The program is structured in ways that emphasize the bridging of theory and practice, lending primary emphasis to academic study and research. The program is designed to provide an academic and practical foundation that prepares students for a variety of career pathways. These include, but are not limited to, work in K–12 education, youth-serving community organizations, educational research firms or in the private sector. Faculty advisors and students build programs of study that meet program goals and the student’s interests.

Prior Experience

To make the most of the LSHD MA program, it is helpful—though not required—for students to have taken coursework focused on learning and human development. For example, courses that address topics such as how people learn, cognition and the social and cultural contexts of development, including the study of culture, race, ethnicity, gender or linguistics would be relevant. Commensurate professional or paraprofessional experience in educational settings—in and out of school and with youth and adults—is also a valued prior experience.

Requirements

Required Courses and Credits

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Total Credit Hours 30

1. GRTE courses may not count toward a master’s degree.

Capstone Project

The capstone project is the culminating academic experience for students in the MA program. The capstone project is meant to provide a context in which students can use the conceptual and methodological tools, along with their grounded professional experiences to develop a project designed to integrate their lived experiences with the knowledge they have gained through coursework.

Time Limit

The master’s degree must be completed within four years.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. Students who have transfer credits must complete the transfer of credit paperwork.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B+ or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Educational Foundations, Policy and Practice

Educational Foundations, Policy & Practice (EFPP) graduate programs focus on policy analysis and the application of academic disciplines—anthropology, history, law, philosophy and sociology—to the analysis of education. Programs are devoted to the critical examination of the relations among education, society, culture and government, with special
emphasize issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The master’s program prepares students for a variety of pathways, including policy analyst careers for state and local organizations, and further study at the PhD level. The PhD program prepares students for university faculty positions and other careers requiring deep knowledge of research.

**Master's Degrees**
- Educational Foundations, Policy and Practice - Master of Arts (MA) (p. 1444)
- Higher Education - Master of Arts (MA) (p. 1445)

**Doctoral Degree**
- Education - Doctor of Philosophy (PhD) (p. 1450)

**Educational Foundations, Policy and Practice - Master of Arts (MA)**

The master’s program in Educational Foundations, Policy & Practice (EFPP) includes two possible concentrations, each with a different focus: community-based change, and evaluation and policy analysis. Both concentrations engage students in a critical examination of the relations among education, society, culture and government, with special emphases on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The program stresses analysis of educational theory, policy, and practice by drawing on the humanities and the social sciences. Its foundation is critical scholarship, which examines educational institutions within broad social, political, cultural, legal, and economic contexts in the United States. Program faculty members offer courses in social, cultural, historical, legal and philosophical foundations of education; in policy analysis; transnational, Latinx, African-American, gender and queer studies in education; and in evaluation. Additional related courses are available in other programs within the School of Education and in other departments of the university.

EFPP has designed its master’s program as a flexible program with a relatively small size to encourage strong and enduring relationships among students and faculty. All master’s program concentrations are designed to prepare graduates for diverse roles as educators, advocates or policy analysts in schools, government agencies, think tanks, policy organizations, community organizations or institutions of higher education. This program also prepares graduates to pursue doctoral work.

The following two are possible concentrations, but students are also welcome to design an individualized concentration that reflects their academic interests and professional goals.

**Community-Based Change Concentration**

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as contemporary school reforms and partnerships between schools and communities. This strand of the EFPP MA program is specifically geared toward educators, non-profit leaders, parents, and other community members who wish to gain skills and knowledge that will assist them in becoming powerful advocates for high-quality, equitable education.

Key foundations courses in this concentration include but are not limited to: policy issues in education, philosophy of education, anthropology of education, sociology in education, history of American education, education policy and the law, international and comparative education, queer(ing) topics in education, and issues in African-American education. Students will create a specific course plan around their interests in consultation with their advisor. Research methods courses can include Community-Based Participatory Research, as well as Disciplined Inquiry, Basic Statistical Methods, or Introduction to Qualitative Methods.

**Evaluation and Policy Analysis Concentration**

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as the process of school reform and the development of more equitable education policies. The program is designed to prepare evaluators and policy analysts for careers in academic institutions and agencies at the state and federal levels. Graduates will be able to analyze, recommend, and evaluate public policies.

Key courses in this concentration include but are not limited to: education evaluation, policy issues in education, philosophy of education, education policy and the law, and theoretical issues in education policy. Students will create a specific course plan around their interests in consultation with their advisor. Research methods courses can include Disciplined Inquiry and Basic Statistical Methods, as well as advanced courses in Program Evaluation, Survey Methodology, or Introduction to Qualitative Methods.

**Bachelor’s–Accelerated Master’s Degree Program**

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Ethnic Studies - Bachelor of Arts (BA) (p. 290).

Completing the BAM degree program efficiently requires early and careful planning. Interested students can contact education advisors at edadvise@colorado.edu or 303-492-6555, and Ethnic Studies advisors at ethnicst@colorado.edu or 303-492-8852 at any time.

**Requirements**

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Capstone Course. The master’s degree must be completed within four years.

For more information on requirements for the master’s degree, visit the Educational Foundations, Policy and Practice (http://www.colorado.edu/education/graduate-programs/educational-foundations-policy-practice-efpp/ma-efpp/degree-requirements/) page on the School of Education website.
Degree Requirements
Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit set forth below.

Students select the remaining 6 credit hours in consultation with their advisors, depending on the credit distribution in the above categories.

Education Research
Ordinarily, entering master’s-level students will take the following two courses to meet this requirement:

- EDUC 5716 Basic Statistical Methods
- EDUC 5726 Introduction to Disciplined Inquiry

Those who have already taken one or more comparable courses can adjust their course of study accordingly.

Electives

Students may select 6 credits of coursework in consultation with their advisor.

Capstone Course

3

Total Credit Hours

30

Capstone Course

During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6945 MA Capstone Seminar in Foundations of Education. This course is only offered in the spring semester. The capstone course requires the submission of a paper or project reviewed by faculty to successfully complete both course and graduation requirements.

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours. These transfer credits are accepted only after approval of the department chair or program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed six credits of graduate-level coursework, with a 3.0 GPA, as a degree-seeking student on the CU Boulder campus.

Learning Outcomes

MA students in Educational Foundations, Policy and Practice will:

- Understand and apply various disciplinary perspectives and critical theoretical lenses to analyze educational policy and practice.
- Analyze the relationship between schools and various social, political and economic forces that structure educational aims, institutions and practices.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the ability to evaluate how (and to what extent) various educational policies and practices advance or undermine such aims.
- Develop and practice strategies and skills of policy analysis and program evaluation, in order to effectively analyze, recommend and evaluate public policies and to advocate for high-quality, equitable education.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning.

Higher Education - Master of Arts (MA)

The MA in Higher Education (MAHE) is a professional degree program designed to prepare students for careers in higher education. The MAHE program is designed to help students broaden their knowledge of higher education policy, research and practice, especially in the areas of student affairs, academic affairs, diversity and community engagement.

The professional MA program offers a supportive community and flexible coursework designed to accommodate busy professionals’ schedules. An innovative collaborative effort between the School of Education and various administrative departments on campus, the program offers a dynamic combination of academic knowledge and experiential education.

Requirements

The MA in Higher Education (MAHE) program aims to develop knowledgeable, ethical, and diverse leaders in higher education. Students will broaden their knowledge of higher education in three key areas: the foundations of higher education; research and evaluation; and higher education and student affairs practice. Students complete two professional practicum experiences in higher education as well as a research-based Capstone project, a summative writing project designed around the professional and academic goals of each student, with feedback from their advisor.
Students must successfully complete 36 credit hours of approved coursework while maintaining at least a B (3.0) grade point average, and must pass their capstone course. Additionally, the master's degree must be completed within four years.

**Learning Outcomes**

Students in the MAHE program will:

- Understand the mission, roles, and functions of higher education in the United States, including the history and philosophy of higher education; college student development; and key factors that influence student and organizational behavior.
- Translate theoretical knowledge into meaningful practices in the profession, including in areas such as advising, instruction, supervision, program design, administration and research.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the competencies necessary to engage with diverse students and staff with sensitivity, effectiveness and confidence.
- Practice skills of program assessment, design, implementation, and evaluation, as appropriate for various divisions and offices in higher education. Develop professional relationships with peers and team members in a university setting.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning. Students will be able to offer (and receive) critical and supportive peer feedback, and gain experience presenting work to external audiences.

**Equity, Bilingualism and Biliteracy**

Equity, Bilingualism and Biliteracy (EBB) offers a course of study devoted to the critical examination of theory, practice and policy in two major areas of emphasis, including:

- The education of culturally and linguistically diverse students
- The education of exceptional children

The program stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

Program faculty offer courses in language acquisition theory, program development for bilingual education and English language development and methodologies appropriate for such programs. Faculty also offer courses in special education methodologies, assessment and program implementation. Additional related courses are available in other
programs of the School of Education and in other departments of the university.

The program is designed to train scholars, teachers, resource specialists and administrators for careers in academic institutions, public schools and federal and state agencies. Doctoral level preparation is research-oriented and qualifies graduates to be curriculum specialists in school districts or faculty in university positions.

Our graduate degrees prioritize K-12 bilingualism in the United States, with a strong emphasis on Spanish/English bilingualism.

Master's Degree

- Equity, Bilingualism and Biliteracy - Master of Arts (MA) (p. 1447)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1450)

Equity, Bilingualism and Biliteracy - Master of Arts (MA)

Equity, Bilingualism and Biliteracy (EBB) offers a course of study devoted to the critical examination of theory, practice and policy in two major areas of emphasis: the education of culturally and linguistically diverse students and the education of students with disabilities. The program stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

Areas of Emphasis

Culturally & Linguistically Diverse Education Emphasis

The School of Education offers the master's degree in EBB with an emphasis in bilingual/ELD special education. Completion of this program qualifies one for a Colorado endorsement in the area of Culturally & Linguistically Diverse education (K-12). Some candidates may also be eligible for the Culturally & Linguistically Diverse Education Specialist: Bilingual Education endorsement. Please contact the School of Education for details.

The program provides a range of direct experiences in bilingual/multicultural/ELD education with the opportunity to develop skills and expertise essential to the work of educators of the bilingual/emerging bilingual learner. The overall purpose of the program is to develop sound bilingual/multicultural/ELD competencies in teachers and school leaders. Program coursework includes foundations of bilingual/multicultural education, assessment practices and issues, methods in bilingual and ELD, biliteracy, family/community engagement, and a field-based practicum. Participation in the program may be on a part-time basis. International students seeking participation in this program should consult with a faculty advisor before applying for admission and must complete a practicum in a U.S. K-12 public school. This program is not appropriate for individuals wishing to teach English as a foreign language in other countries.

Culturally & Linguistically Diverse Ed/Special Ed Generalist Emphasis

The School of Education offers the master's degree in EBB with an emphasis in bilingual/ELD special education. Completion of this program qualifies one for teacher license endorsements in two areas of Special Education Generalist (K-12) and Culturally & Linguistically Diverse education (K-12). Program graduates are employed in both general and special education programs. The program offers courses in foundations in special and ELD/bilingual/multicultural education; assessment issues and practices in bilingual/ELD special education; methods of bilingual, ELD and special education; biliteracy; family and community engagement; and a field-based practicum. This program is not suitable for international students seeking preparation in Teaching English as a Foreign Language (TEFL). This is a part-time program for practicing educators with courses offered evenings and summers. This program is designed to be completed over a three-year period.

Social/Multicultural/Bilingual Education Emphasis

This program is a non-endorsement degree with an interdisciplinary focus. The program offers courses in foundations of bilingual/multicultural education, curriculum and methods in multicultural education, and curriculum theory. Participation in the program may be on a part-time or full-time basis.

Requirements

Social/Multicultural/Bilingual Education (Non-Endorsement) Plan

Program Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master's degree within four years.

This program does not lead to an added endorsement in Culturally and Linguistically Diverse Education. This program is most appropriate for those who do not have a teaching license, or for licensed teachers who already have the endorsement in Culturally and Linguistically Diverse Education but need a master's degree.

Required Courses and Credits

The program requires 15 credit hours in bilingual, ELD and multicultural education. The remaining 15 credit hours are electives that may be taken either in the School of Education or in other CU departments, but should be discussed with and approved by an advisor. Education courses must be at the 5000 level or above. GRTE courses may not count toward a master's degree. A maximum of 6 credit hours may be completed in Arts & Sciences courses taken at the 3000 or 4000 level. The frequency of individual course offerings varies; therefore candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Approved coursework meets the following course requirements:

Students must successfully complete 36–37 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their capstone project and complete the master’s degree within four years.

Comprehensive Exam/Capstone Project
A written comprehensive examination or capstone research study must be completed prior to the completion of the master’s degree. The project will reflect the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder. Students must be enrolled in a course in the same semester they present their final project.

Transfer of Credit
Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Culturally & Linguistically Diverse Education (CO CLD Endorsement) Plan
Program Requirements
Student must successfully complete 31 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their capstone project and complete the master’s degree within four years.

Required Courses and Credits
Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 31 credit hours are completed within the four-year limit.

Approved coursework meets the following course requirements:

Comprehensive Exam/Capstone Course

EDUC 5595 Practicum in Linguistically Different: English Language Development

Total Credit Hours

31

Capstone Project
A capstone project must be completed prior to the completion the MA degree. The project will reflect the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- Practicum in Linguistically Different: English Language Development (EDUC 5595): (4 credit hours) Practicum includes 200 hours of in-school work (can be taken over two semester blocks)

Transfer of Credit
Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Special Education Generalist and Culturally & Linguistically Diverse Education (CO Dual Endorsement) Plan
Program Requirements
Students must successfully complete 36–37 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their comprehensive exam and complete the master’s degree within four years.
Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 36–37 credit hours are completed within the four-year limit.

**Comprehensive Exam/Capstone Course**: 3-4 credit hours

**Total Credit Hours**: 36-37

**Comprehensive Exam**

A written comprehensive examination must be completed during the student’s last term of study for the master’s degree. The examination will cover the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- Practicum in Bilingual/Special Education (EDUC 5555): 3-4 credit hours

**Transfer of Credit**

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

**Learning Outcomes**

Students in the Educational Equity and Cultural Diversity MA program will:

- Develop pedagogical expertise in planning for instruction and effectively teaching bi/multilingual students and/or students with identified special needs in PK-12th grade settings.
- Understand the complex interaction of language, culture, identity and learning in and out of schools.
- Develop the knowledge and skills to advocate on behalf of culturally and linguistically diverse learners in schools.
- Build effective partnerships with communities and families in the pursuit of educational equity and opportunity.
- Embrace a holistic/dynamic bilingual lens and an anti-racist stance in making decisions regarding policy, programs, assessment, curriculum and instruction.
- For CLD and Dual Endorsement Programs: Meet requirements for the State of Colorado Endorsement in Cultural and Linguistic Diversity in Education.
- For Double Endorsement Program: Meet requirements for the State of Colorado Endorsement in Special Education.

**Research and Evaluation Methodology**

The Research & Evaluation Methodology (REM) program offers the opportunity to combine substantive interests in education with advanced training in research methods. The program’s central mission is to provide students with the training they need to use sophisticated methods that shed light on policies, programs and practices that have been enacted to facilitate student learning and to mitigate inequality in educational opportunities and outcomes. Students will learn both how to apply a variety of methodological approaches, and, of equal or greater importance, to think deeply about when and why the approach is sensible given the real-world contexts in which these research designs and methods are applied.

A spirit of critical inquiry and intellectual curiosity is a defining feature of the REM community. When claims are made—by students or faculty—it is expected that those claims will be supported by an adequate warrant, drawing on empirical evidence when appropriate.

Within this framing, learning goals for REM students include that they:

- Develop knowledge and skills for applying appropriate research methods and study designs to answer substantive questions about educational policies, programs, and practices aimed at promoting equitable opportunities and outcomes for historically underserved and marginalized populations.
- Learn to communicate relevant findings and insights to a broad audience of stakeholders including the public, policymakers and academic peers.
- Find fulfilling careers in a context that is the best fit for each individual student’s research (and teaching) interests. These careers may be in university teaching and research, research and evaluation in state departments of education, large school districts, think tanks or research firms, federally funded regional research and development
laboratories; assessment and testing organizations; and consultation for government and education agencies.

REM faculty strive to foster an environment for students that is both challenging and supportive. During the weekly “REM seminar,” students have the opportunity to interact with invited speakers, discuss timely research topics and studies, brainstorm ideas for publishable papers, and practice giving oral presentations. Regular interactions among students and faculty is the norm, not the exception. REM faculty teach courses and mentor students with the same commitment and dedication that is evident in our scholarly research. Students will have ongoing support as they embark on a path that begins with coursework, transitions to dissertation prospectus and defense, and culminates in a job that aligns with their particular career aspirations in educational research.

Students participate in graduate research assistantships each semester and most can expect to work with faculty on research projects as part of CADRE at some point during their doctoral studies.

The Center for Assessment, Design, Research and Evaluation (CADRE (https://www.colorado.edu/cadre/))

REM students can explore opportunities to be involved in CADRE research. The mission of CADRE is to produce generalizable knowledge that improves the ability to assess student learning and to evaluate programs and methods that may have an effect on this learning. CADRE projects represent a collaboration with the ongoing activities in the School of Education, the university, and the broader national and international community of scholars and stakeholders involved in educational assessment and evaluation. Visit the center’s CADRE Projects and Resources (http://www.colorado.edu/cadre/cadre-projects-and-resources/) website for examples.

Other CU Boulder Center-Based Opportunities

REM faculty are affiliates of various centers at CU Boulder. REM students may have opportunities to gain research experience via faculty collaborations within these centers, which include:

- The Institute of Behavioral Science (https://behavioralscience.colorado.edu/)
- Renée Crown Wellness Institute (https://www.colorado.edu/crowninstitute/)

Career Opportunities

Opportunities for students with a PhD with an area of emphasis in REM include:

- University teaching and research
- Research, evaluation and testing in state departments of education and large school districts
- Research and policy analysis for think tanks like the RAND Corporation, SRI International, and federally funded regional research and development laboratories
- Measurement or statistical analysis for assessment and testing organizations such as the Educational Testing Service
- Consultation for government and education agencies

Examples of our REM graduates’ careers over the past ten years:

- National Center for the Improvement of Educational Assessment (Senior Associate)
- Educational Testing Service (Research Scientist)
- Center for Assessment, Design, Research and Evaluation (Associate Director)
- SRI International (Principal Research Scientist)
- Stanford University (Associate Professor)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1450)

Education - Doctor of Philosophy (PhD)

Overview

The School of Education offers a single doctoral degree in Education. The degree has seven program areas of emphasis, from which a student chooses:

- Educational Foundations, Policy and Practice
- Equity, Bilingualism and Biliteracy
- Learning Sciences and Human Development
- Literacy Studies
- Research and Evaluation Methodology
- STEM Education
- Teacher Learning, Research and Practice

Requirements

Required Courses and Credits

Students must successfully complete 56 credit hours of approved coursework, with 12 credit hours of core courses (see below) taken as a doctoral cohort during the first two years of study. The remaining 44 credits are completed in the student’s area of emphasis. Students work with their faculty advisor to develop an individualized, coherent program of study that includes advanced theoretical, methodological and writing experiences.

Students must maintain at least a B (3.0) average with no grade lower than a B- while enrolled.

Students must complete 30 hours of dissertation credit. Students must be registered for a minimum of 5 dissertation hours per semester after successful completion of their comprehensive exam.

All PhD students are required to take the following four courses in their first and second years:

<table>

**Total Credit Hours**: 12

### Educational Foundations, Policy and Practice

#### Specialty Seminar

- **EDUC 6929**: Readings in Educational Foundations Policy and Practice

#### Writing Seminar

- **EDUC 8940** or **EDUC 8950**: Scholarly Writing for Graduate Students or Proposal and Dissertation Writing

#### Educational Foundations

Course options (examples):

- EDUC 5015: International / Comparative Education
- EDUC 5075: Sociology of Education
- EDUC 5085: History of American Education
- EDUC 6210: Education Policy and the Law
- EDUC 6220: Gender Issues in Education
- EDUC 6230: Ethics in Education
- EDUC 6240: African American Education in the United States
- EDUC 6250: Higher Education in the United States
- EDUC 6260: Transnational Migration, Education, and Citizenship
- EDUC 6325: Anthropology of Education
- EDUC 7055: Philosophy of Education
- EDUC 7446: Policy Issues in Education
- EDUC 8045: Philosophical Issues in Educational Research
- EDUC 8055: Theoretical Issues in Education Policy
- EDUC 8125: Seminar: Radical Education Theories

#### Advanced Methods

Minimum nine hours of advanced research methods courses; these courses may be in advanced qualitative or advanced quantitative methods and may be taken in the School of Education or in other departments of the University. Students concentrating in History of Education or Philosophy of Education may choose to fulfill this requirement with courses in historiography or philosophical inquiry, respectively. These must be chosen in consultation with the faculty advisor.

- **COMM 6410**: Discourse Analysis
- **EDUC 6504**: Issues and Methods in Cognitive Science
- **EDUC 7336**: Methods of Survey Research and Assessments
- **EDUC 7346**: Ethnographic Methods in Educational Research
- **EDUC 7386**: Educational Evaluation
- **EDUC 7396**: Latent Variable and Structural Equation Modeling
- **EDUC 7456**: Multilevel Modeling
- **EDUC 8710**: Measurement in Survey Research
- **EDUC 8720**: Advanced Topics in Measurement
- **EDUC 8730**: Advanced Qualitative Data Analysis
- **EDUC 8348**: Human Development in Cultural, Historical, and Sociopolitical Contexts
- **EDUC 8348**: or **COMM 6410**: Discourse Analysis

#### Non-Education Courses

Minimum of six hours must be taken outside of the School of Education. Courses should be selected in consultation with your advisor and are typically at the 6000 or higher level.

#### Electives

These courses must be selected in consultation with the faculty advisor and are typically at the 6000-level or higher.

**Total Credits**: 44
**Electives**

Minimum six elective hours must be outside Learning Sciences and Human Development, and must be courses other than those used to satisfy the core requirements and the advance topics requirements. These electives may be used to satisfy requirements toward the Institute for Cognitive Sciences certificate.

**Total Credits**

**Literacy Studies**

**Specialty Seminar**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 6925</td>
<td>Readings in Curriculum and Instruction</td>
</tr>
</tbody>
</table>

**Literacy Doctoral Seminars**

Minimum twelve hours of the advanced doctoral courses in literacy studies are required to be taken within the first four years. Depending on the content focus of the course offerings, a course number may be taken more than once with approval of literacy studies faculty. These seminars will be offered minimum of once per academic year. Please plan for these courses in consultation with the faculty advisor.

**Advanced Methods**

Minimum six hours of coursework in qualitative, quantitative, and/or mixed methodologies. Courses must be graduate level and may be taken within or outside of the School of Education. For those also pursuing the Teacher Learning, Research and Practice area of emphasis, one advanced methods requirement can be met through either EDUC 8135 or EDUC 7115. Note that one of these two courses could be fulfilled in conjunction with the Cognate Requirement.

**Writing Seminar**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDUC 8950</td>
<td>Proposal and Dissertation Writing</td>
</tr>
<tr>
<td>or EDUC 8940</td>
<td>Scholarly Writing for Graduate Students</td>
</tr>
</tbody>
</table>

**Cognate Requirement**

Minimum six hours taken outside of the School of Education. Choose a minimum of two courses in an area of specialization to be taken outside of the School of Education. The courses related to a student’s specialty area may be defined by discipline (e.g., linguistics, anthropology, English literature) or by focus (e.g., critical theories of race; Latinx studies; queer studies; poetry; digital humanities). Note that one of these two courses could be fulfilled in conjunction with the Advanced Methods Requirement.

**Electives**

Minimum nine hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

**Total Credits**

**Research and Evaluation Methodology**

**Specialty Seminar**

**Advanced Methods**

Minimum six hours of coursework in qualitative, quantitative, and/or mixed methodologies. Options within and outside of the School of Education may be chosen in consultation with advisor and are typically at the 6000 or higher level.

**Total Credits**

**Non-Education Courses**

Minimum of six hours must be taken outside of the School of Education. Courses should be selected in consultation with your advisor and are typically at the 6000 or higher level.

**Total Credits**

**Non-Education Electives**

A minimum six hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

**Total Credits**

**Qualitative Methods**

An additional qualitative methods course to be taken following the completion of EDUC 8260.

**Total Credits**

**Non-Education Courses**

Minimum of six hours must be taken outside of the School of Education. Courses should be selected in consultation with your advisor and are typically at the 6000 or higher level.

**Total Credits**

**Non-Education Electives**

A minimum six hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

**Total Credits**

**Non-Education Electives**

A minimum six hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

**Total Credits**

**Non-Education Electives**

A minimum six hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

**Total Credits**

**Non-Education Electives**

A minimum six hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.
In addition to EDUC 7115 and EDUC 8135, three hours of advanced methods (qualitative or quantitative) are required. The remaining three hours are met through a course selected from within or outside the School of Education in consultation with the faculty advisor. Although there are several courses that might fulfill this requirement, examples might include but are not limited to those noted below.

Writing Seminar

- EDUS 8950 Proposal and Dissertation Writing
- EDUS 8940 Scholarly Writing for Graduate Students

Cognate Requirement

Students design a pathway that best aligns with their goals. Students might, for example, select a complementary program area of study within the CU Boulder School of Education and complete the twelve (12) hours of Graduate Seminar coursework housed in that program. Students might select a cognate area that allows them to explore a specialty area defined by discipline (e.g., linguistics, anthropology, English literature) or by focus (e.g., critical approaches to race, class, and gender; urban studies). For either of these pathways, the remaining hours may serve as Elective credits chosen in consultation with the advisor and in the context of students’ interests and developing expertise. Regardless of how the student chooses to design this element of the program, we strongly recommend that at least one course be taken outside of the School of Education. Note, too, that these credits may potentially overlap with Advanced Methods.

Electives

- 1 Each program area of emphasis requires a one-credit, specialty seminar course to be taken both fall and spring semesters of the first year. Additionally, first-year PhD students participate in a “Professional Seminar” that meets five times each semester. This course is required to fulfill the credits earned in the fall and spring “Readings” (specialty seminar) course.
- 2 (Studies in Equity, Bilingualism, and Biliteracy) These courses are required if not already taken prior to entering PhD program.
- 3 For students also pursuing the Teacher Learning, Research and Practice area of emphasis, all elective requirements will be met through the Teacher Learning, Research and Practice required seminars.

Dissertation Credit

All doctoral students must take a minimum of 30 dissertation hours (EDUC 8994 Doctoral Dissertation).

Students are allowed to take up to 10 hours prior to passing their comprehensive exam. Once students pass their comprehensive exam, they must be registered for a minimum of 5 dissertation hours every semester. Students may be registered for 3 hours if they are “off-campus” status, meaning they are not on appointment and are not taking any coursework hours.

Students must be registered for a minimum of 5 dissertation hours during the semester they defend.

Publishable Paper Requirement

In addition to coursework requirements, doctoral students should be immersed in ongoing research with faculty as early in their program as possible. All doctoral students in the School of Education (SOE) are required to complete, at a minimum, one “publishable paper” by May of their third year in the program.

Please see the School of Education Student Handbook (https://www.colorado.edu/education/student-handbook/) for more information on this requirement.

Comprehensive Examination

Students must schedule comprehensive examinations or “comps” with the SOE by completing an application for candidacy form and emailing soe.gradvise@colorado.edu with the names of their committee members and the date of their exam at the beginning of the semester they plan to take their comprehensive exams. Students should also request a room booking at this time. For remote examinations, the chair must set up the Zoom room for the event. The comps committee shall consist of the major advisor and two additional SOE or CU Boulder faculty members. The SOE Associate Dean of Students and the Associate Dean for Research serve as additional pro-forma (non-examining) committee members. The chair must have a regular Graduate Faculty appointment. Other committee members must have regular or special Graduate Faculty appointments. The student must be registered during the semester that the comprehensive examination is taken.

Please see the School of Education Student Handbook (https://www.colorado.edu/education/student-handbook/) for more information on this requirement.

Proposal Committee

Once students have successfully passed their comprehensive exam, they should consult their faculty advisor to propose their dissertation proposal committee.

The dissertation/proposal chair must be a faculty member who is rostered in the doctoral candidate’s program area who holds a regular Graduate Faculty Appointment (GFA). In the event that the doctoral candidate would like a dissertation chair from another program area, they may be invited to serve as a co-chair. Once the candidate and the dissertation advisor have agreed on the topic of the dissertation, they should proceed together to identify the full dissertation/proposal committee.

Consistent with the Graduate School’s requirements, the dissertation/proposal committee must include at least five faculty.
Three committee members (out of 5) must be CU Boulder faculty, and could all be SOE faculty members.

One committee member (out of 5) must be CU Boulder faculty, a.k.a. “outside member,” who is not an SOE faculty member.

The Grad School defines “outside member” as someone who has a regular GFA i.e., a CU Boulder faculty member) but is not in the student’s home department; in our School, the “home department” is the SOE.

Up to two committee members (out of 5) could be external to CU Boulder (i.e., not faculty members at CU Boulder) as long as they have appropriate GFAs.

The Chair must have regular membership on the graduate faculty. The other members must have regular or special memberships on the graduate faculty. Note that if a student is pursuing a joint or dual-degree, at least two of the faculty must hold graduate appointments in the student’s SOE program area. Special membership, which includes faculty from other institutions, requires the approvals of the Associate Dean of Students and the Graduate School. The entire list of prospective committee members must be submitted to the Graduate Program Coordinator at soe.gradvise@colorado.edu and approved by the Associate Dean of Students at the start of the semester during which the proposal will be defended, and then re-approved at the start of the semester during which the dissertation will be defended.

Please check the deadlines sheet for dates.

Please see the School of Education Student Handbook (https://www.colorado.edu/education/student-handbook/) for more information.

Dissertation Proposal and Oral Defense

The dissertation proposal is a forward-looking document that outlines the doctoral candidate’s proposed terrain of study through elaborating the following: a justification for the study; the conceptual framework and review of relevant literature; and the methodology. The written document should provide a clearly articulated and defensible stance, one which will provide the basis for further discussion among and planning by the proposal committee.

The dissertation proposal must describe the proposed study in sufficient detail so that members of the committee can judge the significance of the intended research and the adequacy of the planned study methods.

The oral defense of the dissertation proposal is a meeting where the candidate and five members of the committee agree to the purpose and methods of the proposed study. All members of the PhD examining committee (“dissertation/proposal committee”) are expected to participate in the proposal oral defense and sign the formal proposal examination form. After the dissertation committee members have reviewed the proposal and signed the proposal signature page it must be sent electronically to soe.gradvise@colorado.edu.

If the proposed study involves human subjects, the doctoral candidate must obtain the approval of the University of Colorado Boulder Institutional Review Board (IRB). A copy of the IRB approval of the proposed research must accompany the signed proposal signature page when it is submitted to the Graduate Programs Coordinator.

Please see the School of Education Student Handbook (https://www.colorado.edu/education/student-handbook/) for more information.

Dissertation Committee and Final Defense

Consistent with the Graduate’s School’s requirements for the final PhD examination, the dissertation/proposal committee must include at least five faculty:

Three committee members (out of 5) must be CU Boulder faculty, and could all be SOE faculty members.

One committee member (out of 5) must be CU Boulder faculty, a.k.a. “outside member,” who is not an SOE faculty member.

The Grad School defines “outside member” as someone who has a regular GFA i.e., a CU Boulder faculty member) but is not in the student’s home department; in our School, the “home department” is the SOE.

Up to two committee members (out of 5) could be external to CU Boulder (i.e., not faculty members at CU Boulder) as long as they have appropriate GFAs.

The Chair must have regular membership on the graduate faculty. The other members must have regular or special memberships on the graduate faculty. Note that if a student is pursuing a joint or dual-degree, at least two of the faculty must hold graduate appointments in the student’s SOE program area. Special membership, which includes faculty from other institutions, requires the approvals of the Associate Dean of Students and the Graduate School. The entire list of prospective committee members must be submitted to the Graduate Program Coordinator at soe.gradvise@colorado.edu and be re-approved by the Associate Dean of Students at the start of the semester during which the dissertation will be defended.

All members of the final PhD examining committee (“dissertation committee”) are expected to participate in the dissertation oral defense and sign the formal final examination form.

Doctoral candidates must deliver the final dissertation text to all committee members at least three weeks before the scheduled dissertation defense. This allows the committee two weeks to review and evaluate the dissertation. The Chair will request that committee members provide substantive feedback, preferably in writing, about the dissertation whether the document is defense-ready. If it is not ready, the candidate is given more time to work on it and the defense will be rescheduled.

Please check the deadlines sheet for dates, and the School of Education Student Handbook for more information.

After successful completion of dissertation defense, the completed dissertation must be uploaded to the Graduate School according to Graduate School procedures and deadlines. Please see the Graduate School website for details.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 21 credit hours, and is accepted only after approval of the faculty advisor and the Graduate Programs Coordinator, in consultation with the Associate Dean of Students. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.
Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Students who have applicable credits to transfer to their PhD degree program must complete the transfer of credit paperwork.

**Time Limit**
The doctoral degree must be completed within six years, including defending the dissertation and submitting it to the Graduate School. A one-year extension may be granted if formally requested in writing, recommended by the student’s faculty advisor, and approved by the Associate Dean of Students and the Dean of the Graduate School. The extension request must show valid reasons as to why an extension is needed. If an extension is granted, all degree requirements must be completed within the extended time period.

**Establishing State Residency**
PhD students who move to Colorado from another state need to petition for Colorado in-state tuition classification within one year so they are eligible for in-state tuition during second year of graduate study. Proof of residency includes a Colorado driver’s license and vehicle registration, voter registration, filing Colorado income taxes and proof of employment. Students should save a signed copy of their Graduate Student Assistantship offer letter to serve as proof of employment.

Detailed instructions on how to apply for Colorado residency (also called domicile) can be found on the Office of the Registrar’s State Residency webpage (http://www.colorado.edu/registrar/students/state-residency/).

**Areas of Emphasis**

**Educational Foundations, Policy, and Practice**
The Educational Foundations, Policy, and Practice (EFPP) program area of emphasis focuses on policy analysis and the application of academic disciplines—anthropology, history, law, philosophy and sociology—to the analysis of education. Programs are devoted to the critical examination of the relations among education, society, culture and government, with special emphasis on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The EFPP program area of emphasis prepares students for university faculty positions and other careers requiring deep knowledge of research.

**Equity, Bilingualism, and Biliteracy**
The Equity, Bilingualism, and Biliteracy (EBB) program area of emphasis stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

EBB is specifically geared to preparing researchers and leadership personnel in the field of bilingual multicultural education. Program graduates are typically employed in schools of education as faculty and/or researchers. Other graduates also serve in professional positions with state and federal education agencies, as well as local school districts.

**Learning Sciences and Human Development**
Faculty and students in the Learning Sciences & Human Development (LSHD) program area of emphasis study how people learn in the context of organizing for more equitable, sustainable social futures. Researchers consider how the practice of research can inform social change that can improve learning and teaching for K–12 students and their teachers, for undergraduates and the organization of higher education pathways, and in community contexts. Working in partnership with school and community partners is a key component of the approach taken to understanding educational problems and their possible solutions.

The LSHD program prepares graduate students to research and inform collective efforts to improve conditions of learning, particularly for young people from non-dominant communities and the adults (including teachers, community organizers and community members) who work with them. The program emphasizes:

- How a strong foundation in psychological perspectives on education and human development can inform efforts to improve conditions for learning in school and out of school contexts.
- The need to go beyond psychological perspectives to interpret learning and development in social, cultural and historical contexts.
- Social justice as a central concern in studying and informing efforts to improve conditions of learning.
- Humanistic approaches to research that draw on interpretive, phenomenological and social practice theories of human action.

Students work with faculty members who conduct research in a range of settings, including schools, preservice teacher education programs, after-school programs, museums, community organizations, workplaces and grassroots social movements.

**Literacy Studies**
Faculty and graduate students in the Literacy Studies program study and design literacies in print and multimodal modes and in varied contexts. Literacies are framed as central to envisioning and enacting expansive and justice-centered theories and practices for teaching, learning, imagination, and self-expression in K-12 schools, informal learning spaces, and communities. Grounded in critical, social and interpretive conceptions of literacy, our program highlights the interrelationships among theory, research, practice, policy and the potential for equitable social change.

Through multiple methodologies, research in the program occurs in partnership with children, youth, families and teachers in ways that honor and attend to experiences and identities at the intersections of race, language, gender, sexuality, ability and economic opportunity. Doctoral students collaborate with faculty on a range of research projects, engage in community outreach, and work in teacher education programs emphasizing social justice and humanizing approaches to curriculum and instruction that center and address the interests and needs of all learners. The program prepares graduate students for careers in research and teaching in university settings, educational leadership in schools and community organizations, and research and development in the private or nonprofit sector.

Students will have the opportunity to:

- Develop an expansive understanding of literacy and its implications for children, youth, and their families and communities.
- Understand the theoretical perspectives informing literacy research currently and historically.
- Critically examine and apply research methodologies to questions of significance to them and to the field of literacy studies.
- Collaborate with faculty, peers, youth, communities and other educators to pursue research and pedagogical goals.
• Deepen their understanding of theories and practices that situate literacy as essential for dismantling systems of oppression and building toward anti-racist, anti-oppressive, and affirming futures for children and youth, teachers, teacher educators, schools and communities.

Research and Evaluation Methodology
The Research and Evaluation Methodology (REM) program is a place for intellectually curious and motivated students who want to learn about deep research methodology with an eye toward influencing education policy and practice. The most common methodological specializations are:

• Psychometrics and educational assessment
• Applied statistics

The program is a full-time commitment, and all admitted students are supported with five years of funding, including tuition remission and a stipend for living expenses. Students participate in graduate research assistant-ships each semester and can expect to work with faculty on research projects as part of CADRE (http://www.colorado.edu/cadre/cadre-projects-and-resources/), the Center for Assessment, Design, Research and Evaluation.

STEM Education
The STEM Education program offers students an opportunity to build their understanding and expertise in STEM (predominantly science and mathematics) topics, with a special focus on diversity and justice in STEM education. The program helps teachers develop their content knowledge, as well as greater understanding of how learning environments can be designed to foster students’ understanding of and participation in mathematics and science. Our faculty work in deep partnership with STEM faculty in other departments at CU Boulder, as well as with teachers, schools, districts, and community members. The PhD prepares students for careers as researchers and teachers in university settings with a particular emphasis on equity and justice, as educational leaders in schools and community organizations, and as researchers and developers in private and nonprofit sectors.

The TLRP program is grounded in a commitment to the practice, study, and transformation of teacher education in ways that forward and honor humanizing thinking and action. Doctoral students enjoy opportunities to work in and with the school’s multiple teacher education programs and to collaborate with faculty, doctoral students, and other stakeholders (e.g., school partners; community organizations) in the critical design and study of these programs. Conducting research with members of this community provides additional opportunities to deepen understandings from coursework and to pose and pursue questions using innovative research methodologies and methods.

Teacher Leadership - Master of Arts (MA)
To help teachers make a difference in their districts and communities, our innovative online Teacher Leadership program offers graduate certificates that can lead to a master’s degree. Our coursework threads reflective practices, content mastery and skill development throughout so that students can practice leadership skills as they engage with the curriculum. This program is offered entirely online and is organized around asynchronous (course work completed at separate times) as well as synchronous formats (meeting virtually at the same time).

Teacher Leadership - Master of Arts (MA)
To earn the master’s degree, students will complete three graduate certificates. Each certificate blends together on-demand, self-paced online courses with a synchronous capstone course held in the summer. These affordable certificates have been designed for educators looking to enhance their skills and capacities as classroom teachers and leaders and to make a difference in their schools and local communities. Students can choose to take classes and separately complete certificates without enrolling in the full MA program.

Graduate Certificates in Teacher Leadership
The Teacher and Social and Emotional Learning - Graduate Certificate
The certificate in Social and Emotional Learning provides practicing teachers with requisite background knowledge, understanding, and preparation so as to engage students in social and emotional learning. In order for teachers to enable students to become more aware and understanding of their own and others’ emotions, teachers need to understand their own emotions as well.

The arena of social and emotional learning is a new, growing, and much needed public school curricular domain. During the last three decades, public schools have focused almost exclusively on cognitive academic outcomes. While some progress has been achieved, the consensus seems to be that a renewed emphasis on the whole student needs to be restored. At the same time teachers’ professional work conditions have deteriorated. Teachers new to the field are leaving the profession
at greater rates than in the past. Teacher “burnout” is a recognized and acknowledged public education phenomenon.

Teaching Culturally and Linguistically Diverse Students - Graduate Certificate

The certificate in Culturally and Linguistically Diverse Education will offer teachers an introduction to the history and current policy and laws that relate to emerging bilingual learners in Colorado public schools. Teachers will learn about the process of language acquisition, develop skills and strategies to teach English and adapt their curriculum and instruction to the developing needs of emerging bilingual learners, and learn key strategies for engaging diverse families in their school and classroom communities.

Leading for Change in Science Assessment Practice - Graduate Certificate

In this certificate, teachers learn how to adapt, develop and pilot assessments that elicit students’ integrated understanding of disciplinary core ideas and crosscutting concepts and that connect to students’ interests and identities. This certificate supports the needs of partnerships in Colorado and beyond in to develop assessment systems aligned to new science standards.

Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

The four-course certificate explores the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools. The certificate will prepare educators to lead efforts to promote compassion and dignity in schools. The certificate provides educators with supports and resources for caring for themselves and for cultivating and sustaining compassion for students, families, their school community and colleagues. The courses prioritize ways in which educators can see and feel their own daily teaching practices, struggles, constraints and joys reflected in the curriculum as well as the ways in which educators might become more compassionate teacher leaders. The compassion practices and skills embedded in the courses support district-level equity goals of creating safe and inclusive schools that challenge racism and promote justice. The certificate draws upon rigorous research, contemplative wisdom and deeply embedded lived experience of educators. The certificate was co-designed by the Crown Institute and the Compassion Institute working in collaboration with teachers, counselors and administrators.

Rethinking Inclusive and Special Education - Graduate Certificate

This certificate prepares educators to be leaders in Rethinking Inclusive and Special Education in their schools and districts by humanizing students with dis/abilities and the systems designed to support them, by gaining valuable knowledge about legal, historical and social precedents in special education, and by expanding their instructional toolkit. Educators will examine federal, state, and local policies and they will also learn practical strategies they can use to plan instruction and to support students in general education and intervention settings. Each course will draw upon culturally and linguistically appropriate practices that attend to the needs and strengths of all students, with an emphasis on creating equitable learning environments. Course content and assignments consider dis/ability to be one of multiple identities that makes each of us human, rather than a defect or problem in need of a cure. We use the term dis/ability, choosing purposefully to place a slash between dis and ability.

Designing for Learning: Inquiry-Based Pedagogy for K-12 Educators - Graduate Certificate

Dr. Gloria Ladson-Billings argues that instead of organizing curriculum and instruction around the question, “What do you want to be when you grow up,” we can go further in supporting young people in meaningful, culturally relevant and sustaining ways if we instead ask: “What problems do you want to solve?” This certificate focuses on how to follow Ladson-Billings’ suggestion and re-organize our pedagogies around the questions and problems that youth and their communities want to pursue. Rather than approaching teaching as a process of transmitting information and skills to youth, this certificate helps teachers position youth as people whose questions, problems, and problem-solutions are inquiry-worthy. The certificate offers coursework that introduces teachers to research and theorizing about how people learn through inquiry, how communities engage in knowledge-building and inquiry within and across subject areas, and how teachers can organize curriculum and pedagogy to create inquiry-based learning experiences with young people in schools. The certificate culminates in a capstone experience positioning teachers as pedagogical leaders who can organize and sustain professional learning among peers and colleagues through practitioner inquiry into how young people learn when given the opportunity to pursue questions and problems that they want to solve.

Teachers Leading Change - Graduate Certificate

This certificate focuses on understanding and developing leadership skills that enable teachers to engage effectively in shared leadership and proactively expand their sphere of influence in meaningful ways. A core tenet of the courses is that teachers start to or continue to see themselves as leaders, to effectively take on a leadership stance, and to do so in a way that feels authentic and builds on each teacher’s own histories and priorities for growth. The courses provide students with ideas and tools for leading change in a variety of educational spaces, including within district workshops and community networks.

Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1791) section of the catalog for more information.

Program Requirements

Teacher Leadership - Master of Arts (MA)

The MA in Teacher Leadership degree requires completion of any three teacher leadership certificates (a minimum of 30 credit hours of approved, graduate-level coursework) and a minimum cumulative grade-point average (GPA) of 3.00.

Once a student has completed three of the 10-credit online certificates that prepare them for leadership in their teaching career, they will be awarded the MA in Teacher Leadership. A comprehensive final examination is not required.

People who enroll in the MA in Teacher Leadership must currently be a practicing educator with an established education site. This program does not offer endorsements or licensure.

**Total Credit Hours** 10

In order to earn a certificate, students must receive a minimum grade of a C or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.
Plan(s) of Study

Students must complete three of the 10-credit online certificates to be awarded the MA in Teacher Leadership. Each graduate certificate in teacher leadership requires 10 completed credits, as follows:

- Three two-credit asynchronous classes, taken in sequence. The two-credit asynchronous course sessions are self-paced and must be completed within a six-month period. These classes must be completed two weeks before beginning a synchronous capstone in the summer.
- One four-credit synchronous class, taken in the summer. The last course for all certificates is a synchronous capstone course that brings together all the content and curriculum. This course runs as a 3-week intensive after academic school years end in May/June.

Learning Outcomes

Teacher Leadership - Master of Arts (MA)

Knowledge outcomes:

- Teachers will examine and understand the central knowledge claims within each certificate domain.
- Teachers will examine and understand the distinct instructional strategies within each certificate domain.
- Teachers will examine and understand the particular K-12 curricular content for their students’ development.
- Teachers will utilize this certificate domain knowledge in the creation of a classroom, school or community implementation plan.

Skill outcomes:

- Teachers will become acquainted with and able to convey the relevant domain’s content knowledge to students, other teachers and community members.
- Teachers will become acquainted with and able to convey the distinct instructional strategies within each certificate domain to students, other teachers and community members.
- Teachers will be able to convey the relevant K-12 curricular content to their students.
- Teachers will be able to engage other teachers and community members so as to further their understanding of and see the value of their chosen certificate domain.

Graduate Certificates in Teacher Leadership

Social and Emotional Learning - Graduate Certificate

Knowledge outcomes:

This certificate will prepare teacher leaders to:

- Examine and reflect on the role of emotions in teaching and learning.
- Know the important distinct features and curricular approaches utilized in K-12 SEL curricula; consider alternative approaches to student well-being.
- Choose and justify the appropriate K-12 or teacher SEL programming for their setting.

Skill outcomes:

This certificate will prepare teacher leaders to:

- Know the ways in which their emotions affect their classroom interactions and educational contexts.
- Implement an existing or develop an alternative SEL curriculum for their setting.
- Identify or develop a teacher SEL approach for their setting.

Culturally and Linguistically Diverse Education - Graduate Certificate

This certificate will prepare teacher leaders to:

- Recognize and understand the cultural and linguistic differences within their classroom, school and communities.
- Analyze their own classroom as a site for second language acquisition and make appropriate adjustments.
- Use knowledge of factors affecting second language acquisition to modify instruction for multilingual students.
- Capably address the linguistic and cultural differences in classrooms in ways that build on students’ linguistic and cultural diversity.
- Can assess content learning of students who are at different levels of English proficiency.

Leading for Change in Science Assessment Practice - Graduate Certificate

The certificate will prepare teacher leaders to:

- Explain the key assumptions of the vision for equitable teaching and learning in A Framework for K-12 Science Education to teachers and other leaders.
- Identify supports needed to help teachers make shifts to teaching and assessment to address new science standards.
- Design tasks that invite students to explain phenomena and solve problems that connect to their interests, experiences and identities.

Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

The certificate will prepare teacher leaders to:

- Consider the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools.
- Explore supports and resources for caring for themselves.
- Identify and practice skills to cultivate and sustain compassion for students, families, their school community and colleagues.
- Apply compassion tools and resources to serve as compassionate leaders in school and community settings and to address the many challenges they face in today’s increasingly precarious climate.

Teachers Leading Change - Graduate Certificate

The certificate will prepare teacher leaders to:

- Describe how to cultivate authentic professional learning communities and a school climate that builds upon the strengths and expertise of teachers as leaders.
- Identify and practice facilitation moves for purposeful coaching activities that foster teacher learning.
- Explore and implement methods to support change in teacher-led networks.
- Synthesize concepts, practices, and resources to develop a plan of action that addresses a pressing need in public education.
Inclusive and Special Education
The certificate will prepare teacher leaders to:

- Understand the historical, political, and social influences on inclusive and special education.
- Identify the features of creative, flexible and supportive inclusive learning environments for students with and without dis/abilities.
- Use instructional strategies to include students with dis/abilities and those with a range of learning strengths and needs in curriculum and school structures.
- Synthesize knowledge on inclusive and special education to create and implement an advocacy project.

Designing for Learning: Inquiry-Based Pedagogy for K-12 Educators
- Graduate Certificate
The certificate will prepare teacher leaders to:

- Apply current research exploring how people learn in order to demonstrate the importance of inquiry-based learning as a valid pedagogical strategy.
- Consider how different cultural communities—including subject areas and disciplines—engage in inquiries to build understanding and how communities can incorporate young learners into these inquiries.
- Investigate how different K-12 instructional designs orchestrate curricular and pedagogical tools to organize inquiry-based learning experiences.
- Develop and, if feasible, carry out an instructional design that organizes an inquiry-based learning experience within or across subject areas using a combination of curricular and pedagogical tools.
- Develop and, if feasible, conduct a practitioner inquiry using tools of teacher research to examine and analyze how inquiry-based pedagogies could transform your classroom, your learning community and yourself as a teacher.
- Prepare possible plans for engaging in teacher leadership to build capacity for inquiry-based pedagogies and practitioner inquiry in your school/system.

Teacher Licensure Program
The MA+ Teacher Licensure program leads to a Colorado initial teaching license in secondary (grades 7–12) Mathematics, Science, English Language Arts, or Social Studies, plus a master's degree in Curriculum & Instruction. This offers an efficient and experiential route to earning a master's degree with teaching licensure.

This program is for candidates who have earned a bachelor's degree from an accredited institution of higher education and want to elaborate upon and deepen the close connections between fieldwork and coursework to become a teacher. Graduate students follow a planned sequence of core courses that meet state content preparation standards, complete a master’s degree, and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and 7–12 school placements.

Students who successfully complete all School of Education requirements will be recommended for a Colorado initial teaching license.

The teacher education programs at the University of Colorado Boulder do not prepare candidates for teacher licensure exams in states other than Colorado. For students planning to seek professional licensure or certification in a state other than Colorado, it is strongly recommended that you contact the appropriate licensing entity in the state in which you are, or plan to be, located to seek information and guidance regarding licensure or certification requirements and how the Colorado license may transfer in advance of program completion. If you will have to take an additional course or pass a different licensure exam to transfer your license, your contact person at the correct state agency will help you plan for that and avoid surprises.

Program Mission & Commitments
The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators who desire to invest and succeed in school. This involves noticing youth; building relationships with them; valuing their perspectives; and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion, fuel both learning and teaching.
- Teachers must design equitable learning environments in which all youth are engaged in robust and consequential learning.
- Teachers’ instruction and student learning are always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matter and must be analyzed. Our language and action construct or constrain opportunities for youth to build meaningful, positive and sustained relationships to learning and one another.

Colorado Teacher Quality Standards
Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below:

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach. The secondary teacher has knowledge of literacy and mathematics and is an expert in his, her, or their content endorsement area(s).
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers demonstrate professionalism through ethical conduct, reflection and leadership.

Admission Requirements
To be eligible for admission to the MA+ program, applicants must meet all of the requirements below. Please note, satisfying the minimum criteria does not guarantee acceptance.

Secondary Mathematics and Secondary Science
To be considered for admission, applicants must meet the following:
• Hold a bachelor's degree from an accredited institution of higher education.
• Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area coursework. Please note, GRE Scores are not required for the MA+ program.
• Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE, or Praxis CORE exam will also satisfy the requirement.
• Complete content coursework. Applicants must complete all content coursework for their teaching area prior to the beginning of the fall semester in the program. Any candidate who has not completed their content coursework by that time will be dismissed from the program or may be given the option to defer admission one year.
• Complete the appropriate, state-approved licensure exam (currently the Praxis Subject Assessments exams) for their content area prior to the beginning of the beginning of the fall semester in the program. Any candidate that has not passed the licensure exam by the time their program this time will be dismissed from the program or may be given the option to defer admission one year.
  • Praxis Mathematics: Content Knowledge (test code 5165)
  • Praxis General Science: Content Knowledge (test code 5435)

Secondary English Language Arts and Secondary Social Studies
To be considered for admission, applicants must meet the following:
• Hold a bachelor's degree from an accredited institution of higher education. English Language Arts applicants must have a degree in English Literature, Ethnic Studies, Spanish Literature, or Humanities with a literature emphasis.
• Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area coursework. Please note, GRE Scores are not required for the MA+ program.
• Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE, or Praxis CORE exam will also satisfy the requirement.
• Complete content coursework. Applicants must complete all content coursework for their teaching area prior to the beginning of the spring semester in the program. Any candidate who has not completed their content coursework by that time will be dismissed from the program or may be given the option to defer admission one year.
  • Praxis English Language Arts: Content Knowledge (test code 5038)
  • Praxis Social Studies: Content Knowledge (test code 5081)

MA+ Secondary English Language Arts (7–12) Teacher Licensure Program
Teacher licensure candidates must maintain a 3.0 cumulative GPA in their content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Total Credit Hours | 33

Student Teaching
Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring semesters of the program. Student teaching coursework does not count towards the Master's degree.
Required Tests and Assessments

Basic Skills: Prior to Student Teaching
Complete an appropriate, college-level math and composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Spring Semester of Program
Pass the state-approved licensure exam, PRAXIS English Language Arts: Content Knowledge (test code 5038).

MA+ Secondary Mathematics (7–12) Teacher Licensure Program
Teacher licensure candidates must maintain a 3.0 cumulative GPA in their content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Total Credit Hours 34

Student Teaching
Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring Semesters of the program. Student teaching coursework does not count towards the Master's degree.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching
Complete an appropriate, college-level math and composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Fall Semester
Pass the state-approved licensure exam, PRAXIS Mathematics: Content Knowledge (test code 5161).

Teacher Performance Assessment
Pass a performance-based, subject-specific assessment designed by program faculty.

MA+ Secondary Science (7–12) Teacher Licensure Program
Teacher licensure candidates must maintain a 3.0 cumulative GPA in their content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Students must complete 24 credit hours in one of the sections below:

- Biology (may include courses from biology area above). Coursework must include the study of general biology, matter & energy in living systems, ecology, evolution, genetics, molecular biology, human anatomy, environmental biology and biotechnology.
- Chemistry (may include courses from chemistry area above). Coursework must include the study of analytical, inorganic, organic and physical chemistry.
- Earth/space science (may include courses from Earth/Space Science area above). Coursework must include the study of environmental science, astronomy, historical & physical geology, meteorology, oceanography, and geomorphology & earth systems.
- Environmental science. Coursework must include the study of ecology and astronomy, and 17 credit hours in biology.
- Physics (may include courses from Physics area above). Coursework must include the study of mathematics through differential equations, astronomy, atomic & nuclear, classical mechanics, electricity & magnetism, heat & thermodynamics, optics & sound, quantum mechanics, radiation & radioactivity, relativity and waves.

The College of Engineering and Applied Science's mission is to generate new knowledge in engineering and related fields, and to equip students from diverse backgrounds to become leaders and citizens responsible for the betterment of individuals and society. Our vision is to be a recognized world leader for excellence and innovation in engineering research and education, with an emphasis on inclusive excellence, active learning and global society.

**Degree Programs**

Graduate degrees are offered in the following areas:

- Aerospace engineering sciences (p. 1465)
- Architectural engineering (p. 1486)
- Biomedical engineering (p. 1493)
- Biological engineering (p. 1501)
- Chemical engineering (p. 1496)
- Civil engineering (p. 1502)
- Computer science (p. 1519)
- Creative technology and design (p. 1550)
- Electrical engineering (p. 1557)
- Engineering management (p. 1582)
- Environmental engineering (p. 1590)
- Materials science and engineering (p. 1596)
- Mechanical engineering (p. 1600)
- Technology, cybersecurity and policy (p. 1519)

**Policies & Requirements**

**Academic Excellence**

Graduate study in engineering at the University of Colorado Boulder offers a challenging, collaborative environment with exceptional possibilities. Graduate education at the College of Engineering & Applied Science involves the creation and dissemination of knowledge in many forms.

**Academic Standards**

**Academic Policies**

College of Engineering and Applied Science graduate students must abide by policies within their programs of study, college and the Graduate School policies. Students should refer to these websites often; policies, procedures and forms may be updated throughout the academic year.

**Academic Integrity**

Graduate students in the College of Engineering and Applied Science may be required to pass an academic integrity quiz.

See also the campuswide Academic Integrity (p. 1035) and Student Conduct (p. 1052) sections and the Honor Code (http://honorcode.colorado.edu/) website.

**Academic Standing**

Refer to the Graduate School (p. 1034) for details.

**Credit and Enrollment**

**Attendance and Full-Time Enrollment**

While the majority of our students attend classes on the Boulder campus, many of the college’s graduate degrees and certificates are available online through Boulder Connect (http://www.colorado.edu/connect/). Attendance and enrollment requirements are governed by Graduate School policies (http://www.colorado.edu/graduateschool/)

---

**Engineering & Applied Science**

The College of Engineering and Applied Science has a tradition of excellence in engineering education dating back to 1893, and we continually update and improve our programs to reflect the highest standards in teaching and learning, discovery, innovation, community and culture. We are the top-ranked engineering school in the Rocky Mountain region with 17 baccalaureate programs and 16 graduate programs offering more than 40 degrees. Via our partnership program with Colorado Mesa University, we also offer students on the Western Slope the opportunity to earn degrees in mechanical engineering and civil engineering.

**Mission & Vision**

The College of Engineering & Applied Science's mission is to generate new knowledge in engineering and related fields, and to equip students from diverse backgrounds to become leaders and citizens responsible for
Credit Policies

Final Grade Appeal
Visit the college's Grade Appeal Policy (http://www.colorado.edu/engineering-facultystaff/college-rules-policies/grade-appeal-policy/) webpage.

Transfer Credit
Transfer credit requirements are governed by the Graduate School policies (http://www.colorado.edu/graduateschool/policies/). However, the college's individual graduate programs must approve the transfer credits and may have transfer credit requirements that are more stringent than the Graduate School. Refer to the individual graduate programs for specific transfer credit requirements.

Petition Policy
A student desiring a waiver of departmental and/or Graduate School policies must request and secure approval for this waiver through a petition procedure. Petitions are first presented to the student's individual graduate program for review, followed by review at the Graduate School.

Requirements

Prerequisites
To enroll for an advanced degree in any department or program in the College of Engineering and Applied Science, candidates either must have previously earned a bachelor's degree in a curriculum that includes the necessary prerequisites for that branch of engineering or must qualify for the concurrent BS and MS program. If the candidate's preliminary education was taken at another institution, the degree of qualification for advanced work is determined by the department concerned and by the dean of the Graduate School.

Graduates of engineering technology programs should note that the equivalent of a BS degree in an appropriate engineering field is required for entry into the Graduate School. Because the goals and orientation of engineering programs differ from those of technology programs, technology graduates should expect to make up deficiencies before being admitted to graduate study in engineering. Students may not be admitted to the Graduate School while making up deficiencies, but can enroll as nondegree students.

Coursework
Graduate work in each department of the College of Engineering and Applied Science falls into two classes:

1. courses that are offered for candidates who have chosen to major in the particular department, and
2. courses that are offered for candidates who have chosen their major in some other department, but who are pursuing a certificate or other complementary coursework.

Availability of Courses
All courses are not necessarily offered every year. They may only be available if there is sufficient demand.

Qualifying or Preliminary Examinations
Graduate students who plan to become candidates for the MS or PhD degree may be required to take a qualifying or preliminary examination.

Individual departments should be consulted concerning the timing or requirement of this examination.

Teaching and Research Assistantships
The College of Engineering and Applied Science requires that all graduate teaching assistants and research assistants be proficient and intelligible in spoken English. In order to ensure that this is the case, all prospective teaching assistants and research assistants whose native language is not English, or others for whom the department graduate program coordinator believes that spoken language intelligibility is a concern, regardless of native language, will be tested for spoken language intelligibility prior to or at the beginning of the semester in which the teaching or research assistantship is awarded. In the event that a prospective teaching or research assistant does not demonstrate a satisfactory level of proficiency, as determined by campus assessment, that student will be required to participate in training designed to improve intelligibility.

Programs of Study

Aerospace Engineering Sciences
The aerospace program is organized around focus areas in astrodynamics and satellite navigation systems, bioastronautics, remote sensing, Earth and space sciences and aerospace engineering systems, including fluid dynamics and propulsion, automatic control, structures and mechanics of materials.

The Ann and HJ Smead Department of Aerospace Engineering Sciences (http://www.colorado.edu/aerospace/) at the University of Colorado Boulder is one of the top aerospace engineering departments in the nation. Aerospace engineers work on Earth and in space not only to extend frontiers, but also to better understand and preserve our terrestrial environment. Few fields offer as many exciting and diverse career opportunities: becoming an astronaut (15 graduates to date have become astronauts), designing the next generation of aircraft and spacecraft, monitoring our global habitat via remote sensing from space, in situ sensing with unmanned vehicles and helping to develop environmentally clean energy and transportation systems.

Aerospace graduate students often formulate degree plans on the basis of their interests and needs. Portions of the program are designed to promote our students’ engineering and professional development.

Graduate students are admitted into a specific focus area that provides research advising and financial support, and sets specialized admission and program requirements with recommendations for coursework within and outside the department.

The five focus areas are:

• Astrodynamics and Satellite Navigation Systems
• Autonomous Systems
• Bioastronautics
• Flows, Structures and Materials
• Remote Sensing, Earth and Space Sciences

Each focus area has defined the required characteristics of its successful graduates at the MS and PhD level, and defined the required and elective courses that support its educational program.

Aerospace-related research centers in the College include the Colorado Center for Astrodynamics Research, Aerospace Mechanics Research...
Center, the Research and Engineering Center for Unmanned Vehicles, and BioServe Space Technologies. Other research centers and institutes within the University that are involved in aerospace-related research activities are the Center for Astrophysics and Space Astronomy (CAS), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Earth Science & Observation Center (ESOC), JILA, and the Laboratory for Atmospheric and Space Physics (LASP).

Course code for this program is ASEN.

Master’s Degrees

- Aerospace Engineering Sciences - Master of Science (MS) (p. 1477)
- Aerospace Engineering Sciences - Professional Master of Science (MSAES) (p. 1481)

Doctoral Degree

- Aerospace Engineering Sciences - Doctor of Philosophy (PhD) (p. 1482)

Certificates

- Astrodynamics and Satellite Navigation Systems - Graduate Certificate (p. 1483)
- Engineering Management in the Aerospace Industry - Graduate Certificate (p. 1589)
- Hypersonics - Graduate Certificate (p. 1483)
- Radio Frequency Engineering for Aerospace - Graduate Certificate (p. 1484)
- Remote Sensing - Graduate Certificate (p. 1485)
- Satellite Systems Design - Graduate Certificate (p. 1627)
- Space Weather and Applications - Graduate Certificate (p. 1628)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Thomas, Evan (https://experts.colorado.edu/display/fisid_163895/)  
Associate Professor, PhD, University of Colorado Boulder  
Voss, James S. (https://experts.colorado.edu/display/fisid_140891/)  
Scholar in Residence; MS, University of Colorado Boulder  
Williams, Christopher (https://experts.colorado.edu/display/fisid_105765/)  
Research Professor; PhD, University of Colorado Boulder  
Wingate, Kathryn (https://experts.colorado.edu/display/fisid_164029/)  
Teaching Assistant Professor; PhD, University of Colorado Boulder

Courses

ASEN 5007 (3) Introduction to Finite Elements  
Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation.  
**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.  
**Recommended:** Prerequisite matrix algebra.  
**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5010 (3) Spacecraft Attitude Dynamics and Control  
Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws.  
**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.  
**Recommended:** Prerequisite ASEN 3200 or equivalent and good knowledge of linear algebra, vector calculus, basics of ordinary differential equations.  
**Grading Basis:** Letter Grade  
**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5012 (3) Mechanics of Aerospace Structures  
Applies fundamental concepts of continuum mechanics, theory of elasticity and energy methods to the analysis of structures.  
**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5023  
**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.  
**Recommended:** Prerequisites ASEN 3200 and ASEN 2003 and ASEN 3112 or equivalent or instructor consent required.  
**Grading Basis:** Letter Grade  
**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5014 (3) Linear Control Systems  
Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods.  
**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.  
**Recommended:** Prerequisite ASEN 3200 or equivalent or instructor consent required.  
**Additional Information:** Departmental Category: Systems and Control

ASEN 5016 (3) Space Life Sciences  
Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation.  
**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.  
**Additional Information:** Departmental Category: Bioastronautics and Microgravity Science

ASEN 5018 (3) Graduate Projects I  
Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification.  
**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.  
**Recommended:** Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5158 or instructor consent required.

ASEN 5022 (3) Dynamics of Aerospace Structures  
Applies concepts covered in undergraduate dynamics, structures and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements and dynamic stability.  
**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.  
**Recommended:** Prerequisite ASEN 5012 or ASEN 5227 or MATH 2130 or APPM 3310 or equivalent or instructor consent required.  
**Grading Basis:** Letter Grade  
**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics
ASEN 5034 (3) Stochastic Methods for Systems Engineering
Development of stochastic models used in aerospace and other systems engineering and optimization problems. Review of probability theory, stochastic models used in decision theory, random processes, queuing theory, information theory, reliability and quality control. Computer solutions required.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5044 (3) Statistical Estimation for Dynamical Systems
Introduces theory and methods of statistical estimation for general linear and nonlinear dynamical systems, with emphasis on aerospace engineering applications. Major topics include: review of applied probability and statistics; optimal parameter and dynamic state estimation; theory and design of Kalman filters for linear systems; extended/unscented Kalman filters and general Bayesian filters for nonlinear systems.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade

ASEN 5047 (3) Probability and Statistics for Aerospace Engineering Sciences
Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes and quality control, including software models of same.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5050 (3) Space Flight Dynamics
Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5052
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5051 (3) Fundamentals of Fluid Dynamics
Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade

ASEN 5052 (3) Analytical Astrodynamics
Introduction to astrodynamics with an emphasis on analytical approaches. The primary subjects covered are the general solution of the 2-body problem; orbital trajectories, transfers, targeting, and time of flight; orbit perturbations and averaging analysis; and the restricted 3-body problem. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5050
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.
Grading Basis: Letter Grade

ASEN 5053 (3) Rocket and Spacecraft Propulsion
An in depth presentation of the theory, analysis, and design of modern rocket and spacecraft propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5067 (3) Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems
Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. The goal of this course is to learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students "learn by doing," through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo. Previously offered as a s
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
ASEN 5090 (3) Introduction to Global Navigation Satellite Systems
Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Global Positioning Systems

ASEN 5098 (3) System Engr and Design
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5111 (3) Introduction to Aeroelasticity
Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisites Undergraduate systems or control course or instructor consent required.
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5114 (3) Automatic Control Systems
Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4114
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisites Undergraduate systems or control course or instructor consent (ASEN 3128 or ASEN 3200).
Additional Information: Departmental Category: Systems and Control Engineering

ASEN 5121 (3) Boundary Layers and Convection
This course presents an introduction to the principles of viscous fluid flow and methods for performing engineering calculations of quantities such as skin friction and heat transfer rates in boundary layers. The first portion of the course material will focus on basic principles of fluid mechanics. We will derive the Navier-Stokes equations and discuss some simple solutions to these equations. The second portion of the course will concentrate on the application of these principles to boundary layers. We will derive the boundary layer equations and discuss their approximate and almost exact solutions. Formerly offered as a special topics course.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3111 and/or ASEN 5051.
Grading Basis: Letter Grade

ASEN 5122 (3) Control of Aerospace Structures 1
Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5148 (3) Spacecraft Design
Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5151 (3) Fundamentals of Gas Dynamics
Presents the fundamental topics of gas dynamics, focusing on compressible flows but providing connections to incompressible topics. Topics include analysis of quasi-one-dimensional flow, the partial differential equations governing inviscid compressible flows, linearized flow theory, supersonic flow around cones, and the method of characteristics applied to both steady two-dimensional supersonic flows, and unsteady one-dimensional flows.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Recommended: Prerequisite ASEN 3111 or equivalent.
Grading Basis: Letter Grade

ASEN 5158 (3) Space Habitat Design
Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering
ASEN 5168 (3) Remote Sensing Instrumentation Design
Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5188 (3) Fundamentals of Systems Engineering
Examines the disciplined processes of designing and managing complex systems over their life cycle. Requirements engineering, reliability, logistics, team leadership, testing and evaluation, maintainability and other disciplines are examined with focus on the system engineering of small spacecraft.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5212 (3) Composite Structures and Materials
Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5218 (3) Large Space Structures Design
Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4218
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5222 (3) Materials Science for Composite Manufacturing
Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 4222
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisites ASEN 3112 and ASEN 4012 or equivalent or instructor consent required.
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5226 (3) Medicine in Space and Surface Environments
Introduces concepts of space medicine and provides a focused analysis on exploration medical capabilities. This course provides a unique learning opportunity to understand the medical challenges of human spaceflight. This is done both in the classroom and in an immersive field simulation that allows students to engage in medical care in simulated planetary surface environments. As such, it also introduces students to important concepts in human spaceflight operations which are difficult to teach in the classroom.

ASEN 5227 (3) Mathematics for Aerospace Engineering Sciences 1
Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing
Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget.
Equivalent - Duplicate Degree Credit Not Granted: ATOC 5235
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite one year of calculus-based physics and math up through differential equations.
Additional Information: Departmental Category: Remote Sensing

ASEN 5245 (3) Radar and Remote Sensing
Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications.
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Remote Sensing

ASEN 5254 (3) Algorithmic Motion Planning
Overview of the lessons learned by the robot motion planning community in the recent years. Examines approaches based on potential functions, graphs, sampling methods, task and motion planning, and basic approaches to planning under uncertainty. Provides a set of tools to tackle new problems and enables the pursuit of complex research questions such as planning for autonomous systems.
Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.
Recommended: Prerequisites or corequisites: ASEN 5014 or equivalent, knowledge of how to plot 2-D/3-D functions, arrays and other data structures, standard constructs (loops, functions, etc), C++, Python or MATLAB, and knowledge of differential equations and linear algebra.
ASEN 5264 (3) Decision Making under Uncertainty
Covers algorithms for optimal sequential decision making in the presence of uncertainty. Mathematical formalisms include the Markov decision process (MDP), partially observable Markov decision process (POMDP), and Games. Solution techniques include exact dynamic programming, Monte Carlo tree search, deep reinforcement learning, and alpha vector value approximation for POMDPs. Assignments require programming in a high level language (Julia as of 2023). Previously offered as a special topics course.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite fluency in a high-level programming language, willingness to learn another language if required for homework assignments and basic understanding of probability.

Grading Basis: Letter Grade

ASEN 5307 (3) Engineering Data Analysis Methods
Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5325 (3) Small Scale Processes in Geophysical Fluids
Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5335 (3) Aerospace Environment
Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite Senior or graduate standing in engineering or related physical sciences.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5347 (3) Math Methods in Dynamics
Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Department consent required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5417 (3) Numerical Methods in Engineering and Science
Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or Matlab.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite APPM 2360 or equivalent or instructor consent required.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5426 (3) Neural Systems and Physiological Control
A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted:
ASEN 4426 and ECEN 4821 and ECEN 5821

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5440 (3) Mission Design and Development for Space Sciences
Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5780

Requisites: Restricted to College of Engineering (ENGR) graduate students, Department of Astrophysical and Planetary Sciences graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering
ASEN 5506 (1-2) Bioastronautics Seminar  
Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development.  
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.  
Additional Information: Departmental Category: Specialized Courses  
ASEN 5519 (1-3) Special Topics  
Reflected upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search.  
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.  
Recommended: Prerequisite varies.  
Additional Information: Departmental Category: Specialized Courses  
ASEN 5550 (3) Designing for Defense 1  
Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams, chosen by competitive selection, work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real-world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment. The first semester of a two-course sequence. Students take this course, ASEN/CSCI/CYBR 5550, and ASEN/CSCI/CYBR 5580 contiguously as the sequence spans the academic year.  
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5550  
Grading Basis: Letter Grade  
ASEN 5849 (1-6) Independent Study  
Study of special projects.  
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: Specialized Courses  
ASEN 5940 (1-3) Engineering Research Internship  
Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US.  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Restricted to graduate students only.  
Additional Information: Departmental Category: Specialized Courses  
ASEN 6008 (3) Interplanetary Mission Design  
Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered.  
Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.  
Recommended: Prerequisite ASEN 5050 or ASEN 5052.  
Grading Basis: Letter Grade  
Additional Information: Departmental Category: Specialized Courses  
ASEN 6009 (1-2) Special Topics Seminar  
Presents research and developments in each department's focus areas.  
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.  
Additional Information: Departmental Category: Specialized Courses  
ASEN 6010 (3) Advanced Spacecraft Dynamics and Control  
Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann Hamel equations) to model a hybrid rigid/flexible spacecraft system.  
Requisites: Requires prerequisite course of ASEN 5010 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.  
Additional Information: Departmental Category: Specialized Courses  
ASEN 6011 (3) Experimental Fluid Mechanics  
This course presents an intermediate level introduction into the theory and practice of performing experimental measurements in fluid mechanics. The fundamental principles and definitions associated with instrumentation, measurement procedures, data analysis, and uncertainty quantification will be discussed. A specific focus will be placed on the application of a variety of measurement techniques in low-speed aerodynamic environments. A selection of measurement techniques will be extensively studied and applied including: classical pressure and temperature measurements, thermal (hot-wire) anemometry, laser doppler anemometry, particle image velocimetry, surface and field flow visualization techniques, schlieren and shadowgraph photography techniques. Undergraduates may enroll with instructor permission. Previously offered as a special topics course.  
Requisites: Requires prerequisite or corequisite course of ASEN 5051 (minimum grade D-) Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors.
ASEN 6013 (3) High Speed Propulsion
Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.
Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 6014 (3) Spacecraft Formation Flying
Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies.
Requisites: Requires prerequisite course of ASEN 5050 or ASEN 5052 (minimum grade B-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Systems and Control

ASEN 6015 (3) Space Vehicle Guidance and Control
The course gives a comprehensive view of guidance systems used in space vehicles, and methods for analyzing the performance of these systems. The types of guidance systems that will be covered are launch vehicle ascent, intercept/rendezvous, interplanetary, orbit stationkeeping, atmospheric re-entry, lander, and low-thrust. The mathematical foundation of these systems will be derived and discussed. Real world applications will be presented by reviewing selections from published literature. Course work will emphasize the analysis of the guidance system performance to achieve stated goals. Previously offered as a special topics course.
Requisites: Requires prerequisite courses of ASEN 5014 and ASEN 5050 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

ASEN 6021 (3) Viscous Flow
Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6024 (3) Nonlinear Control Systems
Introduces the analysis and control design methods for nonlinear systems, including Lyapunov, Describing Function, and Feedback Linearization methods.
Requisites: Requires prerequisite course of ASEN 5014 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Systems and Control

ASEN 6028 (3) Graduate Projects II
Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5018 or ASEN 5158 or instructor consent required.
Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6037 (3) Turbulent Flows
Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employ spectral methods in direct and large-eddy simulation of turbulence. Formerly ASEN 5037.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6050 (3) Space Instrumentation
Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.
Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and GEOL 6050
Requisites: Requires prerequisite course of ASEN 5335 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Aerospace Design and System Engineering
ASEN 6055 (3) Data Assimilation & Inverse Methods for Earth & Geospace Observations
Covers a selection of topics in probability theory, spatial statistics, estimation theory, numeric optimization, and geophysical nonlinear dynamics that form the foundation of commonly used data assimilation and inverse methods in the Earth and Space Sciences. Hands-on computational homework and projects provide opportunities to apply classroom curricula to realistic examples in the context of data assimilation.
Requisites: Requires prerequisite course of ASEN 5044 (minimum grade B-). Restricted to graduate students.
Grading Basis: Letter Grade
ASEN 6060 (3) Advanced Astrodynamics
Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 5050 or equivalent or instructor consent required.
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics
ASEN 6061 (3) Molecular Gas Dynamics and DSMC
Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics
ASEN 6070 (3) Satellite Geodesy
Focuses on the measurement of the Earth’s gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics
ASEN 6080 (3) Statistical Orbit Determination
Course on orbit and advanced estimation techniques. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination.
Requisites: Requires prerequisite course of ASEN 5044 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors and Aerospace graduate certificate students.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics
ASEN 6084 (3) Optical Multi-Target Tracking
This course focuses on exploiting sensor information to detect, track, and characterize unresolved objects using optical sensors. This course will cover phenomenological modeling, error statistics, image processing, detection methods, and several multi-object tracking frameworks. Assignments and projects will incorporate both simulated and empirical data generation / collection and reduction.
Requisites: Requires prerequisite course ASEN 5044 (minimum grade D). Restricted to College of Engineering (ENGR) graduate students.
Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 5090 or instructor consent required.
Additional Information: Departmental Category: Global Positioning Systems
ASEN 6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture
Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 5090.
Additional Information: Departmental Category: Global Positioning Systems
ASEN 6107 (3) Nonlinear Finite Element Methods
Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability.
**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
**Recommended:** Prerequisite ASEN 5007 or equivalent or instructor consent required.

**Additional Information:** Departmental Category: Specialized Courses

ASEN 6116 (3) Spacecraft Life Support Systems
Study the environmental control and the life support systems and technologies that keep people alive and healthy in spacecraft and habitats. Students will learn about thermal control systems, air revitalization processes, water reclamation and treatment, waste handling and the reuse of materials, and food and nutrition. Expect to develop analytical models from first principles and perform hands-on laboratory experiments. Formerly ASEN 5116.

**Requisites:** Requires prerequisite course of ASEN 5158 (minimum grade D-). Requires corequisite course of ASEN 5016. Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Bioastronautics and Microgravity Science

ASEN 6116 (3) Human Operation of Aerospace Vehicles
Examines the role, capabilities, and limitations of human operators in aerospace vehicles. Topics include theoretical models of human information processing and decision-making, physiological limitations of the human (particularly spatial orientation illusions), the design of display and control interfaces, and the evaluation of those interfaces for human interaction with complex aerospace systems.

**Requisites:** Requires prerequisite or corequisite course of ASEN 5158 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** for aerospace and biomedical engineering students.

ASEN 6265 (3) Fundamentals of Spectroscopy for Optical Remote Sensing
Provides a comprehensive overview of the fundamentals of quantum physics, atomic spectroscopy, molecular spectroscopy and laser spectroscopy. Exposes students to the spectroscopy applications in modern optical and laser remote sensing. Assists students to develop the fundamental knowledge and skills for independent learning.

**Requisites:** Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

ASEN 6316 (3) Extravehicular Activity
Expose students to all aspects of extravehicular activity (EVA) to enable them to design systems to facilitate EVA for future human exploration. This course will draw upon the academic elements of design, engineering, technology development, physiology, operations, human-machine interaction, and geology to provide an interdisciplinary look at this topic.

**Requisites:** Requires prerequisite course of ASEN 5158 or ASEN 5016 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students.

**Recommended:** aerospace or biomedical engineering students with a focus in bioastronautics.

ASEN 6331 (3) Computational Fluid Dynamics
Focuses on computational approaches to solve the Navier-Stokes equations. Assumes a basic knowledge of the solution of partial differential equations with numerical methods with focus finite element/volume methods (FEM/FVM but primarily FEM). These issues include: the discrete formulation, non-linear equation iterator, linear equation formation, boundary condition prescription and linear equation solution.

**Requisites:** Requires prerequisite or corequisite courses of ASEN 5007 and ASEN 5051 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** instructor permission required if pre/co requisite of ASEN 5007 and ASEN 5051 haven’t been met.

ASEN 6337 (3) Remote Sensing Data Analysis
Covers some of the most commonly used machine learning techniques in remote sensing data analysis, specifically for clustering, classification, feature extraction and dimensionality reduction, and inverse methods used to retrieve geophysical information from remote sensing data.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Remote Sensing

ASEN 6365 (3) Lidar Remote Sensing
Provides a comprehensive, yet easily understandable, up-to-date understanding of lidar principles, technologies and applications. Contains approaches for quantitative lidar simulation, lidar sensitivity and error analysis, lidar data retrieval, lidar system design and performance analysis. Gives students opportunities to see and operate real state-of-the-art lidar systems and make connections to lidar experts in the nation and world.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

ASEN 6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids
Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation and numerical solutions of problems modeled as plates, shells and solids. Includes an overview of advanced variational formulations.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisite introductory graduate level course in FEM and familiarity with linear algebra.

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics
ASEN 6412 (3) Uncertainty Quantification
This advanced topics course provides an exploration of techniques for representation and propagation of uncertainty in PDE/ODE-based systems.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisites APPM 5570 and ECEN 5612 (all minimum grade B) or equivalent courses with instructor consent.
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6427 (3) Advanced Computational Fluid Dynamics
Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 5417 or equivalent or instructor consent required.
Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6517 (3) Computational Methods In Dynamics
Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite ASEN 5022 or equivalent or instructor consent required.
Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6519 (1-3) Special Topics
Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.
Recommended: Prerequisite varies.
Additional Information: Departmental Category: Specialized Courses

ASEN 6800 (3) Master of Engr Project
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Specialized Courses

ASEN 6849 (1-6) Independent Study
Studies special projects agreed upon by student and instructor.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Specialized Courses

ASEN 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Specialized Courses

ASEN 6950 (1-6) Master's Thesis
Additional Information: Departmental Category: Specialized Courses

ASEN 8990 (1-10) Doctoral Dissertation
Additional Information: Departmental Category: Specialized Courses

Aerospace Engineering Sciences - Master of Science (MS)
CU Boulder's Department of Aerospace Engineering Sciences (AES) is internationally recognized for its research and education leadership in aerospace engineering, Earth and space sciences. Its world-renowned engineers and scientists tackle challenges in aerospace technology and science, focusing on Astrodynamics and Satellite Navigation Systems (ASN); Autonomous Systems (AUT); Bioastronautics (BIO), Fluids, Structures and Materials (FSM); and Remote Sensing, Earth and Space Science (RSESS).

With more than 50 faculty members and over 550 MS and PhD students, our graduate programs prepare aerospace engineering students to meet the needs of our 21st-century society through the understanding, conception, design and application of aerial and spacecraft systems.

In the MS program we focus on hands-on, experiential learning, technical and organizational expertise, and end-to-end mission and systems perspectives via course-based degree options.

Research opportunities for MS students are very limited and are not funded. Students interested in completing an MS thesis are encouraged to take a few of our courses before deciding to pursue that route.

For more information, visit the department’s Prospective Graduate Students (https://www.colorado.edu/aerospace/prospective-students/graduates/) webpage and our Graduate Student Handbook (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/).

Requirements
Program Requirements
Students must complete a total of 30 credit hours, equivalent to 10 classes, with a grade of B- or better and a cumulative GPA of at least 3.00. Of these 30 credits, at least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in Aerospace Engineering (ASEN) courses, and one approved math course. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class. Seminar credits, even those earned in other disciplines, do not count toward the MS degree.)

Up to 6 credits can be taken at the 4000 level in approved engineering, math and science departments (ECEN, CVEN, MCEN, CHEN, CSCI, ATOC, ASTR, PHYS, MCDB, APPM, MATH, STAT, CHEM, IPHY, GEOL, ENVD). ASEN courses level 4000 or below do not count towards AES graduate degrees.

Focus Area-Defined Courses
Some focus areas offer the option to take additional courses to satisfy the non-thesis option. This will represent at least an additional six credit hours with respect to the minimum requirement to obtain a MS with that focus area.
## Required Math Course:

## Elective Courses Offered by ASN Focus Area

- ASEN 6008: Interplanetary Mission Design
- ASEN 6010: Advanced Spacecraft Dynamics and Control
- ASEN 6014: Spacecraft Formation Flying
- ASEN 6015: Space Vehicle Guidance and Control
- ASEN 6020: Optimal Trajectories
- ASEN 6060: Advanced Astrodynamics
- ASEN 6070: Satellite Geodesy
- ASEN 6080: Statistical Orbit Determination
- ASEN 6091: Global Navigation Satellite System (GNSS) Receiver Architecture
- ASEN 6519: Special Topics (Celestial Mechanics & Advanced Astrodynamics)
- ASEN 6519: Special Topics (GNSS for Remote Sensing)
- ASEN 6519: Special Topics (Multi-Object Detection, Tracking, and Characterization)

### Autonomous Systems (AUT) (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/autonomous-systems/)

Students are required to take one course from three of the following topic areas:

#### Autonomous Decision-Making

- ASEN 5254: Algorithmic Motion Planning
- ASEN 5519: Special Topics (Decision-Making Under Uncertainty)
### Control Theory
- **ASEN 5014** Linear Control Systems
- **ASEN 6024** Nonlinear Control Systems

### Dynamics and Modelling of Vehicles
- **ASEN 5519** Special Topics (Small UAS Dynamics and Control)
- **ASEN 6519** Special Topics (System Identification for Control)

### Estimation and Sensor Fusion
- **ASEN 5044** Statistical Estimation for Dynamical Systems

### Programming for Embedded Systems
- **ASEN 5067** Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems
- **CSCI 5302** Advanced Robotics
- **ECEN 5613** Embedded System Design
- **ECEN 5813** Principles of Embedded Software
- **MCEN 5115** Mechatronics and Robotics I

### Elective Courses Offered by AUT Focus Area
- **ASEN 5114** Automatic Control Systems
- **ASEN 5519** Special Topics (Aerobatics)
- **ASEN 5519** Special Topics (Machine Learning for Aerospace)
- **ASEN 6519** Special Topics (Cooperative Control)
- **ASEN 6519** Special Topics (Hybrid Control Systems)
- **ASEN 6519** Special Topics (Stochastic Verification and Synthesis)

### Bioastronautics (BIO) (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/bioastronautics/)
Students are required to take two Core courses and one course from each of the following areas:

<table>
<thead>
<tr>
<th>Code</th>

</tbody>
</table>

### Elective Courses Offered by BIO Focus Area
- **ASEN 5226** Medicine in Space and Surface Environments
- **ASEN 5327** Experimental Design and Statistical Methods
- **ASEN 5849** Independent Study (for MS students)
- **ASEN 6116** Spacecraft Life Support Systems
- **ASEN 6216** Human Operation of Aerospace Vehicles
- **ASEN 6316** Extravehicular Activity
- **ASEN 6849** Independent Study (for PhD 'pre/non-thesis' topic)

### Fluids, Structures and Materials (FSM) (https://www.colorado.edu/aerospace/academics/graduates/curriculum/fluids-structures-and-materials/)
Requirements of the MS degree in the Fluids, Structures and Materials (FSM) focus area are:
- Two Core Classes in your chosen track, and one Core course in the other FSM track.
- Two electives from the FSM focus area, with at least one in your chosen track. (See Graduate Handbook for detailed listing.)
- Attending 50% of the “Fluid, Structures and Materials” seminars each semester.

### Structures and Materials Sub-Track
- **ASEN 5007** Introduction to Finite Elements
- **ASEN 5012** Mechanics of Aerospace Structures
- **ASEN 5022** Dynamics of Aerospace Structures

### Elective Courses Approved by FSM Focus Area

#### Fluids
- **ASEN 5121** Boundary Layers and Convection
- **ASEN 5321** Computational Fluid Dynamics Structured Grid
- **ASEN 5519** Special Topics (Introduction to Hypersonics)
- **ASEN 6011** Experimental Fluid Mechanics
- **ASEN 6037/ MCEN 7221** Turbulent Flows
- **ASEN 6061** Molecular Gas Dynamics and DSMC
- **ASEN 6331/ MCEN 5231** Computational Fluid Dynamics
- **ASEN 6519** Special Topics (Advanced Turbulence Simulation)
- **ASEN 6519** Special Topics (Flow Control)
- **ASEN 6519** Special Topics (Isogeometric Analysis)

Remote Sensing, Earth and Space Science (RSESS) (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/remote-sensing-earth-space-sciences/) Note that MS students using the Remote Sensing Certificate for their degree requirements in lieu of an MS thesis or two semester graduate projects may count a maximum of 2 of the 4 required RSESS focus area courses toward the certificate requirement.
### Dual Degree Program

**MS in Aerospace Engineering Sciences and ME in Engineering Management**

Students may complement their aerospace engineering master’s degree with a Master of Engineering (ME) in Engineering Management. To complete the Aerospace Engineering and Engineering Management dual degree program, students must be admitted to Aerospace Engineering first, and apply to Engineering Management afterwards.

#### Requirements

The dual degree consists of 45 credits: 24 credits based on Aerospace Engineering requirements and 21 based on Engineering Management requirements, as detailed below.

For more information, visit the Engineering Management Program's MS Aerospace Engineering Sciences & ME Engineering Management [webpage](https://www.colorado.edu/emp/programs/graduate-program/dual-degree-program/ms-aerospace-engineering-sciences-me-engineering/).

### Aerospace Engineering

At least 24 credits at the 5000 level or above:

- At least 18 credits in Aerospace Engineering (ASEN) courses. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class).
- One approved math course (3 credits)
- Professional MS students do not follow focus area-specific requirements and do not require the completion of a certificate, graduate projects or MS thesis
- Traditional MS students:
  - Completion of an approved certificate, graduate projects (6 credits) or MS thesis (6 MS thesis credits)
  - Fulfill focus area-specific requirements

Review our Graduate Student Handbook [for details](https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/) on focus area requirements, GPA and grade minimums, and other information.

### Engineering Management

Students must complete at least 21 credits. Visit the Engineering Management [website](https://www.colorado.edu/emp/current-students/) for details.

### Aerospace Engineering Sciences - Professional Master of Science (MSAES)

A professional master's degree (MSAES) in aerospace engineering sciences from CU Boulder is designed for working engineers and people planning to pursue a career in industry. We designed the program with industry partners to meet your needs, further your career and with your location in mind—the degree can be earned on campus or 100 percent online.

For more information, visit the department’s [Prospective Graduate Students](https://www.colorado.edu/aerospace/prospective-students/graduates/) webpage.

Aerospace Engineering Sciences - Doctor of Philosophy (PhD)

Students typically complete their PhD in aerospace engineering sciences within 4 to 6 years, depending on whether they enter the program with a master’s degree.

The primary focus of a PhD student is to perform novel research guided by their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. PhD students are supported through research and teaching assistantships and are also encouraged to apply for their own source of funding.

For more information, visit the department’s Prospective Graduate Students webpage.

Requirements

Course Requirements

- A minimum of 30 credit hours of courses numbered 5000 or above (at least 15 of these must be in ASEN) with a minimum of 3.25 GPA.
- 30 credit hours of dissertation credit are required for the degree.
- A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a PhD degree if approved by the graduate committee of the department and the Graduate School.
- All courses taken for the master’s degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the university.

Preliminary Examination

Students must pass the preliminary exam by the fifth semester as a CU Boulder PhD student, although most students take the exam in their third semester. If a student enters the PhD program with a master’s degree in aerospace engineering, their faculty advisor can require the exam be taken by their third semester. The preliminary exam is composed of an oral exam in front of a committee of three graduate teaching faculty members that focuses upon both research preparation and fundamental knowledge in key subject areas.

The oral exam will be composed of three components:

1. A presentation summarizing the literature review conducted by the student followed by an examination of the presented concepts.
2. Two subject area exams based on approved courses.

Comprehensive Examination

Students must pass the comprehensive exam to become doctoral candidates. This exam is in front of the student’s doctoral committee, which is made up of the student’s research advisor and four (or more) other graduate faculty members chosen by the student. Before the exam, the student provides a written proposal for their thesis research to the doctoral committee. The oral exam consists of the student presenting their proposal and any initial research findings to their committee, who then examines the student on the proposal and related technical concepts. After incorporating input from the committee through the Comprehensive Exam and passing this exam, the student

4000, 5000, 6000, or 7000 level APPM course

4000, 5000, 6000, or 7000 level STAT course

Additional Coursework 9

Total Credit Hours 30

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework.
will have a plan for their thesis research and will become a doctoral candidate.

**PhD Dissertation**

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

**Time Limit**

All degree requirements must be completed within six years of the date of commencing coursework.

**Astrodynamics and Satellite Navigation Systems - Graduate Certificate**

The Astrodynamics and Satellite Navigation Systems Certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in Astrodynamics and Satellite Navigation (ASN). It is essentially a specialization of the AES MS degree in the ASN focus area, with additional requirements for breadth and depth in the ASN area. The certificate will make students more desirable to future employers looking for astrodynamics and satellite navigation specialists.

This certificate is available to graduate degree-seeking and non-matriculated students. Additional certificate information can be found on the department’s Astrodynamics and Satellite Navigation Systems Certificate [webpage](https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/asn-certificate/).

**Distance Education Option**

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

**Requirements**

**Admissions Requirements**

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra, and differential equations, two semesters of undergraduate calculus-based physics, and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates webpage [here](https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/asn-certificate/); nondegree-seeking and non-matriculated students may visit the AES Certificates & Continuing Education webpage [here](https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/).

**Certificate Requirements**

Complete all four core area subjects in ASN, plus two advanced ASN courses of the student’s choosing (18 credit hours)

**Advanced Requirements**

Select any two 6000-level ASN courses, including but not limited to:

- ASEN 6008: Interplanetary Mission Design
- ASEN 6010: Advanced Spacecraft Dynamics and Control
- ASEN 6014: Spacecraft Formation Flying
- ASEN 6020: Optimal Trajectories
- ASEN 6060: Advanced Astrodynamics
- ASEN 6070: Satellite Geodesy
- ASEN 6080: Statistical Orbit Determination
- ASEN 6091: Global Navigation Satellite System (GNSS) Receiver Architecture
- ASEN 6519: Special Topics

Total Credit Hours: **18**

1. Any core requirement can be satisfied by taking an additional 6000-level course which has the corresponding core requirement as a prerequisite. *This substitution does not require a petition.*
2. This requirement can be satisfied by taking ASEN 5055 Analytical Astrodynamics or an additional 6000-level course that has ASEN 5050 as a prerequisite.
3. Taking ASEN 5044 as part of the certificate requirement does not preclude it counting as a math course to satisfy the MS or PhD requirement.

**Hypersonics - Graduate Certificate**

This certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in the cross-disciplinary field of hypersonics. It is sponsored by the Ann and H. J. Smead Department of Aerospace Engineering Sciences (AES) and the Paul M. Rady Department of Mechanical Engineering (ME) and involves courses from AES and ME.

The purpose of the certificate is to develop interdisciplinary skills in the field of hypersonics, which requires knowledge about fundamental
areas such as gas dynamics, materials, controls, and how their inter-
relationships determine hypersonic vehicle performance.

This certificate is available to graduate degree-seeking and non-
matriculated students. Additional certificate information can be found on the department’s Hypersonics Certificate (https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificate-programs/hypersonics-certificate/) webpage.

Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements
Admission Requirements
• Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education or its equivalent.
• Undergraduate courses in calculus, linear algebra and differential equations; two semesters of undergraduate calculus-based physics; and at least two semesters of upper-division undergraduate courses in engineering or physics.
• Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates webpage (https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificates/) webpage; nondegree-seeking and non-matriculated students may visit the AES Certificates & Continuing Education webpage (https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/) webpage.

Required Courses and Credits
The standard requirements of this certificate program are the completion of twelve (12) hours of graduate-level coursework (typically four 3-credit courses) with grades of B or higher in each course. Students also pursuing other graduate certificates may not use the same courses to count for both certificates.

There is one required course, ASEN 5519 Special Topics (Introduction to Hypersonics). Each student is free to choose the other three courses from the elective list below.

Total Credit Hours: 12

Radio Frequency Engineering for Aerospace - Graduate Certificate
A joint certificate program between Smead Aerospace and the Department of Electrical, Computer & Energy Engineering. This certificate fills an industry need in Colorado and beyond for cross-disciplinary graduate level education in aerospace and electrical engineering.

The program is open to new and current degree-seeking Aerospace Engineering Sciences (AES) and Electrical, Computer and Energy Engineering (ECEE) students. This certificate is not available to non-matriculated students.

Additional certificate information can be found on the department’s Radio Frequency Engineering for Aerospace Certificate webpage (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/radio-frequency-engineering-aerospace/) webpage.

Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements
Admissions Requirements
Candidates for admission must be a matriculated graduate student in the AES or ECEE departments. For certificate application and more details, visit the AES Certificates webpage (https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificates/).

This certificate is co-managed by AES and ECEE. Students must follow the rules and policies of each department. Courses from already awarded degrees cannot be used to fulfill certificate requirements.

AES Grad Projects

Total Credit Hours 18

1. For students interested in taking both courses, one course can count as a requirement and one course can count as an elective. A single course cannot count as both a required course and an elective course, simultaneously.

2. As an elective, choose whichever course not taken as a requirement.

3. Approved radio frequency project; can only count for one elective.

Remote Sensing - Graduate Certificate

Remote sensing (satellite and ground-based) is increasingly being used as a technique to probe the Earth's atmosphere, ocean, and land surfaces. Probing of other planets is accomplished largely by satellite remote sensing. Given national priorities in such areas as climate and global change, the interest in remote sensing will only increase with time. Graduate students, research staff and faculty work on a wide variety of topics ranging from the theory of remote sensing, to instrument development and application.

This certificate is available to graduate degree-seeking and non-matriculated students. Additional certificate information can be found on the department’s Remote Sensing Certificate (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/remote-sensing-certificate/) webpage.

Distance Education Option

Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra and differential equations; two semesters of undergraduate calculus-based physics; and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

Architectural Engineering

Architectural engineering focuses on the design, construction and operation of buildings and the integration of their systems. The department offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees in architectural engineering with a study emphasis (i.e., focus area) in:

- Building energy engineering
- Illumination engineering
- Materials and carbon
- Construction engineering and management

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering (http://www.colorado.edu/ceae/prospective-students/graduate-studies/). The Graduate Record Examination (GRE), consisting of the aptitude tests and advanced test in engineering, is used to evaluate MS and PhD candidates. Candidates who submit GRE scores are more likely considered for financial assistance.

Course code for this program is AREN.

Research Interests and Facilities

The Larson HVAC Laboratory has been a staple of the University of Colorado's building energy research activities and AREN program education. The laboratory has been the stepping stone for fundamental and applied research in building energy efficiency, energy controls, thermal comfort and indoor air quality. The newly renovated Larson HVAC Laboratory provides a unique facility that permits the evaluation of entire systems in a controlled dynamic environment, providing repeatable test conditions. The laboratory has been recently redesigned to allow maximum flexibility in conducting a wide variety of research and testing procedures. In particular, both the HVAC and control systems in the laboratory are reconfigurable in that components, subsystems or entire systems can be readily installed and tested. For instance, the performance of air handling units, displacement ventilation units, chilled beams and variable refrigerant flow units can be tested. In addition, coils, air mixers, dampers, filters and variable frequency drives can be evaluated. Moreover, the laboratory offers the possibility to test standalone HVAC and refrigeration systems including water heaters, boilers, thermal energy storage tanks and chillers.

The Lighting Laboratory is a learning and research space for lighting students in the AREN program. The lab has a dynamic ceiling with adjustable height to allow a wide range of academic and research exploration. Although the lab has a full-wall, with north-facing windows, there are blackout curtains installed to eliminate any undesirable external light. In addition, this lab houses a goniophotometer used to measure the intensity of light leaving a luminaire at various vertical and horizontal angles. The measured data allow establishing photometric light distribution of the luminaire and metrics such as total lumen output, luminaire luminance and zonal lumen summary. The lab also houses a small lighting sphere, which allows testing of lumen output of LED luminaires and LED chips. In addition, the lighting lab includes a studio space used primarily for lighting research. The lab has an extensive aluminum open ceiling grid that allows for quick electrical and physical connection of light sources and luminaires for research. For lighting design-oriented classes, students have access to theatrical-type and programmable color-changing luminaires to do mock-ups and study lighting effects.

The AREN laboratories offer state-of-the-art facilities to test a wide range of operational and control strategies for lighting and HVAC systems and subsystems. Indeed, several control projects have been carried out in the Larson HVAC laboratory including demand-ventilation controls, optimal chiller and thermal energy storage controls, outdoor air intake controls, and optimal operation of evaporative systems. In addition, fault diagnostic algorithms have been tested in the laboratory for specific HVAC equipment including for heating and cooling coils, chillers and outdoor air intake dampers.

Master's Degrees

- Architectural Engineering - Master of Science (MS) (p. 1491)

Doctoral Degree

- Architectural Engineering - Doctor of Philosophy (PhD) (p. 1492)

Certificate

Courses

AREN 5001 (3) Building Science and Engineering 1  
Prepares graduate students with general knowledge and skills that are required by advanced AREN technical courses. Covers two parts of materials: Building Lighting Systems and Building Electrical Systems.  
Requisites: Restricted to graduate students or concurrent degree sub plans C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.  
Grading Basis: Letter Grade  
Additional Information: Departmental Category: Building Systems Engineering

AREN 5002 (3) Building Science and Engineering II  
Introduces AREN fundamentals to new graduate students entering the Architectural Engineering Program (AREN) but without general Civil or Architectural Engineering background. This course is part of a two-course set with AREN 5001: Building Science and Engineering I. This course covers two parts: (1) building thermal science and engineering; (2) building material science and engineering.  
Requisites: Restricted to graduate students or concurrent degree students with sub-plans C-CVEN or C-ARENCVEN.  
Grading Basis: Letter Grade
AREN 5010 (3) Energy System Modeling and Control
Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4010
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite AREN 4140.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5020 (3) Building Energy Audits
Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings.
Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite AREN 3010 or AREN 5002.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5030 (3) Data Science for Energy and Buildings
Establishing hands-on skills along with understanding of underlying mathematical concepts of current machine learning approaches including: ordinary least squares, quantile, logistic, and local regression; unsupervised methods including principal component analysis and clustering; tree-based models such as regression trees and random forests; kernel-based methods such as support vector and Gaussian process regression; Bayesian inference; as well as shallow and deep neural networks. Numerous examples and case studies applicable to thermal/building/renewable/district energy systems will be used. Undergraduate seniors will be allowed with instructor consent.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN).

AREN 5040 (3) Advanced Solar Design
Predicts performance and analyzes economics of low-temperature, high-temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Taught intermittently.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5050 (3) Distributed Electricity Generation
Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Building Systems Engineering

AREN 5070 (3) Thermal Analysis of Buildings
Examines response factors, conduction transfer functions and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal gains and infiltration analysis as modeled in hourly simulations. Taught intermittently.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5080 (3) Computer Simulation of Building Energy Systems
Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure.
Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite AREN 3010 or AREN 5002.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5090 (3) Optimizing Grid Connected Systems
Address the challenges that the electric power grid is facing from a technical perspective, using grid modeling, mathematics (optimization and linear algebra) and programming (Python). The course will also touch on a variety of topics such as electricity markets, renewable energy integration, and distributed energy resources, including how buildings can help the broader electrical grid. Students will gain skills that will help them prepare for careers in building controls, renewable energy, energy policy, and more. Do not take this class if you have already taken a power systems optimization course.
Recommended: Prerequisites students should have prior experience/ coursework in programming (beyond Excel) and linear algebra before taking this course.
Grading Basis: Letter Grade

AREN 5110 (3-4) HVAC System Design
Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4110
Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Recommended: Prerequisite AREN 3010 or AREN 5002.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5130 (3) Optical Design for Illumination and Solid State Lighting
Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4130
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite AREN 3540.
Additional Information: Departmental Category: Building Systems Engineering
AREN 5510 (3) Architectural Lighting I
Teaches the fundamentals of architectural lighting systems and the human responses to those systems. Describes the properties of light sources, how light interacts with architectural elements, and how light affects human visual and non-visual responses. Provides a broad overview of the holistic effects of light on building occupants, as well as the implications for building energy use and sustainability. Previously offered as a special topics course.
Requisites: Restricted to non-degree (NDGR) graduate students only.

AREN 5520 (3) Architectural Lighting II
Builds on the fundamentals taught in AREN 5500 with a detailed look at how technical information about lighting systems can be used for design concepts and analyses. Provides an examination of daylighting in buildings. Describes the latest research and design standards for color rendering, glare, flicker, circadian rhythms, and alerting effects. Concludes by considering case studies of various project types.
Requisites: Open to Non-degree, Non sponsored Students only.

AREN 5530 (3) Architectural Lighting Capstone
Concludes the nine-credit Professional Graduate Certificate in Architectural Lighting with an immersive hands-on experience. Concepts learned in the two prior online courses will be demonstrated and experienced using facilities and equipment available on the CU Boulder campus. A culminating, comprehensive project submittal that includes content developed during the entire three-course sequence will be submitted following the on-campus experience.
Requisites: Requires prerequisite courses of AREN 5510 and AREN 5520 (all minimum grade C-). Restricted to non-degree (NDGR) graduate students only.

AREN 5540 (3) Exterior Lighting Systems
Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4540
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites AREN 3540 and AREN 4550.
Additional Information: Departmental Category: Building Systems Engineering

AREN 5560 (3) Luminous Radiative Transfer
Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4560
Requisites: Requires prerequisite course of AREN 3540 or AREN 5001 (minimum grade C-).

AREN 5570 (3) Building Electrical Systems Design 1
Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4570
Requisites: Requires prerequisite course of AREN 5002 (minimum grade D-).
Recommended: Prerequisite AREN 3030.

AREN 5580 (3) Daylighting
Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4580
Requisites: Requires prerequisite course of AREN 3540 or AREN 5001 (minimum grade C-).

AREN 5620 (3) Adaptive Lighting Systems
Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: AREN 4620
Requisites: Requires prerequisite courses of AREN 3540 and AREN 4550 (minimum grade D-).
Recommended: Prerequisite AREN 4130.

AREN 5650 (3) Forensic Engineering
Identify and explore the physical, chemical, mechanical, and biological deterioration mechanisms in the most common construction materials; concrete, masonry, metals, wood, polymers, and fiber-reinforced composites. Course topics include an introduction to failure analysis; materials science; ion diffusion; electrochemistry (corrosion); fracture, fatigue, and creep; and diagnostic, retrofit, and rehabilitation strategies for extended service life.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

AREN 5660 (3) Embodied Carbon in Buildings
Introduces students to whole building life cycle assessment (LCA) and embodied carbon in buildings. Topics include LCA methodologies, whole-building LCA tools, materials science of low-carbon and carbon-storing building materials, and strategies for reducing embodied carbon.
Requisites: Restricted to graduate students only, or BAM students with C-AREN, C-CVEN, or C-ARENCVEN subplan.
Recommended: Prerequisite AREN 5002.

AREN 5830 (1-3) Architectural Engineering Special Topic
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

AREN 5849 (1-3) Independent Study in Architectural Engineering
The topics and the goals of this course are tailored to fit the needs of the student in various areas related to the Architectural Engineering program. These topics and goals, documented in the course agreement form at the start of the semester, include but are not limited to areas of building energy engineering, building illumination systems, construction engineering and management, building materials and resources, and building electrical systems.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade
**AREN 5890 (3) Sustainable Building Design**
Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4890

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite AREN 3010 or AREN 5002.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 5990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts**
Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method. Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4990

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisites AREN 2120 and APPM 2360.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 6950 (1-6) Master's Thesis**
Up to 6 credits of independent study may be taken, where an individual course of study is worked out between the student and a faculty member. Up to 9 credits of graduate courses can be transferred from another institution. Students are allowed up to 6 credits in total of non-technical coursework for the MS/PhD degree.

**AREN 6960 (1-3) Master's Report**
Repeatable for up to 3.00 total credit hours.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 8990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts**
Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method. Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4990

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisites AREN 2120 and APPM 2360.

**Additional Information:** Departmental Category: Building Systems Engineering

**ARCHITECTURAL ENGINEERING - MASTER OF SCIENCE (MS)**
Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a Master of Science degree with study emphases in several major areas:

- Building systems engineering
- Illumination engineering
- Materials and carbon
- Construction engineering and management

For more information, visit the department's Graduate Studies website.

**Bachelor's–Accelerated Master's Degree Program**
Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Architectural Engineering - Bachelor of Science (BS) (p. 769)

**Requirements**
For a Master of Science (MS) degree in architectural engineering, students may undertake Plan I (with a thesis) or Plan II (with a project).

Up to 6 credits of independent study may be taken, where an individual course of study is worked out between the student and a faculty member. Up to 9 credits of graduate courses can be transferred from another institution. Students are allowed up to 6 credits in total of non-technical coursework for the MS/PhD degree.

**Degree Plans**

**Plan I: Thesis Option**
Plan I requires 24 credits of coursework, plus 6 credits of thesis work. The thesis is a formal research report that discusses an organized research topic. Experience has shown that it takes a student from 24 to 30 months to complete this plan. Financial support is generally limited to exceptionally well-qualified students selecting Plan I.

**Plan II: Non-Thesis Option**
Plan II requires 27 credits of coursework, plus 3 credits of MS project work. The 3-credit Master's Report (AREN 6960) is related to an applied research AREN topic. It can be successfully completed in 18–24 months by a diligent student. Note that one-half of the coursework must be taken in the CEA Department (an exception may be made if the relevant courses were taken as part of an undergraduate degree).

With the approval of the advisor, non-CEAE courses at the 4000 level may be used for graduate credit up to a maximum of 6 credits.

**Course Requirements**
Courses offered in the architectural engineering graduate program may be separated into four tracks, one specific to the Construction Engineering & Management discipline and three related to the Building Systems Engineering discipline. Students may decide to concentrate in one of these track areas, or they may wish to take a broad selection from the courses; there is no requirement for picking any specific track under the general track option.

Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering program (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/engineering-developing-communities-graduate-certificate/) must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

Architectural Engineering - Doctor of Philosophy (PhD)

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a PhD degree with study emphases in several major areas:

- Building Energy Engineering
- Illumination Engineering
- Materials & Carbon
- Construction Engineering & Management

There is no requirement for picking a specific focus area and students can select from courses under any of the four focus areas. Students must complete a minimum of 9 credit hours from the list of courses.

**RESIDENCY REQUIREMENTS**

For an entrant from another university, up to 21 hours of acceptable coursework to be completed at the University of Colorado upon the approval of their advisors. The transfer credits are transferable at the discretion of the research advisor, and students may be asked to take additional courses toward the completion of their degree. Work already applied toward a graduate degree received from the University of Colorado or another institution cannot be accepted for transfer toward another graduate degree of the same level at the University of Colorado. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

For students already in the MS program in the CEAE department, 30 hours of graduate coursework performed at CU is applicable towards the PhD degree upon the approval of their advisors. The PhD also requires that 30 hours of dissertation credit be taken, with a minimum residency of two years. After passing the comprehensive exam, PhD candidates are required to maintain continuous registration. Candidates must register for at least 5 hours of dissertation credits each semester.

### Preliminary Examination

Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 24 months from the time the student is first enrolled in the doctoral program. Each CEAE group has a designated time for PhD students to take the exam. Students should discuss the schedule, date and format of the exam with their academic adviser.

### Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

### PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

### Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

### Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/engineering-developing-communities-graduate-certificate/) program must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

### Biomedical Engineering

CU Boulder’s Biomedical Engineering program offers students a flexible degree program to achieve their degree and research goals. Biomedical engineering is an exciting, multidisciplinary field that lies at the intersection of medicine, biology and engineering.

With a cross-listed curriculum and an interdisciplinary faculty roster, the BME program delivers a multi-faceted and rigorous education in biomedical engineering. Our department consists of 36 faculty members from multiple backgrounds and disciplines. They conduct research in the

- **CVEN 5835**: Special Topics for Seniors/Grads (Design of Wood Structure)
- **AREN 4315**: Design of Masonry Structures (must enroll in CVEN 5849, independent study, to receive graduate credit)
- **AREN 5660**: Embodied Carbon in Buildings
- **CVEN 5831**: Special Topics (Construction Materials)

**Focus Area: Construction Engineering & Management**

- **CVEN 5246**: Legal Aspects of Construction
- **CVEN 5276**: Engineering Risk and Decision Analysis
- **CVEN 5226**: Construction Safety
- **CVEN 5346**: Managing Construction and Engineering Projects and Organizations
- **CVEN 5836**: Special Topics for Seniors/Grads (Infrastructure Asset Management)

---

**Residency Requirements**

For an entrant from another university, up to 21 hours of acceptable graduate courses may be transferred, leaving at least 9 hours of coursework to be completed at the University of Colorado upon the approval of their advisors. The transfer credits are transferable at the discretion of the research advisor, and students may be asked to take additional courses toward the completion of their degree. Work already applied toward a graduate degree received from the University of Colorado or another institution cannot be accepted for transfer toward another graduate degree of the same level at the University of Colorado. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

For students already in the MS program in the CEAE department, 30 hours of graduate coursework performed at CU is applicable towards the PhD degree upon the approval of their advisors. The PhD also requires that 30 hours of dissertation credit be taken, with a minimum residency of two years. After passing the comprehensive exam, PhD candidates are required to maintain continuous registration. Candidates must register for at least 5 hours of dissertation credits each semester.

### Preliminary Examination

Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 24 months from the time the student is first enrolled in the doctoral program. Each CEAE group has a designated time for PhD students to take the exam. Students should discuss the schedule, date and format of the exam with their academic adviser.

### Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

### PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

### Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

### Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/engineering-developing-communities-graduate-certificate/) program must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

### Biomedical Engineering

CU Boulder’s Biomedical Engineering program offers students a flexible degree program to achieve their degree and research goals. Biomedical engineering is an exciting, multidisciplinary field that lies at the intersection of medicine, biology and engineering.

With a cross-listed curriculum and an interdisciplinary faculty roster, the BME program delivers a multi-faceted and rigorous education in biomedical engineering. Our department consists of 36 faculty members from multiple backgrounds and disciplines. They conduct research in the

### Biomedical Engineering

CU Boulder’s Biomedical Engineering program offers students a flexible degree program to achieve their degree and research goals. Biomedical engineering is an exciting, multidisciplinary field that lies at the intersection of medicine, biology and engineering.

With a cross-listed curriculum and an interdisciplinary faculty roster, the BME program delivers a multi-faceted and rigorous education in biomedical engineering. Our department consists of 36 faculty members from multiple backgrounds and disciplines. They conduct research in the
areas of biomechanics, tissue engineering, biomaterials, drug delivery, molecular imaging, image-guided therapy, point-of-care diagnostics, biosensors, prosthetics, bioastronautics, systems biology and many more.

Our program offers students the opportunity to take courses in any of the following areas:

- Biomechanics
- Imaging and Diagnostics
- Medical Devices
- Neuroengineering
- Therapeutics

The BME program is directed by Professor Mark Borden. For more information, visit the Biomedical Engineering Program (https://www.colorado.edu/bme/) website.

Course code for this program is BMEN.

**Master's Degree**

- Biomedical Engineering - Master of Science (MS) (p. 1495)

**Doctoral Degree**

- Biomedical Engineering - Doctor of Philosophy (PhD) (p. 1496)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

**BMEN 5117 (3) Anatomy and Physiology for Biomedical Engineering**
The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4117

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 5840 (1-6) Independent Study**
Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 5939 (1-6) Biomedical Engineering Internship**
Grants credit to international graduate students for conducting research via professional research opportunities in the biomedical engineering field. Students are responsible for securing their own internships.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BMEN 6519 (1-3) Special Topics in Biomedical Engineering**
Credit hours and subject matter to be arranged.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**BMEN 6949 (1) Master's Candidate for Degree**
Credit hours and subject matter to be arranged.

**BMEN 6950 (1-6) Master's Thesis**
Work with a faculty advisor on a masters thesis.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 7840 (1-6) Independent Study**
Provides opportunities for independent study at the graduate (PhD) level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

**Requisites:** Restricted to Biomedical Engineering BMEN-PhD students only.

**BMEN 8990 (1-10) Doctoral Dissertation**
Work with a faculty advisor on a doctoral dissertation.

**Repeatable:** Repeatable for up to 60.00 total credit hours.

**Requisites:** Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

**Biomedical Engineering - Master of Science (MS)**
The Biomedical Engineering Master of Science (MS) degree program is designed to be flexible to meet the individual student’s needs. Students will collaborate with faculty and other advisors to create a tailored degree plan based on their career interests and goals.

Students may choose either a coursework- or thesis-based MS. The thesis option requires completion of a research project with a faculty mentor, a written thesis that describes the research in detail, and an oral defense in front of a committee of program faculty.

For more information, visit the Biomedical Engineering MS Program (https://www.colorado.edu/bme/masters-program/) page.

**Bachelor’s–Accelerated Master's Degree Program**
Students may earn this degree as part of the Bachelor’s–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Biomedical Engineering - Bachelor of Science (BSBM) (p. 740)

**Requirements**

Biomedical Engineering MS students must complete 30 credit hours of coursework at the 5000 level or higher and obtain a minimum grade of C (2.0) in each class to count towards the degree. Students must also maintain a 3.0 cumulative GPA or higher to be in good standing with the Graduate School.

Additional credit hours obtained, as needed, from other fields (e.g., business or other engineering electives). Of these 12 credit hours, MS Thesis students must complete 4-6 thesis credit hours in which they will submit a written thesis following the graduate school specifications and present their research findings to a three-member committee.

**Total Credit Hours**

30
Biomedical Engineering - Doctor of Philosophy (PhD)

Biomedical Engineering PhD students have the opportunity to participate in cutting-edge research with engineering faculty in many different biomedical fields. Our program provides the scientific foundation to prepare students for careers in academia, healthcare, industry and government labs.

The PhD program is open to both first-time graduate students as well as those who hold master’s degrees.

For more information, visit the Biomedical Engineering PhD Program (https://www.colorado.edu/bme/academics/phd-program/) page.

Requirements

All Biomedical Engineering PhD student must complete a minimum of 30 credit hours of coursework at the 5000 level or higher, plus 30 credit hours of dissertation credits. Some research advisors will require that their students complete more than 30 course credits, and the department recommends that specific course decisions should be agreed upon through individual faculty/student discussions. Students must receive a minimum grade of B- (2.7) in each course to count towards the degree. Students must also maintain a 3.0 cumulative GPA or higher to be in good standing with the graduate school.

1 May be fulfilled by courses taken as part of a prior MS or PhD program.

Preliminary Examination

Biomedical Engineering PhD students are required to pass a preliminary examination. It consists of a comprehensive review of primary literature that supports the current and future research directions of the student. This must be completed within the first three semesters after matriculation into the program.

Comprehensive Examination

The Comprehensive Examination is an important second evaluation step required to advance the student to candidacy for the PhD degree, which is typically completed within the first three years after matriculation to the program and greater than one year prior to graduation. It consists of an NIH R21-style research proposal in addition to an oral exam with a selected committee of faculty advisors, both focusing on the proposed course of research. Students will also likely have completed one chapter of their dissertation for submission to a peer-reviewed journal before taking the Comprehensive Exam.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

Time Limit

All degree requirements for the Biomedical Engineering PhD must be completed within six years of the date commencing coursework.

Chemical Engineering

The Department of Chemical and Biological Engineering (https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/) (ChBE) offers an innovative graduate program and emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within the Department of Chemical and Biological Engineering include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials, and renewable energy.

Biological engineering research includes a broad collection of focal areas spanning from the molecular scale (metabolites, genes, proteins) to the cellular and multicellular scales. Biological engineering projects account for a significant portion of the research activity within the ChBE Department. This research is supported in a variety of manners: federal grants (NIH, NSF, DOD, etc.), national foundations (Howard Hughes, Cystic Fibrosis, etc.), and industrial collaborators.

Functional Materials research in the ChBE Department is concentrated in a diverse group of research areas including polymers, nanostructured materials, photovoltaic materials, ultrathin films, catalytic materials, computational materials science, self-assembled monolayers, and liquid crystalline materials. The department has strength in studying materials problems at the nanometer and sub-nanometer length scales. Such fundamental investigations are directed toward technological applications.

Finally, the ChBE Department has an active program in renewable energy research. Studies range from the production and utilization of hydrogen to materials for photovoltaics to biorefining and biofuels research. A number of efforts focus on developing catalysts for converting water to hydrogen and CO2 into fuels such as CO and methanol. Another area of focus is the study of novel photovoltaic materials and structures.
involving organic, inorganic, and hybrid structures for efficient solar energy harvesting.

Course code for this program is CHEN.

Courses

CHEN 5090 (1) Seminar in Chemical Engineering
Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics. 
**Requisites:** Restricted to graduate students only.

CHEN 5128 (3) Applied Statistics In Research and Development
Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Department enforced prereq.: one introductory probability/statistics course.

CHEN 5150 (3) Biomolecular Kinetics, Transport, and Thermodynamics
Required for the Biological Engineering PhD. This course covers aspects of kinetics, transport, and thermodynamics as they relate to interactions between biomolecules and cells. These core subjects will be introduced within concepts common to cell biology, protein/genetic engineering, and signaling, among others. Undergraduate enrollment with instructor consent only.
**Recommended:** Prerequisites Introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, organic chemistry.

CHEN 5160 (3) Systems Analysis of Cells and Tissues
Required for the Biological Engineering PhD. This course explores how to describe signaling and regulation networks present at the cell and tissue level. Topics include gene expression, stem cell differentiation, homeostasis, and others.
**Recommended:** Prerequisite prior experience in introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, and organic chemistry.

CHEN 5210 (3) Transport Phenomena
Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat and mass transfer and their applications to engineering problems. Department enforced prerequisites: undergraduate courses in fluid mechanics, heat transfer, and differential equations.
**Requisites:** Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5360 (3) Catalysis and Kinetics
Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis.
**Requisites:** Requires corequisite course of CHEN 4330. Restricted to Chemistry (CHEM) or Chemical Engineering (CHEN) graduate students only.

CHEN 5370 (3) Intermediate Chemical Engineering Thermodynamics
Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures and solutions. Also looks at relations between thermodynamics and statistical mechanics. Department enforced prerequisite: an undergraduate course in chemical thermodynamics.
**Requisites:** Restricted to graduate students only.

CHEN 5390 (3) Chemical Reactor Engineering
Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution and diffusion effects. Department enforced prerequisite: undergraduate course in chemical reactor design/kinetics.
**Requisites:** Restricted to graduate students only.

CHEN 5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces
Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena.
**Requisites:** Requires prerequisite course of CHEN 3200 (minimum grade D-).

CHEN 5440 (3-4) Design of Materials
The course content includes introduction and study of important concepts in solid state physics (particularly those relevant for design of materials); origin, characterization and design of mechanical, electronic, optical, magnetic, thermal and electrochemical properties of materials; design of bulk and nanostructured composites; introduction to polymers and soft materials; fundamentals of colloids and interfaces; and nanoscale chemistry and physics for design or desired material properties.
**Grading Basis:** Letter Grade

CHEN 5450 (3) Polymer Chemistry
Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4450
**Requisites:** Restricted to graduate students only.

CHEN 5460 (3) Polymer Engineering
Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4460
**Requisites:** Restricted to graduate students only.

CHEN 5470 (3) Functional Materials Chemistry
The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.
**Recommended:** Prerequisite Introductory course(s) in materials or organic chemistry.

CHEN 5480 (3) Solar Cells and Optical Devices for Sustainable Buildings
This course assumes no background in electronic materials and explains how silicon and cutting-edge metal halide perovskite solar cells are designed, fabricated and characterized. Topics will include optics, band diagrams, wafer fabrication, most thin film deposition techniques, module design and economics. Other optical devices that can help the world rapidly reduce its carbon emissions, such as light-emitting diodes and energy saving windows with dynamic tinting, will also be covered.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4480
**Recommended:** Prerequisite a course in materials science (for example CHEN 4440), the physics of electromagnetism and optics at a very basic level.
CHEN 5490 (3) Electrochemical Engineering
This course discusses fundamentals and applications of electrochemical systems from an engineering perspective. Aspects of thermodynamics, reaction kinetics, and transport phenomena relevant to the description of electrode/electrolyte interfaces and charge transfer reactions are covered. Topics include cell equilibrium (Nernst equation), reactions within Butler-Volmer and Marcus theory, electrochemical double layer structure, ion transport (Poisson-Nernst-Planck equation), potential and current distributions in electrochemical cells, and experimental electroanalytical techniques. Applications include fuel cells, electrolyzers, batteries, sensors, and corrosion.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4490
Requisites: Requires prerequisite courses of (CHEN 4330 or CHEN 4830) and PHYS 1120 (minimum grade D-). Restricted to graduate students only.
Grading Basis: Letter Grade

CHEN 5630 (1) Intellectual Property Law and Engineering
Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4630
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CHEN 5650 (3) Particle Technology
Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Extra work required for graduate course.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4650
Requisites: Restricted to graduate students only.

CHEN 5670 (3) Environmental Separations
Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems.

CHEN 5730 (1) Mathematical Methods Short Course for Chemical Engineers
Determine and apply appropriate analytical methods, which may include linear and nonlinear algebraic equations, ordinary differential equations and partial differential equations, to solve an array of chemical engineering problems. Identify and interpret the differences between model predictions and experimental results.
Grading Basis: Letter Grade

CHEN 5740 (3) Analytical Methods in Chemical Engineering
Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Department enforced prerequisite: working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.
Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5750 (3) Numerical Methods in Chemical Engineering
Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers.
Requisites: Restricted to graduate students only.

CHEN 5800 (3) Bioprocess Engineering
Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes.

CHEN 5802 (3) Tissue Engineering and Medical Devices
The purpose of this course is to develop a basic understanding of quantitative and qualitative aspects of tissue engineering and medical devices. Particular emphasis will be placed on topics of potential importance and significance to chemical and biological engineers. Students will be introduced to important professional, societal and entrepreneurial issues in the field by examining case studies in which drugs and medical products have been developed or are being considered for FDA approval and clinical use.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4802
Requisites: Restricted to graduate students only.

CHEN 5803 (3) Metabolic Engineering
Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4803
Requisites: Requires prerequisite courses of APPM 2360 and BCHM 4611 (all minimum grade C-). Restricted to graduate students only.

CHEN 5804 (3) Protein and Enzyme Engineering
This course reviews various applications of protein and enzyme engineering and covers key concepts in protein and enzyme design, including protein structure-function relationships; rational and evolutionary engineering approaches; genetic code expansion; cell-free protein synthesis; computational design; and biophysical methods for protein characterization. Additionally, students gain valuable experience reading, analyzing, and interpreting research results from scientific literature, as well as drafting an original research proposal.
Equivalent - Duplicate Degree Credit Not Granted: CHEN 4804
Requisites: Requires prerequisite courses of CHEN 3320 and CHEN 2810 and BCHM 4611 (minimum grade D-). Restricted to graduate students only.

Grading Basis: Letter Grade

CHEN 5805 (3) Biological Interactions to Biomaterials
Covers major classes of materials used in medical applications. Provide an in-depth view of advanced biomaterial concepts with a focus on biological interactions with materials that relate to protein and cell interactions, the innate and acquired immune response, blood interactions and infection.
Requisites: Restricted to graduate students only.

CHEN 5830 (1) Introduction to Modern Biotechnology
Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.
**CHEN 5831 (2) Biotechnology Case Studies**
Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan.
**Requisites:** Requires prerequisite course of CHEN 5830 (minimum grade D-).

**CHEN 5835 (3) Colloids and Interfaces**
Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial a forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribiology, surfactant self-assembly, and foams/emulsions among others.
**Requisites:** Requires prerequisite course of CHEN 3320 (minimum grade C-).

**CHEN 5836 (3) Nanomaterials**
Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.
**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4836
**Requisites:** Restricted to graduate students only.

**CHEN 5838 (1-3) Special Topics in Chemical Engineering**
Graduate-selected topics courses offered upon demand.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**CHEN 5840 (1-4) Independent Study**
Allows multiple enrollment in term.
**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.

**CHEN 5900 (3) Pharmaceutical Biotechnology**
Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding.
**Requisites:** Restricted to graduate students only.

**CHEN 5919 (1-5) Special Topics in CHBE**
Repeatable: Repeatable for up to 5.00 total credit hours.
**Requisites:** Restricted to graduate students only.

**CHEN 5930 (1-3) Professional Internship**
This class provides a structure for CHEN and BIEN graduate students to receive academic credit for participating in internship experiences with industry partners that have an academic component consistent with graduate-level education in the engineering arts and sciences. Participation in this class requires an internship agreement between the student and the employment (industry) partner, detailing the academic goals of the internship experience. Instructor participation will include facilitation of mid-term and final assessment of student performance as well as additional educational opportunities during the internship period. May be taken during any term following initial enrollment and participation in CHEN or BIEN graduate programs.
**Requisites:** Restricted to graduate students only.

**CHEN 6210 (3) Microhydrodynamics of Suspensions and Colloids**
Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers.
**Requisites:** Requires prerequisite course of CHEN 5210 (minimum grade D-).

**CHEN 6820 (3) Biochemical Engineering Fundamentals**
Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomenon microbial systems and downstream processing.
**Requisites:** Restricted to Chemistry (CHEM), Chemical Engineering (CHEN), Biological Engineering (BIEN), or Biological Sciences (MCDB) graduate students only.

**CHEN 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**CHEN 6950 (1-6) Master's Thesis**

**CHEN 8990 (1-10) Doctoral Dissertation**

---

**Chemical Engineering - Master of Science (MS)**

The Master of Science degree in chemical engineering requires 30 hours of approved credit hours and successful completion of a comprehensive final exam or thesis defense.

For more information, visit the department’s Prospective Graduate Student (https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/) webpage.

**Note:** The department does not accept students interested in a terminal master’s degree except under special circumstances. Students generally obtain a master’s degree in the course of fulfilling the requirements for the Chemical Engineering - Doctor of Philosophy (PhD) (p. 1502) or the Biological Engineering - Doctor of Philosophy (PhD) (p. 1501).

**Bachelor’s–Accelerated Master’s Degree Program**

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.
For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Chemical Engineering - Bachelor of Science (BS) ([https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/chemical-biological-engineering/chemical-engineering-bachelor-science-bs/#acceleratedmasterstext]).

Requirements

Admission Requirements

General criteria for regular admission to the master's program include a bachelor's degree with a 3.25/4.00 or better overall GPA from a college or university of recognized standing, equivalent to the degree given at this university (or college work equivalent to that required for such a degree, at least 96 credit hours of which must be acceptable toward a degree at this university)# promise of ability to pursue advanced study and research, as judged by previous scholastic record or otherwise# and adequate preparation to begin graduate study in the chosen field.

Degree Requirements

The following course requirements are subject to change; for the most current information, visit the department's Prospective Graduate Student ([https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/] webpage).

A candidate for the Master of Science degree in chemical engineering must complete at least 30 credits, including at least 24 credits of coursework and 4–6 credits of MS thesis credit (CHEN 6950).

Only courses 5000-level and above may be applied towards the MS degree. Moreover, only courses at the 5000-level and above in any department count toward the PhD degree. An advisor must approve all courses.

Only those courses for which the student receives a grade of B- or better will count toward the MS degree. The overall grade point average must be 3.00 or better.

A successful oral defense of the MS thesis is required.

</tbody>
</table>

Total Credit Hours 9

Additionally, 15 of the total required credits must be chemical and biological engineering courses, and pass/fail courses do not count toward the degree.

A degree plan must be prepared at the beginning of the academic program in consultation with an advisory committee. The student is urged to maintain close contact with this advisory committee during the entire course of study.

Residency and Time Limit

It is expected that a qualified student can complete the MS degree in two years or less. All work, including the thesis defense and filing of the thesis with the Graduate School, must be completed in the two-year requirement.

Biological Engineering - Doctor of Philosophy (PhD)

The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within ChBE include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials and renewable energy.

For additional information, visit the department's Biological Engineering ([https://www.colorado.edu/chbe/graduate-program/biological-engineering-phd-program/] and Prospective Graduate Students ([https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/] webpage).

Requirements

Course Requirements

The student must work out an informal degree plan early in the PhD program with the aid of a research committee. This degree plan must include a total of at least 30 semester hours of 5000-level or above courses and at least 30 semester hours of Doctor Thesis credits.

Biological Engineering PhD students are required to complete two core courses: CHEN 5150 Biomolecular Kinetics, Transport, and Thermodynamics and CHEN 5160 Systems Analysis of Cells and Tissues.

Students are expected to complete with distinction all work in the formal courses that apply toward the degree, and achieve an overall grade-point average of 3.00 or better. A course grade below B- will not be counted toward the minimum requirements for the PhD degree, but it will be considered in the overall grade-point average.

Preliminary Examination

A preliminary examination is required of all PhD candidates. This examination consists of an oral and written component to be completed in the third semester. In addition, all students entering the program without a degree closely related to chemical engineering must either take the FE exam or have completed four chemical engineering core undergraduate courses with a grade of B or better (Fluids/Heat, Mass Transfer, Thermodynamics, Kinetics, or the equivalent courses). The graduate director or department chair will make assessments as to whether a degree is closely related to the chemical engineering degree.
Comprehensive Examination
Students must complete and pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This is followed by a group question-and-answer period with all committee members. The oral examination before the committee is based primarily on a written report the student provides to committee members two weeks in advance.

PhD Dissertation
Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit
All degree requirements must be completed within six years of the date of commencing coursework.

Chemical Engineering - Doctor of Philosophy (PhD)
The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within ChBE include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials and renewable energy.

All degree requirements must be completed within six years of the date of commencing coursework.

Civil Engineering
Graduate studies in civil engineering are offered up to the doctoral level through the Department of Civil, Environmental and Architectural Engineering (http://www.colorado.edu/ceae/). Fundamental and applied research areas pursued in the civil engineering program include geotechnical engineering and geomechanics, structural mechanics and engineering, construction management and engineering, environmental and geoenvironmental engineering, hydrology, environmental fluid mechanics, civil engineering systems, and engineering science. Together with relevant advanced coursework, graduates possess high competence and versatility to pursue a wide variety of careers in both engineering and non-engineering fields.

Course code for this program is CVEN.

Research Interests and Facilities
The Department has a variety of computational and experimental research facilities. It has multiple disciplinary computer labs as well as the CEAE Bechtel lab which houses dozens of workstations with a wide range of professional engineering analysis software for teaching and research, and owns time and ready access to the university's supercomputer system. Physical experimental facilities for geotechnical engineering and geomechanics research include 3 geotechnical
centrifuges, with one being a world-class 440g-ton centrifuge with a servo-controlled shake table for advanced physical simulations and soil model testing. For soil and rock mechanics research, analytical research can be conducted in the M.Y. Leung Computational Lab for Soils and Structures and its graduate experimental soil mechanics lab which houses multiple triaxial and cubical cells for simulating complicated 3D ascending and cyclic stress paths on geomaterials, consolidation devices with load-, deformation- and seepage-control, and special test cells for unsaturated soil mechanics testing. For structural mechanics and material engineering research, sophisticated testing for static and dynamic response of structures and their components is available by means of multiple high-speed high-force actuators, a large strong floor and a hydraulic shake table. Four uniaxial loading frames and MTS equipment for studies of mechanical and durability properties of structural and construction materials under combined load and environmental conditions are in use. Sophisticated real-time hybrid experimental-computational pseudo-dynamic testing of large-scale structures whose critical part is tested physically as a substructure with its measured response serving as input to a computer model of the rest of the structure which in turn computes the next load increment to be applied experimentally to the former in a coupled manner can also be set up.

The hydraulics and water resources research laboratories include excellent facilities in water quality and water resources management for which an advanced networked workstation environment for developing advanced decision support systems is available. For environmental fluid mechanics research and instruction, a state-of-the-art Ecological Fluid Dynamics Laboratory is available for fluid mechanics and studies of the interaction between biological processes and ecological systems from fluid stirring, mixing, and reactions, and how organisms evolved and adapt to their physical environment. The facility utilizes laser-based instrumentation for quantifying turbulence and transport of contaminants, microorganisms and odors. For environmental engineering research, the Sustainable Energy and Environmental Laboratories (SEEL) houses a variety of experimental facilities including multiple liquid chromatography mass spectrometers and an automated solid phase extraction system. They offer unique opportunities for studies of environmental microbiology, environmental chemistry, water quality, air quality, molecular biology, toxicology and field ecology with modern PCs in all laboratories for instrument control and data acquisition. For building energy and systems research and studies, the Illumination Laboratory is a special facility for testing and evaluating architectural lighting systems as well as daylighting and lighting control design. Its Larson Building Systems Laboratory (https://www.colorado.edu/ceae/larsonlab/) is a unique facility in the HVAC industry for both education and research purposes and is designed for dynamic testing of complete and full-scale commercial HVAC and building systems. The facility consists of a full-size commercial HVAC system, four representative commercial building zones, a system for producing repeatable and controllable loads on the HVAC system, and sophisticated data acquisition and control systems. The graduate program in construction engineering and management is well equipped in terms of computer hardware and software, and can arrange access to other unique lab facilities in the department.

To provide further synergy in research, the department operates several centers:

- The Center for Infrastructure, Energy and Space Testing (https://www.colorado.edu/geotech-centrifuge/) supports research and instructions in structural and geotechnical testing, characterization of the fundamental mechanical, structural, hydraulic, and thermal properties of materials relevant to the performance of infrastructural systems.
- The Design of Risk-reducing, Innovative-implantable Small-system Knowledge (DeRISK) Center aims to identify, develop, demonstrate and facilitate widespread acceptance and applicability of novel and innovative technologies and approaches to measure or treat groups of microbiological or chemical contaminants, or their precursors, apply novel information technology systems and improve the sustainability of small drinking water systems.
- The Center for Environmental Mass Spectrometry (CEMS) is a laboratory that focuses on the detection of pharmaceuticals, hormones and other organic contaminants in water and evaluating the effectiveness of methods for removing these compounds.
- The Center for Advanced Decision Support for Water and Environmental Systems (CADSWES) is an interdisciplinary center of excellence that focuses on applying advanced computing techniques to provide decision makers with decision support systems (DSSs) to help them more effectively manage water and environmental systems.
- The Mortenson Center in Global Engineering focuses on promoting integrated and participatory solutions to humanitarian development by educating globally responsible engineering students and professionals to address pressing problems faced by developing communities worldwide, with the goal of transforming the understanding, application and evaluation of engineering globally. Current research includes such topics as water and wastewater treatment, surface and subsurface contaminant transport, environmental processes, fluid mechanics, decision support systems, hydraulic research, land treatment, rapid infiltration and activated sludge processes. Cost prediction in construction projects, construction management, worker safety, energy conservation in buildings, solar applications and lighting systems are included. Active research is ongoing in advanced constitutive soil modeling and experimental characterization for geotechnical engineering, computational geomechanics, soil dynamics, seismic wave propagation and geophysics, geotechnical earthquake engineering, wave-based sounding, centrifugal modeling, geosynthetics and glaciology. Research in structures includes stability, damage and fracture, material microstructures, durability, temperature effects, finite element modeling, reinforced concrete, earthquake responses, reinforced masonry structures, prestressed concrete and dynamic control. In water resources and fluid mechanics, work is continuing in stochastic hydrology and hydroclimatolgy, physics of scalar transport, mixing and reactions and hydrodynamics of ecological flows. Research in engineering science includes theoretical, mathematical and computational mechanics with applications to solid and fluid dynamics, blast and shock loading, mathematical physics, heat transfer, earth science, and multi-scale multiphase material modeling. Making use of model-based analysis, experimental and past performance data of built and human environment, the civil systems program focuses on providing training of a systems approach for life-cycle design decisions, management and monitoring of civil infrastructure systems, accounting for engineering, social science, economics and public policies in design holistically.

**Master's Degrees**

- Civil Engineering - Master of Science (MS) (p. 1515)
- Civil Engineering - Professional Master of Science (MSCVE) (p. 1516)
Doctoral Degree

- Civil Engineering - Doctor of Philosophy (PhD) (p. 1518)

Certificates

- Architectural Lighting - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-applied-science/architectural-lighting-graduate-certificate/)
- Global Engineering - Graduate Certificate (p. 1519)
- Water Engineering and Management - Graduate Certificate (p. 1629)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Sture, Stein  
Professor Emeritus

Summers, Scott R. (https://experts.colorado.edu/display/fisid_113151/)  
Professor; PhD, Stanford University

Thomas, Evan (https://experts.colorado.edu/display/fisid_163895/)  
Professor, Assistant Professor; PhD, University of Colorado Boulder

Tonon, Fulvio  
Associate Professor Adjunct; PhD, University of Colorado Boulder

Torres-Machi, Cristina (https://experts.colorado.edu/display/fisid_159884/)  
Assistant Professor; PhD, Universitat Politecnica de Valencia, Spain

Vásconez, Sandra L. (https://experts.colorado.edu/display/fisid_144198/)  
Senior Instructor; MA, University of Denver

Walker, Michael Edward (https://experts.colorado.edu/display/fisid_155103/)  
Instructor; PhD, Illinois Institute of Technology

William, Kaspar J.  
Professor Emeritus

Xi, Yunping (https://experts.colorado.edu/display/fisid_110518/)  
Professor; PhD, Northwestern University

Zagona, Edith A. (https://experts.colorado.edu/display/fisid_100429/)  
Research Professor; PhD, University of Colorado Boulder

Zhai, John Z. (https://experts.colorado.edu/display/fisid_130604/)  
Professor, Faculty Director, Associate Chair; PhD, Stanford University

Zhang, Yida (https://experts.colorado.edu/display/fisid_158222/)  
Assistant Professor; PhD, Northwestern University
Courses

CVEN 5006 (3) Construction Engineering and Management Fundamentals
Provides an overview of the construction industry to establish a foundation for subsequent graduate courses in construction engineering and management. Students will be exposed to projects of varying funding sources, contracts, scope and complexity. Project phases will be established including planning, funding, design, construction, turnover, operation and maintenance. The course will focus on fundamental construction cost estimating, scheduling, delivery systems, contractual relationships, key contract clauses, risk allocation, building materials/systems and project controls. Previously offered as a special topics course.

Grading Basis: Letter Grade

CVEN 5111 (3) Structural Dynamics
Focuses on the response of single- and multi-degree of freedom structures subjected to harmonic, impulsive and arbitrary loads (including earthquake base excitation). Sources and modeling of damping will be discussed. Analytical and numerical solutions will be considered for both linear and nonlinear structural systems. Elastic and inelastic response spectra will be discussed.

Requisites: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.

Additional Information: Departmental Category: Mechanics

CVEN 5131 (3) Continuum Mechanics and Elasticity
Provides foundation for advanced study of structural, mechanical and geo-material behavior and continuum theories in mechanics. Topics: Cartesian tensors, formulation of continuum mechanics for small and large deformation, constitutive laws for elastic solids, energy principles, methods of potentials, formulations and solutions of 2D and 3D elastostatic and elastodynamic problems, analytical and numerical formulations.

Requisites: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.

Recommended: Prerequisite CVEN 3161.

Additional Information: Departmental Category: Mechanics

CVEN 5147 (3) Civil Engineering Systems
Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4147

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-AREN-CVEN, C-EVEN-CVEN or C-EVEN) only.

Additional Information: Departmental Category: Miscellaneous

CVEN 5151 (3) Wave Methods for Design and Characterization of Advanced Materials
Covers key theoretical concepts and applications of wave propagation with the focus on ultrasonic scattering. The course material includes: (i) dispersion analysis for design and characterization of materials with random and periodic microstructure, and (ii) advanced elastodynamic formulations rooted in 2D and 3D boundary integral equations for the purpose of inverse scattering and imaging. The course is intended to be self-contained, research-oriented and accessible for multidisciplinary audience.

CVEN 5157 (3) A Systems Approach to Global Engineering
Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

Equivalent - Duplicate Degree Credit Not Granted: EDEN 4147, CVEN 4157 and EDEN 5147

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-AREN-CVEN, C-EVEN-CVEN or C-EVEN) only.

CVEN 5161 (3) Advanced Mechanics of Materials I
Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4161

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-AREN-CVEN, C-EVEN-CVEN or C-EVEN) only.

Additional Information: Departmental Category: Mechanics

CVEN 5206 (3) Design Development
Provides an overview of the development process and proforma, investigates the interrelationship between design decisions and building costs, and evaluates the impact of each major building system on the development budget and schedule. Provides a simulated development experience where students respond to a Request for Proposal, including proformas, design, estimates and outline specifications. Department consent required. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-AREN-CVEN, C-EVEN-CVEN or C-EVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5226 (3) Construction Safety
Comprehensively studies construction safety in the construction industry. Focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, predictive analytics and learning. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-AREN-CVEN, C-EVEN-CVEN or C-EVEN) only.

Additional Information: Departmental Category: Construction

CVEN 5246 (3) Legal Aspects of Construction
Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-AREN-CVEN, C-EVEN-CVEN or C-EVEN) only.

Recommended: graduate standing or department consent required.

Additional Information: Departmental Category: Construction
CVEN 5276 (3) Engineering Risk and Decision Analysis
Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, and various types of multicriteria decision analyses. Culminates in a larger term project.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 3227 and graduate standing or instructor consent required.
Additional Information: Departmental Category: Construction

CVEN 5286 (3) Design Construction Operations
Considers effective/efficient design of construction operations. Front end planning; construction labor relations; productivity management. Emphasizes construction productivity improvement by group field studies and discrete event simulation modeling. How overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: graduate standing or department consent required.
Additional Information: Departmental Category: Construction

CVEN 5313 (3) Environmental Fluid Mechanics
Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites APPM 2350 and APPM 2360 and CVEN 3313.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5323 (3) Applied Stream Ecology
Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5333 (3) Physical Hydrology
Introduces hydrology as a quantitative science describing the occurrence, distribution and movement of water at and near the surface of the earth. Develops a quantitative understanding of atmospheric water, infiltration, evapotranspiration and surface runoff. Studies global climatology and large scale climate drivers of regional hydrology at interannual time scales. Solves engineering problems related to water resources.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 4333.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5343 (3) Transport and Dispersion in Surface Water
Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5346 (3) Managing Construction and Engineering Projects and Organizations
Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, cores competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Construction

CVEN 5353 (3) Groundwater Hydrology
Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 and APPM 2360.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5363 (3) Modeling of Hydrologic Systems
Introduces students to modeling techniques. Focus areas include physical hydrology and hydrometeorology; measurement and inference; climate change impacts; role of scale in hydrology; uncertainty analysis; and a case study project. Projects will examine hydrologic impacts of various drivers such as climate warming or land cover change, utilizing an assessment of historic conditions to better understand and model future disturbance scenarios.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5373 (3) Water Law, Policy, and Institutions
Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations.
Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources
CVEN 5383 (3) Applied Groundwater Modeling
Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4383
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites APPM 2360 and CVEN 4353 or CVEN 5353.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5393 (3) Water Resources System and Management
Introduces water resources planning and management as an integrated systems problem that satisfies multiple competing objectives under constraints and uncertainty. Includes problem formulation and solution using decision support systems, optimization with and without uncertainty, stochastic simulation, and multiobjective optimization. Introduces water resources economics and planning under uncertainties such as climate change and increasing urbanization.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5404 (3) Water Chemistry
Introduces chemical fundamentals governing the chemistry of natural and treated waters. Topics include thermodynamics and kinetics of acid and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5414 (3) Water Chemistry Laboratory
Introduces analytical techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Topics include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters.
Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C). Requires corequisite course of CVEN 5424. Requires graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5423 (3) Water Resources Engineering Design
Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4323
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5424 (3) Environmental Organic Chemistry
Examines the fundamental physical and chemical processes that impact the fate and transport of organic contaminants in natural and engineered systems. Emphasizes both equilibrium and kinetic aspects, including solubility, vapor pressure, air-water exchange, sorption, abiotic redox reactions, and photodegradation.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5434 (3) Environmental Engineering Design
Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Department consent required.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 5524 or CVEN 5534 or CVEN 5474.
Additional Information: Departmental Category: Environmental

CVEN 5444 (3) Municipal Des Proj

CVEN 5446 (3) Infrastructure Asset Management
Introduces a framework that combines engineering principles with economic theory to facilitate a more organized and logical approach to decision-making in the management of infrastructure. Topics covered include asset valuation, modeling infrastructure deterioration, life-cycle cost analysis, and optimization. Although the concepts introduced in this course are applicable to different infrastructure systems, especially emphasis will be given to transportation projects.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CVEN 5454 (3) Statistical Methods for Natural and Engineered Systems
Applies traditional and modern probability and statistical methods to environmental, hydrological, climatological and engineering data analysis. Topics include: basic probability, data visualization, fitting univariate and multivariate distributions, Monte Carlo simulations, extreme value distributions, confidence intervals and hypothesis testing, nonparametric density estimators, linear regression, and Bayesian analysis. The data analysis tool, R, is used throughout the course.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5464 (3) Environmental Engineering Processes
Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4464 and EVEN 4464
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental
CVEN 5474 (3) Hazardous and Industrial Waste Management
Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4474
Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5484 (3) Applied Microbiology and Toxicology
Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4484 and EVEN 4484
Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5494 (3) Surface Water Quality Modeling
Examines the relationships among air, water, and landpollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Department consent required.

Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5511 (3) Introduction to Finite Element Analysis
Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4511
Requirements: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.
Additional Information: Departmental Category: Mechanics

CVEN 5514 (3) Bioremediation
Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation.

Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 4484 or CVEN 5424 or CVEN 5484.
Additional Information: Departmental Category: Environmental

CVEN 5524 (3) Drinking Water Treatment
Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies.

Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 4464 or CVEN 5464 or graduate standing or instructor consent required.
Additional Information: Departmental Category: Environmental

CVEN 5525 (3) Matrix Structural Analysis
Covers matrix formulation of principles of structural analysis and development of direct stiffness and flexibility methods for analysis of 2D and 3D structures. Variational formulation of the finite element method. Geometric nonlinearity. Familiarity with MatLab programming is expected.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4525
Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Structures

CVEN 5534 (3) Wastewater Treatment
Covers the processes used to treat municipal wastewater, focusing on biological processes. Includes: design of aerobic, anoxic, anaerobic and suspended growth technologies to remove and transform pollutants; design and assessment of treatment approaches that recover energy, nutrients and water from wastewater; application of fundamental concepts of aquatic chemistry, environmental microbiology and computational models.

Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 5404 and CVEN 5484 and CVEN 5464.
Additional Information: Departmental Category: Environmental

CVEN 5537 (3) Numerical Methods in Civil Engineering
Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4537
Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Miscellaneous

CVEN 5544 (3) Solid Waste Management and Resource Recovery
Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.

Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 3414.
Additional Information: Departmental Category: Environmental

CVEN 5554 (3) Fundamentals of Air Quality Management
Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Required for CVEN environmental engineering graduate students.

Equivalent - Duplicate Degree Credit Not Granted: CVEN 4554
Requirements: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental
CVEN 5564 (3) Water Profession: Communication and Utility Finance
Develops and improves the skills and tools needed for graduate students and young professionals. Focusing on highly effective leaders; leadership with impact; effective communication tools; and communicating with teams, city councils, governing boards, and the public.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environmental

CVEN 5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems
Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety, management, and sustainability considering. Undergraduates may enroll with the permission of the instructor.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 3227 or equivalent.
Additional Information: Departmental Category: Structures

CVEN 5574 (3) Water Utility Management: Current Issues and Future Challenges
Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on management, leadership, communication and utility financial in the new water profession era. Undergraduate seniors may contact instructor for permission to enroll.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Structures

CVEN 5575 (3) Advanced Topics in Steel Design
Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Undergraduate may enroll with permission of the instructor.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5584 (3) Water Profession: Leadership and Management
Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on financing water services, capital planning, rates, management planning, staffing and organization and critical thinking. Undergraduates may request instructor permission to enroll.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Structures

CVEN 5585 (3) Advanced Topics in Reinforced Concrete Design
Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Undergraduates may enroll with the permission of the instructor.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 4555.
Additional Information: Departmental Category: Structures

CVEN 5594 (3) Water Reuse and Reclamation
Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4594
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 3141 and CVEN 3424.
Additional Information: Departmental Category: Environmental

CVEN 5604 (3) UV Disinfection and Advanced Oxidation
Provides a fundamental basis for design of UV processes in water and wastewater treatment. Includes principles of photochemistry and photobiology. Applications to disinfection of water and degradation of chemical compounds in the environment. Design of UV disinfection systems and reactors and advanced oxidation processes. Environmental UV-based decay of pollutants.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 3414 and CVEN 3424.
Additional Information: Departmental Category: Environmental

CVEN 5614 (3) Bioenergy & Bioresource Recovery
Introduces fundamental theories and applied technologies used in production and conversion of renewable biomass including waste materials into bioenergy and other value-added products. Conducts quantitative evaluations on conversion processes such as renewable biogas production, electricity generation, liquid fuels, metal and nutrients recovery and organic chemical production.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 4484.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environmental

CVEN 5628 (3) Seepage and Slopes
Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 3708 and CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 5678 (3) Soil Improvement and Reinforcement
Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 3718.
Additional Information: Departmental Category: Geotechnical
CVEN 5688 (3) Environmental Geotechnics
Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5708 (3) Soil Mechanics
Offers an advanced course in soil mechanics. Coverage includes basic principles of continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5718 (3) Mechanics and Dynamics of Glaciers
Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4718
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5728 (3) Foundation Engineering
Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.
Equivalent - Duplicate Degree Credit Not Granted: CVEN 4728
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5738 (3) Applied Geotechnical Analysis
Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures.
Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5748 (3) Design of Earth Structures
Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems.
Requisites: Requires a prerequisite course of CVEN 5708 (minimum grade C). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5758 (3) Flow Processes in Soils
Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 5768 (3) Introduction to Rock Mechanics
Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisites CVEN 3708 and CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 5788 (3) Computational Modeling in Geotechnical Engineering
Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Recommended Prereq: CVEN 5708
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5798 (3) Dynamics of Soils and Structures
Covers fundamental characterization of soils, foundations and structures under general dynamic and earthquake loads. Principles of vibrations and wave propagation for 1D, 2D, 3D. In-situ and laboratory determination of dynamic soil properties; methods for site response analysis, foundation vibrations, dynamic soil-structure interaction and liquefaction problems.
Requisites: Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.
Recommended: Prerequisite CVEN 3708.
Additional Information: Departmental Category: Geotechnical
CVEN 5818 (3) Geotechnical Earthquake Engineering
Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite CVEN 5798.
Additional Information: Departmental Category: Geotechnical

CVEN 5822 (3) Geographical Information Systems for Civil and Environmental Systems
Theory and use of geographical information systems in civil engineering, environmental studies, natural resources and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 5830 (1-3) Special Topics for Seniors/Grads
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Building Systems

CVEN 5831 (3) Special Topics
Supervised study of special topics of interest to students under instructor guidance. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Mechanics

CVEN 5833 (1-3) Special Topics
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 5834 (1-3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Environmental

CVEN 5835 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Structures

CVEN 5836 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Construction

CVEN 5837 (1-3) Special Topics for Seniors/Grads
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Miscellaneous

CVEN 5838 (1-3) Special Topics
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Geotechnical

CVEN 5849 (1-6) Independent Study
Available only through approval of graduate advisor. Subject arranged to fit needs of student.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Additional Information: Departmental Category: Special Topics

CVEN 5899 (1) Graduate Engineering Internship Experience
An academically supervised graduate-level engineering experience that is integral to the students’ graduate research and study by connecting classroom instructions to professional practice. Requires a pre-approved written plan of the proposed graduate-level work experience and a signed cooperative agreement or offer letter from employer. The 1-unit course will count toward the graduate student's degree together with the required minimum of 30 credit hours of regular core and elective courses in the student's major.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.

CVEN 5919 (3) Global Development for Engineers
Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects.
Requisites: Restricted to students with sub-plan of Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.
Additional Information: Departmental Category: Special Topics
CVEN 5929 (3) Sustainable Community Development 2
Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development.
Requisites: Requires prerequisite course of CVEN 5919 (minimum grade C-). Restricted to students with Engineering Developing Communities (EDC) sub-plan or EDC certificate (ENDC-CERG).
Additional Information: Departmental Category: Special Topics

CVEN 5939 (3) Global Development Practicum
Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in CVEN 5919.
Requisites: Requires prerequisite course CVEN 5919 (minimum grade C-). Restricted to students with sub-plan of Global Engineering/Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.
Additional Information: Departmental Category: Miscellaneous

CVEN 5969 (1-3) Water, Sanitation, and Hygiene
Studies the fundamentals behind effective hygiene and remediation processes and engineering solutions developed and designed for specific international problems. Approaches to hygiene, clean water and sanitation in less industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite course CVEN 3424 and CVEN 3414.
Additional Information: Departmental Category: Environmental

CVEN 6161 (3) Advanced Mechanics of Materials 2
Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques.
Recommended: Prerequisite CVEN 5161.
Additional Information: Departmental Category: Mechanics

CVEN 6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology
Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization.
Requisites: Requires a prerequisite course of CVEN 5333 (minimum grade C-).
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6383 (3) Flow and Transport through Porous Media
Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar
Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers.
Requisites: Restricted to graduate student Civil (CVEN) Engineering students only.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6414 (3) Aquatic Surfaces and Particles
Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics.
Requisites: Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-).
Additional Information: Departmental Category: Environmental

CVEN 6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media
Covers constitutive modeling, multiphase mechanics, and finite element implementation of constitutive models and coupled solid-fluid mechanical governing equations for inelastic porous media at small strain. Considers transient and steady state conditions. Analyzes structural, geotechnical, geological, mechanical, biomechanical, and other related modern engineering problems. Uses general purpose finite element software program for implementation and analysis.
Additional Information: Departmental Category: Mechanics

CVEN 6525 (3) Nonlinear Analysis of Framed Structures
Explores theoretical underpinnings of nonlinear static and dynamic analysis of framed structures, along with exposure to the corresponding programming techniques in Matlab. Topics covered are: flexibility and fiber based beam-column element formulation; structural, section and fiber plasticity; geometric and material nonlinearities; nonlinear pushover and transient analysis of framed structures.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Structures

CVEN 6595 (3) Earthquake Engineering
Analyzes and designs structures for earthquake load covering; properties of earthquake ground motions, ground motion prediction equations, seismic hazard analysis, response spectra, response of linear and nonlinear structures, construction of design spectra, seismic design methods, and building code requirements.
Requisites: Requires prerequisite course of CVEN 5111 (minimum grade of C-). Restricted to graduate students only.
Additional Information: Departmental Category: Structures

CVEN 6830 (3) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Building Systems

CVEN 6831 (3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Mechanics
CVEN 6833 (1-3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Special Topics

CVEN 6834 (1-3) Special Topics
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Special Topics

CVEN 6835 (3) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Structures

CVEN 6836 (3) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Construction

CVEN 6837 (3) Sp Tpcs Comp Graphics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Miscellaneous

CVEN 6838 (3) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Geotechnical

CVEN 6839 (1-3) Special Topics
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Geotechnical

CVEN 6943 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Environmental

CVEN 6944 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Environmental

CVEN 6945 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Structures

CVEN 6946 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Structures

CVEN 6947 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Miscellaneous

CVEN 6948 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Geotechnical

CVEN 6949 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Special Topics

CVEN 6951 (1-4) Master's Thesis
Additional Information: Departmental Category: Mechanics

CVEN 6952 (1-4) Master's Thesis
Additional Information: Departmental Category: Surveying and Transportation

CVEN 6953 (1-6) Master's Thesis
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6954 (1-6) Master's Thesis
Additional Information: Departmental Category: Environmental

CVEN 6955 (1-6) Master's Thesis

Additional Information: Departmental Category: Construction

CVEN 6957 (1-4) Master's Thesis
Additional Information: Departmental Category: Miscellaneous

CVEN 6958 (1-6) Master's Thesis
Additional Information: Departmental Category: Geotechnical

CVEN 6959 (1-4) Master's Thesis
Additional Information: Departmental Category: Special Topics

CVEN 6961 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Mechanics

CVEN 6962 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Surveying and Transportation

CVEN 6963 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Fluid Mechanics and Water Resources

CVEN 6964 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Environmental

CVEN 6965 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Structures

CVEN 6966 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Construction

CVEN 6967 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Miscellaneous

CVEN 6968 (1-3) Master's Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Geotechnical

CVEN 6969 (1-3) Masters Report
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Special Topics

CVEN 7111 (3) Advanced Structural Dynamics
Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads.
Requisites: Requires prerequisite course of CVEN 5111 (minimum grade C).
Additional Information: Departmental Category: Mechanics
CVEN 7141 (3) Plates and Shells
Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings.
Requisites: Requires prerequisite courses of CVEN 5131 or CVEN 5161 (minimum grade C-).
Additional Information: Departmental Category: Mechanics

CVEN 7161 (3) Fracture Mechanics
Includes three parts: 1) fundamentals through rigorous mathematical formulations of linear/nonlinear elastic fracture mechanics, 2) materials’ theoretical strength, including metals, granular materials, polymers and steel, 3) numerical (finite element) methods in fracture mechanics. Heavy emphasis on project and independent work.
Additional Information: Departmental Category: Mechanics

CVEN 7511 (3) Computational Finite Inelasticity and Multiphase Mechanics
Recommended: Prerequisites CVEN 5131 and CVEN 5511 and CVEN 6511.
Additional Information: Departmental Category: Mechanics

CVEN 7718 (3) Engineering Properties of Soils
Emphasizes engineering aspects of soil mechanics. Implications of soil strength, volume change, consolidation behavior in engineering problems such as slope stability, deformation of retaining walls, surface subsidence due to tunneling. Time effects in soil/long-term bearing capacity of piles. Laboratory determination of constitutive parameters of soils. Field tests/their correlations with soil properties. Case studies using finite element software.
Requisites: Requires prerequisite course of CVEN 5708 (minimum grade of C).
Additional Information: Departmental Category: Geotechnical

CVEN 7788 (3) Soil Behavior
Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials.
Recommended: Prerequisite CVEN 3718.
Additional Information: Departmental Category: Geotechnical

CVEN 7831 (1-3) Sp Tpc-Constitutive Mech
Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Mechanics

CVEN 7838 (3) Special Topics
Additional Information: Departmental Category: Geotechnical

CVEN 7849 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: Special Topics

CVEN 8991 (1-10) Doctoral Dissertation
Additional Information: Departmental Category: Mechanics

CVEN 8992 (1-10) Doctoral Dissertation
Additional Information: Departmental Category: Surveying and Transportation

CVEN 8993 (1-10) Doctoral Dissertation

Additional Information: Departmental Category: Special Topics

Civil Engineering - Master of Science (MS)

The department's objective is to produce engineers capable of identifying, preventing and solving building, construction and environmental problems. In addition to the well-established graduate programs in environmental, water resource and geotechnical engineering, students in the department may also choose to study in the emerging field of geoenvironmental engineering. Campus facilities, including a National Science Foundation-funded earthquake simulator, permit a case-study approach, which exposes students to real-world problems and allows experimentation, testing and analysis.

Areas of study within the Civil Engineering Department are:
- Building systems engineering
- Civil systems engineering
- Construction engineering and management
- Engineering science
- Environmental engineering
  - Environmental fluid mechanics and hydraulic engineering
  - Geoenvironmental engineering
  - Geotechnical engineering and geomechanics
  - Global engineering
  - Structural engineering and structural mechanics
- Hydrology and water resources management

For more information, visit the department's Graduate Studies (http://www.colorado.edu/ceae/prospective-students/graduate-studies/) webpage.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.
For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Architectural Engineering - Bachelor of Science (BS) (p. 769)
- Civil Engineering - Bachelor of Science (BS) (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs/study/civil-environmental-architectural-engineering/civil-engineering-bachelor-science-bs/acceleratedmasterstext)
- Environmental Engineering - Bachelor of Science (BS) (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs/study/civil-environmental-architectural-engineering/environmental-engineering-bachelor-science-bs/acceleratedmasterstext)

**Requirements**

**Course Requirements**

The Master of Science degree in civil engineering requires a total of 30 credit hours (including coursework and thesis hours) with a grade of B- or better and a cumulative GPA of at least 3.00. At least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in CVEN courses. In addition, specific focus area requirements must be met.

Students may apply up to 6 credit hours of approved 4000-level courses from departments outside CEAE to their master's degree if the courses fit with the student's degree plan.

**Degree Plans**

**Plan I: Thesis Option**

Students must complete 6 credit hours of MS thesis. Plan I culminates with an oral presentation and/or written report or oral examination.

**Plan II: Non-Thesis Option**

There are two non-thesis options:

- Students choosing Plan Ila must complete at least 30 credit hours of coursework, including a 3-credit independent study report.
- Students choosing Plan IIb must complete at least 30 credit hours of coursework and pass a final exam.

**Time Limit**

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one to two years.

**Civil Engineering - Professional Master of Science (MSCVE)**

The Department of Civil, Environmental and Architectural Engineering offers a professional master's degree tailored toward working engineers who desire to develop a new skill set. The programs are coursework based and result in a Master of Science degree.

**Areas of Emphasis**

**Water Engineering and Management Emphasis**

CU Boulder's professional Master of Science degree in civil engineering, with an emphasis in water engineering and management (WE&M), combines technical courses in environmental and civil engineering with highly-valued professional, non-technical skills in communication, leadership, management, utility finance and governance. The water engineering and management program provides students with leadership skills so they can effectively manage teams and initiatives typically faced in the water profession.

The water engineering and management professional master's program (PMP), designed for working professionals, provides the tools you need to produce results and solve increasingly complex problems in the water profession. Courses are delivered on campus and live streamed/recorded options over the internet, allowing working professionals from across the globe to earn a graduate MS degree while continuing to put the learning into practice in their work.

Students are young and mid-career professionals working for utilities, consulting firms, government and regulatory agencies, looking to advance their careers in the water industry. With faculty of senior water professionals from across the country, including those from utilities, consulting firms, and global professional organizations, students gain an opportunity to network and learn through real work case studies.

All of the graduate courses are available to distance and on campus students. All the students can come to class, watch the live classes over Zoom and/or the recorded Zoom classes.

The WE&M courses are available for a WE&M graduate certificate (https://www.colorado.edu/ceae/water-engineering-management-certificate/) or as an Professional MS degree (https://www.colorado.edu/ceae/water-engineering-management-professional-masters-program/).

**Degree Options**

The PMP program has three plans. Plan I includes a written thesis, with reduced course work. Plans Ila and IIb focus on coursework, with an option of including up to 2 semesters of independent study for a report. A vast majority of PMP students use plans Ila and IIb.

- **Plan I (Thesis Options):** This plan requires 24 hours of course credits and 6 hours of thesis credits. This is pursued under the direct supervision of a research advisor, and student must formally defend the thesis.
- **Plan Ila (Coursework Option):** This plan requires 30 credits. Thirty credits can be obtained with 10, 3 hour-credit courses. This plan has a wider variety of coursework.
- **Plan IIb (Report Option):** This plan requires 30 credits, but up to 6 hours of independent study may be included towards to 30-credit requirement. The independent study requires a report completed under the guidance of a faculty member.

For more information, visit the department's Water Engineering and Management (https://www.colorado.edu/ceae/research/interdisciplinary-programs/water-engineering-management/) webpage.

**Global Engineering Emphasis**

The Master of Science degree in civil engineering, with an emphasis in global engineering is a unique program offered by the Mortenson Center at CU Boulder. This degree is a professional track of the MS program in civil engineering. It is designed to offer students exposure to a breadth of knowledge in relevant areas such as global health, development economics and impact evaluation, while also building technical skills and providing the opportunity for further study in a specific area of interest within global engineering. In addition to classroom-based learning, students are required to complete a field practicum, embedded for six weeks to six months with a global development organization. These practicum placements have taken
place in over 50 countries, partnering with over 80 organizations. Learn more about our practicum partnerships on the Mortenson Center (https://www.colorado.edu/center/mortenson/education/practicumplacements/) website.

Our graduates are able to provide technical expertise to development agencies or other firms by recognizing the many facets of community development that are critical to sustainable solutions. Students gain skills in data analysis, project management and systems thinking so they can help create and implement solutions to address worldwide needs.

For more information, visit the Mortenson Center in Global Engineering (https://www.colorado.edu/center/mortenson/) webpage.

**Distance Education Option**

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

**Requirements**

**Course Requirements**

The following course requirements are subject to change; for the most current information, visit the department’s Water Engineering & Management webpage or the Mortenson Center in Global Engineering (https://www.colorado.edu/center/mortenson/) webpage.

The professional master's degree requires a total of 30 credit hours, at least 24 of which must be completed at the 5000 level or above. At least 18 credit hours must be from coursework in CVEN.

**Time Limit**

All degree requirements must be completed within four years of the date of commencing coursework.

**Areas of Emphasis**

**Water Engineering & Management Emphasis**

This emphasis requires at least 30 credit hours from the following categories.

**Global Engineering Series**

MCGE offers courses as series of 5-week modules, with each module worth one credit-hour. In the Professional Master's in Global Engineering, students are required to complete 12 credit-hours from the series

| Principles | Project Management |
| Field Methods | Water, Sanitation and Hygiene (WASH) |
| Humanitarian Aid | Household Energy |

**Option Area**

Students work with their faculty advisor to determine which courses to take in order to fulfill the remaining 12 required credit hours. These can be met through courses that fall under an established theme (e.g., energy, infrastructure, WASH) or that help to strengthen prioritized skills (e.g., project management, data analysis) as identified by the student and their advisor.

**Dual-Track Emphasis**

For this emphasis, students are required to:

1. Select 9 credit hours from the courses listed in Group A and 15 credit hours from Group B of more than one sub-areas listed below.
2. Select 6 credits of 5000-level free electives from the extensive course offerings from civil or other engineering disciplines in the College or professional management classes, such as EMEN 5010 and EMEN 5020, collectively referred to as Group C.

**Sub-area 1: Structural Engineering**

CVEN 5585 Advanced Topics in Reinforced Concrete Design
CVEN 6595 Earthquake Engineering

Sub-area 2: Construction Engineering

Group A
CVEN 5836 Special Topics for Seniors/Grads (CEM Fundamentals)
CVEN 5226 Construction Safety
CVEN 5246 Legal Aspects of Construction

Group B
CVEN 5276 Engineering Risk and Decision Analysis
CVEN 5346 Managing Construction and Engineering Projects and Organizations
CVEN 5836 Special Topics for Seniors/Grads

Sub-area 3: Geotechnical Engineering

Group A
CVEN 5708 Soil Mechanics
CVEN 5798 Dynamics of Soils and Structures
CVEN 5788 Computational Modeling in Geotechnical Engineering
CVEN 5768 Introduction to Rock Mechanics

Group B
CVEN 5628 Seepage and Slopes
CVEN 5728 Foundation Engineering
CVEN 5818 Geotechnical Earthquake Engineering

Sub-area 4: Water Resources Engineering

Group A
CVEN 5333 Physical Hydrology
CVEN 5353 Groundwater Hydrology
CVEN 5313 Environmental Fluid Mechanics
CVEN 5454 Statistical Methods for Natural and Engineered Systems
CVEN 5537 Numerical Methods in Civil Engineering

Group B
CVEN 5363 Modeling of Hydrologic Systems
CVEN 5393 Water Resources System and Management
CVEN 5383 Applied Groundwater Modeling
CVEN 5343 Transport and Dispersion in Surface Water
CVEN 5423 Water Resources Engineering Design

Civil Engineering - Doctor of Philosophy (PhD)

Students typically complete their PhD in civil, environmental and architectural engineering within 4 to 5 years, depending on whether they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program directly without a master's degree.

Our PhD program is intended to help students achieve a high level of engineering competence and develop their ability to perform original research that advances the field of civil engineering and beyond. PhD students in the program are typically supported with research and teaching assistantships, but are also often successful in obtaining their own fellowships or sponsorships from external agencies.

Areas of study within the Civil Engineering Department are:
- building systems engineering
- construction engineering and management
- environmental engineering
- geoenvironmental engineering
- geotechnical engineering
- civil systems engineering
- engineering science
- structural engineering and structural mechanics
- hydrology, water resources and environmental fluid mechanics

For more information, visit the department’s Graduate Studies webpage.

Requirements

The PhD requires 30 credit hours of coursework, plus 30 hours of dissertation credit. PhD students are also required to successfully complete a preliminary exam, a comprehensive exam and a final dissertation defense.

Preliminary Examination
Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. The student must pass this examination in order to continue in the doctoral program. Specific format of the preliminary examination varies by the area of study, so the student should check with their advisor for additional details.

Comprehensive Examination
The comprehensive examination shall consist of a written and an oral examination. The exam may not be attempted until the student’s last semester of formal coursework. At the comprehensive examination, the student shall present a plan for the dissertation research to the advisory committee for approval. Failure to pass the comprehensive examination may be remedied by repeating the examination after an interval of not less than four months. Specific format of the comprehensive examination varies by the area of study, so the student should check with their advisor for additional details.

PhD Dissertation
Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

Time Limit
All degree requirements must be completed within six years of the date of commencing coursework.
Global Engineering - Graduate Certificate

The Mortenson Center in Global Engineering trains engineers to work in partnership with people from developing communities worldwide to create sustainable solutions to meet their basic needs.

The Mortenson Center in Global Engineering provides students with the opportunity to engage in education, research and practice that is focused on finding solutions to global development challenges. The graduate certificate consists of three specialized, classroom-based courses and a field practicum course. The field practicum integrates education and practice, with students applying their knowledge and skills to contribute to projects in more than 25 countries and tribal nations. Students also have the opportunity to take part in research funded by agencies such as the Bill & Melinda Gates Foundation, USEPA and most recently USAID. For more information, visit the Mortenson Center (http://www.colorado.edu/mcedc/) website.

Requirements

Eligibility

The Mortenson Center in Global Engineering offers a graduate certificate to degree-seeking graduate-level engineering students (including BS/MS students in their final year and MS or PhD students) enrolled in a department within the College of Engineering and Applied Science. It is primarily designed for students who want to learn about global development or who have an interest in possibly pursuing a career in the fields of community development or humanitarian engineering.

The global engineering graduate certificate requirements are separate from the graduate degree requirements established by each student’s home department. Therefore, graduate students interested in completing the certificate need to contact their respective academic advisors to determine how the certificate courses will fit into their overall degree plan.

Program Requirements

Students earn the certificate by satisfactorily completing the four required courses listed below, with a grade of B- or higher in each course.

Total Credit Hours 12

Computer Science

The University of Colorado Boulder Computer Science graduate program is one of the top ranked programs in the U.S. News & World Report Best Graduate Schools issue among public universities. Students receive a strong education and conduct groundbreaking tier-one research. We have 60+ faculty members conducting fundamental and applied research in artificial intelligence, complex systems, robotics, computational biology, human centered computing, numerical & scientific computing, programming languages, software engineering, systems and networking, verification and theory of computing.

The department has also been awarded funds for national centers like the Pervasive Personalized Intelligence IUCRC, ASPIRE, NSF AI Institute for Students-AI Teaming.

Boulder is also home to research and development operations for many large companies and four federal research labs: the National Center for Atmospheric Research, the National Institute for Standards and Technology, the National Oceanic and Atmospheric Administration and the National Renewable Energy Laboratory.

Recent doctoral and master’s graduates accepted employment at companies including, but not limited to, the following: Microsoft, Apple, Google, Facebook, Twitter, Cisco, Raytheon, HP, NASA, Amazon, Sandia National Laboratories, Northrop Grumman and Seagate. Many of our graduating PhD students also enter careers in academia.

For more information, visit the Computer Science (http://www.colorado.edu/cs/) website.

Master’s Degrees

- Computer Science - Master of Science (MS) (p. 1537)
- Computer Science - Master of Science (MS) Online (p. 1539)
- Computer Science - Professional Master of Science (MSCPS) (p. 1541)
- Network Engineering - Master of Science (MSNE) (p. 1545)
- Technology, Cybersecurity and Policy - Master of Science (MS) (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/technology-cybersecurity-policy/master-science-ms/)

Doctoral Degrees

- Computer Science - Doctor of Philosophy (PhD) (p. 1548)
- Technology, Cybersecurity and Policy - Doctor of Philosophy (PhD) (p. 1548)

Certificates

- Cybersecurity - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/technology-cybersecurity-policy/cybersecurity-graduate-certificate/)
- Wireless Engineering - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/technology-cybersecurity-policy/wireless-engineering-graduate-certificate/)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Acuna, Daniel
Associated Professor; PhD, University of Minnesota

Ahmed, Nisar R. (https://experts.colorado.edu/display/fisid_153237/)
Associate Professor; PhD, Cornell University
Alistar, Mirela (https://experts.colorado.edu/display/fisid_164177/)
Assistant Professor; PhD, Technical University of Denmark

Anderson, Kenneth M. (https://experts.colorado.edu/display/fisid_113566/)
Chair, Professor; PhD, University of California, Irvine

Ashraf, Asa
Associate Teaching Professor; MS, South Dakota State University

Banic, Amy
Visiting Associate Professor

Black, John (https://experts.colorado.edu/display/fisid_126540/)
Associate Professor; PhD, University of California, Davis

Bortz, David Matthew (https://experts.colorado.edu/display/fisid_143348/)
Associate Professor; PhD, North Carolina State University

Bradley, Elizabeth (https://experts.colorado.edu/display/fisid_100546/)
Professor; PhD, Massachusetts Institute of Technology

Brown, Jed (https://experts.colorado.edu/display/fisid_153965/)
Associate Chair, Associate Professor; DSc, ETH Zürich (Switzerland)

Brubaker, Jed Richards (https://experts.colorado.edu/display/fisid_156193/)
Assistant Professor; PhD, University of California, Irvine

Burke, Robin D. (https://experts.colorado.edu/display/fisid_165005/)
Professor; PhD, Northwestern University

Cai, Xiao-Chuan (https://experts.colorado.edu/display/fisid_100636/)
Professor Emeritus; PhD, New York University

Chang, Bor-Yuh Evan (https://experts.colorado.edu/display/fisid_146087/)
Associate Professor; PhD, University of California, Berkeley

Chen, Lijun (https://experts.colorado.edu/display/fisid_149472/)
Associate Professor; PhD, California Institute of Technology

Chen, Yueqi
Assistant Professor; PhD, Pennsylvania State University

Clauset, Aaron (https://experts.colorado.edu/display/fisid_147554/)
Professor; PhD, University of New Mexico

Colunga, Eliana (https://experts.colorado.edu/display/fisid_129477/)
Associate Professor; PhD, Indiana University Bloomington

Correll, Nikolaus J. (https://experts.colorado.edu/display/fisid_147555/)
Associate Professor; PhD, Ecole Polytech Federale de Lausanne (Switzerland)

Cox, Murray William (https://experts.colorado.edu/display/fisid_153192/)
Associate Teaching Professor; PhD, Texas A&M University

Curry, James H. (https://experts.colorado.edu/display/fisid_105730/)
Professor; PhD, University of California, Berkeley

D’Mello, Sidney (https://experts.colorado.edu/display/fisid_159117/)
Professor; PhD, University of Memphis

Devendorf, Laura (https://experts.colorado.edu/display/fisid_158564/)
Assistant Professor; PhD, University of California, Berkeley

Do, Ellen Yi-Luen (https://experts.colorado.edu/display/fisid_159925/)
Professor; PhD, Georgia Institute of Technology

Dowell, Robin D. (https://experts.colorado.edu/display/fisid_147779/)
Associate Professor; DSc, Washington University

Dykes Jim
Assistant Teaching Professor; MS, University of Colorado Boulder

Fiesler, Casey Lynn (https://experts.colorado.edu/display/fisid_155950/)
Associate Professor; PhD, Georgia Institute of Technology

Fischer, Gerhard
Professor Emeritus

Fleming, Ioana (https://experts.colorado.edu/display/fisid_154718/)
Senior Instructor; PhD, Johns Hopkins University

Frew, Eric W. (https://experts.colorado.edu/display/fisid_134685/)
Professor; PhD, Stanford University

Frongillo, Rafael M. (https://experts.colorado.edu/display/fisid_156416/)
Assistant Professor; PhD, University of California, Berkeley

Gifford, Kevin K. (https://experts.colorado.edu/display/fisid_104361/)
Research Professor; PhD, University of Colorado Boulder

Godley Christopher
Teaching Assistant Professor

Grochow, Joshua A. (https://experts.colorado.edu/display/fisid_158240/)
Assistant Professor; PhD, University of Chicago

Gross, Mark D. (https://experts.colorado.edu/display/fisid_100095/)
Professor; PhD, Massachusetts Institute of Technology

Grunwald, Dirk C. (https://experts.colorado.edu/display/fisid_102261/)
Faculty Director, Professor; PhD, University of Illinois at Urbana–Champaign

Gurari Danna (https://experts.colorado.edu/display/fisid_104361/)
Assistant Professor; PhD, Boston University

Ha, Sangaee (https://experts.colorado.edu/display/fisid_153246/)
Associate Professor; PhD, North Carolina State University

Han, Richard (https://experts.colorado.edu/display/fisid_122947/)
Professor; PhD, University of California, Berkeley

Hauser, Thomas (https://experts.colorado.edu/individual/fisid_148662/)
Associate Professor Adjunct; PhD, Technische Universität München (Germany)

Hayes, Bradley H. (https://experts.colorado.edu/display/fisid_159810/)
Assistant Professor; PhD, Yale University

Heckman, Christoffr (https://experts.colorado.edu/display/fisid_155294/)
Assistant Professor; PhD, Cornell University

Herzfeld, Ute C. (https://experts.colorado.edu/display/fisid_106575/)
Research Professor; PhD, Johannes Gutenberg-Universität Mainz (Germany)
Hoenigman, Rhonda (https://experts.colorado.edu/display/fisid_152997/)  
Associate Dean, Associate Teaching Professor; PhD, University of Colorado Boulder

Hunter, Lawrence (https://experts.colorado.edu/display/fisid_143568/)  
Professor; PhD, Yale University

Izraelevitz, Joe (https://experts.colorado.edu/display/fisid_166042/)  
Assistant Professor; PhD, University of Rochester

Jansen, Kenneth E. (https://experts.colorado.edu/display/fisid_147360/)  
Professor; PhD, Stanford University

Jessup, Elizabeth R. (https://experts.colorado.edu/display/fisid_102065/)  
Professor Emeritus; PhD, Yale University

Kane, Shaun Kevin (https://experts.colorado.edu/display/fisid_154603/)  
Associate Professor, PhD, University of Washington

Karimzadeh, Morteza (https://experts.colorado.edu/display/fisid_166081/)  
Assistant Professor; PhD, Pennsylvania State University

Keegan, Brian (https://experts.colorado.edu/display/fisid_158122/)  
Assistant Professor; PhD, Northwestern University

Keller, Eric Robert (https://experts.colorado.edu/display/fisid_151647/)  
Associate Professor; PhD, Princeton University

King, Roger A.  
Professor Emeritus

Kissler, Stephen  
Assistant Professor; PhD, University of Cambridge

Knox, David Allen (https://experts.colorado.edu/display/fisid_158054/)  
Assistant Teaching Professor; PhD, University of Colorado Health Sciences Center

Lahijanian, Morteza Mehdi (https://experts.colorado.edu/display/fisid_164179/)  
Assistant Professor; PhD, Boston University

Larremore, Daniel B. (https://experts.colorado.edu/display/fisid_159893/)  
Assistant Professor; PhD, University of Colorado Boulder

Layer, Ryan M. (https://experts.colorado.edu/display/fisid_163567/)  
Assistant Professor; PhD, University of Virginia

Lehman, Tamara (https://experts.colorado.edu/display/fisid_165649/)  
Assistant Professor; PhD, Duke University

Leithinger, Daniel (https://experts.colorado.edu/display/fisid_163356/)  
Assistant Professor; PhD, Massachusetts Institute of Technology

Lewis, Clayton H. (https://experts.colorado.edu/display/fisid_100307/)  
Professor Emeritus; PhD, University of Michigan Ann Arbor

Lladser, Manuel E. (https://experts.colorado.edu/display/fisid_134170/)  
Associate Professor; PhD, The Ohio State University

Lv, Qin (https://experts.colorado.edu/display/fisid_145832/)  
Professor, Associate Chair; PhD, Princeton University

MacCurdy, Robert B. (https://experts.colorado.edu/display/fisid_163307/)  
Assistant Professor; PhD, Cornell University

Martin, James H. (https://experts.colorado.edu/display/fisid_100495/)  
Professor; PhD, University of California, Berkeley

Mishra, Shivakant (https://experts.colorado.edu/display/fisid_118376/)  
Professor; PhD, University of Arizona

Monteleoni, Claire Elizabeth (https://experts.colorado.edu/display/fisid_163979/)  
Associate Professor; PhD, Massachusetts Institute of Technology

Morrison, Rebecca E. (https://experts.colorado.edu/display/fisid_159999/)  
Assistant Professor; PhD, University of Texas Austin

Mozer, Michael C. (https://experts.colorado.edu/display/fisid_105922/)  
Research Professor; PhD, University of California, San Diego

Myers, Chris (https://experts.colorado.edu/display/fisid_167168/)  
Professor; PhD, Stanford University

Naidu, Supriya (https://experts.colorado.edu/display/fisid_166267/)  
Assistant Teaching Professor; MS, University of Colorado Boulder

Nath Sreesha (https://experts.colorado.edu/display/fisid_165807/)  
Assistant Teaching Professor, Associate Chair

Nielsen Katherine  
Assistant Teaching Professor; PhD, University of California Los Angeles

Onyejekwe, Osita Eluemuno (https://experts.colorado.edu/display/fisid_164235/)  
Assistant Teaching Professor; PhD, Florida Institute of Technology

Oscamou, Maribeth B. (https://experts.colorado.edu/display/fisid_159794/)  
Associate Teaching Professor; MS, University of Colorado Boulder

Pacheco, Maria  
Assistant Professor; PhD, Purdue University

Palen, Leysa A. (https://experts.colorado.edu/display/fisid_114604/)  
Distinguished Professor, Associate Chair; PhD, University of California, Irvine

Palmer, Martha (https://experts.colorado.edu/display/fisid_138162/)  
Research Professor; PhD, University of Edinburgh (Scotland)

Paradise, Alan (https://experts.colorado.edu/display/fisid_158849/)  
Assistant Teaching Professor; MS, Washington University in St. Louis

Peleg, Orit (https://experts.colorado.edu/display/fisid_159998/)  
Assistant Professor; PhD, ETH Zürich (Switzerland)

Perigo, Levi (https://experts.colorado.edu/display/fisid_155662/)  
Scholar in Residence; PhD, Nova Southeastern University

Phillips, Caleb Timothy (https://experts.colorado.edu/individual/fisid_152384/)  
Assistant Professor Adjunct

Quigley, David Philip (https://experts.colorado.edu/display/fisid_164079/)  
Assistant Teaching Professor; PhD, University of Colorado Boulder
Courses

CSCI 5000 (1) Introduction to the Computer Science Research-Based MS Program
Instructs new research-based MS students in Computer Science how to become an effective member in terms of research, teaching, and presentation, and potentially advancing to the Ph.D. program. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.
Requisites: Restricted to Computer Science (CSCI) MS students only.
Additional Information: Departmental Category: General Computer Science

CSCI 5010 (3) Fundamentals of Data Communication
Combining conceptual knowledge about data communications and core Internet technologies with hands-on labs that reinforce the conceptual knowledge, this course provides students with the ability to create innovative technology solutions in their discipline. Learning how the Internet works and being able to evaluate and operate an Internet network is a valuable skill; students in this course will have a competitive advantage in this foundational field.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5010
Requisites: Restricted to Computer Science Network Engineering MS Majors.
CSCI 5020 (3) Fundamentals of Network Programming
This course provides an immersion into the foundation theories of network programming and software development for emerging technologies. Students will gain direct experience with real-world programming lab experiments and demonstrations that will relate to the prolific increase of cross-discipline programming.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5020
Requisites: Restricted to Computer Science Network Engineering MS Majors.

CSCI 5030 (3) Fundamentals of System Administration and Virtualization
Introduces the basic use and administration of Unix and Linux systems. Topics include booting and system management, scripting, storage and logical volume management, filesystem configuration, account management and password security, process control, software installation, event logging and system auditing. Students will also develop familiarity with virtualization platforms such as VirtualBox and VMware to implement and test their system configurations.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5030
Requisites: Restricted to Computer Science Network Engineering MS Majors.

CSCI 5040 (3) Professional Masters Project 1
First class in a two semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The first semester focuses on design, requirements, and prototyping and is based on common waterfall project practices with gate reviews and project artifacts. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.
Requisites: Restricted to graduate student Computer Sciences (CSEN) students only.

CSCI 5050 (3) Professional Masters Project 2
Second class in a two-semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The second semester focuses on development, code construction, and delivery, using agile-based project management for development. Students work in both Scrum and Kanban agile project cycles. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.
Requisites: Requires prerequisite course of CSCI 5040 (minimum grade of B). Restricted to CSEn graduate students only.

CSCI 5100 (1) Computer Science Colloquium
Learn about innovative research and teaching in computer science by attending talks and discussions by leading researchers and educators. Learn professional presentation skills and etiquette of participating in scientific research presentations. Students can attend during any term even if they are not enrolled
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to Computer Science (CSCI) MS students only.

CSCI 5113 (3) Linux System Administration
Introduces Linux system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up, using provided computing resources, and must maintain and secure these servers themselves. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5113 and CSCI 4113
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3753 (minimum grade B).

CSCI 5114 (3) Practical Algorithmic Complexity
When coming across an algorithmic problem, how do we think about how hard it is? Beyond just how much time or memory it takes, computational complexity offers a plethora of concepts for understanding this fundamental question. This leads to the appropriate choice of algorithm for the job, the development of new algorithms, and understanding the role of algorithmic complexity in natural settings such as biology and physics.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4114
Requisites: Restricted to graduate students only.

CSCI 5135 (3) Computer-Aided Verification
Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon compilation.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5139
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ECEN 2703 and general proficiency in discrete mathematics and programming.

CSCI 5140 (2) CLASIC Capstone
In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master¿s program, we will review each student¿s internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as special topics course.
Equivalent - Duplicate Degree Credit Not Granted: LING 5140
Requisites: Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.
Recommended: It is recommended that this course be taken after the CLASIC internship has been completed.
CSCI 5160 (3) Introduction to Enterprise Networks
Provides direct experience with networking functions and equipment through experiments and demonstrations. Students learn the fundamental principles and techniques of voice and data switching and routing within an enterprise environment. Procedures require the use of actual commercial equipment (including Cisco, Juniper, and Arista) plus network services and observation using packet analyzers. Weekly experiments and exams are designed to reflect real-world networking scenarios and require an additional hours of lab work. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. Students are expected to spend 6 hours per week in the lab. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams. Recommended restriction: students are expected to know the OSI Model, principles of Ethernet Switching, IP Addressing and operation of protocols such as ARP, DHCP, DNS
Requisites: Restricted to graduate students only.

CSCI 5170 (3) IP Routing Protocols and Policies
Explores practical usage and conceptual underpinnings of link state and distance vector routing protocols. The course further explores a holistic view of how the Internet works from a technical routing aspect as well as policy and economics. The course is supplemented with frequent labs to fully explore the specific workings of the routing protocols RIP, OSPF, and BGP and the relationships between them in practical lab based routing scenarios.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5010 or CYBR 5010 or CSCI 4273 or CSCI 5273 or ECEN 5273.

CSCI 5180 (3) Network Management and Automation
Teaching both technical and soft skills, this course incorporates best practices and the key theories behind them such as understanding common services needed for network functionality, maintenance, and troubleshooting. The goal of this course is to equip students with the valuable skills and tools they need to hit the ground running in most network management, operation, automation, and DevOps roles within a company. By the end of the course, students will be competent in the technologies, services, and tools used to manage and automate complex networks.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite background in Linux system administration, Python programming and computer network engineering/data communications.

CSCI 5190 (3) Voice Over IP: Voice Network Design and Implementation
Provides an in-depth immersion into the foundational theories and technologies of Voice Over IP (VoIP). This course supplements these theories with direct experience through real-world, hands-on lab experiments and demonstrations. The fundamentals of voice technologies, services, and tools used in industry to design, deploy and troubleshoot VoIP networks will be explored in detail, providing the student with a competitive advantage in the job market.
Requisites: Requires prerequisite course of CSCI 5170 or CSCI 5160 or CSCI 5180 (minimum grade B). Restricted to graduate students.

CSCI 5200 (3) Introduction to Wireless Systems
Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5200 and CSCI 4200
Recommended: Prerequisites CYBR 5010 and CYBR 5012.

CSCI 5220 (3) Wireless Local Area Networks
Emphasis on the IEEE 802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will to analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified® programs, and will learn how to model and analyze WLAN traffic using industry standard tools.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5220 and ECEN 5122
Requisites: Requires prerequisite course of CYBR 5010 or CSCI 5010 or CSCI 5273 (minimum grade B).
Recommended: Prerequisite CYBR 5200 or CSCI 5200.

CSCI 5229 (3) Computer Graphics
Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4229
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5230 (3) Wireless Systems Lab
This Wireless Solutions Architecture course is designed to examine the core concepts of wireless architecture, design and implementation. The course will focus on architecting solutions unlicensed technology, specifically enterprise Wi-Fi networks. Students will learn how to design, implement, troubleshoot and operate enterprise wireless networks.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5230
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

CSCI 5239 (3) Advanced Computer Graphics
Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4239
Requisites: Requires prerequisite course of CSCI 5229 (minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: Graphics
CSCI 5240 (3) Introduction to Blockchain
Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5240 and CSCI 4240
Requisites: Restricted to graduate students only.

CSCI 5253 (3) Datacenter Scale Computing - Methods, Systems and Techniques
Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4253 and CSPB 4253 and ECEN 5253
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5273.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5254 (3) Convex Optimization and Its Applications
Discuss basic convex analysis (convex sets, functions and optimization problems), optimization theory (linear, quadratic, semidefinite and geometric programming; optimality conditions and duality theory), some optimization algorithms (descent methods and interior-point methods), basic applications (in signal processing, control, communications, networks, statistics, machine learning, circuit design and mechanical engineering, etc.), and some advanced topics (distributed decomposition, exact convex relaxation, parsimonious recovery).
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory of Computation

CSCI 5250 (3) Datacenter Networks
Covers design and configuration principles required to build highly scalable and highly redundant network solutions used by datacenters. Class makes use of commercial grade equipment to build network topologies and services. Students will work in teams to build a virtualized cluster, load balance application traffic between multiple server blades, assure high availability in Ethernet and IP layers, and able to prioritize important services using QoS. This lab-based course requires an average of 6 hours per week where the students are physically present in the CU Network Engineering Lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams.
Requisites: Requires prerequisite course of CSCI 5160 (minimum grade B). Restricted to graduate students.

CSCI 5270 (3) IP Network Design
Focuses on the design and implementation of network solutions according to the needs of a client. The course helps students develop skills to be a consultant and walks them through the complete life cycle of network project development as a member of a professional services team. Implement fundamentals of IP Routing Protocols and apply them directly to design based networking problems. Design scenarios will incorporate physical and logical design, financial analysis, and laboratory configuration.
Requisites: Requires prerequisite course of CSCI 5170 or CSCI 5160 (minimum grade B). Restricted to graduate students.
Recommended: Prerequisite strong familiarity with network protocol operation and implementation.

CSCI 5273 (3) Network Systems
Focuses on design and implementation of network programs and systems, including topics in network protocols, architectures, client-server computing, software-driven networking, and other contemporary network hardware-software system design and programming techniques. Familiarity with C and Unix is required.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5273
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 4273 and CSCI 4573.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5280 (3) Software-Defined Networking
Provides an in-depth immersion into the foundational theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), and emerging technologies for computer networks. Supplements the theoretical knowledge learned through direct experience with real-world lab experiments and demonstrations. This knowledge will give students an advantage in the job market for this in-demand, constantly changing subject.
Requisites: Requires prerequisite course of CSCI 5180 (minimum grade B). Restricted to graduate students.

CSCI 5302 (3) Advanced Robotics
Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4302
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3302 or instructor consent required.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5303 (1) Cybersecurity Club Companion Course
Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5303 and CSCI 4303
Repeatable: Repeatable for up to 3.00 total credit hours.
Recommended: Prerequisites CSCI 5403 or CSCI 3403.
CSCI 5313 (3) Concurrent Programming
Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5313 and ECEN 4313 and CSCI 4313
Requisites: Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 (minimum grade C). Restricted to graduate students only.
Recommended: Prerequisite ECEN 3593.

CSCI 5314 (3) Dynamic Models in Biology
Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4314
Requisites: Restricted to graduate students only.
Recommended: Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.
Additional Information: Departmental Category: Theory of Computation

CSCI 5322 (3) Algorithmic Human-Robot Interaction
Creating autonomous systems that interact with humans requires the synthesis of insights from a variety of disciplines. This course aims to provide students with the algorithms, models, and frameworks that form the building blocks required for developing intelligent autonomous systems that perform useful tasks while interacting with, coordinating with, co-existing with, or otherwise assisting humans. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

CSCI 5340 (3) Startup Essentials: Entrepreneurial Projects in Computing
Provides students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept and be evaluated on product/market fit. CS coding concepts relevant for startups, including potentially cloud programming, mobile programming and agile software engineering, will be taught. Does not satisfy breadth requirement.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4348
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Computer Science

CSCI 5350 (3) Entrepreneurial Projects II
Follows CSCI 5340. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Does not satisfy breadth requirement.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4358
Requisites: Requires a prerequisite course of CSCI 5340 (minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: General Computer Science

CSCI 5352 (3) Network Analysis and Modeling
Examines modern techniques for analyzing and modeling the structure and dynamics of complex networks. Focuses on statistical algorithms and methods, and emphasizes model interpretability and understanding the processes that generate real data. Applications are drawn from computational biology and computational social science. No biological or social science training is required.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 3104 and APPM 3570.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5360 (3) Internet Service Provider Networks
This course presents advanced networking design and implementation techniques through experiments with network measurement equipment, switches, router, and management interfaces. The course primarily focuses on Service Provider Transport technologies for capacity, scalability and fault tolerance. Students learn the essential network architectures of last mile and long haul network solutions used for public and private network traffic transport; implementation of SLAs, load balancing, first hop redundancy, and MPLS transport and L2/L3 VPN solutions. This course requires an average of 6 hours per week in the lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams.
Requisites: Requires prerequisite course of CSCI 5160 (minimum grade B). Restricted to graduate students.
Recommended: Prerequisite CSCI 5170.

CSCI 5380 (3) Network Virtualization and Orchestration
Provides an advanced, in-depth immersion into the theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), network virtualization/orchestration, and emerging technologies for computer networks. Expands on the real-world lab experiments and theoretical demonstrations learned from the course pre-requisite. The knowledge and critical thinking skills learned from this course will arm students with an advantage in the job market for this in-demand, constantly changing subject.
Requisites: Requires prerequisite of CSCI 5280 (minimum grade B). Restricted to graduate students.
CSCI 5402 (3) Research Methods in Human-Robot Interaction
Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5402
Requisites: Restricted to graduate students only.

CSCI 5403 (3) Cybersecurity
Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course, students should have a solid foundation in cybersecurity and hands-on experience.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5300
Requisites: Restricted to graduate students only.

CSCI 5413 (3) Computer Security and Ethical Hacking
Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a “playground” in which to test penetration skills that are normally not allowed on live networks.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4413
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5417 (3) Information Retrieval Systems
Addresses practical issues in the design, implementation and analysis of modern information retrieval systems. The major focus is on Web-based applications including ad hoc retrieval, classification, and clustering. Introduces the use of open source retrieval systems, standard evaluation metrics and gold-standard evaluation collections.
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Database Systems

CSCI 5423 (3) Biologically-inspired Multi-Agent Systems
Explores the principles and emergent properties of collective dynamics through computational modeling and theory. Focuses on multi-agent systems using insights from biology, like the self-assemblage of cells and insect colony behavior. Topics include designing swarm intelligence, networked agents, cellular computing and self-assembly, optimization, synchronization, and evolutionary computation. Uses cross-discipline research developments to practice applied techniques. Biology background is not required.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 2270 and basic knowledge of programming.

CSCI 5434 (3) Probability for Computer Science
This course will introduce computer science students to topics in probability and statistics that will be useful in other computer science courses. Basic concepts in probability will be taught from an algorithmic and computational point of view, with examples drawn from computer science.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite courses of APPM 1360 or MATH 2300 and CSCI 2824 or MATH 2001 or ECEN 2703 (all minimum grade B).

CSCI 5444 (3) Introduction to Theory of Computation
Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability.
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5446 (3) Chaotic Dynamics
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4446 and ECEN 4423 and ECEN 5423
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Numerical Computation

CSCI 5448 (3) Object-Oriented Analysis and Design
An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4448
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Software Engineering

CSCI 5454 (3) Design and Analysis of Algorithms
Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, probabilistic methods, advanced data structures, graph algorithms, etc. Lower bounds, NP-completeness, intractability.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 2270 or equivalent.

Additional Information: Departmental Category: Theory of Computation

CSCI 5502 (3) Data Mining
Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4502
Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory of Computation

CSCI 5514 (3) Algorithms for Whole Genome Sequence Analysis
Explore the algorithms that have been developed to assemble and analyze genome sequencing data. Genome sequencing produces vast and complex data that are intractable without efficient algorithms. This course covers the core data structures and algorithms which form the basis for research in topics ranging from evolution to the cause and treatment of many diseases, including cancer. Topics include string matching, indexing, compression, and succinct data structures. No prior knowledge of biology, DNA, or genetics is required.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite basic understanding of complexity analysis, core algorithms (for example, sort) and data structures (for example, graphs).
CSCI 5523 (3) Modern Offense and Defense in Cybersecurity
Introduce students to the modern techniques used in cyber-attacks and defenses. Topics covered: Stack canary, ASLR, SMEP/SMAP, CFI, Program Misusing, ROP, JOP, ret2lib, off-by-one, unsafe-unlink, UAF, ptmalloc, t-cache, Race condition, Kernel Exploitation. Recommended Prerequisites: CSCI 2400, ECEN 4133.
Requisites: Restricted to graduate students only.

CSCI 5525 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4555 and ECEN 4553 and CSCI 5523
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 3155 and CSCI 2400 or ECEN 3350.
Additional Information: Departmental Category: Programming Languages

CSCI 5535 (3) Fundamental Concepts of Programming Languages
Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5533
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3155 or instructor consent required.
Additional Information: Departmental Category: Programming Languages

CSCI 5548 (3) Software Engineering of Standalone Programs
Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections and modeling. Includes relation to RTS and object-oriented programming.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5543
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 1300 and CSCI 2270 or instructor consent required.
Additional Information: Departmental Category: Software Engineering

CSCI 5550 (3) Designing for Defense 1
Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams, chosen by competitive selection, work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real-world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment. The first semester of a two-course sequence. Students take this course, ASEN/CSCI/CYBR 5550, and ASEN/CSCI/CYBR 5580 contiguously as the sequence spans the academic year.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5550 and CYBR 5550
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CSCI 5573 (3) Advanced Operating Systems
Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5573
Requisites: Requires prerequisite course of CSCI 2400 and CSCI 3753 (all minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5576 (4) High-Performance Scientific Computing
Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4576
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Numerical Computation

CSCI 5593 (3) Advanced Computer Architecture
Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems and architectural features required for multicore processor designs. Also studies current and historically important computer architectures, including hardware security concepts.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5593 and ECEN 4693
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 4593 or instructor consent required.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5566 (3) Principles of Numerical Computation
Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 3656 and three semesters of calculus or equivalent.
Additional Information: Departmental Category: Numerical Computation

CSCI 5616 (3) Introduction to Virtual Reality
Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4616, ATLS 4616, ATLS 5616
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 2270 or CSCI 2275 (minimum grade B).
CSCI 5620 (3) Advanced Wireless Lab
Provides a comprehensive, hands-on set of laboratory exercises for the teaching and demonstration of key technical skills required to understand, build, test, and analyze both analog and digital wireless communications concepts. In conjunction with lecture-based content to provide a solid foundation in digital communication theory, SDR-based laboratory exercises enable the synthesis of several fundamental concepts utilizing the latest, modern communications systems technologies.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5620
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).
Recommended: Prerequisites CSCI 5630 or CYBR 5630 and CSCI 5220 or CYBR 5220.

CSCI 5622 (3) Machine Learning
Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended.
Requisites: Prereqs: (APPM 3310 or CSCI 2820 or MATH 2130 or 3130 or 3135) OR (APPM 3570 or 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or 4510 or MCEN 3047 or STAT 3100 or 4000 or 4520) (min grade B) Grad students only
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5630 (3) Wireless and Cellular Systems
Studies technologies and architectures employed in modern cellular wireless systems. Major topics include radio propagation, multiple access techniques, analog and digital cellular telephony, and personal communications systems. Presents the necessary tools to understand the wireless industry, its technical details, and its business drivers. Topics include modeling, spectrum, weather, multipath, Doppler effect, and shadowing and covers important aspects of multiple access technologies such as CDMA and OFDMA. Introduces modern radio standards including LTE.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5630
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

CSCI 5636 (3) Numerical Solution of Partial Differential Equations
Focuses on discretization techniques such as finite difference, finite element and finite volume methods, and parallel solution algorithms such as Krylov subspace methods, domain decomposition and multilevel methods.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites (CSCI 2820 or APPM 2360 or APPM 3310 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) AND (CSCI 3656 or APPM 4650 or MATH 4650 or MCEN 3030 or PHYS 2600) (all minimum grade B).
Additional Information: Departmental Category: Numerical Computation

CSCI 5646 (3) Numerical Linear Algebra
Offers direct and iterative solutions of linear systems. Also covers eigenvalue and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Numerical Computation

CSCI 5654 (3) Linear Programming
Requisites: Restricted to graduate students only.
Recommended: Prerequisite linear algebra.
Additional Information: Departmental Category: Theory of Computation

CSCI 5673 (3) Distributed Systems
Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5673
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5573 or a course in computer networks.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5676 (3) Numerical Optimization
Focuses on computational methods for solution of unconstrained and some constrained optimization problems, nonlinear least-squares problems and systems of nonlinear equations. Formerly CSCI 6676.
Recommended: Prerequisite (CSCI 2820 or APPM 2360 or APPM 3310 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) AND (CSCI 3022 or CSCI 3656 or APPM 4650 or MATH 4650 or MCEN 3030 or PHYS 2600) (all minimum grade B), and restricted to grad students.
Additional Information: Departmental Category: Numerical Computation

CSCI 5714 (3) Formal Languages
Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5444 or instructor consent required.
Additional Information: Departmental Category: Theory of Computation

CSCI 5722 (3) Computer Vision
Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4722
Requisites: Restricted to graduate students only.
Recommended: Prerequisite probability, multivariate calculus and linear algebra.
Additional Information: Departmental Category: Artificial Intelligence
CSCI 5753 (3) Computer Performance Modeling
Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4753 and ECEN 4753 and ECEN 5753
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Operating Systems and Hardware

CSCI 5802 (1) Data Science Team Companion Course
Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate. Instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4802
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4809 and ATLS 4809 and ATLS 5809
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5817 (3) Database Systems
Provides an advanced treatment of basic database concepts.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 3753.
Additional Information: Departmental Category: Database Systems

CSCI 5822 (3) Probabilistic Models of Human and Machine Learning
Introduces a set of modeling techniques that have become a mainstay of modern artificial intelligence, cognitive science and machine learning research. These models provide essential tools for interpreting the statistical structure of large data sets and for explaining how intelligent agents analyze the vast amount of experience that accumulates through interactions with an unfamiliar environment.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite undergraduate course in probability and statistics.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5828 (3) Foundations of Software Engineering
Provides an introduction to software engineering concepts and techniques. Topics include the history of software engineering, fundamental software engineering principles and theory, software life cycles, software testing, and the design and implementation of concurrent and large-scale software systems.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Software Engineering

CSCI 5832 (3) Natural Language Processing
Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.
Equivalent - Duplicate Degree Credit Not Granted: LING 5832
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5839 (3) User-Centered Design and Development 1
Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5849 (3) Interactive Machine Learning for Customizable and Expressive Interfaces
Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projects, with varying abilities and disabilities.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4849
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory of Computation

CSCI 5854 (3) Theoretical Foundations of Autonomous Systems
Covers techniques for modeling, design and verification of autonomous systems and application domains including automotive systems, robotics and medical devices. Modeling topics include timed systems, differential equations, switched systems, hybrid dynamical systems. Verification topics: reachability and stability verification. Temporal specifications. Synthesis of controllers. Applications: automotive systems, medical devices.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Theory of Computation

CSCI 5880 (3) Interactive Machine Learning for Customizable and Expressive Interfaces
Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projects within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4889, ATLS 4889 and ATLS 5880
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5900 (1-6) Master's Level Independent Study
Provides opportunities for independent study at the master's level.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.
Additional Information: Departmental Category: General Computer Science
CSCI 5919 (3) HCC Survey and Synthesis: Foundations and Trajectories
Examines the interdisciplinary field of human-centered computing through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. Social computing, is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists, information scientists, social scientists, and business and media arts students.
Equivalent - Duplicate Degree Credit Not Granted: INFO 5919
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Graphics

CSCI 5922 (3) Neural Networks and Deep Learning
Introduces modern approaches to machine learning using neural networks. Neural nets, popular in the early 1990s, have undergone a resurgence due to significant advances in computing power and the availability of very large data sets. Now rechristened 'deep learning', the field has produced state-of-the-art results in a range of artificial intelligence problems, including vision, speech and natural language processing.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 5929 (3) HCC Survey and Synthesis: New Disciplinary Directions
Studies recent advances in human-computer interaction through critical analysis of influential papers and self-guided research. Examines new paradigms in input, output, and visualization for technology design and interaction. Considers innovative methods to assess various population design and technological needs. Studies in computer-related fields, social science, business, media arts and communications benefit learning about human-centered computing research.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5919.
Additional Information: Departmental Category: Graphics

CSCI 6000 (1) Introduction to the Computer Science PhD Program
Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.
Requisites: Restricted to Computer Science (CSCI) PhD. students only.
Additional Information: Departmental Category: General Computer Science

CSCI 6100 (1) Computer Science Colloquium
Learn about innovative research and teaching in computer science by attending talks and discussions by leading researchers and educators. Learn professional presentation skills and etiquette of participating in scientific research presentations. Not repeatable for credit. Students can attend during any term even if they are not enrolled.
Requisites: Restricted to Computer Science (CSCI) PhD. students only.

CSCI 6114 (3) Computational Complexity Theory
Covers standard complexity classes including: time-bounded, space-bounded, nondeterministic, randomized, quantum, parallel, counting, and nonuniform classes. Covers standard relationships between these complexity classes, as well as landmark results in complexity theory. Additional topics may be covered depending on time and interest.
Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.
Recommended: Corequisite CSCI 5444.

CSCI 6118 (3) Software Engineering for Scientists
Learn the core principles of software engineering and design to make scientific software more robust and reproducible. This class targets quantitative scientists with programming skills (in any language) who want to use software in their research. We will cover the version control, testing, benchmarking, data structures, algorithms, and pipelines. This course opens computing to a variety of student disciplines, and is an advanced course in computing geared toward STEM. Instructor approval required for CS majors and CS minors. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4118
Requisites: Restricted to graduate students. Restricted to Non-Computer Science students only.
Recommended: Prerequisites ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 2275 or ECEN 1310 or INFO 1201, knowledge of a programming language, preferably Python, and upper division STEM course recommended.

CSCI 6200 (1) Computer Science PhD Career Development
Learn how to make the most of your CS PhD by understanding and preparing for a career as a computer science research in academia, industry, and government. Students need to take this class once they complete Preliminary Exam and before their proposal defense.
Requisites: Requires prerequisite course of CSCI 6000 (minimum grade B). Restricted to Computer Science (CSCI) MS and PhD students only.

CSCI 6214 (3) Randomized Algorithms
Randomization is a powerful tool to design and analyze algorithms, and one that has played, and continues to play, a key role in the theory of algorithms and complexity. This course will give a technical foundation in common probabilistic tools to design and analyze algorithms, and use this foundation to cover several important randomized algorithms.
Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

CSCI 6268 (3) Foundations of Computer and Network Security
Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography and authentication protocols.
Equivalent - Duplicate Degree Credit Not Granted: TLEN 5550
Requisites: Requires prerequisite course of CSCI 5273 (minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: Software Engineering

CSCI 6302 (3) Speech Recognition and Synthesis
Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 5832 or LING 5200 or instructor consent required.
Additional Information: Departmental Category: Artificial Intelligence
CSCI 6314 (3) Algorithmic Economics
This course will survey the frontier of algorithmic economics: the study of incentives and strategic behavior through a computational lens. It will show how microeconomic theory applies to the design of algorithms, and conversely, how algorithmic thinking applies to economics. Other topics may include game theory, mechanism design / auction theory, forecasting mechanisms, and voting / social choice theory.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5454.

CSCI 6402 (3) Issues and Methods in Cognitive Science
Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

CSCI 6454 (3) Advanced Algorithms
Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting.
Requisites: Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

CSCI 6502 (3) Big Data Analytics: Systems, Algorithms, and Applications
This course studies state-of-the-art practice and research on efficient and effective systems and algorithms design for managing and exploring massive amounts of digital data in various application domains. The course takes an integrated approach that studies all three aspects of big data analytics: systems, algorithms, and applications. Specifically, this course covers big data systems for MapReduce, NoSQL, stream processing, deep learning, mobile/wearable/IoT sensing, as well as practical use of indexing, sketching, recommendation, graph, and deep learning algorithms. Domain-specific data management and analysis, such as those in online social networks, scientific discovery, business intelligence, health informatics, urban computing, are also covered.
Requisites: Restricted to graduate students only.

CSCI 6622 (3) Advanced Machine Learning
Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5622 or instructor consent required.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 6644 (1) Theory of Computing Reading Group
Exposition of key results in major areas of Theory of Computing presented by graduate students. The topics are selected every semester by voting. Examples of topics from previous semesters include: Hardness of Approximation and PCPs, Unique Games Conjecture, and Optimal Inapproximability Results for Max Cut. Previously offered as a special topics course.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.

CSCI 6686 (3) Numerical Methods for Constrained Optimization
Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems.
Requisites: Requires prerequisite course of CSCI 5606 (minimum grade B). Restricted to graduate students only.
Additional Information: Departmental Category: Numerical Computation

CSCI 6800 (1-6) Master of Engineering Project
Students seeking the master of engineering degree must complete a creative investigation project, including a written report, supervised by a member of the graduate faculty. Department enforced prerequisite: completion of 21 hours towards the ME degree.
Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate student Computer Sciences (CSEN) students only.
Additional Information: Departmental Category: General Computer Science

CSCI 6810 (1) Seminar in Computational Biology
Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4810
Additional Information: Departmental Category: General Computer Science

CSCI 6830 (1-3) Professional Internship
This class provides a structure for CS graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in CS graduate programs.
Requisites: Restricted to graduate students only.

CSCI 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.
Additional Information: Departmental Category: General Computer Science
CSCI 6950 (1-6) Master's Thesis
**Requisites:** Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.
**Additional Information:** Departmental Category: General Computer Science

CSCI 7000 (1-4) Current Topics in Computer Science
Covers research topics of current interest in computer science that do not fall into a standard subarea.
**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: General Computer Science

CSCI 7123 (3) Topics in Operating Systems
Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite course of CSCI 5573 (minimum grade B). Restricted to graduate students only.
**Additional Information:** Departmental Category: Operating Systems and Hardware

CSCI 7135 (1-3) Topics in Programming Languages
Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Operating Systems and Hardware

CSCI 7143 (3) Topics in Computer Systems
Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Programming Languages

CSCI 7154 (3) Topics in Theory of Computation
Selected topics of current interest in theory of computation.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.
**Additional Information:** Departmental Category: Theory of Computation

CSCI 7176 (3) Topics in Numerical Computation
Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Department consent required.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Numerical Computation

CSCI 7222 (3) Topics in Nonsymbolic Artificial Intelligence
Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite CSCI 5622 or instructor consent required.
**Additional Information:** Departmental Category: Artificial Intelligence

CSCI 7412 (2) Cognitive Science Research Practicum
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418
**Requisites:** Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.
**Recommended:** Prerequisite EDUC 6505.
**Additional Information:** Departmental Category: Artificial Intelligence

CSCI 7422 (2) Cognitive Science Research Practicum 2
Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D. in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.
**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428
**Requisites:** Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.
**Additional Information:** Departmental Category: Artificial Intelligence

CSCI 7565 (3) Computational Phonology and Morphology
Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.
**Equivalent - Duplicate Degree Credit Not Granted:** LING 7565

CSCI 7717 (3) Topics in Database Systems
Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth.
**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Requires prerequisite course of CSCI 5817 (minimum grade B). Restricted to graduate students only.
**Additional Information:** Departmental Category: Database Systems
CSCI 7772 (1) Topics in Cognitive Science
Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.
Equivalent - Duplicate Degree Credit Not Granted: EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Artificial Intelligence

CSCI 7818 (3) Topics in Software Engineering
Studies selected topics of current interest in software engineering. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Software Engineering

CSCI 7900 (1-6) Doctoral Level Independent Study
For doctoral students.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Computer Science

CSCI 8990 (1-10) Doctoral Dissertation
Investigates some specialized field of computer science. Approved and supervised by faculty members.
Repeatable: Repeatable for up to 30.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: General Computer Science

CYBR 5000 (3) Seminar in Technology, Cybersecurity and Policy
Introduces students to major topics and research at the interface of technology, cybersecurity, and policy by providing a weekly series of guest lectures with questions and discussion. These lectures will be followed by related readings, class discussions, and group work, which show the relationship of cybersecurity and new technology to policy.

CYBR 5010 (3) Fundamentals of Data Communication
Combining conceptual knowledge about data communications and core Internet technologies with hands-on labs that reinforce the conceptual knowledge, this course provides students with the ability to create innovative technology solutions in their discipline. Learning how the Internet works and being able to evaluate and operate an Internet network is a valuable skill; students in this course will have a competitive advantage in this foundational field.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5010
Requisites: Restricted to Technology, Cybersecurity and Policy MS Majors and Business Analytics MS Majors.

CYBR 5020 (3) Fundamentals of Network Programming
This course provides an immersion into the foundation theories of network programming and software development for emerging technologies. Students will gain direct experience with real-world programming lab experiments and demonstrations that will relate to the prolific increase of cross-discipline programming.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5020
Requisites: Restricted to Technology, Cybersecurity and Policy MS Majors.

CYBR 5030 (3) Fundamentals of System Administration and Virtualization
Introduces the basic use and administration of Unix and Linux systems. Topics include booting and system management, scripting, storage and logical volume management, filesystem configuration, account management and password security, process control, software installation, event logging and system auditing. Students will also develop familiarity with virtualization platforms such as VirtualBox and VMware to implement and test their system configurations.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5030
Requisites: Restricted to Technology, Cybersecurity and Policy MS Majors.

CYBR 5113 (3) Linux System Administration
Introduces Linux system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up, using provided computing resources, and must maintain and secure these servers themselves. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5113 and CSCI 4113
Requisites: Restricted to Technology, Cybersecurity and Policy (CYBR) graduate students only.
Recommended: Prerequisite CSCI 3753 (minimum grade B).

CYBR 5200 (3) Introduction to Wireless Systems
Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5200 and CSCI 4200
Recommended: Prerequisites CYBR 5010 and CYBR 5012.
**CYBR 5220 (3) Wireless Local Area Networks**
Emphasis on the IEEE 802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11D/aS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will to analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified programs, and will learn how to model and analyze WLAN traffic using industry standard tools.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5122 and ECEN 5220
**Requisites:** Requires prerequisite course of CYBR 5010 or CSCI 5010 or CSCI 5273 (minimum grade B).
**Recommended:** Prerequisite CYBR 5200.

**CYBR 5230 (3) Wireless Systems Lab**
This Wireless Solutions Architecture course is designed to examine the core concepts of wireless architecture, design and implementation. The course will focus on architecting solutions unlicensed technology, specifically enterprise Wi-Fi networks. Students will learn how to design, implement, troubleshoot and operate enterprise wireless networks.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5230
**Requisites:** Requires prerequisite course of CYBR 5200 (minimum grade B).
**Recommended:** Prerequisite CYBR 5010.

**CYBR 5240 (3) Introduction to Blockchain**
Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5240 and CSCI 4240
**Requisites:** Restricted to graduate students only.

**CYBR 5250 (2-4) Technology Law and Policy Clinic**
Features technology law advocacy before administrative, legislative and judicial bodies in the public interest. Formerly TLEN 5250. Instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7809
**Requisites:** Restricted to CYBR/TLEN graduate students.
**Grading Basis:** Letter Grade

**CYBR 5260 (3) Seminar: Law and Economics of the Information Age**
Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition and how intellectual property and antitrust rules should be developed. Formerly TLEN 5260.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 8341
**Requisites:** Restricted to CYBR/TLEN graduate students.

**CYBR 5300 (3) Cybersecurity**
Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). The course provides a cyber security foundation that will allow practitioners in other fields apply to understand cyber security trade-offs and will also provide interested students with a basis further study in cyber security. At the conclusion of the course, students should have a solid foundation in cybersecurity and hands-on experience.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 4320
**Recommended:** for graduate students only.

**CYBR 5303 (1) Cybersecurity Club Companion Course**
Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 503 and CSCI 4303
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Recommended:** Prerequisites CYBR 5300 or CSCI 5403 or CSCI 3403.

**CYBR 5310 (3) Immersive Cyber Defense**
Immersive Cybersecurity Defense assumes familiarity with core cybersecurity concepts and applies them within a hands-on virtual environment. Students practice offensive skills such as password cracking and exploit development to understand vulnerabilities and then focus on defensive tactics to reduce cyber risk and respond to cyber-attacks. At the conclusion of the course, students will understand how to protect systems against a wide range of threats and have experience using real-world tools to implement these defenses. Previously offered as a special topics course.
**Recommended:** Familiarity with core cybersecurity concepts such as those covered in CYBR 5300 is recommended but not required, and students are expected to have an understanding of Windows, Linux and Networking fundamentals.
**Grading Basis:** Letter Grade

**CYBR 5320 (3) Cybersecurity Network Analytics**
This Cybersecurity Network Analytics course takes a hands-on approach to detecting malicious activity within network traffic. The course will first introduce methodologies for analyzing cyber data. This knowledge will then be used practically, as the students will be given the chance to test out approaches on real traffic. At the conclusion, students will have both a theoretical understanding of cyber algorithms and their use in a real-world setting.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 4320
**Requisites:** Requires prerequisite courses CYBR 5300 or CSCI 3403 or CSCI 5403 or MSBX 5480 (minimum grade B).
**Recommended:** Requisite C++ and Linux/Unix experience and knowledge of computer networking.
CYBR 5330 (3) Digital Forensics
Learn how to identify, collect, examine, analyze, and present digital evidence and the legal challenges associated with conducting digital forensics investigations. Explore various file system types and structures. Learn how to recovery and extract potential evidence from deleted files and directories. Learn how to capture and profile data residing in live memory. Analyze running processes and recover memory artifacts. Learn about various methods data can be hidden on a computing devices, storage media, and within covert communications channels.
Recommended: Prerequisites CYBR 5300 or CSCI 3403 or CSCI 5403.

CYBR 5340 (3) VOIP Network Design
Focuses on VoIP network design and optimization. The emphasis is on the convergence of VoIP, PSTN and cell phone networks and signaling. Topics include voice processing as well as IP and SS7 signaling. In addition there will be a review of ISDN, DSL, Sonet, ATM, SIP and MPLS. There will be a case problem for sizing a VoIP network using silence suppression. Formerly TLEN 5340.
Requisites: Requires corequisite of CYBR 5001. Restricted to CYBR or BUSN graduate students.

CYBR 5350 (3) Security Auditing and Penetration Testing
This course is an introduction to the principles and techniques associated with security auditing and penetration testing. Topics covered include; planning, reconnaissance, scanning, enumeration, exploitation, post-exploitation, and reporting. Students discover how system vulnerabilities can be exploited. Students will develop an understanding of current cybersecurity issues and how user, administrator, and programmer errors can result in security breaches.
Recommended: Prerequisites CYBR 5300 or CSCI 3403 or CSCI 5403.

CYBR 5400 (3) Principles of Internet Policy
Engages in the critical strategic analysis and debate of controversial public policy issues raised by the Internet. Learn how to develop well-reasoned positions on the regulations applied to new Internet-based technologies and business models based on interdisciplinary frameworks that characterize the significant intersection of technology, economics, business, and public policy. Policy topics covered include Broadband as a Universal Service, Net Neutrality, Spectrum Management, Online Privacy, and Cybersecurity.

CYBR 5410 (3) Telecommunications Law and Policy
Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular and other wireless systems and the Internet. Formerly TLEN 5240.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7241
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to CYBR or BUSN graduate Students

CYBR 5420 (3) Spectrum Management and Policy
Studies how spectrum policy is developed and implemented. A general framework is developed for understanding telecommunications law and regulatory objectives. Specifically analyzes international and domestic dimensions of spectrum policy. Considers how economics, administrative processes and innovative technologies affects management of the spectrum. Formerly TLEN 5230.
Requisites: Restricted to graduate students only.

CYBR 5505 (3) Leading Oneself
Provides working engineers a background in leadership concepts and methods and enables students to develop practical leadership skills through numerous in-class exercises and experimentation based assignments. Topics include authentic leadership, motivating self and others, cultivating emotional intelligence, personal mastery, creating accountability, conflict resolution, leading change and organizational culture. Required for all Engineering Management degree students.
Requisites: Restricted to Leeds School of Business or College of Engineering graduate students only.

CYBR 5510 (3) Technology: Commercial Strategy and Operations
Working in groups of 2 to 4, students will leverage their technical skills to learn and apply commercial/business skills via the consideration of a hypothetical competitive technically-oriented business, including its strategy, long-term financial outlook, and operating platform. Upon successful course completion, students should expect to feel confident when speaking with (and ultimately moving into roles of) management and leadership, regarding all critical aspects of business, especially the creation of equity value through scale at pace, aligning interests of all key stakeholders. Open to undergraduates with instructor consent.
Requisites: Restricted to graduate students only.

CYBR 5550 (3) Designing for Defense 1
Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams, chosen by competitive selection, work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real-world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment. The first semester of a two-course sequence. Students take this course, ASEN/CSCI/CYBR 5550, and ASEN/CSCI/CYBR 5580 contiguously as the sequence spans the academic year.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 5550 and CSCI 5550
Grading Basis: Letter Grade

CYBR 5560 (3) Advanced Wireless Lab
Provides a comprehensive, hands-on set of laboratory exercises for the teaching and demonstration of key technical skills required to understand, build, test, and analyze both analog and digital wireless communications concepts. In conjunction with lecture-based content to provide a solid foundation in digital communication theory, SDR-based laboratory exercises enable the synthesis of several fundamental concepts utilizing the latest, modern communications systems technologies.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5620
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).
Recommended: Prerequisites CYBR 5630 or CSCI 5630 and CYBR 5220 or CSCI 5220.
CYBR 5630 (3) Wireless and Cellular Systems
Studies technologies and architectures employed in modern cellular wireless systems. Major topics include radio propagation, multiple access techniques, analog and digital cellular telephony, and personal communications systems. Presents the necessary tools to understand the wireless industry, its technical details, and its business drivers. Topics include modeling, spectrum, weather, multipath, Doppler effect, and shadowing and covers important aspects of multiple access technologies such as CDMA and OFDMA. Introduces modern radio standards including LTE.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5630
Requisites: Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

CYBR 5700 (3) Graduate Projects I
This two-semester sequence includes CYBR 5700 Graduate Projects I and CYBR 5710 Graduate Projects II. Teaches students how to engineer a complex, inter/multidisciplinary design and implementation problem in a group environment.
Requisites: Restricted to Technology, Cybersecurity and Policy MS students.

CYBR 5710 (3) Graduate Projects II
This two-semester sequence includes CYBR 5700 Graduate Projects I and CYBR 5710 Graduate Projects II. Teaches students how to engineer a complex, inter/multidisciplinary design and implementation problem in a group environment. Formerly CYBR 6700.
Requisites: Restricted to Technology, Cybersecurity and Policy MS students. Requires prerequisite course of CYBR 5700 (minimum grade B).

CYBR 5830 (1-6) Special Topics
Current topics in Telecommunications. Formerly TLEN 5830.
Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

CYBR 5910 (1-6) Independent Study
Special projects agreed upon by student and instructor. Department consent required. Formerly TLEN 5920.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to CYBR/TLEN graduate students.

CYBR 6940 (1) Master's Candidate for Degree
This course is for TCP Master's students who are approved candidates to receive their degree.
Requisites: Restricted to CYBR/TLEN graduate students.

CYBR 6950 (1-6) Master's Thesis
Original and independent research conducted by a graduate student under the supervision of a faculty advisor. Formerly TLEN 6950.
Requisites: Restricted to CYBR/TLEN graduate students.

CYBR 8990 (1-10) Doctoral Dissertation
Investigates specialized topic or field in the area of telecommunications. Approved and supervised by faculty members. Formerly TLEN 8990.
Requisites: Restricted to CYBR/TLEN PhD students.

Computer Science - Master of Science (MS)
The Master of Science degree in computer science is a research-based option which permits graduate students the flexibility in defining specialized interdisciplinary fields that meet their professional needs. The research-based MS degree option is well-suited to students pursuing a career in academia or industry with a research component.

Students have two options under this degree:
- The thesis option, wherein students will have to complete six credits of MS thesis hours while working on a research problem and completing their thesis work. They work with a committee of three and have to defend their thesis.
- The non-thesis option, wherein students will have to complete six credits of MS independent study research hours, while working on research projects with individual faculty. These six hours may or may not be with the same faculty.

With support from the research advisor, students in this program have the option of smoothly transitioning in the PhD program. If students receive support from a research advisor, they do not have to apply to the PhD program; the department processes the degree advancement based on the support.

**Bachelor's–Accelerated Master's Degree Program**

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s):
- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 800)
- Computer Science - Bachelor of Arts (BA) (p. 792)
- Computer Science - Bachelor of Science (BSCS) (p. 796)

**Requirements**

**Admission Requirements**

Applicants for graduate study in computer science must hold at least a bachelor's degree or its equivalent from an accredited institution. They should have programming experience, a number of computer science courses and sufficient mathematical maturity to understand pure mathematics courses at the upper division (junior/senior) level.

A minimum undergraduate GPA of 3.00 is required for admission to the master’s program.

**Mathematics Courses**

A student’s academic background should include at least three semesters of mathematics at the level of sophistication of calculus or above. Examples of such courses include calculus, differential equations, linear algebra, probability, statistics and abstract algebra. The courses should indicate that the student has achieved the mathematical maturity expected of an upper-level science, engineering or mathematics undergraduate.

**Computer Science Courses**

At least three one-semester courses in computer science that are beyond the introductory level are required for admissions. These are intended to demonstrate breadth of basic computer science knowledge in the areas of computer hardware, software and theory. The courses should include the equivalent of the following CU Boulder offerings:
• Hardware requirement: CSCI 2400 Computer Systems (Computer Systems)
• Software requirement: Either CSCI 3155 Principles of Programming Languages or CSCI 3753 Design and Analysis of Operating Systems
• Theory requirement: CSCI 2270 Computer Science 2: Data Structures and either CSCI 3104 Algorithms or CSCI 3434 Theory of Computation

More advanced versions of all courses are acceptable. The above courses are prerequisites to many of the graduate-level offerings, so it’s important to complete these to be considered for graduate admissions. Admission without these prerequisites or their equivalents may be considered under extraordinary circumstances only.

Program Requirements

Degree Plans

While pursuing the traditional MS degree in CS, students have to complete a total of 30 credits of graduate level coursework and may select between two options.

Plan I: Thesis Option

The MS thesis option curriculum is designed to provide a balance between modern technological focus and disciplinary depth. Students must secure a thesis advisor for research and course guidance.

Under this option, students complete 24 credits of coursework and 6 thesis credits at the 5000-level or above. At least 24 credits (eight courses) must be completed in computer science, including three required breadth courses. Up to 6 credits (two courses) may be taken outside of the department with the approval of the Graduate Committee.

In addition to this, students must fulfill any other MS degree requirements as stated by the department. For more information, visit the Traditional MS Degree Program Requirements (http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/) webpage.

Plan II: Non-Thesis Option

Under this option, students complete 24 credits of coursework at the 5000-level or above. At least 24 credits (eight courses) must be completed in computer science, including three required breadth courses. Up to 6 credits must be independent study research hours. Up to 6 credits (two courses) may be taken outside of the department with the approval of the Graduate Committee.

In addition to this, students must fulfill any other MS degree requirements as stated by the department. For more information, visit the Traditional MS Degree Program Requirements (http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/) webpage.

Course Requirements

The following course requirements are subject to change; for the most current information, visit the department’s Traditional MS Degree Program Requirements (http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/) webpage.

Professional Development Series

Complete three one-credit Professional Development courses. ¹ 3
Computer Science - Master of Science (MS) Online

The Master of Science in Computer Science (MS-CS) program hosted online through the Coursera platform offers stackable graduate-level courses, a graduate certificate, and a fully accredited master's degree in engineering management. MS-CS on Coursera students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts or diplomas.

The Department of Computer Science has embraced this degree as an ideal opportunity to expand access to the excellent graduate-level courses offered by the department's highly reputed faculty beyond CU Boulder's physical campus. The goal of the MS-CS on Coursera program is to produce creative, workforce-ready graduates equipped with versatile specialized skills and technical leadership.

Students pursuing this degree will also have access to a wide range of courses taught as part of other CU Boulder degrees offered on the Coursera platform, including topics such as data science, engineering management, and electrical engineering.

Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1791) section of the catalog for more information.

Requirements

Admission

The MS-CS on Coursera uses performance-based admissions, which means students earn program admission simply by performing well in a three-course pathway. Students enroll in and complete their preferred three-course pathway with a grade of B or better in each of the three courses to be admitted to the program. Pathway courses are a required part of the curriculum, which means students make direct progress toward the degree while they work toward program admission.

There is no traditional application for admission to the degree. The University of Colorado Boulder never asks for transcripts, previous test scores (like GRE or TOEFL), application essays, letters of recommendation, or application fees. A prior degree is not required for admission. Because this program is fully online, students do not need to complete a background check to enroll.

A student must complete four required protocols to earn admission to the MS-CS on Coursera:

1. Earn at least a grade of B in each for-credit course within one of the following pathway specializations:
   - Graduate Algorithms (3 credits)
   - Dynamic Programming, Greedy Algorithms (1 credit)
   - Approximation Algorithms and Linear Programming (1 credit)
   - Advanced Data Structures, RSA and Quantum Algorithms (1 credit)
   - Software Architecture for Big Data (3 credits)
   - Fundamentals of Software Architecture for Big Data (1 credit)
   - Software Architecture Patterns for Big Data (1 credit)
   - Applications of Software Architecture for Big Data (1 credit)

2. Achieve a computed pathway specialization grade-point average (GPA) of at least 3.00.

3. Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.

4. Declare intent to seek the degree via the enrollment form. This can be done before, during or after completing any work in a pathway specialization.

Upon completion of these four steps, the student is admitted to the MS-CS on Coursera. Students may successfully complete a designated pathway specialization and declare intent at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree.

Non-degree-seeking students may also enroll in for-credit courses. All courses attempted and/or completed for credit will appear on official CU Boulder transcripts (unless dropped by the drop deadline) and will count toward the cumulative GPA.

Prerequisite Knowledge

There are no course prerequisites or corequisites for MS-CS courses on Coursera. Nevertheless, it is important that students are prepared for individual courses. Course descriptions will advise students of assumed incoming knowledge, and students are strongly encouraged to take course sequences in the order they are presented on the Coursera platform.

Students are also encouraged to take a non-credit version in some form before moving to the for-credit version to test whether they can succeed, especially if they are unsure whether they have the background knowledge required for a course.

Program Requirements

The MS-CS on Coursera is a non-thesis degree program that requires 30 credit hours of graduate-level coursework. This includes 15 credits of breadth coursework and a choice of 15 credits hours of elective coursework from the options listed below. Students must complete 5 elective specializations or a combination of 4 complete elective specializations and three 1-credit elective courses totaling 15 credits.

Up to 6 graduate-level credit hours of courses offered by other CU degrees on Coursera may be applied as elective credits toward the MS-CS on Coursera degree. All courses must be graduate level, offered
through Coursera, and meet all applicable academic standards. This includes all courses offered by the ME-EM (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-management/engineering-management-master-engineering-me-online/), MS-DS (https://catalog.colorado.edu/graduate/colleges-schools/interdisciplinary-programs/data-science-master-science-ms-online/), and MS-EE (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/electrical-engineering/electrical-engineering-master-science-online-msee/) programs on Coursera that do not start with a "CSCA" prefix, with the exception of the following courses. Credit from these courses cannot be applied toward MS-CS on Coursera requirements:

- DTSA 5302 Cybersecurity for Data Science
- DTSA 5303 Ethical Issues in Data Science
- DTSA 5501 Algorithms for Searching, Sorting, and Indexing
- DTSA 5502 Trees and Graphs: Basics

Courses may not be double-counted toward two credentials of the same level. This means students can apply credit from a particular course toward one graduate certificate and one graduate degree, but they cannot apply credit from a particular course toward two graduate certificates or two graduate degrees. CU certificates on Coursera are automatically conferred once all requirements are met.

The MS-CS on Coursera requires a minimum cumulative GPA of 3.00 and a grade of B or better in each breadth class (including the two required pathway specializations and the three additional required breadth specializations). Courses in which grades below C (2.0) are received may be applied toward degree requirements:

- CSCA 5214 Computing, Ethics, and Society 1 - Foundations
- CSCA 5224 Computing, Ethics, and Society 2 - Algorithmic Bias and Professional Ethics
- CSCA 5304 Algorithms and Greedy Programming
- CSCA 5309 Advanced Algorithms and Linear Programming
- CSCA 5402 Fundamentals of Data Mining
- CSCA 5422 Dynamic Programming, Greedy Algorithms
- CSCA 5424 Approximation Algorithms and Linear Programming
- CSCA 5452 Advanced Data Structures, RSA and Quantum Algorithms

### Elective Courses

Take five specializations or combination of four complete specializations and three 1-credit courses totaling 15 credits

#### Data Mining Foundations and Practice

- CSCA 5502 Data Mining Pipeline
- CSCA 5512 Data Mining Methods
- CSCA 5522 Data Mining Project

#### Natural Language Processing: Deep Learning Meets Linguistics

- CSCA 5832 Fundamentals of Natural Language Processing
- CSCA 5842 Deep Learning for Natural Language Processing
- CSCA 5852 Model and Error Analysis for Natural Language Processing

#### Human-Computer Interaction

- CSCA 5859 Ideating and Prototyping Interfaces
- CSCA 5869 User Interface Testing and Usability
- CSCA 5879 Emerging Topics in HCI: Designing for VR, AR, AI

#### Foundations of Autonomous Systems

- CSCA 5834 Modeling of Autonomous Systems
- CSCA 5844 Requirement Specifications for Autonomous Systems
- CSCA 5854 Verification and Synthesis of Autonomous Systems

#### Data Visualization (1 credit)

- Fundamentals of Data Visualization

#### Deep Learning for Computer Vision (1 credit)

- Deep Learning Applications for Computer Vision

#### Special Topics

- CSCA 7000 Special Topics

The Department of Computer Science will continue to roll out additional program curriculum. Currently, the department is developing courses covering topics such as datacenter scale computing, high-performance and parallel computing, theory of computation, robotics, object-oriented analysis and design, network systems, and big data challenges and NoSQL solutions.

### Total Credit Hours

30

Faculty members who develop courses and/or serve as instructor of record for graduate level courses will have approved Graduate Faculty Appointments.

### Time Limit

Courses used toward the MS-CS on Coursera degree must have been completed within eight years of the degree conferral date. Courses taken more than eight years prior to graduation will appear on the transcript and be calculated in the cumulative GPA but may not be used toward the degree. Students may continue to pursue the degree even after eight
years, but they must accrue 30 credits within an eight-year window in order to earn the degree.

The eight-year restriction is applied to courses on a rolling basis and is determined by the date that credit was awarded in the course.

**Computer Science - Professional Master of Science (MSCPS)**

The Professional Master of Science (MSCPS) is a degree program that offers possibilities for a wide range of students. Whether the student is a working engineer or an undergraduate considering a career in industry, there are program options to meet their needs.

The department offers seven degree tracks, each of which result in a Professional Master of Science in Computer Science:

1. General
2. Algorithms, Network and Optimization
3. Data Science and Engineering
4. Human-Centered Computing
5. Intelligent Systems
6. Numerical Computation
7. Robotics
8. Software Systems and Cloud Computing

The Department of Computer Science has embraced this degree as an ideal opportunity to expand the high quality courses in the fields above into a wide array of courses leading to a full master's degree. The goal of the MSCPS program is to produce creative, workforce-ready graduates equipped with versatile specialized skills and technical leadership.

Adding several new subplan courses to the program now enables greater options for earning professional MS degree with a these subplans, while also offering plenty of courses to complete a full master's degree, principally with a subplan focus. Students pursuing this degree will also have access to many excellent graduate-level courses offered by the department's highly reputed faculty.

**Subplans**

**General Track**

Students opting for this track have the option to select classes from an approved list for the degree. The jobs these students get are also similar to other subplans. However, specializing in a subplan is more beneficial.

**Algorithms, Network and Optimization**

The subplan enables students to employ powerful mathematical tools and techniques from algorithms, graph theory, computational complexity theory and mathematical optimization to solve problems that may arise in research and development of cutting edge computing systems. Skills include: design and analysis of algorithms, understanding inherent problem complexity and deploying optimization-based tools and techniques. We expect graduates to fill software development roles with an emphasis on algorithms design, data analysis and solution design.

Potential job titles include: graph theorist, optimization analyst, software developer on algorithms design and data analysts on algorithms design. Potential employers include Twitter, Google, Facebook, Amazon, Oracle, Uber, Microsoft and Apple.

**Data Science and Engineering**

This subplan provides the skills to develop computer solutions that require expertise in data science and engineering. Students who complete the program receive both a master's degree in computer science and a specialization within data science and engineering. This combination is very attractive as technology companies are looking for developers that have experience in data science. Students complete both a set of core courses for the degree in addition to a set of data science courses.

Potential job titles include: Hadoop developer, BI developer, quantitative data engineer, search engineer, technical architect, big data analyst, solutions architect, data warehouse engineer, data science software engineer and ETL developer. Potential employers include Twitter, Google, Facebook, Amazon, Oracle, Uber, Microsoft and Apple.

**Human-Centered Computing**

In this track, students learn how to design, implement and evaluate user interfaces for a range of computing technology, and gain skills related to designing technologies to support the needs of real people. Topics covered include user-centered design, information visualization, universally accessible design and computer-supported cooperative work. Students will gain experience with the entire user-centered design process, from requirements gathering, prototyping, and qualitative and quantitative user evaluation. Many courses in this concentration are project-based and will involve user-centered research in the lab and in the field.

Potential job titles for graduates of this program include user experience researcher, user interface engineer, data scientist, interaction designer, front-end developer, accessibility specialist, mobile application developer. Potential employers include Facebook, Google, Autodesk, Sphero, Snap and Oculus.

**Intelligent Systems and Robotics**

The subplans in intelligent systems and robotics build expertise in algorithms and methods for developing autonomous systems, including robotics and cyber-physical systems. As part of this program, students will design and analyze systems which leverage computation to interact with the world around them through sensors and actuators. Machine learning, signal processing and control theory are all components to this program, where students become experts in creating the software for devices ranging from climate control systems to automobiles.

Potential job titles for graduates of this program focusing on intelligent systems include: software engineer, perception engineer, data scientist and research engineer. Potential employers include Lockheed-Martin, Amazon, Microsoft, Google and Facebook.

Potential job titles for graduates of this program focusing on robotics include: robotics engineer, perception engineer, control engineer and robotics scientist. Potential employers include: Amazon Robotics, Uber, Google, iRobot and DJI.

**Numerical Computation**

Ongoing improvements in computational capability and memory performance have increased the importance of high-fidelity simulations, optimization and data-driven science and engineering applications. Students in this subplan develop the skills to design robust and high-performance numerical methods for addressing real-world problems and develop production-grade implementations using state of the art
software tools to target modern architectures and large-scale parallel computers.

Potential job titles: Computational scientist/engineer, numerical/data analyst, research scientist, software engineer, HPC developer and quantitative software engineer. Potential employers include national labs, universities, engineering ISVs (ANSYS, MSC, CD-adapco), aerospace (NASA, Boeing, ULA, SpaceX, Lockheed), exploration (Shell, Schlumberger, CMG), manufacturing (P&G, GE), technology (Amazon, Google, IBM, Motorola) and finance (HFT, mutual funds, credit card).

**Software Systems and Cloud Computing**

In this subplan, students learn about software systems and how they are applied to real world problems. They'll also discover how emerging cloud computing technologies can be used to implement some of the world's most popular services and applications.

For more information, visit the department's Professional MS Degree Program Requirements (http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/) webpage.

**Bachelor’s–Accelerated Master’s Degree Program**

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor's degree(s):

- **Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS)** (p. 800)
- **Computer Science - Bachelor of Arts (BA)** (p. 792)
- **Computer Science - Bachelor of Science (BSCS)** (p. 796)

**Distance Education Option**

Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

**Requirements**

**Admission Requirements**

Applicants for graduate study in computer science must hold at least a bachelor's degree or its equivalent from an accredited institution. They should have programming experience, a number of computer science courses and sufficient mathematical maturity to understand pure mathematics courses at the upper division (junior/senior) level. A minimum undergraduate GPA of 3.0 (on a scale of 4.0) is required for admission to the master's program.

Applicants are **not** required to submit GRE scores.

**Mathematics Courses**

A student's academic background should include at least three semesters of mathematics at the level of sophistication of calculus or above. Examples of such courses include calculus, differential equations, linear algebra, probability, statistics and abstract algebra. The courses should indicate that the student has achieved the mathematical maturity expected of an upper-level science, engineering or mathematics undergraduate.

**Computer Science Courses**

At least three one-semester courses in computer science that are beyond the introductory level are required for admissions. These are intended to demonstrate breadth of basic computer science knowledge in the areas of computer hardware, software and theory. The courses should include the equivalent of the following CU Boulder offerings:

- **Hardware requirement:** CSCI 2400 Computer Systems (Computer Science)
- **Software requirement:** Either CSCI 3155 Principles of Programming Languages or CSCI 3753 Design and Analysis of Operating Systems
- **Theory requirement:** CSCI 2270 Computer Science 2: Data Structures and either CSCI 3104 Algorithms or CSCI 3434 Theory of Computation

**Required Courses and Credits**

The following requirements are subject to change; for the most current information, visit the department's Professional MS Degree Program Requirements (http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/) webpage.

**Degree Requirements**

Students must complete a total of 30 credit hours of approved graduate level course work with a grade of C or better and a cumulative GPA of at least 3.00. Students are allowed to take two non-CS courses and the rest must be CSCI courses. Students under this option are **not** allowed to take research hours or thesis option.

Total Credit Hours: 30

Additional coursework may consist of no more than two non-CS classes, except for classes under subplans. Classes listed under required sub-plans will not be considered against the two non-CS.

**Time Limit**

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in two years.

**Subplan Tracks**

In addition to the above mentioned required courses, students enrolled in any the following subplans must also complete the required subplan courses as listed below.

### Dual Degree

**MSCPS/EMEN in Computer Science and Engineering Management**

Computer Science and Engineering Management ([https://www.colorado.edu/emp/](https://www.colorado.edu/emp/)) have teamed up to offer an exciting dual degree ([https://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/dual-professional-ms-engineering-management/](https://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/dual-professional-ms-engineering-management/)) for MSCPS students. Student complete a total of 45 credits of graduate-level coursework. Of those, 24 credits are in CS courses and 21 credits are in EMEN courses. All degree requirements must be completed within four years of the date of commencing coursework.
Network Engineering - Master of Science (MSNE)

Global interconnectivity requires the continuous expansion and evolution of network infrastructure, in response to trends in e-commerce, the Internet of Things, mobile data and enterprise operations. To assure the continuous operation of this infrastructure, companies need highly educated and technically proficient individuals with the vision to attend and build systems for emerging communication needs. This course-based degree prepares students to join the next generation of leaders in Internet, cloud, and intranet networking. Students will learn how to develop, build and maintain network solutions tailored to the diverse needs of your organization within the private or public sectors.

The intended audience for the Network Engineering program is both working professionals trying to develop or update their technical skills and abilities to match the latest requirements of the Internet service and cloud provider landscapes, as well as new entrants to this industry pursuing academic, professional or research success.

Bachelor’s–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 802)
- Computer Science - Bachelor of Arts (BA) (p. 795)
- Computer Science - Bachelor of Science (BSCS) (p. 796)

Requirements

Admission Requirements

Applicants for graduate study in network engineering must hold at least a bachelor’s degree or its equivalent from an accredited institution. We recommend that candidates have at least some experience in network engineering, system administration, or network programming.

A minimum undergraduate GPA of 3.0 (on a scale of 4.0) is required for admission to the master’s program.

GRE scores are not required for admissions to this program.

Program Requirements

Required Courses and Credits

Students must complete a total of 30 credit hours of approved graduate-level coursework with a grade of C or better and a cumulative GPA of at least 3.00.

Students will take courses in the following categories: fundamentals (6 credits), core (6 credits), advanced electives (9 credits) and electives (9 credits).

**Fundamentals**

The courses in the Fundamentals category are designed to provide students with the background they need to succeed in this degree.

Courses in this category cover the fundamental concepts of how the internet operates; how to develop network systems; and how to administer the machines (both physical and virtual) that deploy them.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCI 5010</td>
<td>Fundamentals of Data Communication</td>
<td>3</td>
</tr>
<tr>
<td>CSCI 5020</td>
<td>Fundamentals of Network Programming</td>
<td></td>
</tr>
<tr>
<td>CSCI 5030</td>
<td>Fundamentals of System Administration and Virtualization</td>
<td></td>
</tr>
</tbody>
</table>

Students are required to take two courses (6 credits) from the Fundamentals category unless they can demonstrate that they have acquired the necessary skills and knowledge via their undergraduate degree. Such students can petition to take two extra elective or advanced elective courses instead.

**Core**

The courses in the Core category begin to lay the foundation for exploring network engineering topics in depth. All aspects of network engineering from the management of network systems to the policies that govern traffic on the internet to the wireless systems that deliver information to devices on the edge are all covered.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>CSCI 5220</td>
<td>Wireless Local Area Networks</td>
<td>3</td>
</tr>
<tr>
<td>CSCI 5230</td>
<td>Wireless Systems Lab</td>
<td>3</td>
</tr>
</tbody>
</table>

Students are required to take two courses (6 credits) from the Core category to help set the stage for taking courses in the Advanced Electives category. Students can be guided in their choice of Core courses by using the suggested tracks below to craft a curriculum plan that best meets their academic goals. If a student feels that they need to take more courses from the Core category, they can certainly do so by choosing to take additional Core classes and applying those credits towards meeting the credits associated with the Electives category.

**Advanced Electives**

The courses in the Advanced Electives category go in-depth on a variety of network engineering topics. Students are required to take three courses (9 credits) of advanced electives to graduate.

Electives
Suggested Tracks

Electives

The three courses (9 credits) associated with the Electives category allow students to customize the MS in Network Engineering degree to meet their academic goals. These credits can include any of the following options:

- Any of the remaining Core courses
- Any of the remaining Advanced Electives Courses
- Any CS 5000-level course approved by petition
- At most three graduate-level courses from outside CS approved by petition

For the last two options, students are encouraged to submit petitions to the CS graduate committee before taking the courses they want to apply to the Electives category.

Suggested Tracks

The following sets of courses represent common tracks that students can take to target a particular area of network engineering in depth.

Technology, Cybersecurity and Policy - Master of Science (MS)

Technology, Cybersecurity and Policy (TCP) teaches cybersecurity from an interdisciplinary perspective which includes aspects of technology, engineering, leadership, policy and applications to emerging technology areas. Among the goals of TCP are to accelerate both research and learning in areas of technology, cybersecurity and policy; to provide relevant content with experiential learning; and to prepare students to be future leaders in these critical areas.

For more information, visit the MS in Technology, Cybersecurity, and Policy (https://www.colorado.edu/cs/academics/graduate-programs/master-science-technology-cybersecurity-policy/) webpage.

Bachelor’s–Accelerated Master’s Degree Program

Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 800)
- Applied Mathematics - Bachelor of Science (BS) (p. 730)
- Business Administration - Bachelor of Science (BA)
- Computer Science - Bachelor of Arts (BA) (p. 792)
- Computer Science - Bachelor of Science (BS) (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/computer-science/computer-science-bachelor-science-bs/#acceleratedmasterstext)
- Electrical and Computer Engineering - Bachelor of Science (BS) (p. 828)
- Electrical Engineering - Bachelor of Science (BSEE) (p. 829)

Requirements

Required Courses and Credits

The Master of Science in TCP requires 30 credit hours of coursework completed at the 5000 level or above. Students must complete the following course requirements: core (9 credit hours), depth area (15 credit hours), and capstone project, thesis or portfolio (6 credit hours). See below for additional details.

Students must complete a total of 30 credit hours of approved graduate level course work with a grade of C or better and maintain a cumulative GPA of at least 3.00.

Core Courses

The TCP program has three Core areas: (i) Technology, Thought Leadership and Policy, (ii) Networking and Secure Communications and (iii) Cybersecurity. These three areas form the cornerstones of the TCP degree, and students are required to complete the three courses listed below to explore each area. These areas cover the skills needed to become a leader in Technology, Cybersecurity and Policy and ensures graduates have the technical, policy and strategy skills to work in
industry and advance to senior leadership levels. The three Core courses contribute 9 credit hours to the overall degree program.

</tr>
<tr>
<td>CYBR 5300</td>
<td>Cybersecurity</td>
<td>3</td>
</tr>
</tbody>
</table>

TCP Depth Areas

TCP's advanced courses allow students to gain deeper knowledge and focus in the area of their choosing. Students must select a depth area and complete the 15 credit (5 course) requirement associated with that depth area. Three depth areas are currently available.

### Cybersecurity Engineering

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>Digital Forensics</td>
<td>3</td>
</tr>
<tr>
<td>CYBR 5350</td>
<td>Security Auditing and Penetration Testing</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Advanced Electives

Choose two:

- CYBR 5240 Introduction to Blockchain 6
- CYBR 5310 Immersive Cyber Defense 3
- CSCI 5413 Computer Security and Ethical Hacking 3

Some TCP special topics classes (CYBR 5830) can be applied to the cybersecurity engineering depth area. For details, see the TCP student handbook or speak with the TCP graduate program advisor.

### Secure Communications

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CYBR 5200</td>
<td>Introduction to Wireless Systems</td>
<td>3</td>

<tr>
<td>CYBR 5620</td>
<td>Advanced Wireless Lab</td>
<td>3</td>
</tr>
<tr>
<td>CYBR 5630</td>
<td>Wireless and Cellular Systems</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Advanced Elective Option

Choose one:

- CYBR 5230 Wireless Systems Lab 3
- CYBR 5240 Introduction to Blockchain 3
- CYBR 5420 Spectrum Management and Policy 3

### Custom

Students electing to take the Custom Depth Area option must first obtain approval from the TCP Program. Under the Custom Option, students must identify a sequence of 5 graduate courses that form a coherent whole that aligns with a student's academic goals and their current, and possibly longer-term, career objectives. Approval of the Custom option is not automatic and requires the student to submit a two-page proposal showing how the selected courses function as a depth area for the student.

The TCP Program is developing some recommended pathways for students who want to use the Custom depth area to specialize in combining knowledge in cybersecurity with other areas such as policy, leadership or management. Some of these pathways will become official depth areas in future years. Students are encouraged to contact the TCP Graduate Program Advisor for information about these pathways if interested.

### Interdisciplinary Capstone, Thesis or Portfolio

Students in the MS in TCP program have three options for completing their degree: capstone, thesis or portfolio.

#### Interdisciplinary Capstone Option

Students work in teams across two semesters to complete an advanced project that builds on their Core and Depth Area courses. Projects are often done in conjunction with industry partners. Topics are selected based on the combined interests of the students, the faculty and external partners such as industry and government. All students are required to take the first course of the sequence below. Most students will then move on to take the second course in the sequence but if a student is enrolled in the Designing for Defense class, they can choose to substitute it for the second capstone course (no petition needed). Thus, the three courses that can be used to meet the Interdisciplinary Capstone requirement are:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CYBR 5700</td>
<td>Graduate Projects I</td>
<td>3</td>
</tr>
<tr>
<td>CYBR 6700</td>
<td>Designing for Defense</td>
<td>3</td>
</tr>
</tbody>
</table>

#### Thesis Option

With faculty approval, students may elect to take 6 credits of thesis work (CYBR 6950) in place of the Interdisciplinary Capstone requirement. To complete a thesis, the student must get approval from a faculty member who will serve as their thesis advisor and find two additional faculty members who are able to serve on their thesis committee. Students will work with a faculty advisor to complete a thesis on a topic of mutual interest that includes aspects of the three Core areas. The three-member committee must be approved by the TCP Program and by the Graduate School. The student works primarily with the thesis advisor and provides both a written document and arranges a presentation (thesis defense/thesis exam) before the thesis examining committee. Examination Report Forms must be filed with the TCP Program at least two weeks prior to the date of the defense (exam). Students must be registered during the semester in which they defend their thesis. Additional information, rules, dates and deadlines, and thesis submission requirements can be found on the Graduate School (https://www.colorado.edu/graduateschool/academic-resources/thesis-dissertation-submission/) website.

#### Portfolio Option

A third capstone option is the portfolio option in which a student may petition the graduate committee to identify two courses that will help them customize their TCP degree in a way that will help them meet their academic and career goals. Students increase the chances of their portfolio petition being approved if the courses they select involve interdisciplinary and/or project-based work as defined by the syllabi from those courses. If a student's portfolio petition is not approved, they must then select either the capstone or thesis option. As a result, students must be submitting their petition for the portfolio option early in their second semester to have time to switch to one of the other two options if denied.
Taking Courses Outside of TCP

Students may take up to six credits of courses from areas outside of TCP to substitute courses within their depth area (both required courses or advanced elective courses). Students must gain approval for these two substitutions prior to completing them by submitting a petition to their graduate program advisor for review/approval by the CS graduate committee. Note: In line with standard practice for the CS graduate committee, courses from the following departments are automatically approved: Linguistics, Business, Geography, Physics, Mathematics, Applied Mathematics/STATS and Information Science.

Dual Degree Programs

The MS in TCP offers dual degree options with the following programs:

- Master of Business Administration (MBA) (p. 1408)
- Juris Doctor (JD) (p. 1772)

Students pursuing a technology, cybersecurity and policy dual degree must be admitted to both schools/programs under their respective admissions procedures and standards. For more information, visit the program’s Concurrent & Dual Degrees (http://www.colorado.edu/itp/dual-degree/) webpage.

Computer Science - Doctor of Philosophy (PhD)

As a computer science PhD student at CU Boulder, students take part in tier one research, learning from nationally and internationally recognized faculty.

Computer Science faculty, staff, and students are engaged in cutting edge research projects that address some of the most important challenges facing society today. From harnessing the power of big data to modeling climate change to understanding the role of social media, advances in computer science today will change the world tomorrow. The department offers opportunities in seven main research areas (https://www.colorado.edu/cs/research/).

Students select from focus areas in artificial intelligence, robotics, computational biology, human-centered computing, numerical and scientific computing, programming languages, software engineering, systems and networking, security and theory of computing. The PhD program in computer science is available whether a student is entering graduate studies for the first time or if they already have a master's degree. While a master's is not required to enroll, our PhD students will typically earn one on the way to a PhD.

PhD students consult with a faculty advisor throughout the duration of their degree to review their research progress and course selection.

For more information, visit the department's PhD Degree (http://www.colorado.edu/cs/current-students/graduate-students/phyd/) and Research (http://www.colorado.edu/cs/research/) webpages.

Requirements

Course Requirements

- 30 credit hours in courses numbered 5000 or above, including three breadth (https://www.colorado.edu/cs/current-students/graduate-students/graduate-breadth-courses/), three 1-credit professional development, and six depth courses (3 credits of the depth needs to be CSCI)
- 30 credit hours of dissertation credit.
- A maximum of 21 credit hours of graduate coursework may be transferred from another accredited institution.
- All courses taken for the master’s degree at the 5000-level or above at CU Boulder may be applied toward the doctoral degree at the university.

Preliminary Examination

The purpose of the area examination is to ensure that the student has sufficient depth to begin research in a selected area. Thus the exam tests knowledge of the general area of computer science that contains the research topic, deeper specialized knowledge of the specific research area that the student will be working in, and intellectual sophistication needed to conduct research in the area.

The area examination contrasts with the comprehensive exam, which is devoted to a focused research theme. It complements the coursework requirement of the preliminary exam, which is meant to build breadth in Computer Science in general and general knowledge of the student’s research area.

For more information, visit the department’s PhD Area Exams (https://www.colorado.edu/cs/current-students/graduate-students/phd/requirements/) information.

Comprehensive Examination

After passing the preliminary examination, the student continues their coursework and prepares a written thesis prospectus within four years of their admission to the program. When ready, the student takes an oral comprehensive examination covering their graduate coursework and thesis prospectus. The oral examination is based primarily on a written proposal for the thesis research provided by the student to committee members in advance. This examination is conducted before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School.

For more information, visit the "PhD Comprehensive Exam/Proposal" section of the department’s PhD Program Requirements (http://www.colorado.edu/cs/current-students/graduate-students/phd/requirements/) webpage.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Technology, Cybersecurity and Policy - Doctor of Philosophy (PhD)

The technology, cybersecurity and policy PhD degree is designed for highly-motivated students seeking to conduct research at the intersection of many emerging technology and includes cybersecurity, policy and human factors. By working with cognate disciplines TCP students can achieve the PhD degree with focus areas such as: economics, linguistics, social sciences and policy disciplines more
generally. Enrolled students develop the necessary skills to conduct research, along with a domain discipline focused study plan in the specific technical areas of their interests. Research foci often mirror one of the established areas of research in the program, such as wireless systems, policy and cybersecurity.

The profile of selected applicants may include those that have already earned a master’s degree or have substantial work experience in the private or public sectors in the cybersecurity, information communications or telecommunications fields. The PhD program may also be of interest to academically qualified students coming straight from a range of undergraduate programs who will earn an MS degree as they progress toward the PhD degree. The future is open to interdisciplinary possibilities in technology, cybersecurity and policy.

The Technology, Cybersecurity and Policy PhD degree program is an on-campus degree only.

For more information, visit the TCP Program (https://www.colorado.edu/program/tcp/) webpage.

**Requirements**

**Course Requirements**

Students must complete a total of at least 60 credits at the graduate-level (i.e., courses taken subsequent to receiving their MS and doctoral dissertation credits) in order to fulfill the requirements for a PhD degree.

The following course requirements are subject to change; for the most current information, see the department’s TCP Program (https://www.colorado.edu/program/tcp/) webpage.

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>

<td>Introduction to Wireless Systems</td>
<td>3</td>
</tr>
<tr>
<td>CYBR 5400</td>
<td>Technology: Commercial Strategy and Operations</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Options include:

- CYBR 5320 Cybersecurity Network Analytics
- CYBR 5330 Digital Forensics
- CYBR 5350 Security Auditing and Penetration Testing
- CYBR 5410 Telecommunications Law and Policy
- CYBR 5420 Spectrum Management and Policy
- CYBR 5550 Designing for Defense
- CYBR 5215 Wireless Local Area Networks
- CYBR 5230 Wireless Systems Lab
- CYBR 5260 Seminar: Law and Economics of the Information Age
- CYBR 5310 Immersive Cyber Defense

**Thesis Credit Hours**

- CYBR 8990 Doctoral Dissertation 30

**Total Credit Hours** 60

**Preliminary Examination**

The preliminary examination consists of two components: a preliminary paper and successful demonstration of proficiency of TCP core courses. All students must complete both the prelim paper and all TCP core courses by their fourth semester (the spring semester of their second year), unless they have successfully petitioned the TCP PhD Preliminary Examination Committee for an exception by the end of the first month of the fall semester of their second year.

**Comprehensive Examination**

Students who have passed the preliminary examination at the PhD level and completed the required coursework (a total of 30 credits) are eligible to take the comprehensive examination the following year, roughly 12 months after the preliminary examination. The comprehensive exam consists of an oral presentation of a written thesis proposal that is reviewed and approved by the student’s thesis committee. The thesis proposal should describe the problem statement, research methodology, and proposed research plan, along with a brief review of the background of the topic and summary of early results. The research plan should break down the research into development phases and include a tentative schedule for the completion of each research phase.

**PhD Dissertation**

Following the semester in which the comprehensive exam is passed, the student must be continuously registered each fall and spring for dissertation hours until the student successfully defends his or her dissertation or formally withdraws from the program. These students are required to register for at least 5 credit hours per semester of dissertation research (on campus), or for at least 3 credit hours per semester if dissertation research takes place off campus (distance).

**Cybersecurity - Graduate Certificate**

The Technology, Cybersecurity and Policy (TCP) program offers a graduate certificate that provides foundational knowledge and technical skills for students seeking career opportunities in the growing area of cybersecurity. Credits earned in this certificate can be applied towards earning an MS in Technology, Cybersecurity and Policy.

**Requirements**

**Required Courses and Credits**

This certificate requires completion of 12 credit hours, as follows:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CYBR 5300</td>
<td>Cybersecurity</td>
<td>3</td>
</tr>
</tbody>
</table>

**Elective Courses**

Choose three:

- CYBR 5010 Fundamentals of Data Communication
- CYBR 5310 Immersive Cyber Defense
- CYBR 5320 Cybersecurity Network Analytics
- CYBR 5330 Digital Forensics
- CYBR 5350 Security Auditing and Penetration Testing

**Total Credit Hours** 12
Additional Requirements

A student may petition the graduate committee to substitute one of the elective courses with a different graduate-level course. The petition must justify how the new course applies to a certificate in cybersecurity and/or how it supports the academic and career goals of the student.

A student may not have a course fulfill the requirements for multiple certificates.

To earn a certificate, students must receive a minimum grade of a C or higher in each course. Furthermore, the cumulative GPA for all courses applied to the certificate must be 3.0 or higher.

Wireless Network Engineering - Graduate Certificate

The Technology, Cybersecurity and Policy program (TCP) wireless networks and technologies graduate certificate offers students foundational knowledge and technical skills in the highly sought-after job relevant area of wireless networking. Students seeking a certificate can also apply their TCP course credits toward a master's degree in the program. This ecosystem is evolving and many exciting things are happening in the wireless space including 5G research and deployment, space and aerospace applications, the deployment of the Internet of Things (IoT) and the associated policy and other issues.

For more information, visit the program’s Graduate Certificates webpage.

Requirements

The wireless networks and technologies graduate certificate requires the completion of 12 credit hours and is currently offered on-campus only.

Creative Technology and Design

Conferred by the College of Engineering and Applied Science and administered by the ATLAS Institute, graduate programs in creative technology and design are highly interdisciplinary, nurturing robust technical and design skills while giving students the maximum flexibility to explore and develop their creative visions.

ATLAS faculty interests are broad, including areas such as e-textiles, human-robot interaction, game design and engineering at the molecular level. Graduate students hail from a wide range of academic disciplines, including computer science, engineering, art, the humanities, the natural sciences, music and design.

Graduates of the professional MS program most often pursue careers in design, technology and social impact fields. PhD alumni work as researchers in industry and government, and as faculty members in academia.

For those seeking a graduate experience surrounded by a vibrant, interdisciplinary academic community of creative designers, engineers and inventors, ATLAS is the place.

For more information, visit the institute's Graduate Programs webpage.

Course code for this program is ATLS.

Professional Master's Degree

• Creative Technology and Design - Master of Science (MS) (p. 1555)

Doctoral Degree

• Creative Technology and Design - Doctor of Philosophy (PhD) (p. 1556)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Alaa A. (https://experts.colorado.edu/display/fisid_144736/) Associate Professor; PhD, University of Michigan

Alistar, Mirela (https://experts.colorado.edu/display/fisid_164177/) Assistant Professor; PhD, Technical University of Denmark

Bethancourt, Matthew R. (https://experts.colorado.edu/display/fisid_156489/) Teaching Associate Professor, Faculty Director; MFA, Parsons School of Design

Black, Jonathan Lecturer

Braith, Daniel Lecturer, BA, Arizona State University

Bruns, Carson J. (https://experts.colorado.edu/display/fisid_159851/) Assistant Professor; PhD, Northwestern University

Devendorf, Laura (https://experts.colorado.edu/display/fisid_158564/) Assistant Professor; PhD, University of California, Berkeley

Dispenza, Arielle (https://experts.colorado.edu/display/fisid_157379/) Instructor, Faculty Director; MPS, New York University
Courses

**ATLS 5040 (3) Game Design**
Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4040
Requisites: Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to the ATLAS (PATL) student group only.

**ATLS 5112 (3) Neurohacking**
Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4112
Requisites: Restricted to Atlas (ATLS) graduate students only.

**ATLS 5120 (3) Mobile Application Development**
Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers’ kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4120
Grading Basis: Letter Grade

**ATLS 5130 (3) Experimental Typography**
This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4130
Requisites: Restricted to graduate students only.

**ATLS 5140 (3) Game Development**
Builds on concepts and processes learned in ATLS 4140/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4140

**ATLS 5150 (1) Managing Effectively in a Changing Telecommunications Environment**
Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world.
Equivalent - Duplicate Degree Credit Not Granted: TLEN 5150
Requisites: Restricted to CYBR/TLEN graduate students.

**ATLS 5151 (3) Flow Visualization**
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, ARTF 5200, ATLS 4151 and MCEN 5151
ATLS 5210 (3) Global Development I
Introduces students to the theories and policy of international development. Examines the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. Focuses on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques.
**Requisites:** Restricted to Atlas (ATLS) graduate students only.

ATLS 5214 (3) Big Data Architecture
Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.
**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4214
**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

ATLS 5220 (3) Global Development II
Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development.
**Requisites:** Requires prerequisite courses of ATLS 5210 (minimum grade D-). Restricted to graduate students only.

ATLS 5230 (3) Case Studies in Social Impact
Serves as foundation course for MS-Social Impact program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of Social Impact as an emerging area of academic focus.
**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4230
**Requisites:** Restricted to Atlas (ATLS) graduate students only.

ATLS 5240 (3) Technology for Social Impact Laboratory
Prepares students for the semester-long practicum. Students work in teams to design interventions that address unique socio-economic and environmental development issues. Teams will design a variety of interventions, including telehealth and distance education programs, communication networks, and pro-development policies. Topics will be chosen by teams and guided by program faculty and external domain experts.
**Requisites:** Requires prerequisite courses of ATLS 5230 (minimum grade D-). Restricted to graduate students only.

ATLS 5244 (3) Empathy and Technology
Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.
**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4244
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

ATLS 5250 (3) Fieldwork Methods
Introduces methods and models that can be employed in program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing initiatives.
**Requisites:** Restricted to Atlas (ATLS) graduate students only.

ATLS 5279 (3) Aesthetics in Design
Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.
**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5279 and MCEN 4279 and ATLS 4279

ATLS 5320 (3) Mobile Application Development: Advanced Topics
Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.
**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4320
**Requisites:** Requires prerequisite course of ATLS 5120 (minimum grade C).

**Grading Basis:** Letter Grade

ATLS 5330 (3) Wearable Technologies
Introduces elements of embedding electronic and computational behaviors into clothing and accoutrements such as watches, handbags, and other wearable accessories. In weekly exercises students build, test, and demonstrate canonical wearable projects. Readings and video viewings survey past and current trends in wearable technologies, including materials, components, fashion and social acceptability. Participants design, develop, debug and document a wearable technology term project.
**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4330
**Requisites:** Restricted to Atlas (ATLS) graduate students only.

ATLS 5402 (3) Research Methods in Human-Robot Interaction
Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.
**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5402
**Requisites:** Restricted to graduate students only.

ATLS 5410 (3) Creative Technologies
This course gives students hands-on exposure to a wide range of technologies, including 3D printing, laser cutting, microcontrollers, sensors and programming. Through rapid prototyping and problem solving, students gain technical fluency and competence while identifying technology skills they wish to develop further.
**Requisites:** Restricted to Atlas (ATLS) graduate students only.
**ATLS 5420 (3) Professional Seminar: Business of Creativity**

This course was designed specifically to prepare students to make the most of their time in the CTD Master's Program, and to prepare them for a career within the creative technology and design professional landscape. The course helps students identify career goals and mentors, and helps them position themselves for industry through course-selection, portfolio development, and projects. There is also a survey element to the course which exposes students to creative technology professionals who discuss their career paths, offer advice, and provide insight into their individual design process.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5430 (3) Design Methods**

In this course, students will learn to develop sense-making techniques as designers. This includes framing and structuring design research, making representations to generate insights, as well as documenting and communicating processes and outcomes. The class is structured around weekly discussions and activities anchored in real-world design challenges; and it will also offer tutorials on key design skills such as rapid prototyping and visual communication.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5440 (3) Design Studio**

In this course students work with both faculty and industry expert mentors on developing a semester-long group project. In small teams, students learn to develop an interactive experience that combines project design and technical execution. The class is designed to reflect a real-world, interactive design project experience, in which students must present and deliver a large scale completed project for demonstration/exhibition at the end of the semester.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5519 (1-3) Advanced Special Topics in Creative Technology and Design**

Analyzes special interest areas of multidisciplinary creative technologies and design research and practice.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ATLS 5529 (1-3) Advanced Special Topics: Critical Perspectives in Technology**

Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4529

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5606 (3) Critical Technical Practice**

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships. Counts as Mastery in Information Science.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5606, ATLS 4606 and INFO 4606

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5610 (6) Startup Practicum**

Presumes that entrepreneurship can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerse students in the daily leadership and innovation challenges of the startup environment and serve as a clinic in thinking, decision making and mental agility that will benefit any area of business—not just startups.

**Requisites:** Restricted to graduate students only.

**ATLS 5616 (3) Introduction to Virtual Reality**

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4616, ATLS 4616, CSCI 5616

**ATLS 5620 (3) User-Experience Design 1**

Through lecture, industry illustrations, and hands-on projects students will learn the end-to-end UX Design process. Through this course students will learn how to craft a professional design portfolio piece, understand contemporary UX design methodologies, and be shown how to innovate when designing at scale.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5630 (3) Web Front-End Development**

Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4630

**Requisites:** Restricted to graduate students only.

**ATLS 5640 (4) Design Thinking**

Explores design thinking and how it can be applied conceptually and practically to innovation in areas as diverse as business organization and product development to topics and areas including but not limited to, story, design, UX, interaction design, communication strategy and presentation. Fast-paced, project-based, and immersive, students will work in small teams to discover solutions to real-world problems.

**Requisites:** Restricted to graduate students only.

**ATLS 5650 (3) Introduction to Programming**

Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization. This class is a mix of technical instruction (both inside and outside the classroom), readings, viewings, lectures, workdays, and critiques. This is a projects-based class, but projects will vary.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.
ATLS 5660 (3) Creative Code
Exposes students to front-end, web-based design and development processes and best practices. WordPress will be used as the back end CMS. Students will learn how to design and develop using WordPress as a framework. At the end of the semester, students will present a final project to illustrate what they have learned and the logic of their build.
Requisites: Restricted to Atlas (ATLS) graduate students only.
Recommended: Prerequisites: exposure to HTML, CSS, JavaScript, PHP and MySQL and previous experience with WordPress for blogging and/or content publication.

ATLS 5680 (3) Creative Tech Studio
Emphasizes fundamentally, theoretically, and practically that technology and creativity are not opposing disciplines but rather a dynamic and complementary blending of idea and execution that is iterative and evolving through the dynamic exchange and interaction of ideas and tools. Each Studio will offer a different conceptual challenge, such as using technology to bridge physical and digital environments, game design, or storytelling.
Repeatable: Repeatable for up to 12.00 total credit hours.
Grading Basis: Letter Grade

ATLS 5720 (3) User-Experience Design 2
Expands on techniques and opportunities presented in User-Experience Design 1 with a deeper dive into research and prototyping practices as means to insight into user desires and preference, adoption, and execution of product and branded experiences in a variety of contexts and locations within the global experience economy.
Requisites: Requires prerequisite course of ATLS 5620 (minimum grade C).

ATLS 5730 (3) Front-End Development 2
Requires that students are proficient in front-end environment and ready for advanced front-end development using these tools - HTML 5, CSS3, JS - on weekly projects, a mid-term project, and a final project. This course develops more robust and elegant uses of the semantic use of elements as well as the benefits of using standards-based, valid code, CSS efficiencies, and JS and its libraries.

ATLS 5809 (3) Computer Animation
Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4809 and CSCI 4809 and CSCI 5809
Requisites: Restricted to graduate students only.

ATLS 5880 (3) Interactive Machine Learning for Customizable and Expressive Interfaces
Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 4889, CSCI 4889 and CSCI 5880
Requisites: Requires prereqs (CSCI 3022 or APPM 4570 or APPM 3570 or APPM 4520 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or MCEN 4120) (CSCI 3002 or CSCI 3202 or CSCI 4448) all min grade C-. Restricted to grad students in the ATLAS program.
Grading Basis: Letter Grade

ATLS 5900 (1-6) Masters Level Independent Study
Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATLS 6519 (1-3) Advanced Special Topics in Creative Technology and Design
Analyzes special interest areas of multidisciplinary in creative technology and design research and practice.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

ATLS 6900 (1-3) Professional Internship
The objective of this course is for students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period.
Repeatable: Repeatable for up to 3.00 total credit hours.

ATLS 6910 (3-6) Social Impact Practicum
This practicum allows Social Impact MS students to synthesize what they have learned and test their readiness for a career in Social Impact. Practicum assignments are arranged under the supervision of the MS Program Director and involve work with a non-governmental organization, development agency or technology/policy entity. Successful completion is required for graduation from the Social Impact MS Program.
Requisites: Requires prerequisite courses of ATLS 5210 and ATLS 5220 and ATLS 5230 and ATLS 5240 and ATLS 5250 (all minimum grade D-).
ATLS 6920 (3) Creative Industries Final Project
This course allows MS-CTD students to synthesize what they have learned and test their readiness for a career in the creative technologies and design field. Through this class students work with an academic and/or industry mentor to create a capstone final project emblematic of their focus during their master degree studies. Students learn to propose and scope work, adhere to budget constraints and time schedules, communicate their work, and create a final deliverable that is presented to the larger ATLAS community. This final project is meant to serve as a culminating portfolio project that helps position students for industry after graduation. Successful completion is required for graduation from the MS-CTD Program.

Requisites: Restricted to Tech, Media and Society (ATLS) master’s degree students only.

ATLS 7000 (1) ATLAS Colloquium
Each week during the fall and spring semesters, the ATLAS Colloquium features dynamic speakers from academia and industry who work in fields of interest to the creative technology and design community. Whether artists, creatives, scientists, researchers, entrepreneurs or free spirits, these speakers share their interdisciplinary experience and knowledge in an intimate, small-group setting. Topics may include programmable matters, do-it-yourself technologies, new design medium, robotic teleoperations, virtual/augmented/mixed reality, information visualization, games, design computation, creativity and cognition, personal health informatics, addictive fabrication, cyber security, ethics, education, human computer interaction and others. The ATLAS Colloquium promotes rigorous, curiosity-driven investigation in a thriving academic community that is supportive, energetic and playful.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

ATLS 7500 (3) ATLAS Graduate Research Methods
The objective of this course is to provide a primer for key methodological approaches used in the field. Students will investigate a broad set of techniques for conducting theoretical, design, and experimental research. They will explore how to formulate and investigate research questions using these methods. Topics covered will include basic research ethics, research project design, approaches to constructing theory, research through design techniques, and methods for experimental study.

Repeatable: Repeatable for up to 6.00 total credit hours.

ATLS 7900 (1-6) Doctoral Level Independent Study
Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Atlas (ATLS) graduate students only.

ATLS 8990 (1-10) Doctoral Dissertation
Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Atlas (ATLS) graduate students only.

Creative Technology and Design - Master of Science (MS)

Conferred by the College of Engineering and Applied Science and administered by the ATLAS Institute, the professional Master of Science in Creative Technology and Design is highly interdisciplinary, nurturing robust technical and design skills while providing students with the maximum flexibility to explore and develop their creative visions.

Program Tracks

The degree program includes two tracks: Creative Industries and Social Impact.

Creative Industries

Through project-based learning, students in this track gain technical fluency, designing systems and products to realize their creative visions. Students learn more than design thinking; they graduate from the program as creative technologists equipped with robust portfolios of thoughtful projects and prototypes.

The program is driven by a unique and relevant core curriculum, flexibly shaped by student interest and guided by industry leaders.

The creative industries track connects students to the current and most relevant considerations of the field. Through hands-on workshops, visiting speakers, studios and classes, students work directly with leading professionals on real-world issues, gaining design expertise and technical skills as they learn the business of creativity.

Social Impact

The social impact track prepares students to leverage information and communication technology in support of underserved communities, in the U.S. and around the world.

Graduates are creative problem solvers tackling some of the world’s biggest issues. Learning in the program prepares students to creatively apply information and communication technologies for social impact. Students understand that the most effective and culturally appropriate solutions balance technology and societal need; through a project-based curriculum, students learn to critically evaluate and apply both.

One of the program’s greatest strengths is its diverse student cohort; a broad mix of talent leads to more thoughtful and thorough development projects and solutions.

A hallmark of the program is the final field-based practicum semester when students are placed with non-governmental organizations, development agencies, foundations or technology companies to apply social impact interventions to real-world problems—experience that positions them favorably for careers in the field after graduation, sometimes with the same organizations.

For more information, visit the ATLAS Institute's Graduate Programs (https://www.colorado.edu/atlas/academics/grad/) webpage.

Requirements

Creative Industries Track

The creative industries track requires a total of 33 credit hours, of which at least 27 must be completed at the 5000 level or above, including the mandatory core courses listed below. In addition, specific focus area requirements must be met. Students must receive a grade of B or higher in all coursework, maintaining a minimum overall GPA of 3.00.

For more information, visit the ATLAS Institute (https://www.colorado.edu/atlas/academics/graduate/ms-technology-media-society/) webpage.
Social Impact Track
The social impact track requires a total of 33 credit hours, of which at least 27 of which must be completed at the 5000 level or above, including the mandatory core courses listed below. In addition, specific focus area requirements must be met. Students must receive a grade of B or higher in all coursework, maintaining a minimum overall GPA of 3.000.

For more information, visit the ATLAS Institute (https://www.colorado.edu/atlas/ictd/) webpage.

Two-Year Plans of Study

Creative Technology and Design - Doctor of Philosophy (PhD)

The PhD program at CU Boulder's ATLAS Institute emphasizes out-of-the-box invention and radical inquiry, attracting students whose interests and knowledge span multiple disciplines and domains. Conducting compelling and relevant research, ATLAS PhD students are central to the institute's thriving academic community of engineers, artists and designers.
Structurally, the ATLAS PhD program is like any other research-based doctoral program: a student forms an advisory committee, takes courses, takes a qualifying examination, proposes a dissertation, performs research, writes a dissertation and defends it.

However, unlike most U.S. doctoral programs, the ATLAS PhD program has few required courses; instead, the curriculum is crafted individually, with students working with their advisory committees to identify the expertise needed to research their area of focus.

For more information, visit the ATLAS Institute's PhD Program (https://www.colorado.edu/atlas/academics/graduate-programs/atlas-phd-program/) webpage.

**Requirements**

**Course Requirements**

- A minimum of 30 credit hours of courses numbered 5000 or above where students earn a minimum of 3.00 GPA.
- A minimum of 30 credit hours of dissertation credit are required for the degree.
- Students must complete the following two courses: Research Methods and PhD Research Professional Seminar, and attend the ATLAS Colloquium three semesters over the span of their time in the PhD program.

**Program Proposal**

To maintain good standing in the program, all students must complete their academic program plan/program proposal by the end of the second semester. In general, ATLAS academic plan/program proposals include general research area and the courses to be taken and other research/disciplinary appropriate activities planned.

**Preliminary Examination**

To maintain good standing in the program, all students must complete their preliminary examination by the end of the second year. The preliminary examination will demonstrate the student’s preparation for scholarly work in his/her chosen area.

**Comprehensive Examination**

To maintain good standing in the program, all students must complete their comprehensive exam by the end of the second semester of their fourth year in the program. The comprehensive examination will outline the student’s completed research and proposed research agenda. This includes both an oral and written exam delivered to their dissertation committee and open to the larger community.

**PhD Dissertation**

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all CU Boulder Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

**Plan(s) of Study**

Due to the highly interdisciplinary nature of the program, each student’s plan of study is developed in consultation with their advisor to address their unique research goals.

---

**Electrical Engineering**

Areas of focus in electrical engineering include photovoltaic, wind and renewable energy systems, power electronics systems, electromagnetic theory, microwave systems, antennas, remote sensing, bioelectronics and biomedical engineering, communications and signal processing, medical imaging, optoelectronics, nanophotonics and nanodevices, biophotonics, human/machine interfaces, controls theory, embedded systems engineering, and complex network systems.

With a highly regarded faculty and $7.1 million awarded in new contract and grant funding in fiscal year 2021, the Department of Electrical, Computer and Energy Engineering (http://www.colorado.edu/ecee/) is the perfect place to take your education to the next level.

We offer several degree options tailored to both working engineers looking to advance their careers and to those looking to pursue a career in academia. Research is concentrated in six broad areas: optics, nanostructures and bioengineering; communications and signal processing; computer engineering; systems and controls; electromagnetics, RF and microwaves; and power electronics.

**Course code for this program is ECEN.**

**Research Centers**

**Colorado Power Electronics Center (CoPEC)**

Since it was founded in 1983, the power electronics group at the University of Colorado has maintained a tradition of innovative design-oriented and application-driven research. Colorado Power Electronics Center (CoPEC) activities now span the range of applications from high-efficiency milliwatt converters for portable battery-operated systems, to hundreds or thousands of watts for computer, data centers, telecommunications, aerospace, and medical applications, to hundreds of kilowatts for electrified transportation, solar photovoltaic and wind power systems.

Our current research activities include projects in high-efficiency, high-power converter technology, power electronics for portable, battery-operated systems, converter modeling and computer-aided analysis, high-efficiency modular and composite power conversion architectures utilizing wide bandgap power semiconductors, low harmonic rectifier technology for single-phase and three-phase applications, solar photovoltaic power systems, and advanced digital and mixed-signal control techniques. We collaborate with other research groups at the University of Colorado, including those in energy systems, microelectronics packaging, RF/microwave systems, control and semiconductor devices. We also maintain collaborations with the National Renewable Energy Laboratory and within the NSF Engineering Research Center ASPIRE, which is focused on electrified transportation. For more information, call 303-492-7327 or visit the CoPEC (http://ecee.colorado.edu/copec/) website.

**ASPIRE**

Launched in 2020, ASPIRE (Advancing Sustainability through Powered Infrastructure for Roadway Electrification) is exploring a diverse range of electrified transportation questions, from electrified highways that energize vehicles to the placement of charging stations, data security and workforce development. Participating in ASPIRE are CU Boulder researchers in electrical, computer and energy engineering, including Colorado Power Electronics Center, Power and Renewable Energy Systems, Optimization, and Data Science, as well as researchers in computer science and mechanical engineering. The ASPIRE Engineering
Research Center is funded by a $26 million National Science Foundation (NSF) grant and led by Utah State University.

**The University of Colorado Center for Environmental Technology (CET)**

Understanding and managing the environment—whether for agriculture, health, water resources, disaster mitigation, energy generation, transportation, weather forecasting, climate modeling or biodiversity—requires accurate knowledge of many variables on a wide range of time and space scales. Measurements for environmental purposes are made either in situ or remote sensors, and rely upon a variety of different means, including acoustic and electromagnetic waves, point measurements and wide-area imaging and active and passive systems. A variety of different types of platforms can be used for environmental observation, including ships and submersibles, aircraft (both manned and unmanned), spacecraft and stationary sites.

Research and educational activities at the CU Center for Environmental Technology are focused on developing sensors, systems of sensors and associated hardware and algorithms for environmental observation with a focus on new remote and in situ techniques to meet contemporary scientific and applications goals. This is accomplished by direct involvement of CU faculty, CET engineering staff and undergraduate and graduate students on the development of sensing systems to meet the observational needs of a number of government and industry sponsors. CET training involves close interaction between students and experienced professional engineers, practicing scientists and CU faculty.

The CET was established in 2006 with a major donation of equipment from the NOAA Earth System Research Laboratory, and has members, associates and students from within the broad earth science and engineering communities of Colorado. For more information, contact the CET director at 303-492-9688 or visit the Center for Environmental Technology website.

**The STROBE Center**

The STROBE Science & Technology Center brings together imaging science experts from seven universities and partners with national labs, industry and academia to push the boundaries of imaging science capabilities and technologies, while building a diverse workforce that is prepared for 21st century careers in science and technology.

Modern functional materials require a deep knowledge of interactions within them to understand how heterogeneity defines function. STROBE brings together academia, national laboratories and industry to develop and advance multimodal multi-scale imaging modalities and their application to material and bio-systems science.

**Research and Instructional Equipment**

The department’s special equipment and facilities include a class 1000 clean room facility for epitaxial growth and fabrication of microwave and optical devices; an anechoic chamber; high-vacuum and vacuum deposition equipment for thin-films research; an integrated circuits laboratory; ion implantation equipment; crystal growing facilities; a modern systems laboratory; a laboratory for data storage research; a digital system design laboratory; a power electronics research laboratory; undergraduate laboratories in circuits, electronics; power electronics; digital signal processing and communications; embedded systems; microwaves; a holography and optics laboratory; an advanced optical metrology lab; numerous special purpose computers; a computer system development laboratory; a roof-mounted antenna range; a special microscope for laser manipulation of microorganisms in vivo; a bio-

microwave laboratory; a solar power lab; photovoltaic device fabrication and characterization facilities; and bioelectronics fabrication and integration capabilities.

The Colorado Shared Instrumentation in Nanofabrication and Characterization (COSINC) is an open user facility on campus. Our mission is to provide expertise, facilities, infrastructure and teaming environments to enable and facilitate interdisciplinary research in microelectronics, optoelectronics and MEMS. We also make use of the campus's HPC system RMACC Summit (https://www.colorado.edu/rc/articles/rmaccsummit/).

The Department of Electrical, Computer and Energy Engineering has a large variety of computing equipment to support its research and instructional activities. In addition to specialized computing equipment, this includes several hundred PCs, Macs, a department server and a student server. These machines are connected to the campus-wide ethernet network.

**Master's Degrees**

- Electrical Engineering - Master of Engineering (ME) (p. 1573)
- Electrical Engineering - Master of Science (MS) (p. 1574)
- Electrical Engineering - Professional Master of Science (MSEE) (p. 1577)

**Doctoral Degree**

- Electrical Engineering - Doctor of Philosophy (PhD) (p. 1581)

**Certificates**

- Embedded Systems Engineering - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-applied-science/embedded-systems-engineering-graduate-certificate/)
- Power Electronics - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-applied-science/power-electronics-graduate-certificate/)
- Photonics - Graduate Certificate (p. 1581)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Walkes, Dan
Lecturer

Williamson, James A.
Lecturer

Wustrow, Eric A. (https://experts.colorado.edu/display/fisid_156419/)
Assistant Professor; BE, University of Michigan Ann Arbor

Zabotin, Nikolay (https://experts.colorado.edu/display/fisid_127038/)
Research Professor

**Courses**

**ECEN 5005 (3) Special Topics**
Examines a special topic in Electrical, Computer and Energy Engineering. **Repeatability:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term. **Additional Information:** Departmental Category: Nanostructures and Devices
ECEN 5008 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5009 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Embedded Systems

ECEN 5011 (1-4) Special Topics
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4011
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Bioengineering

ECEN 5012 (3) Special Topics
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5013 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Campus section restricted to ECEE graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP only.
Grading Basis: Letter Grade

ECEN 5016 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Additional Information: Departmental Category: Optics

ECEN 5018 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5021 (1-4) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatability: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.
Additional Information: Departmental Category: Bioengineering

ECEN 5023 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering, Embedded Systems.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.
Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5024 (3) Special Topics
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4024
Repeatability: Repeatable for up to 9.00 total credit hours.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5028 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5032 (3) Special Topics
Additional Information: Departmental Category: Bioengineering

ECEN 5053 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4053
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.
Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5104 (3) Passive Microwave Circuits
Building on fundamentals taught in a class such as ECEN 3410 (Electromagnetic Waves), this course teaches fundamentals of microwave passive circuit analysis using scattering parameters. Design of impedance matching networks, impedance transformers, couplers, filters, dividers/combiners and other typical circuits used at microwave frequencies are covered. Using an industry-standard CAD tool, design of microstrip circuits is emphasized. Assignments include theoretical and CAD approaches to analysis and design of passive microwave transmission-line circuits.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5110 (1-3) Graduate Teaching Practicum
Provides training and hands-on experience in teaching of ECEE courses. Students will work with an instructor of an ECEE course to carry out teaching activities such as lecturing, leading discussion sessions, writing homework and examination problems, and relevant grading.
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

ECEN 5114 (3) Electromagnetic Theory
This course covers theory and applications of Maxwell's equations at the graduate level, including various electromagnetic wave types. Additionally, fundamental electromagnetic theorems such as Poynting, equivalence, duality, reciprocity and compensation, are studied through examples across the electromagnetic spectrum.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing
ECEN 5122 (3) Wireless Local Area Networks
Emphasis on the IEEE 802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will to analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified, programs, and will learn how to model and analyze WLAN traffic using industry standard tools.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5220 and CYBR 5220
Requisites: Requires prerequisite course of ECEN 3810 or APPM 3570 or MATH 4510 (minimum grade D-).
Recommended: Prerequisite CYBR 5430.
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5126 (3) Computational Optical Imaging
Covers the fundamentals of computational optical imaging modalities, namely systems in which the hardware (optics, sensors, illumination) is designed in conjunction with algorithms (implemented optically, electronically and via software) to deliver information about a scene. Students learn the analysis and design of modern imaging systems. Covers a variety of applications including biomedical imaging, nanoscopy, photography and space imaging.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

ECEN 5133 (3) Fundamentals of Computer Security
Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).
Grading Basis: Letter Grade

ECEN 5134 (3) Electromagnetic Radiation and Antennas
This course is introduction to antenna theory and antenna applications in applied electromagnetics. Elements of electromagnetic theory are first reviewed through the discussion of fundamental antenna parameters. Topics such as input impedance, radiation pattern, gain, radar cross section, near- and far-field, antenna temperature, and others are discussed first. The theory of operation of electric and magnetic dipoles, small and large dipoles, monopoles, and loops, as well as impact of different grounds on their parameters are discussed next. Other antennas such as bicones, helices, Yagi-Uda, microstrip patches, horns, reflectors, slots, spirals, log-periodics, etc. are also discussed. The fundamentals of array theory inclusive of linear, planar and circular topologies, coupling, beamforming, as well as elements of array synthesis are also discussed. Students will be exposed to the commercial software tools used to design antennas and will work individually or in teams to accomplish different project assignments.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5138 (3) Control Systems Analysis
Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Topics covered in this course will be investigated in more depth, require external readings, additional homework will be assigned, and the exams will be more difficult.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4138 MCEN 4138 or MCEN 5138
Requisites: Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.
Recommended: Prerequisite ECEN 3300.
Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5139 (3) Computer-Aided Verification
Covers theoretical and practical aspects of verification of finite-state systems (hardware) and infinite-state systems (programs). Model checking: temporal logics, explicit-state and symbolic search, BDDs. Constraint solvers: SAT solvers, decision procedures. Program verification: invariants, partial vs. total correctness, abstraction. Department enforced requisite: general proficiency in discrete mathematics and programming.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5135
Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.
Recommended: Prerequisite CSCI 2824.
Additional Information: Departmental Category: VLSI CAD Methods

ECEN 5154 (3) Computational Electromagnetics
This course is introduction to the frequency domain methods used in computational electromagnetics (CEM) for solving complex radio-frequency (RF) problems. The course starts with the review of electromagnetic theory and mathematical concepts used in CEM, followed by the introduction to the partial differential and integral equation based methods. Specifically, the fundamentals behind the finite difference method, finite element method, and method of moments are discussed and implemented to solve problems such as shielded microstrip line, charge distribution on metallic objects, waveguide modes, wire antennas, etc. Students will work independently and in teams to develop their own codes to solve given boundary value problems. The implementation of different methods in commercial software tools is continuously emphasized. An understanding of electrostatics and electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5156 (3) Physical Optics
Covers the application of Maxwell’s equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ECEN 3410.
Additional Information: Departmental Category: Optics
ECEN 5164 (3) Electromagnetic Metamaterials
Enables students to design engineered structures to realize materials with desired electromagnetic properties that are difficult or impossible to achieve using conventional materials. Exact and approximate techniques are explored to develop an intuitive understanding of the electromagnetic response of these structures.
Recommended: Prerequisite ECEN 3410 (EM Waves and Transmissions) or equivalent course in fundamental electromagnetic theory.

ECEN 5224 (3) High Speed Digital Design
Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4224
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5244 (3) Stochastic / Environmental Signal Processing
Provides a baseline understanding for research and development in signal processing and analytics for environmental and other data-intensive applications. Topics include parameter estimation, transforms, linear and nonlinear estimation, data assimilation and detection. Applications include numerical weather prediction, GNSS sensing, ionospheric sounding, radar, radiometry, surveillance, target detection and tracking. Previous coursework in linear systems and electromagnetic waves recommended.
Grading Basis: Letter Grade

ECEN 5253 (3) Datacenter Scale Computing - Methods, Systems and Techniques
Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 4253 and CSCI 5253 and CSPB 4253
Requisites: Restricted to graduate students only.
Recommended: Prerequisite CSCI 5273 or ECEN 5273.

ECEN 5254 (3) Remote Sensing Signals and Systems
Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5264 (3) Electromagnetic Absorption, Scattering, and Propagation
Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.
Recommended: Prerequisites ECEN 3400 and ECEN 3410.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing

ECEN 5273 (3) Network Systems
Focuses on design and implementation of network programs and systems, including topics in network protocols, architectures, client-server computing, software-driven networking, and other contemporary network hardware-software system design and programming techniques. Familiarity with C and Unix is required.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5273
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5295 (3) Foundations of Quantum Hardware
Introduces students to the principles and operation of quantum hardware. In this course you will learn how to describe many different physical systems (trapped ions, superconducting circuits, and optical systems) mathematically. This will allow you to model quantum sensors, communication systems and computing hardware.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4295

ECEN 5313 (3) Concurrent Programming
Introduces the theory and practice of multicores programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5313 and ECEN 4313 and CSCI 4313
Requisites: Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 (minimum grade C). Restricted to graduate students only.
Recommended: Prerequisite ECEN 3593.

ECEN 5322 (3) Data and Network Science
The course covers the theory and design of algorithms that are used to model, analyze, and extract information from large scale datasets and networks. The course includes a project.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4322
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Digital Signal Processing

ECEN 5341 (3) Bioelectromagnetics
Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4341
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Bioengineering
ECEN 5345 (3) Introduction to Solid State Physics
Provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons and electrooptical effects. Makes use of quantum mechanical methods. Department enforced prerequisite: basic quantum mechanics.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Nanostructures and Devices
ECEN 5355 (3) Principles of Electronic Devices 1
Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ECEN 3320.
Additional Information: Departmental Category: Nanostructures and Devices
ECEN 5395 (3) Organic Electronic Materials and Devices
Covers the materials and physics principles of organic electronic devices, including organic light emitting diodes (OLEDs), photovoltaics (OPVs), field effect transistors (OFETs), electrochemical transistors (OECTs), and bioelectronic and neuromorphic devices. The molecular, structural, and electronic properties of organic semiconductors are introduced, and the architectures and operating principles of the devices are then taught. Assignments will require computational solutions and simulations. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4395
Recommended: Prerequisite ECEN 5345.
ECEN 5407 (3) Renewable Energy and the Future Power Grid
This course will begin with an introduction to the power grid including planning and operations for the transmission and distribution level power grid. The course will reflect that while many of the solutions to the integration of variable generation are technical in nature, policy and economics play a large role in the changes that are occurring within the power system. After examining the technological specifications of the most important variable generation sources (wind power, solar photovoltaics, and solar thermal power), as well as traditional power generation sources, other aspects of power system planning and operations in the future power grid will be examined in detail.
Requisites: Restricted to students in College of Engineering and Applied Science (ENGR) only.
Grading Basis: Letter Grade
ECEN 5414 (3) Essential Principles of Signal Integrity
Designing a robust and cost-effective product is about following a process that helps apply your engineering intuition to balance cost and design tradeoffs specific to your product. This class introduces essential principles of signal integrity, including principles of transmission lines, reflections, inductance, ground bounce, differential pairs, losses, terminations, routing, discontinuities, impedance, PDN design and EMC with respect to optimized design.
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN3400.
ECEN 5417 (3) Power System Analysis
This course covers the basics of power system analysis techniques. Students will be introduced to the concepts behind the fundamental principles of traditional bulk power systems. The difference between single and three phase powers will be discussed. Students will learn how to model bulk power system components and the per unit system. Understanding the flow of power in the system will be examined in detail as students will learn about and apply both AC and DC power flow formulations.
Recommended: Corequisite ECEN 5407.
Grading Basis: Letter Grade
ECEN 5423 (3) Chaotic Dynamics
Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4423 and CSCI 4446 and CSCI 5446
Additional Information: Departmental Category: Computer and Digital Systems
ECEN 5427 (3) Power System Planning & Operations
This course will focus on bulk power system planning and operations, with special emphasis on systems with high variable renewable energy penetrations. Electricity markets will also be presented, and the differences with vertically integrated utilities will be discussed. Students will develop an understanding of electricity market dynamics in one of the course projects by participating in an electricity market game. The application of optimization problems in bulk power system operations will be discussed and applied by the students in another course project. They will develop a production cost model to simulate bulk power system operations of a test system under different scenarios.
Requisites: Requires prerequisite course ECEN 5407 (minimum grade B-).
Recommended: Prerequisite ECEN 5417.
Grading Basis: Letter Grade
ECEN 5434 (3) S-Parameters for Signal Integrity in High Speed Digital Engineering
Designing a robust and cost-effective product is about following a process that helps apply your engineering intuition to balance cost and design tradeoffs specific to your product. This class introduces design principles obtained by understanding S-Parameter results for complex PCB structures. Single-ended and Differential Transmission lines are analyzed and four common S-Parameter patterns are identified.
Requisites: Requires prerequisite ECEN 5414 ECEN minimum grade C-
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.
ECEN 5437 (3) Distribution System Analysis
Fundamental aspects of the analysis of power distributions systems, including the traditional distribution grid, loads, components, topologies, operational aspects, and power flow analysis. Includes how the distribution system is changing with the introduction of distributed energy resources.
Requisites: Requires corequisite course of ECEN 5407.
Recommended: Corequisite ECEN 5417.
Grading Basis: Letter Grade
ECEN 5444 (3) Electromagnetic Compatibility (EMC) for High-Speed Digital Engineering
Understanding and applying the theoretical principles of electromagnetics to high-speed digital engineering with respect to electromagnetic compatibility (EMC). Faster data rates and shorter rise times make signal integrity in high-speed digital engineering (HSDE) increasingly difficult. Signal distortion has adverse effects on EMC. This course covers understanding the radiation mechanisms and susceptibility of PCB circuits in HSDE.
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

ECEN 5447 (3) Power System Dynamics with Renewable Energy
To introduce the current and future electrical power systems dynamics coupled with inverter based renewable generators. Fundamentals of renewable generators dynamic models, power system dynamics will be introduced. Previously offered as a special topics course.
Recommended: Prerequisites ECEN 5417: Power systems analysis, ECEN 5407: Renewable Energy and the Future Power Grid, and graduate standing in the College of Engineering and Applied Science.

Additional Information:
ECEN 5447 (3) Power System Dynamics with Renewable Energy
Focuses on modern power and energy systems with high penetration of distributed energy resources (solar, batteries, electrical vehicles). Analytical methods for inference and decision making in such systems will be covered, including state estimation, forecasting, and optimal control. The emphasis is on data-driven methods, rooted in machine-learning techniques, such as kernel-based regression and reinforcement learning.
Recommended: Prerequisite ECEN 5407 and graduate standing in the College of Engineering and Applied Science.

ECEN 5448 (3) Geometric Control Theory
Introduce geometric approaches to study dynamical control systems over manifolds. Cover fundamental control-theoretical results, such as controllability, observability, feedback stabilizability, symmetries and group actions, that are beyond linear control systems. Establish connections between control theory and mathematics, especially topology, differential geometry, Lie groups and Lie algebras. Final project focuses on engineering applications related to students' own research interests.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5488
Recommended: Prerequisites a solid foundation in Probability Theory and ECEN 4138/5138 and ECEN 5448.

ECEN 5448 (3) Geometric Control Theory
Introduce geometric approaches to study dynamical control systems over manifolds. Cover fundamental control-theoretical results, such as controllability, observability, feedback stabilizability, symmetries and group actions, that are beyond linear control systems. Establish connections between control theory and mathematics, especially topology, differential geometry, Lie groups and Lie algebras. Final project focuses on engineering applications related to students' own research interests.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5488
Recommended: Prerequisites a solid foundation in Probability Theory and ECEN 4138/5138 and ECEN 5448.

Recommended: Restricted to graduate students only.

Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5458 (3) Sampled Data and Digital Control Systems
Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites ECEN 3300 and ECEN 4138.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5467 (3) Data Analytics and Data-Driven Decision Making for Modern Power and Energy Systems
Focuses on modern power and energy systems with high penetration of distributed energy resources (solar, batteries, electrical vehicles). Analytical methods for inference and decision making in such systems will be covered, including state estimation, forecasting, and optimal control. The emphasis is on data-driven methods, rooted in machine-learning techniques, such as kernel-based regression and reinforcement learning.
Requisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

ECEN 5478 (3) Online Convex Optimization and Learning
Covers basics of convex optimization, online learning, time-varying optimization, online first-order methods, learning problems over networks, zeroth-order methods, bandit optimization, projection-free methods, distributed methods for online convex optimization. Application domains considered in the course include Machine Learning, Signal Processing, and Data-driven Control. Specific application examples include the Internet of Things, recommendation systems, power systems, sensor networks, and transportation systems. Previously offered as a special topics course.
Recommended: Prerequisite ECEN 5448.

ECEN 5478 (3) Online Convex Optimization and Learning
Covers basics of convex optimization, online learning, time-varying optimization, online first-order methods, learning problems over networks, zeroth-order methods, bandit optimization, projection-free methods, distributed methods for online convex optimization. Application domains considered in the course include Machine Learning, Signal Processing, and Data-driven Control. Specific application examples include the Internet of Things, recommendation systems, power systems, sensor networks, and transportation systems. Previously offered as a special topics course.
Recommended: Prerequisite ECEN 5448.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites ECEN 5417: Power systems analysis, ECEN 5407: Renewable Energy and the Future Power Grid, and graduate standing in the College of Engineering and Applied Science.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5488
Recommended: Prerequisites a solid foundation in Probability Theory and ECEN 4138/5138 and ECEN 5448.

ECEN 5498 (3) Stochastic Control Theory
Introduce a toolbox for dealing with stochastic control systems. Cover topics such as stochastic calculus, linear and nonlinear filtering, and dynamic programming. Discuss system theoretic issues and derive optimal control laws for a variety of stochastic control problems, including, e.g., the separation principle for Linear-quadratic-Gaussian problems. Final project focuses on engineering applications related to students' own research interests.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 5498
Recommended: Prerequisites a solid foundation in Probability Theory and ECEN 4138/5138, ECEN 5448 and 5612.

ECEN 5514 (3) Principles of Electromagnetics for High-Speed Digital Engineering
Teaches understanding and application of the theoretical principals of electromagnetics to printed circuit board design. Students learn to apply advanced concepts related to Maxwell's equations for Si and PI and High-Speed applications. Some topics covered include: skin effect, surface roughness, non-uniform dielectric constant, coupling, reflection, and losses; boundary conditions and boundary value problems; displacement and conduction currents.
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

ECEN 5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory
Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4517
Recommended: Requires prerequisite course of ECEN 5797 (minimum grade C-).

Additional Information: Departmental Category: Power Engineering
ECEN 5523 (3) Compiler Construction
Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4553 and CSCI 4555 and CSCI 5525
Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-CENEEN) or to Graduate Certificate Engineering (CRTGE) students.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5524 (3) Principles of Computational Electromagnetics for Signal and Power Integrity
Introduces students to practical computational electromagnetics (CEM) and numerical methods concepts necessary for solving SI/PI problems. Fundamentals behind finite difference, finite element, and method of moments are studied to solve problems like a microstrip line and others related to SI-PI applications. Students will study the concepts of accuracy, stability, convergence and boundary conditions as they apply to commercial EM tools.
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

ECEN 5527 (3) Power Electronics Design Laboratory
Create, build, and debug an original design of a power converter to meet given a specification, project schedule, and related requirements. Lectures provide supporting information. Compliance to the specification is shown through a formal test report and demonstration to an instructor.
Requisites: Requires prerequisite courses of ECEN 5517 and ECEN 5797 (all minimum grade B). Restricted to Electrical and Computer Engineering (ECEN) graduate students with Power Electronics (PPE) subplan only.
Grading Basis: Letter Grade

ECEN 5532 (3) Digital Signal Processing Laboratory
Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4532
Additional Information: Departmental Category: Digital Signal Processing Communications

ECEN 5533 (3) Fundamental Concepts of Programming Languages
Considers concepts common to a variety of programming languages--how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5535
Requisites: Requires prerequisite course CSCI 3155 (minimum grade D).
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5534 (3) Practical Signal Integrity Measurements
Taking accurate measurements are the anchor to reality in all HSDE analysis. This course introduces the three important high speed measurement instruments; the VNA, the TDR and the high-speed oscilloscope. Measurements above 200 MHz bandwidth require special considerations. Topics covered include S-parameter analysis of interconnects, de-embedding, probing methods, measurement-simulation correlation and building circuit topology models from S-parameters.
Requisites: Requires prerequisites ECEN 5224 and ECEN 5730 (all minimum grade C).
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

ECEN 5543 (3) Software Engineering of Standalone Programs
Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5548
Requisites: Restricted to graduate students only.
Recommended: Prerequisites CSCI 1300 and CSCI 2270 (minimum grade C).
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5544 (3) EM Signal Modeling for HSDE using Ansys HFSS and Q3D
Doing high speed digital engineering using HFSS from Ansys. This is a one semester hands-on capstone design course for the high-speed digital engineering professional master\_s program. Students will deepen their understanding of EM signal modeling for HSDE applications while learning how to correctly use HFSS to do a variety of high-speed designs for PCBs.
Requisites: Requires prerequisite course of ECEN 5524 (minimum grade C).
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

ECEN 5554 (3) Designing PCB Memory Systems using Keysight ADS
Doing high speed digital engineering using ADS from Keysight. This is a one semester hands-on capstone design course for the high-speed digital engineering professional master\_s program. Students will deepen their understanding of EM signal modeling for HSDE PCB memory applications while learning how to correctly use ADS to do a variety of high-speed memory designs for PCBs.
Requisites: Requires prerequisite course of ECEN 5524 (minimum grade C).
Recommended: Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.
ECEN 5555 (3) Principles of Energy Systems and Devices
Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4555
Requisites: Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.
Additional Information: Departmental Category: Nanostructures and Devices

ECEN 5565 (3) Advanced Network Systems
Provides an advanced study of network architecture, across the end hosts, the network elements, and the people and systems that manage the network. The course provides the foundation for modern network systems, beyond the basic understanding of the OSI layers, and into the system which makes networks work.
Requisites: Requires prerequisite of CSCI 4273 or CSCI 5273 or ECEN 5273 (minimum grade C). Restricted to graduate students in the College of Engineering.
Grading Basis: Letter Grade

ECEN 5573 (3) Advanced Operating Systems
Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5573
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5592 (3) Modern Signal Processing
Presents a mathematical tour of modern signal processing focusing on sparse signal representations and their applications. Extends classical Fourier transform and traditional digital signal processing techniques to enable various types of computational harmonic analysis. Covers time-frequency and wavelet analysis, filter banks, nonlinear approximation of functions, compression, signal restoration, compressive sensing, and convolutional neural networks.
Recommended: Prerequisites familiarity with Fourier transforms, z-transforms, filters, linear algebra, bases, norms, inner products, eigendecompositions, singular value decomposition (SVD) and MATLAB.

ECEN 5593 (3) Advanced Computer Architecture
Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems and architectural features required for multicore processor designs. Also studies current and historically important computer architectures, including hardware security concepts.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5593 and ECEN 4693
Requisites: Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.
Recommended: Prerequisite ECEN 3593, ECEN 5090.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5603 (3) Software Project Management
Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.
Requisites: Requires prerequisite courses ECEN 4583 and ECEN 5543 and CSCI 4318 (all minimum grade D-). Restricted to graduate students only.
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5606 (3) Optics Laboratory
Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms and experimentation of fiber optics and Fourier optics. Department enforced prerequisite: undergraduate optics course (e.g. PHYS 4510).
Equivalent - Duplicate Degree Credit Not Granted: PHYS 5606
Additional Information: Departmental Category: Optics

ECEN 5607 (3) Power Electronics for Electrified Transportation
Covers analysis, modeling, control, simulations, and design of electric-drive vehicles and the charging infrastructure. Vehicle system architectures and dynamics are used to determine the requirements and to validate the performance of electric-vehicle drivetrain subsystems. Analysis, modeling, and design of the subsystems are addressed, including battery systems, battery management electronics, dc-dc converters, dc-ac inverters, motor drives, and chargers.
Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-CEENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

ECEN 5612 (3) Random Processes for Engineers
Deals with random time-varying functions and is therefore useful in the broad range of applications where they occur. Topics include review of probability, convergence of random sequences, random vectors, minimum mean-square error estimation, basic concepts of random processes, Markov processes, Poisson processes, Gaussian processes, linear systems with random inputs, and Wiener filtering. Applications range from communications, communication networks, and signal processing to random vibration/stress analysis, mathematical finance, physics, etc.
Additional Information: Departmental Category: Digital Signal Processing Communications
ECEN 5613 (3) Embedded System Design
Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembled. A significant final project is designed, developed, documented, and presented. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.
**Requisites:** Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.
**Additional Information:** Departmental Category: Embedded Systems Engineering

ECEN 5616 (3) Optoelectric System Design
Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.
**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4616
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Optics

ECEN 5622 (3) Information Theory and Coding
Covers fundamental limits of data compression, reliable transmission of information and information storage. Topics include information measures, typicality, entropy rates of information sources, limits and algorithms for lossless data compression, mutual information, and limits of information transmission over noisy wired and wireless links. Optional topics include lossy data compression, limits of information transmission in multiple-access and broadcast networks, and limits and algorithms for information storage.
**Requisites:** Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.
**Additional Information:** Departmental Category: Digital Signal Processing Communications

ECEN 5623 (3) Real-Time Embedded Systems
Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.
**Requisites:** Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.
**Additional Information:** Departmental Category: Embedded Systems Engineering

ECEN 5626 (3) Active Optical Devices
Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance.
**Requisites:** Restricted to graduate students only.
**Recommended:** Prerequisite ECEN 5355.
**Additional Information:** Departmental Category: Optics

ECEN 5632 (3) Theory and Application of Digital Filtering
Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals.
**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.
**Additional Information:** Departmental Category: Digital Signal Processing Communications

ECEN 5634 (3) Microwave and RF Laboratory
This course is a hands-on introduction to RF and microwave topics, from fundamentals including vector network analyzer (VNA) calibration and operation, power measurements, and antenna characterization, to system-level topics such as RADAR systems and superheterodyne links. Students work in small groups on weekly experiments based on both coaxial and waveguide setups. An understanding of electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed.
**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4634
**Requisites:** Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.
**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

ECEN 5638 (3) Control Systems Laboratory
Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.
**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4638
**Requisites:** Requires prerequisite course of ECEN/MCEN 4138/5138 (minimum grade D-). Restricted to graduate students only.

ECEN 5645 (3) Introduction to Optical Electronics
Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices.
**Requisites:** Restricted to graduate students only.
**Additional Information:** Departmental Category: Nanostructures and Devices

ECEN 5652 (3) Detection and Extraction of Signals from Noise
Introduces detection, estimation, and related algorithms. Topics in detection include simple/composite hypothesis testing, repeated observations and asymptotic performance and sequential detection. Topics in estimation include Bayesian estimation including minimum mean-square estimation and non-random parameter estimation. Topics in algorithms vary. Examples include algorithms for state estimation and smoothing in Hidden Gauss-Markov models and the expectation-maximization algorithm. Applications include communications, radar/sonar/geophysical signal processing, image analysis, authentication, etc.
**Requisites:** Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.
**Additional Information:** Departmental Category: Digital Signal Processing Communications
ECEN 5672 (3) Digital Image Processing
Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion).

Requisites: Requires prerequisite course ECEN 5632 (minimum grade C).
Additional Information: Departmental Category: Digital Signal Processing

Communications

ECEN 5673 (3) Distributed Systems
Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5673
Recommended: Prerequisite CSCI 5573 or a course in computer networks.

Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5678 (3) Control of Multi-agent Systems
Covers basics of matrix theory and graph theory; distributed averaging and consensus methods on graphs; parallel computation of fixed points; basics of optimization; parallel and distributed optimization methods over graphs; convergence analysis. The techniques and methodologies presented in the course are introduced through application setups including Internet of Things, power and energy systems, sensor networks, transportation systems, and social networks. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.
Recommended: Prerequisites ECEN 5448 and courses in convex optimization.

ECEN 5682 (3) Theory and Practice of Error Control Codes
Introduces error control coding techniques for reliable transmission of digital data over noisy channels. Topics include algebraic characterizations of cyclic codes, convolutional codes, modern graph codes, decoding algorithms for block codes, Viterbi algorithm and iterative decoding on graphs. Applications include modern digital communication and storage systems including deep space communications, satellite broadcasting, cellular networks, and optical disk storage.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.
Additional Information: Departmental Category: Digital Signal Processing

Communications

ECEN 5692 (3) Principles of Digital Communication
Introduces fundamental principles of efficient and reliable transmission of information used in wired and wireless digital communication systems including cable modems, smart phones/tablets, cellular networks, local area (wi-fi) networks, and deep-space communications. Topics include bandwidth and power constraints, digital modulation methods, optimum transmitter and receiver design principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization.

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.
Additional Information: Departmental Category: Digital Signal Processing

Communications

ECEN 5696 (3) Fourier Optics
Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging.

Requisites: Restricted to graduate students only.
Recommended: Prerequisites ECEN 3300 and ECEN 3410.
Additional Information: Departmental Category: Optics

ECEN 5712 (3) Machine Learning for Engineers
Prepares students to apply/improve machine learning methods for engineering applications and to perform related research. Covers popular algorithms and theories for learning from data, e.g., supervised learning, unsupervised learning, online learning, neural networks, VC-dimension, PAC learning theory. Explores the connections with detection/estimation theory and information theory. The course project focuses on engineering applications related to students' majors.

Recommended: Prerequisites ECEN 5612, 5652 and 5622.

ECEN 5713 (3) Advanced Embedded Software Development
Building on fundamentals taught in ECEN 5813 PES, this course teaches more advanced programming principles for embedded systems that are implemented with the use of an embedded operating system. Topics include Linux kernel space and user programming, driver design, multi-threaded programming, and operating systems fundamentals, software design patterns, sound development methods and practices, and use of debugging and performance tools to create applications and enhance operating systems' services embedded system prototypes and products.

Requisites: Requires prerequisite course of ECEN 5813 (minimum grade D). Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec CmpElec Eng-Prof Degree (C-ECENEEEP) only.
Recommended: Prerequisites This course assumes students have direct coding and tool experience including C-programming Bare Metal Firmware Design, Compilation with GCC & Build Systems with GNU Make, Git, Linux command line operations, shell environment, compilation, Lab instruments, DVM, Logic Analyzer, Oscilloscope or demonstration of portable, maintainable, and testable software design.
ECEN 5720 (3) Practical Printed Circuit Board Design Accelerator
This course introduces students to the most important skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will learn the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with a custom board design project. A commercial EDA tool widely used in the electronics industry will be used for the project. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4730 or ECEN 5730 ECEN 4720
Recommended: Prerequisites ECEN 2250 and ECEN 2260 and ECEN 2270.

ECEN 5730 (3) Practical Printed Circuit Board Design and Manufacture
This course prepares students with all skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will master the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with three different board design projects with increasing challenge. A commercial EDA tool widely used in the electronics industry will be used for all projects. Previously offered as a special topics course. Degree credit not offered for this course and ECEN 4720 or ECEN 5720 or ECEN 3730.

Recommended: Prerequisites ECEN 2250 and ECEN 2260 and ECEN 2270.

ECEN 5737 (3) Adjustable-Speed AC Drives
Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine).

Requisites: Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

Recommended: Prerequisite ECEN 3170.

Additional Information: Departmental Category: Power

ECEN 5738 (3) Theory of Nonlinear Systems

Requisites: Requires prerequisite course of ECEN 5448 (minimum grade C). Restricted to graduate students only.

Recommended: Prerequisite knowledge in differential equations.

Additional Information: Departmental Category: Dynamical Systems and Control

ECEN 5752 (3) Communication Laboratory
Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase-frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4752
Requisites: Requires prerequisite course of ECEN 4242 (minimum grade C). Restricted to College of Engineering majors only.

ECEN 5753 (3) Computer Performance Modeling
Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 4753 and CSCI 4753 and CSCI 5753
Additional Information: Departmental Category: Computer and Digital Systems

ECEN 5763 (3) Embedded Machine Vision and Intelligent Automation
Introduces students to machine vision and machine learning methods used in automation, autopilots and security and inspection systems. Embedded and automation topics include implementation of algorithms with FPGA or GP-GPU embedded real time co-processing for autopilots (intelligent transportation), general automation and security including methods for detection, classification, recognition of targets for inspection, surveillance, search and rescue, and machine vision navigation applications.

Requisites: Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Embedded Systems Engineering

ECEN 5773 (3) Developing the Industrial Internet of Things
This course goes beyond consumer IoT hype to emphasize a much greater space for potential embedded system applications and growth: The Industrial Internet of Things (IIoT), also known as Industry 4.0. Cisco's CEO stated: "IoT overall is a $19 Trillion market. IIoT is a significant subset including digital oilfield, advanced manufacturing, power grid automation, and smart cities." The course examines emerging markets, technology trends, applications and skills required for exploring career opportunities in this space.

Requisites: Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

Recommended: Prerequisites ECEN 5613, ECEN 5823, ECEN 5053, and ECEN 5133.
ECEN 5783 (3) Embedded Interface Design
This course deeply explores interface design approaches and architectures for creating embedded system prototypes and products. For both machine and user interfaces, we will examine best practices for the interface design process, including considerations of characteristics of the information to be transferred between devices or between a device and a user. Projects leverage the now standard Raspberry Pi 3 single-board computer (SBC), providing a strong foundation for exploring many elements of interface design.

**Requisites:** Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

**Recommended:** Prerequisites knowledge of programming, particularly Python, ECEN 2120, ECEN 2350, ECEN 1030, CSCI 1300.

ECEN 5793 (3) Secure Computer Architecture
Explore cutting-edge secure architectures that look to protect the system from the hardware up. This course covers advanced topics in security with an emphasis on computer architecture on both the attack and defense sides. Discussion oriented classes will deepen understanding of weekly technical reading assignments, enhance the ability to analyze technical papers, and help carry out a semester long research project.

**Requisites:** Requires prerequisite or corequisite course of ECEN 5593 (minimum grade D-).

ECEN 5797 (3) Introduction to Power Electronics
An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4797

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Power

ECEN 5803 (3) Mastering Embedded Systems Architecture
Acquire an understanding of embedded systems architectures for the purpose of creating prototypes or products for a variety of applications. The salient issues in the decision making process will be examined, including trade-offs between hardware and software implementations, processor and operating system selection and IP creation or acquisition. Projects will involve the latest software development and tools and hardware platforms.

**Requisites:** Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

ECEN 5807 (3) Modeling and Control of Power Electronic Systems
Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, nullidouble injection techniques in linear circuits, input filter design, and low-harmonic rectifiers.

**Requisites:** Requires prerequisite course of ECEN 5797 (minimum grade C-).

**Additional Information:** Departmental Category: Power

ECEN 5813 (3) Principles of Embedded Software
Introduces principles around embedded software elements and software development needed for the Embedded Systems Engineering core curriculum. Student will write C program applications that employ efficient, high performance and robust software design techniques. Topics include bare-metal firmware, c-programming optimization and introductions to underlying embedded architecture. Sound testing and debug practices will be instilled and utilized in several application projects.

**Requisites:** Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

ECEN 5817 (3) Resonant and Soft-Switching Techniques in Power Electronics
Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, LCC, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hand-switched and soft-switched PWM converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits.

**Requisites:** Requires prerequisite course of ECEN 5797 (minimum grade C-).

**Additional Information:** Departmental Category: Power

ECEN 5821 (3) Neural Systems and Physiological Control
A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4821 and ASEN 4426 and ASEN 5426

**Additional Information:** Departmental Category: Bioengineering

ECEN 5823 (3) Internet of Things Embedded Firmware
Acquire firmware development skills to meet low energy and internet connectivity demands of embedded systems. Event-driven firmware techniques will be explored through programming assignments, transitioning to programming an Internet of Things RF Network Protocol such as Bluetooth Low Energy or Thread. The coursework will align with the latest industry firmware and embedded wireless protocol trends.

**Requisites:** Campus section restricted to CU Boulder graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

ECEN 5827 (3) Analog IC Design
Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4827

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Power
ECEN 5828 (3) Hybrid Dynamical Systems: Theory and Applications
Students will study the basic properties of differential and difference
equations and inclusions including: existence of solutions, uniqueness,
invariance principles; introduction to basic hybrid systems that combine
continuous-time and discrete-time dynamics: automata, switched
systems, etc.; Lyapunov theory for hybrid systems; and examples and
applications in the areas of optimization, feedback control, machine
learning, energy systems, social networks, multi-agent systems, and
asynchronous systems. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

ECEN 5830 (3) Special Topics
Examines a special topic in Electrical, Computer and Energy Engineering.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple
enrollment in term.
Additional Information: Departmental Category: General

ECEN 5833 (3) Low Power Embedded Design Techniques
The course explores through weekly quizzes, assignments, and a course
project, low energy hardware design concepts, selecting components to
meet reliability goals, radio implementation, power supply design, product
design, and system bring up. The programming of the microcontroller
or SoC will most likely be coding to the metal1 to control individual
microcontroller peripherals and utilizing them in the most energy efficient
ways.
Requisites: Restricted to students with an Embedded Systems
Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or
Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.
Recommended: Requires Students should have knowledge of assembly
and C programming, digital logic design, and embedded computer
architecture, and have had at least one course in each of these subjects,
such as ECEN 5813 or ECEN 5823, students should also have experience
using a microcontroller Integrated Development Environment (IDE) and its
associated tools including its debugger and register views.

ECEN 5837 (3) Mixed-Signal IC Design Lab
Software laboratory course extends the concepts developed in
ECEN 5827 to full design and layout of mixed analog and digital custom
integrated circuits. Assignments explore implementation of analog to
digital and digital to analog converters, and final project develops a full
custom IC for a target application.
Requisites: Requires prerequisite course of ECEN 5827 (minimum grade
C-).
Additional Information: Departmental Category: Power

ECEN 5840 (1-6) Independent Study
Offers an opportunity for students to do independent, creative work at
the master’s level. Numbered ECEN 5840-5849. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General

ECEN 5853 (3) Embedding Sensors and Motors
Introduces students to the design of sensors and motors, and methods
that integrate them into embedded systems used in consumer and
industrial products. Students will learn about sensor technologies and
motors through lectures, recorded and online videos, online reading, and
through laboratory experiments. Students will build systems that take
sensor inputs, and sort, filter and evaluate the resulting data. They will
also learn how to use sensor input to measure properties of motors.
Requisites: Restricted to students with an Embedded Systems
Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or
Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.
Recommended: Prerequisites ECEN 1400, ECEN 2250, ECEN 2260 and
ECEN 2440 or equivalent coursework.

ECEN 5857 (3) Digital Control for Power Electronics
Focuses on analysis, modeling and design of digitally controlled
power converters. Covers the dynamical discrete-time analysis of
power converters, digital compensator design and main nonlinear
phenomena due to quantization effects. Addresses the basics of
controller autotuning.
Requisites: Requires prerequisite course of ECEN 5797 (minimum grade
C-).

ECEN 5863 (3) Programmable Logic Embedded System Design
Learn to design programmable systems on a chip for the purpose of
creating prototypes or products for a variety of applications. Explore
complexities, capabilities and trends of Field Programmable Gate Arrays
(FPGA) and Complex Programmable Logic Devices (CPLD). Implement
synchronization and timing closure in these devices. Projects will involve
the latest software and FPGA development tools and hardware platforms.
Requisites: Campus section restricted to CU Boulder graduate students
in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Embedded Systems
Engineering

ECEN 5907 (3) Special Topics
Special topics class.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple
enrollment in term.

ECEN 5915 (3) Foundations of Quantum Engineering
Introduces engineers to quantum theory. In this course you will learn how
to describe many different physical systems (such as atoms, electrons,
light, mechanical oscillators, and tops) mathematically. It also explores
different notions of quantumness such as entanglement and non-
contextuality. The foundations obtained in this course are important
for further study of quantum hardware (sensors), communication, and
computing.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 3915

ECEN 5925 (3) Foundations of Quantum Hardware
Introduces students to the principles and operation of quantum
hardware. In this course you will learn how to describe many different
physical systems (trapped ions, superconducting circuits, and optical
systems) mathematically. This will allow you to model quantum sensors,
communication systems and computing hardware.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4295

ECEN 5930 (1-3) Industry Internship
This class provides a structure for ECEE graduate students to receive
academic credit for internships with industry partners that have
an academic component to them suitable for graduate-level work.
Participation in the program will consist of an internship agreement
between a student and an industry partner who will employ the student
in a role that supports the academic goals of the internship. Instructor
participation will include facilitation of mid-term and final assessments
of student performance as well as support for any academic-related issues
that may arise during the internship period. May be taken during any term
following initial enrollment and participation in ECEE graduate programs.
Repeatable: Repeatable for up to 3.00 total credit hours.
Grading Basis: Letter Grade
ECEN 5933 (3) Engineering Genetic Circuits
Presents recent research into methods and software tools for the modeling, analysis, and design of genetic circuits that are enabling the new field of synthetic biology. Teaches both biological and engineering principles in order to enable collaborations between engineers and biologists working in the field of synthetic biology.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 4933
Recommended: Prerequisite some familiarity with genetics, cell biology, molecular biology, or biochemistry or familiarity with engineering methods for modeling, analysis and design, but students are not expected to have knowledge in both.
ECEN 6016 (1-3) Special Topics
Additional Information: Departmental Category: Optics
ECEN 6106 (3) Numerical Methods in Photonics
Teaches students how to create and use their own computational techniques to explore optical physics, devices and systems. Learning is project-based, that is no traditional homework or exams are used. Instead, students write their own series of different numerical tools such as finite difference time domain and Fourier beam propagation. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite ECEN 5696 Fourier Optics or equivalent and some familiarity with a numerical programming language such as Matlab.
ECEN 6139 (3) Logic Synthesis of VLSI Systems
Studies synthesis and optimization of sequential circuits, including retiming transformations and don’t care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits.
Recommended: Prerequisites ECEN 5139 and CSCI 5454.
Additional Information: Departmental Category: VLSI CAD Methods
ECEN 6144 (3) Electromagnetic Boundary Problems
Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics.
Requisites: Requires prereq course of ECEN 5114 or 5134 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.
Additional Information: Departmental Category: Electromagnetics and Remote Sensing
ECEN 6800 (3) Master of Engineering Report
Additional Information: Departmental Category: General
ECEN 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: General
ECEN 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Additional Information: Departmental Category: General
ECEN 6960 (3) Master of Engineering Project
Additional Information: Departmental Category: General
ECEN 7840 (1-6) Independent Study
Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: General
ECEN 7849 (1-6) Independent Study
Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Additional Information: Departmental Category: VLSI CAD Methods
ECEN 8990 (1-10) Doctoral Dissertation
Repeatable: Repeatable for up to 10.00 total credit hours.
Additional Information: Departmental Category: General

Electrical Engineering - Master of Engineering (ME)
At CU Boulder, the Department of Electrical, Computer & Energy Engineering (http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-engineering/) has focused our ME degree on professional master’s programs that serve highly employable disciplines and provide skills based on industry needs.

Distance Education Option
Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements
A minimum of 30 credit hours of academic work acceptable to the student’s advisory committee and within the rules established by the College of Engineering and Applied Science and the Graduate School will be required for the ME degree (http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-engineering/).

- All 30 course credit hours in ECEN at the 5000-level or above or.
- Minimally, 15 in sufficiently technical ECEN 5000+ with remainder in related STEM (Science, Technology, Engineering, Math) including up to 15 EMEN course credit hours upon permission from faculty advisor.
- In the Embedded Systems Engineering (ESE) subplan with ME degree, you can maximally take just 9 credit hours (3 courses) in related STEM, while 21 credit hours must be courses in ESE. Other professional master's subplans might also vary.
- Optionally, maximally 6 credit hours may be at the 4000+ level.

However, all course work from ECEN, TLEN/CYBR, EMEN and ATLS must solely be at the 5000+ level.

Time Limit
All degree requirements must be completed within four years of the date of commencing coursework (if on campus) or six years (if working full-time and taking only one course, each semester). Most students complete the degree in 2 to 5 years (on-campus, full-time student vs. off-campus, full-time worker/part-time student, respectively).
Dual Degree Program
ME in Electrical, Computer & Energy Engineering and Engineering Management
The Department of Electrical, Computer & Energy Engineering also offers a dual ME degree with the Engineering Management Program. The dual degree requires 45 total credit hours, where 21 credits are from the Engineering Management Program (EMP) and 24 credits are from the Electrical, Computer & Energy Engineering Program.

For more information, visit the program’s Electrical, Computer and Energy Engineering & ME Engineering Management Dual Degrees (https://www.colorado.edu/emp/me-electrical-computer-and-energy-engineering-me-engineering-management/) webpage.

Electrical Engineering - Master of Science (MS)
The Department of Electrical, Computer & Energy Engineering (ECEE) offers degree options tailored to both working engineers looking to advance their careers and to those looking to pursue a career in academia. Research is concentrated in six broad areas:

- Photonics and quantum engineering
- Learning, information, network, communication and data sciences
- Computer engineering
- Systems and controls
- Electromagnetics, RF and microwaves
- Power electronics

For more information, visit the department’s Prospective Students (https://www.colorado.edu/ecee/academics/graduate-programs/master-science-electrical-engineering/degree-requirements/) webpage.

Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Coursera Option
The Master of Science in Electrical Engineering is also available as a completely online master’s degree (https://www.colorado.edu/ecee/msee/) through the Coursera platform.

Bachelor’s–Accelerated Master’s Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab (https://www.colorado.edu/ecee/undergraduate-program/degrees/bachelors-accelerated-masters-degree/) for the associated bachelor’s degree(s):

- Electrical and Computer Engineering - Bachelor of Science (BS) (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/electrical-computer-energy-engineering/electrical-engineering-bachelor-science-bs/#acceleratedmasterstext)
- Electrical Engineering - Bachelor of Science (BS) (https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/electrical-computer-energy-engineering/electrical-engineering-bachelor-science-bs/#acceleratedmasterstext)

Requirements

Plan I: Thesis Option
Students must complete 4–6 credit hours of MS thesis. The total number of combined hours of independent study and thesis research shall not exceed 9 hours. The Plan I project culminates with an oral presentation and written thesis.

Plan II: Non-Thesis Option
A maximum of 6 credit hours of independent study can be used toward the 30-credit-hour requirement. No thesis is required, and there is no cumulative examination.

Time Limit
All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in two years.

Plan II: Non-Thesis Option

"Sufficiently technical" usually means the course requires at least one technical pre-requisite course, and that its primary focus is engineering/mathematical problem-solving rather than having a policy-based focus.

Electrical Engineering - Master of Science (MS) Online
The online Master of Science in Electrical Engineering (MS-EE), hosted on the internationally acclaimed Coursera (https://www.coursera.org/degrees/msee-boulder/) platform, offers stackable graduate-level courses, graduate certificates, and a fully accredited master's degree in electrical engineering. The MS-EE on Coursera students earn the same credentials as our on-campus students. There are no designations on official CU transcripts, degrees or certificates that this is an online program.
Focus Areas

Embedded Systems
Embedded system engineering is used in industries such as aerospace and defense, energy, industrial automation, health care, networking and communication, security, transportation and more. Embedded systems also drive the Internet of Things (IoT), enabling countless human-to-machine and machine-to-machine applications including home automation, security and more.

The embedded systems engineering curriculum covers essential embedded technologies, synthesizes foundational principles, and directly applies them to current tools and trends. It is structured to provide you with a broad, versatile and highly competitive skill set. We emphasize practical, project-based learning across hardware and embedded software design that addresses numerous end markets, as well as multiple semiconductor technologies including sensors, controllers, programmable devices and development tools.

Power Electronics
Power electronics is a key enabling technology in essentially all electronic systems and is increasingly important in the grid interface of renewable energy sources and in efficient electrical loads. The necessity for power electronics technology in these rapidly expanding areas creates an increasing need for design engineers equipped with knowledge and skills to actively participate in multidisciplinary teams.

The power electronics curriculum addresses this demand for skilled power electronics design engineers, covering switching power supplies, DC-DC converters, inverters, power factor correction converters and LED lighting drivers. The power electronics curriculum emphasizes fundamentals and application in the power electronics field. This domain competency applies to end markets such as power management, portable power, computer systems, medical applications, spacecraft power systems, the automotive industry, renewable energy and the utilities.

Photonics & Optics
While 20th-century technology was defined by the growth of electronics, the 21st century belongs to photonics. LEDs will light households powered by photovoltaic panels and filled with displays and cameras communicating by optical fiber to distant owners wearing virtual reality glasses. Laser 3D printing will transform manufacturing. New microscopes and telescopes will peer into the depths of living cells and distant galaxies.

The photonics curriculum provides a firm theoretical foundation on the generation, modulation, radiative or guided transmission, sensing, and detection of optical signals. It also covers optical telecommunications, medical instrumentation, photovoltaic power generation, information processing, optical instruments and environmental sensing. While some of these industries are mature, photonics continues to grow into new industries such as LED lighting and on-chip silicon photonics for multi-core CPUs.

Program Policies
This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1791) section of the catalog for more information.

Up to 9 credits offered by the MS in Data Science (p. 1616) or ME in Engineering Management (p. 1587) on Coursera programs may be applied toward the MS in Electrical Engineering degree’s required 30 credits. Courses must be graduate level and meet all applicable academic standards and may not be double counted toward two credentials of the same level. Only courses offered through CU Boulder’s for-credit programs on Coursera may be used.

Admission Requirements
The MS-EE program utilizes performance-based admissions for enrollment. There is no traditional application for admission to the degree. Students do not need to take the GRE or submit letters of recommendation or proof of language proficiency. Neither a prior degree nor university transcripts are required for admission. Because this is a purely online program, students do not need to complete a background check to enroll.

A student desiring admission to the MS-EE program must complete four required protocols:

1. Take one pathway specialization for credit with at least a grade of C in each course.
2. Achieve a computed pathway specialization grade-point average (GPA) of at least 3.00.
3. Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.
4. Declare their intention to seek the degree, which they can do before, during, or after any work in a pathway specialization.

Upon completion of these four steps the student is admitted to the MS-EE program. Students may successfully complete a designated pathway specialization and declare intent at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree. Non-degree seeking students may enroll in for-credit courses.

All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

Program Requirements
The diagram displayed on the Electrical Engineering (https://www.colorado.edu/eece/msee/) website shows how the program’s courses and certificates can be stacked into the full 30 credit hour degree.

Up to 9 credits offered by the MS-DS or ME-EM on Coursera programs may be applied toward the Electrical Engineering MS degree required 30 credits. Courses must be graduate level and meet all applicable academic standards and may not be double counted toward two credentials of the same level. Only courses offered through Coursera may be used.

Embedded Systems Track
Industrial Internet of Things - Graduate Certificate
To earn a graduate certificate (9 credits), students must complete the required specializations.

Required specializations:
- Embedded Sensors and Motors Specialization
- Embedded Interface Design Specialization
- Developing Industrial Internet of Things Specialization
### Advanced Embedded Linux Development Specialization

Photons and Optics Track

Semiconductor Photonics - Graduate Certificate
Admission to a graduate degree-seeking program in the ECEE department is not required for students pursuing the certificate. Certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student.

The semiconductor photonics certificate is comprised of 3 specializations, each of which is comprised of 3–4 individual online courses (MOOCs), which deliver about one month of content:

To complete a certificate, you must complete the following required specializations/courses.

Semiconductor Photonics Graduate Certificate (9 credits)
Required specializations:
- Optical Engineering Specialization
- Semiconductor Specialization
- Active Optical Devices Specialization

Optical Engineering Specialization

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>

</table>

For further details regarding Photonics content under our online MS-EE degree through Coursera, see Photonics and Optics (https://www.colorado.edu/ecee/academics/online-programs/ms-ee-coursera/curriculum/photons-and-optics/).

Electrical Engineering - Professional Master of Science (MSEE)
The professional Master of Science degree in electrical engineering is a professional degree composed of advanced courses relevant to working engineers.

The department offers many professional degree tracks, each of which result in a professional Master of Science degree in electrical engineering (MSEE).

Program Tracks
Embedded Systems Engineering (ESE) Track
The Embedded Systems Engineering (http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/) (ESE) track provides comprehensive coverage of essential embedded technologies, current tools and trends. It is structured to provide students with a broad, versatile skill set and is coupled with industry input for continuous curriculum updates.

Through flexible core course options and electives, students enrolled in the ESE program pursue a 30-credit-hour MSEE degree. Many courses offer distance learning options through CU Boulder Distance Education.

Power Electronics (PPE) Track
Power Electronics (http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/) is a key enabling technology in essentially all electronic systems and is increasingly important in the grid interface of renewable energy sources and in efficient electrical loads. The necessity for power electronics technology in these rapidly expanding areas creates an increasing need for design engineers equipped with knowledge and skills to actively participate in multidisciplinary teams.
Through flexible core course options and electives, students enrolled in this program pursue a 30-credit-hour MSEE degree. The program is intended for students and engineers with a BS degree in electrical engineering or the equivalent. Entering students must have adequate knowledge of circuits and electronics, as taught in undergraduate courses intended for EE majors.

**Photonics (PHO) Track**
While 20th-century technology was defined by the growth of electronics, the 21st century belongs to photonics (https://www.colorado.edu/ecee/graduate-program/degrees/photonics/). LEDs will light households powered by photovoltaic panels and filled with displays and cameras communicating by optical fiber to distant owners wearing virtual reality glasses. Laser 3D printing will transform manufacturing. New microscopes and telescopes will peer into the depths of living cells and distant galaxies. Photonics graduates will command skills in design, fabrication and laboratory practice to place them at the forefront of these industries and many more not yet invented.

Photonics is the electrical engineering sub-discipline concerned with the generation, modulation, radiative or guided transmission, sensing and detection of optical-frequency signals. Application areas include optical telecommunications, medical instrumentation, photovoltaic power generation, quantum information processing, optical instruments and environmental sensing. While some of these industries are mature, photonics continues to rapidly grow into new industries such as LED lighting and on-chip silicon photonics for multi-core CPUs.

Through flexible core course options and electives, students enrolled in this program pursue a 30-credit-hour MSEE degree. The program is intended for students and engineers with a BS degree in electrical engineering or the equivalent. Entering students must have adequate knowledge of photonics, as taught in undergraduate courses intended for EE majors.

**Next-Generation Power and Energy Systems (PPS) Track**
The Next-Generation Power and Energy Systems (https://www.colorado.edu/ecee/graduate-program/degrees/next-generation-power-and-energy-systems/) (PPS) track offers five core courses and numerous electives for the 30-credit-hour program to prepare students with the specialized knowledge required to practice grid integration of renewable energy into integrated energy systems, taught by instructors from CU Boulder's faculty and National Renewable Energy Laboratory (NREL) research programs.

Through flexible core course options and electives, students enrolled in the PPS program pursue a 30-credit-hour MSEE degree. Many courses also offer distance learning options.

**High-Speed Digital Engineering (HSDE) Track**
The High-Speed Digital Engineering (https://www.colorado.edu/ecee/academics/graduate-programs/professional-masters/high-speed-digital-engineering/) (HSDE) track is an innovative practical degree plan that prepares students for a career in industry with the specialized knowledge required to be a successful high-speed design engineering team member and to be able to solve complex signal integrity, power integrity and electromagnetic compatibility design problems quickly and efficiently. Simulation and measurement tools used in industry are leveraged to develop and enhance high-speed digital engineering design intuition at the same time fundamental principles are studied through best practices from industry in design, measurement, simulation and analysis. The program facilitates lifelong learning capabilities and is continuously updated with industry input.

Through five core courses and five elective options, students enrolled in this program pursue a ten course, 30-credit-hour degree. Most courses emphasize practical, hands-on experience, understanding and solving real world problems faced by the electronics industry today. Students with a background in electrical engineering fundamentals will be well-prepared for this program. It is intended for students and engineers with a bachelor's degree in electrical engineering or equivalent, including a background in basic electromagnetics. Students with other relevant engineering or scientific backgrounds may still be admitted to the program with a personalized study program to address foundational knowledge gaps.

**Distance Education Option**
Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

**Requirements**

**Admission**
A minimum undergraduate GPA of 3.00 is required for application to the master's program. Students who are interested in the PhD degree and have strong academics (including 3.50 or higher GPA) should apply directly to the PhD program (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/electrical-engineering/electrical-engineering-doctor-philosophy-phd/).

**Course Requirements**
The following course requirements are subject to change; for the most current information, visit the department's Embedded Systems Engineering (http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/), Power Electronics (http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/), Photonics (https://www.colorado.edu/ecee/graduate-program/degrees/photonics/) or Next-Generation Power and Energy Systems (https://www.colorado.edu/ecee/graduate-program/degrees/programs/next-generation-power-and-energy-systems/) webpages.

Students must complete a total of 30 credit hours (including both course and thesis hours) with a grade of C or better and a cumulative GPA of at least 3.00. At least 24 credit hours must be completed at the 5000-level or above, and at least 18 of those credits must be in sufficiently technical ECEN 5000+ level courses.

**Time Limit**
All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one-and-a-half to two years.

**Program Tracks**

**Artificial Intelligence and Communication Engineering (AICE) Track**
Students need 10 courses, 30 credit hours to graduate. A grade of B- or better is required for each course applied towards the AICE program.

    - Convex Optimization and Its Applications

### Open 5000-level Electives
- Credit: 6

Choose two 5000-level electives, at least one of which is technical, from the ACE electives, other ECEE courses or courses in other departments with the approval of an academic advisor. Recommended electives include courses in computer science and applied math, such as APPM 5570 Statistical Methods.

### Total Credit Hours
- 30

For more information, visit the department’s Artificial Intelligence and Information/Communication Engineering (https://www.colorado.edu/ecee/academics/graduate-programs/professional-masters/artificial-intelligence-communication-engineering/) webpage.

## Embedded Systems Engineering (ESE) Track (non-thesis)

### Code | Title | Credit Hours
---|---|---
ESE Core Courses

**Choose five of the following:**

- ECS 5613
  - Embedded System Design
- ECS 5623
  - Real-Time Embedded Systems
- ECS 5803
  - Mastering Embedded Systems Architecture
- ECS 5813
  - Principles of Embedded Software
- ECS 5823
  - Internet of Things Embedded Firmware
- ECS 5833
  - Low Power Embedded Design Techniques
- ECS 5853
  - Embedding Sensors and Motors
- ECS 5863
  - Programmable Logic Embedded System Design

### HSDE Core Courses

All five required:

- ECS 5224
  - High Speed Digital Design (spring)
- ECS 5514
  - Principles of Electromagnetics for High-Speed Digital Engineering (spring)
- ECS 5524
  - Principles of Computational Electromagnetics for Signal and Power Integrity (spring)
- ECS 5534
  - Practical Signal Integrity Measurements (fall)
- ECS 5730
  - Practical Printed Circuit Board Design and Manufacture (fall, spring)

### HSDE Program Electives

Choose two:

- ECS 5013
  - Special Topics (Advanced PCB Design for high-speed serial links (fall))
- ECS 5414
  - Essential Principles of Signal Integrity (spring)
- ECS 5424
  - High Speed Channel Design for Signal Integrity (spring 2024)
- ECS 5434
  - S-Parameters for Signal Integrity in High Speed Digital Engineering (fall)
ECEN 5444  Electromagnetic Compatibility (EMC) for High-Speed Digital Engineering (fall)
ECEN 5444  EM Signal Modeling for HSDE using Ansys HFSS and Q3D (spring)
ECEN 5554  Designing PCB Memory Systems using Keysight ADS (fall)

Choose three more from the above HSDE electives list, or from other STEM electives 9

Total Credit Hours 30

• For more information, visit the department’s High-Speed Digital Engineering (https://www.colorado.edu/ecee/academics/graduate-programs/professional-masters/high-speed-digital-engineering/) webpage.

Next-Generation Power and Energy Systems (PPS) Track

Core Courses

<table>

Course Requirements

Requirements

**Philosophy/degree-requirements/**

For more information, visit the department's [website](https://www.colorado.edu/ecee/academics/graduate-programs/doctor-philosophy/degree-requirements/).

**Electrical Engineering - Doctor of Philosophy (PhD)**

The Doctor of Philosophy (PhD) is the terminal degree for those seeking a technical or research career in electrical engineering.

Students typically complete their PhD within 4 to 6 years, depending on whether they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program directly without a master's degree.

The primary focus of a PhD student is to perform novel research and support their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. Most of our PhD students are supported through research and teaching assistantships, and are also encouraged to apply for their own source of funding. Others are self-funded.

For more information, visit the department's [website](https://www.colorado.edu/ecee/academics/graduate-programs/doctor-philosophy/degree-requirements/).

**Requirements**

**Course Requirements**

- A minimum of 30 credit hours of engineering, math and science courses numbered 5000 or above (at least 18 of these must be in technical ECEN; none can be TLEN/CYBR, EMEN or ATLS) with a minimum of 3.00 GPA (with no lower than a B- in any single course).
- 30 credit hours of dissertation credit are required for the degree.
- A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a PhD degree if approved by the graduate committee of the department and the Graduate School.
- All courses taken for the master's degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the university, however, the technical requirements in the first bullet point still apply.

**Preliminary Examination**

PhD students must take a preliminary examination, generally completed within their first two years. They are given two chances to pass. If a student takes an exam in one research area on their first attempt and a different area on their second attempt, those comprise their two maximum attempts.

Preliminary exams are given by faculty in respective research groups. Depending on the research area, the exam could consist of oral and written parts, or a literature search and an oral report, or some other form of exam. If a student passes one part on the first attempt, then they need only take and pass the remaining part during their subsequent attempt. The outcome of an exam can also be a conditional pass, in which the student is required to carry out additional activities such as problem solving or taking a course to build foundational knowledge.

Those who do not pass after two attempts can earn a master's degree pending fulfilling the other academic requirements for that program; their tenure in the PhD will be at a close.

**Comprehensive Examination**

Students must pass an oral comprehensive examination before the student’s doctoral committee of five or more graduate faculty members, three of which must be rostered in the ECEE department, chosen by the student and approved by the department and the Graduate School. The oral examination before the committee is based primarily on a written proposal for the thesis research provided by the student to committee members in advance.

**PhD Dissertation**

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

**Time Limit**

All degree requirements must be completed within six years of the date of commencing coursework. Extensions beyond this timeline may be granted via petition to the Graduate College and approval by the ECEE Chair of Graduate Studies.

**Photonics - Graduate Certificate**

While 20th-century technology was defined by the growth of electronics, the field of photonics is coming of age in the 21st century. LEDs are lighting households powered by photovoltaic panels and connected to the internet via optical fiber. Holographic displays and virtual reality glasses are providing new forms of visualization. New microscopes are peering into living cells with resolutions that break previous limits. Photons are being used to interrogate atoms for quantum computations. Photonics graduates will command skills in theory, design, fabrication and laboratory practice to place them at the forefront of these industries and many more not yet invented.

Photonics is the electrical engineering sub-discipline concerned with the generation, modulation, radiative or guided transmission, sensing and detection of optical-frequency signals. Application areas include optical telecommunications and instrumentation, optical computing and data transmission, medical imaging, renewable energy, and environmental sensing. While some of these industries are mature, photonics continues...
to rapidly grow into emerging technologies such as quantum computing and cryptography, optogenetics, and virtual reality.

Photonics courses at CU Boulder engage high-caliber students from around the world. The courses typically run at a fast pace, often involving a mixture of fundamental theory, design in relevant industry standard CAD tools and individual projects.

For more information visit the department website (https://www.colorado.edu/ecee/graduate-program/degrees/photonics/).

Requirements
Admission to a graduate degree-seeking program in the ECEE department is not required for students pursuing the certificate.

Graduate students pursuing a photonics certificate are not required to matriculate into the program subplan through a master’s degree, although degree-seeking students enrolled in the program will be given course registration priority.

Photonics certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student. However, credit hours may not count toward both a BS and a master's degree.

Required Courses
Nine credit hours of graduate-level coursework, made up of any three of the six core photonics courses, will be required to complete the certificate program. Students must earn at least a B in each course and a minimum GPA of 3.0 is required to remain in good academic standing.

Total Credit Hours: 18

Engineering & Applied Science
Biomedical Engineering - Graduate Certificate

The graduate certificate in biomedical engineering trains next-generation professional engineers to interface engineering and medicine with design and problem solving to improve human health.

- Apply knowledge and skills to a broad range of biomedical fields, from the establishment of disruptive imaging technologies or fabrication of new biomimetic tissue replacements to conception of innovative medical devices.
- Engage with clinical, veterinary, and entrepreneurial partners at cutting edge institutions along the Front Range such as Anschutz Medical Campus, Colorado State University for veterinary medicine and local companies, such as Allosource, Medtronic and Terumo, among others.
- Gain unique experience in translational and applied medicine.

Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements
Admission Requirements
Applicants must provide the following items for admission to the certificate program:

- Statement of purpose (1-2 pages) explaining how the graduate certificate in biomedical engineering will benefit their professional and/or personal interests.
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree in engineering or a related field.
- One letter of support from a professional supervisor or a faculty member.

For more information, please contact the graduate advisor (find contact information on this program's Overview (p. 1582) tab)

Required Courses and Credits
Nine credit hours of graduate level coursework will be required to complete the certificate program with a B grade or above in each course. A minimum GPA of 3.0 is required to remain in good academic standing.

Engineering Management

The Lockheed Martin Engineering Management Program (EMP) is a management and leadership program that prepares students in the engineering and technical fields for early to mid-career positions. It is designed for students who are looking to advance in management, successfully contribute to the overall business or venture, and develop leadership skills.

The program offers a Master of Engineering, four engineering dual degrees and graduate certificates. Courses are offered both on campus and online (available in real-time distance class participation, as well as recorded videos for later viewing) to meet the needs of busy professionals. Courses are taught by faculty whose expertise in the
engineering and technical industry and business leadership bring real-world experiences to the classroom.

For more information, visit the Lockheed Martin Engineering Management Program (EMP) (http://www.colorado.edu/emp/) website.

Course code for this program is EMEN.

Master's Degree
- Engineering Management - Master of Engineering (ME) (p. 1586)

Certificates
- Engineering Management in the Aerospace Industry (p. 1589)
- Innovation and Entrepreneurship in Engineering (p. 1589)
- Leadership and Management (p. 1590)
- Project Management (p. 1590)

Partnership Certificate
- Water Engineering and Management (p. 1629)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Angel, George
Lecturer; BS, University of Albuquerque

Bozic, Christy L. (https://experts.colorado.edu/display/fisid_155482/)
Scholar in Residence, Endowed/Named Professor, Faculty Director; PhD, Purdue University

Stephen, M. Dunn
Scholar in Residence, Director; M.B.A., Rice University

Duren, Ron G. Jr. (https://experts.colorado.edu/display/fisid_157263/)
Teaching Assistant Professor; M.S., University of Colorado Boulder

Egan, Kristen
Lecturer; M.E., University of Colorado Boulder

Kirschling, Wayne (https://experts.colorado.edu/display/fisid_123149/)
Professor Emeritus; DBA, University of Colorado Boulder

Leeker, Jessica Rush (https://experts.colorado.edu/display/fisid_167166/)
Endowed/Named Professor, Faculty Director, Scholar in Residence; MS, Purdue University

Martin, Wendy Lynn (https://experts.colorado.edu/display/fisid_154942/)
Teaching Assistant Professor; ME, University of Colorado Boulder

McCluskey, Alyssa (https://experts.colorado.edu/display/fisid_142958/)
Lecturer; Ph.D., University of Colorado Boulder

Moore, Daniel F. Jr. (https://experts.colorado.edu/display/fisid_151590/)
Scholar in Residence; PhD, University of Colorado Boulder

Murray, Seth (https://experts.colorado.edu/display/fisid_148038/)
Teaching Assistant Professor; ME, University of Colorado Boulder

Readey, Michael J. (https://experts.colorado.edu/display/fisid_157363/)
Scholar in Residence, Endowed/Named Professor, Associate Faculty Director; PhD, Case Western Reserve University

Svoboda, John D. (https://experts.colorado.edu/display/fisid_154884/)
Teaching Assistant Professor; Ph.D., University of California-Los Angeles

Thomas, John (https://experts.colorado.edu/display/fisid_167167/)
Scholar in Residence; PhD, Arizona State University

Tobey, Kathryn
Scholar in Residence; ME, University of Colorado Boulder

Van Atten, Bill
Lecturer; MS, Johns Hopkins University

Courses

EMEN 5000 (3) Engineering Principles
Provides an appreciation, understanding, and perspective of the tasks and challenges faced in engineering disciplines. This introductory course offers non-engineers insight into how engineers think and approach problems. Explores different engineering disciplines by evaluating the tools used, main concepts, and how the discipline impacts daily life. Through a series of case studies, students will review successful and unsuccessful engineering projects.

Requisites: Restricted to graduate students in Engineering Management Program (EMEN) only.

EMEN 5005 (3) Introduction to Applied Statistical Methods
Covers statistical reasoning and analysis in support of business and engineering decision making. Topics include: engineering and applied research, descriptive and inferential statistics to include estimation and hypothesis testing using both traditional parametric as well as nonparametric procedures for research situations involving one or two groups of treatment conditions. The R statistical analysis and programming system is used.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5010 (3) Introduction to Engineering Management
Learn concept, methods, activities and philosophies of business and be encouraged to utilize them in your professional activities. Interact with engineering management faculty who share what works based upon their engineering management experiences. Engage with our classmates on their business experience, thereby preparing you to interact more thoughtfully and knowledgeably with your professional colleagues.

Requisites: Restricted to Engineering Management (EMEN) graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5015 (3) Engineering Communication
Enables students to communicate their thoughts and ideas in written and oral form in professional environments. Understand and demonstrate the ability to write a correctly-formed document. Develop active listening skills, particularly when providing and receiving feedback. Learn to orally communicate ideas by speaking clearly, persuasively, energetically, and with appropriate non-verbal elements. Present in various environments and to various audiences.

Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.
EMEN 5020 (3) Finance for Engineering Managers
Confidently engage in topics of financial performance, financial statements, time value of money and your own personal finances. The course focuses on areas relevant to engineering and technical managers, including product and process cost analyses, cost-volume-profitability calculations, discounted cash flow techniques for project selection, creating project and departmental budgets, valuation of intellectual property and entrepreneurial finance.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5030 (3) Fundamentals of Project Management
Provides an in-depth introduction to the project management discipline, including the concepts, tools and techniques used in the management and leadership of projects small and large alike. Key topics covered include the role of the project manager; project team selection and management; cost, schedule and risk management; quality in projects; introduction to creating and maintaining project plans through the project lifecycle.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5031 (3) Software Project Management
Introduces software project management as a critical element of software development activities throughout every area of human endeavor. Learn the software life cycle, software configuration management, code reviews, architectural influences and quality assurance with automated testing. Explore the impact on project success of the Capability Maturity Model (CMM) and United Modeling Language (UML).
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

**Recommended:** Prerequisite software development experience.

EMEN 5032 (3) Project Management Application and Execution
Emphasizes judgment-intensive decision-making and team leadership. Analyze and debate complex case studies drawn from multiple industries to illuminate best and worst practices that impact businesses, careers and lives. Advanced PM tools are reviewed and assessed for real-world utility. Students present a mini case drawn from a prominent event or their own experience.
**Requisites:** Requires prerequisite courses of EMEN 5030 or MBAX 6440 (all minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5042 (3) Data Science for Quality Improvement
Develop in-depth expertise in the concepts, tools and techniques used in the management and measurement of quality and productivity. Apply statistics and probability to the topics of process variation and statistical process control and capability analysis for process, product, and measurement systems. Explore an introduction to design of experiments (DOE) in business and industry to improve both quality and performance.
**Requisites:** Requires prerequisite course of EMEN 5005 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5043 (3) Systems for Quality Improvement
Advanced study of methods, tools, techniques and systems associated with advanced quality applications. Includes a survey of advanced process control technologies, control schemes and measurement system analysis.
**Requisites:** Requires prerequisite course of EMEN 5042 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5050 (3) Leading Oneself
Provides working professionals the framework to build leadership skills by first starting with oneself because the foundation for great leadership starts with personal excellence. Topics include accountability, authentic leadership, personal branding, self-awareness, growth mindset, emotional intelligence, personal mastery, feedback and communication skills.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5052 (3) Leading Others
Understand and apply leadership techniques that develop and sustain a high-powered technical organization. Specifically, students evaluate qualities associated with successful leaders, learn practical leadership skills such as defining roles and responsibilities, setting vision, coaching, and dealing with conflicts. The course then addresses team building, from hiring the right team members, to managing the team, and conducting effective team meetings.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5053 (3) Leading Technical Organizations
Examining relevant technical organization leadership skills using the context of stakeholder value creation is the basis of this course. The class explores how leaders multiply their abilities by leading through others, developing an accountable team, building enduring employees, managing customer and supplier relationships, exhibiting leadership presence, dealing with challenging situations and creating and executing strategies.
**Repeatable:** Repeatable for up to 3.00 total credit hours.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5054 (3) Neuroscience of Leadership
Examines leadership techniques through the lens of social cognitive neuroscience and psychology. Utilizing the latest research, we develop a leadership practice based on neuroscience. Consideration for leading oneself, leading others and leading organizations is covered. Topics include neuroplasticity, psychological safety, resilience, mental toughness, primal power of storytelling, improv and creativity, as well as the subtle power of influence.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5055 (3) Leading for Diversity, Equity and Inclusion in Engineering
This course focuses on the importance of embedding diversity equity inclusion (DEI) in engineering workplace environments. Students focus on the historical narrative of institutions and institutional structures that have shaped instances of inclusion and exclusion in engineering, how their own identity and background shape their thoughts and actions, and how transformational leadership is enacted for DEI in a challenging atmosphere.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5056 (3) Global Topics in Aerospace
Examining current international space topics including civil, military, and commercial activities forms the basis for this course. The origins and evolution of space policy and laws, current organizational and governance structures, space economics, space sustainability, international human exploration strategies, the future of space exploration, deregulation and space traffic management and recent developments in the commercial space sector will be analyzed.
**Repeatable:** Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.
EMEN 5080 (3) Ethical Decision-Making in Engineering Management
Learn how to recognize ethical issues and dilemmas affecting managers in the workplace. Understand various models and practices offering solutions to these issues and how to create a culture of ethics and integrity in supporting and/or building a profitable, healthy and responsible organization.
Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5090 (3) Marketing and Technology Ventures
Why do great products often lose in tech markets? This course analyzes processes for developing the customer bases essential for commercial success. Student teams develop strategic launch programs for actual tech startups of their choosing. Students will analyze and discuss real-world case studies and alternative strategies. Structured towards professional applicability for engineers in large enterprises as well as startups.
Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5094 (3) Technology Entrepreneurship
Explores the process of new venture creation as it relates to both launching a technology-based startup (entrepreneurship), and the introduction of new products and services within an existing firm (intrapreneurship). The course features a semester project that incorporates all elements of the new venture process, enabling engineers to transform their own innovative ideas into viable and sustainable business opportunities.
Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5215 (3) Applied Sustainability for Engineering Managers
Provides students the tools to integrate sustainability into technology-intensive businesses. The course explores the sustainability imperative for today’s businesses, and how sustainability is requiring engineers to have a deeper knowledge of how successful market solutions also impact society and the environment. The course addresses the engineer’s role in developing sustainable products and packaging, the triple bottom line and circular economy.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5220 (3) Product Design for the Circular Economy
Product Design for the Circular Economy provides the tools and knowledge necessary to implement Circular Economy (CE) principles, including design frameworks defined by Design for R2, Cradle-to-Cradle, Biomimicry, ISO 14000 and several EU Directives. Products can be certified if they meet certain criteria, and the course covers the major certifications available today. Finally, the course shows how companies report their progress using methods prescribed by the Global Reporting Initiative (GRI).

EMEN 5225 (3) Sustainable and Resilient Operations and Supply Chains
Innovative organizations need leaders and managers who understand the complex nature of corporate social responsibility, sustainability, and resilience. In this course, students will learn strategies to become good corporate citizens while still creating value for stakeholders. Students will learn concepts and practices companies employ to manage business processes that meet business needs while reducing negative impacts on the pollution and waste. You will also learn to build a more sustainable and socially responsible supply chains.

EMEN 5315 (3) Business Law for Engineering Managers
Provides engineering students an introduction to important areas of business law likely to be encountered as technology and engineering managers. Topics include fundamental legal concepts, intellectual property and strategy, contracts, data privacy and product liability. The course uses experiential and practical approaches and exercises to enable the student to identify and address critical legal issues in real-world business contexts.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering graduate students only.

EMEN 5316 (3) Engineering and the Legal Process
Provides engineering students the experience of working through a product litigation case, beginning with understanding why products fail, to the various stages of the litigation process culminating in a mock trial where engineers are on the stand as expert witnesses. This course meets concurrently with LAWS 7343, engaging both engineering and law students in the same learning environment.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Engineering graduate students only.

EMEN 5400 (3) Product Development and Design
Introduces contemporary methods of identifying and creating new products and services that both consumer and industrial customers really want. The course takes students on a project-based journey of ideation, concept development, prototyping, customer validation, costs and the new product launch process. Students ultimately showcase their products in a tradeshow-like setting. Environmental impact analyses and cradle-to-cradle design methods are also addressed.
Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5405 (3) Fundamentals of Systems Engineering
Examines the disciplined processes of designing and managing complex systems over their life cycle. Requirements engineering, reliability, logistics, team leadership, testing and evaluation, maintainability and other disciplines are examined with focus on the system engineering of small spacecraft.
Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5500 (3) Lean and Agile Management
Learn lean and agile concepts and tools to improve customer value, improve processes and reduce waste. Examine and apply lean and agile principles in diverse circumstances including hardware/software, product development/ongoing operations and manufacturing products/providing services. Apply your learning to improving performance in current responsibilities, whether as an individual contributor or as a manager.
Equivalent - Duplicate Degree Credit Not Granted: OPIM 6080
Requisites: Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

EMEN 5710 (3) Enterprise Strategic Management
Student Teams launch a virtual company in a simulated tech-driven manufacturing industry. Plot your strategic direction and make tactical choices in product development, marketing, manufacturing, operations and finance. Present a business pitch and executive summary to secure venture capital or angel funding. The course focuses on the interplay among organizational functions. Targeted towards future general management and entrepreneurial roles.
Requisites: Requires prerequisite course of EMEN 5610 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.
Graduates of the program are prepared to lead people and organizations in decision-making, lean and agile management and entrepreneurship. Elective courses provide in-depth skills in areas such as quality management, product management, R&D, ethical communication and leadership. Gain valuable business acumen using a hands-on and learning environment.

**EMEN 5825 (3) Intrapreneurship & Innovation**
Learn a comprehensive set of business concepts, skills and tools to launch and manage intrapreneurial ventures. Engage with faculty, classmates, guest speakers, industry professionals, potential customers and one's leadership team to help you launch your venture. Develop the necessary skills, tools and awareness to be successful colleagues, managers and leaders in scientific and engineering industries. Gain valuable business acumen using a hands-on and learning environment.

**EMEN 5830 (1-3) Special Topics**
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

**EMEN 5840 (1-3) Independent Study Project**
Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Non-EMP students require instructor permission.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students in Engineering Management Program (EMEN) only.

**EMEN 6805 (1) Capstone Preparation**
Students determine capstone research question, conduct literature review, develop research methodology and project plan, write a proposal, and select capstone committee.
**Requisites:** Requires prerequisite course of EMEN 5825 or EMEN 5900 (minimum grade C+). Restricted to graduate students in Engineering Management Program (EMEN) only.

**EMEN 6810 (3) Capstone**
Students conduct agreed-upon research, critical review, business proposal, or project and present their work to the capstone committee for evaluation.
Repeatable: Repeatable for up to 6.00 total credit hours.
**Requisites:** Restricted to graduate students in Engineering Management Program (EMEN) only.

**EMEN 6940 (1) Master's Candidate for Degree**
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
**Requisites:** Restricted to graduate students in Engineering Management Program (EMEN) only.

### Engineering Management - Master of Engineering (ME)

The Master of Engineering in engineering management is an excellent alternative to an MBA for engineers, scientists and technical professionals who want to move into management. The program facilitates technically minded people to learn and practice data-driven management, develop leadership capabilities and apply proven principles for business performance improvement.

The core curriculum addresses the business basics of engineering management, project management, finance and accounting, business communication and leadership. Elective courses provide in-depth skills in areas such as quality management, product management, R&D, ethical decision-making, lean and agile management and entrepreneurship. Graduates of the program are prepared to lead people and organizations and respond to the challenges that go along with managing engineering and technology businesses.

For more information, visit the program's Master of Engineering in Engineering Management [webpage](http://www.colorado.edu/emp/programs/graduate-degree/master-engineering-management/).

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

### Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Aerospace Engineering Sciences - Bachelor of Science (BSE) (p. 716)
- Electrical and Computer Engineering - Bachelor of Science (BSEC) (p. 828)
- Mechanical Engineering - Bachelor of Science (BSME) (p. 893)

### Requirements

The following course requirements are subject to change; for the most current information, visit the program's Degree Requirements [webpage](http://www.colorado.edu/emp/degree-requirements/).

### Degree Requirements

The ME degree requires 30 credit hours. Students have the option to complete coursework only, consisting of four core courses and six elective courses, or the capstone option. The capstone is a 3-credit course that replaces one of the six electives required for the degree.

Dual Degree Programs
In addition to the Master of Engineering in engineering management, the Engineering Management Program also offers dual degrees in the following areas:

- Computer Science & Engineering Management
- Aerospace Engineering Sciences & Engineering Management
- Electrical, Computer, and Energy Engineering & Engineering Management
- Mechanical Engineering & Engineering Management

For more information, visit the program’s Dual Graduate Degree Programs (http://www.colorado.edu/emp/programs/graduate-degree/dual-degree-program/) webpage.

Engineering Management - Master of Engineering (ME) Online
The Master of Engineering in Engineering Management (ME-EM) program hosted online through the Coursera platform offers stackable graduate-level courses, a graduate certificate, and a fully accredited master’s degree in engineering management. ME-EM on Coursera students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts or diplomas.

The ME-EM is an excellent alternative to an MBA for engineers, scientists and technical professionals who want to move into management. The ME-EM prepares individuals for leadership roles within technology-driven industries. This highly multidisciplinary program integrates contemporary concepts of authentic leadership, organizational management and quantitative analysis to provide students the specific tools and knowledge to succeed in today’s rapidly evolving business environment. The program’s core curriculum builds foundational skills in communication, project management, finance and leadership. Students then have the opportunity to dive deeper into subject of interest through a variety of elective courses including product development, technology entrepreneurship, systems engineering, innovation management, and more.

Program Policies
This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1791) section of the catalog for more information.

Program Requirements
The ME-EM on Coursera utilizes performance-based admissions for enrollment. There is no traditional application for admission to the degree. Students do not need to take the GRE or submit letters of recommendation or proof of language proficiency. Neither a prior degree nor university transcripts are required for admission. Because this is a purely online program, students do not need to complete a background check to enroll.

A student desiring admission to the ME-EM on Coursera must complete four required protocols:

1. Take one of the following two pathway specializations for credit:
   a. Finance for Technical Managers (3 credit)
   b. Project Management (3 credits)

2. Achieve a computed pathway specialization grade-point average (GPA) of at least 3.00.
3. Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.
4. Declare their intent to seek the degree via the enrollment form, which they can do before, during, or after any work in a pathway specialization.

Upon completion of these four steps, the student is admitted to the ME-EM on Coursera. Students may successfully complete a designated pathway specialization and declare intent at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree.

Nondegree seeking students may enroll in for-credit courses. All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

Prerequisites & Assumed Background Knowledge
There are no course prerequisites or corequisites for EMP courses on Coursera. Nevertheless, it is important that students are prepared for individual courses. Course descriptions will advise students of assumed incoming knowledge, and students are strongly encouraged to take course sequences in the order they are presented on the Coursera platform. Students are also encouraged to take a non-credit version in some form before moving to the for-credit version to test whether they can succeed, especially if they are unsure whether they have the background knowledge required for a course.

Course Requirements
The ME-EM on Coursera is a non-thesis degree that requires 30 credit hours of coursework. Students must complete the following 12 credits of core coursework and 18 credits hours of any elective courses listed below. Please note, 9 elective credit hours can be accepted from the MS-DS (https://www.colorado.edu/program/data-science/coursera-overview/) and MS-EE (https://www.colorado.edu/ecee/academics/online-programs/master-science-electrical-engineering/) programs.

Learning Outcomes

Upon completing the program, students will be able to:

• Identify, explain, and use engineering management concepts and theories.
• Evaluate the ethical and environmental implications of engineering and management practices.
• Analyze personal leadership awareness.
• Analyze and design complex systems using multiple tools and systems.
• Communicate effectively to technical and non-technical professionals.
• Interpret quantitative and qualitative data to make sound engineering and managerial decisions.
• Manage complex projects with a systems-approach.
• Understand the financial implications of engineering decisions.

Engineering Management - Graduate Certificate (Online)

The Master of Engineering in Engineering Management (ME-EM) program hosted online through the Coursera platform offers stackable graduate-level courses, a graduate certificate, and a fully accredited master’s degree in engineering management. ME-EM and Engineering Management Graduate Certificate on Coursera students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts or diplomas.

Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1791) section of the catalog for more information.

Requirements

Admission Requirements

There are no admission processes for learners seeking to earn the Engineering Management Graduate Certificate. All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

Program Requirements

To earn the Engineering Management Graduate Certificate, students must earn 9 credit hours in the required courses listed below. To earn the certificate, students must have a separately computed minimum cumulative GPA of 3.00 across courses applicable toward the certificate. Certificate courses in which grades below C+ (2.3) are received may not be applied toward the certificate requirements.

Prerequisite Knowledge

There are no formal prerequisites for the Engineering Management Graduate Certificate, but we recommend that prospective students have an undergraduate degree in engineering, science, or a technical field (including areas such as physics, applied mathematics, and computer science). If they do not have an undergraduate degree in engineering or a technical field, we recommend that students try the non-credit versions of courses to test their readiness before upgrading to the for-credit versions.

Upon completing the program, students will be able to:

• Analyze personal leadership awareness.
• Manage complex projects with a systems-approach.
• Understand the financial implications of engineering decisions.

Engineering Management in the Aerospace Industry - Graduate Certificate

The certificate in engineering management in the aerospace industry is designed for students enrolled in the MS in Aerospace Engineering or ME Engineering Management, as well as other master's degree programs (computer science, electrical engineering and mechanical engineering).

Learn leadership and program management skills widely employed by the aerospace industry in this jointly sponsored program between the Ann and H. J. Smead Aerospace Engineering Science Department and the Engineering Management Program.

For more information, visit the Engineering Management Program's Engineering Management in the Aerospace Industry Certificate webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

This certificate requires 12 credit hours.

Code  Title  Credit Hours

EMEN 5030  Fundamentals of Project Management  3
EMEN 5053  Leading Technical Organizations  3
EMEN 5065  Global Topics in Aerospace  3

Total Credit Hours  12

1 May be waived for another course with experience or PMP; see department.

Innovation and Entrepreneurship in Engineering - Graduate Certificate

Whether forming a new company, or being part of a larger organization, students interested in the innovation & entrepreneurship in engineering graduate certificate will learn how to develop new and innovative products, and the processes required to successfully introduce into the marketplace.

The certificate is a hands-on, practical series of courses that begins with a focus on the product development process, emphasizing where good product ideas come from, and identifying the characteristics that resonate with customers. From there, students learn how products are commercialized within the framework of an existing company and the methods necessary in launching a new high-tech startup.

All courses are taught by faculty that have successfully launched new products or new companies, and have therefore lived what they teach. Finally, the courses are project-based, culminating with student presentations suitable for potential customers, their company's C-Suite or venture capitalists.

For more information, visit the Engineering Management Program's Innovation & Entrepreneurship in Engineering Certificate webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

This certificate requires 12 credit hours.

Code  Title  Credit Hours

Required Courses
Choose four from the following:  12

EMEN 5020  Finance for Engineering Managers
EMEN 5090  Marketing and Technology Ventures
EMEN 5094  Entrepreneurship for Engineers
EMEN 5215  Principles & Practices of the Sustainable Enterprise
EMEN 5400  Product Development and Design
EMEN 5710  Enterprise Strategic Management
EMEN 5315  Business Law for Engineering Managers

Total Credit Hours  12
Leadership and Management - Graduate Certificate

With the leadership and management graduate certificate from the Engineering Management Program, you’ll gain an in-depth understanding of management, leadership and strategy deployment to improve performance quality; discover how to use natural strengths to become the best leader possible; learn to navigate ethical decisions and maintain integrity as a leader; and find the leverage points in an organization for delivering exceptional results.

For more information, see the program’s Leadership and Management (https://www.colorado.edu/emp/leadership-and-management/) webpage.

Distance Education Option

Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Environmental Engineering

The Environmental Engineering Graduate Program (http://www.colorado.edu/even/) focuses on the fundamental and applied understanding of the processes which govern our natural and engineered environmental systems.

The program consists of over 35 research and instructional faculty members and about 70 graduate students, covers topics ranging from drinking and wastewater treatment, water reuse, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering. The program offers MS, Professional MS, and PhD degrees in environmental engineering.

For more information, visit the Environmental Engineering Program (https://www.colorado.edu/even/prospective-students/) website.

Course code for this program is EVEN.

Master's Degrees

- Environmental Engineering - Master of Science (MS) (p. 1593)
- Environmental Engineering - Professional Master of Science (MSENV) (p. 1594)

Doctoral Degree

- Environmental Engineering - Doctor of Philosophy (PhD) (p. 1595)
Certificate
- Architectural Lighting - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-applied-science/architectural-lighting-graduate-certificate/)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Balaji, Rajagopalan (https://experts.colorado.edu/display/fisid_118480/)
Professor, Chair, PhD, Utah State University

Bielefeldt, Angela R. (https://experts.colorado.edu/display/fisid_110322/)

Vance, Marina E. (https://experts.colorado.edu/display/fisid_158217/)
Assistant Professor; PhD, Virginia Polytechnic Institute and State University

Walker, Michael Edward (https://experts.colorado.edu/display/fisid_155103/)
Instructor; PhD, Illinois Institute of Technology

Writer, Jeffrey Hawkins (https://experts.colorado.edu/display/fisid_149024/)
Instructor; PhD, University of Colorado Boulder

Young, Wendy Mores (https://experts.colorado.edu/display/fisid_146942/)
Senior Instructor; PhD, University of Colorado Boulder
Courses

EVEN 5444 (3) Analytical Methods, Experimental Design, and Applied Data Analysis
Focuses on experimental design and applied statistical methods for data analysis in the environmental engineering field. Students learn how to design and interpret experiments considering multiple variables, avoid confounding effects, and identify interactions between variables. Statistical tools are applied to analytical methods to validate environmental analytical samples. Students learn how to decipher analytical methods to ensure that environmental samples are collected and analyzed following robust quality assurance/quality control procedures.

Requisites: Restricted to College of Engineering and Applied Science graduate students or BS/MS Concurrent Degree Students only.
Recommended: Prerequisite undergraduate statistics course.
Grading Basis: Letter Grade

EVEN 5584 (3) Sustainable Engineering Design
Introduces students to sustainable design and quantitative sustainability assessment methods. Students will develop an understanding of quantitative sustainable design and how to navigate engineering decision-making. Students will learn tools for economic (life cycle costing, LCC) and environmental (life cycle assessment, LCA) sustainability assessments, and how to link these tools to engineering design decisions under uncertainty. Students will design engineered technologies individually and in teams, with special attention to energy and water technologies. Main course objectives are that students will have the ability to assess the relative sustainability of design alternatives using quantitative tools and to complete the detailed design of civil/environmental engineering infrastructure while navigating trade-offs across and within dimensions of sustainability.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

EVEN 5830 (1-3) Environmental Engineering Special Topic
Supervised study of special topics of interest to students under instructor guidance.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

EVEN 5959 (3) International Environmental Impact Assessment
Provides elements needed to develop Environmental Impact Assessments (EIA) in countries around the world. Familiarizes students with terms and definitions used in environmental practice. Explains the application of methodologies/tools used globally in EIA studies, taking into consideration the cause-effect relationships between project activities and the environment. Overview of World Bank and regional evaluation criteria driven by local ecosystems, society, and regulations. Case studies focus on the application of tools/methodologies and criteria in various international scenarios.
Equivalent - Duplicate Degree Credit Not Granted: EVEN 4959
Requisites: Requires prerequisite or corequisite course of EVEN 3414 (minimum grade C). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.
Recommended: Prerequisite or corequisite EVEN 3550.

EVEN 5979 (1-3) Introduction to Humanitarian Aid
Addresses the humanitarian-development nexus and gives an overview of the main ethical and professional principles, standards, and key stakeholders involved in humanitarian aid. Students will learn the historical and legal frameworks that shaped these principles, and examine their applicability to the challenges faced by humanitarian actors today. Increasing frequency, intensity, complexity, and length of emergency situations require new approaches and coordination among historically divided humanitarian and development actors.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.
Recommended: Prerequisite CVEN 4839/5919 Global Development for Engineers.
Grading Basis: Letter Grade

EVEN 5989 (1-3) Disaster Risk Reduction
Explores disaster governance, the decentralization of disaster resources and responsibilities, and best practices and tools in preparedness and mitigation. Students will examine the intersection of development, climate change, and disasters, by studying the impact of crisis events on human, social, and political behavior, and associated responses from impacted populations. Students will learn how to use data, tools, and geospatial techniques (GIS) that can inform and enhance vulnerability assessments, mitigation planning, and response operations.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.
Recommended: Prerequisite CVEN 4839/5919 Global Development for Engineers, or EVEN 5979, Introduction to Humanitarian Aid.
Grading Basis: Letter Grade

EVEN 5999 (1-3) Refugees and Displacement
Examines the processes and policies contributing to and driving refugee and migration flows, as well as response strategies. The focus will be on forced displacement, which currently impact the lives of almost 80 million people worldwide. This course covers solutions, particularly in the settlement context, for the appropriate provision of covered living space to adequately shelter displaced populations, while also promoting safer, healthier settlements that link emergency shelter and settlement assistance to longer-term recovery efforts. Previously offered as a special topics course.
Requisites: Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.
Recommended: Prerequisites CVEN 4839/5919 Global Development for Engineers.
Grading Basis: Letter Grade

EVEN 6504 (3) Advanced Physical-Chemical Processes for Water and Water Reuse Treatment
Teaches the process fundamentals of (1) granular activated carbon adsorption (2) UV, ozone and advanced oxidation processes (3) membrane filtration and reverse osmosis treatment and (4) ion exchange. These processes, as applied to impaired water sources, including brackish/saline/saltwater and wastewater reuse, will address water quality parameters including pathogenic microorganism, background organic matter, specific organic contaminants, metals and salts.
Requisites: Requires prerequisite course of CVEN 5524 (minimum grade C-).
Grading Basis: Letter Grade

EVEN 6940 (1) Master’s Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

EVEN 6950 (1-6) Master’s Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.
EVEN 6960 (1-3) Master's Report
Offers report research under faculty supervision. Faculty advisor consent required.
Repeatable: Repeatable for up to 3.00 total credit hours.

EVEN 8990 (1-10) Doctoral Dissertation
Repeatable: Repeatable for up to 10.00 total credit hours.

Environmental Engineering - Master of Science (MS)

The Master of Science in the Environmental Engineering Program focuses on fundamental and applied understanding of the processes that govern our natural and engineered environmental systems. The program of over 35 research and instructional faculty members and about 70 graduate students covers topics ranging from drinking and wastewater treatment, water re-use, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering.

For more information, visit the Environmental Engineering Program (https://www.colorado.edu/even/prospective-students/) website.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): BSEV in Environmental Engineering (p. 776)

Requirements

General Requirements

The following course requirements are subject to change; for the most current information, visit the Program's Curriculum and Courses (http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/) webpage.

Students must complete at least 30 credit hours.

For students who have undertaken prior graduate study, up to 9 hours of relevant graduate-level coursework may be transferred to meet the course requirements for the MS degree, following the rules established by the Graduate School for transfer credit.

Degree Plans

Requirements for the Master of Science in environmental engineering can be fulfilled in two ways.

Plan I: Thesis Option
In addition to 24 credit hours of coursework, candidates complete 4–6 credit hours of thesis credit with a sum of course and thesis credit of at least 30 hours. Additionally, the successful completion and defense of an MS thesis is required.

Plan II: Non-Thesis Option
In addition to 24 credit hours of coursework, candidates complete an additional 6 credit hours of elective courses or independent study.

Environmental Engineering - Professional Master of Science (MSENV)

The professional master’s degree (MSENV) in environmental engineering is a coursework-only program that offers possibilities for a range of prospective students.

Whether a prospective student is a working engineer or an undergraduate considering widening their exposure to areas of environmental engineering, we have program options to meet their needs. Prospective professional master’s degree students may choose between three different tracks:

- Environmental engineering
- Water reuse
- Water engineering & management

For more information, visit the department’s Curriculum and Courses (http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/) webpage.

Requirements

General Requirements

The following course requirements are subject to change; for the most current information, visit the Program’s Curriculum and Courses (http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/) webpage.

The professional master’s degree requires 30 credit hours of graduate-level courses with a minimum cumulative GPA of 3.00.

For students who have undertaken prior graduate study, up to 9 semester credit hours of relevant graduate-level course work may be transferred to meet the course requirements for the MSENV degree, following the rules established by the Graduate School for transfer credit.

Total Credit Hours: 30

Environmental Engineering - Doctor of Philosophy (PhD)

The Environmental Engineering Graduate Program (http://www.colorado.edu/even/) focuses on fundamental and applied understanding of the processes that govern our natural and engineered environmental systems. The program of over 35 research and instructional faculty members and about 70 graduate students covers topics ranging from drinking and wastewater treatment, water re-use, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering.

For more information, visit the Environmental Engineering Program (https://www.colorado.edu/even/prospective-students/) website.

Requirements

The PhD in environmental engineering requires 30 credit hours of relevant graduate-level coursework, plus 30 credit hours of thesis credit. PhD students are also required to successfully complete a preliminary exam, a comprehensive exam and a final dissertation defense.

Applicants for this degree must demonstrate the capability for both rigorous academic accomplishments and independent research.

All doctoral students must have completed the environmental engineering core courses (6 credit hours), and a quantitative analysis class (3 credit hours). Coursework must be completed with a minimum cumulative GPA of 3.00.

Graduates of the department’s MS program may transfer up to 30 credit hours of relevant graduate-level courses, pending program approval. Up to 21 credit hours of previous graduate-level work from another institution may be transferred with advisor and Graduate School approval.

Preliminary Examination

Students must pass a preliminary examination based on MS degree-level coursework in environmental engineering topics. Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. The student must pass this examination in order to continue in the doctoral program.

Comprehensive Examination

By no later than the fifth semester, students must also take and pass a comprehensive examination. The comprehensive examination shall consist of a written and an oral examination. The exam may not be attempted until the student’s last semester of formal coursework.
the comprehensive examination, the student shall present a plan for the dissertation research to the advisory committee for approval. Failure to pass the comprehensive examination may be remedied by repeating the examination after an interval of not less than four months.

PhD Dissertation
Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member who is a member of the Environmental Engineering Program faculty.

Time Limit
All degree requirements must be completed within six years of the date of commencing coursework.

Materials Science and Engineering
The Materials Science and Engineering (MSE) program at CU Boulder is an interdisciplinary, graduate-level program that allows students to explore science at the intersection of advanced chemistry, biology, engineering and physics. Our faculty members work across a broad range of scientific and engineering disciplines, but all share expertise and passion for materials development and application. Students will achieve their educational goals through a combination of cross-disciplinary coursework and research under the supervision of one or more of the program’s science and engineering faculty members.

The program offers two degrees to provide students with the necessary skills to be successful in industry. At CU Boulder, students have the opportunity to choose from six unique program tracks for specialization including:

- Electronic, magnetic and photonics materials
- Soft materials
- Structural materials
- Materials characterization and processing
- Materials for energy
- Biomaterials
- Computational materials science

The MSE program is directed by Professor Stephanie Bryant of the Department of Chemical and Biological Engineering. For more information, see the Materials Science & Engineering Program (https://www.colorado.edu/mse/) website.

Master's Degree
- Materials Science and Engineering - Professional Master of Science (MS) (p. 1598)

Doctoral Degree
- Materials Science and Engineering - Doctor of Philosophy (PhD) (p. 1599)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Research Professor; PhD, Tel Aviv Univ (Israel)

Courses

**MSEN 5000 (1-3) Fundamentals of Materials Science and Engineering**

Discusses fundamental topics in materials science and engineering.  
**Requisites:** Restricted to graduate students only.  
**Grading Basis:** Letter Grade
MSEN 5064 (3) Soft Machines
Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4046 and MCEN 5046
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.
Grading Basis: Letter Grade

MSEN 5270 (3) Materials Characterization for Engineering
Rigorous materials characterization is at the heart of understanding property-structure-processing relationships of materials, including soft matter. The goal of the course is to prepare graduate students to understand the basic principles behind material characterization tools and techniques. This class will offer students (1) an introduction to the principles and practice of diffraction, (2) introductory exposure to common characterization methods for the determination of structure, composition, and defects in inorganic and organic solids.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

MSEN 5370 (3) Materials Thermodynamics and Kinetics
Reviews fundamentals of thermodynamics and kinetics and applies them to understand the chemical, thermal, and mechanical behavior of materials. Examines equations of state, solution theory, equilibrium diagrams, and phase changes. Examines kinetics of phase transformations including theories of diffusion, nucleation and growth, and solidification.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

MSEN 5430 (3) Transmission Electron Microscopy in Materials Science & Engineering
This course provides a comprehensive introduction to transmission electron microscopy (TEM) as a powerful characterization tool in materials science. It is aimed at beginners and intermediate users of TEM and covers both the theoretical and practical aspects of advanced electron microscopy techniques. By taking this course, students will be able to interpret and analyze TEM data and understand electron microscopy publications. Students will learn the necessary theoretical basis for taking practical training on modern aberration-corrected TEMs. Previously offered as a special topics course.
Requisites: Restricted to students with 87-180 credits (Senior, 5th Yr Senior) or graduate students only.
Recommended: Prerequisite Experience on electron microscopy is recommended but not necessary.
Grading Basis: Letter Grade

MSEN 5470 (3) Materials Composition and Structure
The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.

MSEN 5840 (1-6) Independent Study
Offers an opportunity for students to do independent work. Subject arranged to fit the needs of the student.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to MS and PhD students in the Materials Science and Engineering program (MTEN) only.

MSEN 5919 (1-5) Special Topics in MSE
Offers an opportunity for special topics in MSE. Subject arrangement to fit the needs of the program.
Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

MSEN 6101 (1) Seminar in Materials Science and Engineering
Required of all materials science and engineering PhD students. Student, faculty, and guest presentations and discussions of current research in materials science and engineering.
Recommended: first- and second-year materials science and engineering PhD MSE students.
Grading Basis: Letter Grade

MSEN 6930 (3) Materials Science and Engineering Professional Internship
This class provides a mechanism for MSE graduate students to receive academic credit for internships with industry partners that include an academic component suitable for graduate-level work. Participation in the course will consist of an internship agreement between the student and an industry partner who will employ the student in a role that supports the academic goals of the MSE program and the internship. Instructor participation will include facilitation of the mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term after one semester of coursework in MSE graduate program.
Grading Basis: Letter Grade

MSEN 6950 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to MS students in the Materials Science and Engineering program (MTEN) only.

MSEN 8990 (1-10) Doctoral Dissertation
Doctoral Dissertation hours
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to PhD students in the Materials Science and Engineering program (MTEN) only.

Materials Science and Engineering - Professional Master of Science (MS)

CU Boulder’s Professional Master of Science degree in Materials Science and Engineering provides students with a wide range of knowledge within the broad industry of materials engineering. Students in the professional master’s program complete 30 hours of coursework covering cutting-edge industry topics, such as traditional and emerging materials systems, experimental methods and advanced computational analyses.

For more information, visit the program’s Professional Master’s Degree (http://www.colorado.edu/mse/professional-masters-degree/) webpage.
Bachelor’s–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor’s–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Chemical and Biological Engineering - Bachelor of Science (BSCB) (p. 748)
- Chemical Engineering - Bachelor of Science (BSCHE) (p. 752)
- Mechanical Engineering - Bachelor of Science (BSME) (p. 893)

Requirements

All Professional Master's students must declare a track by their second semester. Students enrolled in the professional master's program are not eligible to hold a teaching assistantship or research assistantship appointment. The following course requirements are subject to change; for the most current information, visit the department's coursework (https://www.colorado.edu/mse/current-students/coursework/) webpage.

### Code | Title | Credit Hours
---|---|---
MSEN 5919 | Special Topics in MSE (Functional Materials Chemistry) | 3
MSEN 5370 | Materials Thermodynamics and Kinetics | 3
MSEN 5919 | Special Topics in MSE (Materials Characterization in Engineering) | 3

**Breadth Electives**

Students must select three breadth electives with approval of the MSE Graduate Advisor. Independent study and MSEN 5000 may count as breadth electives. Prof. MS students may also take up to 6 credit hours of Engineering Management courses.

### Code | Title | Credit Hours
---|---|---
| | | 9 |

**Total Credit Hours**: 30

### Materials Science and Engineering - Doctor of Philosophy (PhD)

The Materials Science and Engineering (MSE) program is an interdisciplinary PhD program aimed at providing a rigorous education in materials science and engineering and the fundamental physics, engineering, chemistry and biology that underlie this discipline.

Educational goals are achieved through both coursework and training in cross-disciplinary research supervised by one or more science and engineering faculty members.

For more information, visit the Materials Science and Engineering (http://www.colorado.edu/mse/) website.

### Requirements

All PhD students must declare a track by the second semester. With the approval of their advisor, the student can change tracks. The course program should represent a coordinated approach to the attainment of the student’s ultimate goals, including class work, professional preparation and research.

The following course requirements are subject to change; for the most current information, visit the department’s Coursework (http://www.colorado.edu/mse/graduate-study/coursework/) webpage.

---

1. Required track-specific courses and approved track-specific electives are listed on the department's Coursework (http://www.colorado.edu/mse/graduate-study/coursework/) webpage.

### Preliminary Examination

The preliminary exam will normally be given in the spring of the student's second year. If the first attempt is failed, a second attempt will be scheduled in the following months. The second prelim attempt should be completed before the beginning of the third academic year. Students who have a master's degree should complete the preliminary exam in the third semester of study. If a student fails their first attempt, then they must retake the exam at latest in the following semester. Two successive failures result in a terminal MS as the highest possible degree.

### Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

### PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

### Time Limit

All degree requirements must be completed within six years of the date of commencing course work.
Mechanical Engineering

CU Boulder’s Mechanical Engineering Graduate Program (http://www.colorado.edu/mechanical/prospective-students/graduate/) is one of the top ranked programs in the U.S. News & World Report Best Graduate Schools issue among public universities. Students receive a strong education and conduct groundbreaking tier-one research. We have 50+ faculty members conducting fundamental and applied research in air quality, biomedical, materials, mechanics of materials, micro/nanoscale, robotics and systems design, and thermo fluid sciences.

Boulder is also home to research and development operations for many large companies and four federal research labs: the National Center for Atmospheric Research, the National Institute for Standards and Technology, the National Oceanic and Atmospheric Administration, and the National Renewable Energy Laboratory.

Recent doctoral and master’s graduates accepted employment at companies including, but not limited to: ConocoPhils, Ford, Google, NASA Jet Propulsion Laboratory, Lockheed Martin, Nike, Sandia National Laboratories and Seagate. Many of our graduating PhD students also enter careers in academia.

Master’s Degrees

• Mechanical Engineering - Master of Science (MS) (p. 1609)
• Mechanical Engineering - Professional Master of Science (MSME) (p. 1610)

Doctoral Degree

• Mechanical Engineering - Doctor of Philosophy (PhD) (p. 1610)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Affrunti, Andrew J. (https://experts.colorado.edu/display/fisid_149937/) Instructor; MESE, University of Illinois at Urbana–Champaign

Ahmed, Alaa A. (https://experts.colorado.edu/display/fisid_144736/) Associate Professor; PhD, University of Michigan

Ban, Chunmei (https://experts.colorado.edu/display/fisid_165780/) Associate Professor; PhD, SUNY at Binghamton

Barthelat, Francois (https://experts.colorado.edu/display/fisid_164866/) Professor; PhD, Northwestern University

Blacklock, Jennifer L. (https://experts.colorado.edu/individual/fisid_159680/) Faculty Director, Senior Instructor, Visiting Instructor; PhD, Wayne State University

Borden, Mark A. (https://experts.colorado.edu/display/fisid_148514/) Professor; PhD, University of California, Davis

Branch, Melvyn C.
Professor Emeritus

Bright, Victor Mark (https://experts.colorado.edu/display/fisid_112696/) Professor; PhD, Georgia Institute of Technology

Brower, Timothy L. (https://experts.colorado.edu/display/fisid_147553/) Senior Instructor; PhD, Colorado State University

Bruns, Carson J. (https://experts.colorado.edu/display/fisid_159851/) Assistant Professor; PhD, Northwestern University

Calve, Sarah (https://experts.colorado.edu/individual/fisid_165779/) Associate Professor; PhD, University of Michigan

Carlson, Lawrence E.
Professor Emeritus; D.Eng, University of California Berkeley

Castro, Francisco (https://experts.colorado.edu/display/fisid_147992/) Senior Instructor; PhD, University of Colorado Boulder

Cui, Longji (https://experts.colorado.edu/display/fisid_164283/) Assistant Professor; ME, Beihang University (China)

Daily, John W. (https://experts.colorado.edu/display/fisid_100131/) Research Professor; PhD, Stanford University

Datta, Subhendu K.
Professor Emeritus

Ding, Xiaoyun (https://experts.colorado.edu/display/fisid_158563/) Professor; PhD, Pennsylvania State University

Ding, Yifu (https://experts.colorado.edu/display/fisid_146088/) Associate Professor; PhD, University of Akron

Ferguson, Virginia L. (https://experts.colorado.edu/display/fisid_110131/) Associate Professor; PhD, University of Colorado Boulder

Geers, Thomas L.
Professor Emeritus

Greenberg, Alan R.
Professor Emeritus

Gupta, Mohit (https://experts.colorado.edu/display/fisid_166237/) Instructor Adjunct

Hamlington, Peter Edward (https://experts.colorado.edu/display/fisid_149800/) Associate Professor, Associate Chair, Faculty Fellow; PhD, University of Michigan Ann Arbor

Hannigan, Michael P. (https://experts.colorado.edu/display/fisid_122655/) Professor, Chair, Endowed Chair; PhD, California Institute of Technology

Henze, Daven K. (https://experts.colorado.edu/display/fisid_144858/) Professor, Associate Chair; PhD, California Institute of Technology

Hertzberg, Jean R. (https://experts.colorado.edu/display/fisid_105315/) Associate Professor; PhD, University of California, Berkeley

Humbert, J. Sean (https://experts.colorado.edu/display/fisid_156202/) Professor, Associate Chair; PhD, California Institute of Technology

Jayaram, Kaushik (https://experts.colorado.edu/display/fisid_165370/) Assistant Professor; PhD, University of California-Berkeley

Kassoy, David R.
Professor Emeritus
Knappe, Svenja A. (https://experts.colorado.edu/display/fisid_139588/)
Associate Research Professor; PhD, Rheinische Friedrich-Wilhelms-Universität (Germany)

Knutsen, Jeffrey S. (https://experts.colorado.edu/display/fisid_145534/)
Senior Instructor; Lecturer; PhD, University of Colorado Boulder

Kotys-Schwartz, Daria (https://experts.colorado.edu/display/fisid_144738/)
Senior Instructor; PhD, University of Colorado Boulder

Labbe, Nicole J. (https://experts.colorado.edu/display/fisid_157742/)
Assistant Professor; PhD, University of Massachusetts, Amherst

Lee, Sehee (https://experts.colorado.edu/display/fisid_144739/)
Professor; PhD, Seoul National University (South Korea)

Lee, Yung-Cheng (https://experts.colorado.edu/display/fisid_103170/)
Professor; PhD, University of Minnesota Twin Cities

Li, Baowen (https://experts.colorado.edu/display/fisid_156203/)
Professor; PhD, Carl von Ossietzky Universität Oldenburg (Germany)

Long, Rong (https://experts.colorado.edu/display/fisid_151301/)
Associate Professor; PhD, Cornell University

Lynch, Maureen Ellen (https://experts.colorado.edu/display/fisid_163404/)
Assistant Professor; PhD, Cornell University

MacCurdy, Robert B. (https://experts.colorado.edu/display/fisid_163307/)
Assistant Professor; PhD, Cornell University

McNeill, Nathan John (https://experts.colorado.edu/display/fisid_151518/)
Senior Instructor; PhD, Purdue University

Milford, Jana B. (https://experts.colorado.edu/display/fisid_103268/)
Professor; PhD, Carnegie Mellon University

Miller, Shelly L. (https://experts.colorado.edu/display/fisid_110394/)
Professor; PhD, University of California, Berkeley

Mitrano, Peter P. (https://experts.colorado.edu/display/fisid_155075/)
Instructor; PhD, University of Colorado, Boulder

Mukherjee, Debanjan (https://experts.colorado.edu/individual/fisid_164181/)
Assistant Professor; PhD, University of California-Berkeley

Murray, Todd W. (https://experts.colorado.edu/display/fisid_146549/)
Professor, Associate Chair; PhD, Johns Hopkins University

Neu, Corey P. (https://experts.colorado.edu/display/fisid_156210/)
Professor; PhD, University of California, Davis

Norris, Jan Adam (https://experts.colorado.edu/display/fisid_156212/)
Instructor Adjunct; PhD, University of Colorado Boulder

Pachoeco-Borden, Carmen Consuelo (https://experts.colorado.edu/display/fisid_148773/)
Lecturer, Instructor Adjunct

Pellegrino, John (https://experts.colorado.edu/display/fisid_130902/)
Research Professor; PhD, University of Colorado Boulder

Raj, Rishi (https://experts.colorado.edu/display/fisid_108413/)
Professor; PhD, Harvard University

Reamon, Derek T. (https://experts.colorado.edu/display/fisid_120538/)
Senior Instructor; Lecturer, Associate Chair; PhD, Stanford University

Regner, Keith T. (https://experts.colorado.edu/display/fisid_158065/)
Professor; PhD, Carnegie Mellon University

Rentschler, Mark E. (https://experts.colorado.edu/display/fisid_146091/)
Professor; PhD, University of Nebraska-Lincoln

Rieker, Gregory Brian (https://experts.colorado.edu/display/fisid_151727/)
Associate Professor, Faculty Fellow; PhD, Stanford University

Riffell, Daniel J. (https://experts.colorado.edu/display/fisid_154141/)
Scholar in Residence; Lecturer; MS, University of Colorado Boulder

Ruben, Shalom D. (https://experts.colorado.edu/display/fisid_149492/)
Teaching Associate Professor; PhD, University of California, Los Angeles

Ruzzene, Massimo (https://experts.colorado.edu/display/fisid_165832/)
Professor; PhD, Politecnico Di Torino (Italy)

Segil, Jacob Lionel (https://experts.colorado.edu/display/fisid_155128/)
Assistant Research Professor; PhD, University of Colorado Boulder

Steinbrenner, Julie E. (https://experts.colorado.edu/display/fisid_152041/)
Senior Instructor, Lecturer, Faculty Fellow; PhD, Stanford University

Stoldt, Conrad R. (https://experts.colorado.edu/display/fisid_126290/)
Professor, Associate Chair; PhD, Iowa State University

Tan, Wei (https://experts.colorado.edu/display/fisid_141464/)
Associate Professor; PhD, University of Illinois at Chicago

Tsai, Janet Yi-Jen (https://experts.colorado.edu/display/fisid_156447/)
Instructor, Lecturer, Associate Chair; PhD, University of Colorado Boulder

Vance, Marina E. (https://experts.colorado.edu/display/fisid_158217/)
Assistant Professor; PhD, Virginia Polytechnic Institute and State University

Vernerey, Franck J. (https://experts.colorado.edu/display/fisid_144760/)
Professor; PhD, Northwestern University

Vriend, Nathalie Maria (https://experts.colorado.edu/display/fisid_165036/)
Associate Professor, Visiting Associate Professor, Associate Professor Adjunct; PhD, California Institute of Technology

Walker, Michael Edward (https://experts.colorado.edu/display/fisid_155103/)
Senior Instructor; PhD, Illinois Institute of Technology

Weidman, Patrick D. (https://experts.colorado.edu/display/fisid_155103/)
Professor Emeritus

Whiting, Gregory L. (https://experts.colorado.edu/display/fisid_159727/)
Associate Professor; PhD, University of Cambridge (England)

Xiao, Jianliang (https://experts.colorado.edu/display/fisid_141464/)
Professor; PhD, Harvard University

Reamon, Derek T. (https://experts.colorado.edu/display/fisid_120538/)
Senior Instructor; Lecturer, Associate Chair; PhD, Stanford University

Regner, Keith T. (https://experts.colorado.edu/display/fisid_158065/)
Professor; PhD, Carnegie Mellon University

Rentschler, Mark E. (https://experts.colorado.edu/display/fisid_146091/)
Professor; PhD, University of Nebraska-Lincoln

Rieker, Gregory Brian (https://experts.colorado.edu/display/fisid_151727/)
Courses

MCEN 5010 (3) Microsystems Integration
A microsystem consists of microelectronic, optoelectronic, microwave, microelectromechanical and energy components interconnected. Thermal, electrical, fabrication and assembly issues for microsystems represented by iPhone series will be studied. The packaging and interconnection technologies used to establish the design and manufacturing infrastructure of microsystems will be reviewed. Other optoelectronic, MEMS and battery components for microsystems will also be studied.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4010
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.
Grading Basis: Letter Grade

MCEN 5012 (3) Renewable Fuels, Fuel Cells and Internal Combustion Engines
With the accelerated availability of carbon-free and renewable fuels, we will explore high-efficiency, low-emissions fuel cell and internal combustion engine energy conversion technologies, preparing students to enter the rapidly changing fields of power and propulsion on the path to net-zero greenhouse gas emissions. Through thermodynamic modeling, systems engineering, and requirements flow-down, students will apply the fundamentals of thermodynamics, fluids and heat transfer, combustion and electrochemistry for fuel cells and IC Engines.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4012
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

MCEN 5014 (3) Energy Materials Characterization
Introduces theoretical framework for characterization techniques including X-ray diffraction, X-ray photoelectron spectroscopy and imaging methods used in the structural and morphological characterization of energy materials. Helps students determine characterization techniques suitable for their study and understand their data. Uses energy storage case studies to provide the methodologies for determining the nature and composition of materials. Helps students learn new characterization techniques from the literature and seek the characterization resources from DOE funded user facilities.

Requisites: Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) majors with 57+ credits (Junior or Senior).
Recommended: Prerequisite MCEN 1024 Chemistry or equivalent, and MCEN 2024 Materials Science or equivalent.

MCEN 5020 (3) Methods of Engineering Analysis 1
Studies selected topics from linear algebra, ordinary differential equations, and Fourier series. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Math

MCEN 5021 (3) Introduction to Fluid Dynamics
Focuses on physical properties of gases and liquids, and kinematics of flow fields. Analyzes stress; viscous, heat-conducting Newtonian fluids; and capillary effects and surface-tension-driven flow. Other topics include vorticity and circulation, ideal fluid flow theory in two and three dimensions, Schwartz-Christoffel transformations, free streamline theory, and internal and free-surface waves.

Requisites: Requires corequisite course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Thermal

MCEN 5022 (3) Classical Thermodynamics

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Thermal

MCEN 5023 (3) Solid Mechanics 1
Introduces stress, strain and motion of a continuous system. Discusses material derivative; fundamental laws of mass, momentum, energy and entropy; constitutive equations and applications to elastica and plastic materials.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5012
Requisites: Requires coreq course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.

Additional Information: Departmental Category: Solids

MCEN 5024 (3) Materials Chemistry and Structures
Provides graduate level students with a comprehensive overview of the chemistry and structure of material systems, with a focus on chemical bonding, the resulting material structures and their properties. This course is intended to become one of the four core courses offered in the new Materials Science curriculum. Course topics include: bonding in solids, crystalline and amorphous states, basic group theory, diffraction, metals and alloys, ceramics, and an intro to mat. characterization.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Materials

MCEN 5027 (1) Graduate Seminar
Offers weekly presentations by visiting speakers, faculty, and students.
Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

Additional Information: Departmental Category: Miscellaneous

MCEN 5032 (3) Sustainable Energy
Examines sustainability of our current energy systems, including transportation, using environmental and economic indicators. Uses systems analysis that addresses energy supply and demand. Explores the science and technology as well as environmental and economic feasibility of efficiency measures and renewable energy technologies. Additional emphasis is given to the global nature of the challenges and the potential for locally optimal solutions.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 4032
Grading Basis: Letter Grade

Additional Information: Departmental Category: Thermal
MCEN 5034 (3) Thermodynamics of Materials
Provides a unified presentation of fundamental concepts applicable to the thermodynamics of engineering materials. Develops quantitative tools for understanding the physical principles that govern phase equilibrium and transformation. Generates binary and ternary phase diagrams and determine the resulting materials structures and corresponding physical and mechanical properties.
Recommended: Prerequisites MCEN 2024 and MCEN 3012.
Additional Information: Departmental Category: Materials

MCEN 5040 (3) Methods of Engineering Analysis 2
Studies selected topics from the theory of complex variables, integral transform methods, partial differential equations, and variational methods. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications.
Requisites: Requires prerequisite course of MCEN 5020 (minimum grade D). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Math

MCEN 5041 (3) Advanced Fluid Mechanics 1
Highlights exact solution of Navier-Stokes equations and fundamentals of rotating fluids. Considers Low Reynolds number flow; similarity solutions; viscous boundary layers, jets, and wakes; and unsteady viscous flow.
Requisites: Requires corequisite course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Fluids

MCEN 5042 (3) Heat Transfer
Studies development of equations governing transport of heat by conduction, convection, and radiation, and their solution. Includes analytical and numerical solution of initial and boundary value problems representative of heat conduction in solids. Describes heat transfer in free and forced convection, including laminar and turbulent flow. Also involves radiation properties of solids, liquids, and gases and transport of heat by radiation.
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Thermal

MCEN 5044 (3) Mechanical Behavior of Materials
This introductory-level graduate course incorporates relevant aspects of materials science, solid mechanics, thermodynamics and mathematics, and applies them to achieve a fundamental understanding of the mechanical behavior of crystalline and non-crystalline engineering materials.
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Materials

MCEN 5045 (3) Design for Manufacturability
Topics include general design guidelines for manufacturability; aspects of manufacturing processes that affect design decisions; design rules to maximize manufacturability; economic considerations; value engineering and design for assembly. Presents case studies of successful products exhibiting DFMA principles. Prerequisite of MCEN 4026 required for undergraduate students.
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.
Additional Information: Departmental Category: Materials

MCEN 5055 (3) Advanced Product Design
Introduces engineering design and development of consumer products. Includes learning sketching, brainstorming, idea generation, design thinking, user-centered design, product requirements and specifications, product constraints, human factors, aesthetics, industrial design, intellectual property, concept prototyping, idea selection, tolerancing, cost estimating, design for assembly, and materials selection. Entails a semester-long team re-design of a consumer product.
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Design

MCEN 5057 (3) Environmental Modeling
Enables students to develop and evaluate pollutant transport, fate, exposure, and risk models for air, water, and multi-media systems, with a special emphasis on air. Emphasizes the fundamental physics and chemistry that govern contaminant fate and transport and the basic mathematical equations and numerical approaches for describing these processes.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4057
Grading Basis: Letter Grade
Additional Information: Departmental Category: Miscellaneous

MCEN 5064 (3) Soft Machines
Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4046 and MSEN 5046
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.
Grading Basis: Letter Grade

MCEN 5065 (3) Graduate Design I
First part of a two-course graduate product design experience in mechanical engineering. Covers problem definition and specifications, determining design requirements, user feedback, alternative design concepts, engineering analysis, concept prototypes and CAD drawings. Students make several oral design reviews, a final design presentation and prepare a written report. Entails a team product design, fabrication and testing cycle of sponsored project. Students who complete this course are encouraged to take MCEN 5075 Graduate Design II.
Requisites: Requires prerequisite course of MCEN 5055 (minimum grade C).
Additional Information: Departmental Category: Design

MCEN 5075 (3) Graduate Design II
Second part of two-course graduate product design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Entails a team product design, fabrication, and testing cycle of a sponsored project, leading to a fully-functional product.
Requisites: Requires prerequisite course of MCEN 5065 (minimum grade C).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Design
MCEN 5111 (3) Introduction to Microfluidics
Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4111
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Recommended: Prerequisite MCEN 3021 or CHEN 3200 or CVEN 3313.

MCEN 5113 (3) Mechanics of Cancer
Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influences cancer and its etiology as well as the development of future treatments.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4113
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical and Biomedical Engineering undergraduate majors only.

MCEN 5115 (3) Mechatronics and Robotics I
Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred ($50 maximum).
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4115
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Design

MCEN 5117 (3) Anatomy and Physiology for Engineers
Explores human physiological function from an engineering, specifically mechanical engineering, viewpoint. Provides an introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4117
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Miscellaneous

MCEN 5121 (3) Compressible Flow
Applies energy, continuity, and momentum principles to compressible flow. Topics include normal and oblique shocks; Prandtl-Meyer expansion; methods of characteristics; and one-, two-, and three-dimensional subsonic, supersonic, and hypersonic flows.
Requisites: Requires prerequisite course of MCEN 5021 (minimum grade D-). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Fluids

MCEN 5122 (3) Statistical Thermodynamics
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Thermal

MCEN 5125 (3) Optimal Design
Focuses on linear optimization and will introduce non-linear optimization. Formulating engineering applications as optimization problems that can be solved using industry known solvers will be learned. Some of these applications will include minimum cost mechanical design, wind farm power maximization, minimum energy control, production control, and more. Previous programming experience required.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4125
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Design

MCEN 5127 (3) Biomedical Ultrasound
Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow and tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound.
Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; programming exercises for data processing; and a team design project.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4127
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Miscellaneous

MCEN 5131 (3) Air Pollution Control Engineering
Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4131
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Fluids
MCEN 5133 (3) Intro to Tissue Biomechanics
Focius on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4133
Additional Information: Departmental Category: Materials

MCEN 5135 (3) Wind Energy and Wind Turbine Design
Focuses on understanding and applying principles related to current wind energy technologies. Students will apply technical coursework from throughout the engineering curriculum (environmental, fluids, statics, dynamics, power, economics, etc.) to the process of designing wind turbines and wind farms. Practical, real world examples will be integrated into the lessons and problems.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4135
Requisites: Restricted to Mechanical (MCEN), Civil (CVEN) or Aerospace (ASEN) Engineering graduate students only.
Additional Information: Departmental Category: Design

MCEN 5137 (3) Anatomy and Physiology 2
Provides in-depth understandings of anatomy and physiology as well as introductions to transport phenomena, flow mechanics and solid mechanics in several organ systems: the cardiovascular, pulmonary, kidney, endocrine and digestive systems. Introduces artificial physiological systems to replace or assist physiological functions and introduce the concepts of physiological barriers that prevent diagnosis or effective therapeutics.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4137
Grading Basis: Letter Grade
Additional Information: Departmental Category: Design

MCEN 5138 (3) Feedback Control
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4138 ECN 4138 or ECN 5138
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Recommended: Prerequisite MCEN 4043 or comparable knowledge gained through outside coursework.

MCEN 5141 (3) Indoor Air Pollution
Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4141
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Fluids

MCEN 5147 (3) Mechanobiology
Studies how mechanical forces modulate the morphological and structural fitness of biological tissues. Current molecular mechanisms by which cells convert mechanical stimulus into chemical activity and the literature supporting them will be discussed. Students will acquire an understanding and expertise from the analysis of primary literature and completion of a synthesis project.
Requisites: Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.
Grading Basis: Letter Grade

MCEN 5151 (3) Flow Visualization
Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.
Equivalent - Duplicate Degree Credit Not Granted: CINE 4200, MCEN 4151, ARTF 5200, ATLS 4151 and ATLS 5151
Additional Information: Departmental Category: Fluids

MCEN 5152 (3) Introduction to Combustion
Focius on the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety and combustion efficiency.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4152
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Thermal

MCEN 5153 (3) Introduction to Fracture Mechanics
This course will introduce fundamental concepts, analytical approaches, and experimental methods to characterize the fracture of solid materials. Topics to be discussed include: linear elastic analysis of 2D cracks, energy flows and criteria for elastic fracture, experimental methods for elastic fracture, application of fracture mechanics in adhesion, introduction to elastic plastic fracture, and nonlinear fracture mechanics of soft materials.
Requisites: Requires prerequisite course of MCEN 2063 or CVEN 3161 or MCEN 5023 or ASEN 5012 (all minimum grade C).

MCEN 5154 (3) Biocolloids and Biomembranes
Covers the thermodynamics and mechanics of biological membranes and biomedical colloids. Considers intermolecular and surface forces, self-assembly and colloidal stability. Addresses structure-property relationships and design principles for biomedical applications. Focuses on monolayers, bilayers, micelles, filomicelles, liposomes, polymersomes, emulsions, microbubbles, polyplexes and polyelectrolyte multilayer capsules.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4154
Recommended: Prerequisites APPM 2360 and PHYS 1120.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Materials
MCEN 5155 (3) Automated Mechanical Design Synthesis
Introduces computational approaches to automatically generate complex
multimaterial mechanical designs that satisfy predefined high-level
specifications, discusses algorithms to solve design as a constrained
non-convex multi-objective optimization problem. Topics: expert-driven
design process; computational analysis tools based on mechanical
simulation (finite element methods, mesh-free methods); topological
optimization; compositional design; multi-objective optimization;
 evolutionary design; design for manufacturing with additives (FDM, SLA,
 Inkjet). Students design a part to specifications, fabricate using advanced
(3D printing, laser cutting, CNC, etc) tools.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4155
Requisites: Restricted to any College of Engineering and Applied Science
graduate students or to Mechanical Engineering undergraduate majors
only.
Recommended: Prerequisite students should be comfortable with
MATLAB, PDEs, linear algebra, free body diagrams, mechanical
modeling/design; exposure to finite-element modeling and state-space
representations.

MCEN 5157 (3) Modeling of Human Movement
Human movement analysis is used in physical rehabilitation, sport
training, human-robot interaction, animation, and more. Course provides
a systematic overview of human movement on multiple levels of analysis,
with an emphasis on the phenomenology amenable to computational
modeling. Covers muscle physiology, movement-related brain areas,
musculoskeletal mechanics, forward and inverse dynamics, optimal
control and Bayesian inference, learning and adaptation. Inspires
students to see and appreciate the complexities of movement control in
all aspects of daily life.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4157
Requisites: Restricted to graduate students in the College of Engineering
and Applied Science or undergraduate Mechanical Engineering (MCEN)
and Biomedical Engineering (BMEN) majors with 57+ credits (Junior or
Senior).

MCEN 5161 (3) Aerosols
Introduces atmospheric aerosols and properties of their distributions,
followed by fundamental descriptions of single particle dynamics,
thermodynamics, nucleation, coagulation, mass transfer and populations
dynamics. During the second half of the course, the focus will shift to
sources and sinks of atmospheric aerosols, their impacts on atmospheric
chemistry and radiation, and the impacts of these processes on air
quality and climate.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Fluids

MCEN 5171 (3) Biofluids on the Micro Scale
Introduces fundamental physical concepts and basic mechanisms of
biological fluids in microscale. Elaborates on the application of fluid
mechanics principles to major biological systems, including human organ
systems and animal locomotion in microscale. Covers physiologically
relevant fluid flow phenomena on the cellular level and the underlying
physical mechanisms from an engineering perspective. Related state-
of-art technologies such as organ-on-a-chip and micro/nano fabrication
will be emphasized. Will enhance your understanding of organ-on-a-chip
technologies and their broad applications.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4171
Requisites: Restricted to any College of Engineering and Applied Science
graduate students or to Mechanical Engineering undergraduate majors
only.

MCEN 5173 (3) Finite Element Analysis
Introduces the theory behind and applications of the finite element
method as a general and powerful tool to model a variety of phenomena
in mechanical engineering. Applications include structural mechanics,
mechanics of elastic continua and heat conduction.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4173
Requisites: Restricted to any College of Engineering and Applied Science
graduate students or to Mechanical Engineering undergraduate majors
only.
Additional Information: Departmental Category: Solids

MCEN 5174 (3) Failure of Engineering Materials
Examines the fundamental concepts regarding the failure of engineering
materials. Case studies are used to integrate a basic understanding
of material failure mechanisms with analysis techniques and tools.
Topics include the elastic properties (isotropic and anisotropic materials)
and the origin of elastic behavior, viscoelasticity, plasticity (dislocation
mechanisms, yielding criteria, strengthening mechanisms), creep,
fracture and fatigue.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4174
Requisites: Restricted to any College of Engineering and Applied Science
graduate students or to Mechanical Engineering undergraduate majors
only.
Additional Information: Departmental Category: Materials

MCEN 5183 (3) Mechanics of Composite Materials
Introduces various kinds of composite materials, composite fabrication
techniques, the physical and mechanical behavior of composites, and
analytical and experimental methodologies.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4183
Requisites: Restricted to any College of Engineering and Applied Science
graduate students or to Mechanical Engineering undergraduate majors
only.
Additional Information: Departmental Category: Solids

MCEN 5193 (3) Design of Coffee
Serves as an introduction to how engineers use their disciplinary training
to approach and solve problems outside of the traditional confines of
their discipline, as illustrated by the roasting and brewing of coffee. In
addition to focusing on the science, engineering and craftsmanship of
making a cup of coffee from bean to cup, we will also study the global
sourcing and sustainability aspects of coffee.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4193
Requisites: Restricted to any College of Engineering and Applied Science
graduate students or to Mechanical Engineering undergraduate majors
only.

MCEN 5194 (3) Electrochemical Energy Conversion and Storage
Presents the fundamentals, principles and experimental techniques of
electrochemistry, the background of ionic or electronic conduction of
metal, semiconductor, inorganic and polymer materials and applications
in the areas of batteries, fuel cells, electrochemical double layer
capacitors, electrochemical photonics, sensors and semiconductor
electrochemistry.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4194
Recommended: Prerequisites: MCEN 2024 and MCEN 3032.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Materials
MCEN 5195 (3) Bioinspired Robotics
Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4195
Requisites: Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) majors with 57+ credits (Junior or Senior).
MCEN 5208 (1-4) Special Topics
Credit hours and subject matter to be arranged.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to undergraduate or graduate Mechanical Engineering students only.
Additional Information: Departmental Category: Miscellaneous
MCEN 5228 (1-4) Special Topics in Mechanical Engineering
Subject matter to be selected from topics of current interest.
Repeatable: Repeatable for up to 30.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) majors with 57+ credits (Junior or Senior).
Additional Information: Departmental Category: Miscellaneous
MCEN 5231 (3) Computational Fluid Dynamics
This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy, and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4231
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
MCEN 5255 (3) Design for Mfg
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Design
MCEN 5258 (1-3) Sp Tpcs-Combustion Seminar
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Special Topics
MCEN 5279 (3) Aesthetics in Design
Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5279 and MCEN 4279 and ATLS 4279
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
MCEN 5291 (1-2) Project Based Learning in Rural Schools
Focuses on the use of low cost air quality monitoring tools, dubbed Pods, to implement PBL curriculum in high school environmental science classes in rural communities in Colorado. Each student will be paired with a high school class and will serve as curriculum and technology advisors as well as science experts. During the fall semester, students will be trained to effectively work in those roles and will also travel to their schools to be introduced. During the spring semester, students will support high school teachers in implementing an existing PBL air quality curriculum with the Pods. This will include monthly visits to schools in the spring and reporting back to the class. Enrollment during Fall is required for enrollment during Spring. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4291
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
MCEN 5292 (3) Materials and Devices in Medicine
The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Rec
Requisites: Requires prerequisite course of MCEN 4117 or MCEN 5117 (minimum grade C). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
MCEN 5293 (3) Mechanics of Soft Matter
Provides a general overview of fundamental concepts behind the mechanical behavior of soft matter. The term soft matter (which includes polymers, colloids, liquid crystals and surfactants, to name a few) is typically used to describe classes of materials whose structural unit is much larger than atoms, making their response more complex and often richer that of traditional solids. The objective of this class is to understand how chemical and mechanical forces between these small units yield macroscopic behaviors that one can observe in everyday life. Key engineering applications will also be discussed.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4293
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Recommended: Prerequisite knowledge comparable to that gained through MCEN 2063.

MCEN 5298 (3) Introduction to Polymers
Polymers represent a major class of engineering materials that are used by mechanical engineers. In this class, we will discuss the most fundamental concepts regarding polymeric materials. Topics include synthesis/manufacturing and chemical properties of polymers, statistical properties of polymer chains, multiphase polymers including polymer solutions and polymer blends, crystallization and glass transition of polymers, and viscoelastic properties of polymers.
Equivalent - Duplicate Degree Credit Not Granted: MCEN 4298
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Recommended: Prerequisite knowledge comparable to that gained through MCEN 2024.

MCEN 5299 (3) Household Energy Systems
Cooking, heating and lighting in the developing world often involves inefficient and incomplete combustion of solid or liquid fuels. The Global Burden of Disease Study in 2010, ranked this combustion as the 4th largest risk factor, causing 4 million premature deaths per year. There is a strong societal need to tackle this problem. Students leaving this course will be able to meet this need as they will have the skills to assess existing and new technology used in the developing world for cooking, heating and lighting. The course will cover (1) food conversion chemistry with the focus on increasing useable calories, (2) combustion and heat transfer as related to cooking, heating and lighting, and (3) combustion emissions and stove use assessment. There will be case studies interlaced throughout the content and the bulk of the workload will be homeworks and projects. Recommended prerequisite: knowledge comparable to that gained through MCEN 3022 or concurrent enrollment in MC
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering or Environmental Engineering undergraduate majors only.

MCEN 5448 (3) Linear Systems
Introduces the theory of linear systems, including state space descriptions of dynamic systems, linear spaces, linear mappings, structure of linear operators, stability, controllability, observability, state variable estimation and feedback control methods.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5448
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Recommended: Prerequisite MCEN 4138 or MCEN 5138 and strong foundational knowledge of linear algebra and differential equations.

MCEN 5488 (3) Geometric Control Theory
Introduce geometric approaches to study dynamical control systems over manifolds. Cover fundamental control-theoretical results, such as controllability, observability, feedback stabilizability, symmetries and group actions, that are beyond linear control systems. Establish connections between control theory and mathematics, especially topology, differential geometry, Lie groups and Lie algebras. Final project focuses on engineering applications related to students¿ own research interests.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5488

MCEN 5498 (3) Stochastic Control Theory
Introduce a toolbox for dealing with stochastic control systems. Cover topics such as stochastic calculus, linear and nonlinear filtering, and dynamic programming. Discuss system theoretic issues and derive optimal control laws for a variety of stochastic control problems, including, e.g., the separation principle for Linear-quadratic-Gaussian problems. Final project focuses on engineering applications related to students¿ own research interests.
Equivalent - Duplicate Degree Credit Not Granted: ECEN 5498

MCEN 5636 (3) Micro-Electro-Mechanical Systems 1
Addresses issues of micro-electro-mechanical systems (MEMS) modeling, design, and fabrication. Emphasizes the design and fabrication of sensors and actuators due to significance of these devices in optics, medical instruments, navigation components, communications, and robotics. Department consent required.
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

MCEN 5832 (3) Special Topics
Additional Information: Departmental Category: Manufacturing and Systems

MCEN 5833 (3) Special Topics
Additional Information: Departmental Category: Special Topics

MCEN 5848 (1-6) Independent Study
Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. May be repeated for up to 6 total credits.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering graduate students only.

MCEN 5858 (1-6) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

MCEN 5868 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

MCEN 5878 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

MCEN 5888 (1-3) Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Miscellaneous
MCEN 5930 (1-3) Professional Internship
This class provides a structure for Mechanical Engineering graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in ME graduate programs. Department permission required to enroll.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Mechanical Engineering graduate students only.

MCEN 6001 (3) Reacting Flows
Provides an introduction to reacting flows and combustion. Covers chemical kinetics, including global and detailed mechanisms and the variable density flow equations are derived. Relevant non-dimensional parameters and limiting behaviors are discussed. The Rankine-Hugoniot relations are presented and various aspects of diffusion, kinetically dominated and balanced combustion are outlined. Flame structures are discussed, including laminar and turbulent flames, and the Burke-Schumann solution is outlined. The turbulent forms of the motion equations are derived, and the reactive scalar transport equation and mixture fraction variable are presented. The flamelet progress variable approach is outlined, including a comparison of steady and unsteady flamelet models. Specific topics in spray combustion, triple flames, solid-gas reactors and detonations are discussed.
Equivalent - Duplicate Degree Credit Not Granted: ASEN 6001
Requisites: Requires prerequisite course of MCEN 5021 (minimum grade C-). Restricted to College of Engineering and Applied Science graduate students or BS/MS Concurrent Degree Students only.
Additional Information: Departmental Category: Fluids

MCEN 6184 (3) Structure and Properties of Polymers
Emphasizes the relationships between molecular structures and macroscopic properties of polymers. Structural aspects include chain conformation, configuration, and the crystalline and amorphous states. Discusses physical, mechanical and dynamic properties with a focus on solution and phase behavior, transitions of bulk polymers, and rubber and viscoelastic behavior.
Requisites: Restricted to College of Engineering graduate students only.
Recommended: Prerequisite an intro-level polymer course.
Additional Information: Departmental Category: Materials

MCEN 6228 (1-4) Special Topics in Mechanical Engineering
Subject matter to be selected from topics of current interest.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Engineering graduate students only.
Additional Information: Departmental Category: Materials

MCEN 6489 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Additional Information: Departmental Category: Thesis

MCEN 6595 (1-6) Master's Thesis
Additional Information: Departmental Category: Thesis

MCEN 7221 (3) Turbulence
Hydrodynamic stability theory, equations for turbulent flows, free shear flows and boundary layers, homogeneous and isotropic turbulence, overview of turbulent combustion, reaction kinetics, energy equation, Favre averaging, Pdfs, premixed and nonpremixed flame modeling, and recent developments.
Requisites: Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.
Additional Information: Departmental Category: Fluids

MCEN 7228 (3) Special Topics
Additional Information: Departmental Category: Special Topics

MCEN 8999 (1-10) Doctoral Dissertation
Additional Information: Departmental Category: Thesis

Mechanical Engineering - Master of Science (MS)
The Master of Science Thesis is a degree program that is well suited for students pursuing a career in academia or industry with a research component. MS Thesis students choose from focus areas in air quality, biomedical, design, energy and environment, materials, mechanics of materials, microsystems, and robotics/control. With support from the research advisor, students in this program have the option of smoothly transitioning into the PhD program.

If a student plans to earn a master's degree and then immediately continue on to a PhD, they can apply directly to the PhD program (p. 1610); it is not necessary to earn a master's degree separately.

For more information, visit the department's Master of Science Thesis (https://www.colorado.edu/mechanical/current-students/graduate/master-science-thesis/) webpage.

Bachelor's–Accelerated Master's Degree Program
Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU
Boulder undergraduate students the opportunity to earn a bachelor’s and master degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s). BSEV in Environmental Engineering (p. 776)

Requirements
The mechanical engineering Master of Science Thesis curriculum is designed to provide a balance between a modern technological focus and disciplinary depth.

Students must complete at least 30 graduate-level credit hours, to include at least 18 credits in mechanical engineering, including 6 credits of thesis work. Up to 12 credits may be taken outside of the department.

Students must secure a thesis advisor for research and course guidance, and students must attend a select number of mechanical engineering graduate seminars.

For more information, visit the department’s MS - Thesis Option (http://www.colorado.edu/mechanical/current-students/graduate/master-science-msme/ms-thesis-option/) webpage.

Mechanical Engineering - Professional Master of Science (MSME)

The Master of Science Professional is a degree program that offers possibilities for a wide range of prospective students. This coursework-focused degree program emphasizes both project-based and curriculum-driven learning. It is targeted at working engineers and undergraduates considering or already pursuing a career in industry, but can also be completed with the ultimate goal of matriculating in a PhD program.

A thesis is not required to earn this degree. If a student plans to earn a master’s degree and then immediately continue on to a PhD, they can apply directly to the master’s degree and then immediately continue on to a PhD. The best way to do that is by following an MS thesis curriculum (see the department’s Master of Science - Thesis Option (http://www.colorado.edu/mechanical/prospective-students/graduate/master-science-thesis-option/) webpage).

PhD students consult with a faculty advisor throughout the duration of their degree to review their research progress and course selection.

For more information, visit the department’s PhD (http://www.colorado.edu/mechanical/prospective-students/graduate/phd/) webpage.

Requirements
Course Requirements
The PhD requires a minimum of 30 credit hours of coursework in courses numbered 5000 or above, with a minimum GPA of 3.25, plus 30 credit hours of dissertation credit. More coursework may be required at the faculty advisor’s discretion.

A maximum of 21 credit hours of graduate coursework may be transferred from another accredited institution. All courses taken for the master’s degree at the 5000 level or above at CU Boulder may be applied toward the doctoral degree at the university.

For more information, visit the department’s PhD (http://www.colorado.edu/mechanical/prospective-students/graduate/phd/) and Focus Areas (http://www.colorado.edu/mechanical/research/focus-areas/) webpages.

Preliminary Examination
Every student desiring to pursue the PhD degree must pass a preliminary examination. As a part of this evaluation, students must pass a written math examination, as well as two oral examinations designed to test research and fundamental mechanical engineering competency. Students must also pass a research presentation given to a committee of at least three faculty members. Overall performance in the required examinations will determine pass/fail status.

Comprehensive Examination
After passing the preliminary examination, students continue their coursework and prepare a written thesis prospectus. When ready, they take an oral comprehensive examination covering the graduate coursework and the thesis prospectus. The oral examination is based
primarily on a written proposal for the thesis research provided by the student to committee members in advance. This examination is conducted before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School.

PhD Dissertation
Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student’s doctoral committee.

Time Limit
All requirements for the mechanical engineering PhD must be completed within six years of the date of commencing coursework.

Interdisciplinary Programs
CU Boulder offers interdisciplinary master's degrees as well as graduate certificate programs to complement a traditional education.

New graduate certificates must be approved by the Graduate School’s Executive Advisory Council (EAC). For an updated list of graduate interdisciplinary certificates, visit the Graduate School Admissions webpage. For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

• Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 802)
• Computer Science - Bachelor of Arts (BA) (p. 795)
• Computer Science - Bachelor of Science (BSCS) (p. 799)
• Linguistics - Bachelor of Arts (BA) (p. 448)

Certificates
• College Teaching - Graduate Certificate (p. 1620)
• Data Science - Graduate Certificate (p. 1615)
• Data Science - Graduate Certificate (Online) (p. 1618)
• Digital Humanities - Graduate Certificate (p. 1620)
• Earth Data Analytics - Foundations - Graduate Certificate (p. 1621)
• Future Faculty Development - Graduate Certificate (p. 1622)
• Hydrologic Sciences - Graduate Certificate (p. 1622)
• Interdisciplinary Quantitative Biology - Graduate Certificate (p. 1624)
• International Affairs - Graduate Certificate (p. 1624)
• Native American and Indigenous Studies - Graduate Certificate (p. 1626)
• Quantitative Methods for Behavioral Sciences - Graduate Certificate (p. 1627)
• Satellite System Design - Graduate Certificate (p. 1627)
• Space Weather and Applications - Graduate Certificate (p. 1628)
• Water Engineering and Management - Graduate Certificate (p. 1629)

Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS)
This is a unique interdisciplinary degree that provides a solid foundation in both computer science and linguistics graduate coursework as well as several courses focused on data-driven linguistics, computational linguistics and information processing. The training is aimed at preparing students for careers in areas such as predictive text messaging, search engines, question-answering, interactive virtual agents and machine translation.

Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly. Due to the hands-on learning experience, some courses must be taken on campus. This is a hybrid program.

Bachelor’s–Accelerated Master's Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s):

• Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 802)
• Computer Science - Bachelor of Arts (BA) (p. 795)
• Computer Science - Bachelor of Science (BSCS) (p. 799)
• Linguistics - Bachelor of Arts (BA) (p. 448)

Requirements
Students must complete at least 32 hours of approved graduate study, including a 2-credit capstone course focused on a publishable research project, which will run in conjunction with an internship or a CU-based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will also prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. A minimum course grade is a B and a minimum GPA for graduation is a 3.0.

To fulfill core requirements defined below, students must take graduate breadth courses in 3 different breadth bins. This includes core computer science (bins 1 and 3) and core CLASIC (bin 2).

Required Courses and Credits

or LING 6450  Syntactic Analysis
LING 5430  Semantics and Pragmatics

Choose one:
Any LING course at the 5000-, 6000- or 7000-level (subject to advisor approval)

**Core Computer Science Courses** 6

*Bin 1 (choose one)*

Recommended options:
- CSCI 5454  Design and Analysis of Algorithms
- or CSCI 5444  Introduction to Theory of Computation
- or CSCI 5714  Formal Languages
- CSCI 5606  Principles of Numerical Computation
- or CSCI 5646  Numerical Linear Algebra

*Bin 2 (choose one)* 4

Recommended options:
- CSCI 5253  Datacenter Scale Computing - Methods, Systems and Techniques
- CSCI 5448  Object-Oriented Analysis and Design
- CSCI 5535  Fundamental Concepts of Programming Languages

**CLASIC Capstone** 2

- LING/CSCI 5140  CLASIC Capstone

**Core CLASIC Courses**

- CSCI/LING 5832  Natural Language Processing (Required for everyone. Satisfies Bin 2 requirement)

Choose two of the following:
- CSCI 7000/LING 7800  Current Topics in Computer Science (Topics: Computational Lexical Semantics or Computational Models of Discourse)
- CSCI/LING 7565  Computational Phonology and Morphology

Choose two of the following:
- CSCI 5352  Network Analysis and Modeling
- CSCI 5502  Data Mining
- CSCI 5622  Machine Learning
- CSCI 5922  Neural Networks and Deep Learning
- CSCI 6622  Advanced Machine Learning
- CSCI 7000  Current Topics in Computer Science (Inference, Models & Simulation for Complex Systems)
- CSCI 7222  Topics in Nonsymbolic Artificial Intelligence (Probabilistic Models of Human & Machine Intelligence)
- CSCI 7222  Topics in Nonsymbolic Artificial Intelligence (Representation Learning for Language)
- LING 5200  Introduction to Computational Corpus Linguistics
- LING 5800  Open Topics in Linguistics (Machine Learning and Linguistics)
- LING 6300/3800  Topics in Language Use (Formal Models of Linguistics)
- LING 6520  Topics in Comparative Linguistics (Computational Grammars)
- PHIL 5440  Topics in Logic

PHIL 5460  Modal Logic

Any other CSCI or LING course at the 5000-, 6000- or 7000-level

Any Core course listed above (not already taken)

**Total Credit Hours** 32

1 Visit the computer science department website (http://www.colorado.edu/cs/current-students/graduate-students/graduate-breadth-courses/) for a full list of course options in each of the 3 breadth bins. (Updated every two years.)

**Learning Outcomes**

The program is intended to:

- Provide a solid foundation in computer science, data-driven linguistics and natural language processing graduate coursework.
- Educate graduates to be specialists in the application of computers to the processing of natural languages, such as English, Chinese, Arabic and Urdu.
- Prepare students for jobs in the field of computational linguistics, also known as text analytics, natural language processing and informatics, a field critical to the success of mainstream global businesses who compete for employees qualified to address these needs.

**Data Science - Master of Science (MS)**

The on-campus Master of Science in Data Science program focuses on developing knowledge and skills in interdisciplinary and collaborative data science competencies including statistical analysis, data structures and algorithms, data mining, machine learning, big data architecture and data visualization.

Data science is a multidisciplinary field that focuses on the extraction of knowledge and insight from large datasets. Data scientists are tasked with using a range of skills in applied mathematics, statistics and computer science, and in domain applications such as information science, geography, business, media and the humanities.

The MS-DS provides learners with a strong foundation in acquiring, cleaning and managing data. Learners will learn to analyze large datasets using data mining and machine learning techniques. Students will also design, conduct and run statistical experiments and models; draw rational conclusions from data using probability theory and statistics; and more.

Graduates of the MS-DS program will be well-prepared to apply data science skills to a specific domain area. Graduates will also be able to clearly communicate the results of data science analysis to a non-technical audience; structure effective meetings and projects using collaboration skills; and act ethically in the role of professional data scientist.

**Topic Areas**

**Applied Mathematics**

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology,
nonlinear phenomena, physical applied mathematics, and probability and statistics.

**Computer Science**

Computer science is an exciting and challenging field that impacts many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and they advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

**General Data Science**

Data science is a multidisciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from structured and unstructured data.

**Information Science**

Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena and translate those findings to the design and development of useful and meaningful technology.

**Bachelor's–Accelerated Master's Degree Program**

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 800)
- Computer Science - Bachelor of Arts (BA) (p. 792)
- Computer Science - Bachelor of Science (BSCS) (p. 796)

**Requirements**

**Admission Requirements**

Applicants are eligible to apply to the program if they have earned a bachelor's degree or its equivalent from a regionally accredited college or university. Applicants must show promise of their ability to pursue advanced study and research, as judged by the student's scholastic record. Applicants must have a minimum of a 2.75 cumulative GPA in their prior degree program to be considered. International students may have country-specific requirements and/or English proficiency requirements.

Strong applicants will also have an undergraduate GPA of 3.2 or higher on a 4.0 scale (3.0 = B)

**Prerequisite Knowledge**

Applicants with the following prior knowledge or equivalent experience are eligible for admission to the Direct to Data Science Pathway and can complete the degree with 30 total credits:

- Mathematics:
  - Applicants should be familiar with differential calculus (including derivatives), integral calculus, linear algebra, and have some experience with infinite sequences and series. Multivariate calculus is preferred but not required.

- Programming:
  - Applicants should have some programming experience, whether it is formal, informal or on the job. Some advanced knowledge of R is also helpful before starting the program.

Applicants without the specific math and programming experience above are eligible for admission to the Bridge to Data Science Pathway and can complete the degree with 30–34 total credits as determined by the graduate committee upon a review of the student's prior experience.

**Potential Additional Curriculum**

The graduate committee may require students in this pathway to complete one or more of the following courses (up to 7 credits). Courses should be taken in the first year and are subject to Graduate School grade and cumulative GPA standards. Up to 3 hours of bridge courses which meet applicable standards can count toward the degree in the electives category.

- INFO 5651 Fundamental Concepts in Data Science (3)
- INFO 5652 Statistical Programming in R (3)
- DTSC 5003 Programming for Data Science - Python for Data Science (1)

**Application Requirements**

To apply, applicants must submit the following:

- A completed graduate admission application
- An application fee
- Unofficial undergraduate transcripts and, if applicable, any graduate transcripts
- A statement of purpose that briefly describes the applicant's background, academic goals, and professional goals
- Two to three letters of recommendation
- A current curriculum vitae or resume

An applicant whose native language is not English must provide proof of English proficiency by submitting documents. A TOEFL score of at least 80, IELTS score of at least 6, or Duolingo score of at least 100 is required. To report TOEFL and IELTS scores, students should request that the testing agency submit scores directly to the Office of Admissions. They can also ask the agency to automatically submit TOEFL scores to CU Boulder using institution code 4841. To report official Duolingo scores, click Send Results from inside the application, then choose University of Colorado Boulder—Undergraduate.

See the Data Science website for details about application deadlines.

For information about application deadlines, please see the Graduate School's Admissions Deadlines [here](https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/).
Program Requirements

The on-campus data science master’s degree seeks to shape tomorrow’s leaders by providing learners with the skills, competencies and knowledge necessary to fuel creative problem-solving, adaptability, and the capability to communicate effectively across diverse organizations.

The MS degree is a non-thesis degree, though students may have the opportunity to complete a capstone or project as part of the 30 required credit hours. Students in the Bridge to Data Science Pathway may be required to complete up to 4 additional credits as determined by the graduate committee upon a review of the student’s prior experience.

All students must complete 21 credits of core coursework in statistics, computer science and general core concepts as well as 9 credits of elective coursework. The degree does not require a master’s final/comprehensive examination.

Total Credit Hours: 30

1 Intro to Statistical Learning (STAT 5600); Datacenter Scale Computing (CSCI 5253) or Big Data Architecture (ATLS 5214); Information Visualization (INFO 5602)

Learning Outcomes

- Acquire, clean, wrangle, and manage data
- Correctly perform exploratory data analysis in order to assist with the generation of scientific hypotheses
- Apply principles and methods of probability theory and statistics to draw rational conclusions from data
- Construct an appropriate statistical model in order to answer important scientific or business-related questions
- Assess the validity of a statistical model when applied to a particular dataset
- Use statistical techniques to design an experiment
• Understand and be able to apply the main computational techniques used to analyze large data sets, including a variety of data mining and machine learning approaches
• Understand the principles of computer representation, storage and access of large data sets and be able to determine the appropriate approaches for specific problem
• Clearly communicate the results of a data science analysis to a non-technical audience

Data Science - Master of Science (MS) Online

The online Master of Science degree in Data Science (MS-DS) on Coursera is an interdisciplinary degree program offered through the University of Colorado Boulder and hosted online through Coursera’s learning platform. With performance-based admissions and no application process, the MS-DS is ideal for individuals with a broad range of undergraduate education and/or professional experience in computer science, information science, mathematics and statistics.

Data science is a multidisciplinary field that focuses on the extraction of knowledge and insight from large datasets. Data scientists are tasked with using a range of skills in applied mathematics, statistics, and computer science, and in domain applications such as information science, geography, business, media and the humanities.

The MS-DS on Coursera provides learners with a strong foundation in acquiring, cleaning and managing data. Students will learn to analyze large datasets using data mining and machine learning techniques. Students will also design, conduct, and run statistical experiments and models; draw rational conclusions from data using probability theory and statistics; and more.

Graduates of the MS-DS on Coursera program will be well-prepared to apply data science skills to a specific domain area. Graduates will also be able to clearly communicate the results of data science analysis to a non-technical audience; structure effective meetings and projects using collaboration skills; and act ethically in the role of professional data scientist.

Topic Areas

General Data Science
Data science is a multidisciplinary field that uses scientific methods, processes, applications, algorithms and systems to extract knowledge and insights from structured and unstructured data.

Applied Mathematics
The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics.

Computer Science
Computer science is an exciting and challenging field that has an impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

Information Science
Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena, and translate those findings to the design and development of useful and meaningful technology.

Program Policies
This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1791) section of the catalog for more information.

Requirements

Admission Requirements
Students are automatically admitted to the degree program after meeting all admission requirements below. All admitted students receive an official offer letter via email. See the program website for details.

• Pass one pathway with a pathway GPA of 3.0 or higher
• Earn a C or better in all pathway courses within their chosen pathway
• Earn an overall cumulative GPA of 3.0 or higher
• Indicate interest in degree admission (via the enrollment form)

Performance-Based Admission
To be admitted to the MS-DS on Coursera as a degree-seeking student, students must enroll in and complete a pathway specialization with a 3.00 GPA or better. A pathway specialization#(or “pathway”) is a series of 3 one-credit courses with a focus on either statistics or computer science—students choose the pathway that is right for them. Pathway courses are an important part of the required curriculum, so students make direct progress toward their degree as they complete their pathway.

Prerequisite Knowledge
There are no formal prerequisites for the MS-DS on Coursera, but students should be knowledgeable in the following:

• Python
• R programming
• Calculus including derivatives and integrals
• Linear algebra including matrix multiplication, matrix inversion and solving linear systems using matrices

If students do not yet feel ready to complete their pathway courses, the program suggests reviewing courses on the Coursera platform. Students can enroll in a pathway specialization as a non-credit learner, which gives them the option of previewing course content. Then, they can upgrade to the for-credit version and pay tuition when they are ready.

Required Courses and Credits
The MS-DS is a non-thesis degree that requires 30 credit hours of coursework. Students must complete 21 credits of core coursework in statistics, computer science, and general core concepts as well as 9 credits of elective coursework. Students will also participate in practical,
hands-on projects that utilize cloud-based programming environments and Jupyter Notebooks. Coursework includes access to real-world big data sets to prepare students for their future careers.

**Learner Journeys**

Students may complete courses in any order, but are advised to follow one of the recommended learner journeys below.

**Statistics Pathway**

We recommend that students who are skilled in statistics complete their courses in the following order:

<table>

**Engineering Management Electives**

Up to 6 credits offered by the ME-EM on Coursera from the list of courses below may be applied as elective credit toward the Data Science MS degree. Courses must be graduate level and meet all applicable academic standards, and may not be double counted toward two credentials of the same level. Only courses offered through Coursera may be used.
Data Science - Graduate Certificate (Online)

The Master of Science in Data Science program hosted online through the Coursera platform offers stackable graduate-level courses, a graduate certificate, and a fully accredited master's degree in data science. Students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts or diplomas.

Program Policies
This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1791) section of the catalog for more information.

Program Requirements
Admission Requirements
There are no admission processes for learners seeking to earn the Data Science Graduate Certificate.

All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

Prerequisite Knowledge
There are no formal prerequisites for the Data Science Graduate Certificate, but we recommend that prospective students be knowledgeable in Python, R Programming, Calculus including derivatives and integrals, and Linear Algebra including matrix multiplication, matrix inversion, and solving linear systems using matrices. If they are not, we encourage them to try out non-credit coursework before attempting for-credit courses.

Required Courses and Credits
To earn the Data Science Graduate Certificate (12 credits), students must complete the following required specializations:

• Data Mining Foundations and Practice (3 credits)
• Data Science Foundations: Statistical Inference (3 credits)

As well as two specializations from the following:
• Introduction to Statistical Learning for Data Science (3 credits)
• Machine Learning (3 credits)
• Statistical Modeling for Data Science (3 credits)

In order to earn a certificate, students must receive a minimum grade of a C or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.

The Data Science Graduate Certificate requires 12 credit hours of coursework. Students must complete the following required courses:

<table>
<thead>
<tr>

</tbody>
</table>

Total Credit Hours 12

Learning Outcomes
• Acquire, clean, wrangle, and manage data
• Correctly perform exploratory data analysis in order to assist with the generation of scientific hypotheses
• Apply principles and methods of probability theory and statistics to draw rational conclusions from data
• Construct an appropriate statistical model in order to answer important scientific or business-related questions
• Assess the validity of a statistical model when applied to a particular dataset
• Use statistical techniques to design an experiment
• Understand and be able to apply the main computational techniques used to analyze large data sets, including a variety of data mining and machine learning approaches
• Understand the principles of computer representation, storage and access of large data sets and be able to determine the appropriate approaches for specific problem
• Clearly communicate the results of a data science analysis to a non-technical audience

Organizational Leadership - Master of Science (MS)
The Master of Science in Organizational Leadership is an interdisciplinary, fully online professional master's degree that prepares early- to mid-career professionals to succeed as tomorrow’s dynamic leaders. Through coursework that blends business, communications and social sciences, the program develops the knowledge and skills students need to think critically about organizational challenges and how to address them using best practices. Students learn to align others around a shared vision, build and manage effective teams, and apply the leadership skills necessary to excel in an increasingly fast-paced and complex working world.

For more information, visit the Master of Science in Organizational Leadership (http://msol.colorado.edu/) webpage.

Requirements
Students must complete at least 30 credit hours of graduate coursework. The program is composed of 10 courses: six core courses and four specialized track courses.

Core Courses
Core courses ensure that students have the necessary understanding of the complexities of organizational leadership and the varied dimensions of change within the context of public, private and nonprofit organizations. The curriculum prepares graduates to be successful in understanding organizational cultures, anticipating and managing change, and enhancing performance and human capital management. Core courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ORGL 5005</td>
<td>Leadership and Organizations</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5010</td>
<td>Leading Change and Innovation</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5015</td>
<td>Analytics and Data-Driven Decision Making</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5020</td>
<td>Strategic Communication</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5025</td>
<td>Performance Management</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 6830</td>
<td>Master’s Capstone (MSOL)</td>
<td>3</td>
</tr>
</tbody>
</table>

The purpose of the capstone, the final course of the program, is for students to apply knowledge and skills acquired during their program to addressing actual challenges facing an organization. Students do this—under the guidance of the instructor and other subject matter experts—by collecting, processing and analyzing data and information about the organization and applying appropriate analytic methods to develop, propose and substantiate their recommended solution to the organization's problem.

Specialized Track Courses
Students may choose to specialize in one of the following tracks.

Human Resources Track
This track is ideal for students who wish to enter or advance a career in Human Resources or who want to focus on enhancing employee satisfaction and organizational performance as they assume increasing management and leadership responsibilities. Courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ORGL 5105</td>
<td>Negotiation and Conflict Resolution</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5110</td>
<td>Human Resources Law</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5115</td>
<td>Total Rewards Strategies</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5120</td>
<td>Training and Development</td>
<td>3</td>
</tr>
</tbody>
</table>

Strategic Leadership Track
This track is geared for students who want to hone their ability to think, plan, and operate strategically, lead personnel in the allocation of organizational resources and accomplish organizational objectives in a deliberate and systematic manner. Courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ORGL 5205</td>
<td>Strategic Planning in Organizations</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5210</td>
<td>Competitive Analysis and Positioning</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5215</td>
<td>Organizations and the Law</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5220</td>
<td>Operations and Designs of Organizations</td>
<td>3</td>
</tr>
</tbody>
</table>

Leading Innovation Track
The leading innovation track explores leadership at the intersection of business and innovation and helps students learn to drive strategic organizational transformation. It addresses the gap that exists between the aspirations of executives to innovate and their ability to execute. It focuses on the question: why and how should leadership, innovations and technologies be leveraged to shape and support strategic and entrepreneurial initiatives in the global competitive landscape. Courses include:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ORGL 5305</td>
<td>Leadership and Intrapreneurship</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5310</td>
<td>Design Thinking</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5315</td>
<td>Strategy and Innovation</td>
<td>3</td>
</tr>
<tr>
<td>ORGL 5320</td>
<td>Building and Leading Innovative Work Teams</td>
<td>3</td>
</tr>
</tbody>
</table>

Organizational Communication Track
Communication is the key social process that creates and sustains all features of organizational life—including assumptions about power, knowledge, diversity, culture and teamwork that shape the practice of leadership. The organizational communication track offers a perspective that puts communication at the center of our understanding and explanation of all organizational and leadership phenomena. Courses include:

<table>

<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ORGL 5405</td>
<td>Diversity and Organizational Communication</td>
<td>3</td>
</tr>
</tbody>
</table>
The digital humanities graduate certificate welcomes students from all disciplines, including the humanities and arts, social sciences, natural sciences, computational and mathematical sciences, engineering, and communication, media and information science. The certificate prepares students to:

- create, utilize and evaluate digital methods and tools for research;
- integrate methods and tools into their teaching;
- assess the diverse impacts of technologies on people and society;
- leverage digital technologies for public outreach and engagement.

Through an interdisciplinary curriculum, the certificate provides graduate students from across campus the opportunity to explore the evolution and variety of digital humanities theories and practices and to study approaches in the field in-depth. Moreover, the certificate is intended to stimulate collaborations among graduate students in a range of fields, thus preparing them for work in a team-based environment.

For additional details, including the procedures to declare and complete the certificate, visit the Digital Humanities Graduate Certificate (https://www.colorado.edu/crdds/dhgc/) webpage.

### Requirements

#### Required Course and Credits

The certificate consists of course requirements only, at least 9 credit hours at the graduate level with an average GPA of 3.0 (B) or better.

In addition to the core course, students must choose two elective courses to complete the certificate. Certain special topics courses also count as electives. For a full list, please visit the certificate website’s Elective Courses (https://www.colorado.edu/crdds/what-we-do/digital-scholarship/digital-humanities-graduate-certificate/elective-courses/) webpage.

Capstone Project
Though not required to complete the certificate, students may also complete a 1-3 credit Digital Humanities capstone project in collaboration with other students under the guidance of a faculty advisor.

Earth Data Analytics - Foundations - Graduate Certificate

The Earth Data Analytics - Foundations (https://earthlab.colorado.edu/earth-data-analytics-professional-graduate-certificate?utm_source=course-catalog&utm_medium=website&utm_campaign=certificate-2019) professional certificate provides students with skills to launch or advance their careers in the rapidly expanding world of earth data science. The three-course program can be completed online at a student’s own pace or in person in as little as ten months. Students do not need any background in programming or science to enroll.

Data are becoming increasingly available as technology grows and improves. This data can help address some of the world’s most pressing environmental problems. As a result of this, earth and environmental scientists with data science expertise (earth data scientists) are now in high demand in the job market. All skills taught in the program are identified through market research on in-demand skills in industry and government.

Through this nine-credit program students will learn:

• Applied data science skills
• Skills needed to work with different types of data
• Interdisciplinary communication & collaboration techniques and approaches
• Skills needed to address scientific challenges using data

Students will emerge from the program with skills in:

• Scientific programming
• GIS and remote sensing
• Using APIs
• Creating automated workflows using data that anyone can use
• Open reproducible science
• And more

Visit the Earth Lab website (https://www.earthdatascience.org/) to explore lessons and tutorials related to this program.

Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements
The professional graduate certificate requires three sequential courses beginning in the fall semester and ending in June, and can be completed entirely online.

Required Courses and Credits

</tr>
</tbody>
</table>

Total Credit Hours: 9

Visit the Earth Lab website (https://www.earthdatascience.org/) to explore lessons and tutorials related to this program.
Through completing the certificate, students will learn to:

- Apply data science skills to scientific challenges related to earth systems.
- Code using Python and Jupyter Notebooks.
- Use the command line and other tools to work with environmental and earth systems data.
- Use version control systems like Git and GitHub to work collaboratively as well as back-up and document workflows.
- Use different data types and formats including GIS, remote sensing, social media, text, time series, and more.
- Communicate and collaborate with people across different disciplines using different tools.
- Create fully automated and reproducible data workflows.

**Environmental Justice - Graduate Certificate**

Environmental justice (E.J) refers to the right to a safe and healthy environment for everyone, regardless of race, class, gender, ability or other considerations, as well as a place at decision-making tables. From this perspective, the environment is not separate from society, but includes spaces where people live, work, play, learn and/or pray.

The CU Boulder graduate certificate in environmental justice provides training in the interdisciplinary and dynamic field of environmental justice studies, as well as opportunities for engaged interactions with the challenges and solutions environmental justice communities face today.

The certificate program is open to CU Boulder graduate students from all units and programs, and seeks to include scholars and practitioners from diverse disciplinary and experiential backgrounds in its development.

For more information, visit the Graduate Certificate in Environmental Justice (https://www.colorado.edu/certificate/ ej/) website.

**Requirements**

Students must complete 12 credits, including the 3-credit pillar course and three approved electives.

**Future Faculty Development - Graduate Certificate**

The future faculty development certificate (FFD) allows graduate students and postdoctoral scholars who do not teach the chance to do a project to learn about postsecondary teaching or institutions.

The certificate is sponsored by the Center for Teaching & Learning (https://www.colorado.edu/center/teaching-learning/), which supports graduate students on the Boulder campus and provides continued professional development opportunities. The Center for Teaching & Learning prepares graduate students for success on the job market in higher education or in the private sector as professionals.

To that end, we offer:

- Comprehensive college teacher training (workshops on teaching, individual consultation on any aspect of the graduate experience, video consultation on teaching in labs, recitations and courses).
- Workshops and guidance to support the scholarship of teaching and learning.
- Academic and nonacademic career preparation opportunities through conferences, seminars and individual consultations on curriculum vitae, job letters, teaching statements, diversity statements and interviewing skills.

**Requirements**

The certificate is open to all graduate students in good standing.

For more information and completion requirements, visit the Center for Teaching & Learning website's Future Faculty Development webpage (https://www.colorado.edu/center/teaching-learning/programs/graduate-certificates/future-faculty-development-certificate/).

**Hydrologic Sciences - Graduate Certificate**

The CU Boulder hydrologic sciences program focuses on quantitative studies of water in the environment including its role in geologic and biogeochemical processes, ecosystem functions and global elemental cycling. The program is interdisciplinary, interdepartmental and designed to encourage students with a variety of academic backgrounds to enter the field. It is intended for science and engineering graduate students, allowing them to obtain recognition for their accomplishments in...
hydrologic sciences and to demonstrate the quantitative multidisciplinary education desired by many prospective employers.

PhD students can choose to enroll for the hydrologic sciences subplan or graduate certificate and master’s students can pursue a hydrologic sciences graduate certificate, while concurrently obtaining a doctoral or master’s degree, respectively, in a participating academic department. Course requirements are identical for the subplan and certificate.

All hydrologic sciences program students are admitted through one of the participating departments: Atmospheric and Oceanic Sciences (ATOC) (https://www.colorado.edu/ato/academic/graduate-students/); Civil, Environmental and Architectural Engineering (CEAE) (https://www.colorado.edu/ceae/academic/graduate-studies/); Ecology and Evolutionary Biology (EBIO) (https://www.colorado.edu/ebio/graduate-studies/); Geography (GEOG) (https://www.colorado.edu/geo/graduate-curriculum/); or Geological Sciences (GEOL) (https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/). Graduate students may apply for admission (https://www.colorado.edu/program/hydrosciences/graduate-admissions/) to Hydrologic Sciences after admission to one of these departments.

Hydrologic sciences students conduct research within participating departments, research institutes and centers (e.g., INSTAAR (https://instaar.colorado.edu/), or partnering government agency labs in the Boulder area (e.g., USGS (https://www.usgs.gov/), NOAA (https://www.noaa.gov/)). Primary supervision of the student’s research may be provided by any faculty member approved by their department, though the hydrologic sciences program requires representation from hydrologic sciences program faculty on students’ comprehensive exam and defense committees.

For additional information, please visit the program webpage (https://www.colorado.edu/program/hydrosciences/) or contact the Graduate Coordinator (hydrogrd@colorado.edu).

Requirements

- Completion of all hydrologic sciences program courses with a grade of B or better.
- Completion of degree requirements for graduate degree within the student’s home department.
- For the hydrologic sciences graduate certificate: The thesis topic includes substantial use of hydrologic science and the thesis committee includes at least one Hydrologic Sciences faculty member (https://www.colorado.edu/program/hydrosciences/people/faculty/).
- For the hydrologic sciences PhD subplan: The dissertation committee includes at least two Hydrologic Sciences faculty member (https://www.colorado.edu/program/hydrosciences/people/faculty/).

Students are referred to the documents "Graduate School Checklist for Graduation and Other Helpful Information (https://www.colorado.edu/graduate-school/academic-resources/graduation-requirements/)" and the University Catalog for general information on requirements for their degree. In case of a conflict between those documents and the requirements stated here, the rules of the Graduate School apply.

Research Supervision

Primary supervision of the student’s research may be provided by any faculty member approved by the student’s home department.

Course Prerequisites

All students entering the program are expected to have advanced-level knowledge of mathematics, (full year of college level calculus including differential and integral calculus; linear algebra and differential equations are strongly encouraged). Students are expected to have completed one semester of college-level physics (mechanics).

In addition, students are encouraged to work with their advisors and committees to identify and fulfill any other specialized degree and/or research-related required courses. For example, students interested in the physical aspects of hydrologic sciences are expected to have advanced-level knowledge of physics (mechanics and thermodynamics) and fluid mechanics. Similarly, students interested in the chemical aspects of hydrologic sciences may be expected to have advanced-level knowledge of organic and/or physical chemistry, students interested in the biological or ecological aspects of hydrologic sciences are expected to have an advanced-level knowledge of biology and/or ecology.

Students may also need to complete other specific undergraduate prerequisites required by their home department.

Required Courses and Credits

Five courses are required for the hydrologic sciences certificate and PhD subplan. The number of courses is intentionally kept low, so that the student is free to design an overall academic program that meets their needs in terms of specialized scholarly interests. Hydrologic sciences courses are included in the minimum semester hours required for all graduate students. The coursework is designed to assure competency in appropriate subject matter at the graduate level.

The five courses are required, as follows:

- One course from List A
- One course from List A or B
- Three elective courses

Interdisciplinary Quantitative Biology - Graduate Certificate

The Interdisciplinary Quantitative Biology (IQ Biology) PhD Certificate Program is designed for students in life sciences, engineering, computer science, and applied mathematics who are interested in learning the essential competencies of researchers who work and collaborate effectively across disciplines, and want to unravel the complexity of biological systems. These competencies are attained in a number of ways, including integrative coursework, lab rotations, team science, internships and outreach activities.

Requirements

Core Courses

These courses cover cutting-edge quantitative techniques, and include one course in the fall and two courses in the spring. IQ Biology core courses count simultaneously toward a student's chosen academic department's electives. Core courses have included topics like quantitative optical imaging, mathematical and computational biology, bioinformatics and genomics, biologically-inspired multi-agent systems, and biophysics.

Gap-Filling Courses

Students take one to three courses outside of their primary discipline(s). These courses allow students to explore other areas of quantitative biology and fill any "gaps" in their background to benefit their future interdisciplinary research.

Lab Rotations

Students rotate through four different research labs in at least two different disciplines. These rotations allow students to explore their interests, learn new techniques and work with prospective thesis advisors.

Additional Coursework and Research

During the second year, students begin taking the courses required by their chosen academic department, and those advised by their departmental thesis committee.

Engagement

While pursuing the PhD degree, IQ biology student remain engaged with the IQ biology program by:

- Volunteering in academic outreach and teaching projects.
- Pursuing industry or government internships.
- Attending seminars with the IQ biology community, as well as meeting with the speaker.
- Developing and presenting research in a student-run IQ biology symposium on campus.
- Mentoring or tutoring new IQ biology students.
- Attending social gatherings held for the entire IQ biology community.

After completing all program requirements, graduating students will receive a certificate in Interdisciplinary Quantitative Biology in addition to their PhD from their chosen academic department.

International Affairs - Graduate Certificate

The graduate certificate in international affairs allows currently matriculated graduate students across CU Boulder to examine global issues and position their own graduate research in a global context. It will also allow graduate students in specific disciplines to study international
affairs in an interdisciplinary way and with access to courses across the social sciences, humanities and natural sciences.

**Requirements**

**Admission Requirements**

Students must be enrolled in a graduate degree program at the University of Colorado Boulder. They may apply for the graduate certificate at any point in their graduate career by emailing the International Affairs Program at iafs@colorado.edu with the following:

- A brief essay indicating how their research, professional or creative work, or teaching will relate to international affairs
- A statement of approval from their graduate advisor or graduate program in their home department

Requirements fulfilled at CU prior to admission to the Graduate Certificate in International Affairs may be counted towards certificate requirements.

**Required Courses and Credits**

The certificate requires successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from our list of approved graduate courses. A maximum of 6 credits can be taken from any one discipline. This list is built upon our undergraduate interdisciplinary program and draws from our main cognate units in the Social Sciences, Arts & Humanities, and Natural Sciences divisions, and includes courses taught by faculty on the International Affairs Committee.

Students may request that the IAFS Graduate Director approve courses (including independent study courses) from outside this list, if the course contains significant international content and the student’s completed work for that course is related to international affairs. The courses may be drawn from the Social Sciences, Arts & Humanities, or Natural Sciences divisions in the College of Arts of Sciences, as well as from other schools and colleges at CU Boulder.

In addition to the 9 credit hours of graduate coursework, the certificate requires participation in the International Affairs Colloquium. The colloquium is intended for graduate students to present their works-in-progress for discussion and feedback from faculty and participants. Works-in-progress encompass various aspects of intellectual and professional life. Projects may include academic papers, thesis and dissertation chapters, grant proposals, conference presentations, or job applications. Two semesters of participation in the colloquium will be required. One semester of participation is defined as attendance at a colloquium session and presentation of a work in progress during that semester.

2023-24 University Catalog
Native American and Indigenous Studies - Graduate Certificate

The Center for Native American and Indigenous Studies (CNAIS) offers both a graduate and undergraduate certificate in Native American and Indigenous Studies (NAIS). These certificate programs offer students the opportunity to strengthen their interdisciplinary knowledge and experience in this increasingly important area. The rise of global and scholarly attention to issues of indigeneity signals a larger transformation in conceptions of nation, citizenship, and transnationalism in the context of globalization.

A founding principle of CNAIS is to value and expand upon the connections and interdisciplinary nature of Native American & Indigenous scholarly work. The issues facing Native American and Indigenous peoples today require expertise from multiple disciplines and draw from scholarship in a number of fields, including art & art history, anthropology, ethnic studies, environmental studies, geography, history, law, linguistics, literature, political science, religion and sociology.

CU Boulder has recruited an unprecedented number of faculty working in a wide array of areas related to NAIS, and already enjoys a high national and international reputation in several of these areas. In pursuing the NAIS certificate, students join a vibrant and growing community at CU Boulder, including graduate and undergraduate students and more than 40 professors.

For more information, visit the Center for Native American and Indigenous Studies (http://www.colorado.edu/cnais/) website or contact cnais@colorado.edu.

**Requirements**

This interdisciplinary certificate requires a total of four courses (12 credits). One introductory course (ETHN 6103) is required of all students; the other courses can be taken electively, with the provision that two of the four courses be outside the student’s home department.

Note: some courses listed in the catalog are taught by revolving faculty member who are not affiliated with CNAIS. Catalog course content is subject to change from semester to semester. For questions regarding course sections or more information on approved courses, please visit the department's graduate certificate webpage (https://www.colorado.edu/cnais/certificate-program/graduate-certificate/) or contact cnais@colorado.edu.

**Electives**

At least three of the four required elective courses must be taken outside the student's home department.

**Approved Anthropology Courses**

- ANTH 5045 Introduction to Museum Anthropology
- ANTH 5240 From Olmec to Aztec: The Archaeology of Mexico
- ANTH 5224 Archaeology of the Maya and Their Neighbors
- ANTH 5270 Plains Archaeology
- ANTH 5630 Nomadic Peoples of East Africa
- ANTH 6150 Critical and Theoretical Issues in Museums

**Approved Art and Art History Courses**

- ARTH 6939 Graduate Seminar: Open Topics in Art History (Topic: Visual, Material and Artistic Culture of the Plains and Plateau regions, 1800-1900)

**Approved English Courses**

- ENGL 5169 Multicultural/Postcolonial Studies
- ENGL 7179 Advanced Multicultural/Postcolonial Studies

**Approved Ethnic Studies Courses**

- ETHN 5233 Native American and Indigenous Environmental Issues
- ETHN 5353 Indigenous Traditions and Law: A Global Perspective
- ETHN 6101 Topics: Specialized Comparative Studies (Indigenous Film & Media)
- ETHN 6841 Advanced Directed Readings in Ethnic Studies (Indigenous Topics)

**Approved Geography Courses**

- GEOG 6402 Seminar: Political Ecology

**Approved Law School Courses**

- LAWS 6602 Cultural Property Law
- LAWS 7715 Indigenous Peoples in International Law
- LAWS 7725 American Indian Law I
- LAWS 7735 American Indian Law II
- LAWS 7846 Independent Legal Research (on an American Indian Law topic)
- LAWS 8725 Seminar: Advanced Topics in American Indian Law

**Approved Linguistics Courses**

- LING 7800 Open Topics in Linguistics (Language Revitalization)

**Approved Music Courses**

- MUSC 5112 Proseminar in Ethnomusicology
- MUSC 5142 American Indian Music

**Approved Museum and Field Studies Courses**

- MUSM 5045 Introduction to Museum Anthropology
- MUSM 5912 Collections Research Practicum in Cultural Anthropology

**Total Credit Hours**

12

1 Elective courses not taught by CNAIS core or affiliate faculty must be approved by the CNAIS director.
Quantitative Methods for Behavioral Sciences - Graduate Certificate

The purpose of the graduate certificate in quantitative methods is fourfold:

- to strengthen interdepartmental links and communication among social and human science departments at CU Boulder, both in general and specifically with regards to quantitative research methodology and statistical analysis,
- to provide incentive and recognition to graduate students from a diverse set of departments who choose to cultivate expertise in quantitative research methods and methods of statistical analysis,
- to increase the visibility of and promote courses in quantitative research methods (possibly with the benefit that additional quantitative courses can be developed and taught), and
- as a consequence of all of the above, to improve the quality of quantitative training of graduate students at CU Boulder, increasing students' chances of employment upon completion of their graduate studies.

Requirements

Application Process

1. Review the course requirements below.

2. Complete the application form (https://www.colorado.edu/education/node/3115/attachment/) (see also example form (https://www.colorado.edu/education/node/3113/attachment/)).

3. Review application with the advisor to ensure the courses meet the advisor's expectations for expertise in quantitative methods training.

4. Submit the application electronically—along with all available syllabi and an unofficial transcript—to soe.gradvise@colorado.edu. (allison.atteberry@colorado.edu)

Note: If a student's course plan meets the requirements and all courses have already been completed at the time of application, the student will receive approval for the certificate. If some of the intended coursework will take place in future semesters, then the student will be given "conditional" approval. Once all coursework is completed, the student must submit an updated application that includes an unofficial transcript showing that the courses were satisfactorily completed.

Applications will be reviewed once per semester. Deadlines are Nov. 1 and March 1.

Course Requirements

Students will be awarded the certificate if they complete a two-semester foundational sequence in statistics (e.g., EDUC 8230/EDUC 8240, PSYC 5741/PSYC 5751, SOCY 5111/SOCY 6111) as well as a minimum of four additional courses from the approved list below, at least one of which must be outside the student's home department.

The guidelines serve as a minimum threshold for the application process. However, each student's advisor may require their students to take more than the minimum of 6 courses, or to decide that certain courses are not sufficiently rigorous to count towards the certificate. The application will then be reviewed by a cross-disciplinary committee to evaluate whether the course plan meets the certificate requirements.

1 Students from a department that does not offer a two-semester sequence of this nature are welcome to take one of the three sequences listed above, and are encouraged to contact the instructors of those sequences to determine which of them would provide the best fit.

2 At least one must be outside the student's home department.

Satellite System Design - Graduate Certificate

The certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in Satellite System Design (SSD). It blends courses from the Smead Department of Aerospace Engineering Sciences, Electrical, Computer and Energy

<table>

Engineering and Engineering Management Departments. The certificate allows students to develop interdisciplinary skills in the area of satellite design and be more desirable to potential employers.

This certificate is available to degree-seeking and non-matriculated students. Additional certificate information can be found on the department’s Satellite System Design Certificate (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/satellite-system-design-certificate/) webpage.

Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements
Admissions Requirements

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education or its equivalent.
- Undergraduate courses in calculus, linear algebra and differential equations; two semesters of undergraduate calculus-based physics; and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates (https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificates/) webpage; nondegree-seeking and non-matriculated students may visit the AES Certificates & Continuing Education (https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/) webpage.

Certificate Requirements
Grades of B or higher are required for fulfillment of requirements and certificate award. Students also pursuing other graduate certificates may not use the same courses to count for both certificates.

Program Tracks
The certificate in satellite system design (SSD) offers two track options.

Track 1: Hands-on (recommended for on-campus students.)

¹ Core ASN certificate courses. Cannot be counted for both certificates.
² Course enrollment limited to non-Electrical Engineering students.

Space Weather and Applications - Graduate Certificate

This certificate provides students with interdisciplinary skills in the field of space weather of both fundamental processes in science and practical applications to space-based and ground-based technology.

This certificate is available to degree-seeking and non-matriculated students. Additional certificate information can be found on the department’s Space Weather and Applications Certificate (https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/space-weather-and-applications/) webpage.
Distance Education Option

Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admission Requirements

Total Credit Hours 12

1 Students are required to meet each course’s prerequisites, though exceptions can be made by course instructors.
2 If cross-listed in the student’s home department, a course cannot count as the outside course within the certificate.
3 For courses with rotating topics, a particular offering must be on a topic relevant to space weather in order to count for this certificate. These courses will need approval from the program director.

Water Engineering and Management - Graduate Certificate

The water engineering and management (WE&M) graduate certificate provides students with the tools they need to produce results and solve increasingly complex problems in the water profession. Young and mid-career professionals can build non-technical competencies with courses on leadership, management, communication, finance and governance. Courses are delivered on campus and live streamed/recorded options over the internet, allowing working professionals and distance students from around the world to earn a graduate certificate while continuing to put the learning into practice in their work.

Current students include young and mid-career professionals working for utilities, consulting firms, government and regulatory agencies, and degree-seeking graduate students at CU Boulder. With faculty of senior water professionals from across the country, including those from
utilities, consulting firms and global professional organizations, students gain an opportunity to network and learn through real work case studies. Upon completion of the three core courses and an additional elective, students are granted a certificate by the WE&M program, from the University of Colorado, Department of Civil Environmental and Architectural Engineering. The certificate courses count towards the Civil Engineering - Master of Science (MS) degree or the Engineering Management - Master of Engineering (ME) degree.

### Distance Education Option
Students can take individual courses toward a master’s degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

- Water & Engineering Management Graduate Program (https://www.colorado.edu/ceae/research/interdisciplinary-programs/water-engineering-management/)
- Water & Engineering Management Professional Master's Program (https://www.colorado.edu/ceae/water-engineering-management-professional-masters-program/)
- Water & Engineering Management Graduate Certificate (https://www.colorado.edu/ceae/water-engineering-management-certificate/)

### Requirements
The certificate consists of three required courses plus one elective course, for a total of 12 credit hours.

- PUAD 5631 Seminar in Environmental Politics & Policy 1
- Other electives with permission of WE&M Program Director

Total Credit Hours 12

1 CU Denver course.

### Media, Communication & Information
The College of Media, Communication and Information (CMCI) prepares students for careers as engaged and effective citizens endowed with deep understanding of the historical and contemporary context of human communication and expression. Mindful of the active role communication plays in shaping human relationships, CMCI trains graduates to study and practice constructive interaction among people, communities, industries and publics. The college equips students with the skills needed to produce, gather, archive, curate, analyze and evaluate the flood of information, messages, images, sounds and ideas that populate our complex and rapidly evolving global media landscape.

To these ends, CMCI resourcefully combines disciplines newly extended and empowered by digital media and the social and cultural transformations those media engender. These include established scholarly, creative and professional fields such as media studies, communication, the history and interpretation of film and television, journalism, advertising and video production in its cinematic, documentary and broadcast forms. But the college also houses both the fast-growing field of information science—a discipline that, through inquiry and innovation, tackles the problems and opportunities facing an increasingly networked society—and the emergent disciplines of intermedia art, design, music, writing and performance.

In giving these activities a collaborative home, CMCI facilitates innovative interactions among them. Its academic structure accordingly stimulates cross-disciplinary cooperation at all levels of curriculum, research and creative work. Further, CMCI promotes the transformational exchanges it nurtures within its own walls for campus-wide benefit. Its organization thus fosters outreach to—and student and faculty participation from—other schools, colleges, centers and facilities throughout CU Boulder and the wider Colorado community.

CMCI’s collaborative character is even more visible at the graduate level and in terms of its faculty’s scholarly and creative work. Examples include the doctoral program in information science (p. 1654), the master’s in interdisciplinary documentary media practices (p. 1646), the doctoral program in intermedia art, writing and performance (p. 1656) and the doctoral program in media research and practice (p. 1664), which offers three PhD tracks, each lodged in a different yet related department. CMCI’s signature spirit of collaboration is further reflected in the various centers the college contains:

- the Center for Environmental Journalism (CEJ)
- the Center for Media, Religion and Culture (CMRC)
- the Center for the Study of Conflict, Collaboration and Creative Governance (3CG)

It is also reflected in the close relations the new college hopes to entertain with centers elsewhere on campus—for example, with the Center for Humanities and the Arts (CHA); the B2 Center for Media, Arts and Performance (B2); and the Stan Brakhage Center.

### Statement of Core Skills, Competencies and Scholarly and Creative Initiatives
Given its mission, CMCI attracts students, faculty and industry and creative professionals from across the closely related fields of media, communication and information. All of those either rostered in or affiliated with the new college accordingly share a set of skills, competencies and scholarly and creative interests that form a
common core. This core is expressed at all levels of the college, from undergraduate curriculum and graduate training to the research and creative work of its faculty and both internal and external affiliates.

The Graduate Experience and Faculty Research and Creative Work

CMCI’s collaborative character is even more visible at the graduate level and in terms of its faculty’s scholarly and creative work. A prime example is the doctoral program in media research and practice (p. 1664), which combines the emphases of the participating departments—advertising, public relations and design, journalism and media studies—and encourages students to develop research agendas that bridge disciplines and cross between academic research and professional practice. In addition to creating efficiencies by combining resources, the program underscores the shared technical and intellectual as well as logistical needs of the units involved, turning streamlined administration into scholarly and creative synergy.

Journalists learn from information scholars about the nature and uses of big data while sharing with them their skills in narrative and communication. Members of the communication faculty deepen colleagues’ insights into the underlying forms and principles of organizational, interpersonal and public conversation that structure the worlds in which advertising and strategic communication operate while gaining access from colleagues in these areas to problems and case studies they might have overlooked. Meanwhile, faculty in media studies benefit from direct exposure to the technologies and creative processes explored by media production faculty, offering in return a deeper historical, social and theoretical insight into the way media shape, even as they are shaped by, the wider society they serve.

Centers like CMRC, CEJ and 3CG already harness CU’s exceptional multidisciplinary resources in everything from cultural studies to environmental science and from journalism to media design in focused collaborative initiatives of all sorts. By bringing practitioners in all of these areas together with artists and researchers in information science, media production and intermedia art, writing and performance, CMCI provides the environment for many more such common enterprises in the future.

Programs of Study

Advertising, Public Relations and Media Design

The Department of Advertising, Public Relations and Media Design (APRD) offers the graduate programs listed below.

The MA in Corporate Communication (https://www.colorado.edu/cmci/aprd/macc/) is an online professional master’s degree designed for early and mid-career professionals who want to advance their career in corporate communication in an increasingly globalized corporate environment. It is well-suited for corporate communication practitioners in business, governmental and non-governmental organizations, as well as mid-career professionals from allied disciplines such as journalism, advertising and marketing who want to switch to corporate communication jobs due to increased demand in this sector. The program’s coursework blends conceptual knowledge and practical techniques to make students invaluable and nimble communicators in a globally relevant profession.

The MA in Strategic Communication Design (https://www.colorado.edu/cmci/STCMstudio/) (MSTCM) is an immersive 39-credit hour program typically completed in a full calendar year. Located in a state-of-the-art studio in the heart of Boulder’s entrepreneurial tech community, the MSTCM is entirely project-based. With the guidance of industry-driven instructors, our students leverage design’s potential as a critical problem-solving tool in a rapidly changing world. This human-centered program evolves students into branding design and entrepreneurial professionals through innovative, intensive, and progressive learning experiences. MSTCM graduates have been appointed to leadership design positions in top companies, including Google, Apple, Uber, Twitter and Dropbox—to name just a few.

The Marketing Analytics track of the MS in Business Analytics is an APRD, CMCI and Leeds School of Business partnership. In this advertising and marketing specialization in the Leeds Master’s in Business Analytics (https://www.colorado.edu/business/ms-programs/masters-program-business-analytics/) graduate program, students become experts in cutting edge digital advertising techniques and learn how to find, create, and analyze advertising data. The ten-month MS degree starts every July. Students leave the program ready to work in analytical roles at digital advertising agencies, DSPs, DMPs, programmatic shops and digital marketing departments.

Strategic Communication is a distinct track of the PhD in Media Research and Practice (https://www.colorado.edu/cmci/aprd/phd/) program. Students gain an understanding of scholarship through coursework, independent studies and research assistantships that explore theories and methods that shape strategic communication research. We welcome and appreciate both qualitative and quantitative approaches to research. The program emphasizes how theory informs practice, critically analyzing how advertising and public relations operate in ways that can—or could—constructively contribute to the successful, ethical and resilient functioning of society. Students taking this track focus their research and teaching in the areas of advertising, public relations and various types of promotional communication such as health communication, political communication, social media and video gaming.

The department actively encourages students to enroll in courses offered both within and outside CMCI and APRD graduate course are open to students in other units.

Course code for these programs is APRD.

Master’s Degrees

- Corporate Communication - Master of Arts (MA) (p. 1636)
- Strategic Communication Design - Master of Arts (MA) (p. 1637)

Doctoral Degree

- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1664)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Doty, Dawn (https://experts.colorado.edu/display/fsid_158312/)
Senior Instructor, MA, Johns Hopkins University

Duncan, Thomas R.
Professor Emeritus
Courses

APRD 5001 (3) Foundations of Strategic Brand Design
Focuses on the challenges of designing brands targeted to customer needs and desires. The course is structured around the process of identifying brand opportunities, idea generation, design, testing and launch opportunities. Through a series of projects, students address aspects of practice and theory, from brand adaptation of cultural values to maintenance of brand integrity and global design strategies. Where applicable, case studies will supplement studio execution.

Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)

Grading Basis: Letter Grade

APRD 5002 (3) Experience Design Foundations
Provides a comprehensive understanding of design thinking and its processes to design innovative branded experiences and exchanges in a variety of strategic communications contexts. Students learn design methods and applications that can be applied not only to experiential design, but to a problem where design thinking is meaningful to branded experiences. They learn standard and currently practiced design methods and, through repeated application, internalize them into a personal design aesthetic.

Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)

APRD 5003 (3) Toward a Unified Theory of Brand Equity
Builds on and extends concepts and executions covered in Foundations of Brand Design. While Foundations of Brand Design grounds the students in core branding concepts and applications, this course expands both executional skillsets and conceptual frameworks through the development of a unified theory of branding that transforms objects into meaningful brand bearers. Through research, strategic definition, identity, expression, communications and behavior study, students will learn how to create opportunities for complex, meaningful centered relationships between people and things.

Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)

APRD 5004 (3) Interaction Design and the Digital Delivery of Products and Services
Builds on and extends concepts and applications introduced in Experience Design Foundations with a concerted focus on prototyping quickly and often the best way to both communicate and improve one’s design. Integrates prototyping activities, along with research and testing techniques, into every stage of the design process. Students will learn how to choose the appropriate method to suit different dimensions of a design problem at different stages in the process and the pitfalls of each approach.

Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)

Grading Basis: Letter Grade

APRD 5006 (3) Introduction to Designing for Entrepreneurism
Brings students’ attention to design as a form of social innovation and develops awareness of the social, political and economic contexts of design. They become literate in the often implicit narratives embedded in design products and services, then use scenarios and storytelling to generate new strategies, build and test prototypes and write a case study detailing what was learned.

Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)

Grading Basis: Letter Grade
APRD 5008 (3) Access to Tools for Entrepreneurism by Design  
Develops awareness of and access to necessary tools, smart objects for example, that can enable complex dynamics among people, objects and information via a combination of physical and digital design methods, all with an eye to design driven innovation for social change. This course shifts the usual strategic communication design point of view from the typical perspective of "trend noise" and market driven models to identifying actual problems and providing possible design solutions to those problems.  
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)  
Grading Basis: Letter Grade

APRD 5010 (3) Design Sprint  
Executes a five-day, immersive process for answering critical business questions through design, prototyping and testing ideas with sponsoring industry partners. The outcome is a fully functional prototype that is demoed and evaluated on the final day of the sprint. This project based studio is team taught and process based. The tangible outcomes from the project, along with documentation of the process, will go into the students' professional portfolios.  
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)  

APRD 5011 (3) Book Lab  
Dedicated to building out an industry-ready professional portfolio, in this immersive studio-focused course students will work from design briefs to concept, design and solve a variety of design problems. Ranging from finished supercomps to functional prototypes - physical, video, projections mapping, etc. - students to market portfolios will demonstrate their command of strategic communication design across a range of media platforms.  
Repeatable: Repeatable for up to 9.00 total credit hours.  
Grading Basis: Letter Grade

APRD 5012 (3) Entrepreneurship and Product Innovation by Design  
Results in learning how to both think like an entrepreneur and develop innovative products and experiences competitive with the most successful startups in Boulder. Taught by successful entrepreneurs sharing valuable insight into the skills, mindset, and culture that results in the design of innovative products and experiences.  
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)  
Grading Basis: Letter Grade

APRD 5013 (3) Designing for Branded Experiences  
Explores both the theory and the practices of branding and branding through the creation of a series of projects related to the senses. Most of our visual world is made up of one or more identity components--from the basic form and structure of something to the specific experience which a brand provides.  
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)  
Grading Basis: Letter Grade

APRD 5014 (3) Advanced Tools of Interaction Design  
Introduces students to advanced practices and tools of the experience design profession. Topics vary to reflect current and emerging trends in the profession, but the core focus of the course consists of three broad themes: information design principles, understanding and defining user behaviors, and designing for emerging cross-channel experiences.  
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)  
Grading Basis: Letter Grade

APRD 5015 (3) Brand Design for Sustainable Futures  
Takes an in-depth look into engagement with challenges of designing for sustainability. Moves beyond the cradle to grave approach to designing for cradle to cradle with immersion into design ethics and the power of visual communication. Students are taken beyond the project brief to investigate why a brand or service should exist and the consequences of its existence.  
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)  
Grading Basis: Letter Grade

APRD 5016 (3) Experience Design and Narratives of Interaction  
Organizes our annual inquiry and execution of a real-world project around an essential question in design, such as "Can design make us empathetic problem solvers?" Curated by our faculty and executed in collaboration with our industry partners, Experience Design and Narratives of Interaction pairs students with teams from design-driven companies to develop advanced projects over the course of a full semester.  
Requisites: Restricted to graduate students in Strategic Communication Design (STCM-MAP)  
Grading Basis: Letter Grade

APRD 5841 (1-3) Graduate Independent Study  
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.

APRD 5851 (1-6) Graduate Professional Project  
Repeatable: Repeatable for up to 6.00 total credit hours.  
Requisites: Restricted to graduate students only.

APRD 5931 (1-3) Internship  
Repeatable: Repeatable for up to 3.00 total credit hours.  
Requisites: Restricted to graduate students only.

APRD 6342 (3) Digital Advertising  
Covers both traditional and emerging digital advertising methods, the popular platforms used to execute ads, and the leading analytic tools that can be used to assess advertising performance. Core advertising platforms covered include search, display, social media, native advertising, sponsored content and mobile. This class focuses on best practices and Key Performance Indicators that go with each advertising platform. Department consent required.  
Requisites: Restricted to MS Business Analytics (BUAN-MS) majors and MKAG-CERG students only.  
Grading Basis: Letter Grade

APRD 6343 (3) Applications of Advanced Statistical Techniques in Advertising  
Building upon prior data acquisition and analysis coursework, students will effectively and flexibly generate advanced statistical models in a digital advertising-specific context. This course will focus on data originating from a variety of digital advertising sources. In addition to technical skill acquisition, students will learn how to interpret results and present them to clients and management. Department consent required.  
Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.  
Grading Basis: Letter Grade

APRD 6871 (1-3) Special Topics  
Graduate special topics. Topics vary by instructor and semester.  
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.  
Requisites: Restricted to graduate students only.
APRD 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

APRD 6951 (1-6) Master's Thesis
Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

APRD 7001 (3) ProSeminar in Mass Communication Theory I
Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7001
Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7002 (3) Research Design
Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7002
Requisites: Requires prerequisite courses of APRD 7003 and MDRP 7051 and MDRP 7061 (all minimum grade C-). Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7003 (3) ProSeminar in Mass Communication Theory II
Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion. Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.

Equivalent - Duplicate Degree Credit Not Granted: JRNL7003
Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7004 (1) Doctoral Professionalization Seminar
Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7004
Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7011 (3) Seminar in Strategic Public Relations
Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7011
Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7012 (3) Ethnography and Media
Provides a deep understanding concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7012
Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7013 (3) Mixed Research Methods in Mass Communication
Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7013
Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

APRD 7014 (3) Experimental Design in Mass Communication
Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7014
Requisites: Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.

APRD 7020 (3) Controls of Media and Information
Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.

Equivalent - Duplicate Degree Credit Not Granted: JRNL 7020
Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade
APRD 7021 (3) Environmental Journalism and Science Communication
Foci on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7021
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7030 (3) Media Sociology
Examines a range of theories for how media messages and media institutions turn out the way they do. ‘Media sociology’ refers to theorizing about the media as the ‘dependent variable’; even though many of the ‘independent variables’ explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7030
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7031 (3) Moral Psychology and Media Ethics
Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7031
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7034 (3) Media and Health Communication
Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7034
Requisites: Restricted to graduate students only.

APRD 7051 (3) Qualitative Methods in Mass Communication
Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7051
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

APRD 7061 (3) Quantitative Research Methods
Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students for dissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7061
Grading Basis: Letter Grade

APRD 7062 (3) Advanced Statistical Analysis for Mass Communication
Provides instruction on the following topics: ordinary least squares regression, statistical mediation and moderation, path analysis, count and categorical data modeling, and factor analysis.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7062
Requisites: Requires prerequisite course of APRD 7061 or JRNL 7061 (minimum grade D-).
Grading Basis: Letter Grade

APRD 7063 (3) Text Analytics for Computational Mass Communication Research
This course tackles advanced advertising and marketing analytics through three advanced methods aimed at solving these problems: text classification, text topic modeling, and semantic network analysis. Each key area will involve a deep dive into the leading computer science methods aimed at solving these methods using Python. Students will walkthrough conceptual overviews of the methods, and dive into real-world datasets through instructor-led tutorials. Students will also conduct a major project for each of the 3 key methods.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7063
Requisites: Requires prerequisite course of APRD 7061 or JRNL 7061 (minimum grade D-).
Grading Basis: Letter Grade

APRD 7133 (3) Digital Games
Seminar that explores digital games, analog games, and play, and looks at the relatively new field of game studies; the field has moved toward issues of culture and social justice.
Requisites: Restricted to doctoral students.

APRD 7841 (1-3) Independent Study
Provides opportunities for independent study and research on the graduate level. Students perform independent research under faculty supervision.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

APRD 7871 (3) Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

APRD 7880 (3) Persuasion Theory
This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 7880
Requisites: Restricted to graduate students only.

APRD 8991 (1-10) Doctoral Dissertation
Dissertation research and writing. A minimum of 30 hours is required.
Repeatable: Repeatable for up to 40.00 total credit hours.
Requisites: Restricted to PhD students only.

MDRP 7871 (3) Special Topics
Special topics.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Corporate Communication - Master of Arts (MA)

Organizations of all types (for-profit corporations, government agencies and not-for-profits) need to build and maintain symbiotic relationships with their key stakeholders (publics). These stakeholders are both internal to an organization (such as employees and suppliers) and external (such as the mass media, government regulators, consumers, citizens and activist groups). The Master of Arts in Corporate Communication (MACC) provides students with the knowledge and skills to use communication in order to build and maintaining relationships with these strategic stakeholders (publics). In addition, students will also learn to measure the quality of these relationships and its effect on the reputation of their organizations.

The MACC program is especially designed for:

- Early and mid-career practitioners of corporate communication with a desire to increase their knowledge potentially for career advancement.
- Mid-career professionals from allied disciplines such as journalism, advertising and marketing who might want to switch to corporate communication given the increased demand in this sector.

This program equips students with the conceptual knowledge and practical skills to be effective communicators whether they work for for-profit corporations, not-for-profit organizations including inter-governmental organizations (IGOs), or governments and their agencies.

Key program highlights:

- Corporate communication is fundamentally a practice, but scholarship built over the past fifty years has demonstrated that in order to be effective, this practice needs to be based on sound strategic knowledge. This program emphasizes that efficacious corporate communication blends sound strategies with techniques.
- The program emphasizes the need for corporate communication to take place in a global environment because ethnocentricity in communication results in ineffectiveness in communication. Cultural sensitivity also induces graduates of the program to navigate the ethical challenges that arise in their life as communicators no matter where they practice—in Colorado, within the U.S. or internationally.
- Another area of ethnocentricity that is evident in the communication field is the over-emphasis on communication by for-profit corporations. This program seeks to orient students to the diversity in values, stakeholders and communication needs of the two other types of organizations—governments and non-profits (including IGOs).
- Practicing strategic corporate communication is not possible without basing such practice on empirical evidence—whether the evidence is culled through qualitative or quantitative methods. The MACC program seeks to train students on sound methodological principles thereby preparing them to be thoughtful communicators. Evidence also reveals that organizational leaders appreciate, and value, such communicators and so graduates are seen as adding value to organizational activities.

For more information, visit the Master of Arts in Corporate Communication website (https://www.colorado.edu/cmci/aprd/macc/).

Requirements

Admission Requirements

The evaluation of applications is based on a set of criteria that seek to value several key qualities in students, such as professional background and experience, academic record, professional achievements, and career goals (based on a statement of purpose). The evaluation will also be guided by standards set by the Graduate School. The desired qualifications of successful applicants include:

- A baccalaureate degree from a regionally accredited college or university, or its equivalent.
- Professional experience in corporate communication or an allied field such as journalism, advertising or communication.
- An aptitude for corporate communication and potential to pursue academic and research-based work in the field.
- An undergraduate GPA of at least 2.75.

To apply for admission, applicants should submit:

- All academic transcripts.
- A resume or Curriculum Vitae that establishes at least 3–5 years of relevant work experience.
- A statement of purpose describing their preparation for the proposed study as well as future career path relevant to the study.
- Three letters of recommendation, including at least one professional reference.
- Evidence of proficiency in English (international students only).
- Optional: GRE or GMAT scores (even if they are older than 5 years).

Program Requirements

The Master of Arts in Corporate Communication requires 30 credits of coursework. The program consists of accelerated courses, allowing students to take only one course at a time while still completing two courses during the span of a regular semester.

CU Boulder's Master of Arts in Corporate Communication curriculum was strategically crafted not only to be flexible and serve working professionals around the world, but also to provide the knowledge, skills, and tools needed to practice corporate communication in a globalizing environment. The program offers a focused 10-course, 30-credit curriculum consisting of: five core courses (3 credits each) and five elective courses (3 credits each).

The courses are designed to provide students with a blend of conceptual and practical knowledge and skills that can be immediately applied in your day-to-day work.

The five core courses are required of all students because they cover the conceptual foundations of sound corporate communication. These courses orient students to theories and frameworks in public relations and corporate communication.

The electives are designed to expose students to the variety of work handled by corporate communication practitioners. Corporate communication is a diverse practice with many specialties often divided based on the stakeholders involved: employees (internal publics who are key to an organization's success), investors (that often invest in for-profit corporations or donors to not-for-profit organizations), media, etc. The electives included in the list below will be offered at the outset and others will be added in the future.
Life through the design of innovative products and experiences.

Design as a process for transforming social relations and contemporary issues from multiple perspectives, learn from community and leadership and management, along with an increasing awareness, design and everyday life—between work, play, social innovation, evolution and dedication to value-driven efforts through and by design.

The master’s program in strategic communication design (STCM) crosses traditional divides and champions the global value of innovation by design, pointing to a new way of working, seeing, making and thinking in the 21st century creative economy. It’s not only that the boundaries between design disciplines are blurring. So are the boundaries between design and everyday life—between work, play, social innovation, leadership and management, along with an increasing awareness, evolution and dedication to value-driven efforts through and by design.

Students work in an open studio environment in transdisciplinary teams, consider issues from multiple perspectives, learn from community and industry leaders, and emerge with a portfolio of work that showcases design as a process for transforming social relations and contemporary life through the design of innovative products and experiences.

Learning Outcomes
Some of the learning objectives of this program are:

- To help increase students’ ability to draw abstractions of reality and assess their professional activities with critical thinking.
- To use conceptual and critical skills to develop effective oral and written communication skills.
- To negotiate cultural diversity and operate effectively in a globalized environment.
- To base one’s global communication practice on sound ethical principles and analysis thereby working for social good.
- To appreciate that effective communication is based on formative research, sound program planning, effective implementation of planned program, and sound program evaluation.
- To integrate multiple media for communication, including digital and social media.
- To develop collaboration skills and ability to work in groups.

Strategic Communication Design - Master of Arts (MA)
The master’s program in strategic communication design (STCM) crosses traditional divides and champions the global value of innovation by design, pointing to a new way of working, seeing, making and thinking in the 21st century creative economy. It’s not only that the boundaries between design disciplines are blurring. So are the boundaries between design and everyday life—between work, play, social innovation, leadership and management, along with an increasing awareness, evolution and dedication to value-driven efforts through and by design.

The paths that students travel from start to finish of the STCM can vary, depending on individual interests and goals. We have a required core curriculum that all students in STCM take over three semesters. The core design curriculum functions as a through line, providing a common foundation for all students in the program. This common core curriculum is complemented by a variety of electives developed within our individual studies and select graduate courses offered throughout CU Boulder. Students can choose from a diverse range of elective courses that address their specific individual interests. This arrangement allows students to design an individual degree path buttressed by a solid foundational core.

Requirements
Application Requirements
Applications are reviewed on a rolling admissions basis for the STCM master’s. We evaluate applications as they are completed, and acceptances are meted out on a first-come, first-served basis for each prospective qualified student. We accept a maximum of 24 students for the program each calendar year.

Our students have a desire to become design-based leaders, thinkers and doers. The personal statement is an essential part of the student’s application. In a maximum of 1,500 words, students should supply long-form answers to the following questions:

- What attracts you to the program at this time? What do you envision as the most compelling opportunities for you as a designer and also a future leader who can lead by design?
- What particular experiences—personal or professional—have prepared you for work in design?
- Why is design important to you and how would you use it to change the world?

How to Apply
The application is listed under Strategic Communication Design on the Graduate School (https://grad.apply.colorado.edu/apply/) website.

Required materials, a list of which can also be found in the application, are as follows:

- Three letters of recommendation: These should come from professionals and/or professors. No personal recommendations please.
- Unofficial transcripts.
- Writing sample: A sample of the student’s writing that they feel is exemplary and representative of their writing abilities.
- Portfolio: We will be happy to view a portfolio if provided, but submission of a portfolio is optional.
- TOEFL score report: International applicants must have a TOEFL score of at least 600 (ibt 100).
- Application fee: A nonrefundable application fee of $60 is also required ($80 for international).
- We do not require STCM applicants to take the GRE.

Contact
For questions regarding the application, please contact executive director David Slayden (https://www.colorado.edu/cmci/people/advertising-public-relations-and-media-design/david-slayden/) (slayden@colorado.edu) to speak with you and discuss your ambitions and opportunities to be expected within the program.
Program Requirements
The STCM is a 39-hour professional masters degree program to be completed within a single calendar year—from August to August—over four semesters: Fall, Spring, Maymester and Summer Session D. We follow the CU Boulder calendar (https://www.colorado.edu/academics/academic-calendary/) and, in doing so, are guided by a year-long arc from Foundations (fall semester) to Variations and Explorations (spring semester), to Solutions (Maymester and Summer Session D).

The master’s degree is awarded for successful completion of 39 credits over four contiguous semesters. Students must maintain a 3.0 cumulative grade point average and fulfill all requirements in a timely manner.

Communication
Graduate study in communication foregrounds the symbolic and material dimensions of social life, with special attention to the role communication plays in both transmitting messages and constituting relationships. Contexts of study include interpersonal interaction, workplaces and institutions, communities and public/civic life.

Graduate students pursue research within three main areas—community and social interaction, organizational communication, and rhetoric and culture—crafting unique programs of study to meet individual needs.

The master’s program provides students with knowledge of key bodies of communication scholarship and develops their skills in analyzing complex communication situations. The program prepares graduates for positions in businesses, nonprofit institutions and community groups, in addition to doctoral study in communication.

The doctoral program provides students with opportunities to conduct theoretically grounded and methodologically rigorous research on pressing communication issues, while also traversing traditional academic boundaries. The program prepares graduates primarily for faculty positions at leading universities, although some graduates pursue positions in business, the nonprofit sector, social services or government.

Course code for this program is COMM.

Master's Degree
- Communication - Master of Arts (MA) (p. 1642)

Doctoral Degree
- Communication - Doctor of Philosophy (PhD) (p. 1643)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Ackerman, John Martin (https://experts.colorado.edu/display/fisid_144951/)
Professor; PhD, Carnegie Mellon University

Ashcraft, Karen Lee (https://experts.colorado.edu/display/fisid_147453/)
Professor; PhD, University of Colorado Boulder

Boromisz-Habashi, David (https://experts.colorado.edu/display/fisid_145833/)
Associate Professor; Associate Chair; PhD, University of Massachusetts at Amherst

Cruz, Joelle (https://experts.colorado.edu/display/fisid_157594/)
Assistant Professor; PhD, Texas A&M University

Frey, Lawrence R. (https://experts.colorado.edu/display/fisid_125937/)
Professor Emeritus; PhD, University of Kansas
Gries, Laurie Ellen (https://experts.colorado.edu/display/fisd_155951/)
Associate Professor; PhD, Syracuse University

Hickerson, Ruth Lynne (https://experts.colorado.edu/display/fisd_151159/)
Senior Instructor; PhD, University of Denver

Hodge, Danielle (https://experts.colorado.edu/display/fisd_167427/)
Assistant Professor; PhD, University of Colorado Boulder

Jahn, Jody L. (https://experts.colorado.edu/display/fisd_153426/)
Associate Professor; PhD, University of California, Santa Barbara

Koschmann, Matthew A. (https://experts.colorado.edu/display/fisd_145807/)
Associate Professor; PhD, University of Texas at Austin

Kuh, Tim (https://experts.colorado.edu/display/fisd_118144/)
Chair, Professor; PhD, Arizona State University

Maurer, Christy (https://experts.colorado.edu/display/fisd_148831/)
Senior Instructor; PhD, University of Colorado Boulder

Pezzullo, Phaedra Carmen (https://experts.colorado.edu/display/fisd_156204/)
Associate Professor; PhD, University of North Carolina Chapel Hill

Shrikant, Natasha (https://experts.colorado.edu/display/fisd_157954/)
Assistant Professor; PhD, University of Massachusetts at Amherst

Simonson, Peter D. (https://experts.colorado.edu/display/fisd_143251/)
Professor Emeritus; PhD, University of Iowa

Skerski, Jamie L. (https://experts.colorado.edu/display/fisd_149871/)
Senior Instructor; PhD, Indiana University Bloomington

Sprain, Leah M.H. (https://experts.colorado.edu/display/fisd_151292/)
Associate Professor; Faculty Director; PhD, University of Washington

Taylor, Bryan Copeland (https://experts.colorado.edu/display/fisd_107421/)
Professor; PhD, University of Utah

White, Cindy Hagemeier (https://experts.colorado.edu/display/fisd_107461/)
Associate Professor; PhD, University of Arizona

Courses
COMM 5000 (3) Organizational Culture
Focuses on theory and practice associated with the successful development of organizational culture. Topics covered include symbolic artifacts, beliefs, and assumptions that distinguish organizational, corporate, and occupational/professional identities. Related coverage of the communication practices (e.g., performance, ritual, etc.) through which the cultural elements of organizing are created, maintained and transformed. Special emphasis placed on issues of cultural leadership, cultural control, and cultural change in the contexts of contemporary globalization and technological innovation.
Requisites: Restricted to Organizational Leadership (ORGL-MS) students only.
Grading Basis: Letter Grade

COMM 5210 (3) Readings in Communication Theory
Provides a critical overview of influential theoretical traditions in communication studies. Emphasizes the discipline's social scientific and humanistic heritage, while also considering emerging trends. Introduces standards for evaluating and critiquing communication theories.
Requisites: Restricted to graduate students only.

COMM 5220 (3) Seminar: Functions of Communication
Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 5225 (3) Environmental Communication
Examines the study of applications of communication concepts, theories, methods, interventions, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research.
Requisites: Restricted to graduate students only.

COMM 5230 (3) Applied Communication
Focuses on theory and practice associated with the successful development of organizational culture. Topics covered include symbolic artifacts, beliefs, and assumptions that distinguish organizational, corporate, and occupational/professional identities. Related coverage of the communication practices (e.g., performance, ritual, etc.) through which the cultural elements of organizing are created, maintained and transformed. Special emphasis placed on issues of cultural leadership, cultural control, and cultural change in the contexts of contemporary globalization and technological innovation.
Requisites: Restricted to Organizational Leadership (ORGL-MS) students only.
Grading Basis: Letter Grade

COMM 5240 (3) Environmental Communication
Examines the study of applications of communication concepts, theories, methods, interventions, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research.
Requisites: Restricted to graduate students only.

COMM 5300 (3) Seminar: Rhetoric
Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 5310 (3) Contemporary Rhetorical Criticism
Advanced critical analysis of rhetorical texts in terms of how they shape issues and appeals for judgment, create identities for speakers and their audiences, and construct perceptions of time, space, and the human condition.
Requisites: Restricted to graduate students only.

COMM 5320 (3) Readings in Rhetoric
Survey of classical and contemporary readings in rhetoric. Required for doctoral students in communication; optional for master's students.
Requisites: Restricted to graduate students only.

COMM 5435 (3) Readings in Community and Social Interaction
Focuses on how everyday communication practices shape and are shaped by community contexts. Contains theoretical and empirical readings that illustrate how interactions among group members negotiate and maintain distinct communities and how group communication practices reflect shared norms among community members. Also reviews methods to study everyday interactions among community members (e.g., discourse analysis, qualitative coding, surveys and applied approaches/methods).
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
COMM 5600 (3) Seminar: Organizational Communication
Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.
Equivalent - Duplicate Degree Credit Not Granted: COMM 4600
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 5610 (3) Organizational Ethnography
Focuses on the historical influence of the ethnographic tradition in organizational communication studies. Reviews landmark studies of organizational culture and power/control, emphasizing issues of ethics and politics associated with the writing and reading of organizational ethnography. Reviews trends in contemporary organizing such as neoliberal globalization and the adoption of artificial intelligence, and their implications for the future of ethnography.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

COMM 5620 (3) Readings in Organizational Communication
Survey of historical and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives.
Requisites: Restricted to graduate students only.

COMM 5630 (3) Readings in Communication and Technology
Survey of multidisciplinary research that examines various relationships between communication and technology. Students are encouraged to develop critical skills in perceiving assumptions and perspectives that motivate major theories in this area, and to examine how these phenomena have changed over time.
Requisites: Restricted to graduate students only.

COMM 5630 (1-6) Graduate Internship
Offers opportunities for graduate-level communication related work projects. Limited to 3 hours in spring and fall semesters, 6 hours in summer. The 6-hour limit at MA level and 9-hour limit at PhD level applies to any combination of independent study and internship credit.
Repeatable: Repeatable for up to 9.00 total credit hours.

COMM 6010 (3) Communication Research and Theory
Provides an introduction to graduate study of communication, offering an overview of the discipline and its scholarship. Required for MA and Ph.D. communication students.
Requisites: Restricted to Communication (COMM or COMN) graduate students only.

COMM 6020 (3) Quantitative Research Methods
Introduces students to the practice of quantitative research in communication: conceptualization and critique of research projects, measurements, methods (e.g., experimental and survey), statistical data analysis, and written reports.
Requisites: Restricted to graduate students only.

COMM 6030 (3) Qualitative Research Methods
Introduction to the epistemology, methodology, and representational practices associated with qualitative communication research. Fieldwork methods emphasized include participant observation, interviewing, and document/artifact analysis.
Requisites: Restricted to graduate students only.

COMM 6200 (3) Seminar: Selected Topics
Facilitates understanding of current and past theory and research on a selected topic in communication and the ability to develop new theory and research on that topic.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 6310 (3) Advanced Rhetorical Criticism
Reviews current critical methods and issues related to rhetorical criticism and rhetorical field methods.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisites COMM 5310 and COMM 5320.

COMM 6320 (3) Rhetorical Theory
Reviews current theory and research on topics such as contemporary rhetorical theory, rhetoric and public life, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6330 (3) Rhetoric of Inquiry
Surveys foundational texts and contemporary research in the rhetoric of inquiry. Focuses on the role of persuasion in the production of knowledge. Critical analysis of major theoretical and methodological traditions and topics, with an emphasis on social dimensions of inquiry.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6340 (3) Rhetoric and Civic Community
Considers performances of public life as rhetorical inducements of civitas. Topics include negotiation of self-regulation among interdependent partners, rhetorical exclusions and/or counterpublics, and dialectical tensions of public/private as these contribute to and have civic consequences for publicness, community, and social will.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6350 (3) Seminar in Argumentation
Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6350 (3) Seminar in Argumentation
Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6360 (3) Social and Cultural Theory
Traces select traditions in social and/or cultural theory, emphasizing how those traditions affect and are affected by the field of rhetoric studies. Examines the origins and resolutions of major debates in social and/or cultural theory from a rhetorical perspective.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5320.

COMM 6370 (3) Rhetorics of Transgression and Resistance
This course examines contemporary philosophies, analyses, and practices of transgression and resistance. Overall, it encourages greater reflexivity about why, how, and for what ends we study the intersections of rhetoric, culture, and social change, including but not limited to choices about naming, stories, discourses, tactics, coalitions, and movements.
Recommended: graduate students only.
Grading Basis: Letter Grade
COMM 6410 (3) Discourse Analysis
Acquaints students with the main types of discourse analysis: conversation analysis, critical discourse analysis, and rhetorically informed discourse approaches. Teaches how to conduct discourse analysis, including transcribing, selecting excerpts, documenting inferences, and linking findings to scholarly controversies.
Requisites: Restricted to graduate students only.

COMM 6420 (3) Interaction Analysis
Educates students in one of a selected set of methodological specializations used in the study of human interaction.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

COMM 6425 (3) Writing, Reporting, and Publishing
Helps students hone their abilities to write, report, and publish a scholarly article in the field of communication and beyond. Students gain familiarity with the genre of the scholarly article, engage with theories of writing genres, delve into the politics of scholarly publishing, and learn various strategies for crafting a scholarly article. Students are expected to develop a manuscript for submission to a peer-reviewed journal or other scholarly forum.
Grading Basis: Letter Grade

COMM 6440 (3) Grounded Practical Theory
Examines theory, method, and application of grounded practical theory, an approach to building normative theory through description, critique, and theoretical reconstruction of situated communicative practices. Semester project involves analysis of a sample of discourse from a public or field observation setting.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5210.

COMM 6445 (3) Intercultural Communication
Focuses on cultural foundations of social interaction, with a special emphasis on ideology (including potentially contested cultural norms, values and premises) as a basic condition of meaningful interaction. Identities are discussed as culturally variable, historically embedded interactional accomplishments, constructed from communicative resources such as language and other types of signs, that serve the purpose of participation in communal life.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

COMM 6455 (3) Community-based Research Methods
Facilitates and supports graduate student-led community-based research. Working from multiple CBR traditions, students develop a thoughtful rationale for conducting CBR and practice a repertoire of CBR methods (e.g., group decision-making, managing ethical dilemmas, collaborative data collection and analysis, and communicating findings).
Grading Basis: Letter Grade

COMM 6460 (3) Ethnography of Communication
Introduces graduate students to the theory, methodology, and practice of the ethnography of communication. Students read existing literature in the tradition, and design and implement a field-based project that centers on culturally patterned forms and styles of communicative conduct. Prior graduate-level coursework in basic qualitative research methods is required.
Grading Basis: Letter Grade

COMM 6470 (3) Public Deliberation and Dialogue
Explores the theory, research and practices of deliberative democracy and dialogue. Considers "ideal" communicative conduct and common interactional troubles, cross-cultural differences and routine communication practices.
Requisites: Restricted to graduate students only.

COMM 6730 (3) Constitutive Approaches to Organizational Communication
Explores theory and research that explain how organizing processes are constituted through communication. Course themes might include collaboration, authority, identity, knowledge, risk/resilience, or socio-material arrangements.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5620 and COMM 6010.

COMM 6740 (3) Theory and Philosophy of Organizing and Organizations
Reviews theory and philosophy of organizations and organizing where communication processes are seen as constitutive. Focuses on discursive and material practices in the formation and change of organizational structure, culture, and operation.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5620.

COMM 6750 (3) Critical-Cultural Approaches to Organizational Communication
Addresses critical and cultural approaches to communicating and organizing. Topics include relations of culture, power, resistance, identity, and difference as theorized in and around organizational life. Major theoretical works on these topics are highlighted throughout, although specific themes may vary.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Recommended: Prerequisite COMM 5620.

COMM 6780 (3) Roles, Relationships, and Identities in Interaction
Examines how social roles influence communicative practices, the development of relationships, and the impact of relationships on identity. Considers these processes in contexts, such as personal relationships and institutional settings. Topic varies.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

COMM 6840 (1-3) Master's Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

COMM 6910 (1) Communication Research and Theory Practicum
Considers these processes in contexts, such as personal relationships and institutional settings. Topic varies.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

COMM 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Repeatable: Repeatable for up to 3.00 total credit hours.
COMM 6950 (1-6) Master's Thesis  
Repeatable: Repeatable for up to 6.00 total credit hours.

COMM 7118 (3) Foundations of Environmental Justice  
Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality and efforts to reduce it. Formerly offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 7118, ENVS 7118 and PSCI 7118
Requisites: Restricted to graduate students only.

COMM 8840 (1-6) Doctoral Independent Study  
Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

COMM 8990 (1-10) Doctoral Dissertation  
All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.
Repeatable: Repeatable for up to 30.00 total credit hours.

Communication - Master of Arts (MA)

The master's degree provides students with knowledge of communication scholarship and develops their ability to analyze complex communication situations. The program is intended to serve two main groups of students: those planning to pursue the PhD degree and those seeking employment in businesses, nonprofit institutions and community groups.

MA students typically pursue studies in one or more of the department’s three main areas:

- Community & social interaction
- Organizational communication
- Rhetoric & culture

Students may choose a thesis or comprehensive examination option.

Requirements

Students wishing to pursue graduate work toward this degree should carefully read the Graduate School requirements, review the coursework offered in this catalog, and attend to the detailed degree requirements on the department website.

Application Guidelines

Visit the department’s Admissions (http://www.colorado.edu/communication/graduate-degrees/admissions/) webpage for details.

Course Requirements

To complete the MA, students are required to take COMM 6010, at least one methods course and at least two readings courses (see tables below).

For both the thesis option and the comprehensive examination option, coursework may include a maximum of 6 hours of independent study and/or internship combined. A maximum of 9 hours may be transferred from graduate work completed in/at other programs and/or institutions (including other CU campuses, such as CU Denver). A maximum of 9 credit hours of courses may be taken outside the department. Transfer and outside department courses combined may not exceed 12 credit hours. Courses in which a grade of C- or below is received are not counted toward the master's degree.

Degree Plans

Plan I: Thesis Option

Students pursuing the thesis option are required to complete a minimum of 30 graduate credit hours, including 24 credit hours of graduate-level coursework (at the 5000 level or higher) and 6 thesis hours (including oral defense of the thesis; additional thesis hours cannot be taken).

Four additional graduate-level courses 12

Total Credit Hours 30

Students choosing the thesis option should select a permanent graduate faculty advisor prior to completing 12 credit hours. In consultation with their advisor, students should select two additional committee members and, by the beginning of the second year (assuming a course load of 9 hours per semester), complete the MA Program of Study Form and a written thesis proposal (with the thesis designed such that it can be completed during student's final planned semester in residence).

After the committee has read the thesis, a final oral defense is conducted in conformity with the graduate school's rules. Students must have an affirmative vote from the majority of committee members to pass the thesis. Students who fail the thesis defense may attempt it once more after a period of time that is determined by the committee. Students who fail the second defense are dismissed from the master's program. The final submitted thesis must comply with the CU Boulder Graduate School rules regarding the formatting of theses and dissertations.

Plan II: Comprehensive Examination Option

Students pursuing the coursework with comprehensive examination option are required to complete a minimum of 30 graduate credit hours (at the 5000 level or higher), a written comprehensive examination and an oral defense of that written comprehensive examination.

</tbody>
</table>

Master's students choosing the comprehensive examination option should select a permanent graduate faculty advisor prior to completing 12 credit hours. The associate chair of graduate studies automatically serves as a committee member. Students, in consultation with their advisor, select a third committee member.

By the beginning of the second year of graduate work (assuming a course load of 9 hours per semester), students should complete the MA Program of Study Form.

The comprehensive examination includes two standardized questions created by the associate chair of graduate studies that are completed by all master's students taking the examination at the same time that semester. One is about communication theory (90 minutes), and the other is about research methods (90 minutes). A third question, created by the student's advisor, is unique to the student's area of expertise (2 hours).

A one-hour oral defense must be held within two weeks of completing the written comprehensive examination. Students must have an affirmative vote from the majority of committee members to pass the comprehensive examination.

Should the majority of committee members judge the written and/or oral performance unsatisfactory, students may be required to retake relevant portions of the examination (with a maximum of one opportunity to retake the examination). Prior to retaking the comprehensive examination, students may be required to complete additional coursework and/or research projects. Retaking the comprehensive examination must include another oral defense. Students who retake the comprehensive examination but do not complete it in a satisfactory manner are dismissed from the master's program.

Communication - Doctor of Philosophy (PhD)

The PhD in communication typically serves students interested in pursuing academic careers. Students are admitted to the PhD program after having completed an MA degree or equivalent.

PhD students generally specialize in one or more of the department's three main areas:

- community & social interaction
- organizational communication
- rhetoric & culture

Depending on the extent of the student's prior academic work in communication and their rate of progress, the degree can be achieved in three to four years. PhD students are expected to complete all degree requirements within six years from the semester in which they begin coursework in the doctoral program.

Requirements

Application Guidelines

For application guidelines, visit the department's Admissions (http://www.colorado.edu/communication/graduate-degrees/admissions/) webpage.

General Requirements

All PhD students are required to take COMM 6910 and two of three methods courses (COMM 5310, COMM 6020 and COMM 6030). PhD students entering without a background in communication must also take COMM 6010.

Beyond those specific requirements, PhD students develop expertise in four areas: broad-based background in communication, advanced expertise in a primary area of specialization, expertise in a secondary area of specialization and advanced expertise in a primary methodology.

Students' individual coursework requirements must be specified in a PhD plan of study document that is approved by their advisor and committee. A minimum of 54 graduate credit hours of coursework is required, plus 30 hours of dissertation credit, for a minimum total of 84 credit hours. At least 30 graduate credit hours of coursework must be in communication courses.

PhD students may transfer in a maximum of 12 credits from prior graduate coursework. Any graduate courses completed at CU Boulder (including courses completed for the master's in communication) can be applied to the PhD program if they are included in the student's approved PhD plan of study. Students may take a maximum of nine independent study and/or internship credit hours combined.

Students wishing to pursue graduate work toward this degree should carefully read the Graduate School requirements, review the coursework offered in this catalog and attend to the detailed degree requirements on the department website (http://www.colorado.edu/communication/graduate-degrees/phd-communication/).

Primary Area of Specialization

This requirement is satisfied by taking courses, seminars and/or independent studies (including those outside the department) in the primary specialty declared in the student’s approved PhD plan of study.

Secondary Area of Specialization

This requirement is satisfied by taking courses, seminars and/or independent studies (including those outside the department) in the student’s approved PhD plan of study.

Primary Methodology 6

This requirement is satisfied by taking methodology courses in communication and/or cognate disciplines; methodological expertise also can be developed through independent studies and participation in research projects.

Critical Media Practices

Critical media practices (CMDP) addresses the changing landscape of electronic media making by developing both analytical and production skills across a wide range of platforms, practices and technologies while simultaneously placing them within the broader perspective of culture and history. The department explores cross-platform media production, computational media and creative ethnography, as well as other time-based media arts practices such as locative media and performance art. Our convergent approach to media spans a variety of media tools including digital photography, audio/video editing and single camera video production, open source programming and digital single lens reflex cameras, as well as emergent tools under development. With an emphasis on the interaction between critical theory and media production practices, students are encouraged to not only thoughtfully engage with the diversity of media cultures but to also become active entrepreneurial media producers, directors, writers, editors and scholars at the forefront of emerging cultural industries. CMDP prepares students to make productive use of the tools to engage creatively with the future trajectories of media, wherever they may lead.

CMDP students will be exposed to a variety of approaches concerning the study of media, information and communication through core CMCI classes. The undergraduate program is designed to provide basic hands-on grounding in production theory, aesthetics, techniques and approaches emphasizing innovative approaches to media making. As such, the department provides a rich and varied resource for cross-pollination and collaboration. At the graduate level, the program features a terminal MFA. The department also supports a practice-based PhD in emergent technologies and art practices. This innovative merger of theory and praxis, spanning undergraduate through graduate education, places CU on the cutting edge of institutions exploring innovative models for educating twenty-first-century students as well as publishing and disseminating scholarship.

Course code for this program is CMDP.

Master’s Degree

- Interdisciplinary Documentary Media Practices - Master of Fine Arts (MFA) (p. 1646)

Doctoral Degree

- Emergent Technologies and Media Art Practices - Doctor of Philosophy (PhD) (p. 1647)

Certificate

- Emergent Technologies and Media Art Practices - Graduate Certificate (p. 1648)
- Interdisciplinary Documentary Media Practices - Graduate Certificate (p. 1648)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Courses

CMDP 5100 (3) Research and Methodologies Seminar
Explores documentary media preproduction tactics and strategies, including basic research approaches, planning, pre-visualization, stylistic approaches, scheduling, working with archive and documentary materials, and documentary ethics.
**Requires:** Restricted to graduate students only.

CMDP 5370 (3) Choreography, Cinematograph: Writing in Motion
Examine media and moving image aesthetics, tactic and strategies by creating work involving movement and expanded notions of choreography. Within this course students compose images and sounds, structuring them temporally as they explore narrative and non-narrative forms.
**Requires:** Restricted to graduate students only.

CMDP 5450 (3) Contemporary Documentary Media
Explores cross platform documentary media practices and contemporary debates in documentary through a study of documentary history, genre, ethics and changing forms. It develops skills in critically analyzing documentary media.
**Requires:** Restricted to graduate students only.

CMDP 5500 (3) Documentary Production Workshops
Workshopping and developing technical skills in documentary media production.
**Requires:** Restricted to graduate students only.

CMDP 5600 (3) Documentary Lab Seminar
Explores and workshops documentary media projects and ideas from a variety of disciplines. A team-taught course, with affiliated faculty working in design groups within the documentary lab in one or more areas, such as Art and Art History, Anthropology or Geography. A total of 12 hours is required for IDMP MFA candidates.
**Repeatable:** Repeatable for up to 12.00 total credit hours.
**Requisites:** Restricted to graduate students only.

CMDP 5650 (3) Documentary Field Work
Explores distinctive and varied approaches to documentary field work and the uses of media for creative ethnography and other nonfiction practices. A team-taught course, with affiliated faculty from one or more areas such as Art and Art History, Anthropology and Geography.
**Requisites:** Requires a prerequisite course of CMDP 5100 (minimum grade C-). Restricted to graduate students only.

CMDP 5900 (3) Documentary Production Topics
Incorporates reflective study and practice in a course that consists of rotating topics in contemporary documentary practices, such as media essays, observation and participation, personal histories and voices, emergent technologies and documentary media, and interpretive ethnography.
**Repeatable:** Repeatable for up to 12.00 total credit hours.

CMDP 5910 (3) Individual Project Study
Requires students to conduct self-directed research and production in a seminar setting. Topics relate to individual projects.
**Repeatable:** Repeatable for up to 15.00 total credit hours.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

CMDP 6650 (5) Producing Practicum
Explores advanced producing principles through the preproduction of the MFA thesis project, including the development of a professional project proposal.
**Requisites:** Requires a prerequisite course of CMDP 5650 (minimum grade C-).
**Grading Basis:** Letter Grade

CMDP 6660 (5) Documentary MFA Thesis Seminar I
Explores production of MFA thesis product. Focus is on production strategies, ethical challenges and other practical production issues.
**Requisites:** Requires a prerequisite course of CMDP 6500 (minimum grade C-).
**Grading Basis:** Letter Grade

CMDP 6665 (5) Documentary MFA Thesis Seminar II
Explores editing and post-production of the MFA thesis project. Emphasizes aesthetic choices (structure, narration and music), distribution, contracts and audience.
**Requisites:** Requires a prerequisite course of CMDP 6600 (minimum grade C-).
**Grading Basis:** Letter Grade

CMDP 6841 (1-3) Independent Study
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
**Grading Basis:** Letter Grade

CMDP 6871 (3) Special Topics
**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
**Requisites:** Restricted to graduate students only.
CMDP 7100 (3) Historical Overview of Media Arts and Technology
Explores a survey of historical trends in art and technology from the Renaissance to the contemporary global scene. Students investigate how artistic disciplines inform one another and how parallel developments in technology have played a significant role in the history of the arts. This course locates media arts within this broader historical context.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CMDP 7150 (3) Theoretical Overview of Media Arts and Technology
Surveys major theories of art, culture and technology formulated by both practitioners and theoreticians and examines conversations among technology studies, media theory and artistic practice. Students will investigate a variety of approaches, locating media arts within a broad range of theoretical perspectives.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CMDP 7200 (3) Research and Methodologies I
Introduces students to modalities of research and methodological practices in the context of media arts and technology. Strategies from a variety of academic disciplines will be critically engaged to provide a foundation for future work.
Grading Basis: Letter Grade

CMDP 7300 (3) Theories of the Avant-Garde
Explores various manifestations of avant-garde and experimental literature, art and media performance in the 20th century such as Cubism, Futurism, Dada, Surrealism, Theatre of the Absurd, the Situationists, Fluxus, Oulipo and others. Media forms analyzed will include manifestos, sound poetry, theatre, the novel, happenings, cinema, installation and other forms of historical avant-garde art practices.
Grading Basis: Letter Grade

CMDP 7400 (3) Contemporary Practices
Provides students with access to contemporary practices and discourses in media art and culture. The class engages professional practitioners through performances, field work and workshop encounters that may be open to the public. Students research, coordinate and present on biweekly guest presentations, with alternating weeks for reflection and discussion. Readings complement guest presentations.
Grading Basis: Letter Grade

CMDP 7450 (3) Comprehensive Exam Seminar
Designed in a seminar format, this course reviews literature and concepts in all prior coursework and guides students in their preparation for comprehensive exams. All ETMAP students must demonstrate their understanding of the fundamental concepts explored and developed in prior coursework in relation to individual areas of research.
Requisites: Requires prerequisite courses of CMDP 7100 and CMDP 7150 and CMDP 7250 and CMDP 7550 (all minimum grade C-).
Grading Basis: Letter Grade

CMDP 7500 (3) Production Methods I
Provides technical resources for students to work with emergent technologies in a media arts context. This is a team-taught, practice-based course addressing various production methods, from moving image and video to web and network media to computational media.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

CMDP 7560 (3) Emergent Technologies: Theory and Practice
Explores how discreet modalities of media arts practices and their underpinning theoretical perspectives inform each other through the use of technology. Students investigate and develop theoretical perspectives on the exchange between art, technology and theory within their own research and the broader context of the contemporary social and cultural landscape.
Requisites: Requires a prerequisite course of CMDP 7150 (minimum grade C-).
Grading Basis: Letter Grade

CMDP 7841 (1-9) Independent Study
Independent Study
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

CMDP 7871 (3) Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

CMDP 8100 (3) Dissertation Development
Designed in a seminar format, this course guides students through the development of a practice-based dissertation in which constant critical thinking is required. Through intensive workshopping and close reading, this class guides students from the dissertation proposal to the opening stages of tangible, original research.
Grading Basis: Letter Grade

CMDP 8500 (3) Collaborative Studio Practice I
Explores approaches to media arts collaboration across disciplines. Through technological and social systems, students investigate the role of the artist. In analyzing contemporary work in an ongoing cycle of discussion, reading and art practice, students will respond to projects, texts and media in form of creative practice.
Requisites: Requires a prerequisite course of CMDP 7450 (minimum grade C-).
Grading Basis: Letter Grade

CMDP 8600 (1-6) Independent Studio Critique
Work under faculty supervision with individual and group critiques focusing on the development of a practice-based dissertation. Designed to be taken in conjunction with CMDP 8100.
Grading Basis: Letter Grade

CMDP 8991 (1-10) Doctoral Dissertation
Repeatable: Repeatable for up to 40.00 total credit hours.
Requisites: Restricted to graduate students only.

Interdisciplinary Documentary Media Practices - Master of Fine Arts (MFA)
The MFA in Interdisciplinary Documentary Media Practices, a terminal degree, is a three-year program in which students learn and experiment with a variety of documentary media practices as they work toward the completion of a thesis project. The core of the program is the Documentary Lab, in which students from a wide range of disciplines develop and workshop projects at various stages of completion. The program also takes advantage of masterclasses and other opportunities offered by the Center for Documentary and Ethnographic Media.
Requirements

Admission Requirements

DCMP is not currently accepting applications for the MFA program. View the department website (https://www.colorado.edu/cmci/dcmp/mfa/) for updates.

Application Deadlines

The deadline for U.S. and international students is December 1.

Application Guidelines and Resources

MFA applicants must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university and provide transcripts from every institution attended.
- Have an undergraduate grade point average of at least 2.75.
- If international, provide TOEFL or IELTS scores.
- Provide three letters of recommendation.
- Provide a statement of purpose.
- Provide a portfolio of relevant media work, such as video, photographs, sound pieces, websites, and other media art projects. Format preference is Vimeo. Please include a link to your online portfolio in your personal statement.

Candidates will only need to provide official transcripts only after they are recommended for admission.

For more information about this program, visit the department website (https://www.colorado.edu/cmci/dcmp/mfa/) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

Program Requirements

The IDMP MFA is a three-year degree program requiring the successful completion of 60 credit hours of coursework, a first year review, second year review and thesis defense. The thesis consists of an original, media-based project and a written reflection that situates the project within the field of documentary media practices.

Emergent Technologies and Media Art Practices - Doctor of Philosophy (PhD)

The emergent technologies and media arts practices (ETMAP) PhD is a practice-led program of scholarly research and exploration of media practices, theories and innovations in art and technology. Students both experiment with and research the media and artistic practices that they study. The ultimate goal is a substantive dissertation and media-based project that situate media art making within broad cultural and art historical perspectives.

Designed to be completed in four years, the program requires 72 credit hours, a first year review, comprehensive exam, prospectus defense and dissertation defense. There is a high degree of flexibility in the curriculum, with students choosing up to 15 credit hours of guided electives and independent study, including courses and independent study with faculty in other departments. After admission to candidacy, students conduct scholarly and creative research over three semesters (30 credit hours), culminating in a dissertation that makes a unique contribution to the field of media arts and technology.

The program takes seriously the balance of theory and practice. The dissertation consists of two equally important components: a written dissertation and a media-based project. Students are expected to be both scholars and creative artists.

Requirements

Admission Requirements

An overview of admission requirements may be found below. For additional information, view the program page on the department website (https://www.colorado.edu/cmci/dcmp/phd/).

Application Deadlines

The application deadline for U.S. and international applicants is December 1.

Application Guidelines and Resources

PhD applicants must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university and provide transcripts from every institution attended.
- Have an undergraduate grade point average of at least 2.75.
- If international, provide TOEFL or IELTS scores.
- Provide three letters of recommendation.
- Provide a statement of purpose.
- Provide a portfolio of relevant media work, such as video, photographs, sound pieces, websites, and other media art projects. Format preference is Vimeo. Please include a link to your online portfolio in your personal statement.
- Provide a writing sample of at least 2500 words.

In the online application, select ETMAP-PHD as the academic plan.

Transcripts

For review and decision purposes, applicants are required to upload an unofficial copy of their transcript(s) in the online application. The program requires a copy of the scanned transcript from each undergraduate and graduate institution that you attended. This includes community colleges, summer sessions, and extension programs. While credits from one institution may appear on the transcript of another institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether or not courses were completed. Failure to list and submit transcripts from all institutions previously attended is considered to be a violation of academic ethics and may result in the cancellation of a student’s admission or dismissal from the university.

For more information about this program, visit the department website (https://www.colorado.edu/cmci/dcmp/mfa/) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.
Candidates will only need to provide official transcripts only after they are recommended for admission.

**Program Requirements**
The ETMAP PhD is a four-year degree program requiring the successful completion of 72 credit hours of coursework, a first year review, comprehensive exam, prospectus defense and dissertation defense.

In the comprehensive exam, students must demonstrate their proficiency and understanding of the fundamental historical and theoretical concepts explored and developed in prior coursework. Students advance to candidacy after the prospectus defense.

The dissertation must include practical as well as written theoretical components. Students are expected to publicly present their media-based project before the dissertation defense.

**Emergent Technologies and Media Arts Practices - Graduate Certificate**

The graduate certificate in emergent technologies and media arts practices (ETMAP) is a 9-credit-hour certificate program that is open to any student pursuing a graduate degree in any department at CU Boulder. In the program, students integrate media practices, theories and innovations in art and technology into their research. Students both experiment with and research the media and artistic practices that they study. The program will be of particular interest to students whose media research is practice-led and students who wish to integrate media arts practices into their research.

**Requirements**

**Application Guidelines**

To be accepted into the program, students must be a graduate student in good standing with the Graduate School, submit a statement of interest to the Associate Chair of Graduate Studies and meet with the Associate Chair to discuss to their goals as a student in the program. Acceptance into the program is at the discretion of the Associate Chair.

For more information about this program, view the department website (https://www.colorado.edu/cmci/dcmp/cert-etmap/) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

**Required Courses and Credits**
The ETMAP certificate requires the successful completion of 9 credit hours in critical studies and media arts practices, as described below.

The certificate program can usually be completed in one to two years. After the course requirements are met, students must provide a transcript to the Associate Chair of Graduate Studies. The certificate will appear on the student's record at that time or upon graduation.

**Resources**

Students have access to DCMP equipment, facilities and other resources as long as they are enrolled in a course that fulfills certificate requirements.

**Interdisciplinary Documentary Media Practices - Graduate Certificate**

The graduate certificate in interdisciplinary documentary media practices (IDMP) is a 12-credit-hour certificate program that is open to any student pursuing a graduate degree in any department at CU Boulder. In the program, students integrate documentary media practices into their research. The core of the program is the documentary lab, in which students from a wide range of disciplines develop and workshop projects at various stages of completion. The program also takes advantage of masterclasses and other opportunities offered by the Center for Documentary and Ethnographic Media.

**Requirements**

**Application Guidelines**

To be accepted into the program, students must be a graduate student in good standing with the Graduate School, submit a statement of interest to the Associate Chair of Graduate Studies, and meet with the Associate Chair to discuss to their goals as a student in the program. Acceptance into the program is at the discretion of the Associate Chair.

For more information about this program, view the department website (https://www.colorado.edu/cmci/dcmp/cert-idmp/) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.
Required Courses and Credits
The IDMP certificate requires the successful completion of 12 credit hours of seminar courses, and production workshops and topics as described below.

The certificate program can usually be completed in one to two years. After the course requirements are met, students must provide a transcript to the Associate Chair of Graduate Studies. The certificate will appear on the student's record at that time or upon graduation.

Resources
Students have access to DCMP equipment, facilities and other resources as long as they are enrolled in a course that fulfills certificate requirements.

Information Science
Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena, and translate those findings to the design and development of useful and meaningful technology.

The department will equip students with the conceptual machinery to succeed in a future characterized by new ways of working with information and communication technology.

The knowledge and skills of our graduates will enable them to participate in and shape new structures of enterprise. Customized, creative production—as in the "maker culture" movement—is expanding notions of the enterprise, as are distributed and mobile workforces.

The MS and PhD degrees align with standards set by other universities. Both include liberal arts education combined with empirical work and computing knowledge, and both incorporate the grant-driven, collaborative "lab model" research that characterizes the natural and engineering sciences.

Course code for this program is INFO.

Courses
INFO 5301 (3) Computation for Research in Information Science
Introduces principles of computational thinking through the manipulation, transformation and creation of data artifacts used in research. Students will be exposed to a high-level overview of algorithms, functions, data structures, recursion and object-oriented computer programming through a series of assignments that emphasize the use of computation as a means of scholarship.

Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
INFO 5501 (3) Open Collaboration
Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3501
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5502 (3) Online Communities
Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities. Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants' motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3502
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5503 (3) Everyday Information Behavior
Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information online. Students learn to analyze the informational dimensions that occur in their everyday lives.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3503
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5504 (3) Digital Identity
Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3504
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5505 (3) Designing for Creativity and Learning
Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3505
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5506 (3) Online Fandom
Explores and analyzes fan communities in a digital context. Through applied research, students will investigate online spaces devoted to participatory and remix culture, media fandom, and fan creation. This class will draw concepts and methods from fan studies, social computing, ethnography, data science, and sociology to drive project-based inquiry.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3506
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5507 (3) Data and the Humanities
Introduces students to foundational computing and statistical concepts for analyzing humanities data. This course discusses the influence of digitization and data on humanist inquiry and exposes students to techniques for working with data in different areas of the humanities, including literature, history, and art. The course emphasizes technical practices involved in humanist data analysis. Comfort with programming is strongly encouraged.
Equivalent - Duplicate Degree Credit Not Granted: INFO 3507
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5601 (3) Ethical and Policy Dimensions of Information and Technology
Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction. Counts as Mastery in Information Science.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4601
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5602 (3) Information Visualization
Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4602
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5603 (3) Survey Research Design
Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4603
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
INFO 5604 (3) Applied Machine Learning
Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4604
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5605 (3) Ethnographic Research in Applied Settings
Demonstrates the power of ethnography as an investigative approach that is useful in design, evaluation and question formation for information scientists across all workforce sectors. Teaches students how to be keen observers of the unusual as well as the everyday to reveal meaningful insights that elaborate information science projects.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4605
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5606 (3) Critical Technical Practice
Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships. Counts as Mastery in Information Science.
Equivalent - Duplicate Degree Credit Not Granted: ATLS 5606, ATLS 4606 and INFO 4606
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5607 (3) Software Engineering for Data-Centered Systems
Explores design and engineering of systems for data storage and analysis. Introduces fundamental development concepts used in real-world data systems. By combining software engineering with knowledge from data science and human-centered computing, prepares students to develop systems, interpret and modify codebases, understand modern concepts for managing data at scale, and work in teams to create cutting-edge applications for consumer use.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4607
Requisites: Requires prerequisites of INFO 2201 or CSCI 2270 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior)
Grading Basis: Letter Grade

INFO 5608 (3) Community-Based Design
Surveys techniques in cooperative design with community members as collaborators rather than subjects. Students will explore approaches such as participatory design and co-design. Students will work in teams in partnership with community stakeholders to create tools, experiences, or systems that meet the needs of communities, contribute to social change, and/or lead to advancing academic knowledge. Counts as Mastery in Information Science.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4608
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5609 (3) User-Centered Design
Surveys the theoretical and practical foundations of human-computer interaction and user-centered design. Students learn theories of interaction (including cognitive, organizational, collaborative, and task-based approaches), user interface design techniques, design guidelines, and usability testing in the context of developing technology. Course content is explored through a variety of interfaces (desktop, mobile, touch, vision, audio, etc.) and contexts (personal, organizational, cross-cultural, etc.).
Equivalent - Duplicate Degree Credit Not Granted: INFO 4609
Requisites: Restricted to graduate students only.

INFO 5611 (3) Ubiquitous Computing Experience Design
Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4611
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5613 (3) Network Science
Introduces theories and methods for analyzing relational data in social, information, and other complex networks. Students will understand the processes and theories explaining network structure and dynamics as well as develop skills analyzing and visualizing real-world network data. No math or statistics training required, but course will assume familiarity with Python.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4613
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

INFO 5620 (3) Race and Technology
This course is designed with the understanding that race and racial inequality have been central to how societies and societal systems of power have been shaped and reshaped over time. Students will critically examine how race is created by and through sociotechnical systems. Students will explore how the design, implementation, and use of digital platforms and their data continue to perpetuate and embody white, cisgender, heteronormative systems of power. This course will cover a wide range of foundational and emergent scholarship, giving voice to Scholars of Color, providing students with a foundation through which they can continue to critique and explore sociotechnical and other societal arrangements more broadly.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4620
Requisites: Restricted to graduate students only.

INFO 5651 (3) Fundamental Concepts in Data Science
This intensive course provides a general understanding of the mathematical concepts required for success in data science. This course will cover a wide range of mathematical tools in data science including an overview of calculus and linear algebra along with selected topics from numerical analysis. The course will also explore computational implementations of these ideas. This course provides a bridge for students without these advanced math concepts to learn to apply them within a data science career or within a graduate program in data science.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4651
INFO 5652 (3) Statistical Programming in R
This intensive course covers foundational data science tools and techniques in the R programming language, including acquiring, cleaning, exploring, and analyzing data, and conducting reproducible research. The course will emphasize the use of data management best practices such as the tidyverse toolkit in R.
Equivalent - Duplicate Degree Credit Not Granted: INFO 4652
INFO 5841 (1-3) Independent Study
Independent Study
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
INFO 5871 (3) Special Topics
Topics will vary by semester.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
INFO 5919 (3) HCC Survey and Synthesis: Foundations and Trajectories
Examines the interdisciplinary field of human-centered computing through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. Social computing, is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists, information scientists, social scientists, and business and media arts students.
Equivalent - Duplicate Degree Credit Not Granted: CSCI 5919
Requisites: Restricted to graduate students only.
INFO 5931 (1-3) Internship
Internship
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.
INFO 6101 (3) Theories and Concepts in Information Science
Surveys foundational theories and concepts in information science. Students will learn to read and reflect critically about seminal texts, tracing their intellectual genealogies from a variety of originating disciplines to their appropriation by information science. Students will apply these theories to contemporary issues and problems.
Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.
Grading Basis: Letter Grade
INFO 6201 (3) Interdisciplinary Ways of Knowing
Introduces principles of research design and surveys the breadth of research methods appropriated by the field of information science. Students will explore the diversity of epistemological orientations that make up the field, that influence the types of often mixed research methods applied and that shape the kinds of questions that are and are not explored.
Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.
Grading Basis: Letter Grade
INFO 6301 (3) Computation for Research in Information Science
Examines the diversity of roles that computation can play in information science research, ranging from an overview of some data-driven practices to prototyping and infrastructure development to computation-as-research-support. Provides students with a level of computational literacy to engage with the multiplicity of roles that computation serves in the different kinds of research work that is happening across the domain, including exemplars of different kinds of technical contributions and approaches.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
INFO 6401 (3) Information and Ideas in Design Disciplines
Introduces fundamental principles and practices from user-centered design disciplines and examines how those principles and practices intersect with contemporary issues in information science. Theory, research and exemplary practices from interaction, graphic, product, communication and experience design are introduced through readings, problems and case histories. Projects provide direct experience with common design tools and exposure to leading practitioners.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
INFO 6500 (1) Information Science Seminar
Enculturates graduate students in the discipline of Information Science through weekly seminar series that hosts guest speakers, internal faculty and graduate speakers and other community building and professional development activities.
Repeatable: Repeatable for up to 8.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
INFO 6871 (3) Special Topics
Topics will vary by semester.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
INFO 6940 (1-6) Supervised Master's Research Project
Students enrolling in this course will conduct supervised research in Information Science under the supervision of one or more faculty advisors, to include preparation of academic literature reviews, laboratory or field experiments, surveys or interviews with technology stakeholders, interface or system design and development, system evaluation, or other examples of rigorous scholarship in the discipline of Information Science. Some research projects may be carried out in collaboration with other graduate students and faculty members. Although contribution to publishable scholarship (e.g., posters, demonstrations, conference papers, or journal articles) is one possible outcome of this educational experience, the student and his/her advisor(s) may agree to determine alternate mechanisms for assessing mastery of the academic research process, depending on the scope of work carried out as part of this experience, the publishability of the research, and the specific needs and career goals of the student.
Repeatable: Repeatable for up to 6.00 total credit hours.
INFO 6950 (1-6) Master's Thesis
Designing, researching and writing a master's thesis under the supervision of the student's advisors.
Repeatable: Repeatable for up to 6.00 total credit hours.
INFO 7000 (3) Introduction to Doctoral Studies in Information Science
Introduces students to practices associated with successful advancement in a doctoral program, rigorous scholarship in information science and more expert and early participation in their scholarly community of practice.
Requisites: Restricted to Information Science (INFO) Ph.D. graduate students only.
Grading Basis: Letter Grade
INFO 7841 (1-3) Independent Study
Independent Study
Repeatability: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to PhD students only.
INFO 7871 (3) Special Topics
Topics will vary by semester.
Repeatability: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to PhD students only.
INFO 8991 (1-10) Doctoral Dissertation
Repeatability: Repeatable for up to 40.00 total credit hours.
Requisites: Restricted to PhD students only.

Information Science - Master of Science (MS)
The Master of Science degree in Information Science is intended for BS students who desire additional study and experience conducting supervised research to make their résumés even more attractive to industry upon graduation, as well as students considering a PhD in Information Science but lacking either master's-level coursework in the field or demonstrated research experience at the graduate level.

There are two options under this degree:

- Thesis plan: 6 thesis hour credits, typically taken over two semesters (3 credit hours each). A thesis defense with 3 committee members and submission of the thesis to the Graduate School are required.
- Non-thesis plan: 6 credits taken as a graduate-level independent study over two semesters (3 credit hours each) with an INFO faculty member. Students will complete one or more in-depth research projects as part of this plan; however, a formal thesis document and oral presentation/defense are not required.

If an MS elects to continue as a PhD student Information Science—and is admitted, via an explicit and separate application to the program—then up to seven of the courses taken as part of this MS (a maximum of 21 credit hours) could be “rolled-up” to meet PhD curriculum requirements, pending approval of the student’s PhD preliminary exam committee and the graduate director.

Bachelor’s–Accelerated Master’s Degree Program
Students may earn this degree as part of the Bachelor’s–Accelerated Master’s (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor’s and master’s degree in a shorter period of time.

For more information, see the Accelerated Master’s tab for the associated bachelor’s degree(s): Information Science - Bachelor of Science (BS) (p. 954)

Requirements
Application Guidelines
Applicants must hold at least a bachelor’s degree or its equivalent. They must also provide the following documents:

- A CV or resume
- An unofficial transcript from each college or university attended
- Scores from the general GRE are optional; international students must also have a TOEFL score of at least 600 (IBT 100)
- Three letters of recommendation from people qualified to judge the student’s potential for success in graduate school (Note: The most compelling recommendation letters will provide specific observations about the candidate's promise in analytical thinking, oral and written scientific communication, and research and teaching, as well as demonstration of teamwork and collegiality)
- A statement of purpose (two pages maximum) that describes a question, problem or topic in information science the student has a passion to address; explains how the student’s previous academic training, professional experience and/or personal passions led them to this question, problem or topic and drew them to this degree program; and identifies the faculty members with whom the student is interested in working and why
- Optional: A writing sample in addition to the statement of purpose

We encourage applications from individuals representing the broad range of disciplines. We welcome students who bring diverse skills and perspectives on the range of issues related to understanding and shaping the future of information science. All students admitted to the program will be expected to develop a breadth of competencies that are essential to being a researcher in this diverse, interdisciplinary field. One’s ability and willingness to expand skill sets should be demonstrated in the statement of purpose.

Students are required to upload an unofficial copy of their transcript(s) in the online application. We require one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed. Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Only after a student is recommended for admission will they need to provide official transcripts. Assistance with graduate programs is available by phone (303-492-7977) or email (cmcigrad@colorado.edu).

### Information Science - Doctor of Philosophy (PhD)

Information science considers the relationships between people, places and technology—as well as the information or data those interactions yield. It unites a number of interdisciplinary approaches for understanding and shaping a future characterized by pervasively available digital technology. Drawing on knowledge from social science, computer science, data science and the humanities, information scientists support the study and innovation of "socio-technical systems."

Information science takes as a core idea that data are a common denominator for both social and technical systems. By focusing on the transformation of data across systems of people, places, and technology in ways that then make data truly useful and meaningful, students will be in the best possible position to invent what society can do with technology, and what technology can do for society.

The PhD program offers an education that combines training in the liberal arts, empirical investigation and computing knowledge, and incorporates the collaborative "lab model" research that characterizes the natural and engineering sciences.

### Requirements

#### Application Guidelines

PhD applicants must:

- Hold at least a bachelor's degree or its equivalent.
- Provide the following documents:
• A CV or resume
• An unofficial transcript from each college or university attended
• Scores from the general GRE are optional; international students must also have a TOEFL score of at least 600 (IBT 100)
• Three letters of recommendation from people qualified to judge the student’s potential for success in graduate school (Note: The most compelling recommendation letters will provide specific observations about the candidate’s promise in analytical thinking, oral and written scientific communication, and research and teaching, as well as demonstration of teamwork and collegiality)
• A statement of purpose (two pages maximum) that describes a question, problem or topic in information science the student has a passion to address; explains how the student’s previous academic training, professional experience and/or personal passions led them to this question, problem or topic and drew them to this degree program; and identifies the faculty members with whom the student is interested in working and why
• Optional: A writing sample in addition to the statement of purpose

We encourage applications from individuals representing the broad range of disciplines. We welcome students that bring diverse skills and perspectives on the range of issues related to understanding and shaping the future of information science. All students admitted to the program will be expected to develop a breadth of competencies that are essential to being a researcher in this diverse, interdisciplinary field. Twenty-one credit hours of graduate-level elective coursework must be taken. Elective specialization courses can be within or outside of INFO, under the guidance of the student's advisor and committee. Students will also take an additional 30 dissertation hours, typically after finishing their initial coursework.

**Total Credit Hours** 36

**PhD Milestones**

In addition to coursework, program requirements include the successful completion of the following PhD milestones: preliminary exam, comprehensive exam/dissertation proposal and dissertation.

**Intermedia Art, Writing and Performance**

The intermedia art, writing and performance (IAWP) program is an interdisciplinary digital arts and humanities research unit with a practice-based PhD. Faculty investigate past and present forms of digital art, writing and performance, offering graduate students an environment in which to practice and research emerging forms of creativity.

Course code for this program is IAWP.

**Doctoral Degree**

• Intermedia Art, Writing and Performance - Doctor of Philosophy (PhD) (p. 1656)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Amerika, Mark (https://experts.colorado.edu/display/fisid_116523/) Professor; MFA, Brown University

Carr, Julia Alice (https://experts.colorado.edu/display/fisid_143349/) Professor; PhD, University of California, Berkeley

Devendorf, Laura (https://experts.colorado.edu/display/fisid_158564/) Assistant Professor, Faculty Fellow; PhD, University of California, Berkeley

Swanson, Joel E. (https://experts.colorado.edu/display/fisid_134311/) Assistant Professor; MFA, University of California, San Diego

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/) Associate Professor; PhD, University of California, San Diego
Courses
IAWP 6000 (3) Introduction to Practice-Based Research
Introduces students to practice-based research methods in intermedia art, writing and performance.
Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6100 (3) Theory and Practice of Doing
Introduces students to the theory of doing and making. Guiding questions include: what does it mean to place “doing” at the center of one's research agenda? What does it mean to do hands-on work in an art/design studio, a digital humanities lab, a media lab, a media archaeology lab, a makerspace or a hackerspace?
Grading Basis: Letter Grade

IAWP 6200 (3) Intermedia Collaboratory
Collaborative studio course in which students focus on emerging practices in intermediate art, writing and performance while collaboratively building art, writing and/or performance projects that are presented to the community as public events and programs including exhibitions, publications and performances.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6700 (3) Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

IAWP 6871 (3) Special Topics
Repeatable: Repeatable for up to 3.00 total credit hours.
Grading Basis: Letter Grade

IAWP 6800 (3) Intermedia Seminar
Focuses on intermedia arts, writing and performance as they relate to digital media, communication and information.
Requisites: Restricted to College of Media, Communication, and Information (CMCI) graduate students only.
Grading Basis: Letter Grade

IAWP 6871 (3) Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

IAWP 7841 (1-3) Independent Study
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

IAWP 7871 (3) Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

IAWP 8991 (1-10) Doctoral Dissertation
Repeatable: Repeatable for up to 40.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

Intermedia Art, Writing and Performance - Doctor of Philosophy (PhD)
The intermedia art, writing and performance (IAWP) program is an interdisciplinary digital arts and humanities research unit with a practice-based PhD.

Traditional scholarly and creative work outputs, such as the single-authored print book or conventional gallery exhibitions, have already been challenged by the emergence of Internet art sites, electronic literature, live audio/visual performance, multi-platform storytelling or transmedia narratives, software art, artificial intelligence, 3D animation, interactive installations for public spaces, virtual reality, video games, networked media activism and innovative art applications for mobile devices and tablets.

IAWP’s internationally renowned and affiliated faculty collaborate with graduate students to probe the significance of a digitally expanded, process-based research environment located in a cluster of interdisciplinary research labs. The program provides a flexible pedagogical structure that will lead to the creation of new and hybridized forms of art, writing, performance, scholarship, theory, design, curation, exhibition and publication appropriate for our current cultural moment.

The program concentrates its curriculum on digital forms of creativity and cultivates cutting-edge investigations into the practice, theory, history and philosophy of intermedia art, and scholarship.

Requirements
Application Guidelines
Applicants to the PhD program in intermedia art, writing and performance (IAWP) are expected to hold a master’s degree (MFA or MA preferred) or its equivalent from an accredited college or university, and must provide transcripts from every institution attended. In exceptional cases, applicants without a master’s degree may be considered for admission.

The program encourages applications from interdisciplinary digital artists and/or humanists who have already started developing experimental modes of practice-based research in contemporary forms of artistic expression.

Domestic applications must be received by the program no later than Jan. 15 prior to the fall semester for which entrance is sought. International applications should be submitted by Dec. 1. Late applications may be considered under special circumstances.

Successful applicants typically meet or exceed the following criteria:

• Provide transcripts from all institutions the applicant has attended as an undergraduate and graduate.
• Have an undergraduate cumulative GPA of at least 3.2 and a cumulative GPA of at least 3.5 in previous graduate work.
• Provide three letters of recommendation.
• Provide a 1000-word artist statement and proposal for a practice-based research project.
• Provide a resume or CV that includes academic and employment experience.
• Provide a portfolio of intermedia artwork, such as Internet art sites, electronic literature, video and/or film work, sound works, digital
humanities projects, creative writing, mobile and web applications, etc. Format preference is web-based and could include links to Vimeo, Soundcloud, online publication and/or exhibition sites, PDFs, personal websites, etc. DVDs or flash drives with QuickTime files, images, texts, etc., are also accepted.

Meeting these criteria does not guarantee acceptance into the program. The program accepts relatively few new doctoral students each fall; qualified applicants may exceed available openings.

For review and decision purposes, students are required to upload an unofficial copy of their transcript(s) in the online application. The program requires one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed.

Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Program Overview
Doctoral students in the IAWP PhD program take 30 credit hours of required coursework in the first two years of the program, followed by 30 dissertation credit hours, for a total of 60 hours.

The required coursework will include an interdisciplinary set of IAWP classes that introduces students to collaborative, practice-based research processes in the digital arts and humanities. The coursework includes Introduction to Practice-Based Research (IAWP 6000), Intermedia Collaboratory (IAWP 6200), Theory and Practice of Doing (IAWP 6100) and the Intermedia Seminar (IAWP 6800). Students are also encouraged to take approved courses offered by departments inside and outside the College of Media, Communication and Information.

At the end of their second year, students will take their general examination. Once they have passed the general examination, their research will focus on the creation of an original and substantial project centered on practice-based research. The final outcome of their research will result in a creative work accompanied by a written dissertation.

Time Limit
Students are expected to complete the program and their practice-based research project in four years.

Journalism
The Department of Journalism is founded on the principle that a well-informed and engaged public is essential to democracy—perhaps more so now, at a time of dizzying change, than it has ever been—and that, in the face of this change, journalism retains a unique role in contributing to civic life and to the quality of public discourse.

We put this principle to work by helping students become constructive participants in an ever-evolving global media landscape, where distinctions between producers and consumers of content have blurred. More specifically, we prepare them, at both the undergraduate and graduate levels, for careers in journalism and other fields of public communication. We train students to gather information from a diversity of sources, to analyze it critically, and to report what is significant through stories and other media forms across multiple media platforms. We encourage ethical awareness so that students will think independently, being prepared to reflect on and to help shape media practices and norms rather than take them at face value.

We believe in the integration of classroom instruction with practical experience. Many of our students work for, and manage, campus online news and entertainment sites, television programs and a radio station. They intern at broadcast stations, newspapers, magazines, websites and social media companies. Lastly, as a faculty, and with the help of colleagues elsewhere in our College who are working on new and innovative forms of human communication, we are committed to improving journalism through pioneering research and creative work.

Course code for this program is JRNL.

Master's Degrees
- Journalism - Master of Arts (MA) (p. 1663)
- Journalism Entrepreneurship - Master of Arts (MA) (p. 1663)

Doctoral Degree
- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1664)

Faculty
While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ackland, Len (https://experts.colorado.edu/display/fisid_103930/)
Professor Emeritus

Bergen, Lori Ann (https://experts.colorado.edu/display/fisid_155986/)
Professor, PhD, Indiana University Bloomington

Brinkman, P. Delbert
Professor Emeritus

Chuang, Angie (https://experts.colorado.edu/display/fisid_159485/)
Associate Chair, Associate Professor; MA, Stanford University

Daughtery, Paul J. (https://experts.colorado.edu/display/fisid_128801/)
Senior Instructor; MA, University of Colorado Boulder

Dmukhovskaya, Marina (https://experts.colorado.edu/display/fisid_166268/)
Instructor, Faculty Director; MA, Indiana University Bloomington

Jones, Stephen B. (https://experts.colorado.edu/display/fisid_101578/)
Assistant Dean, Senior Instructor Emeritus; PhD, University of Utah

Kaplan, Frank L.
Professor Emeritus

Kim, Hun Shik (https://experts.colorado.edu/display/fisid_141126/)
Associate Professor; PhD, University of Missouri–Columbia

Larson, Christine M. (https://experts.colorado.edu/display/fisid_159789/)
Assistant Professor; PhD, Stanford University

McDevitt, Michael Joseph (https://experts.colorado.edu/display/fisid_122949/)
Professor; PhD, Stanford University
Moritz, Marguerite J.
Professor Emerita

Plunkett, Chuck (https://experts.colorado.edu/display/fisid_103027/)
Instructor, Faculty Director; MFA, University of Pittsburgh

Rosner, Hillary (https://experts.colorado.edu/display/fisid_122724/)
Associate Professor; PhD, Columbia University

Ryan, Kathleen Marie (https://experts.colorado.edu/display/fisid_156501/)
Assistant Professor; MS, Syracuse University

Sama, Vicky
Scholar in Residence; MA, University of Colorado Boulder

Simone, Keyana
Scholar in Residence; PhD, University of Colorado Boulder

Skewes, Elizabeth (https://experts.colorado.edu/display/fisid_164326/)
Professor Emeritus; PhD, University of Oregon

Taylor, Ross (https://experts.colorado.edu/display/fisid_164006/)
Professor Emeritus; PhD, University of Denver

Voakes, Paul S.
Professor Emeritus

Whitt, Jan (https://experts.colorado.edu/display/fisid_163862/)
Instructor, Faculty Director; MFA, University of Pittsburgh

Yulsman, Thomas (https://experts.colorado.edu/display/fisid_109386/)
Professor; MS, Columbia University

## Courses

**JRNL 5001 (3) Media Technology Boot Camp**
Offers a foundation in the technologies of journalistic storytelling across a variety of established and emerging media platforms, such as print, television, radio, online publications, blogs, social media and emerging forms of communication. Students will emerge from the course with basic competence in the technical tools they will need as journalists.

**Requisites:** Restricted to graduate students only.

**JRNL 5011 (3) Newsgathering and Multimedia Storytelling**
Develops skills in research and reporting on public issues and news events, and in the construction of narrative in the journalistic and documentary traditions, using a variety of media platforms.

**Requisites:** Restricted to graduate students only.

**JRNL 5102 (3) Photojournalism Portfolio**
Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4102

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5201 (3) Principles of American Journalism**
Acquaints students with concepts and functions of journalism in America. It will explore the underlying principles of journalism, relationships among journalism and other institutions, and current issues and problems facing journalists. Students will develop familiarity with how journalism works, as well as some perspective on how well (or not) journalism performs its function in American society.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 5211 (3) Funding Journalism in the 21st Century**
Explores new business models and strategies that could sustain the news industry as it makes the transition to primarily digital platforms. The course examines both for-profit and nonprofit models in the United States, while also investigating projects around the world. The class answers the question: If journalism is funded this way, how can I use this in my own career?

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 5221 (3) Entrepreneurial Journalism**
Study the practices of entrepreneurial journalistic ventures, both in start-ups to "intrapreneural" undertakings at legacy media companies. Throughout the course, students will learn skills to enhance their own entrepreneurial journalism, from understanding freelance markets to seeking commercial and nonprofit funding for media ventures.

**Requisites:** Requires prerequisite course of JRNL 5211 (minimum grade D-).

**Grading Basis:** Letter Grade

**JRNL 5231 (3) Video Newsgathering**
Explores the principles and techniques involved in the preparation of mobile- and social-based video storytelling. Students will learn the basics of video journalism: gathering sound and picture simultaneously, the fundamentals of exposure and composition, the grammar of video, writing to picture, selecting sound bites, and the basic concepts of editing.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 5241 (3) Coding for Journalists**
Prepare non-coders to work successfully with developers for students to learn what they need to know to collaborate with technologists. Students will also learn the basics of front-end web development languages (HTML, CSS, Javascript), which will help them develop their own portfolios, and essentially become more marketable and versatile.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 5311 (3) Literary Journalism**
Studies the contributions of American literary journalists from Sara Davidson, Joan Didion, Normal Mailer, Hunter S. Thompson and Tom Wolfe; to established writers of nonfiction, including Annie Dillard, Jon Krakauer, Jane Kramer, Adrian Nichole LeBlanc and Terry Tempest Williams; to the newest wave of long-form journalists. Explores the boundaries between fiction and nonfiction and the literary techniques that distinguish creative nonfiction and literary journalism from other reportorial and storytelling forms. Formerly JRNL 6321.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4311

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives
JRNL 5344 (3) Video Documentary Production
Designed to give students the experience of researching, writing, shooting and editing their own documentaries.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4344
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Broadcast Journalism

JRNL 5402 (3) Journalism and Social Identity
Provides a discussion-based inquiry into the role of journalism and journalists in the representation of intersectional identities, focusing on race, gender, sexual expression and socioeconomic class in the United States. The study and practice of journalism in this course will address issues of trust, power, privilege and ethics inherent in reporting across difference.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4402
Requisites: Restricted to graduate students only.

JRNL 5411 (3) Global Journalism and International News
This graduate course provides students with an overview of the field of international and global journalism with particular foci on comparative media research and international affairs reporting. The course seeks to expose students to theoretical foundations and key concepts in the news media systems and journalistic practices around the world. It also addresses the political, social, and economic consequences of global journalism and the challenges related to it.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4502
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL/ JOUR 5511 and JRNL 5514 (all minimum grade C-). Restricted to College of Media, Communication, and Information (CMCI) graduate students only.
Additional Information: Departmental Category: Print Online Journalism

JRNL 5502 (3) Newsgathering 2
Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4502
Requisites: Requires prerequisite courses of JOUR 5511 and JRNL/ JOUR 5552 (all minimum grade C-). Restricted to College of Media, Communication, and Information (CMCI) graduate students only.
Additional Information: Departmental Category: Print Online Journalism

JRNL 5512 (3) In-Depth Reporting
Shows how to dig beneath the surface of issues and events. Focuses on research, interviewing, and writing.
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Print Online Journalism

JRNL 5514 (3) Newsgathering for Television
Teaches advanced principles and techniques involved in the preparation of news for broadcasting.
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Broadcast Journalism

JRNL 5521 (3) Data Journalism
Instructs students in data-driven investigative reporting. Includes hands-on, in-depth instruction in gathering data from census reports, commercial databases, information networks, and other sources, and utilizing statistical analysis software and spreadsheets to analyze the information in ways that can help deepen and strengthen journalistic stories on a wide variety of subjects.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Core Curriculum and General Electives

JRNL 5552 (3) Multimedia Editing
Discusses principles and practice in copy editing and writing headlines for local and wire stories. Practice in page makeup, picture editing, and electronic editing.
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Print Online Journalism

JRNL 5562 (3) Digital Journalism
Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4562
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Print Online Journalism

JRNL 5572 (3) News Corps
Provides students the opportunity to immerse themselves in an explanatory/investigative news project that gives students a chance to use in-depth research to produce content for Colorado news outlets and practice the skills they've learned in previous reporting classes. Students spend several weeks studying the subject in question before reporting and producing their stories.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 5602 (3) Opinion Writing
Concentrates on several of the subjective areas of journalism. Emphasizes editorial and column writing, editorial pages and blogging.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4602
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Print Online Journalism

JRNL 5624 (4) NewsTeam
Students participate in Newssteam Boulder a program broadcast live over the Boulder cable television system.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4624
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Broadcast Journalism

JRNL 5634 (1-3) Broadcast Projects
Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Instructor consent required.
Equivalent - Duplicate Degree Credit Not Granted: JRNL 4634
Requisites: Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.
Additional Information: Departmental Category: Broadcast Journalism

JRNL 5651 (3) Journalism Law & Ethics
Explores the legal and ethical frameworks of journalistic practice and media production. Covers historical as well as current frameworks used in examining the legal and ethical issues that arise in newsgathering and publication. Examines the relationships between ethics and the law in various media context.
Requisites: Restricted to graduate students only.
**JRNL 5684 (3) The Art of Visual Storytelling**
Teaches students how to raise the production value of their work based on standards used by professionals. Students learn how lenses, lights and contrast can affect an image; how to assemble their shots with pacing and rhythm; how to apply color grading techniques to give video a cinematic look; and how to create motion graphics for titles and lower thirds.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4684

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

**JRNL 5702 (3) Arts/Cultural Reporting and Criticism**
Emphasizes composition of criticism for the performing arts and other areas of entertainment.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4702

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5704 (3) Sports Journalism**
Prepares students for the world of sport journalism. Combines the skills of a hard news reporter, the perspective of an entertainment reporter and the persuasive abilities of an editorial writer. The class focuses on how to cover sports from all angles.

**Recommended:** recommended for students in the Journalism Entrepreneurship (JRNL-MAJE) program.

**JRNL 5802 (3) Feature Writing**
Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4802

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5804 (3) Sports, Media and Society**
Examines how sports and journalism intersect and impact society. Class focuses on how sports, specifically areas of sports such as law and politics, race, gender, sexuality and disability, impact culture and society as a whole.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 5812 (3) Science Writing**
Helps students acquire the basic skills and knowledge required of science journalists. Also examines issues of scientific importance such as climate change, the nature of scientific knowledge, and how science is covered in various media.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5822 (3) Reporting on the Environment**
Involves reporting and writing about the environment by taking into account the scientific, technological, political, economic and cultural dimensions of environmental subjects.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4822

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5841 (1-3) Graduate Independent Study**
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 5851 (1-6) Graduate Professional Project**
Repeatable: Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 5871 (1-3) Special Topics**
Special Topics

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5872 (1-3) Special Topics: Print**
Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4872

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5874 (1-3) Special Topics: Electronic Media**
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Journalism (JRNL) graduate students only.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 5931 (1-3) Internship**
Repeatable: Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires pre-requisite of JRNL 5001 and JRNL 5011 and JRNL 5521 (all minimum grade of C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 6551 (3) News Media Representation and Identity**
Examines the role of race, gender, immigration status, religion, and other identities in journalistic representations. Students will apply the work of journalism scholars to historic and current case studies in print, broadcast, and online media. They will apply quantitative and qualitative research methods to more deeply investigate the role of journalism in constructing social identity. Formerly JRNL 5551.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 6651 (3) Media Law**
Graduate seminar in communications law. Studies changing law and applied legal research techniques.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 6862 (3) Visual Communication and Mass Media**
Visual communication involves understanding both perception of messages and construction of them. Students analyze their visual thinking abilities and develop habits of visual analysis and criticism, as well as visual communication skills.

**Requisites:** Restricted to graduate students only.
JRNL 6871 (3) Special Topics
Repeatability: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

JRNL 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.

JRNL 7001 (3) ProSeminar in Mass Communication Theory I
Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7001
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7002 (3) Research Design
Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7002
Requisites: Requires prerequisite course of JRNL 7003 or APRD 7003 (minimum grade C-). Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7003 (3) ProSeminar in Mass Communication Theory II
Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion. Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7003
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7004 (1) Doctoral Professionalization Seminar
Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7004
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7010 (3) Qualitative Interviewing as a Research Method
Develops the necessary skills to conceptualize, plan, and execute interview-based research projects. Covers topics such as brainstorming and implementing a research idea, formulating research questions, designing a thorough research plan, navigating the IRB, recruiting participants, creating the interview guide, conducting interviews, and analyzing and writing up data. Course also examines reflexivity and ethical issues that are inherent in interview studies, especially ones involving certain populations.
Requisites: Requires prerequisite course of JRNL 7051 or APRD 7051 (all minimum grade D-). Restricted to graduate students only.

JRNL 7011 (3) Seminar in Strategic Public Relations
Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7011
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7012 (3) Ethnography and Media
Provides a ¿how to¿ concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7012
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7013 (3) Mixed Research Methods in Mass Communication
Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7013
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7014 (3) Experimental Design in Mass Communication
Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7014
Requisites: Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.
JRNL 7020 (3) Controls of Media and Information
Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7020
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7021 (3) Environmental Journalism and Science Communication
Focuses on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7021
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7030 (3) Media Sociology
Examines a range of theories for how media messages and media institutions turn out the way they do. 'Media sociology' refers to theorizing about the media as the 'dependent variable', even though many of the 'independent variables' explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7030
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7031 (3) Moral Psychology and Media Ethics
Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7031
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7034 (3) Media and Health Communication
Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7034

JRNL 7051 (3) Qualitative Methods in Mass Communication
Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7051
Requisites: Restricted to graduate students only.
Grading Basis: Letter Grade

JRNL 7061 (3) Quantitative Research Methods
Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students for dissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7061
Grading Basis: Letter Grade

JRNL 7062 (3) Advanced Statistical Analysis for Mass Communication
Provides instruction on the following topics: ordinary least squares regression, statistical mediation and moderation, path analysis, count and categorical data modeling, and factor analysis.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7062
Grading Basis: Letter Grade

JRNL 7063 (3) Text Analytics for Computational Mass Communication Research
This course tackles advanced advertising and marketing analytics through three advanced methods aimed at solving these problems: text classification, text topic modeling, and semantic network analysis. Each key area will involve a deep dive into the leading computer science methods aimed at solving these methods using Python. Students will walkthrough conceptual overviews of the methods, and dive into real-world datasets through instructor-led tutorials. Students will also conduct a major project for each of the 3 key methods.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7063
Grading Basis: Letter Grade

JRNL 7871 (3) Special Topics
Special Topics
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

JRNL 7880 (3) Persuasion Theory
This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.
Equivalent - Duplicate Degree Credit Not Granted: APRD 7880

JRNL 8991 (1-10) Doctoral Dissertation
Working on dissertation.
Repeatable: Repeatable for up to 30.00 total credit hours.
Requisites: Restricted to graduate students only.

Special topics.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Journalism - Master of Arts (MA)

The master's degree in journalism prepares students for professional success in news outlets, digital and social media platforms, and corporate communications.

The program offers two options, both of which are designed for students with limited academic or professional experience in journalism.

The professional practice option is for students who wish to focus on quickly obtaining advanced journalistic skills. It can be completed with as few as 30 credits and in as little as two semesters plus a summer.

The area of expertise option is for students wishing not only to acquire advanced journalistic skills, but also to complement them with an area of expertise, such as environmental science and policy. This option can be completed with a minimum of 36 credits and in four semesters.

Regardless of option, the degree's focus is on multimedia training and experience. Students develop skills in information-gathering, storytelling and analysis across a variety of platforms and professional contexts, including video, online interactivity, social media, photography and, of course, the printed word. They produce in-depth reporting projects in collaboration with professional media outlets in Colorado, and they complete internships at award-winning radio and television stations, newspapers, magazines, websites and other news organizations nationwide.

Requirements

Application Guidelines

Applicants to the MA in journalism must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university
- Have an undergraduate grade point average of at least 2.75
- Have a GRE verbal score of at least 153 (62%). International applicants must also have a TOEFL score of at least 600 (IBT 100)
- Provide three letters of recommendation
- Provide a 500-word statement of purpose
- Provide a resume

Program Requirements

Professional Practice Option

This option can be completed with a minimum of 30 credits and in as little as two semesters plus a summer.

Journalism Entrepreneurship - Master of Arts (MA)

The online master's degree in journalism entrepreneurship prepares students for professional careers at news outlets, and in digital and social media platforms, corporate communications and the freelance market. It particularly focuses on entrepreneurship and preparing students for today's media environment, one in which skills in both journalism and business are essential.

This degree is designed for students with a limited range of experience in journalism. Courses are offered in differing online environments. The entire program can be completed in one calendar year with students starting classes in the Augmester, then continuing in the fall and spring semesters, and finishing their professional project over the summer. The Master of Arts in Journalism Entrepreneurship also offers flexibility in that its online courses can be taken at a student’s own pace over a longer time period.

Regardless of schedule, the degree's focus is on multimedia journalism and business training. Students develop skills in information gathering, storytelling and analysis across a variety of platforms and professional contexts, including video, online interactivity, social media, photography — and, of course, the printed word. They will also take conceptual courses concerning the journalism industry and the business of journalism.
Requirements

Application Guidelines
Applicants to the MA in journalism must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university
- Have an undergraduate grade point average of at least 2.75
- International applicants must also have a TOEFL score of at least 600 (IBT 100)
- Provide three letters of recommendation
- Provide a 500-word statement of purpose
- Provide a resume

Program Requirements
The program required is 30 credits. Students come to Boulder in early August for a one-week media boot camp in residency, which will include another two weeks of class work completed remotely. This 3-credit course begins the program. Students will then take up to 12 credits in the fall and another 12 in the spring semesters. These courses are a mixture of traditional 15-week classes and five-week terms; each is 3 credits.

There are two tracks to choose from, Sports Journalism or Journalism Entrepreneurship. Out of the 30 credits required for the program, 6 of them are specific to the chosen track.

Total Credit Hours: 30

Media Research and Practice - Doctor of Philosophy (PhD)
The media research and practice (MDRP) PhD program is an umbrella that includes three distinct doctoral tracks in three separate departments in the College of Media, Communication and Information:

1. Strategic communication, offered by the Department of Advertising, Public Relations and Media Design.
2. Journalism studies, offered by the Department of Journalism.
3. Media studies, offered by the Department of Media Studies.

Program Tracks

Strategic Communication Track
The strategic communication PhD track offered by the Department of Advertising, Public Relations and Media Design is one of three separate and distinct tracks of the Media Research and Practice doctoral program within the College of Media, Communication and Information.

Strategic communication is a distinct track that is designed to provide students with rigorous training in theory and research through coursework, independent studies and research assistantships. Students gain an understanding of scholarship through required coursework that explores theories and methods that shape strategic communication research and elective coursework that expands into areas of sociology, psychology, gender studies, politics, economics, business and ethics. The program emphasizes how theory informs practice, critically analyzing how advertising and public relations operate in ways that can—or could—constructively contribute to the successful, ethical and resilient functioning of society. Students taking this track focus their research and teaching in the areas of advertising, public relations and various types of promotional communication such as health communication, political communication, social media and video gaming.

The strategic communication and journalism studies tracks for the PhD are administered together by the departments of Advertising, Public Relations and Journalism. Students in both tracks are taught by and have access to the faculties of both departments. The curriculum includes an overview of mass/public communication literature with specific modules and courses dedicated to advertising, journalism and public relations. Classes also focus on areas that straddle each industry such as social media, political communication, ethics, media organizations, health communication and video games. We welcome and appreciate both qualitative and quantitative approaches to research. Graduates pursue teaching and research positions at universities as well as work in the private sector.

Journalism Studies Track
The journalism studies PhD track focuses on exploring the intersection of journalism, journalism practice and society. Students gain a solid foundation through coursework that explores the theories and methods that shape mass communication research. The multidisciplinary program examines not only traditional journalism, but also the ever-increasing boundaries of the industry, including user-generated content, citizen journalism, the audience's impact on news production, the new technologies shaping practice, social media's role in news, new quasi-journalistic outlets, etc.

Students research institutions, content, audiences and publics—and they can approach these subjects through a multitude of methodologies and theoretical lenses: sociological, psychological, historical, cultural, political, economic, legal and more. Students are encouraged to develop their own approach (both theoretical and methodological) to the study of mass communication and journalism, all while learning and collaborating with faculty who have a diverse range of specialties. An integral part of our doctoral students' education is their participation in the department's research and teaching missions through their assignments as research assistants, teaching assistants and graduate instructors.

The strategic communication and journalism studies tracks for the PhD are administered together by the departments of Advertising, Public...
Successful applicants typically meet or exceed the following criteria:

- Have an undergraduate cumulative GPA of at least 3.2 and a cumulative GPA of at least 3.5 in previous graduate work.
- Provide three letters of recommendation, with at least two being academic references.
- Provide a 700-word statement of purpose.
- Provide a resume or CV that includes academic and employment experience.
- Provide a writing sample that exhibits the ability to undertake the conceptual and empirical studies required of doctoral students (e.g., a chapter from a master’s thesis or graduate-level term paper).

Meeting these criteria does not guarantee acceptance into the program. The program accepts relatively few new doctoral students each fall; there may be more qualified applicants than there are available openings.

In the online application, select “Advertising, Public Relations and Design” as the department, select “Media Research & Practice” as the degree, and then select your chosen program track.

For review and decision purposes, students are required to upload an unofficial copy of their transcript(s) in the online application. The program requires one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed.

Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

**General Requirements**

Students take a minimum of 72 hours to complete their degrees, although they may take additional coursework if there is a justified need. Students are expected to complete their coursework and defend their dissertations in 4–5 years.

It is expected that students will devote their full time to the doctoral program and assistantship duties during the fall and spring semesters while enrolled in the program, unless other arrangements have been made with the department.

**Program Tracks**

**Journalism Studies and Strategic Communication Tracks**

Students are expected to complete the required courses listed below, in addition to 30 credits of electives.

Students are expected to take courses at the 6000 level or above. There are some exceptions to this in which doctoral students may receive permission to take 5000-level courses.

Students may take a maximum of two independent study courses in their course of study, either inside APRD and JRNL or outside of those home departments. Generally, these will be taken no earlier than the third semester of the program.

Comprehensive Examinations
Each doctoral student will be required to pass comprehensive examinations, consisting of four questions, which are generally administered after the last semester in which the student takes coursework. The examinations are individually tailored for each student and comprise both written and oral examinations.

Dissertation
A minimum of 30 hours of dissertation credit, JRNL 8991/MDST 8991, must be taken. Various restrictions apply to these hours, including:

- No more than 10 dissertation credit hours may be taken in any one semester
- No more than 10 dissertation credit hours may be taken prior to the semester in which comprehensive examinations are taken
- No more than 10 dissertation credit hours may be taken in the semester in which comprehensive examinations are taken
- After passing comprehensive examinations, student must enroll for at least 5 dissertation credit hours (full time) or 3 dissertation credit hours (part time) each semester until graduation.

Typically students enroll for 10 dissertation hours in the semester in which they are taking comprehensive examinations and 10 dissertation hours each in the following fall and spring terms. Students must be aware of Graduate School rules (http://www.colorado.edu/GraduateSchool/policies/) regarding registration for dissertation hours.

Time Limit
Students are expected to complete the program and defend the dissertation in four years.

Media Studies
Contemporary media practitioners, both professional and amateur, influence the values and behaviors of national and global populations, challenging and shaping the authority, legitimacy and control exercised by governments and other powerful social institutions. Because of this, media and cultural studies are central to research about the complex intersections of culture, politics and economics from the local to the global levels. Appropriately, the Department of Media Studies emphasizes the history, nature and impact of mediated sounds, images and texts from a wide range of inter- and cross-disciplinary perspectives.

The Department of Media Studies examines ways of thinking about and conducting research into the intersection of media, communication and cultural practices in both historical and contemporary perspectives. Encompassing humanistic, social scientific and artistic approaches to the study of media and culture, and interdisciplinary in its theoretical and methodological approaches, the degree spans traditional boundaries between theory and practice. It fosters media "literacy" in the broadest sense by providing students with critical skills to analyze contemporary media and culture, along with technical, aesthetic and intellectual principles that facilitate strong media practices.

Course code for this program is MDRP and MDST.

Courses

MDST 5001 (3) Connected Media Practices  
Provides a crucial frame through which students understand the evolution of film, television and gaming in the digital era. Explores an impending revolution in how screen media are created, circulated and consumed. Relates to a larger trend across the media industries to integrate digital technology and socially networked communication with traditional screen media practices.  
Requisites: Restricted to graduate students only.

MDST 5002 (3) Media Activism and Public Engagement  
Explores politics of media activism. Relies on survey of existing theory and scholarship on media activism and close analyses of activist practices within both old and new media and on local, national and global scale. Special attention paid to questions of relativity and efficacy and value of media activism as both aesthetic and political activity.  
Requisites: Requires a prerequisite course of MDST 5001 (minimum grade C-). Restricted to graduate students only.

MDST 5003 (3) Digital Media Production and Design  
Introduces techniques, technologies of online development and online media presentation. Contextualizes the technical and social implications of the Internet through historical and critical perspectives. Students engage in online media projects designed to emphasize the affordances, conventions and usability considerations of effective online communication.  
Equivalent - Duplicate Degree Credit Not Granted: MDST 4003  
Requisites: Restricted to graduate students only.  
Grading Basis: Letter Grade

MDST 5071 (3) Screenwriting  
Students will learn the fundamentals of screenwriting, but will also learn from peers. Students will workshop scenes, share, and discuss. Students will work scenes through description, dialogue, and action, combine those scenes into sequences, and those sequences into scripts. Students will learn how to create dramatic tension, how to write compelling dialogue, how to deal with character development.

MDST 5121 (3) Deconstructing Disney: Mediated American Mythology  
Explores various Disney cultural products, some with which students will be very familiar, some students may have never seen. In order to discuss the cultural messaging The Walt Disney Company has presented over its long and illustrious history. Students will conduct analysis research in popular culture studies.  
Requisites: Restricted to graduate students only.
MDST 5211 (3) Asian Media and Culture
Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today’s digitally connected/disconnected world.
Equivalent - Duplicate Degree Credit Not Granted: MDST 4211
Requisites: Restricted to graduate students only.

MDST 5220 (3) Viral Video & Media
Students will examine how viral videos are produced and shared on social media platforms by developing an understanding of the components that make a viral video as well as by engaging in a critical analysis of those viral videos. Students will engage in critical analysis, consider strategies for virality, and learn about production and publishing. Students will analyze their own and their peers’ work in terms of genre, convention, format, structure, and audience.
Requisites: Restricted to graduate students only.

MDST 5311 (3) Mass Communication Criticism
Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism. Texts from contemporary print and broadcast media.
Equivalent - Duplicate Degree Credit Not Granted: MDST 4311

MDST 5331 (3) Gender, Race, Class, and Sexuality in Popular Culture
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 5341 (3) Designing Alternative Media Platforms
This course helps students construct alternative form of media to exhibit their research and build connections with relevant community leaders. Through the practice and examination alternative exhibition traditions of such as Social Practice and Relational Aesthetics students connect with community members to design alternative platforms for media projects that respond to the needs of external communities.
Requisites: Restricted to graduate students only.

MDST 5401 (3) Fan and Audience Studies
Drawing upon a variety of theoretical perspectives and tools of measurement, students will explore the structures, forces and environments that produce culture. Students will also interpret popular culture as a site of cultural meaning, and to understand the historical approaches scholars have used to analyze meaning in media messages, fan practices, and institutional responses.
Requisites: Restricted to graduate students only.

MDST 5402 (3) Transmedia Worldbuilding
Guides students to develop entertainment concepts for transmedia delivery. Students will develop concepts and characters built around storytelling themes capable of producing serial and multimedia storylines. This course considers essential elements of storytelling: how to design and actively participate across media platforms; essential elements of meta-narratives; and how to create an immersive and interactive experience for audiences using digital communication tools.
Requisites: Restricted to graduate students only.

MDST 5405 (3) Queer and Trans Identities in Popular Culture
Give students the theory, media history, and cultural frameworks to advocate for better queer & trans presentation in popular media. Uses queer studies, critical theory, media surveys, and trans theory as a tool for discussing and addressing gaps in media representation. Explores the emergence, codification, and rejection of queer and trans identities and deconstructs the popular media that contributed to the formation of these identities.
Equivalent - Duplicate Degree Credit Not Granted: MDST 4405
Requisites: Restricted to graduate students only.

MDST 5841 (1-3) Graduate Independent Study
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

MDST 5851 (1-6) Graduate Professional Project
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to graduate students only.

MDST 5871 (3) Special Topics
Special topics in Media Studies.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

MDST 5931 (1-3) Internship
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to graduate students only.

MDST 6031 (3) Documentary and Social Change
Explores how local, national and international filmmakers use documentaries to provide cultural observation, education, entertainment and memories with the hope of making sense of, and transforming, the realities of contemporary societies. The course emphasizes contemporary issues and practices in the production of documentaries, including the participatory means such as the crowd-sourcing of documentary footage, and the use of newer, non-theatrical means of distribution, including YouTube, Vimeo and other digital outlets.
Requisites: Restricted to graduate students only.

MDST 6051 (3) Media Theories
Studies theories and perspectives of mass and networked communication and explores the role of media in society.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6061 (3) Media Research
Introduces concepts, theoretical approaches and research methods of media research. Students apply these frameworks in research on mediated communication. Covers qualitative and quantitative methods of gathering and analyzing data.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6071 (3) Critical Theories of Media and Culture
Introduces students to critical theories and analysis of media and popular culture. Examines major theoretical traditions and/or theorists that significantly inform media studies (e.g., culturalism, structuralism, Marxism, critical theory, feminism, psychoanalysis, post-structuralism) and applies these to media analysis and criticism.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives
MDST 6201 (3) Global Media and Culture
Explores the historical, cultural, social, political and economic dimensions of media systems in various parts of the world and their relationship with technological and cultural processes. Aims to provide a critical overview of the profound changes in media and culture in today's digitally connected/disconnected world. Formerly MDST 6201.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6211 (3) Communication and International Development
Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6241 (3) Visual Epistemologies: Theory and Practice
Examines visuals as a form of knowledge on its own terms with an emphasis on both theory and practice. It first considers how social, cultural and cognitive mechanisms shape visual ways of knowing, and it discusses methodological approaches for working with and in images. Then it traces the complicated status of visual knowledge over time and across institutional contexts, religion, art, science, the law, journalism and politics.

MDST 6250 (3) Algorithms, Culture, and Power
Explores how automated computational processes (algorithms) affect the production, distribution, exchange, and consumption of media and other cultural goods. Also examines the history and politics of algorithms with respect to their growing prevalence in daily life. Foregrounds themes of power, identity, bias, aesthetics, infrastructure, epistemology, and political economy. Employs theories and methods from media studies, science and technology studies, digital humanities, and/or cultural studies.
Requisites: Restricted to graduate students only.

MDST 6301 (3) Communication, Media, and Concepts of the Public
Introduces students to historical and contemporary uses of fundamental concepts in research and theory about media institutions, particularly public, community, mass, publicity, public space, public opinion, public interest, and the public sphere.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6311 (3) Power, Politics and Mediated Culture
Examines various literatures that consider the role of power in shaping social orders and the social beings that constitute that order and the place of media in both processes.
Requisites: Restricted to graduate students only.

MDST 6341 (3) Children, Youth and the Media
Examines the concepts of children and childhood from the historical, social, cultural, economic and political perspectives, this course explores the interaction between mass media and the socialization and cultivation process of children and youth. Multiple theoretical traditions are used as a framework to study a variety of issues related to children and the media.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6350 (3) Media & Cultural Policy
Survey the research literature and practical significance of cultural policy as it relates to culture as a basis of social definition, inclusion, exclusion and conflict. The study of cultural policy does not focus exclusively on the role of government, but rather on a broader range of institutions that play central roles in governing contemporary culture, including museums, libraries, and media industries. 
Requisites: Restricted to graduate students only.

MDST 6351 (3) Media, Culture & Food Politics
Stresses intersections among media industries, food industries, and politics, with an emphasis on how public knowledge and activism about food relate to questions of a sustainable environment, human health and safety, and social justice for food producers and consumers. Examines a wide range of political discourses about food, the politics of food labeling, the globalization and hybridization of food, public policies governing food, food activism, the biopolitics of food, and food-related manifestations of cultural capital. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

MDST 6551 (3) Media and Communication Policy
Surveys historical and contemporary developments in media and communications policy, emphasizing social and cultural dimensions.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6552 (3) Media and Public Scholarship
Historicizes the role of the public intellectual through readings and discussions of biographies of selected scholars and accounts of historical changes in the habitats of the spaces of politics in which particular types of public engagement by intellectuals occurred in the past. The course will include a media practicum to enable students to understand what it means to become a scholar who has a public voice through direct and indirect engagement in a media-saturated age. Previously offered as a special topics course.
Requisites: Restricted to graduate students only.

MDST 6671 (3) Media, Myth, and Ritual
Explores cultural practices of media audiences. Addresses theoretical and methodological implications of studying audiences from a culturalist perspective, with particular focus on media audience practices. Students engage in field research projects related to course content. Formerly MDST 6671.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6711 (3) Media and Popular Culture
Introduces fundamental methods for understanding the construction of meaning in film, television, popular music and advertising. Traces the study of popular culture through film theory, mass media analysis and cultural studies. Surveys various strands of research that seek to understand popular culture and its effects.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives
MDST 6721 (3) Feminist Media Studies
Explores the complex relation between feminism and global media consumption and production. Students will be introduced to key theoretical approaches to engage critically with film, print and broadcast media, digital media, and art. Students will engage with themes that frame feminist media studies today: intersectionality, gaze, (in)visibility, consumerism, resistance, bodies, representational narratives, queer identities, decolonial feminism as a theoretical tool of relationality, and explorations of decolonizing feminist practices originating in the global South.
Requisites: Restricted to graduate students only.

MDST 6771 (3) History of Media and Communication
Examines history of communication, including the means (technologies) of communication, social practices (institutional, collective, individual) that intersect with the study of communication and media, and cultural forms (texts, products). Situates the study of media, technology, and culture within historical contexts, comparative historical research, media archaeology, genealogy and media history.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6781 (3) Political Economy of Media
Examines economic problems and political issues relevant to media institutions and industries.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 6871 (1-3) Special Topics
Special topics. May be repeated up to 15 total credit hours hours
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

MDST 6940 (1) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.
Requisites: Restricted to graduate students only.

MDST 6951 (1-6) Master's Thesis
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7001 (1) PhD Colloquium Series
Introduce the new doctoral students to the Media Research and Practice program and its faculty members and their research. The colloquium series will also include workshops on program planning, publishing, attending conferences, writing a dissertation, preparing and presenting a job talk, etc.
Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

MDST 7011 (3) Proseminar in Media Communication Theory 1
Introduces the principal concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Formerly MDST 7011.
Requisites: Restricted to doctoral students in Media Studies (MDST), Journalism (JRNL) or Advertising, PR and Media Design (APRD) only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7021 (3) Proseminar in Media and Communication Theory 2
Continues the introduction of principle concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Formerly MDST 7021.
Requisites: Requires prerequisite course of MDRP 7011 (minimum grade C). Restricted to doctoral students in Media Studies (MDST), Journalism (JRNL) or Advertising, PR and Media Design (APRD).
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7051 (3) Qualitative Research Methods in Media
Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7061 (3) Quantitative Research Methods in Media
Examines various methods of quantitative data gathering methods and analysis in mass media and social media contexts.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7841 (1-6) Independent Study
Independent study.
Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7851 (1-6) Master's Thesis
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDST 7871 (3) Special Topics
Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Core Curriculum and General Electives

MDRP 7871 (3) Special Topics
Special topics.
Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to graduate students only.

Media and Public Engagement - Master of Arts (MA)
The Master of Arts in media and public engagement (MAPE) trains critical advocates for social change. It is a two-year, interdisciplinary program
that spans traditional boundaries between theory and practice, offering opportunities for critical study of the history, institutions, economics and social implications of the media, both nationally and globally. It also offers practice-based media training geared toward civic engagement and community building. In addition to completing courses in media theory and other fields of interest, students learn how to create thoughtful and engaging projects using a variety of media practices, including online platforms, multimedia documentary, social media campaigns and other kinds of tools both longstanding and cutting-edge.

During their two years in the program, MAPE students will collaborate with faculty, community leaders, nonprofit organizations and companies to devise innovative interventions for social change. They may also choose to complete one of several subject-area certificate programs available through the university.

The MAPE prepares students for entering and transforming a variety of professions, both at the national and international level, in government, media, public relations, cultural organizations and the nonprofit sector.

Requirements
Application Guidelines
Students are admitted to the program based on the quality of their proposed project and their commitment to social change and the public good. Applicants to the MA in media and public engagement must:

• Hold at least a baccalaureate degree or its equivalent from an accredited college or university.
• Have an undergraduate grade point average of at least 2.75.
• Have a GRE verbal score of at least 153 (62%). International applicants must also have a TOEFL score of at least 600 (IBT 100).
• Provide three letters of recommendation.
• Provide a 500-word statement of purpose.
• Provide a resume.

Graduate advising is available by phone (303-492-7977), email (cmcigrad@colorado.edu) or in person (Hellem 96D).

Program Requirements
Students in the MAPE program take a total of 30 credit hours, comprised of:

• 24 hours of coursework selected from a range of courses offered by the Media Studies department and/or courses crosslisted with other departments inside and outside the College of Media, Communication and Information (CMCI)
• 6 hours for a thesis project

Total Credit Hours 30
Music

The CU Boulder College of Music inspires artistry and discovery, together.

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers seven undergraduate and graduate degrees in 24 fields of study, along with an array of interdisciplinary opportunities, including certificates in music technology, entrepreneurship and arts administration.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

Entrepreneurship Center

The Entrepreneurship Center for Music (ECM) is a national leader in professional development for musicians. The ECM equips today’s music students with the skills and tools they need to create sustainable careers in the arts. ECM students are encouraged to develop entrepreneurial skills to explore the vast opportunities inherent in a changing marketplace, and to develop plans to implement career-enhancing ventures across the artistic spectrum. Offers include courses for credit, an undergraduate Certificate in Music Entrepreneurship, workshops and internships with a wide range of arts organizations and businesses nationwide.

Facilities

The College of Music has several beautiful performance halls, including the 2,000-seat Macky Auditorium, the 500-seat Grusin Music Hall, the 270-seat Music Theatre and the 111-seat Recital Hall. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas, seminar facilities and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky Auditorium.

The college’s outstanding Howard B. Waltz Music Library is considered to be among the nation’s most comprehensive. The library contains over 150,000 volumes, scores, recordings and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching.

The college also features extensive facilities for music technology and electronic music study. The Computer-Assisted Music Laboratories (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard and a computer. The CRUNCH Lab is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano Laboratory is equipped with 12 digital pianos.

Performances

Each year the College of Music presents over 400 concerts by students, faculty and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public.

Other music programs presented by CU Presents include:

- Artist Series
- Eklund Opera Program
- Takács Quartet Series
- Holiday Festival

For a schedule of all College of Music performances, call 303-492-8008 or visit the College of Music (http://www.colorado.edu/music/) website.

Student Organizations

The student body of the College of Music has its own government, represented by the College of Music Student Government. Honorary music fraternities are Sigma Alpha Iota, Mu Phi Epsilon and Kappa Kappa Psi. Pi Kappa Lambda, a national music honor society, and the Music Teachers National Association both have active chapters within the College of Music. Music education majors are eligible for membership in student chapters of the National Association for Music Educators, the American Choral Directors Association and the American String Teachers Association. Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Policies & Requirements

Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music.

Graduate students must enroll as full-time students, maintaining a 3.00 GPA, and make adequate progress toward their degrees. The college offers approximately 100 graduate assistantships as well as graduate fellowships and a variety of endowed scholarships for graduate students.

Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism,
and Pedagogy must demonstrate knowledge of jazz theory and history and jazz keyboard proficiency.

**College Teaching and Professional Development**

Most graduate degrees in music require coursework in music pedagogy. Students who plan to teach at the college level are urged to be involved in the many offerings of CU Boulder’s renowned Center for Teaching and Learning. Workshops, observations, consultations and other professional development opportunities are scheduled throughout the academic year. These include campus-level offerings as posted at the Center for Teaching and Learning (https://www.colorado.edu/center/teaching-learning/) website, as well as music-specific events organized by the Lead TAs in the College of Music. The program offers three certificates that graduate students may pursue during their studies at CU Boulder: the Certificate in College Teaching (CCT), Professional Development Certificate for Preparing Future Faculty (PDC:PF), Professional Development Certificate for Preparing Future Faculty in Business, Government, Industry and the Arts (PDC:BGIA). For details, see Graduate Certificates (https://www.colorado.edu/center/teaching-learning/programs/graduate-certificates/).

**Financial Aid**

In addition to the opportunities for financial aid described in the Graduate School section, the College of Music grants merit aid in the form of teaching assistantships, graduate assistantships and graduate part-time instructorships (GPTI) to numerous graduate students each year. The assistantships and instructorships, which are usually one-quarter time (25 percent), include both a stipend and the waiver of 5 or 6 credit hours of tuition each semester. There are also scholarships offered by the individual departments and external fellowships awarded through the Graduate School. All prospective students who have completed their applications by December 1 will automatically be considered for available scholarships and assistantships.

**English Language Requirements**

A student who is noticeably deficient in the use of the English language may not obtain an advanced degree from the University of Colorado. Satisfaction of this requirement depends not so much upon ability to pass formal tests, although these may be required, as upon the consistent use of good English in all oral and written work.

Therefore, and English assessment exam (TOEFL, IELTS, DuoLingo are currently accepted, see here for an updated list (https://www.colorado.edu/music/admissions/prospective-graduate-students/#step_two_upload_supplemental_materials-2284) of acceptable exams) is required of all international graduate applicants whose native language is not English. This includes applicants who have already completed a degree or studied in an English-speaking country for any length of time. An acceptable score must be reported directly to the CU Boulder Office of Admissions by the December 1 deadline in order for the applicant to be considered.

**Graduate Auditions**

Auditions are required for all performance and performance/pedagogy programs. A personal audition is strongly preferred, but students may be accepted into most programs by submitting a recorded audition. Note that some studios require a preliminary, recorded audition before a...
student may be invited to schedule an audition on campus. For specific information and audition dates, refer to the Prospective Graduate Students Auditions (http://www.colorado.edu/music/admissions/ prospective-graduate-students/auditions/) website or contact the office of the associate dean for graduate studies at 303-492-2207 or gradmusc@colorado.edu.

**Programs of Study**

**Music**

The College of Music’s renowned faculty will guide students through the Master of Music, Doctor of Musical Arts, Doctor of Philosophy in Music or Artist Diploma programs, while a variety of ensembles are available for honing performance skills.

Visit the College of Music (http://www.colorado.edu/music/) website for more information about the school, academics, ensembles and more.

**Master's Degree**

- Music - Master of Music (MMus) (p. 1685)

**Doctoral Degree**

- Music - Doctor of Philosophy (PhD) (p. 1691)

**Artist Diplomas**

- Chamber Music Performance (p. 1692)
- Opera and Solo Vocal Performance (p. 1692)
- Orchestral Performance (p. 1693)
- Solo Instrumental Performance (p. 1693)
- String Quartet Performance (p. 1694)
- Vocal Coaching (p. 1694)

**Certificates**

- Arts Administration - Graduate Certificate (p. 1695)
- Music Theory - Graduate Certificate (https://catalog.colorado.edu/graduate/colleges-schools/music/programs-study/music/music-theory-graduate-certificate/)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

McKinney, Donald J. (https://experts.colorado.edu/display/fisid_152974/)  
Professor, Faculty Director; DMA, University of Michigan Ann Arbor

McMurray, Allan  
Professor Emeritus

Meneghini-Stalker, Tamara L. (https://experts.colorado.edu/display/fisid_146090/)  
Associate Professor; MFA, Northern Illinois University

Miranda, Martina L. (https://experts.colorado.edu/display/fisid_140091/)  
Associate Professor; DMA, Arizona State University; PhD, Arizona State University
Moteki, Mutsumi (https://experts.colorado.edu/display/fisid_100992/)
Professor, Faculty Fellow; DMA, University of Michigan Ann Arbor

Myer, Tom R. (https://experts.colorado.edu/display/fisid_100922/)
Associate Professor; MM, East Texas State University

Nguyen, Alexandra (https://experts.colorado.edu/display/fisid_145847/)
Associate Professor; DMA, University of Rochester

Nims, Abigail Andrews (https://experts.colorado.edu/display/fisid_152977/)
Associate Professor; MM, Westminster Choir College

Okigbo, Austin Chinagorom (https://experts.colorado.edu/display/fisid_151507/)
Associate Professor; PhD, Indiana University Bloomington

Pann, Carter N. (https://experts.colorado.edu/display/fisid_141461/)
Professor, Faculty Fellow; DMA, University of Michigan Ann Arbor

Peterson, Patti H.
Professor Emerita

Pinkow, David
Professor Emeritus

Reger, Jeremy J. (https://experts.colorado.edu/display/fisid_156224/)
Assistant Professor, Faculty Director; DMA, University of Michigan Ann Arbor

Requiro, David (https://experts.colorado.edu/display/fisid_155785/)
Assistant Professor; MM, University of Michigan Ann Arbor

Rhodes, Harumi B. (https://experts.colorado.edu/display/fisid_155971/)
Associate Professor; Faculty Fellow, Artist in Residence; MM, New England Conservatory of Music

Riis, Thomas L.
Professor Emeritus

Roeder, Matthew J. (https://experts.colorado.edu/display/fisid_120180/)
Associate Professor, Associate Dean; DMA, University of Colorado Boulder

Romero, Brenda M. (https://experts.colorado.edu/display/fisid_106117/)
Professor Emerita

Sable, Barbara Kinsey
Professor Emeritus

Sampsel, Laurie (https://experts.colorado.edu/display/fisid_101802/)
Professor; PhD, University of Pittsburgh

Sawchuk, Terry M.
Associate Professor Emeritus; MM, University of Michigan Ann Arbor

Schranz, Karoly (https://experts.colorado.edu/display/fisid_103924/)
Senior Instructor; Diploma, Franz Liszt Academy of Music

Schut, Joel (https://experts.colorado.edu/display/fisid_165312/)
Instructor; DMA, Michigan State University

Scott, F. Wayne
Professor Emeritus

Seesholtz, John (https://experts.colorado.edu/display/fisid_163908/)
Associate Professor; Faculty Director; DMA, University of North Texas

Shay, Robert S. (https://experts.colorado.edu/display/fisid_154671/)
Dean, Professor; PhD, University of North Carolina Chapel Hill

Sher, Daniel (https://experts.colorado.edu/display/fisid_164269/)
Professor, Dean Emeritus; EdD, Columbia University

Silver, Daniel S. (https://experts.colorado.edu/display/fisid_115564/)
Professor; MM, University of Michigan Ann Arbor

Sim, Claude (https://experts.colorado.edu/display/fisid_118265/)
Assistant Professor; BM, Oberlin Conservatory

Smith, Jeremy L. (https://experts.colorado.edu/display/fisid_103616/)
Professor; PhD, University of California, Santa Barbara

Spera, Nicolo Ruggero Ferruccio (https://experts.colorado.edu/display/fisid_148406/)
Associate Professor; DMA, University of Colorado Boulder

Spillman, Robert
Professor Emeritus

Stanley, William J. (https://experts.colorado.edu/display/fisid_103616/)
Associate Professor; DMA, University of Illinois at Urbana–Champaign

Steinmetz, Branden (https://experts.colorado.edu/display/fisid_165415/)
Instructor, Faculty Director; DMA, Michigan State University

Swadener, Marc
Professor Emeritus

Swanson, Elizabeth (https://experts.colorado.edu/display/fisid_159726/)
Assistant Professor, Faculty Director; DMA, Northwestern University

Teitelbaum, Benjamin Raphael (https://experts.colorado.edu/display/fisid_151338/)
Associate Professor; PhD, Brown University

Theodore, Michael (https://experts.colorado.edu/display/fisid_113318/)
Associate Professor; PhD, University of California, San Diego

Thomas, Susan (https://experts.colorado.edu/display/fisid_163986/)
Professor, Faculty Director; PhD, Brandeis University

Thornton, Michael Robert (https://experts.colorado.edu/display/fisid_116318/)
Professor; BM, Temple University

Walter, Douglas W. (https://experts.colorado.edu/display/fisid_101811/)
Professor; DMA, Temple University

Waters, Keith John (https://experts.colorado.edu/display/fisid_107518/)
Professor; PhD, University of Rochester

Weiss, Meta (https://experts.colorado.edu/display/fisid_164484/)
Senior Instructor; DMA, The Juilliard School

Wetherbee, Charles Tyler (https://experts.colorado.edu/display/fisid_151515/)
Associate Professor; BM, Curtis Institute of Music

Wetherbee, Charles Tyler
Instructor, Faculty Director; DMA, University of Colorado Boulder

Weiss, Meta
Professor Emerita

Waters, Keith John
Professor; PhD, University of Rochester

Wetherbee, Charles Tyler
Associate Professor, Faculty Fellow; DMA, Michigan State University
Courses

MUSC 5002 (3) Proseminar in Historical Musicology
Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 5011 (2) 16th Century Counterpoint
Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4011

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5012 (3) African Music
Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4012 and MUEL 4012

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5021 (2) 18th Century Counterpoint
Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Offered fall terms only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5026 (2) Percussion Literature
In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Offered spring semester of odd numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5036 (2) Brass Literature
Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring term.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5041 (3) Advanced Orchestration
Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5061 (3) Advanced Tonal Analysis
Surveys tonal repertory and analytical techniques. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5071 (3) Post-tonal Theory and Analysis I
Focuses on theory and analysis of post-tonal literature pre-1945. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5078 (1) Piano Technician for Pianists
Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

Equivalent - Duplicate Degree Credit Not Granted: MUSC 4078

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Recommended: Prerequisite piano majors.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5081 (3) Applications in Music Technology
Presents advanced strategies for applying computer technology in music creation. Synthesis, DSP, MIDI and audio sequencing, as well as advanced music engraving, will be explored through the use of various software platforms including Logic, Reason, MAX and Finale. Offered fall term only.

Requisites: Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 5091 (3) Contemporary Theory - Jazz and Modal Music
Studies the composition and improvisation of Herbie Hancock, Wayne Shorter, Chick Corea and their contemporaries. Broadly examines modality in jazz and its similarities to music of Ravel and Debussy, as well as systems of organization in Messiaen and others. Strategies for analysis and integration of the material into a personal vocabulary as a composer and improviser are explored. Offered spring of even-numbered years.

Requisites: Requires prerequisite course of MUSC 3081 (minimum grade D.). Restricted to College of Music (MUSCG) graduate students only.

Additional Information: Departmental Category: Theory and Composition
MUSC 5103 (3) Teaching General Music
Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Offered fall of odd-numbered years.
Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5112 (3) Proseminar in Ethnomusicology
Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5121 (3) Advanced Topics in Music Technology
Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 5081 (minimum grade D-). Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 5136 (2) Advanced Conducting
Offers advanced work in conducting.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5141 (2) Topics in Choral Music Education
Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4143
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5151 (3) Topics in Music Analysis
Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc.). Study published analyses representing a variety of methodologies and produce original analyses. Student must have passed graduate preliminary exams or completed remediation before enrolling in this course.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisite MUSC 5061 or MUSC 5071 as appropriate to the topic, or instructor consent required.
Additional Information: Departmental Category: Theory and Composition

MUSC 5153 (1) Advanced Topics in K-12 Music Pedagogy
Examines the literature, skills, and pedagogical applications of selected topics applicable to all K-12 Music Educators such as curriculum, music listening, and composition.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Music Education (MMED-MMUE) students only.
Grading Basis: Letter Grade

MUSC 5156 (2) Symposium in Choral Music
Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5163 (1) Advanced Topics in Secondary Choral Music Education Pedagogy
Examines the literature, skills, and pedagogical applications of selected topics in choral music classrooms, such as adolescent vocal development, vocal jazz ensemble directing, and development of piano skills.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade

MUSC 5168 (3) World Music Theories
Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4168
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Theory and Composition
MUSC 5173 (1) Advanced Instrumental Techniques and Pedagogy
Reviews and expands knowledge of brass, woodwind, percussion, or string instrumental techniques and pedagogical tools, extending upon skills gained in a typical introductory class teachers complete prior to licensure. Students complete a project based on synthesizing new pedagogical resources and materials. Intended for music educators who teach in K-12 school settings.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Music Education (MMED-MMUE) students only.
Grading Basis: Letter Grade

MUSC 5176 (2) Conducting 3
This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4176
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Music Education (MMED) graduate students only.
Grading Basis: Letter Grade

MUSC 5183 (2) Research in Music Teaching
Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Offered fall of odd-numbered years.
Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5203 (2) Topics in Music Education
Provides an in-depth examination of contemporary topics in music education. Students implement and design relevant projects.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5215 (1-2) Studies in Piano Teaching
Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level.
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisites: MUSC 5305 and MUSC 5315.
Additional Information: Departmental Category: Keyboard

MUSC 5246 (3) Jazz Improvisation and Analysis
Application of performance skills for the advanced improviser through specific harmonic, melodic and rhythmic techniques. Also includes analysis of transcriptions and varied harmonic contexts as well as a focus on the development of repertoire. Offered fall semester of odd-numbered years. Requires prerequisite course or instructor consent.
Requisites: Requires prerequisite course of MUSC 3071 (minimum grade D-). Restricted to Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5256 (3) Jazz Studies Administration and Pedagogy
Surveys approaches, techniques, philosophies and materials available for teaching jazz at both pre-college and collegiate level. Subject areas covered include improvisation, composition and arranging, studio teaching and directing ensembles. Studies the organization and administration of collegiate jazz programs. Topic include curriculum, program philosophy, teaching techniques, funding, teacher training and evaluation. Offered fall terms of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisite MUSC 3253.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5273 (2) Comprehensive String Pedagogy
Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Offered fall of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5285 (3) Organ Survey
Survey of organ repertoire and the history of organ building from the 16th century to the present.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4285
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5305 (2) Piano Pedagogy Group Techniques
Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5313 (3) Teaching Choral Music
Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4313
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5315 (2) Piano Pedagogy: Intermediate Literature
Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard
MUSC 5325 (2) Keyboard Literature 1
Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall terms of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5335 (2) Keyboard Literature 2
Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring terms of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5345 (2) Research: Piano Literature and Pedagogy
Looks at individual or group research related to piano pedagogy or literature for piano.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5346 (2) Brass Pedagogy
Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4336
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5346 (2) Woodwind Pedagogy
Provides the knowledge and skills to teach woodwind instruments in both individual studio and collegiate class settings. Considers pedagogical techniques for all levels of instruction. Offered fall terms of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5346 (2) Jazz Studies Practicum
Implements independent, project-based studies for further developing knowledge and experience in jazz pedagogy, performance and composition. Student is assessed and guided by faculty to develop specific skills needed toward becoming a more effective jazz educator. Offered spring of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisite MUSC 5256.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5355 (2) Advanced Accompanying
An in-depth study of collaborative repertoire in individually assigned projects, coached by collaborative piano faculty and others.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5375 (2) Opera Coaching for Pianists
Teaches skills for opera coaches and rehearsal pianists.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5405 (2) Basso-Continuo Accompaniment
Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4405
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion
Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered fall terms of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5435 (2) Collaborative Literature for Piano with Strings
Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered spring terms of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5443 (3) Teaching Instrumental Music
Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4443
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5444 (2) Vocal Pedagogy
In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5446 (1) Supervised Teaching Practicum
Designed to provide supervised teaching experience that includes feedback on weekly teaching; weekly and longer-term planning; and reflection on the impact of teacher characteristics and actions on student development.
Repeatable: Repeatable for up to 5.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 5273 (minimum grade D). Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade
MUSC 5454 (2) Repertory for Young Voices
Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5464 (2) Voice Literature I: French Song Literature and Oratorio/Concert Solo Literature
Explores the vocal literature of French Art Song and Oratorio/Concert Solo Literature in a graduate-level survey course taught in two modules.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Voice

MUSC 5484 (2) Graduate Seminar in Vocal Pedagogy
A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video methodologies of student teaching. Examination and evaluation of comparative methodologies of vocal technique.
Requisites: Requires prerequisite course of MUSC 5444 (minimum grade D-). Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5564 (2) German Song Literature
Provides an extensive analytical and historical discussion of German song literature styles, from the 18th century to the present. Offered fall terms only.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5583 (2) Inclusive Music Classroom
Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4583
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5608 (1) Wellness for Musicians 1
Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing, and vocal health.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5642 (3) Jazz History and Literature
Studies musical trends and cultural forces influencing jazz, with analysis of improvisational styles, melodic and motivic variations, transcriptions and orchestrations from significant periods in its history. Offered spring terms only.
Requisites: Requires prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5666 (2) Chamber Music Literature: Woodwinds
Provides a stylistic-historical survey in various genres from Baroque era to present. Offered fall terms of even numbered years.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5708 (2) Introduction to Music Bibliography and Research
Explores basic informational sources about music and musicians; a study of citation formats, research methodologies and writing techniques employed in music research papers, theses and dissertations. Intended to increase students’ information fluency. Required in all master's degree programs.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5712 (3) History of Opera
Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5742 (3) Performance Practice of Early Music
Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5752 (3) Women in Music
Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4752
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5762 (3-4) History of Choral Literature
Provides a seminar in analysis of musical style and history of choral repertoire . Those wishing review of literature and repertory may enroll for 4 credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5772 (3) History of Opera
Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4772
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology
MUSC 5802 (3) Studies in 20th Century Music
Offers intensified work in history of music in the 20th century. Topics vary from year to year.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4802
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5808 (1) Wellness for Musicians 2
Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander's conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4608
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 5608 (minimum grade C). Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5822 (3) Ancient and Medieval Music
Surveys sources from the ancient Greeks to the early Christian era and music from the 8th to the 14th century.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5832 (3) Studies in American Music
Offers intensified work in folk, popular, and art music of the United States.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5842 (3) Aesthetics of Music
Surveys various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics and historians.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5852 (3) 17th and Early 18th Century Music
Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4852
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5862 (3) Late 18th and 19th Century Music
Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4872
Repeatable: Repeatable for up to 12.00 total credit hours.
Recommended: Prerequisite or corequisite MUSC 3812.
Additional Information: Departmental Category: Musicology

MUSC 5872 (3) Studies in 18th and 19th Century Music
Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5892 (3) Latin American Music
Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4892
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5908 (1-3) Internship in Music Business
Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4908
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5918 (2) Building Your Music Career
Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 2918
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5938 (3) Management and Leadership in the Arts
Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4968
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade

MUSC 5948 (3) Sustainable Arts Organizations: Forecasting and Fundraising
Equips students to create comprehensive fundraising plans rooted in strategic business planning for arts organizations, which depend on contributed income for sustainability. Students will learn the basics of planning, budgeting and forecasting, along with proven, effective fundraising strategies and techniques. Includes case studies and guest speakers with extensive professional expertise in the field.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade
MUSC 5958 (2) Community Performances
Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4958
Requisites: Requires prerequisite course of MUSC 5918 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5978 (3) Introduction to Arts Administration
Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4978
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5988 (3) The Entrepreneurial Artist
Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4988
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisite MUSC 5918.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 6041 (3) Advanced Orchestration
Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.
Requisites: Restricted to Music (MUAD, MUED or MUSG) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 6051 (3) Pedagogy of Music Theory
Explores methods, materials, practical techniques for teaching undergraduate music theory, aural skills and analysis. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course. Offered spring of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 6113 (2) Foundations of Music Education
Surveys historical and philosophical bases of contemporary music education. Offered fall of even-numbered years.
Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUEB) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 6133 (2) Comprehensive Musicianship through Performance
Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Offered spring terms of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 6193 (1-3) Selected Studies in Music Education
Instructor consent required.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to Music (MUSD) or Music Education (MMED-MMUE) students only.
Additional Information: Departmental Category: Music Education

MUSC 6203 (2) Psychology of Music Learning
Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Offered spring terms only.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 6213 (2) Assessment of Music Learning
Instructor consent required.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 6223 (2) Sociology of Music Education
Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Offered fall of even-numbered years.
Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUEB) graduate students only.
Recommended: Prerequisite MUSC 6113.
Additional Information: Departmental Category: Music Education

MUSC 6233 (2) Pedagogy of Music Teaching and Learning
Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers’ lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring terms of odd numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisite MUSC 6113 and/or significant teaching experience.
Additional Information: Departmental Category: Music Education
MUSC 6243 (1) Applications of Music Pedagogy
Provides a structured, collaborative environment for graduate students with K-12 teaching duties to apply the content from music education courses to their current pedagogical environments. Students will apply inquiry strategies as they design and implement an applied project that synthesizes specific theoretical or conceptual areas. Offered fall term only.

Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Music Education

MUSC 6325 (2) Seminar in Piano Literature
Provides an intensive study of a selected area of repertoire or history. Offered fall terms only.

Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Keyboard

MUSC 6343 (1) Capstone Portfolio Project
Designed as the capstone course for students enrolled in the Summer MME degree program. Students are guided in their composition of three summative essays involving reflection on connections between two or more courses, comparisons between their entrance essays and current thinking, and identification of pedagogical impacts on their K-12 teaching.

Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.
Grading Basis: Letter Grade

MUSC 6801 (3) Advanced Topics in Music Theory
Intensive study of a specialized topics in theory and analysis through critical reading and analysis, class presentations and independent research. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires a prerequisite course of MUSC 5708 (minimum grade D). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Theory and Composition

MUSC 6822 (3) Advanced Studies in Musicology
Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Requires prerequisite course of MUSC 5708 (minimum grade D). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Musicology

MUSC 7046 (3) Seminar in Jazz Literature
Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. Offered spring semester only.

Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Music (MUAD, MUED or MUSD) graduate students only.
Recommended: Prerequisites MUSC 5091 and MUSC 5642.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 7103 (3) Historical Research in Music Education
Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. Offered spring of even-numbered years.

Requisites: Restricted to Music Education (MMED-MMUE) doctoral students only.
Additional Information: Departmental Category: Music Education

MUSC 7113 (3) Quantitative Research in Music Education
Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Offered fall of even-numbered years.

Requisites: Restricted to Music Education (MMED-MMUE) students only.
Additional Information: Departmental Category: Music Education

MUSC 7138 (3) Contemporary Issues in College Teaching
Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered terms.

Requisites: Restricted to College of Music (MUED or MUSD) graduate students only.

Additional Information: Departmental Category: Interdepartmental Courses

MUSC 7143 (3) Qualitative Research in Music Education
Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Offered fall of odd-numbered years.

Requisites: Restricted to MUED students only.
Additional Information: Departmental Category: Music Education

MUSC 7203 (3) Doctoral Seminar in Music Education
Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Offered fall of even-numbered years.

Requisites: Restricted to MUED students only.
Additional Information: Departmental Category: Music Education

MUSC 7801 (3) Doctoral Seminar in Music Theory
Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

Requisites: Requires a prerequisite course of MUSC 5708 (minimum grade D). Restricted to College of Music (MUED or MUSD) graduate students only.
Additional Information: Departmental Category: Theory and Composition
**Music - Master of Music (MMus)**

The Master of Music degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. The purpose of Master of Music degree work is to refine skills in music performance, music composition, research and writing, and pedagogy. There are numerous fields of study within the Master of Music program as listed below. The musicology program admits students only at the PhD level.

The Master of Music degree provides advanced studies in performance, performance/pedagogy, composition (with an optional emphasis in technology), music theory, and conducting (choral, orchestral and wind). Areas of emphasis in performance and performance/pedagogy include all band and orchestral instruments, guitar, harp, harpsichord, jazz, piano and voice. Each of the MM degrees incorporates studies in the major area, support courses in music electives and thesis/recital work. The minimum credit hours required for a MM degree varies from 30 to 32 depending on the area of study. For specific major area requirements, see the list of Master of Music degrees (https://www.colorado.edu/music/academics/graduate-advising/degrees/) at the College of Music website.

Brass, conducting, percussion, string, voice and woodwind majors are required to participate in a music ensemble. A student's ensemble placement will be determined by an audition during the first week of classes.

### Requirements

**Prerequisites**

Students should have completed undergraduate preparation equivalent to that expected for the bachelor’s degree at this university. Normally this is a bachelor of music degree in the proposed area of concentration.

Before admission, composition majors should upload representative scores and recordings (to the digital portfolio on the application) and a list of completed compositions. Theory majors should upload two scholarly writing samples that demonstrate ability in critical analysis, appropriate research techniques and skill in the cogent use of English. For further details, see the Application Process section of the website.

**Program Requirements**

The master of music (MM) degree, which the Graduate School considers a Plan II program, requires a minimum of 30–32 credit hours of graduate coursework, including thesis projects. Many students find it necessary to exceed this minimum in order to meet the musical and academic standards demanded by the MM preliminary examinations. Specific degree requirements (https://www.colorado.edu/music/academics/graduate-advising/degrees/) for each program are available online at the College of Music website.

Each student’s program is directed by a three-member advisory committee headed by the major advisor (the student's major professor). A second member is chosen from the major area; the third member is usually from outside the major area. (Major areas include: composition, music education, music theory and performance.) By the second semester of residence, the student should complete a tentative degree plan and obtain the approval of the advisory committee and the associate dean for graduate studies. Students must complete the master’s degree within four years of matriculation into the program.

**Examinations**

In addition to preliminary examinations, master's degree students in music must take the Master's Qualifying Examination. The procedures, guidelines for registration and deadlines for taking these examinations are announced by the Music Graduate Office.

**Recital/Thesis Requirements**

The recital/thesis requirement for the MM in composition is a body of work(s) lasting at least 20 minutes in duration. This could be comprised of one or more original works for varying forces. For the major in conducting, the requirement is a public practicum and a performance-related or other scholarly document. For the major in music theory, it is two thesis papers. Or, with consent of the faculty advisory committee, a single, extended thesis for four credit hours. For the major in performance, presentation of two public recitals fulfills the requirement. For the major in performance and pedagogy, a full-length recital and a research document in pedagogy are required.

Choral Ensemble required each semester of residence; credit attached to applied study

### Total Credit Hours

30

1. With the consent of the faculty advisory committee, the student may write a single, extended thesis for 4 credit hours (TMUS 6956 and TMUS 6957). The master’s thesis project(s) culminates in an oral defense before the three members of the student’s advisory committee. This is in addition to the MM Qualifying Oral Examination.

2. Electives may include ensemble participation (limited to 3 credits for the degree) or private applied instruction. Free electives may be in or outside of the College of Music, but must be outside of the major area or germane to the program of study. Reading proficiency in a foreign language is strongly recommended.

---

1 Participation is orchestra is *required* during each semester of applied instruction.

2 Orchestra may *not* be included.

---

1 TMUS 6956 must be a full-length recital, but may be fulfilled by one of the following: a traditional full-length recital; a lecture recital with supporting program notes; a major opera role; a mid-sized opera role and a half-hour recital; a concert of oratorio solo involving significant singing time and difficulty level.
theoretical and pedagogical principles of music teaching and learning; psychological and sociological foundations of music education; the knowledge, apply research results to areas of specialization, and communicate effectively in both oral and written forms.

Graduates typically pursue careers in music education at the college level or supervisory positions in elementary and secondary schools.

**Musicology Emphasis**

For the musicology student, the Doctor of Philosophy in music degree is intended to emphasize research in music history, music theory, ethnomusicology or some other aspect of music in culture.

An advanced degree will not be conferred merely because a student completes a specified period of residence and passes a given number of courses. One should not expect to gain from formal courses all the training, knowledge, and understanding of ideas necessary to meet the requirements for an advanced degree. The culminating work on a PhD is the dissertation, a substantial document based upon original investigation and showing mature scholarship and critical judgment, as well as a command of the tools and methods of research in music.

**Requirements**

**Prerequisites**

Students applying to the PhD program should have a bachelor's degree or equivalent in a music field related to their intended area of study. Applicants for the PhD with an emphasis in music education should hold an MME degree.

Letters of recommendation, representative research papers and satisfactory scores on the GRE (the general test) are required elements of the student's application for the degree in Music Education. The GRE is not required for Musicology.

Upon entrance to the degree program, students must pass the preliminary examinations and begin working toward basic requirements.

**Degree Requirements**

**Music Education Emphasis**

**Course Requirements**

Students must complete a minimum of 45 credit hours of courses numbered 5000 or above, 15 of which may be transferred from the master's degree, and a minimum of 30 credit hours of doctoral dissertation credit.

**Dissertation Requirements**

Each candidate must complete a dissertation based on original investigation that demonstrates mature scholarship. Following successful completion of the comprehensive examination, the student designates a dissertation committee, develops a dissertation prospectus and presents it to the committee for approval. After the dissertation has been accepted, a final oral examination on the dissertation and related topics is conducted by the student's dissertation committee.

For more details, consult the PhD in Music Education (https://www.colorado.edu/music/sites/default/files/attached-files/phd_music_ed_2015.pdf) program description at the College of Music website.

**Musicology Emphasis**

**Course Requirements**

Students must complete a minimum of 30 credit hours of courses numbered 5000 or above, although the minimum number is almost always exceeded. At least six doctoral seminars (7000 level) in musicology are required and must be taken at CU Boulder as part of PhD curriculum development; testing and assessment; and research techniques.

**Areas of Emphasis**

The two principal areas of study are music education and musicology.

**Music Education Emphasis**

The Doctor of Philosophy degree in music, with music education as a field of specialization, is offered through the Graduate School for students who demonstrate both scholarly potential and a superior commitment to the music education profession.

This degree program requires that individuals think abstractly, generalize knowledge, apply research results to areas of specialization, and communicate effectively in both oral and written forms.

Coursework emphasizes the study of historical, philosophical, psychological and sociological foundations of music education; the theoretical and pedagogical principles of music teaching and learning;
course work. Additionally, certain seminars in related disciplines, such as Music Theory and Analysis, Religious Studies, Anthropology, Sociology, and so on, may count in lieu of the former requirement, with the consent of the student's advisory committee. Students are expected to complete with distinction all work in the formal courses in which they enroll. Students must also complete at least 30 credit hours of dissertation credit, with not more than 10 of those credit hours in any one semester.

Up to 21 credit hours of graduate work taken at another institution may be considered for transfer. All requests for credit transfer, however, must be approved by the chair of the musicology faculty and other college and university officers as specified on a form for that purpose.

The College of Music requires proficiency in two foreign languages appropriate to the student's program of study. Normally, the language requirement is met by a translation examination scheduled through the graduate music office.

**Dissertation Requirements**
The dissertation should be an original and worthwhile contribution to knowledge in the field of musicology. It is expected that the student work closely with a major professor who will serve as the first reader and critic before the dissertation is submitted to the other dissertation committee members.

For more details, consult the PhD Musicology (https://www.colorado.edu/music/sites/default/files/attached-files/phd_musicology_2016_dec_16.pdf) program description at the College of Music website.

**Artist Diploma: Chamber Music Performance - Graduate Certificate**

This graduate program is for pre-professionals who exhibit potential for a national and/or international performing career.

The program offers exceptionally gifted instrumentalists the opportunity to deepen their artistry, broaden their musical perspective and refine their performance skills under the guidance of College of Music faculty. In addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music. Students are provided both coaching and individualized instruction, with extensive opportunities for performance, in preparation for a performance career.

**Requirements**

**Admission Requirements**
An earned baccalaureate degree and a successful audition are required for admission into this program.

1. Pianists not participating in a conducted ensemble are required to take two extra credits of chamber music and/or accompanying.
2. A maximum of two credits at the 4000-level may be used to fulfill requirements.
3. Students who wish to take academic classes at the 5000-level or above must pass the appropriate preliminary exam.

**Artist Diploma: Opera and Solo Vocal Performance - Graduate Certificate**

This program is designed to provide intensive performance studies for those who have the talent and potential for a career in opera, chamber and solo vocal performance.

Studies include individualized voice instruction, vocal coaching, and performance opportunities in opera, solo, oratorio and other concert work, with elective studies in entrepreneurship, as preparation for a performance career.

**Requirements**

**Admission Requirements**
Admissions requirements for this program include completing all required graduate music office requirements, submitting a CU Boulder application, three letters of recommendation, a pre-screening recorded audition, and then performing a live on-campus audition and being interviewed by the faculty.

An earned baccalaureate degree in voice performance is the minimum requirement for admission into this program.

2. Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exam.
Artist Diploma: String Quartet Performance - Graduate Certificate

The professional certificate in string quartet performance is designed to provide intensive performance experiences and coaching for those that have the potential for a career in string quartet performance. An earned baccalaureate degree in performance is the minimum requirement for admission into this program.

Students are provided both coaching and individualized instruction, with extensive opportunities for performance, as well as elective studies in entrepreneurship, in preparation for a performance career. Although each student applies individually, quartets are expected to audition as a pre-formed ensemble for admission to this program. This is a two-year program with only one ensemble in residence at a time.

Requirements

Admission Requirements

Total Credit Hours 22

1. Pianists not participating in a conducted ensemble are required to enroll in two credits of chamber music or accompanying
2. A maximum of two credits at the 4000-level may be used to fulfill certificate requirements.
3. Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exam.

Artist Diploma: Vocal Coaching - Graduate Certificate

This graduate program is for pre-professionals who exhibit potential for a specialized career in vocal accompanying.

The program offers exceptionally gifted collaborative pianists the opportunity to deepen their artistry, broaden their musical perspective, and refine their performance skills under the guidance of College of Music faculty. In addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music.

Students are provided both coaching and individualized instruction, with extensive opportunities for performance, in preparation for a career as a professional vocal coach.

Requirements

Admission Requirements

An earned master of music degree in collaborative piano with commensurate language and diction training (or equivalent professional experience) and a successful audition are required for admission into this program.

Additional credits in the College of Music at the 4000- or 5000-level. 5

Total Credit Hours 20

1. Applied string instruction. Registration for applied study is for two credit hours per semester, entitling each member of the quartet to one hour of private lessons per week.
2. This four-recital requirement entitles the quartet to one hour of coaching per week. The string faculty will decide if one of these recitals should be a solo recital.
3. Two fall semesters as principals in the Chamber Orchestra (1 credit each).
4. A maximum of two credits at the 4000-level may be taken in fulfillment of the certificate requirements.
5. Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary examinations.
The Graduate Certificate in Music Theory provides advanced studies in music theory and theory pedagogy without the full requirements of the master’s degree in music theory. This credential enhances the professional training and future employment options for students in existing graduate degrees across the College of Music. The curricular requirements of the Music Theory Certificate are readily combined with theory coursework required in all MM and DMA degree programs.

**Requirements**

The Graduate Certificate in Music Theory requires 12 credit hours. Required coursework includes MUSC 6051 Pedagogy of Music Theory (3) and TMUS 5524 Special Study-Music Theory (3), which culminates in a research project and public presentation of research.

For the remaining 6 credit hours, students also must complete two of the three following 3-credit courses: MUSC 5151 Topics in Music Analysis-Schenkerian Analysis; MUSC 5071 Post-tonal Theory and Analysis I (3); and a further elective, either MUSC 5151 Topics in Music Analysis (3) for MM students, or Advanced Topics in Music Theory (MUSC 6801 Advanced Topics in Music Theory (3) for DMA and PhD students.

Any of the required courses listed here may also be applied toward theory coursework required in the student's major degree program.

**Arts Administration - Graduate Certificate**

CU Boulder’s professional graduate certificate in arts administration provides students with the managerial skills and knowledge to work in the performing arts industry. Students will gain knowledge and insights into the opportunities and challenges facing today’s arts administration professionals. This program offers the skills and education needed for a successful career in arts management in music, dance and theater.

**Requirements**

**Admission Requirements**

Applicants should have either an undergraduate degree in an arts discipline, or a bachelor's degree in any other discipline plus at least 3 years of professional experience working in an arts organization. This certificate program is also open to all students already enrolled in a graduate degree in music, theatre or dance.

**Required Courses and Credits**

The graduate certificate in arts administration is comprised of three 3-credit courses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSC 5978</td>
<td>Introduction to Arts Administration</td>
<td>3</td>
</tr>
<tr>
<td>MUSC 5938</td>
<td>Management and Leadership in the Arts</td>
<td>3</td>
</tr>
<tr>
<td>MUSC 5948</td>
<td>Sustainable Arts Organizations: Forecasting and Fundraising</td>
<td>3</td>
</tr>
</tbody>
</table>

For application instructions and deadlines, please consult the Graduate School's Admissions webpage and the College of Music.

**Music Education**

Students in this degree program complete advanced studies that are designed to refine their teaching philosophy and practices. These studies include courses in historical and philosophical foundations of music education, psychological theories of music learning, basic research methods, curriculum development and assessment. The minimum number of credit hours required is 30.

The college also offers a master of music education degree/certification with K–12 teaching for students who have completed an undergraduate degree in music, but in a major area other than music education. Coursework leads to a master's degree and a Colorado K–12 music teaching license. The entire program requires a minimum of 71 credit hours.

**Master’s Degree**

- Music Education - Master of Music Education (MMusEd) (p. 1704)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Austin, James R. (https://experts.colorado.edu/display/fisid_103455/)  
Professor; PhD, University of Iowa

Dockendorf, Matthew Paul (https://experts.colorado.edu/display/fisid_154511/)  
Instructor; DMA, Michigan State University

Heil, Leila (https://experts.colorado.edu/display/fisid_149780/)  
Associate Professor; PhD, University of Colorado Boulder

Miranda, Martina L. (https://experts.colorado.edu/display/fisid_140091/)  
Associate Professor; DMA, Arizona State University; PhD, Arizona State University

Rickels, David Aaron (https://experts.colorado.edu/display/fisid_151424/)  
Associate Professor; DMA, Arizona State University
Roeder, Matthew J. (https://experts.colorado.edu/display/fisid_120180/)  
Associate Professor; DMA, University of Colorado Boulder

Courses

MUSC 5002 (3) Proseminar in Historical Musicology  
Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Musicology

MUSC 5011 (2) 16th Century Counterpoint  
Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.  
**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4011  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition

MUSC 5012 (3) African Music  
Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.  
**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4012 and MUEL 4012  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition

MUSC 5021 (2) 18th Century Counterpoint  
Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Offered fall terms only.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Musicology

MUSC 5026 (2) Percussion Literature  
In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Offered spring semester of odd numbered years.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition

MUSC 5036 (2) Brass Literature  
Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring term.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Choral and Instrumental Music

MUSC 5041 (3) Advanced Orchestration  
Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition

MUSC 5061 (3) Advanced Tonal Analysis  
Surveys tonal repertory and analytical techniques. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition

MUSC 5071 (3) Post-tonal Theory and Analysis I  
Focuses on theory and analysis of post-tonal literature pre-1945. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Recommended:** Prerequisite piano majors.  
**Additional Information:** Departmental Category: Interdepartmental Courses

MUSC 5078 (1) Piano Technician for Pianists  
Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.  
**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4078  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition

MUSC 5081 (3) Applications in Music Technology  
Presents advanced strategies for applying computer technology in music creation. Synthesis, DSP, MIDI and audio sequencing, as well as advanced music engraving, will be explored through the use of various software platforms including Logic, Reason, MAX and Finale. Offered fall term only.  
**Requisites:** Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition

MUSC 5091 (3) Contemporary Theory - Jazz and Modal Music  
Studies the composition and improvisation of Herbie Hancock, Wayne Shorter, Chick Corea and their contemporaries. Broadly examines modality in jazz and its similarities to music of Ravel and Debussy, as well as systems of organization in Messiaen and others. Strategies for analysis and integration of the material into a personal vocabulary as a composer and improver are explored. Offered spring of even-numbered years.  
**Requisites:** Requires prerequisite course of MUSC 3081 (minimum grade D.). Restricted to College of Music (MUSCG) graduate students only.  
**Additional Information:** Departmental Category: Theory and Composition
MUSC 5103 (3) Teaching General Music
Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Offered fall of odd-numbered years.
Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5112 (3) Proseminar in Ethnomusicology
Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5121 (3) Advanced Topics in Music Technology
Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects.
Repeatable: Repeatable for up to 9.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 5081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 5136 (2) Advanced Conducting
Offers advanced work in conducting.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5141 (2) Instrument Design Lab: Sound, Perception & Creativity
Explore fundamental physical concepts of sound and music in a hands-on laboratory environment. Survey a number of topics through the construction of PVC overtone flutes, an investigation in the timbral intention of Dolly Parton’s vocal technique, physical modeling through the testing of 3D-printed vowel flutes, the construction of a “Long String Instrument” and more. Specific topics include: tuning and temperament, harmony and timbre, and preparing the piano (digital and analog).
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4141
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade

MUSC 5142 (3) American Indian Music
Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4142
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5143 (2) Topics in Choral Music Education
Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4143
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5151 (3) Topics in Music Analysis
Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies and produce original analyses. Student must have passed graduate preliminary exams or completed remediation before enrolling in this course.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisite MUSC 5061 or MUSC 5071 as appropriate to the topic, or instructor consent required.
Additional Information: Departmental Category: Theory and Composition

MUSC 5153 (1) Advanced Topics in K-12 Music Pedagogy
Examines the literature, skills, and pedagogical applications of selected topics applicable to all K-12 Music Educators such as curriculum, music listening, and composition.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Music Education (MMED-MMUE) students only.
Grading Basis: Letter Grade

MUSC 5155 (2) Symposium in Choral Music
Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5163 (1) Advanced Topics in Secondary Choral Music Education Pedagogy
Examines the literature, skills, and pedagogical applications of selected topics in choral music classrooms, such as adolescent vocal development, vocal jazz ensemble directing, and development of piano skills.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade

MUSC 5165 (2) World Music Theories
Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4165
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Theory and Composition
MUSC 5173 (1) Advanced Instrumental Techniques and Pedagogy
Reviews and expands knowledge of brass, woodwind, percussion, or string instrumental techniques and pedagogical tools, extending upon skills gained in a typical introductory class teachers complete prior to licensure. Students complete a project based on synthesizing new pedagogical resources and materials. Intended for music educators who teach in K-12 school settings.
Repeatability: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Music (MUSD) graduate students only.
Grading Basis: Letter Grade

MUSC 5176 (2) Conducting 3
This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4176
Repeatability: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Music Education (MMED) graduate students only.
Grading Basis: Letter Grade

MUSC 5183 (2) Research in Music Teaching
Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Offered fall of odd-numbered years.
Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5203 (2) Topics in Music Education
Provides an in-depth examination of contemporary topics in music education. Students implement and design relevant projects.
Repeatability: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5215 (1-2) Studies in Piano Teaching
Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level.
Repeatability: Repeatable for up to 2.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisites: MUSC 5305 and MUSC 5315.
Additional Information: Departmental Category: Keyboard

MUSC 5246 (3) Jazz Improvisation and Analysis
Application of performance skills for the advanced improviser through specific harmonic, melodic and rhythmic techniques. Also includes analysis of transcriptions and varied harmonic contexts as well as a focus on the development of repertoire. Offered fall semester of odd-numbered years. Requires prerequisite course or instructor consent.
Requisites: Requires prerequisite course of MUSC 3071 (minimum grade D-). Restricted to Music (MUSC) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5256 (3) Jazz Studies Administration and Pedagogy
Surveys approaches, techniques, philosophies and materials available for teaching jazz at both pre-college and collegiate level. Subject areas covered include improvisation, composition and arranging, studio teaching and directing ensembles. Studies the organization and administration of collegiate jazz programs. Topic include curriculum, program philosophy, teaching techniques, funding, teacher training and evaluation. Offered fall terms of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Recommended: Prerequisite MUSC 3253.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5273 (2) Comprehensive String Pedagogy
Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Offered fall of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5285 (3) Organ Survey
Survey of organ repertoire and the history of organ building from the 16th century to the present.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4285
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5305 (2) Piano Pedagogy Group Techniques
Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5313 (3) Teaching Choral Music
Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4313
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5315 (2) Piano Pedagogy: Intermediate Literature
Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard
MUSC 5325 (2) Keyboard Literature 1
Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall terms of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5335 (2) Keyboard Literature 2
Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring terms of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5345 (2) Research: Piano Literature and Pedagogy
Looks at individual or group research related to piano pedagogy or literature for piano.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5346 (2) Woodwind Pedagogy
Provides the knowledge and skills to teach woodwind instruments in both individual studio and collegiate class settings. Considers pedagogical techniques for all levels of instruction. Offered fall terms of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5356 (2) Advanced Accompanying
An in-depth study of collaborative repertoire in individually assigned projects, coached by collaborative piano faculty and others.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5375 (2) Opera Coaching for Pianists
Teaches skills for opera coaches and rehearsal pianists.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5405 (2) Basso-Continuo Accompaniment
Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4405
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion
Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered fall terms of odd-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5435 (2) Collaborative Literature for Piano with Strings
Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered spring terms of even-numbered years.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 5443 (3) Teaching Instrumental Music
Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4443
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5444 (2) Vocal Pedagogy
In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5446 (1) Supervised Teaching Practicum
Designed to provide supervised teaching experience that includes feedback on weekly teaching; weekly and longer-term planning; and reflection on the impact of teacher characteristics and actions on student development.
Repeatable: Repeatable for up to 5.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 5273 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Voice

Grading Basis: Letter Grade
MUSC 5454 (2) Repertory for Young Voices
Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5464 (2) Voice Literature I: French Song Literature and Oratorio/Concert Solo Literature
Explores the vocal literature of French Art Song and Oratorio/Concert Solo Literature in a graduate-level survey course taught in two modules.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Voice

MUSC 5484 (2) Graduate Seminar in Vocal Pedagogy
A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video methodologies of student teaching. Examination and evaluation of comparative methodologies of vocal technique.
Requisites: Requires prerequisite course of MUSC 5444 (minimum grade D-). Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5554 (2) German Song Literature
Provides an extensive analytical and historical discussion of German song literature styles, from the 18th century to the present. Offered fall terms only.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Voice

MUSC 5583 (2) Inclusive Music Classroom
Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4583
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 5608 (1) Wellness for Musicians 1
Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing and vocal health.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5642 (3) Jazz History and Literature
Studies musical trends and cultural forces influencing jazz, with analysis of improvisational styles, melodic and motivic variations, transcriptions and orchestrations from significant periods in its history. Offered spring terms only.
Requisites: Requires prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5666 (2) Chamber Music Literature: Woodwinds
Provides a stylistic-historical survey in various genres from Baroque era to present. Offered fall terms of even numbered years.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 5708 (2) Introduction to Music Bibliography and Research
Explores basic informational sources about music and musicians; a study of citation formats, research methodologies and writing techniques employed in music research papers, theses and dissertations. Intended to increase students’ information fluency. Required in all master’s degree programs.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5712 (3) Renaissance Music
Provides a repertory and analysis of polyphonic music, 1400-1600.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4712
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5742 (3) Performance Practice of Early Music
Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5752 (3) Women in Music
Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4752
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5762 (3-4) History of Choral Literature
Provides a seminar in analysis of musical style and history of choral repertory. Those wishing review of literature and repertory may enroll for 4 credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5772 (3) History of Opera
Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4772
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology
MUSC 5802 (3) Studies in 20th Century Music
Offers intensified work in history of music in the 20th century. Topics vary from year to year.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4802
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5808 (1) Wellness for Musicians 2
Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander’s conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4608
Repeatable: Repeatable for up to 2.00 total credit hours.
Requisites: Requires prerequisite course of MUSC 5608 (minimum grade C), Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 5822 (3) Ancient and Medieval Music
Survey sources from the ancient Greeks to the early Christian era and music from the 8th to the 14th century.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5832 (3) Studies in American Music
Offers intensified work in folk, popular, and art music of the United States.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5842 (3) Aesthetics of Music
Survey various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics and historians.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5852 (3) 17th and Early 18th Century Music
Examine music and writings about music from the Baroque era. Emphasize cultural and musical analysis and surveys current musicological literature.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4852
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5872 (3) Late 18th and 19th Century Music
Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4872
Repeatable: Repeatable for up to 12.00 total credit hours.
Recommended: Prerequisite or corequisite MUSC 3812.
Additional Information: Departmental Category: Musicology

MUSC 5882 (3) Studies in 18th and 19th Century Music
Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5892 (3) Latin American Music
Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4892
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 5908 (1-3) Internship in Music Business
Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student’s career goals. A minimum of 48 hours is required per semester for one credit.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4908
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5918 (2) Building Your Music Career
Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 2918
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5938 (3) Management and Leadership in the Arts
Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4938
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade

MUSC 5948 (3) Sustainable Arts Organizations: Forecasting and Fundraising
Equips students to create comprehensive fundraising plans rooted in strategic business planning for arts organizations, which depend on contributed income for sustainability. Students will learn the basics of planning, budgeting and forecasting, along with proven, effective fundraising strategies and techniques. Includes case studies and guest speakers with extensive professional expertise in the field.
Requisites: Restricted to College of Music (MUSCG) graduate students only.
Grading Basis: Letter Grade
MUSC 5958 (2) Community Performances
Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4958
Requisites: Requires prerequisite course of MUSC 5918 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5978 (3) Introduction to Arts Administration
Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4978
Requisites: Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 5988 (3) The Entrepreneurial Artist
Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.
Equivalent - Duplicate Degree Credit Not Granted: MUSC 4988
Requisites: Restricted to College of Music (MUSC) graduate students only.
Recommended: Prerequisite MUSC 5918.
Additional Information: Departmental Category: Music Entrepreneurship

MUSC 6041 (3) Advanced Orchestration
Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring terms of odd numbered years.
Requisites: Restricted to Music (MUAD, MUED or MUSD) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 6051 (3) Pedagogy of Music Theory
Explores methods, materials, practical techniques for teaching undergraduate music theory, aural skills and analysis. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course. Offered spring of odd-numbered years.
Requisites: Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 6113 (2) Comprehensive Musicianship through Performance
Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Offered spring of even-numbered years.
Requisites: Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 6193 (1-3) Selected Studies in Music Education
Instructor consent required.
Repeatable: Repeatable for up to 12.00 total credit hours.
Requisites: Restricted to Music (MUSD) or Music Education (MMED-MMUE) students only.
Additional Information: Departmental Category: Music Education

MUSC 6203 (2) Psychology of Music Learning
Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Offered spring terms only.
Requisites: Restricted to College of Music (MUSC) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 6213 (2) Assessment of Music Learning
Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Offered on a rotating basis during summer session.
Requisites: Restricted to Music Education (MMED-MMUE) graduate students only.
Additional Information: Departmental Category: Music Education

MUSC 6223 (2) Sociology of Music Education
Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Offered fall of even-numbered years.
Requisites: Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.
Recommended: Prerequisite MUSC 6113.
Additional Information: Departmental Category: Music Education

MUSC 6233 (2) Pedagogy of Music Teaching and Learning
Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers’ lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring terms of odd numbered years.
Requisites: Restricted to College of Music (MUSC) graduate students only.
Recommended: Prerequisite MUSC 6113 and/or significant teaching experience.
Additional Information: Departmental Category: Music Education
MUSC 6243 (1) Applications of Music Pedagogy
Provides a structured, collaborative environment for graduate students with K-12 teaching duties to apply the content from music education courses to their current pedagogical environments. Students will apply inquiry strategies as they design and implement an applied project that synthesizes specific theoretical or conceptual areas. Offered fall term only.
Repeatability: Repeatable for up to 2.00 total credit hours.
Prerequisites: Restricted to Music Education (MMED-MMUE) graduate students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Music Education

MUSC 6325 (2) Seminar in Piano Literature
Provides an intensive study of a selected area of repertoire or history. Offered fall terms only.
Repeatability: Repeatable for up to 6.00 total credit hours.
Prerequisites: Restricted to College of Music (MUSCG) graduate students only.
Additional Information: Departmental Category: Keyboard

MUSC 6343 (1) Capstone Portfolio Project
Designed as the capstone course for students enrolled in the Summer MME degree program. Students are guided in their composition of three summative essays involving reflection on connections between two or more courses, comparisons between their entrance essays and current thinking, and identification of pedagogical impacts on their K-12 teaching.
Prerequisites: Restricted to Music Education (MMED-MMUE) graduate students only.
Grading Basis: Letter Grade

MUSC 6801 (3) Advanced Topics in Music Theory
Intensive study of a specialized topic in theory and analysis through critical reading and analysis, class presentations and independent research. Students must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.
Repeatability: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Prerequisites: Requires a prerequisite course of MUSC 5708 (minimum grade D). Restricted to Music (MUAD, MUED or MUSD) graduate students only.
Additional Information: Departmental Category: Theory and Composition

MUSC 6822 (3) Advanced Studies in Musicology
Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Prerequisites: Requires prerequisite course of MUSC 5708 (minimum grade D). Restricted to Music (MUAD, MUED or MUSD) graduate students only.
Additional Information: Departmental Category: Musicology

MUSC 7046 (3) Seminar in Jazz Literature
Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. Offered spring semester only.
Repeatability: Repeatable for up to 6.00 total credit hours.
Prerequisites: Restricted to Music (MUAD, MUED or MUSD) graduate students only.
Recommended: Prerequisites MUSC 5091 and MUSC 5642.
Additional Information: Departmental Category: Choral and Instrumental Music

MUSC 7103 (3) Historical Research in Music Education
Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. Offered spring of even-numbered years.
Prerequisites: Restricted to Music Education (MMED-MMUE) doctoral students only.
Additional Information: Departmental Category: Music Education

MUSC 7113 (3) Quantitative Research in Music Education
Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Offered fall of even-numbered years.
Prerequisites: Restricted to Music Education (MMED-MMUE) students only.
Additional Information: Departmental Category: Music Education

MUSC 7118 (3) Contemporary Issues in College Teaching
Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered terms.
Prerequisites: Restricted to College of Music (MUED or MUSD) graduate students only.
Additional Information: Departmental Category: Interdepartmental Courses

MUSC 7138 (3) Qualitative Research in Music Education
Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Offered fall of odd-numbered years.
Prerequisites: Restricted to MUED students only.
Additional Information: Departmental Category: Departmental Category: Music Education

MUSC 7203 (3) Doctoral Seminar in Music Education
Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Offered fall of even-numbered years.
Prerequisites: Restricted to MUED students only.
Additional Information: Departmental Category: Music Education

MUSC 7801 (3) Doctoral Seminar in Music Theory
Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Requires a prerequisite course of MUSC 5708 (minimum grade D). Restricted to College of Music (MUED or MUSD) graduate students only.
Additional Information: Departmental Category: Theory and Composition
MUSC 7822 (3) Seminar in Musicology
Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. Offered fall only.
Requisites: Restricted to Music (MUSD) graduate students only.
Additional Information: Departmental Category: Musicology
NCMU 5093 (0.2-3) Special Topics in Music
Repeatable: Repeatable for up to 3.00 total credit hours.

Music Education - Master of Music Education (MMusEd)

The Master of Music Education program addresses the professional development needs of music teachers in the field. Students are challenged to develop a greater understanding and mastery of music teaching-learning processes, to improve personal musicianship, and to become committed leaders within the music education profession.

Students in this degree program complete advanced studies that are designed to refine their teaching philosophy and practices. These studies include courses in historical and philosophical foundations of music education, psychological theories of music learning, basic research methods, curriculum development, and assessment. The minimum number of credit hours required is 30.

The college also offers a Master of Music Education degree/certification with K–12 teaching for students who have completed an undergraduate degree in music, but in a major area other than music education. Coursework leads to a master's degree and a Colorado K–12 music teaching license. The entire program requires a minimum of 71 credit hours.

Requirements

Admission Requirements
Applicants are expected to provide evidence of undergraduate preparation equivalent to that required for the bachelor of music education degree at this university. Applicants also must possess a music teaching certificate/license or agree to work toward a Colorado music teaching license. GRE scores are not required for admission, but can be helpful in determining merit-based financial aid. Individuals who wish to pursue music performance or conducting as their cognate area must demonstrate at least senior-level proficiency on their particular medium through an audition.

Program Requirements

Program of Study
Students earning the MMusEd degree must complete a minimum of 30 credit hours of course work, including 12 credit hours in music education, 12 credit hours in music and 6 credit hours of open electives in a specialization area or other areas of interest. Of the 12 credit hours in music, a 2-credit-hour course in bibliography and research is required, as well as 6 credit hours of study in a cognate area, which includes musicology/ethnomusicology, music theory/music technology or performance (including conducting, pedagogy and jazz studies).

The music component of the degree should assist students in developing their musical knowledge and skills. One member of the student’s graduate advisory committee should be from the cognate area, and it is assumed that at least some part of the student's study is with that faculty member. All music studies must be at the 5000 level or above.

Under special circumstances, up to 6 credit hours at the 4000-level may be applied to the open electives portion of the degree.

Students typically complete the degree in two academic years, or one academic year plus two summers. Degree work must be completed within four years of the semester in which the student is accepted into a degree program and begins studies. A summers-only MMusEd program (completed in three summers) is also available; for details, see the Summer MMusEd webpage (https://www.colorado.edu/music/summer-college-music/summer-mme/) or contact the music education faculty. Because most master’s level music education courses are offered in late afternoons, students who live within commuting distance can earn a significant portion of credit toward the degree while continuing to work full time.

Dual Degree Program

Master’s Degree in Two College of Music Programs

Students may apply for a dual master’s degree that combines any two master’s programs (with approval from both departments) in the College of Music. To guarantee the ability to pursue a dual master’s degree, the student must apply separately and be admitted by the faculty in each of the degree programs under their respective admissions procedures and standards. The student must be accepted into both degree programs at the time of the initial application. If a student is already accepted to the College of Music in one degree program and is interested in adding a second degree (dual degree plan), the second master’s degree must be approved by both area Department Chairs and the Associate Dean of the College of Music. In consultation with the Department Chairs, Associate Dean and Graduate Studies Coordinator, a comprehensive degree plan will be devised for all requirements expected for the student to earn the dual degree. This plan must be completed before the last anticipated semester of study in the student’s original degree. With the exception of thesis credit hours, courses that fulfill requirements in both degree programs need only be taken once to be counted for both degrees. A minimum of 45 credit hours must be earned.

Musical Arts

The faculty of the College of Music has modeled the DMA degree programs at CU Boulder after the guiding principles outlined by the National Association of Schools of Music (NASM). As defined by NASM, the Doctor of Musical Arts degree is intended for those seeking “the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works, or pedagogy... Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice” (NASM Handbook, 2009–10: 116).

Doctoral Degree

- Doctor of Musical Arts (DMA) (p. 1708)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.
Drumheller, John E. (https://experts.colorado.edu/display/fisid_103707/)  
Senior Instructor; DMA, University of Colorado Boulder

Dunn, James M. (https://experts.colorado.edu/display/fisid_140593/)

Senior Instructor; DMA, The Juilliard School

Wetherbee, Charles Tyler (https://experts.colorado.edu/display/fisid_151515/)
Associate Professor; BM, Curtis Institute of Music

Wolzien, Charles
Professor Emeritus

Musical Arts - Doctor of Musical Arts (DMA)

The DMA degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. As defined by the NASM, the Doctor of Musical Arts degree is intended for those seeking “the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works, or pedagogy... Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice” (NASM Handbook, 2016-17: 135).

This professional degree is intended for composers, conductors and performers who possess both creative and scholarly abilities. Graduates of this program go on to careers as composers and performers in solo, chamber music, opera, jazz or orchestra, or as choral, jazz, band and/or orchestral conductors. A particular focus of the DMA is the preparation for a career as a college, conservatory or university teacher. Students work closely with an advisor in developing a degree plan that reflects their needs and interests. This degree requires a minimum of 30 hours beyond the master’s level, including 12 hours in seminar and other coursework, and a minimum of 18 hours of performance and written projects (constituting the dissertation portion of the degree).

For outlines of specific programs, visit the college’s Degrees (http://www.colorado.edu/music/academics/graduate-advising/degrees/) webpage or contact the Music Graduate Studies office.

Requirements

Prerequisites

Entrance requirements include a master’s degree in music or demonstrated background comparable to that of the master of music degree at this university. All graduate applicants must complete an audition, interview, or some other demonstration of their ability in the major field. If at all possible, a visit to the campus is strongly encouraged. As part of the application, composition majors should upload representative scores and recordings (to the digital portfolio tab on the application), and a list of completed compositions. Performance majors should submit a repertoire list and arrange for a personal audition and interview, if at all possible. Some areas require applicants to send a pre-audition screening recording of their performance. Conducting majors must upload a video of a performance. All DMA applicants must also submit a scholarly writing sample that demonstrates ability in critical thinking, appropriate research techniques, and skill in the cogent use of English. For full details concerning audition and application requirements, visit the college’s Prospective Graduate Students (http://www.colorado.edu/music/admissions/prospective-graduate-students/) webpage.

Course Requirements

Students must take a minimum of 30 credit hours of coursework, of which at least 18 credit hours are dissertation projects. Students take two doctoral topic classes (at the 6000 level), one each in musicology and music theory; prerequisites are stipulated by the theory and musicology faculties. Some areas require specific coursework prior to or in conjunction with work on dissertation projects. In other instances students may be advised to take coursework in preparation for the comprehensive examination. Applied music instruction may be elected for the duration of the residency requirement.

Advisory Committee

Each DMA program is directed by a five-member advisory committee headed by the major advisor, who is usually the student’s main studio teacher. At least one member must hold the PhD degree in musicology, music theory, composition or music education.

Residence Requirements

The minimum residence requirement is six semesters of work beyond the attainment of an acceptable bachelor's degree. Two semesters of residence credit may be allowed for a master's degree from another institution of approved standing, but at least four semesters of residence credit, two of which must be consecutive in one academic year, must be earned for coursework and/or dissertation work taken at this university.

Continuous Registration

After the residence requirements for the doctor of musical arts program have been satisfied, a student must enroll for fall and spring semesters of each year until attaining the degree. If a student has enrolled in all required dissertation courses but is still working on dissertation projects to complete the degree requirements, they should enroll in TMUS 8019, or TMUS 8029, until the degree is completed.

Degree Plans

A degree plan approved by the advisory committee will be presented to the associate dean for graduate studies at the beginning of the second semester of residence. The student’s major professor is responsible for helping the student formulate this plan. The plan should include members of the student’s doctoral committee, projected remedial and supporting coursework, proposed dissertation projects, and tentative dates for the comprehensive and final examinations. In consultation with the major advisor, the student should form the five-member faculty advisory committee by the third semester in residence.

The following degree plans are available for the doctor of musical arts degree:

- Brass Performance and Pedagogy
- Percussion Performance and Pedagogy
- Composition
- Conducting and Literature - Choral
- Conducting and Literature - Orchestral
• Conducting and Literature - Wind
• Jazz Performance
• Solo Piano - Thesis
• Solo Piano - Non-thesis
• Collaborative Piano
• String Performance
• Voice Performance and Pedagogy
• Woodwinds Performance and Pedagogy

Learn more about degree plans on the College of Music's Degrees webpage (https://www.colorado.edu/music/academics/graduate-advising/degrees/).

Language Requirement
Brass + percussion; collaborative piano; choral conducting; orchestral conducting; voice; and musicology students are required to demonstrate foreign language proficiency before being allowed to take the comprehensive examination. The choice of the language(s) must be approved by the student's advisory committee. Specific requirements include:

• Brass + percussion: Passing score on a foreign language repertoire terms exam
• Collaborative piano: instrumental emphasis: One year of French, German, or Italian; vocal emphasis: One year of two languages (selected from French, German, or Italian)
• Choral conducting: Two years of one language
• Orchestral conducting: Two years of one language
• Voice: One year of three languages. Students may petition the voice faculty for an exception to this policy. Please see the DMA Voice Performance & Pedagogy degree plan for more information.
• Musicology: Two years of two languages or specialty language training (with approval)

Dissertation
The DMA dissertation consists of a specified number of performances, projects, and documents. The student’s permanent advisory committee must approve all dissertation projects.

Time Limit
DMA degree work must be completed within six years of first registration.

Welcome to Colorado Law. We are a diverse and inclusive community of outstanding students, faculty, staff and alumni who help one another succeed. Our selective admissions process keeps our student body small, enabling our faculty, staff, alumni and professional network to invest deeply in each student’s success. Because we take our responsibility to educate and train future lawyers very seriously, our curriculum, research centers, and experiential learning opportunities are designed to prepare students for success in today’s changing legal environment.

Our students have extraordinary credentials and life experiences (http://www.colorado.edu/law/node/1759/). In addition to being intelligent, congenial, hard-working and entrepreneurial, our students are engaged with the community. A plethora of active student organizations (http://www.colorado.edu/law/node/239/), rich externship opportunities (http://www.colorado.edu/law/node/117/) and a robust Public Service Pledge Program (http://www.colorado.edu/law/node/123/) enable our students to foster Colorado Law’s tradition of service. Our faculty (http://lawweb.colorado.edu/profiles/allFaculty.jsp) are national and international leaders in their fields and are committed to helping Colorado Law students develop the legal knowledge, critical thinking, writing and problem-solving skills necessary for professional success. Our intentionally designed low student-to-faculty ratio of 6.4 to 1 enables meaningful interaction between faculty and students, giving students abundant opportunities to develop deep substantive expertise and long-lasting professional relationships.

Our staff is devoted to helping students and alumni succeed. From the moment our students commit to attending Colorado Law and throughout their professional careers, we provide unwavering personal and professional support. Our admissions (http://www.colorado.edu/law/node/1/) office welcomes students to the Colorado Law community, and our student affairs (http://www.colorado.edu/law/node/235/) office provides support for students as they develop their professional identity and skills. Our career development office (http://www.colorado.edu/law/node/177/) helps students secure and retain rewarding employment. Those unsure about their field of interest can rely on our wealth of career exploration opportunities and resources.

Our alumni (http://www.colorado.edu/law/node/255/) represent Colorado Law in a variety of professional settings and fields across Colorado and nationwide. They thrive in a variety of professional domains: national law firms, regional law firms, government organizations (both at the federal and state levels), business organizations (often utilizing their legal skills in business roles), and public interest organizations. Not only do our alumni thrive professionally, but they also enthusiastically work with current Colorado Law students in a number of key ways that foster students’ career success.

We are educating students for success. Our relevant and challenging curriculum prepares students to thrive in a variety of sectors and settings. Our three research centers enable students to develop unique connections and insights in today’s most important fields, including:

- Natural Resources, Energy, and Environmental Law and Policy—the Getches Wilkinson Center (http://www.colorado.edu/law/node/149)/.
- Technology and Entrepreneurship/Business—the Silicon Flatirons Center (https://siliconflatirons.org/).
- Public Law/Public Service—the White Center (http://www.colorado.edu/law/node/135/).

In addition, our Schaden Experiential Learning Program and Clinical Program (with nine clinics (http://www.colorado.edu/law/node/53/) representing a range of practice areas) allow students to develop and hone their legal skills through extensive real-world experiences while in school.

We invite you to learn more about what makes the Colorado Law experience (http://www.colorado.edu/law/node/4079/) so special. Please contact us (http://www.colorado.edu/law/node/231/) for more information or, even better, come visit us (http://www.colorado.edu/law/node/219/).

Thanks for taking the time to get to know us better.

Sincerely,

Lolita Buckner Inniss

About Colorado Law

The University of Colorado Law School, established in 1892, has a long and proud history as a top public law school. The first students of color entered in 1898. The school became a charter member of the Association of American Law Schools, organized in 1901. The first woman graduated in 1908. And the school has been on the American Bar Association’s list of accredited law schools since its first publication in 1923.

Today, Colorado Law, housed in the beautiful new “green” Wolf Law Building with one of the largest law libraries in the country, is also one of the most technologically advanced law schools in the country. Most importantly, it provides one of the best comprehensive legal educations in the nation, featuring:

- A favorable faculty-student ratio (6.4:1) that produces class sizes that encourage discussion
- 60 highly published resident faculty dedicated to interacting with students inside and outside the classroom
- First-year students who are placed in small sections for more class participation opportunities and to build relationships with classmates and professors
- Full-time, three-year Juris Doctor (JD) degree, one-year Master of Laws (LLM) degree, one-year Master of Studies in Law (MSL) degree, eight dual degrees, eight certificates, three centers and three journals
- An Experiential Learning Program that integrates lawyering activities, including nine legal clinics, externships, public service pledge and trial and moot court competitions
- Comprehensive program to prepare students for a wide range of careers; many graduates obtain judicial clerkships

Law School Vision

With our roots in Colorado and a global outlook, we are a supportive and diverse community of scholars and students in a place that inspires vigorous pursuit of ideas, critical analysis and civic engagement in order to advance the rule of law in an open, sustainable society.

Our Mission

To be an outstanding public law school that: provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through
scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

**Wolf Law Building**
The five-story Wolf Law Building was completed in 2006 and was only possible through the financing of alumni, friends, law firms and 61 percent by students.

- Top “green” certification, from construction to operation, including 88 percent renewable energy and electricity, 40 percent water use reduction and 59 percent regionally manufactured materials
- Technologically advanced wireless networking, video conferencing, videotaping capabilities for distance learning and digital kiosks
- All classrooms have electrical outlets for each student and complete audio-visual equipment (LCD projectors, DVD, VHS, cable) with built-in touch-screen control systems
- Student commons with café and patio, study and interview rooms, individual lockers and mailboxes, law bookstore and courtyard with barbeque
- Suites and offices for centers, clinics, student organizations, journals and all faculty offices
- A 250-seat main courtroom with judge’s chambers, 30-seat teaching courtroom with jury box and witness stand and a mock trial practice room for competition and clinic training

The three-story William A. Wise Law Library is housed in the Wolf Law Building.

- Most comprehensive law library in the 12-state Rocky Mountain region, one of the largest in the country, serving as a selective federal government depository
- Six computer stations, five group study rooms, 12 study pods, and 459 total seats
- Access in print or online to more than 500,000 volumes

**Student Life**
Students who choose the University of Colorado Law School generally seek the very best all-around legal education combined with a great location, a supportive community, top specialties, interdisciplinary study, dedicated faculty, a public service tradition and so much more. Colorado Law is distinguished by the extraordinary quality of its students. As a competitively selective school, its students rank in the top tier, represent a rich blend of geographic and ethnic backgrounds and bring experiences of leadership, career achievement and community service. Although competitiveness among students with such elite qualifications is typical at many law schools, CU Law students have a proud history of putting collegiality first.

**Commitment to Diversity**
Colorado Law is proud to have been one of the earliest law schools in the nation to graduate lawyers of color. The first students of color entered the University of Colorado Law School in 1898 and the first woman graduated in 1908. Colorado Law’s commitment to diversity is evident throughout the Law School. We seek students with not only the academic credentials to excel in a rigorous legal education program, but also a desire to join a diverse community of future lawyers committed to the service of others. Student organizations offer support and networking opportunities.

**Academic Support**
From the student’s first day, Colorado Law invests in her or his academic success. Through the Rothergerber Academic Assistance Program, upper-division law students tutor first-year students in their courses, except Legal Writing. The program is open to all first-year students, and more than 50 percent of the class participates in this free opportunity.

**Honor System**
Members of the legal profession are held to the highest standards of ethical and professional conduct, and Law School faculty and students are expected to maintain the same level of professional competence and integrity in their work. The Colorado Law School Honor Code, subscribed to by all students, is a system of rules administered by student officers and demands the highest ethical conduct.

**Legal Research and Writing**
Colorado Law’s Legal Research and Writing Program ensures that its graduates are proficient in legal research, analysis and writing, and capable of adapting these skills to varying contexts. All first-year Legal Writing courses are taught by resident legal writing faculty, and legal research and research strategy is guided by professional librarian instructors. Upper-division courses are designated as writing classes and students spend a seminar preparing a substantial paper requiring significant legal research and writing.

**Journals**
Colorado Law is home to three nationally respected student-led law journals. These journals provide legal research, writing, editorial and publishing experience to competitively chosen second- and third-year law students, with a select number of third-year students serving as prestigious Editorial Board members. Subscribers include government agencies, judicial courts, law school and government libraries, judges, attorneys, faculty and alumni.

- University of Colorado Law Revie
- Colorado Natural Resources, Energy and Environmental Law Review
- Colorado Technology Law Journal

**Student Organizations**
Colorado Law’s student organizations reflect the diverse interests and concerns of its active student body. Students increase their knowledge in specific areas, gain leadership experience and work closely with fellow students, faculty, alumni and legal professionals with similar passions. The Student Bar Association serves as the school’s student government, represents the interests of law students generally, allocates funding to agencies, judicial courts, law school and government libraries, judges, attorneys, faculty and alumni.

- American Bar Association, Law Student Division
- Arab Law Student Association
- Asian Pacific American Law Students Association
- Barristers’ Council
- Black Law Students Association
- Breakthrough Student Group
- Business and Tax Law Association
- Cannabis Law League
- Christian Legal Society
- Colorado Disability Justice Alliance
- Colorado Law Animal Legal Defense Fund
Career Development
Colorado Law prepares students for a wide variety of careers. The Career Development Office offers students and alumni individualized career counseling and professional development advice to help them identify and achieve their career goals. The office has career counselors with JDs who have many years of experience in a wide range of law practice areas. It maintains state-of-the-art career development and job search resources and helps students prepare for and pursue job opportunities during and after law school.

Services and Programs

- Career Counseling: Each first-year student meets with a career counselor who helps with résumés and job search action plans.
- Employer Outreach: Counselors conduct extensive employer outreach in- and out-of-state.
- Career Fairs/Symposia: The office organizes employer networking opportunities on and off campus.
- On-Campus Interviews: Each year approximately 100 employers come on campus to interview students for summer clerkships, internships and associate attorney positions with law firms and government agencies.
- Résumé Collections: Résumés from interested students are sent to in- and out-of-state employers.
- Brown Bag Speaker Series: Practicing attorneys from the local and national legal community are regularly invited to speak to students during weekly lunch-hour informational sessions about what it’s like to work in a variety of legal areas.
- Job Postings: Through a secure web-based system, students and alumni can review current job listings and an online resources library.
- Mock Interviews: Counselors set up appointments with students for practice interviews with the counselors or with volunteer attorneys. Students receive tips and feedback to help them improve.
- Referrals: Counselors help students connect with alumni and other legal professionals as resources for information about a field or practice area of law in Colorado or any other part of the country or world.
- Mentoring and Community Involvement: The office regularly helps students get involved in the legal community by referring them to mentor programs (including the Student Alumni Mentoring Program), bar associations, Inns of Court and other law-related organizations.

Job Opportunities
Colorado Law helps students pursue numerous job opportunities and helps connect them to valuable part-time and permanent legal positions, including:

- Paid internships are academic year or summer, part or full-time positions with law firms, businesses, government agencies and nonprofits.
- For-credit externships are for students working as volunteers for government agencies and non-profits for academic credit under the supervision of a field and faculty supervisor.
- Fellowships provide funding for law students and graduates to work with public service organizations or academic programs.
- Honors programs are prestigious summer and post-graduate programs for students and graduates to work within federal government agencies.
- Judicial clerkships are prestigious paid positions for new graduates working for state and federal judges across the country.

Experiential Learning
Experiential education encompasses lawyering activities in which students receive experience outside the classroom—clinics, externships, appellate and trial competitions and voluntary public service work. Colorado Law’s Experiential Learning Program gives greater coherence to our entire curriculum and builds linkages with faculty involved in experiential education and those involved in traditional classroom teaching.

Legal Clinics
Colorado Law’s Clinical Education Program started in 1948 and now serves almost 900 clients each year. Clinics are courses that provide practical learning experiences for our students, much-needed assistance to those less fortunate in our community and invaluable service to the public good. By handling actual cases, students make the transition from legal theory to legal practice, enabling them to take classroom knowledge and turn it into real-world understanding. Under the supervision of expert clinical faculty, student practitioners take primary responsibility for understanding the goals of their clients, and working to represent those
organizations. Students develop professional lawyering skills, gain

Students may gain academic credit for performing substantive legal

Externships

Examples of recent competitions are:

• Saul Lefkowitz National Moot Court Competition
• The Rothgerber Moot Court Competition
• Philip C. Jessup International Law Moot Court Competition:
  • Pace National Environmental Law Moot Court Competition
  • The Rothgerber Moot Court Competition
  • Saul Lefkowitz National Moot Court Competition

Public Service Pledge Program

Colorado Law is a public institution with a public spirit. The faculty and

Trial Advocacy and Moot Court

Appellate advocacy, mock trials and moot court competitions help to
develop skills in appellate brief writing and oral argument, and gain
valuable trial practice experience. Colorado Law teams have consistently
been extremely competitive and participate in and host more and more
competitions each year. Coaching and support come from an experienced
group of faculty, fellow students, alumni who recently competed and
judges and lawyers in the community. Students may earn academic credit
for their participation. Examples of recent competitions are:

• Constance Baker Motley National Moot Court Competition
• Emory Civil Rights and Liberties Competition
• Hispanic National Bar Association Moot Court
• Jessup International Law Moot Court Competition
• Jim R. Carrigan Trial Advocacy Competition
• Mardi Gras National Moot Court Competition
• National Moot Court Competition
• National Moot Court Competition in Child Welfare and Adoption Law
• National Student Trial Advocacy Competition
• National Telecommunications Moot Court Competition
• The National Trial Competition
• Native American Law Students Association Moot Court Competition
• Pace National Environmental Law Moot Court Competition

Externships

Students may gain academic credit for performing substantive legal
work with government agencies, public institutions and not-for-profit
organizations. Students develop professional lawyering skills, gain

insight into various aspects of the legal system and profession and
cultivate a sense of professional responsibility. While uncompensated,
students receive credit hours (1 credit hour per 50 hours of work) toward
their degrees.

Research Centers

Wide-ranging diversity and originality, the faculty at
Colorado Law encompasses an array of prominent legal scholars. The
faculty's record of scholarly publication is both extensive and frequently
cited. Together with the faculty's commitment to public service, this
work has positioned the faculty of Colorado Law to exert important and
constructive influences on legal and public policy debates at the local,
national, and international levels.

Colorado Law's three research centers have earned national prominence
for their research, publications and leading conferences that debate
legal and policy issues, foster practical solutions and innovative
ideas, facilitate networking and produce scholarship. Students are an
integral part of the centers. Students may work as volunteers, externs
or research assistants on research projects, reports, newsletters and
events. In addition, students will have unique access to national and
local policymakers, researchers, scientists, entrepreneurs and legal
practitioners in many areas of the law.

Byron R. White Center for the Study of American
Constitutional Law

Named in honor of the retired Supreme Court Justice and CU alumnus,
the Byron White Center (http://www.colorado.edu/law/node/135/) for the
Study of American Constitutional Law was founded in 1990 to enhance
the study and teaching of Constitutional law and stimulate public
debate and understanding of our Constitutional system. Each year,
the center gathers politicians, academics and practitioners for the
Ira C. Rothgerber, Jr. Conference. Recent topics have included home
rule, reapportioning Colorado, state initiatives, academic freedom
and conscience and the free exercise of religion. The center is the
cornerstone of Colorado Law's public service (http://www.colorado.edu/
law/node/1125/) commitment.

Getches-Wilkinson Center for Natural Resources, Energy
and the Environment

The Getches-Wilkinson Center (http://www.colorado.edu/law/node/149/) for Natural Resources, Energy, and the Environment is
the 21st century name of the Natural Resources Law Center (NRLC)
and crown jewel of Colorado Law's dedication to natural resources,
energy, and the environment. The center is dedicated to serving the
people of the American West, the nation and the world through creative,
interdisciplinary research, bold, inclusive teaching and innovative problem
solving in order to further true sustainability for our lands, waters and
environment. The Getches-Wilkinson Center is building on the successful
legacies not only of the NRLC, but also of other existing programs in
natural resources, energy and the environment at Colorado Law.

The Getches-Wilkinson Center regularly hosts an array of conferences
and distinguished speakers, including the Annual Martz Summer
Conference, the Energy Innovation Speaker Series and various seminars
for practitioners and the interested public. Students are invited to join
these events and visit some of the center's ongoing projects, such as the
longstanding work to improve western water management, to develop
and deploy best management practices for oil and gas production and
to develop practical strategies and solutions to provide appropriate sustainable energy technologies.

Silicon Flatirons Center for Law, Technology and Entrepreneurship
The Silicon Flatirons Center (http://www.colorado.edu/law/node/151/) for Law, Technology, and Entrepreneurship is Colorado Law’s influential foundation that supports and enables entrepreneurship in the technology community. The center is nationally recognized as a telecommunications law powerhouse. It hosts leading technology policy conferences with legal, technical, regulatory and business experts to elevate the debate around technology policy issues, facilitate networking and develop "human capital" in the Colorado technology community. Students assist on major research projects including the Software Regulation Clearing House and help organize 15–20 events a year on topics such as digital broadband migration, entrepreneurial law and startups, new technology, business plan competition, private equity, software patents and regulatory law and economics.

Academic Calendar & Exams

Academic Calendar
The campus operates year round, with fall and spring semesters, a winter session in between fall and spring semesters, and a summer term.

For a complete calendar of the Law School’s academic and financial dates and deadlines, visit the CU Boulder Law School Registrar’s Calendars and Schedules (https://www.colorado.edu/law/academics/calendars-and-schedules/) webpage. (http://colorado.edu/registrar/)

Final Examinations
For more information about final examinations, please see the Exam Procedures & Technology page (https://www.colorado.edu/law/academics/courses-and-registration/exam-procedures-technology/) of the CU Boulder Law website.

Academic Integrity

Why Do We Have a Student Honor Code?

Mission
The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

Values
The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

What is a Violation?

Academic Misconduct includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. Cheating:
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one’s work/exam and turning in that work/exam as one’s own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions, including, but not limited to, exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.

2. Plagiarism. This includes, but is not limited to:
   a. Portrayal of another’s work or ideas as one’s own;
   b. Improper citation of another’s work;
   c. Improper citation of one’s own previous work;
   d. Use of paper writing services or technology (such as essay bots) whether paid or unpaid.

3. Resubmission. Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course faculty involved.

4. Fabrication. Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.

5. Lying. Deliberate falsification with the intent to deceive, as it relates to an academic submission.

6. Bribery. Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.

7. Threat. Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. Retaliation. Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.

8. Unauthorized Access. Gaining access to, giving access to, or use of, protected academic information, including but not limited to: CU-SIS; a faculty, student, or staff member’s computer, files, and/or physical space; and/or secure information on an online server.

9. Aiding Academic Misconduct. Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. Sharing course materials, including but not limited to personal notes, in an unauthorized online bank or forum, whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code.
   b. Sharing personal authentication credentials/login information to third party sites is strongly discouraged and may result in a referral to the Honor Code process.
Resolution Processes

SCCR resolves alleged prohibited conduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

Informal Resolution

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

Formal Resolution

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist’s determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student’s response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/honor-code/) website.

Academic Records

Diplomas

A diploma is issued for each degree earned at the University of Colorado Boulder. A diploma will list degree, and dependent on the college, a student’s major(s). Diplomas will not list any minors earned. Undergraduate diplomas will list Latin or academic honors earned based on eligible GPA or successful participation in a honors program. Graduate students are not awarded Latin or academic honors based on GPA. Minors and eligible certificates earned will appear on the official transcript. Diplomas are mailed to all graduating students approximately eight weeks after the close of the semester in which degree requirements were completed and the student applied for graduation. Note: International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) for students who complete a university-approved certificate from Fall 2015 and onwards.

Graduating students with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student’s record. The hold prevents registration for future terms. Students can complete a loan exit interview by contacting Heartland ECSI at 1-888-549-3274 or via the Heartland ECSI (http://www.heartlandecsi.com/) website. Questions may be directed to University Student Loans & Debt Management in the Bursar’s Office at 303-492-5571, toll free at 800-925-9844.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar’s Diplomas (http://www.colorado.edu/registrar/alumni/diplomas/) webpage.

Transcripts

Official Transcripts

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7i3anAeWu6K3ErXO); no IdentiKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions. Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).

Unofficial Transcripts

Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student’s career at CU Boulder, as this transcript does not carry the registrar’s signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

Educational Record Changes

Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

Law School/Law Career Transcripts

The Office of the Registrar can provide Law School/Law Career Transcripts for the Class of 1985 to the present. These transcripts are considered official by university standards and will include all coursework taken specifically towards a degree at the University of Colorado Law
School as well as Law School ranks, Public Service Pledge awards, certificates and Order of the Coif and Dean’s List notations, as applicable.

To order a Law School/Law Career transcript, students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page-login&sid=7i3anAeWu6K3ExX0). Students should request their “Law Only” transcripts when selecting the transcript for ordering.

Admissions

Colorado Law values leadership, character, diversity and commitment to service in its students pursuing their Juris Doctor (JD). The small size of the incoming JD class—about 170 every fall—and the larger number of applicants require a very selective admissions process. In evaluating applications, the Admissions Committee relies on (1) the completed application form, (2) the report of LSAT scores, (3) undergraduate GPA and transcripts, (4) personal essay(s), and (5) recommendations. The Committee also conducts a holistic analysis of special qualities and individual circumstances such as motivation, undergraduate program, diversity in economic, social, or cultural background, employment or other experience (e.g., military), leadership, and perseverance in overcoming personal handicaps or disadvantages. Graduate level work is also considered. The Admissions Committee is also seeking evidence of character, leadership and diversity, which are the hallmarks of the Colorado Law student body.

Application Process

Regular admission applications with all required materials should be submitted starting Oct. 1. Find complete application instructions at www.lsac.org (http://www.lsac.org/) and on the Colorado Law (http://www.colorado.edu/law/admissions/apply-colorado-law/) website. The Admissions Committee considers regular decision applications beginning in October. Applicants are notified by letter of decisions from early fall until the class is filled. Admission from the waitlist, which is not ranked, can occur as late as August, and the number of offers varies from year to year.

International Students

International applicants have additional requirements as explained on the school’s website, including transcripts showing completion of the equivalent of an American bachelor’s degree, foreign degree verification and transcript translation, if applicable. The TOEFL is required of all students whose native language is not English, as a thorough and excellent command of written and spoken English is crucial to success in law school. After admissions, international students must submit a financial affidavit stating that they have the financial resources to support themselves while attending school in the United States, since the Colorado Law cannot offer loan assistance to international students.

Transfer Students

Students who have completed at least one full year of study (approximately 30 credit hours) at a law school accredited by the American Bar Association may apply for fall transfer admission to Colorado Law. Typically, applications for fall enrollment are accepted after May 1 and must be received by July 1. The number of transfer students admitted varies each year, and only those who have done very well in their law studies elsewhere have a substantial chance of admission.

Visiting Students

Colorado Law admits some students who are receiving their law degree from another law school to study here for the fall or spring semester or both. Admission as a visiting student is available to applicants who have completed one or two years of high-quality work at another law school and have demonstrated a compelling need to attend Colorado Law. Financial aid for visiting students is usually handled by a consortium agreement between Colorado Law and the degree-granting institution.

Credits & Grading

Grading System

The following grading system is standardized for all colleges and schools of the university. Each instructor is responsible for determining the requirements for a class, determining the grading scale used, and for assigning grades on the basis of those requirements and grading scale by the grade submission deadline each term.

Standard Grade Points per Hour of Credit

<table>
<thead>
<tr>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0 (Law School Numerical Grade 93 &amp; Above)</td>
</tr>
<tr>
<td>A-</td>
<td>3.7 (Law School Numerical Grade 90-92)</td>
</tr>
<tr>
<td>B+</td>
<td>3.3 (Law School Numerical Grade 86-89)</td>
</tr>
<tr>
<td>B</td>
<td>3.0 (Law School Numerical Grade 83-85)</td>
</tr>
<tr>
<td>B-</td>
<td>2.7 (Law School Numerical Grade 80-82)</td>
</tr>
<tr>
<td>C+</td>
<td>2.3 (Law School Numerical Grade 76-79)</td>

<td>0.7 (Law School Numerical Grade 60-62)</td>
</tr>
<tr>
<td>F</td>
<td>0.0 (Law School Numerical Grade 59 or Below)</td>
</tr>
</tbody>
</table>

Grading

Letter grades within the University’s 12-step plus/minus grading system will be reported for all students in the JD degree program to the appropriate University administrative office. For each credit hour, the letter grades shall have the credit point value shown above. Through the spring of 2012 for JD students who matriculated before the Fall 2010 semester, for Law School purposes only, a numerical system of grading shall be used in addition to the University’s plus/minus grading system. For JD and LLM students who matriculate in the Fall 2010 semester or later, only letter grades shall be assigned.
Grade Symbols

I
incomplete; If the I grade is given, the instructor and the Dean's Office shall determine in writing the appropriate date for completion of the requirements of the course, such period not to extend beyond the end of the next regular (i.e., not summer) term. If the student fails to complete the requirements of the course by the assigned date, the I grade will be converted to an F. If, at the end of the next succeeding regular (i.e., not summer) term, the faculty member has not provided a new grade to the Law School Registrar, the I grade will be automatically converted to an F unless, prior to that time, the instructor and the Dean's Office have agreed that the grade of W is appropriate. The W grade should be given only where the circumstances preventing completion of course requirements are serious, unforeseeable, and beyond the student's control.

P
passing; pass-graded course shall mean that the grade of "pass" will be given when in the judgment of the instructor the quality and quantity of the work is such that on a graded basis such work would be equivalent to at least a C. Should the work not receive a grade of "pass," the work shall be assigned that letter grade between C- and F that the instructor determines is appropriate.

W
withdrew

***
class grades were not submitted when final grades were processed, or the student is currently enrolled in the course.

Explanation of an I (Incomplete) Grade
The grade I may be given if the instructor and the Dean’s Office determine that 1) an incomplete grade is appropriate because of serious illness of the student or for other equally justifiable reason; or 2) the scope of the work involved in the course is such that it is appropriate to extend the time for its completion beyond the end of the semester.

Grade Point Average
The overall University of Colorado grade point average (GPA) is computed as follows: the credit hours and credit points are totaled for all courses and across all campuses within the same career (UGRD, GRAD or LAW); then the total credit points are divided by the total credit hours. Courses with grade symbols of P, *** (grade not yet entered), W, and I are excluded from calculations. All standard letter grades (A-F) are included in the GPA, including grades of F earned for courses graded on a pass/graded basis. Below is example GPA calculation for a hypothetical semester:

<table>
<thead>
<tr>
<th>Grade Earned</th>
<th>Credit Points per Hour</th>
<th>x Credit Hours</th>
<th>= Credit Points in Course</th>
</tr>
</thead>
<tbody>
<tr>
<td>Grade Earned: A;</td>
<td>Credit Points per Hour: 4.0; x Credit Hours: 4.0 = Credit Points in Course: 16.0</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grade Earned: A-;</td>
<td>Credit Points per Hour: 3.7; x Credit Hours: 4.0 = Credit Points in Course: 14.8</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grade Earned: B+;</td>
<td>Credit Points per Hour: 3.3; x Credit Hours: 4.0 = Credit Points in Course: 13.2</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grade Earned: P;</td>
<td>Credit Points per Hour: —; x Credit Hours: 3.0 = Credit Points in Course: — (excluded)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Grade Earned: F;</td>
<td>Credit Points per Hour: 0; x Credit Hours: 3.0 = Credit Points in Course: 0</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Total of 15 credit hours with 44 credit points, so 44/15 = 2.93 GPA</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

For individual GPA calculations related to academic standing and graduation from a college or school, students should refer to their academic dean’s office.

Credit Limits
For academic purposes, law students must be enrolled for a minimum of 10 credit hours to be considered full time in the fall and spring. For more information, visit the Colorado Law (http://www.colorado.edu/law/) website. Law students may apply a maximum of 18 credit hours toward a degree during the fall and spring semesters. Students who receive financial aid or veterans benefits or who live in university housing should check with the appropriate office regarding course-load requirements for eligibility purposes.

Graduation
Graduation
Students are eligible to graduate at the close of the term in which they successfully complete all requirements for their degree program. Degrees are typically conferred at the close of fall semester, spring semester and summer session. Students must apply for graduation through Buff Portal by the published deadline for the term in which they complete degree requirements. Instructions for applying and important dates and deadlines are available on the Office of the Registrar’s Graduation & Commencement (http://www.colorado.edu/registrar/students/graduation/) webpage. Individual colleges and schools may require additional processes for students completing their degrees.

Commencement
A general commencement ceremony is held in May for all students who have graduated or anticipate to graduate in a given academic year (fall, spring and summer). This ceremony is open to the public and no tickets are required. Many departments, colleges and schools hold recognition ceremonies in both fall and spring semesters. For details about the ceremony, visit CU Boulder’s Commencement (http://www.colorado.edu/commencement/) website.
Diplomas
Please see the Academic Records (p. 1718) section.

Registration & Enrollment
Registration
Visit the Office of the Registrar’s Academic Calendar (http://www.colorado.edu/registrar/students/academic-calendar/) webpage for specific academic and financial dates and deadlines. Students should also consult Colorado Law’s Courses and Registration webpage (https://www.colorado.edu/law/academics/courses-and-registration/) for additional information on special requirements and deadlines. The following registration policies are intended to serve as general guidelines.

Students who require accommodations because of a disability should visit the Disability Services (http://www.colorado.edu/disabilityservices/) website or call 303-492-8671.

When registering for courses, most Law School classes may be located searching under the subject code LAWS.

Student Portal
Student registration and other important information and services are available through the student portal (https://www.colorado.edu/studentportal/). Students access the portal using a secure CU login name and IdentKey password. For more information and registration instructions, visit the Registration (http://www.colorado.edu/registrar/students/registration/) webpage.

Holds
A hold may be placed on a student’s record for a number of reasons, including but not limited to financial, advising, scholastic, conduct and health. A hold may prevent a student from registering, returning to school, obtaining an official transcript or receiving a diploma. Students should resolve holds as quickly as possible by contacting the appropriate campus office identified in the hold in their student portal.

Withdrawing from the Semester
A withdrawal from a Main Campus semester occurs if the student:

• Never registers for classes in a fall or spring semester
• Drops all classes for a semester
• Submits a withdrawal request to the Office of the Registrar

A student who desires to withdraw from the university and drop all Main Campus classes should visit the Office of the Registrar’s Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage and review the current term’s withdrawal calendar and the withdrawal checklist to understand the potential impacts of withdrawing. Failure to withdraw properly may result in failing grades recorded for every class and liability for the full amount of tuition and fees for that term.

Rules for withdrawing may vary with each college and school. Students anticipating a withdrawal should consult their advisor to understand the potential impacts to their degree requirements.

Withdrawing students (including students applying for a graduate leave of absence) with Federal Perkins/NDSL loans must complete a loan exit interview and clear all outstanding financial balances before leaving the university. Failure to do so results in a hold on the student’s record. This hold prevents receipt of a diploma or an academic transcript of work at the university and registration for future terms. Students can complete a loan exit interview by contacting University Student Loans & Debt Management in the Bursar’s Office at 303-492-5571, toll free at 800-925-9844 or TTY 303-492-3528.

Undergraduate students who withdraw and then wish to return to the university have two semesters (plus summer) from their last graded semester to return to the university without having to reapply for admission. Graduate students can apply for an approved leave of absence.

Details are available on the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage. For more information, contact the Office of the Registrar at 303-492-6970 or withdraw@colorado.edu. For information about tuition and fee obligations for withdrawing students, see either the Undergraduate Tuition and Fee Policies (p. 63) or the Graduate Tuition and Fee Policies (p. 1056) sections.

Active Duty
Students who are military personnel, fire fighters and police officers called to active duty and/or to help with disasters may request to go on a leave of absence. These students should contact the Office of the Registrar. For more information, visit the Withdraw from the Semester (https://www.colorado.edu/registrar/students/withdraw/) webpage.

Law Student Withdrawal and Leave of Absence
A law student who desires to voluntarily withdraw from the university and drop all classes during the first (fall) semester must reapply for readmission, may only be readmitted to resume in a subsequent fall semester, and shall receive no readmission preference. Students who withdraw after completing the fall semester but before beginning on the second (spring) semester, must reapply for admission, shall normally be expected to wait until the next spring semester to resume their studies, and shall receive admission preference only in the next regularly scheduled spring semester. Law students must apply for a leave of absence (https://www.colorado.edu/registrar/students/leave-of-absence/) or will be discontinued from the university. Department and college approval is required on the application.

Student Affairs
Health & Wellness
Health and Wellness Services
Health and Wellness Services is a part of the CU Boulder Division of Student Affairs. As part of Student Affairs, we are collectively committed to the success and well-being of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings. To learn more, visit Health and Wellness Services (http://www.colorado.edu/health/).

Administrative Services
The Administrative Services team oversees all aspects of medical insurance, billing and medical records at CU Boulder. To learn more,
visit Administrative Services (https://www.colorado.edu/healthcenter/insurance-billing-medical-records/).

**Counseling and Psychiatric Services**

Counseling and Psychiatric Services (CAPS) offers confidential, on-campus short-term mental health and psychiatric services for all fee-paying students. CAPS addresses a variety of concerns such as academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (http://www.colorado.edu/health/counseling/).

**Disability Services**

Disability Services is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit Disability Services (http://www.colorado.edu/disabilityservices/).

**Health Promotion**

Health Promotion provides outreach and education on a variety of health topics. Our office supports students in learning skills to make informed decisions about their health and help them succeed while they're in school and beyond. Health promotion collaborates with student groups and campus departments to provide programs and services that positively influence student health. To learn more, visit Health Promotion (https://www.colorado.edu/health/promotion/).

**Medical Services**

Medical Services is the primary health care resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (https://www.colorado.edu/healthcenter/). (https://www.colorado.edu/healthcenter/)

**Recovery Community**

The CU Collegiate Recovery Community (CUCRC) provides community, support and connection for students, faculty and staff in recovery or seeking recovery from a wide range of behaviors. Our mission is to help develop peer-to-peer connections, support resiliency and contribute to their overall well-being through a welcoming and supportive community. To learn more, visit Recovery Center (https://www.colorado.edu/recoverycenter/).

**Recreation Services**

The University of Colorado Boulder has two indoor recreation facilities, three artificial turf fields, four natural grass fields, four outdoor basketball courts, three tennis courts, and a challenge ropes course. These are all located throughout campus and provide a variety of amenities, programming and operating hours. Both Rec Center locations on campus are open to all full-fee paying students and those with memberships. To learn more, visit Recreation Services (https://www.colorado.edu/recreation/).

**The Office of Victim Assistance**

The Office of Victim Assistance (OVA) provides free and confidential information, consultation, support, advocacy and short term counseling services to University of Colorado Boulder students, graduate students, faculty and staff who have experienced a traumatic, disturbing or life-disruptive event. Call 303-492-8855 to connect with an OVA counselor or to receive after-hours support. To learn more, visit The Office of Victim Assistance (https://www.colorado.edu/ova/).

**CU Boulder Student Health Insurance Plan (SHIP)**

All full fee paying students, regardless of their insurance plan, have full access to the services provided by Health and Wellness Services.

Students may elect health insurance coverage through:

- CU Gold Student Health Insurance Plan (SHIP)
- Private insurance (an individual health insurance plan through a family member or employer)

Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process. Once a student is registered for their semester credits, the student will begin receiving email communications from Academic HealthPlans. These emails explain the insurance requirement and outline the process of enrolling or waiving the Gold SHIP.

For more information, visit the Health Insurance Requirement (http://www.colorado.edu/health/insurance/health-insurance/)

Note: Plans available through the health insurance marketplace meet CU's health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (http://connectforhealthco.com/). Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (https://www.healthcare.gov/).

**Housing**

**Off-Campus Housing**

Off-Campus Housing & Neighborhood Relations (a service of CUSG) maintains listings of apartments, houses and rooms for rent in the Boulder area. Currently enrolled students may view listings and connect with potential roommates on Ralphie’s List, CU’s rental database, on the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu) website. The office also maintains a detailed list of apartments and property management companies available for download or pickup in the office.

The department has a staff attorney available on Tuesdays and Fridays to advise students about leases, security deposits, maintenance issues and roommate and landlord conflicts. Office assistants will help students locate properties and answer questions about the surrounding neighborhoods.

During the academic year, the office sponsors several off-campus housing fairs where landlords, property managers and related businesses offer their services to students in a trade-show format.

For additional information, visit the Off-Campus Housing & Neighborhood Relations (http://offcampushousing.colorado.edu/) website or call 303-492-7053. Office hours are 8 a.m.–5 p.m., Monday–Friday. Summer hours are 7:30 a.m.–4:30 p.m.
**Graduate & Family Housing**
The University of Colorado Children's Center provides childcare for the children of students, staff, faculty and Graduate & Family Housing residents.

Graduate & Family Housing offers an affordable, convenient and comfortable living environment that serves the needs of a diverse population of students at CU Boulder. We are home to residents from over 70 nations and offer a variety of apartment types and sizes, flexible leases and community-building programs and events. To learn more, visit the Housing and Dining (https://living.colorado.edu) website or call, write or email the Graduate & Family Housing Office at the address provided.

Graduate & Family Housing Office
1350 20th Street, #A10
University of Colorado Boulder
Boulder, CO 80302
T: 303-492-6384
graduatefamilyhousing@colorado.edu

**Student Conduct & Colorado Creed**

**Student Conduct & Conflict Resolution**

---

**What We Believe**

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- fostering reflection on the impact of their behaviors;
- promoting responsible community membership and repairing harm; and
- cultivating the wellbeing and safety of the CU Boulder community.

---

**What Is Important to Us**

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, comply with institutional policy, and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics, and values.
   - The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

---

**Why Do We Have a Student Code of Conduct?**

**Authority**

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-6550.

---

**When and Where Does the Student Code of Conduct Apply? (Jurisdiction)**

1. The Student Code of Conduct applies to:

   a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder sponsored programs conducted away from the campus.
   b. Student conduct that occurs off CU Boulder property is subject to this policy if it:
      - adversely affects the health, safety, or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy, or the mission of CU Boulder; or
      - involves any records or documents of CU Boulder; or
      - involves conduct that may be a violation of federal, state, or local law, as determined by SCCR.
   c. For purposes of this policy, CU Boulder’s mission is broadly defined to include both its academic goals and the importance of developing civic responsibility in our students.

2. Recognized Student Organizations and Recognized Social Greek Organizations

   a. Wherever the Student Code of Conduct refers to “responding student”, the same also applies to Recognized Student Organizations (RSOs) and Recognized Social Greek Organizations (RSGOs). RSOs, as described in the Student Organization Handbook (https://www.colorado.edu/involvement/), are general student organizations recognized by the Center for Student Involvement (CSI) and CU Boulder. Recognized Social Greek Organizations are recognized by Fraternity & Sorority Life (FSL) and CU Boulder.
   b. RSOs and RSGOs, as well as their members and other students, may be held collectively and/or individually responsible for violations.
   c. The RSO and RSGO officers, leaders, signers, or individuals currently listed in an official position in the Center for Student Involvement records or Fraternity and Sorority Life records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization officers or leaders, if those officers or leaders knew, or reasonably should have known, that such violations were being or would be committed.
   d. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization, and by the organization.

3. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to
the same underlying factual incident. SCCR's jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.

4. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.

5. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence, and gender/sex-based stalking), protected class discrimination, harassment, and any related retaliation, see Section M of the student Code of Conduct.

6. For jurisdictional information pertaining to academic misconduct, see Section M of the Student Code of Conduct.

7. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.

**Student Resolution Processes**

**Informal Resolution**

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes, and/or participation in the Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

**Formal Resolution**

This process generally includes: i. written notice of the factual allegations and alleged violations of the Student Code of Conduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the responding student’s response to those allegations; ii. any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant, or any other interested party; and/or iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any alleged victim, or other interested party, as it appears in a report, or as requested by the resolution specialist.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing Policies (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.

Cases involving sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) policies. For more information, visit the OIEC (https://www.colorado.edu/oiec/) website or call 303-492-2127.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the Policies (https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/) webpage.

**Colorado Creed**

The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

**Student Resources**

The Division of Student Affairs (http://www.colorado.edu/studentaffairs/) offers many on-campus resources for our students. Visit our offices to learn more.

**Student Life & Involvement**

- Center for Inclusion and Social Change (https://www.colorado.edu/cisc/): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (https://www.colorado.edu/cusg/): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/ecenter/): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (https://www.colorado.edu/greeks/): Find opportunities for friendship, leadership and growth in CU's vibrant and diverse Greek community.
The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.

• Off-Campus Housing & Neighborhood Relations (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie’s List, register your party and learn about the legal aspects of off-campus living.

• Recreation Services (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and the Outdoor Program.

• Residence Life (https://www.colorado.edu/living/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.

• Student Support & Case Management (https://www.colorado.edu/scrm/): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment and dining options.

Student Support & Development

• Basic Needs Center (https://www.colorado.edu/support/basicneeds/): Get connected to essential resources when you need them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.

• Career Services (https://www.colorado.edu/career/): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land that internship and make connections with employers.

• Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.

• Student Legal Services (https://www.colorado.edu/studentlegal/): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.

• Student Support & Case Management (https://www.colorado.edu/studentaffairs/sscm/): Find individual support for students and advocates for their needs in all aspects of campus life.

• Veteran and Military Affairs (https://www.colorado.edu/veterans/): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.

• Volunteer Resource Center (https://www.colorado.edu/volunteer/): Explore volunteer opportunities for CU Boulder students and staff on campus and throughout the greater Boulder community.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it’s important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

• Inspect and review your education record
• Request amendment of your education record

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

• To your parents or guardians (if you are a dependent student for tax purposes)
• To an accrediting organization
• To comply with a judicial order or lawfully issued subpoena
• In connection with a health or safety emergency or other exception under FERPA
• To a duly charged official in connection with a student proceeding under FERPA
• To an agent of a state or local educational agency for a state vocational education program
• To a accrediting agency to carry out its duties under legal statutes
• To a parent of a student with respect to the student’s education record
• To a person or persons who are the child’s next of kin
• To any person (including the student) named in a court order or judicial lawfully issued subpoena
• To a designated officer or official of any school district, state or local educational agency, or military department or agency for the purpose of carrying out the duties of such agency
• To a state or local educational agency for compliance with legal statutes
• To an official of another institution at which you seek or intend to enroll
• To an agency conducting financial aid
• To an organization conducting studies for or on behalf of the university
• To authorized representatives of federal, state or local educational authorities
• To a recognized educational or professional organization (e.g., honor societies, professional associations)
• To a recognized agency conducting financial aid
• To a prospective employer (to verify your enrollment or degree)
• To a campus publication (to verify your enrollment or degree)
• To a campus organization with which you are affiliated (to verify your enrollment or degree)
• To a representative of the U.S. Department of Education (to verify your enrollment or degree)
• To the Department of Education in connection with an audit or program evaluation

To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)...

Student data that is not directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or “directory” information:

• student name
• hometown (city, state)
• campus email address
• dates of attendance
• previous educational institutions attended
• school/campus or division of enrollment
• majors, minors and fields of study
• classification level (e.g., first-year, sophomore, etc.)
• university-recognized honors and awards
• degree status (e.g., expected graduation date and/or conferral dates/terms)
• enrollment status
• employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
• participation in officially recognized activities/sports, including height and weight of athletes.
• photos and videos taken or maintained by the university

1 If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student’s primary name. When communicating with outside third parties, including parents, the university generally uses a student’s primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.
2 Campus email addresses are only disclosed to requestors who agree to not use them for solicitation.

Withholding Directory Information
Students have the right to withhold directory information from inquirers. To restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Confidential Information
Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information
Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student’s academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student’s conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student’s conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Student Finances
All admission decisions are made without regard to students’ financial need. Financial assistance may be available in the form of federal and private educational loans, grants, work-study and scholarships. Students applying for financial aid or private law scholarships based on financial need must complete the Free Application for Federal Student Aid (FAFSA) (https://studentaid.gov/h/apply-for-aid/fafsa/) as soon as possible.

Eligible students are offered Federal Direct Unsubsidized Loans up to a maximum of $20,500 per year. Federal Graduate PLUS loans are also available, but require a credit check. Private loans (https://www.colorado.edu/financialaid/node/29/) have interest rates and fees that vary according to the lender, the credit rating of the student and whether there is a co-signer. Both loan fees and interest rates may be higher than federal loans and there is no cap on interest rates.

Scholarships, Fellowships and Awards
A number of scholarships, fellowships and awards are given annually on a competitive basis for academic and financial considerations. All admitted first-year students are considered for scholarships, as recipients are selected by the Admissions and Financial Aid Committee after an offer of admission has been made. It is possible for scholarships to be awarded through August. Colorado Law also offers some scholarship money to second-year and third-year students each spring. These scholarships are awarded based on academic performance and other criteria, such as economic need and demonstration of assistance in advancing the diversity of the student body.

Tuition Classification
In-State and Out-of-State Tuition Classification
Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (https://www.colorado.edu/registrar/students/state-residency/guidelines/), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as in-state or out-of-state residents for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to in-state status must submit a petition with documentation and evidence substantiating their eligibility. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.
Basic Requirement for Establishing Colorado Residency

To become eligible for in-state residency, a person must establish legal residence in Colorado. Legal residence, or “domicile,” is defined as a person’s true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

Resident status requires at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident status.

To be eligible to begin the 12-month period to establish Colorado domicile, an individual must be at least one of the following:

- 22 years of age or older
- Married
- A graduate student
- An emancipated student

The domicile of a nonemancipated student is the same as that of a parent or legal guardian. Students over the age of 22 years, second-year graduate students, married students and emancipated students are qualified to determine their own domicile.

Unemancipated Minors

Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation

An emancipated minor is someone under age 23 who demonstrates total financial and residential independence. This means the student’s parents and all others have entirely surrendered the right to the student’s care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.

Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver’s license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorably discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED and 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile (http://www.colorado.edu/registrar/students/state-residency/domicile-exceptions/) webpage.

University Policies

Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs
and alcohol) of any kind and in any amount. These prohibitions cover any individual’s actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Campus housing:** See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct:** See the Student Code of Conduct (https://www.colorado.edu/scsr/student-conduct/).
- **Safety:** Annual Security and Fire Safety Report (http://www.colorado.edu/clery/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (http://www.colorado.edu/health/counseling/) webpage or call 303-492-2277.

**Smoking**

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

**Campus Safety**

**Personal Safety on Campus**

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (http://www.colorado.edu/clery/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don’t Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@CUBoulderPolice) and Facebook (CUBoulderPolice (https://www.facebook.com/CUBoulderPolice/)).

**Communication**

**Student Email**

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (http://www.colorado.edu/policies/student-e-mail-policy/) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology’s Messaging and Collaboration webpage (https://oit.colorado.edu/node/237/).

**Copyright & Fair Use**

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

**Diversity & Nondiscrimination**

**Commitment to Diversity**

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive
campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning"—from the Guidelines for Diversity Planning (https://www.colorado.edu/odece/diversity-plan/).

**Nondiscrimination Statement**

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

**Equity & Compliance**

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed in order to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also offers education and assessment to identify areas in need of improvement and foster a more welcoming campus culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (https://www.colorado.edu/oiec/) website or call 303-492-2127.

---

**Programs of Study**

Colorado Law’s curriculum provides students one of the best comprehensive legal educations in the nation, employing a solid foundation in the fundamentals of law, robust theoretical inquiry, doctrinal and policy analysis, real world experience, legal reasoning tools and professional skills. Our faculty members are passionate about teaching and are committed to providing a well-rounded learning experience that prepares students to serve wisely and with professionalism.

**Graduate Degrees**

- Law - Juris Doctor (JD) (p. 1769)
- Law - Master of Laws (LLM) (p. 1768)
- Law - Master of Studies in Law (MSL) (p. 1768)

**Certificates**

- American Indian Law (p. 1772)
- Civil Rights and Racial Justice (p. 1773)
- Energy, Environmental, and Natural Resources Law and Policy (https://catalog.colorado.edu/law/programs-study/natural-resources-law-policy-graduate-certificate/)
- Entrepreneurial Law (p. 1774)
- Health Law and Policy (p. 1776)
- International Law (p. 1777)
- Juvenile and Family Law (p. 1777)
- Tax Emphasis (p. 1778)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member’s home department.

Professor Emeritus; LLB, Stanford University
Courses

LAWS 5064 (1-2) Legal Analysis
Designed to help students develop the analytical skills necessary for success in law school and on the bar exam. Students will strengthen their core analytical skills, written communication skills, and ability to retain information. The ability to engage legal questions at the highest level is a skill that can be practiced and improved.
Requisites: Restricted to Professional Year 1 Law students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 5103 (1) Legal Ethics & Professionalism: What Kind of Lawyer Do You Want to Be?
Explores both the kind of law students might decide to practice and the ethical, personal and professional commitments central to the practice of law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5121 (4) Contracts
Covers basic principles of contract liability, offer, acceptance and consideration, statute of frauds, contract remedies, the parol evidence rule, performance of contracts, conditions, effect of changed circumstances, third-party beneficiaries, assignment and specific performance.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 5201 (1) Entrepreneurship, Innovation and Public Policy
Explores cutting edge questions around entrepreneurship, including being an entrepreneur, leadership and what makes a great founding team, building and scaling a business, entrepreneurial communities, financing entrepreneurial companies, leadership in government, entrepreneurship and innovation policy.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Business

LAWS 5203 (1) Legal Ethics, Professionalism and Creative Problem Solving
Developing reflective, creative problem solving and ethical legal professionals by touching a core set of issues facing lawyers, including the duty of confidentiality to clients and the hazard of conflicts of interest, providing students with an opportunity to confront these challenges in an interactive and engaged environment.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Electives

LAWS 5205 (3) Legislation and Regulation
Introduces lawmaking in the modern administrative state. Examines the way Congress and administrative agencies adopt binding rules of law (statutes and regulations, respectively) and the way that implementing institutions, courts and administrative agencies interpret and apply these laws. Considers the structure of the modern administrative state, the incentives that influence the behavior of the various actors, and the legal rules that help to structure the relationships among Congress, the agencies and the courts.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 5211 (1) Framing and Legal Narrative
Thinking through the fundamental concepts that inform and animate different areas of law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail

LAWS 5223 (2) Legal Writing II
Students prepare appellate briefs and related documents and deliver oral arguments before a three-judge court composed of faculty, upper-division students, and practicing attorneys. Practice arguments are videotaped and critiqued.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 5226 (2) Legal Writing I
Provides an intensive introduction to the resources available for legal research. Students also prepare written material of various kinds designed to develop research skills, legal writing style, and analysis of legal problems.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 5303 (4) Civil Procedure
Studies modern practice in civil suits, including rules governing pleading, joinder of parties, discovery, jurisdiction of courts over the subject matter and parties, right to jury trial, appeals, and res judicata and collateral estoppel, with emphasis on the Federal Rules of Civil Procedure and their Colorado counterpart.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 5323 (1) Courtroom Observation Civil
An elective that requires 15 hours observing actual civil proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 5425 (3) Torts
Studies nonconsensual allocation of losses for civil wrongs, focusing primarily on concepts of negligence and strict liability.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 5503 (4) Criminal Law
Studies statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, the purposes of criminal law, and the constitutional limits upon it.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure
**LAWS 5513 (1) Courtroom Observation Criminal**
An elective that requires 15 hours observing actual criminal proceedings in a courtroom, attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. Figuring out how to gain access to appropriate proceedings is part of the student's work, although the professor is available for advice and guidance.

**Requirements**: Restricted to Law (LAWS) students only.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Jurisprudence and Perspective

---

**LAWS 5624 (4) Property**
Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

**Requirements**: Restricted to Law (LAWS) students only.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Property

---

**LAWS 5634 (2-3) Property 2**
Topics include personal property, estates and interests in land, landlord-tenant, basic land conveyancing, and private land use controls.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Property

---

**LAWS 5646 (1) Foundations of Legal Research**
Designed to move students from the brief introduction to legal research offered in the first-year legal writing classes to the problem-centered research students will perform starting in the summer after their first year. Provides students with a conceptual understanding of the organization and connectivity of legal authority and with instruction in research methodology at both the project and resource levels.

**Requirements**: Restricted to Professional Year 1, 2, or 3 Law students only.

**Grading Basis**: Pass/Fail

**Additional Information**: Departmental Category: Research and Writing

---

**LAWS 5803 (1) Courtroom Observation International**
An elective that requires fifteen hours observing proceedings before an international tribunal(s), attending a two-hour class meeting every other week, preparing and submitting a journal of recorded observations. The proceedings observed will be available streaming online and the professor will provide information about how to gain access to them.

**Requirements**: Restricted to Law (LAWS) students only.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Jurisprudence and Perspective

---

**LAWS 6001 (4) Commercial Transaction**

**Grading Basis**: Letter Grade

---

**LAWS 6002 (3) Public Land Law**
Deals with the legal status and management of resources on federal lands, including national forests, parks and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife and wilderness resources on public lands.

**Requirements**: Requires prerequisite course of LAWS 6112 (minimum grade D-).

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Environment, Natural Resources and American Indian

---

**LAWS 6004 (3) Real Estate Transactions**
Focuses on legal issues that arise in all phases of real estate transactions, with an emphasis on the role of the lawyer in the business of real estate as well as on the regulation of real estate markets.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Property

---

**LAWS 6005 (4) Constitutional Law**
Studies constitutional structure: judicial review, federalism, separation of powers; and constitutional rights of due process and equal protection.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Government and Public

---

**LAWS 6007 (4) Income Taxation**
Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

**Equivalent - Duplicate Degree Credit Not Granted**: ACCT 6700

**Requirements**: Restricted to Professional Year 1, 2, or 3 Law students only.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Taxation

---

**LAWS 6008 (3) Foundations of International Legal Thought**
Provides students with a broad historical and philosophical introduction to international law. Addresses changing conceptions of sovereignty between 1492 and World War II, the contexts of the Spanish conquest of the Americas, the international legality of the slave trade, relations between the Ottoman Empire and the "Great Powers", the Chinese opium wars and the rise of modern international institutions.

**Requirements**: Restricted to Law (LAWS) students only.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: International

---

**LAWS 6009 (4) Legal Aid Civil Practice 1**
Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills.

**Requirements**: Restricted to Law (LAWS) students only.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Practice: Clinical and Simulation

---

**LAWS 6011 (3) Payment Systems**
Examines the methodology and policies of Articles 3 and 4 of the Uniform Commercial Code, dealing with such topics as negotiable instruments, bank deposits, collections, letters of credit and electronic fund transfers.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Business

---

**LAWS 6013 (3) Civil Practice Clinic 2**
Emphasizes procedural and practical remedies and defenses available in civil litigation. Assigns civil cases related to the course material. Develops working knowledge of courtroom skills.

**Requirements**: Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D).

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Practice: Clinical and Simulation

---

**LAWS 6021 (3) Secured Transactions**
Explores the methodology and policies of Article 9 of the Uniform Commercial Code, dealing with financing transactions in personal property.

**Grading Basis**: Letter Grade

**Additional Information**: Departmental Category: Business
**LAWS 6024 (3) Real Property Security**
Examines basic mortgage law, including use of mortgage substitutes (e.g., deeds of trusts and installment land contracts). Covers foreclosure and redemption and related problems; special priority problems in land acquisitions and construction financing; special financing devices, including variable-interest and wraparound mortgages; and problems relating to the transfer of the mortgagor’s and mortgagee’s respective interests.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Property, Trust and Estate and Land Use

**LAWS 6029 (4) Criminal and Immigration Defense Clinic**
Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.

**Requisites:** Restricted to Law (LAWS) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Practice: Clinical and Simulation

**LAWS 6031 (2) Consumer Protection Laws and Policies**
Focuses on deceptive trade practices and consumer rights. Reviews the law of deception/misrepresentation at common law, and federal and state laws regarding unfair acts and practices. Covers credit practices, environmental and health claims, and telecommunications and privacy. Discusses remedies, including governmental enforcement actions, and individual and class actions.

**Grading Basis:** Letter Grade

**LAWS 6035 (3) White Collar Crime**
Examines distinctions between white collar crime and other types of criminal activity and the needs for and arguments against white collar laws and law enforcement. Studies securities fraud, mail and wire fraud, insider trading, money laundering, false statements, conspiracy and criminal forfeiture statutes. Includes use of the grand jury, privileges applicable in the corporate setting, immunity, discovery and the impact of parallel civil proceedings. Examines effect of government policy on corporations and their counsel, pre-trial and trial strategy, jury selection and victim notification and restitution options.

**Requisites:** Restricted to Law (LAWS) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Practice: Clinical and Simulation

**LAWS 6039 (4) Criminal Defense Clinic 2**
Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants in Boulder courts. Develops working knowledge of courtroom skills.

**Requisites:** Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Practice: Clinical and Simulation

**LAWS 6045 (3) Criminal Procedure**
Focuses primarily on the constitutional limitations applicable to such police investigative techniques as arrest, search, seizure, electronic surveillance, interrogation and lineup identification.

**Requisites:** Restricted to Law (LAWS) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Litigation and Procedure

**LAWS 6049 (4) Legal Assistance 1: Federal Courts**
Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.

**Grading Basis:** Letter Grade

**LAWS 6055 (3) Post-Conviction Criminal Procedure**
Addresses sentencing process and schemes, direct appeals, probation modification and revocation, parole revocation, pardon and commutation processes, post-conviction litigation and appeal in both state and federal court, federal review of state convictions through habeas and/or the AEDPA, and ethical issues that arise in post-conviction proceedings.

**Requisites:** Restricted to Law (LAWS) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Litigation and Procedure

**LAWS 6059 (2-3) Legal Aid and Defender**

**Grading Basis:** Letter Grade

**LAWS 6060 (3) White Collar Crime Practicum**
Addresses the non-trial portion of white collar criminal law. Drawing examples and problems from wire fraud, securities fraud, health care, and computer fraud contexts, explores a white collar's case's major investigative and charging phases, corporate and organizational issues, as well as pleas and punishment.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Government and Public

**LAWS 6065 (3) Media, Popular Culture, and the Law**
Examines how the institutions, practices, and the very identity of the law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed is: to what extent, and how are the forms and methods of the new media, having an effect on the perception, role and identity of law?

**Requisites:** Restricted to Law (LAWS) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Government and Public

**LAWS 6069 (4) Immigration Clinic**
Emphasizes practice skills in immigration cases. Includes litigation before Federal Immigration judges, Board of Immigration Appeals, and Federal Circuit Court of Appeals.

**Requisites:** Requires prerequisite or corequisite course of LAWS 6353 (minimum grade D-).

**Grading Basis:** Pass/Fail

**LAWS 6079 (4) Criminal Defense Clinic**
Provides thorough grounding in problems of criminal defense. Students defend indigent misdemeanants. Develops working knowledge of courtroom skills, advocacy and evidence presentation. Concludes with full mock trial.

**Requisites:** Restricted to Law (LAWS) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Practice: Clinical and Simulation
LAWS 6089 (4) Legal Assistance 2: Federal Courts
Studies evidence and procedural issues, discovery (including document management), pretrial preparation, motions, pretrial conferences, and jury selection. Focuses on opening and closing statement strategies, elements of direct and cross-examination, and impeachment; how to present evidence using technology, including presentation software. Students participate in preparing and arguing motions in federal court and may participate in trial proceedings.
Grading Basis: Letter Grade

LAWS 6099 (4) Family Law Clinic
Represents low-income clients in family law cases in local state district court. Students will gain court-based experience in dissolution's and allocations of parental responsibilities. Seminar component includes instruction on substantive family law, related ethical issues, and theoretical backgrounds of poverty lawyering.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation, Negotiation Alt Dispute Resolution

LAWS 6103 (2-3) Legal Ethics Professionalism
Examines the legal profession as an institution, its history and traditions and the ethics of the bar with particular emphasis on the professional responsibilities of the lawyer. Discusses the Model Rules of Professional Conduct.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation, Negotation Alt Dispute Resolution

LAWS 6104 (3) Wills and Trusts
Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6105 (2) Defending Immigrants in Criminal and Immigration Courts
Addresses legal procedures, pleadings and client advocacy matters involved in the representation of Spanish-speaking clients who have been arrested for criminal offenses and who have been issued a detainer by Immigration and Customs Enforcement for possible immigration removal proceedings. Provides overview of criminal defense concepts, and how criminal defense attorneys must be prepared to competently counsel their clients who are facing removal proceedings in the federal immigration system.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 6106 (3) Conflict of Laws
Addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6107 (3) Survey of Business Enterprise Tax
Makes a comparative survey of federal income taxation of C corporations, S corporations, and partnerships/limited liability companies, the principal entity choices for conducting business in the United States. Includes formation, operations, distributions, sales of interests, and liquidation. Suitable for students seeking introductory background for business or real estate practice, without the detail required for a tax specialist.
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D).
Grading Basis: Letter Grade

LAWS 6108 (3) Conflict of Laws

LAWS 6109 (2) Trial Advocacy
Focuses on voir dire, opening statement, direct examination of witnesses and cross examination.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6112 (3) Foundations of American Natural Resources Law
Introduces students to the law of natural resources. Examines the legal, historical, political, and intellectual influences that shape resources development and conservation.
Requisites: Restricted to Professional Year 1, 2, or 3 Law students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6113 (2) Legal Ethics and Professionalism: Ethics and the Law of Lawyering
Continuation of LAWS 5103. Focuses on the Model Rules of Professional Conduct. Provides the nuts and bolts of the ethical rules needed to begin to explore externships, clinics, pro bono projects and other practice experiences during law school.
Requisites: Requires prerequisite course of LAWS 5103 (minimum grade D). Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6114 (2) Construction Law
Focuses on the basic principles and practices of construction law. Provides an overview of construction industry participants and players (engineers, contractors, insurers) and discusses and analyzes the various obligations and liabilities of these parties. Covers construction and design contracting, construction claims, professional negligence, construction insurance and suretyship and ADR in construction. Provides transactional-practice oriented exercises.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 6115 (2-3) Representing the Spanish-Speaking Client
This course is a survey of the substantive law of matters likely to be encountered by attorneys representing Spanish-speaking clients in Colorado. Topics may include, among others, family law, criminal law, employment law, wage theft, and consumer rights. The course will not only introduce legal Spanish vocabulary, but more importantly, it will teach students how to communicate legal concepts so as to be understood by the clients.
Grading Basis: Letter Grade

LAWS 6117 (3) Survey of Business Enterprise Tax
LAWS 6119 (1) Deposition Skills
Provides valuable skills to assume active roles in the deposition process. Explores why and when to take depositions; drafting and objecting to deposition notices for individual deponents, non-party witnesses and corporate designees; drafting successful outlines, proper questions and objections; using exhibits; furthering case theory, making and using stipulations; using depositions in pretrial motions and at trial.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6122 (2) International Natural Resources Law and Policy
Examines the suite of policy issues and legal ramifications associated with sustainable natural resource development. Examines most recent research on the "resource curse" theory. Examines recent policy developments and discussions that have occurred among industry, NGOs, multilateral development agencies and governments. Examines issues related to bribery and corruption in developing country environments and dispute resolution mechanisms at national and local levels.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment Natural Resources
Departmental Category: International Comparative Law

LAWS 6123 (2) Legislative and Policy Drafting
Examines the drafting and amending enacted legal texts such as statutes, regulations, and polities of both governmental and non-governmental entities. Students will critically examine lawyers' roles as counselors, advocates and experts in different legislative and policy-drafting contexts.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6128 (1-3) Statutory Interpretation
Examines theories of legislation and the relation between legislatures and courts, emphasizing problems of statutory interpretation and other issues in the judicial use or misuse of statutes.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 6138 (2-3) Federal Tax Politics
Examines the federal income taxation of subchapter C corporations and their shareholders. Topics include choice of entity, operations, distributions, reorganizations, liquidations, property, and stock acquisitions, and tax-free reorganizations (that is, mergers and acquisitions).
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6450
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 6167 (3) Partnership Taxation
Examines the federal income taxation of partnerships and other pass-through entities, which represent most small businesses in the United States. Topics may include the allocation of operating income and deductions among owners, contributions and distributions of property, and acquisitions and dispositions of partnership interests by partners.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6430
Requisites: Requires a prerequisite course of LAWS 6007 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 6170 (1) E-Discovery
Explores students to the legal and practical challenges presented by E-discovery and how electronically stored information shapes litigation and the pretrial process. Students gain an understanding of how electronically stored information can impact an overall discovery strategy and how this complicates a lawyer's ethical and professional obligations.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6177 (1-2) Civil Tax Controversies
Explore critical rules that drive the administration of our tax system, as well as policy and strategic considerations in the application of these rules. This course would address return filing, statutes of limitations, and civil penalties; audit, deficiency assessments, and administrative appeals; litigation in U.S. Tax Court and U.S. District Court; and ethical considerations. This course would be relevant not only to students interested in litigation, but also to students with a transactional focus.
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D-).
Grading Basis: Letter Grade

LAWS 6179 (2) Trial Practice
Students apply the rules and doctrine of evidence in simulated trial settings. Must be taken with the corresponding section of Evidence. Satisfies the trial practice requirement and counts 2 hours toward the 14 credit hour maximum of clinical hours counted toward graduation.
Grading Basis: Letter Grade

LAWS 6201 (3-4) Agency, Partnership, and the LLC
Surveys agency law whose principles are important in many other areas of law. Studies the legal organizations commonly used by small businesses: partnerships and limited liability companies (LLCs).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6205 (3) Lawyers for Social Change
Helps students expand their perspective to understand the ways in which lawyers more broadly participate in social change work in this service learning class. Analyzes case histories of cause lawyering. The service learning component is based on the precept that one of the most effective ways to learn a role is to perform that role. Students will participate as social change lawyers by working with a local community to help it develop projects that the community believes will help it better itself.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public
LAWS 6206 (3) Litigation Drafting
Examines the intersection of civil procedure and legal writing. Emphasizes the drafting of persuasive adversarial litigation documents, including complaints, answers, motions in limine, motions to dismiss, motions of summary judgment, and jury instructions. Intensive writing and workshop format.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6207 (2) Writing in the Regulatory State
Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.
Grading Basis: Letter Grade

LAWS 6209 (4) Sustainable Community Development Clinic
Provide legal and policy advice, guidance and representation related to sustainable development with a focus on fostering social enterprise, healthy communities and poverty reduction.
Grading Basis: Letter Grade

LAWS 6210 (2-3) Comparative Law
Considers foreign solutions to certain key legal problems. Focuses on general problems of legal process, rather than on substantive rules. Topics include the role of lawyers, civil dispute resolution, criminal procedure and employment discrimination. Covers different legal systems in different years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6211 (3-4) Corporations
Covers formation of corporations and their management; relations among shareholders, officers and directors; the impact of federal legislation on directors’ duties; the special problems of closed corporations.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6213 (2) Advanced Appellate Advocacy
Advanced study and practice of written and oral appellate advocacy. Builds on the first-year advocacy course, but provides more advanced techniques for brief writing, and preparing for and conducting oral argument. Students are required to write an appellate brief and participate in several oral arguments, and receive detailed, one-on-one critiques of work product.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6217 (3) Estate and Gift Tax Planning
Explores structural and planning aspects of the current federal wealth transfer tax system, including the federal tax code provisions governing estate and gift taxation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7217 or ACCT 6720
Requisites: Requires prerequisite course of LAWS 6104.
Recommended: Prerequisite LAWS 6007.
Grading Basis: Letter Grade

LAWS 6220 (3) Introduction to Jewish/Israeli Law
Outlines the history and basic principles of Jewish Law, Halakhic system that encompasses Biblical law and the Rabbinic law. Covers Legal Sources of the Jewish laws, interpretation, legislation, custom, precedence and legal reasoning. Explores the study of modern legal system of the state of Israel and examines the problematic nature of the incorporation of the Law of personal status in the Rabbinical and in general courts.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6221 (3) Compliance
Covers requirements for corporate compliance programs and key components of them, including the role of audit committee, internal audit and ethics and compliance. Looks closely at different compliance regimes, including Sarbanes Oxley, the privacy and security components of the Health Insurance Portability and Accountability Act of 1996 (HIPAA), the evolution of other data privacy standards and the anti-corruption standards of the Foreign Corrupt Practices Act and the UK Bribery Act.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6223 (3) Research and Writing in the Regulatory State
Focus on developing in students the research, writing and analytical skills necessary to operate within any highly regulated field. Students will work broadly on research and writing skills required in a regulatory practice and narrowly on how that applies to particular areas of expertise, to gain an understanding of a particular area of the law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6226 (1-3) Advanced Legal Writing
Builds on skills learned in the first-year legal writing course to improve written legal analysis. Students will complete multiple written assignments and will receive individual feedback on their work. Sections vary significantly depending on the professor; please check the Legal Writing page of the Colorado Law website to read each professor’s course description.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6228 (1) Writing in Context
Provides the opportunity to improve legal writing and analytical skills in a particular field of law. This course will be offered in conjunction with a doctrinal course, and the writing assignments will be based on the law taught in the doctrinal course. Students enrolled in this course will need to be concurrently enrolled in the doctrinal course.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to 2L or 3L students only.
Grading Basis: Letter Grade
LAWS 6236 (2) Judicial Opinion Writing
Considers the contemporary American judicial opinion in historical and comparative context. Examines institutional constraints and emerging challenges to judicial decision-making. Analyzes individual opinion authors, writing styles. Builds upon the first-year legal-writing curriculum. Challenges students to develop a personal style and approach to writing and editing opinions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6246 (2) Introduction to United States Legal System/Legal Reasoning, Research and Writing
Introduces students without a law degree to the basic structure and content of the United States legal system, examining how the three branches of government at the state and federal levels make law and policy in the United States. The course will provide a basic introductory overview of the following: the various sources of law, including an understanding of how statutes are enacted by legislative institutions; the role of the United States court system in interpreting laws; application of judicial precedent in common-law systems; trial and appellate court procedures; and judicial review standards. The class will also introduce students to the methodology of American law, including legal reasoning, research, and writing, through a variety of in-class and outside research and writing assignments.
Grading Basis: Letter Grade

LAWS 6270 (1-2) Law and Mathematics
Covers basic mathematical concepts frequently encountered in the practice of law. Examines the relationships between evidence, calculation, and truth. Intended especially for students who lack confidence in their math skills and/or have not previously studied statistics, but all are welcome.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 6271 (1-2) Special Topics: Deals Lab
Provides an umbrella for several advanced business law sections, each providing an intensive intellectual experience for law students by requiring them to connect deep concepts and knowledge from basic business courses to complex transactional environments. Students are required to solve client problems and negotiate transactions in the face of intricate and conflicting legal regimes that sprawl across doctrinal fields.
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite LAWS 6211.
Grading Basis: Letter Grade

LAWS 6280 (1) Intensive Intro to Financial Info, Accounting and the Law: Accounting Boot Camp
Exposes students to the basics of financial accounting and when and how lawyers encounter accounting problems. Students will leave the course with an understanding of the basic framework of accounting, including the double-entry method, balance sheets, income statements, and statements of cash flows; time value of money; discount rates; basic methods of business valuation; and risk and diversification concepts.
Grading Basis: Letter Grade

LAWS 6281 (3) Accounting Issues for Lawyers
Studies accounting and auditing problems in the form they are placed before the lawyer, including a succinct study of basic bookkeeping, in-depth legal analysis of the major current problems of financial accounting, and consideration of the conduct of the financial affairs of business.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 6301 (3) Introduction to Intellectual Property Law
Provides an overview of our nation’s intellectual property laws, including patents, copyrights, trademarks and trade secrets. Discusses other matters related to intellectual property, including licensing, competition policy issues and remedies.
Equivalent - Duplicate Degree Credit Not Granted: TLEN 5245
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6302 (3) Water Resources
Analyzes regional and national water problems, including the legal methods by which surface and ground water supplies are allocated, managed and protected.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6308 (2) Law and Neuroscience
Covers neuroscience basics and explores the relationship between the law and recent neuroscientific discoveries in domains including pain, memory, lie detection, pscychopathy and criminal responsibility.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6311 (1) National Security and Privacy Law
Introduces national security and privacy law and relevant law, regulations, rules, policies, and guidelines.
Grading Basis: Letter Grade

LAWS 6315 (2) The Prosecutor's Role in the Criminal Justice System
Designed to familiarize students with the professional and ethical duties of the prosecutor in the criminal justice system, with the goal of encouraging students to think about the role that prosecutors play. While the focus of the materials and presentations will center on the Colorado criminal Justice system, the concepts and principles addressed translate to all state systems and the federal system. National trends and legislative policy decisions related to criminal law, and their potential impact on public safety and prosecution efforts will also be discussed.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Criminal

LAWS 6318 (3) Economic Analysis of Law
Introduces the basic elements of economic theory and emphasizes demand and utility, cost and optimality.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective
LAWS 6321 (2-3) Computer Crime
Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront as they respond to recent explosions in computer-related crime. Includes the Fourth Amendment in cyberspace, the law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal/state relations in enforcement of computer crime laws, and civil liberties online.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6328 (3) Financial Decision-Making
Applies concepts, ideas, insights and principles of modern finance to real-world situations that lawyers will face in many areas of law. Analyzes present discounted value (time value of money), risk versus return, asset diversification, portfolio theory, efficient markets hypothesis, arbitrage, financial options, real options, financial signals, human capital, behavioral finance, socially responsible investing, neurofinance, happiness finance and financial bubbles and crashes.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6331 (1) The Technology of Privacy
Explores the escalating debates by policymakers, scholars, advocates and industry representatives about the growing spread of tracking and surveillance in society. Debates are being spurred by the pace of changes to technology and particularly of changes to Internet and mobile technology. Practitioners in information privacy law or technology policy must understand the past, present, and likely future, of the technology of privacy.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 6338 (1) Understanding the Global Financial Crisis
Explores the causes and consequences of the global financial crisis. Analyzes financial instruments and institutions at the heart of the crisis -- including asset-backed securities, credit derivatives, government-sponsored entities, credit rating agencies, hedge funds, and financial conglomerates -- and places them in the context of a larger "shadow banking system". Examines the building blocks of financial reform.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6353 (3) Evidence
Studies the methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.
Grading Basis: Letter Grade

LAWS 6361 (2-3) Information Privacy and Cybersecurity
Explores the laws that regulate the basic technologies of the internet and the management of information in the digital age. It examines the most significant statutes, regulations and common law practices that comprise this emerging legal framework.
Grading Basis: Letter Grade

LAWS 6363 (5) Evidence and Trial Practice
Studies methods and forms of proof in litigation, including detailed consideration of hearsay, impeachment of witnesses, relevancy and certain restrictions on authentication and best evidence doctrines, and privileges. Applies rules and doctrine of evidence in simulated trial settings. Combined Evidence and Trial Practice course. Satisfies the trial practice requirement and counts two hours toward the 14 credit hour maximum in clinical hours.
Grading Basis: Letter Grade

LAWS 6373 (3) Federal Litigation: Everything but the Trial
Litigates through all pretrial phases as plaintiff's counsel, a mock federal case: an employee's challenge to compensation and termination, with possible claims including breach of contract, breach of the implied covenant of good faith and fair dealing, violation of wage payment statutory and regulatory requirements, and fraudulent inducement to contract.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Legislation and Procedure

LAWS 6383 (1) Applied Evidence
Provides the opportunity to improve the legal writing and analytical skills by practicing written analysis based on the law of Evidence. Professors Griffin and Bloom designed materials specifically for this course, which is designed to be taken concurrently with Professor Bloom's Evidence class. Student receive individual feedback on every exercise and assignment.
Requisites: Requires corequisite course of LAWS 6353.
Grading Basis: Letter Grade

LAWS 6400 (3) International Law
Examines the nature, structure and sources of international law, the relationship between international law and domestic U.S. law, the role of international organizations such as the United Nations, the methods of resolving international disputes, the bases of international jurisdiction, and select substantive areas of international law that may change from semester to semester.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6401 (1) Foreign Corrupt Practices, Anti-Bribery and Anti-Trafficking
Examines Foreign Corrupt Practices Act and similar legal regimes that target bribery and trafficking.
Grading Basis: Letter Grade

LAWS 6410 (3) International Trade Law
Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International
LAWS 6415 (2-3) Drug Product Liability Litigation: Principles and Practice
Explores product liability lawsuits and litigation. Explores law of product liability and the tools necessary to successfully litigate these cases. Considers the theory and practice of lawsuits now and after the Supreme Courts landmark decision in Wyeth v. Levine (2009). Focuses on similarities and differences between the special context of FDA regulation. Considers the legal principles governing such lawsuits such as inadequate warning, the Learned intermediary Doctrine and medical causation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business and Commercial Law

LAWS 6420 (1) Law and the Holocaust
Explores comparative law, jurisprudence, conflicts of laws and international law. Examines the Nazi philosophy of law emanating from its egregious racial ideology, and how it was used to pervert Germany's legal system to discriminate against, ostracize, dehumanize and eliminate certain classes of people. Studies the role of international law in rectifying the damage by bringing perpetrators to justice and constructing a legal system designed to prevent a repetition.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6430 (1-2) International Trade Litigation Lab
Examine international trade litigation as practiced in the U.S. This course will provide an overview of antidumping and countervailing duty law and regulations. Students will interpret and analyze case precedent and argue a hypothetical case in this area of law. Effects of trade cases on foreign governments and economies and on companies' business practices will be examined.
Requisites: Requires prerequisite of LAWS 6410 (minimum grade C-) or co-requisite of LAWS 6410.
Grading Basis: Letter Grade

LAWS 6458 (2) Creative Writing for Lawyers
Requires substantial writing and reading. Begins with participants bringing to class a piece of creative writing consisting of three to five thousand words. Each session consists of one hour of discussion and critique of an assigned writing exercise that everyone has prepared for the class, and one hour of workshop critique of each participant's longer work, in turn.
Grading Basis: Letter Grade

LAWS 6503 (3) Law and Social Sciences
Explores disparities in criminal sentencing and death penalty cases; quality and effectiveness of legal representation for indigent criminal defendants; relationship between modifications in traditional steps in legal process; connection between alternative tort doctrines and volume of litigation, trial rates, plaintiff success rates and award size; impact of congressional statutes and US Supreme Court decisions on handling and outcomes of habeas corpus petitions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6508 (1) The Philosophy of Law
Questions the nature of law, characteristics and considerations of a legal system, rights and from where they come; thinking like a lawyer, basic techniques of legal reasoning, difference between doctrinal and normative legal analysis. Explores law's frontier and what distinguishes law from morality or politics. Focuses on influential texts from the end of WWII to the end of the Cold War.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 6510 (2-3) International Environmental Law
Examines international environmental law, including transboundary impacts and global issues. Addresses such issues as intergenerational equities, principles of compensation, and if international environmental norms should receive special environmental norm consideration. A course in public international law is not a prerequisite, but students who have not taken such a course will probably find it useful to do some additional background reading. Offered in alternate years.
Grading Basis: Letter Grade

LAWS 6511 (3) Labor Law
Relates to labor unions and other collective aspects of employment, including the right of workers to form and join unions, to provoke collective bargaining and to strike and engage other forms of protest. Focuses on domestic law at the federal level and with a particular statute, the National Labor Relations Act, and the workings of particular agency, the National Labor Relations Board. Engages other sources of law, including constitutional law, as well as judicial decisions and other statutes.
Grading Basis: Letter Grade

LAWS 6513 (2) Crime Victims Rights and Victim Counseling and Advocacy
Involves highly experiential and participatory form of learning related to the rights and needs of victims of crime. Legal and constitutional aspects of crime victims' rights and advocacy are considered. Includes a training component by Moving to End Sexual Assault, a Boulder based organization. After training by MESA, students will complete 120 hours of volunteer service on the MESA hotline as well as attend various meetings.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6515 (3) International Trade Litigation Lab
Examine international trade litigation as practiced in the U.S. This course will provide an overview of antidumping and countervailing duty law and regulations. Students will interpret and analyze case precedent and argue a hypothetical case in this area of law. Effects of trade cases on foreign governments and economies and on companies' business practices will be examined.
Requisites: Requires prerequisite of LAWS 6410 (minimum grade C-) or co-requisite of LAWS 6410.
Grading Basis: Letter Grade

LAWS 6519 (2) Wildlife and the Law
Examines the law that protects wildlife, its habitat and biodiversity. Explores human-caused threats including habitat destruction, illegal trade and climate change. Focuses on statutes, case law, environmental ethics, and current controversies to highlight legal, scientific and political strategies for protecting biodiversity. Particular emphasis is placed on the U.S. Endangered Species Act.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian
LAWS 6518 (2-3) Introduction to Islamic Law & Jurisprudence
Develops student understanding of the internal working of Islamic law at its theoretical roots. Analyzes the various methodologies that are represented in Islamic legal literature, heling to enable the students to identify modern manifestations of these methodologies in contemporary Muslim discourses. Contextualizes the subject of Islamic law within various governmental and constitutional structures, beginning with the classical period, continuing through colonialism and reaching into the present day.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 6521 (3) Employment Law
Entails a survey of employment-at-will, workplace safety, workplace torts; ERISA and retirement, workers' compensation; controls on hours and wages; health insurance; disability and unemployment compensation.
Grading Basis: Letter Grade

LAWS 6525 (2-3) Elder Law
The counseling and legal representation of older persons and their representatives. Topics may include: legal aspects of health and long-term care planning, public benefits, surrogate decision making, legal capacity, the conservation, disposition, and administration of older persons' estates, the implementation of their decisions concerning such matters, and the broad ethical issues of representing clients in this field of practice.
Grading Basis: Letter Grade

LAWS 6528 (3) Capital Punishment in America
Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.
Grading Basis: Letter Grade

LAWS 6531 (3) Comparative Employment Law
In today's globalized world, lawyers are increasingly likely to encounter issues involving foreign employment. Provides substantive knowledge about foreign employment law and its relation to American law, as well as a comparative framework to assess the relative merits of the American approach to employment law.
Grading Basis: Letter Grade

LAWS 6532 (3) Foreign Employment Law
Introduces the study of international employment law, focusing on the legal frameworks in various countries. The course covers issues such as the rights of workers in different jurisdictions, the role of international organizations in labor relations, and the impact of globalization on employment law.
Grading Basis: Letter Grade

LAWS 6534 (3) Global Law & Global Governance
Addresses contemporary theories of globalization. We will explore questions such as: What is globalization, and in particular, what is the globalization of law? What is the extent of legal globalization, and how can we know? Are global law and global governance good things? How are these categories any different from what has traditionally been called "international law"? Our search for answers will be guided by a selection of recent books from theorists of globalization and global governance, such as David Held, Immanuel Wallerstein, and David Kennedy.
Grading Basis: Letter Grade

LAWS 6541 (2) Colorado Worker's Compensation Theory and Practice
Introduces the legal theories that underlie the no-fault compensation system, its historical evolution, policy conundrums and ethical quandaries. Teaches the application of the procedural rules most frequently utilized in administrative setting. Studies the Workers' Compensation Act, the Workers' Compensation Rules of Procedure and the Office of Administrative Courts Rules of Procedure.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6551 (3) Employee Benefits and Compensation Law
Examines past and present employee benefits and compensation practices among private and public employers. Covers ERISA and defined benefit, defined contribution, and welfare benefit plans; equity awards granted by corporations; equity awards granted by LLCs and partnerships; nonqualified deferred compensation and Section 409A of the Internal Revenue Code; golden parachutes and Sections 280G and 4999 of the Internal Revenue Code.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6552 (2-3) Disability Rights
Explores the theories of disability, including whether disability is the product of society/social construction or medicine. The course will then explore some of the major federal protections for disability, including the Americans with Disabilities Act, which prohibits discrimination in employment and public accommodations, and the Individuals with Disabilities in Education Act.
Grading Basis: Letter Grade

LAWS 6555 (2-3) Disability Rights
Explores the theories of disability, including whether disability is the product of society/social construction or medicine. The course will then explore some of the major federal protections for disability, including the Americans with Disabilities Act, which prohibits discrimination in employment and public accommodations, and the Individuals with Disabilities in Education Act.
Grading Basis: Letter Grade

LAWS 6601 (3) Corporate Transactions in Latin America
Introduces students to an overview of Latin American commercial and civil law systems, looking closely at Napoleonic and Chilean law. Explores the choice legal structures available for Latin American corporations; contract law that regulates business transactions in Latin America; and exploration of the way in which Latin American countries have joined international business trade agreements that pertain to Latin American nations such as the Vienna Convention and Gatt.
Grading Basis: Letter Grade

LAWS 6602 (3) Cultural Property Law
Concerns domestic and International regulation of property that expresses group identity and experience. Organized around traditional categories of property (real, personal and intellectual), covers historic preservation, archeological resources, art and museum law, with attention to indigenous people's advocacy on burial sites, traditional lands, ceremonies, music, symbols, ethnobotany, genetic information and language. May satisfy upper-level writing requirement.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 6702 (1) Climate Justice
Introduces the field of climate justice and seeks to identify legal and policy tools for advancing fair outcomes in climate change decision making. Climate justice is concerned with the intersection of race and/or indignity, poverty, and climate change.
Grading Basis: Letter Grade
LAWS 6708 (1-3) Special Topics
Explores special topics in law.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6712 (3) Climate Change Law and Policy
Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in Massachusetts v. EPA, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes and the aftermath in the courts, Executive Branch and Congress.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6722 (3) Energy Law and Regulation
Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments and the key federal statutes and regulatory regimes governing natural gas, electricity and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail competition.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6732 (3) Renewable Energy Project Finance and Development
Examines renewable energy and how legal topics impact financing projects. Reviews structure, regulation, and functioning of electric energy industry and laws applicable to development, ownership and operation of renewable energy projects across technologies. Addresses legal policy, economic and financing issues associated with expansion and improvement of the transmission grid to support renewable energy development.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6801 (1) Anti-money Laundering Law
Explores domestic and foreign laws against money laundering, including know your customer and bank secrecy rules.
Grading Basis: Letter Grade

LAWS 6803 (2) Quantitative Methods
Equips students to deal effectively with experts, whether as consultants or as adverse witnesses, and to enable the identification of a quantitative issue. Helps students to become multi-dimensional in quantitative literacy. Enables students to be comfortable reading statistical arguments, performing basic analyses, writing about statistics, expressing quantitative ideas in graphs, questioning an expert, and understanding the power of computer programming.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 6808 (1) LILAC Symposium Course: Leadership in Law and Community
Addresses issues in law, community, and leadership, explored through multiple pedagogies in teaching and learning, in a symposium-style setting. After introductory classes on the theme of leadership in law and community, and related topics of professional responsibility and personal identity, social change, creative lawyering, the course will turn to spring service projects in law and community.
Repeatable: Repeatable for up to 4.00 total credit hours.
Grading Basis: Pass/Fail

LAWS 6812 (3) Climate Change Law and Policy
Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions and key issues in policy design. Reviews the Supreme Court's April 2, 2007, decision in Massachusetts v. EPA, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes and the aftermath in the courts, Executive Branch and Congress.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 6816 (1-2) Problem-Solving and Writing
Enhances students' ability to solve problems and writing concise coherent memos to clients or other legal documents outlining their legal analysis and strategic thinking. Uses diagnostic exams in which students are given multiple documents for fact patterns to begin their analysis.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6823 (1-2) Legal Reasoning
This course of seven 100-minute classes aims to present legal reasoning skills crucial to the crafting and criticism of legal arguments. The classes will cover seven topics: rules and standards, the art of the legal distinction, dealing with legal contradictions, facts and framing, level of abstraction, baselines, and legal interpretation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 6826 (2) Interactive Programming for Lawyers
Teaches students how to develop simple computer applications that would help in the practice of law and the delivery of legal services, using a drag-n-drop application development platform. Students will learn programming logic and principles of user-centric design. No programming experience is required. Includes substantial legal research and analysis.
Grading Basis: Pass/Fail

LAWS 6836 (1) Special Topics in Legal Research
Builds upon first-year legal research problem solving skills by exposing students to the nuances of research topics in a specialized topic and tracking related doctrinal classes, e.g., environmental and natural resources law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing
LAWS 6856 (2-3) Advanced Legal Research
Offers an in-depth look at research resources and methods. Includes sources from the judicial, legislative, and executive branches of federal and state government; research in topical areas such as environmental law, taxation, and international law; and extensive coverage of secondary and nonlaw resources. Covers both print and electronic sources. Students will have several assignments and a final project.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6866 (1) Colorado Legal Research
Surveys resources and methods to effectively research Colorado law. Covers primary and secondary resources including Colorado statutes, cases and digests, regulations, and constitution and practice materials. Covers how to research Colorado municipal law and other Colorado topics.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6876 (2) Legal Research Skills for Practice
Focuses on preparing students to research in a transactional law legal practice. Students will learn how to research in transactional law subject areas using practitioner-focused research platforms, including Westlaw Practical Law, Lexis Practice Advisor, and Bloomberg Law. Students will also learn how to research corporate and industry data, property records and dockets as well as acquire other competencies and skills helpful for researching in a transactional law practice.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6886 (3) Advanced Legal Research and Analysis
Develops students' ability to think critically about and solve current legal problems. Evaluates the benefits and detriments of both print and on-line legal resources, and how to create an efficient research plan. Formulates and applies research strategies to real-world legal problems, and uses legal analysis to refine and improve research results. Note: students who have taken LAWS 6856 may not enroll in this course.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 6896 (3) Advanced Legal Research and Writing for Practice
Advances and improves legal research and writing skills learned in first year. Proposes variety of assignment types across substantive and procedural areas to prepare for experiences as summer associates or new attorneys.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 7003 (3) Federal Courts
Looks at structure and jurisdiction of the federal courts, emphasizing problems of federalism and separation of powers and their relationship to resolution of substantive disputes.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7004 (3) Advanced Deals Lab: Real Estate Transactions
Using documents from actual real estate transactions, this course will focus on the drafting and negotiation skills required for the successful practice of real estate transaction law. Students will negotiate and draft actual real estate transactional documents.
Requisites: Requires prerequisite course of LAWS 6004 (minimum grade D).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 7005 (3) Internet and Media Law
Provides a survey of common, statutory, and regulatory law as applied to the media, including the internet. Topics include: the law as it affects the gathering of news; publisher liability online and offline; First Amendment issues; and related regulation of the internet and computer technologies.
Grading Basis: Letter Grade

LAWS 7011 (3) Creditors' Remedies and Debtors' Protections
Examines typical state rights and procedures for the enforcement of claims and federal and state law limitations providing protection to debtors in the process. Includes prejudgment remedies, statutory and equitable remedies, fraudulent conveyance principles and exemptions and other judicial protections afforded debtors.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7013 (2) Supreme Court Decision Making
Students deliberate over several important cases as "Justices" of the Supreme Court. Class is divided into three "Courts" with the first hour spent in deliberation and the second hour in discussion of the deliberative process as well as the substantive issues.
Grading Basis: Letter Grade

LAWS 7015 (3) First Amendment
Examines speech and religion clauses of the First Amendment. Includes the philosophical foundation of free expression, analytical problems in First Amendment jurisprudence and the relationships between free exercise of religion and the separation of church and state.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7019 (1-3) Advanced Clinical Practicum
Enables a clinical student an optional 1-3 credits to complete advanced legal work in the Clinical Education Program. Course must follow enrollment in an existing clinical offering already successfully completed. Permission of the appropriate clinical faculty member required. For each credit taken, a clinical student must complete a minimum of 50 hours of legal work, all of which shall be graded pass/graded. A clinical student may complete 1-3 credits of work over the course of no more than two semesters. A clinical student may earn no more than 3 credits total over the student’s law school career.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation
LAWS 7021 (3-4) Bankruptcy
Bankruptcy is the field of law that governs economic failure, and oftentimes, economic revival. The course includes both consumer and corporate bankruptcy, and for each of these areas, we will learn liquidation, and reorganization. Students will gain a strong understanding of Chapters 7, 11 and 13 of the Bankruptcy Code.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7023 (2) Jury Selection and History
Studies the history of the jury from ancient times through the implications of Apprendi, the grand jury from the time of Henry II through modern federal practice, and current jury selection procedures, both federal and Colorado, both civil and criminal. Experienced trial attorneys will work with students to demonstrate jury selection.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7024 (2-3) Real Estate Planning
Considers various contemporary legal problems involved in the ownership, use, development, and operation of real estate, with particular emphasis on the federal income tax aspects of these issues. Topics may include sales, leases, and loans; choice of entity; leveraged partnerships; tax credit financing, foreign and tax-exempt investors; and real estate investment trusts.
Requisites: Requires prerequisite or corequisite course of LAWS 6007 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 7025 (3) Civil Rights
Presents a comprehensive study of federal civil rights statutes briefly reviewed in other courses (e.g., Constitutional Law or Federal Courts). Studies federal civil rights statutes, their judicial application, and their interrelationships as a discrete and significant body of law of increasing theoretical and practical importance.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7029 (3) Appellate Advocacy Practicum
Offers the opportunity to represent parties in federal and state civil appeals. Students draft opening briefs in the fall semester, and draft reply briefs and appear for oral argument in the spring. Prior appellate advocacy experience will be helpful. Enrollment is limited to six students.
Repeatable: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7031 (3) Regulation of Financial Institutions
Focuses on the core banking law and works outward to cover a broader spectrum of bank-like financial institutions. Covers bank licensing, restrictions on bank business, regulating safety and soundness of banks, consumer protection of depositors and other bank customers and regulatory examination and enforcement.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7045 (3) Criminal Procedure: Adjudicative Process
Focuses primarily on criminal procedure at and after trial. Looks at bail, prosecutorial discretion, discovery, plea bargaining, speedy trial, jury trial, the right to counsel at trial, double jeopardy, appeal and federal habeas corpus.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7051 (1-3) Transactional Drafting
Focuses on principles of contemporary transactional drafting. Skills gained will be applicable to transactional practice and will also be useful to litigators. Students will learn to translate, draft and review contracts, as well as how to add value to deals.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7055 (3) Education Law
Considers issues raised by the interaction of law and education. Issues may include the legitimacy of compulsory schooling, alternatives to public schools, socialization and discipline in the schools and questions of equal educational opportunities.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7058 (3) Conflict of Laws
Grading Basis: Letter Grade

LAWS 7061 (1) Contract Drafting
Begins with value creation by transactional lawyers and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps, and warranties, capitalized terms, definitions, indemnifications and escrow).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Business

LAWS 7065 (3-4) Immigration and Citizenship Law
Covers legal issues pertaining to noncitizens of the United States, especially their right to enter and remain as immigrants and nonimmigrants. Topics include admission and exclusion, deportation, and refugees and political asylum. Approaches topics from various perspectives, including constitutional law, statutory interpretation, planning, ethics, history and policy.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7071 (2-3) Advanced Transactional Drafting
Provides students with the opportunity to further develop skills gained in LAWS 7051 and put them to use in simulations and business contexts across various areas of practice. Students will be asked to draft industry specific contract provisions, review existing contracts, counsel and negotiate on behalf of clients and work through ethical dilemmas encountered by transactional attorneys.
Requisites: Requires a prerequisite course of LAWS 7051 (minimum grade D-).
Grading Basis: Letter Grade
LAWS 7079 (2-3) Wrongful Convictions
Focuses on the issues and remedies in cases of people who have been convicted, whose traditional appellate remedies have been exhausted, and who continue to claim actual innocence. Preference given to those who have taken or are taking more criminal procedure courses.

Grading Basis: Letter Grade

LAWS 7085 (2) Law and Religion
Uses judicial decisions as well as historical and theoretical materials to explore significant aspects of the relationship between law and religion. The religion clauses of the First Amendment are a central but not exclusive subject of study. Offered in alternate years.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7095 (2) Women in Law
Explores the role of women in the legal system by looking at women as parties, jurors, witnesses, lawyers, law professors, and judges. Explores the relationship of law and society to women as victims and offenders. Investigates law and society’s response to adoption, lesbian/gay issues, rape, surrogate and bad mothers, and sexual harassment.

Grading Basis: Letter Grade

LAWS 7100 (2-3) International Criminal Law: Theory and Practice
Exposes students to the rapidly growing body of jurisprudence, both international and national, wherein international humanitarian and human rights law are being applied for the purposes of prosecution, trial and punishment of individuals alleged to be responsible for the commission of war crimes, crimes against humanity, genocide and, more recently, terrorism.

Requisites: Requires prerequisite course of LAWS 6400 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7101 (4) Deals: Engineering Financial Transactions
Explores the business lawyer’s role in creating value by helping clients identify, assess and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7102 (2-3) Oil and Gas
Deals with the legal problems associated with private arrangements for the ownership and development of oil and gas: deeds and leases to oil and gas rights, trespass, adverse possession, implied covenants in leases, conveyances of fractional interests, and the interaction of private rights and conservation regulation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7103 (2-3) Ethics and Compliance Capstone
Integrates skills and knowledge from the introductory compliance course and other courses in law school compliance curriculum as students develop a compliance program for an institution.

Requisites: Requires prerequisite course of LAWS 6221 (minimum grade D).

Grading Basis: Letter Grade

LAWS 7105 (3) Family Law
Focuses on nature of marriage, actions for annulment and divorce, problems of alimony and property division, separation agreements, and custody of children. Also considers illegitimacy, abortion, contraception, the status of married women in common law and under modern statutes and relations of parent and child.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7106 (1-2) Moot Court Competition
Offers an intensive involvement in legal research, appellate brief writing and oral arguments in a competitive context. Student finalists may continue involvement in regional and national competitions.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Pass/Fail

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7111 (3) Contract Theory: Collisions of Contracting and Culture
Explores various contract theories and principles emanating from classical and neoclassical law, legal realism, law and economics, critical legal studies, law and society, relational theory, and others. Considers and critiques these theories as applied to particular contracting cultures, especially as applied to construction contracts.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7115 (3) Juvenile Justice
Covers a wide array of issues dealing with the legal rights of the unborn, children and juveniles. Covers the legal status of parent-child abuse, delinquency and crime, and emancipation.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7116 (1) Barristers Council
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Pass/Fail

LAWS 7121 (3) Advanced Contracts: Commercial Transactions
Studies Article 2 and Article 2A of the Uniform Commercial Code, together with the Convention and the International Sale of Goods. Advanced contracts topics are explored in depth. Among other subjects, warranties, title, remedies and risk of loss in the sale of goods will be studied.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7122 (2-3) Mining and Mineral Development Law
Addresses major issues affecting the development of mineral resources in the western United States. Includes the regulation of the impacts of hardrock and coal mining and oil and gas development on the environment under federal and state laws. Covers the Mining Law of 1872, the Mineral Leasing Act, 'split estates,' and state regulation of mineral development.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian
LAWS 7125 (2) Advanced Domestic Relations
Offers advanced study of several domestic relations subjects, including both theoretical and lawyering issues. Tentative subjects include discovery, client interviewing and deposition preparation, asset valuation, working with expert witnesses, children as clients, and alternative dispute resolution.
Recommended: Prerequisite LAWS 7105.
Grading Basis: Letter Grade

LAWS 7126 (1-2) Transactional Competition
Covers a broad array of topics, including, but far from limited to, contract negotiation, health law, mergers and acquisitions, and client counseling. A valuable opportunity for students to gain experience outside the classroom and develop tactics for interacting with clients, negotiation, techniques, and transactional drafting skills. Provides great opportunities for networking. A division of Barristers’ Council.
Repeatable: Repeatable for up to 6.00 total credit hours.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7128 (2-4) Jurisprudence
Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 8128
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 7132 (3) Energy, Insecurity, Sustainable Law
Examines why national security deals not only with armed aggression and the ability to thwart military invasions or subversion, but also includes critical threats to vital national and international support systems such as the economy, energy and the environment.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7135 (3) Parent, Child, and State
Examines the legal rights of parents and children in a constitutional framework, as well as the state’s authority to define and regulate the parent-child relationship. Addresses rights of parents and children to freedom of expression and religious exercise, termination of parental rights and adoption, paternity orientation and culture in defining the family.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7138 (3) Legal Philosophy
Grading Basis: Letter Grade

LAWS 7145 (3) Comparative Family Law
Examines and critiques law, legal institutions and traditions of the country of focus and the US as they affect children, families, and work. Enhances research and writing skills, including field and international research. Contributes to host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7154 (3) Land Use Planning
Explores mechanisms for public control of private land uses, such as planning, zonin, and regulation of land development; including consideration of federal and state constitutional and statutory limitations on local governments. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 7159 (2) Advanced Trial Advocacy
Offers an advanced course covering trial practice elements. Open only to students who have taken LAWS 6109.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7164 (2) Land Conservation Law
Focuses on private land conservation efforts in the United States, and particularly Colorado, also considers public land conservation programs. Analyzes real property principles and instruments used to protect land, and the development and acceptance of conservation easements in gross as a mechanism for protection, financing mechanisms for land conservation, including direct government funding and indirect funding through tax incentives at the federal, state and local levels. Understanding of Real Property and Tax concepts helpful.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 7169 (2) Motions Advocacy
Provides practical training in preparing and arguing pretrial, post-trial and chambers motions to an experienced federal judge based on materials from actual case files. Assigns some research papers. Limited to students with interest in trial advocacy and willingness to participate in confrontational exercises.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7200 (3) Anthropology of Law
Reviews the relationship between the social and cultural features of both developed and developing country societies and the formal and informal legal institutions within them. Considers the nature of social control and constraint, judicial reasoning, fact finding, conciliation, mediation and arbitration, and legal discourse.
Grading Basis: Letter Grade
LAWS 7201 (3) Antitrust
Studies American competition policy: collaborations among competitors, including agreements on price and boycotts, definition of agreement, monopolization, vertical restraints such as resale price maintenance and territorial confinement of dealers. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7202 (3) Environmental Law
Examines and analyzes important federal pollution control statutes, including the National Environmental Policy Act, the Clean Air Act and Clean Water Act, Solid Waste Act, and Superfund. Considers related economic theory, ethics and policy issues.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7205 (3) Administrative Law
Covers practices and procedures of administrative agencies and limitations thereon, including the Federal Administrative Procedure Act, and the relationship between courts and agencies.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7207 (3) Federal Estate and Gift Tax
Analyzes the federal estate and gift taxation of inter vivos and testamentary transfers, introduces the federal income taxation of estates and trusts, and explores elementary estate planning. Students may receive credit for this course and either Estate Planning (LAWS 7217) or Estate and Gift Tax Planning (LAWS 6217), but not for both LAWS 7217 and LAWS 6217.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6710
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7209 (4) Natural Resources and Environmental Law Clinic
Offers hands-on experience in the practice of natural resources law in the Rocky Mountain region to a select number of clinic students. The clinic's docket of active cases focuses on public land law and the environmental statutes protecting those lands and their resources. Students participate in projects that test the full range of lawyering skills, including traditional litigation, administrative advocacy, legislative drafting, and the conduct of complex negotiations and settlements.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7211 (3) Business Planning
Focuses on the development and use of concepts derived from a number of legal areas in the context of business planning and counseling. Topics such as formation of business entities, sale of a business, recapitalization, division, reorganization and dissolution are considered.
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D).
Recommended: Prerequisite or corequisite LAWS 6201 or LAWS 6211.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7212 (2) Environmental Litigation
Examines the litigation strategies and procedures used to enforce and defend against enforcement under environmental protection statutes, such as the Clean Water Act, Clean Air Act, Resource Conversation and Recovery Act, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, and the Toxic Substances Control Act. Covers civil enforcement, and citizen's suits.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7217 (2) Estate Planning
Deals with the practical application of estate planning principles to various client situations, including certain federal wealth transfer taxation issues. Students may not receive credit for both Estate Planning (LAWS 7217) and Estate and Gift Tax Planning (LAWS 6217).
Requisites: Requires prerequisite course of LAWS 7207 (minimum grade D).
Recommended: Prerequisites LAWS 6007 and LAWS 6104.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7218 (2-3) Legal History
Grading Basis: Letter Grade

LAWS 7221 (2-3) Government Regulation of Business
Covers themes that explore the nature of the regulatory state and the realities of how businesses react to regulation. Provides an understanding of regulatory institutions; the tools of governmental regulation; a critical perspective on regulation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7222 (2-3) Environmental Decision-Making
Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.
Equivalent - Duplicate Degree Credit Not Granted: ENVS 6222
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7228 (2) Intellectual Origins of the Constitution
Examines the views of the Constitution's framers as expressed in contemporaneous and antecedent writings and debates. Offered in alternate years.
Grading Basis: Letter Grade

LAWS 7232 (3) Global Energy Justice
Establishes why nearly a third of the world populated by the energy oppressed poor, presents a major national and international "legislative" or socio political problem calling for answers from governments and civil societies in the developed and developing world. Explains and elucidates the concept of energy justice, its jurisprudential heritage and its meaning and relevance in contemporary society. Case studies present problem solving frameworks spanning the political, social, behavioral, engineering, natural sciences and law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian
LAWS 7241 (3) Telecommunications Law and Policy
Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular and other wireless systems and the Internet.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5410
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7242 (3) Environmental Justice and Law
Examines issues of unequal environmental protection across various contexts, including air and water pollution, siting of toxic and hazardous waste, noxious land uses, and access to environmental goods such as public lands. The course will explore the role that U.S. law has played in constructing the unequal distribution of environmental harms and benefits. It will then examine efforts within the U.S. to use law and other tactics to redress environmental injustice.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 7248 (3) History of Criminal Justice
Explores the social, cultural, and legal history of Anglo-American criminal justice from the 17th to the 20th centuries. Also examines tensions between various methods that historians employ to study crime and law.
Grading Basis: Letter Grade

LAWS 7251 (3) Non-Profit Law
Examines the legal and policy issues raised by non-profits. Topics may include the formation of a non-profit, qualification for federal tax exemption, the rise and role of private foundations, fiduciary duty issues, restrictions on political activity and private benefit, and the unrelated business income tax. Also focuses on broader social questions raised by giving, charities, and philanthropy.
Grading Basis: Letter Grade

LAWS 7255 (3) Local Government
Studies state legislative and judicial control of the activities, powers and duties of local governmental units, including home-rule cities and counties, and some problems of federal, state, and local constitutional and statutory limitations on governmental powers when exercised by local governmental units (e.g., the powers to regulate private activities, tax, spend, borrow money and condemn private property for public uses). Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Affairs

LAWS 7261 (3) Corporate Finance
Examines a variety of important legal issues related to the funding and financing corporations including creditor protection laws, the Trust Indenture Act of 1939, fiduciary duties, bond indenture provisions, securities laws and rights of equity holders. Covers efficient capitalization structures, corporated valuation techniques, capital markets and the efficient market theory and cost of capital concept.
Requisites: Requires prerequisite course of LAWS 6211 or LAWS 6251 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7271 (3) Venture Capital and Private Equity
Provides overview of the legal and financial principles to represent privately held companies, their founders and managers and their investors. Emphasizes transaction structuring rather than judicial opinions. Includes the organization and financing of start-ups, structuring buyout transactions, exit strategies, legal organization of investment funds and other financial intermediaries. Discusses the relevant regulatory landscape, including securities law, bankruptcy, ERISA and tax law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7285 (2-3) Marshall-Brennan Constitutional Literacy Project
Teaches students how to educate high school students in the local Denver Metro area high schools about the constitution, public speaking, and logical reasoning. Interested students must apply and requires a commitment teaching once per week in a local high school. Encourages individual development as teachers, writers, and critical thinkers and provides an opportunity to grow as colleagues and teammates.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail

LAWS 7300 (2-3) International Litigation
Examines the special issues that arise in litigation in U.S. courts when one or more of the parties is a foreign individual, corporation, or government, or when the subject of the litigation concerns events occurring wholly or partly outside of this country. Includes personal jurisdiction over foreign defendants, extraterritorial service of process and evidence gathering, choice of forum, foreign sovereign immunity, the act of state doctrine, extraterritorial application of U.S. law, and recognition of enforcement of foreign judgments.
Grading Basis: Letter Grade

LAWS 7301 (2-3) Copyright
Examines state and federal laws relating to the protection of works of authorship ranging from traditional works to computer programs. Studies the 1976 Copyright Act as well as relevant earlier acts. Gives attention to state laws, such as interference with contractual relations, the right of publicity, moral right, protection of ideas and misappropriation of trade values, that supplement federal copyright.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7302 (2) Advanced Oil and Gas
Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environment regulation, and the interplay between federal, state and local regulation.
Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7303 (3) Complex Civil Litigation
Covers civil procedure in modern complex multiparty suits, including class actions in such settings as employment discrimination and mass torts, and problems in discovery, joinder, res judicata, collateral estoppel and judicial management in such suits. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure
LAWS 7307 (3) Taxation of Natural Resources
Considers the federal income tax aspects applicable to the exploration, development of, and the operation of natural resources, as well as the financing thereof. Also considers oil and gas, hard minerals, timber, and water.

Recommended: Prerequisite LAWS 6007.
Grading Basis: Letter Grade

LAWS 7309 (2-4) American Indian Law Clinic
Offers a clinical education course involving participation in the representation and advocacy of Indian causes – land or water claims, Indian religious freedom, job or other discrimination based on race and issues implicating tribal sovereignty.

Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7310 (3) International Dispute Settlement
Examines various mechanisms for the settlement of international disputes. Includes negotiation, inquiry, mediation, conciliation, arbitration, and adjudication. Focuses on intergovernmental dispute resolution.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7311 (2-3) Patent Law
Covers selected topics, such as patentable subject matter, patentability and utilization of patent rights through licensing and infringement litigation. Covers practice and procedure of the patent and trademark office.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7312 (2) Advanced Water Law
Builds on the study of basic water law principles for those interested in practicing in this field. Explores in more detail the highly developed legal and administrative system of water law in Colorado and other states, including the use of special courts to adjudicate the existence of water rights and approve changes of use.

Requisites: Requires prerequisite course of LAWS 6302 (minimum grade D-).
Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7315 (3) Criminal Justice Policy and Practice
Focuses on policy and practice issues rather than case law. Examines how American criminal justice is (and has been) dispensed in the vast majority of cases that never reach trial. Devotes attention to systemic issues rather than case-specific problems. Studies policy behavior, prosecutorial charging and bargaining discretion, the provision of defense services, bail and preventive detention, plea negotiation, and sentencing—aspects of the criminal process that affect huge volumes of cases and require thought in global terms.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Criminal

LAWS 7318 (3) Economics of the American Legal System
Explores the economics of the American legal system. Topics include the cost of producing lawyers, the market for legal services, the practical challenges of running small and large law firms and the government’s role in making legal services available.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 7320 (3) International Criminal Law
Surveys international human rights law and international crime and punishment. Addresses ideas of rights from a historical, philosophical, conceptual and analytical perspective; explores the “Primary rules of conduct” as well as adjudication and remedies, and selected rights from a comparative perspective.

Recommended: Prerequisite LAWS 6400.
Grading Basis: Letter Grade

Additional Information: Departmental Category: International

LAWS 7321 (1-2) Patent Drafting and Prosecution
Covers transactions, and often high-tech deals involving intellectual property rights. Studies IP ownership; assignment or rights; commercialization transactions (licensing, distribution, strategic); antitrust; emerging issues. Gives students essential tools to draft and analyze technology contracts.

Requisites: Requires prerequisite course of LAWS 6301 or 7301 (minimum grade D-).
Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7322 (1) Field Trip of Upper Colorado River Basin for Advanced Water
Spend a week out in the basin meeting and talking with key leaders directly involved in Colorado River Basin water matters, visiting major water projects such as storage facilities and observing their operations, visiting major water users such as irrigation districts and cities, visiting and talking with tribal leaders and touring projects aimed at recovering populations of endangered fish.

Requisites: Requires corequisite course of LAWS 7312.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7323 (2-3) Patent Litigation
Focuses on unique aspects of patent litigation: substantive patent law, civil procedure, federal jurisdiction and litigation strategy; includes claim construction, infringement, anticipation and obviousness defenses, unenforceability challenges, declaratory judgments, injunctions, damages, settlements, licenses and trial strategy. Of interest and useful to those interested in intellectual property generally, not just patents or in litigation.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7325 (3) Election Law
Examines the rapidly evolving field of election law: the right to vote, voting procedures, redistricting, candidate selection, campaign finance laws and direct democracy. Emphasizes federal law, including applicable constitutional jurisprudence.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public

LAWS 7331 (2) Sports Law
Covers the application of rules from agency, antitrust, contracts, constitutional law (including sex discrimination), labor law, property, torts, unincorporated associations and other subjects to those persons involved in the production and delivery of athletic competition to consumers. Explores the development of the application of these rules to a sports setting and related economic issues.

Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Business
LAWS 7333 (2) Advanced Evidence: Forensic Science and the Criminal Courts
Explores the admissibility of forensic science opinion and expert testimony, its use as evidence at a trial, and the challenges that such evidence may pose for the courts and the entire criminal justice system in the future.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7335 (1) The Law of Presidential Elections
Examines the laws and regulations that uniquely shape presidential selection, analyzing practical applications as well as the broader constitutional and policy considerations. A combination of federal, state, and local laws shapes how Americans select their president. But more than ever before, Americans are questioning the rules that influence presidential selection, such as the major party primary system, ballot access, presidential campaign financing, and the electoral college.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Law

LAWS 7341 (3) Trademark and Unfair Competition Law
Examines trademark protection, the interaction of trademark and unfair competition law with other intellectual property doctrines, the requirements for acquiring and retaining federal trademark rights, false advertising and other misrepresentations, the right of publicity and related claims, remedies for infringement, and international aspects of trademark protection.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7343 (2) Technical & Engineering Knowledge in Litigation
Teaches law students and engineering students to work with each other in varied legal disputes implicating technical matters (accidents, trade secrets, pollution, etc.), covering expert witness law and practice, use of empirical methods in litigation, and more broadly the roles of lawyers and of engineers in such disputes. Experiential learning-based assignments may include initial investigations, witness testimony, and legal writings that include engineers’ expert witness reports and lawyers’ complaints and motions.
Grading Basis: Letter Grade

LAWS 7345 (2) Comparative Criminal Procedure
Takes an in-depth look at some of the basic features of modern criminal justice systems that share the civil law tradition with the hope that such study will provide a vehicle for a deeper understanding of the strengths and weaknesses of the American system of criminal justice.
Requisites: Requires prerequisite course of LAWS 6045 (minimum grade D-).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 7350 (2-3) Analytical Strategies
Develops analytical, writing and problem-solving skills necessary to pass the bar exam and succeed in practice. Designed for third-year law students in their final semester. Students will improve their techniques for analyzing, organizing and writing responses to essay and performance test questions through frequent written exercises and individual feedback on those exercises.
Grading Basis: Letter Grade

LAWS 7361 (2) Cybersecurity
Introduces students to the laws that regulate the basic technologies of the Internet and the management of information in the digital age. It examines the most significant statutes, regulations, and common law principles that comprise this emerging legal framework, including the Federal Wiretap Act, the HIPAA Privacy Rule, and the Digital Millennium Copyright Act.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7365 (2) Comp Constitutional Law
Grading Basis: Letter Grade

LAWS 7371 (3) Standardization and Standards Wars
Examines current issues in the standardization of telecommunications and information technologies. Covers the importance of standards, government and private sector perspectives and the impact of information age technologies on standards of development. Emphasizes key national and international organizations.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 7373 (3) U.S. Races and Justice Systems
Examines the unique but related legal, social, and economic problems and accomplishments of those persons in this country whose ancestry originated in Africa, Asia, Latin America, or North America, and explores the developing literature on whites and whiteness.
Grading Basis: Letter Grade

LAWS 7375 (3) U.S. Races and Justice Systems
Examines the unique but related legal, social, and economic problems and accomplishments of those persons in this country whose ancestry originated in Africa, Asia, Latin America, or North America, and explores the developing literature on whites and whiteness.
Grading Basis: Letter Grade

LAWS 7381 (3) Intellectual Property Counseling and Licensing
Introduces strategic development and procurement of IP, including patents, trademarks, copyrights, and trade secrets. Evaluates the latest cases and legal trends from a practical and strategic perspective. Focuses on widely accepted best practices and critical thinking in these areas.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property, Technology Telecomm

LAWS 7401 (3) Securities Regulation
Stresses statutory interpretation of the various federal statutes regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7402 (2) The Law of Toxic and Hazardous Wastes
Examines the EPA's federal hazardous waste statutes, including the Resource Conservation and Recovery Act of 1976 (RCRA), and the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). Analyzes the RCRA "Cradle-to-grave" hazardous waste program and addresses the evolving CERCLA liability scheme and cleanup process.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian
LAWS 7405 (2-3) Health Law 2: Medical Malpractice and Quality Regulation
Explores (1) the law controlling ethical issues that arise during the delivery of medical care, (2) the substantive law of medical malpractice and tort reform aimed at reducing the frequency and severity of medical malpractice verdicts, and (3) the practical aspects of litigating a medical malpractice case. Cross-listed at the Health Sciences Center; will include field trips there.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7406 (1) International Moot Court Competition
Open only to students who actively participate in the seminar preparing for the competition, in the preparation of memorials for the competition, and in the practice of oral arguments or regional oral arguments.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7407 (1-3) Tax Policy
Explores current issues in tax policy. Topics may include the tax legislative process, consumption taxes, taxes and distributive justice, the tax exemption for nonprofits, carbon taxes, corporate taxes and integration, and taxes and entrepreneurship. There are no required prerequisites, but Federal Income Tax will be helpful.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7409 (3) Legal Negotiation
Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7411 (2-3) Mergers, Acquisitions and Reorganizations
Studies the planning of corporate mergers, acquisitions and reorganizations, examining the application and integration of state corporate law, federal securities law, accounting principles, tax law, labor law, products liability law, environmental law, ERISA and antitrust law.
Equivalent - Duplicate Degree Credit Not Granted: BADM 6900
Requisites: Requires prerequisite LAWS 6211 (minimum grade D).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7415 (2) Bioethics and Law
Grading Basis: Letter Grade

LAWS 7418 (2) Legal Imagination
Advanced course in reading and writing for law students. Varied literary and other works are read. May be of interest to the student interested in the question: Does my choice to become a lawyer mean the sacrifice of my ambitions to be a serious writer (or person)?
Grading Basis: Letter Grade

LAWS 7420 (2) European Union Law
Covers all the essential aspects of the EU law: EU institutions, competences, the making and the application of EU law, and the content of the fundamental principles of EU law and the common market.
Grading Basis: Letter Grade

LAWS 7421 (2-3) Business and Human Rights
Examine the role of international human rights law in regulating or influencing businesses enterprises, along with relevant policy considerations.
Grading Basis: Letter Grade

LAWS 7425 (2-3) Health Law and Policy
Acquaints students with the issues arising at the interface between law and medicine through analysis of cases and other materials. Critically analyzes methods used by courts and legislatures to address medical/legal problems in an effort to determine whether the legal resolution was reasonable and appropriate in light of medical, social and political considerations. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7426 (2) Health Care Compliance
Introduces students to a number of primary laws and regulations that give rise to the vast majority of serious fraud and abuse cases. The primary statutes and regulations implementing them will then be viewed from the context of common problems in the health care industry such as: up-coding, unbundling, worthless services/quality of care, medically unnecessary care, over-utilization, joint ventures with referral physicians, off-label marketing.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7428 (3) Bioethics Law and Literature
Interdisciplinary study of law, medicine, and bioethics. Addresses such issues as confidentiality in medical treatment, rejecting life-sustaining treatment, death and dying, reproductive law and genetic technology, human experimentation, and access to health care.
Grading Basis: Letter Grade

LAWS 7429 (2-3) Alternative Dispute Resolution
Examines a variety of dispute resolution processes, such as mediation, arbitration, minitrials and court-annexed settlement procedures, as alternatives to traditional court adjudication.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7431 (3) Corporate Finance
Grading Basis: Letter Grade

LAWS 7433 (3) Remedies
Examines the types of relief available to vindicate various rights. Covers damages, specific performance, injunctions, and restitution. Emphasizes the planning aspect of enforcement, in view of the limitations and problems of proof associated with specific remedies.
Grading Basis: Letter Grade

LAWS 7439 (2-3) Mediation
Explores mediation, one of the more important methods of alternative dispute resolution and the legal issues that may arise related to mediation. Considers what kinds of persons and disputes are most appropriate for mediation. Includes role playing.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation
LAWS 7440 (3) International Human Rights and Humanitarian Law
Surveys international human rights both in law and in philosophy, both current and historical.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7445 (2) Insurance Law
Grading Basis: Letter Grade

LAWS 7449 (2-4) Juvenile and Family Law Clinic
Examines the world of child welfare from the view of the child client, by representing their best interests in abuse and neglect cases. As Guardians ad litem, students will represent children in abuse and neglect cases from the beginning, at the temporary shelter hearing, through the conclusion of the case at a permanency orders hearing.
Repeatable: Repeatable for up to 8.00 total credit hours.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7450 (2) Regional Human Rights Protection for JD Students
Examines how human rights law and policy is created, interpreted and enforced within regional systems. Explores the main sources of human rights law including treaties, international customary law, constitutional law, municipal law, comparative law and principles; the jurisprudence of regional courts and tribunals, the institutions that support human rights advocacy and the cultural perspectives of affected communities and peoples.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

LAWS 7451 (3) Law and Finance for Entrepreneurs
Studies unique legal problems faced by entrepreneurs, including formation issues (choice of entity, rights of the founders, initial investors), operation issues (governance, key employees, intellectual property, financing), IPOs and buy-outs.
Equivalent - Duplicate Degree Credit Not Granted: BADM 6910
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7458 (2) Law and Literature
Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka, and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal, and a final eight page paper are required.
Grading Basis: Letter Grade

LAWS 7461 (1) Dispute Resolution in the Digital Age
Explores the need for expanded and equalized access to remedies in consumer cases, and how the internet opens doors to online dispute resolution ("ODR") systems that utilize cost-effective negotiation, mediation, and arbitration processes for resolving complaints. This course will look at the various systems currently used by major companies, as well as the rules and treaty developments in global markets.
Grading Basis: Letter Grade

LAWS 7465 (2) Public Health Law and Ethics
Explores the legal and ethical dimension of public health. Focuses on topics that generate legal and ethical controversies, including governmental duties to protect citizens, nature and the extent of the government’s ability to regulate conduct and responses to epidemics.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7471 (3) Securities Litigation and Enforcement
Covers the provisions of the Securities Exchange Act of 1934 and related federal statutes, concentrating on the arbitration of private securities claims; SEC enforcement actions; international securities regulation; securities manipulation and fraud; self-regulatory organizations; and regulation of attorneys and accountants practicing before the SEC.
Grading Basis: Letter Grade

LAWS 7475 (2) Advanced Torts
Studies selected tort actions and theories. Topics covered may include "Dignitary torts" (e.g., defamation, privacy, etc.), business torts, and product liability. Offered in alternate years.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Health

LAWS 7505 (2) Sexuality and the Law
Examines the regulation of sexuality in local, state, and federal law, with particular emphasis on sexual orientation. Explores how sexuality shapes, and is shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7507 (2-3) State and Local Taxation
Examines the operation of the income, property and sales tax used to finance our state and local governments. Includes requirements of equal protection and due process. Covers jurisdiction to tax allocation of the tax base among different state and local governments.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 6760
Grading Basis: Letter Grade

LAWS 7509 (1) Mock Trial Competition
Student teams further develop trial and advocacy skills in a competitive mock-trial format involving two or more rounds of trials. Requires preparation of trial briefs and drafting other court pleadings and documents. Credit is limited to the top two teams (six students). Student finalists may continue involvement in regional and national competitions.
Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation
LAWS 7512 (2) Advanced Environmental Law: Air Pollution
Provides an examination of efforts to regulate air pollution in the United States under the Clean Air Act. Covers key provisions, basic approach of cooperative federalism, role of science and risk assessment establishing health-based standards, implications of instrument choice and regulatory design on innovation and economic growth, development of 'first generation' climate policies, and new approaches to compliance and enforcement.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7513 (3) Domestic Violence
Explores the law, policy, history and theory of domestic violence. Examines the limits of legal methods and remedies for holding batterers accountable and keeping victims safe; the dynamics of abusive relationships; the history of the criminal justice system's response to domestic violence; the defenses available to battered persons who kill their abusers; the legal paradigm of the sympathetic victim; psychological and feminist theories about abusive relationships; civil rights and tort liability for batterers and third parties; and the intersection of domestic violence with international human rights.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7515 (3) Poverty Law
Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans and Chicana/os.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7520 (3) Food Law and Practice
Surveys the basic regulatory landscape of food law with insight into critical legal issues facing industry and consumers. Covers federal, state and municipal regulation, litigation, government incentives, international standards and soft-law. Combines doctrinal approaches with simulation and problem solving to introduce systems-level thinking. No prerequisites or prior knowledge if required, though interest in food law and corporate law are helpful.
Grading Basis: Letter Grade

LAWS 7522 (2) Juvenile Law
Takes a critical look at the juvenile justice system and how it responds to the needs of juveniles who are either delinquents and/or victims of abuse. Issues include the rights and responsibility of parents, parental responsibility programs, delinquents, and the future of our juvenile courts.
Grading Basis: Letter Grade

LAWS 7525 (3) Race and American Law
Examines the judiciary's approach to racial discrimination from America's colonial period to the present day. Concludes with an analysis of the contemporary status of racial subordination in the legal system and considers recent scholarly critiques of the law's limitations in effecting racial justice. Employs an interdisciplinary approach and covers the experiences of American Indians, African Americans, Asian Pacific Americans and Chicana/os.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7529 (1) Appellate Advocacy Competition
Gives students the opportunity to participate in an intermural appellate advocacy competition, in which a brief must be filed and reviewed, critiqued, and deemed credit-worthy by a member of the faculty. (Law School Rule 3-2-9 (b) should be consulted prior to enrollment.)
Grading Basis: Pass/Fail

LAWS 7531 (3) Wage Law and Litigation
Teaches federal and state wage statutes, common-law claims for unpaid wages (e.g., fraud, contract/quasi-contract, etc.), and complex statutes outside employment law (racketeering, antitrust, etc.) that creative wage litigators sometimes use. Coverage of the limits of wage law scope may include non-employee contractors (both traditional and gig economy workers), undocumented workers, students, volunteers, and/or prisoners. Teaches litigation practice and strategy, including class/collective action practice, plus experiential learning assignments that may include deposition-taking/client-interviewing, claim-strategizing, damages-calculating, and/or motion-writing.
Grading Basis: Letter Grade

LAWS 7535 (2) Poverty, Health and Law 1
Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, health, violence, and immigrants. Students will also help with intake of clinic patients and support client representation by the attorney of record.
Grading Basis: Letter Grade

LAWS 7541 (2-3) Employment Discrimination
Examines statutory and constitutional prohibitions of discrimination in employment on the basis of race, gender, age, religion, national origin and disability.
Grading Basis: Letter Grade

LAWS 7545 (2) Poverty, Health and Law Practicum
A service learning course in which students draw from the substantive materials studied in LAWS 7535 to develop competency in case planning, problem solving, cooperative decision making, and client counseling. Students will staff cases under the supervision of a CO Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, health, violence, and immigrants. Students will also help with intake of clinic patients and support client representation by the attorney of record.
Grading Basis: Letter Grade

LAWS 7551 (2) Trade Secrets
Examines law of trade secrets and how companies and entrepreneurs use this field to protect intellectual property in conjunction with other forms of legal protection (e.g., patent, copyright and trademark).
Grading Basis: Letter Grade
LAWS 7555 (4) Poverty, Health, and Law Practicum
Introduces students to the substantive areas of health and poverty law. Topics include health disparities and the role of law, cultural competence, standards of care for vulnerable populations, relationships between income, employment, housing, education, and health. Students will also staff cases under the supervision of a Colorado Legal Services (CLS) staff attorney or a pro bono attorney working on behalf of CLS, and will develop competency in case planning, problem solving, cooperative decision making, and client counseling.

Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7565 (3) Corporate Transactions in Health Law
Introduces key corporate and regulatory issues impacting the delivery of health care. Focus will be transactional, with students gaining an understanding of basic corporate law and regulatory principles, and then learning to integrate core federal and state laws into choice and use of corporate structures and operational strategies.

Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7601 (2-3) Business Transactions
Provides a practical understanding of how to apply the law in both transactional and litigation settings. Gives an interdisciplinary look at how various areas of the law are brought together in common factual settings. Teaches students to negotiate, document and close the acquisition of a business covering the areas of practice of corporate, contracts, real property, secured transactions and bankruptcy law. Tests, in a litigation setting, the decisions made during the acquisition stage.

Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 7605 (2-3) Refugee and Asylum Law
Focuses on protections offered under international and domestic law for persons who are threatened by persecution or other adverse conditions in their country of origin. Covers who is a refugee and the protections they have or do not have under United States and international law.

Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7609 (1-2) Law Practice Management
Studies the establishment of a solo or small-firm legal practice. Topics include the business structure (PC, LLC, etc.), office systems, marketing and development, staffing, liability insurance, managing time, technology and billing. (This practice course counts toward the 14 credit hour maximum of practice hours.) Course supported by the Section of Law Practice Management of the ABA in memory of Harold A. Feder, CU Law '59.

Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7611 (2-3) International Business Transactions
Examines the sources of international business law, the relationship between such law and the U.S. legal system, the choice of law in international business disputes, the special issues that arise when doing business with foreign governments, the law governing international sales and the shipment of goods and international intellectual property protection. Offered in alternate years.

Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7615 (4) Immigration Law and Immigrants' Rights
Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7181
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D).

Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7617 (3) International Taxation
Explores the United States income taxation of international activities, principally U.S. persons doing business abroad and foreign persons doing business in the United States. This course focuses on the Internal Revenue Code as well as tax treaties.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6780
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D).

Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 7618 (1) Marijuana Law and Policy
Covers three distinct but interwoven topics: substantive law governing marijuana; policy rationales behind and outcomes produced by different approaches to regulating the drug; and the legal authority to regulate the drug. The objective is to prepare to handle legal issues that arise in practice but also to provide informed counsel on proposed and future reforms to the law.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 7619 (3-4) Entrepreneurial Law Clinic
Provides law students with practical experience in transactional law while offering valuable legal services without charge to local startup businesses lacking access to legal resources. Enrollment priority is given to third year law students. The ELC professor may set forth additional requirements to ensure that students are qualified to provide services to ELC clients.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7621 (4) Business Associations
Covers the law of agency, partnerships, limited liability companies and corporations. It includes principles of agency, formation and operation of business entities, fiduciary duties of the actors in business entities, and the relevant federal and state laws related to those entities.

Requisites: Restricted to Law (LAWS) students only.

Grading Basis: Letter Grade
LAWS 7629 (1) Introduction to the In-House Practice of Law
Explores cutting edge questions around the practice of law as an employee of a business. Demonstrates how the combination of law and business can be valuable to businesses and also innovative, challenging and rewarding to legal professionals. Legal services to corporate America is changing dramatically with more entities relying on in-house counsel, compared to private practitioners, to obtain legal advice and counsel.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7709 (3) Advanced Legal Negotiation
Deepens students' understanding of the economic, psychological, cultural, and critical literatures related to legal negotiation and bargaining. Provides students an advanced set of negotiations, experiences and simulations that introduce new dynamics and problems not dealt with in the core course, and deepens students' self-understanding and ability to learn from experience.
Requisites: Requires prerequisite course of LAWS 7409 (minimum grade D).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7710 (2-3) Space Law and Policy
Examines the role of international law in the regulation of outer space activities. Topics include current and potential future uses of outer space, law-making process related to space activities, legal regime of outer space and celestial bodies, legal status of spacecraft, liability for damage caused by space activities, settlement of space-related disputes.
Grading Basis: Letter Grade

LAWS 7715 (3) Indigenous Peoples in International Law
Studies developments in the substance and procedure of international human rights law pertaining to indigenous peoples, examining these developments through varying perspectives, doctrinal and political, pragmatic and critical. Students will become familiar with indigenous peoples' involvement in the human rights movement both before and after WWII, and corresponding developments in the United Nations, Organization of American States, and other institutions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 7718 (2) The Regulation of Marijuana
Covers three distinct but interwoven topics: substantive law governing marijuana, policy rationales behind and outcomes produced by different approaches to regulating the drug and the legal authority to regulate the drug. Prepares one to handle legal issues that arise in practice, but also to provide informed counsel on proposed and future reforms to law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 7725 (3) American Indian Law I
Investigates the federal statutory, decisional and constitutional law that bears upon American Indians, tribal governments and Indian reservation transactions.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7735 (3) American Indian Law II
Investigates the legal history and current legal status of Alaska Natives and Native Hawaiians. Addresses other current topics such as tribal water rights, tribal fishing and hunting rights, tribal justice systems, religious freedom, and tribal natural resource and environmental management.
Requisites: Requires prerequisite course of LAWS 7725 (minimum grade D).
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7745 (2-3) Jurisdiction in Indian Country
Examines the current state of the justice system within Indian nations today. Includes understanding the respective roles of tribal and state law enforcement authorities, as well as the Bureau of Indian Affairs' Office of Justice Services, the Federal Bureau of Investigation, and the Drug Enforcement Administration. Examines relationship between federal and tribal courts; substantive laws; and advocates who appear before them.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 7751 (3) Arbitration
Discusses the nature of arbitration, enforcement of arbitration agreements and awards, complexities of multi-party arbitrations, fairness and efficiency of the arbitral process and other issues related to arbitration's prevalence in contexts ranging from corporate to consumer and employment disputes.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7765 (3) Gender and Justice
Grading Basis: Letter Grade

LAWS 7775 (1) Gender Law and Public Policy
Examines the relationship of law and gender in criminal law, and constitutional law, using feminist theoretical perspectives as the organizing principle. Each perspective is applied to cases and material all such topics as violence against women, prostitution, pornography, and discrimination in education and athletics.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 7801 (1) Tech Policy Advocacy
Provides an intensive, one-week look at the substance, strategy, tactics, and import of technology policy advocacy. Each year, we will study one particular theme or conflict and examine it in-depth. The point of studying one particular episode is to learn lessons about the practice of technology policy advocacy that apply beyond this one historical moment. This class is meant to combine traditional doctrinal approaches with an experiential focus.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/ Technology/Telecommunication
LAWS 7809 (2-4) Technology Law and Policy Clinic
Features technology law advocacy before administrative, legislative and judicial bodies in the public interest.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5250
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 7846 (1-3) Independent Legal Research
Involves independent study and preparation of a research paper under faculty supervision. Students produce a research paper equivalent to a seminar research paper. A draft is submitted, subjected to critique by the faculty member, and redrafted. Available during or after the fifth semester of law school. Instructor consent required.
Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 7896 (1) Journal: University of Colorado Law Review
Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7906 (2) Journal: University of Colorado Law Review
Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the University of Colorado Law Review.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7916 (1) Journal: CO Natural Resources, Energy & Environmental Law Review
Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Colorado Journal of International Environmental Law and Policy.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7936 (1) Journal: Colorado Technology Law Journal
Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Journal of Telecommunications and High Technology Law.
Repeatable: Repeatable for up to 4.00 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7939 (1-10) Extern Program
Extern credit may be earned for uncompensated work for a sponsor, which may be any lawyer, judge, or organization that employs lawyers or judges and is approved by the Academic and Student Affairs Committee. Work is done under the direction of a field instructor (a lawyer or judge as the sponsor) and a member of the law faculty. Requires a substantial writing component and 50 hours of working time per credit hour.
Repeatable: Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 7946 (2) Journal: Colorado Technology Law Journal
Gives students the opportunity to participate in the research, writing, and editing activities involved in publishing the Journal of Telecommunications and High Technology Law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Research and Writing

LAWS 7949 (2) Remote Externship Course Component
Accompanies remote externship placements and provides an opportunity for structured and interactive reflection on the educational experience afforded by the externship placement.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 8003 (2) Seminar: Lawyers and Leadership
Analyzes challenges and responsibilities of serving in leadership roles, with particular emphasis on utilizing law as a vehicle to change organizations and societies. Topics include characteristics, models, styles, and theories of leadership, charisma, civil and human rights, conflict management, decision-making, diversity, ethical responsibilities, forms of influence and persuasion, innovation, mindfulness, organizational dynamics, positive organizational scholarship, and scandal. Materials will include cutting-edge research, case histories, exercises, problems, simulations, and video clips from popular culture and media.
Grading Basis: Letter Grade

LAWS 8005 (2) Seminar: Advanced Constitutional Law Equality and Privacy
Addresses "Equal Protection" rights under the Fourteenth Amendment and "Privacy" rights to personal autonomy. Analyzes varied constitutional grounds for recognizing or rejecting abortion rights; limits on Congressional power to pass civil rights laws granting broader rights than the Fourteenth Amendment does; treatment of sexual orientation-related laws and government actions as "Privacy" versus "Equality" matters; and "Benign"/"remedial" race- and sex-based government decisions such as affirmative action and same-sex schools.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public
LAWS 8011 (1-3) Seminar: Humanizing Contracts: Service Learning
Examines contract theory and policy, while providing community-based service. Students analyze and discuss readings exploring doctrinal and theoretical bases of contract law, and see "Contracts in action" through participating in a service project. Requires a final paper linking theory and doctrine with service experiences. Note: this is a year-long seminar (2 credits per semester); students must enroll in both semesters but receive only one grade at the end of the year. Students participate in a service project that may include off-campus and weekend participation.
Grading Basis: Letter Grade

LAWS 8013 (2) Seminar: Habemas Corpus: The Great Writ of Liberty
Includes readings on the history of the writ, its constitutional status, and its use as a civil rights remedy, as well as case studies of important Supreme Court decisions, and a review of contemporary jurisdictional and procedural issues.
Grading Basis: Letter Grade

LAWS 8015 (1-3) Seminar: Constitutional Theory
Aims at thinking broadly about the challenges, and problems of constitutionalism in the U.S. What are the fundamental tensions that attend the constitutional enterprise: internally, externally? What relations does the Constitution have to democracy and liberalism? Readings will be taken from legal theory, social theory, philosophy and occasionally judicial opinions. Emphases will differ slightly each year as announced.
Repeatable: Repeatable for up to 3.00 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8021 (2-3) Seminar: Consumers and the Law
Expands understanding and analysis of contracts beyond the basic concepts learned in the first-year contracts course. Explores norms, goals and functions of consumer law and also observes the law "in action" through a class blog and outreach with the Boulder County Department of Housing and Human Services ("BCDHHS"), who assists people throughout Boulder County with an array of financial, housing and other consumer issues.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8025 (2) Seminar: Advanced Topics in Federalism
Explores the development of "Our Federalism", the relationship between federal and state governments, from the founding period of the US Supreme Court's recent New Federalism jurisprudence. Studies historical material, commentary, and case law and addresses how federalism is defined; the values that federalism serves; the role of federalism in our interconnected, global society; the Supreme Court's boundaries of federalism; the direction of New Federalism.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8035 (2) Seminar Speech, Religion, and Equality: Constitutional Values in Tension
Addresses past and continuing debates involving potential tensions between antidiscrimination principles and free speech, free exercise and establishment clause values. Examines constitutional protections under the First Amendment and the equal protection clause, together with an array of existing and proposed federal and state antidiscrimination laws regulating employment, housing, and public accommodations, among other areas.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8036 (2-3) Seminar: Special Topics in Intellectual Property
Applies copyright doctrine to the digital music contexts. Topics may include but are not limited to radio, compulsory licensing, performance rights, sampling, user generated content, term extension, termination rights, "open-access" and the public domain, emerging technologies and infringement, social implications of copyright legislation, digital fair use and the first sale doctrine and moral rights for users and artists.
Requisites: Require a prerequisite course of LAWS 6301 or LAWS 7301 (minimum grade D-).
Grading Basis: Letter Grade

LAWS 8045 (2) Seminar: Comparative Constitutional Law
Examines legal structures and concepts typically found in constitutions, including judicial review, distinction between legislative and executive authority, federalism and the principle of subsidiarity, the relationship between church and state, free speech and press, and social welfare rights. Examines differences between constitutional law and other domestic law; role of comparative constitutional law in domestic constitutional law adjudication. Emphasizes American and Swedish perspectives.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8055 (1-2) Seminar: Media, Popular Culture, and the Law
Examines how the institutions, practices and the very identity of law are in part affected by the media through which law is apprehended and communicated. Hence the general question posed in this seminar: to what extent and how are the forms and methods of the new media having an effect on the perception, role and identity of law? This is a year-long seminar.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8060 (3) Seminar: Poverty and Inequality in Comparative Perspective
Investigates the nature, causes, consequences and major responses to persistent poverty and inequality in the United States and several other countries. Students are expected to write short response papers for each assignment as well as a substantial research paper on a topic selected in discussion with the instructor.
Grading Basis: Letter Grade

LAWS 8065 (2) Sem White Collar Crime
Grading Basis: Letter Grade

LAWS 8075 (2) Seminar: Race, Racism, and American Law
Focuses on issues of race reform law, in particular the group of issues dealing with Black Americans. (Students of all hues and persuasions are welcome.) Offers an interpretive or critical dimension, rather than a litigation-oriented one. Helps students understand how race reform works and how attitudes and historical forces have shaped that body of law.
Grading Basis: Letter Grade

LAWS 8085 (2) Sem Crit Race Theory
Grading Basis: Letter Grade

LAWS 8095 (2) Seminar: Problems in Constitutional Law
Explores, in depth, various topics in U.S. constitutional law. Examines history, societal impacts, and challenges raised by those topics. The coverage of the seminar varies from year to year, depending on the instructor's interests and expertise.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public
LAWS 8101 (3) Seminar: Business Law Colloquium
Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8103 (2) Seminar: Alternative Dispute Resolution Ethics
Explores the ethics of mediators and other alternative dispute resolvers and facilitators, of attorneys representing clients in alternative dispute resolution processes, and of judges serving in alternative roles. Issues include confidentiality, providing appropriate notice to those concerned, and avoidance of conflicts of interest.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8104 (2) Seminar: Cities, Suburbs, and the Law
Explores dynamics that play out in the relationship between cities, suburbs, exurbs and other patterns of urban development. Explores the nature of local power, relations between local jurisdictions, and metropolitan and regional approaches to governance. Includes fiscal disparities, ethnic and racial segregation, sprawl and growth controls, affordable housing, transportation, and the urban/rural divide.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8105 (3) Seminar: Comparative Family Law
Examines and critiques law, legal institutions and traditions of the country of focus and the U.S. as they affect children, families and work. Enhances research and writing skills, including field and international research. Contributes to the host country through scholarship and service. Increases cultural competence through active engagement with peers and with social justice issues in another country. Includes required field study component and service learning project over spring break.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8110 (2) Seminar: Fascism and the Liberal State
Explores fascist legal theory and its critiques of the liberal democratic state. Readings of major conservative, liberal, fascist, Nazi and Marxist theorists including Marx, Gentile, Fuller, Neumann, Schmitt, Agamben, Hayek and Mill. Understand from a variety of perspectives, the structure and character of the liberal democratic state, its strengths and weaknesses as well as it susceptibility of fascism.
Grading Basis: Letter Grade

LAWS 8111 (3) Sem: National Security Law and US Foreign Policy
Explores the legal frameworks influencing the development of national security policy and U.S. foreign policy. Students will be introduced to applicable U.S. Foreign Relations Law, U.S. National Security Law and International Law before considering how such apply and interact in response to current threats to national security.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8112 (2-3) Seminar: Advanced Natural Resources Law
Provides in-depth study and analysis of current problems in natural resources law, using historical, literary, and scientific materials. Includes field-trip, and requires additional field trip expenses. Department enforced prerequisites or corequisites: any two of the following: LAWS 6002 or LAWS 6112 or LAWS 6302 or LAWS 7775.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Recommended: Prerequisite LAWS 6112.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8115 (2) Seminar: Child Abuse and the Law
Explores legal responses to child abuse by examining the constitutional framework for legal proceedings, effective strategies for preventing child abuse and punishing offenders, alternatives to the current system, and cultural aspects of child abuse and the legal response to it. Examines physical abuse and neglect, and focuses on sexual abuse.
Grading Basis: Letter Grade

LAWS 8120 (2-3) Special Topics in Constitutional Law
Offers students the opportunity for in-depth discussion and study on an important topic of constitutional law. Topics may vary from year to year.
Grading Basis: Letter Grade

LAWS 8122 (2) Seminar: Mineral Development
Deals with legal and policy issues surrounding mineral development and its environmental impacts. Emphasizes the problems associated with hard rock minerals and coal development, with some treatment of oil and gas leasing and development issues. Focuses on western public lands with some discussion of international and private lands issues.
Grading Basis: Letter Grade

LAWS 8125 (2) Seminar: Law and the Politics of Family Law
Examines issues that have been raised under the United States Constitution with respect to state regulation of families. Topics include questions of family and individual privacy, the status of children, procreation, marriage and divorce, the definition of family relationships, and problems of federalism and the role of the Supreme Court in the regulation of families.
Grading Basis: Letter Grade

LAWS 8128 (2-3) Seminar: Jurisprudence
Addresses a number of fundamental questions, such as: What is law? What should it be? How is it created? Our readings consist of cutting-edge articles from leading modernist/postmodernist schools of thought including legal formalism, legal realism, interpretive theory, law and economics, feminist jurisprudence, critical legal studies and law and literature.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7128
Grading Basis: Letter Grade

LAWS 8135 (2) Seminar: Gender, Work, and Family
Explores the social and legal problems that develop at the intersection of work and family, and considers legal/non-legal solutions that have been and could be used to accommodate both women and men in their efforts to deal with these problems.
Grading Basis: Letter Grade
LAWS 8138 (2) Seminar: The Rhetoric of Law
Considers how Anglo-American law operates rhetorically, how it persuades, builds character, offers proof, approximates the truth, establishes legitimacy, and makes things happen. It will also explore the ethics of rhetoric and note the relationship of rhetoric to other bodies of legal scholarship (e.g., law and literature, legal pragmatism, law and culture). It will hone student advocacy skills, prepare students to anticipate and defend against the rhetorical stratagems of different legal actors, and enrich students' sense of professional identity.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

LAWS 8154 (2) Seminar: Land Use Planning
Discusses public control of private land uses through planning, zoning, and regulation of land development, including consideration of constitutional and statutory limitations on legislatively created techniques. Offered in alternate years.
Grading Basis: Letter Grade

LAWS 8202 (2) Seminar: Environmental Policy
Examines issues of environmental justice, including the disparate impacts of pollution and land use controls on certain communities and ethnic groups. Topics may include concentration of waste facilities in neighborhoods occupied by poor and minority populations, adequate protection of migrant farmworkers from the impacts of pesticide hazards, and environmental controls that inhibit economic growth and development sought by Indian tribes.
Grading Basis: Letter Grade

LAWS 8205 (3) Seminar: Law and Democratic Governance
Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.
Equivalent - Duplicate Degree Credit Not Granted: PSCI 7171
Requisites: Restricted to Law (LAWS) students only.
Recommended: Prerequisite LAWS 7325.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Administration

LAWS 8210 (2) Seminar: Comparative Law
Develops student understanding of the internal working of Islamic law at its theoretical roots. Analyses the various methodologies that are represented in Islamic legal literature, helping to enable the students to identify modern manifestations of these methodologies in contemporary Muslim discourses. Contextualizes the subject of Islamic law within various governmental and constitutional structures, beginning with the classical period, continuing through colonialism and reaching into the present day.
Grading Basis: Letter Grade

LAWS 8211 (2) Sem: Comp Constitutional Law: US, UK and Australia
Takes a comparative law approach to the constitutional law of the United States, the United Kingdom, and Australia. The seminar's intellectual purpose is to understand all three nations more deeply (especially our own) by seeing what they do similarly, what they do differently, what the advantages and disadvantages of each nation's approach appear to be, and whether any lessons learned in one place could profitably be transferred to another.
Grading Basis: Letter Grade

LAWS 8212 (2) Seminar: Environmental Law Practice and Policy
Focuses on the translation of environmental policies and purposes into environmental law and practice. Investigates policy issues on prevention of significant deterioration of air quality (PSD), the particulate matter national ambient air quality standard (PM NAAQS), and global climate changes. Emphasizes legal structure issues, including the role of national, state, and local governments in implementing environmental law and policy as well as counterpart global structures and mechanisms for responding to global or transboundary environmental problems.
Requisites: Requires prerequisite course of LAWS 7202 (minimum grade D+).
Grading Basis: Letter Grade

LAWS 8220 (2) Seminar: Environmental Philosophy and Law
Investigates the changing philosophical underpinnings of U.S. environmental law and policy and how philosophy and legal institutions interact.
Grading Basis: Letter Grade

LAWS 8235 (2) Seminar: Advanced Topics In Family Law
Explores a variety of current issues related to family law: topics will change to reflect emerging issues and will draw from legal and social science scholarship as well as relevant statutes and cases. Possible topics include reproductive technology, children's rights, the role of religion in family law, and political theories of the family.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8242 (2) Seminar: Funding Climate Action
Explores the menu of legal and policy options that can be used to fund climate change mitigation, as well as adaptation to climate risks already underway. Robust climate action will require investment on an enormous scale and an increasingly tight timeline. How to fund these investments is one of the central questions of climate policy today.
Grading Basis: Letter Grade

LAWS 8251 (2) Seminar: Advanced Corporate Law
Explores current issues in corporate and securities law, including developments in fiduciary duties of officers and directors, corporate governance, executive compensation, revisions to the model business corporation act, and state and federal litigation reform.
Grading Basis: Letter Grade

LAWS 8252 (2-3) Seminar: Policy and Climate Change In The Mont Blanc Region
Explore the Mont Blanc region including the history and culture, along with the political and economic forces that have shaped it. Attention to the environmental and land use issues and climate change impact. Consideration of the opportunities and obstacles for regional political leaders in adapting to changes in the regional climate. Review techniques to monitor and understand baseline conditions and how climate change may be impacting those conditions. Field work on site required.
Grading Basis: Letter Grade
LAWS 8285 (2-3) Seminar: Education and the Constitution
Teaches the substantive constitutional law governing public education. Students will teach constitutional materials to high school students in the local Denver Metro area high schools. Interested students must apply and requires a commitment to a full-year curriculum. Encourages individual development as teachers, writers, and critical thinkers, and provides an opportunity to grow as colleagues and teammates. Requires extra time outside of class.
Requisites: Restricted to Law (LAWS) students only.
Recommended: Prerequisite LAWS 7055.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Policy

LAWS 8300 (3) Seminar: International Adjudication
Focuses on writing briefs and memoranda of law suitable for practice before tribunals such as the International Courts of Justice. Emphasis will be on students writing, legal analysis, and presentation of oral arguments. Instruction identifies how to research and analyze international materials, such as treaties, covenants, and international customary law.
Grading Basis: Letter Grade

LAWS 8301 (2) Seminar: Innovation, Network Theory, Social Entrepreneurship
Covers topics related to the legal and public policy implications of innovation, entrepreneurship, and social networks including normative ideals of entrepreneurship, the concept of regional advantage, whether startups should be subsidized and the design of such subsidies, the role of universities in commercializing ideas, impact of the tax code on entrepreneurship, the role of corporate responsibility in startups, and more.
Grading Basis: Letter Grade

LAWS 8302 (2) Seminar: Advanced Problems in Water Resources Law
Explores the use of watersheds as geographic and political entities for addressing water-related issues and how laws and institutions facilitate or impede watershed-based problem solving.
Grading Basis: Letter Grade

LAWS 8303 (2) Seminar: Advanced Oil and Gas
Covers the history of oil and gas conservation and its regulation, proration and allowable regulation, compulsory pooling and unitization, permitting and environmental regulation, and the interplay between federal, state and local regulation.
Requisites: Requires prerequisite course of LAWS 7102 (minimum grade D-).
Grading Basis: Letter Grade

LAWS 8310 (2) Seminar: International Crimes Punishment
Addresses issues in international criminal law in three parts: 1) basic contents of international law, 2) international criminal tribunals that enforce international criminal law, 3) national efforts to bring international criminal prosecutions.
Requisites: Restricted to Law (LAWS) students only.
Recommended: Prerequisites LAWS 6400 and LAWS 7440.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 8311 (2) Seminar: Computer Crimes
Explores legal issues that judges, legislators, prosecutors, and defense attorneys confront with the recent explosion in computer related crime. Includes Fourth Amendment in cyberspace, law of electronic surveillance, computer hacking and other computer crimes, encryption, online economic espionage, cyberterrorism, First Amendment in cyberspace, federal and state relations in enforcement of computer crime laws, and civil liberties online.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8312 (3) Seminar: The Law of the Colorado River
Addresses the many areas of law and policy that affect management of the Colorado River and the communities that depend on it. The seminar will also include material and presentations from experts in other disciplines, including conservation biology, climate science, anthropology, geology, and hydrology. The centerpiece of the class will be a two-week raft trip through the Grand Canyon.
Grading Basis: Letter Grade

LAWS 8315 (2) Seminar: Advanced Criminal Justice
Studies policy and practice issues rather than case law. Focuses primarily on how American criminal justice is dispensed in cases that do not reach trial, including police behavior, prosecutorial discretion, defense services, bail, plea bargaining, and sentencing.
Grading Basis: Letter Grade

LAWS 8318 (2) Seminar: Law and Economics
Introduces the uses and limitations of microeconomic theory for understanding and resolving legal problems. Emphasizes concepts prominent in the law and economics literature such as cost, transaction costs, utility, and rational self interest.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8320 (2-3) Seminar: Oil and International Relations
Addresses the extent to which the international community of nations is oil dependent. Assesses the impact and the geopolitical dangers to international relations arising from the expanding demand for scarce oil from developing, as well as developed, economies.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 8321 (2) Seminar: Computers and Law
Explores a range of topics surrounding the juxtaposition of computers and law. Most are aware of the impact that law has on computers through the myriad of regulations that govern computers and related technologies. Less well known is the impact that computer technology is having on governance and on the practice of law. Explores both sides of this dynamic interplay between law impacting computing, and computing impacting law.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8322 (3) Seminar: Environmental Decision Making
Explores the foundational issues that underlie agency decision making, including environmental ethics, cost benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.
Grading Basis: Letter Grade
LAWS 8325 (2) Seminar: Reforming Criminal Trials
Starts from the premise that reform of our criminal trial system to make it less complicated, less expensive, and more reliable should be considered. Examines trial systems in other countries and U.S. changes over recent decades. Student papers make and defend proposals for reform.
Grading Basis: Letter Grade

LAWS 8331 (2) Seminar: Equality And Sports
Examines equality law and theory as applied to sports. Focuses on sex/gender/identity but includes treatment of disability, race, and class. Compares and contrasts the formal regime of legal equality, primarily in the form of Title IX, with equality norms developed in the larger society and within sports organizations themselves. Considers how the meaning of equality shifts across contexts, such as whether sport is treated as a business, as pure competition, or as an opportunity/public accommodation.
Grading Basis: Letter Grade

LAWS 8335 (2) Seminar: Advanced Criminal Procedure
Focuses on a particular topic in criminal procedure. Topics include the privilege against self-incrimination, juries and defense and prosecution ethics.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Litigation and Procedure

LAWS 8341 (3) Seminar: Law and Economics of the Information Age
Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition and how intellectual property and antitrust rules should be developed.
Equivalent - Duplicate Degree Credit Not Granted: CYBR 5260
Requisites: Requires prerequisite course of LAWS 7201 or LAWS 7241 or LAWS 7301 (minimum grade D-).
Grading Basis: Letter Grade

LAWS 8345 (2) Sem Comp Crim Pro
Grading Basis: Letter Grade

LAWS 8351 (2) Seminar: Law and Economics of Utility Regulation
Discusses economics of regulation and matters ranging from neoclassical economic analysis to public choice theory to new institutional economics. Discusses several regulatory domains, including antitrust law, telecommunications regulation and energy regulation. Highlights both economic and non-economic goals, including universal service, sustainability (e.g., renewable energy) and architecture (e.g., free speech concerns with regard to telecommunications networks).
Requisites: Requires prerequisite course of LAWS 6301 or 7201 or 7241 (minimum grade D-). Restricted to Law (LAWS) or Telecommunications (TELE) students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8355 (2) Seminar: Sentencing Law and Policy
Studies sentencing law against the backdrop of criminal justice policy and concerns of public policy. Covers theories of punishment, the merits of indeterminate sentencing, sentencing guidelines, and nonincarcerative sanctions. Confronts problems of race, class, and other disparities in criminal sentencing.
Grading Basis: Letter Grade

LAWS 8361 (2) Seminar: Advanced Information Privacy
Explores current issues in information privacy law and cybersecurity law at depth. Topics will change to reflect subjects that emerge each time that the seminar is offered. Some examples include: federal consumer protection law, federal sectoral privacy statutes, state privacy laws, cybersecurity regulation, and European and comparative data privacy law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Intellectual Property/Technology/Telecommunication

LAWS 8375 (2) Seminar: Advanced Immigration and Citizenship
Explores the law and policy of citizenship in the United States, starting with legal questions regarding acquisition and loss of citizenship as well as the consequences of citizenship, but also examines the fundamental premises underlying American citizenship and the concept of citizenship generally.
Grading Basis: Letter Grade

LAWS 8385 (2) Sem Law & Religion
Grading Basis: Letter Grade

LAWS 8395 (2) Seminar: Separation of Powers
Explores the constitutional relationships among the three branches of the federal government in the sphere of domestic matters, omitting foreign affairs and war. Develops topics including executive orders, Congressional control of the executive and the courts, appointment and removal of officers, impeachment, executive privilege, use of military tribunals, and the election of 2000. A seminar paper will be required.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public Policy

LAWS 8400 (2) Seminar: Special Topics in International Law
Provides in-depth coverage of particular issues in international law and exposes students to intellectual concepts in the field. Students write seminar length papers and develop critical thinking through writing and research.
Grading Basis: Letter Grade

LAWS 8401 (2) Seminar: Securities Litigation and Enforcement
Designed for students interested in studying topics related to securities litigation. Covers civil liability under the Securities Act of 1933, proxy fraud, class actions (with special emphasis on the Private Securities Litigation Reform Act and the Securities Litigation Uniform Standards Act), market manipulation, SEC enforcement actions, enforcement issues involving attorneys and accountants, criminal enforcement, international securities fraud and securities arbitration.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Business

LAWS 8405 (2) Seminar: Public Health Law and Ethics
Explores rules of law pertaining to the American public health care system and the ethical issues raised by the government's effort to protect the health of the American people. Held at the Anschutz Medical Campus.
Grading Basis: Letter Grade

Additional Information: Departmental Category: Government and Public Policy
LAWS 8407 (2) Seminar: Tax Law, Economics and Policy
Explores current issues in tax policy. Topics may include equity, efficiency, and distributive justice; choice of tax base, including consumption taxes; social policy in the Internal Revenue Code; corporate taxation and tax incidence; and the tax legislative process, legal transitions, and tax reform. This two-credit seminar does satisfy the graduation requirement.
Requisites: Requires prerequisite or corequisite course of LAWS 6007 (minimum grade D-). Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 8409 (2) Seminar Special Problems in Conflict Resolution and Management
Develops a comprehensive description of dispute; creates a conflict assessment of the stakeholders in and dynamics of dispute; assess obstacles to and opportunities for mediation; recommend strategy for addressing and managing the dispute.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 8412 (2) Seminar: Critical Law and Economics
Explores some of the more successful and enduring critiques of Chicago Law and Economics. Starts with an introduction to economic analysis, including basic analytic tools like rational actor theory, supply and demand, efficiency notions, and cost concepts. Later classes will explore more advanced works in the area.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8415 (2) Seminar: Bioethics and Law
Focuses on legal, moral, and economic analyses of problems posed or soon to be posed by advances in biomedical technologies.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8421 (2) Seminar: Duties of the Professional Advisor
Studies ethical and legal regulation of lawyers, auditors, and investment bankers, who have been described as “Gatekeepers” to the investment markets. Considers changes in ethical and legal regulation that can be adopted to restore a sense of integrity for these professionals.
Grading Basis: Letter Grade

LAWS 8425 (2) Seminar: Advanced Torts
Explores how dignitary interests have influenced the development of and have been incorporated into law, using the common law of torts and the constitutional rights of life and liberty as a general (but not exclusive) focal point of discussion.
Grading Basis: Letter Grade

LAWS 8426 (2) Seminar: The Law of Pandemics
Develops student understanding of the numerous ways in which the law must reckon with, regulate, and regulate around, pandemics. Shows how, while public health law primarily engages with pandemic to stop its spread, secondary legal regimes must also take pandemics into account in order to ensure the operation of law. This includes the laws of contract, tort, property, finance, welfare, and the like. Situates reading and format within ongoing pandemics to the degree appropriate.
Grading Basis: Letter Grade

LAWS 8428 (2) Seminar: Women in Law and Literature
Considers both legal and literary depictions of women and their legal and extralegal situations. Topics may include women as mothers, women as sexual beings, women’s silence, women’s violence and women as criminals, women at work, and women as the “Other” in law and literature.
Grading Basis: Letter Grade

LAWS 8430 (2) Seminar: Comparative Public Health Law and Ethics
Compares public health law systems to those in other countries. Studies the goals, legal structures, and services provided, together with such issues of coercion as quarantines, monitoring, mandates and prohibitions, and forcing pharmaceutical companies to make available inexpensive generic drugs.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 8440 (2) Seminar: International Human Rights
Exposes students to a variety of human rights issues and the responses by international institutions. In the fall, the seminar will meet for several sessions in a colloquium format, featuring guest speakers from around the world. In the spring semester, students will complete a paper that satisfies the law school’s seminar writing requirement.
Grading Basis: Letter Grade

LAWS 8450 (2) Seminar: Law and Economic Development
Explores past and present debates over the role of the legal order in economic development. Studies the relationships among economic ideas, legal ideas and the development policies pursued at the national and international level in successive historical periods, beginning in the Seventeenth Century to the present. Focuses on the potential for an alliance of various traditions from economics, law and other disciplines to understand development.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International Comparative Law

LAWS 8455 (2) Seminar: Gender and Criminal Justice
Explores the intersection of gender and criminal justice in such areas as police and prosecutorial discretion, the investigation and prevention of crimes, the definition of offenses and defenses, factors contributing to criminality, criminal sentencing and the experience of punishment, and the societal ramifications of incarcerating children’s caregivers.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8458 (2) Seminar: Law and Literature
Focuses on the question of what literature can teach lawyers through a variety of literary works and films. Covers traditional works by Shakespeare, Tolstoy, Camus, Kafka and Melville, as well as more contemporary works by Toni Morrison and Norman Mailer. Several short reflection papers, a journal and a final paper will be required.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing
LAWS 8505 (2) Seminar: Interdisciplinary Perspectives on Law and Social Change
Introduces legal institutions engaged in social change, from courts, to Congress, to bureaucracies and organizations. Posits tension between tasks of dispute resolution and public policy development and institutional adaptations. Considers the role of public opinion and the classics of legal formalism to more critical accounts. Considers postmodern theory and empirical legal scholarship. Presents alternatives to court-centered approaches to change, including community lawyering and organizing, law and social movements, and legislation.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8508 (2) Seminar: Constitutional Foundations Core Ideas
Focuses on core ideas in U.S. constitutional law, such as means/ends analysis, institutional competence, rights definitions, and jurisdictional techniques for limiting governmental powers. Draws from historical writings, contemporary press accounts, learned treatises, oral arguments, law review articles, and key judicial opinions such as Mccullough v. Maryland, Lochner v. New York, Brown v. Board of Education.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8511 (2) Seminar: Wal-Mart
Examines issues raised by Wal-Mart’s size, power, and business model. Considered issues bring numerous areas of law into play, including employment and labor law, social welfare legislation, class actions, antitrust, zoning, international labor and human rights regulation, and international trade. The course will show how different areas of the law are integrated in practice.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8515 (2) Seminar: Forced Labor
Reviews several regimes of compulsory labor that have been central to the American experience: Black chattel slavery in the antebellum South; debt peonage, criminal surety, and related institutions of agricultural involuntary servitude; convict leasing and other forms of compulsory inmate labor; “White slavery” and prostitution; and forced labor among immigrants. Emphasizes the complicated role that the law has played, and in some respects continues to play, in both supporting and undermining such institutions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business and Commercial Law

LAWS 8521 (2) Seminar: Comparative Labor Law
Explores the laws and economic transformations that affect labor relations on a global scale.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8531 (2) Seminar: Labor and Employment in Transportation
Explores legal, social, and economic issues arising from labor relations in the industries transporting goods and people by road, rail, air, and water, among the most critical sectors of the economy.
Grading Basis: Letter Grade

LAWS 8533 (2) Seminar: Criminal Law in Context: Legal and Social Images of Victims and Perpetrators
Contextualizes criminal law by engaging in an in-depth study of the legal and social characterizations of victims and perpetrators in U.S. law, politics, and popular culture.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 8535 (2) Seminar: Class and Law
Explores issues relating social class to such areas as labor relations, law enforcement, controls on radical movements and the distribution of wealth and power. Considers problems defining social class.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8538 (2) Seminar: Modern Legal Theory Core Ideas
Explores key ideas that have shaped American law and legal thought, such as Holmes’ bad man, the Coase Theorem, the “Hunch” theory of law, and others. Focuses on researching and writing many short papers.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8545 (2-3) Seminar: Food Law and Policy
Introduces students to the laws and regulations that govern our food supply. The focus is federal law provided by the U.S. Food and Drug Administration, with additional readings, videos and speakers. Topics to be covered include legal definitions for food, rules on food labeling, standards for food safety, biotechnology, international trade, organic and environmental regulation, hunger, farmer’s markets and obesity.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8548 (1-2) Seminar: Theory of Punishment
Explores the various justifications that philosophers have developed to explain why we have the right to punish. Examines the historical evolution of our punishment system and focuses on the death penalty as a critical contemporary issue in the debate about the proper role of punishment in our society.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8555 (2) Seminar: Race, Education and American Law
Explores issues of equity, access and reform in American public education, particularly as it pertains to race, including desegregation, diversity, equal protection and public education, tracking and high-stakes testing, courts or the political branches, charters and vouchers.
Requisites: Restricted to Law (LAWS) students only.
Recommended: Prerequisite LAWS 7525.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8565 (1-3) Seminar: Citizenship and Equality
The concept of citizenship connects immigration with studies of race, international human rights, gender, criminality and many others. It has been receiving growing attention in many scholarly disciplines. Examines the notion of citizenship in recent scholarship spanning law, political science, sociology and history.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health
LAWS 8605 (3) Seminar: Regulation and Innovation
Explores two related questions: first, what role does regulation play in encouraging (or inhibiting) innovation? Second, what kinds of innovation approaches to regulation itself are being employed or might be employed and how might these strategies improve the environment for private innovation?
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 8608 (2) Seminar: Power, Ethics, and Professionalism
Examines critically the possibility and character of ethical reasoning within the legal profession in light of its institutional structures. Explores descriptive/normative accounts of the profession’s structure, “Professionalism,” and individual conscience. Put simply, the seminar explores whether it is possible to be a good lawyer and ethical person.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8611 (2) Seminar: US National Security and Foreign Relations in a Time of Change
Explores the legal frameworks influencing the development of national security policy and US foreign policy. Students will be introduced to applicable US Foreign Relations Law, US National Security Law and International Law and will engage in analysis about current policy approaches to emerging national security threats.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 8613 (2) Seminar: Civil Liberties Litigation
Studies issues unique to the prosecution and defense of civil liberties lawsuits. Discusses litigation strategies with reference to lawsuits currently pending in the federal courts.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Law

LAWS 8628 (2) Seminar: Law, Power, and Politics
Draws upon various works of political theory, social theory, and jurisprudence to examine different conceptualizations of politics, power, law, and their relations.
Grading Basis: Letter Grade

LAWS 8645 (3) Seminar: Law and Politics Colloquium: Race in America
A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.
Equivalent - Duplicate Degree Credit Not Granted: PSCI 7191
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Law

LAWS 8648 (2) Seminar: The Law of Politics
Examines the legal framework that governs the political process, including such topics as the political question doctrine, the “right to vote,” the 2000 presidential election controversy, term limits, bicameralism and presentment, campaign finance, direct democracy, and the interpretation of the legislative product (i.e., statutes).
Grading Basis: Letter Grade

LAWS 8650 (3) Seminar: Conflict of Laws
This seminar addresses the conflicts that arise when the significant facts of a case are connected with more than one jurisdiction, whether that jurisdiction belongs to a state, the federal government, or a foreign government. The subject is studied in its theoretical and historical context, with special emphasis on the international aspects of extraterritorial jurisdiction.
Grading Basis: Letter Grade

LAWS 8665 (2) Seminar: Sexuality, Gender Identity, and Law
Examines the regulation of sexuality and gender identity in local, state, and federal law. Explores how sexuality and gender identity shape, and are shaped by, an array of laws and policies, which may include family law, military regulations, tax law, employment law, trusts and estates, obscenity law, and criminal law.
Grading Basis: Letter Grade

LAWS 8701 (2) Seminar: Counseling Families in Business
Explores the legal aspects of owning, managing and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business and conflict resolution.
Recommended: Prerequisites LAWS 6104 and LAWS 6157 and LAWS 6211 and/or LAWS 7409.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 8705 (2) Seminar: Affordable Housing
Explores the policy, legal and practical dynamics that drive the development and preservation of privately owned, government subsidized affordable housing. Investigates the nature of the market for housing, with particular emphasis on multifamily rental housing and debates about market failure in that context and then outline and contrast the major regulatory responses to such market failure. Explores how subsidy programs work in practice, focusing on model documents to frame sample transactions.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public Law

LAWS 8718 (2) Seminar: Modern Theorists and Law
Considers the work of Levi Strauss, Steven Lukes, Pierre Bordieu, Alfred Schutz, Anthony Giddens, Culler, David Harvey, Denis Cosgrove, Michel Foucault, and Emily Martin with respect to social control and law. Focuses on the way in which social control is exercised through the organization of space, time, and the human body. Topics include consideration of meaning, intersubjectivity in the law, social construction of time, and the body as a real and cultural artifact.
Grading Basis: Letter Grade

LAWS 8722 (2-3) Seminar: Advanced Energy Law
Provides an opportunity for students to further develop their knowledge of the field and to engage in a substantial writing project. Examples of possible topics include hydraulic fracturing, regulation of air emissions from power plants, the smart grid, transmission siting and development, the ratemaking process, design and regulation of electricity markets, energy finance or comparative study of energy regulation.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian
LAWS 8725 (2) Seminar: Advanced Topics in American Indian Law
Examines a variety of current issues related to American Indian Law. Topics will change to reflect the subjects that emerge at each time that the seminar is offered. Some examples of topics considered include legal protections for American Indian religion and culture, cultural property, Tribal law, gaming law, and Native American natural and cultural resources law. Department enforced corequisite: LAWS 7725.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 8728 (2) Seminar: Critical Theory Colloquium
Surveys critical legal theory; introduces the discipline of analytical engagement with law review literature; feminist legal theory, and critical race theory. Offers a deeper understanding of the purposes behind legal reforms, the interaction between law on the books and law in action, how different groups experience the law in different ways and difficult yet rewarding nature of working through seemingly intractable and emotionally charged race, sex and class issues.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Jurisprudence and Perspective

LAWS 8755 (2) Seminar: Higher Education and the Law
Examines the goals, governance, norms, and ideals of American institutions of higher education, and how those policies are shaped by the legal system. Examines the legal relationship between institutions of higher education and its various constituents: faculty, presidents, governing boards, students, alumni, and staff. Spans several traditional doctrinal categories, including contract, torts, employment law, constitutional law, intellectual property, tax, and antitrust.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Government and Public

LAWS 8765 (2) Seminar: Gender, Law, and Public Policy
Introduces students to various schools of feminist theory and examines the relationship between feminist theories and concrete problems in such areas as constitutional law, education law, employment discrimination, family law and criminal law.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Family, Gender, and Health

LAWS 8775 (2) Seminar: Advanced Topics in Health Law and Policy
Addresses advanced legal issues in representing physicians, long-term care institutions, hospitals, and other health providers. Issues range from economic policy, distributive justice, and bioethical questions to antitrust and regulatory issues. To be taught at Health Sciences Center.
Recommended: Prerequisite LAWS 7425.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Health Law

LAWS 8785 (2-3) Seminar: Access to Justice
Explores the scholarship that has developed around the provision of legal services - or the lack of legal services - for those who cannot afford market prices for attorneys. The seminar will also examine recent efforts to provide empirical support for the range of political claims that are made about access to the legal system.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Electives

LAWS 8795 (2) Seminar: Special Topics in Law and Feminism
Provides an introduction to core concepts of human rights, women's rights and feminism. Examination of particular fields of law through feminist lenses, issues of gender and human rights, and feminist legal approaches in other countries or in comparative/cross-cultural perspectives.
Grading Basis: Letter Grade

LAWS 8808 (2) Seminar: Rhetoric and the Art of Persuasion
Explores recent work in rhetoric to identify the principles and techniques of effective persuasion in law. Examines the ways in which cognition, language, imagery, metaphor, narrative, and scene setting shape the ways in which lawyers and judges strive to persuade each other.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Litigation and Procedure

LAWS 9002 (3) Public Land Law
Deals with the legal status and management of resources on federal lands, including national forests, parks and BLM lands. Explores federal law, policy, and agency practice affecting the use of mineral, timber, range, water, wildlife and wilderness resources on public lands.
Requisites: Requires prerequisite course of LAWS 6112 (minimum grade D). Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9003 (3) Ethical Organizations and Professionals
Provides students, particularly those in the Master of Studies in Law (MSL) in Ethics and Compliance program, the opportunity to examine what drives ethical behavior within organizations and the role that ethics and compliance professionals play in promoting ethical behavior. Investigates ethical challenges and decision making, methods to assess ethical organizational culture and qualities of ethical leadership.
Grading Basis: Letter Grade

LAWS 9005 (3) Introduction to U.S. Law for MSL Students
Provides an overview of the US legal system and will help MSL students begin to 'think like lawyers'. Students will be provided with the necessary vocabulary and skills to use legal resources and legal reasoning in academic and professional environments, including reading and analyzing cases, statutes and regulations, doing legal research, and applying existing law to the issue at hand to predict answers to legal questions.
Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.
Grading Basis: Pass/Fail
Additional Information: Departmental Category: Electives

LAWS 9025 (2-3) Introduction to U.S. Law For LLM Students
Reviews the fundamentals of the U.S. legal system, including an overview of the U.S. Constitution, federalism, the structure and function of courts, sources of legal authority, and common-law methodology.
Requisites: Restricted to students in the LLM program.
Grading Basis: Letter Grade
LAWS 9061 (1) Contract Drafting
Begins with value creation by transactional lawyers, and emphasizes the opportunity for lawyers to reduce information and agency costs, and mitigate strategic behavior by using tools such as disclosure, representation and warranties, incentive compensation and earnouts. Shifts to negotiation and drafting, focusing on basic drafting principles and strategies to advance one's clients' interests. Introduces the basic framework of contracts (recitals, reps and warranties, capitalized terms, definitions, indemnifications and escrow).
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 9101 (4) Deals: Engineering Financial Transactions
Explores the business lawyer's role in creating value by helping clients identify, assess and manage business risks through efficient contract design while achieving the optimal legal, tax or regulatory treatment for the deal. Includes case studies of actual transactions.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 9103 (1) Ethics of Patent Practice
Patent agents are not licensed to practice law in any state and therefore courts, clients and practitioners are often faced with uncertainty in defining the ethical obligations of a patent agent and the consequences of failure to fulfill those obligations.
Grading Basis: Letter Grade

LAWS 9104 (3) Wills and Trusts
Covers intestate succession; family protection; execution of wills; revocation and revival; will contracts and will substitutes; creation of trusts; modification and termination; charitable trusts; fiduciary administration, including probate and contest of wills; construction problems in estate distribution.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Property

LAWS 9111 (4) Business Law Colloquium
Business law scholars from CU and around the country present research papers at this weekly colloquium. Topics may include contracts, corporate law, securities regulation, tax, intellectual property, venture capital and private equity and the legal profession. No prior knowledge of law and economics is expected, although some knowledge of business organizations will be useful.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 9112 (2-3) Advanced Natural Resources Law
Provides in-depth study and analysis of current problems in natural resources law, using historical, literary and scientific materials. Includes field-trip and requires additional field trip expenses.
Repeatability: Repeatable for up to 5.00 total credit hours.
Requisites: Restricted to Law (LAWS) students only.
Recommended: Prerequisite LAWS 6112 or students must have taken or be currently enrolled in any three of the following, LAWS 6002, LAWS 6112, LAWS 6302 or LAWS 7725.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9167 (3) Partnership Taxation
Examines the federal income taxation of partnerships and other pass-through entities, which represent most small businesses in the United States. Topics may include the allocation of operating income and deductions among owners, contributions and distributions of property, and acquisitions and disposals of partnership interests by partners.
Requisites: Requires prerequisite course of LAWS 6007 (minimum grade D). Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Taxation

LAWS 9209 (4) Natural Resources Law Clinic
Engages in litigation and advocacy aimed at protecting the natural resources of the Rocky Mountain region. Students will represent clients in matters involving public lands, wildlife, and other resources. The seminar component will focus on practical aspects of environmental litigation, including administrative practice and decision-making, client representation, citizen suits and ethical issues.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Practice: Clinical and Simulation

LAWS 9221 (2) Advanced Applied Compliance
Enables students to discover what is takes to transform a company’s compliance program beyond a “paper program.” The class will explore the elements of a strong, effective and mature Compliance program. Taught by an experienced compliance professional with the support of several expert guests, the class will investigate how the best Compliance programs augment compliance policies with processes, controls and continuous monitoring.
Grading Basis: Letter Grade

LAWS 9222 (1-2) Topics in Compliance
Learn how to assess allegations of wrongdoing and recognize situations in which internal investigations are appropriate. Students will learn how to develop an investigation plan and will be introduced to the primary steps in an investigation including the following: initiating an investigation, locating and gathering evidence, conducting interviews, analyzing evidence, articulating conclusions and drafting investigative reports.
Repeatability: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Master of Studies in Law (MSL) or Law-JD students only.
Grading Basis: Letter Grade

LAWS 9223 (1-2) Investigations
Learn how to assess allegations of employee wrongdoing and recognize situations in which internal investigations are appropriate. They will learn how to develop an investigation plan and will be introduced to the primary steps in an investigation including the following: initiating an investigation, locating and gathering evidence, conducting interviews, analyzing evidence, articulating conclusions and drafting investigative reports.
Repeatability: Repeatable for up to 6.00 total credit hours.
Grading Basis: Letter Grade
LAWS 9226 (1-3) Communications for Compliance Professionals
Develops the tools students will need to thrive in the law school's MSL program. Deepens students' understanding of the United States legal system and develops their ability to communicate effectively and appropriately in writing and orally to their intended audience, and research, organize and explain their ideas clearly, using appropriate writing conventions.
Requisites: Restricted to Master of Studies in Law (LAWS-MSL) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Research and Writing

LAWS 9246 (2-3) Intro to U.S. Legal Practice: Legal Writing, Research and Analysis
Assist LL.M. students develop their legal writing skills as well as teach practical skills needed in the U.S. legal environment including locating cases, statutes and other legal source materials, citing legal authority correctly, and checking the validity of case citations.
Requisites: Restricted to students in the LLM program.
Grading Basis: Letter Grade

LAWS 9341 (3) Law and Economics of the Information Age
Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "Unbundling" policies to advance competition, and how intellectual property and antitrust rules should be developed.
Requisites: Requires prerequisite course of LAWS 7201 or 7241 or 7301 (minimum grade D). Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 9401 (3) Securities Regulation
Stresses statutory interpretation of the various federal statues regulating the issue of corporate securities and the cases and regulations that have arisen out of those statutes.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 9409 (3) Legal Negotiation
Explores the fundamentals of effective negotiation techniques and policies for lawyers. Students engage in mock negotiations of several legal disputes.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 9410 (3) International Trade Law
Examines the law of the World Trade Organization and the General Agreement on Tariffs and Trade. Examines rules restraining national restrictions on trade that addresses tariff and non-tariff barriers, discrimination, regionalism, anti-dumping, countervailing duties and safeguards. Considers the relationship between trade and other regulatory areas or social values, such as environmental protection, health and safety standards, human rights, intellectual property protection.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: International

LAWS 9450 (2) Regional Human Rights Protection for MSL and LLM Students
Examines how human rights law and policy is created, interpreted and enforced within regional systems. Explores the main sources of human rights law including treaties, international customary law, constitutional law, municipal law, comparative law and principles; the jurisprudence of regional courts and tribunals, the institutions that support human rights advocacy and the cultural perspectives of affected communities and peoples.
Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.
Grading Basis: Letter Grade

LAWS 9701 (2) Counseling Families in Business
Explores the legal aspects of owning, managing and participating in a successful family business system, including corporate structure, legal issues, succession planning and estate management, internal capital markets in private enterprise, ownership issues in private businesses, how lawyers can assist with family governance, planning for and managing family philanthropy, gender issues in family business, and conflict resolution. Recommended prerequisites: LAWS 6104 and LAWS 6157 and LAWS 6211 and/or LAWS 7409
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Business

LAWS 9712 (3) Climate Change Law and Policy
Examines the science of climate change and the broader role of science in public policymaking. Reviews the changing legal landscape to abate greenhouse gas emissions, and key issues in policy design. Reviews the Supreme Court's April 2, 2007 decision in Massachusetts v. EPA, overturning EPA's refusal to regulate greenhouse gas pollution from motor vehicle tailpipes, and the aftermath in the courts, Executive Branch and Congress.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian

LAWS 9722 (3) Energy Law and Regulation
Provides an introduction to energy law and regulation in the United States. Covers basic principles of rate regulation and public utilities, the division of jurisdiction between federal and state governments, and the key federal statutes and regulatory regimes governing natural gas, electricity, and nuclear power. Focuses on the basic federal frameworks for natural gas and electricity regulation, with an emphasis on understanding the messy and uneven transition to wholesale competition in these sectors and, in the electricity context, the experience with state restructuring and retail completion.
Requisites: Restricted to Law (LAWS) students only.
Grading Basis: Letter Grade
Additional Information: Departmental Category: Environment, Natural Resources and American Indian
Law - Master of Laws (LLM)

Colorado Law offers a one-year, full-time LLM degree in the following areas:

- Natural Resources, Energy & Environmental Law
- International Law & Human Rights
- Indigenous Peoples Law & Policy
- Entrepreneurship & Business Law
- Intellectual Property, Technology and Telecommunications Law
- US Law for Foreign Lawyers

Colorado Law’s LLM degree program is global in scope and is for talented lawyers from diverse backgrounds and countries. The LLM program fully immerses students in Colorado Law and offers inclusive access to programming, courses/modules, and the greater CU Boulder campus; our JD and LLM students learn side-by-side and from each other. At Colorado Law, we recognize that each of our LLM students have unique and diverse backgrounds and experiences, backgrounds and experiences that can enrich our community of scholars and students and help to advance Colorado Law’s intellectual leadership in the world.

LLM program course options are diverse, and LLM students have the ability to design a program of study suited to his or her academic and professional interests. While students complete most courses at the law school, they also have the opportunity to complement their legal studies with graduate-level courses in other departments within the greater university.

Requirements

The Master of Laws requires 24 credits.

For more information, contact Director of International Programs, Jimmy Ilseng at jimmy.ilseng@colorado.edu.

Learning Outcomes

Colorado Law’s mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.
- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

Law - Master of Studies in Law (MSL)

Colorado Law’s Master of Studies in Law (MSL) degree is a one-year, 28-credit, no-LSAT-required program that enables students who hold at least an undergraduate degree to obtain legal training short of a full Juris Doctor (JD). Increasingly, emerging job markets have openings that require some legal knowledge and employers are assigning a number of legal tasks traditionally performed by lawyers to non-lawyers. Colorado Law’s MSL will prepare students to obtain and excel in those positions.

Ethics and Compliance Curriculum

The ethics and compliance track trains students to become compliance and ethics officers at large corporations, as well as at nonprofit entities, such as colleges, universities, and hospitals. These organizations are subject to an increasing number of legal requirements and need trained professionals to lead effective in-house programs to ensure compliance with statutes and regulations.

This track prepares students to develop, improve, and manage ethics and compliance programs and help organizations obey the law, reduce the risk of fraud, other law-breaking, and misconduct, and mitigate their firms’ legal liability and reputation risk. Students have the opportunity to focus on specific fields of law, such as privacy/cybersecurity, healthcare and financial services.
Requirements

Colorado Law’s Master of Studies in Law (MSL) in Human Rights is an advanced degree program that offers training in international human rights law and policy for professionals from a wide variety of academic backgrounds. The MSL in ethics and compliance is designed to prepare prospective ethics and compliance officers in privacy/cybersecurity, health care and financial services.

All MSL students will take courses designed specifically for MSL students—one that introduces them to the American legal system, and one that introduces them to legal research, writing and analysis. In addition to those introductory courses, MSL students will take required and elective courses, alongside JD students, relevant to their specialty track.

Learning Outcomes

Colorado Law’s mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.
- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

Law - Juris Doctor of Laws (JD)

Colorado Law’s three-year, full-time Juris Doctor (JD) degree provides a strong, well-rounded legal education with a rich mixture of theory, policy, doctrinal analysis and professional skills. Students have broad flexibility to meet their individual interests and needs.

Areas of Academic Strength

Environmental, Energy and Natural Resources Law

Ranked consistently among the very best in the country, environmental and natural resources law has been a key focus of the Colorado Law curriculum for more than half a century, and is one of the strongest and deepest programs of its kind.

Technology and Intellectual Property Law

Colorado Law has developed one of the nation’s most comprehensive legal programs oriented around information technology. Technology lawyers address interesting policy challenges and novel legal issues, and rank among the most satisfied within the legal profession. Colorado Law is the right place at the right time for those interested in exploring the frontiers of entrepreneurial law, technology policy and intellectual property.

Entrepreneurial and Business Law

Colorado Law provides a robust curriculum in business law, tailored for aspiring deal lawyers in Boulder, Denver and beyond. Boulder has a vibrant entrepreneurial community with many start-up and emerging companies. We place students in small law firms that serve small business and emerging companies, as well as in larger law firms who serve traditional larger corporate clients. In recent years, we have placed students in interesting and fulfilling in-house positions.

American Indian Law

At Colorado Law, we believe that American Indians deserve the very best lawyers and that we have an obligation to train them. Our American Indian Law Program faculty, including the nation’s top scholars and practitioners in the field, offers a full slate of introductory and advanced classes in the field to prepare students for all aspects of Indian law practice, and we now have dozens of successful alumni practicing Indian law in tribal government, federal agencies and at law firms. Colorado Law graduates are equally prepared to work on impact litigation, economic development, policy advocacy, individual legal services and tribal governance in Indian law. Our American Indian Law Program also appeals to many students with broader practice interests in natural resources, public lands, property, museum and art law, technology, entrepreneurship, family law and beyond. Indeed, because American Indian law raises questions regarding the rule of law and legal pluralism, the contours of sovereignty and governance, cross-cultural representation and minority rights and interdisciplinary study and practice, it offers important intellectual development opportunities for all Colorado Law students.

Juvenile and Family Law

Juvenile and family law covers a broad range of practice areas, such as marriage, divorce, custody, visitation, family support, child abuse and neglect, delinquency, adoption, estate planning, education law and elder law. The Juvenile and Family Law Program (JFLP) provides students with opportunities to acquire specialized knowledge in this field, develop a network of, and foster collaboration between, students, academics, and practitioners and engage in interdisciplinary work in the study and practice of the field. The Program includes specialized courses, research projects, externships and clinical opportunities.

Requirements

First Year

First-year courses lay the foundation and all JD candidates take these courses to learn to “think like a lawyer.” Common law courses taught in the Socratic Method allow students to develop legal reasoning and critical thinking skills.

Fall Semester

- **Civil Procedure (LAWS 5303):** Rules governing pleading, joinder of parties, discovery, jurisdiction of courts, right to jury trial, appeals and res judicata and collateral estoppel, with emphasis on the Federal and State Rules of Civil Procedure.
- **Contracts (LAWS 5121):** Contract liability, offer and acceptance, consideration, frauds statute, contract remedies, the parol evidence rule, contract performance, conditions, changed circumstances.
- **Legal Writing I (LAWS 5226):** Legal analysis and document preparation, objective legal analysis techniques, legal rule synthesis, authority use to explain rules and rule application to case facts.

• Torts (LAWS 5425): Nonconsensual allocation of losses for civil wrongs, focusing on negligence and strict liability.

**Spring Semester**

• Legal Writing II (LAWS 5223): Appellate brief and document preparation, oral arguments before a three-judge mock court, techniques of persuading a court to accept a client’s view of the law and facts, professional judgments within ethical boundaries and lawyer credibility.

• Constitutional Law (LAWS 6005): Constitutional structure, including judicial review, federalism, separation of powers and constitutional rights of due process and equal protection.

• Criminal Law (LAWS 5503): Statutory and common law of crimes and defenses, the procedures by which the law makes judgments as to criminality of conduct, constitutional limits.

• Property (LAWS 5624): Personal property, estates and interests in land, landlord—tenant, basic land conveyancing and private land use controls.

**Second and Third Years**

The elective program in the second and third years builds upon the foundation laid in the first-year curriculum. Students must take Evidence (LAWS 6353) and Legal Ethics Professionalism (LAWS 6103) courses and a seminar (labeled as a LAWS 8000-level course).

**Experiential Learning**

Students who start law school in the fall 2016 semester or later also have to complete six credit hours of experiential courses. Experiential courses are simulation courses, law clinics and externships. At least two of these credits must be obtained in courses with regularly scheduled class sessions as specified in Miscellaneous Rule 36(A). Externships do not qualify as courses with regularly scheduled class sessions, and Law School Rules generally cap credits that may be earned in externships at 4 credits. The registrar’s office will post which courses in a given semester meet the definition of simulation courses before registration begins for that semester.

No student shall receive more than 14 credit hours toward the JD degree from co-curricular activities such as journals, moot court and trial competitions; Independent Legal Research; courtroom observation courses; externships; or coursework completed in another department, school or college of the university or at another institution of higher learning.

Students must complete eighty-nine (89) total credit hours with a numerical GPA of at least 2.0 and all other requirements as laid out in the Law School Rules to receive the Juris Doctor.

**Elective Courses**

**Business**

• Accounting Issues for Lawyers
• Agency, Partnership and the LLC
• Antitrust
• Bankruptcy
• Business Planning
• Business Transactions
• Corporate Finance
• Corporations

**Criminal**

• Capital Punishment in America
• Criminal Procedure: Investigative Phase
• Criminal Procedure: Adjudicative Process
• Post Conviction Criminal Procedure
• White Collar Crime

**Family, Gender and Health**

• Domestic Violence
• Family Law
• Gender, Law, and Public Policy
• Health Law I: Finance, Administration and Organization of Health Care
• Health Law II: Medical Malpractice Litigation
• Juvenile Justice
• Parent, Child and State
• Sexuality and the Law

**Government and Public Interest**

• Administrative Law
• Education Law
• Election Law
• Employment Discrimination
• Employment Law
• Federal Courts
• First Amendment
• Labor Law
• Legislation
• Local Government
• Race and American Law

**Intellectual Property, Technology and Telecommunications**

• Computer Crimes
• Copyright
• Introduction to Intellectual Property Law
• IP Counseling
• IP and Technology Contracting
• Patent Law
• Patent Litigation
• Privacy and Security in the Digital Age
• Telecommunications Law and Policy
• Trademark and Unfair Competition

**International**

• Conflict of Laws
• Law and Development
• Immigration and Citizenship Law
• International Business Transactions
• International Dispute Resolution
• International Environmental Law
• International Human Rights
• International Law
• International Trade Law
• Refugee and Asylum Law

Jurisprudence and Perspective
• Class and Law
• Critical Theory Colloquium
• Economic Analysis of Law
• Gender and Law
• Jurisprudence

Litigation
• Advanced Appellate Advocacy
• Advanced Evidence
• Complex Civil Litigation
• Federal Litigation: Everything but the Trial
• Motions Advocacy
• Trial Advocacy

Natural Resources, Energy and Environmental Law
• American Indian Law I
• American Indian Law II
• Climate Change Law and Policy
• Energy Insecurity and Sustainable Law
• Energy Law and Regulation
• Environmental Law
• Foundations of Natural Resources Law and Policy
• Mining and Energy Law
• Oil and Gas
• Public Land Law
• Toxic and Hazardous Waste
• Water Law
• Wildlife and the Law

Practice—Clinical
• American Indian Law Clinic
• Civil Practice Clinic
• Criminal Defense Clinic
• Criminal and Immigration Defense Clinic
• Entrepreneurial Law Clinic
• Extern Program
• Juvenile and Family Law Clinic
• Natural Resources, Energy, and Environmental Law Clinic
• Sustainable Community Development Clinic
• Technology Law and Policy Clinic

Practice—Simulation
• Advanced Trial Advocacy
• Alternative Dispute Resolution
• Appellate Advocacy Competition
• Arbitration
• Legal Negotiation
• Mediation
• Motions Advocacy
• Trial Advocacy
• Trial Competition

Property
• Advanced Real Estate Transactions
• Construction Law
• Estate Planning
• Land Use Planning
• Real Estate Planning
• Real Estate Transactions
• Wills and Trusts

Research and Writing
• Advanced Legal Research
• Advanced Legal Writing

Dual Degree Programs
Colorado Law students take advantage of an array of rich opportunities for interdisciplinary study through other CU schools and colleges, in addition to the University of Alberta. Students apply separately to and are admitted by the two schools under their respective admissions requirements.

The schools work in cooperation to select courses for the programs that allow students to earn the dual degrees in less time than it takes to earn each degree separately. Only credit hours earned after law school enrollment count toward the JD degree, and the first year of the JD curriculum must be taken exclusively at Colorado Law.

For additional information, see the Dual Degrees and Certificates (https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/) page on the Colorado Law website.

Dual Degrees with CU Boulder Programs
- Juris Doctor/Master of Business Administration (p. 1408) (JD/MBA) with the Leeds School of Business
- Juris Doctor/Master of Science in Environmental Studies (p. 1181) (JD/MS) with the Environmental Studies Program
- Juris Doctor/Doctorate in Environmental Studies (p. 1185) (JD/PhD) with the Environmental Studies Program

Dual Degrees with Other CU Programs
- Juris Doctor/Doctor of Medicine (JD/MD) with CU Denver’s School of Medicine on the Anschutz Medical Campus in Aurora
- Juris Doctor/Master of Public Administration (JD/MPA) with CU Denver’s School of Public Affairs
- Juris Doctor/Master of Urban and Regional Planning (JD/MURP) with CU Denver’s College of Architecture and Planning

Dual Degrees with Other Universities
- Juris Doctor/Bachelor of Laws (JD/LLB) with the University of Alberta Faculty of Law, Canada. This program is currently on hold and not accepting applications.

Learning Outcomes
Colorado Law’s mission is to be an outstanding public law school that provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

As this mission statement makes clear, we believe that excellence in legal education requires a commitment to a plurality of purposes. To achieve some of those purposes, Colorado Law has identified the following learning outcomes for its students:

- Knowledge and understanding of legal theory and doctrine.
- Related substantive knowledge, including societal context.
- Legal analysis.
- Legal research skills.
- Oral and written communication.

- Professional and ethical responsibilities to clients and the legal system.
- Other professional skills.

American Indian Law - Graduate Certificate
Colorado Law offers an American Indian law certificate demonstrating the completion of a concentrated course of study in the legal issues facing Native peoples and American Indian tribes. This certificate is attractive to legal, tribal and governmental employers, as well as employers seeking to do business with tribes and tribal members.

Program Requirements
Students must complete at least 92 credit hours (89 credit hours are required for the JD), at least 18 of which are in designated Indian law and related courses.

**Civil Rights and Racial Justice - Graduate Certificate**

The Civil Rights and Racial Justice graduate certificate directly prepares students for a career in civil rights and racial justice law, focuses their education on issues in race and the law and anti-subordination, and seeks to address structural racism by studying its causes and effects.

### Requirements

The Civil Rights and Racial Justice Certificate can be completed through a focused but flexible range of coursework. The certificate requires a participating student to earn no less than 92 semester hours of course credit for graduation (as contrasted with the usual 89 semester hours), and to earn at least 18 of these semester hour credits in the area of civil rights and/or racial justice. The certificate may be completed within the normal three year law degree period if a student takes a somewhat heavier than average load in each semester after completing the first year of law school.

### Minimum Grade Point Average

A student who satisfies all of the course requirements for this certificate program would be awarded the certificate if the student earned a grade of at least a C in each required course. A student who satisfies all of the course requirements for a certificate program would be awarded the certificate "with honors" if the student earned at least an A- average in courses designated by the student as satisfying the certificate requirements.

### Required Courses and Credits

After completion of the first year of law school study, students are required to select from the following courses to meet their 18 credits. However, consistent with other certificate programs, a student may seek permission from the faculty advisor of the certificate program to receive certificate credit for one other course (including a clinic) not listed below, upon a showing that the course/clinic will meaningfully focus on civil rights or racial justice law. Law students who wish to participate in the certificate program should consult the Law School Registrar and the certificate faculty advisor to discuss the certificate requirements, plan their schedule and obtain approval for any non-specified electives courses in advance of taking such courses for certificate credit.

Integrative Practice/Externships
Consistent with the limitations on practice hour credits, participants could dedicate 2 credit hours toward the Certificate credit requirements or the Capstone requirement using the following:

- Externships in the field of civil rights, racial justice, international human rights, or American Indian/indigenous peoples law and policy. These placements could be at agencies, non-profits, or law firms focusing on this field, such as the ACLU, the Southern Poverty Law Center, the EEOC, or could include acting as a research assistant for a professor.

1 This list of elective courses may be altered by the certificate advisor(s).

Entrepreneurial Law - Graduate Certificate

The entrepreneurial law certificate coordinates Colorado Law’s strengths and business-law related assets in the areas of entrepreneurial and technology law, such as the Silicon Flatirons Center (https://siliconflatirons.org/), the Entrepreneurial Law Clinic (https://www.colorado.edu/law/academics/clinics/entrepreneurial-law-clinic/) and the Colorado Technology Law Journal. It is awarded to law students who complete coursework reflecting a concentrated study of issues typically faced by transaction-side lawyers, and signals to prospective employers that a student possesses a skill set with applicability across issues of transactional law.

Requirements
Certificate requirements include:
1. at least 92 credit hours (89 is required for the J.D.), and
2. at least 21 of the 92 credit hours in the area of entrepreneurial law.

This includes at least 3 credit hours in a Business School course and participation in an Experiential Offering relevant to the certificate. Visit the Rules of the Law School (https://www.colorado.edu/law/about/rules/) webpage for complete details, including a full list or relevant electives to be used to satisfy the 21 credit-hour requirement.

**Clinics**

Entrepreneurial Law - Graduate Certificate

Clinical and/or additional practice requirement as a capstone project, students are required to complete one of the below clinics or externships (or another clinic/externship approved by the faculty advisor)
Environmental, Natural Resources and Energy Law - Graduate Certificate

The University of Colorado Law School has a proud tradition as a leader in the field of natural resources law, and it consistently ranks among the best programs in that field. The environmental, natural resources and energy law certificate recognizes the strength of the law school’s natural resources program by affording law students the opportunity to design an educational program that provides a solid foundation in natural resources law, even while ensuring that they receive a well-rounded legal education. The certificate also offers prospective employers evidence of a student’s interest and commitment to the study of natural resources law.

Requirements

At least 92 total credit hours in law school courses or in graduate-level courses approved for the certificate program by the Dean’s Office, in consultation with the environmental, natural resources and energy law certificate advisor.

A student who satisfies all of the course requirements for the environmental, natural resources and energy law certificate will be awarded the certificate with honors if the student earned an average of at least an A- for classes designated by the student that satisfy the requirements for the certificate. A grade of C is required for all certificate courses to count towards completion.

At least 18 credit hours in natural resources law and policy courses, in addition to administrative law, as set forth below.

1 If circumstances warrant, the MBA requirement may be waived after consultation with the program advisor and completion of a substitute course (certificate participants should ensure their compliance with Law School Rule 22 as it applies to Business School offerings).
Health Law and Policy - Graduate Certificate

Law students may demonstrate to employers that they are prepared to practice health law and lead in the administration, financing, organization, policy-making and delivery of health care by earning a health law & policy certificate (HLP).

The HLP certificate not only prepares students to practice law in areas such as health care administration, organization, financing, public interest advocacy and public health, but also allows students to take advantage of the wealth of resources and courses related to health and health care in the Law School and throughout the University of Colorado system. Colorado Law surveyed health law employers and heard from them that the HLP certificate will move law graduate resumes to the top of the applicant pile.

For more information, contact the program director.

Requirements

To qualify for the HLP certificate, a student must earn 92 credit hours—three more than required for a regular JD degree—and at least 20 credit hours must be earned in courses approved in the health law and policy curriculum. Students awarded the health law & policy certificate will carry the notation of their concentration on their Law School transcripts. Moreover, students may earn the "Certificate With Honors" notation by earning a cumulative average grade of at least A- in the designated courses.

A full list of the designated courses and HLP certificate requirements may be found in Law School Rules (https://www.colorado.edu/law/about/rules/#_Toc385575490).

International Law - Graduate Certificate

The international law certificate program is designed to ratify a student’s completion of a concentrated course of study in international law. This certificate will provide students with a grounding in the foundations of private and public international law, and also reflects the interdisciplinary nature of the ever-growing international law practice, from international business transactions to international human rights. This certificate signals to potential employers and others that the student has engaged in a sustained course of study regarding international law and practice.

Requirements

Law students who wish to participate in the international law certificate program should contact the Law School Registrar and the certificate program advisor.

The international law certificate requires completion of the normal requirements for the JD, and the additional 3 credit hours that are required (total of 92 credit hours). The program can be completed within the normal three-year law degree if a student takes a somewhat heavier than average course load in each semester after the first year of study.

Students must earn a grade of at least a C in each required course. A student who satisfies all of the course requirements for a certificate will be awarded the certificate if the student earned at least a C in each course designated by the student as satisfying the certificate requirements.

Required Courses and Credits

A minimum of 18 credit hours must be obtained in the area of international law as follows:

Total Credit Hours 18

The certificate program advisor may approve additional classes as they reasonably fit within the framework of the program requirements below. In the event that a required course is not taught during an academic year, the program advisor shall have discretion to authorize a reasonable substitute course as satisfying a program requirement.

Juvenile and Family Law - Graduate Certificate

Juvenile and family law covers a broad range of practice areas, such as marriage, divorce, custody, visitation, family support, child abuse and neglect, delinquency, adoption, estate planning, education law and elder law. The juvenile and family law program (JFLP) provides students with opportunities to acquire specialized knowledge in this field, develop a network of, and foster collaboration between students, academics and practitioners, and engage in interdisciplinary work in the study and practice of the field. The program includes specialized courses, research projects, externships and clinical opportunities.

Requirements

Admission Requirements

Interested students should submit a completed Certificate Application (https://cuboulder.qualtrics.com/SE/?SID=SV_a5I6EoglyAxNy2).

Required Courses Credits

Colorado Law offers a juvenile and family law certificate, demonstrating a student’s completion of a concentrated course of study in juvenile and family law.

Students must earn 92 total credits, which must include 18 in the field of juvenile and family law.

A student who satisfies all of the course requirements for the certificate will be awarded the certificate if the student earned at least a C in each course designated by the student as satisfying the certificate requirements. A student who satisfies all of the course requirements for the certificate would be awarded the certificate "with honors" if the student earned a cumulative grade point average of at least an A- in courses designated by the student as satisfying the certificate requirements.
Tax Emphasis - Graduate Certificate

The Law School offers a program of law study that leads to a Juris Doctor degree with an emphasis in taxation. The program signifies tax law experience beyond that normally obtained by law graduates, but not as extensive as that obtained in a master's of taxation degree program.

Requirements

Program Requirements

Students must earn at least 92 credit hours (89 are required for the JD) with at least 18 of the credits in taxation.

1 Consistent with law school limitations on practice credit hours and subject to the approval of the Program Advisor, participants may earn up to 2 credit hours toward the Certificate requirements through additional practice opportunities as defined in this section.

Business school and economics department courses taken for Law School credit under the tax emphasis program are limited to 6 semester credit hours and must have received prior approval from the faculty. Students may take more than the required 18 credit hours of tax courses.

Students must receive at least a B in the business school course or in the public finance course to count for Law School credit. The business school or public finance courses will be treated as pass/fail courses for the Law School transcript; that is, these courses will count toward the 92 hours required for the degree, but will not be taken into account in computing a law student’s grade point average.

Graduating in Three Years

Students can complete the program within the normal three-year law degree period if they take a somewhat heavier than average load in each semester after the first year of law study. Law students who wish to
participate in the program should submit an online enrollment form to both the program director and the law school registrar. See law school website for details.
CONTINUING EDUCATION CATALOG

The mission of the Division of Continuing Education is to provide quality, innovative, lifelong learning opportunities to a diverse student population by extending the educational resources of the University of Colorado Boulder. Continuing Education collaborates with departments across campus to offer a variety of evening and online courses for university credit, graduate certificates and degree programs, as well as K-12 STEM programming and outreach opportunities for faculty. The Division facilitates nondegree enrollment in main campus classes for visiting students, high school students and auditors. (Nondegree refers to students who have not been formally admitted to a CU Boulder degree program.) Continuing Education is also involved in the administration of CU Boulder’s Summer Session. Only university-approved faculty teach in Continuing Education programs.

ACCESS

In conjunction with CU Boulder academic departments, ACCESS (http://ce.colorado.edu/programs/access/) (Available Credit Courses for Eligible Special Students) enables nondegree students to enroll in Boulder main campus undergraduate and graduate credit courses after degree-seeking students have registered.

Applied Music Program

The Applied Music Program (http://ce.colorado.edu/programs/applied-music/) offers non-music majors the opportunity to earn CU credit for beginning or continuing music lessons on guitar, piano, voice, winds, brass, drums, percussion or strings. Instruction is available in individual or group sessions depending on the instrument.

CE Evening Credit Program

Offered in conjunction with CU Boulder’s academic departments, the CE Evening Credit Program (http://ce.colorado.edu/programs/evening-credit/) provides credit courses in the evening either on the Boulder campus or in a hybrid remote/online format. These smaller-sized classes are provided through various departments.

CE Online Credit Program

The CE Online Credit Program (http://ce.colorado.edu/programs/online-credit/) offers online versions of approved CU Boulder courses from 35 departments on campus. Online courses hold the same breadth, depth and rigor as face-to-face courses while offering students more control over when and where they complete their coursework. A rich collaboration among faculty and instructional designers with expertise in learning technology focuses on ongoing enhancements of quality and innovation. Courses range from traditional semester-long courses to shorter intensive terms and online flexible courses.

CU Complete

The goal of CU Complete (http://ce.colorado.edu/programs/cu-complete/) is to assist former CU Boulder students in the completion of their degrees. Advisors work with each student individually and offer a degree analysis, recommendations, resources and assistance in completing remaining requirements.

Extraordinary Program

The Extraordinary Program provides flexibility to support CU Boulder academic units’ strategic objectives and fiscal goals in serving the unique needs of a variety of student populations, including nondegree, undergraduate and graduate students. The Extraordinary Program collaborates with units across campus to annually schedule over 350 courses that cannot be effectively administered through main campus or other Continuing Education programs. In addition to individual credit and noncredit courses, the Extraordinary Program also enrolls students in select graduate degrees and professional certificates from nearly all schools and colleges.

Finish What You Started

The Finish What You Started program (https://ce.colorado.edu/program-landing/finish-what-you-started/), with support from the American Rescue Plan and the Colorado Opportunity Scholarship Initiative, offers financial assistance and advising and coaching services to undergraduate, in-state students who have taken time off from college coursework, have been economically impacted by the pandemic and have not completed their degrees. Eligible students receive a minimum of $1,500 in scholarships each semester for the duration of the program.

High School ACCESS

Colorado high school juniors and seniors interested in the challenge of university coursework may enroll in ACCESS as part of the High School ACCESS Program (https://ce.colorado.edu/programs/high-school-access/). In addition to earning college credit, students may also earn credit toward high school graduation requirements.

Individualized Instruction

Individualized Instruction provides an opportunity for students to receive credit for university courses by meeting with faculty members outside the regular classroom setting. This option may be used when the student cannot reasonably be expected to enroll in the main campus course.

International English Center

The International English Center (http://iec.colorado.edu/) (IEC) offers a range of comprehensive English language and culture programs designed for international pre-collegiate, undergraduate and graduate students, working professionals and special groups. Students build and refine their communication skills through engaging classroom instruction, experiential learning, extended practice and cultural activities. Full and part-time programs are available. Students can choose from in-person and online formats. Programs include Intensive English, ESL Academic Bridge (for conditionally admitted CU Boulder students), ESL Credit for graduate students, EducationUSA Academy for international high school students, global professional English, military English and leadership communication, teacher training and customized options for special groups. The IEC is authorized to issue a form I-20 for qualified students seeking to study full-time on an F-1 visa. For some programs, qualified exchange visitors may request a form DS-2019 from the IEC to apply for a J-1 visa.

Master of Science in Organizational Leadership

Offered in collaboration with the Graduate School, the Master of Science in Organizational Leadership (https://catalog.colorado.edu/graduate-colleges-schools/interdisciplinary-programs/organizational-leadership-
master-science-ms/) is an interdisciplinary, fully online professional master’s degree that prepares early- to mid-career professionals to succeed as tomorrow’s dynamic leaders. Through coursework that blends business, communications and social sciences, the program develops the knowledge and skills students need to think critically about organizational challenges and how to address them using best practices. Students learn to align others around a shared vision, build and manage effective teams and apply the leadership skills necessary to excel in an increasingly fast-paced and complex work world. Visit the Master of Science in Organizational Leadership website (http://msol.colorado.edu/) to learn more.

Post-Baccalaureate Health Professions Program
The Post-Baccalaureate Health Professions Program (https://www.colorado.edu/cep prere/ is a partnership between the College of Arts and Sciences and the Division of Continuing Education. It is designed for career changers who were academically successful as undergraduates but have not completed the prerequisite science courses needed to apply to graduate medical programs. Students enter the program in a cohort and take all coursework together. The program provides in-depth pre-health advising, academic advising, group and individual tutoring, peer mentors, and social events.

Science Discovery
Science Discovery (https://www.colorado.edu/sciencediscovery/) is a science education outreach organization designed to heighten student interest and increase literacy in science, technology, engineering and math (STEM). Science Discovery connects K–12 students and teachers to CU science through a broad array of virtual, in-person and hybrid programs including summer camps, summer high school enrichment, out of school time classes, homeschool programs, in-school programs, teacher professional development workshops and Teen Science Cafés. Programs capitalize on CU Boulder’s scientific resources, facilities and expertise (including CU graduate and undergraduate students) in order to excite participants about STEM, expose them to a variety of STEM careers and professional and inspire a future generation of scientists and engineers. Science Discovery serves students and teachers throughout the State of Colorado and beyond.

Winter Session
Winter Session (http://www.colorado.edu/winter/) occurs during the winter break between fall and spring semesters, and allows students to take intensive online courses in a short period of time. Winter Session credits count toward the spring semester.

Summer Session
Summer Session (http://www.colorado.edu/summer/) offers more than 900 courses and enrolls about 8,000 students between the months of May and August. Courses in a variety of formats are available to students who wish to enhance or accelerate their academic progress. Courses are also open to students visiting from other colleges, teachers, high school students or others interested in pursuing their professional development or enrichment.

Visit the Summer Session (https://www.colorado.edu/summer/) website to learn more about summer at CU Boulder.

Auditing
Auditing allows interested individuals the opportunity to attend university classes for no academic credit. Auditors must receive permission and obtain a signature from course instructors during the first week of class to be formally added to the roster.

Audited courses will appear on a special non-academic credit transcript; however, no academic credit is awarded. Registered auditors receive class instruction, access to online course materials and library privileges only. Being an auditor at the University of Colorado Boulder does not guarantee eligibility for regular degree or nondegree status.

Note: Admitted degree students, either enrolled or suspended, are not permitted to audit courses. If an admitted degree student is interested in participating in a class without receiving credit, the student must enroll in the course for no credit. Courses taken for no credit are assessed the same tuition rate as courses taken for credit.

Continuing Education Auditors Program
The Senior Auditors program, formerly offered by the CU Boulder Alumni Association, along with the Community Auditors program previously offered by Continuing Education, have been incorporated into the new Continuing Education Auditors program. All community members interested in auditing CU Boulder courses can register using the application and instructor permission form on the Auditors (https://ce.colorado.edu/programs/auditors/) webpage. Contact ceregistration@colorado.edu or call 303-492-5148 for more information.

Office for Outreach and Engagement
Public outreach and community engagement are crucial to the University of Colorado Boulder’s role as a comprehensive public research university and are vital to the Division of Continuing Education’s mission. The Office for Outreach and Engagement (http://www.colorado.edu/outreach/ ooe/) serves the CU Boulder campus and the state by helping to connect research, teaching and creative work with public needs and interests. The office administers the CU Boulder Outreach Awards and other grantmaking programs for faculty-led outreach and engagement projects, manages the campuswide Community Outreach and Engagement Programs (http://www.colorado.edu/outreach/) website, assists with program and proposal design, leads strategic outreach initiatives, organizes the CU on the Weekend lecture series and provides outreach communications support.

CU on the Weekend
CU on the Weekend (https://www.colorado.edu/outreach/ooe/cu- weekend/) is a series of free public lectures offered through the Office for Outreach and Engagement. The series runs during the fall and spring semesters each year and features some of CU Boulder’s most dynamic faculty and cutting-edge work. This program’s delivery may be virtual or in a hybrid format depending on university guidance/policy.

Academic Integrity
Why Do We Have a Student Honor Code?
Mission
The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.
Values
The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

What is a Violation?
Academic Misconduct includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. Cheating:
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one's work/exam and turning in that work/exam as one's own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions, including, but not limited to, exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.

2. Plagiarism. This includes, but is not limited to:
   a. Portrayal of another's work or ideas as one's own;
   b. Improper citation of another's work;
   c. Improper citation of one's own previous work;
   d. Use of paper writing services or technology (such as essay bots) whether paid or unpaid.

3. Resubmission. Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course faculty involved.

4. Fabrication. Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.

5. Lying. Deliberate falsification with the intent to deceive, as it relates to an academic submission.

6. Bribery. Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.

7. Threat. Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. Retaliation. Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.

8. Unauthorized Access. Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member's computer, files, and/or physical space; and/or secure information on an online server.

9. Aiding Academic Misconduct. Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. Sharing course materials, including but not limited to personal notes, in an unauthorized online bank or forum, whether for profit or for free, is strongly discouraged and may result in a referral to the Honor Code.
   b. Sharing personal authentication credentials/login information to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

Resolution Processes
SCCR resolves alleged prohibited conduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

Informal Resolution
This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

Formal Resolution
This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist's determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student's response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.
The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/honor-code/) website.

Student Affairs
Health & Wellness

Health and Wellness Services
Health and Wellness Services is a part of the CU Boulder Division of Student Affairs. As part of Student Affairs, we are collectively committed to the success and well-being of all our students as well as the faculty and staff we serve.

All CU Boulder undergraduate and graduate students have access to a full range of on-campus health and wellness services in addition to a variety of virtual offerings. To learn more, visit Health and Wellness Services (http://www.colorado.edu/health/).

Administrative Services
The Administrative Services team oversees all aspects of medical insurance, billing and medical records at CU Boulder. To learn more, visit Administrative Services (https://www.colorado.edu/healthcenter/insurance-billing-medical-records/).

Counseling and Psychiatric Services
Counseling and Psychiatric Services (CAPS) offers confidential, on-campus short-term mental health and psychiatric services for all fee-paying students. CAPS addresses a variety of concerns such as academics, anxiety, body image, depression, relationships, substance use and more. To learn more, visit CAPS (http://www.colorado.edu/health/counseling/).

Disability Services
Disability Services is dedicated to providing students with disabilities an equal opportunity to participate in university programs, courses and activities through reasonable accommodations and services. Our office is here to support students, staff and faculty with accommodation requests, implementation, guidance and general information. To learn more, visit Disability Services (http://www.colorado.edu/disabilityservices/).

Health Promotion
Health Promotion provides outreach and education on a variety of health topics. Our office supports students in learning skills to make informed decisions about their health and help them succeed while they’re in school and beyond. Health promotion collaborates with student groups and campus departments to provide programs and services that positively influence student health. To learn more, visit Health Promotion (https://www.colorado.edu/health/promotion/).

Medical Services
Medical Services is the primary health care resource for CU Boulder students. Through comprehensive care and education we strive to give students the skills and knowledge they need to develop healthy life-long habits. To learn more, visit Medical Services (https://www.colorado.edu/healthcenter/). (https://www.colorado.edu/healthcenter/)

Recovery Community
The CU Collegiate Recovery Community (CUCRC) provides community, support and connection for students, faculty and staff in recovery or seeking recovery from a wide range of behaviors. Our mission is to help develop peer-to-peer connections, support resiliency and contribute to their overall well-being through a welcoming and supportive community. To learn more, visit Recovery Center (https://www.colorado.edu/recoverycenter/).

Recreation Services
The University of Colorado Boulder has two indoor recreation facilities, three artificial turf fields, four natural grass fields, four outdoor basketball courts, three tennis courts, and a challenge ropes course. These are all located throughout campus and provide a variety of amenities, programming and operating hours. Both Rec Center locations on campus are open to all full-fee paying students and those with memberships. To learn more, visit Recreation Services (https://www.colorado.edu/recreation/).

The Office of Victim Assistance
The Office of Victim Assistance (OVA) provides free and confidential information, consultation, support, advocacy and short term counseling services to University of Colorado Boulder students, graduate students, faculty and staff who have experienced a traumatic, disturbing or life-disruptive event. Call 303-492-8855 to connect with an OVA counselor or to receive after-hours support. To learn more, visit The Office of Victim Assistance (https://www.colorado.edu/ova/).

CU Boulder Student Health Insurance Plan (SHIP)
All full fee paying students, regardless of their insurance plan, have full access to the services provided by Health and Wellness Services.

Students may elect health insurance coverage through:

• CU Gold Student Health Insurance Plan (SHIP)
• Private insurance (an individual health insurance plan through a family member or employer)

Students must meet this requirement their first semester at CU Boulder and at the beginning of each academic year. Those taking six (6) or more undergraduate credit hours or one (1) or more graduate credit hours are required to complete the health insurance requirement process. Once a student is registered for their semester credits, the student will begin receiving email communications from Academic HealthPlans. These emails explain the insurance requirement and outline the process of enrolling or waiving the Gold SHIP.

For more information, visit the Health Insurance Requirement (http://www.colorado.edu/health/insurance/health-insurance/webpage).

Note: Plans available through the health insurance marketplace meet CU’s health insurance requirement. Colorado students may sign up through the Connect for Health Colorado (http://connectforhealthco.com/) website. Nonresident students may sign up through their home state health exchange or through the national HealthCare.gov (https://www.healthcare.gov/) website.
**Student Conduct & Colorado Creed**

**Student Conduct & Conflict Resolution**

**What We Believe**

Student Conduct & Conflict Resolution (SCCR) strives to provide students with individualized responses to support community standards and conflict resolution that emphasize accountability and growth by:

- fostering reflection on the impact of their behaviors;
- promoting responsible community membership and repairing harm; and
- cultivating the wellbeing and safety of the CU Boulder community.

**What Is Important to Us**

1. The student will understand the impact of their behavior on others.
2. The student will demonstrate ethical development, will comply with institutional policy, and will engage in no further violations of policy.
3. The student will gain an understanding of the institutional values reflected in institutional policies.
4. The student will gain a better understanding of the importance of personal integrity.
5. Through SCCR processes, the student will be asked to reflect on their beliefs, ethics, and values.
   a. The student will be able to articulate their personal ethics and values, will act in congruence with those ethics and values, and will make decisions that reflect their beliefs.
6. The student will contribute positively to the CU Boulder community and beyond.
7. The student will gain a better understanding of the consequences and potential consequences of their personal actions and will learn the purposes of institutional policies.
8. The student will employ critical thinking in problem solving and ultimately obtain a degree.

**Why Do We Have a Student Code of Conduct?**

**(Authority)**

Article 7, Part B, of the Laws of the Regents of the University of Colorado requires each campus to develop a student code of conduct. Student Conduct & Conflict Resolution (SCCR) is authorized to establish and administer this policy. Any questions regarding interpretation of this code or any of its provisions should be directed to the Dean of Students or their designee for final determination.

Questions regarding student behavior should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

**When and Where Does the Student Code of Conduct Apply?**

**(Jurisdiction)**

1. The Student Code of Conduct applies to:
   a. Student conduct that occurs on, or as it relates to, CU Boulder property or at official functions and CU Boulder sponsored programs conducted away from the campus.
   b. Student conduct that occurs off CU Boulder property is subject to this policy if it:
      i. adversely affects the health, safety, or security of any member of the CU Boulder community, including the student alleged to have violated CU Boulder policy, or the mission of CU Boulder; or
      ii. involves any records or documents of CU Boulder; or
      iii. involves conduct that may be a violation of federal, state, or local law, as determined by SCCR.
   c. For purposes of this policy, CU Boulder’s mission is broadly defined to include both its academic goals and the importance of developing civic responsibility in our students.
2. Recognized Student Organizations and Recognized Social Greek Organizations
   a. Wherever the Student Code of Conduct refers to “responding student”, the same also applies to Recognized Student Organizations (RSOs) and Recognized Social Greek Organizations (RSGOs). RSOs, as described in the Student Organization Handbook (https://www.colorado.edu/involvement/), are general student organizations recognized by the Center for Student Involvement (CSI) and CU Boulder. Recognized Social Greek Organizations are recognized by Fraternity & Sorority Life (FSL) and CU Boulder.
   b. RSOs and RSGOs, as well as their members and other students, may be held collectively and/or individually responsible for violations.
   c. The RSO and RSGO leaders, signers, or individuals currently listed in an official position in the Center for Student Involvement records or Fraternity and Sorority Life records may be held collectively and/or individually responsible for violations when such violations are committed by persons associated with the organization who have received consent or encouragement from the organization officers or leaders, if those officers or leaders knew, or reasonably should have known, that such violations were being or would be committed.
   d. The officers or leaders of a student organization may be directed by CU Boulder officials to take action designed to prevent or end violations by the organization or by any persons associated with the organization. Failure to comply with a directive may be considered a violation of the Student Code of Conduct, both by the officers or leaders of the organization, and by the organization.
3. Actions taken under a resolution process are separate and apart from any law enforcement or other court process or proceeding, such as a civil lawsuit or criminal prosecution, that may relate to the same underlying factual incident. SCCR’s jurisdiction does not depend on whether a responding student is criminally charged through the criminal justice system. A resolution process is not postponed while criminal or civil proceedings are pending unless otherwise determined by the resolution specialist. Dismissal of criminal charges or acquittal in a criminal case does not prevent SCCR from investigating and resolving an incident.
4. The unexcused failure of a responding student to appear and/or respond to a resolution process does not prevent CU Boulder from proceeding with or completing a resolution process.
5. For jurisdictional information related to sexual misconduct (including sexual assault, sexual harassment, intimate partner violence, and gender/sex-based stalking), protected class discrimination, harassment, and any related retaliation, see Section M of the student Code of Conduct
6. For jurisdictional information pertaining to academic misconduct, see Section M of the Student Code of Conduct.
7. Questions or concerns regarding policy and procedures for students charged or convicted of a crime that occurred prior to being admitted should be directed to SCCR.
Student Resolution Processes

Informal Resolution
This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes, and/or participation in the Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged prohibited conduct and completes educational resolution outcomes assigned by the resolution specialist, then SCCR will consider the matter to be resolved informally.

Formal Resolution
This process generally includes: i. written notice of the factual allegations and alleged violations of the Student Code of Conduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist’s determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the responding student’s response to those allegations; ii. any documents or information that the resolution specialist finds relevant, including without limitation, relevant documents presented by the responding student, complainant, or any other interested party; and/or iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any alleged victim, or other interested party, as it appears in a report, or as requested by the resolution specialist.

All students residing in Housing & Dining Services facilities are subject to Residence Hall policies or any policy properly communicated through Housing & Dining Services staff. For more information, visit the Housing Policies (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.

Cases involving sexual misconduct (including sexual assault, sexual harassment, intimate partner violence and gender/sex-based stalking), protected class discrimination and harassment and any related retaliation are subject to the Office of Institutional Equity and Compliance (OIEC) policies. For more information, visit the OIEC (https://www.colorado.edu/oiec/) website or call 303-492-2127.

Excerpts from the Colorado Revised Statutes regarding hazing, ethnic intimidation and riots are also presented. Colorado law prohibits persons convicted of rioting from enrolling in state-supported universities/colleges for 12 months following the date of a conviction.

For information about student classroom and course-related behavior, visit the Policies (https://www.colorado.edu/policies/student-classroom-and-course-related-behavior/) webpage.

Colorado Creed
The Colorado Creed, developed by students in 2003, is a social code of conduct and a lifestyle by which students at CU Boulder live. The text of the creed is:

As a member of the Boulder community and the University of Colorado, I agree to:

- Act with honor, integrity and accountability in my interactions with students, faculty, staff and neighbors.
- Respect the rights of others and accept our differences.
- Contribute to the greater good of this community.

I will strive to uphold these principles in all aspects of my collegiate experience and beyond.

For more information, visit the Colorado Creed (http://www.colorado.edu/creed/) website.

Student Resources

The Division of Student Affairs (http://www.colorado.edu/studentaffairs/) offers many on-campus resources for our students. Visit our offices to learn more.

Student Life & Involvement

- Center for Inclusion and Social Change (https://www.colorado.edu/cisc/): Explore identity and inclusivity, participate in educational programs, attend events and build community with others.
- Center for Student Involvement (https://www.colorado.edu/involvement/): Be involved! Find your community by connecting with student organizations, campus-wide events and leadership opportunities.
- CU Student Government (https://www.colorado.edu/cusg/): Make a difference! Get involved with your student government representatives, elected by students, for students. CUSG is your voice on campus.
- Environmental Center (https://www.colorado.edu/center/): Help CU Boulder become a global leader in sustainability through recycling, student bus pass, bicycle and educational programs.
- Fraternity & Sorority Life (https://www.colorado.edu/greeks/): Find opportunities for friendship, leadership and growth in CU’s vibrant and diverse Greek community.
- Housing & Dining (https://www.colorado.edu/living/): Explore information about on-campus life including residence halls, meal plans and dining options!
- New Student & Family Programs (https://www.colorado.edu/orientation/): The campus resource for new students and families as they begin their journey at CU Boulder. Ask questions and be sure to join for welcome events throughout the year.
- Off-Campus Housing & Neighborhood Relations (https://www.colorado.edu/offcampus/): Explore off-campus rentals on Ralphie’s List, register your party and learn about the legal aspects of off-campus living.
- Recreation Services (https://www.colorado.edu/recreation/): Get moving with all that The Rec has to offer, including intramural sports, fitness classes, nutritional services and the Outdoor Program.
- Residence Life (https://www.colorado.edu/living/): Explore the opportunities that residence life provides, from on-campus housing and employment to student resources like free tutoring.
- University Memorial Center (https://www.colorado.edu/umc/): Visit the CU Book Store, student services and student organization offices, as well as plenty of entertainment and dining options.
Student Support & Development

- Basic Needs Center (https://www.colorado.edu/support/basicneeds/): Get connected to essential resources when you need them most. Access the Buff Pantry and other assistance with food, housing and other on-campus and community services.
- Career Services (https://www.colorado.edu/career/): Become more employable and find meaningful work through learning how to fine-tune your resume, develop your skills, land that internship and make connections with employers.
- Student Conduct & Conflict Resolution (https://www.colorado.edu/sscr/): Get support for resolving conflicts and learn more about the Student Code of Conduct and the Honor Code.
- Student Legal Services (https://www.colorado.edu/studentlegal/): Access low-cost legal advice and education regarding your rights and responsibilities, and how to navigate the legal system.
- Student Support & Case Management (https://www.colorado.edu/studentaffairs/sscm/): Find individual support for students and advocates for their needs in all aspects of campus life.
- Veteran and Military Affairs (https://www.colorado.edu/veterans/): Prospective and current student veterans and veteran dependents: find program information, policies, pay and support services.
- Volunteer Resource Center (https://www.colorado.edu/volunteer/): Explore volunteer opportunities for CU Boulder students and staff on campus and throughout the greater Boulder community.

Student Data Privacy

Annual Notice to Students

As a CU Boulder student, it’s important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (https://www.colorado.edu/registrar/students/records/ferpa/) (FERPA) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest (https://www.colorado.edu/registrar/students/records/ferpa/glossary/)
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you’ve applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is not directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information

The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name
- hometown (city, state)
- campus email address
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
- degree status (e.g., expected graduation date and/or conferral dates/terms)
- enrollment status
- employment related to student status (e.g., teaching assistant, resident assistant or work-study) and dates for positions held
- participation in officially recognized activities/sports, including height and weight of athletes.
- photos and videos taken or maintained by the university

If a student provides a preferred name, the university uses it when communicating directly with the student and in campus systems, rosters, etc., unless there is a documented business or legal reason to use a student’s primary name. When communicating with outside third parties, including parents, the university generally uses a student’s primary (legal) name. Students may also select a diploma name (https://www.colorado.edu/registrar/students/graduation/) for graduation and commencement materials.

Campus email addresses are only disclosed to requestors who agree to not use them for solicitation.
Withholding Directory Information
Students have the right to withhold directory information from inquirers. To restrict the release of directory information, students must bring a photo ID to the Office of the Registrar during business hours to complete a privacy form.

Student Consent for Release of Confidential Information
Students may authorize the university to release educational records to parents, spouses or other third parties by granting consent in their student portal. The Privacy Settings (http://www.colorado.edu/registrar/students/records/privacy/) webpage has more information about various options for granting and restricting access to student records.

Release of Disciplinary Information
Provisions of the Family Educational Rights and Privacy Act of 1974, as amended by the Higher Education Amendments of 1998, govern access to a student's academic transcript or conduct file. The student and/or those university officials who demonstrate a legitimate educational need for disciplinary information may have access to the student's conduct file.

Parent(s) who provide proof that a student is a dependent as defined in Section 152 of the Internal Revenue Code of 1954 (i.e., a copy of the last federal income tax return listing the student as a dependent) may have access to the student's conduct file without written consent of the student. In this case, parents may have access to a conduct file, even if the student has requested otherwise.

In addition, parent(s) may be notified if a student under 21 is found responsible for a violation involving use or possession of alcohol and controlled substances. All other inquiries, including but not limited to inquiries from employers, government agencies, news media, family, friends or police agencies, require a written release from the student before access to university conduct files is granted. Exception: information may be released pursuant to a lawfully issued subpoena and as provided by the Campus Security Act as amended by the Higher Education Amendments of 1992.

The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of the conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

Tuition Classification
In-State and Out-of-State Tuition Classification
Tuition classification is governed by state law and by judicial decisions that apply to all public institutions of higher education in Colorado. Since tuition classification is governed by state law (https://www.colorado.edu/registrar/students/state-residency/guidelines/), the University of Colorado cannot alter or waive the eligibility criteria for any reason, including financial hardship or academic excellence.

New students are classified as in-state or out-of-state residents for tuition purposes based on information provided on their admission application and other relevant information. Applicants may be required to submit evidence substantiating their claim of in-state eligibility.

Current nonresident students who believe they have become eligible for a change to in-state status must submit a petition with documentation to have their status reviewed. The petition requirements, deadlines for submission, explanation of Colorado tuition classification statutes, specific legal residency exceptions and Office of the Registrar contact information are available on the Tuition Classification (http://www.colorado.edu/registrar/students/state-residency/) webpage.

Basic Requirement for Establishing Colorado Residency
To become eligible for in-state residency, a person must establish legal residence in Colorado. Legal residence, or "domicile," is defined as a person's true, fixed, and permanent home and place of habitation. No person may establish domicile in Colorado solely for the purpose of obtaining in-state tuition benefits.

Resident status requires at least 12 consecutive months of Colorado domicile immediately preceding the beginning of the term for which the student is seeking resident status.

To be eligible to begin the 12-month period to establish Colorado domicile, an individual must be at least one of the following:
- 22 years of age or older
- Married
- A graduate student
- An emancipated student

The domicile of a nonemancipated student is the same as that of a parent or legal guardian. Students over the age of 22 years, second-year graduate students, married students and emancipated students are qualified to determine their own domicile.

Unemancipated Minors
Students under age 23 who depend on their parents for support may qualify for in-state tuition if either of their parents, regardless of custody, has been domiciled in Colorado for 12 consecutive months preceding the first day of class in a given semester, even if the student resides elsewhere. In certain circumstances, students may qualify through their parents up to age 23.

Emancipation
An emancipated minor is someone under age 23 who demonstrates total financial and residential independence. This means the student’s parents and all others have entirely surrendered the right to the student’s care, custody and earnings, and make no provision for support of any kind. Emancipation is very rare; undergraduates under age 23 who do not have a parent domiciled in Colorado are highly unlikely to be classified as a Colorado resident student.

Students who provide false information to evade payment of out-of-state tuition or who fail to provide timely notice of their loss of in-state eligibility as an emancipated minor are subject to retroactive assessment of out-of-state tuition, as well as disciplinary and legal actions.
Evidence of Domicile

Establishing Colorado domicile includes actions that would be expected of any permanent resident. Pursuant to Colorado law, the following are actions that may be considered evidence of domicile:

- Filing a tax return in Colorado and, if applicable, payment of Colorado state income tax.
- Colorado driver’s license or Colorado ID card within 120 days of move to Colorado.
- Colorado vehicle registration within 180 days of move to Colorado.
- Voter registration in Colorado.
- Graduation from a Colorado high school.
- Lease or deed showing permanent occupancy of residential real property in Colorado.
- Continued residence in Colorado while not enrolled as a student and during semester breaks.
- Permanent employment or acceptance of future employment in Colorado.
- Any other factor particular to the individual that tends to establish the necessary intent to make Colorado a permanent home.

No single factor constitutes proof of domicile. All evidence, both positive and negative, is considered. Not all of the listed items are necessary, however individuals should take action on all factors that are applicable to their circumstances. For more information on all requirements, see the Tuition Classification webpage.

Domicile Exceptions

Colorado tuition law provides the following rare exceptions to the one-year domicile requirement in certain circumstances:

- Colorado National Guard members
- Members of American Indian Tribes with Historical Ties to Colorado
- Active duty military stationed in Colorado and their dependents
- Honorary discharged members of the U.S. Armed Forces and their dependents
- Returning active-duty military members
- Canadian military stationed in Colorado
- ASSET law qualified students with one year Colorado High School attendance (must have attended a Colorado high school for at least one year preceding the date of graduation; also requires Colorado high school graduation/Colorado GED and 12 consecutive months of physical presence in Colorado prior to enrolling at the institution)
- Children of new faculty members at Colorado state colleges and universities
- Employees of companies moving to Colorado receiving government economic incentives
- Western Regional Graduate Program enrollees in specific major fields of study
- Olympic athletes training in Colorado
- Others (see Residency Exceptions for Domicile webpage)

Requirements, including spouse and child eligibility, and a list of qualifying tribes are detailed on the Residency Exceptions for Domicile webpage.

University Policies

Alcohol and Other Drugs

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.

In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual’s actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information webpage. These policies are also described by various university offices in several publications:

- Campus housing: See the Residential Handbook webpage.
- Student Code of Conduct: See the Student Code of Conduct webpage.

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services webpage or call 303-492-2277.

Smoking

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking" as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bids, kreteks, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at
university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

**Campus Safety**

**Personal Safety on Campus**

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff, and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (http://www.colorado.edu/clery/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don't Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@CUBoulderPolice) and Facebook (CU Boulder Police (https://www.facebook.com/CUBoulderPolice/)).

**Communication**

**Student Email**

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (http://www.colorado.edu/policies/student-e-mail-policy/) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology’s Messaging and Collaboration webpage (https://oit.colorado.edu/node/237/).

**Copyright & Fair Use**

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.

**Diversity & Nondiscrimination**

**Commitment to Diversity**

The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning (https://www.colorado.edu/odece/diversity-plan/).

**Nondiscrimination Statement**

The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

**Equity & Compliance**

The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of
Interest in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed in order to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also offers education and assessment to identify areas in need of improvement and foster a more welcoming campus culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (https://www.colorado.edu/oiec/) website or call 303-492-2127.
SPECIAL ONLINE PROGRAMS CATALOG

CU Boulder offers a number of special online graduate degree and certificate programs to complement a traditional education.

Due to the nature of these program offerings, these specialized programs do not align with some standard campus policies. Learn more by reviewing the related sections in the Special Online Programs Catalog.

Master's Degrees:
- Computer Science - Master of Science (MS) Online (p. 1539)
- Data Science - Master of Science (MS) Online (p. 1616)
- Electrical Engineering - Master of Science (MS) Online (p. 1574)
- Engineering Management - Master of Engineering (ME) Online (p. 1587)
- Teacher Leadership - Master of Arts (MA) Online (p. 1456)

Certificates:
- Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate (p. 1457)
- Designing for Learning: Inquiry-Based Pedagogy for K-12 Educators - Graduate Certificate (p. 1457)
- Embedded Programmable Logic - Graduate Certificate (p. 1575)
- Engineering Management - Graduate Certificate (p. 1588)
- Industrial Internet of Things - Graduate Certificate (p. 1575)
- Leading for Change in Science Assessment Practice - Graduate Certificate (p. 1457)
- Power Electronics - Graduate Certificate (p. 1575)
- Optical Science and Engineering - Graduate Certificate (p. 1575)
- Rethinking Inclusive and Special Education - Graduate Certificate (p. 1457)
- Semiconductor Photonics - Graduate Certificate (p. 1575)
- Social and Emotional Learning - Graduate Certificate (p. 1457)
- Teachers Leading Change - Graduate Certificate (p. 1457)
- Teaching Culturally/Linguistically Diverse Students - Graduate Certificate (p. 1457)

Academic Integrity

Why Do We Have a Student Honor Code?

Mission
The mission of the Honor Code at the University of Colorado Boulder is to secure an environment where academic integrity can flourish.

Values
The Honor Code recognizes the importance of honesty, trust, fairness, respect, and responsibility and aims to instill these principles as essential features of the University of Colorado Boulder campus. The Honor Code allows all students to have responsibility for, and the ability to attain, appropriate recognition for their academic and personal achievements.

What is a Violation?

Academic Misconduct includes any act in which a student gains or provides, or attempts to gain or provide, an unfair academic advantage over other students. These acts include, but are not limited to the following and also include any attempts to engage in the following:

1. Cheating:
   a. Use of prohibited notes, study aids, or other explicitly prohibited course materials;
   b. Allowing another party to do one’s work/exam and turning in that work/exam as one’s own;
   c. Copying coursework from another student or from an unauthorized source (including but not limited to internet sources);
   d. Collaborating on coursework when prohibited;
   e. Failing to abide by the specific written course instructions, including, but not limited to, exams, homework assignments, and syllabi;
   f. Clicker Fraud. Using, or having someone else use, clicker technology improperly in an effort to receive academic credit.

2. Plagiarism. This includes, but is not limited to:
   a. Portrayal of another’s work or ideas as one’s own;
   b. Improper citation of another’s work;
   c. Improper citation of one’s own previous work;
   d. Use of paper writing services or technology (such as essay bots) whether paid or unpaid.

3. Resubmission. Submitting the same or similar work for credit, including, but not limited to, homework, more than once without permission from all course faculty involved.

4. Fabrication. Falsification or creation of data, research, or resources, or altering graded work without the prior consent of the course faculty.

5. Lying. Deliberate falsification with the intent to deceive, as it relates to an academic submission.

6. Bribery. Providing, offering, or taking rewards in exchange for a grade, an assignment, or in the aiding of Academic Misconduct.
   a. Rewards include, but are not limited to: currency, tangible items, services, or recompense.

7. Threat. Acting to intimidate a student, staff, or faculty member for the purpose of affecting a grade or in an effort to prevent the reporting of an Honor Code allegation, or in connection with any other form of Academic Misconduct.
   a. Retaliation. Retaliating against or discouraging, directly or through third parties, an individual from participating in the Honor Code process. To be considered retaliation, there must be a causal connection between a materially adverse action and the act of reporting a violation or participating in an Honor Code process. A materially adverse action is one that would dissuade a reasonable person from reporting a violation, and includes, but is not limited to, intimidation, 5 threats, or coercion. A determination of whether an action is materially adverse is a fact-dependent inquiry made on a case-by-case basis by Student Conduct and Conflict Resolution (SCCR) staff.

8. Unauthorized Access. Gaining access to, giving access to, or use of, protected academic information including, but not limited to: CU-SIS; a faculty, student, or staff member’s computer, files, and/or physical space; and/or secure information on an online server.

9. Aiding Academic Misconduct. Facilitating any act which may help a student to gain an unfair academic advantage including, but not limited to, any of the aforementioned acts.
   a. Sharing course materials, including but not limited to personal notes, in an unauthorized online bank or forum, whether for profit
or for free, is strongly discouraged and may result in a referral to the Honor Code.

b. **Sharing personal authentication credentials/login information** to third party sites is strongly discouraged and may result in a referral to the Honor Code process.

**Resolution Processes**

SCCR resolves alleged prohibited conduct through the informal resolution process or the formal resolution process. Resolution specialists have the authority and sole discretion to determine the type of resolution process without Honor Code Advisory Board (HCAB) consultation.

**Informal Resolution**

This process may generally include, but is not limited to, a meeting with a resolution specialist, completion of the assigned resolution outcomes and/or participation in the CU Restorative Justice process.

During the meeting, if the resolution specialist determines that the informal resolution process may be appropriate, the resolution specialist will offer it as an option to the responding student and address any questions the responding student may have about the process. If the responding student accepts responsibility for the alleged academic misconduct, agrees to, and completes the agreement developed during the meeting, then SCCR will consider the matter to be resolved informally. In some cases, the HCAB will also review the referrals before a final determination is made.

**Formal Resolution**

This process generally includes: i. written notice of the factual allegations and alleged academic misconduct; ii. the opportunity to meet with the resolution specialist to address the allegations and provide information to the resolution specialist; iii. the resolution specialist reviewing the allegations and making factual and violation determinations based on preponderance of the evidence; and iv. written notice to the responding student of the resolution specialist’s determinations.

The resolution specialist will consider the following in making this determination: i. the allegations in the Resolution Meeting Notice and the student’s response to those allegations; ii. all documents and/or information that the resolution specialist finds relevant, including, without limitation, relevant documents presented by the responding student, reporting party, or any other interested party; iii. the oral or written statements of any witnesses with relevant information, as presented by the responding student, any reporting party, or other interested party, as it appears in a referral, and/or as requested by the resolution specialist; and iv. the recommendations of HCAB regarding responsibility and Resolution Outcomes related to the incident or precedent.

Questions regarding academic integrity should be directed to Student Conduct & Conflict Resolution, studentconduct@colorado.edu, 10 UCB Boulder, CO 80309, phone 303-492-5550.

The full Student Honor Code can also be viewed on the Student Conduct & Conflict Resolution (https://www.colorado.edu/sccr/honor-code/) website.

**Academic Records**

**Diplomas**

A diploma is issued for each degree earned at the University of Colorado Boulder. Diplomas are mailed to graduating students approximately eight weeks after the close of the semester or session in which degree requirements were completed. Note: International students must resolve all financial obligations with CU before a diploma is issued.

CU Boulder also offers a certified electronic diploma (CeDiploma) (http://www.colorado.edu/registrar/students/graduation/cediploma/) for students who complete a university-approved certificate from Fall 2015 and onwards.

Display diplomas or replacement diplomas may be ordered online after graduation. For more information, visit the Office of the Registrar’s Diplomas (http://www.colorado.edu/registrar/alumni/diplomas/) webpage.

**Enrollment & Degree Certification**

The Office of the Registrar can provide written confirmation of registration, enrollment or degree status upon request by current or former students. Students in special online programs should reach out to reg-specialprograms@colorado.edu with this request.

CU Boulder has authorized the National Student Clearinghouse (NSC) to act as its agent for purposes of third party enrollment and degree verification. The NSC verifies degrees and enrollment for students who have not placed a privacy restriction on their academic record. The student’s name when enrolled, social security number or student ID, and date of birth will be required for identification purposes for enrollment or degree verification. All third parties should contact the National Student Clearinghouse by phone or visit its web site for current enrollment and degree verification information, instructions and fees.

University policy determines the academic enrollment status and federal regulation determines the financial aid enrollment status. CU Boulder is required to report enrollment based on the financial aid enrollment status to the NSC. Please refer to the Office of the Registrar’s enrollment status grid on the Check Your Enrollment Status (https://www.colorado.edu/registrar/students/registration/register/status/) webpage to determine your academic/financial aid enrollment status.

**Transfer of Credit**

Credits earned in special online programs may be transferred to other CU Boulder graduate degree programs at the discretion of the program and of the Graduate School in accordance with program-specific requirements and Graduate School rules.

**Transcripts**

**Official Transcripts**

Current and former students may order transcripts online (https://exchange.parchment.com/send/adds/?main_page=login&s_id=7I3anAeWu6K3ErXO); no IdentKey is required. Official transcripts are available in electronic PDF or paper format. Transcripts may be ordered as either a complete academic record of courses taken at all University of Colorado campuses or as a select career (undergraduate, graduate, law or noncredit) for coursework taken after 1988.

In certain circumstances, transcripts can be withheld for ongoing financial obligations to the university or for disciplinary actions.

Official transcripts bear the signature of the registrar and the official seal of the university (not applicable to noncredit transcripts).
Unofficial Transcripts
Currently enrolled students and alumni who have access to the student portal may view and print unofficial transcripts free of charge through Buff Portal (https://buffportal.colorado.edu/). Unofficial transcripts display the complete academic record of courses taken at the University of Colorado. However, academic institutions and potential employers generally do not accept the unofficial transcript as evidence of a student’s career at CU Boulder, as this transcript does not carry the registrar's signature, the seal of the university or other security features. Unofficial transcripts are primarily used for advising and counseling in offices at University of Colorado campuses.

Educational Record Changes
Students whose degrees have been conferred are not eligible for retroactive changes to their educational record.

Degrees
Specialized Online Graduate Degrees
The Graduate School of the University of Colorado Boulder offers online instruction leading to the following advanced degrees in specialized programs:

- Master of Science in Computer Science*
- Master of Science in Electrical Engineering*
- Master of Science in Data Science*
- Master of Engineering in Engineering Management*
- Master of Arts in Teacher Leadership

*Offered on the Coursera platform

For a full list of graduate degrees, please see the Academic Records (p. 1037) section of the Graduate Catalog.

Certificates
Where applicable, students may enroll in graduate certificates offered within special online programs as either non-degree or degree-seeking students. Each certificate program has unique requirements. Degree-seeking students who have been verified with completed certificate requirements will have the certificate(s) posted to their academic records at the time of graduation.

Graduate Course Load
Students in special online programs are not required to take a minimum number of credit hours over any given period of time and are not required to apply for a leave of absence when not enrolled in courses. However, students who have not enrolled for two years will be discontinued until they enroll in a new for-credit course. At that point, they will automatically be reinstated.

Graduate students enrolled in special online programs may register for a maximum of 15 credit hours per semester toward a degree.

For more information about graduate student course load and enrollment status at CU Boulder, refer to the Academic Records (p. 1039) section of the Graduate catalog.

Academic Standards & Advising

Academic Standards
Grade Point Average
A student is required to maintain at least a B (3.00) average in all work attempted while enrolled in the Graduate School, and must have at least a 3.00 cumulative average to receive a graduate degree.

Nonacceptable Grades
1. A student who receives a grade of C+ or below in a course may retake the course under the grade replacement policy (https://www.colorado.edu/registrar/students/degree-planning/grade-replacement/), if eligibility standards are met.
2. Courses in which grades below B- (2.70) are received are not accepted for doctoral programs.
3. Courses in which grades below C (2.00) are received are not accepted for master’s degree programs or for the removal of academic deficiencies.
4. Courses taken toward the fulfillment of requirements for graduate degrees may not be taken pass/fail.

Student Ethics
Academic Dishonesty
The University of Colorado Boulder is dedicated to maintaining the highest standards of intellectual honesty. Commitment to these standards is the responsibility of every student, faculty and staff member. The Honor Code (https://www.colorado.edu/ope/aps/1007/) was designed to uphold CU Boulder’s standards of academic integrity and intellectual honesty, as well as to provide quick resolution of reports of student academic misconduct. The Honor Code process is supported by the Boulder Faculty Assembly.

All students of the University of Colorado Boulder are subject to the Honor Code for academic matters. Students must sign a statement agreeing to abide by all university policies, including the Honor Code, as a condition of admission to the university. Students who violate may be subject to discipline as set forth by the Honor Code.

Research Integrity
All research and scholarly/creative work must comply with requirements regarding research integrity. Allegations of plagiarism, fabrication, falsification, and other forms of research misconduct will be investigated by the Standing Committee on Research Misconduct. The Office of Research Integrity (https://www.colorado.edu/researchinnovation/rcr/research-misconduct/) provides further information and clarification on related issues and processes. Students should also review the university policy (https://www.cu.edu/ope/aps/1007/) on Misconduct in Research, Scholarship, and Creative Activities.

Academic Standing and Dismissal
Students are subject to academic requirements and standards for adequate progress placed both by the Graduate School and by their graduate program.

A student whose cumulative GPA falls below 3.00 is placed on academic warning. The student generally has two semesters in which to raise the cumulative GPA to 3.00 or above. If the student’s cumulative GPA is at or below 2.50, a dean’s administrative stop is placed on the student’s record, and the student may be withdrawn from coursework for upcoming semesters. If there are extenuating circumstances, the department chair/
program director may petition the Dean of the Graduate School showing compelling reasons for the student to be granted a chance to continue.

If a student does not earn a 3.0 GPA in all courses taken in the first of two academic warning semesters, or if after the two-semester academic warning period the student’s cumulative GPA is still below 3.00 (or if other conditions placed by the major department or Graduate School are not met) a dean’s administrative stop will be placed on the student’s record and they may be subject to dismissal.

Students are also subject to academic requirements and standards for adequate progress placed by their graduate program. Based upon Regent Law and Regent Policy, an academic dismissal decision is made by the dean of the Graduate School upon the program’s recommendation. Should the student be dismissed from the program, a dean’s administrative stop is placed on the student’s record and the student is withdrawn from classes for any future semesters.

Graduate School Advising
Graduate students receive degree-specific advising from their academic department/program. Faculty advisors are assigned to students according to departmental policies.

The Graduate School provides academic student services and fosters connection to campus partners and resources. Staff members offer expert guidance related to Graduate School and campus policies and procedures. Specific areas of expertise include registration requirements and requests, committee and general examination requirements, general academic standards, degree requirements which apply to all students and exceptions to general requirements.

The Graduate Student Services office also assists in the navigation of thesis/dissertation and graduation process, including associated requirements, deadlines and degree conferral. Staff can assist in a number of additional areas at the dean’s office level.

For general inquiries, contact Graduate Student Services at gradinfo@colorado.edu or call 303-492-8220.

Admissions Admissions
Specialized online programs typically have performance-based admissions criteria and processes. Programs that are not approved for performance-based admissions require applicants to have an awarded and verified baccalaureate degree.

Refer to each program for program-specific admissions policies, requirements and processes.

Student Data Privacy Annual Notice to Students
As a CU Boulder student, it’s important to understand your rights regarding access to and disclosure of information in your education record. The Family Educational Rights and Privacy Act (FERPA) (https://www.colorado.edu/registrar/students/records/ferpa/) affords you the right to:

- Inspect and review your education record
- Request amendment of your education record
- Consent to disclosure of personally identifiable information in your education record
- File a complaint with the U.S. Department of Education (Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202)

To review or request an amendment to your record, contact the Office of the Registrar or the university office that maintains the record. This does not apply to grade changes, which are at faculty discretion.

Under FERPA, the university may release education record information if the disclosure is:

- To CU Boulder officials who have a legitimate educational interest
- To officials of another institution at which you seek or intend to enroll
- To authorized representatives of federal, state or local educational authorities
- To connection with financial aid you’ve applied for or received
- To an organization conducting studies for or on behalf of the university
- To your parents or guardians (if you are a dependent student for tax purposes)
- To an accrediting organization
- To comply with a judicial order or lawfully issued subpoena
- In connection with a health or safety emergency or other exception under FERPA (https://www.colorado.edu/registrar/students/records/ferpa/exceptions/)
- To fulfill a request for data that CU Boulder defines as directory information (https://www.colorado.edu/registrar/students/records/ferpa/directory-info/)

Student data that is not directory information may only be released with your documented consent.

To authorize third-party access to your non-directory information, see CU Guest Access (https://www.colorado.edu/registrar/students/records/privacy/guest-access/) and FERPA Consent to Release (https://www.colorado.edu/registrar/students/records/privacy/consent/). You may restrict the release of directory information by placing full privacy (https://www.colorado.edu/registrar/students/records/privacy/full/) on your record.

Questions may be directed to the Office of the Registrar.

Directory Information
The following items of student information have been designated by the University of Colorado Boulder as public or "directory" information:

- student name
- hometown (city, state)
- campus email address
- dates of attendance
- previous educational institutions attended
- school/college or division of enrollment
- majors, minors and fields of study
- classification level (e.g., first-year, sophomore, etc.)
- university-recognized honors and awards
The Campus Security Act permits higher education institutions to disclose to alleged victims of any crime of violence (e.g., murder, robbery, aggravated assault, burglary, motor vehicle theft, arson) the results of conduct proceedings conducted by the institution against an alleged perpetrator with respect to such crime. The Campus Security Act also requires that both the accused and the accuser be informed of campus conduct proceedings involving a sexual assault.

**Student Finances**

**Tuition**

Tuition is assessed at a linear rate based on credit hours. Refer to the Bursar's website (https://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/) for officially approved tuition rates. Students in Specialized Programs on Coursera are granted access to for-credit components of a course after their tuition has been paid and verified.

Former or current CU Boulder students wishing to enroll in a Specialized Program who have unpaid debts will have these debts automatically deducted from payments made to Specialized Programs and before Specialized Program tuition charges are paid.

If a student enrolled in a Specialized Program wishes to take additional courses on Main Campus or through Continuing Education, they must enroll through the appropriate channels and will be charged separately for those courses.

In consultation with University Counsel and the Chief Financial Officer’s office, Specialized Programs on the Coursera platform are offered as auxiliary programs. This designation allows CU Boulder to charge the same tuition to resident and non-resident students. It also prevents Specialized Program enrollments from impacting CU Boulder’s mandated resident and non-resident student ratios. The CU Employee Tuition Assistance Benefit cannot be applied toward auxiliary-funded programs per Administrative Policy Statement (APS) 5024 (https://www.cu.edu/ope/aps/5024/). Auxiliaries (fund 2x’s) are those funds that account for units and activities that generate their own revenue to support the expenses of the individual program.

If a tuition payment does not process successfully, a financial hold is placed on the student’s account and the student will be prevented from registering for future courses at CU Boulder until the outstanding amount is paid in full.

**Student Fees**

Student fees will be set in accordance with campus policy (https://www.colorado.edu/bfp/fee-planning/mandatory-administrative-fees/institutional-student-fee-plan/).

For additional information regarding tuition and fees, refer to program-specific policies.

**Financial Aid**

At this time, no federal financial aid will be administered in Specialized Programs.

**University Policies**

**Alcohol and Other Drugs**

In order to create the best possible environment for teaching and learning, the University of Colorado Boulder affirms its support for a responsible campus policy that addresses the inappropriate use of alcohol and other drugs.
In compliance with the federal Drug Free Schools and Communities Act, the University of Colorado Boulder prohibits the unlawful manufacture, possession, use or distribution of a controlled substance (illicit drugs and alcohol) of any kind and in any amount. These prohibitions cover any individual’s actions that are part of any university activities, including those occurring while on university property or in the conduct of university business away from the campus.

Information on policies, penalties, health effects and resources available to students and staff regarding alcohol and other drugs can be found on the Alcohol & Other Drugs Information (http://www.colorado.edu/aod/) website.

These policies are also described by various university offices in several publications:

- **Campus housing**: See the Residential Handbook (https://www.colorado.edu/living/housing/policies-forms-and-accommodations/#residential_handbook-1317) webpage.
- **Student Code of Conduct**: See the Student Code of Conduct (https://www.colorado.edu/scrc/student-conduct/).
- **Safety**: Annual Security and Fire Safety Report (http://www.colorado.edu/clery/).

Individual and group counseling for students with substance abuse concerns is available through Counseling and Psychiatric Services. For more information, visit the Counseling and Psychiatric Services (http://www.colorado.edu/health/counseling/) webpage or call 303-492-2277.

**Smoking**

For student health and the health of our community, smoking is prohibited in all campus buildings and on all campus grounds.

At this time, the use of smoking products of any sort shall be prohibited on all university-owned and operated campus grounds both indoors and outdoors. This smoking ban does not apply to public rights-of-way (sidewalks, streets) on the perimeter of the campus.

"Smoking," as used in this policy, means smoking any substance, including but not limited to, tobacco, cloves or marijuana. "Smoking products" include, but are not limited to, all cigarette products (cigarettes, bidis, kareets, e-cigarettes, etc.) and all smoke-producing products (cigars, pipes, hookahs, etc.). University-owned and operated campus grounds include, but are not limited to: all outdoor common and educational areas; all university buildings; university-owned on-campus housing; campus sidewalks; campus parking lots; recreational areas; outdoor stadiums; and university-owned and leased vehicles (regardless of location). In keeping with university policy, the sale, distribution and sampling of all tobacco products and tobacco-related merchandise is prohibited on all university-owned and operated property and at university-sponsored events. Littering campus with remains of smoking products is prohibited.

This policy applies to all employees, students, visitors, contractors and externally affiliated individuals or companies renting university-owned space on university-owned and operated property campus grounds.

**Campus Safety**

**Personal Safety on Campus**

While the University of Colorado Boulder is a relatively safe place to be, the campus is not a haven from community problems. Through the joint effort of various organizations on campus, CU is committed to providing ample safety resources for faculty, staff and students.

Specific efforts to promote safety on campus include the provision of adequate lighting, police protection, educational programs and special prevention programs, such as the CU NightRide escort services and laptop and bicycle registration programs.

In compliance with the federal Clery Act, students and employees receive information on campus security policies and programs, including crime statistics, in an Annual Security and Fire Safety Report (http://www.colorado.edu/clery/). This report will be sent to CU Boulder affiliates by Oct. 1 of each year. In any emergency or life-threatening situation, always call 9-1-1.

Members of the university community are encouraged to report any incident of threatening or harmful behavior to the CU Boulder Police by calling 9-1-1 in an emergency or the non-emergency line, 303-492-6666. Visit Don’t Ignore It (http://www.colorado.edu/dontignoreit/) for more information about the wide range of campus and community resources and reporting options available.

Additional safety information can be found on the CU Police Department (http://www.colorado.edu/police/) website. For information on crime alerts, trends and safety tips, follow the CU Police Department on Twitter (@CUPolice) and Facebook (CUBoulderPolice) and Twitter (CUBoulderPolice) and Facebook (CUBoulderPolice/).

**Communication**

**Student Email**

All CU students receive an email account from the university, which is an official means of sending information to students. Students are responsible for maintaining this CU email address. The official email address can be used by professors to contact students and provide course-related information. Administrative offices, such as the Office of the Registrar, use official email addresses to contact students and provide important information. Students are responsible for frequently checking their official CU email address. For more information on the student email policy, visit the Student E-mail Policy (http://www.colorado.edu/policies/student-e-mail-policy/) webpage, call the IT Service Center at 303-735-HELP or email HELP@colorado.edu. To learn more about student email accounts, visit the Office of Information Technology’s Messaging and Collaboration webpage (https://oit.colorado.edu/node/237/).

**Copyright & Fair Use**

The University of Colorado Boulder community respects the intellectual property of others, regardless of the medium by which it is transmitted. This is a cornerstone of academic integrity. We prohibit the use of unauthorized distribution of copyrighted material, which is subject to both civil and criminal penalties as well as university procedures.

Distributing copyrighted materials using peer-to-peer or file-sharing programs is illegal and the university uses technological solutions to deter this activity. Still, the university regularly receives notices of copyright violations and is required by law to take action. Common consequences include loss of network access and referral to the Office of Judicial Affairs. Guidance on campus fair use and copyright issues is provided on the University Libraries (http://www.colorado.edu/libraries/copyright-information/) website.
Diversity & Nondiscrimination
Commitment to Diversity
The Division of Student Affairs supports and contributes to creating and sustaining a diverse, multicultural, socially just and inclusive campus climate by learning about, recognizing and honoring the diverse backgrounds, histories, identities and life experiences of all our students, faculty and staff. Our goal is to create an environment in which all campus community members can thrive while feeling welcomed, safe and at home.

At the University of Colorado Boulder we are committed to building a campus community in which diversity is a fundamental value. People are different and the differences among us are what we call diversity—a natural and enriching hallmark of life. Diversity includes, but is not limited to, ethnicity, race, gender, age, class, sexual orientation, religion, disability, veteran status, gender identity/expression, veteran status, political affiliation or political philosophy and health status. A climate of healthy diversity is one in which people value individual and group differences, respect the perspectives of others and communicate openly.

"Diversity is a key to inclusive excellence in education. A diverse learning environment better prepares all students for the world that awaits them. CU Boulder is committed to enriching the lives of our students, faculty and staff by providing a diverse campus where the exchange of ideas, knowledge and perspectives is an active part of learning."—from the Guidelines for Diversity Planning (https://www.colorado.edu/odece/diversity-plan/).

Nondiscrimination Statement
The University of Colorado Boulder does not discriminate on the basis of race, color, national origin, sex, pregnancy, age, disability, creed, religion, sexual orientation, gender identity, gender expression, veteran status, political affiliation or political philosophy in admission and access to, and treatment and employment in, its educational programs and activities. The university takes affirmative action to increase ethnic, cultural, and gender diversity; to employ qualified disabled individuals; and to provide equal access and opportunity to all students and employees.

Equity & Compliance
The University of Colorado Boulder is committed to maintaining a positive learning, working, and living environment free from discrimination and harassment. The Office of Institutional Equity and Compliance (OIEC) (http://www.colorado.edu/oiec/) addresses all claims of sexual misconduct, harassment and/or discrimination, or related retaliation by students, staff or faculty pursuant to the University of Colorado Sexual Misconduct, Intimate Partner Violence and Stalking Policy, the University of Colorado Boulder Policy on Protected-Class Discrimination and Harassment, and the University of Colorado Policy on Conflict of Interest in Cases of Amorous Relationships. The university is committed to addressing concerns and taking appropriate action against those found in violation of these policies.

In response to a report, OIEC determines what immediate and long-term support and safety measures are needed in order to minimize disruptions to education or employment and to help keep the involved parties and the campus safe. OIEC also offers education and assessment to identify areas in need of improvement and foster a more welcoming campus culture.

To learn more about university policy or the role and programs offered by OIEC, please visit the Office of Institutional Equity and Compliance (https://www.colorado.edu/oiec/) website or call 303-492-2127.

COURSES A-Z

About the Course Descriptions
The courses listed here are included in the Boulder campus catalog during the 2022–23 academic year. This listing does not constitute a guarantee that any particular course will be offered during this year. Consult specific programs and major requirements within each school and college for more information. Also visit CU Boulder Class Search (http://classes.colorado.edu) for details about specific class offerings and schedules.

Course Numbering
Consult specific departments and programs within schools and colleges for restrictions, requirements and permissions. (http://www.colorado.edu/catalog/node/448/)
- 1000–2000 courses are usually intended for lower-division students (freshmen and sophomores).
- 3000–4000 courses are intended for upper-division students (juniors and seniors), and may require instructor consent.
- 5000 courses usually require graduate-student status, but may be open to qualified undergraduates with instructor consent. Consult the program or department.
- 6000, 7000 and 8000 courses are usually open to graduate students only.

Abbreviations
- Coreq. Corequisite
- Lab. Laboratory
- Lect. Lecture
- Prereq. Prerequisite
- Rec. Recitation
- CE/SL Civic engagement/service learning component

Course Credits
Course credits are stated in semester units.

Subjects
Accounting (ACCT)

Courses
ACCT 3220 (3) Corporate Financial Reporting 1
First of a two-course sequence intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information.
Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3225 (6) Corporate Financial Reporting
Intended to provide students with increased fluency in the language of business. Focuses on U.S. and international accounting concepts and methods that underlie financial statements and the related implications for interpreting financial accounting information. Builds and extends detailed knowledge of preparation, analysis, and use of financial statements. No credit granted for this course and ACCT 3220 and ACCT 3230.
Requisites: Requires prerequisite of BASE 2104 (minimum grade of D-), or BCOR 2000 (minimum grade of D-), and BCOR 2200

ACCT 3230 (3) Corporate Financial Reporting 2
Second in a two-course sequence building and extending detailed knowledge of preparation, analysis and use of financial statements.
Requisites: Requires a prerequisite course of ACCT 3220 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ACCT 3320 (3) Cost Management
Provides cost analysis for the support of management decision making. Analyzes activities, cost behavior, role of accounting in planning, financial modeling and managerial uses of cost data.
Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3440 (3) Income Taxation of Individuals
Provides an overview of individual US federal income tax law. Topics covered include tax formula and tax determination, filing status, gross income and exclusions, deductions, tax credits, and payment procedures.
Requisites: Requires prerequisite of BASE 2104 (minimum grade D-).

ACCT 3700 (3) Accounting in a Global Economy
This London-based global seminar introduces undergraduate students to transfer pricing, International Financial Reporting Standards (IFRS) and the impact of foreign exchange rates on financial reporting. Includes an IASB headquarter experience and presentations from multinational corporations and public accounting firms. It also includes experiential-based accounting learning in continental Europe.
Requisites: Requires a prerequisite course of ACCT 3220 (minimum grade D-). Restricted to Business (BUSN) majors only.

ACCT 4240 (3) Advanced Financial Accounting
Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5240
Requisites: Requires prerequisite course of ACCT 3220 and ACCT 3230 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) or Finance (FNCE) majors with 52-180 units completed.

ACCT 4250 (3) Financial Statement Analysis
Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5250
Requisites: Requires a prerequisite course of ACCT 3220 or 3225 and ACCT 3230 (minimum grade D-). Restricted to Accounting (ACCT), Finance (FNCE) or Accounting Concurrent Degree majors only with 52-180 units completed.
ACCT 4540 (3) Accounting Information Systems
Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5540
Requisites: Requires a prerequisite course of ACCT 3220 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) majors with 52-180 units completed.

ACCT 4620 (3) Auditing and Assurance Services
Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5620
Requisites: Requires a prerequisite course of ACCT 3230 (minimum grade D-). Restricted to Accounting (ACCT) majors with 52-180 units completed.

ACCT 4821 (3) Experimental Seminar: Financial Report for Complex Transactions
Focuses on topics related to major financial events in the life of an organization (IPOs, mergers and acquisitions). Enhance the ability to understand the economic essence of important complex business transactions as linked to the financial reporting and tax issues surrounding these deals. Many fascinating and recent transactions will be examined in depth.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 5821
Requisites: Requires a prerequisite course of ACCT 3230 (minimum grade D-). Restricted to Business (BUSN) majors with 52-180 units completed.

ACCT 4850 (3) Senior Seminar - Accounting Ethics
Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets.
Requisites: Requires prerequisite course of ACCT 3230 or ACCT 3225 (minimum grade D-). Restricted to Accounting (ACCT) majors with 102-180 units completed.

ACCT 4900 (1-3) Independent Study
Requires prior consent of dean and instructor under whose direction study is taken. Intended only for exceptionally well-qualified business seniors. Departmental form required.

ACCT 5100 (3) Oil and Gas Accounting
This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.
Recommended: ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.
Grading Basis: Letter Grade

ACCT 5120 (3) Business Analytics
Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.
Requisites: Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students
Grading Basis: Letter Grade

ACCT 5240 (3) Advanced Financial Accounting
Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis
Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5450 (3) Income Taxation of Business Entities
Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems
Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting
Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.
Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.
Grading Basis: Letter Grade
ACCT 5620 (3) Auditing and Assurance Services
Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5700 (3) International Accounting
Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5820 (3) Topics in Business
Offered irregularly to provide opportunity for investigation of new frontiers in accounting.
Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820
Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.
Grading Basis: Letter Grade

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies
Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827
Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6000 (1-3) Academic Internship in Accounting
Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6220 (3) Corporate Financial Reporting
Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700
Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis
Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710
Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting
Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.
Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6290 (3) Textual Analysis in Business
This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).
Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290
Recommended: restricted to ACCT-MS and ACTX-MS students.
Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics
Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.
Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation
Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing.
Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACCT or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships
Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167
Requisites: Requires prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACCT or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations
Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157
Requisites: Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only.
ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis
Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.
Requisites: Requires a prerequisite course of ACCT 5620 (minimum grade C).
Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation
Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6710 (3) Federal Estate and Gift Tax
Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207
Requisites: Requires prerequisite courses of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to Accounting, ACIS, ACIX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning
Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217
Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 6780 (3) US International Taxation
This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.
Equivalent - Duplicate Degree Credit Not Granted: LAWS 7617
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree or Acct Tax-Concurrent Degree students only.
Recommended: Prerequisite ACCT 5450.
Grading Basis: Letter Grade

ACCT 6900 (1-6) Independent Study
Prior department consent required of instructor under whose direction study is taken. Departmental form required.
Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6940 (1-6) Master's Candidate for Degree
Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 6950 (1-4) Master's Thesis
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7800 (3) Doctoral Seminar: Introduction to Accounting Research
Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree students only.

ACCT 7830 (3) Doctoral Seminar: Accounting and Capital Markets 1
Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7840 (3) Doctoral Seminar: Managerial Accounting Research
Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7880 (3) Doctoral Seminar: Accounting Theory
Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and lowballing. Describes implications of analytical results for primarily economics-based empirical research designs.
Repeatable: Repeatable for up to 6.00 total credit hours.
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8900 (1-3) Independent Study
Instructor consent required and departmental form (taught as doctoral seminar).
Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation
Requisites: Restricted to Business (BUSN) graduate students only.
Advertising, PR and Media Design (APRD)

Courses

APRD 1003 (3) Principles of Strategic Communication
Introduces the foundations, nature, and practices of advertising and public relations and the various industry functions - including account management, market research, account planning, media planning, creative strategy, creative execution, branding, image reputation and crisis management. This course offers historical, organizational, financial, creative and critical perspectives concerning strategic communication.
Requisites: Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 1004 (1) Fundamentals of Grammar
Teaches students the basic rules of grammar, punctuation, word choice and sentence structure so that they can write clear and concise messages that convey a desired meaning, apply punctuation in an accurate and effective manner, and differentiate between style conventions.
Grading Basis: Letter Grade

APRD 2001 (3) Strategic Thinking in Advertising and Public Relations
Reviews historical and contemporary views of critical and strategic thinking, as well as how strategic practices utilized in advertising, branding, and public relations through the use of readings, exploration of case studies, lectures, individual and group exercises, and client projects.
Requisites: Requires a prerequisite course of APRD 1003 (minimum grade C). Restricted to students with Strategic Communication (STCM) plan (Majors) or who are On-Track admitted to STCM (POT2).
Grading Basis: Letter Grade

APRD 2004 (3) Introduction to Research Methods and Insights
Provides students with the fundamental skills necessary to develop research-based strategies to address challenges faced by advertising, public relations, and marketing professionals in their efforts to address client communication needs.
Requisites: Requires a prerequisite course of APRD 1003 (minimum grade C). Restricted to students with Strategic Communication (STCM) plan (Majors) or who are On-Track admitted to STCM (POT2).
Grading Basis: Letter Grade

APRD 2005 (3) Strategic Communication Writing
Introduces students to strategic writing across multiple media platforms and demonstrates the different forms of writing used in the strategic communication subfields. Students will learn strategies for crafting and delivering effective messages to target audiences.
Requisites: Requires prerequisite courses of APRD 1004 and APRD 2001 and APRD 2004 (all minimum grade C). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 2006 (3) Software and Design Applications
Equips students with the practical knowledge and critical skills necessary to effectively employ visual design in advertising and public relations practice. Students will be introduced to both the fundamental principles of graphic design and the technical tools used to bring design ideas to life.
Requisites: Requires prerequisite courses of APRD 1004 and APRD 2001 and APRD 2004 (all minimum grade C). Restricted to Strategic Communication (STCM) majors only.
Grading Basis: Letter Grade

APRD 3001 (3) Visual Design
Students are introduced to design elements and principles, research and visual storytelling. They are challenged to communicate intellectual, sensory and emotional concepts by learning a visual vocabulary of type, color, and form expressed in a variety of mediums and dimensions.
Requisites: Requires prerequisite courses of APRD 2005 and APRD 2006 (minimum grade C). Restricted to Strategic Communication (STCM) majors with Media Design (DSN) subplan only.
