PhD, University of Colorado
Han, Min (https://experts.colorado.edu/display/fisid_105512/)
Distinguished Professor; PhD, University of California, Los Angeles

Harvey, Pamela Ann (https://experts.colorado.edu/display/fisid_148012/)
Senior Instructor; PhD, Tufts University

Hoenger, Andreas (https://experts.colorado.edu/display/fisid_142883/)
Professor; PhD, Universität Basel (Switzerland)

Jones, Kevin Robert (https://experts.colorado.edu/display/fisid_102094/)
Associate Professor; PhD, University of California, Berkeley

Junge, Harald Jobst (https://experts.colorado.edu/display/fisid_148593/)
Assistant Professor; PhD, Philipps-Universität Marburg (Germany)

Klymkowsky, Michael W. (https://experts.colorado.edu/display/fisid_101226/)
Professor; PhD, California Institute of Technology

Knight, Jennifer Kirsten (https://experts.colorado.edu/display/fisid_101933/)
Associate Professor; PhD, University of Michigan Ann Arbor

Kralj, Joel M. (https://experts.colorado.edu/display/fisid_153055/)
Assistant Professor; PhD, Boston University

Krauter, Kenneth S. (https://experts.colorado.edu/display/fisid_107978/)
Professor, Associate Chair; PhD, Yeshiva University

Kuemppel, Peter L.
Professor Emeritus

Leinwand, Leslie Anne (https://experts.colorado.edu/display/fisid_107104/)
Distinguished Professor, Faculty Director; PhD, Yale University

Martin, Jennifer Mary (https://experts.colorado.edu/display/fisid_110125/)
Senior Instructor; PhD, University of Washington

### Courses

**MCDB 5201 (1) Graduate Lab in Molecular Evolution**  
Ever wonder what functional clues might reside in the DNA sequence of your favorite gene? In this course, graduate students will learn the fundamentals of phylogenetics with an emphasis on evolutionary models that infer selective pressures in protein-coding DNA sequences (genes). During the course, students will be working on their favorite gene and using it as a case study for applying all of the concepts that we will cover. By the end of the course they will have generated a publication-quality summary figure, along with appropriate supplemental figures, of the selective pressures shaping their favorite gene. Additionally, they will learn how to design and execute an experimental approach based off of findings from the evolutionary analysis.  
**Requisites:** Restricted to graduate students only.  
**Grading Basis:** Letter Grade  

**MCDB 5220 (3) Graduate Core 2**  
**Requisites:** Restricted to graduate students only.  

**MCDB 5230 (3) Graduate Core 1**  
**Requisites:** Restricted to graduate students only.  

**MCDB 5250 (3) Topics in Developmental Genetics (Methods and Logic)**  
Repeatable: Repeatable for up to 6.00 total credit hours.  

**MCDB 5301 (3) Immunology**  
Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and misfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4300  
**Requisites:** Restricted to Biological Sciences (MCDB) graduate students only.  

**MCDB 5310 (3) Microbial Genetics and Physiology**  
Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4310  

**MCDB 5312 (3-4) Quantitative Optical Imaging**  
Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.  
**Equivalent - Duplicate Degree Credit Not Granted:** BCHM 5312, MCDB 4312 and BCHM 4312  
**Grading Basis:** Letter Grade  

**MCDB 5350 (3) Microbial Diversity and the Biosphere**  
Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4350  
**Requisites:** Restricted to graduate students only.  

**MCDB 5361 (3) Evolution and Development**  
Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development).  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4361  

**MCDB 5425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease**  
Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4425  
**Requisites:** Restricted to graduate students only.  

**MCDB 5426 (3) Cell Signaling and Developmental Regulation**  
Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4426  

**MCDB 5427 (3) Biology of the Visual System**  
Explores the neurobiology, cell biology, genetics and developmental biology of the visual system. Discusses neurodegenerative and vascular diseases that lead to blindness. Students read and analyze original research articles to train scientific reasoning. Involves student-organized presentations and classroom discussion.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4427  
**Requisites:** Requires prerequisite courses of MCDB 3135 and MCDB 3145 (all minimum grade C-).  

**MCDB 5441 (4) Animal Developmental Diversity**  
Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4441 and EBIO 4440 and EBIO 5440  
**Requisites:** Restricted to graduate students only.  

**MCDB 5471 (3) Mechanisms of Gene Regulation in Eukaryotes**  
Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4471  

**MCDB 5520 (3) Bioinformatics and Genomics**  
Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCDB 4520  
**Requisites:** Restricted to graduate students only.

</table>
| MCDB 4521   | Bioinformatics and Genomics Laboratory | Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, and plan and execute data analysis in selected areas. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4521  
Grading Basis: Letter Grade |
| MCDB 4550   | Cells, Molecules and Tissues: A Biophysical Approach | Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4550 and PHYS 4550 and PHYS 5550  
Grading Basis: Letter Grade |
| MCDB 4560   | Introduction to Biophysics | Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4560 and PHYS 4560 and PHYS 5560  
Grading Basis: Letter Grade |
| MCDB 4561   | Biology of Stem Cells | Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4561  
Requisites: Restricted to graduate students only |
| MCDB 4562   | Genome Databases: Mining and Management | Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure. | Equivalent - Duplicate Degree Credit Not Granted: BCHM 5621, MCDB 4621 and BCHM 5621 |
| MCDB 4565   | Teaching and Learning in Undergraduate Science Courses | Discusses recent research on how students learn and applications to the teaching of undergraduate science courses. Conducted as an interactive workshop, in which active-engagement in learning approaches are modeled and experienced by participants. Open to undergraduate and graduate students. May be used to fulfill the pedagogical training requirement for undergraduate Learning Assistants in upper division science courses. Post-doctoral and faculty auditors are welcome to participate as regular auditors. | Requires: Restricted to graduate students only |
| MCDB 4567   | Developmental Biology | Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4550  
Requisites: Restricted to graduate students only |
| MCDB 5520   | Mechanisms of Aging | Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4680  
Requisites: Restricted to graduate students only |
| MCDB 5750   | Animal Virology | Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Fulfills MCDB scientific reasoning requirement. Course has additional graduate student level requirements. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4750  
Requisites: Restricted to graduate students only |
| MCDB 5776   | Scientific Ethics and Responsible Conduct in Research | Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards. | Equivalent - Duplicate Degree Credit Not Granted: BCHM 5776  
Requisites: Requires a corequisite course of MCDB 5230 or BCHM 5771. |
| MCDB 5777   | Molecular Neurobiology | Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4777 |
| MCDB 5811   | Teaching and Learning Biology | Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions. | Equivalent - Duplicate Degree Credit Not Granted: MCDB 4811 and EDUC 4811 and EDUC 6811  
Requisites: Restricted to graduate students only |
| MCDB 6000   | Introduction to Laboratory Methods | Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to plan and execute experiments in selected areas. | Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term. |
| MCDB 6440   | Special Topics in MCD Biology | Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors. | Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term. |
| **Total**    |               |             | **2023-24 University Catalog 1263** |
MCDB 6441 (1) Faculty Res Seminar
Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

MCDB 6442 (2) Research Grant Writing
Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

MCDB 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

MCDB 6950 (1-6) Master's Thesis
Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

MCDB 7840 (1-6) Graduate Independent Study
An independent study contract is required.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

MCDB 7910 (1) Seminar Practicum
Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information.
**Repeatable:** Repeatable for up to 2.00 total credit hours.
**Requisites:** Restricted to graduate students only.

MCDB 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
**Repeatable:** Repeatable for up to 7.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD)**

**Areas of Study**
Opportunities for graduate study and original research leading to the PhD degree are available in a variety of areas. The department does not offer a terminal, stand-alone master’s degree program. Students enrolled in the doctoral program may earn their master’s degree if they decide to leave the program after completing 30 hours of graduate coursework and the PhD oral and written comprehensive examination.

**Molecular Biology**
Includes gene regulation, virology, nucleic acid-protein interactions, chromosome structure and function, chromosome replication, microbial diversity, human genome structure, RNA structure and catalysis.

**Cell Biology**
Includes cytoskeleton, biophysical cytology, vacuole assembly, analysis of yeast spindle pole bodies and vertebrate centrosomes, synthesis and secretion of glycoproteins and polysaccharides, defense responses in plants and 3-D high resolution reconstruction, biogenesis of mitochondria and chloroplasts, energy metabolism, assembly of membrane protein complexes, cell cycle regulation and checkpoints and signal transduction.

**Developmental Biology**
Covers mechanisms and regulation of morphogenesis and cell growth, genetic control of development, molecular genetics of embryogenesis, sex determination, ras proteins and vulval development and programmed cell death in nematodes, molecular genetics of *Drosophila* neurobiology, developmental genetics of *Drosophila* and *Caenorhabditis*, neural development in mice, transgenic mice and muscle development and function.

**Genetics**
Includes genetics of human disease, complex traits, mouse development and invertebrate development.

**Requirements**

**Admission Requirements**
The graduate program of the Department of Molecular, Cellular and Developmental Biology is sufficiently flexible to accommodate students with a wide range of training. Students with bachelor’s degrees in any of the biological, biochemical or physical sciences are encouraged to apply.

**Degree Requirements**
A minimum of 30 credit hours of courses numbered 5000 and above, plus 30 credit hours of doctoral thesis, are required. Specific courses depend on the student background and field of specialization.

The faculty of the department offers a variety of courses to help graduate students acquire knowledge in the various areas of study. Further, students are required to work in four different laboratories to broaden their education and to help them identify the field of greatest interest for their thesis work.

**Advisory Committee**
An advisory committee, appointed upon entrance, develops an appropriate curriculum based in part on the student’s background. A written preliminary exam consists of a series of courses and exams administered during the first year.

**Qualifying Exam**
A comprehensive qualifying exam administered at the beginning of the spring semester of the second year includes a written research proposal and an oral defense of the proposal that emphasizes breadth and depth of knowledge as well as an ability to communicate and synthesize facts into a coherent scientific argument.

**Thesis**
The principal elements in graduate training are defining a thesis problem, investigating this problem with a coherent piece of research that constitutes a substantial contribution to knowledge, and writing a report on this work in the form of peer-reviewed journal articles and a thesis submitted to a departmental committee for approval. Thesis research must result in at least one peer-reviewed research article with the candidate as first or co-first author. After completion of the thesis, each candidate for the PhD degree is required to take a final oral examination on the thesis and related topics, and to present a public seminar.
Teaching
Generally, each candidate for the PhD degree does two semesters of apprentice teaching. This obligation is usually met during the student’s first year of graduate study.

Museum and Field Studies
Graduate training in anthropology, art history, history, botany, entomology, paleontology and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the Museum and Field Studies Program. Areas of study include, but are not limited to:

- anthropological interpretation
- diatom taxonomy, systematics and ecology
- southwestern archaeology and ethnology
- plant taxonomy, evolution and phytogeography
- vertebrate paleontology and Cenozoic mammals
- biology of aquatic invertebrates
- systematics and population biology of insects of the Rocky Mountain Region
- plant–insect interactions
- mammalogy

Museum assistantships include support from the Walker Van Riper fund and research support from the Collie and William Henry Burt museum funds. Other financial assistance is available to selected students. Students interested in working toward advanced degrees under the direction of museum faculty may use the contact information above.

Course code for this program is MUSM.

Master's Degree
- Museum and Field Studies - Master of Science (MS) (p. 1267)

Certificate
- Museology - Graduate Certificate (p. 1269)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Bowers, M. Deane (https://experts.colorado.edu/display/fisid_101746/)
Professor; PhD, University of Massachusetts Amherst

Chin, Karen (https://experts.colorado.edu/display/fisid_122666/)
Professor; PhD, University of California, Santa Barbara

Eberle, Jaelyn J. (https://experts.colorado.edu/display/fisid_126544/)
Professor, Faculty Director; PhD, University of Wyoming

Fladd, Samantha G. (https://experts.colorado.edu/display/fisid_165651/)
Assistant Professor; PhD, University of Arizona

Kociolek, John Patrick (https://experts.colorado.edu/display/fisid_145728/)
Faculty Director, Professor; PhD, University of Michigan

Li, Jingchun (https://experts.colorado.edu/display/fisid_157561/)
Assistant Professor; PhD, University of Michigan

McCain, Christy (https://experts.colorado.edu/display/fisid_145010/)
Associate Professor; PhD, University of Kansas

Shannon, Jennifer A. (https://experts.colorado.edu/display/fisid_147612/)
Associate Professor; PhD, Cornell University

Simpson, Carl (https://experts.colorado.edu/display/fisid_159652/)
Assistant Professor; PhD, University of Chicago

Taylor, William T. (https://experts.colorado.edu/display/fisid_165652/)
Assistant Professor; PhD, University of New Mexico

Tripp, Erin Anne (https://experts.colorado.edu/display/fisid_152313/)
Associate Professor; PhD, Duke University

Courses

MUSM 5011 (4) Introduction to Museum Studies
Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorship, exhibition theory, and administration.

Additional Information: Departmental Category: Museum Studies

MUSM 5021 (2-4) Selected Museum Topics
Provides framework for student projects on varied museum topics (e.g., ethics of collecting, data management, the museum's role in the community). Student projects include case study analysis, interviewing, and original presentations. Topics vary each semester. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Museum Studies

MUSM 5030 (3) Museum Education
Survey of the theory and practice of education in museums and informal learning centers. Topics include current trends in the field, learning theories, teaching methodologies, program development, museum/school relationships, the role of education in exhibit development, and being a critically reflective practitioner.

Additional Information: Departmental Category: Museum Studies

MUSM 5031 (3) Museums and the Public: Exhibit Development
Covers elements of exhibition development and design, up to production and evaluation of exhibit prototypes. The team approach is emphasized. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies

MUSM 5041 (3) Museum Administration
Covers theory of organizations and how it applies to museums. Application of small business management and nonprofit organizations. Review museum organizational charts and staffing. Evolution of marketing and development in a museum context are reviewed. Budget process and annual financial reporting are discussed, and there is an emphasis on evaluating financial statements. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies
MUSM 5045 (3) Introduction to Museum Anthropology
Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.
Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and ANTH 5045
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Anthropology

MUSM 5051 (3) Museum Collections Management
Deals specifically with curation and data management. Topics include acquisition practices and problems; organization, management, use and preventive conservation of collections; computer data management of collections.
Additional Information: Departmental Category: Museum Studies

MUSM 5061 (3) Introduction to Scientific Illustration
Intended for students with little to no art background. Focus is on the accurate rendering of scientific subjects for publication and for public display. Course begins with basic drawing skills and sharpening of visual perception. Students progress to be able to produce realistic renderings of subjects. Students are exposed to a variety of black and white and color techniques and the standards for presenting illustrations for a variety of audiences. Course concludes with computer illustration tools and techniques.
Additional Information: Departmental Category: Museum Studies

MUSM 5474 (4) Vertebrate Paleontology
Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and GEOL 5474
Additional Information: Departmental Category: Geology

MUSM 5484 (3) Museum Field Methods in Geology
Paleontological and paleoecological field techniques including collecting; recording of geographic, stratigraphic and quarry information; preservation; interpretation, including applicable readings. Designed for individuals who have some background in geology but little or no prior field experience. Offered summer only.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4484
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Geology

MUSM 5760 (4) Mammalogy
Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.
Equivalent - Duplicate Degree Credit Not Granted: EBIIO 4760 and EBIIO 5760
Additional Information: Departmental Category: Zoology

MUSM 5795 (3) Field Methods in Zoology and Botany
Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4795 and ENVS 4795
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Zoology

MUSM 5900 (1-6) Independent Study
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4900
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Independent Study

MUSM 5912 (3) Collections Research Practicum in Cultural Anthropology
Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4912 and ANTH 4470 and ANTH 5470
Repeatable: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade

MUSM 5913 (3) Museum Practicum in Botany
Students take part in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloguing, conservation and collection management. Enrollment is limited therefore students should make arrangements during the previous semester.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4913
Recommended: Prerequisite MUSM 5011.
Additional Information: Departmental Category: Botany

MUSM 5914 (3) Museum Practicum in Geology
Students take part in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloguing, collection management and a survey of current laws as they apply to specimens. Enrollment is limited therefore students should make arrangements during the previous semester.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4914
Recommended: Prerequisite MUSM 5011
Additional Information: Departmental Category: Geology

MUSM 5915 (1-3) Museum Practicum in Zoology
Students take part in basic curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloguing, storing and shipping. Also introduces students to the animal kingdom.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4915
Additional Information: Departmental Category: Zoology

MUSM 5916 (1-3) Museum Practicum in Entomology
Students take part in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling identification, rearing techniques and exhibit preparation. Enrollment is limited, students should make arrangements during previous semester.
Equivalent - Duplicate Degree Credit Not Granted: MUSM 4916
Recommended: Prerequisite MUSM 5011.
Additional Information: Departmental Category: Entomology
MUSM 5917 (1-3) Museum Practicum in Techniques
Students participate in museum public education functions that may include researching, planning, developing, and producing exhibits, traveling trunks, booklets, and other materials. May involve writing labels, molding and casting, conservation, and restoration.
Equivalence: - Duplicate Degree Credit Not Granted: MUSM 4917
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Museology

MUSM 5918 (3) Museum Practicum in Advanced Collections Management
Provides a hands-on environment for exploring issues in museum collections management. Through lecture, resource procurement, in-class activities and out-of-class projects, students will gain practical and professional experience in areas of policy, procedure, best practices, museum storage planning and legal issues.
Recommended: Prerequisite MUSM 5051.
Additional Information: Departmental Category: Museum Studies

MUSM 5919 (3) Collections Research Practicum: Archaeology
Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.
Equivalence: - Duplicate Degree Credit Not Granted: ANTH 4919 and ANTH 5919
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

MUSM 6110 (1-3) Advanced Seminar in Museum Issues
Offers a weekly seminar for museum and field study students that addresses one new topic each semester relevant to museum operations such as archival administration, museums, multiculturalism, repatriation and others. Department enforced prerequisite: MUSM 5011.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisite: Restricted to graduate students only.
Additional Information: Departmental Category: Museum Studies

MUSM 6150 (3) Critical and Theoretical Issues in Museums
Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Department enforced prerequisite: MUSM 5011.
Equivalence: - Duplicate Degree Credit Not Granted: ARTH 6150 and HIST 6150 and ANTH 6150
Additional Information: Departmental Category: Museum Studies

MUSM 6930 (2-4) Museum Internship
Provides experience in museums of different sizes, audiences, and subjects, including history, natural history, art, and children's museums. Each student is supervised individually by a faculty member as well as the appropriate person in the cooperating museum.
Additional Information: Departmental Category: Museum Studies

MUSM 6940 (1-4) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Museum Studies

MUSM 6950 (1-6) Master's Thesis
A thesis, which may be of a research, expository, critical or creative type, is required of every master's degree candidate under the thesis option. Department enforced prerequisites: MUSM 5011 and MUSM 5051 and one of the following: MUSM 5030 or MUSM 5031 or MUSM 5041.
Additional Information: Departmental Category: Museum Studies

MUSM 6960 (1-4) Master's Project or Paper
A project or paper in the student's discipline and related to some aspect of museum studies is required of every master's degree candidate under the non-thesis-option plan. Department enforced prerequisites: MUSM 5011 and MUSM 5051. Students in collections/field track also need MUSM 5030 or MUSM 5031 or MUSM 5041.
Additional Information: Departmental Category: Museum Studies

Museum and Field Studies - Master of Science (MS)
The interdisciplinary museum and field studies program is administered by the University of Colorado Museum of Natural History, in conjunction with the departments of anthropology, history, art history, ecology and evolutionary biology, and geological sciences; as well as other departments. The program provides a strong background in the chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians and administrators.

Program Tracks
Three tracks are available: a collections/field track, a public/administration track and an art history track.

Collections/Field Track
This track offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present and biological inventory. The curriculum gives students academic training as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.

Public/Administration Track
This track offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

Art History Track
The art history track in the MFS program is open to applicants who hold a BA degree in the liberal arts, preferably with a major in art history. This track addresses issues specific to the research and curation of artworks. The curriculum provides students with academic training in art history and offers students firsthand museum experience in curatorial and collections work through exhibitions practica and collections research.
Requirements

Admission Requirements
Students must meet all university requirements for admission to graduate school and have a baccalaureate degree and at least a B (3.00) grade-point average in previous academic work. The baccalaureate degree should be in anthropology, biology, geology, geography, history (including archival studies), classics, fine arts or education, although other majors will be considered. Acceptance to the program is decided by the admissions committee of the University Museum in consultation with the student’s department. The student must be accepted by an advisor in his or her discipline. Applicants accepted for graduate work by museum faculty must be admitted to the Graduate School.

Course Requirements
The degree in museum and field studies is a two-year program requiring a total of 32 credit hours, plus 150 hours of internship. Depending on the track and plan, students complete from 9 to 15 credit hours in a department and from 13 to 22 credit hours in museology courses. View the Program Tracks (p. 1268) tab for more information.

Internship
A museum internship of 150 hours is required.

Committee
A committee of at least three graduate faculty will be selected during the first semester in residence, by consultation between the student, the student’s advisor, and the director of the MFS program. At least one member of the committee must be a tenured or tenure-track member of the museum faculty. The committee will serve as program advisors for the comprehensive exam and as the defense committee for the thesis or project. A student and advisor may apply for an exception in writing, which must be approved by the MFS program director.

Degree Plans
Students may choose either the thesis or non-thesis plan.

Plan I: Thesis Option
This plan requires the completion and successful defense of a thesis.

Plan II: Non-Thesis Option
This plan requires the completion of a project and paper.

Total Credit Hours 32  

1 Cognate (or specialty) hours may include 5000+ level courses, practicum work, field methods courses, and up to six hours of 3000- or 4000-level classes, if appropriate. Cognate hours may be taken in more than one department or school. Some Museum courses may count as cognate hours with advisor approval.

### Museology - Graduate Certificate

Providing professional museum training for CU Boulder graduate students and for museum professionals who seek to upgrade their skills and credentials, the Professional Certificate in Museology serves a range of disciplines in the arts and sciences, education and engineering, as well as the Colorado museum community.

**CU Graduate Students**

The Museum and Field Studies program offers a Graduate Professional Certificate in Museology for graduate students. This program provides professional training and certification for students at the University of Colorado Boulder whose primary enrollment is in a graduate program in another museum-related discipline (e.g., anthropology, art, art history, biology, business administration, education, geological sciences, history, etc.). For graduate students in other university departments, the coursework in a cognate discipline is provided by MA/MS or PhD programs in their home department.

**Museum Professionals**

Additionally, the professional certificate program is open to museum professionals in Colorado and the surrounding Rocky Mountain region. The program provides an avenue for early and mid-career museum staff to upgrade their skills and credentials in order to better meet the challenges and opportunities that museum work affords in the 21st century. For museum professionals, additional disciplinary work is available as appropriate upper division undergraduate or graduate coursework taken as electives under the nondegree study plan available in the ACCESS program through Continuing Education.
Requirements
The Professional Certificate in Museology requires a minimum of 12 credit hours and a 75-hour internship that may be waived if comparable professional experience is demonstrated.

Total Credit Hours: 12

Philosophy
Applicants for admission to the Graduate School for work toward a master’s or doctoral degree in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the master’s and doctoral programs must satisfy a variety of requirements, including the completion of coursework. The Department of Philosophy has a diversified faculty that can supervise the writing of master’s theses and doctoral dissertations on a wide range of topics.

The Department makes available teaching assistantships and then graduate part-time instructorships to doctoral students, and assists with job placement. Teaching assistantships are available to several master’s students each semester as well.

An overview (https://www.colorado.edu/philosophy/graduate/overview/) and descriptions of both degree programs (PhD (https://www.colorado.edu/philosophy/graduate/phd-program/) and MA (https://www.colorado.edu/philosophy/graduate/ma-program/)) are available from the Department of Philosophy. Students wishing to pursue graduate work in philosophy should note master’s (p. 1043) and doctoral (p. 1045) degree requirements, and consult the Graduate (https://www.colorado.edu/philosophy/graduate/) portion of the Department’s website.

Course code for this program is PHIL.

Master's Degree
- Philosophy - Master of Arts (MA) (p. 1274)

Doctoral Degree
- Philosophy - Doctor of Philosophy (PhD) (p. 1276)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.
Courses

PHIL 5010 (3) Single Philosopher
Discusses the work of a single historical figure in philosophy with the aim of reaching a broad and deep understanding of the philosopher's thought.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4010
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5020 (3) Topics in the History of Philosophy
Examines a specific philosophical problem over an extended historical period.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4020
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5030 (1) Greek Philosophical Texts
Selected readings in classical philosophy, in the original language, with a focus on achieving fluency in reading philosophical Greek.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

PHIL 5040 (1) Latin Philosophical Texts
Selected readings in classical and medieval philosophy, in the original language, with a focus on achieving fluency in reading philosophical Latin.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

PHIL 5100 (3) Values Proseminar
Covers seminal classic texts and/or fundamental topics in analytic ethics and social/political philosophy, including its history.
Requisites: Restricted to Philosophy graduate students only.

PHIL 5110 (3) Contemporary Moral Theory
Provides an in-depth look at some recent work in moral theory, usually organized around a single topic. Topics vary from year to year. Previous topics include: consequentialism and its critics, virtue theory, deontological ethics, moral psychology, well-being, and metaethics.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4110
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5120 (3) Philosophy and Animals
Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 5120
Requisites: Restricted to graduate students only.

PHIL 5150 (3) Topics in Applied Ethics
Discusses advanced work in applied normative philosophy. Topics vary from semester to semester and may focus on one or two specific areas (e.g., race, procreative ethics, military ethics, sports ethics) or take a broader approach that includes issues from across a wider range of subjects.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4150
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5200 (3) Contemporary Political Philosophy
Provides a survey of recent approaches to political philosophy, liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4200
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5230 (3) Bioethics and Public Policy
Examines public policy implications of contemporary biological, genetic, biomedical, and behavioral science in light of ethics and human values. Considers theoretical and practical grounds for moral assessment of scientific research and possible applications of technology.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5240 (3) Seminar in Environmental Philosophy
Philosophical examination of several different approaches to environmental problems: economic, juridical, political and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights and land use and urban planning.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 5240
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5260 (3) Philosophy of Law
Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4260
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5290 (1-3) Topics in Values and Social Policy
Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5300 (3) Philosophy of Mind
Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation, and the nature of mental states.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4300
Requisites: Restricted to graduate students only.

PHIL 5340 (3) Epistemology
Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4340
PHIL 5360 (3) Metaphysics
Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will and modality.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4360
Requisites: Restricted to graduate students only.

PHIL 5370 (3) Free Will and Determinism
Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4370

PHIL 5400 (3) Philosophy of Science
Advances students' knowledge of topics in philosophy of science and develops students' ability to think and write clearly about science. Topics may include scientific methodology; distinguishing science from pseudoscience; characterizing experimental and historical sciences; interpretations of special and general relativity; interpretations of quantum mechanics; the nature of biological species; approaches to defining life; criteria for identifying alien life; artificial intelligence; neuroscience and consciousness; fundamental physical properties and laws of nature; chance and probability; and causation.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4400
Requisites: Restricted to graduate students only.

PHIL 5440 (3) Topics in Logic
Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4440
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5450 (3) History and Philosophy of Physics
Discusses the epistemic question of what characterizes good physics research as well as the metaphysical question of what our best physics research tells us about the world. Topics may include case studies of physics experiments, theory choice, and scientific methodology in physics, as well as foundational metaphysical questions in statistical mechanics, quantum mechanics, special and general relativity, chance and probability, and the laws of nature.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4450 and PHYS 5450 and PHYS 5450
Requisites: Restricted to graduate students only.

PHIL 5460 (3) Modal Logic
Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4460
Requisites: Restricted to graduate students only.

PHIL 5470 (3) Probability and Rational Choice
Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons and Schelling points) and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4470
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.

PHIL 5480 (3) Formal Methods in Philosophy
Introduces formal methods used in contemporary philosophy beyond classical first-order logic. Specific topics may vary. Examples: extensions of and alternatives to first-order logic (including propositional and quantified modal logic and higher-order and plural logic), alternatives to classical logic (including many-valued and intuitionistic systems), generalized and substitutional quantifiers, the lambda calculus, indicative and subjunctive conditionals, probability theory, inductive logic, and decision theory.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4480

PHIL 5490 (3) Philosophy of Language
Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons and Schelling points) and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.
Equivalent - Duplicate Degree Credit Not Granted: PHIL 4490
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

PHIL 5550 (3) Metaphysics and Epistemology Proseminar
Covers seminal classic texts and/or fundamental topics in analytic metaphysics and epistemology.
Requisites: Restricted to Philosophy graduate students only.

PHIL 5600 (3) Philosophy of Religion
Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

PHIL 5700 (3) Aesthetics
Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

PHIL 5800 (3) Open Topics in Philosophy
Variety of new courses at the 5000 level. See current departmental announcements for specific content.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 5810 (1-3) Special Topics in Philosophy
Instructor meets regularly with three or more students to discuss special topics in philosophy.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
PHIL 5840 (1-3) Graduate Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6000 (3-4) Seminar in the History of Philosophy
Studies advanced topics in the history of philosophy. Content varies by semester, but may extend to any period in the history of philosophy, from the Presocratics into the modern era.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6100 (3) Seminar in Ethics
Intensive study of selected topics in ethical theory.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6200 (3) Seminar in Social and Political Philosophy
Provides an in-depth look at some particular topic in social and political philosophy, such as rights, political freedom, political obligation, or democracy.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6300 (3) Seminar in Philosophy of Mind
Intensive study of selected topics in philosophy of mind.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6310 (3) Issues and Methods in Cognitive Science
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PSYC 6200 and SLHS 6402
Requisites: Restricted to graduate students only.
Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

PHIL 6340 (3) Seminar in Epistemology
Intensive study of selected topics in epistemology.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6380 (3) Seminar in Metaphysics
Intensive study of selected topics in metaphysics.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6400 (3) Seminar in Philosophy of Science
Topics connected with development of nature of science: the structure of scientific theories, the testing of hypotheses, the theory of decisions in science and the basic conceptions and models of abstraction in the history of science.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to Philosophy graduate students only.

PHIL 6950 (1-6) Master's Thesis
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHIL 6950 (1-6) Master's Thesis
Restrict to graduate students only.

PHIL 6950 (1-6) Master's Thesis
Restrict to graduate students only.

PHIL 7415 (2) Cognitive Science Research Practicum
Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive
Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

PHIL 7425 (2) Cognitive Science Research Practicum 2
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PSYC 7425 and SLHS 7428
Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).
Recommended: Prerequisite EDUC 6505 or PHIL 6310.

PHIL 7810 (1) Topics in Cognitive Science
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PSYC 7775 and SLHS 7775
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.
PHIL 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to Philosophy graduate students only.

Philosophy - Master of Arts (MA)
The MA in Philosophy is intended to provide students with:

• A solid foundation in all the core areas of philosophy, including its history, in preparation for more advanced and specialized work at the doctoral level.
• Philosophical training for those who intend to go on to work in interdisciplinary areas bordering with philosophy, such as cognitive science or applied ethics and public policy.
• An opportunity for those who wish to explore more advanced study of philosophy for personal enrichment and satisfaction.
• The education needed for teaching philosophy at the secondary school level or at a community college.

We offer to MA students not only an outstanding education in philosophy but also all the benefits of being in a large, active, collegial department, with numerous colloquia, conferences, workshops, and reading groups in many areas of philosophy. MA students enroll in the same classes as PhD students, and are treated as full members of the graduate program.

Master’s degree students do not typically receive guaranteed departmental funding, but in recent years most master’s students have received teaching assistantships (TA-ships) in some of their semesters in the program. (TA-ships come with both a stipend and a tuition waiver.) The Department also has a fellowship specifically for MA students, the Wille Fellowship, which is awarded each semester to a first-year MA student to help defray the costs of tuition. MA students are encouraged to apply through the university for financial aid and university scholarships (for more information, see the Funding (https://www.colorado.edu/philosophy/graduate/funding/) webpage).

All domestic graduate students qualify for in-state tuition (https://www.colorado.edu/bursar/costs/) after just one year of residency in Colorado (https://www.colorado.edu/registrar/students/state-residency/adult/). Applicants admitted to the MA program who are not residents of Colorado or of any of the Western states might consider petitioning to defer their enrollment for one year, during which time they can establish residency in Colorado, in order to avoid paying out-of-state tuition.

The Department of Philosophy at the University of Colorado Boulder is a member of the Western Regional Graduate Program (http://wiche.edu/wrpg/) (WRPG) which means that students from the Western states (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) can enroll in our MA program at in-state Colorado tuition rates (http://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/). Students need not demonstrate financial need to take advantage of this benefit. To be considered for the WRPG tuition rate, students simply apply directly to our program and identify themselves as WICHE WRPG applicants. WRPG students must fulfill all of our usual requirements for admission, meet all admission deadlines, and be selected for admission.

Students in the master’s program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of master’s theses on a wide range of topics. There is also a popular non-thesis option for the MA.

Students considering both our PhD and MA program should apply to the PhD program. Applicants not accepted to the PhD will automatically be considered for the MA program. Those interested only in the terminal MA program should apply just to that program. Students applying to the MA program can expect to hear about admission some time in late March to early April.

Students wishing to pursue a master’s degree in philosophy should note the Graduate School requirements in the master’s degree requirements (p. 1043) section and consult the MA Program page (https://www.colorado.edu/philosophy/graduate/ma-program/) and the Graduate Admissions page (https://www.colorado.edu/philosophy/graduate/graduate-admissions/) of the Philosophy Department’s website.

Bachelor’s–Accelerated Master’s Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree, Philosophy - Bachelor of Arts (BA) (p. 491) and the Bachelor’s–Accelerated Master’s Program page (https://www.colorado.edu/philosophy/undergraduate/bachelors-accelerated-masters-program/) on the Philosophy Department’s website.

Requirements
Degree Plans
Plan I: Thesis Option
The MA requires:

• 30 hours of approved graduate study at the 5000 level or above (philosophy courses taken below the 5000 level may be taken as PHIL 5810, with approval)
• demonstrated proficiency in the core areas of philosophy
• a successful thesis defense.

Four to six hours of the 30 credit hours must be thesis hours; the remaining 24 to 26 hours are for coursework credit hours (typically eight courses). At least 18 hours must be philosophy courses (PHIL 6940 and PHIL 6950 do not count).

No more than 9 hours of credit may be transferred into the program from other graduate programs. Students who enter the MA program already holding an MA degree may not transfer into the program any credits that applied toward the MA degree already held.

Students must demonstrate competence in the core areas of philosophy by passing, with a grade of B or better, one graduate or upper-division course in each of the following three areas: history of philosophy, metaphysics and epistemology, and values.

Electives
One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Decartes to Kant).
- PHIL 5010 Single Philosopher
- PHIL 5020 Topics in the History of Philosophy
- PHIL 6000 Seminar in the History of Philosophy

One course in metaphysics and epistemology: 3
- PHIL 5300 Philosophy of Mind
- PHIL 5340 Epistemology
- PHIL 5360 Metaphysics
- PHIL 5370 Free Will and Determinism
- PHIL 5400 Philosophy of Science
- PHIL 5490 Philosophy of Language
- PHIL 5550 Metaphysics and Epistemology Proseminar
- PHIL 6300 Seminar in Philosophy of Mind
- PHIL 6340 Seminar in Epistemology
- PHIL 6380 Seminar in Metaphysics
- PHIL 6400 Seminar in Philosophy of Science
- PHIL 6490 Seminar in Philosophy of Language

One course in values: 3
- PHIL 5100 Values Proseminar
- PHIL 5110 Contemporary Moral Theory
- PHIL 5120 Philosophy and Animals
- PHIL 5150 Topics in Applied Ethics
- PHIL 5200 Contemporary Political Philosophy
- PHIL 5210 Philosophy and Social Policy
- PHIL 5230 Bioethics and Public Policy
- PHIL 5240 Seminar in Environmental Philosophy
- PHIL 5260 Philosophy of Law
- PHIL 5290 Topics in Values and Social Policy
- PHIL 5470 Probability and Rational Choice
- PHIL 5700 Aesthetics
- PHIL 6100 Seminar in Ethics
- PHIL 6200 Seminar in Social and Political Philosophy

Other course as approved by the graduate director. Other electives to fulfill the 30-credit minimum: 15
- PHIL 5030 Greek Philosophical Texts
- PHIL 5040 Latin Philosophical Texts
- PHIL 5440 Topics in Logic
- PHIL 5450 History and Philosophy of Physics
- PHIL 5460 Modal Logic
- PHIL 5600 Philosophy of Religion
- PHIL 5810 Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)
- PHIL 5840 Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)
- PHIL 6310 Issues and Methods in Cognitive Science

Students must demonstrate competence in logic by earning a grade of B– or better in PHIL 2440 (Symbolic Logic), or an equivalent course, or in some more advanced logic course. Students may satisfy this requirement either by taking all the examinations in PHIL 2440 and averaging at least a B– or by earning at least a B– on the comprehensive final examination offered in that course each semester. Students may be exempted from this requirement by the Director of Graduate Studies if they have done suitable work in formal logic at other institutions, or in other departments at CU Boulder.

Total Credit Hours 28-30

Thesis and Oral Defense
Each student must prepare a thesis plan acceptable to the chair of his or her thesis committee and proceed to write the thesis, working as closely as necessary with the chair. At the appropriate time, the committee will convene to hold a final oral defense of the thesis. A copy of the thesis must be furnished to each committee member at least two weeks prior to the scheduled date of the defense.

Plan II: Non-Thesis Option
The department will award a non-thesis MA to any student who has completed 33 credits of graduate-level coursework with a B+ average or better. Twenty-four hours of coursework must be in philosophy.

The student must also meet the standard logic requirement and take three credits in each of our three general areas: history of philosophy (ancient or modern, specifically); metaphysics and epistemology; and values.

Standard restrictions on the number of credits earned from special topics and from independent study apply.

### Philosophy - Doctor of Philosophy (PhD)

The PhD program in philosophy at CU Boulder consists of approximately 2.5 years of coursework and 2.5 years of work on a dissertation, with 5 years of guaranteed funding. We are both a research and a teaching department. Teaching appointments are not only the principal means of supporting graduate students but are also the way that we train graduate students for a career of teaching as well as doing research in philosophy.

Applicants for admission to the Graduate School for work toward a doctoral degree in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the doctoral program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of doctoral dissertations on a wide range of topics. The department makes available teaching assistantships and then graduate part-time instructorships to its doctoral students, and assists with job placement.

Students wishing to pursue doctoral work in philosophy should note the doctoral degree requirements (p. 1045) and consult the PhD program portion (https://www.colorado.edu/philosophy/graduate/ phd-program/) and the Graduate Admissions portion (https://www.colorado.edu/philosophy/graduate/graduate-admissions/) of the Department of Philosophy website.

---

**Total Credit Hours**

36
Requirements

- **Coursework:** Students must take a minimum of 45 hours of approved graduate study, in addition to the 30 hours of dissertation credit hours required by the Graduate School.
- **Distribution requirements:** 27 hours must be devoted to satisfying specific distribution requirements.
- **Language and technical requirement:** Students must satisfy any language and/or technical requirements that the department judges to be necessary given the area of the dissertation.
- **Logic:** Students must demonstrate proficiency in propositional and first-order logic.
- **Diagnostic paper:** Students must submit a diagnostic paper, generally at the beginning of the third semester of graduate study.
- **Qualifying papers:** Students must submit a qualifying paper, generally at the beginning of the fifth semester of graduate study. Students may advance in the program only if the qualifying paper is judged acceptable by the examining committee and approved by the department.
- **Prospectus and oral examination:** After passing the qualifying paper, students must assemble a prospectus committee of five faculty members, including a Chair/Advisor and (typically) an outside member. Students must submit a written prospectus to this committee, who, after judging the prospectus acceptable, will conduct an oral exam on the prospectus and related topics.
- **Dissertation and oral defense:** Students must write a dissertation that is acceptable to the dissertation committee, and defend the dissertation in a public, oral defense at a time deemed appropriate by the committee.
- Students are expected to make reasonable progress toward the PhD, and will be evaluated by the department in this regard each spring.

For detailed requirements, consult the PhD section (https://www.colorado.edu/philosophy/graduate/phd-program/) of the department’s website and especially the Official PhD Requirements and Additional Program Information (https://www.colorado.edu/philosophy/phdreqs/) (PDF).

**Recommended Plan of Study**

Ideally, PhD students in their first two years will take and complete three courses per semester, for a total of 12 courses (36 credit hours) by the end of the second year. The minimum number of courses PhD students can take to make good progress in the first two years of the program is five courses per year.

At the beginning of the third semester in the program, students turn in a diagnostic paper and will receive feedback from three faculty members.

At the beginning of the fifth semester in the program, students turn in the qualifying paper, which will be evaluated anonymously; this is a qualifying event that the student must pass in order to be considered for advancement to candidacy in the PhD program.

In the fifth semester, students continue to take courses in order to complete the required 45 credit hours (typically 15 courses). Ideally, students should have completed coursework by the end of their fifth semester and should then begin work on the prospectus.

Ideally, students will submit and defend their prospectus sometime in their sixth semester. Students are eligible to sign up for up to 10 dissertation hours before they pass their prospectus exam. The remainder of the required 30 dissertation hours are used in the fourth and fifth (and possibly sixth) years in the program while completing the dissertation.

**Physics**

Graduate study and opportunities for basic research are offered in experimental and theoretical physics in the following subfields: atomic and molecular physics, biophysics, chemical physics, condensed matter physics, elementary particle physics, geophysics, laser and optical physics, nuclear physics, physics education research, plasma and space physics, quantum information science and renewable energy.

Doctoral programs in chemical physics and geophysics are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

Course code for this program is PHYS.

**Master's Degree**

- Physics - Master of Science (MS) (p. 1284)

**Doctoral Degree**

- Physics - Doctor of Philosophy (PhD) (p. 1285)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses

PHYS 5030 (3) Intermediate Mathematical Physics 1
This course and its continuation, PHYS 5040, form a survey of classical mathematical physics. Studies complex variable theory and finite vector spaces, and includes topics in ordinary and partial differential equations, boundary value problems, potential theory, and Fourier analysis.
Equivalent - Duplicate Degree Credit Not Granted: MATH 5030
Requisites: Restricted to graduate students only.

PHYS 5040 (3) Intermediate Mathematical Physics 2
Continuation of PHYS 5030. Includes group theory, special functions, integral transforms, integral equations and calculus of variations.
Equivalent - Duplicate Degree Credit Not Granted: MATH 5040
Requisites: Restricted to graduate students only.
Recommended: Prerequisite PHYS 5030.

PHYS 5070 (3) Introduction to Computational Physics
Surveys methods and practices in programming and scientific computing for the study of physics, using the Python programming language. Core material will include data analysis and visualization, numerical solution of differential equations, working with large-scale remote computers, and general software skills such as debugging, version control, and collaborative tools. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

PHYS 5130 (3) Biological Electron Microscopy: Principles and Recent Advances
Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4130

PHYS 5141 (3) Astrophysical and Space Plasmas
Covers magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5140
Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

PHYS 5150 (3) Introductory Plasma Physics
Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzmann equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKBJ theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory). Department enforced prerequisite: PHYS 3310. Instructor consent required for undergraduates.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 5150
Requisites: Restricted to graduate students only.

PHYS 5160 (3) Fundamentals of Optics and Lasers
Covers the basic physic of lasers. Topics include basics of optical resonators and gaussian beam propagation, stimulated emission, laser threshold conditions, laser linewidth, q-switching and mode locking of lasers, tuning of Cw lasers, and specifics of various common lasers.
Requisites: Restricted to graduate students only.

PHYS 5210 (3) Theoretical Mechanics
Variational principles, Lagrange's equations, Hamilton's equations, motion of rigid body, relativistic mechanics, transformation theory, continuum mechanics, small oscillations, Hamilton-Jacobi theory.
Requisites: Restricted to graduate students only.

PHYS 5250 (3) Introduction to Quantum Mechanics 1
Quantum phenomena, Ehrenfest theorem and relation to classical physics, applications to one-dimensional problems, operator techniques, angular momentum and its representations, bound states and hydrogen atom, and Stern-Gerlach experiment and spin and spinor wave function. Department enforced prerequisite: advanced undergraduate quantum mechanics course.
Requisites: Restricted to graduate students only.

PHYS 5260 (3) Introduction to Quantum Mechanics 2
Symmetries and conservation laws, identical particle systems, approximation techniques (including time-dependent and time-independent perturbation theories and variational techniques) and their applications, scattering theory, radiative transitions, and helium atom.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite PHYS 5250.

PHYS 5400 (3) Introduction to Fluid Dynamics
Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400 and ASTR 5400
Requisites: Restricted to graduate students only.

PHYS 5430 (3) Advanced Laboratory
Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Department enforced prerequisites: PHYS 3330 and PHYS 3220 and PHYS 3320. Department enforced corequisites: PHYS 4410.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4430
Requisites: Restricted to graduate students only.

PHYS 5450 (3) History and Philosophy of Physics
Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4450 and PHIL 4450 and PHIL 5450
Requisites: Restricted to graduate students only.

PHYS 5460 (3) Teaching and Learning Physics
Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4460 and EDUC 4460 and EDUC 5460
Requisites: Restricted to graduate students only.
PHYS 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach
Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4550 and MCDB 4550 and MCDB 5500

PHYS 5560 (3) Introduction to Biophysics
Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4560 and MCDB 4560 and MCDB 5560

Grading Basis: Letter Grade

PHYS 5606 (3) Optics Laboratory
Consists of 13 optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers and holograms, and experimentation of fiber optics and Fourier optics.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5606
Recommended: Prerequisite undergraduate optics course such as PHYS 4510.

PHYS 5730 (3) Particle Physics
Introduces the properties of elementary particles, phenomenology of particle interactions, particle detector, particle accelerators, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, symmetries and symmetry breaking.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites undergraduate courses in quantum mechanics and electricity and magnetism.

PHYS 5770 (3) Gravitational Theory (Theory of General Relativity)
Presents Einstein’s relativistic theory of gravitation from geometric viewpoint; gives applications to astrophysical problems (gravitational waves, stellar collapse, etc.). Instructor consent required for undergraduates.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites PHYS 3220 and PHYS 3320.

PHYS 5840 (1-3) Selected Topics for Graduate Independent Study
Subject matter to be arranged.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment term in term.

PHYS 5970 (3) Seminar on Physical Methods in Biology
Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, Eels, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRL, Pet, Cat), Fourier analysis, synchrotron radiation, Exafs, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.
Equivalent - Duplicate Degree Credit Not Granted: PHYS 4970
Requisites: Restricted to graduate students only.

PHYS 6260 (3) Geometry of Quantum Fields and Strings
Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories.
Equivalent - Duplicate Degree Credit Not Granted: MATH 6250
Recommended: Prerequisites MATH 6230 and PHYS 5250 and MATH 6240 and PHYS 7280.

PHYS 6610 (3) Earth and Planetary Physics 1
Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and ASTR 6610
Requisites: Restricted to graduate students only.

PHYS 6620 (3) Earth and Planetary Physics 2
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and ASTR 6630
Requisites: Restricted to graduate students only.

PHYS 6630 (3) Earth and Planetary Physics 3
Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and ASTR 6630
Requisites: Restricted to graduate students only.

PHYS 6650 (1-3) Seminar in Geophysics
Advanced seminar studies in geophysical subjects for graduate students.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and GEOL 6655
Requisites: Restricted to graduate students only.

PHYS 6655 (3) InSAR Processing and Interpretation
Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6655
Grading Basis: Letter Grade

PHYS 6670 (2) Geophysical Inverse Theory
Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations.
Equivalent - Duplicate Degree Credit Not Granted: GEOL 6670
Requisites: Restricted to graduate students only.
Recommended: Prerequisites a course in calculus and a course in computer programming (any language).

PHYS 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
PHYS 6950 (1-6) Master’s Thesis
Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and development work. Work of an original nature expected.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

PHYS 7160 (3) Intermediate Plasma Physics
Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy, inhomogeneity; radiation-ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 7160
Requisites: Restricted to graduate students only.
Recommended: Prerequisite PHYS 5150.

PHYS 7230 (3) Statistical Mechanics
Classical and quantum statistical theory, including study of both equilibrium and nonequilibrium systems. Topics covered include kinetic theory, degenerate gases, macrocanonical and grand canonical ensembles, and irreversible processes. Department enforced prerequisite: advanced undergraduate quantum mechanics course.
Requisites: Restricted to graduate students only.

PHYS 7240 (3) Advanced Statistical Mechanics
Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite PHYS 7230.

PHYS 7250 (3) Quantum Many Body Theory
Theory of quantum many body systems, including methods based on Green’s functions, Feynman diagrams, and coherent state path integral with applications to interacting quantum gases, superconductivity and superfluidity, quantum phase transitions, quantum magnetism, quantum motion in the presence of disorder, and topological states of matter.
Requisites: Restricted to graduate students only.

PHYS 7270 (3) Introduction to Quantum Mechanics 3
Radiation theory; relativistic wave equations with simple applications; introduction to field theory and second quantization.
Requisites: Restricted to graduate students only.

PHYS 7280 (3) Advanced Quantum Theory
Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite PHYS 7270 or instructor consent required.

PHYS 7310 (3) Electromagnetic Theory 1
Sophisticated approach to electrostatics, boundary value problems, magnetostatics, applications of Maxwell’s equations to electromagnetic wave propagation, wave guides, and resonant cavities and magnetohydrodynamics.
Requisites: Restricted to graduate students only.

PHYS 7320 (3) Electromagnetic Theory 2
Continuation of PHYS 7310. Topics include relativistic particle dynamics; radiation by moving charges; multiple fields; radiation damping and self-fields of a particle; collisions between charged particles and energy loss; radiative processes; and classical field theory.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite PHYS 7310.

PHYS 7430 (3) Softened Condensed Matter Physics
Introduces the science of liquid crystals, polymers, biological membranes, biopolymers, block copolymers, molecular monolayers, colloids, nanoparticle suspensions, emulsions, foams, gels, elastomers and other soft materials. Topics vary from semester to semester and is geared toward graduate students with diverse preparation backgrounds, including students from the Department of Physics, as well as other science and engineering departments.
Requisites: Restricted to graduate students only.

PHYS 7440 (3) Theory of the Solid State
Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity.
Requisites: Restricted to graduate students only.

PHYS 7450 (3) Theory of Solid State 2
Second semester of condensed matter physics, covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity and other topics at the discretion of the instructor.
Requisites: Restricted to graduate students only.

PHYS 7550 (3) Atomic and Molecular Spectra
Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.
Requisites: Restricted to graduate students only.

PHYS 7560 (3) Quantum Optics
Covers quantum optical and atomic systems including topics such as: coherent and squeezed states, theory of optical coherence, atom-radiation interaction, optical Bloch equations, open quantum systems, dynamics on the Bloch sphere, resonance fluorescence, beam-splitters and interferometry, entanglement and quantum information.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites PHYS 3220 and PHYS 4410.

PHYS 7570 (3) Quantum Information and Computing
Requisites: Restricted to graduate students only.
PHYS 7650 (3) Nonlinear and Nano-Optics
Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include: description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their generation, measurement and manipulation and their use in applications including spectroscopy.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites PHYS 4510 or PHYS 5160.

PHYS 7660 (3) Ultrafast Optics
Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their generation, measurement and manipulation and their use in applications including spectroscopy. Department enforced prerequisite: PHYS 5160, or PHYS 4510, or ECEN 5645.
Requisites: Restricted to graduate students only.

PHYS 7730 (3) Theory of Elementary Particles
Systematics of elementary particles, leptons, quarks, gauge bosons, symmetries and symmetry breaking, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.
Requisites: Restricted to graduate students only.

PHYS 7810 (1-3) Special Topics in Physics
Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

PHYS 7820 (3) Topics in Scientific Writing
Teaches strategies used in scientific writing with emphasis on problem statement, audience analysis and principles of sound argument; reviews and reinforces essential writing skills, stressing the need for careful and strategic revision; provides experience in writing academic and professional communications; presentation skills and proposal writing. Most appropriate for students beginning to write journal articles, Comp II paper, or dissertation chapter.
Requisites: Restricted to graduate students only.

PHYS 7830 (1) Plasma Seminar
One credit 'journal club' style course covering current and significant historical advances in plasma physics research. Each week the class is assigned a journal article to read in advance of the meeting and one student is selected (on a rotating basis) to present a synopsis and lead a round-table discussion. Cannot be used for minimum credit hour requirements of graduate program. See also PHYS 7810 and PHYS 7820. May be repeated for a total of 7 credit hours.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

PHYS 7840 (1-3) Selected Topics for Graduate Independent Study
Subject matter to be arranged.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 7850 (1-3) Selected Topics for Graduate Independent Study
Subject matter to be arranged. May be repeated for a total of 7 credit hours.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.

Physics - Master of Science (MS)

Students may obtain a master 's degree as either an undergraduate student through the bachelor 's–accelerated master's degree program or as a graduate student.

Graduate students are generally only admitted to the PhD program in physics. Therefore, graduate students who have completed their PhD comprehensive exam or who are unable to complete the PhD program may earn an MS degree en route to a PhD degree. In certain circumstances, students can be admitted to the graduate program for a terminal master 's degree, in which case the prerequisites are the same as for the doctoral program.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor 's and master's degree in a shorter period of time.

For more information, see the Accelerated Master 's tab for the associated bachelor 's degrees:

- Physics - Bachelor of Arts (BA) (p. 506)
- Engineering Physics - Bachelor of Science (BSEP) (p. 861)

Requirements

Qualifying Examination
The Graduate Record Examination (GRE) aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

Course Requirements
There are two separate plans for obtaining the master 's degree, both of which require a total of 30 credit hours with a grade of B- or better at the 5000 level or above (up to 6 credit hours may be at the 3000 or 4000 level if approved by the physics graduate chair). All but 3 credit hours must be in physics (more credit hours may be allowed with permission of the physics graduate chair). A minimum of a B average (GPA of 3.0) must be maintained.

Degree Plans
Plan I: Thesis Option
This plan requires 4–6 thesis credit hours and completion of five of the following courses with a grade of B- or better.
in general physics, analytical mechanics, electricity and magnetism, at a recognized college or university. This preparation includes courses in physics, equivalent to an undergraduate physics major.

**Prerequisites**

Requirements with the other departments that participate in the interdepartmental.

**Doctoral programs in**

**Physics Tracks Requirements page**

**Chemical Physics/Physical Chemistry (PhD)**

Graduate study and opportunities for basic research are offered in experimental and theoretical physics in the following subfields: atomic and molecular physics, biophysics, chemical physics, condensed matter physics, elementary particle physics, geophysics, laser and optical physics, nuclear physics, physics education research, plasma and space physics, quantum information science and renewable energy.

Doctoral programs in chemical physics (https://catalog.colorado.edu/graduate/courses/schools/arts-sciences/programs-study/chemistry-biochemistry/physical-chemistry-doctor-physics-phd/) and geophysics (p. 1213) are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

**Requirements**

**Prerequisites**

Entering graduate students must have a thorough undergraduate preparation in physics, equivalent to an undergraduate physics major at a recognized college or university. This preparation includes courses in general physics, analytical mechanics, electricity and magnetism, thermodynamics, quantum mechanics, atomic physics and mathematics through differential equations and complex variables.

Students wishing to pursue graduate work in physics leading to candidacy for an advanced degree should carefully read the Doctoral Degree Requirements (p. 1045) section of this catalog.

**Qualifying Examination**

The Graduate Record Examination aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

**Course Requirements**

To earn a PhD, candidates must complete 30 credit hours of graduate courses and 30 hours of dissertation credit. At least 27 of the 30 credit hours of coursework must be physics courses at the 5000 level or above; exceptions may be granted with the discretion of the associate chair of graduate studies. All courses, required or otherwise, must be passed with a grade of B- or better, and a course may be repeated only once.

**Comprehensive Examination**

The comprehensive examination is divided into three parts. Part I consists of passing any five of the following six courses with a grade of B- or better.

politics, international relations, public policy, political theory and empirical
type and methodology. The department’s mission is to understand the
political world and to equip students and their community with the skills
for a lifetime of inquiry and engagement.

Course code for this program is PSCI.

Doctoral Degree

• Political Science - Doctor of Philosophy (PhD) (p. 1293)

Faculty

While many faculty teach both undergraduate and graduate students,
some instruct students at the undergraduate level only. For more
information, contact the faculty member’s home department.

Adler, Edward Scott (https://experts.colorado.edu/display/fisid_108903/)
Professor; PhD, Columbia University

Andersson, Krister Par (https://experts.colorado.edu/display/

Vanderheiden, Steven Jon (https://experts.colorado.edu/display/fisid_144759/)
Professor; PhD, University of Wisconsin–Madison

Courses

PSCI 6851 (2) Interdisciplinary Social Science Professional Socialization
Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.
Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831 and SOCY 6851
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

PSCI 6948 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General

PSCI 7002 (3) Seminar in West European Politics
Examines West European politics in terms of general theories of comparative politics, including institutional, behavioral and political economy approaches.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7004 (3) Seminar: Political Theory
Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Political Theory

PSCI 7008 (1) Teaching Political Science
Designed to prepare graduate student teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline-specific education.
Requisites: Restricted to Political Science (PSCI) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General

PSCI 7011 (3) Seminar: American Politics
Core field seminar for students of American politics. Course work emphasizes the diversity of contemporary research on American political history, political institutions, and political behavior.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7012 (3) Seminar: Comparative Political Systems
Discusses current literature on comparative politics including theoretical and methodological issues.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7013 (3) Seminar: International Relations
Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 7021 (3) Latinos and U.S. Politics
Examines in depth the theoretical and empirical literature assessing the political situation and activities of Latinos (Mexican Americans, Puerto Ricans, Cuban Americans, and others) in the U.S. Stresses original research.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7022 (3) Seminar in Political and Economic Development
Covers domestic political and economic development in Latin America, Africa, and Asia, as well as interactions with the global economy. Includes defining, explaining, and prescribing policies for successful development, and comparing the experiences of developing and industrialized countries.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7023 (1) Seminar: Political Theory
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7024 (6) Graduate Student Teaching
Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Political Theory

PSCI 7026 (3) Seminar: Comparative Political Systems
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7029 (3) Seminar: International Relations
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7031 (3) Seminar: Political Theory
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Political Theory

PSCI 7033 (3) Seminar: Comparative Political Systems
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7034 (3) Seminar: International Relations
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7035 (3) Seminar: Political Theory
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Political Theory

PSCI 7036 (3) Seminar: Comparative Political Systems
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7037 (3) Seminar: International Relations
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative
PSCI 7024 (3) Seminar: Selected Political Theories
Familiarizes students with selected political philosophies or theories in classical or modern political thought.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Political Theory

PSCI 7028 (1) Teaching Political Science 2
Second course designed to train graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline specific education.
Requisites: Requires prerequisite course of PSCI 7008 (minimum grade D-). Restricted to Political Science (PSCI) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General

PSCI 7031 (3) Seminar: Political Attitudes and Behavior
Provides an intensive examination of topics in political attitudes and behavior such as political participation, ideology, voting, and elite behavior. Reviews methodology of behavioral research and introduces ICPSR data archive and computer-based research.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7032 (3) Seminar: Latin American Politics
Stresses intensive study of the political process in Latin America with special emphasis on democratization.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7043 (3) Seminar: Problems of International Organization
Studies selected problems concerning administration and operation of public international organizations, including the United Nations and its specialized agencies. Considers decision making, executive leadership, internal organization, personnel policies, coordination of activities, and financing.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 7046 (3) Seminar: Urban Public Policy
Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Public Policy

PSCI 7051 (3) Seminar: The United States Congress
Comprehensively examines literature and selected research topics concerning the United States Congress.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7052 (3) Democracy & Authoritarianism
Examine differences between democracies and authoritarian regimes; the choices and the consequences of democratic institutions in authoritarian regimes; and the causes of authoritarian survival and demise and the subsequent political choice.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite PSCI 7012.
Additional Information: Departmental Category: Comparative

PSCI 7053 (3) War and Peace
Explores the conditions that promote conflict between countries, focusing on broad and systemic explanations of war and peace. Investigates classical as well as current behavioral approaches to understanding why countries fight.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 7055 (3) Introductory Game Theory
Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7062 (3) The Politics of Ethnicity
Explores the political aspects of pluralism, ethnonationalism, separatism, and related phenomena. Examines theories of ethnic mobilization, conflict, and accommodation in the context of political development and nation building. Includes cross-polity comparisons and case studies of multiethnic societies in the developed and developing world.
Requisites: Restricted to graduate students only.
Recommended: Requisite at least one course in comparative politics.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7071 (3) An Introduction to the Rule of Law
Introduces students to debates about the role of institutions, particularly but not exclusively legal institutions, in placing limits on the state and fostering the rule of law. What is law? Why do courts exist and what is their role in the state? What institutions are necessary to establish the rule of law? Why are institutions successful in some contexts and not others? Considers these questions by surveying classic and current research from American and comparative politics literatures on topics such as judicial independence, credible commitments, separation of powers and constitutional design.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American
PSCI 7073 (3) Seminar: Global Political Economy
Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 7075 (3) Scope and Methods of Political Science
Introduces students to research design, with a subsequent focus on professional development. Students learn about different styles of research, central methodological points surrounding (and differentiating) these styles, and standards for evaluating research, regardless of approach or content.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7085 (4) Introduction to Political Science Data Analysis
Provides intensive experience with quantitative techniques commonly employed in political science research, covering basic inferential and descriptive statistics through multiple regression. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research.
Requisites: Restricted to Political Science (PSCI) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7091 (3) Politics of Social Movements
Examines theoretical and empirical research on American social movements. Emphasizes the role of movements as political actors and their ability to bring about changes in public policy and national political institutions.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7095 (3) Advanced Political Data Analysis
Provides advanced training in the statistical modeling of political relationships. Focuses on the properties and assumptions of the ordinary least squares regression model, building on material covered in PSCI 7085: Introduction to Political Science Data Analysis.
Requisites: Requires prerequisite course of PSCI 7085 (minimum grade B-). Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7108 (3) Special Topics
Various topics not normally offered in the curriculum. Topics vary each semester.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General

PSCI 7111 (3) Seminar: American Political Institutions
Intensive examination of the structure and rules of different political institutions in the United States. Explores both the changing approaches to the study of American political institutions as well as many of the major research topics on the presidency, Congress, the judiciary, and the bureaucracy.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7114 (3) Survey of Historical and Contemporary Political Theory
Examines major texts of Western political thought from the ancients through the 21st century. Introduces students to major schools of contemporary political theory, while situating these in their larger political context. Professionalizes students through presentations and research projects. Texts vary each semester.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Requisite some previous coursework in political theory or philosophy.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Political Theory

PSCI 7115 (3) Qualitative Methods
Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7116 (3) Context-Sensitive Research Methods
Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 5740
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Public Policy

PSCI 7118 (3) Foundations of Environmental Justice
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: GEOG 7118, COMM 7118 and ENVS 7118
Requisites: Restricted to graduate students only.

PSCI 7123 (3) Civil Conflict
Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including the causes and consequences of civil war, protests, insurgency, terrorism, revolution, and intervention.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations
PSCI 7124 (3) Contemporary Democratic Theory
Surveys major schools of contemporary democratic theory and introduces students to current scholarly debates about democracy and democratic politics. Professionalizes students through class presentations and research projects. Specific controversies and texts vary each semester.
**Requisites:** Restricted to graduate students only.
**Recommended:** Requisite some previous coursework in political theory or philosophy.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Political Theory

PSCI 7126 (3) Introduction to Public Policy
Designed for graduate students specializing in the field of public policy in the political science program. Surveys a wide variety of approaches to the analysis and understanding of public policy. The course is not a survey of any particular set of substantive policy areas but instead is intended as an examination of the enduring puzzles that analysts of public policy commonly confront, the kinds of research methodologies that they employ, and a selection of the techniques that they bring to bear on their research questions.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Public Policy

PSCI 7131 (3) Political Psychology
Focuses on the psychological roots of political behavior, including the origins of political beliefs, political decision-making processes, and the psychology of group interactions.
**Requisites:** Restricted to Political Science (PSCI) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

PSCI 7132 (3) Comparative Political Economy
Explores the relationship between economics and politics in developed and developing countries. Gives students an historical overview of 20th century economic trends and covers scholarly approaches to topics such as political and economic institutions, economic ideas and interests, the political causes of growth and equality, globalization and the welfare state, and varieties of capitalism.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite PSCI 7012.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Comparative

PSCI 7136 (3) Public Policy and Behavioral Science
Public policy is usually designed with the assumption that we make optimal choices based on our own best interests. Findings from the behavioral sciences, however, challenge this traditional view and reveal that a wide array of factors influence our decisions. In this course, we will explore the gaps between how we assume individuals to behave and how people actually behave. With better knowledge of what motivates human behavior, we will examine and discuss how policy might be better designed and executed to improve outcomes in society.
**Requisites:** Restricted to graduate students only.

PSCI 7143 (3) Strategic Choice of Political Conflict
Explores the conditions under which political actors go to war, and the conditions under which they broker peace. Approaches political conflict from the perspective of strategic choice. Conflict is not an accident, but is the deliberate result of decisions by actors. Actors choose conflict when bargaining obstacles prevent them from reaching a peaceful agreement.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

PSCI 7145 (3) Advanced Game Theory
Covers more advanced applications of game theory in political science. Equips students with the skills to design and solve models at a reasonably high level of complexity and generality, and to understand how to effectively make use of such models in their research.
**Requisites:** Requires prerequisite course of PSCI 7055 (minimum grade B-). Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

PSCI 7151 (3) American Subnational Politics and Government
Provides a comprehensive overview of the issues and literature concerning American “subnational” politics. Considers three bodies of literature: American federalism and intergovernmental relations, state politics, and urban/local politics. Also examines a number of policy issues.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American

PSCI 7155 (3) Maximum Likelihood Estimation and Generalized Linear Models
Introduces maximum likelihood estimation and extends the linear model to several “generalized linear models.” Provides students with the skills to analyze and understand a broad class of outcome variables and data structures such as dichotomous outcomes, counts, ordered and unordered categorical outcomes and bounded variables. Also examines several special topics such as multilevel models, causal inference and missing data.
**Requisites:** Requires prerequisite courses of PSCI 7075 and PSCI 7085 and PSCI 7095 (all minimum grade B-). Restricted to graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

PSCI 7165 (3) Experimental Methods
Focuses on the design, implementation, and analysis of experiments in political science, including lab experiments, survey experiments, and field experiments.
**Requisites:** Restricted to Political Science (PSCI) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

PSCI 7171 (3) Seminar: Law and Democratic Governance
Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students’ understanding of the law of democracy, exposing students to some of the best scholarship, and improving students’ ability to evaluate and critique legal scholarship.
**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 8205
**Recommended:** Prerequisite PSCI 7011.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: American
PSCI 7172 (3) Comparative Political Institutions
Institutional theory has burgeoned across the social sciences in the last three decades. This course aims to raise awareness and understanding of institutional theory in comparative politics, as compared to alternative approaches such as political economy, political behavior, etc., and to help students develop skills to communicate this awareness and understanding to other professional political scientists.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 7173 (3) The Politics of International Factor Flows
Focuses on the second dimension of international trade: the politics of international factor flows. Economic globalization can be defined as the freer flow of (1) goods and services (i.e., international trade) and (2) factors of production (e.g., capital and labor) across national borders. Links these topics in International Political Economy to broader theories of International Relations, namely Institutionalism and Liberalism.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 7175 (3) Dissertation Seminar
Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7181 (3) Immigration Law and Immigrants' Rights
Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7615
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7183 (3) International Cooperation
Investigates the origins, forms and consequences of international cooperation. The course covers both theoretical material related to international cooperation and various related global issue areas; security, economy, environment and social welfare. For each issue area, the key theoretical debates, empirical findings, as well as central challenges and parameters that constrain international cooperation will be investigated.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 7185 (3) Political Network Analysis
Explores all aspects of political network analysis including disciplinary background, theories and concepts, approaches and applications, data basics and measurement, and techniques of analysis. Data assignments use software such as UCINET and R. Introduces visualization software including NetDraw, NetworkX and Cytoscape.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7191 (3) Law and Politics Colloquium: Race in America
A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8645
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 7203 (3) Political Economy of International Migration and Policy
Provides an overview of the seminal and cutting edge research on the political economy of international migration including both immigration and emigration. Covers a diverse set of international migration issues, including public attitudes toward immigration, special interest politics of immigration policy making and the dynamics between political institutions and international migration.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 7206 (3) Public Policy and the Governance of Natural Resources
Addresses a basic empirical puzzle in comparative environmental policy: why are some governmental organizations able to create relatively functional governance arrangements for natural resources management, while many others fail to do so? More specifically, we will seek to understand the particular contextual conditions that make successful governance transformations more likely.

Grading Basis: Letter Grade
Additional Information: Departmental Category: Public Policy

PSCI 7222 (3) Comparative Political Behavior
Provides an introduction to research on behavioral processes and outcomes using readings mainly from the sub-fields of American Politics and Comparative Politics. Geographic emphasis leans toward advanced democracies because this is how behavioral research has generally developed but will also explore works by developing country experts. The main goals are to help students become familiar with the existing literature and to help them explore several key debates in the field.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative
PSCI 7255 (3) Time Series and Pooled Time Series
Time series models are models which take advantage of variation over time in a single unit, and pooled time series (sometimes called cross-sectional time series or time series cross-sectional) models, which utilize variation across both time and spatial units, are very common in political science. While these models offer substantial leverage over important social science problems that use purely cross-sectional data, there are a number of pitfalls that are necessary to avoid during estimation.

**Requisites:** Restriction to graduate students only.

**Recommended:** Prerequisite students should have a background in advanced regression statistics (such as PSCI 7085, PSCI 7095 and PSCI 7155).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

PSCI 7306 (3) Program Evaluation
Focuses on applying the tools of causal inference and program evaluation to various policy issues. The course materials explore whether programs meet their desired goals. There are a number of ways in which the effectiveness of a program can be defined and measured. Empirical applications based on real-world data will be drawn from a wide range of policy areas, including education, welfare, unemployment, discrimination, health, immigration, the environment, and economic development. Previously offered as a special topics course.

**Grading Basis:** Letter Grade

PSCI 7901 (1-3) Independent Study
Not a free option; must be approved by the student’s advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American

PSCI 7902 (1-3) Independent Study
Not a free option; must be approved by the student’s advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Comparative

PSCI 7903 (1-3) Independent Study
Not a free option; must be approved by the student’s advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: International Relations

PSCI 7904 (1-3) Independent Study
Not a free option; must be approved by the student’s advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Political Theory

PSCI 7905 (1-3) Independent Study
Not a free option; must be approved by the student’s advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Empirical Theory and Research Methodology

PSCI 7906 (1-3) Independent Study
Not a free option; must be approved by the student’s advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Public Policy

PSCI 7908 (1-3) Independent Study
Not a free option; must be approved by the student’s advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General

PSCI 7909 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: American
PSCI 8902 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 8903 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 8904 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Political Theory

PSCI 8905 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 8906 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Public Policy

PSCI 8908 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General

PSCI 8909 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 8910 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 8911 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 8912 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 8913 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Comparative

PSCI 8914 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 8915 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: American

PSCI 8916 (1-3) Graduate Research Topic
 Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
 Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
 Grading Basis: Letter Grade
 Additional Information: Departmental Category: Comparative

PSCI 8917 (1-3) Graduate Research Topic
Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student’s advisor and department chair. Does not count as a seminar.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Relations

PSCI 8991 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: American

PSCI 8992 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: Comparative

PSCI 8993 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: International Relations

PSCI 8994 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: American

PSCI 8995 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: Comparative

PSCI 8996 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: International Relations

PSCI 8997 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: American

PSCI 8998 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: Comparative

PSCI 8999 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 99.00 total credit hours.
Additional Information: Departmental Category: International Relations

Political Science - Doctor of Philosophy (PhD)
The Department of Political Science at CU Boulder offers instruction and research in the art and science of politics and has a long tradition of excellence in training graduate students. A diverse faculty of nearly 30 professors trains graduate students to conduct original research in six areas of political science:

- American government and politics
- Comparative politics
- International relations
- Political theory
Requirements

The Department of Political Science PhD program includes coursework in six fields of study, a qualifying research paper and oral defense, comprehensive written and oral examinations, doctoral prospectus defense, final dissertation defense, and minimum 30 dissertation credit hours.

Students take a wide range of courses and demonstrate mastery of two different fields, the major (first field) and the minor (second field). Students take a minimum of three seminars in each field and at least three courses outside of their major and minor fields.

Students complete a minimum of 42 credit hours of coursework with a B average or better. Of these 42 credit hours, 39 must be at the 7000 level or higher and 35 credit hours must be taken in the Political Science Department. Students also take a minimum of 30 dissertation credit hours.

Students take additional coursework with the consideration that they will fulfill all requirements needed to complete the program. During the first semester in residence students are required to take three introductory courses:

- PSCI 7008 Teaching Political Science
- PSCI 7075 Scope and Methods of Political Science
- PSCI 7085 Introduction to Political Science Data Analysis

In addition, there are five majors with required core seminar coursework.

- American Politics Major - PSCI 7011 is required.
- Comparative Politics Major - PSCI 7012 is required.
- International Relations Major - PSCI 7XX3 is required (please identify an appropriate graduate seminar in consultation with your advisor).
- Political Theory Major - PSCI 7004 is required.
- Public Policy Major - PSCI 7126 is required.

As a condition of funding, all students appointed as graduate assistants are required to enroll in a minimum of 9 credit hours per semester for their first five semesters or until they have passed comprehensive exams.

Students wishing to pursue graduate work toward the degree should carefully read the Doctoral Degree Requirements (p. 1045) section and review the courses listed in this catalog. Requirements for the political science graduate program are clarified in more detail on the department’s PhD Requirements and Handbook (http://www.colorado.edu/polisci/graduate/phd/) webpage.

Time Limit

Full-time students are expected to complete all requirements for the PhD degree within five years of entering the program; the maximum time allowed by the Graduate School is six years.

Psychology and Neuroscience

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric, and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department’s Graduate Program Subplans (https://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/) webpage.

Note: The department does not offer a terminal master’s degree program.

Course codes for this program are PSYC and NRSC.

Doctoral Degrees

- Neuroscience - Doctor of Philosophy (PhD) (p. 1302)
- Psychology - Doctor of Philosophy (PhD) (p. 1303)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Allen, David (https://experts.colorado.edu/display/fisid_114466/)
Teaching Associate Professor; PhD, University of California, Los Angeles

Alpern, Herbert P.
Professor Emeritus

Arch, Joanna (https://experts.colorado.edu/display/fisid_147415/)
Professor; PhD, University of California, Los Angeles

Bachtell, Ryan (https://experts.colorado.edu/display/fisid_146084/)
Associate Professor; PhD, Oregon Health Science University

Banich, Marie (https://experts.colorado.edu/display/fisid_120646/)
Professor; PhD, University of Chicago

Baratta, Michael V. (https://experts.colorado.edu/display/fisid_149599/)
Assistant Professor; PhD, University of Colorado Boulder

Barth, Daniel (https://experts.colorado.edu/display/fisid_100820/)
Professor; PhD, University of California, Los Angeles

Benoit, Roland
Associate Professor; PhD, University College London

Bidwell, Cinnamon (https://experts.colorado.edu/display/fisid_155117/)
Assistant Professor; PhD, University of Colorado Boulder

Blair, Irene (https://experts.colorado.edu/display/fisid_107261/)
Professor; PhD, Yale University
Blechman, Elaine A. 
Professor Emerita

Bourne, Lyle E. Jr. 
Professor Emeritus

Bryan, Angela (https://experts.colorado.edu/display/fisid_115216/)
Professor; PhD, Arizona State University

Campeau, Serge (https://experts.colorado.edu/display/fisid_115395/)
Professor; PhD, Yale University

Carter Carston, Ronald McKell (https://experts.colorado.edu/display/fisid_154921/)
Assistant Professor; PhD, California Institute of Technology

Chun, Lauren (https://experts.colorado.edu/display/fisid_168527/)
Teaching Assistant Professor; PhD, University of Colorado Boulder

Collins, Allan C. 
Professor Emeritus

Correll, Joshua (https://experts.colorado.edu/display/fisid_151728/)
Associate Professor; PhD, University of Colorado Boulder

Cowell, Rosie 
Associate Professor; PhD, University of Oxford

Curran, Timothy (https://experts.colorado.edu/display/fisid_118454/)
Professor Emeritus; PhD, University of Oregon

Day, Heidi E.W. (https://experts.colorado.edu/display/fisid_116632/)
Teaching Professor of Distinction; PhD, University of Cambridge

DeFries, John C. 
Professor Emeritus

Dimidjian, Sona (https://experts.colorado.edu/display/fisid_140084/)
Professor; PhD, University of Washington

Donaldson, Zoe (https://experts.colorado.edu/display/fisid_157087/)
Associate Professor; PhD, Emory University

Friedman, Naomi P. (https://experts.colorado.edu/display/fisid_109519/)
Associate Professor; PhD, University of Colorado Boulder

Gildersleeve, Kelly (https://experts.colorado.edu/individual/fisid_167402/)
Teaching Assistant Professor; PhD, University of California, Los Angeles

Grotzinger, Andrew (https://experts.colorado.edu/display/fisid_167222/)
Assistant Professor; PhD, University of Texas at Austin

Gruber, June L. (https://experts.colorado.edu/display/fisid_153634/)
Associate Professor; PhD, University of California, Berkeley

Harvey, Lewis Orvis (https://experts.colorado.edu/display/fisid_101173/)
Professor; PhD, Pennsylvania State University

Healy, Alice F. 
Distinguished Professor Emeritus

Hernandez, Theresa D. (https://experts.colorado.edu/display/fisid_102953/)
Professor; PhD, University of Texas at Austin

Hewitt, John K. (https://experts.colorado.edu/display/fisid_101035/)
Professor; PhD, University of London

Hill, Karl G. (https://experts.colorado.edu/individual/fisid_159803/)
Professor

Huber, David 
Professor; PhD, University of Indiana

Huibregtse, Brooke (https://experts.colorado.edu/display/fisid_159929/)
Teaching Assistant Professor; PhD, University of Colorado Boulder

Ito, Tiffany (https://experts.colorado.edu/display/fisid_113066/)
Professor; PhD, University of Southern California

Jessor, Richard 
Professor Emeritus

Jones, Matthew (https://experts.colorado.edu/display/fisid_144611/)
Professor; PhD, University of Michigan Ann Arbor

Judd, Charles M. 
Distinguished Professor Emeritus

Kaiser, Roselinde H. (https://experts.colorado.edu/display/fisid_164070/)
Assistant Professor; PhD, University of Colorado Boulder

Kaufmann, Vyga G. (https://experts.colorado.edu/display/fisid_151089/)
Teaching Assistant Professor; PhD, University of Colorado Boulder

Keller, Matthew C. (https://experts.colorado.edu/display/fisid_144507/)
Professor; PhD, University of Michigan Ann Arbor

Kim, Albert E. (https://experts.colorado.edu/display/fisid_143740/)
Associate Professor; PhD, University of Pennsylvania

King, D. Brett (https://experts.colorado.edu/display/fisid_103815/)
Teaching Professor of Distinction; PhD, Colorado State University

Kintsch, Walter 
Professor Emeritus

Maier, Steven F. (https://experts.colorado.edu/display/fisid_100482/)
Distinguished Professor; PhD, University of Pennsylvania

Professor Emeritus

Miyake, Akira (https://experts.colorado.edu/display/fisid_107321/)
Professor; PhD, Carnegie Mellon University

Molas, Susanna 
Assistant Professor; PhD, Pompeu Fabra University

Olson, Richard 
Professor Emeritus

Park, Bernadette (https://experts.colorado.edu/display/fisid_103732/)
Professor Emeritus; PhD, Northwestern University

Pedersen, Eric (https://experts.colorado.edu/display/fisid_159278/)
Assistant Professor; PhD, University of Miami
Pierotti, Chelsea (https://experts.colorado.edu/display/fisid_155551/)
Teaching Assistant Professor

Pietri, Evava
Associate Professor; PhD, Ohio State University

Polson, Peter G.
Professor Emeritus

Ramirez, Albert
Associate Professor Emeritus

Rhee, Soo H. (https://experts.colorado.edu/display/fisid_123401/)
Associate Professor; PhD, Emory University

Richardson, Emily (https://experts.colorado.edu/display/fisid_115007/)
Clinical Associate Professor; PhD, University of Iowa

Root, David H. (https://experts.colorado.edu/display/fisid_159444/)
Assistant Professor; PhD, Rutgers University

Rudy, Jerry W.
Professor Emeritus; PhD, University of Virginia

Saddoris, Michael Paul (https://experts.colorado.edu/display/fisid_152979/)
Assistant Professor; PhD, Johns Hopkins University

Smutzlzer, Natalie (https://experts.colorado.edu/display/fisid_113933/)
Teaching Associate Professor

Spencer, Robert L. (https://experts.colorado.edu/display/fisid_104362/)
Professor; PhD, University of Arizona

Stallings, Michael C. (https://experts.colorado.edu/display/fisid_108745/)
Professor; PhD, University of Southern California

Stratford, Jennifer M. (https://experts.colorado.edu/display/fisid_157880/)
Teaching Assistant Professor; PhD, Florida State University

Taylor, Ronald G.
Professor Emeritus

Van Boven, Leaf D. (https://experts.colorado.edu/display/fisid_126291/)
Professor; PhD, Cornell University

Watkins, Linda R. (https://experts.colorado.edu/display/fisid_101513/)
Distinguished Professor; PhD, Virginia Commonwealth University

Wehner, Jeanne M.
Professor Emerita

Wertheimer, Michael
Professor Emeritus

Whisman, Mark (https://experts.colorado.edu/display/fisid_113391/)
Professor; PhD, University of Washington

Willcutt, Erik G. (https://experts.colorado.edu/display/fisid_113861/)
Professor; PhD, University of Denver

Wilson, James R.
Professor Emeritus

Yuan, Lei (https://experts.colorado.edu/display/fisid_167699/)
Assistant Professor; PhD, Northwestern University

Courses

Neuroscience

NRSC 5015 (3) Affective Neuroscience
Experience learning and emotion from affect–emotional value–is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently, however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.
Equivalent - Duplicate Degree Credit Not Granted: NRSC 4015
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 5032 (3) Neurobiology of Learning and Memory
Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved.
Equivalent - Duplicate Degree Credit Not Granted: NRSC 4032
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

NRSC 5072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective
Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.
Equivalent - Duplicate Degree Credit Not Granted: NRSC 4072
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

NRSC 5082 (3) Neural Circuits of Learning and Decision Making
Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.
Equivalent - Duplicate Degree Credit Not Granted: NRSC 4082
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Grading Basis: Letter Grade

NRSC 5092 (3-4) Behavioral Neuroendocrinology
Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function. In addition to attending and meeting all the requirements for the lecture portion of the course, graduate students meet for an additional hour each week to discuss in depth behavioral neuroendocrinology relevant research articles.
Equivalent - Duplicate Degree Credit Not Granted: NRSC 4092
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological
NRSC 5100 (3) Introduction to Neuroscience I
This first course in the year-long sequence of introduction to neuroscience provides an intensive introduction to the principles of neuroscience, covering detailed neuroanatomy, physiology, neurophysiology, neurochemical and developmental characteristics of the central nervous system. Structure-function relationships in sensory and motor systems are then explored with neuroanatomical and electrophysiological perspectives.
Repeateable: Repeatable for up to 5.00 total credit hours.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

NRSC 5110 (3) Introduction to Neuroscience II
Provides an intensive interdisciplinary introduction to the principles of neuroscience. It is a sequel to NRSC 5100. Provides a detailed overview of neurochemistry, neurodevelopment, neuromotor control, neurogenetics, and cognitive neuroscience. Open to undergraduates with instructor permission.
Requisites: Requires a prerequisite course of NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

NRSC 5132 (3) Neuropharmacology
Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.
Equivalent - Duplicate Degree Credit Not Granted: NRSC 4132
Repeateable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Biological

NRSC 5262 (3) Mammalian Neuroanatomy
Provides a detailed overview of peripheral and central nervous system connectional neuroanatomy targeted at delineating functional sensory, motor and motivational systems and the control of behavior and cognition. Emphasizes histological, anatomical and functional techniques employed in investigations of the nervous system. Formerly PSY 5262.
Requisites: Requires a prerequisite course of NRSC 2100 or NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Biological

NRSC 5545 (3) Neurobiology of Addiction
Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.
Equivalent - Duplicate Degree Credit Not Granted: NRSC 4545
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 5911 (3) Teaching of Neuroscience
Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 6100 (2) Advances in Neuroscience Seminar
Designed for beginning graduate students interested in neuroscience. Students read, discuss, and evaluate the primary literature on a number of current topics in neuroscience as well as attend the seminar program in neuroscience.
Repeateable: Repeatable for up to 8.00 total credit hours.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 6602 (1-3) Behavioral Neuroscience Professional Skills Development
Enrolled graduate students in the behavioral neuroscience program will be asked to prepare, present and receive feedback on scientific presentations of their own research or from review of a current research project.
Repeateable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Grading Basis: Letter Grade

NRSC 7102 (1-3) Topics in Neuroscience
Advanced seminar dealing with different specialized topics in neuroscience. Instructor consent required for students outside of the department.
Repeateable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 7152 (3) Special Topics in Neuroscience V
Advanced seminar dealing with several different specialized topics in Neuroscience.
Repeateable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Psychology
PSYC 5052 (4) Behavioral Neuroscience
This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.
Equivalent - Duplicate Degree Credit Not Granted: PSYC 4052 and NRSC 4052 and NRSC 5052
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Biological
PSYC 5082 (2-3) Seminar: Biological Psychology
Special topics concerning biological bases of behavior.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Requires a prerequisite course of PSYC 4052 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Biological

PSYC 5102 (3) Introduction to Behavioral Genetics
Provides introduction to basic principles of genetics in the study of behavior; methods used to examine the influences of genes and environment on behavior and interpretation of studies using these methods.
Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
Additional Information: Departmental Category: Biological

PSYC 5112 (3) Concepts in Behavioral Genetics
Examines selected topics in greater detail than is possible in the comprehensive undergraduate course in behavioral genetics (PSYC 3102). Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
Additional Information: Departmental Category: Biological

PSYC 5122 (3) Quantitative Genetics
Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of mutation, migration, and selection. Also looks at correlations among relatives, heritability, inbreeding, crossbreeding, and selective breeding.
Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
Additional Information: Departmental Category: Biological

PSYC 5131 (3) Affective Science
Core graduate course on affective science and fulfills APA Cognitive and Affective Aspects of Behavior Requirement. Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of emotions; cognitive and behavioral aspects of emotion; neurobiological mechanisms; development of emotion; and psychopathology and emotion.
Requisites: Restricted to Clinical Psychology PhD students.
Additional Information: Departmental Category: General

PSYC 5145 (4) Advanced Cognitive Psychology
Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required.
Equivalent - Duplicate Degree Credit Not Granted: PSYC 4145
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: General

PSYC 5175 (4) Computational Cognitive Neuroscience
Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week.
Equivalent - Duplicate Degree Credit Not Granted: PSYC 4175
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Experimental

PSYC 5200 (3) Physiological Genetics and Genomics
Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.
Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and IPHY 5200
Requisites: Restricted to Integrative Physiology (IPHYS or C-IPHY) or Psychology (PSYC) graduate students only.
Additional Information: Departmental Category: General

PSYC 5232 (2) Molecular Genetics and Physiology
Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases. Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities.
Requisites: Requires a prerequisite course of PSYC 5200 or IPHY 5200 (minimum grade D-). Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students. Restricted to graduate students only.
Additional Information: Departmental Category: Biological

PSYC 5242 (3) Biometrical Methods in Behavioral Genetics
Studies development of structural models appropriate to behavioral genetics and the estimation procedures necessary for their application.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Biological

PSYC 5423 (3) Research Problems in Clinical Psychology
Provides an overview of fundamental research methods relevant to clinical psychology, including literature synthesis, hypothesis formulation and study design, measure selection, and data analysis. Students will gain specific experience writing scientific papers and funding proposals.
Requisites: Restricted to Clinical Psychology PhD students.
Additional Information: Departmental Category: Clinical

PSYC 5433 (3) Adult Psychopathology
Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns.
Requisites: Restricted to Clinical Psychology PhD students.
Additional Information: Departmental Category: Clinical

PSYC 5453 (3) Developmental Psychopathology
Examines the development of psychopathology across the lifespan, including etiological influences, neurobiological correlates, symptom presentation, and clinical diagnosis and intervention.
Requisites: Restricted to Clinical Psychology PhD students.
Additional Information: Departmental Category: Clinical
PSYC 5541 (1-6) Special Topics in Psychology
Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor. Instructor consent required for students outside of the department.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: General

PSYC 5606 (3) Proseminar: Social-Personality Psychology
Provides a thorough introduction to methods and theories in social psychology concerned with topics such as the self, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, health and social psychology, and others.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Social Psychology PhD students.
Additional Information: Departmental Category: Social

PSYC 5656 (3) Advanced Graduate Research Methods
Provides training in the philosophical roots of empirical research, inference of causality, internal and external validity and reliability. These topics will be covered as they relate to a range of research designs including passive observational, experimental, quasi-experimental, meta-analytic and longitudinal. Additional topics include statistical inference and research ethics.
Requisites: Restricted to Social Psychology PhD students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Social

PSYC 5665 (2) Perception and Attention Proseminar
Required proseminar for students in the Cognitive Psychology Ph.D. program. Provides an introduction to current thinking about sensory and perceptual processing, object recognition and attention. Students will read peer-reviewed journal articles and make class presentations on appropriate topics, including methods of data collection and analysis.
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 5685 (2-3) Research Methods Proseminar
Main topic is research methods in cognitive psychology, with an emphasis on experimental methods. Skills and knowledge will be gained that are necessary to A) critically evaluate existing research and B) design, conduct, analyze and write up experimental studies. Required for graduate students in Cognitive Psychology.
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 5695 (2) Memory Proseminar
Provides beginning Ph.D. students with a basic introduction to (primarily human) memory research. One of the six required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of experimental, theoretical, behavioral and cognitive neuroscience perspectives on memory. Instructor consent required for students outside of the department.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 5741 (4) General Statistics 1
is part 1 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software. Restricted to Psychology and Neuroscience (PSYC & NRSC) graduate students. Instructor consent required for students outside of the department.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: General

PSYC 5751 (4) General Statistics 2
is part 2 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Recommended: Prerequisite successful completion of graduate level statistics.
Additional Information: Departmental Category: General

PSYC 5761 (3) Structural Equation Modeling
Provides training in the use of structural equation modeling, a class of analytic techniques that include the estimation of unobserved, or latent, constructs and an estimation of relationships among latent constructs.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: General

PSYC 5771 (3) Bayesian Data Analysis
This course is a practical introduction to using Bayesian methods to analyze data in R. After we develop our general Bayesian approach, with an emphasis on simulation rather than calculus, we will focus on applications from regression basics to advanced multilevel models. Students outside of the department may contact the instructor for permission to enroll.
Requisites: Requires prerequisite courses of PSYC 5741 and PSYC 5751 (min grade C). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
PSYC 5815 (2) Language Proseminar
Introduction to research on human language. A required proseminar for Cognitive Psychology Ph.D. students. Covers research at the cognitive, neural, and computational levels. Addresses phenomena at the levels of phonology, grammar, and meaning. Emphasizes interrelationships between language and other domains of cognition (perception, memory, executive function).
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 5825 (2) Executive Function Proseminar
Provides beginning Ph.D. students with an introduction to the study of executive functions. Required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of working memory, inhibition, multi-tasking, monitoring, selection, lifespan changes and social/clinical applications at the cognitive, neural and computational levels.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 5835 (2) Thinking Proseminar
Provides beginning Ph.D. students with a basic introduction to research on complex human cognition, including reasoning, problem solving, decision making, analogy, concept learning and knowledge representation. Includes consideration of theoretical, behavioral and cognitive neuroscience perspectives. One of six proseminar modules required of students in the Cognitive Psychology Ph.D. program.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 6200 (3) Issues and Methods in Cognitive Science
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making; and game-theory; language processing; connectionism. No background in computer science will be presumed.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and SLHS 6402
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General

PSYC 6603 (1) Professional Issues in Clinical Psychology
Covers a range of topics important for professional development in clinical psychology, including preparation and delivery of research presentations, preparation of grant proposals/manuscripts and practicum experience (i.e., interviewing and assessment, treatment planning, intervention and documentation). Intended to prepare students for careers as research scientists and clinicians. Instructor consent required.
Repeatable: Repeatable for up to 10.00 total credit hours.
Requisites: Restricted to Clinical Psychology PhD students.
Additional Information: Departmental Category: Clinical

PSYC 6605 (1) Cognitive Psychology Research Update
Provides summaries of current research by graduate students and faculty members in the Cognitive Psychology program in the Department of Psychology and Neuroscience. Professional Development issues relevant to cognitive psychologists will also be discussed. Graduate students in all programs and advanced undergraduates welcome with instructor consent.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology (PSYC) and Neuroscience (NRSC) PhD Students only.

PSYC 6606 (1) Professional Issues in Social Psychology
Covers a range of topics important for professional development in social psychology, including preparation and delivery of research presentations, preparation of grant proposals and manuscripts, and peer review of manuscripts. Intended to prepare students for careers as research scientists.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Social Psychology PhD students.
Additional Information: Departmental Category: Social

PSYC 6761 (3) Topics in Advanced Structural Equations Modeling
Covers topics in advanced structural equation modeling, including modeling with nonlinear observed variables, latent variable interactions, longitudinal models, mixture models and transition analysis. Other topics will be covered by request.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Recommended: Prerequisite PSYC 5761.
Additional Information: Departmental Category: General

PSYC 6831 (2) Interdisciplinary Social Science Professional Socialization
Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 6851 and PSCI 6851
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

PSYC 6841 (1-3) Independent Study
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General

PSYC 6911 (1-3) Research Practicum
Department consent required to enroll.
Repeatable: Repeatable for up to 18.00 total credit hours.
Additional Information: Departmental Category: General

PSYC 6941 (1) Master’s Candidate for Degree
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PSYC 6951 (1-6) Master’s Thesis
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General
PSYC 7012 (1-3) Research in Behavioral Genetics
Individual research projects.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
Additional Information: Departmental Category: Biological

PSYC 7102 (2-3) Seminar: Behavioral Genetics
Intensive study of selected topics in behavioral genetics. Emphasizes recent research. Attention to both human and animal studies. Instructor consent required for students outside of the Behavioral, Psychiatric, and Statistical Genetics program.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.
Additional Information: Departmental Category: Biological

PSYC 7215 (3) Seminar: Experimental Psychology
Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 7291 (3) Multivariate Analysis
Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: General

PSYC 7315 (2) Advanced Research Seminar on Human Memory
Addresses topics in the experimental psychology of human memory. Specific content varies from semester to semester. Both theoretical issues and contemporary empirical work will be reviewed. Each student will be required to engage in laboratory work outside of class, which will include an original experiment.
Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.
Additional Information: Departmental Category: Experimental

PSYC 7415 (2) Cognitive Science Research Applications Seminar 1
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and SLHS 7418
Requisites: Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.
Recommended: Prerequisite EDUC 6505.
Additional Information: Departmental Category: Experimental

PSYC 7425 (2) Cognitive Science Research Applications Seminar 2
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and SLHS 7428
Requisites: Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: Experimental

PSYC 7536 (1-3) Personality and Social Psychology
Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and prejudice, social neuroscience, person perception, social psychology and the self, health and social psychology, race and ethnic identity, or social cognition.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Social Psychology PhD students.
Additional Information: Departmental Category: Social

PSYC 7663 (1) Intellectual Assessment Laboratory
Practice administration of common intellectual and neuropsychological tests.
Requisites: Requires corequisite courses of PSYC 7683.
Additional Information: Departmental Category: Clinical

PSYC 7673 (3) Adult Psychotherapy
Provides an intensive introduction to the science and practice of psychological treatments for adult psychopathology. Will focus on selected treatments and address the relevant theoretical and empirical base for each approach and the specific principles and procedures utilized. Aim of course is for students to acquire both a scientific and applied knowledge of evidence-based practice in clinical psychology, with a focus on intervention for adult mental disorders. Instructor consent required for students outside of the Clinical Psychology program.
Requisites: Restricted to Clinical Psychology PhD students.
Additional Information: Departmental Category: Clinical

PSYC 7683 (1-3) Intellectual Assessment, with Practicum, in Clinical Psychology
Focuses on administering and interpreting objective test commonly used in clinical psychology practice. Includes case study approach and direct clinical experience.
Repeatable: Repeatable for up to 8.00 total credit hours.
Additional Information: Departmental Category: Clinical

PSYC 7693 (3) Personality Measurement
Covers theory and basic applications of psychological assessment, with an emphasis on measurement theory and the assessment of psychopathology and personality.
Requisites: Restricted to Clinical Psychology PhD students.
Additional Information: Departmental Category: Clinical
Neuroscience - Doctor of Philosophy (PhD)

The neuroscience community at CU Boulder is made up of over 80 faculty and research associates rostered in 13 departments and institutes. Neuroscience activities on the campus are coordinated by the Center for Neuroscience.

The graduate PhD program in neuroscience is an interdepartmental program currently consisting of eight tracks to a PhD:

- Behavioral, Psychiatric and Statistical Genetics (Integrative Physiology, Psychology & Neuroscience)
- Behavioral Neuroscience (Psychology & Neuroscience)
- Clinical Neuroscience (Psychology & Neuroscience)
- Cognitive Neuroscience (Psychology & Neuroscience)
- Social Neuroscience (Psychology & Neuroscience)
- Integrative Physiological Neuroscience (Integrative Physiology)
- Molecular, Cellular and Developmental Neuroscience (Molecular, Cellular and Developmental Biology)
- Speech, Language and Hearing Neurosciences (Speech, Language and Hearing Sciences)

The neuroscience curriculum includes a year-long intensive core course, graduate seminar courses linked to an invited speaker series and wide-ranging neuroscience courses offered by many departments and institutes across campus.

Interested students are encouraged to visit the Center for Neuroscience (https://www.colorado.edu/neuroscience/) website, which provides detailed information on the program, application process, courses, faculty and current trainees.

Requirements

Admission Requirements

Students apply for admission to one of the participating departments, which determines whether to admit the student to CU Boulder and provide financial support. Once in residence, students enter the neuroscience PhD program while still maintaining their "home" in the department to which they were admitted. They receive a PhD that lists both their home department and neuroscience. All students are admitted with the expectation that they will work toward the PhD degree. Many students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field; furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

</tr>
</tbody>
</table>

Required Fundamentals of Neuroscience Depth Courses

Choose a minimum of 3 additional neuroscience-related courses (2-3 credit hours per course). ¹

Neuroscience-Related Discipline Specialization

Choose a sequence of courses that provides an advanced graduate-level specialization in a discipline that contributes to the field of neuroscience.

Total Credit Hours

30-32

¹ For a list of approved neuroscience courses, visit the Neuroscience PhD Program (https://www.colorado.edu/neuroscience/graduate-education-neuroscience/) webpage.

Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related
fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Potential applicants are encouraged to visit the Center for Neuroscience website, which provides detailed information on the program, application process, courses, faculty and current trainees.

**Psychology - Doctor of Philosophy (PhD)**

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (http://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/) webpage.

*Note: The department does not offer a terminal master's degree program.*

**Requirements**

All students are admitted with the expectation that they will work toward the PhD degree. Students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field. Furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, there is a first-year research requirement that starts the student on an active program of research. First-year graduate students typically enroll in a two-semester graduate statistical sequence. The student also must enroll in a sequence of courses designed to give exposure to various research topics and methods. In later years, a variety of advanced research seminars are taught on a regular basis.

Students complete a master's degree (MA) based on research and coursework completed within their first 2-3 years. Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

**Religious Studies**

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

**Course codes for this program are RLST and SNSK.**

**Master's Degree**

- Religious Studies - Master of Arts (MA) (p. 1306)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

**RLST 5030 (3) Religions in America**  
Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4030  
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.

**RLST 5050 (3) Topics in Christian Studies**  
Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4050  
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.  
Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

**RLST 5170 (3) God and Politics**  
Examines in depth central themes, schools of thought, and movements in Buddhism such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4250  
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: Asia Content

**RLST 5190 (3) Love and Desire**  
Explores debates about the following questions: what and whom should humans and gods love, and what role should passions play in religion? Examining traditions such as Judaism and Christianity, this course considers diverse views on topics including religion and sexuality, the promise and perils of loving gods and humans, and the relationship between love, politics, and violence.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4190 and JWST 4190  
Requisites: Restricted to graduate students only.

**RLST 5200 (3) Topics in Hinduism**  
Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4200  
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.  
Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

**RLST 5210 (3) Advanced Readings in Sanskrit**  
Requires at least two years of prior Sanskrit training. Students will read texts in the original. Class time is devoted to parsing out difficult grammatical structures, discussing the philosophical import of the readings and addressing the historical contexts that assist in interpreting the texts. The topic varies according to student interest.  
Repeatable: Repeatable for up to 9.00 total credit hours.  
Requisites: Requires prerequisite course of SNSK 2120 (minimum grade C). Restricted to graduate students only.  
Additional Information: Departmental Category: Asia Content

**RLST 5250 (3) Topics in Buddhism**  
Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4250  
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: Asia Content

**RLST 5260 (3) Topics in Judaism**  
Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4260 and JWST 4260  
Repeatable: Repeatable for up to 9.00 total credit hours.  
Requisites: Restricted to graduate students only.

**RLST 5280 (3) Body and Magic in India**  
Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.  
Equivalent - Duplicate Degree Credit Not Granted: RLST 4280  
Requisites: Restricted to graduate students only.
RLST 5300 (3) Topics in Native American Religions
Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology, shamanism and medicine; trickster, clown and fool; crisis cult movements.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4300
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite 3 additional credit hours of RLST course work or instructor consent.

RLST 5350 (3) Native American Religions: Regional Studies
Studied religion(s) of a single native North American tribe or geographic region within context of history and culture of the tribe.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite 6 additional credit hours of RLST course work or instructor consent.

RLST 5353 (3) Indigenous Traditions and Law: A Global Perspective
Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4353 and ETHN 4353 and ETHN 5353
Requisites: Restricted to graduate students only.

RLST 5610 (3) Topics in Islam
A detailed exploration of diverse intellectual approaches to central questions in Islamic traditions. Department consent required.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4610
Repeatable: Repeatable for up to 9.00 total credit hours.
Grading Basis: Letter Grade

RLST 5650 (3) Islam in the Modern World
Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4650
Requisites: Restricted to graduate students only.
Recommended: Prerequisite 6 credit hours of religious studies at any level or instructor consent.
Additional Information: Departmental Category: Asia Content

RLST 5780 (3) New Religions of East Asia
Explores the new religious movements of modern China, Japan, and Korea, which have arisen over the last century due to the influence of the West and in response to the pressures of modernization. Previous coursework in religious studies or Asian languages and civilizations is recommended.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4780
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

RLST 5820 (3) Interdisciplinary Seminar on Religion
Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4820
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

RLST 5840 (1-6) Independent Study
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

RLST 5850 (3) Gender in Hagiography
Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4850 and WGST 4850
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

RLST 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands
Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.
Equivalent - Duplicate Degree Credit Not Granted: RLST 4820
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

RLST 6830 (3) Introduction to the Academic Study of Religion
Introduction to the graduate academic study of religion through the exploration of contemporary models and issues that demonstrate the nature and future of the field. Students prepares a profile of intended area of research.
Requisites: Restricted to graduate students only.

RLST 6840 (1-6) Independent Study
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

RLST 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.
Religious Studies - Master of Arts (MA)

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia, and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Requirements

Course Requirements

The student must successfully complete 30 credit hours of academic work, at least 27 of which must be completed at the 5000 level or above. Up to 6 credit hours of coursework may be taken outside the department or transferred from another accredited institution, consistent with the student’s special needs and interests and with the advisor's approval. Independent study credit hours shall not exceed 6 credit hours.

A graduate degree represents the mastery of a significant body of knowledge and interpretation within an academic discipline. A degree is not granted merely because a student completes a specific number of courses. The student is expected to acquire both breadth and depth in religious studies.

A student who has not completed at least 12 credit hours, or the equivalent, of undergraduate academic coursework directly related to the study of religion will be required to do remedial work to make up this deficit before beginning graduate study or, with the director of graduate studies' permission, after beginning the program. This can be done by attaining a grade of B or better in an appropriate 2000- or 3000-level course taken within the first year. Remedial courses may not be counted toward the degree.

Courses for each term must be approved by the student’s faculty advisor and be in compliance with the requirements of the Graduate School where necessary. In order to register for any given term, the student must have the course of study for that term approved in writing by the advisor on the student’s Record of Progress Toward the MA Degree Form. No changes can be made to registration without the advisor’s approval.

### Plan I: Portfolio with Research Paper

Students selecting the portfolio with research paper option will take a 3-credit portfolio preparation course on secondary scholarship in a specific field (theoretical topic, geographic area or religious tradition) that will culminate with a portfolio defense. The portfolio defense, to be completed in accordance with the deadline set by the graduate school each semester, will involve a three-member committee, and will be overseen by the advisor.

### Plan II: Portfolio with Thesis

Students selecting the portfolio with thesis option will take 6 credits of thesis coursework over two semesters (RLST 6950). The first semester of RLST 6950 (3 credit hours) will result in a thesis prospectus with the thesis committee. After successfully completing the prospectus defense, the student will enroll in the second semester of RLST 6950 (3 credit hours), which will result in the full portfolio defense, which includes defending the thesis.

(Note: Students who have not already established Colorado residency at the time they begin the program may wish to consider taking 12 credits during their first year and 18 credits during their second year.)

Dual Degree Programs

The Department of Religious Studies also participates in a dual master's degree program with the Departments of History and Asian Languages and Civilizations. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

For more information visit the department's Dual MA (https://www.colorado.edu/rlst/graduate/dual-ma/) webpage.

Sociology

The graduate program in the Department of Sociology at CU Boulder seeks to train creative and productive scholars and teachers. The department maintains a strong emphasis in the theories and methods of the discipline while specializing in the following areas:

- Criminology
- Cultural Sociology
- Environment, Hazards and Disasters
- Gender and Sexuality
- Health and Medicine
- Life Course, Aging and Youth
- Political Economy
- Population
- Race and Ethnicity
- Social Psychology and Emotions

The department offers a PhD program focusing on teaching, researching and training in theory and methods. It does not, however, offer a separate MA program. More information about program specifics can be found in the Graduate Handbook (http://www.colorado.edu/sociology/students/graduate-students/resources/).

Graduate students will meet with faculty advisors during their time at CU Boulder to foster social integration at the university as well as research interests. Financial support is given to students serving as teaching assistants (TAs). A teaching assistantship is a fulfilling position that allows students to further their understanding of a specific area of study while gaining knowledge in instructing at the university level.

Additionally, advanced graduate students are encouraged to teach their own courses as graduate part-time instructors (GPTIs). The department encourages graduate students to pursue opportunities for funded research wherever possible and supports the efforts of other university units in which students may seek financial support for their research, such as the Institute of Behavioral Science. Aside from teaching and research, CU Boulder offers a wide array of courses for graduate students taught by a diverse and well-regarded faculty.

Course code for this program is SOCY.

Doctoral Degree

- Sociology - Doctor of Philosophy (PhD) (p. 1312)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

**Courses**

**SOCY 5031 (3) Research Design**

Principles and practice of quantitative sociological research, including the nature of scientific explanation, the relationship between theory and research, research design, measurement issues, sampling, questionnaire construction, and statistical analyses. A key aspect of the course will be developing a quantitative research proposal that addresses a key empirical sociological question.

**Additional Information:** Departmental Category: General Sociology
SOCY 5037 (3) Hazards, Disasters and Society
Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, and key issues in the sociological study of disasters, social vulnerability, and the impacts of disasters in the U.S. and worldwide.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 4037
Additional Information: Departmental Category: Environment and Society

SOCY 5071 (3) Social Inequalities and Social Change
Provides a sociological perspective on social inequalities in the United States, such as those pertaining to social class, race, ethnicity, sex, gender, sexuality, and age. Examines current data of patterns and trends of such inequalities, reviews scholarship on their roots, and critically evaluates social change efforts to redress them.
Equivalent - Duplicate Degree Credit Not Granted: SOCY 4071
Additional Information: Departmental Category: General Sociology

SOCY 5111 (3) Data 1: Introduction to Social Statistics
Introduces statistical analysis in the social sciences. Introduces basic techniques of inferential statistics and several bivariate statistical techniques including t-test for the difference in means, chi-square independence, analysis of variance (ANOVA), correlation, and simple regression (OLS). Prepares students for the required course on multivariate regression techniques (Data 2).
Requisites: Restricted to Sociology (SOCY) graduate students only.
Additional Information: Departmental Category: General Sociology

SOCY 5181 (3) Logics of Qualitative Inquiry
A required first-year seminar that introduces the logics of qualitative inquiry in sociology. Introduces the history of qualitative epistemology. Considers the logic of common qualitative methodologies and qualitative research representations. Engages with the logics of inquiry in classic and more recent well regarded qualitative sociological works.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Sociology

SOCY 5201 (3) Graduate Seminar in Sociological Theory
Examines theoretical approaches to core issues and problems in sociology, including the nature of society, the relationship between society and the individual, the role of culture and social structure, the sources of social power, and the conceptual structure of sociological knowledge itself.
Requisites: Restricted to Sociology (SOCY) graduate students only.
Additional Information: Departmental Category: General Sociology

SOCY 5202 (3) Graduate Seminar in Contemporary Theory
Examines selected sociological theories considered contemporary, including but not limited to cultural sociology, feminist theory, postcolonial thought, actor-network theory, microsociology, field theory, and poststructuralism. Discusses the formation of a sociological canon and the challenge of categorizing theory. Considers the process of theorizing as an acquired skill. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

SOCY 5350 (3) Comparison, Narrative, Meaning, and Method in Historical Sociology
Examines the comparative, narrative, and interpretive methods historical sociologists use when investigating temporally unfolding social processes occurring in the recent or distant past. Through an introduction to the methodological literature and a close reading of exemplary historical research, students will learn to (a) critically evaluate historical sociological research and (b) design methodologically sophisticated historical research projects that address questions that most interest them, potentially incorporating ethnographic and/or quantitative methods into their research designs. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

SOCY 5611 (3) Teaching in Sociology
Learn how to teach sociology more effectively while developing a new content area and a clearer sense of the field. Choose a content area within sociology as the basis for planning a course and developing and practicing different teaching techniques. Department enforced prerequisite: enrollment in the Sociology graduate program.
Additional Information: Departmental Category: General Sociology

SOCY 5750 (3) Climate Politics and Science-Policy
Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics under-girding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750, GEOG 5750 and ENVS 5750
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

SOCY 5841 (1-6) Independent Study in Sociology
Graduate variable credit. Instructor consent required.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General Sociology

SOCY 5937 (1-6) Graduate Research Internship in Environmental Sociology
Offers the opportunity for sociology graduate students specializing in environmental sociology to work with local governmental or non-profit organizations on research assignments. The research topic, academic reading list, and expectations for the final project will be developed collaboratively with a faculty sponsor and organizational representative.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General Sociology

SOCY 6004 (3) Topics in Criminology
Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Deviance and Criminology
SOCY 6007 (3) Foundations of Environmental Sociology
Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 6007
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Environment and Society

SOCY 6012 (3) Population Issues, Problems, and Policies
Presents contemporary perspectives on relations between population and society. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies.

SOCY 6016 (3) Topics in Sex and Gender
Covers diverse specializations of faculty in the area of sex and gender. See current departmental announcements or online Schedule Planner for specific content.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sex and Gender

SOCY 6017 (3) Inequality, Democracy, and the Environment
Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between a) inequality and democratic decision making and b) undemocratic economic and political decision making, U.S. and corporate food and energy policy, and global environmental degradation. Focus will also be placed on the role that global inequality plays in fostering environmental degradation.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Environment and Society

SOCY 6041 (3) Cultural Sociology
Explores "the cultural turn" in sociology and related disciplines. Reviews basic themes in cultural studies: distinguishing "cultural" and "social"; narrative as catalyst between symbols and practices; cultural production processes; self as embodied; culture and power; methods and epistemological issues. Students present their own projects in class and as research papers.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Environment and Society

SOCY 6821 (1-2) Graduate Sociology Forum 1
Introduces first-year graduate students to the full range of substantive topics, research programs, and other projects in which graduate sociology faculty are engaged. Provides a forum in which issues of the discipline are presented and discussed. Features weekly presentations by graduate sociology faculty.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Sociology

SOCY 6831 (1) Graduate Professional Seminar
Offers guidance and instruction on topics related to advanced graduate study and academic life beyond graduation. Discussions will include writing journal articles; creating a vitae; writing dissertations; applying for grants and other sources of funding; the academic job search; and what to expect as a junior faculty member.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Sociology

SOCY 6841 (1-6) Guided Research in Sociology
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Sociology

SOCY 6851 (2) Interdisciplinary Social Science Professional Socialization
Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.
Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831 and PSCI 6851
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Sociology

SOCY 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course
This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring: topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center for Advance Research and Teaching in the Social Sciences (CARTSS).
Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831 and PSCI 6851
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

SOCY 6941 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General Sociology
SOCY 6951 (1-6) Master's Thesis
Additional Information: Departmental Category: General Sociology

SOCY 7002 (3) Social Disparities in Health
Presents social disparities in health in their social context. Includes the sociology of health behavior; links between health status and social statuses including gender, race, ethnicity, and socioeconomic status; fundamental causes and other explanations for social disparities in health; environment and health; health insurance disparities; the physician-patient interaction and its consequences.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Population and Health Issue

SOCY 7004 (3) Criminological Theory
Examines the major criminological theories of the 18th through 21st centuries in Europe, Australia, and the U.S. Emphasizes the historical contexts and paradigms of knowledge influencing these theories.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Deviance and Criminology

SOCY 7006 (3) Sociology of Sex and Gender
Theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture.
Additional Information: Departmental Category: Sex and Gender

SOCY 7012 (3) The Social Demography of Race
Introduction to relevant, timely research within sociological and social demographic research on race and ethnicity. Specific areas will include conceptual/measurement issues; population size, growth, and migration; health and mortality; marriage, family, and fertility; socioeconomic context; and policy considerations. Course content will be structured around current empirical pieces in sociology literature with emphasis on methodological approach in analyses.
Additional Information: Departmental Category: Population and Health Issue

SOCY 7014 (3) Gender, Race, Class, and Crime
Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.
Equivalent - Duplicate Degree Credit Not Granted: ETHN 6014
Additional Information: Departmental Category: Deviance and Criminology

SOCY 7017 (3) Population and Environment
Reviews research on human-environment interactions, with a focus on ways in which demographic processes influence, and are influenced by, the environmental context. Specific topics include conceptual and analytical frameworks; methodologies; intervening factors shaping human dimensions of environmental change; and regionally-focused research.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Environment and Society

SOCY 7024 (3) Punishment and Social Control
Exploration of sociological perspectives on the criminal justice process. Considers organization of criminal law responses, including enforcing and sentencing. Race, class, gender, and age differences in treatment and sentencing are analyzed.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Deviance and Criminology

SOCY 7026 (3) Feminist Research Methods
Epistemological and methodological issues generated by feminist research and students’ own projects.
Additional Information: Departmental Category: Sex and Gender

SOCY 7034 (3) Capital Punishment in the United States
Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Deviance and Criminology

SOCY 7036 (3) Feminist Theory
Examines the main schools of feminist thought and their impact upon sociological theories. Also examines current feminist theoretical debates and their relevance to feminist sociology.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Sex and Gender

SOCY 7111 (3) Data III—Advanced Data Analysis
Denotes third graduate course in sequence of quantitative methods. Following basic inferential statistics (SOCY 5111) and multivariate regression analysis (SOCY 6111), students study advanced statistical techniques such as event history analysis, multilevel modeling, structural equation modeling, and latent class analysis.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires a prerequisite course of SOCY 6111 (minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: General Sociology

SOCY 7121 (3) Seminar in Social Psychology
SOCY 7131 (3) Seminar in Social Psychology
Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms, and conformity.
Additional Information: Departmental Category: General Sociology

SOCY 7141 (3) Third-year Paper Seminar
Guides graduate students through the creation of the required third-year paper and helps establish productive writing habits. Includes assigned readings, discussion, peer review, and specific tasks related to scholarly writing. Students will revise and defend the paper during the semester following the seminar. Department enforced prereqs., SOCY 5111 and SOCY 5201.
Requisites: Restricted to Sociology (SOCY) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Sociology

SOCY 7171 (3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Sociology
Sociology - Doctor of Philosophy (PhD)

Our program offers solid training in the foundational theories and methods of the discipline and allows students the flexibility to pursue interests in a variety of specialty areas. The Department of Sociology at CU Boulder is a well-respected center for teaching and research. Here students can work with award-winning faculty members who have been recognized for their research, teaching and service.

The Department of Sociology strives to maintain a diverse mix of graduate students, promote respect for and opportunities to learn from others with a broad range of backgrounds and experiences, and otherwise promote inclusive excellence. By providing a variety of perspectives, a diverse student body enhances students’ educational experiences and strengthens our research and outreach endeavors.

We have strengths in the following areas:

- criminology
- cultural sociology
- environment, hazards and disasters
- gender and sexuality
- health and medicine
- life course, aging and youth
- political economy
- population
- race and ethnicity
- social psychology and emotions

Community

The department views the recruitment and retention of an inclusive and diverse student body as an essential component of a successful graduate program. Besides enhancing the quality of our program by bringing a larger diversity of experience to it, recruitment and retention of students from many different backgrounds and experiences will increase the diversity in the profession of sociology overall. Our department is committed to improving the diversity of the student body and the graduate program experience.

Students are encouraged to become involved in CU Boulder’s United Government of Graduate Students (UGGS) (http://www.colorado.edu/uggs/about-uggs/). UGGS is committed to enhancing the graduate student experience by interacting with the university administration on matters such as financial aid, etc. UGGS has worked with the Graduate School to develop the Graduate Student Bill of Rights and Responsibilities (http://www.colorado.edu/uggs/sites/default/files/attached-files/Graduate%20Student%20Bill%20of%20Rights%20and%20Responsibilities.pdf).

Requirements

Students must complete a total of 45 credit hours of coursework before taking the specialty area comprehensive exam. At least 24 hours must be in the Department of Sociology on the Boulder campus. All courses taken within the Department of Sociology must be numbered 5000 or above to qualify for graduate credit.

All first-year coursework must be completed with at least a 3.50 GPA and no grade lower than a B to continue into the second year.

At the end of the first and second years, faculty members teaching required courses, faculty mentors/advisors and faculty supervising teaching assistants conduct a review of students’ progress.

A second theory seminar of the student’s choice. 3
Two 1-credit-hour graduate forums: 3
SOCY 6821 Graduate Sociology Forum 1

Master’s Degree

The Department of Sociology does not have a master’s degree program; however, students who are unable to meet the requirements for the doctoral degree may pursue an MA with Graduate Committee approval. In addition, PhD students may obtain the MA in the process of completing the doctoral degree. The department does not allow extra time for the completion of the MA degree while pursuing the PhD.

All MA students are required to complete a minimum of 30 credit hours of graduate coursework. These 30 credit hours must include at least 6 credit hours in at least two seminars in the student’s major fields. Students may take a maximum of 6 credit hours of independent study. Independent study may not be substituted for regular seminars. In addition, all students must take courses from at least four faculty members. Finally, all MA students must designate a master’s advisory committee that consists of at least three regularly appointed graduate faculty members from the Department of Sociology.

For the MA degree, a student must complete 30 credit hours of coursework at the 5000 level or above, including 4–6 thesis credit hours and the required Theory and Methods sequence with a B or higher in addition to the preparation of a written thesis and a successful oral defense of the thesis. Students must register for thesis credit hours in the semester of thesis defense.

Dissertation

Students must prepare a written dissertation proposal and orally defend it before the dissertation committee, and complete dissertation research and defend by the end of the sixth program year.
Recommended Plan of Study

Students enter the program in a cohort of approximately 12 students. Students typically focus on required courses during the first year. Graduate students are expected to take two or three seminars each semester. We encourage students to work with their faculty advisors to determine the course load for the first year based on prior coursework, etc. Beyond the first year, we recommend that students take three courses each semester.

Each incoming student will be assigned an individual faculty advisor who will help guide the student through the first year of the program. Under the first-year advising system, students are encouraged to work with their first-year advisors to explore the program, the research specialties of the department and their own developing research interests while getting to know faculty members. Once a student has had an opportunity to meet and work with a variety of faculty, decisions regarding long-term advisors should be made. Beginning in year two of the program, graduate students are expected to seek their own faculty advisors.

Students in their first year are required to attend the graduate forum (SOCY 6821). Students will meet bimonthly throughout the academic year with the forum leader. The primary purposes of the forum are to introduce faculty and their research to the first-year cohort and to provide a communal forum for the cohort to discuss issues of concern with the forum leader.

The department offers an ongoing professionalization seminar ("prosem") led by a group of elected graduate students.

During the first two years, a student’s coursework will focus on theory and methods. In the third and fourth years, the student will work with their advisor to develop a specialty area. Upon successful completion of the specialty comprehensive exam, the student will be admitted to candidacy and begin their dissertation research.

Spanish and Portuguese

 Ranked as a top graduate program in the nation by the National Research Council, the Department of Spanish and Portuguese offers MA degrees in Peninsular and Latin American Literature as well as Hispanic Linguistics. It also offers PhD degrees in Peninsular and Latin American Literatures, and Medieval and Early Modern Hispanic Literatures.

All students are eligible for graduate teaching assistantships. These appointments include a monthly stipend and tuition remission, and they cover all student health insurance premiums. Grants and fellowships (summer, research and travel) are also available by application.

Course codes for this program are SPAN and PORT.

Master’s Degree

- Spanish - Master of Arts (MA) (p. 1316)

Doctoral Degree

- Spanish - Doctor of Philosophy (PhD) (p. 1319)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Becher, Anne Helen (https://experts.colorado.edu/display/fisid_110035/)
Senior Instructor; MA, University of Colorado Boulder

Brown, Esther Lynn (https://experts.colorado.edu/display/fisid_129298/)
Chair, Associate Professor; PhD, University of New Mexico

Associate Professor; PhD, Universitat Autònoma de Barcelona (Spain)
Courses

Spanish and Portuguese

SPAN 5120 (3) Seminar: Spanish Literature and/or Spanish American Literature
Selected topics in Spanish and/or Spanish American literature.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7120
Repeatability: Repeatability for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5130 (3) Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures
An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7130
Repeatability: Repeatability for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5140 (3) Seminar: Spanish Literature, Medieval Period
Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7140
Repeatability: Repeatability for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5200 (3) Seminar: Spanish Literature, Renaissance and Baroque
Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picarolesque novel and the Spanish comedias of the 17th century.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7200
Repeatability: Repeatability for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century
Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7300
Repeatability: Repeatability for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries
Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7320
Repeatability: Repeatability for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5400 (3) Seminar: Spanish Phonology
Topics within Spanish phonology are treated as needs and resources dictate. Special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7400
Repeatability: Repeatability for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish
SPAN 5410 (3) Seminar: Spanish Syntax
Treats topics within Spanish syntax, each requiring a semester’s study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7410
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5430 (3) Seminar: Hispanic Linguistics
Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7430
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5440 (3) Seminar: Trends in Hispanic Linguistics
Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 7440
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5450 (3) Introduction to Hispanic Linguistics
Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 4450
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 5580 (1) Research Methods and Skills
This seven-week introductory course is designed to refine research methods and skills and to critically examine different types of materials (print, music recording, electronic resources). In the age of ¿fake news, ¿ you will consider an array of information sources that will help you reflect on the research process while enhancing critical thinking and evaluative research skills. Reading knowledge of the Spanish language is desired.
Equivalent - Duplicate Degree Credit Not Granted: LIBR 5580
Grading Basis: Letter Grade

SPAN 5650 (3) Methods of Teaching Spanish
Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 4650
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 6840 (3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 6950 (1-6) Master's Thesis
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7120 (3) Seminar: Spanish Literature and/or Spanish American Literature
Selected topics in Spanish and/or Spanish American literature.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 5120
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7130 (3) Seminar: Critical Approaches to Iberian and Latin American Literatures and Cultures
An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 5130
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7200 (3) Seminar: Spanish Literature, Medieval Period
Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.
Equivalent - Duplicate Degree Credit Not Granted: SPAN 5140
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Spanish

SPAN 7410 (3) Seminar: Spanish Syntax
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7440 (3) Seminar: Trends in Hispanic Linguistics
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7430 (3) Seminar: Hispanic Linguistics
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7440 (3) Seminar: Critical Approaches to Iberian and Latin American Literatures and Cultures
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7430 (3) Seminar: Hispanic Linguistics
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7450 (3) Seminar: Spanish Syntax
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7580 (1) Research Methods and Skills
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7650 (3) Methods of Teaching Spanish
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7700 (3) Seminar: Spanish Literature, Renaissance and Baroque
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7850 (3) Seminar: Spanish Literature, Romanticism
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7950 (1-6) Master's Thesis
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7980 (3) Independent Study
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 8840 (3) Independent Study
Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish
SPAN 7210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries
Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5210
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5220
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5300
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries
Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5320
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7400 (3) Seminar: Spanish Phonology
Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5400
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7410 (3) Seminar: Spanish Syntax
Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5410
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7430 (3) Seminar: Hispanic Linguistics
Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5430
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 7440 (3) Seminar: Trends in Hispanic Linguistics
Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5440
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 8840 (3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

SPAN 8990 (1-10) Doctoral Dissertation
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Spanish (SPAN) graduate students only.
Additional Information: Departmental Category: Spanish

Spanish - Master of Arts (MA)
Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master’s Degree Requirements (p. 1043) section of this catalog.

Areas of Concentration
Peninsular/Spanish American Literature Concentration
Our MA in Peninsular and Latin American literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA students are required to take 30 hours of graduate coursework.
**Hispanic Linguistics Concentration**

Our MA in Hispanic linguistics is an interdisciplinary program that provides students with a solid foundation in linguistics through the coursework taken in the Departments of Spanish and Portuguese, Linguistics, Communication, Anthropology and the School of Education. Students have the unique opportunity to work closely in collaboration with faculty to develop their areas of concentration and graduate as specialists in a wide range of topics (e.g., history of the Spanish language, Spanish in the United States, sociolinguistics, etc.)

All MA students in the Hispanic linguistics option are required to take 30 hours of graduate coursework. They are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education could serve as important complements to linguistics courses taken in our department.

**Spanish & Portuguese Studies Concentration**

Our MA in Spanish and Portuguese studies is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds, with an emphasis on Lusophone culture. MA students are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level) and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Students who are proficient in Portuguese but not in Spanish are required to take SPAN 1150 or SPAN 2150 in addition to 30 hours of graduate coursework. Graduate students in this subplan are required to have Portuguese as the main area for their MA Comprehensive Exams.

**Teaching Spanish Concentration**

The MA in Spanish with an emphasis in teaching Spanish offers students a broad base in literature, linguistics and language pedagogy and education, and its 31 hours of coursework are almost evenly divided between these three areas. Six of the credits in the pedagogy and education area may be taken outside of the Department. If students wish to earn a teaching license, they can apply to and concurrently enroll in the Post-Baccalaureate Secondary Spanish Teaching Licensure program, completing the remaining coursework and the student teaching semester after graduation with the MA. Upon completion, students will be prepared to teach and design Spanish language curricula at the secondary and post-secondary levels, as well as pursue further study and research in the fields of applied linguistics, second language acquisition or education.

**Requirements**

**General Course Requirements**

The MA in Spanish is offered in two areas of concentration: one with an emphasis on literature and one with an emphasis on linguistics.

All MA students are required to complete at least 30 hours of graduate coursework, at least 25 of which must be completed at CU Boulder. MA students may transfer to the department a maximum of 6 credit hours of acceptable graduate-level courses and may take no more than 6 credit hours of independent study courses.

Courses taken as part of the MA program must be offered by our department or by others upon having been approved by the student’s MA supervisory committee (or the Associate Chair of Graduate Studies if the committee has not yet been formed). In addition, MA students may not take more than 9 hours of graduate coursework in any given semester.

No graduate course in the department may be taken pass/fail by a graduate student in our program. This rule also applies to those courses taken in the Department of Linguistics by our MA students.

Students who are failing a course will not be allowed to drop the course, except under special circumstances. To do so, approval must be secured from the course instructor, the Associate Chair of Graduate Studies and the department Chair.

**Language Requirement**

Students must demonstrate, as early as possible and before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of a foreign language other than Spanish. They also must be able to speak, read and write English well.

**Concentration Requirements**

**Peninsular/Spanish American Literature Concentration**

The emphasis in Peninsular and Latin American Literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA Students are required to take 30 hours of graduate coursework, of which 27 hours must be taken within the department.

All MA students in the Peninsular/Latin American Literature Option are required to take:

SPAN 5320 Seminar: Spanish American Literature, 20th and/or 21st Centuries

One Hispanic linguistics course: 3

SPAN 5400 Seminar: Spanish Phonology
SPAN 5410 Seminar: Spanish Syntax
SPAN 5430 Seminar: Hispanic Linguistics
SPAN 5440 Seminar: Trends in Hispanic Linguistics
SPAN 5450 Introduction to Hispanic Linguistics

Electives 3

Any other graduate seminar offered by the department of Spanish and Portuguese:

SPAN 5120 Seminar: Spanish Literature and/or Spanish American Literature
SPAN 5200 Seminar: Spanish Literature, Renaissance and Baroque
SPAN 5220 Seminar: Spanish Literature, 20th and/or 21st Centuries
SPAN 5320 Seminar: Spanish American Literature, 20th and/or 21st Centuries
SPAN 5650 Methods of Teaching Spanish
PORT 5110 Brazilian Literature
PORT 5150 Literature of the Portuguese Speaking World

Additional 5000-level course(s), inside or outside the department, to fulfill the 30-credit minimum. 2

Total Credit Hours 30

Hispanic Linguistics Concentration

MA students in the Hispanic linguistics option are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education can serve as important complements to linguistics courses taken in our department.

Code Title Credit Hours

Required Courses
LING 2000 Introduction to Linguistics 3
SPAN 4980 Methods Language Learn/Pedagogy 1

Electives

One Spanish graduate-level literature seminar. 3
Additional courses to fulfill the 30-credit minimum. 23

Total Credit Hours 30

1 Required for students who did not take a similar course as part of their previous course of study. Students who must take LING 2000 are required to do so during their first semester in the program.

Spanish & Portuguese Studies Concentration

MA students in the Spanish and Portuguese studies track are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level), and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Graduate students in this subplan are required to have Portuguese as the main area for their MA comprehensive exams.

Code Title Credit Hours

Required Courses
SPAN 4650/5650 Methods of Teaching Spanish 3
SPAN 4980 Methods Language Learn/Pedagogy 1

Teaching Spanish Concentration

MA students in the Spanish teaching concentration are required to complete a minimum of 30 graduate credit hours, of which at least 25 must be taken in the department. All students are required to have their course selections approved by their advisor and the Associate Chair for Graduate Studies.

Code Title Credit Hours

Required Courses
SPAN 4650/5650 Methods of Teaching Spanish 3
SPAN 4980 Methods Language Learn/Pedagogy 1
Spanish graduate-level literature seminars 9
Spanish graduate-level linguistics seminars 9
Graduate-level linguistics or literature electives in the Department 3
Education-related electives inside or outside of the Department 6
Total Credit Hours 31

1 Candidates enrolled in this course will complete a special teaching project covering the planning, teaching and evaluation of a unit consisting of 10 to 15 lessons.

Spanish - Doctor of Philosophy (PhD)

Unique among other departments in the country, the Spanish and Portuguese Department at CU Boulder offers two distinct tracks to our PhD students:

• Medieval and early modern Hispanic literatures
• Peninsular and Latin American literatures

Both PhD programs offer students a rigorous yet flexible plan of studies designed to deepen their knowledge of Peninsular and Latin American literatures and cultures.

Our faculty is actively engaged in research and publication in a variety of topics covering the whole range of peninsular and Latin American literatures and cultures, from the role of women's leadership in the Peninsular Middle Ages to cultural histories of banditry in Latin America, from Cervantes to the work of contemporary authors like Roberto Bolaño.

Students work closely with CU Boulder faculty members and are encouraged to pursue their own research interests.

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements section of this catalog.

Requirements

Residence Requirement

PhD students must complete a minimum of one academic year in residence on the Boulder campus (excluding summer) within the four years immediately preceding the date on which they present themselves for the PhD comprehensive examination.

Areas of Concentration

The PhD in Spanish is offered in three literary periods of concentration:

• Medieval/Early Modern/Colonial Literature
• Modern and Contemporary Peninsular Literature
• Modern and Contemporary Spanish-American Literature

For further information on these options, contact the department.

Course Requirements

Prior to taking the PhD comprehensive exams, students must complete a minimum of 36 credit hours in graduate seminars in Spanish and/or related fields numbered 5000 or above. Students can take as many as 9 graduate credit hours outside the department. The student’s advisor and the Associate Chair of Graduate Studies, in consultation with the Chair of the department, must approve credit hours in excess of 9, provided that the student formally requests it and gives a compelling reason for the standard limit to be overridden. Approval of the MA degree must also be presented for the PhD. Each advisor, in consultation with the student, will determine which courses will be acceptable.

All PhD students must take at least 30 credit hours of graduate coursework at CU Boulder. PhD students may transfer to the department a maximum of 6 hours of acceptable graduate-level credit. Transfer of credits will be considered only at the moment of admission into the program, not later on. Students may take no more than 3 credit hours of independent study courses. Additional independent study has to be approved by the graduate committee, which makes a recommendation to the Associate Chair of Graduate Studies or the Chair of the department. Under no circumstances can independent study coursework exceed 25 percent of the coursework required for the PhD degree.

Doctoral students can only take up to 12 credits in course load that are not regular graduate seminars in the Spanish and Portuguese Department. These 12 credits are a combination of credits taken outside of the Spanish and Portuguese Department and independent studies offered by a faculty member of the Spanish and Portuguese Department. If a student decides to take one independent study with their advisor, then the student is allowed to take 9 credits outside the department; this is the recommended situation. If a student takes two independent studies, then they can only take 6 credits outside the department, and so on. No more than 9 credit hours can be used in independent studies, and no more than 9 credit hours can be taken outside the department.

PhD students who did not take a teaching methodology seminar, a literary theory seminar, or a Hispanic linguistics seminar as part of their MA program must do so as part of their PhD program. Those students who did not take a minimum of 3 graduate credit hours in each of the seven subject areas as part of their MA program, must make up coursework in these areas as part of the PhD program. The Associate Chair of Graduate Studies makes the decision regarding this additional work during the student’s first semester in the program. If this additional work is not completed the semester prior to the PhD exam, students will not be able to take their comprehensive exams.

Language Requirement

Students must demonstrate, as early as possible before taking the PhD Comprehensive Examination, communication knowledge in Portuguese and one other modern language (subject to the approval of the student’s PhD Supervisory Committee). English and Spanish are not part of this language requirement. Communication knowledge is defined as the achievement of the current minimal acceptable score of the Graduate School Foreign Language Test or completion of a fourth-semester college-level course with a grade of B or higher. A fourth-semester college level of Latin (with a grade of B or higher) will also fulfill part of this requirement. Successful completion of PORT 2350 with a B or higher will satisfy the language requirement in Portuguese.

Speech, Language and Hearing Sciences

The graduate curriculum in speech, language and hearing sciences (SLHS) leads to either a master’s or a doctoral degree including clinical degrees and research degrees. The clinical-training programs in speech-language pathology and audiology are accredited by the Council on Academic Accreditation (CAA) and the Colorado State Department of Education.
Prospective students should read the Master’s Degree (p. 1043) or Doctoral Degree Requirements (p. 1045) sections of this catalog.

Course code for this program is SLHS.

Accreditation
Degree programs in Speech-Language Pathology (SLP) and Audiology are designed to provide a theoretically and clinically rich learning experience for students planning to work as audiologists or speech-language pathologists in medical, educational and private practice settings. States have varied requirements for practitioners of speech-language pathology and audiology (e.g. additional externship hours, earning the Certificate of Clinical Competence (https://www.asha.org/certification/), etc.). Students are reminded to contact the applicable licensing board in the state where they are planning on looking for employment. Information is also available on the university’s Accreditation & State Authorization (https://www.colorado.edu/accreditation/professional-licensure-programs-degrees/) website.

The MA education program in speech-language pathology and the Doctor of Audiology (AuD) education program in audiology at CU Boulder is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association. (Address: 2200 Research Boulevard, #310, Rockville, MD 20850. Phone: 800-498-2071 or 301-296-5700)

Master's Degree
- Speech, Language and Hearing Sciences - Master of Arts (MA) (p. 1327)

Doctoral Degrees
- Audiology - Doctor of Audiology (AuD) (p. 1328)
- Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD) (p. 1329)

Certificate
- Speech-Language Pathology Assistant - Graduate Certificate (p. 1330)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses
SLHS 5012 (3) Evidence-based Practice and Research Methods
Focuses on the knowledge of research methods and the application of research principles into clinical practice. In particular, covers quantitative research methods that are in speech-language pathology clinical settings. Will cover (1) clinical practice and research methods in speech, language and hearing sciences; (2) single-subject design in clinical settings; (3) introduction to data collection, data organization and data analysis; (4) interpretation and presentation of clinical data. Formerly SLHS 5000.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology
SLHS 5032 (3) Competencies and Strategies for the SLPA
This course includes content regarding roles and responsibilities of the SLPA, Codes of Ethics and ethical issues, standard health precautions and infection control, health and safety policy and procedures, confidentiality (FERPA & HIPAA), culture of public schools, service delivery models, screening protocols, intervention processes and procedures, data collection and documentation, assistive technology, special populations and cultural-linguistic diversity, reflective practice and continuing professional growth. Students must be accepted in the SLPA certification program to enroll in this course.
Requisites: Requires a prerequisite course of SLHS 4918 (minimum grade D).
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5112 (2) Clinical Practice I
Provides entering graduate students a framework for beginning their clinical education and building the relationship of theory and research to current clinical practice in speech-language pathology. Key topics for exploration include contemporary professional issues, licensure, professionalism, ethics and ethical conduct, scope of practice, competency development, teaming and collaboration, accountability and multicultural issues. Formerly SLHS 5110.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5122 (1) Clinical Practice II: Assessment and Treatment Planning
Explores critical elements associated with assessment and treatment planning in speech-language pathology. Topic areas include assessment style, interviewing, test selection and techniques of test administration. Diagnosis and treatment planning section includes differential diagnoses, ethics of diagnoses, goal writing and treatment rationale.
Requisites: Requires a prerequisite course of SLHS 5112 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5132 (3) Clinical Practice II: Clinical Practice in Varied Work Settings
Explores knowledge and skills specific to working in public school, medical, and private practice settings. Coursework will address required data collection, reporting, and accountability for specific work settings; aspects of billing, coding, and reimbursement where applicable; working effectively on interdisciplinary teams; supervision of support personnel; aspects of diversity, equity, and inclusion including cultural humility, responsiveness, and competence; overview of education and healthcare landscapes with implications for service delivery; service delivery models; and implementation of federal and state regulations and rules in different clinical settings.

SLHS 5142 (1) Clinical Practice III: Clinical Practice in Medical and Private Practice Settings
Explores skills specific to working in medically-based settings and private practice. Topics include billing, coding and reimbursement, working with an interdisciplinary team and measures and documentation specific to these settings.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5242 (3) Language Disorders in School Age Children
Addresses the nature, assessment, and treatment of developmental language disorders in school age children.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite undergraduate background in SLHS.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5252 (3) Acquired Language Disorders in Adults
Introduces the neural bases and medical etiologies of acquired language disorders in adults, explores the ways in which normal language processing may become disordered, and studies current methods of evaluation and treatment design.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Recommended: Prerequisite undergraduate background in SLHS.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5262 (3) Dysphagia
Provides students with background in the anatomical, physiological, and neurological bases of swallowing function and disorders across the lifespan. Etiological factors are presented, as well as various assessment tools and principles of treatment of swallowing disorders in children and adults.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5272 (1) Augmentative Alternative Communication: Theory and Use
Provides an overview of the application of current technology to alternative/augmentative communication. Emphasizes assessment and intervention with nonverbal children and adults with need for alternative/augmentative communication systems. Presents various technological devices and systems. Addresses system selection, programming, development and integration of use in environmental contexts.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5282 (3) Acquired Cognitive Disorders
Explores the theoretical and clinical management of acquired cognitive disorders that impact communication. Includes basic functional neuroanatomy.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology
SLHS 5292 (3) Neurogenic Speech Disorders in Adults
Presents the neural bases of normal and disordered speech motor control, teaches assessment and treatment of motor speech disorders in adults, and applies motor control research to clinical problems.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5302 (3) Speech Sound Disorders in Children
Provides overview of phonological development, perception, and production. Presents factors related to articulation and focuses on critical evaluation of traditional and phonological based assessment and intervention procedures. Includes coverage of phonological awareness, metathenological skills as related to literacy, as well as treatments and principles specific to children with motor speech disorders.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5312 (2) Aging and Communication
Examines normal age-related changes to communication systems. Anatomic and physiological changes to the mechanisms of speech production, audition and the brain will be included, with a focus on the functional impacts of such changes for speech production and perception, cognition, language and social communication.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Grading Basis: Letter Grade

SLHS 5322 (2) Complex Medical Speech-Language Pathology Cases
Expands upon the basic knowledge learned in SLHS 5252 (acquired language disorders), 5332 (voice disorders), 5282 (acquired cognitive disorders), 5262 (dysphagia), 5292 (neurogenic speech disorders) and 5362 (fluency disorders). Students will explore clinical management options for complex medical cases created by factors such as multiple and/or rare diagnoses, medical complications, socioeconomic factors and behavioral or personality issues.
Requisites: Requires prerequisite courses SLHS 5252 and SLHS 5332 and SLHS 5282 (all minimum grade B). Requires corequisite course SLHS 5292. Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5332 (3) Voice and Resonance Disorders
Examines the anatomical and physiological bases for normal and disordered laryngeal and velopharyngeal function including functional, organic, and neurogenic voice disorders, and velopharyngeal insufficiency and incompetence. Emphasis on evidence-based assessment and treatment of individuals with voice and resonance disorders, including special populations.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5342 (2) Counseling in Speech-Language Pathology
Designed to demonstrate the principles of counseling for individuals with communication disorders and their families throughout the client's lifespan. Counseling systems and techniques for specific communication disorders will be included. The course will focus on the basic theory of counseling and how counseling skills can be used in the treatment of various communication disorders. Provides an introduction to the basic counseling skills necessary to help speech-language pathologists achieve the greatest success possible when working with individuals exhibiting communication disorders.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5352 (3) Bilinguals with Communication Disorders
Covers current empirical research regarding the linguistic and cognitive system of bilinguals with and without communication disorders. Address cross-cultural and cross-linguistic issues in selection and implementation of assessment and intervention procedures. Discuss various intervention strategies for working with bilinguals and their families.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5362 (3) Fluency Disorders
Exploration of the nature, differential diagnosis and treatment of fluency disorders across the life-span. Students will develop the requisite skills and knowledge base to provide prevention, consultation, assessment and intervention for fluency disorders. Research bearing on affective, behavioral and cognitive components of stuttering will be reviewed, along with recent data on the neural bases of the disorder. A broad range of treatment approaches will be discussed and demonstrated.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5372 (1) Cleft and Resonance: Fundamentals for Evaluation and Treatment
Provides an overview of fundamental awareness and knowledge of the etiology, development and treatment of children with cleft lip and palate and other disorders of resonance. It covers general parameters of care for speech language pathologists across various age groups (birth, toddler, preschool, and school age) with this population. Students will learn the methods for identifying and treating compensatory mis-articulation patterns and abnormal resonance patterns and the aspects of multidisciplinary team care for families and individuals with cleft lip and palate.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5555 (3) Advanced Topics in Social Communication: Autism Spectrum Disorders
Students will acquire knowledge and skills in the appropriate selection, application and evaluation of interventions for children, adolescents and adults with autism spectrum disorders (ASD) and their families. Evaluation and diagnosis, including development of the IFSP and IEP, will be addressed.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Didactic: Speech-Language Pathology
SLHS 5576 (3) Neuroanatomy and Neurophysiology of Communication
Provides an introduction to the neuroanatomy and neurophysiology that collectively give rise to human communication including speech perception and production. We will consider how speech, language and hearing are represented in and controlled by the central nervous system and how neuropathologies affect processes of communication.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: All-Department

SLHS 5602 (3) Communication Challenges in Children: Birth to Six
Emphasizes nature and profile of language and communication disorders affecting infants and young children. Facilitates integration of clinical and theoretical perspectives with specific approaches for family-centered assessment and intervention principles, models and techniques.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

SLHS 5612 (3) Language Learning Disabilities
Expands upon the nature of Language Disorders in SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.
**Requisites:** Requires a prerequisite course of SLHS 5242 (minimum grade B).
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

SLHS 5622 (2) Advanced Topics in Learning Disabilities
Expands upon the nature of Language Learning Disabilities learned in SLHS 5612 (Learning Disabilities) and SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.
**Requisites:** Requires prerequisite courses of SLHS 5242 and SLHS 5612 (all minimum grade B).
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology

SLHS 5674 (2) Signals, Systems, and Calibration in Audiology
Provides in-depth study of instrumentation used by audiologists for hearing aid evaluation and fitting, signal generation and modification, and signal measurement and calibration.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Didactic: Audiology

SLHS 5848 (1-4) Independent Study
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Additional Information:** Departmental Category: Practica

SLHS 5849 (1-4) Independent Study 1, M.A.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Independent Study

SLHS 5859 (1-4) Independent Study 2, M.A.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Additional Information:** Departmental Category: Independent Study

SLHS 5898 (1-4) Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention
Offers on-campus and off-campus supervised clinical practice in diagnosis, assessment, and intervention of speech-language-hearing disorders in children and adults.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Practica

SLHS 5918 (1-3) Audiology Clinical Practicum: Lab
Provides clinical training in the on site Speech, Language and Hearing Center in skills including audiology identification, evaluation and management for adults and children with hearing loss.
**Repeatable:** Repeatable for up to 16.00 total credit hours.
**Requisites:** Restricted to Speech, Language, and Hearing Sciences (SLHS) OR Audiology (AUDD) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Practica

SLHS 5928 (1-4) Audiology Clinical Practicum: Level 1
Provides clinical training in an off-campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Requires a prerequisite course of SLHS 5918 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

SLHS 5930 (4) Speech Language Pathology Assistant Internship
Placement for 15-18 hours per week for a total of 180 clock hours including a minimum of 50% supervised provision of 80 hours of direct intervention (in-person/virtual) with students on caseload. SLPA interns will complete tasks for mentor/supervisor including file reviews, scheduling, research of evidence-based practices, materials preparation, observation of intervention and IEP meetings, and provide other assistance as specified by mentor and within the scope of practice of an SLPA (Asha, 2013). Competency development and professional growth will be documented through midterm formal conferences and final semester ratings of specific competencies and completion of internship assignments. Students must be accepted into the SLPA certificate program to enroll in this course.
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Requires a prerequisite course of SLHS 4918 (minimum grade D).
**Additional Information:** Departmental Category: Didactic: Speech-Language Pathology
SLHS 5938 (1-4) Audiology Clinic Practicum: Level 2 Educational
Provides clinical training in an off campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.
Repeatable: Repeatable for up to 15.00 total credit hours.
Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practica

SLHS 5948 (1-4) Audiology Clinic Practicum: Level 2 Medical
Provides clinical training in an off campus medical audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6000 (1-4) Advanced Topics in Speech, Language and Hearing Sciences
Studies selected topics related to the theory and management of communication disorders, and theoretical/scientific information related to speech, language, and hearing.
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: All-Department

SLHS 6006 (3) Advanced Hearing Science
Provides advanced study in hearing science, including physical, physiological, and psychological acoustics of both normal and impaired auditory systems. Department enforced prerequisite: graduate standing in SLHS; undergraduate course work in biology or anatomy.
Additional Information: Departmental Category: Didactic: Speech-Hearing Science

SLHS 6504 (1) Professional Ethics in Audiology
Overview of ethics and ethical issues in the profession of audiology. Topics to be discussed include code of ethics by professions, approaches to analyzing ethical dilemmas, ethics in relationships with manufacturers, and ethical considerations in teaching, clinical practice and research.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite undergraduate background in SLHS.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6514 (1) Professional Issues in Audiology
Overview of professional issues related to the profession of audiology. Topics to be discussed include certification, licensure, professional associations, infection control, practice management, federal regulations related to audiology, professional communications and professional relationships.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Recommended: Prerequisite undergraduate background in SLHS.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6544 (3) Auditory Processes: Adult Assessment
Advanced study on the current science surrounding hearing assessment of adults across the age span. Includes theoretical foundations and clinical applications.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6554 (3) Auditory Processes: Child Assessment
Provides advanced study in hearing assessment and management of children across the age span. Topics include epidemiological, medical, audiological, developmental, and habilitative aspects of normal and impaired hearing in children.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Recommended: Prerequisite undergraduate background in SLHS.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6564 (3) Auditory Processes: Neurodiagnostics
Provides advanced study in the neural bases of hearing. Includes theoretical foundations and clinical assessment of neurological functioning in auditory systems with both normal and impaired function.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6614 (3) Fundamentals of Amplification
Discusses theoretical and clinical issues regarding the design, fitting, and evaluation of amplification technology for individuals with hearing loss. Includes the use of behavioral, psychological, electroacoustic, and physiological (real ear) measures in the selection and evaluation of digital and analog hearing aid technology.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6614 (3) Development and Intervention in Childhood Hearing Loss
Reviews development and intervention with children who are deaf and hard-of-hearing, birth through school age. Focuses on speech, auditory training, language, literacy and cognitive development. Formerly SLHS 6640.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Didactic: Speech-Language Pathology
SLHS 6650 (3) Counseling and Multicultural Issues in SLHS
Explores counseling theories and techniques following the diagnosis of a communication disorder across the life span. Considers issues related to grieving and mourning, parenting, disability, cultural customs, attachment, and relationships. Covers professional ethics and ethical responsibilities.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: All-Department

SLHS 6670 (3) Aging and Hearing Loss
The course will address research and evidence-based practice regarding hearing loss in adults across the age span. Topics will include aural rehabilitation, co-morbidities associated with hearing loss (e.g., cognition and dementia; mental health; sensory-perceptual-motor skills; other health/medical conditions), and impacts of hearing loss on functioning, disability, health, and health services.
Requisites: Requires a prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.
Recommended: Prerequisites SLHS 7418 and SLHS 7540.
Additional Information: Departmental Category: Didactic: All-Department

SLHS 6918 (7) Practicum 2: Medical-Clinical Internship
Gives an off-campus experience in a clinical or medical setting that provides in-depth practice in management of communication disorders of children and adults.
Repeatable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Practica

SLHS 6928 (7) Practicum 2: Public School Internship
Provides an off-campus supervised experience providing extended and in-depth practice involving school-age children in a school classroom.
Repeatable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Practica

SLHS 6938 (1-10) Audiology Clinic Externship Educational
Provides students with full time off campus experience in an educational audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.
Repeatable: Repeatable for up to 21.00 total credit hours.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Practica

SLHS 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: All-Department

SLHS 6948 (1-10) Audiology Clinic Externship: Medical
Provides students with full time off campus experience in a medical audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.
Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 6950 (1-7) Master's Thesis
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

SLHS 7000 (3) Research Designs in Human Communication Sciences and Disorders
Offers an advanced seminar in research designs for human behavior: efficacy, ethnographic, single-subject, quasi-experimental, and experimental designs. Designed to familiarize students with terminologies and research designs frequently used in speech-language-hearing areas.
Recommended: Prerequisite basic statistics.

SLHS 7200 (3) Business, Management and Ethics in Audiology
Focuses on the business aspects of managing an audiology practice. Addresses developing a business plan, contracting for services, legal issues, financial reporting, budgeting, pricing, billing and reimbursement, regulatory issues, marketing, personnel management, risk abatement, and business ethics.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.
Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

SLHS 7418 (2) Cognitive Science Research Practicum
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415
Requisites: Restricted to graduate students only.
Recommended: Prerequisite EDUC 6505.

SLHS 7428 (2) Cognitive Science Research Practicum 2
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425
Requisites: Restricted to graduate students only.
SLHS 7450 (3) Audiology Capstone Project
Provides an individualized project for AUD, completed prior to initiation
of final clinical year. May be in the form of research-based investigation,
an evidence-based position paper, a clinical protocol based on peer-
reviewed literature, a grant proposal, or another format approved by
AUD committee. Project requires approved proposal by AUD committee
and focused study supervised by capstone advisor.
Requisites: Restricted to Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: All-Department

SLHS 7520 (3) Auditory Processes: Medical and Genetic Bases
Discusses current developments in epidemiology, pathogenesis, and
symptomatology of hearing loss. Investigates the genetic bases of
hearing loss and deafness. Incorporates clinical decision theory in
assessment and intervention. Explores cross-disciplinary topics from
genetics, radiology, pharmacology, pathology, and otology.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS)
or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 7530 (3) Auditory Processes: Theory and Application in the School
Environment
Focuses on application of routine audiological practices such as
screening, assessment, rehabilitation, and instrumentation to children
in educational settings. Emphasizes federal education regulations and
pertinent case law.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS)
or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 7540 (3) Auditory Processes: Physiology, Assessment, and
Management of the Vestibular System
Emphasizes current research on physiology of the vestibular system,
including both structure and function. Considers the etiology of both
peripheral and central pathologies of the vestibular system. Discusses
ways to assess function of the vestibular system as well as theoretical
and practical considerations of vestibular rehabilitation.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS)
or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 7550 (3) Prevention of Hearing Loss from a Public Health
Perspective
Discusses the prevention of hearing loss from public health perspectives.
Includes the effects of noise and other damaging agents on the
auditory physiology. Discusses prevention, screening, identification, and
management of occupational and recreational hearing loss. Considers
noise measurement and monitoring. Addresses local, national and global
initiatives and legislation regarding hearing health.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS)
or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 7614 (3) Implantable Devices: Technology and Clinical Application
Examines technological aspects and clinical applications of implantable
prostheses such as cochlear implants, brainstem implants, hybrid
cochlear implants, Baha devices and middle ear implants. Topics will
include: history of implantable devices, anatomy and histopathology of
the inner ear, speech processing in implants, mapping devices, candidacy
criteria, behavioral and electrophysiologic techniques for assessment and
outcomes in implanted children and adults.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS)
or Audiology (AUDD) graduate students only.
Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 7640 (3) Communication Processes and Hearing Loss: Birth
through Six
Provides in-depth study of current research literature and its implications
for clinical practice regarding development of communication processes
in the first six years of life and impact of hearing loss. Investigates
development of language, auditory perception, speech production, social-
emotional abilities, and cognition.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS)
or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 7714 (3) Advanced Topics in Amplification
Discusses advanced issues in the design and fitting of hearing aid technology, including advanced signal processing, outcomes
assessment, evidence-based practice and specialized fitting protocols
for pediatric and geriatric populations. Current research is integrated
with clinical case studies to guide the development of evidence-based
practice in hearing aid fittings.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Didactic: Audiology

SLHS 7775 (1) Topics in Cognitive Science
Reading of interdisciplinary innovative theories and methodologies of
cognitive science. Students participate in the ICS Distinguished Speakers
series that hosts internationally recognized cognitive scientists who
share and discuss their current research. Session discussions include
analysis of leading edge and controversial new approaches in cognitive
science.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and
EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Didactic: All-Department

SLHS 7800 (1) Seminars in Audiology: Advanced Topics
Graduate seminar exploring advanced topics in the field of audiology
as they relate to diagnosis and (re)habilitation. Topics will include novel
clinical issues and topics including tinnitus, intraoperative monitoring,
pharmacology, hyperacusis/misophonia, auditory processing. Discussion
of the evidence-based literature surrounding these advanced topics will
be central to this seminar.
Requisites: Requires prerequisite course of SLHS 6544 (minimum grade
B). Restricted to graduate students only.
Grading Basis: Letter Grade

SLHS 7849 (1-4) Independent Study 1, PhD
Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple
enrollment in term.
Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS)
or Audiology (AUDD) graduate students only.
Additional Information: Departmental Category: Independent Study
Speech, Language and Hearing Sciences - Master of Arts (MA)

Focus Areas

There are two areas of focus available at the MA level:

- MA leading to professional certification in speech-language pathology
- Research

Professional Certification Focus

The master's degree program leading to professional certification in speech-language pathology (MA-SLP (https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/)) is designed to provide a theoretically and clinically rich path for students planning to work as speech-language pathologists in medical, educational, and private practice settings. Students in the MA-SLP program are provided with a strong foundation of theoretical and clinical knowledge through their coursework and clinical experiences.

Students completing the MA-SLP program obtain a Master of Arts degree from the University of Colorado and are eligible to receive the Certificate of Clinical Competence in speech-language pathology from the American Speech-Language-Hearing Association (http://www.asha.org/) (ASHA) upon successful completion of the clinical fellowship year and the national PRAXIS examination and thus meet educational requirements for Speech-Language Pathology licensure in all states. However, students should also contact the applicable licensing board in the state where they are planning on looking for employment. Students can also apply for Colorado State Licensure to work in the public schools.

Research Focus

The master's program with a research focus allows students to design their own master’s degree in SLHS (https://www.colorado.edu/slhs/graduate/masters-non-clinical-degree/) in any topic related to speech, language or hearing sciences. This degree does not result in clinical certification. Working with an advisor, students design a plan of study, with coursework within SLHS and from other departments. A master’s thesis is required.

Requirements

Professional Certification Focus

The master's program with a professional certification focus (MA-SLP) is a two-year (24-month) program that culminates in one or two internships and either successful passage of the comprehensive exam or completion of a thesis. The program consists of an initial summer intensive session beginning in early August and ends in late July two years later. Students are enrolled for August intensive, fall year 1, spring year 1, summer year 1, fall year 2, spring year 2, and summer year 2.

Within departmental and ASHA guidelines, master's students with a focus in speech-language pathology complete a core set of seminars and clinical assignments that assure at least minimal competence in the full scope of practice for speech-language pathologists. In addition, students complete at least one of three electives that provide the opportunity to develop greater knowledge and skills in areas of specific interest. Clinical assignments are initiated in the on-site Speech, Language and Hearing Center; later, student input is obtained in making off-campus clinical assignments in educational and medical settings.

Students with an undergraduate degree in speech-language pathology and audiology can expect to complete the program in two calendar years (see the MA-SLP (https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/) webpage). Those without such a background are required to make up undergraduate deficiencies, which normally require at least an additional 18 credit hours of courses in speech, language and hearing sciences and related disciplines.

Students must meet standards for both academic and clinical competence, as well as professional conduct. Full-time graduate study is required.

Prerequisites

In addition to meeting the Graduate School and SLHS requirements, students in the MA-SLP program must meet ASHA requirements for clinical certification. MA-SLP students must complete all undergraduate course prerequisites, which can be found on our website (https://www.colorado.edu/slhs/prerequisite-coursework/). Students may complete the prerequisites prior to applying to the graduate program, either as part of their undergraduate degree program, or following completion of the undergraduate degree in any other major. Students may also apply to enter the MA-SLP program and complete the prerequisites during the first year of their graduate study as a 3-year track student (the prerequisites will not count as credits in the MA-SLP program). Please note that all prerequisite coursework must be approved by the CAA Program Director.

Research Focus

The research focus is designed for students who are not seeking clinical certification.
Working with an advisor, students design a plan of study with coursework from SLHS and other departments. A master’s thesis is required. The non-clinical master’s degree in SLHS requires 30 credit hours of graduate coursework, with four to six credit hours devoted to the master’s thesis. For more information, visit the Thesis Option (http://www.colorado.edu/slhs/thesis-option/) webpage.

At least 24 hours must be completed at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department. Students may be able to transfer up to 9 credit hours of graduate credit towards this degree. The non-clinical master’s degree requires close work with a faculty member of your choosing. Students interested in pursuing this degree option are encouraged to talk with SLHS faculty members who share their interests before applying (see the Meet Us (http://www.colorado.edu/slhs/meet-us/) webpage).

Sample Two-Year Plan of Study
Below is a sample curriculum for the MA-SLP program. MA-SLP students must take 3 credit hours of elective classes. Students will take either the comprehensive exam in the fall of the second year or pursue a thesis option. The department recommends students take the PRAXIS exam by mid-April of the second year. Due to the length of time of the thesis option, the department recommends students take the PRAXIS exam by mid-April of the second year. Due to the length of time of the thesis option. The department recommends students take the PRAXIS exam by mid-April of the second year. Due to the length of time of the thesis option.

Audiology - Doctor of Audiology (AuD)

The AuD is the entry-level degree in clinical audiology (https://www.colorado.edu/slhs/graduate/doctorate-audiology/) that emphasizes both clinical competency development and evidence-based practice. Students in the AuD program complete a four-year curriculum that includes academic coursework, clinical practicum and a capstone project. Students take advanced seminars in hearing science, clinical audiology and research methods.

Students have the opportunity to pursue clinical research in both laboratory and clinical settings, with faculty in a wide range of areas including electrophysiology, psychological acoustics, physiological acoustics, diagnostic evaluation and intervention procedures for newborns through geriatrics, advanced amplification, speech perception in noise, assistive technologies, cochlear implants, vestibular assessment techniques and aural habilitation and rehabilitation of individuals with hearing loss. Furthermore, students undertake clinical practica to develop competency across the scope of practice consistent with national clinical certification and/or licensure in audiology. Successful completion of the AuD at CU Boulder meets the requirements for certification in audiology by the American Speech-Language-Hearing Association.
(ASHA). Currently, the AuD meet the educational requirements for licensure as an audiologist in every state.

Students will have the opportunity to complete clinical rotations in several different settings including full use of laboratories and suites in the Department of Speech, Language & Hearing Sciences. Clinical rotations occur at sites such as University of Colorado Hospital (UCH) in Denver and the UCH outpatient Boulder clinic, Children’s Hospital Colorado, local school districts, and other clinical settings throughout the metro Boulder and Denver area. Students complete fourth-year externships in clinical settings both in Colorado as well as across the United States.

**Requirements**

**Prerequisite Coursework**

The AuD faculty recommends that students have undergraduate coursework in speech-language-hearing sciences including content knowledge in audiological evaluation and rehabilitation, hearing and speech science, language development, phonetics, and speech and language disorders. A strong foundation in college algebra and pre-calculus is also expected. A college-level course in statistics is required.

Students who matriculate in the AuD program are required to document their background content knowledge and to address any missing competencies. See the department’s Doctorate of Audiology (https://www.colorado.edu/slhs/graduate/doctorate-audiology/) webpage for a list of prerequisites and a sample course schedule.

**Course Requirements**

The AuD program requires a total of 89 credits. Below is a list of sample courses that fulfill this requirement.

**Dual Degree Program**

**AuD/PhD in Audiology and Speech, Language and Hearing Science**

The department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the fields of audiology and hearing science. The PhD/AuD dual degree program (https://www.colorado.edu/slhs/graduate/audphd-dual-degree/) trains students in both clinical research and clinical practice in audiology. Students in the program gain training that will prepare them to become independent scholars, teach in higher education, conduct research, become certified clinical audiologists and gain leadership skills. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program.

**Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD)**

The PhD program is grounded in research. Supervisory, administrative, instructional and research activities acquaint students with problems and concepts at a higher level of professional activity and responsibility. Students in the PhD program gain the knowledge and skills that will prepare them to become independent scholars, teach in higher education, conduct research, and become leaders within the discipline.

Wide latitude prevails in planning individual PhD programs. It is expected that students have some professional or research experience before entering the program and that they have specific academic or professional goals in mind. PhD students must take a four-course sequence in statistics, four core courses within Speech, Language and Hearing Sciences (SLHS), complete the preliminary and comprehensive examinations and successfully defend a dissertation research project. Beyond that, student degree plans are individually designed through the joint efforts of the student and an advisory committee.

**Requirements**

The student will select an advisory committee during the first semester of his or her program. Then the student will develop a plan of study in conjunction with the advisory committee during the first year of doctoral study. The plan of study will detail the student’s goals, coursework to be completed to meet those goals and departmental and Graduate School requirements, and a proposed schedule for completion of doctoral work.
The plan of study will become the student’s blueprint for their doctoral work. The advisory committee must approve the plan of study, which may be amended later with the committee approval.

Departmental and Graduate School requirements for doctoral students are intended to allow maximum flexibility in developing a plan of study. All students take three SLHS doctoral seminars, at least 12 credit hours in statistics and research tools, and additional coursework in their own research area. There is no foreign language requirement. The Graduate School specifies that not more than 25 percent of coursework can be taken through independent study.

<table>

<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>SLHS 8918</td>
<td>Practicum 3: Classroom Instruction</td>
<td>3</td>
</tr>
</tbody>
</table>

**Required Coursework**

Three doctoral-level SLHS seminars.  
At least 15 credit hours in the student’s major content area.  
One teaching practicum:  
Two courses each in statistics and research tools.  
30 hours of doctoral dissertation credit.”

**Credit Hours**

At least 12 hours of coursework may be transferred to fulfill the above requirements. The minimum registration requirement for doctoral students is six semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

In order to continue in the program, a grade point average of 3.50 or better on coursework every semester will be required as well as continued recommendation of the SLHS faculty advisory committee. Grades below B will not count toward a doctoral degree.

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor’s degree. Two semesters of minimum registration credit may be allowed for a master’s degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

**Dual Degree Programs**

Students may pursue a dual PhD with neuroscience (p. 1302) or cognitive science (p. 1151). In addition, the department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the field of audiology and speech, language and hearing science. The PhD/AuD dual degree program trains students in clinical research and clinical practice in audiology. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program.

Students may apply to both programs simultaneously, or may apply to the PhD portion after having been accepted into the AuD portion or may apply to the AuD portion after having been accepted into the PhD portion.

For more information, visit the department’s Graduate Coursework (http://www.colorado.edu/slhs/graduate-coursework/) webpage.

**Speech-Language Pathology Assistant - Graduate Certificate**

Speech-Language Pathology Assistants (SLPAs) work directly with students with communication challenges in public school settings. Students may pursue a MA degree with a concentration in speech-language pathology (MA-SLP; CCC). SLPAs have a significant role in enhancing the quality of services for children and adolescents that need support for speech, communication, reading, and writing. This certificate program is not guaranteed to always meet educational requirements for authorization in other states as each state has variable criteria for practice. Students are encouraged to contact the appropriate state licensing board in the state they wish to practice to determine applicability.

Candidates develop the knowledge and skills to work under the supervision of a certified SLP in the public school setting with ages birth–21. This certificate is appropriate for individuals with a BA in speech, language and hearing sciences (SLHS); those completing a MA in SLHS; enrolled in their last semester of senior year at CU; or individuals with a MA in another field, who have completed or are completing equivalent leveling coursework (24 hours) through an approved SLHS department. See coursework required as listed under the “Apply” section of the department website (http://www.colorado.edu/slhs/online/slapacertificate-program/requirements-admission/).

The Colorado Department of Education currently provides a legislated statewide credential for SLPAs who meet qualifications to provide intervention services and supports, under the supervision of a qualified MA CCC-SLP provider. For additional information, please search for SLPA authorization on the Colorado Department of Education website (http://www.cde.state.co.us/cedprof/checklist-initialspeechlanguage/). Acquisition of this SLPA license in Colorado does not necessarily transfer to all other states and it is recommended students inquire if applicable credentials exist in other states in which they intend to seek employment as an SLPA.

This certification program at CU Boulder was developed as a BA Plus program to address shortages of qualified personnel and extend the intensity of services to special education students, especially in high-need districts and rural areas in Colorado where there is an ongoing paucity of qualified professional related service providers. This was made possible through ongoing collaboration with the Colorado Department of Education, BOCES Boards throughout Colorado, and our university and district school partners. Many interested students complete the program as part of their residency in Colorado as they complete their BA to gain additional experience in speech-language pathology prior to applying for a MA degree. Others in rural or high needs areas see this opportunity to continue their education and work as an SLPA as they prepare to move on to graduate school through distance learning programs as they work close to home without moving. Out of state BA students also apply to the program as an opportunity to continue their education as courses are offered remotely with onsite internships experience in their own state.
At this time, this program may not meet the educational requirements for SLPA certification or licensure in states other than Colorado. Students residing outside of Colorado are encouraged to consult the speech-language pathology and audiology board (https://www.colorado.edu/slhs/node/1243/attachment/) in their state prior to applying or enrolling in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting with an MA-SLP, CCC.

Requirements

Admission Requirements
The program is competitive and requires complete applications in electronic format. Preference for in-state students and especially qualified students in rural areas is given. A specific number of seats are reserved for Colorado students who qualify and are sponsored by BOCES to participate in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting in their own state with a MA CCC-SLP.

Required GPA of 3.0 or above.

Education Requirements
Completion of one option below:

- Last semester SLHS senior (students may be enrolled in a maximum of 2 required prerequisite courses concurrently with the SLPA program, although enrollment in only one is preferred).
- BA in SLHS.
- BA in a field other than SLHS with completion of 24 credits of "leveling" prerequisite coursework in SLHS.

Prerequisites or "Leveling" Coursework
The courses listed below are offered by the SLHS department at CU Boulder. Equivalent courses from other universities will also meet these requirements, if approved by the program director. These requirements are consistent with the Colorado Department of Education SLPA Authorization (http://www.cde.state.co.us/).

Required Courses and Credits
Students will register for two courses to be taken in the semester for which they have been admitted. These courses are as follows:

- SLHS 5032 Competencies and Strategies for the SLPA 3
- SLHS 5930 Speech Language Pathology Assistant Internship 4

Placement hours must be under the 50 percent supervision of an MA CCC-SLP.

Theatre & Dance
The Department of Theatre & Dance is a community of students, scholars, artists and artisans who regard the collaborative and creative process as the core of education. We engage with that process at all levels of our work as we pursue excellence and understanding. From the root of process stems practice, and that practice bears the fruit of experience. The Department of Theatre & Dance guides that fruition, offering students an expansive of opportunities to encounter the art forms of theatre, dance and experience design, their making and meaning. We strongly value the ampersand in Theatre & Dance, and seek to make connections across communities. We aim to make change, make art, and to make a difference, together.

We honor a global diversity of ways of making and of knowing. European colonialism and U.S. imperialism have long worked to diminish and eliminate knowledge that differed from a European worldview. As a U.S.-based institution, we recognize that the only way we can truly see beyond the limitations of our own perspectives is to listen and learn from people with experiences that are different from our own throughout the world. Our diversity efforts are therefore grounded on establishing long-lasting relationships with scholars and artists who have worked and continue to work outside of the United States, and to attract graduate students that can help us continue to learn from these perspectives.

The CU Boulder graduate studies in Theatre & Dance is designed to accommodate a variety of students, from the practicing professional to the recent BA/BFA graduate. Our approach is to develop students' creativity, pedagogical and scholarly skills in equal measure. We combine traditional studies with opportunities for practical training. Ambitious seasonal programs of theatre productions and dance concerts feature student performers, designers, directors and choreographers. Guest artists of national and international fame regularly participate in curricular, performance and extracurricular activities.

The performing arts at CU Boulder embrace many conventional and emerging modalities of presentation: proscenium stages, film, devised work, online social platforms, digital arenas, interactive installations, community collaboration, process-based work, performance activism that is both affective and effective, and new creations of bold imaginarians.

Our primary hope is to enable a deepening of your artistic and scholarly voice, to put what is distinctive about you in conversation with the world. Each of the above programs is designed to suit international expectations in skill acquisition and capacity. We differ from other colleges in our extensive efforts to support and enrich each student's individual interests and distinct gifts. For this reason, the number of annual admissions is limited to allow for highly personalized mentorship.

Students interested in theatre and performance studies, dance, and experience design are urged to consult with an advisor in the appropriate
field to obtain both advice and the most current information concerning program opportunities and expectations.

**Course codes for this department are THTR, DNCE, TDXD and THDN.**

**Departmental Requirements**

Students wishing to pursue graduate work in theatre & performance studies, dance, and experience design should carefully read both requirements for advanced degrees in the Graduate School section and the individual degree handbooks published on the Theatre & Dance (http://www.colorado.edu/theatredance/) website. Students should note that departmental requirements are sometimes more comprehensive than those minimums established by the Graduate School.

**Prerequisites**

Applicants are admitted to the graduate programs in theatre & performance studies, dance, and experience design on the basis of their academic records and recommendations.

**Advising**

Every student is assigned a faculty advisor and will have a meeting with their advisor upon entering the program. Topics discussed in the meeting and other available information are employed to design the best possible course of study for the student.

All candidates for a degree have the responsibility of making certain that the appropriate persons or committees have been appointed to supervise the various steps in their graduate programs. Detailed instructions can be found in the handbook for each degree, available from the department website.

**Master's Degrees**

- Dance - Master of Fine Arts (MFA) (p. 1340)
- Experience Design - Master of Fine Arts (MFA) (p. 1343)
- Theatre and Performance Studies - Master of Arts (MA) (p. 1344)

**Doctoral Degree**

- Theatre and Performance Studies - Doctor of Philosophy (PhD) (p. 1347)

**Certificates**

- Applied Shakespeare - Graduate Certificate (p. 1350)
- Hip-Hop Studies - Graduate Certificate (p. 1349)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Spencer, Jonathan (https://experts.colorado.edu/display/fisid_164209/)
Senior Instructor; MFA, Ohio University

Stark, Theodore (https://experts.colorado.edu/display/fisid_118462/)
Senior Instructor; MFA, Boston University

Steuernagel, Marcos (https://experts.colorado.edu/display/fisid_157686/)
Assistant Professor; PhD, New York University

Symons, James M.
Professor Emeritus

Wilkins, Helanius J. (https://experts.colorado.edu/display/fisid_155486/)
Assistant Professor, Associate Chair; MFA, George Washington University

Williams, Letitia S.
Senior Instructor Emeritus

Yang, Daniel
Professor Emeritus

Courses

Dance

DNCE 5001 (1-2) Graduate Technique
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Major Technique

DNCE 5012 (1) Concert Production
Meets with DNCE 4012.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Production

DNCE 5014 (2) Inside the Groove: Developing Rhythmic Skills for Graduates
Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, poly-meter, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Meets with DNCE 3014.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Music

DNCE 5015 (3) Movement Analysis
Introduces Rudolf Laban’s theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 4015.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Movement Awareness Injury Prevent for the Dancer

DNCE 5016 (3) Creative Dance for Children
Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.
Equivalent - Duplicate Degree Credit Not Granted: DNCE 4016 (with addition of readings and a paper)
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Pedagogy

DNCE 5017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance
Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.
Equivalent - Duplicate Degree Credit Not Granted: DNCE 4017, with addition of graduate papers and/or a project
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5023 (2) Performance Improvisation Techniques
Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.
Equivalent - Duplicate Degree Credit Not Granted: DNCE 4023 (with the addition of written analysis and creative assignments)
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Creative Process

DNCE 5024 (2) SOUND Choices: Enhancing the Music/Dance Relationship
Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Meets with DNCE 3024.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Music

DNCE 5036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction
Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialities of participants.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Pedagogy
DNCE 5038 (1-3) Dance Repertory
Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.
Equivalent - Duplicate Degree Credit Not Granted: DNCE 4038
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Performance

DNCE 5047 (3) Hip-Hop Dance History
Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 4047.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5048 (3) Performance and Community Engagement
Engages students in the power of performance for effecting positive social change. Students research collaboratively to create performances and workshop experiences to intentionally author the future they want. Readings provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations. Open to all forms of performance.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Performance

DNCE 5052 (1-3) Studio Concert
Provides the opportunity for choreographic and performative synthesis and experimentation via the execution of a project related to the student’s major area of creative research. Project must be approved by the student’s first reader.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Production

DNCE 5053 (3) Advanced Dance Composition
Meets with DNCE 4053.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5056 (2) Graduate Teaching Seminar
Examines practical, pedagogical, philosophical, and legal issues in current dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Provides practice in practical application of theoretical material. All genres of dance may be utilized.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Pedagogy

DNCE 5064 (2) Music and Dance Seminar: Collaboration
Investigates music in relation to dance performance, choreography, and teaching. Topics may include: a survey of musical styles and composers; direct experimentation with composition and recording techniques; enhancement of rhythmic versatility; work with accompanist/composers; and/or improvement of analytical listening and writing skills.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Music

DNCE 5101 (1) Intermediate Graduate Ballet
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5128 (1) Ballet Repertory
Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and Neo-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 4128.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Performance

DNCE 5261 (1) Advanced Jazz Dance Technique
Refines advanced students’ approach to the nuances and virtuosity of the jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 4261.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5301 (2) Graduate Hip-Hop Technique 1
Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination and performance skills.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5331 (2) Graduate Hip-Hop Technique 2
Students deepen their understanding of Hip-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. Focuses on increasing dancers’ capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 3301.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.

DNCE 5339 (1-3) Hip-Hop Practicum
Design and implement an experiential, action-based learning project that connects to local innovators in the Boulder/Denver Hip-hop community who are engaged in one of Hip-hop culture’s five elements: mcing, djing, breaking/street dance, graffiti, knowledge. Projects might range from creating a piece of graffiti with a local crew to organizing an academic panel or workshop with a Hip-hop pioneer.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

DNCE 5411 (2) Aerial Dance Technique
Study of basic technique skills in aerial dance on single point, low-flying trapeze. Additional skills include choreographic techniques, improvisation, and an historical overview of aerial dance. Through the theoretical readings and discussion, this course defines the place of aerial dance in the lineage of modern dance and addresses aesthetics, philosophical approaches to teaching, and safety issues.
Requisites: Restricted to graduate students only.
DNCE 5501 (2) Graduate African Dance
Explores the technique, styles and rhythms of regional and national cultures of Africa by introducing signature attributes common to different countries’ dance traditions. Features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity. Areas of concentration may vary by each semester (e.g. Ghana, Guinea, Intermediate).
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Major Technique

DNCE 5601 (2) Alexander Technique for Graduate Students
Studies how human reaction, coordination, and movement play a role in all activities. Graduate students will explore direct application to dance training, performance, choreography, and teaching. Through in-depth class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 3601.
Requisites: Restricted to Dance (DNCE) or Theatre (THTR) graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5701 (2) Contact Improvisation 2
Moves into rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 4701.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5849 (1-3) Independent Study
Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5901 (1-3) Graduate Technique Practicum
Offers special courses in the technique series. Course may meet at the same time with an undergraduate studio course and includes the practical movement experience with an additional scholarly study of specially chosen issues in dance.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Independent Study

DNCE 5909 (1-4) Special Topics
Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.
Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 4909
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Major Technique

DNCE 5919 (1-3) Dance Practicum
Project in dance under supervision of senior faculty.
Equivalent - Duplicate Degree Credit Not Granted: DNCE 4919
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Independent Study

DNCE 6016 (2) Teaching Lab-Contemporary Dance
Provides opportunity to apply principles and skills introduced in DNCE 5056. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on development, analysis and evaluation of teaching skills.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Pedagogy

DNCE 6017 (3) Cultural Collisions and Ethics in Dance and Movement Performance
Explores the inevitable transformation of traditions in dance/movement performance, using hip-hop and transnational fusion as foundation studies. As students expand their application of ethical inquiry, we will investigate what responsibility artists have as ambassadors in a digital culture. Films, readings and discussions will address personal integrity, ethics, industry practices, values and distortions imparted by history and socialization.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6047 (3) Dance Studies
Studies current dance trends, mostly in the United States, with particular attention paid to dance's intersection with philosophy, theory, technology, politics, current events and the other arts.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6056 (2) Professional Development
Examines current trends and issues in dance education and the professional dance world. Explores curriculum development, administration, and job opportunities along with other topics such as grant writing, community engagement, dance advocacy, and working as an independent artist.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Pedagogy

DNCE 6073 (3) Choreography
Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Pedagogy

DNCE 6101 (1) Advanced Graduate Ballet
Open only to graduate dance majors.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Creative Process

DNCE 6849 (1-3) Independent Study
Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.
Repeatable: Repeatable for up to 7.00 total credit hours.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Independent Study
DNCE 6919 (1-3) Directed Studies
Explores advanced topics in dance not regularly covered in the curriculum of the graduate program.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Independent Study

DNCE 6949 (1) Master’s Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Independent Study

DNCE 6959 (1-6) Master’s Thesis
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Independent Study

DNCE 6969 (1-6) The Graduate Project
Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student’s major area of interest. Project must be approved by the graduate faculty advisor.
Requisites: Restricted to Dance (DNCE) graduate students only.
Additional Information: Departmental Category: Independent Study

Experience Design

TDXD 5005 (3) Design Theory
Interrogates the principals, theories and philosophies that scaffold successful and innovative design with specific application to the design of immersive and interactive experiences and across a range of commercial, performative and cultural contexts. Activities will clarify how the philosophies of design support the core story-telling and interactive elements of experience designs.
Requisites: Restricted to Experience Design (TDXD MFA) students only.
Additional Information: Departmental Category: Experience Design: Technique

TDXD 5105 (3) Collaboratory in Experience Design 1
Addresses philosophies of storytelling through experience and the general concepts and aesthetics of Experience Design. The first in a two-part series, this course lays foundational principles focusing on the components of a live experience and how space, narrative and interaction affect the design from early conceptualization through implementation.
Requisites: Restricted to Experience Design (TDXD MFA) students only.
Additional Information: Departmental Category: Experience Design: Process

TDXD 5500 (3) Experience Design Atelier 1: Design Evolution and Expression
Introduces students to various techniques for graphically representing design ideas using drawing and illustration techniques in order to augment and deepen the diverse skill sets of students in the class. The first in three-part sequence on graphic representation and expressive practices, students will learn how to work out design ideas through sketching, drawing, creating storyboards and collages.
Requisites: Restricted to Experience Design (TDXD MFA) students only.
Additional Information: Departmental Category: Experience Design: Technique

TDXD 5700 (3) Experience Design Atelier 2: Introduction to Design Graphics
Introduces students to advanced techniques for representing design ideas in graphic form including commonly used software applications (Sketchup, Vectorworks, AutoCAD), scale modeling, mechanical drawing and rendering. The second in a three-part class sequence on graphic representation and expressive practices, this atelier will offer a range of exercises tailored to the skill level of individual students.
Requisites: Requires a prerequisite course of TDXD 5500 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.
Additional Information: Departmental Category: Experience Design: Technique

TDXD 5805 (3) Professional Portfolio 1
Focuses on selecting, organizing and developing a plan for presenting material that will eventually culminate in the completion of a competitive professional portfolio, a vital tool for gaining employment in the Experience Design industry. The first of a two-part credited final project, students begin the process to prepare their professional portfolio under the guidance of faculty and industry professionals.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Experience Design (TDXD MFA) students only.
Additional Information: Departmental Category: Experience Design: Documentation

TDXD 6010 (3) Collaboratory in Experience Design 2
Introduces students to professional models of working in the Experience Design industry. The second in a two-part class sequence, students work collaboratively on industry case studies focusing on entertainment, education and cultural destination genres with input from outside professionals in the field.
Requisites: Requires a prerequisite course of TDXD 5105 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.
Additional Information: Departmental Category: Experience Design: Process

TDXD 6210 (3) Storytelling for XD
Explores multi-modal, expressive strategies for experimental storytelling and investigates the diverse languages of live experience. Students complete projects using varying modes of conveyance including physical and spatial action, filmic approaches, digital media and alternative methods. Students will discuss current trends in expressive methods and the nature of story.
Requisites: Restricted to Experience Design (TDXD MFA) students only.

TDXD 6500 (3) Experience Design Atelier 3: Packaging the Design Presentation
Investigates strategies for visually communication and "selling" design ideas in a compelling and well composed visual/aural presentation. The third in a three-part sequence on graphic representation and expressive practices, this class culminates in a final, comprehensive design project portfolio that follows current professional standards.
Requisites: Requires a prerequisite course of TDXD 5700 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.
Additional Information: Departmental Category: Experience Design: Technique
TDXD 6555 (3) Experience Design Technology
Explores established and cutting-edge technologies employed in visual, auditory, and interactive elements of designed environments and experiences. Develops an understanding of the function of these areas, the ways in which they facilitate a complete experience and examines new directions of experimentation in these fields. Elicits research, analysis, and development of new concepts in response to current practices and design problems.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

TDXD 6805 (3) Professional Portfolio 2
Through editing materials collected in TDXD 5805, students will complete adaptable versions (hard copy, digital, web-based and presentations) of their professional portfolios. In this second of a two-part credited project, a committee comprised of faculty and industry professionals guide the completion of XD portfolios.

Repeatability: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of TDXD 5805 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6849 (3-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

TDXD 6901 (3) XD Implementation and Engineering
Explores the realities and challenges of implementing themed entertainment design. Within the framework of project based case studies and a real work project, this course analyzes aspects of construction management, client management and approvals, scheduling, budgeting, value engineering, architecture and design.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

TDXD 6910 (3-6) The Experience Design Center
Offers Experience Design students an opportunity to engage in and complete projects posed by industry professionals or non-profit partners seeking assistance with experiential projects in a professional, practicing lab/studio setting. The XD Center, house in a campus “maker-space,” accepts design challenges and assignments that provide a realistic field experience for students.

Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

Theatre

THTR 5011 (3) Seminar: Theory and Criticism
Studies theories and criticisms of drama and theatrical performances from Plato to post-modernism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 5025 (3) Costume Patterning and Construction
Includes techniques for the patterning and construction of contemporary and period costumes. Hands-on format covers techniques, materials and equipment particular to theatrical production.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C). Restricted to graduate students.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5031 (3) Russian Theatre
Studies Russian theatre history and the development of Russian drama from the 18th century to the present. Taught in translation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 5033 (3) Advanced Movement for the Stage
Explores a wide range of physical actor training methods and practices that support the fundamentals of mask training and mask performance for the actor. Students will experience each mask by gaining an understanding of its historical and performative relevance and directly bring into play the authentic life required of the specific mask. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4033

Requisites: Restricted to graduate students only.

THTR 5039 (3) Musical Theatre Repertory
Develops around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4039

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5045 (3) Costume Crafts
Covers basic and advanced techniques in casting/molding, mask making, dyeing, painting, jewelry making, ventilating and wig style and millinery via a series of projects. Culminates in a final project encompassing all techniques. Instruction consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisite THTR 1115.

THTR 5049 (1-4) Special Topics in Theatre
Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4049

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5051 (3) Special Topics in Theatre History
Detailed study of a particular topic in theatre history (e.g., an era, a style, a country, or an organization). Topic specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing
THTR 5061 (3) On Stage Studies: Asian Performance
Study of live performance forms, theory, and literature throughout Asia: performance history, production styles, and social functions of performance.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite background in theatre, dance, or Asian studies.
Additional Information: Departmental Category: History/Dramaturgy/Directing
Departmental Category: Asia Content

THTR 5065 (3) Theatrical Tailoring
Explores classic and theatrical tailoring techniques and theories through the construction of classical men's wear: trousers, vest/waistcoats and coats. Student work with hand and machine sewing techniques, patterning skills and appropriate tailoring materials. Period of exploration will vary by semester. Repeatable for credit up to 6 total credit hours.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite THTR 1115.

THTR 5067 (3) Teaching Shakespeare
Provides students with pedagogies, lesson plans and exercises for making Shakespeare accessible for students of all ages and across multiple content. This online course may be taken as a standalone, 3-credit course or as part of the Graduate Certificate in Applied Shakespeare.

THTR 5071 (3) Advanced Directing
Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercises. Instructor consent required.
Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5085 (3) Theatre Management
Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.
Equivalent - Duplicate Degree Credit Not Granted: THTR 4085
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theatre Design and Technology

THTR 5105 (3) Theatre Make-Up Design
Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.
Equivalent - Duplicate Degree Credit Not Granted: THTR 4105
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Special Courses in Theatre

THTR 5113 (3) Comedy Matters
Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.
Equivalent - Duplicate Degree Credit Not Granted: THTR 4113
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Performance

THTR 5125 (3) Watercolor Illustration and Rendering Techniques
Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.
Equivalent - Duplicate Degree Credit Not Granted: THTR 4125
Requisites: Restricted to graduate students only.

THTR 5143 (3) Shakespeare in Community
Surveys a growing field of arts practitioners who are intersecting Applied Theatre, Shakespeare and community in meaningful ways, including Shakespeare in Prisons, Shakespeare with Veterans and Shakespeare for Inclusive Audiences. Students will explore a variety of methodologies for teaching and practicing Shakespeare and create original work using Shakespeare as a lens for examining a particular theme, topic or social issue.
Equivalent - Duplicate Degree Credit Not Granted: THTR 4143
Requisites: Restricted to graduate students only.

THTR 5175 (3) Conceptualization
Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.
Equivalent - Duplicate Degree Credit Not Granted: THTR 4175
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Special Courses in Theatre

THTR 5213 (3) Improvisation I: Thinking On Your Feet
Provides students with an introduction to several forms of improvisation, including short form, long-form, playback theatre and clown. A useful course for anyone interested in improving confidence with public speaking, communication and/or performance. Attendance and participation are mandatory.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Performance

THTR 5849 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Special Courses in Theatre
THTR 6031 (3) On-Stage Studies: American Theatre
Studies American drama in performance, with particular attention to critical and scholarly responses to landmark productions of American classics. 
Requirements: Restricted to graduate students only. 
Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6041 (3) Theatre and Performance Histories 2
Studies global histories of theatre and performance from colonization to the present, with particular attention paid to critical and theoretical responses to work from the period.
Requirements: Restricted to graduate students only.
Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6051 (1-3) Production Research and Practicum: Directing
Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercise. Instructor consent required.
Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6071 (3) Seminar: Perspectives on Acting
Art of acting is examined through study of acting theories and practices developed during major periods of theatre history. Examines the variety of theories about acting that remain today.
Requirements: Restricted to graduate students only.
Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6081 (3) Seminar in American Theatre: Lesbians and Gays
Studies the portrayal of lesbians and gays in mainstream American theatre during the 20th and 21st centuries, as well as the contributions of gay and lesbian theatre artists during the same period.
Requirements: Restricted to graduate students only.
Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6091 (1-3) Production Research and Practicum: Dramaturgy
Students undertake a dramaturgical project, normally within the major season, requiring detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report of their project.
Requirements: Restricted to graduate students only.
Recommended: advanced course work in dramatic literature and advisor approval.
Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 6111 (3) On Stage Studies: Global Contemporary Theatre
Explores global theatre from the early 1960s to the present, with particular attention towards balancing the avant garde and popular theatre in recent world drama.
Requirements: Restricted to graduate students only.

THTR 6849 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Special Courses in Theatre

THTR 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Special Courses in Theatre

THTR 6959 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Courses in Theatre
The MFA program is designed to accommodate a variety of students, ranging from the practicing professional to the recent BA/BFA graduate with professional experience. The MFA develops students’ creative, performance, pedagogical and scholarly work. With an emphasis on embodied research, this degree positions participants for teaching careers in higher education and a great variety of careers in the field of dance, movement, entrepreneurship, critical theory, advocacy and arts administration.

The MFA is an intense immersion into a student’s expertise and curiosities as an artist and scholar. Great transformations in learning are an expected part of the graduate school experience, and significant space is allocated for self-directed interests. The decision to pursue an MFA in dance indicates a hunger to embark upon the challenges, rewards and maturation this experience will bring.

Funding for the MFA is connected to Teaching Assistantships and Graduate Assistantships, so all prospective MFA students must have previous teaching experience.

**Curriculum**

The primary core MFA curriculum focuses on the development of the individual artistic voice in performance, choreography, teaching, research and writing. The presentation of new creative work is bolstered, augmented and enriched by the study of theory, history and many diverse artists of all dance genres and movement disciplines. The program is designed to be responsive to individual areas of interest and to ensure effective preparation for careers in academics, not-for-profit organizations, and the professional arenas.

Students are encouraged to think outside of the box in terms of course choices, creative pursuits and scholarly activities. A considerable number of the required credits consists of student-selected courses and electives, allowing for a great deal of freedom and individualized study. It is critical that a student work closely with their advisor in selecting courses in the dance curriculum, courses outside of the department and creating independent studies that will support the student’s goals and secondary area of emphasis.

**Performance and Choreography**

All MFA students are expected to present choreographic work each semester, either as part of course-related events or in other departmentally-produced events. Students are coached to seek refinement of their established artistic practices, but also assiduously to expand their artistic selves into less familiar movement, choreographic, aesthetic and expressive modes. Evaluation of artistic growth is based on intellectual and physical articulateness, creative problem-solving, depth of critical, conceptual and aesthetic research and writing. The presentation of new creative work is bolstered, which a student has deeply sought discovery, reconsideration and analysis of their art-making methods.

Students are encouraged to seek a variety of performance opportunities with fellow graduate students, undergraduates, faculty and guest artists. Produced performances are presented multiple times each year and informal showings occur regularly. Given the rigorous schedule of our MFA program, extensive work with off-campus groups can be extremely difficult to schedule and tends to overwhelm students with multi-tasking and juggling of priorities.

**Modified MFA Program for Professionals**

Those students entering our program with significant professional backgrounds including teaching, choreography and/or performance may be able to request a modified degree plan. For such students, an interview with the Director of Dance and the Director of Graduate Studies for Dance during the application/audition process is necessary. The interview will help determine if there is a good match between the student’s goals and the MFA program.

The goal of the modified program for professionals is to provide flexibility in the pursuit of individual goals and the fortification of specific educational gaps. In close consultation with the faculty and graduate advisor, the student will be able to propose and develop new areas of research and creative work. All modifications to the MFA program must receive the approval of program directors and the CU Boulder Graduate
School. The number of required credits and semesters will be determined based on the individual’s exceptional professional experiences.

Requirements

Admission Requirements

Applicants are expected to show a high level of proficiency in dance performance, pedagogy and choreography. All applicants must submit the Teaching Application (https://www.colorado.edu/theatredance/dance/graduates/graduate-assistantships-teaching-application/) portion of the application. Funding (https://www.colorado.edu/theatredance/financial-information/) for the MFA is contingent upon teaching within our program.

The deadline for all applications is December 1. Select applicants will be invited to an initial Zoom interview in January. The faculty will then invite a small number of applicants for an in-person campus audition in February. International students may request to audition in digital format. The dance program does not accept applications or transfer requests for spring semester admission.

The specific audition dates and detailed information about the on-campus audition can be found on the department’s Dance MFA Application (https://www.colorado.edu/theatredance/dance/graduates/mfa-dance-application/) webpage.

Graduate Record Exam (GRE) scores are not required for the MFA in Dance application.

Prerequisites

- Hold a baccalaureate degree in dance, or equivalent dance proficiency and experience with a degree in another field
- Have an undergraduate GPA of at least 2.75 and meet the Graduate School’s minimum Admission Requirements (https://www.colorado.edu/graduateschool/admissions/prepare-apply/)
- Demonstrate a deep commitment to the field of dance with proficiency in practice, performance, choreography and teaching

Program Requirements

Required Courses and Credits

The three-year program requires a minimum of 60 credit hours, at least 50 of which must be completed on campus at CU Boulder. At this time there is no low-residency option for the MFA program. The curriculum focuses on performance, choreography, scholarship, pedagogy and a secondary area of specialization. Grades lower than a B- cannot be applied towards graduation; a 3.0 GPA is needed to graduate.

</tbody>
</table>

Total Credit Hours 56

1 Students must complete Advanced Composition, both Choreography courses, and Concert Production prior to the semester in which their choreographic/creative project is presented.

2 Students who do the Aerial Dance or Somatic Secondary Emphases will complete fewer credit hours of electives.

MFA Project and Project Paper

The culmination of graduate study is the MFA Project and Project Paper. The MFA Project is based on creative work: a choreographic/creative project usually presented in a live performance or digital format, followed by a paper and an oral defense of the project and paper. We celebrate many varieties of creative projects and we offer the support and imaginative expertise of an outstanding production team.

Graduate Comprehensive Portfolio

Prior to graduation, MFA candidates submit a collection of scholarly, pedagogical and creative work. The portfolio is intended to document and synthesize the graduate’s personal practice, philosophies, choreography and academic investigations. It includes creative and pedagogical statements, scholarly essays, a CV and digital documentation of teaching, performance and choreography.

Credit Hours 10
Students are:

Secondary Emphasis

We wholeheartedly assert that a liberal arts education cultivates a healthy balance of critical thinking, creativity and communal excellence. In this spirit, MFA candidates choose at least one secondary area of study to give variety and dimension to their training.

Secondary Emphases Within Our Campus

Students may choose an emphasis that can be fulfilled by courses taken within the department and/or in other campus departments. Secondary emphases vary between two and five courses, depending on the choice of subject. The university setting is particularly well-suited to broad educational goals, given the wide assortment of subjects available at the CU Boulder campus. We encourage students to search far and wide through the course catalog to discover courses and areas of study that are particularly suited to their individual interests and goals.

Students may also choose to complete a graduate certificate as their secondary emphasis. The most common certificates earned by MFA students are:

- Women & Gender Studies Certificate (https://www.colorado.edu/wgs/graduates/)
- Hip-hop Studies Certificate (https://www.colorado.edu/theatredance/dance/hip-hop-studies-certificate/)
- Critical Ethnic Studies Certificate (https://www.colorado.edu/ethnicstudies/graduate/graduate-certificate/)
- Emergent Technologies and Media Arts Practices (https://www.colorado.edu/cmci/dcmp/cert-emap/)
- Critical Theory Certificate (p. 1225)
- Digital Humanities Certificate (https://www.colorado.edu/crdds/dhgc/)
- Arts Administration Certificate (https://www.colorado.edu/music/academics/graduate-advising/graduate-certificate-arts-administration/)

Aerial Dance Emphasis

The aerial dance emphasis is available to students who have a serious interest in aerial dance and its application to dance training, performance and/or teacher training. Students can work towards the completion of the Professional Training Program at Frequent Flyers Aerial Dance Studio (http://www.frequentflyers.org/)® (located in Boulder) while simultaneously pursuing their MFA degree. The Professional Training Program must be successfully completed before the MFA degree will be awarded. Before a student is eligible to begin work in the aerial dance emphasis, they must be officially accepted by Frequent Flyers® Professional Training Program and have been approved by the Director of Graduate Studies for Dance to follow the aerial dance emphasis.

The aerial emphasis is sponsored by the program, but requires students to take off-campus training. Because of this, the number of CU Boulder credit hours required for the MFA is reduced from 60 to 50 credit hours.

Somatic Emphasis

The somatic emphasis is social justice oriented. It is intended for students with a strong devotion to intersectional practice-based research. Designed as a connective tissue within the MFA in Dance, the somatic emphasis fosters the artist-citizen to be accountable, embodied and aware through dancing, dance making, performance, critical discourse, collaboration, wellness and activism. Students are supported in accumulating broad experiential knowing through diverse somatic approaches.

We prioritize the development of skills and strategies toward cultivating radical aliveness. How we inhabit our living bodies/minds, and relate to others, impacts our identities, our communities, and the structures we participate in. We consider how somatic decolonizing will deepen collective movements toward justice, equity, diversity, inclusivity, and responsive global citizenship.

The MFA in Dance honors the complexity of somatic lineages and practices. We place value on knowing the global roots of somatics and strongly assert that Eurocentric certified somatic systems are not the only traditions to hold valuable somatic knowledge. Our program supports innovative research into somatic practices of every origin. We aim for a collaborative re-imagining of the potential applications for culturally informed and politically engaged somatic practice; depth of inquiry, integration of theory and practice, and queering of perspectives is encouraged. This emphasis calls for investment in the power of our anatomical, energetic, cultural bodies/minds in the face of converging crises, shifting human demographics, emerging realities, and potential futures.

The somatic emphasis consists of an individualized course of study worth 12 credits. The specific course of study will be developed by each student in collaboration with Dance faculty Anya Cloud.

Course of study will be developed from the following:

- Graduate level Dance courses in somatics
- One approved course in anatomy, physiology and/or kinesiology
- Peer-to-peer somatic lab practice
• Cumulative somatic research documentation and bibliography
• Intensive off-campus somatic training
• One approved course outside of the department from the following areas: Ethnic Studies, Women and Gender Studies, LGBTQ Studies, Disability Studies, Native American and Indigenous Studies, Peace and Conflict Studies, Environmental Justice and Eco-Social Justice, or a related and relevant course approved by faculty

Students can apply for CU Boulder grant funding (https://www.colorado.edu/graduateschool/funding/awards-grants/) to pursue off-campus somatic training. MFA in Dance grant options are listed within the MFA Handbook (https://www.colorado.edu/theatredance/graduate-student-resources/). Current local partners include the Renée Crown Wellness Institute at CU Boulder and community practitioners of Feldenkrais®, Alexander Technique, Body-Mind Centering®, Gyrotonic®/Gyrokinesis®, and Pilates. Current international remote partner includes a practitioner of Kung Fu.

Students must declare the somatic emphasis by the end of the first year. Given the nature of the Somatic Emphasis, the number of CU Boulder credit hours required for the MFA with a Somatic Emphasis is reduced from 60 to 50 credit hours. All requirements must be successfully completed before the MFA degree will be awarded. The Dance faculty advisor for the somatic emphasis is Anya Cloud.

Learning Outcomes
• To encourage the clarification and individuation of each student's artistic voice.
• To prepare and empower students to fulfill their chosen career paths, both in their graduate studies and in the professional world.
• To investigate traditional and innovative approaches to movement invention, choreography and performance.
• To deepen somatic awareness and increase fluency in dance technique, including but not limited to Improvisation, Jazz, African Caribbean, Aerial, Hip-hop, Transnational Fusion, North and West African dance, Ballet and Contemporary.
• To actively engage in dance research, with particular attention to discovering relationships between scholarship and creative work.
• To examine and practice pedagogical goals and strategies from aesthetic, cultural and anatomical perspectives.
• To present choreography/creative work on a regular basis and perform in the creative work of faculty, peers and guest artists working in a variety of aesthetic and technical styles.

Experience Design - Master of Fine Arts (MFA)

This program is not being offered in 2023–24. Please check back for future updates.

Every other year, this unique, studio-centric MFA in experience design (XD) admits a cohort of eight to twelve talented students from varied backgrounds, including all areas of design, art, architecture and engineering. Students in the XD program form a studio collective to complete an array of XD projects under the direct guidance of CU faculty and professionals in the field, many who provide project content. As a result of this industry involvement, and the students own self-exploration, XD graduates are prepared to enter the field of experience design.

The MFA in XD also exposes students to new ways of seeing the reality around them, new ways of creating, resolving problems, expressing ideas and telling stories. Essentially, the MFA in XD is a course of study in using new languages.

The program also features a summer "design center" where students and faculty can accept real-time XD problems posed by outside entities (including some contracted projects with commercial firms) and solve them via a collaborative, studio approach. The work of this center provides a service to various communities and is a practical extension of learning for students.

While the MFA in XD advances a collaborative studio environment where teamwork is held in high regard, we consider it a mission of the program to foster the individual talents, visions, and interests of each student in the program. The program will make every effort to provide an environment where individual students may gestate their own concepts, allowing them room to explore, test and innovate with the support of the studio, other students, faculty and industry professionals.

Connections to Industry

Some of the program's professional advisors, endorsers and participants include:

• Jim Doyle of WET Design (https://wetdesign.com/), makers of the famed Bellagio Fountains in Las Vegas
• Dave Cooperstein and Al Cross of PGAV Destinations (http://pgavdestinations.com), designers of Sea World and the NASA Space Museum
• Electrosonic (http://www.electrosonic.com), makers of the live video projection technology for Disney's Magic Kingdom Castle
• Adam Bezark (http://bezark.com), Phil Hettema (http://www.thehettemagroup.com) and Steve Ryan, commercial producers of live experiences with credits at Disney, Universal and Landmark Entertainment
• Drew Campbell, Creative Director at International Resorts in Singapore
• Baam Productions (http://www.baamproductions.com)
• Nassal (http://www.nassal.com)
• Super 78 (http://www.super78.com)
• Bolder Interactive, Technology Designers for Themed Experiences
• Stantec, Experiential Architecture Firm

Requirements

Application Process

The professional MFA in experience design admits a new cohort of 8–12 students every other fall semester. Applications will be accepted on a rolling deadline for entry in a fall semester beginning in July of the previous year.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Theatre - Bachelor of Arts (BA) (p. 592)

Requirements

Prerequisites

Applicants must have a bachelor's degree and an undergraduate GPA of at least 2.75. While a bachelor's degree in theatre is not a requirement, theatre experience is highly desirable.

Program Requirements

Required Courses and Credits

Students must earn 30 credit hours, at least 24 of which must be at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor. Theatre courses below the 5000 level cannot be counted toward the degree. Courses in which grades below B- are received are not accepted for master's degree programs.

The degree is normally completed in four semesters (excluding summers).

Students must declare either the thesis or non-thesis option by the start of their third semester. Those choosing the thesis option will apply 4–6 thesis credit hours toward the 30-credit-hour requirement.

Elective Coursework

MA students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g.,
graduate dance technique, advanced dance composition, African dance). When approved by the student’s advisor, MA students are encouraged to take courses in other departments. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements. All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments.

Graduate Independent Study
Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Independent study coursework cannot exceed 25 percent of the coursework required for the master’s degree.

Production Research and Practicum Courses
These courses in acting, directing, design and dramaturgy may be taken for 1–3 credits. A limit of 3 credits in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit are:

- one credit hour for successfully completing the project;
- two credit hours for completing the project and submitting a written record of it (e.g., an actor’s journal, a director’s regiebuch);
- three credits for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor.

MA Degree Tracks
The MA program in Theatre & Performance Studies has two tracks: a thesis option and non-thesis option. Students must declare either track by the start of their third semester.

Track I: Thesis Option
This track prepares students to pursue a PhD degree at CU or elsewhere. Students must write a thesis, a substantial research document demonstrating mature critical thought based on independent study and investigation. Students must demonstrate proficiency in three areas: academic coursework, the thesis and the final exam (oral).

Students in the thesis track take two one-hour oral examinations back-to-back (i.e. on the same day) after the majority of coursework for the degree has been completed and the master’s thesis is "essentially" complete. The first oral exam covers coursework. The second oral examination covers the thesis.

Required Courses and Credits for the Thesis Track

<td>2</td>
<td></td>
</tr>
</tbody>
</table>

Total Credit Hours: 30

1 Students may take 4–6 thesis hours. The number of electives is adjusted accordingly.
2 A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student’s academic advisor.

Track II: Non-Thesis Option
Students who do not plan to pursue a PhD can elect the non-thesis track, which requires a two-part comprehensive exam, comprised of a take home written exam and a 1.5-hour oral exam. The written and oral exams will be comprehensive, covering all coursework presented for the degree. The exam will take place near the end of the last semester of coursework.

Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience, or beyond. To complete the non-thesis track, students must demonstrate proficiency in two areas: academic coursework and the final exam (written and oral).

## Dual Degree Program

### MA/MBA in Theatre and Performance Studies

The Department of Theatre & Dance, in conjunction with the Leeds School of Business, offers students the ability to earn an MBA and an MA in Theatre & Performance Studies through a three-year dual degree program. The dual MA/MBA offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially. An MBA degree in combination with an MA degree in Theatre & Performance Studies will provide students with a set of business tools to complement their artistic talents and expand their career options.

Students in the MA/MBA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums, not-for-profit organizations and arts presenters.

### Application Process

Students may apply either to the Department of Theatre & Dance for the MA degree program or to the Leeds School of Business for the MBA degree program. Having been accepted, they will subsequently apply to the other degree program.

Alternatively, students may apply for both programs simultaneously, in which case students must apply to each program separately and meet the admissions standards for each program separately.

**NOTE:** Residents of U.S. Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program, provided the student applies and is accepted to both programs in the same admissions cycle. For more information, visit the Western Regional Graduate Program (http://wiche.edu/wrgp/) webpage.

### Program Requirements

The MA/MBA is a dual degree program, and its curriculum is best conceived that way. A minimum of 67 approved credit hours must be completed to earn both degrees. Dual degree students will be required to complete 43 hours of MBA coursework and 24 hours of theatre/dance coursework. The dual degree agreement allows students to count 18 credit hours of courses towards both degrees.

First-year students in the MA/MBA in Theatre & Performance Studies take courses exclusively in either the Leeds School of Business or the Department of Theatre & Dance. In the second year, courses are taken exclusively in the other program. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Because of the two-year cohort model at Leeds School of Business, students are advised to start their coursework in the Department of Theatre & Dance. This is the case even if the student was admitted to both programs simultaneously.
Coursework for the MBA portion of the Dual MA/MBA in Theatre & Performance Studies (p. 1408) can be found on the Leeds School of Business catalog page. The MBA requires 55 credit hours. MA/MBA students will complete 43 credit hours of business courses. Twelve credit hours from the student’s coursework for the MA will count toward the MBA.

The MA in Theatre & Performance Studies requires 30 credit hours, 24 of which must be at the 5000 level or above. Six credit hours from the student’s work in the Leeds School of Business will count toward the MA in Theatre & Performance Studies. Students are encouraged to explore classes outside the Department of Theatre & Dance for some of their electives, as approved by their advisor.

All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments. Theatre courses below the 5000 level cannot be counted toward the degree.

Courses in which grades below B are received are not accepted for the MA in Theatre & Performance Studies.

Students in the MA/MBA will choose between the thesis track and the non-thesis track. Those choosing the thesis track will take 4–6 master’s thesis credit hours and the number of electives in THTR or DNCE will be adjusted accordingly.

1 Students who elect the thesis plan will take 4–6 master's thesis credit hours. The number of electives will be adjusted accordingly.

2 A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student’s academic advisor.

**Learning Outcomes**

The goal of the MA, MA/MBA, BAM Degrees in Theatre & Performance Studies is to cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breath and relevance to our field and beyond.

We use the indicators below to measure the extent to which a student has reached the above learning objectives:

- Coursework
- Research and creative work
- Professional and outward-facing development
- For non-thesis track: completion of culminating project and exam
- For thesis track: completion of thesis and exam

**Theatre and Performance Studies - Doctor of Philosophy (PhD)**

The PhD in Theatre & Performance Studies is primarily designed for those who intend to be scholars working in an academic environment.

Our PhD in Theatre & Performances Studies is committed to performance as research as integral to the study of the history, theory, and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing, and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from
throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender, race and/or coloniality play in this work? Why is it relevant today?

The program is designed to be completed in four years for students entering with a master’s degree. The first through fourth semesters focus on coursework, the fifth semester is spent preparing for and taking the comprehensive examination and writing the dissertation prospectus and the sixth through eighth semesters are spent writing and defending the dissertation. It is possible for a student entering the PhD program with a master’s degree to finish in three years.

Requirements

Prerequisites

Applicants to the PhD in Theatre & Performance Studies must have a master’s degree in any subject. Students who apply to the PhD but will not have earned a master’s degree prior to the start of the program will instead be considered for the MA in Theatre & Performance Studies.

Program Overview

To complete the program, students must:

1. Demonstrate proficiency in academic coursework.
2. Demonstrate reading competency in at least one foreign language equivalent to the completion of a second-semester college-level course.
3. Pass a comprehensive exam.
4. Prepare and successfully defend a dissertation.

Doctoral students in theatre complete 30 credit hours of coursework beyond the master’s degree at the 5000 level or above. When approved by the student’s advisor, credit hours from other departments on campus may count, provided the course is taught by a member of the graduate faculty in the department. In addition to the 30 credit hours of coursework, 30 dissertation credit hours (THTR 8999) are required.

Required Courses

The PhD program is based upon a core of required courses which emphasize the interrelatedness of theory, history and practice.

</tbody>
</table>

Elective Coursework

PhD students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student’s advisor, PhD students are encouraged to take courses in other departments, especially as they relate to the anticipated dissertation topic. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements.

Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Although there is no limit to the number of independent study credit hours a doctoral student may take, they should be held to a minimum.

Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credit hours. A limit of 3 credit hours in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit hours are:

- one credit hour for successfully completing the project
- two credit hours for completing the project and submitting a written record of it (e.g., an actor’s journal, a director’s regiebuch)
- three credit hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor

Language Requirement

Reading competency in a foreign language is an important skill for a scholar. It allows the student to consider a dissertation topic beyond the limits of English-speaking theatre, thereby significantly broadening their research and publishing possibilities. Doctoral students are required to demonstrate proficiency in a foreign language equivalent to the completion of a second-semester college-level course before taking the comprehensive exam. This requirement may be fulfilled by coursework taken within five years previous to the exam or by testing.

Dissertation

The PhD program culminates in the dissertation, a research document that makes a significant and original contribution to the field of theatre studies. The dissertation will be defended before a committee of five members.

Learning Outcomes

Goal of the PhD Degree in Theatre & Performance Studies

To cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues.
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breath and relevance to our field and beyond.

Indicators for Reaching Learning Objectives

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- Completion of comprehensive examination and dissertation
- Assessment of teaching

Hip-Hop Studies - Graduate Certificate

This consolidated certificate program in Hip-hop Studies for matriculated graduate students is designed to expose students to the richness, complexity and vitality of Hip-hop— as theory and practice.

Hip-hop, which arose in youth communities of color in the 1970s amid political abandonment and economic devastation, has become the most important cultural movement of the last-half century. Practiced in nearly every corner of the globe, it is now one of the most important through-lines in human culture. To understand Hip-hop is to understand the world in which we live. Inclusive excellence is the bedrock of Hip-hop; membership in its community is not defined by subscription to a particular place or race but rather to its unique ethos, which privileges virtuosic innovation as much as historic and self knowledge.

Hip-hop is fundamentally an interdisciplinary form. It does not live in one field alone. Rather, it is a dialogue that occurs across dance, music, visual and verbal arts, as well as history and theory. While the Graduate Certificate in Hip-Hop Studies is housed in the Department of Theatre & Dance, courses are available in other departments, such as History, Sociology, English and Ethnic Studies. Organized in this way, with offerings from several campus departments, the consolidated certificate program is the best way to give students a sense of the richness, complexity and vitality of Hip-hop.

Importantly, the certificate's community-based practicum ensures the students in the program will know Hip-hop as a lived culture, not merely an object to be consumed inside the halls of academia. This active learning component will integrate students into the local Boulder/Denver communities that are shaping the future of Hip-hop's forms. It ensures students will know themselves as ethnographers, as well as theorists, and know Hip-hop as an ever-evolving, potent and urgent tool of self-expression.

The certificate in Hip-hop Studies is designed to be an enriching, interdisciplinary supplement to other areas of study. It provides a broad base, which can serve as an entry point to more focused study and
practice. While offering rich and rewarding experiences, the graduate certificate is not a professional endorsement from Rennie Harris or Larry Southall of the student’s skills. Rather, it develops students’ appreciation and respect for one of the most important American cultural forms to have emerged in the last half-century.

**Requirements**

**Prerequisites**
All currently matriculated graduate students at CU Boulder are eligible for admission to the certificate program. Students must submit a Statement of Interest which will be reviewed and approved by the Hip-hop Studies Directors, Rennie Harris and Larry Southall.

**Program Requirements**
To obtain this certificate, students will be required to complete eleven graduate-level credit hours:

- Two movement-based courses (4 credits)
- One community-based practicum (1 credit)
- Two elective courses that develop the critical thinking skills required for understanding Hip-hop’s impact and socio-historical development (6 credits)

This broad menu of options, which upholds both theoretical engagement and embodied practice with equal importance, will equip students with the skills necessary to engage with Hip-hop as praxis.

Courses will be offered on a regular basis in the departments of Theatre & Dance, Ethnic Studies and English. Additionally, other departments may offer courses that are relevant to the certificate. Students may petition to have these and other Special Topics courses approved by their Hip-hop Studies advisor.

In order to earn the certificate, students must earn a grade of B in each course and meet the graduate school’s overall GPA requirement.

11

1 Students may petition their Hip-hop Studies advisor to have other courses approved. All courses for the certificate must be graduate level (5000 or above). Independent Study is not accepted.

**Applied Shakespeare - Graduate Certificate**

By participating in this unique, cross-disciplinary graduate certificate program that combines courses from the Department of Theatre & Dance and the Department of English, students get to know the Bard and his plays as never before.

Students experience a vital mix of performance and scholarship by taking two online-learning courses and then visiting campus for a one-week summer intensive during the Colorado Shakespeare Festival (CSF) to learn from the nationally recognized CSF company members and CU faculty in small experiential groups.

The summer intensive includes acting, directing, stage combat, Elizabethan culture, rehearsal visits, play attendance, classes on how to teach Shakespeare and more. The certificate requirements conclude with a final capstone project. For more information, visit the program page. (https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/certificate-programs/applied-shakespeare/)

**Total Credit Hours**

12

Within one month of completing the two-week summer intensive, students must submit their final paper.

**Women and Gender Studies**

The graduate certificate in Women and Gender Studies offers CU Boulder graduate students a cutting-edge, interdisciplinary education in gender and sexuality studies. It provides a thorough grounding in feminist theories, queer theories, and/or feminist methodology, as well as the opportunity to explore diverse special topics in gender and sexuality studies. The graduate certificate is designed to train graduate students from a wide range of CU Boulder departments and programs to conduct interdisciplinary research in gender and sexuality studies. On a practical level, the certificate has proven especially useful to graduate students seeking to demonstrate their expertise in gender and sexuality studies to prospective employers in academia, government and the private sector.
Course code for this program is WGST.

Certificate

- Women and Gender Studies - Graduate Certificate (p. 1352)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

WGST 5001 (3) Advanced Topics in Gender and Sexuality Studies (AH)
Provides and advanced interdisciplinary course organized around a specific issue in the arts and humanities relating to gender and sexuality.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4001
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 5002 (3) Advanced Topics in Gender and Sexuality Studies (SS)
Provides an advanced interdisciplinary course organized around a specific issue in the arts and humanities relating to gender and sexuality.
Equivalent - Duplicate Degree Credit Not Granted: WGST 5002
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 5200 (3) Religion and Reproductive Politics in the United States
Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4200, JWST 4200, JWST 5200

WGST 5400 (3) Critical Inquiries in Transgender Studies
Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.
Equivalent - Duplicate Degree Credit Not Granted: WGST 4400 and LGBT 4400 and LGBT 5400
Grading Basis: Letter Grade
Additional Information: Departmental Category: LGBT Studies

WGST 6090 (3) Feminist Theories
Explores how feminist theorists have understood gender and how it interrelates to our understandings of race, ethnicity, sexuality, embodiment and knowledge. Meets the requirements for the WGST certificate.
Requisites: Restricted to graduate students only.

WGST 6190 (3) Feminist Methodology
Explores feminist methodology across a range of disciplines. Themes include experience and interpretation, the social position of the researcher, language and argument structure, knowledge and power, bias and objectivity, and the ethics and politics of research. Meets the requirements for the WGST certificate.
Requisites: Restricted to graduate students only.

WGST 6290 (3) Special Topics in Gender and Sexuality Studies
Offers interdisciplinary feminist perspectives on different special topics such as gender and war, gender and globalization, women's social movements, gender and citizenship, gender and collective memory, and cultural representations of gender and sexuality. Meets the requirements for the WGST certificate.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

WGST 6796 (3) Queer Theories
Explores key concepts and debates in the field of queer theory with an interdisciplinary focus on crosscutting issues (aesthetic, cultural, legal, medical, political and social) that shape queer subjectivities, practices and relations.
Requisites: Restricted to graduate students only.
Women and Gender Studies - Graduate Certificate

The graduate certificate in women and gender studies is designed to complement a CU Boulder graduate disciplinary degree program—providing graduate students the opportunity to engage a variety of scholarly and methodological approaches to the study of gender and sexuality.

Students wishing to take part in the women and gender studies certificate program must be currently enrolled in a graduate disciplinary degree or professional degree program at CU Boulder. Students are encouraged to apply for the graduate certificate early in their course of graduate studies; students enrolled in the program will get priority if placed on a waitlist for a graduate-level women and gender studies course.

Requirements

Students must complete 9 credit hours of coursework in women and gender studies and one additional 3 credit hour course to be approved by the women and gender studies graduate director, for a total of 12 credit hours.

The minimum acceptable grade for courses submitted for the graduate certificate is a B. Minimum GPA for all courses submitted for the graduate certificate is a cumulative 3.5.

None of the three required women and gender studies courses may be taken as independent study.

Requisites:

- Restricted to graduate students only.
- Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
- Approval agreement form completed by the student and signed by the faculty advisor.

Independent study courses taken with faculty not affiliated with the Department of Women and Gender Studies will not count for the graduate certificate. Independent study courses taken with department faculty members may count only in exceptional circumstances as determined by the graduate committee.

For more details, including application instructions, visit the WGST Graduate Certificate [webpage](http://www.colorado.edu/wgst/graduates/) or email us at wgst@colorado.edu.

Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Undergraduate students can specialize in accounting, finance, management and entrepreneurship, business analytics, marketing, and real estate. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the Wall St. Journal, the New York Times, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.
Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Graduation Recognition Ceremony
Every May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

Facilities & Research
The Leeds School of Business houses resources for the specific needs of business students:

- Burridge Center for Finance
- Business Research Division
- Career Strategy
- Center for Education on Social Responsibility
- Center for Research on Consumer Financial Decision Making
- Office of Diversity Affairs
- Real Estate Center
- Robert H. and Beverly A. Deming Center for Entrepreneurship
- Smart classrooms
- Student lounges
- Undergraduate Student Services
- Graduate Student Services
- William M. White Business Library and Information Commons

The William M. White Business Library and Information Commons
The White Business Library (http://www.colorado.edu/libraries/libraries/william-m-white-business-library/) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (https://vems1.colorado.edu/).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus “smart” classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

Business Research Division
Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado’s resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the Leeds Business Confidence Index. Research results are distributed through presentations and reports; a quarterly newsletter, the Colorado Business Review; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm’s competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to $75,000 in grant funds and 50/50 cost sharing for strategic projects.

Academic Centers
In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burridge Center for Finance, the Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

The Robert H. and Beverly A. Deming Center for Entrepreneurship
As part of the Leeds School of Business, the Deming Center for Entrepreneurship’s mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

Cutting-Edge Curriculum
Our progressive curriculum and interdisciplinary programs include:
The Deming Center supports the entrepreneurial curriculum and advances the Leeds School’s leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education.** Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting, curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.

- **Real-world experience.** Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students with projects, advisors and internships that challenge them to use their new skills creatively.

- **Student experience.** Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.

- **The community.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs.

**CU Real Estate Center**

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school’s real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Coursework is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project coursework and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

**Burridge Center for Finance**

The Burridge Center for Finance is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public,
- identifying critical research issues in the theory and practice of security analysis and valuation, and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

**Center for Ethics and Social Responsibility (CESR)**

CESR’s goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school’s commitment to developing leaders of conscience. Although the Center’s primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations, conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

**Courses**

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite business core courses; Business Law and Business Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4850, and CESR 4828.

**Certificate and Graduate Pathways**

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the certificate in social responsibility and ethics (p. 651) (SRE). At the MBA level, MBAs can participate in CESR-designed co-curricular pathways in Natural & Organics, Clean Energy, and ESG Integration and Sustainability.

**CESR Co-Curricular Activities**

- **CESR Stampede at Leeds: A Week of Driving Values in Business.** This weeklong event showcases the values-driven and innovative curriculum developed by the CESR that is shaping tomorrow’s business leaders. Through class visits, expert panels and lectures student competitions and showcases, attendees will explore their own values and network with like-minded professionals about applying positive values in a business setting. Stampede Week also includes the fourth annual Conscious Capitalism Conference, a CESR flagship event.

CESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:
The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

**Programs & Leadership**

**Professional Mentorship Program**

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program’s mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and mentors, the PMP provides workshops, training and additional support for participants throughout the program.

**Program Benefits**

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- advice and assistance on academic questions, career options, life beyond college and more,
- access to the PMP network and networking opportunities and the opportunity to start building the student’s own professional network,
- opportunities to practice and strengthen professional communication and presentation skills,
- help in defining personal and professional goals, and the strategies to achieve them,
- unique internship and job opportunities, and
- development of a life-long friend and connection in the business world.

**Contact Information**

Email: leedsmpm@colorado.edu
Office: Koelbel 201
Phone: 303-492-5881

**Study Abroad**

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

**Student Organizations**

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:
Leeds School of Business graduates are prepared for positions in the
following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management

Other graduates hold positions in fields as diverse as business
journalism, public relations, city planning, chamber of commerce and
trade association management, college administration and government.
The entrepreneurial area of application prepares students to start their
own business ventures to take positions in emerging growth companies
and the venture capital industry.

Programs of Study

The new innovation economy requires—and rewards—richer knowledge,
sharper skills and a global mindset. Ultimately, the edge belongs to those
who are principled leaders who bring inspiration and purpose to their
work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative
agenda designed to leverage our unique assets: the intellectual capital
of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and
industry partners and our firm commitment to student support.

World-class faculty provide the foundation for breakthrough thinking—
creating knowledge from research, disseminating knowledge through
teaching and applying knowledge in collaboration with the business
community. Faculty discoveries are frequently published in prestigious
academic journals and discussed in media outlets such as the Wall St.
Journal, the New York Times, CNBC and more. The cutting-edge research
we produce enhances the school’s reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students
to discover and optimize their potential. Through an array of targeted
services, students create an individualized journey that maximizes the
impact of their experience and leads to future opportunities. Ethics and
social responsibility are hallmarks of a Leeds education, and the school’s

Senior Instructor; MS, Colorado State University

Montealegre, Jose Ramiro (https://experts.colorado.edu/display/fisid_100072/)
Professor, DBA, Harvard University

Moon, Katie Seoyeon (https://experts.colorado.edu/display/fisid_157680/)
Assistant Professor; PhD, University of Maryland

Morley, Susan (https://experts.colorado.edu/display/fisid_116716/)
Senior Instructor; JD, University of Colorado Boulder

Moyen, Nathalie (https://experts.colorado.edu/display/fisid_113873/)
Professor, Chair, PhD, University of British Columbia (Canada)

Mueller, Erick Michael (https://experts.colorado.edu/display/fisid_140940/)
Senior Instructor, Faculty Director; MBA, University of Colorado Boulder

Mukhopadhyay, Tathagat (https://experts.colorado.edu/display/fisid_159337/)
Assistant Professor; PhD, London Business School (England)

Munter, Paul
Senior Instructor; PhD, University of Colorado Boulder

Neil, Josh (https://experts.colorado.edu/display/fisid_152068/)
Senior Instructor, Faculty Director; MS, Oklahoma State University

Nelson, James E.
Professor Emeritus

Nelson, Thomas Cavett (https://experts.colorado.edu/display/fisid_116011/)
Senior Instructor; PhD, University of Colorado Boulder

Nunziato, Joshua (https://experts.colorado.edu/display/fisid_164373/)
Instructor; PhD, Villanova University

Oest, Donald G. (https://experts.colorado.edu/display/fisid_146623/)
Senior Instructor; MBA, Fairleigh Dickinson University

Palmer, Michael
Professor Emeritus

Papuzza, Antonio (https://experts.colorado.edu/display/fisid_145295/)
Senior Instructor; PhD, University of Florence (Italy)

Packer, Richard C. (https://experts.colorado.edu/display/fisid_166139/)
Lecturer

Parkin, Don
Professor Emeritus

Purmehdi, Mostafa (https://experts.colorado.edu/display/fisid_158906/)
Instructor; PhD, University of Montreal (Canada)

Ravishankar, G. Ravi (https://experts.colorado.edu/display/fisid_144567/)
Scholar in Residence, Faculty Director; MBA, Massachusetts Institute of Technology

Reinholtz, Nicholas S. (https://experts.colorado.edu/display/fisid_155180/)
Assistant Professor; PhD, Columbia University

Reuer, Jeffrey J. (https://experts.colorado.edu/display/fisid_155768/)
Professor, Endowed Chair; PhD, Purdue University

Reznicek, Birdie C. (https://experts.colorado.edu/display/fisid_149091/)
Instructor, Associate Chair; MBA, Northwestern University

Richey, Clyde W.
Professor Emeritus

Ringgenberg, Ralph G.
Professor Emeritus

Rock, Steven Karl (https://experts.colorado.edu/display/fisid_113689/)
Associate Professor, Chair; PhD, Pennsylvania State University

Rogers, Timothy (https://experts.colorado.edu/display/fisid_155460/)
Instructor; PhD, University of California, Santa Cruz

Rogers, Jonathan Lawrence (https://experts.colorado.edu/display/fisid_153009/)
Professor, Endowed/Named Professor; PhD, University of Pennsylvania

Rosse, Joseph G.
Professor Emeritus: Leeds School of Business

Schattke, Rudolph
Professor Emeritus

Schaub, Kevin D. (https://experts.colorado.edu/display/fisid_144142/)
Senior Instructor, Faculty Director; MBA, University of Colorado Boulder

Schonberger, Bryce (https://experts.colorado.edu/display/fisid_167332/)
Assistant Professor; PhD, University of Southern California

Sears, Curtis R. (https://experts.colorado.edu/display/fisid_145482/)
Senior Instructor, Faculty Fellow, Endowed/Named Professor; JD, University of Colorado Boulder

Selto, Frank
Professor Emeritus

Seward, Lori Elizabeth (https://experts.colorado.edu/display/fisid_113934/)
Senior Instructor, Faculty Director; PhD, Virginia Polytechnic Institute and State University

Shriver, Scott Kennedy (https://experts.colorado.edu/display/fisid_158937/)
Assistant Professor; PhD, Stanford University
Shukri, Salma Tariq (https://experts.colorado.edu/display/fisid_158219/)
Instructor; PhD, University of Denver

Smith, Julie Scher (https://experts.colorado.edu/display/fisid_166064/)
Instructor; MBA, University of Chicago

Sorenson, Ralph Z.
Professor Emeritus

Senior Instructor; PhD, University of Arizona

Stutzer, Michael J. (https://experts.colorado.edu/display/fisid_126711/)
Professor; PhD, University of Minnesota Twin Cities

Swisher, Kristin Joy (https://experts.colorado.edu/display/fisid_156510/)
Instructor; MA, Central Missouri State University

Taylor, Robert H.
Professor Emeritus

Taylor, Stephen John (https://experts.colorado.edu/display/fisid_156918/)
Lecturer

Thibodeau, Thomas G. (https://experts.colorado.edu/display/fisid_134750/)
Professor, Faculty Director; PhD, SUNY at Stony Brook

Tice, Frances M. (https://experts.colorado.edu/display/fisid_156018/)
Assistant Professor; PhD, Texas A&M University

Tong, Wenfeng (https://experts.colorado.edu/display/fisid_144520/)
Professor, Chair; PhD, The Ohio State University

Tracy, John A.
Professor Emeritus

Urrea, Gloria (https://experts.colorado.edu/display/fisid_165311/)
Assistant Professor; PhD, Università della Svizzera italiana, Switzerland

Van Wesep, Edward D. (https://experts.colorado.edu/display/fisid_154573/)
Associate Professor; PhD, Stanford University

Vargo, Christopher (https://experts.colorado.edu/display/fisid_158320/)
Associate Professor; PhD, University of North Carolina

Volpone, Sabrina D. (https://experts.colorado.edu/display/fisid_158941/)
Associate Professor; PhD, Temple University

Vossen, Thomas Wilhelmus (https://experts.colorado.edu/display/fisid_126642/)
Associate Professor; PhD, University of Maryland, College Park

Waddell, Jay L. (https://experts.colorado.edu/display/fisid_151520/)
Instructor; MS, University of Wisconsin–Madison

Wang, Clare (https://experts.colorado.edu/display/fisid_165260/)
Associate Professor, Faculty Director; PhD, University of Pennsylvania, The Wharton School

Wang, Yanwen
Assistant Professor; PhD, Emory University

Wang, Zhiyi (https://experts.colorado.edu/display/fisid_167339/)
Assistant Professor; PhD, National University of Singapore (Singapore)

Waters, Brian Todd (https://experts.colorado.edu/display/fisid_155846/)
Assistant Professor; PhD, University of California, Los Angeles

Wenger, Paula (https://experts.colorado.edu/display/fisid_113621/)
Senior Instructor; MA, Miami University–Oxford

Werner, Walter Bradley (https://experts.colorado.edu/display/fisid_158225/)
Instructor, Faculty Director; MBA, University of Chicago

Williams, Lawrence Edwin Jr. (https://experts.colorado.edu/display/fisid_145743/)
Associate Professor; PhD, Yale University

Winn, Daryl
Professor Emeritus

Wobbekind, Richard (https://experts.colorado.edu/display/fisid_100997/)
Associate Dean, Lecturer; PhD, University of Colorado Boulder

Yao, Xin
Assistant Professor; PhD, University of Washington

Yilmaz, Ovunc (https://experts.colorado.edu/display/fisid_167064/)
Assistant Professor; PhD, University of South Carolina - Colombia

York, Jeffrey Glenn (https://experts.colorado.edu/display/fisid_148387/)
Associate Professor, Chair, Faculty Director; PhD, University of Virginia

Zechman, Sarah Louise Center (https://experts.colorado.edu/display/fisid_156016/)
Professor, Chair, Faculty Fellow; PhD, University of Pennsylvania

Zender, Jaime (https://experts.colorado.edu/display/fisid_122563/)
Professor, Endowed/Named Professor, Chair; PhD, Yale University

Zhang, Dan (https://experts.colorado.edu/display/fisid_149619/)
Professor, Faculty Director; PhD, University of Minnesota Twin Cities

Zhang, Huanan (https://experts.colorado.edu/display/fisid_167063/)
Assistant Professor; PhD, University of Michigan Ann Arbor

Zhang, Rui (https://experts.colorado.edu/display/fisid_157866/)
Assistant Professor; PhD, University of Maryland
Courses
For business administration (BADM) courses, see the Business Administration (p. 1386) section.

Accounting

ACCT 5100 (3) Oil and Gas Accounting
This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.

Recommended: ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

Grading Basis: Letter Grade

ACCT 5120 (3) Business Analytics
Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

Requisites: Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students

Grading Basis: Letter Grade

ACCT 5240 (3) Advanced Financial Accounting
Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis
Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5450 (3) Income Taxation of Business Entities
Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems
Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting
Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACTX or C-FNCEACCT or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5570 (3) International Accounting
Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5580 (3) Topics in Business
Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies
Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX
ACCT 6000 (1-3) Academic Internship in Accounting
Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students’ studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.
Repeatability: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACTX

ACCT 6220 (3) Corporate Financial Reporting
Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700
Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis
Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710
Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting
Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.
Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6290 (3) Textual Analysis in Business
This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/ focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290
Recommended: restricted to ACCT-MS and ACTX-MS students.
Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics
Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.
Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation
Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing.
Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACXT or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships
Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167
Requisites: Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACXT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations
Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157
Requisites: Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis
Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.
Requisites: Requires a prereq course of ACCT 5620 (min grade C). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation
Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6710 (3) Federal Estate and Gift Tax
Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207
Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning
Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217
Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.
ACCT 6780 (3) US International Taxation
This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7617
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.
Recommended: Prerequisite ACCT 5450.
Grading Basis: Letter Grade

ACCT 6900 (1-6) Independent Study
Prior department consent required of instructor under whose direction study is taken. Departmental form required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6940 (1-6) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 6950 (1-4) Master's Thesis
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research
Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I
Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets II
Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research
Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory
Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low bailing. Describes implications of analytical results for primarily economics-based empirical research designs.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research
Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar
Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies
Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study
Instructor consent required and departmental form (taught as doctoral seminar).
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation
Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

Business Environment & Policy
BPOL 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

BPOL 6950 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.

BPOL 7500 (3) Doctoral Seminar: Strategic Management I
Provides an overview of the literature, including classic articles and books, in business strategy and policy (strategic management). Brings the student up to date on schools of thought, research issues, and practical applications in strategic management.
Repeatable: Repeatable for up to 6.00 total credit hours.

BPOL 7530 (3) Doctoral Seminar: Strategic Management II
Continuation of BPOL 7500.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of BPOL 7500 (minimum grade D-). Restricted to Business Administration (BUAD) graduate students only.

BPOL 7560 (3) Entrepreneurship, International Business and Technology Management
Provides doctoral students with an understanding of strategic management and entrepreneurship theory, as applied to international business and technology management literatures. Additionally, students are exposed to research methods in the strategy and entrepreneurship arenas.
Requisites: Requires prerequisite courses of BPOL 7500 and BPOL 7530 (all minimum grade D-).

BPOL 8900 (1-3) Independent Study
Requires consent of instructor under whose direction study is taken. Departmental form required.
MBAC 6001 (1.5) Foundations of Teamwork
Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees' and colleagues'.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
Grading Basis: Letter Grade

MBAC 6002 (3) Social, Moral and Economic Foundations for Business
Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
Grading Basis: Letter Grade

MBAC 6003 (1.5) Foundations of Leadership
Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAC 6004 (1.5) Social, Moral and Economic Foundations for Business
Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAC 6010 (3) Managerial Economics
Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6011 (1.5) Managerial Economics 1
Studies the elements of the business firm’s fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6012 (1.5) Managerial Economics 2
Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6020 (3) Financial Accounting
Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Additional Information: Departmental Category: MBA: Core Courses
MBAC 6031 (1.5) Quantitative Methods 1
Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6032 (1.5) Quantitative Methods 2
Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAC 6050 (3) Strategy
Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade

MBAC 6051 (3) Operations Management
Develops an understanding of processes and the alignment of a process with the organization's operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers C-suite-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAC 6052 (3) Capstone Projects
Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAC 6060 (3) Corporate Finance
Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6080 (3) Decision Modeling and Applications
Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6081 (3) Data and Decisions
Empowers need managers who can integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAC 6090 (3) Marketing Management
Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6096 (1.5) Managerial Communications
Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
Grading Basis: Letter Grade
MBAC 6098 (1) Professional Development I
Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6099 (1.5) Professional Development II
Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) majors only.
**Additional Information:** Departmental Category: MBA: Core Courses

MBA Advanced Electives

**MBAX 6000 (3) Socially Responsible Enterprise**
Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), or Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade

**MBAX 6097 (1.5) Professional Development Internship I**
Experiential compliment to MBAC 6098 to focus on Professional Presentation, Network Development, and/or Executive Exposure.
**Requisites:** Restricted to Master of Business Admin (MBAD) or MBA with Dual Degree programs. Minimum of 27 credit hours required.
**Grading Basis:** Letter Grade

**MBAX 6100 (1.5) Entrepreneurship**
Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.
**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6101 (1.5) Entrepreneurship**
Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their “fit” with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.
**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6110 (3) Entrepreneurial Finance**
Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.
**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6111 (2) Entrepreneurial Finance**
Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.
**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6130 (3) Sustainable Venturing**
Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6140 (3) Social Entrepreneurship in the US and Global Economies**
Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.
**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Recommended:** Prerequisite MBAX 6170.
**Additional Information:** Departmental Category: MBA: Social Responsibility
**MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies**
Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying adolescent firms that are past the initial start-up stage but haven’t evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (J MBA) or Professional MBA Program (PMBA) majors only.

**MBAX 6170 (1.5) New Venture Creation**
This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (J MBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6171 (1.5) New Venture Creation**
This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

**Requisites:** Requires prerequisite courses of MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6180 (3) New Venture Launch**
Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (J MBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6190 (3) Projects in Entrepreneurial Companies**
Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.

**Requisites:** Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (J MBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite completion of MBAX 6111 is strongly recommended prior to enrolling in MBAX 6190.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6195 (1-3) Special Topics in Entrepreneurship**
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (J MBA) or Professional MBA Program (PMBA) majors only.

**MBAX 6210 (3) Applied Financial Management**
Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (J MBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6211 (3) Applied Financial Management**
Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

**Requisites:** Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6220 (3) Investment Management and Analysis**
Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (J MBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance
MBAX 6221 (1.5-3) Investment Management & Analysis
Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.
Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6230 (3) International Financial Management
Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.
Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6250 (3) Derivative Securities
Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
Recommended: Prerequisite for MBAD students, prerequisite course of MBAC 6060; for FNCE-MS majors, prerequisite MSBC 5060 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6260 (3) Fixed Income Investing
Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.
Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6270 (3) Applied Derivatives
Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counterparty risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
Grading Basis: Letter Grade

MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar 1
First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.
Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6280 (1-2) Entrepreneurship Valuation and Investment Seminar 2
Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.
Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Recommended: Prerequisite MBAX 6280.

MBAX 6282 (1) Entrepreneurship Valuation and Investment Seminar 3
Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.
Requisites: Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6280 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6295 (1.5-3) Topics in Finance
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
Grading Basis: Letter Grade
MBAX 6300 (3) Marketing Communication
Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students’ understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.
Requisites: Requires prerequisite course of MBAC 6090 (min grade D-).
Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.
Additional Information: Departmental Category: MBA: Marketing

MBAX 6301 (3) Marketing Communications
Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students’ understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.
Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Marketing

MBAX 6310 (3) Marketing Strategy
Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today’s highly competitive and rapidly changing business environment.
Requisites: Requires prerequisite course of MBAC 6090 (min grade D-).
Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Marketing

MBAX 6311 (3) Marketing Strategy
Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Marketing

MBAX 6330 (3) Market Intelligence
Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.
Requisites: Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6331 (3) Market Intelligence
Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today’s highly competitive and rapidly changing business environment.
Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6340 (1.5) Marketing Field Project
Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.
Additional Information: Departmental Category: MBA: Marketing

MBAX 6350 (3) Digital Marketing
Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.
Requisites: Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance
MBAX 6351 (3) Digital Marketing
Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

MBAX 6360 (3) New Product Development
Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

MBAX 6361 (1.5) New Product Development
Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

MBAX 6365 (3) Practical Product Management
This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry
Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

MBAX 6370 (2-3) Customer Analytics
Provides a deep understanding of customer centricity and its implications for the firm, state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

MBAX 6372 (1.5) Professional Selling and Sales Management
The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individual professional sellers and the organizations that employ them.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design
Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

**Requisites:** Requires prerequisite course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade
MBAX 6381 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design
Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6395 (1-3) Special Topics in Marketing
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6410 (3) Process Analytics
Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) or Business Analytics (BUAN) majors or SCAG-CERG students only.
Grading Basis: Letter Grade

MBAX 6420 (3) IT and Business Strategy
Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

Requisites: Requires prerequisite courses MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6421 (3) IT & Business Strategy
Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

Requisites: Requires prerequisite courses MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6440 (3) Project Management
Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade

MBAX 6441 (3) Project Management
Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute.

Requisites: Restricted to Professional MBA Program (PMBA) majors with 12 credit hours completed.
Grading Basis: Letter Grade

MBAX 6450 (3) International Operations Management
Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management
MBAX 6451 (3) International Business and Strategy
Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including global trade practices; legal and political issues; US trade laws; finance and accounting risks; global supply chain management, cultural challenges; global marketing, and global strategies. Upon completing of the course, you will have a broad foundational understanding of important contemporary issues and challenges of international business.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6460 (3) Supply Chain Management
Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Recommended: Prerequisite MBAC 6080.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Systems

MBAX 6500 (3) Management of Organizational Change
Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6530 (3) Negotiating and Conflict Management
Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6540 (3) Consulting Skills
Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6550 (3) Management of Technology and Innovation
Examines a variety of issues common to management of technology such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6560 (1.5) Executive Leadership
Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6561 (1.5) Executive Leadership
Examines a variety of issues common to management of technology such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6565 (1.5) Inclusive Leadership
This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 26% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population is Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.
Grading Basis: Letter Grade
MBAX 6570 (3) Topics in Sustainable Business
Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.

**Requisites:** Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Social Responsibility

---

MBAX 6595 (1-3) Special Topics in Organizational Behavior
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

---

MBAX 6600 (3) Real Estate Principles
Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

**Requisites:** Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

---

MBAX 6610 (3) Real Estate Finance and Investment Analysis
Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

---

MBAX 6620 (3) Real Estate Project Competition
Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

**Requisites:** Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Prof MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

---

MBAX 6630 (3) Real Estate Economics
Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset.

**Requisites:** Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

---

MBAX 6640 (3) Real Estate Law and Practice
Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

**Requisites:** Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Prof MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

---

MBAX 6650 (3) Real Estate Case Studies
Course will require students to analyze numerous actual real estate investment opportunities. Cases developed for the course will span analyses of various end uses (e.g. apartments, condominiums, office, retail, mixed use, industrial, and hotel) and include examples from investing in existing properties, substantial rehabilitations, and new construction projects. Will include examples from international real estate investment opportunities. Some cases may require students to evaluate the role that technology plays in the real estate industry.

**Requisites:** Requires prerequisite of MBAX 6630 or 6640 and MBAX 6610 or MSBC 5610 (all minimum grade D-). Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

**Grading Basis:** Letter Grade
MBAX 6695 (1-3) Special Topics in Real Estate
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

MBAX 6700 (3) Corporate Financial Reporting
Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6220

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6710 (3) Financial Statement Analysis
Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6250

Requisites: Requires prerequisite course of MBAC 6020 or MSBC 5020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6761 (2) Managerial Accounting, Planning and Control
Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Accounting

MBAX 6801 (3) Global Perspectives Seminar
Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6802 (3) Pricing Strategy and Tactics
Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6806 (1.5-3) Global Perspectives
Contrasting operations in US and a country or region outside the United States, students will study what changes US companies have made to successfully operate in foreign markets and how US companies have influenced foreign business operations. Reviews the history and present state of the interdependency between the domestic and international business environments. Culminates in a week-long trip to the country/region of study. Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

MBAX 6815 (3) Sustainable Real Estate
Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies
Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5827

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
MBAX 6841 (2) Decision Making for Managers
Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6843 (3) Supply Chain and Operations Analytics
Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

Requisites: Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) Profl MBA Prog (PMBA), Business Analytics (BUAN) or Supply Chain Mgmt (SCMN) majors or SCAG-CERG students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Operations and Production Management

MBAX 6846 (2) Global Strategy
The ability to compete effectively globally is increasingly important for many firms. Topics such as globalization and the competitive environment, key differences in institutions around the globe and their implications; how firms can succeed internationally (e.g., different entry strategies, how to manage across country borders, the firm’s broader responsibility in the global community) will be discussed.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6847 (2) Emerging Markets in Global Business
Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6885 (3) Interpreting the Economic Environment
The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6930 (3) Commercializing Sustainable Energy Technologies
Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5005
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6966 (1-3) Independent Study-Real Estate
Independent study in the field of real estate.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Additional Information: Departmental Category: MBA: Real Estate

MS Business Core

MSBC 5015 (1.5) Managerial Economics
Studies the elements of the business firm's fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Core

MSBC 5020 (1.5) Financial Accounting
Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Core
MSBC 5031 (3) Quantitative Methods in Finance
Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.
Grading Basis: Letter Grade

MSBC 5032 (3) Real Estate Data Analysis
Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.
Requisites: Restricted to REAL-MS students only.
Grading Basis: Letter Grade

MSBC 5060 (3) Corporate Finance
Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.
Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.
Grading Basis: Letter Grade

MSBC 5070 (3) Survey of Business Analytics
Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding; it will introduce and subsequently involve extensive use of Python.
Requisites: Restricted to MS Business Analytics (BUAN-MS) majors and MKAG-CERG students only.
Grading Basis: Letter Grade

MSBC 5180 (3) Machine Learning in Python
This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.
Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade

MSBC 5220 (3) Investment Management & Analysis
Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.
Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.
Grading Basis: Letter Grade

MSBC 5460 (3) Supply Chain Strategy
Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.
Requisites: Restricted to Supply Chain Management (SCMN) majors only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5480 (3) SCMN Experiential Projects
Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Supply Chain Management (SCMN) majors only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5490 (3) BUAN Experiential Projects
Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.
Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5600 (1.5) Real Estate Principles
The objective of the course is to provide students with the foundational terms, concepts, and principles fundamental to real estate. The content is divided into five sections, each section covering a different aspect of real estate including its legal foundations, types of real estate, contracts and leases, real estate mortgage loans, and valuation and investment. The course is largely lecture and conversational in format.
Requisites: Restricted to REAL-MS students only.
Grading Basis: Letter Grade

MSBC 5610 (3) Real Estate Finance and Investment
Topics include 1) conducting income property investment analysis; 2) developing the technical competence necessary to structure real estate transactions; and 3) understanding the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.
Requisites: Restricted to REAL-MS students only.
Grading Basis: Letter Grade

MSBC 5680 (3) Optimization Modeling
Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade
**MS Business Electives**

**MSBX 5080 (3) Decision Modeling and Applications**
Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**MSBX 5205 (3) Financial Strategy and Decision Modeling**
Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.

**Requisites:** Restricted to Finance (FINCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5225 (3) Advanced Portfolio Management**
Covers the management and construction of investment portfolios. Topics include performance and risk measurements, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

**Requisites:** Restricted to Master of Finance (FINCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5260 (3) Fixed Income Investing**
Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

**Requisites:** Restricted to Master of Finance (FINCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5270 (3) Applied Derivatives**
Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counterparty risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FINCE-MS) majors only.

**Grading Basis:** Letter Grade

**MSBX 5310 (3) Customer Analytics**
Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.

**Requisites:** Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5311 (2) Customer Analytics**
Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MSBX 5405 (3) Structured Data Modeling and Analysis**
Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5410 (3) Fundamentals of Data Analytics**
Explores the technical and functional environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5410 (3) Fundamentals of Data Analytics**
Explores the technical and functional environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives
MSBX 5415 (3) Advanced Data Analytics
Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (D MBA), Joint Juris Doctor/MBA (J MBA), Professional MBA (P MBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Electives

MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis
Moves the student beyond structured data and sources into business scenarios where data is semi-structured or unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.
Requisites: Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (D MBA), Joint Juris Doctor/MBA (J MBA), Profi MBA Program (P MBA) Supply Chain Mgmt (SCMN) or Business Analytics (BUAN) or BAMG-CERG mjrs onl
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Electives

MSBX 5425 (3) Natural Language Processing for the Health Sciences
Practitioners of natural language processing (NLP) use methods from math, science, engineering and linguistics to teach computers to understand human language. Because much biomedical information is stored as text, there are many possible applications of NLP in health sciences. This course offers an introduction to NLP for the health sciences. Students will gain a conceptual and hands-on introduction to fundamental tools, concepts and problems from NLP by exploring applications in healthcare, population health and biomedicine.
Requisites: Requires prerequisite courses of MSBC 5070 and MSBC 5180 (minimum grade D-).
Recommended: Prerequisite Python 3.
Grading Basis: Letter Grade

MSBX 5430 (3) Advanced Statistical Analysis
Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (D MBA), Joint Juris Doctor/MBA (J MBA), Professional MBA Program (P MBA) or MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Electives

MSBX 5435 (3) Planning and Production
At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/ process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (D MBA), Joint Juris Doctor/MBA (J MBA), Professional MBA Program (P MBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.
Additional Information: Departmental Category: MS: Business Electives

MSBX 5440 (3) Decision Analysis
Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (D MBA), Joint Juris Doctor/MBA (J MBA), Professional MBA Program (P MBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Electives

MSBX 5450 (3) Transportation and Logistics
Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (D MBA), Joint Juris Doctor/MBA (J MBA), Professional MBA Program (P MBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Electives

MSBX 5470 (3) Procurement and Contracting
Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (D MBA), Joint Juris Doctor/MBA (J MBA), Professional MBA Program (P MBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Electives
MSBX 5480 (3) Information Security Management
A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

Grading Basis: Letter Grade

MSBX 5500 (3) Security Analytics with Python and Machine Learning
Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA). Profi MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.

Requisites: Requires prerequisite course of MSBX 5480 (minimum grade D-). Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (ITP) majors only.

Grading Basis: Letter Grade

MSBX 5605 (3) Real Estate Investment and Risk Management
Examines strategies for mitigating the legal, property and portfolio risks associated with income properties. The course begins by examining risks created by leases. The course then analyzes the risks associated with a single property and examines how risk changes with portfolios containing multiple properties. Finally, the course examines how to optimally incorporate investment properties in mixed asset portfolios.

Requisites: Requires prerequisite course MBAX 5610 or MSBC 5610 (minimum grade D-). Restricted to Master’s students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Grading Basis: Letter Grade

MSBX 5680 (3) Real Estate Technology
Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

Requisites: Restricted to Master’s students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

MSBX 6290 (3) Textual Analysis in Business
This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6290
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAC 6060 (minimum grade D-).

Grading Basis: Letter Grade

Business Administration
The Leeds School of Business holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International). The Leeds School of Business offers programs leading to the following degrees:

- Master of Business Administration (MBA)
  - Full-time, traditional program
  - Part-time programs for working professionals (Evening MBA, Hybrid MBA)
- Master of Science (MS) in the following fields:
  - Accounting
  - Business Analytics
  - Finance
  - Real Estate
  - Supply Chain Management
  - Taxation
- Doctor of Philosophy (PhD)

These programs are open to qualified individuals who hold a bachelor’s degree from a regionally accredited college or university, or a recognized international university, without regard to their undergraduate major.

Dual degree options available in the full-time traditional MBA program include the following, contingent upon independent admission to both degree programs:

- MBA/JD (p. 1769)
- MBA/MD (https://medschool.cuanschutz.edu/education/md-admissions/about-cu-school-of-medicine/joint-degree-programs/)
Main Faculty

Banks, Cynthia (https://experts.colorado.edu/display/fisid_158245/)
Instructor, Faculty Director; MS, University of Colorado Denver

Beji, Xiaoshu (https://experts.colorado.edu/display/fisid_165170/)
Assistant Professor; PhD, Duke University

Bein, Jonathan Weber (https://experts.colorado.edu/display/fisid_155451/)
Scholar in Residence; PhD, University of Colorado Boulder

Bennett, Douglas P. (https://experts.colorado.edu/display/fisid_149983/)
Instructor; JD, George Washington University

Bercovitz, Janet (https://experts.colorado.edu/display/fisid_159339/)
Professor; PhD, University of California, Berkeley

Bernstein, Asaf (https://experts.colorado.edu/display/fisid_157738/)
Assistant Professor; BS, Harvey Mudd College

Bernthal, Wilmar F.
Professor Emeritus

Bhagat, Sanjai (https://experts.colorado.edu/display/fisid_100789/)
Professor; PhD, University of Washington

Biegen, Casey (https://experts.colorado.edu/display/fisid_166072/)
Instructor; MBA, University of Colorado Boulder

Billings, Stephen B. (https://experts.colorado.edu/display/fisid_157918/)
Associate Professor, Faculty Director; PhD, University of Colorado Boulder

Bondi, Salvatore (https://experts.colorado.edu/display/fisid_165936/)
Instructor; MS, University of Illinois at Urbana-Champaign

Bone, Jennifer Emerling (https://experts.colorado.edu/display/fisid_158206/)
Instructor, Associate Chair; PhD, University of Colorado Boulder

Boss, Russel Wayne (https://experts.colorado.edu/display/fisid_105260/)
Professor, Chair; PhD, University of Georgia

Brown, Daniel (https://experts.colorado.edu/display/fisid_152029/)
Senior Instructor, DPhil, Oxford University

Buchman, Thomas A. (https://experts.colorado.edu/display/fisid_101677/)
Professor Emeritus

Buffa, Andrea (https://experts.colorado.edu/display/fisid_167152/)
Assistant Professor; PhD, London Business School

Bumbaca, Frederico (https://experts.colorado.edu/display/fisid_163475/)
Assistant Professor; PhD, University of California, Irvine

Campbell, Kimberly D. (https://experts.colorado.edu/display/fisid_158160/)
Instructor; PhD, Howard University

Campbell, Margaret Catherine (https://experts.colorado.edu/display/fisid_118141/)
Professor, Associate Dean, Endowed/Named Professor; PhD, Stanford University

Junior Faculty

Ballantine, John T. Jr. (https://experts.colorado.edu/display/fisid_102703/)
Senior Instructor; JD, University of Colorado Boulder

Master's Degrees

- Business Administration - Master of Business Administration (MBA) (p. 1405)
- Accounting - Master of Science (MS) (p. 1412)
- Business Analytics - Master of Science (MS) (p. 1413)
- Finance - Master of Science (MS) (p. 1414)
- Real Estate - Master of Science (MS) (p. 1415)
- Supply Chain Management - Master of Science (MS) (p. 1416)
- Taxation - Master of Science (MS) (p. 1417)

Doctoral Degree

- Business Administration - Doctor of Philosophy (PhD) (p. 1411)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adams, Heather L. (https://experts.colorado.edu/display/fisid_143714/)
Associate Chair, Faculty Director; PhD, University of Maryland, College Park

Alston, Eric Christopher (https://experts.colorado.edu/display/fisid_158159/)
Scholar in Residence; JD, University of Chicago

André, Quentin (https://experts.colorado.edu/display/fisid_166737/)
Assistant Professor; PhD, INSEAD (France)

Appenzeller, William
Professor Emeritus

Auslander, Bonnie (https://experts.colorado.edu/display/fisid_158273/)
Instructor; MFA, University of Massachusetts

Balkin, David B. (https://experts.colorado.edu/display/fisid_105481/)
Professor; PhD, University of Minnesota Twin Cities

Zhang, Rui (https://experts.colorado.edu/display/fisid_157866/)
Assistant Professor; PhD, University of Maryland

Zhang, Xingtian (https://experts.colorado.edu/display/fisid_159295/)
Assistant Professor; PhD, University of Pennsylvania

Zikmund, Noah
Senior Instructor; MBA, University of Tulsa

Courses

**ACCT 5100 (3) Oil and Gas Accounting**
This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.

**Recommended:** ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

**ACCT 5120 (3) Business Analytics**
Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

**Requisites:** Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students

**Grading Basis:** Letter Grade

**ACCT 5240 (3) Advanced Financial Accounting**
Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4240

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5250 (3) Financial Statement Analysis**
Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4250

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5450 (3) Income Taxation of Business Entities**
Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5540 (3) Accounting Information Systems**
Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4540

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5550 (3) Data Analytics for Accounting**
Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

**Requisites:** Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

**ACCT 5560 (3) Auditing and Assurance Services**
Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4620

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5700 (3) International Accounting**
Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5820 (3) Topics in Business**
Offered irregularly to provide opportunity for investigation of new frontiers in accounting

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4820

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACCT 5827 (3)</td>
<td>Integrated Reporting for Socially Responsible Strategies</td>
<td>Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220. Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827 Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACTX</td>
</tr>
<tr>
<td>ACCT 6000 (1-3)</td>
<td>Academic Internship in Accounting</td>
<td>Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not pre-register for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required. Repeatable: Repeatable for up to 6.00 total credit hours. Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACTX</td>
</tr>
<tr>
<td>ACCT 6220 (3)</td>
<td>Corporate Financial Reporting</td>
<td>Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220. Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700 Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D).</td>
</tr>
<tr>
<td>ACCT 6250 (3)</td>
<td>Financial Statement Analysis</td>
<td>Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation. Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710 Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D).</td>
</tr>
<tr>
<td>ACCT 6260 (3)</td>
<td>Seminar: Managerial Accounting</td>
<td>Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications. Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D).</td>
</tr>
<tr>
<td>ACCT 6290 (3)</td>
<td>Textual Analysis in Business</td>
<td>This course will discuss basic ideas around natural language processing (NLP) in research in different &quot;dismal science&quot; disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C). Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290 Recommended: restricted to ACCT-MS and ACTX-MS students. Grading Basis: Letter Grade</td>
</tr>
<tr>
<td>ACCT 6350 (3)</td>
<td>Current Issues in Professional Accounting--Accounting Ethics</td>
<td>Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students. Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.</td>
</tr>
<tr>
<td>ACCT 6420 (3)</td>
<td>Research and Writing in Income Taxation</td>
<td>Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing. Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.</td>
</tr>
<tr>
<td>ACCT 6430 (3)</td>
<td>Taxation of Partnerships</td>
<td>Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation. Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167 Requisites: Requires prerequisite course of ACCT 5450 (minimum grade D). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.</td>
</tr>
<tr>
<td>ACCT 6450 (3)</td>
<td>Taxation of Corporations</td>
<td>Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation. Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157 Requisites: Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only.</td>
</tr>
<tr>
<td>ACCT 6620 (3)</td>
<td>Advanced Auditing: Business Risk and Decision Analysis</td>
<td>Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers. Requisites: Requires a prerequisite course of ACCT 5620 (minimum grade C). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.</td>
</tr>
<tr>
<td>ACCT 6700 (4)</td>
<td>Income Taxation</td>
<td>Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual. Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007 Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.</td>
</tr>
<tr>
<td>ACCT 6710 (3)</td>
<td>Federal Estate and Gift Tax</td>
<td>Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning. Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207 Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D.). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.</td>
</tr>
</tbody>
</table>
ACCT 6720 (2) Estate Planning
Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217
Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D.). Restricted to graduate students only.

ACCT 6780 (3) US International Taxation
This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7617
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.
Recommended: Prerequisite ACCT 5450.
Grading Basis: Letter Grade

ACCT 6900 (1-6) Independent Study
Prior department consent required of instructor under whose direction study is taken. Departmental form required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6940 (1-6) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 6950 (1-4) Master's Thesis
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research
Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I
Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets II
Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research
Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D.). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory
Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research
Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.
Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8820 (1-6) Graduate Seminar
Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies
Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study
Instructor consent required and departmental form (taught as doctoral seminar).
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation
Requisites: Restricted to Business (BUSN) graduate students only.

BADM 6202 (1.5) Principles of Finance
Focuses on the role of finance in small and large businesses. Topics covered include financial statement analysis, time value or money, bonds and stocks (both their markets and their valuation), capital budgeting analysis, and investor expectations regarding risk and return.
Requisites: Requires prerequisite course of BADM 6702 (minimum grade D).
Grading Basis: Letter Grade

BADM 6302 (1.5) Marketing Principles
Course imparts the core marketing toolkit important for success as a general business manager, including an understanding of the following critical principles of marketing: market exchange, strategic planning, market research, segmentation, targeting, positioning, and the marketing mix (design of product, place, promotion, and price to create exchanges).
Grading Basis: Letter Grade
BADM 6502 (1.5) Introduction to Leadership
This course provides an opportunity to examine leadership from the executive perspective in various organizations, including private and public sector firms, and non-profits. Builds graduate students' understanding of leadership theories, concepts, processes, and behavior while also helping them identify, develop, and build their own leadership capabilities. Enables students to enhance their readiness for leadership positions in business, government, and non-profit organizations and to embark on paths of personal leadership development.

Requisites: Requires prerequisite course of BADM 6302 (minimum grade D-).
Grading Basis: Letter Grade

BADM 6702 (1.5) Introduction to Accounting
Accounting is the language of business and involves the accumulation, presentation, and analysis of relevant financial data of a company to serve the needs of creditors, investors, other external decision makers as well as internal decision makers. We will explore the judgment involved in accounting as well as the rationale behind some of the principles.

Requisites: Requires prerequisite course of BADM 6502 (minimum grade D-).

BADM 6820 (1-3) Topics in Business Administration
Offered irregularly to provide opportunity to investigate new topics in business administration.

BADM 6940 (3) Land Use Law
Examines Federal, state and local regulations governing land use in the U.S. and surveys the basic principles of urban planning and public finance. Describes basic tools governments use to control land use: Euclidean zoning, nuisance law, police power, eminent domain and takings, Planned Urban Developments, historic preservation, wetlands and flood zones, airports, endangered species, view restrictions, and environmental law.

Requisites: Restricted to Master of Business Administration (MBAD), MBA with dual degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMB) or MS Real Estate (REAL-MS) students only.
Grading Basis: Letter Grade

BSLW 5120 (3) Advanced Business Law
Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120
Requisites: Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

BSLW 6900 (1-6) Independent Study
Requisites: Restricted to Business (BUSN) graduate students only.

MBAC 6001 (1.5) Foundations of Teamwork
Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees’ and colleagues’.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
Grading Basis: Letter Grade

MBAC 6002 (3) Social, Moral and Economic Foundations for Business
Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMB) majors only.
Grading Basis: Letter Grade

MBAC 6003 (1.5) Foundations of Leadership
Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMB) majors only.
Grading Basis: Letter Grade

MBAC 6004 (1.5) Social, Moral and Economic Foundations for Business
Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

Requisites: Restricted to Professional MBA Program (PMB) majors only.
Grading Basis: Letter Grade

MBAC 6010 (3) Managerial Economics
Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMB), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6011 (1.5) Managerial Economics
Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMB), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses
MBAC 6012 (1.5) Managerial Economics 2
Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6020 (3) Financial Accounting
Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6031 (1.5) Quantitative Methods 1
Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.
**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6032 (1.5) Quantitative Methods 2
Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.
**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6050 (3) Strategy
Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6051 (3) Operations Management
Develops an understanding of processes and the alignment of a process with the organization¿s operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers ¿c-suite¿-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade

MBAC 6052 (3) Capstone Projects
Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.
**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6060 (3) Corporate Finance
Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6080 (3) Decision Modeling and Applications
Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Additional Information:** Departmental Category: MBA: Core Courses

MBAC 6081 (3) Data and Decisions
Empowers business professionals to integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
MBAC 6090 (3) Marketing Management
Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6096 (1.5) Managerial Communications
Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
Grading Basis: Letter Grade

MBAC 6098 (1) Professional Development I
Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAC 6099 (1.5) Professional Development II
Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.
Additional Information: Departmental Category: MBA: Core Courses

MBAX 6000 (3) Socially Responsible Enterprise
Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6097 (1.5) Professional Development Internship I
Experiential compliment to MBAC 6098 to focus on Professional Presentation, Network Development, and/or Executive Exposure.
Requisites: Restricted to Master of Business Admin (MBAD) or MBA with Dual Degree programs. Minimum of 27 credit hours required.
Grading Basis: Letter Grade

MBAX 6100 (1.5) Entrepreneurship
Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.
Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6101 (1.5) Entrepreneurship
Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.
Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6110 (3) Entrepreneurial Finance
Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.
Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6111 (2) Entrepreneurial Finance
Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.
Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship
MBAX 6130 (3) Sustainable Venturing
Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6140 (3) Social Entrepreneurship in the US and Global Economies
Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.
Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Recommended: Prerequisite MBAX 6170.
Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies
Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying ¿adolescent¿ firms that are past the initial start-up stage but haven’t evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6170 (1.5) New Venture Creation
This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.
Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6171 (1.5) New Venture Creation
This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.
Requisites: Requires prerequisite courses of MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6180 (3) New Venture Launch
Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Recommended: Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6190 (3) Projects in Entrepreneurial Companies
Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.
Requisites: Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Recommended: Prerequisite completion of MBAX 6111 is strongly recommended prior to enrolling in MBAX 6190.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6195 (1-3) Special Topics in Entrepreneurship
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
MBAX 6210 (3) Applied Financial Management
Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (min grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6211 (3) Applied Financial Management
Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade C). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6220 (3) Investment Management and Analysis
Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6221 (1.5-3) Investment Management & Analysis
Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6230 (3) International Financial Management
Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6250 (3) Derivative Securities
Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Recommended: Prerequisite for MBAD students, prerequisite course of MBAC 6060; for FNCE-MS majors, prerequisite MSBC 5060 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6260 (3) Fixed Income Investing
Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6270 (3) Applied Derivatives
Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar
First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/ MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
**MBAX 6281 (1-2) Entrepreneurship Valuation and Investment Seminar2**
Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite MBAX 6280.

---

**MBAX 6282 (1) Entrepreneurship Valuation and Investment Seminar 3**
Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6281 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

---

**MBAX 6295 (1.5-3) Topics in Finance**
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

---

**MBAX 6300 (3) Marketing Communication**
Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Additional Information:** Departmental Category: MBA: Marketing

---

**MBAX 6301 (3) Marketing Communications**
Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students' understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

---

**MBAX 6310 (3) Marketing Strategy**
Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

---

**MBAX 6311 (3) Marketing Strategy**
Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

---

**MBAX 6330 (3) Market Intelligence**
Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing
MBAX 6331 (3) Market Intelligence
Market Intelligence is a marketing decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers for both products and services. It is for managers as users of market information across marketing management, consulting, general management, and entrepreneurship to address problems of market selection, segmentation, positioning, new products, customer value and retention, pricing, communication, channel, etc.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Marketing

MBAX 6340 (1.5) Marketing Field Project
Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6350 (3) Digital Marketing
Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6351 (3) Digital Marketing
Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Marketing

MBAX 6360 (3) New Product Development
Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Marketing

MBAX 6361 (1.5) New Product Development
Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6365 (3) Practical Product Management
This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Marketing

MBAX 6366 (3) Practical Product Management
This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Finance

MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry
Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade
MBAX 6370 (2-3) Customer Analytics
Provides a deep understanding of customer centricity and its implications for the firm; state-of-the-art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6372 (1.5) Professional Selling and Sales Management
The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individuals, salespeople, and the organizations that employ them.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design
Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.
Requisites: Requires prerequisite course of MBAC 6090 (min grade D-).
Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6381 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design
Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.
Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6395 (1-3) Special Topics in Marketing
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MBAX 6410 (3) Process Analytics
Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN) or Business Analytics (BUAN) majors or SCAG-CERG students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Systems

MBAX 6420 (3) IT and Business Strategy
Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Systems

MBAX 6421 (3) IT & Business Strategy
Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.
Requisites: Requires prerequisite courses MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management
MBAX 6441 (3) Project Management
Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from Project Management Institute. Requisites: Restricted to Professional MBA Program (PMBA) majors with 12 credit hours completed. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6450 (3) International Operations Management
Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national environments, including theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6451 (3) International Business and Strategy
Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores national and international approaches to international operations including trade practices; legal and political issues; US trade laws; finance and accounting risks; global supply chain management, cultural challenges; global marketing, and global strategies. Upon completing the course, you will have a broad foundational understanding of important contemporary issues and challenges of international business. Requisites: Restricted to Professional MBA Program (PMBA) majors only. Grading Basis: Letter Grade

MBAX 6460 (3) Supply Chain Management
Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Recommended: Prerequisite MBAC 6080. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6500 (3) Management of Organizational Change
Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6530 (3) Negotiating and Conflict Management
Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6531 (1.5) Negotiating and Conflict Management
Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA) or Professional MBA Program (PMBA) majors only. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6540 (3) Consulting Skills
Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6541 (3) Project Management
Exploits the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Recommended: Prerequisite MBAC 6080. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6550 (3) Management of Organizational Change
Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6530 (3) Negotiating and Conflict Management
Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing. Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBLA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only. Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management
MBAX 6550 (3) Management of Technology and Innovation
Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6560 (1.5) Executive Leadership
Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6561 (1.5) Executive Leadership
Provides an opportunity to examine leadership from the executive perspective in organizations including private and public sector firms and non-profits. Topics covered include how executives lead change and innovation in organizations, interact with the top management team, deal with the board of directors, leadership issues involved with governance of the firm and strategies for enhancing executive influence.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6565 (1.5) Inclusive Leadership
This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 25% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population is Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6570 (3) Topics in Sustainable Business
Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.
Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBA, D MBA, J MBA, PMBA, SCMN or BUAN majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6595 (1-3) Special Topics in Organizational Behavior
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Real Estate

MBAX 6600 (3) Real Estate Principles
Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.
Requisites: Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Real Estate

MBAX 6610 (3) Real Estate Finance and Investment Analysis
Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.
Requisites: Restricted to Master of Business Admin (MBAD) students.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Real Estate

MBAX 6620 (3) Real Estate Project Competition
Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.
Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Profil MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Real Estate
MBAX 6630 (3) Real Estate Economics
Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset. 
Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBBA) or Professional MBA Program (PMBA).
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Real Estate

MBAX 6640 (3) Real Estate Law and Practice
Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Formerly MBAX 6855.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Real Estate

MBAX 6650 (3) Real Estate Case Studies
Course will require students to analyze numerous actual real estate investment opportunities. Cases developed for the course will span analyses of various end uses (e.g. apartments, condominiums, office, retail, mixed use, industrial, and hotel) and include examples from investing in existing properties, substantial rehabilitations, and new construction projects. Will include examples from international real estate investment opportunities. Some cases may require students to evaluate the role that technology plays in the real estate industry.
Requisites: Requires prerequisite of MBAX 6630 or 6640 and MBAC 6610 or MSBC 5610 (all minimum grade D-). Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Real Estate

MBAX 6695 (1-3) Special Topics in Real Estate
Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management

MBAX 6700 (3) Corporate Financial Reporting
Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6220
Requisites: Requires prerequisite course of MBAC 6200 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBBA) or Professional MBA Program (PMBA) majors only.
Additional Information: Departmental Category: MBA: Accounting

MBAX 6710 (3) Financial Statement Analysis
Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6250
Requisites: Requires prerequisite course of MBAX 6200 or MSBC 5200 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
Additional Information: Departmental Category: MBA: Accounting

MBAX 6761 (2) Managerial Accounting, Planning and Control
Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.
Requisites: Requires prerequisite course of MBAX 6200 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Accounting

MBAX 6801 (3) Global Perspectives Seminar
Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MBA: Management
MBAX 6802 (3) Pricing Strategy and Tactics
Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6806 (1.5-3) Global Perspectives
Contrasting operations in US and a country or region outside the United States, students will study what changes US companies have made to successfully operate in foreign markets and how US companies have influenced foreign business operations. Reviews the history and present state of the inter-dependency between the domestic and international business environments. Culminates in a week-long trip to the country/region of study. Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

MBAX 6815 (3) Sustainable Real Estate
Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies
Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5827

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6841 (2) Decision Making for Managers
Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6843 (3) Supply Chain and Operations Analytics
Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

Requisites: Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) Profl MBA Prog (PMBA), Business Analytics (BUAN-MS) or Supply Chain Mgmt (SCMN-MS) majors or SCAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Operations and Production Management

MBAX 6846 (2) Global Strategy
The ability to compete effectively globally is increasingly important for many firms. Topics such as globalization and the competitive environment; key differences in institutions around the globe and their implications; how firms can succeed internationally (e.g., different entry strategies, how to manage across country borders, the firm’s broader responsibility in the global community) will be discussed.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6847 (2) Emerging Markets in Global Business
Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship
MBAX 6885 (3) Interpreting the Economic Environment
The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6930 (3) Commercializing Sustainable Energy Technologies
Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5005

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6966 (1-3) Independent Study-Real Estate
Independent study in the field of real estate.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Real Estate

MSBC 5015 (1.5) Managerial Economics
Studies the elements of the business firm’s fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5020 (1.5) Financial Accounting
Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5031 (3) Quantitative Methods in Finance
Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5032 (3) Real Estate Data Analysis
Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Requisites: Restricted to REAL-MS students only.

Grading Basis: Letter Grade

MSBC 5060 (3) Corporate Finance
Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

MSBC 5070 (3) Survey of Business Analytics
Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding, it will introduce and subsequently involve extensive use of Python.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors and MKAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5180 (3) Machine Learning in Python
This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

MSBC 5220 (3) Investment Management & Analysis
Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade
MSBC 5460 (3) Supply Chain Strategy
Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.
**Requisites:** Restricted to Supply Chain Management (SCMN) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Core

MSBC 5480 (3) SCMN Experiential Projects
Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Core

MSBC 5490 (3) BUAN Experiential Projects
Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.
**Grading Basis:** Letter Grade

MSBC 5600 (1.5) Real Estate Principles
The objective of the course is to provide students with the foundational terms, concepts, and principles fundamental to real estate. The content is divided into five sections, each section covering a different aspect of real estate including its legal foundations, types of real estate, contracts and leases, real estate mortgage loans, and valuation and investment. The course is largely lecture and conversational in format.
**Requisites:** Restricted to REAL-MS students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Core

MSBC 5610 (3) Real Estate Finance and Investment
Topics include 1) conducting income property investment analysis; 2) developing the technical competence necessary to structure real estate transactions; and 3) understanding the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.
**Requisites:** Restricted to REAL-MS students only.
**Grading Basis:** Letter Grade

MSBC 5680 (3) Optimization Modeling
Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.
**Grading Basis:** Letter Grade

MSBX 5080 (3) Decision Modeling and Applications
Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

MSBX 5205 (3) Financial Strategy and Decision Modeling
Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.
**Requisites:** Restricted to Finance (FNCE-MS) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Electives

MSBX 5225 (3) Advanced Portfolio Management
Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.
**Requisites:** Restricted to Master of Finance (FNCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA) or Professional MBA Program (PMBA) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Electives

MSBX 5260 (3) Fixed Income Investing
Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.
**Requisites:** Requires prerequisite course of MBAC 5060 or MSCB 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
**Grading Basis:** Letter Grade

MSBX 5270 (3) Applied Derivatives
Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMDA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.
**Grading Basis:** Letter Grade
MSBX 5310 (3) Customer Analytics
Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.
Requisites: Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: MS: Business Electives

MSBX 5311 (2) Customer Analytics
Provides a deep understanding of customer centrivity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.
Requisites: Restricted to Professional MBA Program (PMBA) majors only.
Grading Basis: Letter Grade

MSBX 5405 (3) Structured Data Modeling and Analysis
Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.
Requisites: Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DBMA), Joint Juris Doctor/MBA (JMBMBA), Professional MBA Program (PMBA), and MS Business Analytics (BUAN-MS) majors.
Grading Basis: Letter Grade

MSBX 5406 (3) Advanced Data Analytics
Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.
Grading Basis: Letter Grade

MSBX 5415 (3) Advanced Data Analytics
Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade

MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis
Moves the student beyond structured data and sources into business scenarios where data is semi-structured to unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.
Requisites: Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBMBA), Professional MBA Program (PMBA), and MS Business Analytics (BUAN-MS) majors.
Grading Basis: Letter Grade

MSBX 5425 (3) Natural Language Processing for the Health Sciences
Practitioners of natural language processing (NLP) use methods from math, science, engineering and linguistics to teach computers to understand human language. Because much biomedical information is stored as text, there are many possible applications of NLP in health sciences. This course offers an introduction to NLP for the health sciences. Students will gain a conceptual and hands-on introduction to fundamental tools, concepts and problems from NLP by exploring applications in healthcare, population health and biomedicine.
Requisites: Requires prerequisite courses of MSBC 5070 and MSBC 5180 (minimum grade D-).
Recommended: Prerequisite Python 3.
Grading Basis: Letter Grade

MSBX 5430 (3) Advanced Statistical Analysis
Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade

MSBX 5431 (3) Advanced Data Analytics
Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives
MSBX 5435 (3) Planning and Production
At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.
**Additional Information:** Departmental Category: MS: Business Electives

MSBX 5440 (3) Decision Analysis
Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Electives

MSBX 5450 (3) Transportation and Logistics
Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Electives

MSBX 5470 (3) Procurement and Contracting
Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Electives

MSBX 5480 (3) Information Security Management
A broad introductions to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Profl MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

MSBX 5500 (3) Security Analytics with Python and Machine Learning
Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Profl MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.
**Requisites:** Requires prerequisite course of MSBX 5480 (minimum grade D). Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.
**Grading Basis:** Letter Grade

MSBX 5605 (3) Real Estate Investment and Risk Management
Examines strategies for mitigating the legal, property and portfolio risks associated with income properties. The course begins by examining risks created by leases. The course then analyzes the risks associated with a single property and examines how risk changes with portfolios containing multiple properties. Finally, the course examines how to optimally incorporate investment properties in mixed asset portfolios.
**Requisites:** Requires prerequisite course MBAX 6610 or MSBC 5610 (min grade D). Restricted to Master’s students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Profl MBA Program (PMBA) majors onl
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: MS: Business Electives

MSBX 5615 (1.5) Real Estate Modeling
Real Estate Modeling and Analysis is a graduate level course which will teach students skills necessary to model Real Estate proformas to aid in valuation of acquisition and development of commercial real estate assets. The course will engage three software programs: Excel, Argus [Commercial Real Estate Software] and CoStar [largest commercial real estate information and analytics provider].
**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.
MSBX 5680 (3) Real Estate Technology
Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

Requisites: Restricted to Master’s students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with DUAL Degree (DMA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

MSBX 6290 (3) Textual Analysis in Business
This course will discuss basic ideas around natural language processing (NLP) in research in different “dismal science” disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6290
Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.
Recommended: Prerequisite MBAC 6060 (minimum grade D-).
Grading Basis: Letter Grade

Business Administration - Master of Business Administration (MBA)

The breadth of training that master of business administration graduates receive prepares them to become high-level managers and lead in a challenging and evolving business environment.

The MBA program is rigorous and comprehensive, and demands student commitment. The curriculum develops a set of broad-based, integrative skills. Core courses provide a solid foundation in both business management and analytical disciplines, a foundation that fosters continued career growth. In addition to core courses stressing key functional areas of business, students can choose electives specific to a chosen area of concentration.

The case study method and student projects are used broadly throughout all courses, and common areas of study such as ethics, technology, communications and international issues are integrated throughout much of the curriculum. Students learn about management theory and its practical applications in “real-world” situations. Lectures, seminars, team teaching, team projects and guest lectures are various approaches taken by the faculty to generate new ideas and encourage student input.

Diversity
The Leeds School of Business encourages qualified individuals to apply regardless of gender, race, religion, national origin, age, physical limitation or sexual orientation.

Requirements

Full-Time MBA
During the first semester of study, to ascertain degree requirements, MBA students should meet with a member of the student services team for the MBA program.

Students entering the MBA program take a prescribed sequence of classes before beginning elective courses. A total of 55 credit hours is needed to graduate. Students entering the MBA program are expected to complete the degree in two years. Transferred coursework is not accepted into the MBA program.

MBA students may enroll in up to 6 credit hours of elective graduate coursework in CU Boulder programs other than the Leeds School of Business with explicit approval from the MBA Programs office prior to enrollment. All remaining 18 credit hours of electives must be taken within the MBA program. MBA academic internship credits will decrement the total number of non-Leeds elective credits available. Students may not take courses outside the University of Colorado Boulder and count them toward the degree. Students should contact individual departments for course listings and registration requirements for non-business courses.

All courses applied toward the 55 credit hours must be taken for a grade. Courses in which a C- or below is received are not accepted for credit toward the 55 credit hours and may have to be retaken. In this case, both grades are factored into the GPA. To withdraw from an elective course and receive a grade of W, a student must be earning a passing grade in that course. Students normally are not permitted to withdraw from courses after the sixth week of the semester. Students in the MBA program may not withdraw from specified MBAC lockstep coursework. An "I" is an incomplete grade. Use of the "I" is at the discretion of the course instructor and/or the dean. Students must ask for an incomplete grade. An "I" is given only when students, for reasons beyond their control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

Co-curricular activities are a critical counterpart to the classroom experience and enrich the value of the degree. Case competitions, student leadership positions, clubs, networking opportunities, guest speakers, small-group meetings with business leaders and professional mentoring all add to the immersive nature of the full-time program. Summer internship opportunities allow students to apply those core skills and develop new insights to help focus their choice of elective courses.

MBAX 6440  Project Management
MBAX 6460  Supply Chain Management
MBAX 6843  Supply Chain and Operations Analytics

**Evening/Hybrid MBA**

The curriculum of the Evening MBA program and Hybrid MBA program includes the same core of required courses as the full-time MBA program, but delivered in a format that accommodates students who are fully employed. Building on foundational courses, evening MBA and Hybrid MBA students then choose 12 total credits of electives to add greater depth and specificity of knowledge.

The Evening MBA program maintains a traditional classroom format, with classes meeting twice per week (summer terms may vary). The Hybrid MBA is a combination of enhanced virtual instruction and traditional classroom format (one Saturday/month with variation during summer terms).

The Evening MBA Program and Hybrid MBA program each begin in May, with an innovative schedule that allows students to graduate in two years (six semesters). During the second year, students complete MBAC 6052 Capstone Projects. Students in the evening and hybrid programs have access to electives in both programs, including the following options. For additional information about courses by semester, see the Plan(s) of Study tab. Elective coursework varies by term.

</table>

The Executive MBA (EMBA) program is for leaders and executives with significant work experience, ideally a minimum of eight years, who are interested in further developing their leadership skills. This program provides a cohort model that allows students to cultivate a professional and personal network throughout the program. Courses deliver over two semesters each academic year (fall and spring) for a total of four semesters. Enhanced virtual instruction provides flexibility so that students can focus on work, personal lives and school. Across all semesters, students will continue to meet with teams and faculty, leveraging technology for engagement.

During the program students will attend six intensive mandatory (one-week onsite) residencies which provide time for students to collaborate with faculty and classmates regarding knowledge learned in their respective classes. The one-week residencies are scheduled each semester of the program during the months of October, January and April. The first five residencies will be in the United States and the final residency will be onsite for ten days in a location outside of the United States. The EMBA program begins in August of every year with a (three-day onsite) orientation on the Boulder campus. The exact dates can be found under the Executive MBA Course Schedule (https://www.colorado.edu/business/executive-mba-program/executive-mba-curriculum/executive-mba-course-schedule/).

The EMBA curriculum begins with a first year of rigorous business fundamentals. Leadership is spread throughout the program with themes around inclusion, executive and ethical responsibilities, and negotiation. During the second year, students will learn advanced topics in marketing, finance and strategy as well as innovative business practices and how an entrepreneurial mindset can be leveraged. Academic enrichment opportunities are offered throughout the program as well as access to personal executive coaching. The EMBA curriculum comprises 45 total credits. Please see Plans of Study for a detailed course list.

### Dual Degree Programs

#### Juris Doctor/MBA

The purpose of this dual degree program is to allow students admitted to both the School of Law and the Leeds School of Business to obtain the juris doctor (JD) and the master of business administration (MBA)
degrees in four (or fewer) years of full-time study. The program is designed to train students for careers in which business administration and law overlap.

Admission
To be eligible for the JD/MBA dual degree program of the School of Law and the Leeds School of Business, a student must apply separately to and be admitted by each of the two schools under their respective admission procedures and standards.

Students may elect the dual degree program at the time of initial application to both schools, or they may apply for the dual degree program during their first year of study in the degree program of either school.

Course of Study
A student enrolled in the JD/MBA program may commence studies under the program in either the School of Law or the Leeds School of Business. Dual degree students are strongly encouraged to begin their course of study at the School of Law. However, a student must take the first year of the JD curriculum as a unit exclusively in the School of Law. Likewise, a student must take the first year of the MBA curriculum as a unit exclusively in the Leeds School of Business. Students can then take additional courses necessary to meet the requirements of the degree programs of the two schools.

No student in the dual degree program shall be allowed to take fewer than 9 credit hours or more than 16 credit hours during any term (excluding summer terms) without receiving the consent of the program advisor in each school in which courses are being taken.

Credit for Law Courses in the JD/MBA Program
The Leeds School of Business grants credit toward the MBA degree for up to 12 credit hours of acceptable performance in law courses taken by a JD/MBA student at the School of Law. Core courses required in the law school program cannot be counted toward the 12 credit hours. A student must earn at least a 77 grade in a law school course to be accepted for Leeds School of Business credit. For credit to be granted, the law school courses must be approved before enrollment by an MBA advisor. Only courses taken after admission into the MBA program are credited toward the degree.

Grading in the Dual Degree Program
Leeds School of Business credit for courses completed in the School of Law as part of the joint degree program is recorded on a pass/fail basis and is not included in the required MBA 3.00 cumulative average.

MBA/MD
The Leeds School of Business and the University of Colorado School of Medicine offer students the ability to earn both an MBA and a Doctor of Medicine (MD) degree.

With the MD/MBA dual degree, students acquire expertise in business essentials like leadership, finance, accounting, marketing, strategy, innovation and social responsibility. As collaborative leaders, these medical professionals with business fundamentals are positively impacting patient care and healthcare delivery by leveraging their knowledge in powerful new ways. As the medical field rapidly changes and evolves—with new technologies, shifting professional roles, a dynamic public policy landscape, and new healthcare delivery models—physicians need leadership skills now more than ever to tackle complex issues and ensure high standards of care.

Admission
To ensure student success—both academically and professionally—admission to the program is competitive. Each application undergoes a holistic review, including an evaluation of academic strengths and a high-level assessment of compatibility with the Leeds MBA program. SOM students must apply to become a dual degree student one year prior to beginning the MBA curriculum. All dual degree students must fulfill all requirements for each program, as well as all applicable dual degree requirements.

Course of Study
The 5-year dual degree from CU Leeds School of Business and CU School of Medicine requires 31 credits of MBA core coursework. Dual degree students begin with the MD program. Students must complete two academic years of the MD program prior to starting the MBA experience. MBA requirements will be satisfied with successful completion of core curriculum (summer/fall/spring).

MBA/MFA
The Leeds School of Business, in conjunction with the Department of Art and Art History, offers students the ability to earn an MBA and an MA in fine arts through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in digital marketing, web design, e-commerce, gallery/museum administration and private art consulting.

Admission
Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study
Students in the MBA/MA in fine arts spend the first year of their dual degree program exclusively in either the business school or the fine arts program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and fine arts elective courses.

Credit for Fine Arts Courses in the MBA/MA Fine Arts Program
Dual degree students in studio arts are required to complete 43 credit hours of MBA coursework and 45 credit hours of fine arts coursework. Students in art history are required to complete 43 credit hours of MBA coursework and 30 credit hours of fine arts coursework.

MBA/MA in Anthropology
The MBA/MA in anthropology dual degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing field of corporate cultural anthropology and ethnography or museum management.

Admission
Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.
Course of Study
Students in the MBA/MA in anthropology spend the first year of their dual degree program exclusively in either the business school or the department of anthropology. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers students the opportunity to take both MBA and anthropology elective courses.

MBA/MA in German Studies
The MBA/MA in German studies dual degree program enables students to earn an MBA and an MA in German studies simultaneously over three or four years. Students in this MBA/MA program pursue careers in international business.

Admission
Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master’s program, provided they do so during the first year of study.

Course of Study
Students in the MBA/MA in German studies spend the first year of their dual degree program exclusively in either the Leeds School of Business or the Department of Germanic and Slavic Languages and Literatures. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers students the opportunity to take both MBA and German studies elective courses.

MBA/MA in Theater and Dance
The Leeds School of Business, in conjunction with the Department of Theatre and Dance, offers students the ability to earn an MBA and an MA in theatre or dance through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums and arts presenters.

Admission
Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master’s program, provided they do so during the first year of study.

Course of Study
Students in the MBA/MA in theatre and dance spend the first year of their dual degree program exclusively in either the business school or the theatre/dance program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Credit for Courses
Dual degree students are required to complete 43 credit hours of MBA coursework and 24 credit hours of theatre/dance coursework. A minimum of 67 approved credit hours must be completed to earn both degrees.

MBA/MS in Computer Science
The MBA/MS in computer science enables students to earn an MBA and an MS in computer science over three or four years. Students in this MBA/MS program have career interests that combine corporate business and technology.

Admission
Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master’s program, provided they do so during the first year of study.

Course of Study
Students in the MBA/MS in computer science spend the first year of the dual degree program exclusively in either the business school or the computer science department. In the second year, courses are taken exclusively in the other department. The remaining year(s) students may take both MBA and computer science electives.

MBA/MENV
An MBA degree in combination with the Masters of the Environment (MENV) degree will provide a student with a powerful set of tools and knowledge to expand career options. The MBA offers a valuable business toolkit—including leadership, critical thinking and communication skills. This option allows a student to complete two specialized master’s degrees in less time than it would take to earn both separately.

Admission
Students must apply to each program separately and meet the respective application requirements and admissions standards for each program. Students admitted simultaneously to both programs are advised to begin the MBA program first. A person may elect the dual degree program at the time of initial application to both schools; or a student enrolled in the applicable degree program of either school may apply for admission to the other school and elect to be enrolled under the dual degree program.

Course of Study
Dual degree students in their second year will exclusively enroll in the Masters of the Environmental Program. Students will choose a specialization and enroll in all core and required MENV courses. MENV specializations include: Environmental Policy; Public Lands and Natural Resources; Renewable and Sustainable Energy; Sustainable Food Systems; and Urban and Regional Sustainability. Both degrees must be awarded simultaneously. Dual degree students must maintain the academic and ethical standards required of both programs. Students who do not complete the dual degree program requirements (i.e., who withdraw for any reason from one of the two programs) will be required to meet the full requirements of the remaining program in which they are enrolled. Dual degree students must complete a Dual Degree Curricular Program (DDCP) form for their program and present to both advisors prior to beginning the degree. This is the initial map of the course sequence to meet the dual requirements and can change over time.

Credit for Courses
The MBA/MENV dual degree program allows for 9 MBA credits to be used for MENV degree requirements, and 12 MENV credits to be used for MBA degree requirements. Dual degree students will be required to complete 43 hours of MBA coursework and 39 hours of MENV coursework, for a total of 82 hours of combined coursework.

MBA/MS in Environmental Studies
The MBA/MS in environmental studies enables students to earn an MBA and an MS in environmental studies over three or four years. Students
in the MBA/MA program have career interests that combine corporate business and environmental protection, the management of renewal energy, water conservation or environmental programs.

**Admission**

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master’s program, provided they do so during the first year of study.

**Course of Study**

Students in the MBA/MS in environmental studies spend the first year of the dual degree program exclusively in either the business school or the environmental studies department. In the second year, courses are taken exclusively in the other department. The remaining year(s) students may take both MBA and environmental studies electives.

**MBA/MS in STEM**

The purpose of this dual degree program is to allow students admitted to the Leeds School of Business as a dual degree student to obtain the master of business administration (MBA) and master of science in business analytics or supply chain management degrees in two years of full-time study. An MBA degree in combination with the MS degree will provide students with a set of business tools to develop leadership, critical thinking and communications skills as well as a specialization in one of the STEM designated areas of either Business Analytics or Supply Chain Management. The MBA/MS offers students the opportunity to earn both degrees together in less time than if the degrees were earned separately.

**Admission**

To be eligible for the MBA/STEM dual degree program, a student must apply directly to the Leeds School of Business choosing dual degree status. Applicants must select the MBA/MS-SCMN or the MBA/MS-BUAN dual degree option at the time of application to be evaluated for admission to both programs, simultaneously. Students may not apply to the MBA program, and subsequent to the start of classes, add the dual degree designation. Students must meet the admissions standards for each program separately. The Graduate Management Admissions Test (GMAT) or Graduate Record Examinations (GRE) will be used as the standardized examination for admissions to both the Leeds School of Business MBA and MS Supply Chain Management or Business Analytics programs.

**Course of Study**

Dual degree students must begin with the MBA program, and will take courses exclusively in the MBA program during the first year. The second year of the dual degree program will consist of the existing MS Supply Chain Management or MS Business Analytics curriculum, in full: 33 credits over three semesters.

**Credit for Courses in the MBA/STEM Program**

Students are required to complete 37 credit hours of MBA coursework and 33 credit hours of MS coursework. Certain MBA elective courses are part of the STEM curriculum and must be taken in the second year as an MS student.

**MBA/MS in Technology, Cybersecurity and Policy**

The Leeds School of Business, in conjunction with the College of Engineering and Applied Science, offers a dual degree program resulting in a master of business administration (MBA) and master of science in technology, cybersecurity and policy (MS/TCP). The dual degree program combines broad-based business management study with an in-depth understanding of telecommunications technology. This program prepares students to be competent, effective managers in the telecommunications industry.

**Admission**

An individual must apply separately and be admitted to both programs under each school’s or college’s admission procedures and standards. Applicants are encouraged to apply to the programs concurrently.

**Course of Study**

Students in the MBA/MS in technology, cybersecurity and policy spend the first year of the dual degree program exclusively in either the business school or the TCP program. In the second year, courses are taken exclusively in the other department. In the third year students will take both MBA and TCP elective courses to complete both master’s degrees.

**Credit for Courses**

Dual degree students are required to complete 43 credit hours of MBA coursework and 36 credit hours of TCP coursework. A minimum of 79 approved credit hours must be completed to earn both degrees.

**Business Administration - Doctor of Philosophy (PhD)**

The Leeds School of Business provides a dynamic professional atmosphere comprised of quality diverse faculty and PhD students, framed by a thriving business community and a beautiful environment. The Leeds PhD program prepares students for research careers at leading universities and equips students with a deep understanding of the most influential research within the disciplines, as well as the tools necessary to contribute state-of-the-art research advancing these disciplines:

- accounting
- finance
- marketing
- organizational behavior and information systems
- strategy, entrepreneurship, and operations

In addition to the creation of knowledge, the program also supports the dissemination of that knowledge from classrooms to the profession at large. The program is small enough to ensure that all students can receive the mentoring needed to innovate at the frontier of their disciplines.

Dr. Clare Wang chairs the PhD Curriculum and Policy Committee which oversees the Leeds PhD program.

**Requirements**

PhD students must complete all Graduate School, Leeds School of Business and division requirements to be conferred the PhD in business administration. All PhD students are required to complete at least 30 credit hours of coursework and at least 30 credit hours of dissertation at CU Boulder. Additional coursework may be required as determined by the academic advisor. To comply with this 30-credit-hour requirement, a course must be taken by a member of the university’s graduate faculty, must be at the 5000 level or above, and the student must achieve a grade of B+ or better. Most students complete 7000- and 8000-level PhD seminars.
PhD students in all program areas except for Accounting are required to maintain a minimum GPA of 3.3 or better while in residence in the program. Accounting students must maintain a minimum GPA of 3.0.

PhD students are required to assume teaching apprentice roles for three sections of any course and then independently teach two courses to achieve teaching proficiency. PhD students are also expected to attend eight (8) workshops and/or trainings while in residence.

**Time Limit**

PhD students have six years from the commencement of coursework to complete all requirements of the degree, but most PhD students complete their program within five years.

**Comprehensive Examination**

Before admission to candidacy, a PhD student must pass a comprehensive examination in the field of concentration. The examination may be oral, written or both, and will test the student’s mastery of a broad field of knowledge, not merely the formal coursework completed. Each division will determine the required content, length and standards of evaluation for the exam. Check with the division as to the specific requirements for the comprehensive exam.

**Admission to Candidacy**

PhD students are admitted to candidacy according to Graduate School procedures and requirements. PhD students shall complete all coursework and any other requirements listed on their degree plans, earn at least four semesters of residence and successfully pass the comprehensive exams before admission to candidacy is approved by the Graduate School. In addition, requirements related to academic quality of work, graduate-level coursework, the minimum number of course credit hours, and graduate faculty membership must be met before admission to candidacy is approved.

**Dissertation Proposal and Final Defense**

All PhD students are required to successfully present and defend a dissertation proposal on a subject approved by the candidate’s dissertation committee. The dissertation proposal must be passed before attempting to defend a final dissertation.

A final dissertation must be based upon original investigation showing mature scholarship and critical judgment, as well as competence with research tools and methods. To be acceptable, the dissertation must be a significant contribution to knowledge in the candidate's primary field and must comply with the CU Boulder Graduate School Thesis and Dissertation Specifications. All PhD students are required to present a final dissertation defense, which is open to the public.

**Accounting - Master of Science (MS)**

A master’s degree in accounting prepares students to become financial professionals who can help a wide range of organizations thrive. Accounting is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful. Through the program, graduates develop specific expertise in the area of accounting by strengthening and enhancing the ability to interpret and communicate information about a company’s operations and finances. Academic experience, combined with a practical internship experience, propels graduates to be proficient in the “language of business” that is accounting.

Typically, over 90 percent of MS accounting students have a job in accounting and financial advisory fields at graduation, and the demand for CU Boulder-educated accountants continues to soar. Many graduates begin careers with public accounting firms in audit, tax or advisory business services. Others prefer information management, tax or compliance positions within corporations. Still other opportunities exist in financial management, nonprofits and government agencies.

**MS Program**

Coursework in accounting conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding and use of information, which enables students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

Accounting students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses they may need to fulfill in order to obtain licensure in a particular state.

**Bachelor’s–Accelerated Master’s Degree Program**

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Business Administration - Bachelor of Science (BS) (p. 645).

**Requirements**

The MS accounting degree consists of ten graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

**Prerequisites**

The following four intermediate-level accounting courses or their equivalent must be completed before starting the master’s-level accounting courses. Course equivalency will be assessed by the MS in Accounting faculty director during transcript review in the application process.
corporate social responsibility support our commitment to developing
seminars in topics ranging from teamwork and leadership to ethics and
opportunities. In addition to the academic coursework, four enrichment
application of materials, preparing students for a range of job
This 10-month program includes extensive coursework and an
application of materials, preparing students for a range of job
opportunities. In addition to the academic coursework, four enrichment
seminars in topics ranging from teamwork and leadership to ethics and
corporate social responsibility support our commitment to developing

### Plan(s) of Study

Students will meet with their advisors to plan out their course of study to
meet degree requirements.

### Business Analytics - Master of Science (MS)

The MS degree in business analytics focuses on the exciting and fast-
growing field of "big data." Merging developments in marketing and
customer analytics with operations research, business analytics, aspects
of computer science and statistical methods, the specialization offers
a technical, quantitative and statistically intensive program designed to
train specialists in turning "big data" into business decisions. Analytics
may be used as input for human decisions or may drive fully automated
decisions about why some data pattern is observed, what will happen
next and how a firm can adapt to optimize that outcome. Students
have an option to customize their curriculum by specializing in decision
science, healthcare analytics, marketing analytics, research analytics or
security analytics.

This 10-month program includes extensive coursework and an
application of materials, preparing students for a range of job
opportunities. In addition to the academic coursework, four enrichment
seminars in topics ranging from teamwork and leadership to ethics and
corporate social responsibility support our commitment to developing

### Distance Education Option via Online+

Students may enroll in the MS Business Analytics (BUAN) or MS Supply
Chain Management (SCMN) degree program through distance education
(online) and complete the degree requirements established for each MS
program. Distance education offers regularly scheduled on-campus
graduate courses to remote off-campus (distance) students using
advanced virtual and video-conferencing technology. Distance students
participate both synchronously (at a scheduled delivery time) and
asynchronously (no scheduled delivery time). Instructors, courses,
assignments, projects, exams and evaluations are identical for on-
campus and off-campus students. Online+ courses are term-based
(i.e., follow the regular academic schedule) and structured to maximize
student engagement with faculty and other online+ students to support
student success and degree completion.

Designed for working professionals, the online option allows students
to enroll part-time and follows the same curriculum as the on-campus
degree option. Please see degree requirements and plan(s) of study
specific to Business Analytics or Supply Chain Management. Based on
circumstance and timeline to completion, students enroll in one or two
courses each semester, completing the degree in two years.

**Note:** Online sections for Marketing Analytics and Healthcare Analytics
track electives are delivered regularly; online sections for Decision
Sciences and Security Analytics tracks are not guaranteed. Online
academic advisors can offer further guidance.

For more information, connect with the individual graduate program
directly.
on analytics project management experience prepares graduates to make an immediate meaningful contribution in the workplace.

For additional information, please visit Leeds School Graduate Programs (http://www.colorado.edu/business/ms-programs/) or email us at leedsgrad@colorado.edu.

**Tracks**

The MS in Business Analytics offers tracks to develop analytic skills in specific disciplines: healthcare analytics, decision science, marketing analytics, research analytics and security analytics. Learn more below and on the Plan(s) of Study tab.

**Finance - Master of Science (MS)**

The nine-month MS in finance provides extensive coursework and an in-depth application of materials, preparing students for a range of job opportunities. In addition to the coursework, enrichment seminars in
topics ranging from teamwork and leadership to ethics and corporate social responsibility support the "whole student" experience by incorporating professional development into the academic experience.

The focused finance curriculum offers students a firm grounding in general finance, and helps to develop the specific skills necessary to pursue careers in a variety of financial fields.

The MS degree in finance offers two tracks to develop skills in specific disciplines:

- The investment management track provides the skills necessary to pursue a career with an investment management firm and preparation to take the CFA Level I exam.
- The corporate finance/consulting track prepares students for a career in management consulting, investment banking, private equity and venture capital.

For additional information, please visit Leeds School Graduate Programs (http://www.colorado.edu/business/ms-programs/) or email us at leedsgrad@colorado.edu.

### Real Estate - Master of Science (MS)

The MS in Real Estate program is offered as a nine-month degree for traditional full-time students, or can be completed over two years by working professionals. The degree keeps students and professionals up-to-date with industry-focused technical skills, necessary for today and the future of where the real estate industry is headed. As technology continues to redefine the real estate industry, data-driven insights on the use of commercial and residential space are critical to maximizing value and impact. With this degree, students will develop analytical skills and innovative thinking, expertise in quantitative financial analysis, basic business concepts and leadership skills. World-class faculty, along with industry influencers, draw from in-depth knowledge of the latest industry trends and business applications giving students an edge in a rapidly advancing field.

This program also incorporates co-curricular opportunities including market treks, case competitions and networking events.

#### Requirements

**Admission Requirements**

Applicants for the real estate track must have a minimum of two years’ relevant work experience.

For additional information, please visit Leeds School’s Graduate Programs (http://www.colorado.edu/business/ms-programs/) webpage or email leedsgrad@colorado.edu.

Supply Chain Management - Master of Science (MS)

The supply chain management master's degree provides students with the expertise needed to manage business supply chains in the global economy. This ten-month program includes extensive coursework which prepares students for a range of job opportunities. In addition to the academic coursework, four enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support our commitment to developing the "whole student" by incorporating professional development into the academic experience.

Based on an "action learning" model, the program is designed to provide hands-on supply chain project management experience, amplified by shared experiences with other students.

Graduates will be prepared for responsible and influential jobs in a variety of organizations, including large manufacturing, retail, and distribution organizations; transportation companies; supply chain software companies; and supply chain consulting firms.

Distance Education Option via Online+

Students may enroll in the MS Business Analytics (BUAN) or MS Supply Chain Management (SCMN) degree program through distance education (online) and complete the degree requirements established for each MS program. Distance education offers regularly scheduled on-campus graduate courses to remote off-campus (distance) students using advanced virtual and video-conferencing technology. Distance students participate both synchronously (at a scheduled delivery time) and asynchronously (no scheduled delivery time). Instructors, courses, assignments, projects, exams and evaluations are identical for on-campus and off-campus students. Online+ courses are term-based (i.e., follows the regular academic schedule) and structured to maximize student engagement with faculty and other online+ students to support student success and degree completion.

Designed for working professionals, the online option allows students to enroll part-time and follows the same curriculum as the on-campus degree option. Please see degree requirements and plan(s) of study specific to Business Analytics or Supply Chain Management. Based on circumstance and timeline to degree completion, students enroll in one or two courses each semester, completing the degree in two years. For more information, connect with the individual graduate program directly.

Requirements

Admission Requirements

Admissions guidelines and application details are outlined on the master's programs admissions (https://www.colorado.edu/business/ms-programs/masters-programs-admissions/) website. Admission to the program may recommend or require preparation or refresher courses in statistics, math and business.

Experiential Projects

The experiential project pairs students with clients in industry to work on important practical problems in supply chain management. Students work under the supervision of faculty and meet together weekly to discuss progress, jointly work on problems and to share experiences. This hands-on project management experiences prepares graduates to make an immediate meaningful contribution in the workplace.

For additional information, please visit Leeds School Graduate Programs (http://www.colorado.edu/business/ms-programs/) or email leedsgrad@colorado.edu.

Taxation - Master of Science (MS)
A master’s degree in taxation prepares students to become financial professionals who can help a wide range of organizations thrive. Taxation is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful. Through our program, our graduates develop specific expertise in the area of taxation by strengthening and enhancing the ability to interpret and communicate information about a company’s operations and finances. Academic experience, combined with a practical internship experience, propels our graduates to be proficient in the “language of business” that is taxation.

Coursework in taxation conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding, and use of information, which enable students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

CPA Licensure
Taxation students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses, they may need to fulfill in order to obtain licensure in a particular state.

Bachelor’s–Accelerated Master’s Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Business Administration - Bachelor of Science (BS) (p. 645).

Requirements
The MS taxation degree consists of 10 graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

Prerequisites
The following four intermediate-level accounting courses or their equivalent must be completed before starting the master’s-level accounting courses. Course equivalency will be assessed by the faculty director during transcript review in the application process.

Plan(s) of Study

Students will meet with their advisors to plan out their course of study to meet degree requirements.

Business Analytic Methods - Graduate Certificate

The business analytic methods certificate courses comprise the foundational topics in a business analytics curriculum, providing business analytics training for mid-career professionals in a number of roles, including human resources, pricing, optimization, procurement, finance, real estate and acquisition.

Designed for nondegree students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students participate in coursework both synchronously (scheduled delivery time) and asynchronously (no scheduled delivery time). As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (https://leeds.apply.colorado.edu/apply/).

Applicants must provide:

• Statement of purpose (1–2 pages) explaining how the business analytic methods graduate certificate will further their professional and/or personal interests
• Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
• Current resume
• One letter of recommendation

Course Requirements

Business analytic methods certificate courses include the courses listed below. All courses must be passed with a B grade or better to count towards the certificate.

<table>

Total Credit Hours 31

Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

Marketing Analytics - Graduate Certificate

The marketing analytics certificate courses comprise the major topics in an advanced business analytics curriculum, providing marketing analytics training for mid-career professionals in business analytics or marketing roles. The courses have been specifically selected in order to teach students core concepts and targeted skills in marketing analytics.

Designed for nondegree students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students participate in coursework both synchronously (scheduled delivery time) and asynchronously (no scheduled delivery time). As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (https://leeds.apply.colorado.edu/apply/).

Applicants must provide:

• Statement of purpose (1–2 pages) explaining how the marketing analytics graduate certificate will further their professional and/or personal interests
• Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
• Current resume
• One letter of recommendation
Course Prerequisite

Students applying to the graduate certificate are required to complete a course prerequisite. The course prerequisite may be satisfied by one of the following:

- Successful completion of MSBC 5460 (or successful completion of similar coursework at another university)
- Successful completion of the non-credit Coursera course Supply Chain Management Strategy
- Relevant work experience

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

Additional Materials

In addition, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the supply chain analytics graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

• Successful completion of the non-credit Coursera course Supply Chain Management Strategy
• Relevant work experience.

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

**Additional Materials**
In addition, applicants must provide:

• Statement of purpose (1–2 pages) explaining how the supply chain foundations graduate certificate will further their professional and/or personal interests
• Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
• Current resume
• One letter of recommendation

**Courses**
Supply chain foundations certificate courses are listed below. All courses must be passed with a B grade or better to count towards the certificate.

**Plan(s) of Study**
Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

**Education**
The School of Education offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K–12 classrooms, conducting educational research, developing evidence-informed policy and designing innovative learning environments both in schools and in community-based settings.

Graduate programs in the School of Education serve practicing teachers, higher education professionals, as well as those seeking to improve education through rigorous research and evidence-informed policy and practice. The School of Education's doctoral program is a cohort-based, full-time program that prepares individuals to lead in universities, research or policy institutes, state or government agencies and innovative non-profit organizations.

**Mission**
Our mission in the School of Education is grounded in a lived commitment to democracy, diversity, equity and justice. We teach and conduct research to make a positive difference with and in schools and communities. The work of our faculty, researchers, staff and students leads to evidence-based policy and practice. We aim for our graduates to be engaged and informed educators, researchers, policymakers and community leaders.

**Licensure**
The School of Education is authorized by the Colorado Department of Education and the Colorado Department of Higher Education to offer teacher preparation programs.

Because each state has its own laws and standards regarding teacher preparation, our teacher education programs do not prepare candidates for licensure in states other than Colorado. It is strongly recommended that students planning to seek professional licensure or certification in a state other than Colorado contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how a degree from CU Boulder may satisfy another state’s requirements for licensure in advance of program completion.

**Policies & Requirements**

**Admission**
Prospective students seeking admission to a graduate degree program should view electronic application instructions and admission information on the School of Education Graduate Program (https://www.colorado.edu/education/academics/graduate-programs/) webpage. GRE test scores are optional for admission to the doctoral programs.

Admission to all programs and degrees in the School of Education is selective. Master’s admissions deadlines are October 1 for spring semester, January 15th for Fall and Summer for international students, and February 1st for Fall and Summer for domestic applicants. Note that our MA+ Licensure programs only accept applications for the Summer term. The admissions deadline for PhD applicants is November 15th for international applicants and December 1st for Fall and Summer for domestic applicants. The PhD program only accepts applications for the Fall semester. Students should visit the International Admissions (http://www.colorado.edu/international/international-admissions/) webpage for additional forms and information.

**Advising**
Graduate students are assigned an individual faculty advisor after admission and are required to submit a formal plan of study, approved by their advisor, before the end of the first full year of study.

**Maximum Load and Part-Time Study**
A maximum of 15 credit hours in any one semester may be applied toward graduate degree requirements. During the summer, 9 credit hours is the maximum that will be counted toward education graduate degrees. Within this limit, students may take up to 6 credit hours in a five-week summer term, and/or 3 credit hours in a three-week term. During the academic year for financial aid purposes, students will be regarded as having a full load if they are registered for 5 or more credit hours in courses numbered 5000 or above, or are registered in a minimum of 5 dissertation or 1 MA thesis hour. At least four semesters of residence credit hours, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder. See the Graduate School section for clarification.
Opportunities for Assistantships
The School of Education has a limited number of assistantships administered by the dean on the recommendations of faculty and the associate deans. Some assistantships involve the supervision of student teachers; others involve helping professors in their teaching or research. Taxable stipends in amounts set by the university are paid for all assistantships. Appointments are usually made in terms of one-fourth time (10 hours a week) or one-half time (20 hours a week).

Master of Arts in Education
The master of arts degree requires one academic year or more of graduate work beyond the bachelor’s degree.

The master’s degree must be completed within four years of initial enrollment. The MA plan II (non-thesis) degree requires a minimum of 30 credit hours to graduate. See the Graduate School section for discussion of plan I and plan II. Students may transfer no more than 9 credit hours of work taken at another institution or as a non-degree student at CU Boulder.

All program areas have outlined a recommended or required program of study, and students pursuing a degree are expected to follow that program unless they have appropriate substitutions arranged in advance with their advisors and the associate dean of students.

At the beginning of the final term of study, each student must submit a “Candidacy Application for an Advanced Degree.” These forms are available online through the Graduate School (https://www.colorado.edu/graduateschool/admissions/). If a minor is included, the form must first be signed by a representative of the student’s minor department or program area. The form must first be signed by the student and the student’s faculty advisor, then submitted to the School of Education Graduate Programs Coordinator for initial approval and then to the Graduate School for final approval. All students are required to pass a comprehensive-final examination or its equivalent, as determined by the program’s faculty committee (For time limits and other information, see the Graduate School section under master’s degree).

Doctor of Philosophy (PhD) in Education
Please see the PhD in Education (p. 1450) section of the catalog for details.

Graduation
A student must apply online through the student portal for graduation via the student portal; this is the official notification to the Graduate School of intent to graduate during a given semester. The student will be permitted to graduate during a specific semester only if they have applied by the deadline for that semester. If they do not graduate during the semester for which they applied, the student must apply online again for the new semester. Application submissions are not retained beyond the semester indicated online. The Graduate School determines all deadlines. The student is responsible for meeting all deadlines to ensure graduation during a particular semester.

Scholarships and Awards
Each year a number of merit-based Teaching Assistantships (TA), Research Assistantships (RA), Graduate Part-Time Instructors (GPTI), and fellowships are available in the School of Education to support full-time doctoral study. Half-time appointments (the maximum allowed) for 20 hours of work per week are the norm. Quarter-time RA, TA, and GPTI appointments (10 hours per week) may also be made. The monetary amount of stipends paid for assistantships are set by the university. These stipends are taxable income. Students must be considered full-time to hold an assistantship. According to university policy, full-time enrollment prior to completing the comprehensive examination is five (5) hours of coursework per semester at the 5000 level or above or eight (8) semester hours of mixed level coursework. After passing the comprehensive examination, full-time is considered to be five (5) dissertation hours per semester.

The strongest doctoral applicants are nominated by the school for fellowships awarded by the Graduate School. Candidates apply in the spring semester for scholarships and awards for the following school year. Application procedures and deadlines are published by the Graduate School.

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. The Office of Financial Aid, in conjunction with the Graduate School, awards financial aid in the form of grants and workstudy jobs on the basis of both need and merit criteria. Students must be registered for a minimum of four credits in order to be eligible for Financial Aid.

State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students from low-income families. Information about these opportunities may be found on the School of Education (http://www.colorado.edu/education/admissions/financial-aid Scholarships/) website.

Academic Standards
A grade average of B (3.00) or better is required for all work taken for any graduate degree. Transferred credits are not included when calculating grade averages.

A mark below B- will not be credited toward the PhD program; a mark below C is not acceptable for MA students. Students who do not maintain at least a B (3.00) average or better may be suspended by the dean of the Graduate School upon the recommendation of the School of Education. Students may also be suspended from the Graduate School for continued failure to maintain satisfactory progress toward the degree sought.

Please refer to the Graduate School (p. 1034) for details on Academic Standing.

Programs of Special Interest
Graduate Certificate Programs
There are a number of interdisciplinary Graduate Certificate Programs that align with and expand School of Education programs of study. These include, but are not limited to:

Quantitative Methods for Behavioral Sciences
The purpose of the Graduate Certificate in Quantitative Methods is fourfold: (a) to strengthen interdepartmental links and communication among social and human science departments at CU Boulder, both in general and specifically with regards to quantitative research methodology and statistical analysis, (b) to provide incentive and recognition to graduate students from a diverse set of departments who choose to cultivate expertise in quantitative research methods and methods of statistical analysis, (c) to increase the visibility of and promote courses in quantitative research methods (possibly with the
benefit that additional quantitative courses can be developed and taught), and (d) as a consequence of all of the above, to improve the quality of quantitative training of graduate students at CU Boulder, increasing students’ chances of employment upon completion of their graduate studies.

Please visit the Quantitative Methods for Behavioral Sciences (https://catalog.colorado.edu/graduate/colleges-schools/interdisciplinary-programs/quantitative-methods-behavioral-sciences-graduate-certificate/#requirementstext) certificate page for more details.

Teaching English to Speakers of Other Languages
The Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) is a 14-15 credit post-baccalaureate program designed for individuals who wish to gain, or continue to develop, the professional knowledge, skills and dispositions that qualify them to teach learners of English as an additional language in the U.S. and/or abroad. This graduate certificate prepares teacher candidates to teach young learners, adolescents and adults in a number of contexts, domestic and abroad, including community-based programs, private language institutes, intensive English programs and after school programs.

Please visit the Teaching English to Speakers of Other Languages (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/linguistics/teaching-english-speakers-other-languages-graduate-certificate/#requirementstext) certificate page for more details.

Culture, Language and Social Practice
The Graduate Certificate in Culture, Language and Social Practice (CLASP). This program provides an interdisciplinary forum on language and society for CU students and faculty. This is facilitated through regular colloquia on the subject of language and society, as well as the diverse course offerings in the CLASP graduate certificate program. The CLASP program brings cohesion to empirical and theoretical research currently conducted on campus in varied analytic traditions that focus on the study of culture, language and social practice. These traditions include sociolinguistics, linguistic anthropology, literacy, bilingualism, second language acquisition, language endangerment and revitalization, narrative studies, symbolic interactionism, language variation and change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

Please visit the Culture, Language and Social Practice (https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/linguistics/culture-language-social-practice-graduate-certificate/#requirementstext) certificate page for more details.

Equity, Bilingualism and Biliteracy
• Master of Arts

Learning Sciences & Human Development
• Master of Arts

Teacher Leadership
• Master of Arts

Education
• Doctor of Philosophy
The School of Education offers a PhD in Education, which has seven program areas of emphasis:
• Educational Foundations, Policy, and Practice
• Equity, Bilingualism, and Biliteracy
• Learning Sciences and Human Development
• Literacy Studies
• Research and Evaluation Methodology
• STEM Education
• Teacher Learning, Research and Practice

Teaching Endorsements at the Graduate Level
Through the School of Education, CU Boulder offers advanced coursework leading to teacher added endorsements in the following areas:
• Culturally & Linguistically Diverse Education (grades K–12)
• Culturally & Linguistically Diverse Bilingual Education Specialist (grades K–12)
• Special Education Generalist (grades K–12)

All of the above programs have degree, licensure or experience requirements that must be fulfilled before admission. Please check with the School of Education before applying.

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses

EDUC 5001 (3) Framing Equity and Justice in the Humanities Classroom
Critically frames learning to teach for equity and justice within schools as systems. Oriented students to the School of Education's mission and guiding principles of the Secondary Humanities program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 50 hours in local schools.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4001
Requisites: Restricted to Masters-level teacher licensure students with a English-Secondary Education (EDEN-LICG) or Social Studies-Secondary Educ (EDSS-LICG) plan.
Grading Basis: Letter Grade

EDUC 5002 (3) Framing Equity and Justice in the STEM Classroom
Critically frames learning to teach for equity and justice in Science, Technology, Engineering, and Mathematics [STEM] Classrooms. Oriented students to the School of Education's mission and guiding principles of the CU Teach program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 40 hours in local schools.

Requisites: Restricted to Mathematics-Secondary Education (EDMA-LICG) or Science-Secondary Educ (EDSC-LICG) students only.
Grading Basis: Letter Grade

EDUC 5005 (3) Advanced Social Foundations of Education
Critically examines the intellectual and political forces that shape the aims, policies, and practices of K-12 education in the United States.

Requisites: Restricted to EduC-Curriculum Instruction (EDCI) graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5010 (3) Race and Equity in Higher Education
This course introduces students to recent research and theory surrounding race, ethnicity, access, inclusion, and equity in higher education. It focuses on the development of knowledge, skills and awareness that is crucial in becoming an engaged scholar and practitioner in the areas of diversity, equity, and inclusion. We discuss the responsibilities, tensions, and opportunities one must have in creating and maintaining a pluralistic and inclusive campus for all. We also discuss ways in which themes of identity and diversity operate far beyond one-on-one relationships but rather extend to systems and structures that comprise a college and/or university environment.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5011 (1) College Student Career Development
Explores the diverse aspects of career development for college students. Examines the different models of career services for students in different schools, colleges and majors.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5012 (4) Framing Equity and Justice in the Humanities Classroom
Critically frames learning to teach for equity and justice within schools as systems. Oriented students to the School of Education's mission and guiding principles of the Secondary Humanities program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 50 hours in local schools.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4001
Requisites: Restricted to Masters-level teacher licensure students with a English-Secondary Education (EDEN-LICG) or Social Studies-Secondary Educ (EDSS-LICG) plan.
Grading Basis: Letter Grade

EDUC 5013 (3) Framing Equity and Justice in the STEM Classroom
Critically frames learning to teach for equity and justice in Science, Technology, Engineering, and Mathematics [STEM] Classrooms. Oriented students to the School of Education's mission and guiding principles of the CU Teach program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 40 hours in local schools.

Requisites: Restricted to Mathematics-Secondary Education (EDMA-LICG) or Science-Secondary Educ (EDSC-LICG) students only.
Grading Basis: Letter Grade

EDUC 5014 (3) Advanced Social Foundations of Education
Critically examines the intellectual and political forces that shape the aims, policies, and practices of K-12 education in the United States.

Requisites: Restricted to EduC-Curriculum Instruction (EDCI) graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5015 (3) Race and Equity in Higher Education
This course introduces students to recent research and theory surrounding race, ethnicity, access, inclusion, and equity in higher education. It focuses on the development of knowledge, skills and awareness that is crucial in becoming an engaged scholar and practitioner in the areas of diversity, equity, and inclusion. We discuss the responsibilities, tensions, and opportunities one must have in creating and maintaining a pluralistic and inclusive campus for all. We also discuss ways in which themes of identity and diversity operate far beyond one-on-one relationships but rather extend to systems and structures that comprise a college and/or university environment.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5016 (3) College Student Career Development
Explores the diverse aspects of career development for college students. Examines the different models of career services for students in different schools, colleges and majors.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education
EDUC 5012 (1) Higher Education Finance
Covers the major, basic elements of budgeting and finance in higher education. It is designed to address the budget process in colleges and universities, as well as the impact of budget activities on other areas of planning and operations within an institution. Enhances students' knowledge of both internal and external financial environments facing higher education.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5014 (1) Ethical Dilemmas in Higher Education
Examines ethical issues involved in higher education and student affairs administration. Uses real and fictional ethical cases to bring to light various moral and ethical tensions relevant for higher education and student affairs professionals.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5015 (3) International / Comparative Education
Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace Corps and Volunteer Agencies.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4015
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5020 (1) College Academic Advising
Explores the diverse aspects of academic advising for college students. Examines the different models of advising for students in different schools, colleges and majors.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5021 (1) College Athletic Affairs
Examines the relationship between student-athletes and the institution and explores how intercollegiate athletics fits into the academic enterprise of higher education. Key questions include: 1) what purpose does athletics serve and 2) for whose benefit? With these questions in mind, we examine the range of issues at the intersection of athletic administration, student development theory, and educational leadership and policy.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5022 (1) LGBTQ+ Topics in Higher Education
Explores the diverse aspects of college and university life for students, staff, and faculty who identify as LGBTQ+. Examines the different higher education supports and challenges for LGBTQ+ student populations.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5023 (1) College Admissions and Enrollment
Explores the diverse aspects of college and university student recruitment, outreach, admissions, and enrollment. Examines the different models of admissions processes and systems, with attention to relevant politics and professional practices.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5026 (1) Technology in Higher Education
Explores impact of technology on higher education and student affairs. Explores impact of technology on students and their development, and teaching and learning. Although technical aspects of technology are discussed in some depth, this is not designed as a 'technical' course; the content revolves around implications of technology as both a driving and a supportive element within higher education.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5027 (1) Institutional Advancement and Development in Higher Education
Examines the roles of institutional advancement, development, and fundraising in higher education and student affairs. Explores the impact of advancement on students, staff, and faculty, as well as on teaching and learning, research, campus life, and the larger community. The content will revolve around implications of development work as both a driving and a supportive element within higher education.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5028 (1) International Education in Higher Education and Student Affairs
To provide an introduction to the field of international education. Students pursuing graduate studies in higher education administration will benefit from an overview of global student mobility trends and an exploration of career pathways within the field. In-class discussions, out-of-class readings, and guest speakers will guide student learning.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5030 (1) Accessibility and Students with Disabilities in Higher Education
Provides students with important knowledge about issues of accessibility and development for students with disabilities in higher education. Examines strategies to offer support and guidance to students with disabilities in order to foster a safe and engaging learning and living environment.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education
EDUC 5031 (1) Institutional Research & Analytics in Higher Education
Examines the roles and uses of institutional research and data analytics in higher education and student affairs. Provides students with a foundational understanding of the field of institutional research and data analytics in higher education. Explores the activities in which institutional researchers engage, the tools they need to be successful in their jobs, the topics they study and issues they investigate.
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5032 (1) College Student Leadership Development
Surveys the study and practice of leadership and provides students with a variety of experiences to wrestle with large leadership questions. What is leadership? Who can be a leader? How is leadership an important aspect of understanding self and others?
**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.
**Grading Basis:** Letter Grade
**Additional Information:** Departmental Category: Graduate Education

EDUC 5035 (3) Proseminar: Parent and Community Involvement
Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5050 (3) Knowing and Learning in Mathematics and Science
The course is aimed at providing graduate students the opportunity to engage deeply with theories of mathematics and science learning for the purposes of designing engaging and affirming learning environments. The course is centered around reading deeply and critically in the literature on learning theory, coupled with a youth and community-based research project.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4050
**Requisites:** Restricted to graduate students only.

EDUC 5060 (3) Classroom Interactions
Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts. Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4060
**Requisites:** Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5065 (3) Curriculum Theories
Examines four central curricular traditions: progressive; conservative; radical; and spiritual. Highlights the strengths and weaknesses of various writers within each tradition with attention paid to the conceptual features and the practical implications of each educational view. Encourages students to examine their own educational assumptions.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5070 (3) Spirituality and Religion in Education
Examines features of religion, spirituality, and a liberal arts education, so as to further understand the constitutional, historical and cultural constraints on, and acceptable approaches to the study of religion and spirituality in American education. Specifically explores aspects of a contemplative orientation and the degree to which such an orientation should/can be pursued in K-12 public and higher education.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5075 (3) Sociology of Education
In-depth analysis of theories and concepts in sociology and education. Evolution of curriculum, organization, and enrollment characteristics of American schools. Schooling, race, class, culture, gender, stratification, and educational reform in light of paradigmatic change in theories and concepts of sociology.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5105 (3) Teaching for Understanding and Equity
Addresses perspectives and evidence-based teaching practices that promote equity and access to conceptual understanding. Introduces the knowledge base on effective and socially just teaching practices, and the theories and research that support these practices. Explores the impact of theory and research on classroom instruction.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5112 (3) Educational Psychology and Adolescent Development
Analyzes fundamental concepts from psychology and the learning sciences to understand how educators can support youth development in and out of school. Includes service learning requirement. This course is not appropriate for in-service teachers.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4112
**Requisites:** Restricted to graduate students only.

EDUC 5115 (3) Issues in School Change and Reform
Examines recent developments in teaching, and trends in the philosophy and practice of education. Focuses special attention on a variety of issues central to school reform.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education

EDUC 5135 (3) Story and Memoir
Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of “how one remembers one’s own life.” Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4135
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Graduate Education
EDUC 5145 (3) Gender, Literacy, and the K-12 Classroom
Explores and critiques various conceptions of gender within popular and scholarly publications that have influenced how gender and sexual diversity is approached in classrooms. Builds a theoretical stance toward gender and sexual diversity that supports equity, engagement and achievement for all children and youth. Discusses teaching strategies that thoughtfully take into account gender identities and equity.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5150 (3) Introduction to Qualitative Research Methods
Introduces students to qualitative research in education. Examines the foundations, design, methods and analysis of qualitative research methods. Readings include texts about the foundations and purposes of qualitative inquiry, and methodological readings about the application of research techniques. Students will complete a variety of small, hands-on projects that introduce major dimensions of qualitative research including observation, interviewing, and document analysis.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4150
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: General Education

EDUC 5165 (3) Children's Literature
Involves reading and evaluation of picture books, and emphasizes children's interests, authors and illustrators, multicultural literature, the components of narrative, and the features of illustrations. Examines connections between children's literature and children's development as writers.
Additional Information: Departmental Category: Graduate Education

EDUC 5179 (3) Seminar on Teaching and Teacher Education in Math and Science Education
This course examines how scholarship on teaching and teacher learning has been evolving in mathematics and science educational research since the 1980s and 1990s. Students will explore theories of teacher learning and how they relate to designs for teacher preparation and professional development. We will also study common designs and design principles for conducting research to study teaching and teacher learning.
Recommended: Prerequisites EDUC 5060 and EDUC 6318.
Grading Basis: Letter Grade

EDUC 5205 (3) Elementary Mathematics Theory and Methods
Provides pre-service teachers opportunities to explore contemporary theories of learning, curriculum development, and pedagogical strategies pertaining to teaching elementary-level mathematics. Blends exploration in mathematical content with development of sophisticated mathematical models for teaching.
Requisites: Requires corequisite course of EDUC 4351. Restricted to Elementary Education (EDEL) majors only.
Additional Information: Departmental Category: Elementary Education

EDUC 5215 (3) Elementary Science Theory and Methods
Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications.
Requisites: Requires corequisite courses of EDUC 4331 and 4341. Restricted to Elementary Education (EDEL) majors only.
Additional Information: Departmental Category: Elementary Education

EDUC 5222 (3) Language Study for Educators
Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4222
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5235 (3) Language and Literacy Across the Curriculum
Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4232
Requisites: Restricted to EDCI, EECD, EPSY, or REME graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5245 (3) Foundations of Reading Instruction K-12
Comparatively analyzes current and emerging philosophies and programs in K-12 with focus on teaching reading and thinking skills.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5255 (3) Digital Literacies and New Media
Engage in digital reading and writing experiences using tools for communication, collaboration, design and research. Students will discuss and critically reflect on the role of technology in literacy instruction, grounded on learning and literacy theories. Connections to English language arts include genre study of literary and nonfiction texts and using quality children's literature as mentor texts for multimodal craft.
Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 5265 (3) Processes in Writing
Examines processes writers use from early ages to maturity by investigating current research related to writing curriculum, instruction, and policy. Includes opportunities for students to engage in inquiry related to writing curriculum and instruction in K-12 classrooms.
Requisites: Restricted to Edu-Curriculum Instruction (EDCI) graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5275 (3) Assessment in Literacy
Assumes an interactive model of reading and supports the perspective of assessment as interrelated with curriculum and instruction; examines principles that guide the selection and interpretation of assessment strategies and tools, with a focus on students who are experiencing difficulties with literacy.
Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education
EDUC 5285 (3) Reading Clinic Procedures K-12
Focuses learning on a select group of K-12 students to assess reading proficiency, develop appropriate instructional goals, and provide instruction that addresses these goals. Emphasis on interpreting assessment data, extending a repertoire of instructional strategies, and developing and implementing a strong instructional plan.
Requisites: Requires a prerequisite course of EDUC 5275 (minimum grade C).
Additional Information: Departmental Category: Graduate Education

EDUC 5295 (3) Narrative and Story in the Humanities
Explores a wide variety of texts that might be used in secondary English and Social Studies classrooms. Examines philosophies and instructional approaches to the teaching of reading and literature. Considers the influence of story and storytelling in the construction of personal and societal meaning.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4295
Requisites: Requires prerequisite of EDUC 4001 or EDUC 5001 (minimum grade C), Restricted to teacher licensure students in English (EDEN-LICG) or Social Studies (EDSS-LICG).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 5301 (3) Queer(ing) Topics in Education
Bring critical and queer theoretical perspectives to bear on an inquiry into what's counted as "normal" in social, historical, and political contexts of education in the United States. We'll explore queerness, queer theory, and queer pedagogy, in an effort to examine schooling as a heteronormative institution that has tended toward (re)producing heterosexism, homophobia, and violence against queer bodies and identities.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4301
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 5310 (3) Social and Emotional Learning in Schools
Explore the ways SEL benefits students through investigating its purposes and goals, the competencies it seeks to promote, the characteristics of effective programs, and the range of program formats. We frame these topics through examining ongoing dilemmas in the field. We also conduct in-depth reviews of several programs and the research that supports them.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4310
Requisites: Restricted to graduate students only.

EDUC 5315 (3) Perspectives on Science
Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4315
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5316 (3) Nature of Social Studies and Social Studies Education
Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.
Requisites: Restricted to Edu-Curriculum Instruction (EDCI), Social Studies-Secondary Educ. (EDSS), Anthropology (ANTH), Economics (ECON), Geography (GEOG), History (HIST) or International Affairs (IAFS) majors only.
Additional Information: Departmental Category: Graduate Education

EDUC 5317 (3) Perspectives on Mathematics
Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4317
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5325 (3) Queering Literacy in Secondary Classrooms
Focuses learning on a select group of K-12 students to assess reading proficiency, develop appropriate instructional goals, and provide instruction that addresses these goals. Emphasis on interpreting assessment data, extending a repertoire of instructional strategies, and developing and implementing a strong instructional plan.
Requisites: Requires a prerequisite course of EDUC 5275 (minimum grade C).
Additional Information: Departmental Category: Graduate Education

EDUC 5330 (3) Secondary Social Studies Methods I
Explores effective social studies teaching techniques used to prepare secondary students for success in college, career, and civic life. An emphasis is placed on interpreting sources, understanding multiple perspectives, and employing critical thinking with diverse students.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4330
Requisites: Requires prerequisite of EDUC 4001 or EDUC 5001 (both minimum grade C). Requires corequisite of EDUC 4901. Restricted to teacher licensure students in Social Studies (EDSS-LICG).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 5345 (3) Secondary English Methods I
Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of language, writing, and speaking and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4345
Requisites: Requires a prerequisite of EDUC 4001 or EDUC 5001 (both minimum grade C). Requires corequisite of EDUC 4901. Restricted to teacher licensure students in English (EDEN-LICG).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education
EDUC 5355 (3) Secondary Social Studies Methods II
Explores effective techniques associated with reading, processing and assessing social studies subject area content with an emphasis on developing critical thinking skills and meeting the needs of diverse students.
Requisites: Requires prerequisite course of EDUC 4330 or EDUC 5330 and EDUC 4901 (all minimum grade C-). Requires corequisite of EDUC 4902. Restricted to teacher licensure students in Social Studies (EDSS-LICG).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 5365 (3) Secondary English Methods II
Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of reading, thinking, and viewing and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.
Requisites: Requires prerequisite course of EDUC 4342 or EDUC 5345 and EDUC 4901 (all minimum grade C-). Requires corequisite of EDUC 4902. Restricted to teach licensure students in English (EDEN-LICG).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 5375 (3-4) Problem-Based Math Instruction
Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4375
Requisites: Restricted to EDCI, EDSC, or EDMA majors only.
Recommended: Corequisite EDUC 4023.
Additional Information: Departmental Category: Graduate Education

EDUC 5385 (4) Problem-Based Science Instruction
Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4385
Requisites: Restricted to EDCI, EDSC, or EDMA majors only.
Recommended: Corequisite EDUC 4023.
Additional Information: Departmental Category: Graduate Education

EDUC 5390 (3) Professional Teaching for Equity and Justice
Explores what it means to be a professional educator for equity and justice. Examines how such educators might best work to sustain their commitments through advocacy and care and how they might extend their role through involvement in the professional community and conversation at local, state, and national levels.
Requisites: Requires prerequisite of EDUC 5365 or EDUC 5355 (both minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG) of Social Studies (EDSS-LICG).
Grading Basis: Letter Grade

EDUC 5425 (3) Introduction to Bilingual/Multicultural Education
Provides an introduction for currently practicing K-12 teachers and non-specialists to bilingual and multicultural education programs for emergent bilingual students. Includes an overview of the history and legislation related to the education of emergent bilingual students, identification and placement, as well as the various models, theoretical and philosophical underpinnings, and pedagogical practices that constitute sound educational practices for emergent bilingual students.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4425
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5435 (3) Materials and Methods in Bilingual/ Multicultural Education
Provides an in-depth study of the curriculum options available for bilingual and ELD programs. Presents, reviews, and critiques specific methods and strategies for teaching language to minority students. Gives the opportunity to develop and present teaching units in Spanish or in ELD methodology, as appropriate.
Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).
Additional Information: Departmental Category: Graduate Education

EDUC 5445 (3) Curriculum for Multicultural Education
Analyzes curriculum programs and examines principles that inform innovation for education of diverse students at all school levels. Includes topics of ethnic, racial, socio-economic, linguistic, and gender diversity.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5455 (3) Literacy for Linguistically Different Learners
Presents current and emerging philosophies and methods on teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transference from L1 to L2 reading.
Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).
Additional Information: Departmental Category: Graduate Education

EDUC 5460 (3) Teaching and Learning Physics
Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4460 and PHYS 4460 and PHYS 5460
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5465 (3) Introduction to ESL/Bilingual and Special Education
Provides students with the fundamental information of ESL, bilingual and special education, including theories, assumptions, philosophies, and paradigms of bilingual and special education. Discusses successful teaching techniques and instructional approaches, including individualization, least restrictive environment, transition, and career education.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education
EDUC 5485 (3) Differentiation in the Classroom
Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices, programmatic interventions that support student learning and using research to inform practice. Includes practicum. Department enforced prerequisite: restricted to MA+ students.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5490 (3) Blurring Disciplinary Lines in the Humanities
Explores theories, methods, and materials for building interdisciplinary connections within and across secondary English and Social Studies classrooms. Provides opportunities for collaborative work in building lessons and unit plans that challenge disciplinary boundaries and advocate for complex problem solving.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 4490
Requisites: Requires prerequisite of EDUC 4342 or EDUC 5342 or EDUC 4330 or EDUC 5330 (all minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICU or EDEN-LICG) or Social Studies (EDSS-LICU or EDSS-LICG).
Grading Basis: Letter Grade

EDUC 5505 (3) Education of Students with Learning and Behavior Disorders
Discusses unique learning needs of students with learning and behavior disorders. Emphasizes development of a systems model for diagnosis, programming, and remediation. Stresses data-based individualization of instruction, with emphasis on intervention in inclusive learning environments and developing a culturally responsive system.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5515 (3) Curriculum and Assessment for Special Learners
Emphasizes assessment of special education students from pre-referral through staffing and placement, including response to intervention, research-based assessment practices, analytic teaching and assessment, curriculum-based assessment and measurement. Selection, administration, and interpretation of formal and informal assessment devices are studied, with particular emphasis on cultural relevance and equity in assessment for special learners with mild to severe needs.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5525 (3) Research Issues in Special Education
Provides practical experience in the review, critique, conceptualization, and writing of research studies in special education. Also offers experience in design of evaluation systems for classroom practice.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5535 (3) Diagnostic Testing in ELD and Bilingual Education
Promotes critical uses of assessment instruments and information. Provides methods for educators to incorporate assessment as a meaningful activity in the classroom intended to support learning among bilingual students. Examines effectiveness, validity, and fairness in the testing of linguistically diverse populations. Provides first-hand experiences developing, selecting, reviewing, and adapting test materials as critical to making informed teaching decisions.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5545 (3) Strategies for Teaching Students with Special Needs
Provides teachers with specific evidence-based methods and techniques for teaching students with a wide variety of high and low disabilities including learning and language disabilities, hearing and visual impairments, physical disabilities, and health impairments. Emphasizes different teaching methods, instructional materials, and learning strategies that have proven effective working students with cognitive learning needs.
Requisites: Restricted to graduate students only.

EDUC 5555 (3-4) Practicum in Bilingual/Special Education
Offers supervised field experience in elementary and secondary special education class settings. Each credit hour requires 50 contact hours.
Requisites: Requires prerequisite courses of EDUC 5465 and EDUC 5505 and EDUC 5515 or EDUC 5545 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5575 (1-4) Workshop in Curriculum and Instruction
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 5580 (3) Physics and Everyday Thinking
Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.
Requisites: Restricted to graduate students only.

EDUC 5595 (1-4) Practicum in Linguistically Different: English Language Development
University supervised, school-based field experience teaching linguistically different students, as well as assistance in the completion of EECD portfolio.
Requisites: Requires prerequisite courses of EDUC 5425 and EDUC 5435 and EDUC 5535 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5605 (3) Research Issues in Bilingual Education
Offers practical experience in the review, critique, conceptualization, and writing of research studies in bilingual/ELD education. Provides experience in the design of classroom evaluation systems.
Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 5610 (1-3) Math and Science Education
Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education
EDUC 5615 (3) Second Language Acquisition  
Presents a broad survey of second-language acquisition research. Stresses theoretical concerns and research findings and practical applications to teaching second languages. Gives special emphasis to second-language acquisition.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5625 (3) Methods of Teaching English Language Development  
Exposes students to strategies used to teach English Language Development. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English Language Development. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5635 (3) Education and Sociolinguistics  
Explores the discipline of sociolinguistics, the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech and social identities, and sociolinguistic research related to teaching and learning.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5706 (3) Assessment in Mathematics and Science Education  
Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.  
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4706  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5716 (3) Basic Statistical Methods  
Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5726 (3) Introduction to Disciplined Inquiry  
Considers various research approaches and methodologies included in education including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational; and sociological, historical, and philosophical research. Topics include library research, research criticism, research design, and proposal writing.  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5800 (1-9) Master's Special Topics  
Designed to meet needs of students with topics of pertinent interest. 00 total credit hours. Allows multiple enrollment in term.  
**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.  
**Grading Basis:** Letter Grade  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5815 (3) Teaching K-12 Mathematics: Number Sense  
Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development. Formerly EDUC 5810.  
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4815  
**Requisites:** Restricted to graduate students only.  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5821 (3) Teaching K-12 Mathematics: Algebraic Thinking  
Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K-12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.  
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4821  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5822 (3) Teaching and Learning Chemistry  
Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.  
**Requisites:** Requires prerequisite course of CHEM 1021 or CHEM 1113 or CHEM M 1400 (minimum grade C).  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5833 (3) Teaching and Learning Earth Systems  
Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). The course focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions and developing effective discourse within and outside the classroom.  
**Grading Basis:** Letter Grade  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5835 (3) Teaching K-12 Mathematics: Geometry & Measurement  
Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K-12 learners. Formerly EDUC 5830.  
**Additional Information:** Departmental Category: Graduate Education

EDUC 5850 (3) Teaching K-12 Mathematics: Probability & Statistics  
Focuses on teaching probability, data analysis, and statistics in K-12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.  
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4850  
**Additional Information:** Departmental Category: Graduate Education
EDUC 6110 (3) Student Affairs in Higher Education
Provides students with a thorough introduction to the field of student affairs administration in higher education. Explores diverse facets of college student affairs administration and its role within US higher education. The course will help students develop a broad foundation for subsequent Higher Education study and practice. Focuses on philosophies, complexities, and futures of the student affairs profession.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 6210 (3) Education Policy and the Law
Approaches education policy issues through the rich history of litigation and current legal challenges facing American K-12 schooling. Builds an understanding of the legal and policy development of the American schooling system, particularly in the 20th century. Laws and legal cases will be used as jumping-off points for broader discussions.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 6211 (3) Education Law and Litigation Workshop
The students in this workshop course will learn through a project-oriented, constructive conversation between legal experts and education policy experts. With elements of community-engaged learning, as well as clinical and street law, the course creates a forum for an iterative process whereby education students, attorneys (adjunct professors) and law students will work together on legal projects of their own choosing. The attorneys and law students will inform the education researchers about how claims for relief or legislation (or a legal argument used in another context) might be shaped, while the researchers would inform the lawyers and law students about whether and how the research supports a potential claim or approach, and about the sorts of remedial orders or interventions that might be beneficial.
Requisites: Restricted to graduate students only.

EDUC 6220 (3) Gender Issues in Education
Provides a strong foundation in the various issues of gender and sexual diversity in education. Stimulates explorations into the ways the construct of "gender" affects and is affected by the educational system and process. Presents theory and research about contemporary educational issues related to sexism and homophobia. Encourages development of well-considered views about the various issues, research, and theories.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 6230 (3) Ethics in Education
Investigates controversies in education from a self-consciously ethical perspective, drawing as appropriate from moral and political theory as well as law. Focuses on public education's role in fostering democratic citizenship and providing equal educational opportunity. Critically evaluates various education reform policies and curriculum policies. Applies method commonly used in medical ethics to make decisions regarding concrete ethically problematic cases.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 6245 (3) Latinx Education Across the Americas
Compares state-led responses to diversity through education and integration policies with the transnational practices of distinct migrant American education. Considers the socio-historical, cultural, and political contexts that shape the education of Latinx communities, with special attention to issues of race, cultural and national identity, and representation as these are negotiated in schools.
Requisites: Restricted to graduate students only.

EDUC 6250 (3) Higher Education in the United States
Examines major issues in higher education focusing on the sociopolitical contexts in which US universities operate as gatekeepers to opportunities. Topics include the purposes and history of higher education in the United States, college teaching and learning, finance and governance, issues of access and equity related to race, gender, sexual orientation, gender identity, immigration status and class, and student life.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

EDUC 6260 (3) Transnational Migration, Education, and Citizenship
Examines the education of transnational migrant youth and families in comparative perspective, with a focus on citizenship formation. Compares state-led responses to diversity through education and integration policies with the transnational practices of distinct migrant and diaspora communities in both the United States and Europe. Considers the educational experiences of distinct types of migrants, including undocumented immigrant students and their families and university students studying abroad, and implications for citizenship.
Requisites: Restricted to graduate students only.

EDUC 6318 (3) Psychological Foundations of Education
Introduces students to theoretical and empirical contributions of educational and developmental psychology and the learning sciences emphasizing applications to educational practices. Topics include learning, development, cognitive processes, social and cultural context, motivation, assessment and individual differences.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 6325 (3) Anthropology of Education
Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education
EDUC 6328 (3) Advanced Child Growth and Educational Development
Introduces students to recent theoretical and research advances in the study of children and adolescent's cognitive, social and emotional development, with an emphasis on implications for learning in and out of school.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6368 (3) Adolescent Psychology and Development for Teachers
Examines current theory and research on adolescent development, learning, motivation, and academic achievement. Emphasizes how theory and research can inform instructional decisions in the secondary classroom.

**Requisites:** Restricted to English-Secondary Education (EDEN), Social Studies-Secondary Educ (EDSS), Mathematics-Secondary Educ (EDMA) or Science-Secondary Educ (EDSC) graduate students only.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6405 (3) College Student Development and Counseling Theories
Covers theories of student development in higher education as they apply to the growth of students and the influence of the college environment on growth and development. Examines selected approaches to counseling theory and practice. Theoretical formulations basic to human development and the counseling process are presented including historical and philosophical background. This course explores themes of human development, self-evolution, meaning making, separation and connection, and moral meaning making, and how college students are other adults construct themselves and the meaning they make of their experience.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

EDUC 6504 (3) Issues and Methods in Cognitive Science
Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6505 (1-2) Readings and Research in Cognitive Science
Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6506 (2) Cognitive Science Research Practicum
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

**Requisites:** Requires prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-). Restricted to graduate students only.

**Recommended:** Prerequisite EDUC 6505.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6516 (2) Cognitive Science Research Practicum 2
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

**Requisites:** Requires prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6705 (3) Leadership in Higher Education
Examines theory and research on leadership and management in higher education, and the structure and governance of colleges and universities. Explores the internal organization and culture of institutions, as well as external and related bodies that affect higher education such as the federal and state governments, accrediting agencies, associations and foundations.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

EDUC 6804 (1-4) Special Topics
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6811 (3) Teaching and Learning Biology
Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4811 and MCB 4811 and MCB 5811

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

EDUC 6844 (1-4) Master's Independent Study
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education
EDUC 6855 (1-4) Independent Study in Curriculum and Instruction---Master's Level
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6877 (1-4) Independent Study in Educational Equity & Cultural Diversity: Master's Level
An independent study may be established between a student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6888 (1-4) Independent Study in Educational and Psychological Studies---Master's Level
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6899 (1-4) Independent Study in Educational Foundations Policy & Practice---Master's Level
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6915 (1-4) Practicum in Curriculum and Instruction
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6916 (1-4) Practicum in Research and Evaluation Methodology
Additional Information: Departmental Category: Graduate Education

EDUC 6917 (1-4) Practicum in Educational Equity and Cultural Diversity
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6918 (1-4) Practicum in Educational and Psychological Studies
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6919 (1-4) Practicum in Educational Foundations Policy and Practice
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6925 (1-4) Readings in Curriculum and Instruction
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6926 (1-4) Readings in Research and Evaluation Methodology
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6927 (1-4) Readings in Equity, Bilingualism and Biliteracy
Explores topics that are relevant to becoming a scholar and researcher in our field.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6928 (1-4) Readings in Learning Sciences and Human Development
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Graduate Education

EDUC 6929 (1-4) Readings in Educational Foundations Policy and Practice
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 6944 (1-3) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Graduate Education

EDUC 6945 (3) MA Capstone Seminar in Foundations of Education
Supports students completing a summative writing assignment for their Masters degree requirements. Writing assignments will be designed around the professional and academic goals of each student, in collaboration with the student's academic advisor. Students will analyze research studies across different disciplinary and methodological approaches. Through instructor coaching and peer review exercises, students will draft and refine a final assignment.
Requisites: Restricted to MA students in Education (EPSY-MA, EFPP-MA, HEDU-MA).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Graduate Education

EDUC 6954 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Graduate Education

EDUC 6964 (3) Capstone: Inquiry in the Content Areas
Supports students in using and building on the ideas and content encountered in previous coursework. Requires students to conceptualize, design and implement an original research project that will serve as exit requirement for the degree. Reads and engages in research and theory associated with Teacher Research (i.e. research conducted by teachers for professional purposes).
Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 7015 (3) Teaching Internship in Teacher Education
One-semester teaching internship in an undergraduate or graduate foundations course.
Additional Information: Departmental Category: Graduate Education

EDUC 7055 (3) Philosophy of Education
Examines exemplars of educational philosophy from ancient times to the present day, emphasizing their relevance and application to current controversies in education (e.g., free speech, multiculturalism, and affirmative action). Formerly EDUC 5055.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education
EDUC 7105 (3) Collaboration to Meet Special Needs
Covers effective collaboration practices involving the special education teacher, other educational personnel, students, and parents. Bilingual special education considerations in collaboration will be described. Issues regarding inclusion will be explored. Practical application to teaching and learning will be made. Strategies for disseminating information and collaborative activities will be discussed.
Additional Information: Departmental Category: Graduate Education

EDUC 7115 (3) Critical Inquiry into Becoming a Teacher Educator
Designed to support doctoral students in development as university level instructors/teacher educators, particularly in relation to undergraduate courses that center equity and justice as central topics, this course will draw on critical perspectives and pedagogies to shape course goals, material/content and pedagogical approach. This will be done in two primary ways: a) through the use of pedagogies adapted from Freirean Culture Circles and Baolian Theater, and b) through the application of practitioner inquiry approaches designed to develop critical, reflective practices/habits of mind among teachers and teacher educators.
Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 7316 (3) Intermediate Statistical Methods
Studies sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis.
Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).
Additional Information: Departmental Category: Graduate Education

EDUC 7326 (3) Quasi-Experimental Design in Causal Inference in Social Sciences
Focuses on experimental and quasi-experimental designs in educational research; applications of the general linear mode; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed design; analysis of covariance; effects of assumption violations; and related computer programs for statistical analysis.
Additional Information: Departmental Category: Graduate Education

EDUC 7336 (3) Methods of Survey Research and Assessments
Examines theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview and mailed surveys, assessing reliability and validity, sampling plans, data reduction (e.g., factor analysis), and analysis of continuous and categorical data.
Requisites: Requires prerequisite courses of EDUC 5726 and EDUC 7316 (all minimum grade D-).
Additional Information: Departmental Category: Graduate Education

EDUC 7346 (3) Ethnographic Methods in Educational Research
Explores the history of ethnography and its translation into educational research. Students practice participant observation, interviewing, journal writing, artifact searches, qualitative analysis and interpretation, and styles of reporting.
Requisites: Requires a prerequisite course of EDUC 6325 (minimum grade C-).
Additional Information: Departmental Category: Graduate Education

EDUC 7376 (3) Theory and Practice of Educational and Psychological Measurement
Introduces theories of measurement and applications, and presents classical test theory. Includes quantitative concepts, methods, and computational techniques for the development, application, and evaluation of measurement instruments in social/behavioral science and education.
Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).
Additional Information: Departmental Category: Graduate Education

EDUC 7386 (3) Educational Evaluation
Builds an understanding of the range of approaches taken by educational evaluators, focusing particularly on the evaluation of programs. Explores the nature of different evaluation perspectives and how these disparate views translate into methodological and conceptual models. Students develop a familiarity with the most common and influential approaches to evaluation.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 7416 (3) Seminar: Research Methodology
Presents selected topics for advanced study in educational research, statistics, measurement, and evaluation.
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Graduate Education

EDUC 7436 (3) Item Response Theory
Introduces contemporary advanced multivariate techniques and their application in social science research. Focus on factor analysis and variance, structural equation modeling. Prior experience with multiple regression is assumed.
Requisites: Requires prerequisite courses of EDUC 7316 and EDUC 7376 (all minimum grade D-).
Additional Information: Departmental Category: Graduate Education

EDUC 7446 (3) Policy Issues in Education
Explores major policy issues confronting U.S. education and examines the nature and undertaking of educational policy studies. Learn to approach policy issues from a contextual perspective that highlights systemic forces and analyzes and applies differing policy instruments. While a wide variety of policies are covered in the course, it particularly emphasizes issues of educational equity.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 7456 (3) Multilevel Modeling
Covers in depth two advanced multivariate models common to social science research: latent variable (structural equation) models and multilevel (hierarchical) models. Topics may be taught with a particular analytic context, such as measurement of change (longitudinal analysis) or experimental design.
Additional Information: Departmental Category: Graduate Education
**EDUC 7775 (1) Topics in Cognitive Science**
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:**
Departmental Category: Graduate Education

**EDUC 8014 (3) Advanced Seminar in Democracy, Diversity and Social Justice**
Addresses the sociopolitical context of multiculturalism and education, and the sociocultural context of learning. Examines critical issues involved in making schooling responsive to an increasingly multicultural and multilingual society.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:**
Departmental Category: Graduate Education

**EDUC 8025 (3) Seminar: Curriculum Theories**
Examines in depth recent developments in curriculum theory highlighting conceptual, contextual, and normative issues. Substantially explores distinct curricular traditions, corresponding conceptions of the good life along with related approaches to reason and emotion. Focuses on the works of prominent curriculum theorists.

**Additional Information:**
Departmental Category: Graduate Education

**EDUC 8045 (3) Philosophical Issues in Educational Research**
Familiarizes students with important concepts and issues from the philosophy of science and, to a lesser extent, political theory and ethics; grounds such concepts and issues in the literature (often in terms of primary philosophical sources); and stimulates students to apply this material to the field of educational research in an informed way.

**Requisites:** Restricted to PhD students only.

**Additional Information:**
Departmental Category: Graduate Education

**EDUC 8055 (3) Theoretical Issues in Education Policy**
Provides students with an examination of the theories behind education policy analysis. Takes a thematic approach to the study of policy in order to understand how policy agendas are set; how democratic deliberation should be linked with research and policy; and the relationship between politics, media, social structures, research and policies.

**Requisites:** Restricted to PhD students only.

**Additional Information:**
Departmental Category: Graduate Education

**EDUC 8100 (3) Historical and Contemporary Issues in Literacy Research**
In this seminar, students read about, discuss, and respond to issues and debates that have shaped and continue to shape literacy research. The course addresses debates in response to research reports, policy and standards in the past 20 years (beginning in the mid 1990s), as well as the emergence of sociocultural and critical approaches to literacy research. The course traces how scholarly debates and reviews of research represent shifts in the field, and help researchers and educators move towards approaches and methods framing social-justice oriented literacy projects.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8101 (3) Theories of Literacy Research and Practice**
This graduate seminar will examine the foundations and central tenets of influential theories that undergird scholarship in literacy studies. The theories explored will include Critical Race Theory (CRT), critical poststructuralist, feminist, queer, literary, affect, and sociocultural theories. Theoretical traditions will be examined through their historical and social movement roots through their current applications, debates, research techniques, and criticisms, always with particular attention to how they have been taken up in literacy research. A key focus of this course is to examine the utility and limitations of frameworks and consider their possible applications to students’ own research.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8102 (3) Literacy Research Methods**
This graduate seminar focuses on some of the central research methods and methodologies employed by literacy researchers. The course will examine methodologies such as ethnography, practitioner research, participatory research, reciprocal partnerships, discourse analysis, literary and textual analysis, design research, and case study, along with specific methods of data collection and analysis commensurate with study designs. Students will read articles focused on methodology specifically, as well as have opportunities to discuss research articles through a focus on the methods scholars describe and enact. The course includes attention to humanizing research practices and issues of relationship, responsibility, and ethics in literacy research. In addition, the course will engage discussions and support for IRB proposals, generative writing practices and processes, as well as dissemination of research through various genres and in academic, practice focused, and publicly accessible venues. May be repeated up

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8103 (3) Special Topics in Literacy Research**
This course provides students an opportunity for deep engagement with important topics and specialty areas in the field of literacy studies. Focused on topics of current interest in the field, the course supports students to examine issues of research and practice, which may include historical and current trajectories of an area of research, theories that animate an area of research and practice, and the methods through which researchers investigate questions related to the topic. In addition to readings and discussion, students complete writing and multimodal projects that allow students to engage with content and process related to the topic to demonstrate and share their learning.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8115 (3) History and Policy Issues in Teaching and Teacher Education**
Examine how issues and dilemmas in teacher education are grounded in historical and political contexts. Analyze patterns in preparation of new teachers, in mechanisms used to govern entry into teaching and make determinations of quality of teachers and teaching, and in efforts to professionalize and de-professionalize teachers and teaching. Investigate contemporary teacher education debates to better understand potential research-policy-practice connections.

**Requisites:** Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.
EDUC 8125 (3) Seminar: Radical Education Theories
Examines radical analyses of schooling, based on class, gender, sexual identity and race, through which U.S. public schooling is said to maintain dynamics of oppression and domination that undermines the schools’ democratic premise. Scrutinizes the conceptual framework, interpretive and explanatory adequacy, and ethical justification of radical claims.

Additional Information: Departmental Category: Graduate Education

EDUC 8135 (3) Theories and Methodologies for Examining Teacher Learning
Examines the potential range and roles of theory in analyzing prospective and practicing teachers’ learning (experiences). Explores various conceptions of teacher learning, including, but not limited to: teacher learning as a knowledge-centric phenomenon; teacher learning as a process of assembling a repertoire of practice; teacher learning as an identity-work phenomenon; and teacher learning as an activist/action-in-the-world phenomenon.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8145 (3) Designing for Teacher Learning and Teacher Education
Examines questions and issues related to the design of preservice teacher education programs and practicing teachers’ professional development/learning opportunities. Analyzes the program and/or learning opportunity conditions, features and approaches that potentially support and/or constrain prospective and practicing teachers’ learning, particularly in relation to their development and as asset-oriented teachers.

Additional Information: Departmental Category: Graduate Education

EDUC 8155 (3) Advanced Topics in Literacy Education
Examines special topics in theory and research related to literacy and literacy education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8165 (3) Advanced Topics in Mathematics Education
Examines special topics in theory and research related to mathematics education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8175 (3) Advanced Topics in Science Education
Engages participants in the process of curriculum development. Principles that guide the development of curricula and learning environments are discussed as they integrate with learning theory. Participants develop and/or test specific activities in the classroom and modify them as a result. There is a particular focus on incorporating the practices of the discipline into each content-based activity.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8177 (3) Advanced Seminar in Curriculum and Policy in Mathematics & Science Education
This course explores the changing curriculum in school mathematics and science. It will examine the history and evolution of K-20 math and science curricula from the late 1890s to current times. It will examine motivations and political forces that have help shape and change math and science curricula.

Grading Basis: Letter Grade

EDUC 8178 (3) Advanced Seminar on Learning in Math & Science Education
This course focuses on research on the learning of mathematics and science in the K-12 schooling environment. It serves to introduce students to seminal learning theories that have guided and shaped mathematics & science education over the past thirty years (e.g., constructivist, cognitive, situative/sociocultural and critical perspectives). Core ideas within each of these theoretical perspectives will be explored such as knowledge construction and conceptual change, argumentation and reasoning, classroom discourse processes, participation and identity, and access and power. Pragmatic implications of these different theoretical perspectives will also be examined. For example, questions such as the following are considered: What is the purpose of a theory of learning (e.g., for research, for practice)? What constitutes learning within each perspective? What are the implications of a particular theoretical perspective for organizing and analyzing learning environments? What are the implications for differences

Grading Basis: Letter Grade

EDUC 8179 (3) Advanced Seminar in Mathematics and Science Teaching & Teacher Education
This course examines how scholarship on teaching and teacher learning has been evolving in mathematics and science educational research since the 1980s and 1990s. Students will explore theories of teacher learning and how they relate to designs for teacher preparation and professional development. We will also study common designs and design principles for conducting research to study teaching and teacher learning.

Grading Basis: Letter Grade

EDUC 8210 (3) Ways of Knowing in Educational Research
Introduces students to various theoretical perspectives informing educational research and how they are employed to study teaching, learning, and policy in K-12 classrooms. Includes reading and discussion related to the assumptions, questions, methods, and findings associated with theoretical traditions within and across disciplines.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8220 (3) Introduction to Educational Research and Policy
Introduces conceptual and empirical issues and controversies in educational research and policy. Complements other EDUC doctoral courses in quantitative and qualitative methodology.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8230 (3) An Introduction to Quantitative Methods in Educational Research
Explores the use of statistics to formalize study designs in educational research contexts. Introduces causal inference, experimental design, descriptive statistics, linear regression, probability, and the basics of statistical inference. Includes lab-based instruction in the use of statistical software (e.g., R, Excel) to conduct data analysis.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8240 (3) Quantitative Methods II
Continues the exploration of research design in the social sciences, especially the evaluation of the quantitative research reported in professional journals. Introduces instances of the general linear model (both multiple regression and ANOVA) and its application to educational research.

Requisites: Requires prerequisite course of EDUC 8230 (minimum grade D). Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education
EDUC 8250 (3) Qualitative Methods I
Introduces students to the theory and practice of qualitative research in education. First of a two-course sequence covering research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education.

Requisites: Restricted to EDUC-PHD students.
Additional Information: Departmental Category: Graduate Education

EDUC 8260 (3) Qualitative Methods II
Builds on EDUC 8250 to develop knowledge and skills in ethnographic and case study research. Second of a two-course sequence covering qualitative research design, theoretical perspectives, and methods.

Requisites: Restricted to EDUC-PHD students.
Additional Information: Departmental Category: Graduate Education

EDUC 8270 (3) Intermediate and Advanced Application of Quantitative Methods for Behavioral Sciences
This course helps students develop the pragmatic skills needed to conduct quantitative analyses in their own research, in which they must apply concepts with novel data and in novel settings. It also provides a formal introduction to a variety of interstitial topics in quantitative analysis that may be assumed knowledge in more advanced methods courses. In addition, students will learn how to teach themselves new quantitative methods as they need them in their future careers.

Requisites: Requires prerequisite courses of EDUC 8230 and EDUC 8240 (all minimum grade B-).

EDUC 8310 (3) Design of Learning Environments for Radical Possibilities
Design is a tool for imagining radical new possibilities for living together. We will discuss how we can work with community and school partners to leverage cultural and historical resources in design. This course will introduce students to models of design and tools for participatory design used across the Global North and South that can promote individual, social, and institutional change. It will include attention to political, affective, and ethical dimensions of design, as well as explore dilemmas presented by faculty and students engaged in ongoing design projects.

Requisites: Restricted to graduate students only.

EDUC 8348 (3) Human Development in Cultural, Historical, and Sociopolitical Contexts
This course takes a critical approach to exploring the moral, sociopolitical, and bio-psycho-social dimensions of human development. It will introduce students to different theories and methods for studying human development across the lifespan. Many traditional approaches to developmental research treat development in Western Educated Industrialized Rich and Democratic (WEIRD) contexts as normative for all populations. This course will focus on approaches that reject the notion that processes of human development are universal, examining the ways that social, cultural, and geographic environments and histories shape development and life trajectories.

Requisites: Restricted to graduate students only.
Recommended: Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.
Additional Information: Departmental Category: Graduate Education

EDUC 8358 (3) Critical Introduction to Learning Theory and Practice, Part 2
This course builds on content central to Part 1 of Critical Introduction to Learning Theory and Practice, which explores historical and contemporary perspectives in the learning sciences. Special attention is paid to theory and practice which is currently at the leading edge of research and development in the learning sciences, while attending to their roots. This course addresses multiple epistemologies and ways of knowing, including global perspectives and critical theories such as feminist, indigenous, and queer approaches. The course also examines how learning theories can inform transformation of practice toward justice and equity.

Requisites: Requires prerequisite course of EDUC 8358 (minimum grade D-).

EDUC 8605 (3) Research and Professional Ethics for Educational Researchers
Examines the central issues and venerable theories of philosophical ethics that have historically framed research ethics. Also examines contemporary ethical theory that emphasizes a greater attention to the social sciences. Focuses on research ethics (both research of human subjects and research misconduct), various issues of professional academic ethics, and the AERA ethical code.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 8610 (3) Advanced Topics in Educational Equity and Cultural Diversity
Examines special topics in theory and research related to educational equity and cultural diversity in education. Topics vary each semester.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 8615 (3) Language Issues in Education Research
Examines ways in which issues of language can affect the validity of educational research. Discusses how language can be properly addressed with a multidisciplinary perspective through different stages in the process of an investigation, including design, sampling, data collection, and data analysis. Provides the conceptual basis for addressing linguistic diversity from a multidisciplinary perspective.

Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 8620 (3) Language and Power
Through language we enact positionality and identity. Language has the power to shape our assumptions and beliefs. This course explores the relationship between linguistic nationalism and xenophobia, bilingual education and accent discrimination, multilingualism and youth culture, code-switching and translanguaging, etc. Participants will analyze domestic policies and current events to understand how language serves to maintain or disrupt the status quo.

EDUC 8630 (3) Bilingual and Biliterate Development in Children and Adolescents
This advanced doctoral seminar introduces doctoral students to key theories and empirical research on bilingual and biliterate development in school age children (preK  12). Participants will explore sociolinguistic, sociocultural, and psycholinguistic perspectives of the language and literacy development of children growing up with two or more languages, and critically examine how varying educational contexts and policies impact the schooling experiences of bilingual learners from early childhood to late adolescence.

Recommended: Doctoral students only.
Grading Basis: Letter Grade
EDUC 8640 (3) Rethinking Disability
Students explore the foundations, trends and future directions of disability in education. Disability is socially, historically, and culturally constructed. It is one of multiple identities that make us human, rather than a problem in need of a cure. This course investigates and disrupts disparities in education that relate to the intersections of disability, culture, race, language, and other identities and explores models for success.
Requisites: Restricted to doctoral students.

EDUC 8710 (3) Measurement in Survey Research
Introduces students to classical test theory and item response theory. Emphasizes the process of developing, analyzing and validating a survey instrument. Focuses on developing a survey instrument with items that derive from a clearly delineated theory for the construct to be measured. Analyzes item responses and put together a validity argument to support the proposed uses of the survey.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 8720 (3) Advanced Topics in Measurement
Focuses on psychometric models for measurement and their applications in educational and psychological research. Emphasizes understanding and evaluating the utility of models from item response theory (IRT). Applies and compares measurement models in the context of simulated or empirical data sets.
Recommended: Prerequisite EDUC 8710.
Additional Information: Departmental Category: Graduate Education

EDUC 8730 (3) Advanced Qualitative Data Analysis
Requires students begin semester with qualitative data already collected (from class project, pilot study, dissertation). Instructors present diverse methods of analyzing data and writing about interpretations. Instructors customize part of course to address specific topic of expertise, e.g., discourse analysis, video analysis, textual analysis, ethnographic analysis.
Repeatable: Repeatable for up to 12.00 total credit hours.
Additional Information: Departmental Category: Graduate Education

EDUC 8740 (3) Advances in the Assessment of Student Learning
Focuses on theories underlying traditional and contemporary proposals for assessment of student learning, and design and research of large-scale and classroom-based methods to assess student learning. Explores intersections between large-scale and classroom assessment, although greater attention is given to issues related to classroom assessment.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 8750 (3) Research in Teaching and Teacher Education
Invites students to acquire a deeper understanding of the history of and challenges in teacher education research, strengthen their knowledge of theoretical and methodological approaches to the study of teacher education, and discuss their own potential contributions to the field.
Requisites: Restricted to EDUC PhD students with plan codes ECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 8804 (3) Special Topics
Designed to meet needs of graduate students with topics of pertinent interest.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graduate Education

EDUC 8844 (1-4) Doctoral Independent Study
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8855 (1-4) Independent Study in Curriculum and Instruction: Doctoral Level
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8866 (1-4) Independent Study in Research and Evaluation Methodology: Doctoral Level
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8877 (1-4) Independent Study in Educational Equity and Cultural Diversity: Doctoral Level
An independent study may be established between a doctoral student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8888 (1-4) Independent Study in Learning and Human Development: Doctoral Level
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8897 (1-4) Independent Study in Educational Foundations Policy and Practice: Doctoral Level
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8935 (1-6) Internship in Curriculum and Instruction
Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8936 (1-6) Internship in Research and Evaluation Methodology
Repeatable: Repeatable for up to 36.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8937 (1-6) Internship in Educational Equity and Cultural Diversity
Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8938 (1-6) Internship in Learning Sciences and Human Development
Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education
EDUC 8939 (1-6) Internship in Educational Foundations Policy and Practice
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Graduate Education

EDUC 8940 (3) Proposal and Dissertation Writing
Provides students with ongoing opportunities to write social science research in the context of the design, analysis and data representation, development, and write-up of students’ dissertation proposals and dissertations. Students will learn to expand how they think about and use evidence, clarify their ideas and arguments, and improve their writing. Students working on proposals and dissertations should enroll.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to EDUC-PHD students.
Additional Information: Departmental Category: Graduate Education

EDUC 8994 (1-10) Doctoral Dissertation
Repeatable: Repeatable for up to 60.00 total credit hours.
Additional Information: Departmental Category: Graduate Education

Curriculum and Instruction
Curriculum and Instruction (C&I) graduate programs focus on teaching and learning in the following curricular areas: Literacy Studies (PhD), STEM Education (PhD, master’s), and Humanities (master’s). Additionally, the MA+ teacher licensure program leads to a Colorado initial teaching license plus a master’s degree in C&I. Coursework focuses on foundations of learning, foundations of education and subject matter knowledge and pedagogy. The programs prepare students to understand the complexities of classroom contexts and teaching practice in relation to education goals of equity, democracy and justice.

Master's Degree
- Curriculum and Instruction - Master of Arts (MA) (p. 1440)

Doctoral Degree
- Education - Doctor of Philosophy (PhD) (p. 1450)

Education - Curriculum and Instruction - Master of Arts (MA)
The Curriculum & Instruction (C&I) master’s degree requires one academic year or more of graduate work beyond the bachelor’s degree.

Program Tracks
Humanities Education Track
This track is designed to support teachers and other education professionals who are interested in developing greater understanding and expertise in the teaching and learning of the humanities. Courses within this concentration provide opportunities for graduate students to strengthen discipline-specific content knowledge, knowledge for teaching humanities and a multidisciplinary understanding of how content, pedagogy and practice that supports teaching and inquiry focused on humans’ social and cultural experience as they navigate institutional, social and political systems, including education. In consultation with the advisor, this degree can be tailored toward students’ goals, interests and desired timeline to degree (typically ranging from 1–2 years)
The program serves practicing teachers, educators working with youth in informal and out-of-school settings, as well as individuals with backgrounds in the humanities wishing to learn more about teaching and learning. This track is only offered as a master's degree. Prospective doctoral students interested in the humanities are encouraged to consider the Literacy Studies, or the Educational Foundations, Policy, and Practice emphasis of the Education PhD (p. 1450) program.

STEM Education Track
The CU Boulder School of Education offers this program to support educators and other education professionals who are interested in developing greater understanding of and expertise in education related to STEM (particularly science and mathematics). The program enables teachers, educational designers and scholars to explore and critically analyze educational, pedagogical, and curricular strategies designed to support students’ STEM learning and identities. Disciplinary connections to critical issues in STEM are strengthened through lesson design and analysis, fieldwork, coursework and research activities. Throughout these experiences, we center equity, democracy, and justice as core concerns in STEM education.
The program serves practicing teachers, educational leaders, designers of informal educational settings, as well as individuals with backgrounds in STEM wishing to learn more about teaching and learning. Graduates of our MA program go on to become teacher leaders, instructional designers, curriculum specialists, district administrators and educational consultants.

MA+ Teacher Licensure
The MA+ teacher licensure program (p. 1460) leads to a Colorado initial teaching license in Secondary Math, Science, English or Social Studies plus a master’s degree in C&I. This program is for candidates who have earned a bachelor’s degree from an accredited institution of higher education and who want to elaborate and deepen the close connections between fieldwork and coursework to become a teacher. For more information, contact the School of Education.

Requirements
General Requirements
Program Requirements
Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.
Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year time limit.

Transfer Credit
Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the
Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Master's degree students who began CU's Teacher Education Program as undergraduates or as post-baccalaureate students have the following transfer credit options:

- If the student took the courses as an undergraduate, they may be eligible to transfer up to two of their track's eligible transfer courses, depending on when those courses were taken and if the credits did not count towards the degree. Contact the School of Education for more information.

- If the student took the courses as a post-baccalaureate student, they may transfer up to two of their track's eligible transfer courses as electives, as long as the courses were taken within the past five years. Note: Students transferring from secondary programs will transfer seven credits; therefore, they will complete a 31-credit master's degree.

**Time Limit**
The master's degree must be completed within four years.

**Program Tracks**

**Humanities Education Track**
In addition to the required core courses, students must complete the following track-specific course requirements.

**Capstone Course**
During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6964 Capstone: Inquiry in the Content Areas. This course is only offered once a year. The Capstone course is a graduation requirement and requires the submission of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

**Eligible Transfer Courses**
See the Transfer Credit (p. 1440) section for details.
Choose at least 3 credit hours of foundations of education curriculum courses. Examples of eligible courses include but are not limited to:

- EDUC 5005: Advanced Social Foundations of Education
- EDUC 5075: Sociology of Education
- EDUC 5085: History of American Education
- EDUC 5301: Queer(ing) Topics in Education
- EDUC 5425: Introduction to Bilingual/Multicultural Education
- EDUC 5726: Introduction to Disciplined Inquiry
- EDUC 6325: Anthropology of Education

Curriculum and Instruction in Mathematics and Science

Choose at least 12 credit hours of curriculum and instruction in mathematics and science courses. Eligible courses include but are not limited to:

- EDUC 5317: Perspectives on Mathematics
- EDUC 5460: Teaching and Learning Physics
- EDUC 5706: Assessment in Mathematics and Science Education
- EDUC 5815: Teaching K-12 Mathematics: Number Sense
- EDUC 5821: Teaching K-12 Mathematics: Algebraic Thinking
- EDUC 5822: Teaching and Learning Chemistry
- EDUC 5833: Teaching and Learning Earth Systems
- EDUC 5835: Teaching K-12 Mathematics: Geometry & Measurement
- EDUC 5850: Teaching K-12 Mathematics: Probability & Statistics
- EDUC 6811: Teaching & Learning Biology In the Classroom

Electives

Choose at least 9 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen in consultation with your advisor.

Capstone Course

EDUC 6964: Capstone: Inquiry in the Content Areas

Total Credit Hours: 30

1. Speak with your advisor about other courses that could satisfy this requirement.
2. See also “Eligible Transfer Courses” below.
3. GRTE courses may not count toward a master’s degree.
4. Students may deepen their content knowledge in the mathematics or science disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

Eligible Transfer Courses

See the Transfer Credit (p. 1440) section for full details.

EDUC 5205: Elementary Mathematics Theory and Methods
EDUC 5215: Elementary Science Theory and Methods
EDUC 5317: Perspectives on Mathematics
EDUC 5375: Problem-Based Math Instruction
EDUC 5385: Problem-Based Science Instruction

Comprehensive Exam

During the final Spring semester prior to graduation, students must enroll in the capstone course EDUC 6964. This course is offered only once a year. The capstone course is a graduation requirement and requires the completion of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

Learning Outcomes

MA students in Curriculum & Instruction will:

- Develop greater understanding and expertise in teaching and learning within and/or across content domains (e.g., Humanities, Literacy, STEM Education).
- Demonstrate professional integrity through ethical conduct, reflection and leadership.
- Collect and analyze information from research and practice to inform decisions and enhance equitable teaching and learning for all students.
- Make educational decisions based on deep engagement with educational scholarship, perspectives and data.
- Understand the importance of partnering with and centering the knowledge of families and communities, particularly those that have experienced histories of marginalization, to work toward social change and educational justice.
- Draw on disciplinary knowledge, perspectives and practices to broaden opportunities personal and social transformation.

Education - Learning Sciences and Human Development

The Learning Sciences & Human Development (LSHD) program takes an interdisciplinary approach to understanding learning, teaching and the design of learning ecologies. The program is particularly concerned with examining learning and development as it happens in and across a range of settings, including schools, community organizations, families and peer groups. In their research and courses, faculty engage with pressing questions of policy and practice. To this end, program faculty enact innovative teaching practices that are attuned to our current technological and socio-political climate. Our interdisciplinary approach encourages students in the program to cultivate a strong commitment to and develop a strong record of working in partnership with schools and communities to organize innovative practices that open up opportunities for transformative learning.

The LSHD program is on the leading edge of the field in its theoretical and practical explorations of social and spatial justice, technology and design, and culture and diversity in learning. LSHD faculty and students are also leaders in theorizing and building partnerships with schools, districts and state agencies, as well as youth and community organizations.
Master’s Degree

- Learning Sciences and Human Development - Master of Arts (MA)
  (p. 1443)

Learning Sciences and Human Development - Master of Arts (MA)

The Learning Sciences & Human Development (LSHD) master’s program focuses on research, theory and professional knowledge about learning environments. Areas of study include K–12 schools, community settings, museums and the variety of contexts that young people navigate in their everyday lives, including digital media and gaming. Although we have a primary focus on children and youth, several faculty members also study processes of teacher learning.
