## Courses

### ACCT 5100 (3) Oil and Gas Accounting

This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.

**Recommended:** ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

### ACCT 5120 (3) Business Analytics

Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

**Requisites:** Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students

**Grading Basis:** Letter Grade

### ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4240

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

### ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4250

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

### ACCT 5450 (3) Income Taxation of Business Entities

Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

### ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4540

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5550 (3) Data Analytics for Accounting**

Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

**Requisites:** Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

**ACCT 5620 (3) Auditing and Assurance Services**

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 4620

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**ACCT 5820 (3) Topics in Business**

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

**Equivalent - Duplicate Degree Credit Not Granted:** MSBX 5820

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

**Grading Basis:** Letter Grade

**ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies**

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6827

**Requisites:** Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

**ACCT 6000 (1-3) Academic Internship in Accounting**

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

**ACCT 6220 (3) Corporate Financial Reporting**

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6700

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-).

**ACCT 6250 (3) Financial Statement Analysis**

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6710

**Requisites:** Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

**ACCT 6260 (3) Seminar: Managerial Accounting**

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-).

**ACCT 6290 (3) Textual Analysis in Business**

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

**Equivalent - Duplicate Degree Credit Not Granted:** MSBX 6290

**Recommended:** restricted to ACCT-MS and ACTX-MS students.

**Grading Basis:** Letter Grade

**ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics**

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

**Requisites:** Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

**ACCT 6420 (3) Research and Writing in Income Taxation**

Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing.

**Requisites:** Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

**ACCT 6430 (3) Taxation of Partnerships**

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 6167

**Requisites:** Requires prerequisite course of ACCT 5450 (min grade D-).

Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

**ACCT 6450 (3) Taxation of Corporations**

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 6157

**Requisites:** Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only.

**ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis**

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

**Requisites:** Requires a prereq course of ACCT 5620 (min grade C).

Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

**ACCT 6700 (4) Income Taxation**

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 6007

**Requisites:** Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

**ACCT 6780 (3) US International Taxation**

This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7617

**Requisites:** Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

**Recommended:** Prerequisite ACCT 5450.

**Grading Basis:** Letter Grade

**ACCT 6900 (1-6) Independent Study**

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

**ACCT 6940 (1-6) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 6950 (1-4) Master's Thesis**

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research**

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I**

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2**

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research**

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

**ACCT 7800 (3) Doctoral Seminar: Accounting Theory**

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 7830 (3) Doctoral Seminar: Accounting Research**

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

**ACCT 8820 (1-6) Graduate Seminar**

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ACCT 8900 (1-3) Independent Study**

Instructor consent required and departmental form (taught as doctoral seminar).

**Requisites:** Restricted to Business (BUSN) graduate students only.

**ACCT 8990 (1-10) Doctoral Dissertation**

**Requisites:** Restricted to Business (BUSN) graduate students only.

**BADM 6820 (1-3) Topics in Business Administration**

Offered irregularly to provide opportunity to investigate new topics in business administration.

**BADM 6940 (3) Land Use Law**

Examines Federal, state and local regulations governing land use in the U.S. and surveys the basic principles of urban planning and public finance. Describes basic tools governments use to control land use: Euclidean zoning, nuisance law, police power, eminent domain and takings, Planned Urban Developments, historic preservation, wetlands and flood zones, airports, endangered species, view restrictions, and environmental law.

**Requisites:** Restricted to Master of Business Administration (MBAD), MBA with dual degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

**Grading Basis:** Letter Grade

**BSLW 5120 (3) Advanced Business Law**

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

**Equivalent - Duplicate Degree Credit Not Granted:** BSLW 4120

**Requisites:** Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

**BSLW 6900 (1-6) Independent Study**

**Requisites:** Restricted to Business (BUSN) graduate students only.

**MBAC 6001 (1.5) Foundations of Teamwork**

Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees' and colleagues'.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6002 (3) Social, Moral and Economic Foundations for Business**

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6003 (1.5) Foundations of Leadership**

Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6004 (1.5) Social, Moral and Economic Foundations for Business**

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6010 (3) Managerial Economics**

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6011 (1.5) Managerial Economics 1**

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6012 (1.5) Managerial Economics 2**

Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6020 (3) Financial Accounting**

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6031 (1.5) Quantitative Methods 1**

Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.

**Requisites:** Restricted to MBA (MBAD) and Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6032 (1.5) Quantitative Methods 2**

Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6050 (3) Strategy**

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6051 (3) Operations Management**

Develops an understanding of processes and the alignment of a process with the organization's operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers c-suite-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6052 (3) Capstone Projects**

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6060 (3) Corporate Finance**

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6081 (3) Data and Decisions**

Employers need managers who can integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6090 (3) Marketing Management**

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate marketing concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6096 (1.5) Managerial Communications**

Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAC 6098 (1) Professional Development I**

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAC 6099 (1.5) Professional Development II**

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

**Additional Information:** Departmental Category: MBA: Core Courses

**MBAX 6000 (3) Socially Responsible Enterprise**

Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6097 (1-1.5) Professional Development Internship**

Experiential compliment to MBAC 6098 to focus on Professional Presentation, Network Development, and/or Executive Exposure.

**Repeatable:** Repeatable for up to 3.50 total credit hours.

**Requisites:** Restricted to Master of Business Admin (MBAD) or MBA with Dual Degree programs. Minimum of 27 credit hours required.

**Recommended:** Prerequisite MBAC 6098.

**Grading Basis:** Letter Grade

**MBAX 6100 (1.5) Entrepreneurship**

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6101 (1.5) Entrepreneurship**

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6110 (3) Entrepreneurial Finance**

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6111 (3) Entrepreneurial Finance**

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

**Requisites:** Requires prerequisite courses MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBA (MBAD) and Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6130 (3) Sustainable Venturing**

Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6140 (3) Social Entrepreneurship in the US and Global Economies**

Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite MBAX 6170.

**Additional Information:** Departmental Category: MBA: Social Responsibility

**MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies**

Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying adolescent firms that are past the initial start-up stage but haven't evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**MBAX 6170 (1.5) New Venture Creation**

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6171 (1.5) New Venture Creation**

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

**Requisites:** Requires prerequisite courses of MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6180 (3) New Venture Launch**

Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6190 (3) Projects in Entrepreneurial Companies**

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.

**Requisites:** Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite completion of MBAX 6110 or 6111 is strongly recommended prior to enrolling in MBAX 6190.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6195 (1-3) Special Topics in Entrepreneurship**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**MBAX 6210 (3) Applied Financial Management**

Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

**Requisites:** Requires prereqs MBAC 6060, MSBC 5060, or MSBC 5610 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), MS Finance (FNCE-MS) MS Real Estate (REAL-MS) mjrs onl

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6211 (3) Applied Financial Management**

Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

**Requisites:** Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6220 (3) Investment Management and Analysis**

Covers managing investment portfolios, blending economic theory and evidence with practitioner experience. Topics include understanding risk and return relationships, diversification, portfolio management, various asset classes, popular valuation models (capital asset, arbitrage pricing, and option pricing), aspects of fixed income and performance assessment.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6221 (1.5-3) Investment Management & Analysis**

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6230 (3) International Financial Management**

Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6250 (3) Derivative Securities**

Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Recommended:** Prerequisite for MBAD students, prerequisite course of MBAC 6060; for FNCE-MS majors, prerequisite MSBC 5060 (minimum grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6260 (3) Fixed Income Investing**

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

**Requisites:** Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6270 (3) Applied Derivatives**

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar**

First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6281 (1-2) Entrepreneurship Valuation and Investment Seminar2**

Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite MBAX 6280.

**MBAX 6282 (1.5) Entrepreneurship Valuation and Investment Seminar 3**

Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6281 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6295 (1.5-3) Topics in Finance**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6300 (3) Marketing Communication**

Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6301 (3) Marketing Communications**

Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students' understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6310 (3) Marketing Strategy**

Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6311 (3) Marketing Strategy**

Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6330 (3) Market Intelligence**

Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6331 (3) Market Intelligence**

Market Intelligence is a marketing decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers for both products and services. It is for managers as users of market information across marketing management, consulting, general management, and entrepreneurship to address problems of market selection, segmentation, positioning, new products, customer value and retention, pricing, communication, channel, etc.

SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6360 (3) New Product Development**

Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

**Requisites:** Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6361 (1.5) New Product Development**

Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Marketing

**MBAX 6365 (3) Practical Product Management**

This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry**

Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6370 (2-3) Customer Analytics**

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6372 (1.5) Professional Selling and Sales Management**

The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individual professional sellers and the organizations that employ them.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design**

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

**Requisites:** Requires prerequisite course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6381 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design**

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

**Requisites:** Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6395 (1-3) Special Topics in Marketing**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6410 (3) Process Analytics**

Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) or Business Analytics (BUAN) majors or SCAG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Systems

**MBAX 6420 (3) IT and Business Strategy**

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoptions efforts to success.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Systems

**MBAX 6421 (3) IT & Business Strategy**

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

**Requisites:** Requires prerequisite courses MBAC 6020, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6440 (3) Project Management**

Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Real Estate (REAL-MS), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6441 (3) Project Management**

Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors with 12 credit hours completed.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6450 (3) International Operations Management**

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6451 (3) International Business and Strategy**

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including global trade practices; legal and political issues; US trade laws; finance and accounting risks; global supply chain management, cultural challenges; global marketing, and global strategies. Upon completing of the course, you will have a broad foundational understanding of important contemporary issues and challenges of international business.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.  
**Grading Basis:** Letter Grade

**MBAX 6460 (3) Supply Chain Management**

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

**Equivalent - Duplicate Degree Credit Not Granted:** MSBC 5460

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Recommended:** Prerequisite MBAC 6080.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Systems

**MBAX 6500 (3) Management of Organizational Change**

Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6530 (1.5) Negotiating and Conflict Management**

Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6531 (1.5) Negotiating and Conflict Management**

Practice the art and science of successful negotiations. Provides students high interaction with businesses and entrepreneurs.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6540 (3) Consulting Skills**

Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6550 (3) Management of Technology and Innovation**

Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6560 (1.5) Executive Leadership**

Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. **Additional Information:** Departmental Category: MBA: Management

**MBAX 6565 (1.5) Inclusive Leadership**

This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 25% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population  $\zeta$  but fewer than 1% of Fortune 500 CEOs  $\zeta$  are Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6570 (3) Topics in Sustainable Business**

Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.

**Requisites:** Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Social Responsibility

**MBAX 6595 (1-3) Special Topics in Organizational Behavior**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6600 (3) Real Estate Principles**

Provides an introduction to the real estate business, both commercial and residential. Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

**Requisites:** Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6610 (3) Real Estate Finance and Investment Analysis**

Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

**Requisites:** Requires prerequisite course of MBAX 6600 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6620 (3) Real Estate Project Competition**

Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

**Requisites:** Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6630 (3) Real Estate Economics**

Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset.

**Requisites:** Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6640 (3) Real Estate Law and Practice**

Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Formerly MBAX 6855.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6650 (3) Real Estate Case Studies**

Requires students to analyze numerous real estate investment opportunities utilizing case study methodology. Cases will include analyses of various end uses (e.g. apartments, condominiums, office, retail, mixed use, industrial, and hotel) from both the purchaser and seller perspective. The cases include situations such as investing in existing properties, whether to make substantial rehabilitations, and how to put together a new development. Cases are primarily based in Colorado, although some are in other areas of US and international. Class discussion is designed to mimic a company's investment committee and requires students to both present and defend their positions.

**Requisites:** Requires prerequisite of MBAX 6630 or 6640 and MBAC 6610 or MSBC 5610 (all minimum grade D-). Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

**Grading Basis:** Letter Grade

**MBAX 6695 (1-3) Special Topics in Real Estate**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

**Grading Basis:** Letter Grade

**MBAX 6700 (3) Corporate Financial Reporting**

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 6220

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Accounting

**MBAX 6710 (3) Financial Statement Analysis**

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 6250

**Requisites:** Requires prerequisite course of MBAC 6020 or MSBC 5020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS majors only).

**Additional Information:** Departmental Category: MBA: Accounting

**MBAX 6761 (2) Managerial Accounting, Planning and Control**

Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.

**Requisites:** Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Accounting

**MBAX 6801 (3) Global Perspectives Seminar**

Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6802 (3) Pricing Strategy and Tactics**

Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology.

Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

**Requisites:** Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6806 (1.5-3) Global Perspectives**

Contrasting operations in US and a country or region outside the United States, students will study what changes US companies have made to successfully operate in foreign markets and how US companies have influenced foreign business operations. Reviews the history and present state of the inter-dependency between the domestic and international business environments. Culminates in a week-long trip to the country/region of study. Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6815 (3) Sustainable Real Estate**

Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Real Estate

**MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies**

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 5827

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MBAX 6841 (2) Decision Making for Managers**

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

**Requisites:** Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Management

**MBAX 6843 (3) Supply Chain and Operations Analytics**

Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

**Requisites:** Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) Prof'l MBA Prog (PMBA), Business Analytics (BUAN-MS) or Supply Chain Mgmt (SCMN-MS) majors or SCAG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Operations and Production Management

**MBAX 6847 (2) Emerging Markets in Global Business**

Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MBA: Entrepreneurship

**MBAX 6885 (3) Interpreting the Economic Environment**

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

**Requisites:** Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Additional Information:** Departmental Category: MBA: Finance

**MBAX 6930 (3) Commercializing Sustainable Energy Technologies**

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

**Equivalent - Duplicate Degree Credit Not Granted:** ENVM 5005

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**MBAX 6966 (1-3) Independent Study-Real Estate**

Independent study in the field of real estate.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

**Additional Information:** Departmental Category: MBA: Real Estate

**MSBC 5015 (1.5) Managerial Economics**

Studies the elements of the business firm's fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5020 (1.5) Financial Accounting**

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5031 (3) Quantitative Methods in Finance**

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

**Grading Basis:** Letter Grade

**MSBC 5032 (3) Real Estate Data Analysis**

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

**Requisites:** Restricted to REAL-MS students only.

**Grading Basis:** Letter Grade

**MSBC 5060 (3) Corporate Finance**

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5070 (3) Survey of Business Analytics**

Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding; it will introduce and subsequently involve extensive use of Python.

**Requisites:** Restricted to MS Business Analytics (BUAN-MS) majors and MKAG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5180 (3) Machine Learning in Python**

This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.

**Requisites:** Restricted to Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**MSBC 5220 (3) Investment Management & Analysis**

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

**Requisites:** Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**MSBC 5460 (3) Supply Chain Strategy**

Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.

**Equivalent - Duplicate Degree Credit Not Granted:** MBAX 6460

**Requisites:** Restricted to Supply Chain Management (SCMN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5480 (3) SCMN Experiential Projects**

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Supply Chain Management (SCMN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5490 (3) BUAN Experiential Projects**

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

**Requisites:** Restricted to Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Core

**MSBC 5600 (1.5) Real Estate Principles**

The course provides students with an introduction to the foundational terms, concepts, principles, and formulas fundamental to the business of real estate. It establishes the foundation for other real estate courses. Course content includes legal concepts including property rights and title, mortgage loan types, calculations and decisions, an introduction to time value of money and income capitalization, and real estate investment valuation and decision making utilizing the most common income valuation methods. Instruction and course format are traditional lecture and conversational.

**Requisites:** Restricted to REAL-MS students only.

**Grading Basis:** Letter Grade

**MSBC 5610 (3) Real Estate Finance and Investment**

The primary objectives of this course are to: (1) describe, analyze, and compare the features of residential mortgage loans, commercial mortgage loans, and commercial leases; (2) conduct income property investment analyses and develop the technical competence necessary to structure basic real estate transactions; (3) understand the operations and valuations of private equity funds and real estate investment trusts (REITs), and how real estate is securitized and sold to everyday investors.

**Requisites:** Restricted to REAL-MS students only.

**Grading Basis:** Letter Grade

**MSBC 5680 (3) Optimization Modeling**

Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**MSBX 5080 (3) Decision Modeling and Applications**

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**MSBX 5205 (3) Financial Strategy and Decision Modeling**

Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.

**Requisites:** Restricted to Masters of Finance (FNCE-MS) and Masters of Real Estate (REAL-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5225 (3) Advanced Portfolio Management**

Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

**Requisites:** Restricted to Master of Finance (FNCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5260 (3) Fixed Income Investing**

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

**Requisites:** Requires prereqs MBAC 6060, MSBC 5060, or MSBC 5610 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof MBA Program (PMBA), MS Finance (FNCE-MS) MS Real Estate (REAL-MS) mjrs onl

**Grading Basis:** Letter Grade

**MSBX 5270 (3) Applied Derivatives**

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MSBX 5310 (3) Customer Analytics**

Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.

**Requisites:** Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5311 (2) Customer Analytics**

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.

**Requisites:** Restricted to Professional MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**MSBX 5405 (3) Structured Data Modeling and Analysis**

Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5410 (3) Fundamentals of Data Analytics**

Exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using R before demonstrating the same concepts using SPSS and SAS. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis using R.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5415 (3) Advanced Data Analytics**

Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis**

Moves the student beyond structured data and sources into business scenarios where data is semi-structured to unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.

**Requisites:** Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) Supply Chain Mgmt (SCMN) or Business Analytics (BUAN) or BAMG-CERG mjrs onl

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5425 (3) Natural Language Processing for the Health Sciences**

Practitioners of natural language processing (NLP) use methods from math, science, engineering and linguistics to teach computers to understand human language. Because much biomedical information is stored as text, there are many possible applications of NLP in health sciences. This course offers an introduction to NLP for the health sciences. Students will gain a conceptual and hands-on introduction to fundamental tools, concepts and problems from NLP by exploring applications in healthcare, population health and biomedicine.

**Requisites:** Requires prerequisite courses of MSBC 5070 and MSBC 5180 (minimum grade D-).

**Recommended:** Prerequisite Python 3.

**Grading Basis:** Letter Grade

**MSBX 5430 (3) Advanced Statistical Analysis**

Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5435 (3) Planning and Production**

At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5440 (3) Decision Analysis**

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5450 (3) Transportation and Logistics**

Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5470 (3) Procurement and Contracting**

Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5480 (3) Information Security Management**

A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

**MSBX 5500 (3) Security Analytics with Python and Machine Learning**

Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.

**Requisites:** Requires prerequisite course of MSBX 5480 (minimum grade D-). Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (ITP) majors only.

**Grading Basis:** Letter Grade

**MSBX 5605 (3) Real Estate Investment and Risk Management**

This course empowers students with the knowledge and tools needed to understand, evaluate, and manage real estate investment risk and to recognize and capitalize upon potential real estate investment opportunities. We begin by exploring the types of risk investors face in residential real estate, mortgages, and investment properties and how to quantify those risks. With that foundation, we then delve into the history of such risks (e.g., the Great Depression, Great Recession, etc.) and regulations intended to address them. Finally, we explore current topics which are increasingly important in real estate (e.g., climate change, technology, etc.) including the risks and/or opportunities these challenges may present.

**Requisites:** Requires prerequisite course MBAX 6610 or MSBC 5610 (minimum grade D-). Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Program (PMBA) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: MS: Business Electives

**MSBX 5615 (1.5) Real Estate Modeling**

Real Estate Modeling and Analysis is a graduate level course which will teach students skills necessary to model Real Estate proformas to aid in valuation of acquisition and development of commercial real estate assets. The course will engage three software programs: Excel, Argus [Commercial Real Estate Software] and CoStar [largest commercial real estate information and analytics provider].

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

**MSBX 5680 (3) Real Estate Technology**

Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

**Requisites:** Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with DUAL Degree (DMA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

**MSBX 5820 (1-3) Special Topics in Accounting**

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard graduate business curriculum.

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 5820

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

**Grading Basis:** Letter Grade

**MSBX 6290 (3) Textual Analysis in Business**

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

**Equivalent - Duplicate Degree Credit Not Granted:** ACCT 6290

**Requisites:** Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

**Recommended:** Prerequisite MBAC 6060 (minimum grade D-).

**Grading Basis:** Letter Grade

## Business Administration - Master of Business Administration (MBA)

The breadth of training that master of business administration graduates receive prepares them to become high-level managers and lead in a challenging and evolving business environment.

The MBA program is rigorous and comprehensive, and demands student commitment. The curriculum develops a set of broad-based, integrative skills. Core courses provide a solid foundation in both business management and analytical disciplines, a foundation that fosters continued career growth. In addition to core courses stressing key functional areas of business, students can choose electives specific to a chosen area of concentration.

The case study method and student projects are used broadly throughout all courses, and common areas of study such as ethics, technology, communications and international issues are integrated throughout much of the curriculum. Students learn about management theory and its practical applications in "real-world" situations. Lectures, seminars, team

teaching, team projects and guest lectures are various approaches taken by the faculty to generate new ideas and encourage student input.

## Diversity

The Leeds School of Business encourages qualified individuals to apply regardless of gender, race, religion, national origin, age, physical limitation or sexual orientation.

## Requirements

### Full-Time MBA

During the first semester of study, to ascertain degree requirements, MBA students should meet with a member of the student services team for the MBA program.

Students entering the MBA program take a prescribed sequence of classes before beginning elective courses. A total of 55 credit hours is needed to graduate. Students entering the MBA program are expected to complete the degree in two years. Transferred coursework is not accepted into the MBA program.

MBA students may enroll in up to 6 credit hours of elective graduate coursework in CU Boulder programs other than the Leeds School of Business with explicit approval from the MBA Programs office prior to enrollment. All remaining 18 credit hours of electives must be taken within the MBA program. MBA academic internship credits will decrement the total number of non-Leeds elective credits available. Students may not take courses outside the University of Colorado Boulder and count them toward the degree. Students should contact individual departments for course listings and registration requirements for non-business courses.

All courses applied toward the 55 credit hours must be taken for a grade. Courses in which a C- or below is received are not accepted for credit toward the 55 credit hours and may have to be retaken. In this case, both grades are factored into the GPA. To withdraw from an elective course and receive a grade of W, a student must be earning a passing grade in that course. Students normally are not permitted to withdraw from courses after the sixth week of the semester. Students in the MBA program may not withdraw from specified MBAC lockstep coursework. An "I" is an incomplete grade. Use of the "I" is at the discretion of the course instructor and/or the dean. Students must ask for an incomplete grade. An "I" is given only when students, for reasons beyond their control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

Co-curricular activities are a critical counterpart to the classroom experience and enrich the value of the degree. Case competitions, student leadership positions, clubs, networking opportunities, guest speakers, small-group meetings with business leaders and professional mentoring all add to the immersive nature of the full-time program. Summer internship opportunities allow students to apply those core skills and develop new insights to help focus their choice of elective courses.

### Full-Time Required Courses

Code	Title	Credit Hours
MBAC 6001	Foundations of Teamwork	1.5
MBAC 6002	Social, Moral and Economic Foundations for Business	1.5

## Evening/Hybrid MBA

The curriculum of the Evening MBA program and Hybrid MBA program includes the same core of required courses as the full-time MBA program, but delivered in a format that accommodates students who are fully employed. Building on foundational courses, evening MBA and Hybrid MBA students then choose 12 total credits of electives to add greater depth and specificity of knowledge.

The Evening MBA program maintains a traditional classroom format, with classes meeting twice per week (summer terms may vary). The Hybrid MBA is a combination of enhanced virtual instruction and traditional classroom format (one Saturday/month with variation during summer terms).

The Evening MBA Program and Hybrid MBA program each begin in May, with an innovative schedule that allows students to graduate in two years (six semesters). During the second year, students complete MBAC 6052 Capstone Projects. Students in the evening and hybrid programs have access to electives in both programs, including the following options. For additional information about courses by semester, see the Plan(s) of Study tab. Elective coursework varies by term.

## Executive MBA

The Executive MBA (EMBA) program is for leaders and executives with significant work experience, ideally a minimum of eight years, who are interested in further developing their leadership skills. This program provides a cohort model that allows students to cultivate a professional and personal network throughout the program. Courses deliver over two semesters each academic year (fall and spring) for a total of four semesters. Enhanced virtual instruction provides flexibility so that students can focus on work, personal lives and school. Across all semesters, students will continue to meet with teams and faculty, leveraging technology for engagement.

During the program students will attend six intensive mandatory (one-week onsite) residencies which provide time for students to collaborate with faculty and classmates regarding knowledge learned in their respective classes. The one-week residencies are scheduled each semester of the program during the months of October, January and April. The first five residencies will be in the United States and the final residency will be onsite for ten days in a location outside of the United States. The EMBA program begins in August of every year with a (three-day onsite) orientation on the Boulder campus. The exact dates can be found under the Executive MBA Course Schedule (<https://www.colorado.edu/business/executive-mba-program/executive-mba-curriculum/executive-mba-course-schedule/>).

The EMBA curriculum begins with a first year of rigorous business fundamentals. Leadership is spread throughout the program with themes around inclusion, executive and ethical responsibilities, and negotiation. During the second year, students will learn advanced topics in marketing, finance and strategy as well as innovative business practices and how an entrepreneurial mindset can be leveraged. Academic enrichment opportunities are offered throughout the program as well as access to personal executive coaching. The EMBA curriculum comprises 45 total credits. Please see Plans of Study for a detailed course list.

## Dual Degree Programs

### Juris Doctor/MBA

The purpose of this dual degree program is to allow students admitted to both the School of Law and the Leeds School of Business to obtain the juris doctor (JD) and the master of business administration (MBA) degrees in four (or fewer) years of full-time study. The program is designed to train students for careers in which business administration and law overlap.

### Admission

To be eligible for the JD/MBA dual degree program of the School of Law and the Leeds School of Business, a student must apply separately to and be admitted by each of the two schools under their respective admission procedures and standards.

Students may elect the dual degree program at the time of initial application to both schools, or they may apply for the dual degree program during their first year of study in the degree program of either school.

### Course of Study

A student enrolled in the JD/MBA program may commence studies under the program in either the School of Law or the Leeds School of Business. Dual degree students are strongly encouraged to begin their course of study at the School of Law. However, a student must take the first year of the JD curriculum as a unit exclusively in the School of Law. Likewise, a student must take the first year of the MBA curriculum as a unit exclusively in the Leeds School of Business. Students can then take additional courses necessary to meet the requirements of the degree programs of the two schools.

No student in the dual degree program shall be allowed to take fewer than 9 credit hours or more than 16 credit hours during any term (excluding summer terms) without receiving the consent of the program advisor in each school in which courses are being taken.

### Credit for Law Courses in the JD/MBA Program

The Leeds School of Business grants credit toward the MBA degree for up to 12 credit hours of acceptable performance in law courses taken by a JD/MBA student at the School of Law. Core courses required in the law school program cannot be counted toward the 12 credit hours. A student must earn at least a 77 grade in a law school course to be accepted for Leeds School of Business credit. For credit to be granted, the law school courses must be approved before enrollment by an MBA advisor. Only courses taken after admission into the MBA program are credited toward the degree.

### Grading in the Dual Degree Program

Leeds School of Business credit for courses completed in the School of Law as part of the joint degree program is recorded on a *pass/fail* basis and is not included in the required MBA 3.00 cumulative average.

### MBA/MD

The Leeds School of Business and the University of Colorado School of Medicine offer students the ability to earn both an MBA and a Doctor of Medicine (MD) degree.

With the MD/MBA dual degree, students acquire expertise in business essentials like leadership, finance, accounting, marketing, strategy, innovation and social responsibility. As collaborative leaders, these medical professionals with business fundamentals are positively impacting patient care and healthcare delivery by leveraging their knowledge in powerful new ways. As the medical field rapidly changes and evolves—with new technologies, shifting professional roles, a dynamic public policy landscape, and new healthcare delivery models—physicians need leadership skills now more than ever to tackle complex issues and ensure high standards of care.

### Admission

To ensure student success—both academically and professionally—admission to the program is competitive. Each application undergoes a holistic review, including an evaluation of academic strengths and a high-level assessment of compatibility with the Leeds MBA program. SOM students must apply to become a dual degree student one year prior to beginning the MBA curriculum. All dual degree students must fulfill all requirements for each program, as well as all applicable dual degree requirements.

### Course of Study

The 5-year dual degree from CU Leeds School of Business and CU School of Medicine requires 31 credits of MBA core coursework. Dual degree students begin with the MD program. Students must complete two academic years of the MD program prior to starting the MBA experience. MBA requirements will be satisfied with successful completion of core curriculum (summer/fall/spring).

### MBA/MFA

The Leeds School of Business, in conjunction with the Department of Art and Art History, offers students the ability to earn an MBA and an MA in fine arts through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in digital marketing, web design, e-commerce, gallery/museum administration and private art consulting.

### Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

### Course of Study

Students in the MBA/MA in fine arts spend the first year of their dual degree program exclusively in either the business school or the fine arts program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and fine arts elective courses.

### Credit for Fine Arts Courses in the MBA/MA Fine Arts Program

Dual degree students in studio arts are required to complete 43 credit hours of MBA coursework and 45 credit hours of fine arts coursework. Dual degree students in art history are required to complete 43 credit hours of MBA coursework and 30 credit hours of fine arts coursework.

### MBA/MA in Anthropology

The MBA/MA in anthropology dual degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing

field of corporate cultural anthropology and ethnography or museum management.

### Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

### Course of Study

Students in the MBA/MA in anthropology spend the first year of their dual degree program exclusively in either the business school or the department of anthropology. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers students the opportunity to take both MBA and anthropology elective courses.

### MBA/MA in German Studies

The MBA/MA in German studies dual degree program enables students to earn an MBA and an MA in German studies simultaneously over three or four years. Students in this MBA/MA program pursue careers in international business.

### Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

### Course of Study

Students in the MBA/MA in German studies spend the first year of their dual degree program exclusively in either the Leeds School of Business or the Department of Germanic and Slavic Languages and Literatures. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers students the opportunity to take both MBA and German studies elective courses.

### MBA/MA in Theater and Dance

The Leeds School of Business, in conjunction with the Department of Theatre and Dance, offers students the ability to earn an MBA and an MA in theatre or dance through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums and arts presenters.

### Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

### Course of Study

Students in the MBA/MA in theatre and dance spend the first year of their dual degree program exclusively in either the business school or the theatre/dance program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

**Credit for Courses**

Dual degree students are required to complete 43 credit hours of MBA coursework and 24 credit hours of theatre/dance coursework. A minimum of 67 approved credit hours must be completed to earn both degrees.

**MBA/MENV**

An MBA degree in combination with the Masters of the Environment (MENV) degree will provide a student with a powerful set of tools and knowledge to expand career options. The MBA offers a valuable business toolkit—including leadership, critical thinking and communication skills. This option allows a student to complete two specialized master's degrees in less time than it would take to earn both separately.

**Admission**

Students must apply to each program separately and meet the respective application requirements and admissions standards for each program. Students admitted simultaneously to both programs are advised to begin the MBA program first. A person may elect the dual degree program at the time of initial application to both schools; or a student enrolled in the applicable degree program of either school may apply for admission to the other school and elect to be enrolled under the dual degree program.

**Course of Study**

Dual degree students in their second year will exclusively enroll in the Masters of the Environmental Program. Students will choose a specialization and enroll in all core and required MENV courses. MENV specializations include: Environmental Policy; Public Lands and Natural Resources; Renewable and Sustainable Energy; Sustainable Food Systems; and Urban and Regional Sustainability. Both degrees must be awarded simultaneously. Dual degree students must maintain the academic and ethical standards required of both programs. Students in good standing in one school, but not the other, may be allowed to continue in the school in which they are in good standing. Students who do not complete the dual degree program requirements (i.e., who withdraw for any reason from one of the two programs) will be required to meet the full requirements of the remaining program in which they are enrolled. Dual degree students must complete a Dual Degree Curricular Program (DDCP) form for their program and present to both advisors prior to beginning the degree. This is the initial map of the course sequence to meet the dual requirements and can change over time.

**Credit for Courses**

The MBA/MENV dual degree program allows for 9 MBA credits to be used for MENV degree requirements, and 12 MENV credits to be used for MBA degree requirements. Dual degree students will be required to complete 43 hours of MBA coursework and 39 hours of MENV coursework, for a total of 82 hours of combined coursework.

**MBA/MS in Business Analytics or Supply Chain Management**

The purpose of this dual degree program is to allow students admitted to the Leeds School of Business as a dual degree student to obtain the master of business administration (MBA) and master of science in business analytics or supply chain management degrees in two years of full-time study. An MBA degree in combination with the MS degree will provide students with a set of business tools to develop leadership, critical thinking and communications skills as well as a specialization in one of the STEM designated areas of either Business Analytics or Supply Chain Management. The MBA/MS offers students the opportunity to

earn both degrees together in less time than if the degrees were earned separately.

**Admission**

To be eligible for the MBA/STEM dual degree program, a student must apply directly to the Leeds School of Business choosing dual degree status. Applicants must select the MBA/MS-SCMN or the MBA/MS-BUAN dual degree option at the time of application to be evaluated for admission to both programs, simultaneously. Students may not apply to the MBA program, and subsequent to the start of classes, add the dual degree designation. Students must meet the admissions standards for each program separately. The Graduate Management Admissions Test (GMAT) or Graduate Record Examinations (GRE) will be used as the standardized examination for admissions to both the Leeds School of Business MBA and MS Supply Chain Management or Business Analytics programs.

**Course of Study**

Dual degree students must begin with the MBA program, and will take courses exclusively in the MBA program during the first year. The second year of the dual degree program will consist of the existing MS Supply Chain Management or MS Business Analytics curriculum, in full: 33 credits over three semesters.

**Credit for Courses**

Students are required to complete 37 credit hours of MBA coursework and 33 credit hours of MS coursework. Certain MBA elective courses are part of the STEM curriculum and must be taken in the second year as an MS student.

**MBA/MS in Environmental Studies**

The MBA/MS in environmental studies enables students to earn an MBA and an MS in environmental studies over three or four years. Students in the MBA/MA program have career interests that combine corporate business and environmental protection, the management of renewal energy, water conservation or environmental programs.

**Admission**

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

**Course of Study**

Students in the MBA/MS in environmental studies spend the first year of the dual degree program exclusively in either the business school or the environmental studies department. In the second year, courses are taken exclusively in the other department. The remaining year(s) students may take both MBA and environmental studies electives.

**Business Administration - Doctor of Philosophy (PhD)**

The Leeds School of Business provides a dynamic professional atmosphere comprised of quality diverse faculty and PhD students, framed by a thriving business community and a beautiful environment. The Leeds PhD program prepares students for research careers at leading universities and equips students with a deep understanding of the most influential research within the disciplines, as well as the tools necessary to contribute state-of-the-art research advancing these disciplines:

- accounting
- finance
- marketing
- information systems
- operations
- organizational behavior
- strategy and entrepreneurship

In addition to the creation of knowledge, the program also supports the dissemination of that knowledge from classrooms to the profession at large. The program is small enough to ensure that all students can receive the mentoring needed to innovate at the frontier of their disciplines.

Dr. Diego García chairs the PhD Curriculum and Policy Committee which oversees the Leeds PhD program.

## Requirements

PhD students must complete all Graduate School, Leeds School of Business and division requirements to be conferred the PhD in business administration. All PhD students are required to complete at least 30 credit hours of coursework and at least 30 credit hours of dissertation at CU Boulder. Additional coursework may be required as determined by the academic advisor. To comply with this 30-credit-hour requirement, a course must be taught by a member of the university's graduate faculty, must be at the 5000 level or above, and the student must achieve a grade of B- or better. Most students complete 7000- and 8000-level PhD seminars.

PhD students in all program areas except for Accounting are required to maintain a minimum GPA of 3.3 or better while in residence in the program. Accounting students must maintain a minimum GPA of 3.0.

PhD students are required to assume teaching apprentice roles for three sections of any course and then independently teach two courses to achieve teaching proficiency. PhD students are also expected to attend eight (8) workshops and/or trainings while in residence.

### Time Limit

PhD students have six years from the commencement of coursework to complete all requirements of the degree, but most PhD students complete their program within five years.

### Comprehensive Examination

Before admission to candidacy, a PhD student must pass a comprehensive examination in the field of concentration. The examination may be oral, written or both, and will test the student's mastery of a broad field of knowledge, not merely the formal coursework completed. Each division will determine the required content, length and standards of evaluation for the exam. Check with the division as to the specific requirements for the comprehensive exam.

### Admission to Candidacy

PhD students are admitted to candidacy according to Graduate School procedures and requirements. PhD students shall complete all coursework and any other requirements listed on their degree plans, earn at least four semesters of residence and successfully pass the comprehensive exams before admission to candidacy is approved by the Graduate School. In addition, requirements related to academic quality of work, graduate-level coursework, the minimum number of course credit

hours, and graduate faculty membership must be met before admission to candidacy is approved.

### Dissertation Proposal and Final Defense

All PhD students are required to successfully present and defend a dissertation proposal on a subject approved by the candidate's dissertation committee. The dissertation proposal must be passed before attempting to defend a final dissertation.

A final dissertation must be based upon original investigation showing mature scholarship and critical judgment, as well as competence with research tools and methods. To be acceptable, the dissertation must be a significant contribution to knowledge in the candidate's primary field and must comply with the CU Boulder Graduate School Thesis and Dissertation Specifications. All PhD students are required to present a final dissertation defense, which is open to the public.

## Accounting - Master of Science (MS)

A master's degree in accounting prepares students to become financial professionals who can help a wide range of organizations thrive. Accounting is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful. Through the program, graduates develop specific expertise in the area of accounting by strengthening and enhancing the ability to interpret and communicate information about a company's operations and finances. Academic experience, combined with a practical internship experience, propels graduates to be proficient in the "language of business" that is accounting.

Typically, over 90 percent of MS accounting students have a job in accounting and financial advisory fields at graduation, and the demand for CU Boulder-educated accountants continues to soar. Many graduates begin careers with public accounting firms in audit, tax or advisory business services. Others prefer information management, tax or compliance positions within corporations. Still other opportunities exist in financial management, nonprofits and government agencies.

### MS Program

Coursework in accounting conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding and use of information, which enables students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

Accounting students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses they may need to fulfill in order to obtain licensure in a particular state.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Business Administration - Bachelor of Science (BS) (p. 666).

### Requirements

The MS accounting degree consists of ten graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

### Prerequisites

The following four intermediate-level accounting courses or their equivalent must be completed before starting the master's-level accounting courses. Course equivalency will be assessed by the MS in Accounting faculty director during transcript review in the application process.

Code	Title	Credit Hours

ACCT 5820	Topics in Business	

### Plan(s) of Study

Students will meet with their advisors to plan out their course of study to meet degree requirements.

## Business Analytics - Master of Science (MS)

The MS degree in business analytics focuses on the exciting and fast-growing field of "big data." Merging developments in marketing and customer analytics with operations research, business analytics, aspects of computer science and statistical methods, the specialization offers a technical, quantitative and statistically intensive program designed to train specialists in turning "big data" into business decisions. Analytics may be used as input for human decisions or may drive fully automated decisions about why some data pattern is observed, what will happen next and how a firm can adapt to optimize that outcome. Students have an option to customize their curriculum by specializing in decision science, healthcare analytics, marketing analytics, research analytics or security analytics.

This 10-month program includes extensive coursework and an application of materials, preparing students for a range of job opportunities. In addition to the academic coursework, four enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support our commitment to developing the "whole student" by incorporating professional development into the academic experience.

### Distance Education Option via Online+

Students may enroll in the MS Business Analytics (BUAN) or MS Supply Chain Management (SCMN) degree program through distance education (online) and complete the degree requirements established for each MS program. Distance education offers regularly scheduled on-campus graduate courses to remote off-campus (distance) students using advanced virtual and video-conferencing technology. Distance students participate both synchronously (at a scheduled delivery time) and asynchronously (no scheduled delivery time). Instructors, courses, assignments, projects, exams and evaluations are identical for on-campus and off-campus students. Online+ courses are term-based (i.e., follow the regular academic schedule) and structured to maximize student engagement with faculty and other online+ students to support student success and degree completion.

Designed for working professionals, the online option allows students to enroll part-time and follows the same curriculum as the on-campus degree option. Please see degree requirements and plan(s) of study specific to Business Analytics or Supply Chain Management. Based on circumstance and timeline to completion, students enroll in one or two courses each semester, completing the degree in two years.

*Note:* Online sections for Marketing Analytics and Healthcare Analytics track electives are delivered regularly; online sections for Decision Sciences and Security Analytics tracks are not guaranteed. Online academic advisors can offer further guidance.

For more information, connect with the individual graduate program directly.

## Finance - Master of Science (MS)

The nine-month MS in finance provides extensive coursework and an in-depth application of materials, preparing students for a range of job opportunities. In addition to the coursework, enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support the "whole student" experience by incorporating professional development into the academic experience.

The focused finance curriculum offers students a firm grounding in general finance, and helps to develop the specific skills necessary to pursue careers in a variety of financial fields.

The MS degree in finance offers two tracks to develop skills in specific disciplines:

- The **investment management (IM) track** provides the knowledge and practical tools to construct optimal investment portfolios for an investor's desired goals in terms of assets, risks and returns. The curriculum offers strong foundational knowledge of investment theories along with intensive data-driven analysis to inform asset selection, portfolio construction, diversification and risk management. Coursework covers the drivers of value and growth in markets, the institutional features of stocks, bonds and derivatives markets, as well as investors' considerations among the various investment vehicles including ETFs, mutual funds, hedge funds, venture capital and private equity. This track prepares graduates with competencies necessary to pursue a career with an investment management firm and to take the CFA Level I exam.
- The **sustainable finance (SF) track** provides up-to-date knowledge for a wide array of careers helping investors, corporations, and governments allocate capital between different sustainability projects and evaluate the impact of sustainable funding in the markets.
- The **corporate finance/consulting (CF) track** prepares students for a career in management consulting, investment banking, private equity and venture capital.

For additional information, please visit Leeds School Graduate Programs (<http://www.colorado.edu/business/ms-programs/>) or email us at [leedsgrad@colorado.edu](mailto:leedsgrad@colorado.edu).

## Real Estate - Master of Science (MS)

The MS in Real Estate program is offered as a nine-month degree for traditional full-time students, or can be completed over two years by working professionals. The degree keeps students and professionals up-to-date with industry-focused technical skills, necessary for today and the future of where the real estate industry is headed. As technology continues to redefine the real estate industry, data-driven insights on the use of commercial and residential space are critical to maximizing value and impact. With this degree, students will develop analytical skills and innovative thinking, expertise in quantitative financial analysis, basic business concepts and leadership skills. World-class faculty, along with industry influencers, draw from in-depth knowledge of the latest industry trends and business applications giving students an edge in a rapidly advancing field.

This program also incorporates co-curricular opportunities including market treks, case competitions and networking events.

## Requirements

### Admission Requirements

Applicants for the real estate track must have a minimum of two years' relevant work experience.

For additional information, please visit Leeds School's Graduate Programs (<http://www.colorado.edu/business/ms-programs/>) webpage or email [leedsgrad@colorado.edu](mailto:leedsgrad@colorado.edu).

## Supply Chain Management - Master of Science (MS)

The supply chain management master's degree provides students with the expertise needed to manage business supply chains in the global economy. This ten-month program includes extensive coursework which prepares students for a range of job opportunities. In addition to the academic coursework, four enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support our commitment to developing the "whole student" by incorporating professional development into the academic experience.

Based on an "action learning" model, the program is designed to provide hands-on supply chain project management experience, amplified by shared experiences with other students.

Graduates will be prepared for responsible and influential jobs in a variety of organizations, including large manufacturing, retail and distribution organizations; transportation companies; supply chain software companies; and supply chain consulting firms.

### Distance Education Option via Online+

Students may enroll in the MS Business Analytics (BUAN) or MS Supply Chain Management degree program through distance education (online) and complete the degree requirements established for each MS program.

Distance education offers regularly scheduled on-campus graduate courses to remote off-campus (distance) students using advanced virtual and video-conferencing technology. Distance students participate both synchronously (at a scheduled delivery time) and asynchronously (no scheduled delivery time). Instructors, courses, assignments, projects, exams and evaluations are identical for on-campus and off-campus students. Online+ courses are term-based (i.e., follows the regular academic schedule) and structured to maximize student engagement with faculty and other online+ students to support student success and degree completion.

Designed for working professionals, the online option allows students to enroll part-time and follows the same curriculum as the on-campus degree option. Please see degree requirements and plan(s) of study specific to business analytics or supply chain management. Based on circumstance and timeline to degree completion, students enroll in one or two courses each semester, completing the degree in two years. For more information, connect with the individual graduate program directly.

## Requirements

### Admission Requirements

Admissions guidelines and application details are outlined on the master's programs admissions (<https://www.colorado.edu/business/ms-programs/masters-programs-admissions/>) website. Admission to the program may recommend or require preparation or refresher courses in statistics, math and business.

### Experiential Projects

The experiential project pairs students with clients in industry to work on important practical problems in supply chain management. Students work under the supervision of faculty and meet together weekly to discuss progress, jointly work on problems and to share experiences. This hands-on project management experiences prepares graduates to make an immediate meaningful contribution in the workplace.

## Taxation - Master of Science (MS)

A master's degree in taxation prepares students to become financial professionals who can help a wide range of organizations thrive. Taxation is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful.

Through our program, our graduates develop specific expertise in the area of taxation by strengthening and enhancing the ability to interpret and communicate information about a company's operations and finances. Academic experience, combined with a practical internship experience,

propels our graduates to be proficient in the "language of business" that is taxation.

Coursework in taxation conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding, and use of information, which enable students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

## CPA Licensure

Taxation students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses, they may need to fulfill in order to obtain licensure in a particular state.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Business Administration - Bachelor of Science (BS) (p. 666).

## Requirements

The MS taxation degree consists of 10 graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

### Prerequisites

The following four intermediate-level accounting courses or their equivalent must be completed before starting the master's-level accounting courses. Course equivalency will be assessed by the faculty director during transcript review in the application process.

## Plan(s) of Study

Students will meet with their advisors to plan out their course of study to meet degree requirements.

## Business Analytic Methods - Graduate Certificate

The business analytic methods certificate courses comprise the foundational topics in a business analytics curriculum, providing business analytics training for mid-career professionals in a number of roles, including human resources, pricing, optimization, procurement, finance, real estate and acquisition.

Designed for nondegree students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students participate in coursework both synchronously (scheduled delivery time) and asynchronously (no scheduled delivery time). As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

## Requirements

### Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (<https://leeds.apply.colorado.edu/apply/>).

Applicants must provide:

- Statement of purpose (1–2 pages) explaining how the business analytic methods graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

### Course Requirements

Business analytic methods certificate courses include the courses listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
MSBX 5410	Fundamentals of Data Analytics	3
MSBX 5405	Structured Data Modeling and Analysis	3
MSBX 5415	Advanced Data Analytics	3
MSBX 5420	Unstructured and Distributed Data Modeling and Analysis	3
<b>Total Credit Hours</b>		<b>12</b>

### Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

## Marketing Analytics - Graduate Certificate

The marketing analytics certificate courses comprise the major topics in an advanced business analytics curriculum, providing marketing analytics training for mid-career professionals in business analytics or marketing roles. The courses have been specifically selected in order to teach students core concepts and targeted skills in marketing analytics

Designed for nondegree students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students participate in coursework both synchronously (scheduled delivery time) and asynchronously (no scheduled delivery time). As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

## Requirements

### Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (<https://leeds.apply.colorado.edu/apply/>).

Applicants must provide:

- Statement of purpose (1–2 pages) explaining how the marketing analytics graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

### Courses

Marketing analytics certificate courses are listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
APRD 6342	Digital Advertising	3
MBAX 6330	Market Intelligence	3
MSBX 5310	Customer Analytics	3
MSBC 5070	Survey of Business Analytics	3

### Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

## Supply Chain Analytics - Graduate Certificate

The supply chain analytics certificate courses comprise the major foundational topics in any supply chain management curriculum, providing necessary background for further advanced study. The four courses have been specifically selected in order to teach students core concepts and targeted skills in the fundamentals of supply chain analytics.

Designed for nondegree students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students participate in coursework both synchronously (scheduled delivery time) and asynchronously (no scheduled delivery time). As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS supply chain degree.

Students educated in supply chain analytics will have the knowledge to expand their careers as analysts in supply chain network design, logistics, purchasing and procurement, inventory and production control, transportation network design, facilities location planning, demand forecasting, long term aggregate planning and sub-specialties therein.

## Requirements

### Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (<https://leeds.apply.colorado.edu/apply/>).

### Course Prerequisite

Students applying to the graduate certificate are required to complete a course prerequisite. The course prerequisite may be satisfied by *one* of the following:

- Successful completion of MSBC 5460 (or successful completion of similar coursework at another university)
- Successful completion of the non-credit Coursera course Supply Chain Management Strategy
- Relevant work experience

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

### Additional Materials

In addition, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the supply chain analytics graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

### Courses

Supply chain analytics certificate courses are listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
MSBX 5410	Fundamentals of Data Analytics	3
MBAX 6410	Process Analytics	3
MSBX 5415	Advanced Data Analytics	3
MBAX 6843	Supply Chain and Operations Analytics	3

## Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

## Supply Chain Foundations - Graduate Certificate

The supply chain foundations certificate courses comprise the major foundational topics in any supply chain management curriculum, providing necessary background for further advanced study. The four courses have been specifically selected in order to teach students core concepts and targeted skills in supply chain management.

Designed for nondegree students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students participate in coursework both synchronously (scheduled delivery time) and asynchronously (no scheduled delivery time). As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS supply chain degree.

## Requirements

### Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (<https://leeds.apply.colorado.edu/apply/>).

### Course Prerequisite

Students applying to the graduate certificate are required to complete a course prerequisite. The course prerequisite may be satisfied by *one* of the following:

- Successful completion of MSBC 5460 (or successful completion of similar coursework at another university)
- Successful completion of the non-credit Coursera course Supply Chain Management Strategy
- Relevant work experience.

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

### Additional Materials

In addition, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the supply chain foundations graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

### Courses

Supply chain foundations certificate courses are listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
MSBX 5450	Transportation and Logistics	3
MSBX 5470	Procurement and Contracting	3
MSBX 5435	Planning and Production	3
MBAX 6450	International Operations Management	3

## Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

## Education

The School of Education offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K–12 classrooms, conducting educational research, developing evidence-informed policy and designing innovative learning environments both in schools and in community-based settings.

Graduate programs in the School of Education serve practicing teachers, higher education professionals, as well as those seeking to improve education through rigorous research and evidence-informed policy and practice. The School of Education's doctoral program is a cohort-based, full-time program that prepares individuals to lead in universities, research or policy institutes, state or government agencies and innovative non-profit organizations.

## Mission

Our mission in the School of Education is grounded in a lived commitment to democracy, diversity, equity and justice. We teach and conduct research to make a positive difference with and in schools and communities. The work of our faculty, researchers, staff and students leads to evidence-based policy and practice. We aim for our graduates to be engaged and informed educators, researchers, policymakers and community leaders.

## Licensure

The School of Education is authorized by the Colorado Department of Education and the Colorado Department of Higher Education to offer teacher preparation programs.

Because each state has its own laws and standards regarding teacher preparation, our teacher education programs do *not* prepare candidates for licensure in states other than Colorado. It is strongly recommended that students planning to seek professional licensure or certification in a state other than Colorado contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how a degree from CU Boulder may satisfy another state's requirements for licensure in advance of program completion.

## Policies & Requirements

### Admission

Prospective students seeking admission to a graduate degree program should view electronic application instructions and admission information on the School of Education Graduate Program (<https://www.colorado.edu/education/academics/graduate-programs/>) webpage. GRE test scores are optional for admission to the doctoral programs.

Admission to all programs and degrees in the School of Education is selective. Master's admissions deadlines are October 1 for spring semester, January 15th for Fall and Summer for international students, and February 1st for Fall and Summer for domestic applicants. Note that our MA+ Licensure programs only accept applications for the Summer term. The admissions deadline for PhD applicants is November 15th for international applicants and December 1st for domestic applicants. The PhD program only accepts applications for the Fall semester. Students should visit the International Admissions (<http://www.colorado.edu/international/international-admissions/>) webpage for additional forms and information.

## Advising

Graduate students are assigned an individual faculty advisor after admission and are required to submit a formal plan of study, approved by their advisor, before the end of the first full year of study.

## Maximum Load and Part-Time Study

A maximum of 15 credit hours in any one semester may be applied toward graduate degree requirements. During the summer, 9 credit hours is the maximum that will be counted toward education graduate degrees. Within this limit, students may take up to 6 credit hours in a five-week summer term, and/or 3 credit hours in a three-week term. During the academic year for financial aid purposes, students will be regarded as having a full load if they are registered for 5 or more credit hours in courses numbered 5000 or above, or are registered in a minimum of 5 dissertation or 1 MA thesis hour. At least four semesters of residence credit hours, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder. See the Graduate School section for clarification.

## Opportunities for Assistantships

The School of Education has a limited number of assistantships administered by the dean on the recommendations of faculty and the associate deans. Some assistantships involve the supervision of student teachers; others involve helping professors in their teaching or research. Taxable stipends in amounts set by the university are paid for all assistantships. Appointments are usually made in terms of one-fourth time (10 hours a week) or one-half time (20 hours a week).

## Master of Arts in Education

The master of arts degree requires one academic year or more of graduate work beyond the bachelor's degree.

The master's degree must be completed within four years of initial enrollment. The MA plan II (non-thesis) degree requires a minimum of 30 credit hours to graduate. See the *Graduate School section for discussion of plan I and plan II*. Students may transfer no more than 9 credit hours of work taken at another institution or as a non-degree student at CU Boulder.

All program areas have outlined a recommended or required program of study, and students pursuing a degree are expected to follow that program unless they have appropriate substitutions arranged in advance with their advisors and the associate dean of students.

At the beginning of the final term of study, each student must submit a "Candidacy Application for an Advanced Degree." These forms are available online through the Graduate School (<https://www.colorado.edu/graduateschool/admissions/>). If a minor is included, the form must first be signed by a representative of the student's minor department or program area. The form must first be signed by the student and the student's faculty advisor, then submitted to the School of Education Graduate Programs Coordinator for initial approval and then to the Graduate School for final approval. All students are required to pass a comprehensive-final examination or its equivalent, as determined by the program's faculty committee (For time limits and other information, see the Graduate School section under master's degree).

## Doctor of Philosophy (PhD) in Education

Please see the PhD in Education (p. 1491) section of the catalog for details.

## Graduation

A student must apply online through the student portal for graduation via the student portal; this is the official notification to the Graduate School of intent to graduate during a given semester. The student will be permitted to graduate during a specific semester only if you have applied by the deadline for that semester. If they do not graduate during the semester for which they applied, the student must apply online again for the new semester. Application submissions are not retained beyond the semester indicated online. The Graduate School determines all deadlines. The student is responsible for meeting all deadlines to ensure graduation during a particular semester.

## Scholarships and Awards

Each year a number of merit-based Teaching Assistantships (TA), Research Assistantships (RA), Graduate Part-Time Instructors (GPTI), and fellowships are available in the School of Education to support full-time doctoral study. Half-time appointments (the maximum allowed) for 20 hours of work per week are the norm. Quarter-time RA, TA, and GPTI appointments (10 hours per week) may also be made. The monetary amount of stipends paid for assistantships are set by the university. These stipends are taxable income. Students must be considered full-time to hold an assistantship. According to university policy, full-time enrollment prior to completing the comprehensive examination is five (5) hours of coursework per semester at the 5000 level or above or eight (8) semester hours of mixed level coursework. After passing the comprehensive examination, full-time is considered to be five (5) dissertation hours per semester.

The strongest doctoral applicants are nominated by the school for fellowships awarded by the Graduate School. Candidates apply in the spring semester for scholarships and awards for the following school year. Application procedures and deadlines are publicized by the Graduate School.

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. The Office of Financial Aid, in conjunction with the Graduate School, awards financial aid in the form of grants and workstudy jobs on the basis of both need and merit criteria. Students must be registered for a minimum of four credits in order to be eligible for Financial Aid.

State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students from low-income families. Information about these opportunities may be found on the School of Education (<http://www.colorado.edu/education/admissions/financial-aid-scholarships/>) website.

## Academic Standards

A grade average of B (3.00) or better is required for all work taken for any graduate degree. Transferred credits are not included when calculating grade averages.

A mark below B- will not be credited toward the PhD program; a mark below C is not acceptable for MA students. Students who do not maintain at least a B (3.00) average or better may be suspended by the dean of the Graduate School upon the recommendation of the School of Education.

Students may also be suspended from the Graduate School for continued failure to maintain satisfactory progress toward the degree sought.

Please refer to the Graduate School (p. 1068) for details on Academic Standing.

## Programs of Special Interest

### Graduate Certificate Programs

There are a number of interdisciplinary Graduate Certificate Programs that align with and expand School of Education programs of study. These include, but are not limited to:

#### Quantitative Methods for Behavioral Sciences

The purpose of the Graduate Certificate in Quantitative Methods is fourfold: (a) to strengthen interdepartmental links and communication among social and human science departments at CU Boulder, both in general and specifically with regards to quantitative research methodology and statistical analysis, (b) to provide incentive and recognition to graduate students from a diverse set of departments who choose to cultivate expertise in quantitative research methods and methods of statistical analysis, (c) to increase the visibility of and promote courses in quantitative research methods (possibly with the benefit that additional quantitative courses can be developed and taught), and (d) as a consequence of all of the above, to improve the quality of quantitative training of graduate students at CU Boulder, increasing students' chances of employment upon completion of their graduate studies.

Please visit the Quantitative Methods for Behavioral Sciences (<https://catalog.colorado.edu/graduate/colleges-schools/interdisciplinary-programs/quantitative-methods-behavioral-sciences-graduate-certificate/#requirementstext>) certificate page for more details.

#### Teaching English to Speakers of Other Languages

The Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) is a 14-15 credit post-baccalaureate program designed for individuals who wish to gain, or continue to develop, the professional knowledge, skills and dispositions that qualify them to teach learners of English as an additional language in the U.S. and/or abroad. This graduate certificate prepares teacher candidates to teach young learners, adolescents and adults in a number of contexts, domestic and abroad, including community-based programs, private language institutes, intensive English programs and after school programs.

Please visit the Teaching English to Speakers of Other Languages (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/linguistics/teaching-english-speakers-other-languages-graduate-certificate/#requirementstext>) certificate page for more details.

#### Culture, Language and Social Practice

The Graduate Certificate in Culture, Language and Social Practice (CLASP). This program provides an interdisciplinary forum on language and society for CU students and faculty. This is facilitated through regular colloquia on the subject of language and society, as well as the diverse course offerings in the CLASP graduate certificate program. The CLASP program brings cohesion to empirical and theoretical research currently conducted on campus in varied analytic traditions that focus on the study of culture, language and social practice. These traditions include sociolinguistics, linguistic anthropology, literacy, bilingualism, second language acquisition, language endangerment and revitalization, narrative studies, symbolic interactionism, language variation and

change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

Please visit the Culture, Language and Social Practice (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/linguistics/culture-language-social-practice-graduate-certificate/#requirementstext>) certificate page for more details.

## Programs of Study

### Degree Programs

The degrees available in the various areas of graduate study are listed below.

#### Curriculum & Instruction

- Master of Arts

#### Educational Foundations, Policy & Practice

- Master of Arts
- Master of Arts in Higher Education

#### Equity, Bilingualism and Biliteracy

- Master of Arts

#### Learning Sciences & Human Development

- Master of Arts

#### Teacher Leadership

- Master of Arts

#### Education

The School of Education offers a PhD in Education, which has seven program areas of emphasis

- Doctor of Philosophy
  - Educational Foundations, Policy, and Practice
  - Equity, Bilingualism, and Biliteracy
  - Learning Sciences and Human Development
  - Literacy Studies
  - Research and Evaluation Methodology
  - STEM Education
  - Teacher Learning, Research and Practice

#### Teaching Endorsements at the Graduate Level

Through the School of Education, CU Boulder offers advanced coursework leading to teacher added endorsements in the following areas:

- Culturally & Linguistically Diverse Education (grades K–12)
- Culturally & Linguistically Diverse Bilingual Education Specialist (grades K–12)
- Special Education Generalist (grades K–12)

All of the above programs have degree, licensure or experience requirements that must be fulfilled before admission. Please check with the School of Education before applying.

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Lindsay, William ([https://experts.colorado.edu/display/fisid\\_168224/](https://experts.colorado.edu/display/fisid_168224/))  
Assistant Teaching Professor; PhD, University of Colorado Boulder

Lizarraga, Jose ([https://experts.colorado.edu/display/fisid\\_165966/](https://experts.colorado.edu/display/fisid_165966/))  
Assistant Professor; PhD, University of California-Berkeley

Lopez, Enrique J. ([https://experts.colorado.edu/display/fisid\\_151426/](https://experts.colorado.edu/display/fisid_151426/))  
Associate Professor, Faculty Director; PhD, Stanford University

Maes, Johanna ([https://experts.colorado.edu/display/fisid\\_116936/](https://experts.colorado.edu/display/fisid_116936/))  
Associate Teaching Professor; PhD, Colorado State University

McIntosh, Betsy ([https://experts.colorado.edu/display/fisid\\_160017/](https://experts.colorado.edu/display/fisid_160017/))  
Assistant Teaching Professor; PhD, University of Pennsylvania

Meyer, Elizabeth Jackson ([https://experts.colorado.edu/display/fisid\\_156354/](https://experts.colorado.edu/display/fisid_156354/))  
Associate Professor; PhD, McGill University (Canada)

Molnar, Alex John ([https://experts.colorado.edu/display/fisid\\_148836/](https://experts.colorado.edu/display/fisid_148836/))  
Research Professor; MSW, University of Wisconsin-Milwaukee

Moses, Michele S. ([https://experts.colorado.edu/display/fisid\\_141025/](https://experts.colorado.edu/display/fisid_141025/))  
Professor, Vice Provost; PhD, University of Colorado Boulder

Nogueron-Liu, Silvia ([https://experts.colorado.edu/display/fisid\\_155783/](https://experts.colorado.edu/display/fisid_155783/))  
Associate Professor; PhD, Arizona State University

Nzinga, Kalonji ([https://experts.colorado.edu/display/fisid\\_165958/](https://experts.colorado.edu/display/fisid_165958/))  
Assistant Professor; PhD, Northwestern University

Otero, Valerie K. ([https://experts.colorado.edu/display/fisid\\_118377/](https://experts.colorado.edu/display/fisid_118377/))  
Professor, Faculty Director; PhD, University of California, San Diego

Palmer, Deborah ([https://experts.colorado.edu/display/fisid\\_157996/](https://experts.colorado.edu/display/fisid_157996/))  
Professor; PhD, University of California, Berkeley

Pasquesi, Kira ([https://experts.colorado.edu/display/fisid\\_158236/](https://experts.colorado.edu/display/fisid_158236/))  
Assistant Teaching Professor; PhD, University of Iowa

Penuel, William Richard ([https://experts.colorado.edu/display/fisid\\_149719/](https://experts.colorado.edu/display/fisid_149719/))  
Distinguished Professor; PhD, Clark University

Polman, Joseph Louis ([https://experts.colorado.edu/display/fisid\\_151296/](https://experts.colorado.edu/display/fisid_151296/))  
Professor, Associate Dean; PhD, Northwestern University

Ramirez, Karen E. ([https://experts.colorado.edu/display/fisid\\_116951/](https://experts.colorado.edu/display/fisid_116951/))  
Distinguished Teaching Professor; PhD, University of Illinois at Urbana-Champaign

Rexroth, Grace ([https://experts.colorado.edu/display/fisid\\_167469/](https://experts.colorado.edu/display/fisid_167469/))  
Assistant Teaching Professor; PhD, University of Colorado Boulder

Santiago Schwarz, Vanessa ([https://experts.colorado.edu/display/fisid\\_163872/](https://experts.colorado.edu/display/fisid_163872/))  
Assistant Teaching Professor; PhD, University of Colorado Boulder

Schultz, Kathy ([https://experts.colorado.edu/individual/fisid\\_157988/](https://experts.colorado.edu/individual/fisid_157988/))  
Professor, Dean; PhD, University of Pennsylvania

Scornovacco, Karla  
Assistant Teaching Professor; PhD, University of Colorado Boulder

Shear, Benjamin R. ([https://experts.colorado.edu/display/fisid\\_157747/](https://experts.colorado.edu/display/fisid_157747/))  
Assistant Professor; PhD, Stanford University

Shepard, Lorrie A. ([https://experts.colorado.edu/display/fisid\\_105949/](https://experts.colorado.edu/display/fisid_105949/))  
Professor Emeritus; PhD, University of Colorado Boulder

Sideris, Sabrina ([https://experts.colorado.edu/display/fisid\\_120493/](https://experts.colorado.edu/display/fisid_120493/))  
Assistant Teaching Professor; PhD, University of Denver

Sinha, Vandna ([https://experts.colorado.edu/display/fisid\\_165162/](https://experts.colorado.edu/display/fisid_165162/))  
Associate Research Professor; PhD, University of Denver

Staley, Sara J. ([https://experts.colorado.edu/display/fisid\\_155137/](https://experts.colorado.edu/display/fisid_155137/))  
Assistant Professor; PhD, University of Colorado Boulder

Stillman, Jamy A. ([https://experts.colorado.edu/display/fisid\\_156381/](https://experts.colorado.edu/display/fisid_156381/))  
Associate Professor; PhD, University of California, Los Angeles

Taylor, Edward V. ([https://experts.colorado.edu/display/fisid\\_151510/](https://experts.colorado.edu/display/fisid_151510/))  
Associate Teaching Professor; PhD, University of California, Berkeley

Valladares, Michelle

Associate Research Professor, Associate Director; PhD, University of California, Los Angeles

Van Buskirk, Allison ([https://experts.colorado.edu/display/fisid\\_159795/](https://experts.colorado.edu/display/fisid_159795/))  
Assistant Teaching Professor; MA, Naropa University

Veveer, Elaina

Assistant Teaching Professor; MA, University of Colorado Boulder

Webb, David C. ([https://experts.colorado.edu/display/fisid\\_141204/](https://experts.colorado.edu/display/fisid_141204/))  
Associate Professor; PhD, University of Wisconsin–Madison

Welner, Kevin G. ([https://experts.colorado.edu/display/fisid\\_115565/](https://experts.colorado.edu/display/fisid_115565/))  
Professor; PhD, University of California, Los Angeles

White, Terrenda Corisa ([https://experts.colorado.edu/display/fisid\\_152828/](https://experts.colorado.edu/display/fisid_152828/))  
Associate Professor; PhD, Teachers College at Columbia University

Wilson, Terri Suzanne ([https://experts.colorado.edu/display/fisid\\_155469/](https://experts.colorado.edu/display/fisid_155469/))  
Associate Professor, Faculty Director; PhD, Columbia University

Zarske, Malinda Schaefer ([https://experts.colorado.edu/display/fisid\\_120823/](https://experts.colorado.edu/display/fisid_120823/))  
Lecturer; PhD, University of Colorado Boulder

## Courses

### **EDUC 5001 (3) Framing Equity and Justice in the Humanities Classroom**

Critically frames learning to teach for equity and justice within schools as systems. Orients students to the School of Education's mission and guiding principles of the Secondary Humanities program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 50 hours in local schools.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4001

**Requisites:** Restricted to Masters-level teacher licensure students with a English-Secondary Education (EDEN-LICG) or Social Studies-Secondary Educ (EDSS-LICG) plan.

**Grading Basis:** Letter Grade

### **EDUC 5002 (3) Framing Equity and Justice in the STEM Classroom**

Critically frames learning to teach for equity and justice in Science, Technology, Engineering, and Mathematics [STEM] Classrooms. Orients students to the School of Education's mission and guiding principles of the CU Teach program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 40 hours in local schools.

**Requisites:** Restricted to Mathematics-Secondary Education (EDMA-LICG) or Science-Secondary Educ (EDSC-LICG) students only.

**Grading Basis:** Letter Grade

### **EDUC 5005 (3) Advanced Social Foundations of Education**

Critically examines the intellectual and political forces that shape the aims, policies, and practices of K-12 education in the United States.

**Requisites:** Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

**Additional Information:** Departmental Category: Graduate Education

### **EDUC 5010 (3) Race and Equity in Higher Education**

This course introduces students to recent research and theory surrounding race, ethnicity, access, inclusion, and equity in higher education. It focuses on the development of knowledge, skills and awareness that is crucial in becoming an engaged scholar and practitioner in the areas of diversity, equity, and inclusion. We discuss the responsibilities, tensions, and opportunities one must have in creating and maintaining a pluralistic and inclusive campus for all. We also discuss ways in which themes of identity and diversity operate far beyond one-on-one relationships but rather extend to systems and structures that comprise a college and/or university environment.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

### **EDUC 5011 (1) College Student Career Development**

Explores the diverse aspects of career development for college students. Examines the different models of career services for students in different schools, colleges and majors.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

### **EDUC 5012 (1) Higher Education Finance**

Covers the major, basic elements of budgeting and finance in higher education. It is designed to address the budget process in colleges and universities, as well as the impact of budget activities on other areas of planning and operations within an institution. Enhances students' knowledge of both internal and external financial environments facing higher education.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

### **EDUC 5014 (1) Ethical Dilemmas in Higher Education**

Examines ethical issues involved in higher education and student affairs administration. Uses real and fictional ethical cases to bring to light various moral and ethical tensions relevant for higher education and student affairs professionals.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

### **EDUC 5015 (3) International / Comparative Education**

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace Corps and Volunteer Agencies.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4015

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

### **EDUC 5020 (1) College Academic Advising**

Explores the diverse aspects of academic advising for college students. Examines the different models of advising for students in different schools, colleges and majors.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5021 (1) College Athletic Affairs**

Examines the relationship between student-athletes and the institution and explores how intercollegiate athletics fits into the academic enterprise of higher education. Key questions include: 1) what purpose does athletics serve and 2) for whose benefit? With these questions in mind, we examine the range of issues at the intersection of athletic administration, student development theory, and educational leadership and policy.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5022 (1) LGBTQ+ Topics in Higher Education**

Explores the diverse aspects of college and university life for students, staff, and faculty who identify as LGBTQ+. Examines the different higher education supports and challenges for LGBTQ+ student populations.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5023 (1) College Admissions and Enrollment**

Explores the diverse aspects of college and university student recruitment, outreach, admissions, and enrollment. Examines the different models of admissions processes and systems, with attention to relevant politics and professional practices.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5026 (1) Technology in Higher Education**

Examines impact of technology on higher education and student affairs. Explores impact of technology on students and their development, and teaching and learning. Although technical aspects of technology are discussed in some depth, this is not designed as a 'technical' course; the content revolves around implications of technology as both a driving and a supportive element within higher education

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5027 (1) Institutional Advancement and Development in Higher Education**

Examines the roles of institutional advancement, development, and fundraising in higher education and student affairs. Explores the impact of advancement on students, staff, and faculty, as well as on teaching and learning, research, campus life, and the larger community. The content will revolve around implications of development work as both a driving and a supportive element within higher education.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5028 (1) International Education in Higher Education and Student Affairs**

To provide an introduction to the field of international education.

Students pursuing graduate studies in higher education administration will benefit from an overview of global student mobility trends and an exploration of career pathways within the field. In-class discussions, out-of-class readings, and guest speakers will guide student learning.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**EDUC 5030 (1) Accessibility and Students with Disabilities in Higher Education**

Provides students with important knowledge about issues of accessibility and development for students with disabilities in higher education.

Examines strategies to offer support and guidance to students with disabilities in order to foster a safe and engaging learning and living environment.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5031 (1) Institutional Research & Analytics in Higher Education**

Examines the roles and uses of institutional research and data analytics in higher education and student affairs. Provides students with a foundational understanding of the field of institutional research and data analytics in higher education. Explores the activities in which institutional researchers engage, the tools they need to be successful in their jobs, the topics they study and issues they investigate.

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5032 (1) College Student Leadership Development**

Surveys the study and practice of leadership and provides students with a variety of experiences to wrestle with large leadership questions. What is leadership? Who can be a leader? How is leadership an important aspect of understanding self and others?

**Requisites:** Restricted to Master's in Higher Education (MAHE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5033 (1) Special Topics in Higher Education**

This 1-credit "module" course examines special topics in higher education practice. The course is designed to feature emerging questions of higher education policy and practice. This course satisfies requirements for the MA in Higher Education program, but is also open to other students.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**EDUC 5035 (3) Proseminar: Parent and Community Involvement**

Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5050 (3) Knowing and Learning in Mathematics and Science**

The course is aimed at providing graduate students the opportunity to engage deeply with theories of mathematics and science learning for the purposes of designing engaging and affirming learning environments. The course is centered around reading deeply and critically in the literature on learning theory, coupled with a youth and community-based research project.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4050

**Requisites:** Restricted to graduate students only.

**EDUC 5060 (3) Classroom Interactions**

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts.

Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4060

**Requisites:** Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5065 (3) Curriculum Theories**

Examines four central curricular traditions: progressive; conservative; radical; and spiritual. Highlights the strengths and weaknesses of various writers within each tradition with attention paid to the conceptual features and the practical implications of each educational view.

Encourages students to examine their own educational assumptions.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5070 (3) Spirituality and Religion in Education**

Examines features of religion, spirituality, and a liberal arts education, so as to further understand the constitutional, historical and cultural constraints on, and acceptable approaches to the study of religion and spirituality in American education. Specifically explores aspects of a contemplative orientation and the degree to which such an orientation should/can be pursued in K-12 public and higher education.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5075 (3) Sociology of Education**

In-depth analysis of the theories and concepts in sociology and education. Evolution of curriculum, organization, and enrollment characteristics of American schools. Schooling, race, class, culture, gender, stratification, and educational reform in light of paradigmatic change in theories and concepts of sociology.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5085 (3) History of American Education**

Highlights social and intellectual history perspectives of American educational history, major reform movements from the 19th century to Dewey, and assessment of how differences of race, class, ethnicity, religion, power, and gender affected American education.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5105 (3) Teaching for Understanding and Equity**

Addresses perspectives and evidence-based teaching practices that promote equity and access to conceptual understanding. Introduces the knowledge base on effective and socially just teaching practices, and the theories and research that support these practices. Explores the impact of theory and research on classroom instruction.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5112 (3) Educational Psychology and Adolescent Development**

Analyzes fundamental concepts from psychology and the learning sciences to understand how educators can support youth development in and out of school. Includes service learning requirement. This course is not appropriate for in-service teachers.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4112

**Requisites:** Restricted to graduate students only.

**EDUC 5115 (3) Issues in School Change and Reform**

Examines recent developments in teaching, and trends in the philosophy and practice of education. Focuses special attention on a variety of issues central to school reform.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5135 (3) Story and Memoir**

Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4135

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5145 (3) Gender, Literacy, and the K-12 Classroom**

Explores and critiques various conceptions of gender within popular and scholarly publications that have influenced how gender and sexual diversity is approached in classrooms. Builds a theoretical stance toward gender and sexual diversity that supports equity, engagement and achievement for all children and youth. Discusses teaching strategies that thoughtfully take into account gender identities and equity.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5150 (3) Introduction to Qualitative Research Methods**

Introduces students to qualitative research in education. Examines the foundations, design, methods and analysis of qualitative research methods. Readings include texts about the foundations and purposes of qualitative inquiry, and methodological readings about the application of research techniques. Students will complete a variety of small, hands-on projects that introduce major dimensions of qualitative research including observation, interviewing, and document analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4150

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: General Education

**EDUC 5165 (3) Children's Literature**

Involves reading and evaluation of picture books, and emphasizes children's interests, authors and illustrators, multicultural literature, the components of narrative, and the features of illustrations. Examines connections between children's literature and children's development as writers.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5179 (3) Seminar on Teaching and Teacher Education in Math and Science Education**

This course examines how scholarship on teaching and teacher learning has been evolving in mathematics and science educational research since the 1980s and 1990s. Students will explore theories of teacher learning and how they relate to designs for teacher preparation and professional development. We will also study common designs and design principles for conducting research to study teaching and teacher learning.

**Recommended:** Prerequisites EDUC 5060 and EDUC 6318.

**Grading Basis:** Letter Grade

**EDUC 5205 (3) Elementary Mathematics Theory and Methods**

Provides pre-service teachers opportunities to explore contemporary theories of learning, curriculum development, and pedagogical strategies pertaining to teaching elementary-level mathematics. Blends exploration in mathematical content with development of sophisticated mathematical models for teaching.

**Requisites:** Requires corequisite course of EDUC 4351. Restricted to Elementary Education (EDEL) majors only.

**Additional Information:** Departmental Category: Elementary Education

**EDUC 5215 (3) Elementary Science Theory and Methods**

Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications.

**Requisites:** Requires corequisite courses of EDUC 4331 and 4341. Restricted to Elementary Education (EDEL) majors only.

**Additional Information:** Departmental Category: Elementary Education

**EDUC 5220 (3) Curating and Evaluating Reading Materials for K-12 Classrooms**

In this course, MA students will explore how educators can curate, evaluate, and use different literacy materials for reading and other classroom instruction. Of particular focus will be Children's and Young Adult Literature, decodable books, trade books, and non-traditional texts (e.g., web resources) spanning fiction and nonfiction genres. Attention will be given to texts' written and illustrative quality, cultural relevance and authenticity, and the impacts of these on readers' development and interest.

**Requisites:** Restricted to graduate students only.

**EDUC 5222 (3) Language Study for Educators**

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4222

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5235 (3) Language and Literacy Across the Curriculum**

Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4232

**Requisites:** Restricted to EDCl, EECD, EFPP, EPSY or REME graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5245 (3) Foundations of Reading Instruction K-12**

In this course, MA students build and expand their understanding of the five pillars of reading instruction: phonemic awareness, phonics, fluency, vocabulary, and comprehension. They will gain in-depth and up-to-date knowledge about the Science of Reading and the Science of Teaching Reading, as well as the language comprehension and word recognition strands that are woven into skilled reading.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5255 (3) Digital & Disciplinary Literacies**

In this course, MA students will analyze current technology integration practices in literacy instruction, and their impact on the building, expanding, and transformation of disciplinary literacies; the situated and specific literacy practices necessary to engage in a particular discipline or content area. We will explore the intersections between digital literacies and new media, knowledge building, and project-based inquiry perspectives when children and youth read texts in the content areas of literature, science, and social studies.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5265 (3) Processes & Skills in Writing**

In this course, MA students examine processes that writers use from early ages to maturity by investigating current research related to writing curriculum, instruction, and policy. Includes opportunities for students to engage in inquiry related to writing curriculum and instruction in K-12 classrooms. This course will also examine the ways in which the Science of Reading and Writing can be incorporated into writing pedagogy models.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5275 (3) Diagnostic Reading Assessment & Intervention**

In this course, students develop the concept of reading assessment and evaluation for diagnostic purposes, in order to identify supports for students experiencing reading difficulties and to design reading intervention within an MTSS model. Students explore how factors such as psychological, cognitive, and sociocultural perspectives, educational policies, community and school practices, and curricular and teacher expectations influence assessment (data that are collected) and evaluation (interpretive decisions about assessment data).

**Requisites:** Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5285 (3) Literacy Coaching & Leadership**

The objective of the course is to extend, synthesize, and apply learning gained throughout the program, and to engage participants with advanced topics in literacy, particularly those related to reading interventions and instructional leadership. In addition, many opportunities are provided for demonstrating and evaluating quality small-group and whole-class literacy lessons.

**Requisites:** Requires a prerequisite course of EDUC 5275 (minimum grade C-). Restricted to graduate students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5295 (3) Narrative and Story in the Humanities**

Explores a wide variety of texts that might be used in secondary English and Social Studies classrooms. Examines philosophies and instructional approaches to the teaching of reading and literature. Considers the influence of story and storytelling in the construction of personal and societal meaning.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4295

**Requisites:** Requires prerequisite of EDUC 5001 (minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5301 (3) Queer(ing) Topics in Education**

Bring critical and queer theoretical perspectives to bear on an inquiry into what's counted as "normal" in social, historical, and political contexts of education in the United States. We'll explore queerness, queer theory, and queer pedagogy, in an effort to examine schooling as a heteronormative institution that has tended toward (re)producing heterosexism, homophobia, and violence against queer bodies and identities.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4301

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5310 (3) Social and Emotional Learning in Schools**

Explore the ways SEL benefits students through investigating its purposes and goals, the competencies it seeks to promote, the characteristics of effective programs, and the range of program formats. We frame these topics through examining ongoing dilemmas in the field. We also conduct in-depth reviews of several programs and the research that supports them.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4310

**Requisites:** Restricted to graduate students only.

**EDUC 5315 (3) Perspectives on Science**

Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4315

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5316 (3) Nature of Social Studies and Social Studies Education**

Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4316

**Requisites:** Restricted to Social Studies Secondary Education (EDSS-LICU or EDSS-LICG) students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5317 (3) Perspectives on Mathematics**

Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4317

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5325 (3) Queering Literacy in Secondary Classrooms**

Engages theories and practices of literacy teaching and learning that challenge multiple forms of oppression. Using the tools of queer pedagogy, students will learn, develop, and enact strategies for planning and implementing literacy instruction that moves beyond inclusion of differences in the English/language arts and social studies curriculum.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4325

**Requisites:** Restricted to Master's teacher licensure students in English (EDEN-LICG).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5330 (3) Secondary Social Studies Methods I**

Explores effective social studies teaching techniques used to prepare secondary students for success in college, career, and civic life. An emphasis is placed on interpreting sources, understanding multiple perspectives, and employing critical thinking with diverse students.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4330

**Requisites:** Requires prerequisite of EDUC 5001 (minimum grade C-).

Requires corequisite of EDUC 4901. Restricted to teacher licensure students in Social Studies (EDSS-LICG).

**Grading Basis:** Letter Grade

**EDUC 5345 (3) Secondary English Methods I**

Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of language, writing, and speaking and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4345

**Requisites:** Requires a prerequisite of EDUC 5001 (minimum grade C-).

Requires corequisite of EDUC 4901. Restricted to teacher licensure students in English (EDEN-LICG).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5355 (3) Secondary Social Studies Methods II**

Explores effective techniques associated with reading, processing, and assessing social studies subject area content with an emphasis on developing critical thinking skills and meeting the needs of diverse students.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4355

**Requisites:** Requires prerequisite course of EDUC 4330 or EDUC 5330 (minimum grade C-). Restricted to teacher licensure students in Social Studies (EDSS-LICG).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5365 (3) Secondary English Methods II**

Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of reading, thinking, and viewing and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4365

**Requisites:** Requires prerequisite course of EDUC 4345 or EDUC 5345 (minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5375 (3-4) Problem-Based Math Instruction**

Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4375

**Requisites:** Restricted to EDCl, EDSC, or EDMA majors only.

**Recommended:** Corequisite EDUC 4023.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5385 (4) Problem-Based Science Instruction**

Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

**Requisites:** Restricted to EDCl, EDSC, or EDMA majors only.

**Recommended:** Corequisite EDUC 4023.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5390 (3) Seminar: Teaching for Equity and Justice**

Supports candidates as they continue to develop the skills and stance to teach for equity and justice in public school settings. Explores how educators for equity and justice sustain their commitments through ongoing learning and reflection, care for their students and themselves, and collaboration and advocacy. Supports candidates in making the transition from the university into the profession in a way that allows them to remain true to their vision of who they are and want to be as educators.

**Requisites:** Requires prerequisite of EDUC 5330 or EDUC 5345 (both minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG) or Social Studies (EDSS-LICG).

**Grading Basis:** Letter Grade

**EDUC 5425 (3) Introduction to Bilingual/Multicultural Education**

Provides an introduction for currently practicing K-12 teachers and non-specialists to bilingual and multicultural education programs for emergent bilingual students. Includes an overview of the history and legislation related to the education of emergent bilingual students, identification and placement, as well as the various models, theoretical and philosophical underpinnings, and pedagogical practices that constitute sound educational practices for emergent bilingual students.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4425

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5435 (3) Materials and Methods in Bilingual/ Multicultural Education**

Provides an in-depth study of the curriculum options available for bilingual and ELD programs. Presents, reviews, and critiques specific methods and strategies for teaching language to minority students. Gives the opportunity to develop and present teaching units in Spanish or in ELD methodology, as appropriate.

**Requisites:** Requires a prerequisite course of EDUC 5425 (minimum grade C-).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5445 (3) Curriculum for Multicultural Education**

Analyzes curriculum programs and examines principles that inform innovation for education of diverse students at all school levels. Includes topics of ethnic, racial, socio-economic, linguistic, and gender diversity.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5455 (3) Literacy for Linguistically Different Learners**

Presents current and emerging philosophies and methods on teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transference from L1 to L2 reading.

**Requisites:** Requires a prerequisite course of EDUC 5425 (minimum grade C-).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5460 (3) Teaching and Learning Physics**

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4460 and PHYS 4460 and PHYS 5460

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5465 (3) Introduction to ELD/Bilingual and Special Education**

Provides students with the fundamental information of ELD, bilingual and special education, including theories, assumptions, philosophies, and paradigms of bilingual and special education. Discusses successful teaching techniques and instructional approaches, including individualization, least restrictive environment, transition, and career education.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5485 (3) Differentiation in the Classroom**

Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices, programmatic interventions that support student learning and using research to inform practice. Includes practicum. Department enforced prerequisite: restricted to MA+ students.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5490 (3) Blurring Disciplinary Lines in the Humanities**

Explores theories, methods, and materials for building interdisciplinary connections within and across secondary English and Social Studies classrooms. Provides opportunities for collaborative work in building lessons and unit plans that challenge disciplinary boundaries and advocate for complex problem solving.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4490

**Requisites:** Requires prerequisite of EDUC 4342 or EDUC 5342 or EDUC 4330 or EDUC 5330 (all minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICU or EDEN-LICG) or Social Studies (EDSS-LICU or EDSS\_LICG).

**Grading Basis:** Letter Grade

**EDUC 5505 (3) Education of Students with Learning and Behavior Disorders**

Discusses unique learning needs of students with learning and behavior disorders. Emphasizes development of a systems model for diagnosis, programming, and remediation. Stresses data-based individualization of instruction, with emphasis on intervention in inclusive learning environments and developing a culturally responsive system.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5515 (3) Curriculum and Assessment for Special Learners**

Emphasizes assessment of special education students from pre-referral through staffing and placement, including response to intervention, research-based assessment practices, analytic teaching and assessment, curriculum-based assessment and measurement. Selection, administration, and interpretation of formal and informal assessment devices are studied, with particular emphasis on cultural relevance and equity in assessment for special learners with mild to severe needs.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5525 (3) Research Issues in Special Education**

Provides practical experience in the review, critique, conceptualization, and writing of research studies in special education. Also offers experience in design of evaluation systems for classroom practice.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5535 (3) Diagnostic Testing in ELD and Bilingual Education**

Promotes critical uses of assessment instruments and information. Provides methods for educators to incorporate assessment as a meaningful activity in the classroom intended to support learning among bilingual students. Examines effectiveness, validity, and fairness in the testing of linguistically diverse populations. Provides first-hand experiences developing, selecting, reviewing, and adapting test materials as critical to making informed teaching decisions.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5545 (3) Strategies for Teaching Students with Special Needs**

Provides teachers with specific evidence-based methods and techniques for teaching students with a wide variety of high and low disabilities including learning and language disabilities, hearing and visual impairments, physical disabilities, and health impairments. Emphasizes different teaching methods, instructional materials, and learning strategies that have proven effective working students with cognitive learning needs.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5555 (3-4) Practicum in Bilingual/Special Education**

Offers supervised field experience in elementary and secondary special education class settings. Each credit hour requires 50 contact hours.

**Requisites:** Requires prerequisite courses of EDUC 5465 and EDUC 5505 and EDUC 5515 or EDUC 5545 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5575 (1-4) Workshop in Curriculum and Instruction**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5580 (3) Physics and Everyday Thinking**

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5595 (1-4) Practicum in Linguistically Different: English Language Development**

University supervised, school-based field experience teaching linguistically different students, as well as assistance in the completion of EECD portfolio.

**Requisites:** Requires prerequisite courses of EDUC 5425 and EDUC 5435 and EDUC 5535 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5605 (3) Research Issues in Bilingual Education**

Offers practical experience in the review, critique, conceptualization, and writing of research studies in bilingual/ELD education. Provides experience in the design of classroom evaluation systems.

**Requisites:** Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5610 (1-3) Math and Science Education**

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5615 (3) Second Language Acquisition**

Presents a broad survey of second-language acquisition research. Stresses theoretical concerns and research findings and practical applications to teaching second languages. Gives special emphasis to second-language acquisition.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5625 (3) Methods of Teaching English Language Development**

Exposes students to strategies used to teach English Language Development. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English Language Development. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5635 (3) Education and Sociolinguistics**

Explores the discipline of sociolinguistics, the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech and social identities, and sociolinguistic research related to teaching and learning.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5706 (3) Assessment in Mathematics and Science Education**

Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4706

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5716 (3) Basic Statistical Methods**

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5726 (3) Introduction to Disciplined Inquiry**

Considers various research approaches and methodologies included in education including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational; and sociological, historical, and philosophical research. Topics include library research, research criticism, research design, and proposal writing.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5800 (1-9) Master's Special Topics**

Designed to meet needs of students with topics of pertinent interest. 00 total credit hours. Allows multiple enrollment in term.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5815 (3) Teaching K-12 Mathematics: Number Sense**

Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development. Formerly EDUC 5810.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4815

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5821 (3) Teaching K-12 Mathematics: Algebraic Thinking**

Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K-12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4821

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5822 (3) Teaching and Learning Chemistry**

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

**Requisites:** Requires prerequisite course of CHEM 1021 or CHEM 1113 or CHEM 1400 (minimum grade C).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5833 (3) Teaching and Learning Earth Systems**

Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). The course focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions and developing effective discourse within and outside the classroom.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5835 (3) Teaching K-12 Mathematics: Geometry & Measurement**

Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K-12 learners. Formerly EDUC 5830.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 5844 (3) Teaching and Learning Computational Thinking**

This course is designed for current and future STEM educators interested in understanding Computational Thinking and how it can be enacted to support student learning. Computational Thinking is the process by which people make sense of problems where computation, or computational tools, could be leveraged to enact the solution. For example, when students are tasked with solving a word problem they engage in computational thinking by identifying important elements in the written problem and then leveraging mathematical or scientific methods that would lead to a solution. During this course, students will engage with research-based theories, conceptualizations, and practices for engaging with Computational Thinking in STEM learning environments and experiences. Following an introduction to Computational Thinking, students will be supported in making sense of the ideas and practices through published research, existing tools, classroom activities, and reflection on experiences of problem solving and overcoming

**EDUC 5850 (3) Teaching K-12 Mathematics: Probability & Statistics**

Focuses on teaching probability, data analysis, and statistics in K-12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4850

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6110 (3) Student Affairs in Higher Education**

Provides students with a thorough introduction to the field of student affairs administration in higher education. Explores diverse facets of college student affairs administration and its role within US higher education. The course will help students develop a broad foundation for subsequent Higher Education study and practice. Focuses on philosophies, complexities, and futures of the student affairs profession.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6210 (3) Education Policy and the Law**

Approaches education policy issues through the rich history of litigation and current legal challenges facing American K-12 schooling. Builds an understanding of the legal and policy development of the American schooling system, particularly in the 20th century. Laws and legal cases will be used as jumping-off points for broader discussions.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6211 (3) Education Law and Litigation Workshop**

The students in this workshop course will learn through a project-oriented, constructive conversation between legal experts and education policy experts. With elements of community-engaged learning, as well as clinical and street law, the course creates a forum for an iterative process whereby education students, attorneys (adjunct professors) and law students will work together on legal projects of their own choosing. The attorneys and law students will inform the education researchers about how claims for relief or legislation (or a legal argument used in another context) might be shaped, while the researchers would inform the lawyers and law students about whether and how the research supports a potential claim or approach, and about the sorts of remedial orders or interventions that might be beneficial.

**Requisites:** Restricted to graduate students only.

**EDUC 6220 (3) Gender Issues in Education**

Provides a strong foundation in the various issues of gender and sexual diversity in education. Stimulates explorations into the ways the construct of "gender" affects and is affected by the educational system and process. Presents theory and research about contemporary educational issues related to sexism and homophobia. Encourages development of well-considered views about the various issues, research, and theories.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6230 (3) Ethics in Education**

Investigates controversies in education from a self-consciously ethical perspective, drawing as appropriate from moral and political theory as well as law. Focuses on public education's role in fostering democratic citizenship and providing equal educational opportunity. Critically evaluates various education reform policies and curriculum policies. Applies method commonly used in medical ethics to make decisions regarding concrete ethically problematic cases.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6240 (3) African American Education in the United States**

Explores development of schooling for African Americans in the U.S.. Emphasizes historical and contemporary struggles of this group in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for this group. Degree credit not granted for EDUC 4240 and 6240.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Education

**EDUC 6245 (3) Latinx Education Across the Americas**

Examines Latinx education across the Americas in comparative perspective, exploring critical issues, themes, and cross-border movements that link Latinx education in the United States and Latin American education. Considers the socio-historical, cultural, and political contexts that shape the education of Latinx communities, with special attention to issues of race, cultural and national identity, and representation as these are negotiated in schools.

**Requisites:** Restricted to graduate students only.

**EDUC 6250 (3) Higher Education in the United States**

Examines major issues in higher education focusing on the sociopolitical contexts in which US universities operate as gatekeepers to opportunities. Topics include the purposes and history of higher education in the United States, college teaching and learning, finance and governance, issues of access and equity related to race, gender, sexual orientation, gender identity, immigration status and class, and student life.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 6260 (3) Transnational Migration, Education, and Citizenship**

Examines the education of transnational migrant youth and families in comparative perspective, with a focus on citizenship formation. Compares state-led responses to diversity through education and integration policies with the transnational practices of distinct migrant and diaspora communities in both the United States and Europe. Considers the educational experiences of distinct types of migrants, including undocumented immigrant students and their families and university students studying abroad, and implications for citizenship.

**Requisites:** Restricted to graduate students only.

**EDUC 6318 (3) Psychological Foundations of Education**

Introduces students to theoretical and empirical contributions of educational and developmental psychology and the learning sciences emphasizing applications to educational practices. Topics include learning, development, cognitive processes, social and cultural context, motivation, assessment and individual differences.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6325 (3) Anthropology of Education**

Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6328 (3) Advanced Child Growth and Educational Development**

Introduces students to recent theoretical and research advances in the study of children and adolescent's cognitive, social and emotional development, with an emphasis on implications for learning in and out of school.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6368 (3) Adolescent Psychology and Development for Teachers**

Examines current theory and research on adolescent development, learning, motivation, and academic achievement. Emphasizes how theory and research can inform instructional decisions in the secondary classroom.

**Requisites:** Restricted to English-Secondary Education (EDEN), Social Studies-Secondary Educ (EDSS), Mathematics-Secondary Educ (EDMA) or Science-Secondary Educ (EDSC) graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6405 (3) College Student Development and Counseling Theories**

Covers theories of student development in higher education as they apply to the growth of students and the influence of the college environment on growth and development. Examines selected approaches to counseling theory and practice. Theoretical formulations basic to human development and the counseling process are presented including historical and philosophical background. This course explores themes of human development, self-evolution, meaning making, separation and connection, and moral meaning making, and how college students are other adults construct themselves and the meaning they make of their experience.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6504 (3) Issues and Methods in Cognitive Science**

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Department enforced prerequisite: graduate standing or at least one upper-division course in computer science, linguistics, philosophy, or psychology.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 6402 and LING 6200 and PHIL 6310 and PSYC 6200 and SLHS 6402

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6505 (1-2) Readings and Research in Cognitive Science**

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6506 (2) Cognitive Science Research Practicum**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7412 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

**Requisites:** Requires prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-). Restricted to graduate students only.

**Recommended:** Prerequisite EDUC 6505.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6516 (2) Cognitive Science Research Practicum 2**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7422 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

**Requisites:** Requires prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6705 (3) Leadership in Higher Education**

Examines theory and research on leadership and management in higher education, and the structure and governance of colleges and universities. Explores the internal organization and culture of institutions, as well as external and related bodies that affect higher education such as the federal and state governments, accrediting agencies, associations and foundations.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6804 (1-4) Special Topics**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6811 (3) Teaching and Learning Biology**

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 4811 and MCDB 4811 and MCDB 5811

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6844 (1-4) Master's Independent Study**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6855 (1-4) Independent Study in Curriculum and Instruction---Master's Level**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6877 (1-4) Independent Study in Educational Equity & Cultural Diversity: Master's Level**

An independent study may be established between a student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6888 (1-4) Independent Study in Educational and Psychological Studies---Master's Level**

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6899 (1-4) Independent Study in Educational Foundations Policy & Practice--Master's Level**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6915 (1-4) Practicum in Curriculum and Instruction**

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6916 (1-4) Practicum in Research and Evaluation Methodology**

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6917 (1-4) Practicum in Educational Equity and Cultural Diversity**

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6918 (1-4) Practicum in Educational and Psychological Studies**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6919 (1-4) Practicum in Educational Foundations Policy and Practice**

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6925 (1-4) Readings in Curriculum and Instruction**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6926 (1-4) Readings in Research and Evaluation Methodology**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6927 (1-4) Readings in Equity, Bilingualism and Biliteracy**

Explores topics that are relevant to becoming a scholar and researcher in our field.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6928 (1-4) Readings in Learning Sciences and Human Development**

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6929 (1-4) Readings in Educational Foundations Policy and Practice**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6944 (1-3) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6945 (3) MA Capstone Seminar in Foundations of Education**

Supports students completing a summative writing assignment for their Masters degree requirements. Writing assignments will be designed around the professional and academic goals of each student, in collaboration with the student's academic advisor. Students will analyze research studies across different disciplinary and methodological approaches. Through instructor coaching and peer review exercises, students will draft and refine a final assignment.

**Requisites:** Restricted to MA students in Education (EPSY-MA, EFPP-MA, HEDU-MA).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6954 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 6964 (3) Capstone: Inquiry in the Content Areas**

Supports students in using and building on the ideas and content encountered in previous coursework. Requires students to conceptualize, design and implement an original research project that will serve as exit requirement for the degree. Reads and engages in research and theory associated with Teacher Research (i.e. research conducted by teachers for professional purposes).

**Requisites:** Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7015 (3) Teaching Internship in Teacher Education**

One-semester teaching internship in an undergraduate or graduate foundations course.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7055 (3) Philosophy of Education**

Examines exemplars of educational philosophy from ancient times to the present day, emphasizing their relevance and application to current controversies in education (e.g., free speech, multiculturalism, and affirmative action). Formerly EDUC 5055.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7105 (3) Collaboration to Meet Special Needs**

Covers effective collaboration practices involving the special education teacher, other educational personnel, students, and parents. Bilingual special education considerations in collaboration will be described. Issues regarding inclusion will be explored. Practical application to teaching and learning will be made. Strategies for disseminating information and collaborative activities will be discussed.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7115 (3) Critical Inquiry into Becoming a Teacher Educator**

Designed to support doctoral students' development as university level instructors/teacher educators, particularly in relation to undergraduate courses that center equity and justice as central topics, this course will draw on critical perspectives and pedagogies to shape course goals, material/content and pedagogical approach. This will be done in two primary ways: a) through the use of pedagogies adapted from Freirean Culture Circles and Boalian Theater, and b) through the application of practitioner inquiry approaches designed to develop critical, reflective practices/habits of mind among teachers and teacher educators.

**Requisites:** Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

**EDUC 7316 (3) Intermediate Statistical Methods**

Studies sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis.

**Requisites:** Requires prerequisite course of EDUC 5716 (minimum grade D-).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7326 (3) Quasi-Experimental Design in Causal Inference in Social Sciences**

Focuses on experimental and quasi-experimental designs in educational research; applications of the general linear model; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed design; analysis of covariance; effects of assumption violations; and related computer programs for statistical analysis.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7336 (3) Methods of Survey Research and Assessments**

Examines theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview and mailed surveys, assessing reliability and validity, sampling plans, data reduction (e.g., factor analysis), and analysis of continuous and categorical data.

**Requisites:** Requires prerequisite courses of EDUC 5726 and EDUC 7316 (all minimum grade D-).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7346 (3) Ethnographic Methods in Educational Research**

Explores the history of ethnography and its translation into educational research. Students practice participant observation, interviewing, journal writing, artifact searches, qualitative analysis and interpretation, and styles of reporting.

**Requisites:** Requires a prerequisite course of EDUC 6325 (minimum grade C-).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7376 (3) Theory and Practice of Educational and Psychological Measurement**

Introduces theories of measurement and applications, and presents classical test theory. Includes quantitative concepts, methods, and computational techniques for the development, application, and evaluation of measurement instruments in social/ behavioral science and education.

**Requisites:** Requires prerequisite course of EDUC 5716 (minimum grade D-).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7386 (3) Educational Evaluation**

Builds an understanding of the range of approaches taken by educational evaluators, focusing particularly on the evaluation of programs. Explores the nature of different evaluation perspectives and how these disparate views translate into methodological and conceptual models. Students develop a familiarity with the most common and influential approaches to evaluation.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7396 (3) Latent Variable and Structural Equation Modeling**

Introduces contemporary advanced multivariate techniques and their application in social science research. Focus on factor analysis and structural equation modeling. Prior experience with multiple regression is assumed.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7416 (3) Seminar: Research Methodology**

Presents selected topics for advanced study in educational research, statistics, measurement, and evaluation.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7436 (3) Item Response Theory**

Includes one-, two-, and three-parameter logistic models for dichotomously-scored items and partial credit models for polychotomously-scored items; applications of the models to problems such as equating of test forms, test design, computerized adaptive testing, and the detection of item bias.

**Requisites:** Requires prerequisite courses of EDUC 7316 and EDUC 7376 (all minimum grade D-).

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7446 (3) Policy Issues in Education**

Explores major policy issues confronting U.S. education and examines the nature and undertaking of educational policy studies. Learn to approach policy issues from a contextual perspective that highlights systemic forces and analyzes and applies differing policy instruments. While a wide variety of policies are covered in the course, it particularly emphasizes issues of educational equity.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7456 (3) Multilevel Modeling**

Covers in depth two advanced multivariate models common to social science research: latent variable (structural equation) models and multi-level (hierarchical) models. Topics may be taught with a particular analytic context, such as measurement of change (longitudinal analysis) or experimental design.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 7775 (1) Topics in Cognitive Science**

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 7772 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8014 (3) Advanced Seminar in Democracy, Diversity and Social Justice**

Addresses the sociopolitical context of multiculturalism and education, and the sociocultural context of learning. Examines critical issues involved in making schooling responsive to an increasingly multicultural and multilingual society.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8025 (3) Seminar: Curriculum Theories**

Examines in depth recent developments in curriculum theory highlighting conceptual, contextual, and normative issues. Substantially explores distinct curricular traditions, corresponding conceptions of the good life along with related approaches to reason and emotion. Focuses on the works of prominent curriculum theorists.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8045 (3) Philosophical Issues in Educational Research**

Familiarizes students with important concepts and issues from the philosophy of science and, to a lesser extent, political theory and ethics; grounds such concepts and issues in the literature (often in terms of primary philosophical sources); and stimulates students to apply this material to the field of educational research in an informed way.

**Requisites:** Restricted to PhD students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8055 (3) Theoretical Issues in Education Policy**

Provides students with an examination of the theories behind education policy analysis. Takes a thematic approach to the study of policy in order to understand how policy agendas are set; how democratic deliberation should be linked with research and policy; and the relationship between politics, media, social structures, research and policies.

**Requisites:** Restricted to PhD students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8100 (3) Historical and Contemporary Issues in Literacy Research**

In this seminar, students read about, discuss, and respond to issues and debates that have shaped and continue to shape literacy research. The course addresses debates in response to research reports, policy and standards in the past 20 years (beginning in the mid 1990s), as well as the emergence of sociocultural and critical approaches to literacy research. The course traces how scholarly debates and reviews of research represent shifts in the field, and help researchers and educators move towards approaches and methods framing social-justice oriented literacy projects.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8101 (3) Theories of Literacy Research and Practice**

This graduate seminar will examine the foundations and central tenets of influential theories that undergird scholarship in literacy studies. The theories explored will include Critical Race Theory (CRT), critical poststructuralist, feminist, queer, literary, affect, and sociocultural theories. Theoretical traditions will be examined through their historical and social movement roots through their current applications, debates, research techniques, and criticisms, always with particular attention to how they have been taken up in literacy research. A key focus of this course is to examine the utility and limitations of frameworks and consider their possible applications to students' own research.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8102 (3) Literacy Research Methods**

This graduate seminar focuses on some of the central research methods and methodologies employed by literacy researchers. The course will examine methodologies such as ethnography, practitioner research, participatory research, reciprocal partnerships, discourse analysis, literary and textual analysis, design research, and case study, along with specific methods of data collection and analysis commensurate with study designs. Students will read articles focused on methodology specifically, as well as have opportunities to discuss research articles through a focus on the methods scholars describe and enact. The course includes attention to humanizing research practices and issues of relationship, responsibility, and ethics in literacy research. In addition, the course will engage discussions and support for IRB proposals, generative writing practices and processes, as well as dissemination of research through various genres and in academic, practice focused, and publicly accessible venues. May be repeated up

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8103 (3) Special Topics in Literacy Research**

This course provides students an opportunity for deep engagement with important topics and specialty areas in the field of literacy studies. Focused on topics of current interest in the field, the course supports students to examine issues of research and practice, which may include historical and current trajectories of an area of research, theories that animate an area of research and practice, and the methods through which researchers investigate questions related to the topic. In addition to readings and discussion, students complete writing and multimodal projects that allow students to engage with content and process related to the topic to demonstrate and share their learning.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EDUC 8115 (3) History and Policy Issues in Teaching and Teacher Education**

Examine how issues and dilemmas in teacher education are grounded in historical and political contexts. Analyze patterns in preparation of new teachers, in mechanisms used to govern entry into teaching and make determinations of quality of teachers and teaching, and in efforts to professionalize and de-professionalize teachers and teaching. Investigate contemporary teacher education debates to better understand potential research-policy-practice connections.

**Requisites:** Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

**EDUC 8125 (3) Seminar: Radical Education Theories**

Examines radical analyses of schooling, based on class, gender, sexual identity and race, through which U.S. public schooling is said to maintain dynamics of oppression and domination that undermines the schools' democratic premise. Scrutinizes the conceptual framework, interpretive and explanatory adequacy, and ethical justification of radical claims.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8135 (3) Theories and Methodologies for Examining Teacher Learning**

Examines the potential range and roles of theory in analyzing prospective and practicing teachers' learning (experiences). Explores various conceptions of teacher learning, including, but not limited to: teacher learning as a knowledge-centric phenomenon; teacher learning as a process of assembling a repertoire of practice; teacher learning as an identity-work phenomenon; and teacher learning as an activist/action-in-the-world phenomenon.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8145 (3) Designing for Teacher Learning and Teacher Education**

Examines questions and issues related to the design of preservice teacher education programs and practicing teachers' professional development/learning opportunities. Analyzes the program and/or learning opportunity conditions, features and approaches that potentially support and/or constrain prospective and practicing teachers' learning, particularly in relation to their development and as asset-oriented teachers.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8155 (3) Advanced Topics in Literacy Education**

Examines special topics in theory and research related to literacy and literacy education. Topics vary each semester.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8165 (3) Advanced Topics in Mathematics Education**

Examines special topics in theory and research related to mathematics education. Topics vary each semester.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8175 (3) Advanced Topics in Science Education**

Engages participants in the process of curriculum development. Principles that guide the development of curricula and learning environments are discussed as they integrate with learning theory. Participants develop and/or test specific activities in the classroom and modify them as a result. There is a particular focus on incorporating the practices of the discipline into each content-based activity.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8177 (3) Advanced Seminar in Curriculum and Policy in Mathematics & Science Education**

This course explores the changing curriculum in school mathematics and science. It will examine the history and evolution of K-20 math and science curricula from the late 1890s to current times. It will examine motivations and political forces that have help shape and change math and science curricula.

**Grading Basis:** Letter Grade

**EDUC 8178 (3) Advanced Seminar on Learning in Math & Science Education**

This course focuses on research on the learning of mathematics and science in the K-12 schooling environment. It serves to introduce students to seminal learning theories that have guided and shaped mathematics & science education over the past thirty years (e.g., constructivist, cognitive, situative/sociocultural and critical perspectives). Core ideas within each of these theoretical perspectives will be explored such as knowledge construction and conceptual change, argumentation and reasoning, classroom discourse processes, participation and identity, and access and power. Pragmatic implications of these different theoretical perspectives will also be examined. For example, questions such as the following are considered: What is the purpose of a theory of learning (e.g., for research, for practice)? What constitutes learning within each perspective? What are the implications of a particular theoretical perspective for organizing and analyzing learning environments? What are the implications for differences

**Grading Basis:** Letter Grade

**EDUC 8179 (3) Advanced Seminar in Mathematics and Science Teaching & Teacher Education**

This course examines how scholarship on teaching and teacher learning has been evolving in mathematics and science educational research since the 1980s and 1990s. Students will explore theories of teacher learning and how they relate to designs for teacher preparation and professional development. We will also study common designs and design principles for conducting research to study teaching and teacher learning.

**Grading Basis:** Letter Grade

**EDUC 8210 (3) Ways of Knowing in Educational Research**

Introduces students to various theoretical perspectives informing educational research and how they are employed to study teaching, learning, and policy in K-12 classrooms. Includes reading and discussion related to the assumptions, questions, methods, and findings associated with theoretical traditions within and across disciplines.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8220 (3) Introduction to Educational Research and Policy**

Introduces conceptual and empirical issues and controversies in educational research and policy. Complements other EDUC doctoral courses in quantitative and qualitative methodology.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8230 (3) An Introduction to Quantitative Methods in Educational Research**

Explores the use of statistics to formalize study designs in educational research contexts. Introduces causal inference, experimental design, descriptive statistics, linear regression, probability, and the basics of statistical inference. Includes lab-based instruction in the use of statistical software (e.g., R, Excel) to conduct data analysis.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8240 (3) Quantitative Methods II**

Continues the exploration of research design in the social sciences, especially the evaluation of the quantitative research reported in professional journals. Introduces instances of the general linear model (both multiple regression and ANOVA) and its application to educational research.

**Requisites:** Requires prerequisite course of EDUC 8230 (minimum grade D-). Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8250 (3) Qualitative Methods I**

Introduces students to the theory and practice of qualitative research in education. First of a two-course sequence covering research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8260 (3) Qualitative Methods II**

Builds on EDUC 8250 to develop knowledge and skills in ethnographic and case study research. Second of a two-course sequence covering qualitative research design, theoretical perspectives, and methods.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8270 (3) Intermediate and Advanced Application of Quantitative Methods for Behavioral Sciences**

This course helps students develop the pragmatic skills needed to conduct quantitative analyses in their own research, in which they must apply concepts with novel data and in novel settings. It also provides a formal introduction to a variety of interstitial topics in quantitative analysis that may be assumed knowledge in more advanced methods courses. In addition, students will learn how to teach themselves new quantitative methods as they need them in their future careers.

**Requisites:** Requires prerequisite courses of EDUC 8230 and EDUC 8240 (all minimum grade B-).

**EDUC 8310 (3) Design of Learning Environments for Radical Possibilities**

Design is a tool for imagining radical new possibilities for living together. We will discuss how we can work with community and school partners to leverage cultural and historical resources in design. This course will introduce students to models of design and tools for participatory design used across the Global North and South that can promote individual, social, and institutional change. It will include attention to political, affective, and ethical dimensions of design, as well as explore dilemmas presented by faculty and students engaged in ongoing design projects.

**Requisites:** Restricted to graduate students only.

**EDUC 8348 (3) Human Development in Cultural, Historical, and Sociopolitical Contexts**

This course takes a critical approach to exploring the moral, sociopolitical, and bio-psychosocial dimensions of human development. It will introduce students to different theories and methods for studying human development across the lifespan. Many traditional approaches to developmental research treat development in Western Educated Industrialized Rich and Democratic (WEIRD) contexts as normative for all populations. This course will focus on approaches that reject the notion that processes of human development are universal, examining the ways that social, cultural and geographic environments and histories shape development and life trajectories.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8358 (3) Critical Introduction to Learning Theory and Practice, Part 1**

This course introduces historical and contemporary perspectives in the learning sciences. Areas of scholarship explored include cognition, behaviorism, and sociocultural approaches. Special attention is paid to the linked histories of these traditions in order to broadly explore what concepts are foundational for critical understanding of cultural, historical, social, embodied, and political aspects of learning. The course explores critiques of relevant fields while also exploring how new ideas and movements are generative for moving research and development toward liberatory aims.

**Recommended:** Prerequisite EDUC 6318 or EDUC 8210.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8359 (3) Critical Introduction to Learning Theory and Practice, Part 2**

This course builds on content central to Part 1 of Critical Introduction to Learning Theory and Practice, which explores historical and contemporary perspectives in the learning sciences. Special attention is paid to theory and practice which is currently at the leading edge of research and development in the learning sciences, while attending to their roots. This course addresses multiple epistemologies and ways of knowing, including global perspectives and critical theories such as feminist, indigenous, and queer approaches. The course also examines how learning theories can inform transformation of practice toward justice and equity.

**Requisites:** Requires prerequisite course of EDUC 8358 (minimum grade D-).

**EDUC 8605 (3) Research and Professional Ethics for Educational Researchers**

Examines the central issues and venerable theories of philosophical ethics that have historically framed research ethics. Also examines contemporary ethical theory that emphasizes a greater attention to the social sciences. Focuses on research ethics (both research of human subjects and research misconduct), various issues of professional academic ethics, and the AERA ethical code.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8610 (3) Advanced Topics in Educational Equity and Cultural Diversity**

Examines special topics in theory and research related to educational equity and cultural diversity in education. Topics vary each semester.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8615 (3) Language Issues in Education Research**

Examines ways in which issues of language can affect the validity of educational research. Discusses how language can be properly addressed with a multidisciplinary perspective through different stages in the process of an investigation, including design, sampling, data collection, and data analysis. Provides the conceptual basis for addressing linguistic diversity from a multidisciplinary perspective.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8620 (3) Language and Power**

Through language we enact positionality and identity. Language has the power to shape our assumptions and beliefs. This course explores the relationship between linguistic nationalism and xenophobia, bilingual education and accent discrimination, multilingualism and youth culture, code-switching and translanguaging, etc. Participants will analyze domestic policies and current events to understand how language serves to maintain or disrupt the status quo.

**EDUC 8630 (3) Bilingual and Biliterate Development in Children and Adolescents**

This advanced doctoral seminar introduces doctoral students to key theories and empirical research on bilingual and biliterate development in school age children (preK  $\dot{\sim}$  12). Participants will explore sociolinguistic, sociocultural, and psycholinguistic perspectives of the language and literacy development of children growing up with two or more languages, and critically examine how varying educational contexts and policies impact the schooling experiences of bilingual learners from early childhood to late adolescence.

**Recommended:** Doctoral students only.

**Grading Basis:** Letter Grade

**EDUC 8640 (3) Rethinking Disability**

Students explore the foundations, trends and future directions of disability in education. Disability is socially, historically, and culturally constructed. It is one of multiple identities that make us human, rather than a problem in need of a cure. This course investigates and disrupts disparities in education that relate to the intersections of disability, culture, race, language, and other identities and explores models for success.

**Requisites:** Restricted to doctoral students.

**EDUC 8710 (3) Measurement in Survey Research**

Introduces students to classical test theory and item response theory. Emphasizes the process of developing, analyzing and validating a survey instrument. Focuses on developing a survey instrument with items that derive from a clearly delineated theory for the construct to be measured. Analyzes item responses and put together a validity argument to support the proposed uses of the survey.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8720 (3) Advanced Topics in Measurement**

Focuses on psychometric models for measurement and their applications in educational and psychological research. Emphasizes understanding and evaluating the utility of models from item response theory (IRT). Applies and compares measurement models in the context of simulated or empirical data sets.

**Recommended:** Prerequisite EDUC 8710.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8730 (3) Advanced Qualitative Data Analysis**

Requires students begin semester with qualitative data already collected (from class project, pilot study, dissertation). Instructors present diverse methods of analyzing data and writing about interpretations. Instructors customize part of course to address specific topic of expertise, e.g., discourse analysis, video analysis, textual analysis, ethnographic analysis.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8731 (3) Principles and Practices of Community-Based Participatory Research**

The course topics are organized to follow the life cycle of a community-based participatory research project. Topics include: Map the landscape of participatory and community-based approaches to research; Draw on critical social theory to analyze issues of race, power, and coloniality; Examine arguments about rigor, validity, and generalizability; It is recommended that students have a collaborative research project with communities or schools to workshop during the semester, but this is not required. Previously offered as a special topics course.

**EDUC 8735 (3) Mixed Methods in Educational Research**

Examines the epistemological and methodological issues involved in conducting studies with mixed methods designs in educational settings. Explores the pragmatic foundations of mixed methods research, developing coding systems, calculating interrater reliability statistics, data collection strategies, making inferences, and writing up mixed methods research reports. All students in the course are expected to have a solid background in both qualitative and quantitative approaches to research. Formerly offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**EDUC 8740 (3) Advances in the Assessment of Student Learning**

Focuses on theories underlying traditional and contemporary proposals for assessment of student learning, and design and research of large-scale and classroom-based methods to assess student learning. Explores intersections between large-scale and classroom assessment, although greater attention is given to issues related to classroom assessment.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8750 (3) Research in Teaching and Teacher Education**

Invites students to acquire a deeper understanding of the history of and challenges in teacher education research, strengthen their knowledge of theoretical and methodological approaches to the study of teacher education, and discuss their own potential contributions to the field.

**Requisites:** Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

**EDUC 8804 (3) Special Topics**

Designed to meet needs of graduate students with topics of pertinent interest.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8844 (1-4) Doctoral Independent Study**

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8855 (1-4) Independent Study in Curriculum and Instruction: Doctoral Level**

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8866 (1-4) Independent Study in Research and Evaluation**

**Methodology: Doctoral Level**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8877 (1-4) Independent Study in Educational Equity and Cultural Diversity: Doctoral Level**

An independent study may be established between a doctoral student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8888 (1-4) Independent Study in Learning and Human Development: Doctoral Level**

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8899 (1-4) Independent Study in Educational Foundations Policy and Practice: Doctoral Level**

**Repeatable:** Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8935 (1-6) Internship in Curriculum and Instruction**

**Repeatable:** Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8936 (1-6) Internship in Research and Evaluation Methodology**

**Repeatable:** Repeatable for up to 36.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8937 (1-6) Internship in Educational Equity and Cultural Diversity**

**Repeatable:** Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8938 (1-6) Internship in Learning Sciences and Human Development**

**Repeatable:** Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8939 (1-6) Internship in Educational Foundations Policy and Practice**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8940 (3) Scholarly Writing for Graduate Students**

Provides graduate students an opportunity to reflect on their current writing process, on their identity as an academic writer, and how their writing is shaping and being shaped by their emerging scholarship. Explores genres of academic writing, processes of peer review, and publication as students engage in weekly writing assignments that build toward a complete manuscript. Students should enter the class with a draft of an existing paper that they intend to work on.

**EDUC 8950 (3) Proposal and Dissertation Writing**

Provides students with ongoing opportunities to write social science research in the context of the design, analysis and data representation, development, and write-up of students' dissertation proposals and dissertations. Students will learn to expand how they think about and use evidence, clarify their ideas and arguments, and improve their writing. Students working on proposals and dissertations should enroll.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to EDUC-PHD students.

**Additional Information:** Departmental Category: Graduate Education

**EDUC 8994 (1-10) Doctoral Dissertation**

**Repeatable:** Repeatable for up to 60.00 total credit hours.

**Additional Information:** Departmental Category: Graduate Education

## Curriculum and Instruction

Curriculum and Instruction (C&I) graduate programs focus on teaching and learning in the following curricular areas: Literacy Studies (PhD), STEM Education (PhD, master's) and Humanities (master's). Additionally, the MA+ teacher licensure program leads to a Colorado initial teaching license plus a master's degree in C&I. Coursework focuses on foundations of learning, foundations of education and subject matter knowledge and pedagogy. The programs prepare students to understand the complexities of classroom contexts and teaching practice in relation to education goals of equity, democracy and justice.

### Master's Degree

- Curriculum and Instruction - Master of Arts (MA) (p. 1480)

### Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1491)

## Education - Curriculum and Instruction - Master of Arts (MA)

The Curriculum & Instruction (C&I) master's degree requires one academic year or more of graduate work beyond the bachelor's degree.

### Program Tracks

#### Humanities Education Track

This track is designed to support teachers and other education professionals who are interested in developing greater understanding and expertise in the teaching and learning of the humanities. Courses within this concentration provide opportunities for graduate students to strengthen discipline-specific content knowledge, knowledge for teaching humanities and a multidisciplinary understanding of how content, pedagogy and practice that supports teaching and inquiry focused on humans' social and cultural experience as they navigate institutional, social and political systems, including education. In consultation with the advisor, this degree can be tailored toward students' goals, interests and desired timeline to degree (typically ranging from 1–2 years)

The program serves practicing teachers, educators working with youth in informal and out-of-school settings, as well as individuals with backgrounds in the humanities wishing to learn more about teaching and learning. This track is only offered as a master's degree. Prospective doctoral students interested in the humanities are encouraged to consider the Literacy Studies, or the Educational Foundations, Policy and Practice emphasis of the Education PhD (p. 1491) program.

## STEM Education Track

The CU Boulder School of Education offers this program to support educators and other education professionals who are interested in developing greater understanding of and expertise in education related to STEM (particularly science, mathematics and computational thinking). The program enables teachers, educational designers and scholars to explore and critically analyze educational, pedagogical and curricular strategies designed to support students' STEM learning and identities. Disciplinary connections to critical issues in STEM are strengthened through lesson design and analysis, fieldwork, coursework and research activities. Throughout these experiences, we center equity, democracy and justice as core concerns in STEM education.

The program serves practicing teachers, educational leaders, designers of informal educational settings, as well as individuals with backgrounds in STEM wishing to learn more about teaching and learning. Graduates of our MA program go on to become teacher leaders, instructional designers, curriculum specialists and district administrators.

## MA+ Teacher Licensure

The MA+ teacher licensure program (p. 1501) leads to a Colorado initial teaching license in Secondary Math, Science, English or Social Studies plus a master's degree in C&I. This program is for candidates who have earned a bachelor's degree from an accredited institution of higher education and who want to elaborate and deepen the close connections between fieldwork and coursework to become a teacher. For more information, contact the School of Education.

## Requirements

### General Requirements

#### Program Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year time limit.

#### Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Master's degree students who began CU's Teacher Education Program as undergraduates or as post-baccalaureate students have the following transfer credit options:

- If the student took the courses as an undergraduate, they may be eligible to transfer up to two of their track's eligible transfer courses, depending on when those courses were taken and if the credits did not count towards the degree. Contact the School of Education for more information.
- If the student took the courses as a post-baccalaureate student, they may transfer up to two of their track's eligible transfer courses as electives, as long as the courses were taken within the past five years. Note: Students transferring from secondary programs will transfer seven credits; therefore, they will complete a 31-credit master's degree.

### Time Limit

The master's degree must be completed within four years.

## Program Tracks

### Humanities Education Track

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
<b>Learning and Development</b>		
Choose at least 3 credit hours of learning and development courses. Examples of eligible courses include:		3
EDUC 6318	Psychological Foundations of Education	
EDUC 6328	Advanced Child Growth and Educational Development	
EDUC 5105	Teaching for Understanding and Equity	
<b>Foundations of Education Curriculum</b>		
Choose at least 3 credit hours of foundations of education curriculum courses. Examples of eligible courses include:		3
EDUC 5065	Curriculum Theories	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 5726	Introduction to Disciplined Inquiry	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Policy Issues in Education	
<b>Curriculum and Instruction in Humanities</b>		
Choose at least 12 credit hours of curriculum and instruction in humanities courses. Courses that meet students' goals and interests are chosen in consultation with the advisor. <sup>1</sup>		12
<b>Electives</b>		
Choose at least 9 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen in consultation with an advisor. <sup>1,2,3</sup>		9
<b>Capstone Course</b>		
EDUC 6964	Capstone: Inquiry in the Content Areas	3
<b>Total Credit Hours</b>		<b>30</b>

- <sup>1</sup> See also "Eligible Transfer Courses" below.
- <sup>2</sup> GRTE courses may not count toward a master's degree.
- <sup>3</sup> Students may deepen their content knowledge in the humanities disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

**Eligible Transfer Courses**

See the Transfer Credit (p. 1481) section for details.

Code	Title	Credit Hours
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5316	Nature of Social Studies and Social Studies Education	3
EDUC 5355	Secondary Social Studies Methods II	3
EDUC 5365	Secondary English Methods II	3

**Capstone Course**

During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6964 Capstone: Inquiry in the Content Areas. This course is only offered once a year. The Capstone course is a graduation requirement and requires the submission of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

**STEM Education Track**

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
<b>Learning and Development</b>		
Choose at least 3 credit hours of learning and development courses. Examples of eligible courses include but are not limited to: <sup>1</sup>		3
EDUC 5050	Knowing and Learning in Mathematics and Science	
EDUC 5105	Teaching for Understanding and Equity	
EDUC 6318	Psychological Foundations of Education	
EDUC 6328	Advanced Child Growth and Educational Development	

**Foundations of Education Curriculum**

Choose at least 3 credit hours of foundations of education curriculum courses. Examples of eligible courses include but are not limited to:

EDUC 5005	Advanced Social Foundations of Education	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5726	Introduction to Disciplined Inquiry	
EDUC 6325	Anthropology of Education	

**Curriculum and Instruction in Mathematics and Science**

Choose at least 12 credit hours of curriculum and instruction in mathematics and science courses. Eligible courses include but are not limited to:<sup>2</sup>

EDUC 5317	Perspectives on Mathematics	
EDUC 5460	Teaching and Learning Physics	
EDUC 5706	Assessment in Mathematics and Science Education	
EDUC 5815	Teaching K-12 Mathematics: Number Sense	
EDUC 5821	Teaching K-12 Mathematics: Algebraic Thinking	
EDUC 5822	Teaching and Learning Chemistry	
EDUC 5833	Teaching and Learning Earth Systems	
EDUC 5835	Teaching K-12 Mathematics: Geometry & Measurement	
EDUC 5850	Teaching K-12 Mathematics: Probability & Statistics	
EDUC 6811	Teaching & Learning Biology In the Classroom	

**Capstone Course**

Students are required to take on one of the seminar courses in the spring before graduation to complete their capstone. 3

EDUC 5177	Seminar in Curriculum and Policy in Mathematics & Science Education	
EDUC 5178	Seminar on Learning in Math & Science Education	
EDUC 5179	Seminar on Teaching and Teacher Education in Math and Science Education	

**Electives**

Choose at least 9 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen in consultation with your advisor.<sup>2,3,4</sup> 9

**Total Credit Hours 30**

- <sup>1</sup> Speak with your advisor about other courses that could satisfy this requirement.
- <sup>2</sup> See also "Eligible Transfer Courses" below.
- <sup>3</sup> GRTE courses may not count toward a master's degree.
- <sup>4</sup> Students may deepen their content knowledge in the mathematics or science disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

**Eligible Transfer Courses**

See the Transfer Credit (p. 1481) section for full details.

Code	Title	Credit Hours
EDUC 5050	Knowing and Learning in Mathematics and Science	3
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5317	Perspectives on Mathematics	3

EDUC 5375	Problem-Based Math Instruction	4
EDUC 5385	Phenomenon-Based Science Instruction	4

### Comprehensive Exam

During the final Spring semester prior to graduation, students must enroll in a content seminar course (EDUC 5177, EDUC 5178 or EDUC 5179).

The course is a graduation requirement and requires the completion of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

## Learning Outcomes

MA students in Curriculum & Instruction will:

- Develop greater understanding and expertise in teaching and learning within and/or across content domains (e.g., Humanities, Literacy, STEM Education).
- Demonstrate professional integrity through ethical conduct, reflection and leadership.
- Collect and analyze information from research and practice to inform decisions and enhance equitable teaching and learning for all students.
- Make educational decisions based on deep engagement with educational scholarship, perspectives and data.
- Understand the importance of partnering with and centering the knowledge of families and communities, particularly those that have experienced histories of marginalization, to work toward social change and educational justice.
- Draw on disciplinary knowledge, perspectives and practices to broaden opportunities personal and social transformation

## Education - Learning Sciences and Human Development

The Learning Sciences & Human Development (LSHD) program takes an interdisciplinary approach to understanding learning, teaching and the design of learning ecologies. The program is particularly concerned with examining learning and development as it happens in and across a range of settings, including schools, community organizations, families and peer groups. In their research and courses, faculty engage with pressing questions of policy and practice. To this end, program faculty enact innovative teaching practices and lead research projects that are attuned to our current technological and sociopolitical climate. Our interdisciplinary approach and research opportunities encourage students in the program to work in partnership with schools and communities to organize innovative practices that open up opportunities for transformative learning.

The LSHD program is on the leading edge of the field in its theoretical and practical explorations of social and spatial justice, community-engaged research methods, educational design, and culture and diversity in learning. LSHD faculty and students are leaders in theorizing and building partnerships with schools, districts and state agencies, as well as youth and community organizations.

## Master's Degree

- Learning Sciences and Human Development - Master of Arts (MA) (p. 1483)

## Learning Sciences and Human Development - Master of Arts (MA)

The Learning Sciences & Human Development (LSHD) master's program focuses on research, theory and professional knowledge about learning environments in and outside of school. Areas of study include K–12 schools, community settings, youth and student voice, museums and the variety of contexts that young people navigate in their everyday lives. Although we have a primary focus on children and youth, several faculty members also study processes of teacher learning.

The program is structured in ways that emphasize the bridging of theory and practice, lending primary emphasis to academic study and research. The program is designed to provide an academic and practical foundation that prepares students for a variety of career pathways. These include, but are not limited to, work in K–12 education, youth-serving community organizations, educational research and evaluation firms, or in the private sector. Many MA students also go on to pursue PhDs in learning sciences or education research. Faculty advisors and students build programs of study that meet program goals and the student's interests.

## Requirements

### Prior Experience

To make the most of the LSHD MA program, it is helpful—though not required—for students to have taken coursework focused on learning and human development. For example, courses that address topics such as how people learn, cognition and the social and cultural contexts of development, including the study of culture, race, ethnicity, gender or linguistics would be relevant. Commensurate professional or paraprofessional experience in educational settings—in and out of school and with youth and adults—is also a valued prior experience.

### Required Courses and Credits

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Code	Title	Credit Hours
<b>Core Requirements</b>		
EDUC 5716	Basic Statistical Methods	3
EDUC 5726	Introduction to Disciplined Inquiry	3
EDUC 6318	Psychological Foundations of Education	3
EDUC 6328	Advanced Child Growth and Educational Development	3
<b>Core Electives</b>		
Choose at least 6 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen from the following categories in consultation with your advisor. (Suggested options below.) <sup>1</sup>		6
<i>Learning and Development</i>		
EDUC 8348	Human Development in Cultural, Historical, and Sociopolitical Contexts	

EDUC 8358	Critical Introduction to Learning Theory and Practice, Part 1	
<i>Curriculum and Instruction</i>		
Please consult with Faculty Advisor		
<i>Learning and Technology</i>		
Please consult with Faculty Advisor		
<i>Foundations</i>		
EDUC 5075	Sociology of Education	
<b>Area of Specialization</b>		
Students will develop their Area of Specialization in close dialogue with their advisor. Courses for the Area of Specialization may be taken outside or inside of the School of Education.		6
<b>Capstone Project</b>		6
<b>Total Credit Hours</b>		30

<sup>1</sup> GRTE courses may not count toward a master's degree.

### Capstone Project

In the year when students anticipate completing their Capstone Project, they should enroll in a 1-3 unit professional seminar focused on community building in the program, the practices of doing research and career planning.

This seminar is meant to be taken in addition to the Capstone Course (EDUC 6945), which is taken in the spring semester.

### Time Limit

The master's degree must be completed within four years.

### Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. Students who have transfer credits must complete the transfer of credit paperwork.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

## Educational Foundations, Policy and Practice

Educational Foundations, Policy & Practice (EFPP) graduate programs focus on policy analysis and the application of academic disciplines—anthropology, history, law, philosophy and sociology—to the analysis of education. Programs are devoted to the critical examination of the relations among education, society, culture and government, with special emphasis on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The master's program prepares students for a variety of pathways, including policy analyst careers for state and local organizations, and further study at the PhD level. The PhD program prepares students for university faculty positions and other careers requiring deep knowledge of research.

## Master's Degrees

- Educational Foundations, Policy and Practice - Master of Arts (MA) (p. 1484)
- Higher Education - Master of Arts (MA) (p. 1486)

## Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1491)

## Educational Foundations, Policy and Practice - Master of Arts (MA)

The master's program in Educational Foundations, Policy & Practice (EFPP) includes two possible concentrations, each with a different focus: *community-based change*, and *evaluation and policy analysis*. Both concentrations engage students in a critical examination of the relations among education, society, culture and government, with special emphases on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The program stresses analysis of educational theory, policy, and practice by drawing on the humanities and the social sciences. Its foundation is critical scholarship, which examines educational institutions within broad social, political, cultural, legal, and economic contexts in the United States. Program faculty members offer courses in social, cultural, historical, legal and philosophical foundations of education; in policy analysis; transnational, Latinx, African-American, gender and queer studies in education; and in evaluation. Additional related courses are available in other programs within the School of Education and in other departments of the university.

EFPP has designed its master's program as a flexible program with a relatively small size to encourage strong and enduring relationships among students and faculty. All master's program concentrations are designed to prepare graduates for diverse roles as educators, advocates or policy analysts in schools, government agencies, think tanks, policy organizations, community organizations or institutions of higher education. This program also prepares graduates to pursue doctoral work.

The following two are possible concentrations, but students are also welcome to design an individualized concentration that reflects their academic interests and professional goals.

## Community-Based Change Concentration

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as contemporary school reforms and partnerships between schools and communities. This strand of the EFPP MA program is specifically geared toward educators, non-profit leaders, parents, and other community members who wish to gain skills and knowledge that will assist them in becoming powerful advocates for high-quality, equitable education.

Key foundations courses in this concentration include but are not limited to: policy issues in education, philosophy of education, anthropology

of education, sociology in education, history of American education, education policy and the law, international and comparative education, queer(ing) topics in education, and issues in African-American education. Students will create a specific course plan around their interests in consultation with their advisor. Research methods courses can include Community-Based Participatory Research, as well as Disciplined Inquiry, Basic Statistical Methods, or Introduction to Qualitative Methods.

## Evaluation and Policy Analysis Concentration

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as the process of school reform and the development of more equitable education policies. The program is designed to prepare evaluators and policy analysts for careers in academic institutions and agencies at the state and federal levels. Graduates will be able to analyze, recommend, and evaluate public policies.

Key courses in this concentration include but are not limited to: education evaluation, policy issues in education, philosophy of education, education policy and the law, and theoretical issues in education policy. Students will create a specific course plan around their interests in consultation with their advisor. Research methods courses can include Disciplined Inquiry and Basic Statistical Methods, as well as advanced courses in Program Evaluation, Survey Methodology, or Introduction to Qualitative Methods.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Ethnic Studies - Bachelor of Arts (BA) (p. 301).

Completing the BAM degree program efficiently requires early and careful planning. Interested students can contact education advisors at [edadvise@colorado.edu](mailto:edadvise@colorado.edu) or 303-492-6555, and Ethnic Studies advisors at [ethnicst@colorado.edu](mailto:ethnicst@colorado.edu) or 303-492-8852 at any time.

## Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in *all* work attempted while enrolled. Students must also successfully pass their Capstone Course. The master's degree must be completed within four years.

For more information on requirements for the master's degree, visit the Educational Foundations, Policy and Practice (<http://www.colorado.edu/education/graduate-programs/educational-foundations-policy-practice-efpp/ma-efpp/degree-requirements/>) page on the School of Education website.

## Degree Requirements

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the

required 30 credit hours are completed within the four-year limit set forth below.

Students select the remaining 6 credit hours in consultation with their advisors, depending on the credit distribution in the above categories.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Foundations</b>		<b>15</b>
Choose at least 15 credit hours in educational foundations.		
Suggested courses:		
EDUC 5015	International / Comparative Education	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 6210	Education Policy and the Law	
EDUC 6211	Education Law and Litigation Workshop	
EDUC 6220	Gender Issues in Education	
EDUC 6240	African American Education in the United States	
EDUC 6245	Latinx Education Across the Americas	
EDUC 6250	Higher Education in the United States	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Policy Issues in Education	
EDUC 8055	Theoretical Issues in Education Policy	
EDUC 8125	Seminar: Radical Education Theories	
<b>Education Research</b>		<b>6</b>
Ordinarily, entering master's-level students will take the following two courses to meet this requirement:		
EDUC 5150	Introduction to Qualitative Research Methods	
EDUC 5716	Basic Statistical Methods	
EDUC 5726	Introduction to Disciplined Inquiry	
Those who have already taken one or more comparable courses can adjust their course of study accordingly.		
<b>Electives</b>		<b>6</b>
Students may select 6 credits of coursework in consultation with their advisor.		
<b>Capstone Course</b>		<b>3</b>
<b>Total Credit Hours</b>		<b>30</b>

## Capstone Course

During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6945 MA Capstone Seminar in Foundations of Education. This course is only offered in the spring semester. The capstone course requires the submission of a paper or project reviewed by faculty to successfully complete both course and graduation requirements.

## Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the

Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours. These transfer credits are accepted only after approval of the department chair or program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed six credits of graduate-level coursework, with a 3.0 GPA, as a degree-seeking student on the CU Boulder campus.

## Learning Outcomes

MA students in Educational Foundations, Policy and Practice will:

- Understand and apply various disciplinary perspectives and critical theoretical lenses to analyze educational policy and practice.
- Analyze the relationship between schools and various social, political and economic forces that structure educational aims, institutions and practices.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the ability to evaluate how (and to what extent) various educational policies and practices advance or undermine such aims.
- Develop and practice strategies and skills of policy analysis and program evaluation, in order to effectively analyze, recommend and evaluate public policies and to advocate for high-quality, equitable education.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning.

## Higher Education - Master of Arts (MA)

The MA in Higher Education (MAHE) is a professional degree program designed to prepare students for careers in higher education. The MAHE program is designed to help students broaden their knowledge of higher education policy, research and practice, especially in the areas of student affairs, academic affairs, diversity and community engagement.

The professional MA program offers a supportive community and flexible coursework designed to accommodate busy professionals' schedules. An innovative collaborative effort between the School of Education and various administrative departments on campus, the program offers a dynamic combination of academic knowledge and experiential education.

## Requirements

The MA in Higher Education (MAHE) program aims to develop knowledgeable, ethical, and diverse leaders in higher education. Students will broaden their knowledge of higher education in three key areas: the foundations of higher education; research and evaluation; and higher education and student affairs practice. Students complete two professional practicum experiences in higher education as well as a research-based Capstone project, a summative writing project designed around the professional and academic goals of each student, with feedback from their advisor.

Students must successfully complete 36 credit hours of approved coursework while maintaining at least a B (3.0) grade point average, and must pass their capstone course. Additionally, the master's degree must be completed within four years.

EDUC 5030	Accessibility and Students with Disabilities in Higher Education	
EDUC 5031	Institutional Research & Analytics in Higher Education	
EDUC 5032	College Student Leadership Development	
EDUC 5033	Special Topics in Higher Education	
Or other appropriate courses approved by faculty advisor.		
<b>Required Capstone Course (3 Credits)</b>		<b>3</b>
EDUC 6945	MA Capstone Seminar in Foundations of Education	
<b>Total Credit Hours</b>		<b>36</b>

## Learning Outcomes

Students in the MAHE program will:

- Understand the mission, roles, and functions of higher education in the United States, including the history and philosophy of higher education; college student development; and key factors that influence student and organizational behavior.
- Translate theoretical knowledge into meaningful practices in the profession, including in areas such as advising, instruction, supervision, program design, administration and research.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the competencies necessary to engage with diverse students and staff with sensitivity, effectiveness and confidence.
- Practice skills of program assessment, design, implementation, and evaluation, as appropriate for various divisions and offices in higher education. Develop professional relationships with peers and team members in a university setting.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning. Students will be able to offer (and receive) critical and supportive peer feedback, and gain experience presenting work to external audiences.

## Equity, Bilingualism and Biliteracy

Bilingual learners are the fastest growing population in the United States, and they are among the most marginalized, segregated and underserved populations in public education. Situated in the Southwest, our graduate degrees prioritize equity and justice in PK–12 education for multilingual learners, including students with disabilities.

The Equity, Bilingualism and Biliteracy (EBB) program area seeks to understand and critically respond to issues at the intersection of language, culture, ability and identity, educational and social policies, teacher preparation and teacher learning, and the social and political contexts of schooling. This includes critical explorations of, and interventions related to, the various aspects of schooling that affect multilingual learners and their communities, such as the development of bilingualism and biliteracy, restrictive language and literacy policies, high-stakes accountability, teacher education, disproportionate representation in special education, racio-linguistic ideologies, the implementation

of various bilingual education models, immigration policies and transnationalism. EBB aims specifically to prepare critical, equity- and justice-oriented researchers, teacher educators, and school district and community leaders.

With deep connections to teaching and teacher preparation, EBB faculty partner with schools, classrooms and communities to conduct research, support teacher learning and advocate for, and work in solidarity with, multilingual students, families and community members. We offer courses in language acquisition and biliteracy development, language ideologies and policies, critical perspectives on disability, sociolinguistics and the preparation of justice-centered teachers to work with multilingual learners. Faculty also offer courses in special education methodologies, assessment and program development/implementation, and teacher education/learning. Additional related courses are available in other School of Education programs and in other departments across the university.

All graduate degrees prioritize K–12 bilingualism in the United States, with a strong emphasis on Spanish/English bilingualism. EBB programs are designed to prepare graduates to work and lead in universities, state, federal and local education agencies, schools, school districts, and community-based organizations. Doctoral level preparation is research oriented and qualifies graduates for a range of roles, including faculty in university positions.

## Master's Degree

- Equity, Bilingualism and Biliteracy - Master of Arts (MA) (p. 1487)

## Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1491)

## Equity, Bilingualism and Biliteracy - Master of Arts (MA)

Equity, Bilingualism and Biliteracy (EBB) offers a course of study devoted to the critical examination of theory, practice and policy in two major areas of emphasis: the education of culturally and linguistically diverse students and the education of students with disabilities. The program stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

## Areas of Emphasis

Enrolled students select one of the below:

### Culturally & Linguistically Diverse Education Emphasis

The School of Education offers the master's degree in EBB with an emphasis in Culturally & Linguistically Diverse Education. Completion of this program qualifies one for a Colorado endorsement in the area of Culturally & Linguistically Diverse education (K-12). Some candidates may also be eligible for the Culturally & Linguistically Diverse Education Specialist: Bilingual Education endorsement. Please contact the School of Education for details.

The program provides a range of direct experiences in bilingual/multicultural/ELD education with the opportunity to develop skills and

expertise essential to the work of educators of the bilingual/emerging bilingual learner. The overall purpose of the program is to develop sound bilingual/multicultural/ELD competencies in teachers and school leaders. Program coursework includes foundations of bilingual/ multicultural education, assessment practices and issues, methods in bilingual and ELD, biliteracy, family/community engagement, and a field-based practicum. Participation in the program may be on a part-time basis. International students seeking participation in this program should consult with a faculty advisor before applying for admission and must complete a practicum in a U.S. K-12 public school. This program is not appropriate for individuals wishing to teach English as a foreign language in other countries

## Culturally & Linguistically Diverse Ed/Special Ed Generalist Emphasis

The School of Education offers the master's degree in EBB with an emphasis in bilingual/ELD special education. Completion of this program qualifies one for teacher license endorsements in two areas of Special Education Generalist (K-12) and Culturally & Linguistically Diverse education (K-12). Program graduates are employed in both general and special education programs. The program offers courses in foundations in special and ELD/bilingual/multicultural education; assessment issues and practices in bilingual/ELD special education; methods of bilingual, ELD and special education; biliteracy; family and community engagement; and a field-based practicum. This program is not suitable for international students seeking preparation in Teaching English as a Foreign Language (TEFL). This is a part-time program for practicing educators with courses offered evenings and summers. This program is designed to be completed over a three-year period.

## Social/Multicultural/Bilingual Education Emphasis

This program is a non-endorsement degree with an interdisciplinary focus. The program offers courses in foundations of bilingual/multicultural education, curriculum and methods in multicultural education, and curriculum theory. Participation in the program may be on a part-time or full-time basis.

## Requirements

### Social/Multicultural/Bilingual Education (Non-Endorsement) Plan

#### Program Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master's degree within four years.

This program does *not* lead to an added endorsement in Culturally and Linguistically Diverse Education. This program is most appropriate for those who do not have a teaching license, or for licensed teachers who already have the endorsement in Culturally and Linguistically Diverse Education but need a master's degree.

#### Required Courses and Credits

The program requires 15 credit hours in bilingual, ELD and multicultural education. The remaining 15 credit hours are electives that may be taken either in the School of Education or in other CU departments, but should be discussed with and approved by an advisor. Education courses must be at the 5000 level or above. GRTE courses may not count toward a master's degree. A maximum of 6 credit hours may be completed in Arts & Sciences courses taken at the 3000 or 4000 level. The frequency

of individual course offerings varies; therefore candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Code	Title	Credit Hours
<b>Core Requirements</b>		
EDUC 5525/5605	Research Issues in Special Education	3
Suggested bilingual, ELD and multicultural education courses include the following:		12
EDUC 5035	Proseminar: Parent and Community Involvement	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5445	Curriculum for Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
EDUC 5535	Diagnostic Testing in ELD and Bilingual Education	
EDUC 5615	Second Language Acquisition	
EDUC 5625	Methods of Teaching English Language Development	
<b>Electives</b>		<b>15</b>
<b>Total Credit Hours</b>		<b>30</b>

## Comprehensive Exam/Capstone Project

A written comprehensive examination or capstone research study must be completed prior to the completion of the master's degree. The project will reflect the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder. Students must be enrolled in a course in the same semester they present their final project.

## Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

## Culturally & Linguistically Diverse Education (CO CLD Endorsement) Plan

### Program Requirements

Student must successfully complete 31 credit hours of approved coursework while maintaining at least a B (3.0) average in all work

attempted while enrolled. Students must also successfully pass their capstone project and complete the master's degree within four years.

### Required Courses and Credits

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 31 credit hours are completed within the four-year limit.

Approved coursework meets the following course requirements:

Code	Title	Credit Hours
<b>Courses and Minimum Required Credit Hours</b>		
<i>Course or Requirement:</i>		
EDUC 5425/5465	Introduction to Bilingual/Multicultural Education	3
EDUC 5445	Curriculum for Multicultural Education	3
EDUC 5035	Proseminar: Parent and Community Involvement	3
EDUC 5435	Materials and Methods in Bilingual/Multicultural Education	3
EDUC 5455	Literacy for Linguistically Different Learners	3
EDUC 5535	Diagnostic Testing in ELD and Bilingual Education	3
EDUC 5605	Research Issues in Bilingual Education	3
EDUC 5615	Second Language Acquisition	3
EDUC 5625	Methods of Teaching English Language Development	3
<b>Comprehensive Exam/Capstone Course</b>		<b>4</b>
EDUC 5595	Practicum in Linguistically Different: English Language Development	
<b>Total Credit Hours</b>		<b>31</b>

### Capstone Project

A capstone project must be completed prior to the completion the MA degree. The project will reflect the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- Practicum in Linguistically Different: English Language Development (EDUC 5595): (4 credit hours) Practicum includes 200 hours of in-school work (can be taken over two semester blocks)

### Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program.

Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

## Special Education Generalist and Culturally & Linguistically Diverse Education (CO Dual Endorsement) Plan

### Program Requirements

Students must successfully complete 36–37 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their comprehensive exam and complete the master's degree within four years.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 36–37 credit hours are completed within the four-year limit.

Approved coursework meets the following distribution requirements:

Code	Title	Credit Hours
<b>Courses and Minimum Required Credit Hours</b>		
<i>Course or Requirement:</i>		
EDUC 5035	Proseminar: Parent and Community Involvement	3
EDUC 5455	Literacy for Linguistically Different Learners	3
EDUC 5465	Introduction to ELD/Bilingual and Special Education	3
EDUC 5505	Education of Students with Learning and Behavior Disorders	3
EDUC 5515	Curriculum and Assessment for Special Learners	3
EDUC 5525	Research Issues in Special Education	3
EDUC 5535	Diagnostic Testing in ELD and Bilingual Education	3
EDUC 5545	Strategies for Teaching Students with Special Needs	3
EDUC 5615	Second Language Acquisition	3
EDUC 5625	Methods of Teaching English Language Development	3
EDUC 7105	Collaboration to Meet Special Needs	3
<b>Comprehensive Exam/Capstone Course</b>		<b>3-4</b>
EDUC 5555	Practicum in Bilingual/Special Education	
<b>Total Credit Hours</b>		<b>36-37</b>

### Comprehensive Exam

A written comprehensive examination must be completed during the student's last term of study for the master's degree. The examination will cover the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- Practicum in Bilingual/Special Education (EDUC 5555): 3-4 credit hours

### Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

### Learning Outcomes

Students in the Equity, Bilingualism and Biliteracy MA program will:

- Develop pedagogical expertise in planning for instruction and effectively teaching bi/multilingual students and/or students with identified special needs in PK-12th grade settings.
- Understand the complex interaction of language, culture, identity and learning in and out of schools.
- Develop the knowledge and skills to advocate on behalf of culturally and linguistically diverse learners in schools.
- Build effective partnerships with communities and families in the pursuit of educational equity and opportunity.
- Embrace a holistic/dynamic bilingual lens and an anti-racist stance in making decisions regarding policy, programs, assessment, curriculum and instruction.
- For CLD and Dual Endorsement Programs: Meet requirements for the State of Colorado Endorsement in Cultural and Linguistic Diversity in Education.
- For Double Endorsement Program: Meet requirements for the State of Colorado Endorsement in Special Education.

## Research and Evaluation Methodology

The Research & Evaluation Methodology (REM) program offers the opportunity to combine substantive interests in education with advanced training in research methods. The program's central mission is to provide students with the training they need to use sophisticated methods that shed light on policies, programs and practices that have been enacted to facilitate student learning and to mitigate inequality in educational opportunities and outcomes. Students will learn both how to apply a variety of methodological approaches, and, of equal or greater importance, to think deeply about when and why the approach is sensible given the real-world contexts in which these research designs and methods are applied.

A spirit of critical inquiry and intellectual curiosity is a defining feature of the REM community. When claims are made—by students or faculty—it is expected that those claims will be supported by an adequate warrant, drawing on empirical evidence when appropriate.

Within this framing, learning goals for REM students include that they:

- Develop knowledge and skills for applying appropriate research methods and study designs to answer substantive questions about educational policies, programs, and practices aimed at promoting equitable opportunities and outcomes for historically underserved and marginalized populations.
- Learn to communicate relevant findings and insights to a broad audience of stakeholders including the public, policymakers and academic peers.
- Find fulfilling careers in a context that is the best fit for each individual student's research (and teaching) interests. These careers may be in university teaching and research, research and evaluation in state departments of education, large school districts, think tanks or research firms, federally funded regional research and development laboratories; assessment and testing organizations; and consultation for government and education agencies.

REM faculty strive to foster an environment for students that is both challenging and supportive. During the weekly "REM seminar," students have the opportunity to interact with invited speakers, discuss timely research topics and studies, brainstorm ideas for publishable papers, and practice giving oral presentations. Regular interactions among students and faculty is the norm, not the exception. REM faculty teach courses and mentor students with the same commitment and dedication that is evident in our scholarly research. Students will have ongoing support as they embark on a path that begins with coursework, transitions to dissertation prospectus and defense, and culminates in a job that aligns with their particular career aspirations in educational research.

Students participate in graduate research assistantships each semester and most can expect to work with faculty on research projects as part of CADRE at some point during their doctoral studies.

### The Center for Assessment, Design, Research and Evaluation ( CADRE (<https://www.colorado.edu/cadre/>))

REM students can explore opportunities to be involved in CADRE research. The mission of CADRE is to produce generalizable knowledge that improves the ability to assess student learning and to evaluate programs and methods that may have an effect on this learning. CADRE projects represent a collaboration with the ongoing activities in the School of Education, the university, and the broader national and international community of scholars and stakeholders involved in educational assessment and evaluation. Visit the center's CADRE Projects and Resources (<http://www.colorado.edu/cadre/cadre-projects-and-resources/>) website for examples.

### Other CU Boulder Center-Based Opportunities

REM faculty are affiliates of various centers at CU Boulder. REM students may have opportunities to gain research experience via faculty collaborations within these centers, which include:

- The Institute of Behavioral Science (<https://behavioralscience.colorado.edu/>)
- Renée Crown Wellness Institute (<https://www.colorado.edu/crowninstitute/>)

## Career Opportunities

Opportunities for students with a PhD with an area of emphasis in REM include:

- University teaching and research
- Research, evaluation and testing in state departments of education and large school districts
- Research and policy analysis for think tanks like the RAND Corporation, SRI International, and federally funded regional research and development laboratories
- Measurement or statistical analysis for assessment and testing organizations such as the Educational Testing Service
- Consultation for government and education agencies

Examples of our REM graduates' careers over the past ten years:

- National Center for the Improvement of Educational Assessment (Senior Associate)
- Educational Testing Service (Research Scientist)
- Center for Assessment, Design, Research and Evaluation (Associate Director)
- SRI International (Principal Research Scientist)
- Stanford University (Associate Professor)

## Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1491)

## Education - Doctor of Philosophy (PhD)

### Overview

The School of Education offers a single doctoral degree in Education. The degree has seven program areas of emphasis, from which a student chooses:

- Educational Foundations, Policy and Practice
- Equity, Bilingualism and Biliteracy
- Learning Sciences and Human Development
- Literacy Studies
- Research and Evaluation Methodology
- STEM Education
- Teacher Learning, Research and Practice

## Requirements

### Required Courses and Credits

Students must successfully complete 56 credit hours of approved coursework, with 12 credit hours of core courses (see below) taken as a doctoral cohort during the first two years of study. The remaining 44 credits are completed in the student's area of emphasis. Students work with their faculty advisor to develop an individualized, coherent program of study that includes advanced theoretical, methodological and writing experiences.

Students must maintain at least a B (3.0) average with no grade lower than a B- while enrolled.

Students must complete 30 hours of dissertation credit. Students must be registered for a minimum of 5 dissertation hours per semester after successful completion of their comprehensive exam.

All PhD students are required to take the following four courses in their first and second years:

Code	Title	Credit Hours
EDUC 8210	Ways of Knowing in Educational Research	3
EDUC 8220	Introduction to Educational Research and Policy	3
EDUC 8230	An Introduction to Quantitative Methods in Educational Research	3
EDUC 8250	Qualitative Research Methods in Education	3
<b>Total Credit Hours</b>		<b>12</b>

### Area of Emphasis Course Requirements

Code	Title	Credit Hours
<b>Educational Foundations, Policy and Practice</b>		
<i>Specialty Seminar</i> <sup>1</sup>		2
EDUC 6929	Readings in Educational Foundations Policy and Practice	
<i>Writing Seminar</i>		3
EDUC 8940	Scholarly Writing for Graduate Students	
or EDUC 8950	Proposal and Dissertation Writing	
<i>Educational Foundations</i>		15
Course options (examples):		
EDUC 5015	International / Comparative Education	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6230	Ethics in Education	
EDUC 6240	African American Education in the United States	
EDUC 6250	Higher Education in the United States	
EDUC 6260	Transnational Migration, Education, and Citizenship	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Policy Issues in Education	
EDUC 8045	Philosophical Issues in Educational Research	
EDUC 8055	Theoretical Issues in Education Policy	
EDUC 8125	Seminar: Radical Education Theories	
<i>Advanced Methods</i>		9

Minimum nine hours of advanced research methods courses; these courses may be in advanced qualitative or advanced quantitative methods and may be taken in the School of Education or in other departments of the University. Students concentrating in History of Education or Philosophy of Education may choose to fulfill this requirement with courses in historiography or philosophical inquiry, respectively. These must be chosen in consultation with the faculty advisor.

COMM 6410	Discourse Analysis	
EDUC 7386	Educational Evaluation	
EDUC 7396	Latent Variable and Structural Equation Modeling	
EDUC 7456	Multilevel Modeling	
EDUC 7456	Multilevel Modeling	
EDUC 8710	Measurement in Survey Research	
EDUC 8720	Advanced Topics in Measurement	
EDUC 8730	Advanced Qualitative Data Analysis	
SOCY 7026	Feminist Research Methods	
SOCY 7121	Qualitative Analysis	
<i>Electives</i> <sup>3</sup>		15
<i>Total Credits</i>		44

#### Equity, Bilingualism, and Biliteracy

<i>Specialty Seminar</i> <sup>1</sup>		2
EDUC 6927	Readings in Equity, Bilingualism and Biliteracy	
<i>Studies in Equity, Bilingualism, and Biliteracy</i>		18
EDUC 5615	Second Language Acquisition <sup>2</sup>	
EDUC 5635	Education and Sociolinguistics <sup>2</sup>	
EDUC 8615	Language Issues in Education Research	
EDUC 8620	Language and Power	
EDUC 8630	Bilingual and Biliterate Development in Children and Adolescents	
EDUC 8640	Rethinking Disability	
<i>Advanced Methods</i>		12

Minimum twelve hours in advanced methodology, preferably aligned with the methods to be used during dissertation research. Possible School of Education courses include the courses listed below, but methodology classes may be taken outside of the School of Education.

Choose from:

EDUC 6504	Issues and Methods in Cognitive Science	
EDUC 7336	Methods of Survey Research and Assessments	
EDUC 7346	Ethnographic Methods in Educational Research	
EDUC 7386	Educational Evaluation	
EDUC 7396	Latent Variable and Structural Equation Modeling	
EDUC 7456	Multilevel Modeling	
EDUC 8710	Measurement in Survey Research	
EDUC 8720	Advanced Topics in Measurement	
EDUC 8730	Advanced Qualitative Data Analysis	
EDUC 8348	Human Development in Cultural, Historical, and Sociopolitical Contexts	

or COMM 6410 Discourse Analysis

<i>Non-Education Courses</i>		6
Minimum of six hours must be taken outside of the School of Education. Courses should be selected in consultation with your advisor and are typically at the 6000 or higher level.		
<i>Electives</i>		6
These courses must be selected in consultation with the faculty advisor and are typically at the 6000-level or higher.		
<i>Total Credits</i>		44
<b>Learning Sciences and Human Development</b>		
<i>Specialty Seminar</i> <sup>1</sup>		2
EDUC 6928	Readings in Learning Sciences and Human Development	
<i>Advanced Topics in Learning Sciences and Human Development</i>		12
Twelve hours selected with the faculty advisor's approval from 8000-level. Typically these are comprised of the four LSHD doctoral core courses, which are offered on a rotating basis:		
EDUC 8310	Design of Learning Environments for Radical Possibilities	
EDUC 8358	Critical Introduction to Learning Theory and Practice, Part 1	
EDUC 8359	Critical Introduction to Learning Theory and Practice, Part 2	
EDUC 8348	Human Development in Cultural, Historical, and Sociopolitical Contexts	
<i>Advanced Methods</i>		6
Minimum of six credit hours (equivalent to 2 semester-long courses) in advanced research methods, selected in consultation with your doctoral advisor. Advanced research methods are doctoral level courses and do not include required School of Education core courses.		
<i>Electives</i> <sup>3</sup>		24
Minimum six elective hours must be outside Learning Sciences and Human Development, and must be courses other than those used to satisfy the core requirements and the advanced topics requirements. These electives may be used to satisfy requirements toward the Institute for Cognitive Sciences certificate.		
<i>Total Credits</i>		44
<b>Literacy Studies</b>		
<i>Specialty Seminar</i> <sup>1</sup>		2
EDUC 6925	Readings in Curriculum and Instruction	
<i>Literacy Doctoral Seminars</i>		12
Minimum twelve hours of the advanced doctoral courses in literacy studies are required to be taken within the first four years. Students will enroll in the following four courses. They can be taken in any order, there is no predetermined sequence.		
EDUC 8100	Historical and Contemporary Issues in Literacy Research	
EDUC 8101	Theories of Literacy Research and Practice	
EDUC 8102	Literacy Research Methods	
EDUC 8103	Special Topics in Literacy Research	

**Advanced Methods** 3-6

Minimum six hours of coursework in qualitative, quantitative, and/or mixed methodologies. Courses must be graduate level and may be taken within or outside of the School of Education. For those also pursuing the Teacher Learning, Research and Practice area of emphasis, one advanced methods requirements can be met through either EDUC 8135 or EDUC 7115. Note that one of these two courses could be fulfilled in conjunction with the Cognate Requirement.

**Writing Seminar** 3

EDUC 8950 Proposal and Dissertation Writing  
or EDUC 8940 Scholarly Writing for Graduate Students

**Cognate Requirement** 3-6

Minimum six hours taken outside of the School of Education. Choose a minimum of two courses in an area of specialization to be taken outside of the School of Education. The courses related to a student's specialty area may be defined by discipline (e.g., linguistics, anthropology, English literature) or by focus (e.g., critical theories of race; Latinx studies; queer studies; poetry; digital humanities). Note that one of these two courses could be fulfilled in conjunction with the Advanced Methods Requirement.

**Electives**<sup>3</sup> 18

Minimum nine hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

**Total Credits** 44**Research and Evaluation Methodology****Specialty Seminar**<sup>1</sup> 2

EDUC 6926 Readings in Research and Evaluation Methodology

**Research and Evaluation Methodology Required Courses** 21

EDUC 7326 Quasi-Experimental Design in Causal Inference in Social Sciences

EDUC 7386 Educational Evaluation

EDUC 7396 Latent Variable and Structural Equation Modeling

EDUC 7456 Multilevel Modeling

EDUC 8240 Quantitative Methods II

EDUC 8710 Measurement in Survey Research

EDUC 8720 Advanced Topics in Measurement

**Qualitative Methods** 3

An additional qualitative methods course to be taken following the completion of EDUC 8260.

**Non-Education Courses** 6

Minimum of six hours must be taken outside of the School of Education. Courses should be selected in consultation with your advisor and are typically at the 6000 or higher level.

**Electives**<sup>3</sup> 12

Minimum 12 hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

**Total Credits** 44**STEM Education****Specialty Seminar**<sup>1</sup> 2

EDUC 6925 Readings in Curriculum and Instruction

**STEM Doctoral Seminars** 9

EDUC 8177 Advanced Seminar in Curriculum and Policy in Mathematics & Science Education

EDUC 8178 Advanced Seminar on Learning in Math & Science Education

EDUC 8179 Advanced Seminar in Mathematics and Science Teaching & Teacher Education

**Advanced Methods** 6

Minimum six hours in either qualitative or quantitative methods. Options within and outside of the School of Education may be chosen in consultation with advisor.

EDUC 8710 Measurement in Survey Research

EDUC 8720 Advanced Topics in Measurement

EDUC 8730 Advanced Qualitative Data Analysis

COMM 6410 Discourse Analysis

**Writing Seminar** 3

EDUC 8950 Proposal and Dissertation Writing

**Electives**<sup>3</sup> 24

A minimum six hours within the School of Education. Additional electives may be completed outside the School of Education in consultation with advisor.

**Total Credits** 44**Teacher Learning, Research and Practice****Specialty Seminar**<sup>1</sup> 2

EDUC 6925 Readings in Curriculum and Instruction

**TLRP Seminar Courses** 12

EDUC 7115 Critical Inquiry into Becoming a Teacher Educator

EDUC 8115 History and Policy Issues in Teaching and Teacher Education

EDUC 8135 Theories and Methodologies for Examining Teacher Learning

EDUC 8145 Designing for Teacher Learning and Teacher Education

**Advanced Methods** 3

In addition to EDUC 7115 and EDUC 8135, three hours of advanced methods (qualitative or quantitative) are required. The three remaining credit hours are met through a course selected from within or outside the School of Education in consultation with the faculty advisor. Although there are several courses that might fulfill this requirement, examples might include but are not limited to those noted below.

Course options (examples):

ANTH 7300 Seminar: Research Methods in Cultural Anthropology

COMM 6410 Discourse Analysis

EDUC 8710 Measurement in Survey Research

EDUC 8730 Advanced Qualitative Data Analysis

LING 6310 Sociolinguistic Analysis

LING 7800 Open Topics in Linguistics

SOCY 6121 Qualitative Methods

SOCY 7026 Feminist Research Methods

SOCY 7171 Special Topics

WGST 6190	Feminist Methodology	
<i>Writing Seminar</i>		3
EDUC 8950	Proposal and Dissertation Writing	
or EDUC 8940	Scholarly Writing for Graduate Students	
<i>Cognate Requirement</i>		12
Students design a pathway that best aligns with their goals. Students might, for example, select a complementary program area of study within the CU Boulder School of Education and complete the twelve (12) hours of Graduate Seminar coursework housed in that program. Or, students might select a cognate area that allows them to explore a specialty area defined by discipline (e.g., linguistics, anthropology, English literature) or by focus (e.g., critical approaches to race, class and gender; urban studies). For either of these pathways, the remaining hours might serve as Elective credits chosen in consultation with the advisor and in the context of students' interests and developing expertise. Regardless of how the student chooses to design this element of the program, we strongly recommend that at least one course be taken outside of the School of Education. Note, too, that these credits may potentially overlap with Advanced Methods.		
<i>Electives</i>		12
<i>Total Credits</i>		44

<sup>1</sup> Each program area of emphasis requires a one-credit, specialty seminar course to be taken both fall and spring semesters of the first year. Additionally, first year PhD students participate in a "Professional Seminar" that meets five times each semester. This course is required to fulfill the credits earned in the fall and spring "Readings" (specialty seminar) course.

<sup>2</sup> (Studies in Equity, Bilingualism and Biliteracy) These courses are required if not already taken prior to entering PhD program.

<sup>3</sup> For students also pursuing the Teacher Learning, Research and Practice area of emphasis, all elective requirements will be met through the Teacher Learning, Research and Practice required seminars.

## Dissertation Credit

All doctoral students must take a minimum of 30 dissertation hours (EDUC 8994 Doctoral Dissertation).

Students are allowed to take up to 10 hours prior to passing their comprehensive exam. Once students pass their comprehensive exam, they must be registered for a minimum of 5 dissertation hours every semester. Students may be registered for 3 hours if they are "off-campus" status, meaning they are not on appointment and are not taking any coursework hours.

Students must be registered for a minimum of 5 dissertation hours during the semester they defend.

## Publishable Paper Requirement

In addition to coursework requirements, doctoral students should be immersed in ongoing research with faculty as early in their program as possible. All doctoral students in the School of Education (SOE) are required to complete, at a minimum, one "publishable paper" by May of their third year in the program.

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information on this requirement.

## Comprehensive Examination

Students must schedule comprehensive examinations or "comps" with the SOE by completing an application for candidacy form and emailing [soe.gradvise@colorado.edu](mailto:soe.gradvise@colorado.edu) with the names of their committee members and the date of their exam at the beginning of the semester they plan to take their comprehensive exams. Students should also request a room booking at this time. For remote examinations, the chair must set up the Zoom room for the event. The comps committee shall consist of the major advisor and two additional SOE or CU Boulder faculty members. The SOE Associate Dean of Students and the Associate Dean for Research serve as additional pro-forma (non-examining) committee members. The chair must have a regular Graduate Faculty appointment. Other committee members must have regular or special Graduate Faculty appointments. The student must be registered during the semester that the comprehensive examination is taken.

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information on this requirement.

## Proposal Committee

Once students have successfully passed their comprehensive exam, they should consult their faculty advisor to propose their dissertation proposal committee.

The dissertation/proposal chair must be a faculty member who is rostered in the doctoral candidate's program area who holds a regular Graduate Faculty Appointment (GFA). In the event that the doctoral candidate would like a dissertation chair from another program area, they may be invited to serve as a co-chair. Once the candidate and the dissertation advisor have agreed on the topic of the dissertation, they should proceed together to identify the full dissertation/proposal committee.

Consistent with the Graduate School's requirements, the dissertation/proposal committee must include at least five faculty:

- Three committee members (out of 5) must be CU Boulder faculty, and could all be SOE faculty members
- One committee member (out of 5) must be CU Boulder faculty, a.k.a. "outside member," who is *not* an SOE faculty member
  - The Grad School defines "outside member" as someone who has a regular GFA (i.e., a CU Boulder faculty member) but is not in the student's home department; in our School, the "home department" is the SOE.
- Up to two committee members (out of 5) could be external to CU Boulder (i.e., not faculty members at CU Boulder) as long as they have appropriate GFAs.

The Chair must have regular membership on the graduate faculty. The other members must have regular or special memberships on the graduate faculty. Note that if a student is pursuing a joint or dual-degree, at least two of the faculty must hold graduate appointments in the student's SOE program area. Special membership, which includes faculty from other institutions, requires the approvals of the Associate Dean of Students and the Graduate School. The entire list of prospective committee members must be submitted to the Graduate Program Coordinator at [soe.gradvise@colorado.edu](mailto:soe.gradvise@colorado.edu) and approved by the Associate Dean of Students at the start of the semester during which

the proposal will be defended, and then re-approved at the start of the semester during which the dissertation will be defended.

Please check the deadlines sheet for dates.

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information.

## Dissertation Proposal and Oral Defense

The dissertation proposal is a forward-looking document that outlines the doctoral candidate's proposed terrain of study through elaborating the following: a justification for the study; the conceptual framework and review of relevant literature; and the methodology. The written document should provide a clearly articulated and defensible stance, one which will provide the basis for further discussion among and planning by the proposal committee.

The dissertation proposal must describe the proposed study in sufficient detail so that members of the committee can judge the significance of the intended research and the adequacy of the planned study methods.

The oral defense of the dissertation proposal is a meeting where the candidate and five members of the committee agree to the purpose and methods of the proposed study. All members of the PhD examining committee ("dissertation/proposal committee") are expected to participate in the proposal oral defense and sign the formal proposal examination form. After the dissertation committee members have reviewed the proposal and signed the proposal signature page it must be sent electronically to [soe.gradvise@colorado.edu](mailto:soe.gradvise@colorado.edu).

If the proposed study involves human subjects, the doctoral candidate must obtain the approval of the University of Colorado Boulder Institutional Review Board (IRB). A copy of the IRB approval of the proposed research must accompany the signed proposal signature page when it is submitted to the Graduate Programs Coordinator.

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information.

## Dissertation Committee and Final Defense

Consistent with the Graduate's School's requirements for the final PhD examination, the dissertation/proposal committee must include at least five faculty:

- Three committee members (out of 5) must be CU Boulder faculty, and could all be SOE faculty members
- One committee member (out of 5) must be CU Boulder faculty, a.k.a. "outside member," who is *not* an SOE faculty member
  - The Grad School defines "outside member" as someone who has a regular GFA (i.e., a CU Boulder faculty member) but is not in the student's home department; in our School, the "home department" is the SOE.
- Up to two committee members (out of 5) could be external to CU Boulder (i.e., not faculty members at CU Boulder) as long as they have appropriate GFAs.

The Chair must have regular membership on the graduate faculty. The other members must have regular or special memberships on the graduate faculty. Note that if a student is pursuing a joint or dual-degree, at least two of the faculty must hold graduate appointments in the student's SOE program area. Special membership, which includes faculty from other institutions, requires the approvals of the Associate Dean of Students and the Graduate School. The entire list of prospective

committee members must be submitted to the Graduate Program Coordinator at [soe.gradvise@colorado.edu](mailto:soe.gradvise@colorado.edu) and be re-approved by the Associate Dean of Students at the start of the semester during which the dissertation will be defended.

All members of the final PhD examining committee ("dissertation committee") are expected to participate in the dissertation oral defense and sign the formal final examination form.

Doctoral candidates must deliver the final dissertation text to all committee members at least three weeks before the scheduled dissertation defense. This allows the committee two weeks to review and evaluate the dissertation. The Chair will request that committee members provide substantive feedback, preferably in writing, about the dissertation whether the document is defense-ready. If it is not ready, the candidate is given more time to work on it and the defense will be rescheduled.

Please check the deadlines sheet for dates, and the School of Education Student Handbook for more information.

After successful completion of dissertation defense, the completed dissertation must be uploaded to the Graduate School according to Graduate School procedures and deadlines. Please see the Graduate School website for deadlines details.

## Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 21 credit hours, and is accepted only after approval of the faculty advisor and the Graduate Programs Coordinator, in consultation with the Associate Dean of Students. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Students who have applicable credits to transfer to their PhD degree program must complete the transfer of credit paperwork.

## Time Limit

The doctoral degree must be completed within six years, including defending the dissertation and submitting it to the Graduate School. A one-year extension may be granted if formally requested in writing, recommended by the student's faculty advisor, and approved by the Associate Dean of Students and the Dean of the Graduate School. The extension request must show valid reasons as to why an extension is needed. If an extension is granted, all degree requirements must be completed within the extended time period.

## Establishing State Residency

PhD students who move to Colorado from another state need to petition for Colorado in-state tuition classification within one year so they are eligible for in-state tuition during second year of graduate study. Proof of residency includes a Colorado driver's license and vehicle registration, voter registration, filing Colorado income taxes and proof

of employment. Students should save a signed copy of their Graduate Student Assistantship offer letter to serve as proof of employment.

Detailed instructions on how to apply for Colorado residency (also called domicile) can be found on the Office of the Registrar's State Residency webpage (<http://www.colorado.edu/registrar/students/state-residency/>).

## Areas of Emphasis

### Educational Foundations, Policy and Practice

The Educational Foundations, Policy and Practice (EFPP) program area of emphasis focuses on policy analysis and the application of academic disciplines—anthropology, history, law, philosophy and sociology—to the analysis of education. Faculty in EFPP are devoted to the critical examination of the relations among education, society, culture and government, with special emphasis on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, nationality/citizenship and intersectional inequalities.

The EFPP program area of emphasis prepares students for university faculty positions and other careers requiring deep knowledge of research.

### Equity, Bilingualism and Biliteracy

The Equity, Bilingualism and Biliteracy (EBB) program area seeks to understand and critically respond to issues at the intersection of language, culture, ability and identity; educational and social policies; teacher preparation and teacher learning; and the social and political contexts of schooling. This includes critical explorations of, and interventions related to, the various aspects of schooling that affect multilingual learners and their communities, such as the development of bilingualism and biliteracy, restrictive language and literacy policies, high-stakes accountability, teacher education, disproportionate representation in special education, racio-linguistic ideologies, the implementation of various bilingual education models, immigration policies and transnationalism. EBB aims specifically to prepare critical, equity- and justice-oriented researchers, teacher educators, and school, district and community leaders. Our EBB graduates go on to work and lead in universities; state, federal and local education agencies; and in school districts and community-based organizations.

### Learning Sciences and Human Development

Faculty and students in the Learning Sciences & Human Development (LSHD) program area study how people learn in the context of organizing for more equitable and sustainable social futures. We consider how research can inform social change that strengthens learning and teaching in K-12 schools, access to higher education for minoritized students and the sustainability of community-based education organizations. Working in partnership with schools and communities is a key component of the approach we take to understanding sociopolitical and educational issues and their possible solutions.

The LSHD program prepares graduate students to research and inform collective efforts to improve conditions of learning, particularly for young people from minoritized and marginalized communities and the adults (including teachers, community organizers and community members) who work with them. The program emphasizes:

- How a strong foundation in psychological perspectives on education and human development can inform efforts to improve conditions for learning in school and out of school contexts.
- The need to go beyond psychological perspectives to interpret learning and development in social, cultural and historical contexts.

- Social justice as a central concern in studying and informing efforts to improve conditions of learning.
- Humanistic approaches to research that draw on interpretive, critical and social practice theories of human action.

Students work with faculty members who conduct research in a range of settings, including schools, preservice teacher education programs, after-school programs, museums, community organizations, workplaces and grassroots social movements. We encourage prospective applicants to review the web pages of individual faculty to learn about current projects.

### Literacy Studies

Faculty and graduate students in the Literacy Studies program study and design literacies in print and multimodal modes and in varied contexts. Literacies are framed as central to envisioning and enacting expansive and justice-centered theories and practices for teaching, learning, imagination and self-expression in K-12 schools, informal learning spaces and communities. Grounded in critical, social and interpretive conceptions of literacy, our program highlights the interrelations among theory, research, practice, policy and the potential for equitable social change.

Through multiple methodologies, research in the program occurs in partnership with children, youth, families and teachers in ways that honor and attend to experiences and identities at the intersections of race, language, gender, sexuality, ability and economic opportunity. Doctoral students collaborate with faculty on a range of research projects, engage in community outreach and work in teacher education programs emphasizing social justice and humanizing approaches to curriculum and instruction that center and address the interests and needs of all learners. The program prepares graduate students for careers in research and teaching in university settings, educational leadership in schools and community organizations and research and development in the private or nonprofit sector.

Students will have the opportunity to:

- Develop an expansive understanding of literacy and its implications for children, youth and their families and communities.
- Understand the theoretical perspectives informing literacy research currently and historically.
- Critically examine and apply research methodologies to questions of significance to them and to the field of literacy studies.
- Collaborate with faculty, peers, youth, communities and other educators to pursue research and pedagogical goals.
- Deepen their understanding of theories and practices that situate literacy as essential for dismantling systems of oppression and building toward anti-racist, anti-oppressive and affirming futures for children and youth, teachers, teacher educators, schools and communities.

### Research and Evaluation Methodology

The Research and Evaluation Methodology (REM) program is a place for intellectually curious and motivated students who want to learn about deep research methodology with an eye toward influencing education policy and practice. The most common methodological specializations are:

- Psychometrics and educational assessment
- Applied statistics

The program is a full-time commitment, and all admitted students are supported with five years of funding, including tuition remission and a

stipend for living expenses. Students participate in graduate research assistant-ships each semester and can expect to work with faculty on research projects as part of CADRE (<http://www.colorado.edu/cadre/cadre-projects-and-resources/>), the Center for Assessment, Design, Research and Evaluation.

### STEM Education

The STEM Education program offers students an opportunity to build their understanding and expertise in STEM Education. The faculty in the STEM program area have expertise in science, mathematics and computer science in pre-college learning environments with a special focus on diversity and justice. The program supports students in becoming educational researchers through participation in the doctoral cohort and STEM specific coursework. Students develop an understanding of how learning environments can be designed to foster students' understanding of and participation in mathematics, science and STEM. Our faculty work with collaborators throughout campus and in partnership with teachers, schools, districts and community members. As part of their studies, PhD students have opportunities to work on funded research projects, teach courses and contribute to ongoing work of multiple CU centers. The PhD prepares students for careers in research and teaching in university settings, educational and public leadership and services to schools, or research and development in the private or nonprofit sectors.

The STEM Education program is centered on and takes an interdisciplinary stance to:

- Learning beyond cognitive change towards participation in sociopolitical learning environments that involve issues of identity and power.
- Collaboration with teachers, public schools and community organizations as partners in broadening and re-envisioning STEM education to include more humanizing experiences and outcomes.
- Recognition that current values and traditions of STEM disciplines need to be de-settled to expand what counts as knowing and to be a knower.
- Exploration of the generation of knowledge among learning communities of all types and the negotiation of shared visions and integrity among their members.
- Building and studying programs that engage and sustain learners and their communities through engagement in meaningful and relevant STEM questions.
- Youth empowerment and agency by drawing on scientific knowledge and practices to explore meaningful questions in their communities.

### Teacher Learning, Research and Practice

The Teacher Learning, Research & Practice (TLRP) program offers a rigorous pathway for those interested in becoming teacher educators who conduct research and support the practice of teaching and teacher education. The TLRP program takes seriously this hybrid role of teacher educator as both researcher and practitioner, as well as the historical legacy of inequalities perpetuated by teacher education. This program prepares graduate students for careers as researchers and teachers in university settings with a particular emphasis on equity and justice, as educational leaders in schools and community organizations, and as researchers and developers in private and nonprofit sectors.

The TLRP program is grounded in a commitment to the practice, study and transformation of teacher education in ways that forward and honor humanizing thinking and action. Doctoral students enjoy opportunities to work in and with the school's multiple teacher education programs

and to collaborate with faculty, doctoral students and other stakeholders (e.g., school partners; community organizations) in the critical design and study of these programs. Conducting research with members of this community provides additional opportunities to deepen understandings from coursework and to pose and pursue questions using innovative research methodologies and methods.

## Teacher Leadership - Master of Arts (MA)

To help teachers make a difference in their districts and communities, our innovative online Teacher Leadership program offers graduate certificates that can lead to a master's degree. Our coursework threads reflective practices, content mastery and skill development throughout so that students can practice leadership skills as they engage with the curriculum. This program is offered *entirely online* and is organized around asynchronous (course work completed at separate times) as well as synchronous formats (meeting virtually at the same time).

## Teacher Leadership - Master of Arts (MA)

To earn the master's degree, students will complete three graduate certificates. Each certificate blends together on-demand, self-paced online courses with a synchronous capstone course held in the summer. These affordable certificates have been designed for educators looking to enhance their skills and capacities as classroom teachers and leaders and to make a difference in their schools and local communities. Students can choose to take classes and separately complete certificates without enrolling in the full MA program.

## Graduate Certificates in Teacher Leadership

### The Teacher and Social and Emotional Learning - Graduate Certificate

The certificate in Social and Emotional Learning provides practicing teachers with requisite background knowledge, understanding, and preparation so as to engage students in social and emotional learning. In order for teachers to enable students to become more aware and understanding of their own and others' emotions, teachers need to understand their own emotions as well.

The arena of social and emotional learning is a new, growing, and much needed public school curricular domain. During the last three decades, public schools have focused almost exclusively on cognitive academic outcomes. While some progress has been achieved, the consensus seems to be that a renewed emphasis on the whole student needs to be restored. At the same time teachers' professional work conditions have deteriorated. Teachers new to the field are leaving the profession at greater rates than in the past. Teacher "burnout" is a recognized and acknowledged public education phenomenon.

### Teaching Culturally and Linguistically Diverse Students - Graduate Certificate

The certificate in Culturally and Linguistically Diverse Education will offer teachers an introduction to the history and current policy and laws that relate to emerging bilingual learners in Colorado public schools. Teachers will learn about the process of language acquisition, develop skills and strategies to teach English and adapt their curriculum and instruction to the developing needs of emerging bilingual learners, and learn key

strategies for engaging diverse families in their school and classroom communities.

### Leading for Change in Science Assessment Practice - Graduate Certificate

In this certificate, teachers learn how to adapt, develop and pilot assessments that elicit students' integrated understanding of disciplinary core ideas and crosscutting concepts and that connect to students' interests and identities. This certificate supports the needs of partnerships in Colorado and beyond in to develop assessment systems aligned to new science standards.

### Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

The four-course certificate explores the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools. The certificate will prepare educators to lead efforts to promote compassion and dignity in schools. The certificate provides educators with supports and resources for caring for themselves and for cultivating and sustaining compassion for students, families, their school community and colleagues. The courses prioritize ways in which educators can see and feel their own daily teaching practices, struggles, constraints and joys reflected in the curriculum as well as the ways in which educators might become more compassionate teacher leaders. The compassion practices and skills embedded in the courses support district-level equity goals of creating safe and inclusive schools that challenge racism and promote justice. The certificate draws upon rigorous research, contemplative wisdom and deeply embedded lived experience of educators. The certificate was co-designed by the Crown Institute and the Compassion Institute working in collaboration with teachers, counselors and administrators.

### Inclusive and Special Education - Graduate Certificate

This certificate prepares educators to be leaders in Rethinking Inclusive and Special Education in their schools and districts by humanizing students with dis/abilities and the systems designed to support them, by gaining valuable knowledge about legal, historical and social precedents in special education, and by expanding their instructional toolkit. Educators will examine federal, state, and local policies and they will also learn practical strategies they can use to plan instruction and to support students in general education and intervention settings. Each course will draw upon culturally and linguistically appropriate practices that attend to the needs and strengths of all students, with an emphasis on creating equitable learning environments. Course content and assignments consider dis/ability to be one of multiple identities that makes each of us human, rather than a defect or problem in need of a cure. We use the term dis/ability, choosing purposefully to place a slash between dis and ability.

### Designing for Learning: Inquiry-Based Pedagogy for K-12 Educators - Graduate Certificate

Dr. Gloria Ladson-Billings argues that instead of organizing curriculum and instruction around the question, "What do you want to be when you grow up?," we can go further in supporting young people in meaningful, culturally relevant and sustaining ways if we instead ask: "What problems do you want to solve?" This certificate focuses on how to follow Ladson-Billings' suggestion and re-organize our pedagogies around the questions and problems that youth and their communities want to pursue. Rather than approaching teaching as a process of transmitting information and skills to youth, this certificate helps teachers position youth as people whose questions, problems, and problem-solutions are inquiry-worthy.

The certificate offers coursework that introduces teachers to research and theorizing about how people learn through inquiry, how communities engage in knowledge-building and inquiry within and across subject areas, and how teachers can organize curriculum and pedagogy to create inquiry-based learning experiences with young people in schools. The certificate culminates in a capstone experience positioning teachers as pedagogical leaders who can organize and sustain professional learning among peers and colleagues through practitioner inquiry into how young people learn when given the opportunity to pursue questions and problems that they want to solve.

### Teachers Leading Change - Graduate Certificate

This certificate focuses on understanding and developing leadership skills that enable teachers to engage effectively in shared leadership and proactively expand their sphere of influence in meaningful ways. A core tenet of the courses is that teachers start to or continue to see themselves as leaders, to effectively take on a leadership stance, and to do so in a way that feels authentic and builds on each teacher's own histories and priorities for growth. The courses provide students with ideas and tools for leading change in a variety of educational spaces, including within district workshops and community networks.

## Program Requirements

### Teacher Leadership - Master of Arts (MA)

The MA in Teacher Leadership degree requires completion of any three teacher leadership certificates (a minimum of 30 credit hours of approved, graduate-level coursework) and a minimum cumulative grade-point average (GPA) of 3.00.

Once a student has completed three of the 10-credit online certificates that prepare them for leadership in their teaching career, they will be awarded the MA in Teacher Leadership. A comprehensive final examination is not required.

People who enroll in the MA in Teacher Leadership must currently be a practicing educator with an established education site. This program does not offer endorsements or licensure.

### Graduate Certificates in Teacher Leadership Social and Emotional Learning - Graduate Certificate

Code	Title	Credit Hours
EDUA 5004	The Teacher in SEL - Powerful Personal and Professional Emotions (asynchronous)	2
EDUA 5005	SEL for Students: A Path to Social and Emotional Well-Being (asynchronous)	2
EDUA 5006	Expanding SEL (asynchronous)	2
EDUA 5007	Social and Emotional Learning Capstone (synchronous)	4

**Total Credit Hours** 10

### Teaching Culturally/Linguistically Diverse Students - Graduate Certificate

Code	Title	Credit Hours
EDUA 5000	Introduction to History, Policy and Advocacy for CLD Educators (asynchronous)	2

EDUA 5001	Intro to Designing Culturally Sustaining Pedagogy (asynchronous)	2
EDUA 5002	Introduction to Teaching Culturally and Linguistically Diverse Learners (asynchronous)	2
EDUA 5003	Teaching Culturally/Linguistically Diverse Learners: Capstone (synchronous)	4
<b>Total Credit Hours</b>		<b>10</b>

### Leading for Change in Science Assessment Practice - Graduate Certificate

Code	Title	Credit Hours
EDUA 5015	Envisioning Equitable Teaching and Learning in Science	2
EDUA 5016	Designing Meaningful and Equitable Science Assessments	2
EDUA 5017	Leadership in Creating Equitable Assessment Systems in Science	2
EDUA 5018	Leading in Schools and Systems for Transformation in Science Assessment: Capstone	4
<b>Total Credit Hours</b>		<b>10</b>

### Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

Code	Title	Credit Hours
EDUA 5019	Compassion and Dignity for Educators: Awareness and Intention	2
EDUA 5020	Self-Compassion and Dignity	2
EDUA 5021	Compassion In Fullness	2
EDUA 5022	Compassion In Action: Capstone	4
<b>Total Credit Hours</b>		<b>10</b>

### Inclusive and Special Education - Graduate Certificate

Code	Title	Credit Hours
EDUA 5027	Introduction to Inclusive and Special Education	2
EDUA 5028	Creating and Fostering Inclusive Learning Environments	2
EDUA 5029	Strategies for Inclusive Teaching	2
EDUA 5030	Capstone: Leadership in Inclusive and Special Education	4
<b>Total Credit Hours</b>		<b>10</b>

In order to earn a certificate, students must receive a minimum grade of a C or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.

### Designing for Learning: Inquiry-Based Pedagogy for K-12 Educators - Graduate Certificate

Code	Title	Credit Hours
EDUA 5023	Inquiry-based Pedagogy: How Questions, Dilemmas, and Problems Matter for Learning	2

EDUA 5024	Inquiry-Based Pedagogies: Inquiry Within and Across Different Disciplines & Communities	2
EDUA 5025	Inquiry-Based Pedagogies: Designing & Facilitating Inquiry-Based Learning Experiences	2
EDUA 5026	Inquiry-Based Pedagogies Capstone: Leading for Pedagogical Growth through Practitioner Inquiry	4
<b>Total Credit Hours</b>		<b>10</b>

In order to earn a certificate, students must receive a minimum grade of a C or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.

### Teachers Leading Change - Graduate Certificate

Code	Title	Credit Hours
EDUA 5031	Teacher Leadership and Learning: Professional Learning Communities in Schools and Districts	2
EDUA 5032	Instructional Coaching in Schools and Districts	2
EDUA 5033	Teacher Led-Networks: Teacher Leaders within Networks of Advocacy	2
EDUA 5034	Teachers Leading Change in Action Capstone	4
<b>Total Credit Hours</b>		<b>10</b>

In order to earn a certificate, students must receive a minimum grade of a C or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.

## Plan(s) of Study

Students must complete three of the 10-credit online certificates to be awarded the MA in Teacher Leadership. Each graduate certificate in teacher leadership requires 10 completed credits, as follows:

- Three two-credit asynchronous classes, taken in sequence. The two-credit asynchronous course sessions are self-paced and must be completed within a six-month period. These classes must be completed two weeks before beginning a synchronous capstone in the summer.
- One four-credit synchronous class, taken in the summer. The last course for all certificates is a synchronous capstone course that brings together all the content and curriculum. This course runs as a 3-week intensive after academic school years end in May/June.

## Learning Outcomes

### Teacher Leadership - Master of Arts (MA)

Knowledge outcomes:

- Teachers will examine and understand the central knowledge claims within each certificate domain.
- Teachers will examine and understand the distinct instructional strategies within each certificate domain.
- Teachers will examine and understand the particular K-12 curricular content for their students' development.

- Teachers will utilize this certificate domain knowledge in the creation of a classroom, school or community implementation plan.

Skill outcomes:

- Teachers will become acquainted with and able to convey the relevant domain's content knowledge to students, other teachers and community members.
- Teachers will become acquainted with and able to convey the distinct instructional strategies within each certificate domain to students, other teachers and community members.
- Teachers will be able to convey the relevant K-12 curricular content to their students.
- Teachers will be able to engage other teachers and community members so as to further their understanding of and see the value of their chosen certificate domain.

### **Graduate Certificates in Teacher Leadership Social and Emotional Learning - Graduate Certificate**

Knowledge outcomes:

This certificate will prepare teacher leaders to:

- Examine and reflect on the role of emotions in teaching and learning.
- Know the important distinct features and curricular approaches utilized in K-12 SEL curricula; consider alternative approaches to student well-being.
- Choose and justify the appropriate K-12 or teacher SEL programming for their setting.

Skill outcomes:

This certificate will prepare teacher leaders to:

- Know the ways in which their emotions affect their classroom interactions and educational contexts.
- Implement an existing or develop an alternative SEL curriculum for their setting.
- Identify or develop a teacher SEL approach for their setting.

### **Culturally and Linguistically Diverse Education - Graduate Certificate**

This certificate will prepare teacher leaders to:

- Recognize and understand the cultural and linguistic differences within their classroom, school and communities.
- Analyze their own classroom as a site for second language acquisition and make appropriate adjustments.
- Use knowledge of factors affecting second language acquisition to modify instruction for multilingual students.
- Capably address the linguistic and cultural differences in classrooms in ways that build on students' linguistic and cultural diversity.
- Can assess content learning of students who are at different levels of English proficiency.

### **Leading for Change in Science Assessment Practice - Graduate Certificate**

The certificate will prepare teacher leaders to:

- Explain the key assumptions of the vision for equitable teaching and learning in *A Framework for K-12 Science Education* to teachers and other leaders.

- Identify supports needed to help teachers make shifts to teaching and assessment to address new science standards.
- Design tasks that invite students to explain phenomena and solve problems that connect to their interests, experiences and identities

### **Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate**

The certificate will prepare teacher leaders to:

- Consider the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools.
- Explore supports and resources for caring for themselves.
- Identify and practice skills to cultivate and sustain compassion for students, families, their school community and colleagues.
- Apply compassion tools and resources to serve as compassionate leaders in school and community settings and to address the many challenges they face in today's increasingly precarious climate.

### **Teachers Leading Change - Graduate Certificate**

The certificate will prepare teacher leaders to:

- Describe how to cultivate authentic professional learning communities and a school climate that builds upon the strengths and expertise of teachers as leaders.
- Identify and practice facilitation moves for purposeful coaching activities that foster teacher learning.
- Explore and implement methods to support change in teacher-led networks.
- Synthesize concepts, practices, and resources to develop a plan of action that addresses a pressing need in public education.

### **Inclusive and Special Education**

The certificate will prepare teacher leaders to:

- Understand the historical, political, and social influences on inclusive and special education.
- Identify the features of creative, flexible and supportive inclusive learning environments for students with and without dis/abilities.
- Use instructional strategies to include students with dis/abilities and those with a range of learning strengths and needs in curriculum and school structures.
- Synthesize knowledge on inclusive and special education to create and implement an advocacy project.

### **Designing for Learning: Inquiry-Based Pedagogy for K-12 Educators - Graduate Certificate**

The certificate will prepare teacher leaders to:

- Apply current research exploring how people learn in order to demonstrate the importance of inquiry-based learning as a valid pedagogical strategy.
- Consider how different cultural communities—including subject areas and disciplines—engage in inquiries to build understanding and how communities can incorporate young learners into these inquiries.
- Investigate how different K-12 instructional designs orchestrate curricular and pedagogical tools to organize inquiry-based learning experiences.
- Develop and, if feasible, carry out an instructional design that organizes an inquiry-based learning experience within or across

subject areas using a combination of curricular and pedagogical tools.

- Develop and, if feasible, conduct a practitioner inquiry using tools of teacher research to examine and analyze how inquiry-based pedagogies could transform your classroom, your learning community and yourself as a teacher.
- Prepare possible plans for engaging in teacher leadership to build capacity for inquiry-based pedagogies and practitioner inquiry in your school/system.

## Teacher Licensure Program

The MA+ Teacher Licensure program leads to a Colorado initial teaching license in secondary (grades 7–12) Mathematics, Science, English Language Arts, or Social Studies, plus a master's degree in Curriculum & Instruction. This offers an efficient and experiential route to earning a master's degree with teaching licensure.

This program is for candidates who have earned a bachelor's degree from an accredited institution of higher education and want to elaborate upon and deepen the close connections between fieldwork and coursework to become a teacher. Graduate students follow a planned sequence of core courses that meet state content preparation standards, complete a master's degree, and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and 7–12 school placements.

Students who successfully complete all School of Education requirements will be recommended for a Colorado initial teaching license.

The teacher education programs at the University of Colorado Boulder do not prepare candidates for teacher licensure exams in states other than Colorado. For students planning to seek professional licensure or certification in a state other than Colorado, it is strongly recommended that you contact the appropriate licensing entity in the state in which you are, or plan to be, located to seek information and guidance regarding licensure or certification requirements and how the Colorado license may transfer in advance of program completion. If you will have to take an additional course or pass a different licensure exam to transfer your license, your contact person at the correct state agency will help you plan for that and avoid surprises.

### Program Mission & Commitments

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators who desire to invest and succeed in school. This involves noticing youth; building relationships with them; valuing their perspectives; and attending to their thinking, curiosities and capabilities.
- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion, fuel both learning and teaching.
- Teachers must design equitable learning environments in which all youth are engaged in robust and consequential learning.

- Teachers' instruction and student learning are always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matter and must be analyzed. Our language and action construct or constrain opportunities for youth to build meaningful, positive and sustained relationships to learning and one another.

### Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below:

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach. The secondary teacher has knowledge of literacy and mathematics and is an expert in his, her, or their content endorsement area(s).
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers demonstrate professionalism through ethical conduct, reflection and leadership.

### Admission Requirements

To be eligible for admission to the MA+ program, applicants must meet all of the requirements below. Please note, satisfying the minimum criteria does not guarantee acceptance.

#### Secondary Mathematics and Secondary Science

To be considered for admission, applicants must meet the following:

- Hold a bachelor's degree from an accredited institution of higher education.
- Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area coursework. Please note, GRE Scores are not required for the MA+ program.
- Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE, or Praxis CORE exam will also satisfy the requirement.
- Complete content coursework. Applicants must complete all content coursework for their teaching area *prior* to the beginning of the fall semester in the program. Any candidate who has not completed their content coursework by that time will be dismissed from the program or may be given the option to defer admission one year.
- Complete the appropriate, state-approved licensure exam (currently the Praxis Subject Assessments exams) for their content area prior to the beginning of the fall semester in the program. Any candidate that has not passed the licensure exam by the time their program this time will be dismissed from the program or may be given the option to defer admission one year.
  - Praxis Mathematics (test code 5165)
  - Praxis General Science (test code 5436)

## Secondary English Language Arts and Secondary Social Studies

To be considered for admission, applicants must meet the following:

- Hold a bachelor's degree from an accredited institution of higher education. English Language Arts applicants must have a degree in English Literature, Ethnic Studies, Spanish Literature, or Humanities with a literature emphasis.
- Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area coursework. Please note, GRE Scores are not required for the MA+ program.
- Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.
- Complete content coursework. Applicants must complete all content coursework for their teaching area *prior* to the beginning of the spring semester in the program. Any candidate who has not completed their content coursework by that time will be dismissed from the program or may be given the option to defer admission one year.
- Complete the appropriate, state-approved licensure exam (currently the Praxis Subject Assessments exams) for their content area prior to the beginning of the spring semester in the program. Any candidate that has not passed the licensure exam by the time their program this time will be dismissed from the program or may be given the option to defer admission one year.
  - Praxis English Language Arts: Content Knowledge (test code 5038)
  - Praxis Social Studies: Content Knowledge (test code 5081)

## MA+ Secondary English Language Arts (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in their content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

### Content Coursework Requirement

Code	Title	Credit Hours
<b>Courses and Minimum Required Credit Hours</b>		
	Mathematics: College-level mathematics.	3
	Natural Science	3
	Social Science	3
	Advanced Writing: Critical or creative writing beyond the lower-division/introductory composition level.	3
	Visual or Digital Communication: Includes theatre, film, or other digital media courses.	3
	Literature: Must include a component of American literature, British literature, World literature (non-American/non-British literature), and Multicultural literature.	12
	English and English Language Arts-related courses	30
	Acceptable course work may be in communication/speech, composition, drama/ theatre, humanities, journalism, and/or literature. (May include courses from the content requirements above.)	

## Education Course Requirements

Code	Title	Credit Hours
<b>First Semester (Summer)</b>		
EDUC 5001	Framing Equity and Justice in the Humanities Classroom	3
EDUC 5112	Educational Psychology and Adolescent Development	3
<b>Second Semester (Fall)</b>		
EDUC 5005	Advanced Social Foundations of Education	3
EDUC 5295	Narrative and Story in the Humanities	3
EDUC 5325	Queering Literacy in Secondary Classrooms	3
EDUC 5345	Secondary English Methods I	3
EDUC 5485	Differentiation in the Classroom	3
<b>Third Semester (Spring)</b>		
EDUC 5365	Secondary English Methods II	3
EDUC 5490	Blurring Disciplinary Lines in the Humanities	3
EDUC 4901	Student Teaching	3
EDUC 5390	Seminar: Teaching for Equity and Justice	3
<b>Total Credit Hours</b>		<b>33</b>

### Student Teaching

Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring semesters of the program. Student teaching coursework does not count towards the Master's degree.

### Required Tests and Assessments

#### Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

#### Licensure Exam: Prior to Spring Semester of Program

Pass the state-approved licensure exam, PRAXIS English Language Arts: Content Knowledge (test code 5038).

## MA+ Secondary Mathematics (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

### Content Coursework Requirements

Code	Title	Credit Hours
<b>Courses and Minimum Required Credit Hours</b>		
	Literature & Arts	3
	Natural Science	3
	Social Science	3
	Written Communication: College-level composition or writing	3
	Calculus 1	4-5

Calculus 2	4-5
Linear Algebra	3
Functions & Modeling/Analysis/Abstract Mathematics: One course in functions and modeling, analysis or topology.	3
Geometry: One course in modern geometry.	3
Probability & Statistics: One course in probability theory and mathematical statistics.	3
Math or applied math coursework. Eighteen of the required 24 credit hours above must be completed at the sophomore level or higher. (May include requirements above.)	24
Recent mathematics coursework in the past 5 years. (May include EDUC 5317.)	6

## Education Course Requirements

Code	Title	Credit Hours
<b>First Semester (Summer)</b>		
EDUC 5002	Framing Equity and Justice in the STEM Classroom	3
EDUC 5112	Educational Psychology and Adolescent Development	3
EDUC 5235	Language and Literacy Across the Curriculum	3
<b>Second Semester (Fall)</b>		
EDUC 5005	Advanced Social Foundations of Education	3
EDUC 5060	Classroom Interactions	3
EDUC 5317	Perspectives on Mathematics	3
EDUC 5485	Differentiation in the Classroom	3
<b>Third Semester (Spring)</b>		
EDUC 5375	Problem-Based Math Instruction	4
Teaching & Learning Mathematics. Course options (examples):		3
EDUC 5815	Teaching K-12 Mathematics: Number Sense	
EDUC 5821	Teaching K-12 Mathematics: Algebraic Thinking	
EDUC 5835	Teaching K-12 Mathematics: Geometry & Measurement	
EDUC 5850	Teaching K-12 Mathematics: Probability & Statistics	
EDUC 5706	Assessment in Mathematics and Science Education	
EDUC 4901	Student Teaching	
<b>Total Credit Hours</b>		<b>28</b>

## Student Teaching

Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring Semesters of the program. Student teaching coursework does not count towards the Master's degree.

## Required Tests and Assessments

### Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

### Licensure Exam: Prior to Fall Semester

Pass the state-approved licensure exam, PRAXIS Mathematics (test code 5165).

### Teacher Performance Assessment

Pass a performance-based, subject-specific assessment designed by program faculty.

## MA+ Secondary Science (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in their content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

## Content Coursework Requirements

Code	Title	Credit Hours
<b>Courses and Minimum Required Credit Hours</b>		
	Literature & Arts	3
	Social Science	3
	Written Communication: College-level composition or writing.	3
	Calculus I	4-5
	Biology	3
	Chemistry	3
	Earth/space science	3
	Physics	3
Complete three of the following four content-area lab courses:		
	Biology lab	
	Earth/space science lab	
	Chemistry lab	
	Physics lab	
	Recent science coursework in the past 5 years	6
	Students must complete 24 credit hours in one of the sections below:	24
	Biology (may include courses from biology area above). Coursework must include the study of general biology, matter & energy in living systems, ecology, evolution, genetics, molecular biology, human anatomy, environmental biology and biotechnology.	
	Chemistry (may include courses from chemistry area above). Coursework must include the study of analytical, inorganic, organic and physical chemistry.	
	Earth/space science (may include courses from Earth/Space Science area above). Coursework must include the study of environmental science, astronomy, historical & physical geology, meteorology, oceanography, and geomorphology & earth systems.	
	Environmental science. Coursework must include the study of ecology and astronomy, and 17 credit hours in biology.	
	Physics (may include courses from Physics area above). Coursework must include the study of mathematics through differential equations, astronomy, atomic & nuclear, classical mechanics, electricity & magnetism, heat & thermodynamics, optics & sound, quantum mechanics, radiation & radioactivity, relativity and waves.

## Required Tests and Assessments

### Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

### Licensure Exam: Prior to Spring Semester in Program

Pass the state-approved licensure exam, PRAXIS Social Studies: Content Knowledge (test code 5081).

## Engineering & Applied Science

The College of Engineering and Applied Science has a tradition of excellence in engineering education dating back to 1893, and we continually update and improve our programs to reflect the highest standards in teaching and learning, discovery, innovation, community and culture. We are the top-ranked engineering school in the Rocky Mountain region with 17 baccalaureate programs and 16 graduate programs offering more than 40 degrees. Via our partnership program with Colorado Mesa University, we also offer students on the Western Slope the opportunity to earn degrees in mechanical engineering and civil engineering.

## Mission & Vision

The College of Engineering & Applied Science's mission is to generate new knowledge in engineering and related fields, and to equip students from diverse backgrounds to become leaders and citizens responsible for the betterment of individuals and society. Our vision is to be a recognized world leader for excellence and innovation in engineering research and education, with an emphasis on inclusive excellence, active learning and global society.

## Degree Programs

Graduate degrees are offered in the following areas:

- Aerospace engineering sciences (p. 1506)
- Architectural engineering (p. 1527)
- Biomedical engineering (p. 1536)
- Biological engineering (p. 1545)
- Chemical engineering (p. 1540)
- Civil engineering (p. 1546)
- Computer science (p. 1563)
- Creative technology and design (p. 1592)
- Electrical engineering (p. 1599)
- Engineering education (p. 1624)
- Engineering management (p. 1630)
- Environmental engineering (p. 1640)
- Global engineering (p. 1563)
- Materials science and engineering (p. 1646)
- Mechanical engineering (p. 1650)
- Network engineering (p. 1683)
- Robotics (p. 1623)
- Water engineering and management (p. 1683)

## Policies & Requirements

### Academic Excellence

Graduate study in engineering at the University of Colorado Boulder offers a challenging, collaborative environment with exceptional possibilities. Graduate education at the College of Engineering & Applied Science involves the creation and dissemination of knowledge in many forms.

### Academic Standards

#### Academic Policies

College of Engineering and Applied Science graduate students must abide by policies within their programs of study, college and the Graduate School policies. Students should refer to these websites often; policies, procedures and forms may be updated throughout the academic year.

#### Academic Integrity

Graduate students in the College of Engineering and Applied Science may be required to pass an academic integrity quiz.

See also the campuswide Academic Integrity (p. 1069) and Student Conduct (p. 1086) sections and the Honor Code (<http://honorcode.colorado.edu/>) website.

#### Academic Standing

Refer to the Graduate School (p. 1068) for details.

## Credit and Enrollment

### Attendance and Full-Time Enrollment

While the majority of our students attend classes on the Boulder campus, many of the college's graduate degrees and certificates are available online through Boulder Connect (<http://www.colorado.edu/connect/>). Attendance and enrollment requirements are governed by Graduate School policies (<http://www.colorado.edu/graduateschool/policies/>). However, the college's individual graduate programs may have requirements that are more stringent than the Graduate School.

### Credit Policies

#### Final Grade Appeal

Visit the college's Grade Appeal Policy (<http://www.colorado.edu/engineering-facultystaff/college-rules-policies/grade-appeal-policy/>) webpage.

#### Transfer Credit

Transfer credit requirements are governed by the Graduate School policies (<http://www.colorado.edu/graduateschool/policies/>). However, the college's individual graduate programs must approve the transfer credits and may have transfer credit requirements that are more stringent than the Graduate School. Refer to the individual graduate programs for specific transfer credit requirements.

#### Petition Policy

A student desiring a waiver of departmental and/or Graduate School policies must request and secure approval for this waiver through a petition procedure. Petitions are first presented to the student's individual graduate program for review, followed by review at the Graduate School.

## Requirements

### Prerequisites

To enroll for an advanced degree in any department or program in the College of Engineering and Applied Science, candidates either must have previously earned a bachelor's degree in a curriculum that includes the necessary prerequisites for that branch of engineering or must qualify for the concurrent BS and MS program. If the candidate's preliminary education was taken at another institution, the degree of qualification for advanced work is determined by the department concerned and by the dean of the Graduate School.

Graduates of engineering technology programs should note that the equivalent of a BS degree in an appropriate engineering field is required for entry into the Graduate School. Because the goals and orientation of engineering programs differ from those of technology programs, technology graduates should expect to make up deficiencies before being admitted to graduate study in engineering. Students may not be admitted to the Graduate School while making up deficiencies, but can enroll as nondegree students.

### Coursework

Graduate work in each department of the College of Engineering and Applied Science falls into two classes:

1. courses that are offered for candidates who have chosen to major in the particular department, and
2. courses that are offered for candidates who have chosen their major in some other department, but who are pursuing a certificate or other complementary coursework.

### Availability of Courses

All courses are not necessarily offered every year. They may only be available if there is sufficient demand.

### Qualifying or Preliminary Examinations

Graduate students who plan to become candidates for the MS or PhD degree may be required to take a qualifying or preliminary examination. Individual departments should be consulted concerning the timing or requirement of this examination.

### Teaching and Research Assistantships

The College of Engineering and Applied Science requires that all graduate teaching assistants and research assistants be proficient and intelligible in spoken English. In order to ensure that this is the case, all prospective teaching assistants and research assistants whose native language is not English, or others for whom the department graduate program coordinator believes that spoken language intelligibility is a concern, regardless of native language, will be tested for spoken language intelligibility prior to or at the beginning of the semester in which the teaching or research assistantship is awarded. In the event that a prospective teaching or research assistant does not demonstrate a satisfactory level of proficiency, as determined by campus assessment, that student will be required to participate in training designed to improve intelligibility.

## Programs of Study

## Aerospace Engineering Sciences

The aerospace engineering program is organized around focus areas in astrodynamics and satellite navigation systems, bioastronautics, remote sensing, Earth and space sciences and aerospace engineering systems, including fluid dynamics and propulsion, automatic control, structures and mechanics of materials.

The Ann and HJ Smead Department of Aerospace Engineering Sciences (<http://www.colorado.edu/aerospace/>) at the University of Colorado Boulder is one of the top aerospace engineering departments in the nation. Aerospace engineers work on Earth and in space not only to extend frontiers, but also to better understand and preserve our terrestrial environment. Few fields offer as many exciting and diverse career opportunities: becoming an astronaut (15 graduates to date have become astronauts), designing the next generation of aircraft and spacecraft, monitoring our global habitat via remote sensing from space, *in situ* sensing with unmanned vehicles and helping to develop environmentally clean energy and transportation systems.

Aerospace graduate students often formulate degree plans on the basis of their interests and needs. Portions of the program are designed to promote our students' engineering and professional development.

Graduate students are admitted into a specific focus area that provides research advising and financial support, and sets specialized admission and program requirements with recommendations for coursework within and outside the department.

The five focus areas are:

- Astrodynamics and Satellite Navigation Systems
- Autonomous Systems
- Bioastronautics
- Fluids, Structures and Materials
- Remote Sensing, Earth and Space Sciences

Each focus area has defined the required characteristics of its successful graduates at the MS and PhD level, and defined the required and elective courses that support its educational program.

Aerospace-related research centers in the College include the Colorado Center for Astrodynamics Research, Aerospace Mechanics Research Center, the Research and Engineering Center for Unmanned Vehicles, and BioServe Space Technologies. Other research centers and institutes within the University that are involved in aerospace-related research activities are the Center for Astrophysics and Space Astronomy (CASA), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Earth Science & Observation Center (ESOC), JILA, and the Laboratory for Atmospheric and Space Physics (LASP).

**Course code for this program is ASEN.**

## Master's Degrees

- Aerospace Engineering Sciences - Master of Science (MS) (p. 1518)
- Aerospace Engineering Sciences - Professional Master of Science (MSAES) (p. 1522)

## Doctoral Degree

- Aerospace Engineering Sciences - Doctor of Philosophy (PhD) (p. 1523)

## Certificates

- Astrodynamics and Satellite Navigation Systems - Graduate Certificate (p. 1524)
- Engineering Management in the Aerospace Industry - Graduate Certificate (p. 1639)
- Hypersonics - Graduate Certificate (p. 1525)
- Radio Frequency Engineering for Aerospace - Graduate Certificate (p. 1526)
- Remote Sensing - Graduate Certificate (p. 1526)
- Satellite Systems Design - Graduate Certificate (p. 1680)
- Space Weather and Applications - Graduate Certificate (p. 1682)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Nisar R. ([https://experts.colorado.edu/display/fisid\\_153237/](https://experts.colorado.edu/display/fisid_153237/))

Glusman, F. Jeff ([https://experts.colorado.edu/display/fisid\\_172040/](https://experts.colorado.edu/display/fisid_172040/))  
Teaching Assistant Professor; PhD, University of Colorado Boulder

Gremban, Keith ([https://experts.colorado.edu/display/fisid\\_166519/](https://experts.colorado.edu/display/fisid_166519/))  
Research Professor; PhD, Carnegie Mellon University

Hamlington, Peter Edward ([https://experts.colorado.edu/display/fisid\\_149800/](https://experts.colorado.edu/display/fisid_149800/))  
Associate Professor; PhD, University of Michigan Ann Arbor

Hayman, Allison P. ([https://experts.colorado.edu/display/fisid\\_156275/](https://experts.colorado.edu/display/fisid_156275/))  
Assistant Professor

Heckman, Christoffer ([https://experts.colorado.edu/display/fisid\\_155294/](https://experts.colorado.edu/display/fisid_155294/))  
Assistant Professor; PhD, Cornell University

Hodgkinson, Robert F. ([https://experts.colorado.edu/display/fisid\\_153274/](https://experts.colorado.edu/display/fisid_153274/))  
Teaching Assistant Professor; MS, University of Colorado Boulder

Holzinger, Marcus J. ([https://experts.colorado.edu/display/fisid\\_164054/](https://experts.colorado.edu/display/fisid_164054/))  
Associate Professor; PhD, University of Colorado Boulder

Humbert, J. Sean ([https://experts.colorado.edu/display/fisid\\_156202/](https://experts.colorado.edu/display/fisid_156202/))  
Professor; PhD, California Institute of Technology

Hussein, Mahmoud I. ([https://experts.colorado.edu/display/fisid\\_144300/](https://experts.colorado.edu/display/fisid_144300/))  
Professor; PhD, University of Michigan Ann Arbor

Jansen, Kenneth E. ([https://experts.colorado.edu/display/fisid\\_147360/](https://experts.colorado.edu/display/fisid_147360/))  
Professor; PhD, Stanford University

Kantha, Lakshmi H. ([https://experts.colorado.edu/display/fisid\\_100231/](https://experts.colorado.edu/display/fisid_100231/))  
Professor Emeritus; PhD, Massachusetts Institute of Technology

Klaus, David M. ([https://experts.colorado.edu/display/fisid\\_107103/](https://experts.colorado.edu/display/fisid_107103/))  
Professor; PhD, University of Colorado Boulder

Knipp, Delores Jane ([https://experts.colorado.edu/display/fisid\\_147655/](https://experts.colorado.edu/display/fisid_147655/))  
Research Professor; PhD, University of California, Los Angeles

Knudsen, Erik ([https://experts.colorado.edu/display/fisid\\_172046/](https://experts.colorado.edu/display/fisid_172046/))  
Teaching Assistant Professor, Associate Chair; PhD, University of Florida

Koehler, Chris J. ([https://experts.colorado.edu/display/fisid\\_102226/](https://experts.colorado.edu/display/fisid_102226/))  
Teaching Associate Professor; MS, University of Colorado Boulder

Koster, Jean N.  
Professor Emeritus; PhD, Karlsruhe Institut für Technologie (Germany)

Kubitschek, Daniel ([https://experts.colorado.edu/display/fisid\\_144283/](https://experts.colorado.edu/display/fisid_144283/))  
Lecturer; PhD, University of Colorado Boulder

Lahijanian, Morteza Mehdi ([https://experts.colorado.edu/display/fisid\\_164179/](https://experts.colorado.edu/display/fisid_164179/))  
Assistant Professor; PhD, Boston University

Larson, Kristine M.  
Professor Emerita; PhD, Scripps Institution of Oceanography

Lawrence, Dale A. ([https://experts.colorado.edu/display/fisid\\_104057/](https://experts.colorado.edu/display/fisid_104057/))  
Professor; PhD, Cornell University

Le Moine, Alexandra  
Teaching Assistant Professor; MS, University of Wisconsin

Leben, Robert R.  
Research Professor Emeritus; PhD, University of Colorado Boulder

Li, Xinlin ([https://experts.colorado.edu/display/fisid\\_100016/](https://experts.colorado.edu/display/fisid_100016/))  
Professor; PhD, Dartmouth College

Liu, Hanli  
Associate Professor Adjunct; PhD, University of Michigan

Lopez Jimenez, Francisco ([https://experts.colorado.edu/display/fisid\\_157867/](https://experts.colorado.edu/display/fisid_157867/))  
Assistant Professor; PhD, California Institute of Technology

Macdonald, Robyn ([https://experts.colorado.edu/display/fisid\\_165823/](https://experts.colorado.edu/display/fisid_165823/))  
Assistant Professor; PhD, University of Illinois at Urbana-Champaign

Mah, John K. ([https://experts.colorado.edu/display/fisid\\_164214/](https://experts.colorado.edu/display/fisid_164214/))  
Teaching Assistant Professor; MS, Stanford University

Marshall, David B. ([https://experts.colorado.edu/display/fisid\\_158629/](https://experts.colorado.edu/display/fisid_158629/))  
Research Professor; PhD, Monash University (Australia)

Marshall, Robert A. ([https://experts.colorado.edu/display/fisid\\_155957/](https://experts.colorado.edu/display/fisid_155957/))  
Associate Professor, Associate Chair; PhD, Stanford University

Maslanik, James  
Research Professor Emeritus

Matsuo, Tomoko ([https://experts.colorado.edu/display/fisid\\_145041/](https://experts.colorado.edu/display/fisid_145041/))  
Associate Professor; PhD, SUNY at Stony Brook

Maute, Kurt ([https://experts.colorado.edu/display/fisid\\_113875/](https://experts.colorado.edu/display/fisid_113875/))  
Professor, Associate Dean; PhD, University of Stuttgart (Germany)

McGrath, Michael T.  
Professor Adjunct; BS, University of Colorado Boulder

McMahon, Jay W. ([https://experts.colorado.edu/display/fisid\\_150062/](https://experts.colorado.edu/display/fisid_150062/))  
Associate Professor; PhD, University of Colorado Boulder

Minton, Timothy K. ([https://experts.colorado.edu/display/fisid\\_167230/](https://experts.colorado.edu/display/fisid_167230/))  
Professor; PhD, University of California Berkeley

Morton, Yu Jade ([https://experts.colorado.edu/display/fisid\\_159076/](https://experts.colorado.edu/display/fisid_159076/))  
Endowed/Named Professor; PhD, The Pennsylvania State University

Nabity, James A. ([https://experts.colorado.edu/display/fisid\\_153102/](https://experts.colorado.edu/display/fisid_153102/))  
Associate Professor; PhD, University of Colorado Boulder

Neogi, Sanghamitra ([https://experts.colorado.edu/display/fisid\\_156773/](https://experts.colorado.edu/display/fisid_156773/))  
Assistant Professor; PhD, Pennsylvania State University

Nerem, R. Steven ([https://experts.colorado.edu/display/fisid\\_118478/](https://experts.colorado.edu/display/fisid_118478/))  
Professor; PhD, University of Texas at Austin

Niederwieser, Tobias ([https://experts.colorado.edu/display/fisid\\_164789/](https://experts.colorado.edu/display/fisid_164789/))  
Assistant Research Professor; PhD, University of Colorado Boulder

Palo, Scott E. ([https://experts.colorado.edu/display/fisid\\_109033/](https://experts.colorado.edu/display/fisid_109033/))  
Professor; PhD, University of Colorado Boulder

Pao, Lucy Y. ([https://experts.colorado.edu/display/fisid\\_107151/](https://experts.colorado.edu/display/fisid_107151/))  
Professor; PhD, Stanford University

Park, Kwang-Chun  
Professor Emeritus; PhD, Clarkson College

Peters, Sean ([https://experts.colorado.edu/display/fisid\\_174034/](https://experts.colorado.edu/display/fisid_174034/))  
Assistant Professor; PhD, Stanford University

Rafi, Melvin  
Teaching Assistant Professor; PhD, Wichita State University

Rhode, Matthew ([https://experts.colorado.edu/display/fisid\\_165079/](https://experts.colorado.edu/display/fisid_165079/))  
Teaching Assistant Professor; BA, University of Colorado

Ruzzene, Massimo ([https://experts.colorado.edu/display/fisid\\_165832/](https://experts.colorado.edu/display/fisid_165832/))  
Professor; PhD, Politecnico Di Torino (Italy)

Schaub, Hanspeter ([https://experts.colorado.edu/display/fisid\\_143818/](https://experts.colorado.edu/display/fisid_143818/))  
Endowed/Named Professor, Chair; PhD, Texas A&M University

Scheeres, Daniel J. ([https://experts.colorado.edu/display/fisid\\_145035/](https://experts.colorado.edu/display/fisid_145035/))  
Distinguished Professor; PhD, University of Michigan Ann Arbor

Schwartz, Trudy L. ([https://experts.colorado.edu/display/fisid\\_108607/](https://experts.colorado.edu/display/fisid_108607/))  
Teaching Professor; MS, University of Colorado Boulder

Scott, Hank  
Lecturer; MA, University of Queensland (Australia)

Shakiba, Maryam ([https://experts.colorado.edu/display/fisid\\_172206/](https://experts.colorado.edu/display/fisid_172206/))  
Assistant Professor; PhD, Texas AM University

Singer, Howard Joseph  
Professor Adjunct; PhD, University of California, Los Angeles

Sternovsky, Zoltan ([https://experts.colorado.edu/display/fisid\\_115211/](https://experts.colorado.edu/display/fisid_115211/))  
Associate Professor; PhD, Charles University (Czech Republic)

Stodieck, Louis S. ([https://experts.colorado.edu/display/fisid\\_105272/](https://experts.colorado.edu/display/fisid_105272/))  
Research Professor; PhD, University of Colorado Boulder

Sunberg, Zachary ([https://experts.colorado.edu/individual/fisid\\_165833/](https://experts.colorado.edu/individual/fisid_165833/))  
Assistant Professor; PhD, Stanford University

Thayer, Jeffrey P. ([https://experts.colorado.edu/display/fisid\\_134469/](https://experts.colorado.edu/display/fisid_134469/))  
Professor Emeritus, Research Professor; PhD, University of Michigan Ann Arbor

Thomas, Evan ([https://experts.colorado.edu/display/fisid\\_163895/](https://experts.colorado.edu/display/fisid_163895/))  
Associate Professor; PhD, University of Colorado Boulder

Voss, James S. ([https://experts.colorado.edu/display/fisid\\_140891/](https://experts.colorado.edu/display/fisid_140891/))  
Scholar in Residence; MS, University of Colorado Boulder

Williams, Christopher ([https://experts.colorado.edu/display/fisid\\_105765/](https://experts.colorado.edu/display/fisid_105765/))  
Research Professor; PhD, University of Colorado Boulder

Wingate, Kathryn ([https://experts.colorado.edu/display/fisid\\_164029/](https://experts.colorado.edu/display/fisid_164029/))  
Teaching Assistant Professor; PhD, University of Colorado Boulder

## Courses

### ASEN 5007 (3) Introduction to Finite Elements

Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite matrix algebra.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

### ASEN 5010 (3) Spacecraft Attitude Dynamics and Control

Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3200, ASEN 3700, or equivalent and good knowledge of linear algebra, vector calculus, basics of ordinary differential equations.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

### ASEN 5012 (3) Mechanics of Aerospace Structures

Applies fundamental concepts of continuum mechanics, theory of elasticity and energy methods to the analysis of structures.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5023

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisites APPM 2360 and ASEN 2001 or 2701 and ASEN 2003 or 2703 and ASEN 3112 or 3712 or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

### ASEN 5014 (3) Linear Control Systems

Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3200, ASEN 3700, or equivalent or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Systems and Control

### ASEN 5016 (3) Space Life Sciences

Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Bioastronautics and Microgravity Science

### ASEN 5018 (3) Graduate Projects I

Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5158 or instructor consent required.

### ASEN 5022 (3) Dynamics of Aerospace Structures

Applies concepts covered in undergraduate dynamics, structures and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements and dynamic stability.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 5012 or ASEN 5227 or MATH 2130 or APPM 3310 or equivalent or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

### ASEN 5034 (3) Stochastic Methods for Systems Engineering

Development of stochastic models used in aerospace and other systems engineering and optimization problems. Review of probability theory, stochastic models used in decision theory, random processes, queuing theory, information theory, reliability and quality control. Computer solutions required.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 5044 (3) Statistical Estimation for Dynamical Systems**

Introduces theory and methods of statistical estimation for general linear and nonlinear dynamical systems, with emphasis on aerospace engineering applications. Major topics include: review of applied probability and statistics; optimal parameter and dynamic state estimation; theory and design of Kalman filters for linear systems; extended/unscented Kalman filters and general Bayesian filters for non-linear systems.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Systems and Control

**ASEN 5047 (3) Probability and Statistics for Aerospace Engineering Sciences**

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes and quality control, including software models of same.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Computational and Analytic Methods

**ASEN 5050 (3) Space Flight Dynamics**

Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5052

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3200 or ASEN 3700 or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

**ASEN 5051 (3) Fundamentals of Fluid Dynamics**

Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3111 or ASEN 3711 (minimum grade B) or an equivalent course.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerodynamics and Fluid Mechanics

**ASEN 5052 (3) Analytical Astrodynamics**

Introduction to astrodynamics with an emphasis on analytical approaches. The primary subjects covered are the general solution of the 2-body problem; orbital trajectories, transfers, targeting, and time of flight; orbit perturbations and averaging analysis; and the restricted 3-body problem. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5050

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3200 or equivalent or instructor consent required.

**Grading Basis:** Letter Grade

**ASEN 5053 (3) Space Propulsion**

This course is designed to teach the theory, analysis and design of modern space propulsion systems. Lectures describe the thermodynamics of rocket propulsion and nozzle flow theory, followed by in-depth study of cold gas thrusters, monopropellant and bipropellant liquid rockets, solid and hybrid rockets, electric propulsion, nuclear rockets, and solar sails. If time permits, other exotic propulsion technologies will be dealt with.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Thermodynamics and Propulsion

**ASEN 5067 (3) Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems**

Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. Students will learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students learn-by-doing through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 4067

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Grading Basis:** Letter Grade

**ASEN 5090 (3) Introduction to Global Navigation Satellite Systems**

Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Global Positioning Systems

**ASEN 5098 (3) System Engr and Design**

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 5111 (3) Introduction to Aeroelasticity**

Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisites ASEN 3111 or MATH 2130 or APPM 3310 and MATH 3430 or equivalent or instructor consent required.

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

**ASEN 5114 (3) Automatic Control Systems**

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 4114

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisites Undergraduate systems or control course or instructor consent (ASEN 3128 or ASEN 3200).

**Additional Information:** Departmental Category: Systems and Control

**ASEN 5121 (3) Boundary Layers and Convection**

This course presents an introduction to the principles of viscous fluid flow and methods for performing engineering calculations of quantities such as skin friction and heat transfer rates in boundary layers. The first portion of the course material will focus on basic principles of fluid mechanics. We will derive the Navier-Stokes equations and discuss some simple solutions to these equations. The second portion of the course will concentrate on the application of these principles to boundary layers. We will derive the boundary layer equations and discuss their approximate and almost exact solutions. Formerly offered as a special topics course.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3111 and/or ASEN 5051.

**Grading Basis:** Letter Grade

**ASEN 5122 (3) Control of Aerospace Structures 1**

Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisite ASEN 3200 or equivalent or instructor consent required.

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

**ASEN 5128 (3) Small Uncrewed Aircraft System Guidance, Navigation, and Control**

Introduce students to advanced techniques for guidance, navigation, and control of the emerging class of small uncrewed aircraft systems (SUAS), which are informally defined as aircraft that weight less than 55 lbs.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**ASEN 5131 (3) Introduction to Hypersonics**

Introduces key elements of hypersonic vehicles, including trajectories, surface heating, propulsion, and thermal protection systems. Provides the necessary background on fluid dynamics and boundary layers, so students from a variety of disciplines are welcome. Also covers thermochemical nonequilibrium, surface pressure, and aerodynamic forces. Includes a mix of empirical techniques and computational analyses. Requires basic programming experience and exposure to partial differential equations.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**ASEN 5137 (3) Experimental Design and Statistical Methods**

Examines the applied issues of designing experiments and performing statistical analysis to reach justified scientific conclusions. Approaches are integrated to enable application to real-world research questions, with a focus on the unique challenges of human subject experiments.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** to Aerospace and Biomedical Engineering students.

**Grading Basis:** Letter Grade

**ASEN 5148 (3) Spacecraft Design**

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 5151 (3) Fundamentals of Gas Dynamics**

Presents the fundamental topics of gas dynamics, focusing on compressible flows but providing connections to incompressible topics. Topics include analysis of quasi-one-dimensional flow, the partial differential equations governing inviscid compressible flows, linearized flow theory, supersonic flow around cones, and the method of characteristics applied to both steady two-dimensional supersonic flows, and unsteady one-dimensional flows.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3111 or equivalent.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerodynamics and Fluid Mechanics

**ASEN 5158 (3) Space Habitat Design**

Utilize systems engineering methods to design and analyze a spacecraft intended for human occupancy with functional knowledge of the technologies used to sustain life. Emphasis placed on deriving requirements from stated mission goals and objectives, developing integrated functional schematics into a conceptual design, and analyzing design options by mass/volume estimation, including launch vehicle selection.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 5212 (3) Composite Structures and Materials**

Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

**ASEN 5218 (3) Large Space Structures Design**

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 4218

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 5222 (3) Materials Science for Composite Manufacturing**

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 4222

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisites ASEN 3112 and ASEN 4012 or equivalent or instructor consent required.

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

**ASEN 5226 (3) Medicine in Space and Surface Environments**

Introduces concepts of space medicine and provides a focused analysis on exploration medical capabilities. This course provides a unique learning opportunity to understand the medical challenges of human spaceflight. This is done both in the classroom and in an immersive field simulation that allows students to engage in medical care in simulated planetary surface environments. As such, it also introduces students to important concepts in human spaceflight operations which are difficult to teach in the classroom.

**ASEN 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing**

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Recommended:** Prerequisite one year of calculus-based physics and math up through differential equations.

**Additional Information:** Departmental Category: Remote Sensing

**ASEN 5245 (3) Radar and Remote Sensing**

Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Remote Sensing

**ASEN 5251 (3) Molecular Thermodynamics and Kinetics**

Provides an introduction to chemical kinetics and theories of molecular collisions and chemical reactions. Draws on quantum mechanics, statistical mechanics, and thermodynamics to help understand the magnitude of chemical reaction rates and how they vary with macroscopic parameters, such as temperature, and with microscopic parameters, such as molecular size, structure, and energy spacing.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite general chemistry, general physics, multivariable calculus.

**Grading Basis:** Letter Grade

**ASEN 5254 (3) Algorithmic Motion Planning**

Overview of the lessons learned by the robot motion planning community in the recent years. Examines approaches based on potential functions, graphs, sampling methods, task and motion planning, and basic approaches to planning under uncertainty. Provides a set of tools to tackle new problems and enables the pursuit of complex research questions such as planning for autonomous systems.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisites or corequisites: ASEN 5014 or equivalent, knowledge of how to plot 2-D/3-D functions, arrays and other data structures, standard constructs (loops, functions, etc), C++, Python or MATLAB, and knowledge of differential equations and linear algebra.

**Grading Basis:** Letter Grade

**ASEN 5264 (3) Decision Making under Uncertainty**

Covers algorithms for optimal sequential decision making in the presence of uncertainty. Mathematical formalisms include the Markov decision process (MDP), partially observable Markov decision process (POMDP), and Games. Solution techniques include exact dynamic programming, Monte Carlo tree search, deep reinforcement learning, and alpha vector value approximation for POMDPs. Assignments require programming in a high level language (Julia as of 2023). Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5264

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite fluency in a high-level programming language, willingness to learn another language if required for homework assignments and basic understanding of probability.

**Grading Basis:** Letter Grade

**ASEN 5307 (3) Engineering Data Analysis Methods**

Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Computational and Analytic Methods

**ASEN 5325 (3) Small Scale Processes in Geophysical Fluids**

Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Atmospheric, Oceanic, and Space Sciences

**ASEN 5335 (3) Aerospace Environment**

Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite Senior or graduate standing in engineering or related physical sciences.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Atmospheric, Oceanic, and Space Sciences

**ASEN 5347 (3) Math Methods in Dynamics**

Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Department consent required.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

**ASEN 5440 (3) Mission Design and Development for Space Sciences**

Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 5780

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Department of Astrophysical and Planetary Sciences graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and ASEN-P) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 5506 (1-2) Bioastronautics Seminar**

Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Bioastronautics and Microgravity Science

**ASEN 5519 (1-3) Special Topics**

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Recommended:** Prerequisite varies.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 5550 (3) Designing for Defense 1**

Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams, chosen by competitive selection, work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real-world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment. The first semester of a two-course sequence. Students take this course, ASEN/CSCI/CYBR 5550, and ASEN/CSCI/CYBR 5580 contiguously as the sequence spans the academic year.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5550 and CSCI 5550

**Grading Basis:** Letter Grade

**ASEN 5580 (3) Designing for Defense 2**

This course allows teams to continue their D4D journey from semester 1 guiding

**Requisites:** Requires prerequisite course of ASEN 5550 or CSCI 5550 or CYBR 5550 (minimum grade B). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ASEN 5849 (1-6) Independent Study**

Study of special projects.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 5940 (1-3) Engineering Research Internship**

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 6008 (3) Interplanetary Mission Design**

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two-and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 5050 or ASEN 5052.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

**ASEN 6009 (1-2) Special Topics Seminar**

Presents research and developments in each department's focus areas.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 6010 (3) Advanced Spacecraft Dynamics and Control**

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann-Hamel equations) to model a hybrid rigid/flexible spacecraft system.

**Requisites:** Requires prerequisite course of ASEN 5010 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

**ASEN 6011 (3) Experimental Fluid Mechanics**

This course presents an intermediate level introduction into the theory and practice of performing experimental measurements in fluid mechanics. The fundamental principles and definitions associated with instrumentation, measurement procedures, data analysis, and uncertainty quantification will be discussed. A specific focus will be placed on the application of a variety of measurement techniques in low-speed aerodynamic environments. A selection of measurement techniques will be extensively studied and applied including: classical pressure and temperature measurements, thermal (hot-wire) anemometry, laser doppler anemometry, particle image velocimetry, surface and field flow visualization techniques, schlieren and shadowgraph photography techniques. Undergraduates may enroll with instructor permission. Previously offered as a special topics course.

**Requisites:** Requires prerequisite or corequisite course of ASEN 5051 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**ASEN 6013 (3) High Speed Propulsion**

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisite ASEN 4013 or equivalent or instructor consent required.

**Additional Information:** Departmental Category: Thermodynamics and Propulsion

**ASEN 6014 (3) Spacecraft Formation Flying**

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies.

**Requisites:** Requires prerequisite course of ASEN 5050 or ASEN 5052 (minimum grade B-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Systems and Control

**ASEN 6015 (3) Space Vehicle Guidance and Control**

The course gives a comprehensive view of guidance systems used in space vehicles, and methods for analyzing the performance of these systems. The types of guidance systems that will be covered are launch vehicle ascent, intercept/rendezvous, interplanetary, orbit station-keeping, atmospheric re-entry, lander, and low-thrust. The mathematical foundation of these systems will be derived and discussed. Real world applications will be presented by reviewing selections from published literature. Course work will emphasize the analysis of the guidance system performance to achieve stated goals. Previously offered as a special topics course.

**Requisites:** Requires prerequisite courses of ASEN 5014 and ASEN 5050 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**ASEN 6020 (3) Optimal Trajectories**

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisites ASEN 5050 and ASEN 5014 or instructor consent required.

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

**ASEN 6024 (3) Nonlinear Control Systems**

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov, Describing Function, and Feedback Linearization methods.

**Requisites:** Requires prerequisite course of ASEN 5014 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Systems and Control

**ASEN 6028 (3) Graduate Projects II**

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Recommended:** Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5018 or ASEN 5158 or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 6037 (3) Turbulent Flows**

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Formerly ASEN 5037.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Recommended:** Prerequisite ASEN 5051 or equivalent or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerodynamics and Fluid Mechanics

**ASEN 6044 (3) Advanced State Estimation**

Introduces principles and techniques for designing, implementing, and analyzing probabilistic state estimators for dynamical systems that require going beyond traditional least-squares and Kalman filtering approaches. Emphasis on development of practical discrete-time Bayesian state space filtering algorithms for systems characterized by partial observability and non-Gaussian uncertainties, which arise in many applications governed by complex non-linear stochastic dynamics and measurement processes.

**Requisites:** Requires prerequisite ASEN 5044 (min grade B+). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**ASEN 6050 (3) Space Instrumentation**

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

**Equivalent - Duplicate Degree Credit Not Granted:** ASTR 6050 and GEOL 6050

**Requisites:** Requires prerequisite course of ASEN 5335 (minimum grade D-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 6055 (3) Data Assimilation & Inverse Methods for Earth & Geospace Observations**

Covers a selection of topics in probability theory, spatial statistics, estimation theory, numeric optimization, and geophysical nonlinear dynamics that form the foundation of commonly used data assimilation and inverse methods in the Earth and Space Sciences. Hands-on computational homework and projects provide opportunities to apply classroom curricula to realistic examples in the context of data assimilation.

**Requisites:** Requires prerequisite course of ASEN 5044 (minimum grade B-). Restricted to graduate students.

**Grading Basis:** Letter Grade

**ASEN 6060 (3) Advanced Astrodynamics**

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 5050 or equivalent or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

**ASEN 6061 (3) Molecular Gas Dynamics and DSMC**

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Additional Information:** Departmental Category: Aerodynamics and Fluid Mechanics

**ASEN 6070 (3) Satellite Geodesy**

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 3200 or equivalent or instructor consent required.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

**ASEN 6080 (3) Statistical Orbit Determination**

Course on orbit and advanced estimation techniques. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination.

**Requisites:** Requires prerequisite course of ASEN 5044 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Astrodynamics and Orbital Mechanics

**ASEN 6084 (3) Optical Multi-Target Tracking**

This course focuses on exploiting sensor information to detect, track, and characterize unresolved objects using optical sensors. This course will cover phenomenological modeling, error statistics, image processing, detection methods, and several multi-object tracking frameworks.

Assignments and projects will incorporate both simulated and empirical data generation / collection and reduction.

**Requisites:** Requires prerequisite course ASEN 5044 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students.

**ASEN 6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications**

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisite ASEN 5090 or instructor consent required.

**Additional Information:** Departmental Category: Global Positioning Systems

**ASEN 6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture**

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 5090.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Global Positioning Systems

**ASEN 6092 (3) GNSS for Remote Sensing of the Atmosphere, Ionosphere, and Earth Surface**

Covers technologies that rely on GNSS signals for remote sensing applications. GNSS receiver signal processing techniques and GNSS signal propagation effects due to interactions with the ionosphere, neutral atmosphere, and Earth surface are addressed. Students will learn techniques to process GNSS measurements and to infer ionospheric, atmospheric, and Earth surface properties from real GNSS measurements collected by ground-based receivers and LEO satellites.

**Requisites:** Requires prerequisite course of ASEN 5090 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**ASEN 6107 (3) Nonlinear Finite Element Methods**

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** Prerequisite ASEN 5007 or equivalent or instructor consent required.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 6114 (3) System Identification for Control**

Explores methods for identification of models for physical processes which will be part of a feedback control system. Focuses on the interplay between robustness of control laws and the performance of identification methods. Covers time-domain and frequency-domain identification methods, using experimental simulations of control systems of interest to the class.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisite ASEN 5014 or ASEN 5114.

**Grading Basis:** Letter Grade

**ASEN 6116 (3) Spacecraft Life Support Systems**

Study the environmental control and the life support systems and technologies that keep people alive and healthy in spacecraft and habitats. Students will learn about thermal control systems, air revitalization processes, water reclamation and treatment, waste handling and the reuse of materials, and food and nutrition. Expect to develop analytical models from first principles and perform hands-on laboratory experiments. Formerly ASEN 5116.

**Requisites:** Requires prerequisite course of ASEN 5158 (minimum grade D-). Requires corequisite course of ASEN 5016. Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Bioastronautics and Microgravity Science

**ASEN 6216 (3) Human Operation of Aerospace Vehicles**

Examines the role, capabilities, and limitations of human operators in aerospace vehicles. Topics include theoretical models of human information processing and decision-making, physiological limitations of the human (particularly spatial orientation illusions), the design of display and control interfaces, and the evaluation of those interfaces for human interaction with complex aerospace systems.

**Requisites:** Requires prerequisite or corequisite course of ASEN 5158 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students.

**Recommended:** for aerospace and biomedical engineering students.

**Grading Basis:** Letter Grade

**ASEN 6265 (3) Fundamentals of Spectroscopy for Optical Remote Sensing**

Provides a comprehensive overview of the fundamentals of quantum physics, atomic spectroscopy, molecular spectroscopy and laser spectroscopy. Exposes students to the spectroscopy applications in modern optical and laser remote sensing. Assists students to develop the fundamental knowledge and skills for independent learning.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**ASEN 6316 (3) Extravehicular Activity**

Expose students to all aspects of extravehicular activity (EVA) to enable them to design systems to facilitate EVA for future human exploration. This course will draw upon the academic elements of design, engineering, technology development, physiology, operations, human-machine interaction, and geology to provide an interdisciplinary look at this topic.

**Requisites:** Requires prerequisite course of ASEN 5158 or ASEN 5016 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students and Aerospace graduate certificate students.

**Recommended:** aerospace or biomedical engineering students with a focus in bioastronautics.

**Grading Basis:** Letter Grade

**ASEN 6331 (3) Computational Fluid Dynamics**

Focuses on computational approaches to solve the Navier-Stokes equations. Assumes a basic knowledge of the solution of partial differential equations with numerical methods with focus finite element/volume methods (FEM/FVM but primarily FEM). These issues include: the discrete formulation, non-linear equation iteration, linear equation formation, boundary condition prescription and linear equation solution.

**Requisites:** Requires prerequisite or corequisite courses of ASEN 5007 and ASEN 5051 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Recommended:** instructor permission required if pre/co requisite of ASEN 5007 and ASEN 5051 haven't been met.

**ASEN 6337 (3) Remote Sensing Data Analysis**

Covers some of the most commonly used machine learning techniques in remote sensing data analysis, specifically for clustering, classification, feature extraction and dimensionality reduction, and inverse methods used to retrieve geophysical information from remote sensing data. Hands-on computational homework and group and individual projects provide opportunities to apply classroom curricula to real remote sensing data.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Remote Sensing

**ASEN 6365 (3) Lidar Remote Sensing**

Provides a comprehensive, yet easily understandable, up-to-date understanding of lidar principles, technologies and applications. Contains approaches for quantitative lidar simulation, lidar sensitivity and error analysis, lidar data retrieval, lidar system design and performance analysis. Gives students opportunities to see and operate real state-of-the-art lidar systems and make connections to lidar experts in the nation and world.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Aerospace Design and System Engineering

**ASEN 6412 (3) Uncertainty Quantification**

This advanced topics course provides an exploration of techniques for representation and propagation of uncertainty in PDE/ODE-based systems.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors, and Aerospace graduate certificate students.

**Recommended:** Prerequisites APPM 5570 and ECEN 5612 (all minimum grade B) or equivalent courses with instructor consent.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Structures, Materials, and Structural Dynamics

**ASEN 6519 (1-3) Special Topics**

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN and C-ASENP) majors only.

**Recommended:** Prerequisite varies.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 6800 (3) Master of Engr Project**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 6849 (1-6) Independent Study**

Studies special projects agreed upon by student and instructor.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 6949 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 6950 (1-6) Master's Thesis**

**Additional Information:** Departmental Category: Specialized Courses

**ASEN 8990 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Specialized Courses

## Aerospace Engineering Sciences - Master of Science (MS)

CU Boulder's Department of Aerospace Engineering Sciences (AES) is internationally recognized for its research and education leadership in aerospace engineering, Earth and space sciences. Its world-renowned engineers and scientists tackle challenges in aerospace technology and science, focusing on Astrodynamics and Satellite Navigation Systems (ASN); Autonomous Systems (AUT); Bioastronautics (BIO), Fluids, Structures and Materials (FSM); and Remote Sensing, Earth and Space Science (RSESS).

With more than 50 faculty members and over 550 MS and PhD students, our graduate programs prepare aerospace engineering students to meet the needs of our 21st-century society through the understanding, conception, design and application of aerial and spacecraft systems.

In the MS program we focus on hands-on, experiential learning, technical and organizational expertise, and end-to-end mission and systems perspectives via course-based degree options.

Research opportunities for MS students are very limited and are not funded. Students interested in completing an MS thesis are encouraged to take a few of our courses before deciding to pursue that route.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage and our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>).

## Requirements

### Program Requirements

Students must complete a total of 30 credit hours, equivalent to 10 classes, with a grade of B- or better and a cumulative GPA of at least 3.00. Of these 30 credits, at least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in Aerospace Engineering (ASEN) courses, and one approved math course. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class. Seminar credits, even those earned in other disciplines, do not count toward the MS degree.)

Up to 6 credits can be taken at the 4000 level in approved engineering, math and science departments (ECEN, CVEN, MCEN, CHEN, CSCI, ATOC, ASTR, PHYS, MCDB, BCHM, MSEN, BMEN, APPM, MATH, STAT, CHEM, IPHY, GEOL, ENVD). ASEN courses level 4000 or below do not count towards AES graduate degrees.

### Focus Area-Defined Courses

Some focus areas offer the option to take additional courses to satisfy the non-thesis option. This will represent at least an additional six credit hours with respect to the minimum requirement to obtain a MS with that focus area.

Code	Title	Credit Hours
<b>Approved Math Courses:</b>		
<i>Choose one:</i>		
ASEN 5044	Statistical Estimation for Dynamical Systems <sup>1</sup>	3
ASEN 5137	Experimental Design and Statistical Methods	
ASEN 5307	Engineering Data Analysis Methods	
ASEN 5417		
ASEN 5519	Special Topics (Multi-Object Filtering Theory)	
ASEN 6412	Uncertainty Quantification	
CSCI 5636	Numerical Solution of Partial Differential Equations	
ECEN 5612	Random Processes for Engineers	
ECEN 5632	Theory and Application of Digital Filtering	
ECEN 5652	Detection and Extraction of Signals from Noise	
EMEN 5005	Introduction to Applied Statistical Methods	
4000, 5000, 6000, or 7000 level APPM course		
4000, 5000, 6000, or 7000 level MATH course		
4000, 5000, 6000, or 7000 level STAT course		

*Choose one of the following:*

### Thesis Option

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the faculty advisor. The thesis topic must be related to the major field.

ASEN 6950	Master's Thesis
-----------	-----------------

### Non-Thesis Option (Select One)

ASEN 5018 & ASEN 6028	Graduate Projects I and Graduate Projects II (6 credits)
-----------------------	--

Required courses leading to an approved certificate (or completion of the dual ASEN/EMP degree)

Course-only option (FSM and AUT)

<sup>1</sup> Can be used to meet only one ASEN curriculum-specific requirement, i.e. math or ASN core. This restriction does not apply to certificate requirements.

Please visit our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>) for focus area requirements and coursework offerings.

### Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in approximately two years.

**Aerodynamics and Satellite Navigation Systems (ASN)** (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/aerodynamics-satellite-navigation-systems/>)

Requirements of the MS degree in the Aerodynamics and Satellite Navigation Systems focus area are:

- Three ASN Core Classes
- One ASEN MS Course or Required course from an outside (non-ASN) AES focus area. The outside course is any course not listed under the ASN curriculum.

Code	Title	Credit Hours
<b>Core Courses</b>		
<i>Choose three:</i>		
ASEN 5010	Spacecraft Attitude Dynamics and Control	
ASEN 5044	Statistical Estimation for Dynamical Systems	
ASEN 5050	Space Flight Dynamics	
or ASEN 5052	Analytical Astrodynamics	
ASEN 5090	Introduction to Global Navigation Satellite Systems	

### Additional Course

Choose one ASEN MS Course from an outside (non-ASN) AES focus area

*Elective Courses Offered by ASN Focus Area*

ASEN 6008	Interplanetary Mission Design
ASEN 6010	Advanced Spacecraft Dynamics and Control
ASEN 6014	Spacecraft Formation Flying
ASEN 6015	Space Vehicle Guidance and Control
ASEN 6020	Optimal Trajectories
ASEN 6060	Advanced Astrodynamics
ASEN 6070	Satellite Geodesy
ASEN 6080	Statistical Orbit Determination
ASEN 6084	Optical Multi-Target Tracking
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture

ASEN 6092	GNSS for Remote Sensing of the Atmosphere, Ionosphere, and Earth Surface
ASEN 6519	Special Topics (Celestial Mechanics & Advanced Astrodynamics)

### Autonomous Systems (AUT) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/autonomous-systems/>)

Students are required to take one course from three of the following topic areas:

Code	Title	Credit Hours
<b>Autonomous Decision-Making</b>		
ASEN 5254	Algorithmic Motion Planning	
ASEN 5264	Decision Making under Uncertainty	
<b>Control Theory</b>		
ASEN 5014	Linear Control Systems	
ASEN 6024	Nonlinear Control Systems	
<b>Dynamics and Modelling of Vehicles</b>		
ASEN 5128	Small Uncrewed Aircraft System Guidance, Navigation, and Control	
ASEN 6114	System Identification for Control	
<b>Estimation and Sensor Fusion</b>		
ASEN 5044	Statistical Estimation for Dynamical Systems	
<b>Programming for Embedded Systems</b>		
ASEN 5067	Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems	
CSCI 5302	Advanced Robotics	
ECEN 5613	Embedded System Design	
ECEN 5813	Principles of Embedded Software	
MCEN 5115	Mechatronics and Robotics I	
<i>Elective Courses Offered by AUT Focus Area</i>		
ASEN 5114	Automatic Control Systems	
ASEN 6044	Advanced State Estimation	
ASEN 6519	Special Topics (Advanced Survey of Sequential Decision Making)	
ASEN 6519	Special Topics (Cooperative Control)	
ASEN 6519	Special Topics (Hybrid Control Systems)	
ASEN 6519	Special Topics (Verification & Synthesis of Stochastic Systems)	

For the AUT Course-only MS Requirements, students need to satisfy the AUT-specific MS requirements, plus two additional courses, each from a different topic area. Topic areas used to satisfy the AUT-specific MS requirements can be repeated, with no more than two courses from a single topic area.

### Bioastronautics (BIO) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/bioastronautics/>)

Students are required to take two courses and one course from each of the following areas:

Code	Title	Credit Hours
<b>Required Courses</b>		
ASEN 5016	Space Life Sciences	6

ASEN 5158	Space Habitat Design	
<i>Choose one (BIO elective):</i>		3
ASEN 5137	Experimental Design and Statistical Methods	
ASEN 5226	Medicine in Space and Surface Environments	
ASEN 6116	Spacecraft Life Support Systems	
ASEN 6216	Human Operation of Aerospace Vehicles	
ASEN 6316	Extravehicular Activity	
<i>Choose one (non-BIO course):</i>		3
ASEN 5010	Spacecraft Attitude Dynamics and Control	
ASEN 5012	Mechanics of Aerospace Structures	
ASEN 5014	Linear Control Systems	
ASEN 5044	Statistical Estimation for Dynamical Systems	
ASEN 5050	Space Flight Dynamics	
or ASEN 5052	Analytical Astrodynamics	
ASEN 5090	Introduction to Global Navigation Satellite Systems	
ASEN 5335	Aerospace Environment	
<b>Elective Courses Offered by BIO Focus Area</b>		
ASEN 5137	Experimental Design and Statistical Methods	
ASEN 5226	Medicine in Space and Surface Environments	
ASEN 5849	Independent Study (for MS students)	
ASEN 6116	Spacecraft Life Support Systems	
ASEN 6216	Human Operation of Aerospace Vehicles	
ASEN 6316	Extravehicular Activity	
ASEN 6849	Independent Study (for PhD 'pre/non-thesis' topic)	

### Fluids, Structures and Materials (FSM) (<https://www.colorado.edu/aerospace/academics/graduates/curriculum/fluids-structures-and-materials/>)

Requirements of the MS degree in the Fluids, Structures and Materials (FSM) focus area are:

- Two Core Classes in your chosen track, and one Core course in the other FSM track.
- Two electives from the FSM focus area, with at least one in your chosen track. (See Graduate Handbook for detailed listing.)

Code	Title	Credit Hours
<b>Core Courses</b>		
<i>Fluids Sub-Track</i>		
ASEN 5051	Fundamentals of Fluid Dynamics	
ASEN 5151	Fundamentals of Gas Dynamics	
ASEN 5251	Molecular Thermodynamics and Kinetics	
<i>Structures and Materials Sub-Track</i>		
ASEN 5007	Introduction to Finite Elements	
ASEN 5012	Mechanics of Aerospace Structures	
ASEN 5022	Dynamics of Aerospace Structures	
<b>Elective Courses Approved by FSM Focus Area</b>		

Code	Title	Credit Hours
<b>Fluids</b>		
ASEN 5053	Space Propulsion	
ASEN 5121	Boundary Layers and Convection	
ASEN 5131	Introduction to Hypersonics	
ASEN 6011	Experimental Fluid Mechanics	
ASEN 6037 or MCEN 7221	Turbulent Flows Turbulence	
ASEN 6061	Molecular Gas Dynamics and DSMC	
ASEN 6331/ MCEN 5231	Computational Fluid Dynamics	
ASEN 6519	Special Topics (Advanced Turbulence Simulation)	
MCEN 5022	Classical Thermodynamics	
MCEN 5042	Heat Transfer	
MCEN 5151	Flow Visualization	
MCEN 5152	Introduction to Combustion	
MCEN 6001	Reacting Flows	
<b>Structures and Materials</b>		
ASEN 5111	Introduction to Aeroelasticity	
ASEN 5148	Spacecraft Design	
ASEN 5212	Composite Structures and Materials	
ASEN 5218	Large Space Structures Design	
ASEN 5519	Special Topics (Design Optimization in Aerospace Systems)	
ASEN 5519	Special Topics (Introduction to Phononics)	
ASEN 5519	Special Topics (Nonlinear Mechanical Vibration)	
ASEN 6412	Uncertainty Quantification	
ASEN 6519	Special Topics (Molecular Dynamics)	
CVEN 5161	Advanced Mechanics of Materials I	
CVEN 6161	Advanced Mechanics of Materials 2	
CVEN 7141	Plates and Shells	
CVEN 7511	Computational Finite Inelasticity and Multiphase Mechanics	
EMEN 5405	Fundamentals of Systems Engineering	
MCEN 5044	Mechanical Behavior of Materials	
MCEN 5228	Special Topics in Mechanical Engineering (Mechanics of Composite Materials)	
MCEN 5228	Special Topics in Mechanical Engineering (Mechanics of Soft Materials)	
<p>Remote Sensing, Earth and Space Science (RSESS) (<a href="https://www.colorado.edu/aerospace/current-students/graduates/curriculum/remote-sensing-earth-space-sciences/">https://www.colorado.edu/aerospace/current-students/graduates/curriculum/remote-sensing-earth-space-sciences/</a>)            Note that MS students using the Remote Sensing Certificate for their degree requirements in lieu of an MS thesis or two semester graduate projects may count a maximum of 2 of the 4 required RSESS focus area courses toward the certificate requirement.</p>		
<b>Data or Numerical Analysis Methods Primary Courses</b>		
Choose one:		3
ASEN 5307	Engineering Data Analysis Methods	
ASEN 6055	Data Assimilation & Inverse Methods for Earth & Geospace Observations	
ASEN 6337	Remote Sensing Data Analysis	
APPM 5350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
ECEN 5612	Random Processes for Engineers	
ECEN 5632	Theory and Application of Digital Filtering	
ECEN 5652	Detection and Extraction of Signals from Noise	
STAT 5000	Statistical Methods and Application I	
STAT 5010	Statistical Methods and Applications II	
STAT/MATH 5520	Introduction to Mathematical Statistics	
STAT/MATH 5540	Introduction to Time Series	
<b>Instrumentation Fundamentals Primary Courses</b>		
Choose one:		3
ASEN 5067	Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems	
ASEN 5090	Introduction to Global Navigation Satellite Systems	
ASEN 5168		
ASEN 5245	Radar and Remote Sensing	
ASEN 5440	Mission Design and Development for Space Sciences	
ASEN 6050	Space Instrumentation	
ASEN 6265	Fundamentals of Spectroscopy for Optical Remote Sensing	
ASEN 6365	Lidar Remote Sensing

ATOC 5051	Introduction to Physical Oceanography	
ATOC 5060	Dynamics of the Atmosphere and Oceans	
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	
PHYS 5141	Astrophysical and Space Plasmas	
PHYS 5150	Introductory Plasma Physics	
<b>Astrodynamic and Satellite Navigation Systems</b>		
Choose one:		3
ASEN 5014	Linear Control Systems	
ASEN 5044	Statistical Estimation for Dynamical Systems	
ASEN 5050 or ASEN 5052	Space Flight Dynamics Analytical Astrodynamics	
ASEN 5051	Fundamentals of Fluid Dynamics	
ASEN 5148	Spacecraft Design	
ASEN 6070	Satellite Geodesy	
<b>Total Credit Hours</b>		<b>12</b>

## Dual Degree Program

### MS in Aerospace Engineering Sciences and ME in Engineering Management

Students may complement their aerospace engineering master's degree with a Master of Engineering (ME) in Engineering Management. To complete the Aerospace Engineering and Engineering Management dual degree program, students must be admitted to Aerospace Engineering first, and apply to Engineering Management afterwards.

#### Requirements

The dual degree consists of 45 credits: 24 credits based on Aerospace Engineering requirements and 21 based on Engineering Management requirements, as detailed below.

For more information, visit the Engineering Management Program's MS Aerospace Engineering Sciences & ME Engineering Management (<https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/dual-graduate-degree-aerospace-engineering-and-engineering/>) webpage.

#### Aerospace Engineering

At least 24 credits at the 5000 level or above:

- At least 18 credits in Aerospace Engineering (ASEN) courses. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class).
- One approved math course (3 credits)
- Professional MS students do not follow focus area-specific requirements and do not require the completion of a certificate, graduate projects or MS thesis
- Traditional MS students:
  - Completion of an approved certificate, graduate projects (6 credits) or MS thesis (6 MS thesis credits)
  - Fulfill focus area-specific requirements

Review our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>) for details on focus area requirements, GPA and grade minimums, and other information.

#### Engineering Management

Students must complete at least 21 credits. Visit the Engineering Management website for details.

## Aerospace Engineering Sciences - Professional Master of Science (MSAES)

A professional master's degree (MSAES) in aerospace engineering sciences from CU Boulder is designed for working engineers and people planning to pursue a career in industry. We designed the program with industry partners to meet your needs, further your career and with your location in mind—the degree can be earned on campus or 100 percent online.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage.

## Requirements

### Program Requirements

Students must complete a total of 30 credit hours, equivalent to 10 classes, with a grade of B- or better and a cumulative GPA of at least 3.00. Of these 30 credits, at least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in Aerospace Engineering (ASEN) courses, and one approved math course. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class. Seminar credits, even those earned in other disciplines, do not count toward the MS degree.)

Up to 6 credits can be taken at the 4000 level in approved engineering, math and science departments (ECEN, CVEN, MCEN, CHEN, CSCI, ATOC, ASTR, PHYS, MCDB, BCHM, MSEN, BMEN, APPM, MATH, STAT, CHEM, IPHY, GEOL, ENVD). ASEN courses level 4000 or below do not count towards AES graduate degrees.

Code	Title	Credit Hours
<b>ASEN Courses</b>		<b>18</b>
Choose from the list below (subject to change)		
ASEN 5007	Introduction to Finite Elements	
ASEN 5010	Spacecraft Attitude Dynamics and Control	
ASEN 5012	Mechanics of Aerospace Structures	
ASEN 5014	Linear Control Systems	
ASEN 5016	Space Life Sciences	
ASEN 5022	Dynamics of Aerospace Structures	
ASEN 5050	Space Flight Dynamics	
ASEN 5051	Fundamentals of Fluid Dynamics	
ASEN 5052	Analytical Astrodynamics	
ASEN 5053	Space Propulsion	
ASEN 5067	Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems	
ASEN 5090	Introduction to Global Navigation Satellite Systems	
ASEN 5111	Introduction to Aeroelasticity	
ASEN 5114	Automatic Control Systems	
ASEN 5121	Boundary Layers and Convection	
ASEN 5131	Introduction to Hypersonics	
ASEN 5148	Spacecraft Design	
ASEN 5151	Fundamentals of Gas Dynamics	
ASEN 5158	Space Habitat Design	
ASEN 5168		
ASEN 5212	Composite Structures and Materials	
ASEN 5218	Large Space Structures Design	
ASEN 5226	Medicine in Space and Surface Environments	
ASEN 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	
ASEN 5245	Radar and Remote Sensing	
ASEN 5251	Molecular Thermodynamics and Kinetics	
ASEN 5335	Aerospace Environment	
ASEN 5440	Mission Design and Development for Space Sciences	

ASEN 5519	Special Topics (Molecular Thermodynamics and Kinetics)
ASEN 5849	Independent Study
ASEN 6008	Interplanetary Mission Design
ASEN 6010	Advanced Spacecraft Dynamics and Control
ASEN 6011	Experimental Fluid Mechanics
ASEN 6014	Spacecraft Formation Flying
ASEN 6015	Space Vehicle Guidance and Control
ASEN 6020	Optimal Trajectories
ASEN 6024	Nonlinear Control Systems
ASEN 6037	Turbulent Flows
ASEN 6050	Space Instrumentation
ASEN 6055	Data Assimilation & Inverse Methods for Earth & Geospace Observations
ASEN 6060	Advanced Astrodynamics
ASEN 6061	Molecular Gas Dynamics and DSMC
ASEN 6070	Satellite Geodesy
ASEN 6080	Statistical Orbit Determination
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture
ASEN 6092	GNSS for Remote Sensing of the Atmosphere, Ionosphere, and Earth Surface
ASEN 6107	Nonlinear Finite Element Methods
ASEN 6114	System Identification for Control
ASEN 6116	Spacecraft Life Support Systems
ASEN 6216	Human Operation of Aerospace Vehicles
ASEN 6265	Fundamentals of Spectroscopy for Optical Remote Sensing
ASEN 6316	Extravehicular Activity
ASEN 6331	Computational Fluid Dynamics
ASEN 6337	Remote Sensing Data Analysis
ASEN 6365	Lidar Remote Sensing
ASEN 6519	Special Topics
EMEN 5405	Fundamentals of Systems Engineering

**Math Course** **3**

Choose from one of the following approved options:

ASEN 5044	Statistical Estimation for Dynamical Systems
ASEN 5137	Experimental Design and Statistical Methods
ASEN 5307	Engineering Data Analysis Methods
ASEN 5417	
ASEN 5519	Special Topics (Multi-Object Filtering Theory)
ASEN 6412	Uncertainty Quantification
CSCI 5636	Numerical Solution of Partial Differential Equations
ECEN 5612	Random Processes for Engineers
ECEN 5632	Theory and Application of Digital Filtering

ECEN 5652	Detection and Extraction of Signals from Noise
EMEN 5005	Introduction to Applied Statistical Methods
4000, 5000, 6000, or 7000 level APPM course	
4000, 5000, 6000, or 7000 level MATH course	
4000, 5000, 6000, or 7000 level STAT course	
<b>Additional Coursework</b>	<b>9</b>
<b>Total Credit Hours</b>	<b>30</b>

### Time Limit

All degree requirements must be completed within four years of the date of commencing coursework.

## Aerospace Engineering Sciences - Doctor of Philosophy (PhD)

Students typically complete their PhD in aerospace engineering sciences within 4 to 6 years, depending on whether they enter the program with a master's degree.

The primary focus of a PhD student is to perform novel research guided by their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. PhD students are supported through research and teaching assistantships and are also encouraged to apply for their own source of funding.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage.

## Requirements

### Course Requirements

- A minimum of 30 credit hours of courses numbered 5000 or above (at least 15 of these must be in ASEN) with a minimum of 3.25 GPA.
- 30 credit hours of dissertation credit are required for the degree.
- A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a PhD degree if approved by the graduate committee of the department and the Graduate School.
- All courses taken for the master's degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the university.

### Preliminary Examination

Students must pass the preliminary exam by the fifth semester as a CU Boulder PhD student, although most students take the exam in their third semester. If a student enters the PhD program with a master's degree in aerospace engineering, their faculty advisor can require the exam be taken by their third semester. The preliminary exam is composed of an oral exam in front of a committee of three graduate teaching faculty members. The exam focuses upon both research preparation and fundamental knowledge in key subject areas.

The oral exam will be composed of three components:

1. A presentation summarizing the literature review conducted by the student followed by an examination of the presented concepts.
2. Two subject area exams based on approved courses.

## Doctoral Practicum

The Doctoral Practicum (DP) is a required element of the PhD program in Smead Aerospace that complements the primary research and academic experiences which are core to the awarding of a doctorate. The objective of the DP is to provide students with an experience to use their advanced education to teach, mentor and serve as role models. The emphasis of the practicum is on using technical skills, education and insights in service to others. The expectation is that this activity (which should consist of about 40 total hours of work) will help students grow confidence and skills as leaders. The process is formative, and students are responsible for articulating how their chosen practicum will be structured toward achieving the following goals:

1. Provide meaningful educational or societal benefit/impact to others.
2. Provide intrinsic value to the student's professional or personal development.
3. Leverage the intellectual rigor consistent with the expectations conferred upon an individual who has earned their PhD.

## Comprehensive Examination

Students must pass the comprehensive exam to become doctoral candidate. This exam is in front of the student's doctoral committee, which is made up of the student's research advisor and four (or more) other graduate faculty members chosen by the student. Before the exam, the student provides a written proposal for their thesis research to the doctoral committee. The oral exam consists of the student presenting their proposal and any initial research findings to their committee, who then examines the student on the proposal and related technical concepts. After incorporating input from the committee through the Comprehensive Exam and passing this exam, the student will have a plan for their thesis research and will become a doctoral candidate.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

# Astrodynamics and Satellite Navigation Systems - Graduate Certificate

The Astrodynamics and Satellite Navigation Systems Certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in Astrodynamics and Satellite Navigation (ASN). It is essentially a specialization of the AES MS degree in the ASN focus area, with additional requirements for breadth and depth in the ASN area. The

certificate will make students more desirable to future employers looking for astrodynamics and satellite navigation specialists.

This certificate is available to graduate degree-seeking and non-matriculated students. Additional certificate information can be found on the department's Astrodynamics and Satellite Navigation Systems Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/asn-certificate/>) webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admissions Requirements

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra, and differential equations, two semesters of undergraduate calculus-based physics, and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates webpage (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>); nondegree-seeking and non-matriculated students may visit the AES Certificates & Continuing Education webpage (<https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/>).

### Certificate Requirements

Complete all four core area subjects in ASN, plus two advanced ASN courses of the student's choosing (18 credit hours).

Grades of B or higher are required for fulfillment of requirements and certificate award. Students also pursuing other graduate certificates may not use the same courses to count for both certificates.

Code	Title	Credit Hours
<b>Core Requirements</b> <sup>1</sup>		
ASEN 5010	Spacecraft Attitude Dynamics and Control	3
ASEN 5044	Statistical Estimation for Dynamical Systems <sup>2</sup>	3
ASEN 5050 or ASEN 5052	Space Flight Dynamics Analytical Astrodynamics	3
ASEN 5090	Introduction to Global Navigation Satellite Systems	3
<b>Advanced Requirements</b>		
	<i>Select any two 6000-level ASN courses, including but not limited to:</i>	6
ASEN 6008	Interplanetary Mission Design	
ASEN 6010	Advanced Spacecraft Dynamics and Control	
ASEN 6014	Spacecraft Formation Flying	

ASEN 6015	Space Vehicle Guidance and Control
ASEN 6020	Optimal Trajectories
ASEN 6060	Advanced Astrodynamics
ASEN 6070	Satellite Geodesy
ASEN 6080	Statistical Orbit Determination
ASEN 6084	Optical Multi-Target Tracking
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture
ASEN 6519	Special Topics <sup>3</sup>

**Total Credit Hours** **18**

- <sup>1</sup> Any core requirement can be satisfied by taking an additional 6000-level course which has the corresponding core requirement as a prerequisite. *This substitution does not require a petition.*
- <sup>2</sup> Students are allowed to use ASEN 5044 to satisfy the certificate requirement AND a math course requirement for the MS and/or PhD.
- <sup>3</sup> Topics include GNSS for Remote Sensing and Celestial Mechanics & Advanced Astrodynamics.

## Hypersonics - Graduate Certificate

This certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in the cross-disciplinary field of hypersonics. It is sponsored by the Ann and H. J. Smead Department of Aerospace Engineering Sciences (AES) and the Paul M. Rady Department of Mechanical Engineering (ME) and involves courses from AES and ME.

The purpose of the certificate is to develop interdisciplinary skills in the field of hypersonics, which requires knowledge about fundamental areas such as gas dynamics, materials, controls, and how their inter-relationships determine hypersonic vehicle performance.

This certificate is available to graduate degree-seeking and non-matriculated students. Additional certificate information can be found on the department's Hypersonics Certificate (<https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificate-programs/hypersonics-certificate/>) webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admission Requirements

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education or its equivalent.
- Undergraduate courses in calculus, linear algebra and differential equations; two semesters of undergraduate calculus-based physics; and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates (<https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificates/>) webpage; nondegree-seeking and non-matriculated students may visit the AES Certificates & Continuing Education (<https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/>) webpage.

## Required Courses and Credits

The standard requirements of this certificate program are the completion of twelve (12) hours of graduate-level coursework (typically four 3-credit courses).

There is one required course, ASEN 5131 Introduction to Hypersonics. Each student is free to choose the other three courses from the elective list below.

Grades of B or higher are required for fulfillment of requirements and certificate award. Students also pursuing other graduate certificates may not use the same courses to count for both certificates.

Code	Title	Credit Hours
<b>Course Requirements</b>		
ASEN 5131	Introduction to Hypersonics	3
<b>Electives</b>		
Choose three:		9
ASEN 5018	Graduate Projects I (Specifically focused on hypersonics, approved by certificate coordinator)	
or ASEN 6028	Graduate Projects II	
ASEN 5053	Space Propulsion	
ASEN 5121	Boundary Layers and Convection	
ASEN 5151	Fundamentals of Gas Dynamics	
ASEN 5212	Composite Structures and Materials	
ASEN 5251	Molecular Thermodynamics and Kinetics	
ASEN 5519	Special Topics (Hypersonic Vehicle Design Project)	
ASEN 5849	Independent Study (Specifically focused on hypersonics, approved by certificate coordinator)	
ASEN 6015	Space Vehicle Guidance and Control	
ASEN 6037	Turbulent Flows	
or MCEN 7221	Turbulence	
ASEN 6061	Molecular Gas Dynamics and DSMC	
ASEN 6331	Computational Fluid Dynamics	
MCEN 5022	Classical Thermodynamics	
MCEN 5024	Materials Chemistry and Structures	
MCEN 5042	Heat Transfer	
MCEN 5152	Introduction to Combustion	
MCEN 5228	Special Topics in Mechanical Engineering (High Temperature Materials)	
MCEN 6001	Reacting Flows	

**Total Credit Hours** **12**

# Radio Frequency Engineering for Aerospace - Graduate Certificate

A joint certificate program between Smead Aerospace and the Department of Electrical, Computer & Energy Engineering. This certificate fills an industry need in Colorado and beyond for cross disciplinary graduate level education in aerospace and electrical engineering.

The program is open to new and current degree-seeking Aerospace Engineering Sciences (AES) and Electrical, Computer and Energy Engineering (ECEE) students. This certificate is not available to non-matriculated students.

Additional certificate information can be found on the department's Radio Frequency Engineering for Aerospace Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/radio-frequency-engineering-aerospace/>) webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admissions Requirements

Candidates for admission must be a matriculated graduate student in the AES or ECEE departments. For certificate application and more details, visit the AES Certificates webpage (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>).

This certificate is co-managed by AES and ECEE. Students must follow the rules and policies of each department. Courses from already awarded degrees cannot be used to fulfill certificate requirements.

### Certificate Requirements

Six courses total (18 credit hours): four required courses (12 credit hours) and two elective courses (6 credit hours).

Grades of B or higher are required for fulfillment of requirements and certificate award. Students also pursuing other graduate certificates may not use the same courses to count for both certificates.

Code	Title	Credit Hours
<b>Required Courses</b>		
ASEN 5090	Introduction to Global Navigation Satellite Systems	3
ECEN 5134	Electromagnetic Radiation and Antennas <sup>1</sup>	3
or ECEN 5104	Passive Microwave Circuits	
ECEN 5634	Microwave and RF Laboratory	3
Choose one of the courses below, depending on major.		
ASEN 5148	Spacecraft Design (required for ECEE majors)	3
ECEN 3410	Electromagnetic Waves and Transmission <sup>2</sup>	
<b>Elective Courses</b>		
Choose two:		6
ASEN 5018	Graduate Projects I <sup>3</sup>	

or ASEN 6028	Graduate Projects II
ASEN 5245	Radar and Remote Sensing
ECEN 5114	Electromagnetic Theory
ECEN 5134	Electromagnetic Radiation and Antennas <sup>3</sup>
or ECEN 5104	Passive Microwave Circuits
ECEN 5154	Computational Electromagnetics

**Total Credit Hours** **18**

- For students interested in taking both courses, one course can count as a requirement and one course can count as an elective. A single course cannot count as both a required course and an elective course, simultaneously.
- Note: ECEN 3410 will only meet graduate degree/MS requirements for AES students enrolled in the RF certificate.
- As an elective, choose whichever course *not* taken as a requirement.
- Approved radio frequency project; can only count for one elective (3 credit hours).

## Remote Sensing - Graduate Certificate

Remote sensing (satellite and ground-based) is increasingly being used as a technique to probe the Earth's atmosphere, ocean, and land surfaces. Probing of other planets is accomplished largely by satellite remote sensing. Given national priorities in such areas as climate and global change, the interest in remote sensing will only increase with time. Graduate students, research staff and faculty work on a wide variety of topics ranging from the theory of remote sensing, to instrument development and application.

This certificate is available to graduate degree-seeking and non-matriculated students. Additional certificate information can be found on the department's Remote Sensing Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/remote-sensing-certificate/>) webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admissions Requirements

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra and differential equations; two semesters of undergraduate calculus-based physics; and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates (<https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificates/>) webpage; nondegree and non-matriculated students may visit the AES Certificates & Continuing

Education (<https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/>) webpage.

## Certificate Requirements

Four courses are required totaling at least 12 credit hours.

- Two courses from one of the following topical areas (6 credit hours):
  - Data analysis
  - Instrumentation and measurement techniques
  - Remote sensing theory
- One course in each of the two remaining topical areas (6 credit hours).

Note that MS students using the Remote Sensing Certificate for their degree requirements in lieu of an MS thesis or two semester graduate projects may count a maximum of 2 of the 4 required RSESS Focus Area courses toward the certificate requirement.

Grades of B or higher are required for fulfillment of requirements and certificate award. Students also pursuing other graduate certificates may not use the same courses to count for both certificates.

Code	Title	Credit Hours
<b>Data Analysis Courses</b>		
ASEN 5307	Engineering Data Analysis Methods	3
ASEN 6337	Remote Sensing Data Analysis	3
ASTR 5550	Observations, Data Analysis and Statistics	3
ECEN 5244	Stochastic / Environmental Signal Processing	3
ECEN 5254	Remote Sensing Signals and Systems	3
ECEN 5612	Random Processes for Engineers	3
ECEN 5652	Detection and Extraction of Signals from Noise	3
GEOG 5103	Geographic Information Science: Spatial Analytics	4
GEOG 5203	Geographic Information Science: Spatial Modeling	4
GEOG 5303	Geographic Information Science: Spatial Programming	4
<b>Instrumentation &amp; Measurement Techniques Courses</b>		
ASEN 5168		3
ASEN 5245	Radar and Remote Sensing	3
ASEN 6050	Space Instrumentation	3
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture	3
ASEN 6365	Lidar Remote Sensing	3
ASTR 5760	Astrophysical Instrumentation	3
ECEN 5134	Electromagnetic Radiation and Antennas	3
GEOG 5100	Special Topics: Geography (Topic needs to be relevant to instrumentation/measurement)	1-4
PHYS 5160	Fundamentals of Optics and Lasers	3

Code	Title	Credit Hours
<b>Remote Sensing Theory Courses</b>		
ASEN 6265	Fundamentals of Spectroscopy for Optical Remote Sensing	3
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
ATOC 5560	Radiative Processes in Planetary Atmospheres	3
ECEN 5264	Electromagnetic Absorption, Scattering, and Propagation	3
GEOG 5093	Remote Sensing of the Environment	4
GEOG 5100	Special Topics: Geography (Advanced Remote Sensing)	1-4
PHYS 5150	Introductory Plasma Physics	3

## Architectural Engineering

Architectural engineering focuses on the design, construction and operation of buildings and the integration of their systems. The department offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees in architectural engineering with focus areas in:

- Building energy engineering
- Illumination engineering
- Materials and carbon
- Construction engineering and management

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>).

Course code for this program is AREN.

## Research Interests and Facilities

The Larson HVAC Laboratory has been a staple of the University of Colorado's building energy research activities and AREN program education. The laboratory has been the stepping stone for fundamental and applied research in building energy efficiency, energy controls, thermal comfort and indoor air quality. The newly renovated Larson HVAC Laboratory provides a unique facility that permits the evaluation of entire systems in a controlled dynamic environment, providing repeatable test conditions. The laboratory has been recently redesigned to allow maximum flexibility in conducting a wide variety of research and testing procedures. In particular, both the HVAC and control systems in the laboratory are reconfigurable in that components, subsystems or entire systems can be readily installed and tested. For instance, the performance of air handling units, displacement ventilation units, chilled beams and variable refrigerant flow units can be tested. In addition, coils, air mixers, dampers, filters and variable frequency drives can be evaluated. Moreover, the laboratory offers the possibility to test standalone HVAC and refrigeration systems including water heaters, boilers, thermal energy storage tanks and chillers.

The Lighting Laboratory is a learning and research space for lighting students in the AREN program. The lab has a dynamic ceiling with adjustable height to allow a wide range of academic and research exploration. Although the lab has a full-wall, with north-facing windows, there are blackout curtains installed to eliminate any undesirable external light. In addition, this lab houses a goniophotometer used to

measure the intensity of light leaving a luminaire at various vertical and horizontal angles. The measured data allow establishing photometric light distribution of the luminaire and metrics such as total lumen output, luminaire luminance and zonal lumen summary. The lab also houses a small lighting sphere, which allows testing of lumen output of LED luminaires and LED chips. In addition, the lighting lab includes a studio space used primarily for lighting research. The lab has an extensive aluminum open ceiling grid that allows for quick electrical and physical connection of light sources and luminaires for research. For lighting design-oriented classes, students have access to theatrical-type and programmable color-changing luminaires to do mock-ups and study lighting effects.

The AREN laboratories offer state-of-the-art facilities to test a wide range of operational and control strategies for lighting and HVAC systems and subsystems. Indeed, several control projects have been carried out in the Larson HVAC laboratory including demand-ventilation controls, optimal chiller and thermal energy storage controls, outdoor air intake controls, and optimal operation of evaporative systems. In addition, fault diagnostic algorithms have been tested in the laboratory for specific HVAC equipment including for heating and cooling coils, chillers and outdoor air intake dampers.

## Master's Degrees

- Architectural Engineering - Master of Science (MS) (p. 1532)
- Architectural Engineering - Professional Master of Science (MSAE) (p. 1534)

## Doctoral Degree

- Architectural Engineering - Doctor of Philosophy (PhD) (p. 1535)

## Certificate

- Architectural Lighting - Graduate Certificate (p. 1627)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Amadei, Bernard ([https://experts.colorado.edu/display/fisid\\_105978/](https://experts.colorado.edu/display/fisid_105978/))

## Courses

### AREN 5001 (3) Building Science and Engineering I

Prepares graduate students with general knowledge and skills that are required by advanced AREN technical courses. Covers two parts of materials: Building Lighting Systems and Building Electrical Systems.

**Requisites:** Restricted to graduate students in the College of Engineering.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Building Systems Engineering

### AREN 5002 (3) Building Science and Engineering II

Introduces AREN fundamentals to new graduate students entering the Architectural Engineering Program (AREN) but without general Civil or Architectural Engineering background. This course is part of a two-course set with AREN 5001: Building Science and Engineering I. This course covers two parts: (1) building thermal science and engineering; (2) building material science and engineering.

**Requisites:** Restricted to graduate students in the College of Engineering.

**Grading Basis:** Letter Grade

### AREN 5010 (3) Energy System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4010

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisite AREN 4110 or AREN 5110.

**Additional Information:** Departmental Category: Building Systems Engineering

### AREN 5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4040

**Requisites:** Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite AREN 3010 or AREN 5002.

**Additional Information:** Departmental Category: Building Systems Engineering

### AREN 5030 (3) Data Science for Energy and Buildings

Establishing hands-on skills along with understanding of underlying mathematical concepts of current machine learning approaches including: ordinary least squares, quantile, logistic, and local regression; unsupervised methods including principal component analysis and clustering; tree-based models such as regression trees and random forests; kernel-based methods such as support vector and Gaussian process regression; Bayesian inference; as well as shallow and deep neural networks. Numerous examples and case studies applicable to thermal/building/renewable/district energy systems will be used. Undergraduate seniors will be allowed with instructor consent.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN).

### AREN 5061 (3) Distributed Electricity Generation

Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities. Formerly AREN 5060.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4061

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite AREN 3040 or AREN 5001.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Building Systems Engineering

### AREN 5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisite AREN 3010 or AREN 5002.

**Additional Information:** Departmental Category: Building Systems Engineering

### AREN 5090 (3) Optimizing Grid Connected Systems

Address the challenges that the electric power grid is facing from a technical perspective, using grid modeling, mathematics (optimization and linear algebra) and programming (Python). The course will also touch on a variety of topics such as electricity markets, renewable energy integration, and distributed energy resources, including how buildings can help the broader electrical grid. Students will gain skills that will help them prepare for careers in building controls, renewable energy, energy policy, and more. Do not take this class if you have already taken a power systems optimization course.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisites students should have prior experience/coursework in programming (beyond Excel) and linear algebra before taking this course.

**Grading Basis:** Letter Grade

**AREN 5110 (3) HVAC System Design**

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4110

**Requisites:** Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite AREN 3010 or AREN 5002.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 5130 (3) Optical Design for Illumination and Solid State Lighting**

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4130

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisite AREN 3540.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 5510 (3) Architectural Lighting I**

Teaches the fundamentals of architectural lighting systems and the human responses to those systems. Describes the properties of light sources, how light interacts with architectural elements, and how light affects human visual and non-visual responses. Provides a broad overview of the holistic effects of light on building occupants, as well as the implications for building energy use and sustainability. Previously offered as a special topics course.

**Requisites:** Restricted to non-degree (NDGR) graduate students only.

**AREN 5520 (3) Architectural Lighting II**

Builds on the fundamentals taught in AREN 5500 with a detailed look at how technical information about lighting systems can be used for design concepts and analyses. Provides an examination of daylighting in buildings. Describes the latest research and design standards for color rendering, glare, flicker, circadian rhythms, and alerting effects. Concludes by considering case studies of various project types.

**Requisites:** Open to Non-degree, Non sponsored Students only.

**AREN 5530 (3) Architectural Lighting Capstone**

Concludes the nine-credit Professional Graduate Certificate in Architectural Lighting with an immersive hands-on experience. Concepts learned in the two prior online courses will be demonstrated and experienced using facilities and equipment available on the CU Boulder campus. A culminating, comprehensive project submittal that includes content developed during the entire three-course sequence will be submitted following the on-campus experience.

**Requisites:** Requires prerequisite courses of AREN 5510 and AREN 5520 (all minimum grade C-). Restricted to non-degree (NDGR) graduate students only.

**AREN 5540 (3) Architectural Exterior and Landscape Lighting Design**

Introduces the fundamentals of nighttime illumination for architectural exteriors and landscapes. Students will learn about the interaction of light and human vision at night; lighting technologies used in outdoor settings; societal, environmental and ecological issues related to the application of light at night; lighting design principles and techniques that use light and darkness both creatively and responsibly.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4540

**Requisites:** Requires prerequisite course of AREN 4550 for BAM students or (AREN 5001 and AREN 5550) for graduate students, all minimum grade C-. Restricted to graduate students and students accepted in the Bachelor Accelerated Masters (BAM) program.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 5550 (3) Illumination 2**

Applies the principles studied in Illumination 1. Provides further study in architectural lighting design methods. Uses lighting studio work to develop a broad knowledge of lighting equipment, design methods, and their application in a series of practical design problems in modern buildings.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4550

**Requisites:** Requires corequisite course of AREN 5001 for graduate students. Restricted to graduate students and students in the Bachelor Accelerated Masters (BAM) program.

**Grading Basis:** Letter Grade

**AREN 5560 (3) Luminous Radiative Transfer**

Teaches fundamentals of radiative exchange as applied to illumination engineering. Describes and uses principal numerical techniques for radiative transfer analysis. Applies techniques to lighting design and analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4560

**Requisites:** Requires prerequisite course of AREN 3540 or AREN 5001 (minimum grade C-).

**AREN 5570 (3) Building Electrical Systems Design 1**

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4570

**Requisites:** Requires prerequisite course of AREN 5002 (minimum grade D-).

**Recommended:** Prerequisite AREN 3030.

**AREN 5580 (3) Daylighting**

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4580

**Requisites:** Requires prerequisite course of AREN 3540 or AREN 5001 (minimum grade C-).

**AREN 5620 (3) Adaptive Lighting Systems**

Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4620

**Requisites:** Requires prerequisite courses of AREN 3540 and AREN 4550 (minimum grade D-).

**Recommended:** Prerequisite AREN 4130.

**AREN 5630 (3) Advanced Lighting Design**

Intended to help students understand light as a medium in design, begin the formulation of a philosophical perspective for its application, and continue to develop the skills required to design and implement lighting systems. Knowledge from previous lighting classes (Illumination I and Illumination II) is essential to this course.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4630

**Requisites:** Requires prerequisite course of AREN 4550 for BAM students or AREN 5001 and AREN 5550 for graduate students (all minimum grade C-). Restricted to graduate students and students in the Bachelor Accelerated Masters (BAM) program.

**Grading Basis:** Letter Grade

**AREN 5650 (3) Forensic Engineering**

Identify and explore the physical, chemical, mechanical, and biological deterioration mechanisms in the most common construction materials; concrete, masonry, metals, wood, polymers, and fiber-reinforced composites. Course topics include an introduction to failure analysis; materials science; ion diffusion; electrochemistry (corrosion); fracture, fatigue, and creep; and diagnostic, retrofit, and rehabilitation strategies for extended service life.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENVCVEN, or C-EVENVCVEN) only.

**AREN 5660 (3) Embodied Carbon in Buildings**

Introduces students to whole building life cycle assessment (LCA) and embodied carbon in buildings. Topics include LCA methodologies, whole-building LCA tools, materials science of low-carbon and carbon-storing building materials, and strategies for reducing embodied carbon.

**Requisites:** Restricted to graduate students only, or BAM students with C-AREN, C-CVEN, or C-ARENVCVEN subplan.

**Recommended:** Prerequisite AREN 5002.

**AREN 5830 (1-3) Architectural Engineering Special Topic**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**AREN 5849 (1-3) Independent Study in Architectural Engineering**

The topics and the goals of this course are tailored to fit the needs of the student in various areas related to the Architectural Engineering program. These topics and goals, documented in the course agreement form at the start of the semester, include but are not limited to areas of building energy engineering, building illumination systems, construction engineering and management, building materials and resources, and building electrical systems.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**AREN 5890 (3) Sustainable Building Design**

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4890

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENVCVEN, or C-EVENVCVEN) only.

**Recommended:** Prerequisite AREN 3010 or AREN 5002.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 5990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts**

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method.

Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

**Equivalent - Duplicate Degree Credit Not Granted:** AREN 4990

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENVCVEN, or C-EVENVCVEN) only.

**Recommended:** Prerequisites AREN 2120 and APPM 2360.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 6950 (1-6) Master's Thesis**

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 6960 (1-3) Master's Report**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Additional Information:** Departmental Category: Building Systems Engineering

**AREN 8990 (1-10) Doctoral Dissertation**

A minimum of 30 credit hours is required.

**Additional Information:** Departmental Category: Building Systems Engineering

## Architectural Engineering - Master of Science (MS)

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a Master of Science degree with study emphases in several major areas:

- Building systems engineering
- Illumination engineering
- Materials and carbon
- Construction engineering and management

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Architectural Engineering - Bachelor of Science (BS) (p. 799)

## Requirements

For a Master of Science (MS) degree in architectural engineering, students may undertake Plan I (with a thesis) or Plan II (with a project).

Up to 6 credits of independent study may be taken, where an individual course of study is worked out between the student and a faculty member. Up to 9 credits of graduate courses can be transferred from another institution. Students are allowed up to 6 credits in total of non-technical coursework for the MS/PhD degree.

## Degree Plans

### Plan I: Thesis Option

Plan I requires 24 credits of coursework, plus 6 credits of thesis work. The thesis is a formal research report that discusses an organized research topic. Experience has shown that it takes a student from 24 to 30 months to complete this plan. Financial support is generally limited to exceptionally well-qualified students selecting Plan I.

### Plan II: Non-Thesis Option

Plan II requires 27 credits of coursework, plus 3 credits of MS project work. The 3-credit Master's Report (AREN 6960) is related to an applied research AREN topic. It can be successfully completed in 18–24 months by a diligent student. Note that one-half of the coursework must be taken in the CEAE Department (an exception may be made if the relevant courses were taken as part of an undergraduate degree).

With the approval of the advisor, non-CEAE courses at the 4000 level may be used for graduate credit up to a maximum of 6 credits.

## Course Requirements

Courses offered in the architectural engineering graduate program may be separated into four focus areas, one specific to the Construction Engineering & Management discipline and three related to the Building Systems Engineering discipline. Students may decide to concentrate in one of these focus areas, or they may wish to take a broad selection from the courses; there is no requirement for picking any specific focus area under the general focus area option.

Code	Title	Credit Hours
<b>Core Courses</b>		<b>6</b>
AREN 5001	Building Science and Engineering I	
AREN 5002	Building Science and Engineering II	
<b>General Courses</b>		<b>6-9</b>
(Suitable for any focus area)		

AREN 5890	Sustainable Building Design
AREN 5990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts
AREN 5830	Architectural Engineering Special Topic (Building Systems Modeling and Simulation)
AREN 5030	Data Science for Energy and Buildings
CVEN 5006	Construction Engineering and Management Fundamentals

### Focus Area: Building Energy Engineering

AREN 5010	Energy System Modeling and Control
AREN 5020	Building Energy Audits
AREN 5060	
AREN 5080	Computer Simulation of Building Energy Systems
AREN 5110	Building Energy Systems Engineering
AREN 5570	Building Electrical Systems Design 1
AREN 5090	Optimizing Grid Connected Systems
ECEN 5007	Special Topics (Data Analytics and Decision-making for Power Systems)
ECEN 5007	Special Topics (Renewable Energy Future of Power Grid )
ECEN 5007	Special Topics (Power Systems Planning and Optimizations)

### Focus Area: Illumination Engineering

AREN 5130	Optical Design for Illumination and Solid State Lighting
AREN 5550	Illumination 2
AREN 5560	Luminous Radiative Transfer
AREN 5540	Architectural Exterior and Landscape Lighting Design
AREN 5580	Daylighting
AREN 5620	Adaptive Lighting Systems
AREN 5630	Advanced Lighting Design

### Focus Area: Materials and Carbon

AREN 5650	Forensic Engineering
CVEN 5835	Special Topics for Seniors/Grads (Design of Wood Structures)
CVEN 5835	Special Topics for Seniors/Grads (Design of Masonry Structures)
AREN 5660	Embodied Carbon in Buildings
CVEN 5831	Special Topics (Construction Materials)

### Focus Area: Construction Engineering & Management

CVEN 5246	Legal Aspects of Construction
CVEN 5276	Engineering Risk and Decision Analysis
CVEN 5226	Construction Safety
CVEN 5346	Managing Construction and Engineering Projects and Organizations
CVEN 5446	Infrastructure Asset Management

## Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering program (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/engineering-developing-communities-graduate-certificate/>) must fulfill

the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

## Architectural Engineering - Professional Master of Science (MSAE)

The Professional Master of Science in Architectural Engineering offers contemporary programs of study related to building design and construction.

Students are able to select from one of six focus areas:

- Data science for buildings
- Building energy
- Building decarbonization
- Lighting and daylighting
- Indoor environmental quality for buildings
- Structural engineering
- Construction engineering and management

Students are expected to complete 30 credit hours of coursework to meet the requirements of the MS degree. Each subplan consists of required courses and elective courses that must be selected in consultation with an academic advisor. Students should be able to successfully complete all degree requirements within 12–18 months.

## Requirements

### Required Courses and Credits

As alternatives to some of the elective courses, up to 6 credit hours in independent studies can be considered by the students to enhance their professional skills in any of the focus areas listed below.

#### Data Science for Buildings Subplan

Code	Title	Credit Hours
<b>Required Courses</b>		
AREN 5001	Building Science and Engineering I	3
AREN 5002	Building Science and Engineering II	3
EMEN 5010	Introduction to Engineering Management	3
or EMEN 5020	Finance for Engineering Managers	
or CVEN 5006	Construction Engineering and Management Fundamentals	
AREN 5030	Data Science for Energy and Buildings	3
CVEN 6833	Special Topics (Advanced Data Analysis Techniques)	3
CVEN 5836	Special Topics for Seniors/Grads (AI/ML in the Built Environment)	3

#### Elective Courses

Students can select any set of graduate-level elective courses in architectural engineering, civil engineering, or another science or engineering field with advisor approval, depending on the desired focus area and professional skills. 12

#### Building Energy Subplan

Code	Title	Credit Hours
<b>Required Courses</b>		
AREN 5001	Building Science and Engineering I	3
AREN 5002	Building Science and Engineering II	3
EMEN 5010	Introduction to Engineering Management	3
or EMEN 5020	Finance for Engineering Managers	
or CVEN 5006	Construction Engineering and Management Fundamentals	

Select two of the following:

AREN 5010	Energy System Modeling and Control	
AREN 5080	Computer Simulation of Building Energy Systems	
AREN 5990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	
AREN 5090	Optimizing Grid Connected Systems	
AREN 5830	Architectural Engineering Special Topic (Building Systems Simulation and Modeling)	

#### Elective Courses

Students can select any set of graduate-level elective courses in architectural engineering, civil engineering, or another science or engineering field with advisor approval, depending on the desired focus area and professional skills. 15

#### Building Decarbonization Subplan

Code	Title	Credit Hours
<b>Required Courses</b>		
AREN 5001	Building Science and Engineering I	3
AREN 5002	Building Science and Engineering II	3
EMEN 5010	Introduction to Engineering Management	3
or EMEN 5020	Finance for Engineering Managers	
or CVEN 5006	Construction Engineering and Management Fundamentals	
AREN 5660	Embodied Carbon in Buildings	3
AREN 5890	Sustainable Building Design	3

#### Elective Courses

Students can select any set of graduate-level elective courses in architectural engineering, civil engineering, or another science or engineering field with advisor approval, depending on the desired focus area and professional skills. 15

#### Lighting and Daylighting Subplan

Code	Title	Credit Hours
<b>Required Courses</b>		
AREN 5001	Building Science and Engineering I	3
EMEN 5010	Introduction to Engineering Management	3
or EMEN 5020	Finance for Engineering Managers	
or CVEN 5006	Construction Engineering and Management Fundamentals	
AREN 5550	Illumination 2	3
AREN 5580	Daylighting	3

AREN 5540	Architectural Exterior and Landscape Lighting Design	3
-----------	--	---

Select one of the following

AREN 5620	Adaptive Lighting Systems	
AREN 5630	Advanced Lighting Design	

#### Elective Courses

Students can select any set of graduate-level elective courses in architectural engineering, civil engineering, or another science or engineering field with advisor approval, depending on the desired focus area and professional skills. 12

### Indoor Environmental Quality for Buildings Subplan

Code	Title	Credit Hours
------	-------	--------------

#### Required Courses

AREN 5001	Building Science and Engineering I	3
AREN 5002	Building Science and Engineering II	3
EMEN 5010	Introduction to Engineering Management	3
or EMEN 5020	Finance for Engineering Managers	
or CVEN 5006	Construction Engineering and Management Fundamentals	

AREN 5990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	3
-----------	---	---

AREN 5620	Adaptive Lighting Systems	3
-----------	---------------------------	---

MCEN 5141	Indoor Air Pollution	3
-----------	----------------------	---

#### Elective Courses

Students can select any set of graduate-level elective courses in architectural engineering, civil engineering, or another science or engineering field with advisor approval, depending on the desired focus area and professional skills. 12

### Structural Engineering Subplan

Code	Title	Credit Hours
------	-------	--------------

#### Required Courses

CVEN 5111	Structural Dynamics	3
CVEN 5525	Computational Structural Analysis 1	3
CVEN 6595	Earthquake Engineering	3
AREN 5660	Embodied Carbon in Buildings	3

Select one of the following:

CVEN 5575	Advanced Topics in Steel Design	
CVEN 5585	Advanced Topics in Reinforced Concrete Design	

CVEN 5835	Special Topics for Seniors/Grads (Design of Masonry Structures or Design of Wood Structures)	
-----------	--	--

#### Elective Courses

Students can select any set of graduate-level elective courses in architectural engineering, civil engineering, or another science or engineering field with advisor approval, depending on the desired focus area and professional skills. 15

### Construction Engineering Management Subplan

Code	Title	Credit Hours
------	-------	--------------

#### Required Courses

AREN 5001	Building Science and Engineering I	3
-----------	------------------------------------	---

CVEN 5006	Construction Engineering and Management Fundamentals	3
-----------	--	---

CVEN 5836	Special Topics for Seniors/Grads (BIM for Capital Projects)	3
-----------	---	---

Select three of the following:

CVEN 5226	Construction Safety	
-----------	---------------------	--

CVEN 5346	Managing Construction and Engineering Projects and Organizations	
-----------	--	--

CVEN 5446	Infrastructure Asset Management	
-----------	---------------------------------	--

CVEN 5246	Legal Aspects of Construction	
-----------	-------------------------------	--

#### Elective Courses

Students can select any set of graduate-level elective courses in architectural engineering, civil engineering, or another science or engineering field with advisor approval, depending on the desired focus area and professional skills. 12

## Architectural Engineering - Doctor of Philosophy (PhD)

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a PhD degree with study emphases in several major areas:

- Building Energy Engineering
- Illumination Engineering
- Materials and Carbon
- Construction Engineering and Management

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

## Requirements

### Course Requirements

A total of 30 credit hours of graduate-level coursework plus 30 dissertation credit hours are required for the program.

Focus areas include:

- Building Energy Engineering
- Illumination Engineering
- Materials & Carbon
- Construction Engineering & Management

There is no requirement for picking a specific focus area and students can select from courses under any of the four focus areas. Students must complete a minimum of 9 credit hours from the list of courses.

Code	Title	Credit Hours
------	-------	--------------

#### Core Courses

Required for all students with no AREN undergraduate degrees

AREN 5001	Building Science and Engineering I	3
-----------	------------------------------------	---

AREN 5002	Building Science and Engineering II	3
-----------	-------------------------------------	---

<b>General Courses</b>		<b>9</b>
------------------------	--	----------

Suitable for any focus area

AREN 5030	Data Science for Energy and Buildings
CVEN 5006	Construction Engineering and Management Fundamentals

**Focus Area: Building Energy Engineering**

AREN 5010	Energy System Modeling and Control
AREN 5020	Building Energy Audits
AREN 5060	
AREN 5080	Computer Simulation of Building Energy Systems
AREN 5090	Optimizing Grid Connected Systems
AREN 5110	Building Energy Systems Engineering
AREN 5570	Building Electrical Systems Design 1
ECEN 5007	Special Topics (Data Analytics and Decision-making for Power Systems)
ECEN 5007	Special Topics (Renewable Energy Future of Power Grid )
ECEN 5007	Special Topics (Power Systems Planning and Optimizations)

**Focus Area: Illumination Engineering**

AREN 5130	Optical Design for Illumination and Solid State Lighting
AREN 5550	Illumination 2
AREN 5540	Architectural Exterior and Landscape Lighting Design
AREN 5560	Luminous Radiative Transfer
AREN 5580	Daylighting
AREN 5620	Adaptive Lighting Systems
AREN 5630	Advanced Lighting Design

**Focus Area: Materials and Carbon**

AREN 5650	Forensic Engineering
CVEN 5835	Special Topics for Seniors/Grads (Design of Wood Structure)
AREN 5660	Embodied Carbon in Buildings
CVEN 5835	Special Topics for Seniors/Grads (Design of Masonry Structures)
CVEN 5831	Special Topics (Construction Materials)

**Focus Area: Construction Engineering & Management**

CVEN 5246	Legal Aspects of Construction
CVEN 5276	Engineering Risk and Decision Analysis
CVEN 5226	Construction Safety
CVEN 5346	Managing Construction and Engineering Projects and Organizations
CVEN 5446	Infrastructure Asset Management

**Residency Requirements**

For an entrant from another university, up to 21 hours of acceptable graduate courses may be transferred, leaving at least 9 hours of coursework to be completed at the University of Colorado upon the approval of their advisors. The transfer credits are transferable at the discretion of the research advisor, and students may be asked to

take additional courses toward the completion of their degree. Work already applied toward a graduate degree received from the University of Colorado or another institution cannot be accepted for transfer toward another graduate degree of the same level at the University of Colorado. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

For students already in the MS program in the CEAE department, 30 hours of graduate coursework performed at CU is applicable towards the PhD degree upon the approval of their advisors. The PhD also requires that 30 hours of dissertation credit be taken, with a minimum residency of two years. After passing the comprehensive exam, PhD candidates are required to maintain continuous registration. Candidates must register for at least 5 hours of dissertation credits each semester.

**Preliminary Examination**

Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 24 months from the time the student is first enrolled in the doctoral program. Each CEAE group has a designated time for PhD students to take the exam. Students should discuss the schedule, date and format of the exam with their academic adviser.

**Comprehensive Examination**

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

**PhD Dissertation**

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

**Time Limit**

All degree requirements must be completed within six years of the date of commencing coursework.

**Graduate Certificate in Global Engineering**

Students admitted to the Graduate Certificate in Global Engineering (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/engineering-developing-communities-graduate-certificate/>) program must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

**Biomedical Engineering**

CU Boulder's Biomedical Engineering program offers students a flexible degree program to achieve their degree and research goals. Biomedical engineering is an exciting, multidisciplinary field that lies at the intersection of medicine, biology and engineering.

With a cross-listed curriculum and an interdisciplinary faculty roster, the BME program delivers a multi-faceted and rigorous education in biomedical engineering. Our department consists of 36 faculty members from multiple backgrounds and disciplines. They conduct research in the

areas of biomechanics, tissue engineering, biomaterials, drug delivery, molecular imaging, image-guided therapy, point-of-care diagnostics, biosensors, prosthetics, bioastronautics, systems biology and many more.

Our program offers students the opportunity to take courses in any of the following areas:

- Biomechanics and mechanobiology
- Imaging and diagnostics
- Medical devices
- Therapeutics

The BME program is directed by Dr. Corey Neu. For more information, visit the Biomedical Engineering Program (<https://www.colorado.edu/bme/>) website.

**Course code for this program is BMEN.**

## Master's Degree

- Biomedical Engineering - Master of Science (MS) (p. 1539)

## Doctoral Degree

- Biomedical Engineering - Doctor of Philosophy (PhD) (p. 1540)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### **BMEN 5110 (3) Regenerative Biology and Tissue Repair**

Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 & 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5110 and BMEN 4110 and MCEN 4110

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

### **BMEN 5111 (3) Introduction to Microfluidics**

Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5111 and MCEN 4111 and BMEN 4111

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

### **BMEN 5113 (3) Mechanics of Cancer**

Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influences cancer and its etiology as well as the development of future treatments.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5113 and BMEN 4113 and MCEN 4113

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

### **BMEN 5117 (3) Anatomy and Physiology for Biomedical Engineering**

The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology. Graduate students will be required to present a primary literature review and lead discussion during a class period, as well as take the lead on the final project: a mock NIH grant proposal.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4117 or MCEN 5117 BMEN 4117

**Requisites:** Restricted to graduate Biomedical Engineering students only.

### **BMEN 5127 (3) Biomedical Ultrasound**

Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow and tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; programming exercises for data processing; and a team design project.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5127 and MCEN 4127 and BMEN 4127

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### **BMEN 5157 (3) Modeling of Human Movement**

Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5157 and MCEN 4157 and BMEN 4157

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

**BMEN 5171 (3) Biofluids on the Micro Scale**

Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5171 and MCEN 4171 and BMEN 4171

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5231 (3) Computational Fluid Dynamics**

This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5231 and MCEN 4231 and BMEN 4231

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5292 (3) Materials and Devices in Medicine**

The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Sam

**Requisites:** Requires prerequisite course of MCEN 4117 or MCEN 5117 (minimum grade C-). Restricted to any College of Engineering and Applied Science graduate students or to Biomedical Engineering undergraduate majors only.

**BMEN 5840 (1-6) Independent Study**

Provides opportunities for independent study at the graduate level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 5939 (1-6) Biomedical Engineering Internship**

Grants credit to international graduate students for conducting research via professional research opportunities in the biomedical engineering field. Students are responsible for securing their own internships.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**BMEN 6519 (1-3) Special Topics in Biomedical Engineering**

Credit hours and subject matter to be arranged.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**BMEN 6949 (1) Master's Candidate for Degree**

Credit hours and subject matter to be arranged.

**BMEN 6950 (1-6) Master's Thesis**

Work with a faculty advisor on a masters thesis.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate Biomedical Engineering students only.

**BMEN 7840 (1-6) Independent Study**

Provides opportunities for independent study at the graduate (PhD) level. Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

**Requisites:** Restricted to Biomedical Engineering BMEN-PhD students only.

**BMEN 8990 (1-10) Doctoral Dissertation**

Work with a faculty advisor on a doctoral dissertation.

**Repeatable:** Repeatable for up to 60.00 total credit hours.

**Requisites:** Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

## Biomedical Engineering - Master of Science (MS)

The Biomedical Engineering Master of Science (MS) degree program is designed to be flexible to meet the individual student's needs. Students will collaborate with faculty and other advisors to create a tailored degree plan based on their career interests and goals.

Students may choose either a coursework- or thesis-based MS. The thesis option requires completion of a research project with a faculty mentor, a written thesis that describes the research in detail, and an oral defense in front of a committee of program faculty.

For more information, visit the Biomedical Engineering MS Program (<https://www.colorado.edu/bme/masters-program/>) page.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Biomedical Engineering - Bachelor of Science (BSBM) (p. 769)

## Requirements

Biomedical Engineering MS students must complete 30 credit hours of coursework at the 5000 level or higher and obtain a minimum grade of

C (2.0) in each class to count towards the degree. Students must also maintain a 3.0 cumulative GPA or higher to be in good standing with the Graduate School.

## Required Courses

Code	Title	Credit Hours
<b>Core Required Course</b>		
BMEN 5117	Anatomy and Physiology for Biomedical Engineering (Fall)	3
<b>Additional Coursework</b>		
Designated biomedical engineering courses		15
Additional credit hours obtained, as needed, from other fields (e.g., business or other engineering electives). Of these 12 credit hours, MS Thesis students must complete 4-6 thesis credit hours in which they will submit a written thesis following the graduate school specifications and present their research findings to a three-member committee.		12
<b>Total Credit Hours</b>		<b>30</b>

For more information, visit the Biomedical Engineering MS Program ([https://www.colorado.edu/bme/masters-program/#coursework\\_requirements-127](https://www.colorado.edu/bme/masters-program/#coursework_requirements-127)) webpage.

## Biomedical Engineering - Doctor of Philosophy (PhD)

Biomedical Engineering PhD students have the opportunity to participate in cutting-edge research with engineering faculty in many different biomedical fields. Our program provides the scientific foundation to prepare students for careers in academia, healthcare, industry and government labs.

The PhD program is open to both first-time graduate students as well as those who hold master's degrees.

For more information, visit the Biomedical Engineering PhD Program (<https://www.colorado.edu/bme/academics/phd-program/>) page.

## Requirements

All Biomedical Engineering PhD student must complete a minimum of 30 credit hours of coursework at the 5000 level or higher, plus 30 credit hours of dissertation credits. Some research advisors will require that their students complete more than 30 course credits, and the department recommends that specific course decisions should be agreed upon through individual faculty/student discussions. Students must receive a minimum grade of B- (2.7) in each class to count towards the degree. Students must also maintain a 3.0 cumulative GPA or higher to be in good standing with the graduate school.

## Required Courses

Code	Title	Credit Hours
<b>Core Required Course</b>		
BMEN 5117	Anatomy and Physiology for Biomedical Engineering (Fall)	3
<b>Additional Coursework</b>		
Designated biomedical engineering courses <sup>1</sup>		15

Additional credit hours obtained, as needed, from other fields (e.g., business or other engineering electives) <sup>1</sup> 12

**Total Credit Hours** **30**

<sup>1</sup> May be fulfilled by courses taken as part of a prior MS or PhD program.

## Preliminary Examination

Biomedical Engineering PhD students are required to pass a preliminary examination. It consists of a comprehensive review of primary literature that supports the current and future research directions of the student. This must be completed within the first three semesters after matriculation into the program.

## Comprehensive Examination

The Comprehensive Examination is an important second evaluation step required to advance the student to candidacy for the PhD degree, which is typically completed within the first three years after matriculation to the program and greater than one year prior to graduation. It consists of an NIH R21-style research proposal in addition to an oral exam with a selected committee of faculty advisors, both focusing on the proposed course of research. Students will also likely have completed one chapter of their dissertation for submission to a peer-reviewed journal before taking the Comprehensive Exam.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All degree requirements for the Biomedical Engineering PhD must be completed within six years of the date commencing coursework.

## Chemical Engineering

The Department of Chemical and Biological Engineering (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) (ChBE) offers an innovative graduate program and emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within the Department of Chemical and Biological Engineering include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science; energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials, and renewable energy.

Biological engineering research includes a broad collection of focal areas spanning from the molecular scale (metabolites, genes, proteins)

to the cellular and multicellular scales. Biological engineering projects account for a significant portion of the research activity within the ChBE Department. This research is supported in a variety of manners: federal grants (NIH, NSF, DOD, etc.), national foundations (Howard Hughes, Cystic Fibrosis, etc.), and industrial collaborators.

Functional Materials research in the ChBE Department is concentrated in a diverse group of research areas including polymers, nanostructured materials, photovoltaic materials, ultrathin films, catalytic materials, computational materials science, self-assembled monolayers, and liquid crystalline materials. The department has strength in studying materials problems at the nanometer and sub-nanometer length scales. Such fundamental investigations are directed toward technological applications.

Finally, the ChBE Department has an active program in renewable energy research. Studies range from the production and utilization of hydrogen to materials for photovoltaics to biorefining and biofuels research. A number of efforts focus on developing catalysts for converting water to hydrogen and CO<sub>2</sub> into fuels such as CO and methanol. Another area of focus is the study of novel photovoltaic materials and structures involving organic, inorganic, and hybrid structures for efficient solar energy harvesting.

**Course code for this program is CHEN.**

## Master's Degree

- Chemical Engineering - Master of Science (MS) (p. 1544)

## Doctoral Degree

- Chemical Engineering - Doctor of Philosophy (PhD) (p. 1546)
- Biological Engineering - Doctor of Philosophy (PhD) (p. 1545)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### CHEN 5090 (1) Seminar in Chemical Engineering

Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.

**Requisites:** Restricted to graduate students only.

### CHEN 5128 (3) Applied Statistics In Research and Development

Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Department enforced prereq.: one introductory probability/statistics course.

### CHEN 5150 (3) Biomolecular Kinetics, Transport, and Thermodynamics

Required for the Biological Engineering PhD. This course covers aspects of kinetics, transport, and thermodynamics as they relate to interactions between biomolecules and cells. These core subjects will be introduced within concepts common to cell biology, protein/genetic engineering, and signaling, among others. Undergraduate enrollment with instructor consent only.

**Recommended:** Prerequisites Introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, organic chemistry.

### CHEN 5160 (3) Systems Analysis of Cells and Tissues

Required for the Biological Engineering PhD. This course explores how to describe signaling and regulation networks present at the cell and tissue level. Topics include gene expression, stem cell differentiation, homeostasis, and others.

**Recommended:** Prerequisite prior experience in introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, and organic chemistry.

### CHEN 5210 (4) Transport Phenomena

Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat and mass transfer and their applications to engineering problems. Department enforced prerequisites: undergraduate courses in fluid mechanics, heat transfer, and differential equations.

**Requisites:** Restricted to students with 87-180 credits (Seniors) or graduate students only.

### CHEN 5360 (3) Catalysis and Kinetics

Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis.

**Requisites:** Requires corequisite course of CHEN 4330. Restricted to Chemistry (CHEM) or Chemical Engineering (CHEN) graduate students only.

### CHEN 5370 (3) Intermediate Chemical Engineering Thermodynamics

Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures and solutions. Also looks at relations between thermodynamics and statistical mechanics. Department enforced prerequisite: an undergraduate course in chemical thermodynamics.

**Requisites:** Restricted to graduate students only.

### CHEN 5390 (3) Chemical Reactor Engineering

Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution and diffusion effects. Department enforced prerequisite: undergraduate course in chemical reactor design/kinetics.

**Requisites:** Restricted to graduate students only.

### CHEN 5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces

Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena.

**Requisites:** Requires prerequisite course of CHEN 3200 (minimum grade D-).

### CHEN 5440 (3-4) Design of Materials

The course content includes introduction and study of important concepts in solid state physics (particularly those relevant for design of materials); origin, characterization and design of mechanical, electronic, optical, magnetic, thermal and electrochemical properties of materials; design of bulk and nanostructured composites; introduction to polymers and soft materials; fundamentals of colloids and interfaces; and nanoscale chemistry and physics for design or desired material properties.

**Grading Basis:** Letter Grade

### CHEN 5450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4450

**Requisites:** Restricted to graduate students only.

### CHEN 5460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4460

**Requisites:** Restricted to graduate students only.

**CHEN 5470 (3) Functional Materials Chemistry**

The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.

**Recommended:** Prerequisite Introductory course(s) in materials or organic chemistry.

**CHEN 5480 (3) Solar Cells and Optical Devices for Sustainable Buildings**

This course assumes no background in electronic materials and explains how silicon and cutting-edge metal halide perovskite solar cells are designed, fabricated and characterized. Topics will include optics, band diagrams, wafer fabrication, most thin film deposition techniques, module design and economics. Other optical devices that can help the world rapidly reduce its carbon emissions, such as light-emitting diodes and energy saving windows with dynamic tinting, will also be covered.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4480

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite a course in materials science (for example CHEN 4440), the physics of electromagnetism and optics at a very basic level.

**CHEN 5490 (3) Electrochemical Engineering**

This course discusses fundamentals and applications of electrochemical systems from an engineering perspective. Aspects of thermodynamics, reaction kinetics, and transport phenomena relevant to the description of electrode/electrolyte interfaces and charge transfer reactions are covered. Topics include cell equilibrium (Nernst equation), reactions rates within Butler-Volmer and Marcus theory, electrochemical double layer structure, ion transport (Poisson-Nernst-Planck equation), potential and current distributions in electrochemical cells, and experimental electroanalytical techniques. Applications include fuel cells, electrolyzers, batteries, sensors, and corrosion. Contact instructor to request to take prerequisites as corequisites.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4490

**Requisites:** Requires prerequisite courses of (CHEN 4330 or CHEN 4830) and PHYS 1120 (minimum grade D-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CHEN 5630 (1) Intellectual Property Law and Engineering**

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4630

**Requisites:** Restricted to graduate students only.

**CHEN 5650 (3) Particle Technology**

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Extra work required for graduate course.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4650

**Requisites:** Restricted to graduate students only.

**CHEN 5670 (3) Environmental Separations**

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems.

**CHEN 5730 (1) Mathematical Methods Short Course for Chemical Engineers**

Determine and apply appropriate analytical methods, which may include linear and nonlinear algebraic equations, ordinary differential equations and partial differential equations, to solve an array of chemical engineering problems. Identify and interpret the differences between model predictions and experimental results.

**Grading Basis:** Letter Grade

**CHEN 5740 (3) Analytical Methods in Chemical Engineering**

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Department enforced requisite: working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.

**Requisites:** Restricted to students with 87-180 credits (Seniors) or graduate students only.

**CHEN 5750 (3) Numerical Methods in Chemical Engineering**

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers.

**Requisites:** Restricted to graduate students only.

**CHEN 5800 (3) Bioprocess Engineering**

Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes.

**CHEN 5803 (3) Metabolic Engineering**

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4803

**Requisites:** Requires prerequisite courses of APPM 2360 and BCHM 4611 (all minimum grade C-). Restricted to graduate students only.

**CHEN 5804 (3) Protein and Enzyme Engineering**

This course reviews various applications of protein and enzyme engineering and covers key concepts in protein and enzyme design, including protein structure-function relationships; rational and evolutionary engineering approaches; genetic code expansion; cell-free protein synthesis; computational design; and biophysical methods for protein characterization. Additionally, students gain valuable experience reading, analyzing, and interpreting research results from scientific literature, as well as drafting an original research proposal.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4804

**Requisites:** Requires prerequisite courses of CHEN 3320 and CHEN 2810 and BCHM 4611 (minimum grade D-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CHEN 5805 (3) Biological Interactions to Biomaterials**

Covers major classes of materials used in medical applications. Provide an in-depth view of advanced biomaterial concepts with a focus on biological interactions with materials that relate to protein and cell interactions, the innate and acquired immune response, blood interactions and infection.

**Requisites:** Restricted to graduate students only.

**CHEN 5830 (1) Introduction to Modern Biotechnology**

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

**CHEN 5831 (2) Biotechnology Case Studies**

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan.

**Requisites:** Requires prerequisite course of CHEN 5830 (minimum grade D-).

**CHEN 5835 (3) Colloids and Interfaces**

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others.

**Requisites:** Requires prerequisite course of CHEN 3320 (minimum grade C-).

**CHEN 5836 (3) Nanomaterials**

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

**Equivalent - Duplicate Degree Credit Not Granted:** CHEN 4836

**Requisites:** Restricted to graduate students only.

**CHEN 5838 (1-3) Special Topics in Chemical Engineering**

Graduate-selected topics courses offered upon demand.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**CHEN 5840 (1-4) Independent Study**

Allows multiple enrollment in term.

**Repeatable:** Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**CHEN 5900 (3) Pharmaceutical Biotechnology**

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding.

**Requisites:** Restricted to graduate students only.

**CHEN 5919 (1-5) Special Topics in CHBE**

**Repeatable:** Repeatable for up to 5.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CHEN 5930 (1-3) Professional Internship**

This class provides a structure for CHEN and BIEN graduate students to receive academic credit for participating in internship experiences with industry partners that have an academic component consistent with graduate-level education in the engineering arts and sciences. Participation in this class requires an internship agreement between the student and the employment (industry) partner, detailing the academic goals of the internship experience. Instructor participation will include facilitation of mid-term and final assessment of student performance as well as additional educational opportunities during the internship period. May be taken during any term following initial enrollment and participation in CHEN or BIEN graduate programs.

**Requisites:** Restricted to graduate students only.

**CHEN 6210 (3) Microhydrodynamics of Suspensions and Colloids**

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers.

**Requisites:** Requires prerequisite course of CHEN 5210 (minimum grade D-).

**CHEN 6820 (3) Biochemical Engineering Fundamentals**

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing.

**Requisites:** Restricted to Chemistry (CHEM), Chemical Engineering (CHEN), Biological Engineering (BIEN), or Biological Sciences (MCDB) graduate students only.

**CHEN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**CHEN 6950 (1-6) Master's Thesis****CHEN 8990 (1-10) Doctoral Dissertation**

## Chemical Engineering - Master of Science (MS)

The Master of Science degree in chemical engineering requires 30 hours of approved credit hours and successful completion of a comprehensive final exam or thesis defense.

For more information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

*Note:* The department does not accept students interested in a terminal master's degree except under special circumstances. Students generally obtain a master's degree in the course of fulfilling the requirements for the Chemical Engineering - Doctor of Philosophy (PhD) (p. 1546) or the Biological Engineering - Doctor of Philosophy (PhD) (p. 1545).

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU

Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Chemical Engineering - Bachelor of Science (BS) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/chemical-biological-engineering/chemical-engineering-bachelor-science-bs/#acceleratedmasterstext>).

## Requirements

### Admission Requirements

General criteria for regular admission to the master's program include a bachelor's degree with a 3.25/4.00 or better overall GPA from a college or university of recognized standing, equivalent to the degree given at this university (or college work equivalent to that required for such a degree, at least 96 credit hours of which must be acceptable toward a degree at this university)# promise of ability to pursue advanced study and research, as judged by previous scholastic record or otherwise# and adequate preparation to begin graduate study in the chosen field.

### Degree Requirements

The following course requirements are subject to change; for the most current information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

A candidate for the Master of Science degree in chemical engineering must complete at least 30 credits, including at least 24 credits of coursework and 4–6 credits of MS thesis credit (CHEN 6950).

Only courses 5000-level and above may be applied towards the MS degree. Moreover, only courses at the 5000-level and above in any department count toward the PhD degree. An advisor must approve all courses.

Only those courses for which the student receives a grade of B- or better will count toward the MS degree. The overall grade point average must be 3.00 or better.

A successful oral defense of the MS thesis is required.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
CHEN 5210	Transport Phenomena	3
CHEN 5370	Intermediate Chemical Engineering Thermodynamics	3
CHEN 5390	Chemical Reactor Engineering	3
<b>Total Credit Hours</b>		<b>9</b>

Additionally, 15 of the total required credits must be chemical and biological engineering courses, and pass/fail courses do not count toward the degree.

A degree plan must be prepared at the beginning of the academic program in consultation with an advisory committee. The student is urged to maintain close contact with this advisory committee during the entire course of study.

### Residency and Time Limit

It is expected that a qualified student can complete the MS degree in two years or less. All work, including the thesis defense and filing of the thesis with the Graduate School, must be completed in the two-year requirement.

## Biological Engineering - Doctor of Philosophy (PhD)

The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to interdisciplinary research centers.

This degree seeks to leverage the measurement, theory and manipulation of biomolecules and biological systems for addressing the next challenges in our world. Recent advancements in imaging, data processing and synthesis have enabled access to biological information previously limited to the imagination. Thus, modern biology serves as the foundation of this program for the development of new models, processes and technologies to advance human needs.

Students who enroll in this program will learn how biological components interact on many size scales, how to understand the interplay of different interactions and networks and how to form concrete models from complex data. Key discoveries are applied to the creation of complex synthetic architectures for mimicking cell-tissue interactions, programming metabolic and synthetic pathways to drive cell-mediated chemical production of fuels and chemicals and developing smart, shape-shifting materials.

For additional information, visit the department's Biological Engineering (<https://www.colorado.edu/chbe/graduate-program/biological-engineering-phd-program/>) and Prospective Graduate Students (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

## Requirements

### Course Requirements

The student must work out an informal degree plan early in the PhD program with the aid of a research committee. This degree plan must include a total of at least 30 semester hours of 5000-level or above courses and at least 30 semester hours of Doctor Thesis credits. Biological Engineering PhD students are required to complete two core courses: CHEN 5150 Biomolecular Kinetics, Transport, and Thermodynamics and CHEN 5160 Systems Analysis of Cells and Tissues.

Students are expected to complete with distinction all work in the formal courses that apply toward the degree, and achieve an overall grade-point average of 3.00 or better. A course grade below B- will not be counted toward the minimum requirements for the PhD degree, but it will be considered in the overall grade-point average.

### Preliminary Examination

A preliminary examination is required of all PhD candidates. This examination consists of an oral and written component to be completed in the third semester. In addition, all students entering the program without a degree closely related to chemical engineering must either take the FE exam or have completed four chemical engineering core undergraduate courses with a grade of B or better (Fluids/Heat, Mass

Transfer, Thermodynamics, Kinetics, or the equivalent courses). The graduate director or department chair will make assessments as to whether a degree is closely related to the chemical engineering degree.

## Comprehensive Examination

Students must complete and pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This is followed by a group question-and-answer period with all committee members. The oral examination before the committee is based primarily on a written report the student provides to committee members two weeks in advance.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

# Chemical Engineering - Doctor of Philosophy (PhD)

The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within ChBE include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials and renewable energy.

For more information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

## Requirements

### Course Requirements

The student must work out an informal degree plan early in the PhD program with the aid of a research committee. This degree plan must include a total of at least 30 course credit hours of 5000-level or above courses and at least 30 semester hours of Doctor Thesis credits. Students are required to complete three core courses:

- CHEN 5370 Intermediate Chemical Engineering Thermodynamics
- CHEN 5390 Chemical Reactor Engineering
- CHEN 5210 Transport Phenomena

Students are expected to complete with distinction all work in the formal courses that apply toward the degree, and achieve an overall grade-point average of 3.00 or better. A course grade below B- will not be counted toward the minimum requirements for the PhD degree, but it will be considered in the overall grade-point average.

## Preliminary Examination

A preliminary examination is required of all PhD candidates. This examination consists of an oral and written component to be completed in the third semester. In addition, all students entering the program without a degree closely related to chemical engineering must either take the FE exam or have completed four chemical engineering core undergraduate courses with a grade of B or better (Fluids/Heat, Mass Transfer, Thermodynamics, Kinetics, or the equivalent courses). The graduate director or department chair will make assessments as to whether a degree is closely related to the chemical engineering degree.

## Comprehensive Examination

Students must complete and pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This is followed by a group question-and-answer period with all committee members. The oral examination before the committee is based primarily on a written report the student provides to committee members two weeks in advance.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

# Civil Engineering

Graduate studies in civil engineering are offered up to the doctoral level through the Department of Civil, Environmental and Architectural Engineering (<http://www.colorado.edu/ceae/>). Fundamental and applied research areas pursued in the civil engineering program include geotechnical engineering and geomechanics, structural mechanics and engineering, construction management and engineering, environmental and geoenvironmental engineering, hydrology, environmental fluid mechanics, civil engineering systems, and engineering science. Together with relevant advanced coursework, graduates possess high competence and versatility to pursue a wide variety of careers in both engineering and non-engineering fields.

Course code for this program is CVEN.

## Research Interests and Facilities

The Department has a variety of computational and experimental research facilities. It has multiple disciplinary computer labs as well as the CEAE Bechtel lab which houses dozens of workstations with a

wide range of professional engineering analysis software for teaching and research, and owns time and ready access to the university's supercomputer system. Physical experimental facilities for geotechnical engineering and geomechanics research include 3 geotechnical centrifuges, with one being a world-class 440g-ton centrifuge with a servo-controlled shake table for advanced physical simulations and soil model testing. For soil and rock mechanics research, analytical research can be conducted in the M.Y. Leung Computational Lab for Soils and Structures and its graduate experimental soil mechanics lab which houses multiple triaxial and cubical cells for simulating complicated 3D ascending and cyclic stress paths on geomaterials, consolidation devices with load-, deformation- and seepage-control, and special test cells for unsaturated soil mechanics testing. For structural mechanics and material engineering research, sophisticated testing for static and dynamic response of structures and their components is available by means of multiple high-speed high-force actuators, a large strong floor and a hydraulic shake table. Four uniaxial loading frames and MTS equipment for studies of mechanical and durability properties of structural and construction materials under combined load and environmental conditions are in use. Sophisticated real-time hybrid experimental-computational pseudo-dynamic testing of large-scale structures whose critical part is tested physically as a substructure with its measured response serving as input to a computer model of the rest of the structure which in turn computes the next load increment to be applied experimentally to the former in a coupled manner can also be set up.

The hydraulics and water resources research laboratories include excellent facilities in water quality and water resources management for which an advanced networked workstation environment for developing advanced decision support systems is available. For environmental fluid mechanics research and instruction, a state-of-the-art Ecological Fluid Dynamics Laboratory is available for fluid mechanics and studies of the interaction between biological processes and ecological systems from fluid stirring, mixing, and reactions, and how organisms evolved and adapt to their physical environment. The facility utilizes laser-based instrumentation for quantifying turbulence and transport of contaminants, microorganisms and odors. For environmental engineering research, the Sustainable Energy and Environmental Laboratories (SEEL) houses a variety of experimental facilities including multiple liquid chromatography mass spectrometers and an automated solid phase extraction system. They offer unique opportunities for studies of environmental microbiology, environmental chemistry, water quality, air quality, molecular biology, toxicology and field ecology with modern PCs in all laboratories for instrument control and data acquisition. For building energy and systems research and studies, the Illumination Laboratory is a special facility for testing and evaluating architectural lighting systems as well as daylighting and lighting control design. Its Larson Building Systems Laboratory (<https://www.colorado.edu/ceae/larsonlab/>) is a unique facility in the HVAC industry for both education and research purposes and is designed for dynamic testing of complete and full-scale commercial HVAC and building systems. The facility consists of a full-size commercial HVAC system, four representative commercial building zones, a system for producing repeatable and controllable loads on the HVAC system, and sophisticated data acquisition and control systems. The graduate program in construction engineering and management is well equipped in terms of computer hardware and software, and can arrange access to other unique lab facilities in the department.

To provide further synergy in research, the department operates several centers:

- The Center for Infrastructure, Energy and Space Testing (<https://www.colorado.edu/geotech-centrifuge/>) supports research and instructions in structural and geotechnical testing, characterization of the fundamental mechanical, structural, hydraulic, and thermal properties of materials relevant to the performance of infrastructural systems.
- The Design of Risk-reducing, Innovative-implementable Small-system Knowledge (DeRISK) Center aims to identify, develop, demonstrate and facilitate widespread acceptance and applicability of novel and innovative technologies and approaches to measure or treat groups of microbiological or chemical contaminants, or their precursors, apply novel new information technology systems and improve the sustainability of small drinking water systems.
- The Center for Environmental Mass Spectrometry (CEMS) is a laboratory that focuses on the detection of pharmaceuticals, hormones and other organic contaminants in water and evaluating the effectiveness of methods for removing these compounds.
- The Center for Advanced Decision Support for Water and Environmental Systems (CADSWES) is an interdisciplinary center of excellence that focuses on applying advanced computing techniques to provide decision makers with decision support systems (DSSs) to help them more effectively manage water and environmental systems.
- The Mortenson Center in Global Engineering focuses on promoting integrated and participatory solutions to humanitarian development by educating globally responsible engineering students and professionals to address pressing problems faced by developing communities worldwide, with the goal of transforming the understanding, application and evaluation of engineering globally.

Current research includes such topics as water and wastewater treatment, surface and subsurface contaminant transport, environmental processes, fluid mechanics, decision support systems, hydraulic research, land treatment, rapid infiltration and activated sludge processes. Cost prediction in construction projects, construction management, worker safety, energy conservation in buildings, solar applications and lighting systems are included. Active research is ongoing in advanced constitutive soil modeling and experimental characterization for geotechnical engineering, computational geomechanics, soil dynamics, seismic wave propagation and geophysics, geotechnical earthquake engineering, wave-based sounding, centrifugal modeling, geosynthetics and glaciology. Research in structures includes stability, damage and fracture, material microstructures, durability, temperature effects, finite element modeling, reinforced concrete, earthquake responses, reinforced masonry structures, prestressed concrete and dynamic control. In water resources and fluid mechanics, work is continuing in stochastic hydrology and hydroclimatology, physics of scalar transport, mixing and reactions and hydrodynamics of ecological flows. Research in engineering science includes theoretical, mathematical and computational mechanics with applications to solid and fluid dynamics, blast and shock loading, mathematical physics, heat transfer, earth science, and multi-scale multiphase material modeling. Making use of model-based analysis, experimental and past performance data of built and human environment, the civil systems program focuses on providing training of a systems approach for life-cycle design decisions, management and monitoring of civil infrastructure systems, accounting for engineering, social science, economics and public policies in design holistically.

## Master's Degrees

- Civil Engineering - Master of Science (MS) (p. 1560)
- Civil Engineering - Professional Master of Science (MSCVE) (p. 1561)

## Doctoral Degree

- Civil Engineering - Doctor of Philosophy (PhD) (p. 1559)

## Certificates

- Architectural Lighting - Graduate Certificate (p. 1627)
- Global Engineering - Graduate Certificate (p. 1563)
- Water Engineering and Management - Graduate Certificate (p. 1683)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; PhD, Northwestern University

## Courses

### CVEN 5006 (3) Construction Engineering and Management Fundamentals

Provides an overview of the construction industry to establish a foundation for subsequent graduate courses in construction engineering and management. Students will be exposed to projects of varying funding sources, contracts, scope and complexity. Project phases will be established including planning, funding, design, construction, turnover, operation and maintenance. The course will focus on fundamental construction cost estimating, scheduling, delivery systems, contractual relationships, key contract clauses, risk allocation, building materials/ systems and project controls. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Grading Basis:** Letter Grade

### CVEN 5111 (3) Structural Dynamics

Focuses on the response of single- and multi-degree of freedom structures subjected to harmonic, impulsive and arbitrary loads (including earthquake base excitation). Sources and modeling of damping will be discussed. Analytical and numerical solutions will be considered for both linear and nonlinear structural systems. Elastic and inelastic response spectra will be discussed.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.

**Additional Information:** Departmental Category: Mechanics

### CVEN 5131 (3) Continuum Mechanics and Elasticity

Provides foundation for advanced study of structural, mechanical and geo-material behavior and continuum theories in mechanics. Topics: Cartesian tensors, formulation of continuum mechanics for small and large deformation, constitutive laws for elastic solids, energy principles, methods of potentials, formulations and solutions of 2D and 3D elastostatic and elastodynamic problems, analytical and numerical formulations.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.

**Recommended:** Prerequisite CVEN 3161.

**Additional Information:** Departmental Category: Mechanics

### CVEN 5147 (3) Civil Engineering Systems

Theory and application of the principles of engineering economics and classical and metaheuristic optimization techniques for evaluating problems in civil and environmental engineering.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4147

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Miscellaneous

### CVEN 5151 (3) Wave Methods for Design and Characterization of Advanced Materials

Covers key theoretical concepts and applications of wave propagation with the focus on ultrasonic scattering. The course material includes: (i) dispersion analysis for design and characterization of materials with random and periodic microstructure, and (ii) advanced elastodynamic formulations rooted in 2D and 3D boundary integral equations for the purpose of inverse scattering and imaging. The course is intended to be self-contained, research-oriented and accessible for multidisciplinary audience.

### CVEN 5157 (3) A Systems Approach to Global Engineering

Introduces engineering students to the global context in which engineers are asked to operate in the 21st century using system dynamics tools and other decision-making tools (network analysis, agent based modeling, etc.) necessary to analyze the uncertainty and complexity inherent in global projects.

**Equivalent - Duplicate Degree Credit Not Granted:** EDEN 4147, CVEN 4157 and EDEN 5147

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

### CVEN 5161 (3) Advanced Mechanics of Materials I

Covers advanced topics in the mechanics of solids. Some topics such as asymmetric bending of beams, torsion of non-circular cross-sections, are extensions of topics seen in CVEN 3161. Others like 3-D stress and strain analysis, failure theories and stability of columns and frames are new. Includes selected laboratory experiments.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4161

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Mechanics

### CVEN 5206 (3) Design Development

Provides an overview of the development process and proforma, investigates the interrelationship between design decisions and building costs, and evaluates the impact of each major building system on the development budget and schedule. Provides a simulated development experience where students respond to a Request for Proposal, including proformas, design, estimates and outline specifications. Department consent required. Taught intermittently.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Construction

### CVEN 5226 (3) Construction Safety

Comprehensively studies construction safety in the construction industry. Focuses on advanced safety management issues such as accident causation theory, economic modeling, safety risk quantification and analysis, design for safety, predictive analytics and learning. Skills developed in this course will prepare graduate students to be effective quality and safety managers or researchers.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Construction

### CVEN 5246 (3) Legal Aspects of Construction

Applies law in engineering practice; contracts, construction contract documents, construction specification writing, agency, partnership, and property; types of construction contracts; and legal responsibilities and ethical requirements of the professional engineer. Taught intermittently.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** graduate standing or department consent required.

**Additional Information:** Departmental Category: Construction

**CVEN 5276 (3) Engineering Risk and Decision Analysis**

Acquaints students with the fundamental principles and techniques of risk and decision analysis. Oriented toward project-level decisions in which risk or uncertainty plays a central role. Introduces students to Monte Carlo analyses, and various types of multicriteria decision analyses. Culminates in a larger term project.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 3227 and graduate standing or instructor consent required.

**Additional Information:** Departmental Category: Construction

**CVEN 5286 (3) Design Construction Operations**

Considers effective/efficient design of construction operations. Front end planning; construction labor relations; productivity management. Emphasizes construction productivity improvement by group field studies and discrete event simulation modeling. How overtime, changes, weather, and staffing levels influence productivity. Industrial engineering techniques are applied to the construction environment to improve the use of equipment, human, and material resources.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** graduate standing or department consent required.

**Additional Information:** Departmental Category: Construction

**CVEN 5303 (3) Analysis of Urban Water Systems**

Examines water systems in the urban environment in an integrated manner. Focus is placed on analyzing the behavior of urban water distribution and collection systems using model applications. Students completing this course will be able to understand local urban water resources problems, effectively use complementary urban water models, and examine the interactions between water supply, drainage systems, surface water, and groundwater.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4303

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**CVEN 5313 (3) Environmental Fluid Mechanics**

Analysis of viscous incompressible flows, with first-principle solutions for environmental fluid flows in oceans, rivers, lakes and the atmosphere. Topics include the Navier-Stokes equations, kinematics, vorticity dynamics, geophysical fluid dynamics, and density stratification.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisites APPM 2350 and APPM 2360 and CVEN 3313.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5323 (3) Applied Stream Ecology**

Emphasizes the integration of hydrologic, chemical, and biological processes in controlling river, stream, and reservoir ecosystems at several spatial scales. Students apply ecosystem concepts to current environmental and water quality problems and learn field methods in field trips and a team project.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5333 (3) Physical Hydrology**

Introduces hydrology as a quantitative science describing the occurrence, distribution and movement of water at and near the surface of the earth. Develops a quantitative understanding of atmospheric water, infiltration, evapotranspiration and surface runoff. Studies global climatology and large scale climate drivers of regional hydrology at interannual time scales. Solves engineering problems related to water resources.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisite CVEN 4333.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5343 (3) Transport and Dispersion in Surface Water**

Studies transport and dispersion of introduced contaminants in turbulent surface water flows. Emphasizes developing a physical understanding of fluid processes responsible for turbulent dispersion. Includes analytical development, numerical modeling, and experimental approaches to the problem.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5346 (3) Managing Construction and Engineering Projects and Organizations**

Explores organizational and managerial issues and concerns facing executives in engineering and construction organizations. Through readings, case studies, simulation exercises, and projects, students are introduced to and apply concepts of strategy, core competencies, vision, innovation, team dynamics, interpersonal influence, organizational design issues, and global projects to engineering and construction organizations.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Construction

**CVEN 5353 (3) Groundwater Hydrology**

Studies the occurrence, movement, extraction for use, and quantity and quality aspects of groundwater. Introduces and uses basic concepts to solve engineering and geohydrologic problems.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisites CVEN 3313 or AREN 2120 or CHEN 3200 or GEEN 3853 or MCEN 3021 and APPM 2360.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5363 (3) Modeling of Hydrologic Systems**

Introduces students to modeling techniques. Focus areas include physical hydrology and hydrometeorology; measurement and inference; climate change impacts; role of scale in hydrology; uncertainty analysis; and a case study project. Projects will examine hydrologic impacts of various drivers such as climate warming or land cover change, utilizing an assessment of historic conditions to better understand and model future disturbance scenarios.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5373 (3) Water Law, Policy, and Institutions**

Discusses contemporary issues in water management based on legal doctrine. Identifies legal issues in water resources problems and discusses in close relationship with technical, economic, and political considerations.

**Requisites:** Restricted to students with 87-180 credits (Seniors), graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5383 (3) Applied Groundwater Modeling**

Studies analytical and numerical methods for solving problems of groundwater flow and chemical transport. Emphasizes fundamental modeling techniques and the relationship between the physical system and the model results. Applies models and modeling techniques to solve problems in ground water hydrology using contemporary software. Includes computer laboratory sessions.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4383

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisites APPM 2360 and CVEN 4353 or CVEN 5353.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5393 (3) Water Resources System and Management**

Introduces water resources planning and management as an integrated systems problem that satisfies multiple competing objectives under constraints and uncertainty. Includes problem formulation and solution using decision support systems, optimization with and without uncertainty, stochastic simulation, and multiobjective optimization. Introduces water resources economics and planning under uncertainties such as climate change and increasing urbanization.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5404 (3) Water Chemistry**

Introduces chemical fundamentals governing the chemistry of natural and treated waters. Topics include thermodynamics and kinetics of acid and base reactions, carbonate chemistry, air-water exchange, precipitation, dissolution, complexation, oxidation-reduction, and sorption.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5414 (3) Water Chemistry Laboratory**

Uses experimental and analytical laboratory techniques to develop a better understanding of the concepts of aquatic chemistry and to investigate water chemistry in treated and natural water systems. Techniques include titration, spectrophotometry, gas chromatography, other advanced instrumentation, sampling, portable analyses, and basic statistics and experimental design. Course focuses on water chemistry of Boulder Creek and other local waters.

**Requisites:** Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-). Requires corequisite course of CVEN 5424.

Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5423 (3) Water Resources Engineering Design**

Studies principles and techniques of water resources engineering design. Introduces environmental modeling under uncertainty, stormwater design, precipitation estimation and flow routing. Surveys hydropower, reservoir management and water resources economics.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4323

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5424 (3) Environmental Organic Chemistry**

Examines the fundamental physical and chemical processes that impact the fate and transport of organic contaminants in natural and engineered systems. Emphasizes both equilibrium and kinetic aspects, including solubility, vapor pressure, air-water exchange, sorption, abiotic redox reactions, and photodegradation.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5434 (3) Environmental Engineering Design**

Team-based design of facilities or processes for water or wastewater or solid waste treatment or remediation under multiple real-world constraints. Department consent required.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisite CVEN 5524 or CVEN 5534 or CVEN 5474.

**Additional Information:** Departmental Category: Environmental

**CVEN 5444 (3) Municipal Des Proj**

**Additional Information:** Departmental Category: Environmental

**CVEN 5446 (3) Infrastructure Asset Management**

Introduces a framework that combines engineering principles with economic theory to facilitate a more organized and logical approach to decision-making in the management of infrastructure. Topics covered include asset valuation, modeling infrastructure deterioration, life-cycle cost analysis, and optimization. Although the concepts introduced in this course are applicable to different infrastructure systems, especial emphasis will be given to transportation projects.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CVEN 5454 (3) Statistical Methods for Natural and Engineered Systems**

Applies traditional and modern probability and statistical methods to environmental, hydrological, climatological and engineering data analysis. Topics include: basic probability, data visualization, fitting univariate and multivariate distributions, Monte Carlo simulations, extreme value distributions, confidence intervals and hypothesis testing, nonparametric density estimators, linear regression, and Bayesian analysis. The data analysis tool, R, is used throughout the course.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Environmental

**CVEN 5464 (3) Environmental Engineering Processes**

Develops and utilizes analytic solutions for environmental process models that can be used in a) reactor design for processes used in the treatment of water, wastewater and hazardous waste and b) process analysis of natural systems, such as streams and groundwater flow. Models facilitate the tracking of contaminants in engineered and natural systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4464 and EVEN 4464

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5474 (3) Hazardous and Industrial Waste Management**

Evaluates processes used for treatment of wastes requiring special handling and disposal: toxic organic chemicals, heavy metals, acidic, caustic and radioactive waste material. Discusses techniques for destruction, immobilization and resource recovery and assessment of environmental impact of treatment process end products.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4474

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5484 (3) Applied Microbiology and Toxicology**

Surveys microbiology topics germane to modern civil and environmental engineering. Provides fundamentals needed to understand microbial processes and ecology in engineered and natural systems and reviews applications emphasizing the interface between molecular biology and classical civil engineering.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4484 and EVEN 4484

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5494 (3) Surface Water Quality Modeling**

Examines the relationships among air, water, and landpollution, water quality, and beneficial uses. Using models, develops the ability to quantify and predict the impacts of pollutants in the aquatic environment, and to develop approaches to minimize unfavorable water quality conditions. Department consent required.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5511 (3) Introduction to Finite Element Analysis**

Covers systematic formulation of finite element approximation and isoparametric interpolation (weighted residual and energy methods, triangular and quadrilateral elements). Includes computation applications to the solution of one- and two-dimensional stress-deformation problems and steady and transient heat conduction.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4511

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.

**Additional Information:** Departmental Category: Mechanics

**CVEN 5514 (3) Bioremediation**

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 5514

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 4484 or CVEN 5424 or CVEN 5484.

**Additional Information:** Departmental Category: Environmental

**CVEN 5524 (3) Drinking Water Treatment**

Provides advanced study on theory-of-treatment processes, including design and operation of municipal water supplies.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisite CVEN 4464 or CVEN 5464 or graduate standing or instructor consent required.

**Additional Information:** Departmental Category: Environmental

**CVEN 5525 (3) Computational Structural Analysis I**

Covers the principles and formulations of the direct stiffness method and its transition to the finite element method with the computational modelling and analysis of framed structures in 2D plane and 3D space. The dynamic analysis and the introduction to the nonlinear structural problems are provided. Familiarity with the modern computing and programming environments is increased to address the needs in the structural engineering and mechanics area. Computer programming is applied to the solution of problems in structural analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4525

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Structures

**CVEN 5534 (3) Wastewater Treatment**

Covers the processes used to treat municipal wastewater, focusing on biological processes. Includes: design of aerobic, anoxic, anaerobic and suspended growth technologies to remove and transform pollutants; design and assessment of treatment approaches that recover energy, nutrients and water from wastewater; application of fundamental concepts of aquatic chemistry, environmental microbiology and computational models.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisites CVEN 5404 and CVEN 5484 and CVEN 5464.

**Additional Information:** Departmental Category: Environmental

**CVEN 5537 (3) Numerical Methods in Civil Engineering**

Introduces the use of numerical methods in the solution of civil engineering problems, emphasizing obtaining solutions with high-speed electronic computers. Applies methods to all types of civil engineering problems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4537

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 5544 (3) Solid Waste Management and Resource Recovery**

Covers the scope of the nonhazardous solid waste problem and regulations that drive its management; discussions of nonengineering factors that impact waste management and recycling; design of incinerators, composting facilities, and landfills used to treat and dispose of solid waste.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisite CVEN 3414.

**Additional Information:** Departmental Category: Environmental

**CVEN 5554 (3) Fundamentals of Air Quality Management**

Introduces engineering methods for the study of air quality. Topics include: indoor air quality, greenhouse gases, dispersion modeling, source apportionment modeling, chemistry of combustion, pollution sources and controls, human exposure to air pollutants. A focus on Engineering for Developing Communities runs throughout. Required for CVEN environmental engineering graduate students.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4554

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5564 (3) Water Profession: Communication and Utility Finance**

Develops and improves the skills and tools needed for graduate students and young professionals. Focusing on highly effective leaders; leadership with impact; effective communication tools; and communicating with teams, city councils, governing boards, and the public.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Environmental

**CVEN 5565 (3) Life-Cycle Engineering of Civil Infrastructure Systems**

Philosophical and analytical issues for lifetime design and operation of civil systems. Optimization tradeoffs of construction, management, and sustainability. Utility of operation and service, including present-value economic analysis. Decision-making alternatives of safety and performance, including hazards consideration. Undergraduates may enroll with the permission of the instructor.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 3227 or equivalent.

**Additional Information:** Departmental Category: Structures

**CVEN 5574 (3) Water Utility Management: Current Issues and Future Challenges**

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on management, leadership, communication and utility financial in the new water profession era. Undergraduate seniors may contact instructor for permission to enroll.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5575 (3) Advanced Topics in Steel Design**

Covers steel structure design and analysis. Includes plate girders, moment connections for beams, design of multistory frames, and other topics determined by class interest. Undergraduate may enroll with permission of the instructor.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 4545.

**Additional Information:** Departmental Category: Structures

**CVEN 5584 (3) Water Profession: Leadership and Management**

Develops the skills and tools for graduate students and young professionals to work in the water profession. Focuses on financing water services, capital planning, rates, management planning, staffing and organization and critical thinking. Undergraduates may request instructor permission to enroll.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Environmental

**CVEN 5585 (3) Advanced Topics in Reinforced Concrete Design**

Covers design and analysis topics for prestressed concrete and/or reinforced concrete structures. Includes review of the current ACI design code, slabs, prestressed concrete, seismic design, folded plates and shells, finite element analysis, and other topics determined by class interest. Undergraduates may enroll with the permission of the instructor.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 4555.

**Additional Information:** Departmental Category: Structures

**CVEN 5594 (3) Water Reuse and Reclamation**

Explores development of a safe, reliable and acceptable program for reusing impaired waters. As fresh water becomes scarcer around the world, communities are looking for security through development of new water resources. Reuse of impaired water is one solution to the growing water crisis. Focus is on advanced treatment technologies with emphasis on public perception, economics and regulations.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4594

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisites CVEN 3141 and CVEN 3424.

**Additional Information:** Departmental Category: Environmental

**CVEN 5604 (3) UV Disinfection and Advanced Oxidation**

Provides a fundamental basis for design of UV processes in water and wastewater treatment. Includes principles of photochemistry and photobiology. Applications to disinfection of water and degradation of chemical compounds in the environment. Design of UV disinfection systems and reactors and advanced oxidation processes. Environmental UV-based decay of pollutants.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisites CVEN 3414 and CVEN 3424.

**Additional Information:** Departmental Category: Environmental

**CVEN 5614 (3) Bioenergy & Bioresource Recovery**

Introduces fundamental theories and applied technologies used in production and conversion of renewable biomass including waste materials into bioenergy and other value-added products. Conducts quantitative evaluations on conversion processes such as renewable biogas production, electricity generation, liquid fuels, metal and nutrients recovery and organic chemical production.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 4484.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Environmental

**CVEN 5628 (3) Seepage and Slopes**

Covers fundamental principles of seepage in soils under both saturated and unsaturated conditions and limit equilibrium solution to slope stability problems. The seepage effects on slope stability are analyzed in detail and both conventional slope stability method and the finite element technique are applied to solving the engineering problems.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisites CVEN 3708 and CVEN 3718.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5678 (3) Soil Improvement and Reinforcement**

Provides students with principles and working knowledge of design and construction procedures in soil stabilization, retaining structures, geosynthetics, and soil reinforcement.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 3718.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5688 (3) Environmental Geotechnics**

Provides an understanding of the use of geotechnical concepts in the analysis and design of environmental systems. Focus is placed on the evaluation of waste containment facilities. Including relevant saturated, unsaturated, and multiphase flow mechanisms in cover and liner systems. Includes stability analyses for landfills and geosynthetic interface shear strength. Covers relevant aspects of mining geotechnics and remediation technologies of contaminated sites.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5708 (3) Soil Mechanics**

Offers an advanced course in soil mechanics. Coverage includes basic principles of continuum mechanics; elasticity, viscoelasticity, and plasticity theories applied to soils; effective stress principle; consolidation; shear strength; critical state concepts; and constitutive, numerical, and centrifuge modeling.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5718 (3) Mechanics and Dynamics of Glaciers**

Develops a quantitative physical basis for understanding the functions of snow, ice and glaciers in the environment, with emphasis on developing an understanding of continuum mechanics and thermodynamics and their application to Earth systems.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4718

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5728 (3) Foundation Engineering**

Focuses on geotechnical design of shallow and deep foundations, including spread footings, mats, driven piles and drilled piers. Coverage includes bearing capacity, settlement, group effects and lateral load capacity of the various foundation types. Additional topics include subsurface exploration, construction of deep foundations and analysis of pile behavior using wave equation and dynamic monitoring methods.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 4728

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5738 (3) Applied Geotechnical Analysis**

Studies applications of limiting equilibrium and limit plasticity analysis methods to stability problems in geotechnical engineering, such as slopes, lateral earth pressures on retaining structures, and bearing capacities of foundations. Also includes elastic and consolidation analysis of deformations in soil structures.

**Requisites:** Requires a prerequisite course of CVEN 5708 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5748 (3) Design of Earth Structures**

Covers theory, design, and construction of earth embankments and waste facilities, including isolation systems. Uses published data, field exploration, and laboratory tests on soils and rock in investigating foundations and construction materials. Involves principles of compaction and settlement, permeability analysis, landslide recognition and control, use of composite clay, and liner systems.

**Requisites:** Requires a prerequisite course of CVEN 5708 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5758 (3) Flow Processes in Soils**

Examines fundamental principles of flow through porous media and related engineering problems. Topics include the saturated seepage theory and flow nets; the unsaturated flow theory; suction-saturation and saturation-hydraulic conductivity relationships; nonlinear finite strain consolidation and desiccation theory; laboratory and field testing methods for determining material characteristics; and numerical models for flow-related engineering problems.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisite CVEN 3718.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5768 (3) Introduction to Rock Mechanics**

Nature of rocks and rock masses; engineering properties rock and rock mass; rock mass classifications; planes of weakness; application of rock mechanics to design of rock slopes, underground excavations, and foundations.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisites CVEN 3708 and CVEN 3718.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5788 (3) Computational Modeling in Geotechnical Engineering**

Introduces computational modeling for geotechnical engineering applications such as the Discrete Element Method (DEM) for granular materials, nonlinear Finite Element Analysis (FEA) of seepage, coupled soil elastoplastic consolidation, elastoplasticity models for soil and rock, and advanced computational methods for failure in soil and rock. Uses DEM, FEA, and other software programs for analysis. Recommended Prereq: CVEN 5708

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5798 (3) Dynamics of Soils and Structures**

Covers fundamental characterization of soils, foundations and structures under general dynamic and earthquake loads. Principles of vibrations and wave propagation for 1D, 2D, 3D. In-situ and laboratory determination of dynamic soil properties; methods for site response analysis, foundation vibrations, dynamic soil-structure interaction and liquefaction problems.

**Requisites:** Restricted to College of Engineering (ENGR) graduate students or seniors or students with concurrent degree sub plans C-AREN, C-CVEN, C-MCEN or C-ASEN.

**Recommended:** Prerequisite CVEN 3708.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5818 (3) Geotechnical Earthquake Engineering**

Familiarizes students with the fundamentals of engineering seismology, soil and structural dynamics, and the modern practice of geotechnical earthquake engineering. Focuses on describing earthquake hazards and methods for seismic analysis and design.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisite CVEN 5798.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5822 (3) Geographical Information Systems for Civil and Environmental Systems**

Theory and use of geographical information systems in civil engineering, environmental studies, natural resources and other related disciplines. Topics include spatial data models, data capture, global positioning system, database linkage, use in design, analysis and implementation. Laboratory work includes applications of Arc-View and Arc-GIS software.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Surveying and Transportation

**CVEN 5830 (1-3) Special Topics for Seniors/Grads**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Building Systems

**CVEN 5831 (3) Special Topics**

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Mechanics

**CVEN 5833 (1-3) Special Topics**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 5834 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Additional Information:** Departmental Category: Environmental

**CVEN 5835 (1-3) Special Topics for Seniors/Grads**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Structures

**CVEN 5836 (1-3) Special Topics for Seniors/Grads**

Supervised study of special topics of interest to students under instructor guidance. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Additional Information:** Departmental Category: Construction

**CVEN 5837 (1-3) Special Topics for Seniors/Grads**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 5838 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 5849 (1-6) Independent Study**

Available only through approval of graduate advisor. Subject arranged to fit needs of student.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Special Topics

**CVEN 5899 (1) Graduate Engineering Internship Experience**

An academically supervised graduate-level engineering experience that is integral to the students' graduate research and study by connecting classroom instructions to professional practice. Requires a pre-approved written plan of the proposed graduate-level work experience and a signed cooperative agreement or offer letter from employer. The 1-unit course will count toward the graduate student's degree together with the required minimum of 30 credit hours of regular core and elective courses in the student's major.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**CVEN 5919 (3) Global Development for Engineers**

Focuses on the fundamental tools necessary to address sustainable community development projects in low-income communities (LICs). Topics include: human development, sustainable development, and presentation of an integrative and participatory framework for development projects in LICs. The framework consists of a combination of development and engineering project management tools. Framework is illustrated through case studies and student-driven team projects.

**Requisites:** Restricted to students with sub-plan of Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.

**Additional Information:** Departmental Category: Special Topics

**CVEN 5929 (3) Sustainable Community Development 2**

Covers the principles, practices and strategies of appropriate technology as part of an integrated and systems approach to community-based development. Course content areas include technical issues in development, environmental health and communicable disease, appropriate and sustainable technologies with hands-on workshops, and global cooperation in development.

**Requisites:** Requires prerequisite course of CVEN 5919 (minimum grade C-). Restricted to students with Engineering Developing Communities (EDC) sub-plan or EDC certificate (ENDC-CERG).

**Additional Information:** Departmental Category: Special Topics

**CVEN 5939 (3) Global Development Practicum**

Provides a supervised in-field practicum experience in which the student applies theories and concepts learned in CVEN 5919.

**Requisites:** Requires prerequisite course CVEN 5919 (minimum grade C-). Restricted to students with sub-plan of Global Engineering/Engineering Developing Communities (EDC) or certificate (ENDC-CERG) only.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 5969 (1-3) Water, Sanitation, and Hygiene**

Studies the fundamentals behind effective hygiene and remediation processes and engineering solutions developed/ designed for specific international problems. Approaches to hygiene, clean water and sanitation in lesser industrialized countries often demand alternative solutions to those developed for industrialized societies. Explores issues and solutions developed to tackle these problems.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students or students accepted in the AREN, CVEN or EVEN Bachelor Accelerated Masters (BAM) programs.

**Recommended:** Prerequisites CVEN 3424 and CVEN 3414.

**Additional Information:** Departmental Category: Environmental

**CVEN 6161 (3) Advanced Mechanics of Materials 2**

Fundamentals of continuum mechanics, finite deformations, Lagrangian finite strains, Cauchy and Piola Kirchoff stress tensors, plasticity and thermo-elasticity, elements of damage mechanics, elements of fracture mechanics, rheological and viscoelastic theories, and modern experimental techniques.

**Recommended:** Prerequisite CVEN 5161.

**Additional Information:** Departmental Category: Mechanics

**CVEN 6333 (3) Introduction to Multi-Scale Variability and Scaling in Hydrology**

Provides a foundational physical understanding of channel networks, runoff, precipitation, and evapotranspiration at multiple spatial scales of drainage basins using modern analytical concepts for understanding non-linear phenomena, e.g., fractals, multifractals, statistical scaling, criticality, and renormalization.

**Requisites:** Requires a prerequisite course of CVEN 5333 (minimum grade C-).

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 6383 (3) Flow and Transport through Porous Media**

Studies basic physics of flow and transport of water, air, and other fluid mixtures through a porous medium. Course topics are relevant to applications in contaminant hydrology, contaminant transport in aquifers, hazardous waste management, geohydrology, soil physics, and geoenvironmental engineering.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 6393 (1) Hydrologic Sciences and Water Resources Engineering Seminar**

Provides a broad introduction to a variety of research topics from hydrologic sciences and water resources engineering. Offered as a one-hour weekly seminar by the departmental water faculty, graduate students, and external speakers.

**Requisites:** Restricted to graduate student Civil (CVEN) Engineering students only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 6414 (3) Aquatic Surfaces and Particles**

Examines the role of surfaces and particles in the fate and transport of contaminants in the aquatic environment. Emphasizes modeling of absorption, dissolution, precipitation, surface-catalyzed reactions, and coagulation and filtration kinetics.

**Requisites:** Requires prerequisite course of CVEN 5404 or GEOL 5280 (minimum grade C-).

**Additional Information:** Departmental Category: Environmental

**CVEN 6511 (3) Nonlinear Finite Element Analysis of Solids and Porous Media**

Covers constitutive modeling, multiphase mechanics, and finite element implementation of constitutive models and coupled solid-fluid mechanical governing equations for inelastic porous media at small strain. Considers transient and steady state conditions. Analyzes structural, geotechnical, geological, mechanical, biomechanical, and other related modern engineering problems. Uses general purpose finite element software program for implementation and analysis.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Mechanics

**CVEN 6525 (3) Nonlinear Analysis of Framed Structures**

Explores theoretical underpinnings of nonlinear static and dynamic analysis of framed structures, along with exposure to the corresponding programming techniques in Matlab. Topics covered are: flexibility and fiber based beam-column element formulation; structural, section and fiber plasticity; geometric and material nonlinearities; nonlinear pushover and transient analysis of framed structures.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Structures

**CVEN 6595 (3) Earthquake Engineering**

Analyzes and designs structures for earthquake load covering: properties of earthquake ground motions, ground motion prediction equations, seismic hazard analysis, response spectra, response of linear and nonlinear structures, construction of design spectra, seismic design methods, and building code requirements.

**Requisites:** Requires prerequisite course of CVEN 5111 (minimum grade of C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Structures

**CVEN 6830 (3) Special Topics**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Building Systems

**CVEN 6831 (3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Mechanics

**CVEN 6833 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 6834 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Environmental

**CVEN 6835 (3) Special Topics**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Structures

**CVEN 6836 (3) Special Topics**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Construction

**CVEN 6837 (3) Sp Tpcs Comp Graphics**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 6838 (3) Special Topics**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 6839 (1-3) Special Topics**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Special Topics

**CVEN 6943 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 6944 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Environmental

**CVEN 6945 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Structures

**CVEN 6946 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Construction

**CVEN 6947 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 6948 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 6949 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Special Topics

**CVEN 6951 (1-4) Master's Thesis**

**Additional Information:** Departmental Category: Mechanics

**CVEN 6952 (1-4) Master's Thesis**

**Additional Information:** Departmental Category: Surveying and Transportation

**CVEN 6953 (1-6) Master's Thesis**

**CVEN 6969 (1-3) Masters Report**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Special Topics

**CVEN 7111 (3) Advanced Structural Dynamics**

Includes general vibrations of civil engineering structures and their response to various types of time-dependent loads.

**Requisites:** Requires prerequisite course of CVEN 5111 (minimum grade C-).

**Additional Information:** Departmental Category: Mechanics

**CVEN 7141 (3) Plates and Shells**

Teaches mathematical theories of plate and shell structures and their applications. Involves numerical finite element solutions of plates and shells of various shapes under static and dynamic loadings.

**Requisites:** Requires prerequisite courses of CVEN 5131 or CVEN 5161 (minimum grade C-).

**Additional Information:** Departmental Category: Mechanics

**CVEN 7161 (3) Fracture Mechanics**

Includes three parts: 1) fundamentals through rigorous mathematical formulations of linear/nonlinear elastic fracture mechanics, 2) materials' theoretical strength, including metals, granular materials, polymers and steel, 3) numerical (finite element) methods in fracture mechanics. Heavy emphasis on project and independent work.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Additional Information:** Departmental Category: Mechanics

**CVEN 7511 (3) Computational Finite Inelasticity and Multiphase Mechanics**

Covers kinematics, thermodynamics, coupled balance equations and constitutive models, numerical time integration, and finite element implementation of finite strain inelasticity and multiphase mechanics. Kinematics of multiplicative decomposition, and finite strain mixture theory. Linearization for global nonlinear Newton-Raphson and solution algorithm of nonlinear constitutive models and coupled balance equations.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

**Recommended:** Prerequisites CVEN 5131 and CVEN 5511 and CVEN 6511.

**Additional Information:** Departmental Category: Mechanics

**CVEN 7718 (3) Engineering Properties of Soils**

Emphasizes engineering aspects of soil mechanics. Implications of soil strength, volume change, consolidation behavior in engineering problems such as slope stability, deformation of retaining walls, surface subsidence due to tunneling. Time effects in soil/long-term bearing capacity of piles. Laboratory determination of constitutive parameters of soils. Field tests/their correlations with soil properties. Case studies using finite element software.

**Requisites:** Requires prerequisite course of CVEN 5708 (minimum grade of C-).

**Additional Information:** Departmental Category: Geotechnical

**CVEN 7788 (3) Soil Behavior**

Topics include soil mineralogy, formation of soils through sedimentary processes and weathering, determination of soil composition, soil water, colloidal phenomena in soils, fabric property relationships, analysis of mechanical behavior including compressibility, strength and deformation, and conduction phenomena in terms of physicochemical principles. Involves applications for stabilization and improvement of soils, and disposal of waste materials.

**Recommended:** Prerequisite CVEN 3718.

**Additional Information:** Departmental Category: Geotechnical

**CVEN 7831 (1-3) Sp Tpc-Constitutive Mech**

**Repeatable:** Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Mechanics

**CVEN 7838 (3) Special Topics**

**Additional Information:** Departmental Category: Geotechnical

**CVEN 7849 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: Special Topics

**CVEN 8991 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Mechanics

**CVEN 8992 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Surveying and Transportation

**CVEN 8993 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Fluid Mechanics and Water Resources

**CVEN 8994 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Environmental

**CVEN 8995 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Structures

**CVEN 8996 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Construction

**CVEN 8997 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Miscellaneous

**CVEN 8998 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Geotechnical

**CVEN 8999 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Special Topics

## Civil Engineering - Doctor of Philosophy (PhD)

Students typically complete their PhD in civil, environmental and architectural engineering within 4 to 5 years, depending on whether

they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program directly without a master's degree.

Our PhD program is intended to help students achieve a high level of engineering competence and develop their ability to perform original research that advances the field of civil engineering and beyond. PhD students in the program are typically supported with research and teaching assistantships, but are also often successful in obtaining their own fellowships or sponsorships from external agencies.

Areas of study within the Civil Engineering Department are:

- Building systems engineering
- Construction engineering and management
- Geoenvironmental engineering
- Geotechnical engineering
- Civil systems engineering
- Engineering science
- Structural engineering and structural mechanics
- Hydrology, water resources and environmental fluid mechanics

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

## Requirements

The PhD requires 30 credit hours of coursework, plus 30 hours of dissertation credit. PhD students are also required to successfully complete a preliminary exam, a comprehensive exam and a final dissertation defense.

### Preliminary Examination

Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. The student must pass this examination in order to continue in the doctoral program. Specific format of the preliminary examination varies by the area of study, so the student should check with their advisor for additional details.

### Comprehensive Examination

The comprehensive examination shall consist of a written and an oral examination. The exam may not be attempted until the student's last semester of formal coursework. At the comprehensive examination, the student shall present a plan for the dissertation research to the advisory committee for approval. Failure to pass the comprehensive examination may be remedied by repeating the examination after an interval of not less than four months. Specific format of the comprehensive examination varies by the area of study, so the student should check with their advisor for additional details.

### PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

### Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

## Civil Engineering - Master of Science (MS)

The department's objective is to produce engineers capable of identifying, preventing and solving building, construction and environmental problems. In addition to the well-established graduate programs in environmental, water resource and geotechnical engineering, students in the department may also choose to study in the emerging field of geoenvironmental engineering. Campus facilities, including a National Science Foundation-funded earthquake simulator, permit a case-study approach, which exposes students to real-world problems and allows experimentation, testing and analysis.

Areas of study within the Civil Engineering Department are:

- Building systems engineering
- Civil systems engineering
- Construction engineering and management
- Engineering science
- Environmental engineering
- Environmental fluid mechanics and hydraulic engineering
- Geoenvironmental engineering
- Geotechnical engineering and geomechanics
- Global engineering
- Structural engineering and structural mechanics
- Hydrology and water resources management

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Architectural Engineering - Bachelor of Science (BS) (p. 799)
- Civil Engineering - Bachelor of Science (BS) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/civil-environmental-architectural-engineering/civil-engineering-bachelor-science-bs/#acceleratedmasterstext>)
- Environmental Engineering - Bachelor of Science (BS) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/civil-environmental-architectural-engineering/environmental-engineering-bachelor-science-bs/#acceleratedmasterstext>)

## Requirements

### Course Requirements

The Master of Science degree in civil engineering requires a total of 30 credit hours (including coursework and thesis hours) with a grade of B- or better and a cumulative GPA of at least 3.00. At least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in CVEN courses. In addition, specific focus area requirements must be met.

Students may apply up to 6 credit hours of approved 4000-level courses from departments outside CEAE to their master's degree if the courses fit with the student's degree plan.

### Degree Plans

#### Plan I: Thesis Option

Students must complete 6 credit hours of MS thesis. Plan I culminates with an oral presentation and/or written report or oral examination.

#### Plan II: Non-Thesis Option

There are two non-thesis options:

- Students choosing Plan IIa must complete at least 30 credit hours of coursework, including a 3-credit independent study report.
- Students choosing Plan IIb must complete at least 30 credit hours of coursework and pass a final exam.

### Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one to two years.

## Civil Engineering - Professional Master of Science (MSCVE)

The Department of Civil, Environmental and Architectural Engineering offers a professional master's degree tailored toward working engineers who desire to develop a new skill set. The programs are coursework based and result in a Master of Science degree.

### Areas of Emphasis

#### Water Engineering and Management Emphasis

CU Boulder's professional Master of Science degree in civil engineering, with an emphasis in water engineering and management (WE&M), combines technical courses in environmental and civil engineering with highly-valued professional, non-technical skills in communication, leadership, management, utility finance and governance. The water engineering and management program provides students with leadership skills so they can effectively manage teams and initiatives typically faced in the water profession.

The water engineering and management professional master's program (PMP), designed for working professionals, provides the tools you need to produce results and solve increasingly complex problems in the water profession. Courses are delivered on campus and live streamed/recorded options over the internet, allowing working professionals from around the world to earn a graduate MS degree while continuing to put the learning into practice in their work.

Students are young and mid-career professionals working for utilities, consulting firms, government and regulatory agencies, looking to

advance their careers in the water industry. With faculty of senior water professionals from across the country, including those from utilities, consulting firms, and global professional organizations, students gain an opportunity to network and learn through real work case studies.

All of the graduate courses are available to distance and on campus students. All the students can come to class, watch the live classes over Zoom and/or the recorded Zoom classes. The PMP program is a coursework-only degree and requires 30 credits. These credits can be obtained with ten, 3-credit hour courses.

The WE&M courses are available for a WE&M graduate certificate (<https://www.colorado.edu/ceae/water-engineering-management-certificate/>) or as an Professional MS degree (<https://www.colorado.edu/ceae/water-engineering-management-professional-masters-program/>).

### Global Engineering Emphasis

The master of science degree in civil engineering with an emphasis in global engineering is a unique program offered by the Mortenson Center at CU Boulder. This degree is a professional track of the MS program in civil engineering. It is designed to offer students exposure to a breadth of knowledge in relevant areas such as global health, development economics and impact evaluation, while also building technical skills and providing the opportunity for further study in a specific area of interest within global engineering. In addition to classroom-based learning, students are required to complete a field practicum, embedded for six weeks to six months with a global development organization. These practicum placements have taken place in over 50 countries, partnering with over 80 organizations. Learn more about our practicum partnerships on the Mortenson Center (<https://www.colorado.edu/center/mortenson/education/practicum-placements/>) website.

Our graduates are able to provide technical expertise to development agencies or other firms by recognizing the many facets of community development that are critical to sustainable solutions. Students gain skills in data analysis, project management and systems thinking so they can help create and implement solutions to address worldwide needs.

For more information, visit the Mortenson Center in Global Engineering (<https://www.colorado.edu/center/mortenson/>) webpage.

### Dual-Track Civil Engineering Emphasis

The dual-track professional master of science degree in civil engineering provides students and practicing professionals graduate-level engineering specialization and technical competence in more than a single area. The intended cross-disciplinary training and perspective is often needed to serve or lead in the diverse field of civil engineering where engineers typically have to work in and interact with others from more than one discipline in large and small projects, private and government sectors, in design and development as well as consulting services. The broader technical preparation expands their career opportunities, professional outlook and provides multiple pathways to leadership and management positions. The high demand nationally for more broadly trained graduates in civil engineering to satisfy our sustainable and resilient infrastructure needs and in turn the national's overall economical development points to the benefit of a cross-disciplinary general civil engineering coursework-only professional master's degree.

For more information, visit the department (<https://www.colorado.edu/ceae/civil-engineering-professional-master-science-mscve-dual-track-option/>) website.

## Requirements

### Course Requirements

The following course requirements are subject to change; for the most current information, visit the department's Water Engineering & Management webpage or the Mortenson Center in Global Engineering (<https://www.colorado.edu/center/mortenson/>) webpage.

The professional master's degree requires a total of 30 credit hours, at least 24 of which must be completed at the 5000 level or above. At least 18 credit hours must be from coursework in CVEN.

### Time Limit

All degree requirements must be completed within four years of the date of commencing coursework.

### Areas of Emphasis

#### Water Engineering & Management Emphasis

This emphasis requires at least 30 credit hours from the following categories.

Code	Title	Credit Hours
<b>Environmental Engineering Core Courses</b>		
CVEN 5464	Environmental Engineering Processes	3
CVEN 5404	Water Chemistry	3
CVEN 5484	Applied Microbiology and Toxicology	3
Choose one:		3
CVEN 5524	Drinking Water Treatment	
CVEN 5534	Wastewater Treatment	
CVEN 5474	Hazardous and Industrial Waste Management	
<b>Water Engineering &amp; Management Core Courses</b>		
CVEN 5564	Water Profession: Communication and Utility Finance	3
CVEN 5574	Water Utility Management: Current Issues and Future Challenges	3
CVEN 5584	Water Profession: Leadership and Management	3
<b>Electives &amp; Master's Report and Seminar Courses</b>		
Choose from the the following for a total of 9 credits:		9
Civil engineering electives (3-9 credits)		
Public affairs electives at CU Denver (0-3 credits)		
Master's Report and Seminar (2 credits)		
Additional courses to fulfill 30-credit minimum, if necessary.		
<b>Total Credit Hours</b>		<b>30</b>

#### Global Engineering Emphasis

This emphasis requires at least 30 credit hours distributed as follows.

Code	Title	Credit Hours
<b>Required Core Courses</b>		
CVEN 5919	Global Development for Engineers	3

CVEN 5939	Global Development Practicum	3
<b>Global Engineering Series <sup>1</sup></b>		
MCGE offers courses as series of 5-week modules, with each module worth one credit-hour. In the Professional Master's in Global Engineering, students are required to complete 12 credit-hours from the series		12
Principles		
Project Management		
Field Methods		
Water, Sanitation and Hygiene (WASH)		
Humanitarian Aid		
Household Energy		
<b>Option Area</b>		
Students work with their faculty advisor to determine which courses to take in order to fulfill the remaining 12 required credit hours. These can be met through courses that fall under an established theme (e.g., energy, infrastructure, WASH) or that help to strengthen prioritized skills (e.g., project management, data analysis) as identified by the student and their advisor.		12
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Global Engineering Series course options can be found on the Mortenson Center (<https://www.colorado.edu/center/mortenson/graduate-education/professional-masters-degrees/>) website.

#### Dual-Track Emphasis

For this emphasis, students are required to:

- Select 9 credit hours from the courses listed in **Group A** and 15 credit hours from **Group B** of more than one **sub-areas listed below**.
- Select 6 credits of 5000-level free electives from the extensive course offerings from civil or other engineering disciplines in the College or professional management classes, such as EMEN 5010 and EMEN 5020, collectively referred to as **Group C**.

Code	Title	Credit Hours
<b>Sub-area 1: Structural Engineering</b>		
<i>Group A</i>		
CVEN 5161	Advanced Mechanics of Materials I	
CVEN 5525	Computational Structural Analysis I	
CVEN 5511	Introduction to Finite Element Analysis	
CVEN 5111	Structural Dynamics	
<i>Group B</i>		
CVEN 5575	Advanced Topics in Steel Design	
CVEN 5585	Advanced Topics in Reinforced Concrete Design	
CVEN 6595	Earthquake Engineering	
<b>Sub-area 2: Construction Engineering</b>		
<i>Group A</i>		
CVEN 5006	Construction Engineering and Management Fundamentals	
CVEN 5226	Construction Safety	
CVEN 5346	Managing Construction and Engineering Projects and Organizations	
CVEN 5446	Infrastructure Asset Management	

*Group B*

CVEN 5246	Legal Aspects of Construction
CVEN 5276	Engineering Risk and Decision Analysis
CVEN 5836	Special Topics for Seniors/Grads (BIM for Capital Projects)
CVEN 5836	Special Topics for Seniors/Grads (AI/ML in the Built Environment)

**Sub-area 3: Geotechnical Engineering***Group A*

CVEN 5708	Soil Mechanics
CVEN 5798	Dynamics of Soils and Structures
CVEN 5788	Computational Modeling in Geotechnical Engineering
CVEN 5768	Introduction to Rock Mechanics

*Group B*

CVEN 5628	Seepage and Slopes
CVEN 5728	Foundation Engineering
CVEN 5818	Geotechnical Earthquake Engineering

**Sub-area 4: Water Resources Engineering***Group A*

CVEN 5333	Physical Hydrology
CVEN 5353	Groundwater Hydrology
CVEN 5313	Environmental Fluid Mechanics
CVEN 5454	Statistical Methods for Natural and Engineered Systems
CVEN 5537	Numerical Methods in Civil Engineering

*Group B*

CVEN 5363	Modeling of Hydrologic Systems
CVEN 5393	Water Resources System and Management
CVEN 5383	Applied Groundwater Modeling
CVEN 5343	Transport and Dispersion in Surface Water
CVEN 5423	Water Resources Engineering Design

## Global Engineering - Graduate Certificate

The Mortenson Center in Global Engineering trains engineers to work in partnership with people from developing communities worldwide to create sustainable solutions to meet their basic needs.

The Mortenson Center in Global Engineering provides students with the opportunity to engage in education, research and practice that is focused on finding solutions to global development challenges. The graduate certificate consists of three specialized, classroom-based courses and a field practicum course. The field practicum integrates education and practice, with students applying their knowledge and skills to contribute to projects in more than 25 countries and tribal nations. Students also have the opportunity to take part in research funded by agencies such as the Bill & Melinda Gates Foundation, USEPA and most recently USAID. For more information, visit the Mortenson Center (<http://www.colorado.edu/mcedc/>) website.

## Requirements

### Eligibility

The Mortenson Center in Global Engineering offers a graduate certificate to degree-seeking graduate-level engineering students (including BS/MS students in their final year and MS or PhD students) enrolled in a department within the College of Engineering and Applied Science. It is primarily designed for students who want to learn about global development or who have an interest in possibly pursuing a career in the fields of community development or humanitarian engineering.

The global engineering graduate certificate requirements are separate from the graduate degree requirements established by each student's home department. Therefore, graduate students interested in completing the certificate need to contact their respective academic advisors to determine how the certificate courses will fit into their overall degree plan.

### Program Requirements

Students earn the certificate by satisfactorily completing the four required courses listed below, with a grade of B- or higher in each course.

Code	Title	Credit Hours
<b>Required Courses</b>		
CVEN 5919	Global Development for Engineers	3
CVEN 5929	Sustainable Community Development 2	3
CVEN 5939	Global Development Practicum	3
CVEN 5837	Special Topics for Seniors/Grads (Fieldwork Methods for Development Engineers)	3
<b>Total Credit Hours</b>		<b>12</b>

## Computer Science

The University of Colorado Boulder Computer Science graduate program is one of the top ranked programs in the *U.S. News & World Report* Best Graduate Schools issue among public universities. Students receive a strong education and conduct groundbreaking tier-one research. We have 60+ faculty members conducting fundamental and applied research in artificial intelligence, complex systems, robotics, computational biology, human centered computing, numerical & scientific computing, programming languages, software engineering, systems and networking, verification and theory of computing.

The department has also been awarded funds for national centers like the Pervasive Personalized Intelligence IUCRC, ASPIRE, NSF AI Institute for Students-AI Teaming.

Boulder is also home to research and development operations for many large companies and four federal research labs: the National Center for Atmospheric Research, the National Institute for Standards and Technology, the National Oceanic and Atmospheric Administration and the National Renewable Energy Laboratory.

Recent doctoral and master's graduates accepted employment at companies including, but not limited to, the following: Microsoft, Apple, Google, Facebook, Twitter, Cisco, Raytheon, HP, NASA, Amazon, Sandia National Laboratories, Northrop Grumman and Seagate. Many of our graduating PhD students also enter careers in academia.

For more information, visit the Computer Science (<http://www.colorado.edu/cs/>) website.

## Master's Degrees

- Computer Science - Master of Science (MS) (p. 1581)
- Computer Science - Master of Science (MS) Online (p. 1583)
- Computer Science - Professional Master of Science (MSCPS) (p. 1585)
- Network Engineering - Master of Science (MSNE) (p. 1589)

## Doctoral Degree

- Computer Science - Doctor of Philosophy (PhD) (p. 1591)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Assistant Professor; PhD, Cornell University

Martin, James H. ([https://experts.colorado.edu/display/fisid\\_100495/](https://experts.colorado.edu/display/fisid_100495/))  
Professor; PhD, University of California, Berkeley

Mishra, Shivakant ([https://experts.colorado.edu/display/fisid\\_118376/](https://experts.colorado.edu/display/fisid_118376/))  
Professor; PhD, University of Arizona

Monteleoni, Claire Elizabeth ([https://experts.colorado.edu/display/fisid\\_163979/](https://experts.colorado.edu/display/fisid_163979/))  
Associate Professor; PhD, Massachusetts Institute of Technology

Morrison, Rebecca E. ([https://experts.colorado.edu/display/fisid\\_159999/](https://experts.colorado.edu/display/fisid_159999/))  
Assistant Professor; PhD, University of Texas Austin

Mozer, Michael C. ([https://experts.colorado.edu/display/fisid\\_105922/](https://experts.colorado.edu/display/fisid_105922/))  
Research Professor; PhD, University of California, San Diego

Naidu, Supriya ([https://experts.colorado.edu/display/fisid\\_166267/](https://experts.colorado.edu/display/fisid_166267/))  
Assistant Teaching Professor; MS, University of Colorado Boulder

Nath Sreesha ([https://experts.colorado.edu/display/fisid\\_165807/](https://experts.colorado.edu/display/fisid_165807/))  
Assistant Teaching Professor, Associate Chair; MS, University of Colorado Boulder

Onyejekwe, Osita Eluemuno ([https://experts.colorado.edu/display/fisid\\_164235/](https://experts.colorado.edu/display/fisid_164235/))  
Assistant Teaching Professor; PhD, Florida Institute of Technology

Oscamou, Maribeth B. ([https://experts.colorado.edu/display/fisid\\_159794/](https://experts.colorado.edu/display/fisid_159794/))  
Associate Teaching Professor; MS, University of Colorado Boulder

Pacheco, Maria  
Assistant Professor; PhD, Purdue University

Palen, Leysia A. ([https://experts.colorado.edu/display/fisid\\_114604/](https://experts.colorado.edu/display/fisid_114604/))  
Distinguished Professor, Associate Chair; PhD, University of California, Irvine

Palmer, Martha  
Research Professor; PhD, University of Edinburgh (Scotland)

Paradise, Alan ([https://experts.colorado.edu/display/fisid\\_158849/](https://experts.colorado.edu/display/fisid_158849/))  
Assistant Teaching Professor; MS, Washington University in St. Louis

Peleg, Orit ([https://experts.colorado.edu/display/fisid\\_159998/](https://experts.colorado.edu/display/fisid_159998/))  
Assistant Professor; PhD, ETH Zürich (Switzerland)

Perigo, Levi ([https://experts.colorado.edu/display/fisid\\_155562/](https://experts.colorado.edu/display/fisid_155562/))  
Scholar in Residence; PhD, Nova Southeastern University

Phillips, Caleb Timothy ([https://experts.colorado.edu/individual/fisid\\_152384/](https://experts.colorado.edu/individual/fisid_152384/))  
Assistant Professor Adjunct

Quigley, David Philp ([https://experts.colorado.edu/display/fisid\\_164079/](https://experts.colorado.edu/display/fisid_164079/))  
Assistant Teaching Professor; PhD, University of Colorado Boulder

Reckwerdt, Eric  
Assistant Teaching Professor; PhD, University of Hawaii Manoa

Reed, David P. ([https://experts.colorado.edu/display/fisid\\_152458/](https://experts.colorado.edu/display/fisid_152458/))  
Scholar in Residence; PhD, Carnegie Mellon University

Repenning, Alexander ([https://experts.colorado.edu/display/fisid\\_104946/](https://experts.colorado.edu/display/fisid_104946/))  
Professor Adjunct; PhD, University of Colorado Boulder

Rivera, Michael ([https://experts.colorado.edu/display/fisid\\_169859/](https://experts.colorado.edu/display/fisid_169859/))  
Assistant Professor; PhD, Carnegie Mellon University

Roncone, Alessandro ([https://experts.colorado.edu/display/fisid\\_164509/](https://experts.colorado.edu/display/fisid_164509/))  
Assistant Professor; PhD, Istituto Italiano di Tecnologia (Italy)

Roque, Ricarose ([https://experts.colorado.edu/display/fisid\\_158315/](https://experts.colorado.edu/display/fisid_158315/))  
Assistant Professor; PhD, Massachusetts Institute of Technology

Rozenberg, Grzegorz ([https://experts.colorado.edu/display/fisid\\_100478/](https://experts.colorado.edu/display/fisid_100478/))  
Professor Adjunct

Rozner, Eric John ([https://experts.colorado.edu/display/fisid\\_164185/](https://experts.colorado.edu/display/fisid_164185/))  
Assistant Professor; PhD, University of Texas at Austin

Sankaranarayanan, Sriram ([https://experts.colorado.edu/display/fisid\\_147413/](https://experts.colorado.edu/display/fisid_147413/))  
Professor, Associate Chair; PhD, Stanford University

Santos, Jose R. ([https://experts.colorado.edu/display/fisid\\_124623/](https://experts.colorado.edu/display/fisid_124623/))  
Associate Teaching Professor; MS, University of Colorado Boulder

Schnabel, Robert B. ([https://experts.colorado.edu/display/fisid\\_100499/](https://experts.colorado.edu/display/fisid_100499/))  
Professor, Faculty Director; PhD, Cornell University

Schreüder, Willem A. ([https://experts.colorado.edu/display/fisid\\_143834/](https://experts.colorado.edu/display/fisid_143834/))  
Associate Professor Adjunct; PhD, University of Stellenbosch

Stade, Elisabeth Cote ([https://experts.colorado.edu/display/fisid\\_147089/](https://experts.colorado.edu/display/fisid_147089/))  
Associate Teaching Professor, Associate Faculty Director; MA, University of Colorado Boulder

Sumner, Tamara ([https://experts.colorado.edu/display/fisid\\_105742/](https://experts.colorado.edu/display/fisid_105742/))  
Professor; PhD, University of Colorado Boulder

Thrall, Lloyd Gregory  
Associate Faculty Director; MA, University of London (England)

Trivedi, Ashutosh ([https://experts.colorado.edu/display/fisid\\_156589/](https://experts.colorado.edu/display/fisid_156589/))  
Assistant Professor; PhD, University of Warwick (UK)

Truong, Le Hoang ([https://experts.colorado.edu/display/fisid\\_172198/](https://experts.colorado.edu/display/fisid_172198/))  
Teaching Assistant Professor; MS, Korea Advanced Institute of Science and Technology

Tufo, Henry ([https://experts.colorado.edu/display/fisid\\_127040/](https://experts.colorado.edu/display/fisid_127040/))  
Professor; PhD, Brown University

Vernerey, Divya E. ([https://experts.colorado.edu/display/fisid\\_145131/](https://experts.colorado.edu/display/fisid_145131/))  
Teaching Associate Professor; PhD, Northwestern University

Voida, Amy Kathryn Mitchell ([https://experts.colorado.edu/display/fisid\\_155855/](https://experts.colorado.edu/display/fisid_155855/))  
Associate Professor; PhD, Georgia Institute of Technology

Voida, Stephen A. ([https://experts.colorado.edu/display/fisid\\_155856/](https://experts.colorado.edu/display/fisid_155856/))  
Associate Professor; PhD, Georgia Institute of Technology

Vu, Tam Ngoc  
Associate Professor; PhD, Rutgers University

Ward, Wayne Hinson ([https://experts.colorado.edu/display/fisid\\_114680/](https://experts.colorado.edu/display/fisid_114680/))  
Research Professor; PhD, University of Colorado Boulder

Windyga, Piotr  
Scholar in Residence; PhD, University of Rennes

Wu, Di  
Teaching Assistant Professor; PhD, City University of New York

Wustrow, Eric A. ([https://experts.colorado.edu/display/fisid\\_156419/](https://experts.colorado.edu/display/fisid_156419/))  
Assistant Professor; BE, University of Michigan Ann Arbor

Yeh, Tom ([https://experts.colorado.edu/display/fisid\\_151584/](https://experts.colorado.edu/display/fisid_151584/))  
Associate Professor; PhD, Massachusetts Institute of Technology

Yuan, Lei ([https://experts.colorado.edu/individual/fisid\\_167699/](https://experts.colorado.edu/individual/fisid_167699/))  
Assistant Professor; PhD, Northwestern University

Zagrodzki, Maciej  
Assistant Teaching Professor; MSc, Colorado School of Mines

## Courses

### CSCI 5000 (1) Introduction to the Computer Science Research-Based MS Program

Instructs new research-based MS students in Computer Science how to become an effective member in terms of research, teaching, and presentation, and potentially advancing to the PhD program. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.

**Requisites:** Restricted to Computer Science (CSCI) MS students only.

**Additional Information:** Departmental Category: General Computer Science

### CSCI 5010 (3) Fundamentals of Data Communication

Combining conceptual knowledge about data communications and core Internet technologies with hands-on labs that reinforce the conceptual knowledge, this course provides students with the ability to create innovative technology solutions in their discipline. Learning how the Internet works and being able to evaluate and operate an Internet network is a valuable skill; students in this course will have a competitive advantage in this foundational field.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5010

**Requisites:** Restricted to Computer Science Network Engineering MS Majors.

**CSCI 5020 (3) Fundamentals of Network Programming**

This course provides an immersion into the foundation theories of network programming and software development for emerging technologies. Students will gain direct experience with real-world programming lab experiments and demonstrations that will relate to the prolific increase of cross-discipline programming.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5020

**Requisites:** Restricted to Computer Science Network Engineering MS Majors.

**CSCI 5030 (3) Fundamentals of System Administration and Virtualization**

Introduces the basic use and administration of Unix and Linux systems.

Topics include booting and system management, scripting, storage and logical volume management, filesystem configuration, account management and password security, process control, software installation, event logging and system auditing. Students will also develop familiarity with virtualization platforms such as VirtualBox and VMware to implement and test their system configurations.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5030

**Requisites:** Restricted to Computer Science Network Engineering MS Majors.

**CSCI 5040 (3) Professional Masters Project 1**

First class in a two semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The first semester focuses on design, requirements, and prototyping and is based on common waterfall project practices with gate reviews and project artifacts. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.

**Requisites:** Restricted to Computer Sciences Professional Masters (CSEN-MSCPS) graduate students only.

**CSCI 5050 (3) Professional Masters Project 2**

Second class in a two-semester cycle. Focuses on applied best practice in all facets of software engineering in industry and the application of those practices. Students are part of a development team involved in a two-semester project. Each student has a specific role on the project, and all will be responsible for some level of actual software development. The second semester focuses on development, code construction, and delivery, using agile-based project management for development. Students work in both Scrum and Kanban agile project cycles. Testing, soft skills for teamwork, project management, and other supporting aspects will be driven throughout the semester. The outcome of the two-semester cycle is a final project delivery of a software product for an institutional or industrial partner and/or for entry into software development competitions.

**Requisites:** Requires prerequisite course of CSCI 5040 (minimum grade of B). Restricted to CSEN graduate students only.

**CSCI 5100 (1) Computer Science Colloquium**

Learn about innovative research and teaching in computer science by attending talks and discussions by leading researchers and educators. Learn professional presentation skills and etiquette of participating in scientific research presentations. Students can attend during any term even if they are not enrolled

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to Computer Science (CSCI) MS students only.

**CSCI 5113 (3) Linux System Administration**

Introduces Linux system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up, using provided computing resources, and must maintain and secure these servers themselves. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5113 and CSCI 4113

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 3753 (minimum grade B).

**CSCI 5114 (3) Practical Algorithmic Complexity**

When coming across an algorithmic problem, how do we think about how hard it is? Beyond just how much time or memory it takes, computational complexity offers a plethora of concepts for understanding this fundamental question. This leads to the appropriate choice of algorithm for the job, the development of new algorithms, and understanding the role of algorithmic complexity in natural settings such as biology and physics.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4114

**Requisites:** Restricted to graduate students only.

**CSCI 5135 (3) Computer-Aided Verification**

Covers two-level and multilevel minimization, optimization via expert systems, algebraic and Boolean decomposition, layout methodologies, state assignment, encoding and minimization, silicon compilation.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5139

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ECEN 2703 and general proficiency in discrete mathematics and programming.

**Additional Information:** Departmental Category: Programming Languages

**CSCI 5140 (2) CLASIC Capstone**

In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master's program, we will review each student's internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 5140

**Requisites:** Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.

**Recommended:** It is recommended that this course be taken after the CLASIC internship has been completed.

**CSCI 5160 (3) Introduction to Enterprise Networks**

Provides direct experience with networking functions and equipment through experiments and demonstrations. Students learn the fundamental principles and techniques of voice and data switching and routing within an enterprise environment. Procedures require the use of actual commercial equipment (including Cisco, Juniper, and Arista) plus network services and observation using packet analyzers. Weekly experiments and exams are designed to reflect real-world networking scenarios and require an additional hours of lab work. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. Students are expected to spend 6 hours per week in the lab. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams. Recommended restriction: students are expected to know the OSI Model, principles of Ethernet Switching, IP Addressing and operation of protocols such as ARP, DHCP, DN

**Requisites:** Restricted to graduate students only.

**CSCI 5170 (3) IP Routing Protocols and Policies**

Explores practical usage and conceptual underpinnings of link state and distance vector routing protocols. The course further explores a holistic view of how the Internet works from a technical routing aspect as well as policy and economics. The course is supplemented with frequent labs to fully explore the specific workings of the routing protocols RIP, OSPF, and BGP and the relationships between them in practical lab based routing scenarios.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5010 or CYBR 5010 or CSCI 4273 or CSCI 5273 or ECEN 5273.

**CSCI 5180 (3) Network Management and Automation**

Teaching both technical and soft skills, this course incorporates best practices and the key theories behind them such as understanding common services needed for network functionality, maintenance, and troubleshooting. The goal of this course is to equip students with the valuable skills and tools they need to hit the ground running in most network management, operation, automation, and DevOps roles within a company. By the end of the course, students will be competent in the technologies, services, and tools used to manage and automate complex networks.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite background in Linux system administration, Python programming and computer network engineering/data communications.

**CSCI 5190 (3) Voice Over IP: Voice Network Design and Implementation**

Provides an in-depth immersion into the foundational theories and technologies of Voice Over IP (VoIP). This course supplements these theories with direct experience through real-world, hands-on lab experiments and demonstrations. The fundamentals of voice technologies, services, and tools used in industry to design, deploy and troubleshoot VoIP networks will be explored in detail, providing the student with a competitive advantage in the job market.

**Requisites:** Requires prerequisite course of CSCI 5170 or CSCI 5160 or CSCI 5180 (minimum grade B). Restricted to graduate students.

**CSCI 5200 (3) Introduction to Wireless Systems**

Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5200 and CSCI 4200

**Recommended:** Prerequisites CYBR 5010 and CYBR 5012.

**CSCI 5220 (3) Wireless Local Area Networks**

Emphasis on the IEEE P802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will to analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified<sub>z</sub> programs, and will learn how to model and analyze WLAN traffic using industry standard tools.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5220 and ECEN 5122

**Requisites:** Requires prerequisite course of CYBR 5010 or CSCI 5010 or CSCI 5273 (minimum grade B).

**Recommended:** Prerequisite CYBR 5200 or CSCI 5200.

**CSCI 5229 (3) Computer Graphics**

Studies design, analysis and implementation of computer graphics techniques. Topics include interactive techniques, 3D viewing and models, clipping, transformations, projection, removal of hidden surfaces, lighting, textures and shadows. Knowledge of basic linear algebra is required.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4229

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graphics

**CSCI 5230 (3) Wireless Systems Lab**

This Wireless Solutions Architecture course is designed to examine the core concepts of wireless architecture, design and implementation. The course will focus on architecting solutions unlicensed technology, specifically enterprise Wi-Fi networks. Students will learn how to design, implement, troubleshoot and operate enterprise wireless networks.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5230

**Requisites:** Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

**CSCI 5239 (3) Advanced Computer Graphics**

Studies design, analysis and implementation of advanced computer graphics techniques. Topics include shaders, using the GPU for high performance computing, graphics programming on embedded devices such as mobile phones; advanced graphics techniques such as ray tracing.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4239

**Requisites:** Requires prerequisite course of CSCI 5229 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Graphics

**CSCI 5240 (3) Introduction to Blockchain**

Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5240 and CSCI 4240

**Requisites:** Restricted to graduate students only.

**CSCI 5253 (3) Datacenter Scale Computing - Methods, Systems and Techniques**

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4253 and CSPB 4253 and ECEN 5253

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5273.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 5254 (3) Convex Optimization and Its Applications**

Discuss basic convex analysis (convex sets, functions and optimization problems), optimization theory (linear, quadratic, semidefinite and geometric programming; optimality conditions and duality theory), some optimization algorithms (descent methods and interior-point methods), basic applications (in signal processing, control, communications, networks, statistics, machine learning, circuit design and mechanical engineering, etc.), and some advanced topics (distributed decomposition, exact convex relaxation, parsimonious recovery).

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 5260 (3) Datacenter Networks**

Covers design and configuration principles required to build highly scalable and highly redundant network solutions used by datacenters. Class makes use of commercial grade equipment to build network topologies and services. Students will work in teams to build a virtualized cluster, load balance application traffic between multiple server blades, assure high availability in Ethernet and IP layers, and able to prioritize important services using QoS. This lab-based course requires an average of 6 hours per week where the students are physically present in the CU Network Engineering Lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams.

**Requisites:** Requires prerequisite course of CSCI 5160 (minimum grade B). Restricted to graduate students.

**CSCI 5264 (3) Decision Making under Uncertainty**

Covers algorithms for optimal sequential decision making in the presence of uncertainty. Mathematical formalisms include the Markov decision process (MDP), partially observable Markov decision process (POMDP), and Games. Solution techniques include exact dynamic programming, Monte Carlo tree search, deep reinforcement learning, and alpha vector value approximation for POMDPs. Assignments require programming in a high level language (Julia as of 2023). Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5264

**Grading Basis:** Letter Grade

**CSCI 5270 (3) IP Network Design**

Focuses on the design and implementation of network solutions according to the needs of a client. The course helps students develop skills to be a consultant and walks them through the complete life cycle of network project development as a member of a professional services team. Implement fundamentals of IP Routing Protocols and apply them directly to design based networking problems. Design scenarios will incorporate physical and logical design, financial analysis, and laboratory configuration.

**Requisites:** Requires prerequisite course of CSCI 5170 or CSCI 5160 (minimum grade B). Restricted to graduate students.

**Recommended:** Prerequisite strong familiarity with network protocol operation and implementation.

**CSCI 5273 (3) Network Systems**

Focuses on design and implementation of network programs and systems, including topics in network protocols, architectures, client-server computing, software-driven networking, and other contemporary network hardware-software system design and programming techniques. Familiarity with C and Unix is required.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5273

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 4273 and CSCI 4573.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 5280 (3) Software-Defined Networking**

Provides an in-depth immersion into the foundational theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), and emerging technologies for computer networks. Supplements the theoretical knowledge learned through direct experience with real-world lab experiments and demonstrations. This knowledge will give students an advantage in the job market for this in-demand, constantly changing subject.

**Requisites:** Requires prerequisite course of CSCI 5180 (minimum grade B). Restricted to graduate students.

**CSCI 5302 (3) Advanced Robotics**

Exposes students to current research topics in the field of robotics and provides hands-on experience in solving a grand challenge program.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4302

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 3302 or instructor consent required.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5303 (1) Cybersecurity Club Companion Course**

Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5303 and CSCI 4303

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Recommended:** Prerequisites CSCI 5403 or CSCI 3403.

**CSCI 5313 (3) Concurrent Programming**

Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5313 and ECEN 4313 and CSCI 4313

**Requisites:** Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 (minimum grade C). Restricted to graduate students only.

**Recommended:** Prerequisite ECEN 3593.

**CSCI 5314 (3) Dynamic Models in Biology**

Surveys computational and mathematical modeling to illuminate biological processes. Students work together to learn to build and analyze models using a variety of numerical tools, tackle meaningful biological problems, and communicate effectively across disciplines. Specific topics: Langevin dynamics of protein folding, agent-based models, finite difference models of organismal growth, stochastic and deterministic cellular automata game of life, models of behavior.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4314

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite comfort with mathematics and/or programming experience, and more advanced understanding (upper undergraduate level) of any relevant discipline.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 5322 (3) Algorithmic Human-Robot Interaction**

Creating autonomous systems that interact with humans requires the synthesis of insights from a variety of disciplines. This course aims to provide students with the algorithms, models, and frameworks that form the building blocks required for developing intelligent autonomous systems that perform useful tasks while interacting with, coordinating with, co-existing with, or otherwise assisting humans. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**CSCI 5340 (3) Startup Essentials: Entrepreneurial Projects in Computing**

Provides students with the tools to be successful technical co-founders of their own startups. Explores the initial stages of founding a startup, including team formation, idea validation, pivoting and pitching, while employing an iterative methodology. Student teams will develop a minimum viable product, pitch their final startup concept and be evaluated on product/market fit. CS coding concepts relevant for startups, including potentially cloud programming, mobile programming and agile software engineering, will be taught. Does not satisfy breadth requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4348

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 5350 (3) Entrepreneurial Projects II**

Follows CSCI 5340. In the second semester of this entrepreneurial project capstone, student teams will seek to find market traction for a high-fidelity Minimum Viable Product (MVP), software and/or hardware, that they will develop as part of their startup project. Teams will further learn to incorporate principles of marketing, business finance and legal issues into the business model for their startup concept. Does not satisfy breadth requirement.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4358

**Requisites:** Requires a prerequisite course of CSCI 5340 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 5352 (3) Network Analysis and Modeling**

Examines modern techniques for analyzing and modeling the structure and dynamics of complex networks. Focuses on statistical algorithms and methods, and emphasizes model interpretability and understanding the processes that generate real data. Applications are drawn from computational biology and computational social science. No biological or social science training is required.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 3104 and APPM 3570.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5360 (3) Internet Service Provider Networks**

This course presents advanced networking design and implementation techniques through experiments with network measurement equipment, switches, router, and management interfaces. The course primarily focuses on Service Provider Transport technologies for capacity, scalability and fault tolerance. Students learn the essential network architectures of last mile and long haul network solutions used for public and private network traffic transport; implementation of SLAs, load balancing, first hop redundancy, and MPLS transport and L2/L3 VPN solutions. This course requires an average of 6 hours per week in the lab. Most lab exercises involve activities which require physical access to the hardware and cannot be done remotely. In addition to the lab time, students should also anticipate up to 6 additional hours of time for homework, reading, lab preparation and studying for exams.

**Requisites:** Requires prerequisite course of CSCI 5160 (minimum grade B). Restricted to graduate students.

**Recommended:** Prerequisite CSCI 5170.

**CSCI 5380 (3) Network Virtualization and Orchestration**

Provides an advanced, in-depth immersion into the theories and technologies of Software-Defined Networking (SDN), Network Functions Virtualization (NFV), network virtualization/orchestration, and emerging technologies for computer networks. Expands on the real-world lab experiments and theoretical demonstrations learned from the course pre-requisite. The knowledge and critical thinking skills learned from this course will arm students with an advantage in the job market for this in-demand, constantly changing subject.

**Requisites:** Requires prerequisite of CSCI 5280 (minimum grade B). Restricted to graduate students.

**CSCI 5402 (3) Research Methods in Human-Robot Interaction**

Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5402

**Requisites:** Restricted to graduate students only.

**CSCI 5403 (3) Cybersecurity**

Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). At the conclusion of the course, students should have a solid foundation in cybersecurity and hands-on experience.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5300

**Requisites:** Restricted to graduate students only.

**CSCI 5413 (3) Computer Security and Ethical Hacking**

Teaches basic exploit design and development through hands-on experimentation and testing. Uses a controlled environment to give students a "playground" in which to test penetration skills that are normally not allowed on live networks.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4413

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 5423 (3) Biologically-inspired Multi-Agent Systems**

Explores the principles and emergent properties of collective dynamics through computational modeling and theory. Focuses on multi-agent systems using insights from biology, like the self-assembly of cells and insect colony behavior. Topics include designing swarm intelligence, networked agents, cellular computing and self-assembly, optimization, synchronization, and evolutionary computation. Uses cross-discipline research developments to practice applied techniques. Biology background is not required.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 2270 and basic knowledge of programming.

**CSCI 5434 (3) Probability for Computer Science**

This course will introduce computer science students to topics in probability and statistics that will be useful in other computer science courses. Basic concepts in probability will be taught from an algorithmic and computational point of view, with examples drawn from computer science.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite courses of APPM 1360 or MATH 2300 and CSCI 2824 or MATH 2001 or ECEN 2703 (all minimum grade B).

**CSCI 5444 (3) Introduction to Theory of Computation**

Reviews regular expressions and finite automata. Studies Turing machines and equivalent models of computation, the Chomsky hierarchy, context-free grammars, push-down automata, and computability.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 5446 (3) Chaotic Dynamics**

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4446 and ECEN 4423 and ECEN 5423

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 5448 (3) Object-Oriented Analysis and Design**

An applied analysis and design class addressing the use of object-oriented techniques. Topics include domain modeling, use cases, architectural design and modeling notations. Students apply the techniques in analysis and design projects.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4448

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Software Engineering

**CSCI 5454 (3) Design and Analysis of Algorithms**

Techniques for algorithm design, analysis of correctness and efficiency; divide and conquer, dynamic programming, probabilistic methods, advanced data structures, graph algorithms, etc. Lower bounds, NP-completeness, intractability.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 2270 or equivalent.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 5502 (3) Data Mining**

Introduces basic data mining concepts and techniques for discovering interesting patterns hidden in large-scale data sets, focusing on issues relating to effectiveness and efficiency. Topics covered include data preprocessing, data warehouse, association, classification, clustering, and mining specific data types such as time-series, social networks, multimedia, and Web data.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4502

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5514 (3) Algorithms for Whole Genome Sequence Analysis**

Explore the algorithms that have been developed to assemble and analyze genome sequencing data. Genome sequencing produces vast and complex data that are intractable without efficient algorithms. This course covers the core data structures and algorithms which form the basis for research in topics ranging from evolution to the cause and treatment of many diseases, including cancer. Topics include string matching, indexing, compression, and succinct data structures. No prior knowledge of biology, DNA, or genetics is required.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite basic understanding of complexity analysis, core algorithms (for example, sort) and data structures (for example, graphs).

**CSCI 5523 (3) Modern Offense and Defense in Cybersecurity**

Introduce students to the modern techniques used in cyber-attacks and defenses. Topics covered: Stack canary, ASLR, SMEP/SMAP, CFI, Program Misusing, ROP, JOP, ret2lib, off-by-one, unsafe-unlink, UAF, ptmalloc, t-cache, Race condition, Kernel Exploitation.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 2400, ECEN 4133.

**CSCI 5525 (3) Compiler Construction**

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4555 and ECEN 4553 and ECEN 5523

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 3155 and CSCI 2400 or ECEN 3350.

**Additional Information:** Departmental Category: Programming Languages

**CSCI 5535 (3) Fundamental Concepts of Programming Languages**

Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5533

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 3155 or instructor consent required.

**Additional Information:** Departmental Category: Programming Languages

**CSCI 5548 (3) Software Engineering of Standalone Programs**

Applies engineering principles to phases of software product development, project planning, requirements definition, design, implementation, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections and modeling. Includes relation to RTS and object-oriented programming.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5543

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 1300 and CSCI 2270 or instructor consent required.

**Additional Information:** Departmental Category: Software Engineering

**CSCI 5550 (3) Designing for Defense 1**

Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams, chosen by competitive selection, work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real-world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment. The first semester of a two-course sequence. Students take this course, ASEN/CSCI/CYBR 5550, and ASEN/CSCI/CYBR 5580 contiguously as the sequence spans the academic year.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5550 and CYBR 5550

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CSCI 5573 (3) Advanced Operating Systems**

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5573

**Requisites:** Requires prerequisite course of CSCI 2400 and CSCI 3753 (all minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 5576 (4) High-Performance Scientific Computing**

Introduces computing systems, software and methods used to solve large-scale problems in science and engineering. Students use high-performance workstations and a supercomputer. First course in a two-semester sequence.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4576

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 5580 (3) Designing for Defense 2**

This course allows teams to continue their D4D journey from semester 1 guiding

**Requisites:** Requires prerequisite course of ASEN 5550 or CSCI 5550 or CYBR 5550 (minimum grade B). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CSCI 5593 (3) Advanced Computer Architecture**

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems and architectural features required for multicore processor designs. Also studies current and historically important computer architectures, including hardware security concepts.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5593 and ECEN 4693

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 4593 or instructor consent required.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 5606 (3) Principles of Numerical Computation**

Highlights computer arithmetic, solution of linear systems, least-squares approximations, nonlinear algebraic equations, interpolation, and quadrature.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 3656 and three semesters of calculus or equivalent.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 5616 (3) Introduction to Virtual Reality**

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4616, ATLS 4616, ATLS 5616

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 2270 or CSCI 2275 (minimum grade B).

**CSCI 5620 (3) Advanced Wireless Lab**

Provides a comprehensive, hands-on set of laboratory exercises for the teaching and demonstration of key technical skills required to understand, build, test, and analyze both analog and digital wireless communications concepts. In conjunction with lecture-based content to provide a solid foundation in digital communication theory, SDR-based laboratory exercises enable the synthesis of several fundamental concepts utilizing the latest, modern communications systems technologies.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5620

**Requisites:** Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

**Recommended:** Prerequisites CSCI 5630 or CYBR 5630 and CSCI 5220 or CYBR 5220.

**CSCI 5622 (3) Machine Learning**

Trains students to build computer systems that learn from experience. Includes the three main subfields: supervised learning, reinforcement learning and unsupervised learning. Emphasizes practical and theoretical understanding of the most widely used algorithms (neural networks, decision trees, support vector machines, Q-learning). Covers connections to data mining and statistical modeling. A strong foundation in probability, statistics, multivariate calculus, and linear algebra is highly recommended.

**Requisites:** Prereqs:(APPM 3310 or CSCI 2820 or MATH 2130 or 2135 or 3130 or 3135) OR (APPM 3570 or 4570 or CHEN 3010 or CSCI 3022 or CVEN 3227 or ECEN 3810 or ECON 3818 or MATH 3510 or 4510 or MCEN 3047 or STAT 3100 or 4000 or 4520) (min grade B) Grad students only

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5630 (3) Wireless and Cellular Systems**

Studies technologies and architectures employed in modern cellular wireless systems. Major topics include radio propagation, multiple access techniques, analog and digital cellular telephony, and personal communications systems. Presents the necessary tools to understand the wireless industry, its technical details, and its business drivers. Topics include modeling, spectrum, weather, multipath, Doppler effect, and shadowing and covers important aspects of multiple access technologies such as CDMA and OFDMA. introduces modern radio standards including LTE.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 5630

**Requisites:** Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

**CSCI 5636 (3) Numerical Solution of Partial Differential Equations**

Focuses on discretization techniques such as finite difference, finite element and finite volume methods, and parallel solution algorithms such as Krylov subspace methods, domain decomposition and multilevel methods.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites (CSCI 2820 or APPM 2360 or APPM 3310 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) AND (CSCI 3656 or APPM 4650 or MATH 4650 or MCEN 3030 or PHYS 2600) (all minimum grade B).

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 5646 (3) Numerical Linear Algebra**

Offers direct and iterative solutions of linear systems. Also covers eigen value and eigenvector calculations, error analysis, and reduction by orthogonal transformation. A sound knowledge of basic linear algebra, experience with numerical computation, and programming experience is required.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 5654 (3) Linear Programming**

Presents algorithms, simplex and modifications. Examines theory-duality and complementary slackness. Involves network flow algorithms. Introduces integer programming.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite linear algebra.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 5673 (3) Distributed Systems**

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5673

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5573 or a course in computer networks.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 5676 (3) Numerical Optimization**

Focuses on computational methods for solution of unconstrained and some constrained optimization problems, nonlinear least-squares problems and systems of nonlinear equations. Formerly CSCI 6676.

**Recommended:** Prerequisite (CSCI 2820 or APPM 2360 or APPM 3310 or MATH 2130 or MATH 2135 or MATH 3130 or MATH 3135) AND (CSCI 3022 or CSCI 3656 or APPM 4650 or MATH 4650 or MCEN 3030 or PHYS 2600) (all minimum grade B), and restricted to grad students.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 5714 (3) Formal Languages**

Explores context-free languages: pumping lemma and variants, closure properties, and decision properties. Involves parsing algorithms, including general and special languages, e.g., LR. Additional topics chosen by instructor.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5444 or instructor consent required.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 5722 (3) Computer Vision**

Explores algorithms that can extract information about the world from images or sequences of images. Topics covered include: imaging models and camera calibration, early vision (filters, edges, texture, stereo, optical flow), mid-level vision (segmentation, tracking), vision-based control and object recognition.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4722

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite probability, multivariate calculus and linear algebra.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5753 (3) Computer Performance Modeling**

Presents a broad range of system measurement and modeling techniques, emphasizing applications to computer systems. Topics include system measurement, work load characterization and analysis of data; design of experiments; simulation; and queuing theory and queuing network models.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4753 and ECEN 4753 and ECEN 5753

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 5802 (1) Data Science Team Companion Course**

Gives students hands-on experience applying data science techniques and machine learning algorithms to real-world problems. Students work in small teams on internal challenges, many of which will be sponsored by local companies and organizations and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Kaggle. Students will be expected to participate in both internal and external challenges, attend meetings and present short presentations to the group when appropriate. Instructor consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4802

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5809 (3) Computer Animation**

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4809 and ATLS 4809 and ATLS 5809

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graphics

**CSCI 5817 (3) Database Systems**

Provides an advanced treatment of basic database concepts.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 3753.

**Additional Information:** Departmental Category: Database Systems

**CSCI 5822 (3) Probabilistic and Causal Modeling in Computer Science**

Introduces a set of modeling techniques that have become a mainstay of modern artificial intelligence and machine learning research.

These techniques combine graphical models, Bayesian analysis, and multivariate statistics for probabilistic and causal inference and for interpreting the statistical structure of large data sets. Applications include healthcare, economics, marketing, social sciences, and more.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite undergraduate course in probability and statistics.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5828 (3) Foundations of Software Engineering**

Provides an introduction to software engineering concepts and techniques. Topics include the history of software engineering, fundamental software engineering principles and theory, software life cycles, software testing, and the design and implementation of concurrent and large-scale software systems.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Software Engineering

**CSCI 5832 (3) Natural Language Processing**

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 5832

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5839 (3) User-Centered Design and Development 1**

Develops the skills and practices necessary to apply user-centered approaches to software requirements analysis, and the design and evaluation of computer applications.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graphics

**CSCI 5840 (3) Advanced Network Automation**

Combining lectures, lab experiments, and demonstrations, students in this course will develop advanced skills and knowledge in network automation technologies, services, and tools. They will learn to analyze, evaluate, and apply historical and future services needed for network functionality, maintenance, and troubleshooting. The course will cover a range of topics, from technical to soft skills, including best practices and key theories.

**Requisites:** Requires prerequisite course of CSCI 5180 (minimum grade B). Restricted to Network Engineering students only.

**CSCI 5849 (3) Input, Interaction, and Accessibility**

Explores input and interaction techniques, with an emphasis on universal design and alternative interfaces. Students will explore traditional input methods such as keyboard and mouse input, and alternative techniques such as voice and eye gaze. Students will conduct performance evaluations of existing techniques, and prototype new interaction methods. Students will design technologies to support people with varying abilities and disabilities.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4849

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 3002 or CSCI 5839 (minimum grade B).

**CSCI 5854 (3) Theoretical Foundations of Autonomous Systems**

Covers techniques for modeling, design and verification of autonomous systems and application domains including automotive systems, robotics and medical devices. Modeling topics include timed systems, differential equations, switched systems, hybrid dynamical systems. Verification topics: reachability and stability verification. Temporal specifications. Synthesis of controllers. Applications: automotive systems, medical devices.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 5880 (3) Interactive Machine Learning for Customizable and Expressive Interfaces**

Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4889, ATLS 4889 and ATLS 5880

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5900 (1-6) Master's Level Independent Study**

Provides opportunities for independent study at the master's level.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 5919 (3) HCC Survey and Synthesis: Foundations and Trajectories**

Examines the interdisciplinary field of human-centered computing through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. Social computing, is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists, information scientists, social scientists, and business and media arts students.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5919

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Graphics

**CSCI 5922 (3) Neural Networks and Deep Learning**

Introduces modern approaches to machine learning using neural networks. Neural nets, popular in the early 1990s, have undergone a resurgence due to significant advances in computing power and the availability of very large data sets. Now rechristened 'deep learning', the field has produced state-of-the-art results in a range of artificial intelligence problems, including vision, speech and natural language processing.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 5929 (3) HCC Survey and Synthesis: New Disciplinary Directions**

Studies recent advances in human-computer interaction through critical analysis of influential papers and self-guided research. Examines new paradigms in input, output, and visualization for technology design and interaction. Considers innovative methods to assess various population design and technological needs. Studies in computer-related fields, social science, business, media arts and communications benefit learning about human-centered computing research.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5919.

**Additional Information:** Departmental Category: Graphics

**CSCI 6000 (1) Introduction to the Computer Science PhD Program**

Instructs new Ph.D students in Computer Science how to obtain a Ph.D and how to become an effective member of the computer science research community. Makes students aware of formal requirements, educational objectives, and research themes. Provides evaluative criteria and guidelines for all objectives to be achieved.

**Requisites:** Restricted to Computer Science (CSCI) PhD. students only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 6100 (1) Computer Science Colloquium**

Learn about innovative research and teaching in computer science by attending talks and discussions by leading researchers and educators. Learn professional presentation skills and etiquette of participating in scientific research presentations. Not repeatable for credit. Students can attend during any term even if they are not enrolled.

**Requisites:** Restricted to Computer Science (CSCI) PhD. students only.

**CSCI 6114 (3) Computational Complexity Theory**

Covers standard complexity classes including: time-bounded, space-bounded, nondeterministic, randomized, quantum, parallel, counting, and nonuniform classes. Covers standard relationships between these complexity classes, as well as landmark results in complexity theory. Additional topics may be covered depending on time and interest.

**Requisites:** Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

**Recommended:** Corequisite CSCI 5444.

**CSCI 6118 (3) Software Engineering for Scientists**

Learn the core principles of software engineering and design to make scientific software more robust and reproducible. This class targets quantitative scientists with programming skills (in any language) who want to use software in their research. We will cover the version control, testing, benchmarking, data structures, algorithms, and pipelines. This course opens computing to a variety of student disciplines, and is an advanced course in computing geared toward STEM. Instructor approval required for CS majors and CS minors. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4118

**Requisites:** Restricted to graduate students. Restricted to Non-Computer Science students only.

**Recommended:** Prerequisites ASEN 1320 or CSCI 1200 or CSCI 1300 or CSCI 2275 or ECEN 1310 or INFO 1201, knowledge of a programming language, preferably Python, and upper division STEM course recommended.

**CSCI 6200 (1) Computer Science PhD Career Development**

Learn how to make the most of your CS PhD by understanding and preparing for a career as a computer science research in academia, industry, and government. Students need to take this class once they complete Preliminary Exam and before their proposal defense.

**Requisites:** Requires prerequisite course of CSCI 6000 (minimum grade B). Restricted to Computer Science (CSCI) MS and PhD students only.

**CSCI 6214 (3) Randomized Algorithms**

Randomization is a powerful tool to design and analyze algorithms, and one that has played, and continues to play, a key role in the theory of algorithms and complexity. This course will give a technical foundation in common probabilistic tools to design and analyze algorithms, and use this foundation to cover several important randomized algorithms.

**Requisites:** Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

**CSCI 6254 (3) Advanced Data Structures**

Learn about data structures beyond trees, heaps, and hashables that are covered in introductory classes on algorithms and data structures. Key topics will include hashables and their applications, amortized analysis and data structures using amortization, important balanced tree data structures including B-trees, treaps and skip lists, mergeable heaps: binomial and Fibonacci heaps, persistent data structures, tries, suffix tries, suffix automata and spatial data structures.

**Requisites:** Requires prerequisite course of CSCI 5454 (minimum grade B).

**Recommended:** Prerequisite CSCI 5434.

**CSCI 6268 (3) Foundations of Computer and Network Security**

Studies methods to protect information, and the ability to process and move information, from theft, misuse, tampering, destruction and unauthorized access. Introduces foundational topics of computer and network security, including security models, cryptography and authentication protocols.

**Equivalent - Duplicate Degree Credit Not Granted:** TLEN 5550

**Requisites:** Requires prerequisite course of CSCI 5273 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Software Engineering

**CSCI 6302 (3) Speech Recognition and Synthesis**

Introduction to automatic speech recognition and understanding, conversational agents, dialogue systems, and speech synthesis/text-to-speech. Topics include the noisy channel model, Hidden Markov Models, A\* and Viterbi decoding, language modeling (N-grams, entropy), concatenative synthesis, text normalization, dialogue and conversation modeling.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 5832 or LING 5200 or instructor consent required.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 6314 (3) Algorithmic Economics**

This course will survey the frontier of algorithmic economics: the study of incentives and strategic behavior through a computational lens. It will show how microeconomic theory applies to the design of algorithms, and conversely, how algorithmic thinking applies to economics. Other topics may include game theory, mechanism design / auction theory, forecasting mechanisms, and voting / social choice theory.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5454.

**CSCI 6402 (3) Issues and Methods in Cognitive Science**

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200 and SLHS 6402

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 6454 (3) Advanced Algorithms**

Topics include matching and network flows, matroids, computational geometry, parallel computation (PRAM, hypercube, mesh). Also includes Vlsi, database theory, distributed computation, cryptography, robotics, scheduling, probabilistic algorithms, approximation algorithms, average case, and amortized analysis, time permitting.

**Requisites:** Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 6502 (3) Big Data Analytics: Systems, Algorithms, and Applications**

This course studies state-of-the-art practice and research on efficient and effective systems and algorithms design for managing and exploring massive amounts of digital data in various application domains. The course takes an integrated approach that studies all three aspects of big data analytics: systems, algorithms, and applications. Specifically, this course covers big data systems for MapReduce, NoSQL, stream processing, deep learning, mobile/wearable/IoT sensing, as well as practical use of indexing, sketching, recommendation, graph, and deep learning algorithms. Domain-specific data management and analysis, such as those in online social networks, scientific discovery, business intelligence, health informatics, urban computing, are also covered.

**Requisites:** Restricted to graduate students only.

**CSCI 6622 (3) Advanced Machine Learning**

Covers advanced theoretical and practical topics in machine learning and latest developments in the field. Students conduct original research, either applied or theoretical, and present their results.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5622 or instructor consent required.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 6644 (1) Theory of Computing Reading Group**

Exposition of key results in major areas of Theory of Computing presented by graduate students. The topics are selected every semester by voting. Examples of topics from previous semesters include: Hardness of Approximation and PCPs, Unique Games Conjecture, and Optimal Inapproximability Results for Max Cut. Previously offered as a special topics course.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites Graduate-level courses in Algorithms and Complexity Theory.

**CSCI 6686 (3) Numerical Methods for Constrained Optimization**

Covers computational methods for constrained optimization. Topics include basic theory, methods for quadratic programming, active set strategies for linear constraints, and penalty and successive quadratic programming methods for nonlinearly constrained problems.

**Requisites:** Requires prerequisite course of CSCI 5606 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 6810 (1) Seminar in Computational Biology**

Provides an overview of current research topics in computational biology and health informatics, with a focus on research conducted on campus. Each week students will attend an on-campus seminar or a presentation by an on-campus research group. Prepares students to participate in a research project.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4810

**Additional Information:** Departmental Category: General Computer Science

**CSCI 6930 (1-3) Professional Internship**

This class provides a structure for CS graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in CS graduate programs.

**Requisites:** Restricted to graduate students only.

**CSCI 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 6950 (1-6) Master's Thesis**

**Requisites:** Restricted to Computer Science (CSEN) graduate students or Computer Science Concurrent Degree majors only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 7000 (1-4) Current Topics in Computer Science**

Covers research topics of current interest in computer science that do not fall into a standard subarea.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 7123 (3) Topics in Operating Systems**

Topics selected by instructor. Possible topics are system design, measurement and evaluation, simulation, mathematical modeling, and parallelism.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of CSCI 5573 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 7135 (1-3) Topics in Programming Languages**

Topics selected by instructor. Possible topics are syntax, semantics, metacompilers, compiler design, and translator writing systems. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Programming Languages

**CSCI 7143 (3) Topics in Computer Systems**

Topics selected by instructor. Possible topics are online systems, multiprocessing, microprogramming, architecture, data communications, and computing networks. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Operating Systems and Hardware

**CSCI 7154 (3) Topics in Theory of Computation**

Selected topics of current interest in theory of computation.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of CSCI 5454 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Theory of Computation

**CSCI 7176 (3) Topics in Numerical Computation**

Topics selected by instructor. Possible topics are numerical linear algebra, solution of differential equations, nonlinear algebra and optimization, data fitting, linear and nonlinear programming, and solution of large problems. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Numerical Computation

**CSCI 7222 (3) Topics in Nonsymbolic Artificial Intelligence**

Topics vary from year to year. Possible topics include human and machine vision, signal and speech processing, artificial life, mathematical foundations of connectionism, and computational learning theory.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5622 or instructor consent required.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 7412 (2) Cognitive Science Research Practicum**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

**Requisites:** Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.

**Recommended:** Prerequisite EDUC 6505.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 7422 (2) Cognitive Science Research Practicum 2**

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

**Requisites:** Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 7565 (3) Computational Phonology and Morphology**

Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.

**Equivalent - Duplicate Degree Credit Not Granted:** LING 7565

**CSCI 7717 (3) Topics in Database Systems**

Studies topics such as distributed databases, database interfaces, data models, database theory, and performance measurement in depth.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of CSCI 5817 (minimum grade B). Restricted to graduate students only.

**Additional Information:** Departmental Category: Database Systems

**CSCI 7772 (1) Topics in Cognitive Science**

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

**Equivalent - Duplicate Degree Credit Not Granted:** EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Artificial Intelligence

**CSCI 7818 (3) Topics in Software Engineering**

Studies selected topics of current interest in software engineering. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Software Engineering

**CSCI 7900 (1-6) Doctoral Level Independent Study**

For doctoral students.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Computer Science

**CSCI 8990 (1-10) Doctoral Dissertation**

Investigates some specialized field of computer science. Approved and supervised by faculty members.

**Repeatable:** Repeatable for up to 30.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: General Computer Science

**CYBR 5000 (3) Seminar in Technology, Cybersecurity and Policy**

Introduces students to major topics and research at the interface of technology, cybersecurity, and policy by providing a weekly series of guest lectures with questions and discussion. These lectures will be followed by related readings, class discussions, and group work, which show the relationship of cybersecurity and new technology to policy.

**CYBR 5010 (3) Fundamentals of Data Communication**

Combining conceptual knowledge about data communications and core Internet technologies with hands-on labs that reinforce the conceptual knowledge, this course provides students with the ability to create innovative technology solutions in their discipline. Learning how the Internet works and being able to evaluate and operate an Internet network is a valuable skill; students in this course will have a competitive advantage in this foundational field.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5010

**Requisites:** Restricted to Technology, Cybersecurity and Policy MS Majors and Business Analytics MS Majors.

**CYBR 5020 (3) Fundamentals of Network Programming**

This course provides an immersion into the foundation theories of network programming and software development for emerging technologies. Students will gain direct experience with real-world programming lab experiments and demonstrations that will relate to the prolific increase of cross-discipline programming.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5020

**Requisites:** Restricted to Technology, Cybersecurity and Policy MS Majors.

**CYBR 5030 (3) Fundamentals of System Administration and Virtualization**

Introduces the basic use and administration of Unix and Linux systems. Topics include booting and system management, scripting, storage and logical volume management, filesystem configuration, account management and password security, process control, software installation, event logging and system auditing. Students will also develop familiarity with virtualization platforms such as VirtualBox and VMware to implement and test their system configurations.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5030

**Requisites:** Restricted to Technology, Cybersecurity and Policy MS Majors.

**CYBR 5113 (3) Linux System Administration**

Introduces Linux system administration and related topics. Includes hardware and software installation, storage management, configuration of user accounts and system services, development of automation and monitoring tools, and the provisioning of common network services. This laboratory focused course will provide significant exposure to the network security concerns of Internet connected hosts. Students will build a network of Linux servers from the ground up, using provided computing resources, and must maintain and secure these servers themselves. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5113 and CSCI 4113

**Requisites:** Restricted to Technology, Cybersecurity and Policy (CYBR) graduate students only.

**Recommended:** Prerequisite CSCI 3753 (minimum grade B).

**CYBR 5200 (3) Introduction to Wireless Systems**

Overviews the distinctive characteristics of the wireless communications medium. Topics covered include: Analog signals, Antennas and Propagation, Digital Signals, Sampling, Quadrature Signals, Digital Modulation, SNR and SINR Concepts, Channel Models, Channel Statistics, and Link Budgets. The course includes an introduction to MIMO and beam-forming as implemented in modern communication systems. Software Defined Radio (SDR) is introduced to facilitate student hands-on learning of radio operation. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5200 and CSCI 4200

**Recommended:** Prerequisites CYBR 5010 and CYBR 5012.

**CYBR 5220 (3) Wireless Local Area Networks**

Emphasis on the IEEE P802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified<sup>®</sup> programs, and will learn how to model and analyze WLAN traffic using industry standard tools.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5220 and ECEN 5122

**Requisites:** Requires prerequisite course of CYBR 5010 or CSCI 5010 or CSCI 5273 (minimum grade B).

**Recommended:** Prerequisite CYBR 5200 or CSCI 5220.

**CYBR 5230 (3) Wireless Systems Lab**

This Wireless Solutions Architecture course is designed to examine the core concepts of wireless architecture, design and implementation. The course will focus on architecting solutions unlicensed technology, specifically enterprise Wi-Fi networks. Students will learn how to design, implement, troubleshoot and operate enterprise wireless networks.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5230

**Requisites:** Requires prerequisite course of CYBR 5200 (minimum grade B).

**Recommended:** Prerequisite CYBR 5010.

**CYBR 5240 (3) Introduction to Blockchain**

Examines an emerging technology known as blockchain. Blockchain refers to the distributed and decentralized database technology behind popular cryptocurrencies such as Bitcoin and Ethereum. However, it can be used to record and transfer any digital asset, not just currency. This course explores the fundamentals of blockchain technology and its application from three key perspectives: policy and governance, technology, and application. Students gain an understanding of key concepts and how to apply them in the industry. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5240 and CSCI 4240

**Requisites:** Restricted to graduate students only.

**CYBR 5250 (2-4) Technology Law and Policy Clinic**

Features technology law advocacy before administrative, legislative and judicial bodies in the public interest. Formerly TLEN 5250. Instructor consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7809

**Requisites:** Restricted to CYBR/TLEN graduate students.

**Grading Basis:** Letter Grade

**CYBR 5260 (3) Seminar: Law and Economics of the Information Age**

Examines basic regulatory and legal challenges of our information economy and digital age. Emphasizes the "networked" information industries, the proper role of "unbundling" policies to advance competition and how intellectual property and antitrust rules should be developed. Formerly TLEN 5260.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 8341

**Requisites:** Restricted to CYBR/TLEN graduate students.

**CYBR 5300 (3) Cybersecurity**

Introduces core concepts in cybersecurity including confidentiality, integrity, authentication, risk management, and adversarial thinking. The concepts will be applied to both traditional information technology (IT) systems and cyber physical systems (CPS). The course provides a cyber security foundation that will allow practitioners in other fields apply to understand cyber security trade-offs and will also provide interested students with a basis further study in cyber security. At the conclusion of the course, students should have a solid foundation in cybersecurity and hands-on experience.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5403

**Requisites:** Restricted to graduate students only.

**Recommended:** for graduate students only.

**CYBR 5303 (1) Cybersecurity Club Companion Course**

Gives students hands-on experience applying practical security skills and adversarial thinking to real-world problems. Students will work in small teams on internal challenges, lab development, open source contributions, and will represent the university in larger teams for external challenges at the national and global level, such as those hosted by Collegiate Cyber Defense Competition (CCDC), Wicked6, DOE CyberForce, etc. Students will be expected to participate in both internal and external challenges, attend meetings, and present short presentations to the group when appropriate. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5303 and CSCI 4303

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Recommended:** Prerequisites CYBR 5300 or CSCI 5403 or CSCI 3403.

**CYBR 5320 (3) Cybersecurity Network Analytics**

This Cybersecurity Network Analytics course takes a hands-on approach to detecting malicious activity within network traffic. The course will first introduce methodologies for analyzing cyber data. This knowledge will then be used practically, as the students will be given the chance to test out approaches on real traffic. At the conclusion, students will have both a theoretical understanding of cyber algorithms and their use in a real-world setting.

**Equivalent - Duplicate Degree Credit Not Granted:** CYBR 4320

**Requisites:** Requires prerequisite courses CYBR 5300 or CSCI 3403 or CSCI 5403 or MSBX 5480 (minimum grade B).

**Recommended:** Requisite C++ and Linux/Unix experience and knowledge of computer networking.

**CYBR 5330 (3) Digital Forensics**

Learn how to identify, collect, examine, analyze, and present digital evidence and the legal challenges associated with conducting digital forensics investigations. Explore various file system types and structures. Learn how to recovery and extract potential evidence from deleted files and directories. Learn how to capture and profile data residing in live memory. Analyze running processes and recover memory artifacts. Learn about various methods data can be hidden on a computing devices, storage media, and within covert communications channels.

**Recommended:** Prerequisites CYBR 5300 or CSCI 3403 or CSCI 5403.

**CYBR 5340 (3) VOIP Network Design**

Focuses on VoIP network design and optimization. The emphasis is on the convergence of VoIP, PSTN and cell phone networks and signaling. Topics include voice processing as well as IP and SS7 signaling. In addition there will be a review of ISDN, DSL, Sonet, ATM, SIP and MPLS. There will be a case problem for sizing a VoIP network using silence suppression. Formerly TLEN 5340.

**Requisites:** Requires corequisite of CYBR 5001. Restricted to CYBR or BUSN graduate students.

**CYBR 5350 (3) Security Auditing and Penetration Testing**

This course is an introduction to the principles and techniques associated with security auditing and penetration testing. Topics covered include; planning, reconnaissance, scanning, enumeration, exploitation, post-exploitation, and reporting. Students discover how system vulnerabilities can be exploited. Students will develop an understanding of current cybersecurity issues and how user, administrator, and programmer errors can result in security breaches.

**Recommended:** Prerequisites CYBR 5300 or CSCI 3403 or CSCI 5403.

**CYBR 5400 (3) Principles of Internet Policy**

Engages in the critical strategic analysis and debate of controversial public policy issues raised by the Internet. Learn how to develop well-reasoned positions on the regulations applied to new Internet-based technologies and business models based on interdisciplinary frameworks that characterize the significant intersection of technology, economics, business, and public policy. Policy topics covered include Broadband as a Universal Service, Net Neutrality, Spectrum Management, Online Privacy, and Cybersecurity.

**CYBR 5410 (3) Telecommunications Law and Policy**

Examines laws governing telecommunications industries, including federal and state regulation and international aspects. Includes telephone, cable, satellite, cellular and other wireless systems and the Internet. Formerly TLEN 5240.

**Equivalent - Duplicate Degree Credit Not Granted:** LAWS 7241

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to CYBR or BUSN graduate Students

**CYBR 5420 (3) Spectrum Management and Policy**

Studies how spectrum policy is developed and implemented. A general framework is developed for understanding telecommunications law and regulatory objectives. Specifically analyzes international and domestic dimensions of spectrum policy. Considers how economics, administrative processes and innovative technologies affects management of the spectrum. Formerly TLEN 5230.

**Requisites:** Restricted to graduate students only.

**CYBR 5505 (3) Leading Oneself**

Provides working engineers a background in leadership concepts and methods and enables students to develop practical leadership skills through numerous in-class exercises and experimentation based assignments. Topics include authentic leadership, motivating self and others, cultivating emotional intelligence, personal mastery, creating accountability, conflict resolution, leading change and organizational culture. Required for all Engineering Management degree students.

**Requisites:** Restricted to Leeds School of Business or College of Engineering graduate students only.

**CYBR 5510 (3) Technology: Commercial Strategy and Operations**

Working in groups of 2 to 4, students will leverage their technical skills to learn and apply commercial/business skills via the consideration of a hypothetical competitive technically-oriented business, including its strategy, long-term financial outlook, and operating platform. Upon successful course completion, students should expect to feel confident when speaking with (and ultimately moving into roles of) management and leadership, regarding all critical aspects of business, especially the creation of equity value through scale at pace, aligning interests of all key stakeholders. Open to undergraduates with instructor consent.

**Requisites:** Restricted to graduate students only.

**CYBR 5550 (3) Designing for Defense 1**

Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams chosen by competitive selection work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real-world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment. The first semester of a two-course sequence. Students take this course, ASEN/CSCI/CYBR 5550, and ASEN/CSCI/CYBR 5580 contiguously as the sequence spans the academic year.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5550 and CSCI 5550

**Grading Basis:** Letter Grade

**CYBR 5580 (3) Designing for Defense 2**

This course allows teams to continue their D4D journey from semester 1 guiding

**Requisites:** Requires prerequisite course of ASEN 5550 or CSCI 5550 or CYBR 5550 (minimum grade B). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CYBR 5620 (3) Advanced Wireless Lab**

Provides a comprehensive, hands-on set of laboratory exercises for the teaching and demonstration of key technical skills required to understand, build, test, and analyze both analog and digital wireless communications concepts. In conjunction with lecture-based content to provide a solid foundation in digital communication theory, SDR-based laboratory exercises enable the synthesis of several fundamental concepts utilizing the latest, modern communications systems technologies.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5620

**Requisites:** Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

**Recommended:** Prerequisites CYBR 5630 or CSCI 5630 and CYBR 5220 or CSCI 5220.

**CYBR 5630 (3) Wireless and Cellular Systems**

Studies technologies and architectures employed in modern cellular wireless systems. Major topics include radio propagation, multiple access techniques, analog and digital cellular telephony, and personal communications systems. Presents the necessary tools to understand the wireless industry, its technical details, and its business drivers. Topics include modeling, spectrum, weather, multipath, Doppler effect, and shadowing and covers important aspects of multiple access technologies such as CDMA and OFDMA. introduces modern radio standards including LTE.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5630

**Requisites:** Requires prerequisite course of CSCI 5200 or CYBR 5200 (minimum grade B).

**CYBR 5830 (1-6) Special Topics**

Current topics in technology, cybersecurity and policy.

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**CYBR 5910 (1-6) Independent Study**

Special projects agreed upon by student and instructor. Department consent required. Formerly TLEN 5920.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to CYBR/TLEN graduate students.

**CYBR 6940 (1) Master's Candidate for Degree**

This course is for TCP Master's students who are approved candidates to receive their degree.

**Requisites:** Restricted to CYBR/TLEN graduate students.

**CYBR 6950 (1-6) Master's Thesis**

Original and independent research conducted by a graduate student under the supervision of a faculty advisor. Formerly TLEN 6950.

**Requisites:** Restricted to CYBR/TLEN graduate students.

**CYBR 8990 (1-10) Doctoral Dissertation**

Investigates specialized topic or field in the area of telecommunications. Approved and supervised by faculty members. Formerly TLEN 8990.

**Requisites:** Restricted to CYBR/TLEN PhD students.

## Computer Science - Master of Science (MS)

The Master of Science degree in computer science is a research-based option which permits graduate students the flexibility in defining specialized interdisciplinary fields that meet their professional needs. The

research-based MS degree option is well-suited to students pursuing a career in academia or industry with a research component.

Students have two options under this degree:

- The thesis option, wherein students will have to complete *six* credits of MS thesis hours while working on a research problem and completing their thesis work. They work with a committee of *three* and have to defend their thesis.
- The non-thesis option, wherein students will have to complete *six* credits of MS independent study research hours, while working on research projects with individual faculty. These *six* hours may or may not be with the same faculty.

With support from the research advisor, students in this program have the option of smoothly transitioning in the PhD program. If students receive support from a research advisor, they do not have to apply to the PhD program; the department processes the degree advancement based on the support.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 830)
- Computer Science - Bachelor of Arts (BA) (p. 822)
- Computer Science - Bachelor of Science (BSCS) (p. 825)

## Requirements

### Admission Requirements

Applicants for graduate study in computer science must hold at least a bachelor's degree or its equivalent from an accredited institution. They should have programming experience, a number of computer science courses and sufficient mathematical maturity to understand pure mathematics courses at the upper division (junior/senior) level.

A minimum undergraduate GPA of 3.00 is required for admission to the master's program.

### Mathematics Courses

A student's academic background should include at least three semesters of mathematics at the level of sophistication of calculus or above. Examples of such courses include calculus, differential equations, linear algebra, probability, statistics and abstract algebra. The courses should indicate that the student has achieved the mathematical maturity expected of an upper-level science, engineering or mathematics undergraduate.

### Computer Science Courses

At least three one-semester courses in computer science that are beyond the introductory level are required for admissions. These are intended to demonstrate breadth of basic computer science knowledge in the areas of computer hardware, software and theory. The courses should include the equivalent of the following CU Boulder offerings:

- Hardware requirement: CSCI 2400 Computer Systems (Computer Systems)
- Software requirement: Either CSCI 3155 Principles of Programming Languages or CSCI 3753 Design and Analysis of Operating Systems
- Theory requirement: CSCI 2270 Computer Science 2: Data Structures and either CSCI 3104 Algorithms or CSCI 3434 Theory of Computation

More advanced versions of all courses are acceptable. The above courses are prerequisites to many of the graduate-level offerings, so it's important to complete these to be considered for graduate admissions. Admission without these prerequisites or their equivalents may be considered under extraordinary circumstances only.

## Program Requirements

### Degree Plans

While pursuing the traditional MS degree in CS, students have to complete a total of 30 credits of graduate level coursework and may select between two options.

#### Plan I: Thesis Option

The MS thesis option curriculum is designed to provide a balance between modern technological focus and disciplinary depth. Students must secure a thesis advisor for research and course guidance.

Under this option, students complete 24 credits of coursework and 6 thesis credits at the 5000-level or above. At least 24 credits (eight courses) must be completed in computer science, including three required breadth courses. Up to 6 credits (two courses) may be taken outside of the department with the approval of the Graduate Committee.

In addition to this, students must fulfill any other MS degree requirements as stated by the department. For more information, visit the Traditional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/>) webpage.

#### Plan II: Non-Thesis Option

Under this option, students complete 24 credits of coursework at the 5000-level or above. At least 24 credits (eight courses) must be completed in computer science, including three required breadth courses. Up to 6 credits must be independent study research hours. Up to 6 credits (two courses) may be taken outside of the department with the approval of the Graduate Committee.

In addition to this, students must fulfill any other MS degree requirements as stated by the department. For more information, visit the Traditional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/>) webpage.

### Course Requirements

The following course requirements are subject to change; for the most current information, visit the department's Traditional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/traditional-ms-degree-requirements/>) webpage.

Code	Title	Credit Hours
<b>Professional Development Series</b>		
Complete three one-credit Professional Development courses. <sup>1</sup>		3

CSCI 5000	Introduction to the Computer Science Research-Based MS Program	
CSCI 5100	Computer Science Colloquium	
CSCI 5802	Data Science Team Companion Course	
<b>Breadth Courses <sup>2</sup></b>		
Students must complete one breadth course from each of the three bins listed below.		
<i>Bin One</i>		
Choose one:		3
CSCI 5229	Computer Graphics	
CSCI 5254	Convex Optimization and Its Applications	
CSCI 5434	Probability for Computer Science	
CSCI 5444	Introduction to Theory of Computation	
CSCI 5446	Chaotic Dynamics	
CSCI 5454	Design and Analysis of Algorithms	
CSCI 5576	High-Performance Scientific Computing	
CSCI 5606	Principles of Numerical Computation	
CSCI 5636	Numerical Solution of Partial Differential Equations	
CSCI 5646	Numerical Linear Algebra	
CSCI 5654	Linear Programming	
CSCI 5676	Numerical Optimization	
<i>Bin Two</i>		
Choose one:		3
CSCI 5302	Advanced Robotics	
CSCI 5322	Algorithmic Human-Robot Interaction	
CSCI 5352	Network Analysis and Modeling	
CSCI 5402	Research Methods in Human-Robot Interaction	
CSCI 5502	Data Mining	
CSCI 5616	Introduction to Virtual Reality	
CSCI 5622	Machine Learning	
CSCI 5722	Computer Vision	
CSCI 5822	Probabilistic and Causal Modeling in Computer Science	
CSCI 5832	Natural Language Processing	
CSCI 5839	User-Centered Design and Development 1	
CSCI 5849	Input, Interaction, and Accessibility	
<i>Bin Three:</i>		
Choose one:		3
CSCI 5135	Computer-Aided Verification	
CSCI 5253	Datacenter Scale Computing - Methods, Systems and Techniques	
CSCI 5273	Network Systems	
CSCI 5403	Cybersecurity	
CSCI 5413	Computer Security and Ethical Hacking	
CSCI 5448	Object-Oriented Analysis and Design	
CSCI 5525	Compiler Construction	
CSCI 5535	Fundamental Concepts of Programming Languages	
CSCI 5573	Advanced Operating Systems	
CSCI 5673	Distributed Systems	

CSCI 5753	Computer Performance Modeling
CSCI 5854	Theoretical Foundations of Autonomous Systems

### Electives

An additional 18 credits of approved graduate-level coursework are required to complete the degree, with restrictions.<sup>3</sup> 18

**Total Credit Hours** 30

- <sup>1</sup> The third one-credit course may be a repeat of CSCI 5100 or CSCI 5802, or any other one-credit approved graduate level coursework that is *not* an independent study research hour.
- <sup>2</sup> For a list of breadth courses by category, visit the department's MS/ME Breadth Requirement (<http://www.colorado.edu/cs/current-students/graduate-students/msme-breadth-requirement/>) webpage.
- <sup>3</sup> Out of these credits, only 6 credits may be non-CS graduate courses.

### Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students typically complete the degree requirements in two years.

## Computer Science - Master of Science (MS) Online

The Master of Science in Computer Science (MS-CS) program hosted online through the Coursera platform offers stackable graduate-level courses, a graduate certificate, and a fully accredited master's degree in computer science. MS-CS on Coursera students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts or diplomas.

The Department of Computer Science has embraced this degree as an ideal opportunity to expand access to the excellent graduate-level courses offered by the department's highly reputed faculty beyond CU Boulder's physical campus. The goal of the MS-CS on Coursera program is to produce creative, workforce-ready graduates equipped with versatile specialized skills and technical leadership.

Students pursuing this degree will also have access to a wide range of courses taught as part of other CU Boulder degrees offered on the Coursera platform, including topics such as data science, engineering management, and electrical engineering

## Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1833) section of the catalog for more information.

## Requirements

### Admission

The MS-CS on Coursera uses *performance-based admissions*, which means students earn program admission simply by performing well in a three-course pathway. Students enroll in and complete their preferred three-course pathway with a grade of B or better in each of the three courses to be admitted to the program. Pathway courses are a required part of the curriculum, which means students make direct progress toward the degree while they work toward program admission.

There is no traditional application for admission to the degree. The University of Colorado Boulder never asks for transcripts, previous

test scores (like GRE or TOEFL), application essays, letters of recommendation, or application fees. A prior degree is not required for admission. Because this program is fully online, students do not need to complete a background check to enroll.

A student must complete four required protocols to earn admission to the MS-CS on Coursera:

- Earn at least a grade of B in each for-credit course within one of the following pathway specializations:
  - Foundations of Data Structures and Algorithms* (3 credits) – CSCA 5414 Dynamic Programming, Greedy Algorithms  
CSCA 5424 Approximation Algorithms and Linear Programming  
CSCA 5454 Advanced Data Structures, RSA and Quantum Algorithms
  - Software Architecture for Big Data* (3 credits) – CSCA 5008 Fundamentals of Software Architecture for Big Data  
CSCA 5018 Software Architecture Patterns for Big Data  
CSCA 5028 Applications of Software Architecture for Big Data
- Achieve a computed pathway specialization grade-point average (GPA) of at least 3.00.
- Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.
- Declare intent to seek the degree via the enrollment form. This can be done before, during or after completing any work in a pathway specialization.

Upon completion of these four steps, the student is admitted to the MS-CS on Coursera. Students may successfully complete a designated pathway specialization and declare intent at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree.

Non-degree-seeking students may also enroll in for-credit courses. All courses attempted and/or completed for credit will appear on official CU Boulder transcripts (unless dropped by the drop deadline) and will count toward the cumulative GPA.

### Prerequisite Knowledge

There are no course prerequisites or corequisites for MS-CS courses on Coursera. Nevertheless, it is important that students are prepared for individual courses. Course descriptions will advise students of assumed incoming knowledge, and students are strongly encouraged to take course sequences in the order they are presented on the Coursera platform.

*Students are also encouraged to take a non-credit version in some form before moving to the for-credit version to test whether they can succeed, especially if they are unsure whether they have the background knowledge required for a course*

### Program Requirements

The MS-CS on Coursera is a non-thesis degree program that requires 30 credit hours of graduate-level coursework. This includes 15 credits of breadth coursework and a choice of 15 credits hours of elective coursework from the options listed below. Students must complete 5 elective specializations or a combination of 4 complete elective specializations and three 1-credit elective courses totaling 15 credits.

Up to 6 graduate-level credit hours of courses offered by other CU degrees on Coursera may be applied as elective credits toward the MS-

CS on Coursera degree. All courses must be graduate level, offered through Coursera, and meet all applicable academic standards. This includes all courses offered by the ME-EM (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-management/engineering-management-master-engineering-me-online/>), MS-DS (<https://catalog.colorado.edu/graduate/colleges-schools/interdisciplinary-programs/data-science-master-science-ms-online/>), and MS-EE (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/electrical-engineering/electrical-engineering-master-science-online-msee/>) programs on Coursera that do not start with a "CSCA" prefix, with the exception of the following courses. Credit from these courses cannot be applied toward MS-CS on Coursera requirements:

- DTSA 5302 Cybersecurity for Data Science
- DTSA 5303 Ethical Issues in Data Science
- DTSA 5501 Algorithms for Searching, Sorting, and Indexing
- DTSA 5502 Trees and Graphs: Basics

Courses may not be double-counted toward two credentials of the same level. This means students can apply credit from a particular course toward one graduate certificate and one graduate degree, but they cannot apply credit from a particular course toward two graduate certificates or two graduate degrees. CU certificates on Coursera are automatically conferred once all requirements are met.

The MS-CS on Coursera requires a minimum cumulative GPA of 3.00 and a grade of B or better in each breadth class (including the two required pathway specializations and the three additional required breadth specializations). Courses in which grades below C (2.0) are received may not be applied toward degree requirements.

Code	Title	Credit Hours
<b>Breadth Courses</b>		
Foundations of Data Structures and Algorithms (Pathway Specialization)		3
CSCA 5414	Dynamic Programming, Greedy Algorithms	
CSCA 5424	Approximation Algorithms and Linear Programming	
CSCA 5454	Advanced Data Structures, RSA and Quantum Algorithms	
Software Architecture for Big Data (Pathway Specialization)		3
CSCA 5008	Fundamentals of Software Architecture for Big Data	
CSCA 5018	Software Architecture Patterns for Big Data	
CSCA 5028	Applications of Software Architecture for Big Data	
Machine Learning		3
CSCA 5622	Introduction to Machine Learning - Supervised Learning	
CSCA 5632	Unsupervised Algorithms in Machine Learning	
CSCA 5642	Introduction to Deep Learning	
Computing, Ethics, and Society		3
CSCA 5214	Computing, Ethics, and Society Foundations	

CSCA 5224	Ethical Issues in AI and Professional Ethics	
CSCA 5234	Ethical Issues in Computing Applications	
Network Systems		3
CSCA 5063	Network Systems Foundation	
CSCA 5073	Network Principles in Practice: Linux Networking	
CSCA 5083	Network Principles in Practice: Cloud Networking	
<b>Elective Courses</b>		
Take five specializations or combination of four complete specializations and three 1-credit courses totaling 15 credits		15
Data Mining Foundations and Practice		
CSCA 5502	Data Mining Pipeline	
CSCA 5512	Data Mining Methods	
CSCA 5522	Data Mining Project	
Natural Language Processing: Deep Learning Meets Linguistics		
CSCA 5832	Fundamentals of Natural Language Processing	
CSCA 5842	Deep Learning for Natural Language Processing	
CSCA 5852	Model and Error Analysis for Natural Language Processing	
Human-Computer Interaction		
CSCA 5859	Ideating and Prototyping Interfaces	
CSCA 5869	User Interface Testing and Usability	
CSCA 5879	Emerging Topics in HCI: Designing for VR, AR, AI	
Foundations of Autonomous Systems		
CSCA 5834	Modeling of Autonomous Systems	
CSCA 5844	Requirement Specifications for Autonomous Systems	
CSCA 5854	Verification and Synthesis of Autonomous Systems	
Generative AI		
CSCA 5112	Introduction to Generative AI	
CSCA 5122	Modern Applications of Generative AI	
CSCA 5132	Advances in Generative AI	
Data Visualization (1 credit)		
CSCA 5702	Fundamentals of Data Visualization	
Deep Learning for Computer Vision (1 credit)		
CSCA 5812	Deep Learning Applications for Computer Vision	
Special Topics		
CSCA 7000	Special Topics	
<b>Total Credit Hours</b>		<b>30</b>

The Department of Computer Science will continue to roll out additional program curriculum. Currently, the department is developing courses covering topics such as data center scale computing, high-performance and parallel computing, theory of computation, robotics, object-oriented analysis and design, network systems, and big data challenges and NoSQL solutions.

Faculty members who develop courses and/or serve as instructor of record for graduate level courses will have approved Graduate Faculty Appointments.

### Time Limit

Courses used toward the MS-CS on Coursera degree must have been completed within eight years of the degree conferral date. Courses taken more than eight years prior to graduation will appear on the transcript and be calculated in the cumulative GPA but may not be used toward the degree. Students may continue to pursue the degree even after eight years, but they must accrue 30 credits within an eight-year window in order to earn the degree.

The eight-year restriction is applied to courses on a rolling basis and is determined by the date that credit was awarded in the course.

### Learning Outcomes

Upon graduation, students are expected to perform the following outcomes at an advanced level of sophistication:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
- Apply computer science theory and software development fundamentals to produce computing-based solutions.

## Computer Science - Professional Master of Science (MSCPS)

The Professional Master of Science (MSCPS) is a degree program that offers possibilities for a wide range of students. Whether the student is a working engineer or an undergraduate considering a career in industry, there are program options to meet their needs.

The department offers seven degree tracks, each of which result in a Professional Master of Science in Computer Science:

1. General
2. Algorithms, network and optimization
3. Data science and engineering
4. Human-centered computing
5. Artificial intelligence
6. Numerical computation
7. Robotics
8. Software systems and cloud computing

The Department of Computer Science has embraced this degree as an ideal opportunity to expand the high quality courses in the fields above into a wide array of courses leading to a full master's degree. The goal of the MSCPS program is to produce creative, workforce-ready graduates equipped with versatile specialized skills and technical leadership.

Adding several new subplan courses to the program now enables greater options for earning professional MS degree with a these subplans, while also offering plenty of courses to complete a full master's degree, principally with a subplan focus. Students pursuing this degree will also have access to many excellent graduate-level courses offered by the department's highly reputed faculty.

### Subplans

#### General Track

Students opting for this track have the option to select classes from an approved list for the degree. The jobs these students get are also similar to other subplans. However, specializing in a subplan is more beneficial.

#### Algorithms, Network and Optimization

The subplan enables students to employ powerful mathematical tools and techniques from algorithms, graph theory, computational complexity theory and mathematical optimization to solve problems that may arise in research and development of cutting edge computing systems. Skills include: design and analysis of algorithms, understanding inherent problem complexity and deploying optimization-based tools and techniques. We expect graduates to fill software development roles with an emphasis on algorithms design, data analysis and solution design.

Potential job titles include: graph theorist, optimization analyst, software developer on algorithms design and data analysts on algorithms design. Potential employers include Twitter, Google, Facebook, Amazon, Oracle, Uber, Microsoft and Apple.

#### Data Science and Engineering

This subplan provides the skills to develop computer solutions that require expertise in data science and engineering. Students who complete the program receive both a master's degree in computer science and a specialization within data science and engineering. This combination is very attractive as technology companies are looking for developers that have experience in data science. Students complete both a set of core courses for the degree in addition to a set of data science courses.

Potential job titles include: Hadoop developer, BI developer, quantitative data engineer, search engineer, technical architect, big data analyst, solutions architect, data warehouse engineer, data science software engineer and ETL developer. Potential employers include Twitter, Google, Facebook, Amazon, Oracle, Uber, Microsoft and Apple.

#### Human-Centered Computing

In this track, students learn how to design, implement and evaluate user interfaces for a range of computing technology, and gain skills related to designing technologies to support the needs of real people. Topics covered include user-centered design, information visualization, universally accessible design and computer-supported cooperative work. Students will gain experience with the entire user-centered design process, from requirements gathering, prototyping, and qualitative and quantitative user evaluation. Many courses in this concentration are project-based and will involve user-centered research in the lab and in the field.

Potential job titles for graduates of this program include user experience researcher, user interface engineer, data scientist, interaction designer, front-end developer, accessibility specialist, mobile application developer. Potential employers include Facebook, Google, Microsoft, Twitter, Adobe, Autodesk, Sphero, Snap and Oculus.

## Artificial Intelligence and Robotics

The subplans in artificial intelligence and robotics build expertise in algorithms and methods for developing autonomous systems, including robotics and cyber-physical systems. As part of this program, students will design and analyze systems which leverage computation to interact with the world around them through sensors and actuators. Machine learning, signal processing and control theory are all components to this program, where students become experts in creating the software for devices ranging from climate control systems to automobiles.

Potential job titles for graduates of this program focusing on artificial intelligence include: software engineer, perception engineer, data scientist and research engineer. Potential employers include Lockheed-Martin, Amazon, Microsoft, Google and Facebook.

Potential job titles for graduates of this program focusing on robotics include: robotics engineer, perception engineer, control engineer and robotics scientist. Potential employers include: Amazon Robotics, Uber, Google, iRobot and DJI.

## Numerical Computation

Ongoing improvements in computational capability and memory performance have increased the importance of high-fidelity simulations, optimization and data-driven science and engineering applications. Students in this subplan develop the skills to design robust and high-performance numerical methods for addressing real-world problems and develop production-grade implementations using state of the art software tools to target modern architectures and large-scale parallel computers.

Potential job titles: Computational scientist/engineer, numerical/data analyst, research scientist, software engineer, HPC developer and quantitative software engineer. Potential employers include national labs, universities, engineering ISVs (ANSYS, MSC, CD-adapco), aerospace (NASA, Boeing, ULA, SpaceX, Lockheed), exploration (Shell, Schlumberger, CMG), manufacturing (P&G, GE), technology (Amazon, Google, IBM, Motorola) and finance (HFT, mutual funds, credit card).

## Software Systems and Cloud Computing

In this subplan, students learn about software systems and how they are applied to real world problems. They'll also discover how emerging cloud computing technologies can be used to implement some of the world's most popular services and applications.

For more information, visit the department's Professional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/>) webpage.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 830)

- Computer Science - Bachelor of Arts (BA) (p. 822)
- Computer Science - Bachelor of Science (BCS) (p. 825)

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admission Requirements

Applicants for graduate study in computer science must hold at least a bachelor's degree or its equivalent from an accredited institution. They should have programming experience, a number of computer science courses and sufficient mathematical maturity to understand pure mathematics courses at the upper division (junior/senior) level. A minimum undergraduate GPA of 3.0 (on a scale of 4.0) is required for admission to the master's program.

Applicants are *not* required to submit GRE scores.

### Mathematics Courses

A student's academic background should include at least three semesters of mathematics at the level of sophistication of calculus or above. Examples of such courses include calculus, differential equations, linear algebra, probability, statistics and abstract algebra. The courses should indicate that the student has achieved the mathematical maturity expected of an upper-level science, engineering or mathematics undergraduate.

### Computer Science Courses

At least three one-semester courses in computer science that are beyond the introductory level are required for admissions. These are intended to demonstrate breadth of basic computer science knowledge in the areas of computer hardware, software and theory. The courses should include the equivalent of the following CU Boulder offerings:

- Hardware requirement: CSCI 2400 Computer Systems (Computer Systems)
- Software requirement: Either CSCI 3155 Principles of Programming Languages or CSCI 3753 Design and Analysis of Operating Systems
- Theory requirement: CSCI 2270 Computer Science 2: Data Structures and either CSCI 3104 Algorithms or CSCI 3434 Theory of Computation

## Required Courses and Credits

The following requirements are subject to change; for the most current information, visit the department's Professional MS Degree Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/ms-degree/professional-ms-degree-requirements/>) webpage.

### Degree Requirements

Students must complete a total of 30 credit hours of approved graduate level course work with a grade of C or better and a cumulative GPA of at least 3.00. Students are allowed to take two non-CS courses and the rest must be CSCI courses. Students under this option are *not* allowed to take research hours or thesis option.

Code	Title	Credit Hours
------	-------	--------------

**Breadth Courses**

Students must complete one breadth course from each of the three bins listed below, for a total of 9 credits of breadth courses. Students must earn a grade of B or better in each of the three breadth courses.

*Bin One*

Choose one:		3
-------------	--	---

CSCI 5229	Computer Graphics	
CSCI 5254	Convex Optimization and Its Applications	
CSCI 5434	Probability for Computer Science

## Requirements

### Admission Requirements

Applicants for graduate study in network engineering must hold at least a bachelor's degree or its equivalent from an accredited institution. We recommend that candidates have at least some experience in network engineering, system administration, or network programming.

A minimum undergraduate GPA of 3.0 (on a scale of 4.0) is required for admission to the master's program.

GRE scores are not required for admissions to this program.

### Program Requirements

#### Required Courses and Credits

Students must complete a total of 30 credit hours of approved graduate-level coursework with a grade of C or better and a cumulative GPA of at least 3.00.

Students will take courses in the following categories: fundamentals (6 credits), core (6 credits), advanced electives (9 credits) and electives (9 credits).

#### Fundamentals

The courses in the Fundamentals category are designed to provide students with the background they need to succeed in this degree. Courses in this category cover the fundamental concepts of how the internet operates; how to develop network systems; and how to administer the machines (both physical and virtual) that deploy them.

Code	Title	Credit Hours
CSCI 5010	Fundamentals of Data Communication	3
CSCI 5020	Fundamentals of Network Programming	3
CSCI 5030	Fundamentals of System Administration and Virtualization	3

Students are required to take two courses (6 credits) from the Fundamentals category unless they can demonstrate that they have acquired the necessary skills and knowledge via their undergraduate degree. Such students can petition to take up to two extra elective or advanced elective courses instead. Only 6 fundamental credits can count towards graduation.

#### Core

The courses in the Core category begin to lay the foundation for exploring network engineering topics in depth. All aspects of network engineering from the management of network systems to the policies that govern traffic on the internet to the wireless systems that deliver information to devices on the edge are all covered.

Code	Title	Credit Hours
CSCI 5113		
CSCI 5160	Introduction to Enterprise Networks	3
CSCI 5170	IP Routing Protocols and Policies	3
CSCI 5180	Network Management and Automation	3
CSCI 5200	Introduction to Wireless Systems	3

## Dual Degree

### MSCPS/EMEN in Computer Science and Engineering Management

Computer Science and Engineering Management (<https://www.colorado.edu/emp/>) have teamed up to offer an exciting dual degree (<https://www.colorado.edu/cs/current-students/graduate-students/ms-degree/dual-professional-ms-engineering-management/>) for MSCPS students. Student complete a total of 45 credits of graduate-level coursework. Of those, 24 credits are in CS courses and 21 credits are in EMEN courses. All degree requirements must be completed within four years of the date of commencing coursework.

## Network Engineering - Master of Science (MSNE)

Global interconnectivity requires the continuous expansion and evolution of network infrastructure, in response to trends in e-commerce, the Internet of Things, mobile data and enterprise operations. To assure the continuous operation of this infrastructure, companies need highly educated and technically proficient individuals with the vision to anticipate and build systems for emerging communication needs. This course-based degree prepares students to join the next generation of leaders in Internet, cloud, and intranet networking. Students will learn how to develop, build and maintain network solutions tailored to the diverse needs of your organization within the private or public sectors.

The intended audience for the Network Engineering program is both working professionals trying to develop or update their technical skills and abilities to match the latest requirements of the Internet service and cloud provider landscapes, as well as new entrants to this industry pursuing academic, professional or research success.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 831)

CSCI 5220	Wireless Local Area Networks	3
CSCI 5230	Wireless Systems Lab	3

Students are required to take two courses (6 credits) from the Core category to help set the stage for taking courses in the Advanced Electives category. Students can be guided in their choice of Core courses by using the suggested focus areas below to craft a curriculum plan that best meets their academic goals. If a student feels that they need to take more courses from the Core category, they can certainly do so by choosing to take additional Core classes and applying those credits towards meeting the credits associated with the Electives category.

### Advanced Electives

The courses in the Advanced Electives category go in-depth on a variety of network engineering topics. Students are required to take three courses (9 credits) of advanced electives to graduate.

Code	Title	Credit Hours
CSCI 5190	Voice Over IP. Voice Network Design and Implementation	3
CSCI 5260	Datacenter Networks	3
CSCI 5270	IP Network Design	3
CSCI 5280	Software-Defined Networking	3
CSCI 5360	Internet Service Provider Networks	3
CSCI 5380	Network Virtualization and Orchestration	3
CSCI 5620	Advanced Wireless Lab	3
CSCI 5630	Wireless and Cellular Systems	3
CSCI 5840	Advanced Network Automation	3

### Electives

The three courses (9 credits) associated with the Electives category allow students to customize the MS in Network Engineering degree to meet their academic goals. These credits can include any of the following options:

- Any of the remaining Core courses
- Any of the remaining Advanced Electives Courses
- Any CS 5000-level course
- At most three graduate-level courses (9 credits) from outside CS approved by petition

For the last two options, students are encouraged to submit petitions to the CS graduate committee *before* taking the courses they want to apply to the Electives category.

### Suggested Focus Areas

The following sets of courses represent common focus areas that students can take to target a particular area of network engineering in depth.

#### Network Design and Configuration

Code	Title	Credit Hours
CSCI 5160	Introduction to Enterprise Networks	3
CSCI 5260	Datacenter Networks	3
CSCI 5360	Internet Service Provider Networks	3

#### Network Programmability and Automation

Code	Title	Credit Hours
CSCI 5180	Network Management and Automation	3
CSCI 5280	Software-Defined Networking	3
CSCI 5380	Network Virtualization and Orchestration	3
CSCI 5840	Advanced Network Automation	3

#### Wireless Networking

Code	Title	Credit Hours
CSCI 5200	Introduction to Wireless Systems	3
CSCI 5220	Wireless Local Area Networks	3
CSCI 5620	Advanced Wireless Lab	3
CSCI 5630	Wireless and Cellular Systems	3

#### Comprehensive Networking Solutions

Code	Title	Credit Hours
CSCI 5160	Introduction to Enterprise Networks	3
CSCI 5170	IP Routing Protocols and Policies	3
CSCI 5190	Voice Over IP. Voice Network Design and Implementation	3
CSCI 5200	Introduction to Wireless Systems	3
CSCI 5270	IP Network Design	3

## Learning Outcomes

Network engineering education prepares students to become the individuals responsible for the design, construction and operation of data communication systems. Network engineering and automation teaches students how to develop, build and maintain network solutions tailored to the diverse needs of the industry within the private or public sectors.

Global interconnectivity requires the continuous expansion and evolution of its infrastructure, in response of latest trends in e-commerce, IoT, mobile data and enterprises operations. To assure the continuous operation of this infrastructure the industry needs a constant supply of highly technical individuals with both the knowledge and the vision to anticipate and build for upcoming communication needs. The professional master's in network engineering (MSNE) would prepare students via technical and management courses to be the next leaders in Internet, Cloud and Intranet networking.

The curriculum will use an applied interdisciplinary approach through lab-based courses in multiple disciplines to give students the skills they will need to:

- Design, build and deploy complex networks architectures using multi-vendor solutions.
- Utilize network programming and automation to manage, monitor and audit networks and systems to identify critical problems and proactively resolve problems at scale.
- Analyze, create and deploy software-defined solutions to augment network intelligence and resiliency.
- Plan, scope and manage complex projects and communicate efficiently with audiences of various disciplines.

- Evaluate industry best practices, policies and regulations established by the ACM, FCC, IETF, IEEE, BITAG, NANOG, MEF and other relevant consortia in the industry.

## Computer Science - Doctor of Philosophy (PhD)

As a computer science PhD student at CU Boulder, students take part in tier one research, learning from nationally and internationally recognized faculty.

Computer Science faculty, staff, and students are engaged in cutting edge research projects that address some of the most important challenges facing society today. From harnessing the power of big data to modeling climate change to understanding the role of social media, advances in computer science today will change the world tomorrow. The department offers opportunities in seven main research areas (<https://www.colorado.edu/cs/research/>).

Students select from focus areas in artificial intelligence, robotics, computational biology, human-centered computing, numerical and scientific computing, programming languages, software engineering, systems and networking, security and theory of computing. The PhD program in computer science is available whether a student is entering graduate studies for the first time or if they already have a master's degree. While a master's is not required to enroll, our PhD students will typically earn one on the way to a PhD.

PhD students consult with a faculty advisor throughout the duration of their degree to review their research progress and course selection.

For more information, visit the department's PhD Degree (<http://www.colorado.edu/cs/current-students/graduate-students/phd/>) and Research (<http://www.colorado.edu/cs/research/>) webpages.

## Requirements

### Course Requirements

- 30 credit hours in courses numbered 5000 or above, including three breadth (<https://www.colorado.edu/cs/current-students/graduate-students/graduate-breadth-courses/>), three 1-credit professional development, and six depth courses (3 credits of the depth needs to be CSCI)
- 30 credit hours of dissertation credit.
- A maximum of 21 credit hours of graduate coursework may be transferred from another accredited institution.
- All courses taken for the master's degree at the 5000-level or above at CU Boulder may be applied toward the doctoral degree at the university.

### Preliminary Examination

The purpose of the area examination is to ensure that the student has sufficient depth to begin research in a selected area. Thus the exam tests knowledge of the general area of computer science that contains the research topic, deeper specialized knowledge of the specific research area that the student will be working in, and intellectual sophistication needed to conduct research in the area.

The area examination contrasts with the comprehensive exam, which is devoted to a focused research theme. It complements the coursework requirement of the preliminary exam, which is meant to build breadth

in Computer Science in general and general knowledge of the student's research area.

For more information, visit the department's PhD Area Exams (<https://www.colorado.edu/cs/current-students/graduate-students/phd/requirements/>) information.

### Comprehensive Examination

After passing the preliminary examination, the student continues their coursework and prepares a written thesis prospectus within four years of their admission to the program. When ready, the student takes an oral comprehensive examination covering their graduate coursework and thesis prospectus. The oral examination is based primarily on a written proposal for the thesis research provided by the student to committee members in advance. This examination is conducted before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School.

For more information, visit the "PhD Comprehensive Exam/Proposal" section of the department's PhD Program Requirements (<http://www.colorado.edu/cs/current-students/graduate-students/phd/requirements/>) webpage.

### PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

### Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

## Artificial Intelligence - Graduate Certificate (Online)

The graduate certificate in Artificial Intelligence (AI) provides students a strong foundation in key AI topics. Students apply Machine Learning (ML) algorithms to real-world data sets; examine ethical issues in the design and implementation of current and future computing systems and technologies; create an appreciation for the tight interplay between mechanism, sensor and control in the design of robotic and intelligent systems; and study vital topics in generative AI reinforcement learning, natural language processing and autonomous systems.

## Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1833) section of the catalog for more information.

## Requirements

The AI graduate certificate requires 12 credit hours of coursework. To earn the certificate, students must complete the following courses with a grade of C or higher in each course and a 3.0 cumulative GPA.

Code	Title	Credit Hours
<b>Required Specialization</b>		
	Machine Learning: Theory and Hands-on Practice with Python	3

**Additional Specializations**

Choose 3 from the list below: 9

Computing, Ethics and Society

Natural Language Processing: Deep Learning Meets Linguistics

Artificial Intelligence

Reinforcement Learning

Foundations of Autonomous Systems

Introduction to Robotics with Webots

Generative AI

**Total Credit Hours** 12**Learning Outcomes**

- Students will gain a deep knowledge of AI, machine learning theory and its numerous applications including (but not limited to) natural language processing, computer vision, robotics, healthcare and human-centered computing.
- Students will be able to design and implement comprehensive solutions for practical problems that incorporate the latest AI techniques.
- Students will be able to identify the ethical implications in the design and application of AI technology and contribute to the emerging discussion in these areas as ethical developers of new technologies.
- Students will understand CS foundations, probability/statistics, programming languages and computer systems. Specifically, their knowledge will extend to how ideas from these sub-disciplines of CS support AI systems and vice-versa.
- Students will keep up with the state-of-the-art methods and techniques in this rapidly changing discipline of AI. Students will read and comprehend research papers and consider how the ideas in them can be applied in their everyday practice.

**Creative Technology and Design**

Conferred by the College of Engineering and Applied Science and administered by the ATLAS Institute, graduate programs in creative technology and design are highly interdisciplinary, nurturing robust technical and design skills while giving students the maximum flexibility to explore and develop their creative visions.

ATLAS faculty interests are broad, including areas such as e-textiles, human-robot interaction, game design and engineering at the molecular level. Graduate students hail from a wide range of academic disciplines, including computer science, engineering, art, the humanities, the natural sciences, music and design.

Graduates of the professional MS program most often pursue careers in design, technology and social impact fields. PhD alumni work as researchers in industry and government, and as faculty members in academia.

For those seeking a graduate experience surrounded by a vibrant, interdisciplinary academic community of creative designers, engineers and inventors, ATLAS is the place.

For more information, visit the institute's Graduate Programs (<https://www.colorado.edu/atlas/academics/grad/>) webpage.

**Course code for this program is ATLS.**

**Professional Master's Degree**

- Creative Technology and Design - Master of Science (MS) (p. 1597)

**Doctoral Degree**

- Creative Technology and Design - Doctor of Philosophy (PhD) (p. 1598)

**Faculty**

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### ATLS 5040 (3) Game Design

Introduces students to game design, development, history, theory and culture through readings, discussion, game analysis and the iterative design process of non-digital games.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4040

**Requisites:** Requires prerequisite course of ATLS 2000 (minimum grade C). Restricted to the ATLAS (PATL) student group only.

### ATLS 5112 (3) Neurohacking

Explores psychotechnologies for developing high level metacognition and individual sovereignty. We investigate the optimization of conscious human experience, mindfulness, and creativity through the lenses of neuroscience, cognitive science, evolutionary psychology, and philosophy. Students will learn to critique primary literature, experimental design, and be guided in developing a set of practices to enhance cognition and achieve various desired mental states.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4112

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

### ATLS 5120 (3) Mobile Application Development

Provides a comprehensive overview of developing mobile applications using a range of technologies including software developers' kits, object-oriented programming and human interface design principles. Students incorporate leading edge technologies with their own academic pursuits and personal interests to develop mobile applications. Explores the social and cultural effects of app and mobile-based computing.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4120

**Grading Basis:** Letter Grade

### ATLS 5130 (3) Experimental Typography

This course is an advanced investigation of typography for visual communication and expression. Emphasis is placed on the analysis of meaning as conveyed through materials, technology, and design. Projects are experimental and are designed to challenge you to expand your understanding of the function of typography in communication, design, art, and culture.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4130

**Requisites:** Restricted to graduate students only.

### ATLS 5140 (3) Game Development

Builds on concepts and processes learned in ATLS 4040/5040. Reinforces game design principles through analysis and discussion of digital games, and introduces students to key practices in the development of digital game experiences, including game flow, mechanics, 2D and 3D graphics, and artificial intelligence.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4140

### ATLS 5150 (1) Managing Effectively in a Changing Telecommunications Environment

Provides students with an opportunity to join international managers and policy makers from around the world in an intensive seminar focused on the challenges of managing in a telecommunications environment in an era of technological change. Guest lecturers provide an effective overview of the cutting-edge issues managers face in telecom and technology companies around the world.

**Equivalent - Duplicate Degree Credit Not Granted:** TLEN 5150

**Requisites:** Restricted to CYBR/TLEN graduate students.

### ATLS 5151 (3) Flow Visualization

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4200, MCEN 4151, ARTF 5200, ATLS 4151 and MCEN 5151

### ATLS 5210 (3) Global Development I

Introduces students to the theories and policy of international development. Examines the role of multilateral agencies, foundations, aid organizations, corporate entities and academia in development as both an industry and a research field. Focuses on development movements and their outcomes, the inter-related nature of development and its effect on policies and programs, and critiques.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

### ATLS 5214 (3) Big Data Architecture

Provides students with a comprehensive survey of technologies used today in the collection, storage, processing, analytics and display of big data. Focuses on cultivating real world skills with students working on semester long projects to execute on a group project.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4214

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5220 (3) Global Development II**

Explores the impact of economic, geographical and social/cultural conditions on development outcomes through standalone course components taught by subject matter experts in region and in residency at ATLAS. Components may include, but are not limited to, development economics, environmental sustainability, public health, climate change, globalization and migration, religion, and gender as these broad themes relate to development.

**Requisites:** Requires prerequisite courses of ATLS 5210 (minimum grade D-). Restricted to graduate students only.

**ATLS 5230 (3) Case Studies in Social Impact**

Serves as foundation course for MS-Social Impact program. Students will evaluate case studies across a range of technologies and applications. Students will learn how to match available technologies to human and environmental needs and resources, be introduced to the seminal work and leaders in the field, and discuss the future of Social Impact as an emerging area of academic focus.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4230

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5240 (3) Technology for Social Impact Laboratory**

Prepares students for the semester-long practicum. Students work in teams to design interventions that address unique socio-economic and environmental development issues. Teams will design a variety of interventions, including telehealth and distance education programs, communication networks, and pro-development policies. Topics will be chosen by teams and guided by program faculty and external domain experts.

**Requisites:** Requires prerequisite courses of ATLS 5230 (minimum grade D-). Restricted to graduate students only.

**ATLS 5244 (3) Empathy and Technology**

Explores how the creative integration of empathy and compassion with design and technology can benefit society. Reviews foundational neuroscience and evolution of empathy. Through readings, discussion, and reflection students will develop personal practices for fostering empathy and critically investigate: empathy as a finite resource, tribalism/polarization, the weaponization of empathy, and principles for designing social systems that promote well-being. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4244

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5250 (3) Fieldwork Methods**

Introduces methods and models that can be employed in program development and deployment. Examines the applications of participatory research, value-centric design, program scale, cross-disciplinary work, and appropriate monitoring and evaluation. The goal is to build student confidence around existing evaluation toolkits and methods, while advancing multi-method approaches to designing and analyzing initiatives.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5279 (3) Aesthetics in Design**

Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5279 and MCEN 4279 and ATLS 4279

**ATLS 5320 (3) Mobile Application Development: Advanced Topics**

Explores advanced topics in mobile application design and development, including examining different approaches to information design and the various user interaction models associated with them. Understanding how data is structured, accessed, stored and flows through apps is a core theme of the course. Explores the interaction with external data sources and storage models.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4320

**Requisites:** Requires prerequisite course of ATLS 5120 (minimum grade C).

**Grading Basis:** Letter Grade

**ATLS 5330 (3) Wearable Technologies**

Introduces elements of embedding electronic and computational behaviors into clothing and accoutrements such as watches, handbags, and other wearable accessories. In weekly exercises students build, test, and demonstrate canonical wearable projects. Readings and video viewings survey past and current trends in wearable technologies, including materials, components, fashion and social acceptability. Participants design, develop, debug and document a wearable technology term project.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4330

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5402 (3) Research Methods in Human-Robot Interaction**

Introduces students to the field of human-robot interaction (HRI). Covers HRI theory, principles, methodologies, and applications with links to robotics, artificial intelligence, human factors, human-computer interaction, design, cognitive psychology, education and other domains. Coursework includes readings from state-of-the-art in HRI research, team exercises and problem-solving sessions, and implementation and evaluation of a human-robot interaction systems for specific applications.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5402

**Requisites:** Restricted to graduate students only.

**ATLS 5410 (3) Creative Technologies**

This course gives students hands-on exposure to a wide range of technologies, including 3D printing, laser cutting, microcontrollers, sensors and programming. Through rapid prototyping and problem solving, students gain technical fluency and competence while identifying technology skills they wish to develop further.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5420 (3) Professional Seminar: Business of Creativity**

This course was designed specifically to prepare students to make the most of their time in the CTD Master's Program, and to prepare them for a career within the creative technology and design professional landscape. The course helps students identify career goals and mentors, and helps them position themselves for industry through course-selection, portfolio development, and projects. There is also a survey element to the course which exposes students to creative technology professionals who discuss their career paths, offer advice, and provide insight into their individual design process.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5430 (3) Design Methods**

In this course, students will learn to develop sense-making techniques as designers. This includes framing and structuring design research, making representations to generate insights, as well as documenting and communicating processes and outcomes. The class is structured around weekly discussions and activities anchored in real-world design challenges; and it will also offer tutorials on key design skills such as rapid prototyping and visual communication.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5440 (3) Design Studio**

In this course students work with both faculty and industry expert mentors on developing a semester-long group project. In small teams, students learn to develop an interactive experience that combines project design and technical execution. The class is designed to reflect a *real world* interactive design project experience, in which students must present and deliver a large scale completed project for demonstration/exhibition at the end of the semester.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5519 (1-3) Advanced Special Topics in Creative Technology and Design**

Analyzes special interest areas of multidisciplinary creative technologies and design research and practice.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ATLS 5529 (1-3) Advanced Special Topics: Critical Perspectives in Technology**

Analyzes critical perspectives in technology, art and media. Within these courses, students will develop vocabularies, theoretical perspectives and critical approaches relevant to technology and its effects on culture and society.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4529

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5606 (3) Critical Technical Practice**

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 5606, ATLS 4606 and INFO 4606

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ATLS 5610 (6) Startup Practicum**

Presumes that entrepreneurship can be learned through the conception, build, and launch of an original product or service by student teams within a single semester. Immerses students in the daily leadership and innovation challenges of the startup environment and serves as a clinic in thinking, decision making and mental agility that will benefit any area of business—not just startups.

**Requisites:** Restricted to graduate students only.

**ATLS 5616 (3) Introduction to Virtual Reality**

Introduces students to the field of virtual reality (VR). Covers the historical development of virtual reality technologies and virtual reality as a research field, the mathematics of 3D coordinate systems, fundamental principles, algorithms, and design patterns in developing interactive virtual environments, the perceptual science behind mixed reality technologies, and libraries and tools for creating VR experiences. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4616, ATLS 4616, CSCI 5616

**ATLS 5620 (3) User-Experience Design 1**

Through lecture, industry illustrations, and hands-on projects students will learn the end-to-end UX Design process. Through this course students will learn how to craft a professional design portfolio piece, understand contemporary UX design methodologies, and be shown how to innovate when designing at scale.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5630 (3) Web Front-End Development**

Explores interactivity on the web using front-end web development concepts and technologies. Students will work with a range of technologies including JavaScript, jQuery, HTML5, APIs and user interface design methods to create interactive web applications. Individual and group projects will include animations, games, interactive narratives and web applications.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4630

**Requisites:** Restricted to graduate students only.

**ATLS 5640 (4) Design Thinking**

Explores design thinking and how it can be applied conceptually and practically to innovation in areas as diverse as business organization and product development to topics and areas including but not limited to, story, design, UX, interaction design, communication strategy and presentation. Fast-paced, project-based, and immersive, students will work in small teams to discover solutions to real-world problems.

**Requisites:** Restricted to graduate students only.

**ATLS 5650 (3) Introduction to Programming**

Explores computation as a powerful tool for creative design and expression in a project-based studio environment. Students learn the fundamentals of creative coding, computational thinking, and object-oriented programming. Hands-on topics include generative art and design, interactivity, animation, and visualization. This class is a mix of technical instruction (both inside and outside the classroom), readings, viewings, lectures, workdays, and critiques. This is a projects-based class, but projects will vary.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 5660 (3) Creative Code**

Exposes students to front-end, web-based design and development processes and best practices. WordPress will be used as the back end CMS. Students will learn how to design and develop using WordPress as a framework. At the end of the semester, students will present a final project to illustrate what they have learned and the logic of their build.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**Recommended:** Prerequisites: exposure to HTML, CSS, JavaScript, PHP and MySQL and previous experience with WordPress for blogging and/or content publication.

**ATLS 5680 (3) Creative Tech Studio**

Emphasizes fundamentally, theoretically, and practically that technology and creativity are not opposing disciplines but rather a dynamic and complementary blending of idea and execution that is iterative and evolving through the dynamic exchange and interaction of ideas and tools. Each Studio will offer a different conceptual challenge, such as using technology to bridge physical and digital environments, game design, or storytelling.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Grading Basis:** Letter Grade

**ATLS 5720 (3) User-Experience Design 2**

Expands on techniques and opportunities presented in User-Experience Design 1 with a deeper dive into research and prototyping practices as means to insight into user desires and preference, adoption, and execution of product and branded experiences in a variety of contexts and locations within the global experience economy.

**Requisites:** Requires prerequisite course of ATLS 5620 (minimum grade C).

**ATLS 5730 (3) Front-End Development 2**

Requires that students are proficient in front-end environment and ready for advanced front-end development using these tools - HTML 5, CSS3, JS - on weekly projects, a mid-term project, and a final project. This course develops more robust and elegant uses of the semantic use of elements as well as the benefits of using standards-based, valid code, CSS efficiencies, and JS and its libraries.

**ATLS 5809 (3) Computer Animation**

Develops a firm understanding of the general principles of computer animation. Lectures cover the creation of models, materials, textures, surfaces, and lighting. Path and key frame animation, particle dynamics, and rendering are introduced. Students are assigned a number of animation tutorials to carry out.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4809 and CSCI 4809 and CSCI 5809

**Requisites:** Restricted to graduate students only.

**ATLS 5880 (3) Interactive Machine Learning for Customizable and Expressive Interfaces**

Introduces students to techniques for applying machine learning in the development of customizable human-computer interfaces. Students will learn to process a wide variety of input data (e.g. video and accelerometer streams), using different machine learning algorithms to detect semantically meaningful events that can afford the construction of new interactive systems. They will complete substantial projections within the domains of assistive or creative technologies. Does not fulfill Breadth Requirement for CSEN graduate students.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 4889, CSCI 4889 and CSCI 5880

**Requisites:** Requires prereqs (CSCI 3022 or APPM 4570 or APPM 3570 or APPM 4520 or CVEN 3227 or MATH 3510 or MATH 4510 or ECEN 3810 or ECON 3818 or MCEN 4120) (CSCI 3002 or CSCI 3202 or CSCI 4448) all min grade C-. Restricted to grad students in the ATLAS program.

**Grading Basis:** Letter Grade

**ATLS 5900 (1-6) Masters Level Independent Study**

Provides opportunities for independent study and research at the Masters level. Students work on research project guided by faculty.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ATLS 6519 (1-3) Advanced Special Topics in Creative Technology and Design**

Analyzes special interest areas of multidisciplinary in creative technology and design research and practice.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**ATLS 6900 (1-3) Professional Internship**

The objective of this course is for students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**ATLS 6910 (3-6) Social Impact Practicum**

This practicum allows Social Impact MS students to synthesize what they have learned and test their readiness for a career in Social Impact. Practicum assignments are arranged under the supervision of the MS Program Director and involve work with a non-governmental organization, development agency or technology/policy entity. Successful completion is required for graduation from the Social Impact MS Program.

**Requisites:** Requires prerequisite courses of ATLS 5210 and ATLS 5220 and ATLS 5230 and ATLS 5240 and ATLS 5250 (all minimum grade D-).

**ATLS 6920 (3) Creative Industries Final Project**

This course allows MS-CTD students to synthesize what they have learned and test their readiness for a career in the creative technologies and design field. Through this class students work with an academic and/or industry mentor to create a capstone final project emblematic of their focus during their master degree studies. Students learn to propose and scope work, adhere to budget constraints and time schedules, communicate their work, and create a final end deliverable that is presented to the larger ATLAS community. This final project is meant to serve as a culminating portfolio project that helps position students for industry after graduation. Successful completion is required for graduation from the MS-CTD Program.

**Requisites:** Restricted to Tech, Media and Society (ATLS) master's degree students only.

**ATLS 7000 (1) ATLAS Colloquium**

Each week during the fall and spring semesters, the ATLAS Colloquium features dynamic speakers from academia and industry who work in fields of interest to the creative technology and design community. Whether artists, creatives, scientists, researchers, entrepreneurs or free spirits, these speakers share their interdisciplinary experience and knowledge in an intimate, small-group setting. Topics may include programmable matters, do-it-yourself technologies, new design medium, robotic teleoperations, virtual/augmented/mixed reality, information visualization, games, design computation, creativity and cognition, personal health informatics, addictive fabrication, cyber security, ethics, education, human computer interaction and others. The ATLAS Colloquium promotes rigorous, curiosity-driven investigation in a thriving academic community that is supportive, energetic and playful.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**ATLS 7500 (3) ATLAS Graduate Research Methods**

The objective of this course is to provide a primer for key methodological approaches used in the field. Students will investigate a broad set of techniques for conducting theoretical, design, and experimental research. They will explore how to formulate and investigate research questions using these methods. Topics covered will include basic research ethics, research project design, approaches to constructing theory, research through design techniques, and methods for experimental study.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**ATLS 7900 (1-6) Doctoral Level Independent Study**

Provides opportunities for independent study and research at the Doctoral level. Students perform independent research under faculty supervision.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

**ATLS 8990 (1-10) Doctoral Dissertation**

Approved research conducted under the supervision of members of the graduate faculty. Investigates some specialized topic or field in the area of interdisciplinary information and communication technology. All doctoral students must register for at least 30 hours of dissertation credit as part of the requirement for the ATLAS doctoral degree.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to Atlas (ATLS) graduate students only.

## Creative Technology and Design - Master of Science (MS)

Conferred by the College of Engineering and Applied Science and administered by the ATLAS Institute, the professional Master of Science in Creative Technology and Design is highly interdisciplinary, nurturing robust technical and design skills while providing students with the maximum flexibility to explore and develop their creative visions.

### Program Tracks

The degree program includes two tracks: Creative Industries and Social Impact.

#### Creative Industries

Through project-based learning, students in this track gain technical fluency, designing systems and products to realize their creative visions. Students learn more than design thinking; they graduate from the program as creative technologists equipped with robust portfolios of thoughtful projects and prototypes.

The program is driven by a unique and relevant core curriculum, flexibly shaped by student interest and guided by industry leaders.

The creative industries track connects students to the current and most relevant considerations of the field. Through hands-on workshops, visiting speakers, studios and classes, students work directly with leading professionals on real-world issues, gaining design expertise and technical skills as they learn the business of creativity.

#### Social Impact

The social impact track prepares students to leverage information and communication technology in support of underserved communities, in the U.S. and around the world.

Graduates are creative problem solvers tackling some of the world's biggest issues. Learning in the program prepares students to creatively apply information and communication technologies for social impact. Students understand that the most effective and culturally appropriate solutions balance technology and societal need; through a project-based curriculum, students learn to critically evaluate and apply both.

One of the program's greatest strengths is its diverse student cohort; a broad mix of talent leads to more thoughtful and thorough development projects and solutions.

A hallmark of the program is the final field-based practicum semester when students are placed with non-governmental organizations, development agencies, foundations or technology companies to apply social impact interventions to real-world problems—experience that positions them favorably for careers in the field after graduation, sometimes with the same organizations.

For more information, visit the ATLAS Institute's Graduate Programs (<https://www.colorado.edu/atlas/academics/grad/>) webpage.

## Requirements

### Creative Industries Track

The creative industries track requires a total of 33 credit hours, of which at least 27 must be completed at the 5000 level or above, including the mandatory core courses listed below. In addition, specific focus area requirements must be met. Students must receive a grade of B or higher in all coursework, maintaining a minimum overall GPA of 3.000.

For more information, visit the ATLAS Institute (<https://www.colorado.edu/atlas/academics/graduate/ms-technology-media-society/>) webpage.

Code	Title	Credit Hours
<b>Core Courses</b>		
ATLS 5210	Global Development I	3
ATLS 5230	Case Studies in Social Impact	3
ATLS 5240	Technology for Social Impact Laboratory	3
ATLS 5250	Fieldwork Methods	3
ATLS 6910	Social Impact Practicum (field practicum)	6

### Social Impact Track

The social impact track requires a total of 33 credit hours, of which at least 27 of which must be completed at the 5000 level or above, including the mandatory core courses listed below. In addition, specific focus area requirements must be met. Students must receive a grade of B or higher in all coursework, maintaining a minimum overall GPA of 3.000.

For more information, visit the ATLAS Institute (<https://www.colorado.edu/atlas/ictd/>) webpage.

Code	Title	Credit Hours
<b>Core Courses</b>		
ATLS 5519	Advanced Special Topics in Creative Technology and Design (Professional Seminar: Business of Creativity)	3

ATLS 5519	Advanced Special Topics in Creative Technology and Design (Design Methods)	3
ATLS 5519	Advanced Special Topics in Creative Technology and Design (Creative Technologies)	3
ATLS 5519	Advanced Special Topics in Creative Technology and Design (Design Studio)	3
ATLS Creative Industries Final Project		

## Two-Year Plans of Study Creative Industries Track

### Year One

Fall Semester		Credit Hours
ATLS 5230	Case Studies in Social Impact	3
ATLS 5210	Global Development I	3
Technology Focus Elective 1		3
<b>Credit Hours</b>		<b>9</b>

### Spring Semester

ATLS 5250	Fieldwork Methods	3
Domain-Specific Elective 1		3
Technology Focus Elective 2		3
<b>Credit Hours</b>		<b>9</b>

### Year Two

Fall Semester		Credit Hours
ATLS 5240	Technology for Social Impact Laboratory	3
Domain-Specific Elective 2		3
Technology Focus Elective 3		3
<b>Credit Hours</b>		<b>9</b>

### Spring Semester

ATLS 6910	Social Impact Practicum	6
<b>Credit Hours</b>		<b>6</b>
<b>Total Credit Hours</b>		<b>33</b>

## Social Impact Track

### Year One

Fall Semester		Credit Hours
ATLS 5519	Advanced Special Topics in Creative Technology and Design (CTD Professional Seminar: Business of Creativity)	3
ATLS 5519	Advanced Special Topics in Creative Technology and Design (Design Methods)	3
Creative Technologies <sup>1</sup>		3
<b>Credit Hours</b>		<b>9</b>

### Spring Semester

ATLS 5519	Advanced Special Topics in Creative Technology and Design (Design Studio)	3
Technology Focus Elective 1		3
Technical Focus Elective 2		3
<b>Credit Hours</b>		<b>9</b>

### Year Two

#### Fall Semester

ATLS 5519	Advanced Special Topics in Creative Technology and Design (Critical Perspectives Elective or Technology Perspectives Elective)	3
ATLS 5519	Advanced Special Topics in Creative Technology and Design (Design Studio)	3
Technology Focus Elective 3		3
<b>Credit Hours</b>		<b>9</b>

#### Spring Semester

ATLS 5519	Advanced Special Topics in Creative Technology and Design (Design Studio or Technical Focus Elective directly related to thesis project) <sup>1</sup>	3
CTD Thesis Project		3
<b>Credit Hours</b>		<b>6</b>
<b>Total Credit Hours</b>		<b>33</b>

<sup>1</sup> Or praxis elective 3.

## Creative Technology and Design - Doctor of Philosophy (PhD)

The PhD program at CU Boulder's ATLAS Institute emphasizes out-of-the-box invention and radical inquiry, attracting students whose interests and knowledge span multiple disciplines and domains. Conducting compelling and relevant research, ATLAS PhD students are central to the institute's thriving academic community of engineers, artists and designers.

Structurally, the ATLAS PhD program is like any other research-based doctoral program: a student forms an advisory committee, takes courses, takes a qualifying examination, proposes a dissertation, performs research, writes a dissertation and defends it.

However, unlike most U.S. doctoral programs, the ATLAS PhD program has few required courses; instead, the curriculum is crafted individually, with students working with their advisory committees to identify the expertise needed to research their area of focus.

For more information, visit the ATLAS Institute's PhD Program (<https://www.colorado.edu/atlas/academics/graduate-programs/atlas-phd-program/>) webpage.

## Requirements

### Course Requirements

- A minimum of 30 credit hours of courses numbered 5000 or above where students earn a minimum of 3.00 GPA.
- A minimum of 30 credit hours of dissertation credit are required for the degree.
- Students must complete the following two courses: Research Methods and PhD Research Professional Seminar, and attend the ATLAS Colloquium three semesters over the span of their time in the PhD program.

## Program Proposal

To maintain good standing in the program, all students must complete their academic program plan/program proposal by the end of the second semester. In general, ATLAS academic plan/program proposals include general research area and the courses to be taken and other research/disciplinarily appropriate activities planned.

## Preliminary Examination

To maintain good standing in the program, all students must complete their preliminary examination by the end of the second year. The preliminary examination will demonstrate the student's preparation for scholarly work in his/her chosen area.

## Comprehensive Examination

To maintain good standing in the program, all students must complete their comprehensive exam by the end of the second semester of their fourth year in the program. The comprehensive examination will outline the student's completed research and proposed research agenda. This includes both an oral and written exam delivered to their dissertation committee and open to the larger community.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all CU Boulder Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Plan(s) of Study

Due to the highly interdisciplinary nature of the program, each student's plan of study is developed in consultation with their advisor to address their unique research goals.

## Electrical Engineering

Areas of focus in electrical engineering include photovoltaic, wind and renewable energy systems, power electronics systems, electromagnetic theory, microwave systems, antennas, remote sensing, bioelectronics and biomedical engineering, communications and signal processing, medical imaging, optoelectronics, nanophotonics and nanodevices, biophotonics, human/machine interfaces, controls theory, embedded systems engineering, and complex network systems.

With a highly regarded faculty and \$15.1 million awarded in new contract and grant funding in fiscal year 2021, the Department of Electrical, Computer and Energy Engineering (<http://www.colorado.edu/ecee/>) is the perfect place for students to take their education to the next level.

We offer several degree options tailored to both working engineers looking to advance their careers and to those looking to pursue a career in academia. Research is concentrated in six broad areas: optics, nanostructures and bioengineering; communications and signal processing; computer engineering; systems and controls; electromagnetics, RF and microwaves; and power electronics.

Course code for this program is ECEN.

## Research Centers

### Colorado Power Electronics Center (CoPEC)

Since it was founded in 1983, the power electronics group at the University of Colorado has maintained a tradition of innovative design-

oriented and application-driven research. Colorado Power Electronics Center (CoPEC) activities now span the range of applications from high-efficiency milliwatt converters for portable battery-operated systems, to hundreds or thousands of watts for computer, data centers, telecommunications, aerospace, and medical applications, to hundreds of kilowatts for electrified transportation, solar photovoltaic and wind power systems.

Our current research activities include projects in high-efficiency, high-power converter technology, power electronics for portable, battery-operated systems, converter modeling and computer-aided analysis, high-efficiency modular and composite power conversion architectures utilizing wide bandgap power semiconductors, low harmonic rectifier technology for single-phase and three-phase applications, solar photovoltaic power systems, and advanced digital and mixed-signal control techniques. We collaborate with other research groups at the University of Colorado, including those in power and renewable energy systems, microelectronics packaging, RF/microwave systems, control and semiconductor devices. We also maintain collaborations with the National Renewable Energy Laboratory and within the NSF Engineering Research Center ASPIRE, which is focused on electrified transportation. For more information, call 303-492-7327 or visit the CoPEC (<http://ecee.colorado.edu/copec/>) website.

### ASPIRE

Launched in 2020, **ASPIRE** (Advancing Sustainability through Powered Infrastructure for Roadway Electrification) is exploring a diverse range of electrified transportation questions, from electrified highways that energize vehicles to the placement of charging stations, data security and workforce development. Participating in ASPIRE are CU Boulder researchers in electrical, computer and energy engineering, including Colorado Power Electronics Center, Power and Renewable Energy Systems, Optimization, and Data Science, as well as researchers in computer science and mechanical engineering. The ASPIRE Engineering Research Center is funded by a \$26 million National Science Foundation (NSF) grant and led by Utah State University.

### The University of Colorado Center for Environmental Technology (CET)

Understanding and managing the environment—whether for agriculture, health, water resources, disaster mitigation, energy generation, transportation, weather forecasting, climate modeling or biodiversity—requires accurate knowledge of many variables on a wide range of time and space scales. Measurements for environmental purposes are made either using in situ or remote sensors, and rely upon a variety of different means, including acoustic and electromagnetic waves, point measurements and wide-area imaging and active and passive systems. A variety of different types of platforms can be used for environmental observation, including ships and submersibles, aircraft (both manned and unmanned), spacecraft and stationary sites.

Research and educational activities at the CU Center for Environmental Technology are focused on developing sensors, systems of sensors and associated hardware and algorithms for environmental observation with a focus on new remote and in situ techniques to meet contemporary scientific and applications goals. This is accomplished by direct involvement of CU faculty, CET engineering staff and undergraduate and graduate students on the development of sensing systems to meet the observational needs of a number of government and industry sponsors. CET training involves close interaction between students and experienced professional engineers, practicing scientists and CU faculty.

The CET was established in 2006 with a major donation of equipment from the NOAA Earth System Research Laboratory, and has members, associates and students from within the broad earth science and engineering communities of Colorado. For more information, contact the CET director at 303-492-9688 or visit the Center for Environmental Technology website.

## The STROBE Center

The STROBE Science & Technology Center brings together imaging science experts from seven universities and partners with national labs, industry and academe to push the boundaries of imaging science capabilities and technologies, while building a diverse workforce that is prepared for 21st century careers in science and technology.

Modern functional materials require a deep knowledge of interactions within them to understand how heterogeneity defines function. STROBE brings together academia, national laboratories and industry to develop and advance multimodal multi-scale imaging modalities and their application to material and bio-systems science.

## Research and Instructional Equipment

The department's special equipment and facilities include a class 1000 clean room facility for epitaxial growth and fabrication of microwave and optical devices; an anechoic chamber; high-vacuum and vacuum deposition equipment for thin-films research; an integrated circuits laboratory; ion implantation equipment; crystal growing facilities; a modern systems laboratory; a laboratory for data storage research; a digital system design laboratory; a power electronics research laboratory; undergraduate laboratories in circuits, electronics; power electronics; digital signal processing and communications; embedded systems; microwaves; a holography and optics laboratory; an advanced optical metrology lab; numerous special purpose computers; a computer system development laboratory; a roof-mounted antenna range; a special microscope for laser manipulation of microorganisms in vivo; a bio-microwave laboratory; a solar power lab; photovoltaic device fabrication and characterization facilities; and bioelectronics fabrication and integration capabilities.

The Colorado Shared Instrumentation in Nanofabrication and Characterization (COSINC) is an open user facility on campus. Our mission is to provide expertise, facilities, infrastructure and teaming environments to enable and facilitate interdisciplinary research in microelectronics, optoelectronics and MEMS. We also make use of the campus's HPC system RMACC Summit (<https://www.colorado.edu/rc/articles/rmaccsummit/>).

The Department of Electrical, Computer and Energy Engineering has a large variety of computing equipment to support its research and instructional activities. In addition to specialized computing equipment, this includes several hundred PCs, Macs, a department server and a student server. These machines are connected to the campus-wide ethernet network.

## Master's Degrees

- Electrical Engineering - Master of Engineering (ME) (p. 1615)
- Electrical Engineering - Master of Science (MS) (p. 1615)
- Electrical Engineering - Professional Master of Science (MSEE) (p. 1619)

## Doctoral Degree

- Electrical Engineering - Doctor of Philosophy (PhD) (p. 1622)

## Certificates

- Embedded Systems Engineering - Graduate Certificate (p. 1628)
- Power Electronics - Graduate Certificate (p. 1630)
- Photonics - Graduate Certificate (p. 1623)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Lecturer

Wustrow, Eric A. ([https://experts.colorado.edu/display/fisid\\_156419/](https://experts.colorado.edu/display/fisid_156419/))  
Assistant Professor; BE, University of Michigan Ann Arbor

Zabotin, Nikolay  
Research Professor; DSc, Russian Academy of Science

## Courses

### ECEN 5005 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Nanostructures and Devices

### ECEN 5008 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Dynamical Systems and Control

### ECEN 5009 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: VLSI CAD Methods

### ECEN 5011 (1-4) Special Topics

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4011

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Bioengineering

### ECEN 5012 (3) Special Topics

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

### ECEN 5013 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Campus section restricted to ECEE graduate students in Academic subplans ESE or C-EEENP or C-ECENEEEP only.

**Grading Basis:** Letter Grade

### ECEN 5016 (3) Special Topics

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Additional Information:** Departmental Category: Optics

**ECEN 5018 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 5021 (1-4) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Bioengineering

**ECEN 5023 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering, Embedded Systems.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5024 (3) Special Topics**

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4024

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5028 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 5032 (3) Special Topics**

**Additional Information:** Departmental Category: Bioengineering

**ECEN 5053 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering - Embedded Engineering.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4053

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5104 (3) Passive Microwave Circuits**

Building on fundamentals taught in a class such as ECEN 3410 (Electromagnetic Waves), this course teaches fundamentals of microwave passive circuit analysis using scattering parameters. Design of impedance matching networks, impedance transformers, couplers, filters, dividers/combiners and other typical circuits used at microwave frequencies are covered. Using an industry-standard CAD tool, design of microstrip circuits is emphasized. Assignments include theoretical and CAD approaches to analysis and design of passive microwave transmission-line circuits.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5110 (1-3) Graduate Teaching Practicum**

Provides training and hands-on experience in teaching of ECEE courses.

Students will work with an instructor of an ECEE course to carry out teaching activities such as lecturing, leading discussion sessions, writing homework and examination problems, and relevant grading.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**ECEN 5111 (3) Engineering Applications in Biomedicine: Cardiovascular Devices and Systems**

Application of engineering in medicine has grown dramatically in recent years. Engineers enter the clinical and experimental medical arenas with many new devices and procedures emerging as alternatives to conventional surgical and pharmacological treatments. This course, presents general principles of biomedical engineering as applied to the development of a variety of specific devices and techniques for therapy and diagnosis, with a focus on devices and systems for the cardiovascular system. This class will present relevant anatomy and physiology as part of the class discussion, which will be supplemented by a physiology reference text. Questions, exchanges of ideas, and active classroom discussion are encouraged. Biomedical engineering is an emerging field which is highly interdisciplinary- engineers and scientists from all fields are invited and encouraged to participate in this course. There are no formal prerequisites.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4111

**ECEN 5114 (3) Electromagnetic Theory**

This course covers theory and applications of Maxwell's equations at the graduate level, including various electromagnetic wave types. Additionally, fundamental electromagnetic theorems such as Poynting, equivalence, duality, reciprocity and compensation, are studied through examples across the electromagnetic spectrum.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5122 (3) Wireless Local Area Networks**

Emphasis on the IEEE P802.11 family of WLAN standards. Students learn the legacy versions of the standard (802.11DS/b), the current generation of WLAN systems (802.11a/g/n/ac), and will analyze and critique upcoming versions (802.11ax/ba), and gain insight into proposals for new research in WLAN. Exposure to the interoperability and certification process for WLAN by the Wi-Fi Alliance, study the newest Wi-Fi Certified programs, and will learn how to model and analyze WLAN traffic using industry standard tools.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5220 and CYBR 5220

**Requisites:** Requires prerequisite course of ECEN 3810 or APPM 3570 or MATH 4510 (minimum grade D-).

**Recommended:** Prerequisite CYBR 5430.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5126 (3) Computational Optical Imaging**

Covers the fundamentals of computational optical imaging modalities, namely systems in which the hardware (optics, sensors, illumination) is designed in conjunction with algorithms (implemented optically, electronically and via software) to deliver information about a scene. Students learn the analysis and design of modern imaging systems. Covers a variety of applications including biomedical imaging, nanoscopy, photography and space imaging.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**ECEN 5133 (3) Fundamentals of Computer Security**

Practice thinking like an attacker by exploring several modern computer security attacks and defenses through hands-on programming projects. Topics include applied cryptography (encryption, authentication), web security (XSS, CSRF, SQL Injection), network security (TLS, MITM attacks), application security (shell injection, buffer overflows), and other current events and trends (government surveillance, botnets, cryptocurrencies).

**Grading Basis:** Letter Grade

**ECEN 5134 (3) Electromagnetic Radiation and Antennas**

This course is introduction to antenna theory and antenna applications in applied electromagnetics. Elements of electromagnetic theory are first reviewed through the discussion of fundamental antenna parameters. Topics such as input impedance, radiation pattern, gain, radar cross section, near- and far-field, antenna temperature, and others are discussed first. The theory of operation of electric and magnetic dipoles, small and large dipoles, monopoles, and loops, as well as impact of different grounds on their parameters are discussed next. Other antennas such as bicones, helices, Yagi-Uda, microstrip patches, horns, reflectors, slots, spirals, log-periodics, etc. are also discussed.

The fundamentals of array theory inclusive of linear, planar and circular topologies, coupling, beamforming, as well as elements of array synthesis are also discussed. Students will be exposed to the commercial software tools used to design antennas and will work individually or in teams to accomplish different project assignments.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5138 (3) Control Systems Analysis**

Analysis and design of continuous time control systems using classical and state space methods. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Topics covered in this course will be investigated in more depth, require external readings, additional homework will be assigned, and the exams will be more difficult.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4138 MCEN 4138 or MCEN 5138

**Requisites:** Restricted to graduate students in Electrical Engineering (EEEN) or in Electrical/Computer Engineering (ECEN) or to Electrical or Electrical/Computer Engineering BS/MS Concurrent degree students or to Graduate Certificate Engineering (CRTGE) students.

**Recommended:** Prerequisite ECEN 3300.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 5139 (3) Computer-Aided Verification**

Covers theoretical and practical aspects of verification of finite-state systems (hardware) and infinite-state systems (programs). Model checking: temporal logics, explicit-state and symbolic search, BDDs. Constraint solvers: SAT solvers, decision procedures. Program verification: invariants, partial vs. total correctness, abstraction. Department enforced requisite: general proficiency in discrete mathematics and programming.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5135

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Recommended:** Prerequisite CSCI 2824.

**Additional Information:** Departmental Category: VLSI CAD Methods

**ECEN 5154 (3) Computational Electromagnetics**

This course is introduction to the frequency domain methods used in computational electromagnetics (CEM) for solving complex radio-frequency (RF) problems. The course starts with the review of electromagnetic theory and mathematical concepts used in CEM, followed by the introduction to the partial differential and integral equation based methods. Specifically, the fundamentals behind the finite difference method, finite element method, and method of moments are discussed and implemented to solve problems such as shielded microstrip line, charge distribution on metallic objects, waveguide modes, wire antennas, etc. Students will work independently and in teams to develop their own codes to solve given boundary value problems. The implementation of different methods in commercial software tools is continuously emphasized. An understanding of electrostatics and electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5156 (3) Physical Optics**

Covers the application of Maxwell's equations to optical wave propagation in free space and in media. Topics include polarization, dispersion, geometrical optics, interference, partial coherence, and diffraction.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ECEN 3410.

**Additional Information:** Departmental Category: Optics

**ECEN 5164 (3) Electromagnetic Metamaterials**

Enables students to design engineered structures to realize materials with desired electromagnetic properties that are difficult or impossible to achieve using conventional materials. Exact and approximate techniques are explored to develop an intuitive understanding of the electromagnetic response of these structures.

**Recommended:** Prerequisite ECEN 3410 (EM Waves and Transmissions) or equivalent course in fundamental electromagnetic theory.

**ECEN 5224 (3) High Speed Digital Design**

Covers fundamentals of high-speed properties of logic gates, measurement techniques, transmission lines, ground planes and layer stacking, terminations, vias, power systems, connectors, ribbon cables, clock distribution and clock oscillators.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4224

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5244 (3) Stochastic / Environmental Signal Processing**

Provides a baseline understanding for research and development in signal processing and analytics for environmental and other data-intensive applications. Topics include parameter estimation, transforms, linear and nonlinear estimation, data assimilation and detection. Applications include numerical weather prediction, GNSS sensing, ionospheric sounding, radar, radiometry, surveillance, target detection and tracking. Previous coursework in linear systems and electromagnetic waves recommended.

**Grading Basis:** Letter Grade

**ECEN 5253 (3) Datacenter Scale Computing - Methods, Systems and Techniques**

Covers the primary problem solving strategies, methods and tools needed for data-intensive programs using large collections of computers typically called "warehouse scale" or "data-center scale" computers. Examines methods and algorithms for processing data-intensive applications, methods for deploying and managing large collections of computers in an on-demand infrastructure and issues of large-scale computer system design.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 4253 and CSPB 4253 and CSCI 5253

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite CSCI 5273 or ECEN 5273.

**ECEN 5254 (3) Remote Sensing Signals and Systems**

Examines passive and active techniques for remote sensing with emphasis on fundamental noise and detection issues from radio to optical frequencies. Emphasis is placed on electromagnetic wave detection, statistical signal and noise analysis, remote sensing system architecture, and hardware for remote sensing systems. Systems studied include radiometers, radars (real and synthetic aperture), interferometers, and lidars. Applications to detection and surveillance, Earth remote sensing, astronomy, and imaging systems are covered.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5264 (3) Electromagnetic Absorption, Scattering, and Propagation**

Electromagnetic waves in communication, navigation, and remote sensing systems from radio to optical frequencies, including propagation in deterministic and random media. Topics include absorption and refraction by gases, discrete scattering by precipitation, clouds, and aerosols, continuous scattering by refractivity fluctuations, earth-space propagation and Faraday rotation in plasmas, and radiative transfer theory.

**Recommended:** Prerequisites ECEN 3400 and ECEN 3410.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5273 (3) Network Systems**

Focuses on design and implementation of network programs and systems, including topics in network protocols, architectures, client-server computing, software-driven networking, and other contemporary network hardware-software system design and programming techniques. Familiarity with C and Unix is required.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5273

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5295 (3) Foundations of Quantum Hardware**

Introduces students to the principles and operation of quantum hardware. In this course you will learn how to describe many different physical systems (trapped ions, superconducting circuits, and optical systems) mathematically. This will allow you to model quantum sensors, communication systems and computing hardware.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4295

**ECEN 5313 (3) Concurrent Programming**

Introduces the theory and practice of multicore programming. The first part of the course presents foundations of concurrent programming: mutual exclusion, wait-free and lock-free synchronization, spin locks, monitors, memory consistency models. The second part presents a sequence of concurrent data structures and techniques used in their implementations (coarse-grained, fine-grained, optimistic and lock-free synchronization).

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5313 and ECEN 4313 and CSCI 4313

**Requisites:** Requires prerequisite courses of CSCI 2270 and ECEN 2360 or CSCI 2400 (minimum grade C). Restricted to graduate students only.

**Recommended:** Prerequisite ECEN 3593.

**ECEN 5322 (3) Data and Network Science**

The course covers the theory and design of algorithms that are used to model, analyze, and extract information from large scale datasets and networks. The course includes a project.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4322

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5341 (3) Bioelectromagnetics**

Effects of electric and magnetic fields on biological systems are described with applications to therapy and safety. The complexity of biological systems is described to provide a better understanding of the distribution of fields inside the body. Risk analysis is also introduced.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4341

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Bioengineering

**ECEN 5345 (3) Introduction to Solid State Physics**

Provides an introduction to the electronic, photonic and phononic properties of solid state materials and devices. Covers optical constants, free electron gas, plasmons, energy bands, semiconductors and doping, excitons, quantum wells, phonons and electrooptical effects. Makes use of quantum mechanical methods. Department enforced prerequisite: basic quantum mechanics.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Nanostructures and Devices

**ECEN 5355 (3) Principles of Electronic Devices 1**

Relates performance and limitations of solid state devices to their structures and technology. Examines semiconductor physics and technology. Includes Pn-junction, Mos, and optoelectronic devices. For both advance circuit and device engineers.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ECEN 3320.

**Additional Information:** Departmental Category: Nanostructures and Devices

**ECEN 5395 (3) Organic Electronic Materials and Devices**

Covers the materials and physics principles of organic electronic devices, including organic light emitting diodes (OLEDs), photovoltaics (OPVs), field effect transistors (OFETs), electrochemical transistors (OECTs), and bioelectronic and neuromorphic devices. The molecular, structural, and electronic properties of organic semiconductors are introduced, and the architectures and operating principles of the devices are then taught. Assignments will require computational solutions and simulations. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4395

**Recommended:** Prerequisite ECEN 5345.

**ECEN 5407 (3) Renewable Energy and the Future Power Grid**

This course will begin with an introduction to the power grid including planning and operations for the transmission and distribution level power grid. The course will reflect that while many of the solutions to the integration of variable generation are technical in nature, policy and economics play a large role in the changes that are occurring within the power system. After examining the technological specifications of the most important variable generation sources (wind power, solar photovoltaics, and solar thermal power), as well as traditional power generation sources, other aspects of power system planning and operations in the future power grid will be examined in detail.

**Requisites:** Restricted to students in College of Engineering and Applied Science (ENGR) only.

**Grading Basis:** Letter Grade

**ECEN 5414 (3) Essential Principles of Signal Integrity**

Designing a robust and cost-effective product is about following a process that helps apply your engineering intuition to balance cost and design tradeoffs specific to your product. This class introduces essential principles of signal integrity, including principles of transmission lines, reflections, inductance, ground bounce, differential pairs, losses, terminations, routing, discontinuities, impedance, PDN design and EMC with respect to optimized design.

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN3400.

**ECEN 5417 (3) Power System Analysis**

This course covers the basics of power system analysis techniques. Students will be introduced to the concepts behind the fundamental principles of traditional bulk power systems. The difference between single and three phase powers will be discussed. Students will learn how to model bulk power system components and the per unit system. Understanding the flow of power in the system will be examined in detail as students will learn about and apply both AC and DC powerflow formulations.

**Recommended:** Corequisite ECEN 5407.

**Grading Basis:** Letter Grade

**ECEN 5423 (3) Chaotic Dynamics**

Explores chaotic dynamics theoretically and through computer simulations. Covers the standard computational and analytical tools used in nonlinear dynamics and concludes with an overview of leading-edge chaos research. Topics include time and phase-space dynamics, surfaces of section, bifurcation diagrams, fractal dimension and Lyapunov exponents.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4423 and CSCI 4446 and CSCI 5446

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5424 (3) High Speed Channel Design for Signal Integrity**

Designing a robust and cost-effective product is about following a process that helps apply your engineering intuition to balance cost and design tradeoffs specific to your product. This class introduces design principles for advanced gigabit channel design. Four primary interconnect problems are identified and material and technology solutions to reduce these problems to acceptable levels are explored.

**Requisites:** Requires prerequisite course of ECEN 5414 (minimum grade C).

**ECEN 5427 (3) Power System Planning & Operations**

This course will focus on bulk power system planning and operations, with special emphasis on systems with high variable renewable energy penetrations. Electricity markets will also be presented, and the differences with vertically integrated utilities will be discussed. Students will develop an understanding of electricity market dynamics in one of the course projects by participating in an electricity market game. The application of optimization problems in bulk power system operations will be discussed and applied by the students in another course project. They will develop a production cost model to simulate bulk power system operations of a test system under different scenarios.

**Requisites:** Requires prerequisite course ECEN 5407 (minimum grade B-).

**Recommended:** Prerequisite ECEN 5417.

**Grading Basis:** Letter Grade

**ECEN 5434 (3) S-Parameters for Signal Integrity in High Speed Digital Engineering**

Designing a robust and cost-effective product is about following a process that helps apply your engineering intuition to balance cost and design tradeoffs specific to your product. This class introduces design principles obtained by understanding S-Parameter results for complex PCB structures. Single-ended and Differential Transmission lines are analyzed and four common S-Parameter patterns are identified.

**Requisites:** Requires prerequisite ECEN 5414 ECEN minimum grade C-.

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

**ECEN 5437 (3) Distribution System Analysis**

Fundamental aspects of the analysis of power distributions systems, including the traditional distribution grid, loads, components, topologies, operational aspects, and power flow analysis. Includes how the distribution system is changing with the introduction of distributed energy resources.

**Requisites:** Requires corequisite course of ECEN 5407.

**Recommended:** Corequisite ECEN 5417.

**Grading Basis:** Letter Grade

**ECEN 5444 (3) Electromagnetic Compatibility (EMC) for High-Speed Digital Engineering**

Understanding and applying the theoretical principles of electromagnetics to high speed digital engineering with respect to electromagnetic compatibility (EMC). Faster data rates and shorter rise times make signal integrity in high-speed digital engineering (HSDE) increasingly difficult. Signal distortion has adverse effects on EMC. This course covers understanding the radiation mechanisms and susceptibility of PCB circuits in HSDE.

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

**ECEN 5447 (3) Power System Dynamics with Renewable Energy**

To introduce the current and future electrical power systems dynamics coupled with inverter based renewable generators. Fundamentals of renewable generators dynamic models, power system dynamics will be introduced. Previously offered as a special topics course.

**Recommended:** Prerequisites ECEN 5417: Power systems analysis, ECEN 5407: Renewable Energy and the Future Power Grid, and graduate standing in the College of Engineering and Applied Science.

**ECEN 5448 (3) Advanced Linear Systems**

Offers a state space approach to analysis and synthesis of linear systems, state transition matrix, controllability and observability, system transformation, minimal realization, and analysis and synthesis of multi-input and multi-output systems.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5448

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ECEN 3300 and ECEN 4138.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 5457 (3) Energy Systems Optimization**

Covers basic elements of power system modeling; optimization tasks at the transmission level such as economic dispatch and DC optimal power flow (OPF); and essential techniques for formulating linear, second-order cone, and semidefinite programming approximations to AC OPF problems for transmission and distribution systems. Distributed optimization approaches are covered and tied to future architectural frameworks for smart power systems. Previously offered as a special topics course.

**Recommended:** graduate standing in the College of Engineering and Applied Science.

**ECEN 5458 (3) Sampled Data and Digital Control Systems**

Provides an analysis and synthesis of discrete-time systems. Studies sampling theorem and sampling process characterization, z-transform theory and z-transferfunction, and stability theory. Involves data converters (A/D and D/A), dead-beat design, and digital controller design.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ECEN 3300 and ECEN 4138.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 5467 (3) Data Analytics and Data-Driven Decision Making for Modern Power and Energy Systems**

Focuses on modern power and energy systems with high penetration of distributed energy resources (solar, batteries, electrical vehicles). Analytical methods for inference and decision making in such systems will be covered, including state estimation, forecasting, and optimal control. The emphasis is on data-driven methods, rooted in machine-learning techniques, such as kernel-based regression and reinforcement learning.

**Recommended:** Prerequisite ECEN 5407 and graduate standing in the College of Engineering and Applied Science.

**ECEN 5478 (3) Online Convex Optimization and Learning**

Covers basics of convex optimization, online learning, time-varying optimization, online first-order methods, learning problems over networks, zeroth-order methods, bandit optimization, projection-free methods, distributed methods for online convex optimization. Application domains considered in the course include Machine Learning, Signal Processing, and Data-driven Control. Specific application examples include the Internet of Things, recommendation systems, power systems, sensor networks, and transportation systems. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ECEN 5448.

**ECEN 5488 (3) Geometric Control Theory**

Introduce geometric approaches to study dynamical control systems over manifolds. Cover fundamental control-theoretical results, such as controllability, observability, feedback stabilizability, symmetries and group actions, that are beyond linear control systems. Establish connections between control theory and mathematics, especially topology, differential geometry, Lie groups and Lie algebras. Final project focuses on engineering applications related to students' own research interests.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5488

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites a solid foundation in Linear Algebra and ECEN 4138/5138 and ECEN 5448.

**ECEN 5498 (3) Stochastic Control Theory**

Introduce a toolbox for dealing with stochastic control systems. Cover topics such as stochastic calculus, linear and nonlinear filtering, and dynamic programming. Discuss system theoretic issues and derive optimal control laws for a variety of stochastic control problems, including, e.g., the separation principle for Linear-quadratic-Gaussian problems. Final project focuses on engineering applications related to students' own research interests.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5498

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites a solid foundation in Probability Theory and ECEN 4138/5138, ECEN 5448 and ECEN 5612.

**ECEN 5514 (3) Principles of Electromagnetics for High-Speed Digital Engineering**

Teaches understanding and application of the theoretical principals of electromagnetics to printed circuit board design. Students learn to apply advanced concepts related to Maxwell's equations for SI and PI and High-Speed applications. Some topics covered include: skin effect, surface roughness, non-uniform dielectric constant, coupling, reflection, and losses; boundary conditions and boundary value problems; displacement and conduction currents.

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

**ECEN 5517 (3) Power Electronics and Photovoltaic Power Systems Laboratory**

Focuses on analysis, modeling, design and testing of electrical energy processing systems in a practical laboratory setting. Studies power electronics converters for efficient utilization of available energy sources, including solar panels and utility. Experimental projects involve design, fabrication and testing of a solar power system.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4517

**Requisites:** Requires prerequisite course of ECEN 5797 (minimum grade C-).

**Additional Information:** Departmental Category: Power

**ECEN 5523 (3) Compiler Construction**

Introduces the principles and techniques for compiling high-level programming languages to assembly code. Topics include parsing, instruction selection, register allocation, and compiling high-level features such as polymorphism, first-class functions, and objects. Students build a complete compiler for a simple language.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4553 and CSCI 4555 and CSCI 5525

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5524 (3) Principles of Computational Electromagnetics for Signal and Power Integrity**

Introduces students to practical computational electromagnetics (CEM) and numerical methods concepts necessary for solving SI/PI problems. Fundamentals behind finite difference, finite element, and method of moments are studied to solve problems like a microstrip line and others related to SI-PI applications. Students will study the concepts of accuracy, stability, convergence and boundary conditions as they apply to commercial EM tools.

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

**ECEN 5527 (3) Power Electronics Design Laboratory**

Create, build, and debug an original design of a power converter to meet given a specification, project schedule, and related requirements. Lectures provide supporting information. Compliance to the specification is shown through a formal test report and demonstration to an instructor.

**Requisites:** Requires prerequisite courses of ECEN 5517 and ECEN 5797 (all minimum grade B-). Restricted to Electrical and Computer Engineering (ECEN) graduate students with Power Electronics (PPE) subplan only.

**Grading Basis:** Letter Grade

**ECEN 5532 (3) Digital Signal Processing Laboratory**

Develops experience in code development, debugging and testing of real-time digital signal processing algorithms using dedicated hardware. Applications include filtering, signal synthesis, audio special effects and frequency domain techniques based on the Fast Fourier Transform.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4532

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5533 (3) Fundamental Concepts of Programming Languages**

Considers concepts common to a variety of programming languages—how they are described (both formally and informally) and how they are implemented. Provides a firm basis for comprehending new languages and gives insight into the relationship between languages and machines.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5535

**Requisites:** Requires prerequisite course CSCI 3155 (minimum grade D-).

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5534 (3) Signal Integrity Measurements for High Speed Digital Engineering**

Taking accurate measurements are the anchor to reality in all HSDE analysis. This course introduces the three important high speed measurement instruments; the VNA, the TDR and the high-speed oscilloscope. Measurements above 200 MHz bandwidth require special considerations. Topics covered include S-parameter analysis of interconnects, de-embedding, probing methods, measurement-simulation correlation and building circuit topology models from S-parameters.

**Requisites:** Requires prerequisites ECEN 5224 and ECEN 5730 (all minimum grade C-).

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

**ECEN 5543 (3) Software Engineering of Standalone Programs**

Applies engineering principles to phases of software product development, project planning, requirements definition, design, design patterns, validation and maintenance. Emphasizes practical methods for communicating and verifying definitions and designs: prototyping, inspections, and modeling (primarily UML). Includes relation to embedded systems and object-oriented design.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5548

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites CSCI 1300 and CSCI 2270 (minimum grade C-).

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5544 (3) EM Signal Modeling for HSDE using Ansys HFSS and Q3D**

Doing high speed digital engineering using HFSS from Ansys. This is a one semester hands-on capstone design course for the high-speed digital engineering professional master's program. Students will deepen their understanding of EM signal modeling for HSDE applications while learning how to correctly use HFSS to do a variety of high-speed designs for PCBs.

**Requisites:** Requires prerequisite course of ECEN 5524 (minimum grade C-).

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

**ECEN 5554 (3) Designing PCB Memory Systems using Keysight ADS**

Doing high speed digital engineering using ADS from Keysight. This is a one semester hands-on capstone design course for the high-speed digital engineering professional master's program. Students will deepen their understanding of EM signal modeling for HSDE PCB memory applications while learning how to correctly use ADS to do a variety of high-speed memory designs for PCBs.

**Requisites:** Requires prerequisite course of ECEN 5524 (minimum grade C-).

**Recommended:** Prerequisite students are expected to have completed an electromagnetics course during their undergraduate curriculum; in the CU curriculum it would be ECEN 3400.

**ECEN 5555 (3) Principles of Energy Systems and Devices**

Develops principles underlying electronic, optical and thermal devices, materials and nanostructures for renewable energy. Provides a foundation in statistical thermodynamics and uses it to analyze the operation and efficiency limits of devices for photovoltaics, energy storage (batteries & ultra-capacitors), chemical conversion (fuel cells and engines), solid state lighting, heat pumps, cooling and potentially harvesting zero-point energy from the vacuum.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4555

**Requisites:** Restricted to students with 57-180 credits (Juniors or Seniors) or Graduate students only.

**Additional Information:** Departmental Category: Nanostructures and Devices

**ECEN 5565 (3) Advanced Network Systems**

Provides an advanced study of network architecture, across the end hosts, the network elements, and the people and systems that manage the network. The course provides the foundation for modern network systems, beyond the basic understanding of the OSI layers, and into the system which make networks work.

**Requisites:** Requires prerequisite of CSCI 4273 or CSCI 5273 or ECEN 5273 (minimum grade C). Restricted to graduate students in the College of Engineering.

**Grading Basis:** Letter Grade

**ECEN 5573 (3) Advanced Operating Systems**

Intended to create a foundation for operating systems research or advanced professional practice. Examines the design and implementation of a number of research and commercial operating systems and their components, system organization and structure, threads, communication and synchronization, virtual memory, distribution, file systems, security and authentication, availability and Internet services.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5573

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5590 (3) Computer Organization**

Studies computer design at the microarchitecture level. Discusses instruction set architecture design, arithmetic and logic unit design, control logic, memory design and caches, simple pipelining, I/O and peripheral devices. Briefly covers aspects of modern computer architecture, such as multicore processors and hardware security.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3593 or CSCI 3593

**ECEN 5592 (3) Modern Signal Processing**

Presents a mathematical tour of modern signal processing focusing on sparse signal representations and their applications. Extends classical Fourier transform and traditional digital signal processing techniques to enable various types of computational harmonic analysis. Covers time-frequency and wavelet analysis, filter banks, nonlinear approximation of functions, compression, signal restoration, compressive sensing, and convolutional neural networks.

**Recommended:** Prerequisites familiarity with Fourier transforms, z-transforms, filters, linear algebra, bases, norms, inner products, eigendecompositions, singular value decomposition (SVD) and MATLAB.

**ECEN 5593 (3) Advanced Computer Architecture**

Provides a broad-scope treatment of important concepts in the design and implementation of high-performance computer systems. Discusses important issues in the pipelining of a processor, out-of-order instruction issue and superscalar designs, design of cache memory systems and architectural features required for multicore processor designs. Also studies current and historically important computer architectures, including hardware security concepts.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5593 and ECEN 4693

**Requisites:** Campus section restricted to graduate students in EEEN or BS/Professional MS concurrent degree students with BS portion in EEEN or ECEN.

**Recommended:** Prerequisite ECEN 3593, ECEN 5090.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5603 (3) Software Project Management**

Presents topics and techniques critical to the management of software product development, including estimating, planning, quality, tracking, reporting, team organization, people management and legal issues. Gives special attention to problems unique to software projects.

**Requisites:** Requires prerequisite courses ECEN 4583 and ECEN 5543 and CSCI 4318 (all minimum grade D-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5606 (3) Optics Laboratory**

Provides advanced training in experimental optics. Consists of optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers, and holograms and experimentation of fiber optics and Fourier optics. Department enforced prerequisite: undergraduate optics course (e.g. PHYS 4510).

**Equivalent - Duplicate Degree Credit Not Granted:** PHYS 5606

**Additional Information:** Departmental Category: Optics

**ECEN 5607 (3) Power Electronics for Electrified Transportation**

Covers analysis, modeling, control, simulations, and design of electric-drive vehicles and the charging infrastructure. Vehicle system architectures and dynamics are used to determine the requirements and to validate the performance of electric-vehicle drivetrain subsystems.

Analysis, modeling, and design of the subsystems are addressed, including battery systems, battery management electronics, dc-dc converters, dc-ac inverters, motor drives, and chargers.

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**ECEN 5612 (3) Random Processes for Engineers**

Deals with random time-varying functions and is therefore useful in the broad range of applications where they occur. Topics include review of probability, convergence of random sequences, random vectors, minimum mean-square error estimation, basic concepts of random processes, Markov processes, Poisson processes, Gaussian processes, linear systems with random inputs, and Wiener filtering. Applications range from communications, communication networks, and signal processing to random vibration/stress analysis, mathematical finance, physics, etc.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5613 (3) Embedded System Design**

Introduces system hardware and firmware design for embedded applications. Students independently design and develop a hardware platform encompassing a microcontroller and peripherals. Firmware is developed in C and assembly. A significant final project is designed, developed, documented and presented. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEERP.

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5616 (3) Optoelectric System Design**

Examines optical components and electro-optic devices with the goal of integrating into well design optoelectronic systems. Sample systems include optical storage, zoom lenses and telescopes.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4616

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Optics

**ECEN 5622 (3) Information Theory and Coding**

Covers fundamental limits of data compression, reliable transmission of information and information storage. Topics include information measures, typicality, entropy rates of information sources, limits and algorithms for lossless data compression, mutual information, and limits of information transmission over noisy wired and wireless links. Optional topics include lossy data compression, limits of information transmission in multiple-access and broadcast networks, and limits and algorithms for information storage.

**Requisites:** Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5623 (3) Real-Time Embedded Systems**

Design and build a microprocessor-based embedded system application requiring integration of sensor/actuator devices, a real-time operating system and application firmware and software. Real-time rate monotonic theory and embedded architecture are covered. Prioritized for EEEN graduate students with ESE (Embedded Systems Engineering) sub-plan.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEERP.

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5626 (3) Active Optical Devices**

Analysis of active optical devices such as semiconductor laser, detector and flat panel display by clearly defining and interconnecting the fundamental physical mechanism, device design and operating principles and device performance.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ECEN 5355.

**Additional Information:** Departmental Category: Optics

**ECEN 5632 (3) Theory and Application of Digital Filtering**

Digital signal processing and its applications are of interest to a wide variety of scientists and engineers. The course covers such topics as characterization of linear discrete-time circuits by unit pulse response, transfer functions, and difference equations, use of z-transforms and Fourier analysis, discrete Fourier transform and fast algorithms (FFT), design of finite and infinite impulse response filters, frequency transformations, study of optimized filters for deterministic signals.

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEERP) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5634 (3) Microwave and RF Laboratory**

This course is a hands-on introduction to RF and microwave topics, from fundamentals including vector network analyzer (VNA) calibration and operation, power measurements, and antenna characterization, to system-level topics such as RADAR systems and superheterodyne links. Students work in small groups on weekly experiments based on both coaxial and waveguide setups. An understanding of electromagnetic waves (such as covered in ECEN 3400 and ECEN 3410) is assumed.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4634

**Requisites:** Restricted to any graduate students or Electrical/Computer Engineering or Electrical Engineering Concurrent Degree majors only.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 5638 (3) Control Systems Laboratory**

Provides experience in control system design and analysis, using both real hardware and computer simulation. Covers the entire control system design cycle: modeling the system, synthesizing a controller, conducting simulations, analyzing the design to suggest modifications and improvements, and implementing the design for actual testing.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4638

**Requisites:** Requires prerequisite course of ECEN/MCEN 4138/5138 (minimum grade D-). Restricted to graduate students only.

**ECEN 5645 (3) Introduction to Optical Electronics**

Introduces lasers, Gaussian optics, modulators, nonlinear optics, optical detectors, and other related devices.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Nanostructures and Devices

**ECEN 5652 (3) Detection and Extraction of Signals from Noise**

Introduces detection, estimation, and related algorithms. Topics in detection include simple/composite hypothesis testing, repeated observations and asymptotic performance and sequential detection. Topics in estimation include Bayesian estimation including minimum mean-square estimation and non-random parameter estimation. Topics in algorithms vary. Examples include algorithms for state estimation and smoothing in Hidden Gauss-Markov models and the expectation-maximization algorithm. Applications include communications, radar/sonar/geophysical signal processing, image analysis, authentication, etc.

**Requisites:** Restricted to Electrical/Computer Engineering, Computer Science, Applied Math or Physics graduate students only.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5672 (3) Digital Image Processing**

Course objective is to present the fundamental techniques available for image representation and compression (e.g., wavelets), filtering (e.g., Wiener and nonlinear filter), and segmentation (e.g., anisotropic diffusion).

**Requisites:** Requires prerequisite course ECEN 5632 (minimum grade C-).

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5673 (3) Distributed Systems**

Examines systems that span multiple autonomous computers. Topics include system structuring techniques, scalability, heterogeneity, fault tolerance, load sharing, distributed file and information systems, naming, directory services, resource discovery, resource and network management, security, privacy, ethics and social issues.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5673

**Recommended:** Prerequisite CSCI 5573 or a course in computer networks.

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5678 (3) Control of Multi-agent Systems**

Covers basics of matrix theory and graph theory; distributed averaging and consensus methods on graphs; parallel computation of fixed points; basics of optimization; parallel and distributed optimization methods over graphs; convergence analysis. The techniques and methodologies presented in the course are introduced through application setups including Internet of Things, power and energy systems, sensor networks, transportation systems, and social networks. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ECEN 5448 and courses in convex optimization.

**ECEN 5682 (3) Theory and Practice of Error Control Codes**

Introduces error control coding techniques for reliable transmission of digital data over noisy channels. Topics include algebraic characterizations of cyclic codes, convolutional codes, modern graph codes, decoding algorithms for block codes, Viterbi algorithm and iterative decoding on graphs. Applications include modern digital communication and storage systems including deep space communications, satellite broadcasting, cellular networks, and optical disk storage.

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5692 (3) Principles of Digital Communication**

Introduces fundamental principles of efficient and reliable transmission of information used in wired and wireless digital communication systems including cable modems, smart phones/tablets, cellular networks, local area (wi-fi) networks, and deep-space communications. Topics include bandwidth and power constraints, digital modulation methods, optimum transmitter and receiver design principles, error rate analysis, channel coding potential in wired/wireless media, trellis coded modulation, and equalization.

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Digital Signal Processing Communications

**ECEN 5696 (3) Fourier Optics**

Introduces a system level approach to the analysis and design of optical systems. Topics include holography, Fourier transform properties of lenses, two-dimensional convolution and correlation functions, spatial filtering and optical computing techniques. Also covers coherent and incoherent imaging techniques, tomography, and synthetic aperture imaging.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites ECEN 3300 and ECEN 3410.

**Additional Information:** Departmental Category: Optics

**ECEN 5712 (3) Machine Learning for Engineers**

Prepares students to apply/improve machine learning methods for engineering applications and to perform related research. Covers popular algorithms and theories for learning from data, e.g., supervised learning, unsupervised learning, online learning, neural networks, VC-dimension, PAC learning theory. Explores the connections with detection/estimation theory and information theory. The course project focuses on engineering applications related to students' majors.

**Recommended:** Prerequisites ECEN 5612, 5652 and 5622.

**ECEN 5713 (3) Advanced Embedded Software Development**

Building on fundamentals taught in ECEN 5813 PES, this course teaches more advanced programming principles for embedded systems that are implemented with the use of an embedded operating system. Topics include Linux kernel space and user programming, driver design, multi-threaded programming, and operating systems fundamentals, software design patterns, sound development methods and practices, and use of debugging and performance tools to create applications and enhance operating systems' services embedded system prototypes and products.

**Requisites:** Requires prerequisite course of ECEN 5813 (minimum grade D-).

**Recommended:** Prerequisites This course assumes students have direct coding and tool experience including C-programming Bare Metal Firmware Design, Compilation with GCC & Build Systems with GNU Make, Git, Linux command line operations, shell environment, compilation, Lab instruments, DVM, Logic Analyzer, Oscilloscope or demonstration of portable, maintainable, and testable software design.

**ECEN 5720 (1) Practical Printed Circuit Board Design Accelerator**

This course introduces students to the most important skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will learn the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with a custom board design project. A commercial EDA tool widely used in the electronics industry will be used for the project. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4730 or ECEN 5730 ECEN 4720

**Recommended:** Prerequisites ECEN 2250 and ECEN 2260 and ECEN 2270.

**ECEN 5730 (3) Practical Printed Circuit Board Design and Manufacture**

This course prepares students with all skills needed to convert a back-of-the-napkin circuit sketch into a working widget with first time success. Students will master the seven steps in every board project: planning, selecting components, schematic entry, layout, assembly, bring up and debug, and documentation. This process will be exercised with three different board design projects with increasing challenge. A commercial EDA tool widely used in the electronics industry will be used for all projects. Previously offered as a special topics course. Degree credit not offered for this course and ECEN 4720 or ECEN 5720 or ECEN 3730.

**Requisites:** Restricted to CU Boulder ECEE graduate students in Academic subplans ESE, HSD or C-EEENP or C-ECENEEEP only

**Recommended:** Prerequisites ECEN 2250 and ECEN 2260 and ECEN 2270.

**ECEN 5737 (3) Adjustable-Speed AC Drives**

Presents unified treatment of complete electrical drive systems: mechanical load, electrical machine, power converter, and control equipment. Emphasizes induction, synchronous, and permanent-magnet drives. Uses simulation programs (e.g., SPICE, Finite Element/Difference Program) to simulate drive system components (e.g., gating, inverter, electric machine).

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Recommended:** Prerequisite ECEN 3170.

**Additional Information:** Departmental Category: Power

**ECEN 5738 (3) Theory of Nonlinear Systems**

Nonlinear systems and control. Introduction to nonlinear phenomena: multiple equilibria, limit cycles, bifurcations, complex dynamical behavior. Planar dynamical systems, analysis using phase plane techniques. Input-output analysis and stability. Passivity. Lyapunov stability theory. Feedback linearization. Exploration of examples and applications. Formerly ECEN 7438.

**Requisites:** Requires prerequisite course of ECEN 5448 (minimum grade C-). Restricted to graduate students only.

**Recommended:** Prerequisite knowledge in differential equations.

**Additional Information:** Departmental Category: Dynamical Systems and Control

**ECEN 5752 (3) Communication Laboratory**

Analysis and design of realistic communication signals in a modern digital signal processing environment. Covers both analog and digital communication signals with and without noise and distortion. Pulse amplitude modulation is used initially at baseband and then combined with amplitude and phase/frequency modulation to produce the kind of bandpass signals that are used in cell phones and wireless data networks.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4752

**Requisites:** Requires prerequisite course of ECEN 4242 (minimum grade C-). Restricted to College of Engineering majors only.

**ECEN 5753 (3) Computer Performance Modeling**

Presents a broad range of system modeling techniques, emphasizing applications to computer systems. Covers stochastic processes, queuing network models, stochastic Petri nets and simulation (including parallel processing techniques). Also requires second-semester calculus.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4753 and CSCI 4753 and CSCI 5753

**Additional Information:** Departmental Category: Computer and Digital Systems

**ECEN 5763 (3) Embedded Computer Vision**

Introduces students to machine vision and machine learning methods used in automation, autopilots and security and inspection systems. Embedded and automation topics include implementation of algorithms with FPGA or GP-GPU embedded real time co-processing for autopilots (intelligent transportation), general automation and security including methods for detection, classification, recognition of targets for inspection, surveillance, search and rescue, and machine vision navigation applications.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5773 (3) Developing the Industrial Internet of Things**

This course goes beyond consumer IoT hype to emphasize a much greater space for potential embedded system applications and growth: The Industrial Internet of Things (IIoT), also known as Industry 4.0. Cisco's CEO stated: "IoT overall is a \$19 Trillion market. IIoT is a significant subset including digital oilfield, advanced manufacturing, power grid automation, and smart cities". The course examines emerging markets, technology trends, applications and skills required for exploring career opportunities in this space.

**Requisites:** Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

**Recommended:** Prerequisites ECEN 5613, ECEN 5823, ECEN 5053, and ECEN 5133.

**ECEN 5783 (3) Embedded Interface Design**

This course deeply explores interface design approaches and architectures for creating embedded system prototypes and products. For both machine and user interfaces, we will examine best practices for the interface design process, including considerations of characteristics of the information to be transferred between devices or between a device and a user. Projects leverage the now standard Raspberry Pi 3 single-board computer (SBC), providing a strong foundation for exploring many elements of interface design.

**Requisites:** Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

**Recommended:** Prerequisites knowledge of programming, particularly Python, ECEN 2120, ECEN 2350, ECEN 1030, ECEN 1310, CSCI 1300.

**ECEN 5793 (3) Secure Computer Architecture**

Explore cutting-edge secure architectures that look to protect the system from the hardware up. This course covers advanced topics in security with an emphasis on computer architecture on both the attack and defense sides. Discussion oriented classes will deepen understanding of weekly technical reading assignments, enhance the ability to analyze technical papers, and help carry out a semester long research project.

**Requisites:** Requires prerequisite or corequisite course of ECEN 5593 (minimum grade D-).

**ECEN 5797 (3) Introduction to Power Electronics**

An introduction to switched-mode converters. Includes steady-state converter modeling and analysis, switch realization, discontinuous conduction mode and transformer-isolated converters. Ac modeling of converters using averaged methods, small-signal transfer functions, feedback loop design and transformer design.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4797

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Power

**ECEN 5803 (3) Mastering Embedded Systems Architecture**

Acquire an understanding of embedded systems architectures for the purpose of creating prototypes or products for a variety of applications. The salient issues in the decision making process will be examined, including trade-offs between hardware and software implementations, processor and operating system selection and IP creation or acquisition. Projects will involve the latest software development and tools and hardware platforms.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5807 (3) Modeling and Control of Power Electronic Systems**

Studies modeling and control topics in power electronics. Averaged switch modeling of converters, computer simulation, ac modeling of the discontinuous conduction mode, the current programmed mode, nulldouble injection techniques in linear circuits, input filter design, and low-harmonic rectifiers.

**Requisites:** Requires prerequisite course of ECEN 5797 (minimum grade C-).

**Additional Information:** Departmental Category: Power

**ECEN 5813 (3) Principles of Embedded Software**

Introduces principles around embedded software elements and software development needed for the Embedded Systems Engineering core curriculum. Student will write C program applications that employ efficient, high performance and robust software design techniques. Topics include bare-metal firmware, c-programming optimization and introductions to underlying embedded architecture. Sound testing and debug practices will be instilled and utilized in several application projects.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5817 (3) Resonant and Soft-Switching Techniques in Power Electronics**

Covers resonant converters and inverters, and soft switching; sinusoidal approximations in analysis of series, parallel, LCC, and other resonant dc-dc and dc-ac converters; state-plane analysis of resonant circuits; switching transitions in hard-switched and soft-switched PWM converters; zero-voltage switching techniques, including resonant, quasi resonant, zero voltage transition, and auxiliary switch circuits.

**Requisites:** Requires prerequisite course of ECEN 5797 (minimum grade C-).

**Additional Information:** Departmental Category: Power

**ECEN 5823 (3) Internet of Things Embedded Firmware**

Acquire firmware development skills to meet low energy and internet connectivity demands of embedded systems. Event-driven firmware techniques will be explored through programming assignments, transitioning to programming an Internet of Things RF Network Protocol such as Bluetooth Low Energy or Thread. The coursework will align with the latest industry firmware and embedded wireless protocol trends.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEEP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5827 (3) Analog IC Design**

Covers the fundamentals of transistor-level analog integrated circuit design. Starting with motivations from application circuits, the course develops principles of dc biasing, device models, amplifier stages, frequency response analysis and feedback and compensation techniques for multi-stage operational amplifiers.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4827

**Requisites:** Restricted to Electrical/Computer Engineering (EEEN) graduate students or Concurrent Degree students in Electrical Engineering (C-EEEN) or Electrical/Computer Engineering (C-ECENEEEN) or to Graduate Certificate Engineering (CRTGE) students.

**Additional Information:** Departmental Category: Power

**ECEN 5828 (3) Hybrid Dynamical Systems: Theory and Applications**

Students will study the basic properties of differential and difference equations and inclusions including: existence of solutions, uniqueness, invariance principles; introduction to basic hybrid systems that combine continuous-time and discrete-time dynamics: automata, switched systems, etc.; Lyapunov theory for hybrid systems; and examples and applications in the areas of optimization, feedback control, machine learning, energy systems, social networks, multi-agent systems, and asynchronous systems. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**ECEN 5830 (3) Special Topics**

Examines a special topic in Electrical, Computer and Energy Engineering.  
**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General

**ECEN 5833 (3) Low Power Embedded Design Techniques**

The course explores through weekly quizzes, assignments, and a course project, low energy hardware design concepts, selecting components to meet reliability goals, radio implementation, power supply design, product design, and system bring up. The programming of the microcontroller or SoC will most likely be  $\zeta$ coding to the metal $\zeta$  to control individual microcontroller peripherals and utilizing them in the most energy efficient ways.

**Requisites:** Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

**Recommended:** Requisites Students should have knowledge of assembly and C programming, digital logic design, and embedded computer architecture, and have had at least one course in each of these subjects, such as ECEN 5813 or ECEN 5823, students should also have experience using a microcontroller Integrated Development Environment (IDE) and its associated tools including its debugger and register views.

**ECEN 5837 (3) Mixed-Signal IC Design Lab**

Software laboratory course extends the concepts developed in ECEN 5827 to full design and layout of mixed analog and digital custom integrated circuits. Assignments explore implementation of analog to digital and digital to analog converters, and final project develops a full custom IC for a target application.

**Requisites:** Requires prerequisite course of ECEN 5827 (minimum grade C-).

**Additional Information:** Departmental Category: Power

**ECEN 5840 (1-6) Independent Study**

Offers an opportunity for students to do independent, creative work at the master's level. Numbered ECEN 5840-5849. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 5853 (3) Embedding Sensors and Motors**

Introduces students to the design of sensors and motors, and methods that integrate them into embedded systems used in consumer and industrial products. Students will learn about sensor technologies and motors through lectures, recorded and online videos, online reading, and through laboratory experiments. Students will build systems that take sensor inputs, and sort, filter and evaluate the resulting data. They will also learn how to use sensor input to measure properties of motors.

**Requisites:** Restricted to students with an Embedded Systems Engineering (ESE) subplan or Electrical Engr-Prof Degree (C-EEENP) or Elec Cmp Elec Eng-Prof Degree (C-ECENEEENP) only.

**Recommended:** Prerequisites ECEN 1400, ECEN 2250, ECEN 2260 and ECEN 2440 or equivalent coursework.

**ECEN 5857 (3) Digital Control for Power Electronics**

Focuses on analysis, modeling and design of digitally controlled power converters. Covers the dynamical discrete-time analysis of power converters, digital compensator design and main nonlinear phenomena due to quantization effects. Addresses the basics of controller autotuning.

**Requisites:** Requires prerequisite course of ECEN 5797 (minimum grade C-).

**ECEN 5863 (3) Programmable Logic Embedded System Design**

Learn to design programmable systems on a chip for the purpose of creating prototypes or products for a variety of applications. Explore complexities, capabilities and trends of Field Programmable Gate Arrays (FPGA) and Complex Programmable Logic Devices (CPLD). Implement synchronization and timing closure in these devices. Projects will involve the latest software and FPGA development tools and hardware platforms.

**Requisites:** Campus section restricted to graduate students in Academic sub-plans ESE or C-EEENP or C-ECENEEENP.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Embedded Systems Engineering

**ECEN 5907 (3) Special Topics**

Special topics class.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**ECEN 5915 (3) Foundations of Quantum Engineering**

Introduces engineers to quantum theory. In this course you will learn how to describe many different physical systems (such as atoms, electrons, light, mechanical oscillators, and tops) mathematically. It also explores different notions of quantumness such as entanglement and non-contextuality. The foundations obtained in this course are important for further study of quantum hardware (sensors), communication, and computing.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 3915

**ECEN 5925 (3) Foundations of Quantum Hardware**

Introduces students to the principles and operation of quantum hardware. In this course you will learn how to describe many different physical systems (trapped ions, superconducting circuits, and optical systems) mathematically. This will allow you to model quantum sensors, communication systems and computing hardware.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4295

**ECEN 5930 (1-3) Industry Internship**

This class provides a structure for ECEE graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in ECEE graduate programs.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Grading Basis:** Letter Grade

**ECEN 5933 (3) Engineering Genetic Circuits**

Presents recent research into methods and software tools for the modeling, analysis, and design of genetic circuits that are enabling the new field of synthetic biology. Teaches both biological and engineering principles in order to enable collaborations between engineers and biologists working in the field of synthetic biology.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 4933

**Recommended:** Prerequisite some familiarity with genetics, cell biology, molecular biology, or biochemistry or familiarity with engineering methods for modeling, analysis and design, but students are not expected to have knowledge in both.

**ECEN 6016 (1-3) Special Topics**

**Additional Information:** Departmental Category: Optics

**ECEN 6106 (3) Numerical Methods in Photonics**

Teaches students how to create and use their own computational techniques to explore optical physics, devices and systems. Learning is project-based, that is no traditional homework or exams are used. Instead, students write their own series of different numerical tools such as finite difference time domain and Fourier beam propagation. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite ECEN 5696 Fourier Optics or equivalent and some familiarity with a numerical programming language such as Matlab is strongly recommended.

**ECEN 6139 (3) Logic Synthesis of VLSI Systems**

Studies synthesis and optimization of sequential circuits, including retiming transformations and don't care sequences. Gives attention to hardware description languages and their application to finite state systems. Also includes synthesis for testability and performance, algorithms for test generation, formal verification of sequential systems, and synthesis of asynchronous circuits.

**Recommended:** Prerequisites ECEN 5139 and CSCI 5454.

**Additional Information:** Departmental Category: VLSI CAD Methods

**ECEN 6144 (3) Electromagnetic Boundary Problems**

Provides mathematical and physical fundamentals necessary for the systematic analysis of electromagnetic fields problems. Covers basic properties of Maxwell's equations, potentials and jump conditions; scattering and diffraction by canonical structures; Green's functions, integral equations and approximate methods. Requires some maturity in electromagnetics.

**Requisites:** Requires prereq course of ECEN 5114 or 5134 (minimum grade C-). Restricted to graduate students in Electrical Engr (EEEN) or Electrical/Computer Engr (ECEN) or Electrical Engr Concurrent or Electrical/Computer Engr Concurrent Degree students only.

**Additional Information:** Departmental Category: Electromagnetics and Remote Sensing

**ECEN 6800 (3) Master of Engineering Report**

**Additional Information:** Departmental Category: General

**ECEN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: General

**ECEN 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: General

**ECEN 6960 (3) Master of Engineering Project**

**Additional Information:** Departmental Category: General

**ECEN 7840 (1-6) Independent Study**

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: General

**ECEN 7849 (1-6) Independent Study**

Offers an opportunity for students to do independent, creative work at the doctoral level. Department consent required.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Additional Information:** Departmental Category: VLSI CAD Methods

**ECEN 8990 (1-10) Doctoral Dissertation**

**Repeatable:** Repeatable for up to 10.00 total credit hours.

**Additional Information:** Departmental Category: General

## Electrical Engineering - Master of Engineering (ME)

At CU Boulder, the Department of Electrical, Computer & Energy Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-engineering/>) has focused our ME degree on professional master's programs that serve highly employable disciplines and provide skills based on industry needs.

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

### Requirements

A minimum of 30 credit hours of academic work acceptable to the student's advisory committee and within the rules established by the College of Engineering and Applied Science and the Graduate School will be required for the ME degree (<http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-engineering/>).

- All 30 course credit hours in ECEN at the 5000-level or above or:
- Minimally, 15 in sufficiently technical ECEN 5000+ with remainder in related STEM (Science, Technology, Engineering, Math) including up to 15 EMEN course credit hours upon permission from faculty advisor
- In the Embedded Systems Engineering (ESE) subplan with ME degree, you can maximally take just 9 credit hours (3 courses) in related STEM, while 21 credit hours must be courses in ESE. Other professional master's subplans might also vary.
- *Optionally*, maximally 6 credit hours may be at the 4000+ level. However, all course work from ECEN, TLEN/CYBR, EMEN and ATLS *must solely be* at the 5000+ level.

### Time Limit

All degree requirements must be completed within four years of the date of commencing coursework (if on campus) or six years (if working full-time and taking only one course, each semester). Most students complete the degree in 2 to 5 years (on-campus, full-time student vs. off-campus, full-time worker/part-time student, respectively).

## Dual Degree Program

### ME in Electrical, Computer & Energy Engineering and Engineering Management

The Department of Electrical, Computer & Energy Engineering also offers a dual ME degree with the Engineering Management Program. The dual degree requires 45 total credit hours, where 21 credits are from the Engineering Management Program (EMP) and 24 credits are from the Electrical, Computer & Energy Engineering Program.

For more information, visit the program's dual degrees (<https://www.colorado.edu/emp/graduate-programs/dual-graduate-degrees/>) webpage.

## Electrical Engineering - Master of Science (MS)

The Department of Electrical, Computer & Energy Engineering (ECEE) offers degree options tailored to both working engineers looking

to advance their careers and to those looking to pursue a career in academia. Research is concentrated in six broad areas:

- Photonics and quantum engineering
- Learning, information, network, communication and data sciences
- Computer engineering
- Systems and controls
- Electromagnetics, RF and microwaves
- Power electronics

For more information, visit the department's Prospective Students (<https://www.colorado.edu/ecee/academics/graduate-programs/master-science-electrical-engineering/degree-requirements/>) webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Coursera Option

The Master of Science in Electrical Engineering is also available as a completely online master's degree (<https://www.colorado.edu/ecee/msee/>) through the Coursera platform.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab (<https://www.colorado.edu/ecee/undergraduate-program/degrees/bachelors-accelerated-masters-degree/>) for the associated bachelor's degree(s):

- Electrical and Computer Engineering - Bachelor of Science (BS) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/electrical-computer-energy-engineering/electrical-computer-engineering-bachelor-science-bs/#acceleratedmasterstext>)
- Electrical Engineering - Bachelor of Science (BS) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/electrical-computer-energy-engineering/electrical-engineering-bachelor-science-bs/#acceleratedmasterstext>)

## Requirements

- All MS students must complete a total of 30 credit hours of coursework (including thesis hours, if applicable) with a grade of C or better and a cumulative GPA of at least 3.00.
- At least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in sufficiently technical<sup>1</sup> ECEN courses.
- The remaining courses can also be ECEN 5000+ or in other STEM (Science, Tech, Engineering, Math) departments.
- *Optionally*, maximally 6 credit hours may be at the 4000+ level. However, all course work from ECEN, TLEN/CYBR, EMEN and ATLS *must solely be* at the 5000+ level.

For more information, visit the department's Master of Science (<http://www.colorado.edu/ecee/graduate-program/degrees-programs/master-science/>) webpage.

## Degree Plans

### Plan I: Thesis Option

Students must complete 4–6 credit hours of MS thesis. The total number of combined hours of independent study and thesis research shall not exceed 9 hours. The Plan I project culminates with an oral presentation and written thesis.

### Plan II: Non-Thesis Option

A maximum of 6 credit hours of independent study can be used toward the 30-credit-hour requirement. No thesis is required, and there is no cumulative examination.

## Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in two years.

<sup>1</sup> "Sufficiently technical" usually means the course requires at least one technical pre-requisite course, and that its primary focus is engineering/mathematical problem-solving rather than having a policy-based focus.

## Electrical Engineering - Master of Science (MS) Online

The online Master of Science in Electrical Engineering (MS-EE), hosted on the internationally acclaimed Coursera (<https://www.coursera.org/degrees/msee-boulder/>) platform, offers stackable graduate-level courses, graduate certificates, and a fully accredited master's degree in electrical engineering. The MS-EE on Coursera students earn the same credentials as our on-campus students. There are no designations on official CU transcripts, degrees or certificates that this is an online program.

## Focus Areas

### Embedded Systems

Embedded system engineering is used in industries such as aerospace and defense, energy, industrial automation, health care, networking and communication, security, transportation and more. Embedded systems also drive the Internet of Things (IoT), enabling countless human-to-machine and machine-to-machine applications including home automation, security and more.

The embedded systems engineering curriculum covers essential embedded technologies, synthesizes foundational principles, and directly applies them to current tools and trends. It is structured to provide you with a broad, versatile and highly competitive skill set. We emphasize practical, project-based learning across hardware and embedded software design that addresses numerous end markets, as well as multiple semiconductor technologies including sensors, controllers, programmable devices and development tools.

### Power Electronics

Power electronics is a key enabling technology in essentially all electronic systems and is increasingly important in the grid interface of renewable energy sources and in efficient electrical loads. The necessity for power electronics technology in these rapidly expanding areas creates

an increasing need for design engineers equipped with knowledge and skills to actively participate in multidisciplinary teams.

The power electronics curriculum addresses this demand for skilled power electronics design engineers, covering switching power supplies, DC-DC converters, inverters, power factor correction converters and LED lighting drivers. The power electronics curriculum emphasizes fundamentals and application in the power electronics field. This domain competency applies to end markets such as power management, portable power, computer systems, medical applications, spacecraft power systems, the automotive industry, renewable energy and the utilities.

### Photonics & Optics

While 20th-century technology was defined by the growth of electronics, the 21st century belongs to photonics. LEDs will light households powered by photovoltaic panels and filled with displays and cameras communicating by optical fiber to distant owners wearing virtual reality glasses. Laser 3D printing will transform manufacturing. New microscopes and telescopes will peer into the depths of living cells and distant galaxies.

The photonics curriculum provides a firm theoretical foundation on the generation, modulation, radiative or guided transmission, sensing, and detection of optical signals. It also covers optical telecommunications, medical instrumentation, photovoltaic power generation, information processing, optical instruments and environmental sensing. While some of these industries are mature, photonics continues to grow into new industries such as LED lighting and on-chip silicon photonics for multi-core CPUs.

## Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1833) section of the catalog for more information.

Up to 9 credits offered by the MS in Data Science (p. 1668) or ME in Engineering Management (p. 1635) on Coursera programs may be applied toward the MS in Electrical Engineering degree's required 30 credits. Courses must be graduate level and meet all applicable academic standards and may not be double counted toward two credentials of the same level. Only courses offered through CU Boulder's for-credit programs on Coursera may be used.

## Admission Requirements

The MS-EE program utilizes performance-based admissions for enrollment. There is no traditional application for admission to the degree. Students do not need to take the GRE or submit letters of recommendation or proof of language proficiency. Neither a prior degree nor university transcripts are required for admission. Because this is a purely online program, students do not need to complete a background check to enroll.

A student desiring admission to the MS-EE program must complete four required protocols:

1. Take one pathway specialization for credit with at least a grade of C in each course.
2. Achieve a computed pathway specialization grade-point average (GPA) of at least 3.00.
3. Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.

4. Declare their intention to seek the degree, which they can do before, during, or after any work in a pathway specialization.

Upon completion of these four steps the student is admitted to the MS-EE program. Students may successfully complete a designated pathway specialization and declare intent at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree. Non-degree seeking students may enroll in for-credit courses.

All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

## Program Requirements

The diagram displayed on the Electrical Engineering (<https://www.colorado.edu/ecee/msee/>) website shows how the program's courses and certificates can be stacked into the full 30 credit hour degree.

Up to 9 credits offered by the MS-DS or ME-EM on Coursera programs may be applied toward the Electrical Engineering MS degree required 30 credits. Courses must be graduate level and meet all applicable academic standards and may not be double counted toward two credentials of the same level. Only courses offered through Coursera may be used.

### Embedded Systems Track

#### Industrial Internet of Things - Graduate Certificate

To earn a graduate certificate (9 credits), students must complete the required specializations.

Required specializations:

- Embedded Sensors and Motors Specialization
- Embedded Interface Design Specialization
- Developing Industrial Internet of Things Specialization

#### Advanced Embedded Linux Development Specialization

Code	Title	Credit Hours
ECEA 5305	Linux System Programming and Introduction to Buildroot	1.0
ECEA 5306	Linux Kernel Programming and Introduction to Yocto	1.0
ECEA 5307	Embedded System Topics and Project	1.0

#### Embedding Sensors and Motors Specialization

Code	Title	Credit Hours
ECEA 5340	Embedding Sensors and Motors: Sensors, Sensor Circuit Design	0.8
ECEA 5341	Embedding Sensors and Motors: Motors, Motor Control Circuits	0.8
ECEA 5342	Embedding Sensors and Motors: Pressure and Motion Sensors	0.8
ECEA 5343	Embedding Sensors and Motors: Sensor Manufact, Process Ctrl	0.6

**FPGA Design for Embedded Systems Specialization**

Code	Title	Credit Hours
ECEA 5360	FPGA Design for Embedded Systems: Intro to FPGA Dsgn for ES	0.8
ECEA 5361	FPGA Design for Embedded Systems: Hardwr Desc Lang FPGA Dsgn	0.8
ECEA 5362	FPGA Design for Embedded Systems: FPGA Softcore Proc, IP Acq	0.8
ECEA 5363	FPGA Design for Embedded Systems: Building FPGA Projects	0.6

**Developing Industrial Internet of Things Specialization**

Code	Title	Credit Hours
ECEA 5385	Industrial IoT Markets and Security	1.0
ECEA 5386	Developing Industrial IoT: Proj Planning, Machine Learning	1.0
ECEA 5387	Developing Industrial IoT: Modeling and Debugging Embed Sys	1.0

**Real-time Embedded Systems Specialization**

Code	Title	Credit Hours
ECEA 5315	Real-Time Embedded Systems: Concepts and Practices	0.6
ECEA 5316	Real-Time Embedded Systems: Theory and Analysis	0.8
ECEA 5317	Real-Time Embedded Systems: Mission-Critical, SW Application	0.8
ECEA 5318	Real-Time Embedded Systems: Project	0.8

**Embedded Interface Design Specialization**

Code	Title	Credit Hours
ECEA 5346	Embedded Interface Design: User Exp I/F Design for Emb Sys	1.0
ECEA 5347	Embedded Interface Design: Rapid Prototyping Emb I/F Designs	1.0
ECEA 5348	Embedded Interface Design: M2M, IoT I/F Design & Protocols	1.0

**Spectrum Engineering - Graduate Certificate**

The spectrum engineering graduate certificate requires 12 credit hours of coursework. Three hours of coursework is recommended, though not required.

Code	Title	Credit Hours
<b>Recommended Specialization</b>		<b>3</b>
ECEA 5453	The Electromagnetic Spectrum	
ECEA 5454	Signal Fundamentals	
ECEA 5455	Economics, Management and Policy	
<b>Required Specializations</b>		<b>12</b>
ECEA 5450	The Science of Spectrum Access	
ECEA 5451	Radio Frequency Engineering	
ECEA 5452	Signals and Propagation	

ECEA 5456	Radio Services and Broadcast Applications	
ECEA 5457	Mobile Communication: Cellular and Wi-Fi	
ECEA 5458	Radio Determination and Space Applications	
ECEA 5459	The Electromagnetic Spectrum	
ECEA 5460	History of Spectrum Management	
ECEA 5461	Spectrum Sharing	
ECEA 5462	Consumer Demand and Valuation	
ECEA 5463	Firm Supply and the Structure of the Market	
ECEA 5464	Optimal Pricing with Market Power	

**Power Electronics Track****Power Electronics - Graduate Certificate**

To earn a graduate certificate (9 credits), students must complete the required specializations/courses.

Required specializations:

- Power Electronics Specialization
- Modeling and Control of Power Electronics Specialization
- Power Electronics Project Course: ECEA 5715

**Power Electronics Specialization**

Code	Title	Credit Hours
ECEA 5700	Power Electronics: Introduction to Power Electronics	0.8
ECEA 5701	Power Electronics: Converter Circuits	1.0
ECEA 5702	Power Electronics: Converter Control	1.2
ECEA 5703	Power Electronics: Magnetics Design	1.0

**Modeling and Control of Power Electronics Specialization**

Code	Title	Credit Hours
ECEA 5705	Modeling, Control of Power Elec: Avged-Sw Modeling and Sim	0.8
ECEA 5706	Modeling, Control of Power Elec: Tech Dsgn-Oriented Analysis	0.6
ECEA 5707	Modeling, Control of Power Elec: Input Filter Design	0.6
ECEA 5708	Modeling, Control of Power Elec: Current-mode Control	1.2
ECEA 5709	Modeling, Control of Power Elec: Mod/Ctrl 1-Phase Rect/Inv	0.6

**Power Electronics Project Course:**

Code	Title	Credit Hours
ECEA 5715	Power Electronics Capstone Project	1.2

**Algorithms for Battery Management Systems Specialization**

Code	Title	Credit Hours
ECEA 5730	Introduction to Battery-Management Systems	0.8
ECEA 5731	Equivalent-Circuit Cell-Model Simulation	0.8

ECEA 5732	Battery State-of-Charge (SOC) Estimation	1.0
ECEA 5733	Battery State-of-Health (SOH) Estimation	0.8
ECEA 5734	Battery-Pack Balancing and Power Estimation	0.8

### Photovoltaic Power Electronics Specialization

Code	Title	Credit Hours
ECEA 5716	Open-Loop Photovoltaic Power Electronics Laboratory	1.0
ECEA 5717	Closed-Loop Photovoltaic Power Electronics Laboratory	1.0
ECEA 5718	Photovoltaic Power Electronics Battery Management Laboratory	1.0

### Power Semiconductor Devices Specialization (3.6 credits)

Code	Title	Credit Hours
ECEA 5721	Introduction to Power Switches	0.6
ECEA 5722	High-Voltage p-n and Schottky Diodes	1.2
ECEA 5723	MOSFETs, IGBTs and more	1.2
ECEA 5724	Power Device Fabrication	0.6

## Photonics and Optics Track

### Semiconductor Photonics - Graduate Certificate

Admission to a graduate degree-seeking program in the ECEE department is not required for students pursuing the certificate. Certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student.

The semiconductor photonics certificate is comprised of 3 specializations, each of which is comprised of 3–4 individual online courses (MOOCs), which deliver about one month of content:

To complete a certificate, you must complete the following required specializations/courses.

### Semiconductor Photonics Graduate Certificate (9 credits)

Required specializations:

- Optical Engineering Specialization
- Semiconductor Specialization
- Active Optical Devices Specialization

### Optical Engineering Specialization

Code	Title	Credit Hours
ECEA 5600	Optical Engineering: First Order Optical System Design	1.0
ECEA 5601	Optical Engineering: Optical Efficiency and Resolution	1.0
ECEA 5602	Optical Engineering: Design High-Performance Optical Systems	1.0

### Semiconductor Devices Specialization

Code	Title	Credit Hours
ECEA 5630	Semiconductor Devices: Semiconductor Physics	1.0

ECEA 5631	Semiconductor Devices: Diode: pn junction and metal semiconductor contact	1.0
ECEA 5632	Semiconductor Devices: Transistor: Field Effect Transistor and Bipolar Junction Transistor	1.0

### Active Optical Devices Specialization

Code	Title	Credit Hours
ECEA 5605	Active Optical Devices: LEDs and Semiconductor Lasers	1.2
ECEA 5606	Active Optical Devices: Nanophotonics and Detectors	1.2
ECEA 5607	Active Optical Devices: Displays	0.6

### Quantum Mechanics for Engineers Specialization

Code	Title	Credit Hours
ECEA 5610	Foundations of Quantum Mechanics	1.4
ECEA 5611	Theory of Angular Momentum	0.8
ECEA 5612	Approximation Methods	0.8

For further details regarding Photonics content under our online MS-EE degree through Coursera, see Photonics and Optics (<https://www.colorado.edu/ecee/academics/online-programs/ms-ee-coursera/curriculum/photonics-and-optics/>).

## Electrical Engineering - Professional Master of Science (MSEE)

The professional Master of Science degree in electrical engineering is a professional degree composed of advanced courses relevant to working engineers.

The department offers many professional degree tracks, each of which result in a professional Master of Science degree in electrical engineering (MSEE).

## Program Tracks

### Embedded Systems Engineering (ESE) Track

The Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>) (ESE) track provides comprehensive coverage of essential embedded technologies, current tools and trends. It is structured to provide students with a broad, versatile skill set and is coupled with industry input for continuous curriculum updates.

Through flexible core course options and electives, students enrolled in the ESE program pursue a 30-credit-hour MSEE degree. Many courses offer distance learning options through CU Boulder Distance Education.

### Power Electronics (PPE) Track

Power Electronics (<http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/>) is a key enabling technology in essentially all electronic systems and is increasingly important in the grid interface of renewable energy sources and in efficient electrical loads. The necessity for power electronics technology in these rapidly expanding areas creates an increasing need for design

engineers equipped with knowledge and skills to actively participate in multidisciplinary teams.

Through flexible core course options and electives, students enrolled in this program pursue a 30-credit-hour MSEE degree. The program is intended for students and engineers with a BS degree in electrical engineering or the equivalent. Entering students must have adequate knowledge of circuits and electronics, as taught in undergraduate courses intended for EE majors.

## Next-Generation Power and Energy Systems (PPS) Track

The Next-Generation Power and Energy Systems (<https://www.colorado.edu/ecee/graduate-program/degrees-programs/next-generation-power-and-energy-systems/>) (PPS) track offers five core courses and numerous electives for the 30-credit hour program to prepare students with the specialized knowledge required to practice grid integration of renewable energy into integrated energy systems, taught by instructors from CU Boulder's faculty and National Renewable Energy Laboratory (NREL) research programs

Through flexible core course options and electives, students enrolled in the PPS program pursue a 30-credit-hour MSEE degree. Many courses also offer distance learning options.

## High-Speed Digital Engineering (HSDE) Track

The High-Speed Digital Engineering (<https://www.colorado.edu/ecee/academics/graduate-programs/professional-masters/high-speed-digital-engineering/>) (HSDE) track is an innovative practical degree plan that prepares students for a career in industry with the specialized knowledge required to be a successful high-speed design engineering team member and to be able to solve complex signal integrity, power integrity and electromagnetic compatibility design problems quickly and efficiently. Simulation and measurement tools used in industry are leveraged to develop and enhance high-speed digital engineering design intuition at the same time fundamental principles are studied through best practices from industry in design, measurement, simulation and analysis. The program facilitates lifelong learning capabilities and is continuously updated with industry input.

Through five core courses and five elective options, students enrolled in this program pursue a ten course, 30-credit-hour degree. Most courses emphasize practical, hands-on experience, understanding and solving real world problems faced by the electronics industry today. Students with a background in electrical engineering fundamentals will be well-prepared for this program. It is intended for students and engineers with a bachelor's degree in electrical engineering or equivalent, including a background in basic electromagnetics. Students with other relevant engineering or scientific backgrounds may still be admitted to the program with a personalized study program to address foundational knowledge gaps.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admission

A minimum undergraduate GPA of 3.00 is required for application to the master's program. Students who are interested in the PhD degree

and have strong academics (including 3.50 or higher GPA) should apply directly to the PhD program (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/electrical-engineering/electrical-engineering-doctor-philosophy-phd/>).

## Course Requirements

The following course requirements are subject to change; for the most current information, visit the department's Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>), Power Electronics (<http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/>), Photonics (<https://www.colorado.edu/ecee/graduate-program/degrees/photonics/>) or Next-Generation Power and Energy Systems (<https://www.colorado.edu/ecee/graduate-program/degrees-programs/next-generation-power-and-energy-systems/>) webpages.

Students must complete a total of 30 credit hours (including both course and thesis hours) with a grade of C or better and a cumulative GPA of at least 3.00. At least 24 credit hours must be completed at the 5000-level or above, and at least 18 of those credits must be in sufficiently technical ECEN 5000+ level courses.

## Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one-and-a-half to two years.

## Program Tracks

### Embedded Systems Engineering (ESE) Track (non-thesis)

Code	Title	Credit Hours
<b>ESE Core Courses</b>		
Choose five of the following:		15
ECEN 5613	Embedded System Design	
ECEN 5623	Real-Time Embedded Systems	
ECEN 5803	Mastering Embedded Systems Architecture	
ECEN 5813	Principles of Embedded Software	
ECEN 5823	Internet of Things Embedded Firmware	
ECEN 5833	Low Power Embedded Design Techniques	
ECEN 5853	Embedding Sensors and Motors	
ECEN 5863	Programmable Logic Embedded System Design	
<b>ESE Program Electives</b>		
Choose two of the following (or additional ESE core courses):		6
ECEN 5013	Special Topics (Advanced Printed Circuit Board Design for Signal Integrity)	
ECEN 5133	Fundamentals of Computer Security	
ECEN 5224	High Speed Digital Design	
ECEN 5593	Advanced Computer Architecture	
ECEN 5713	Advanced Embedded Software Development	
ECEN 5763	Embedded Computer Vision	
ECEN 5730	Practical Printed Circuit Board Design and Manufacture	
ECEN 5773	Developing the Industrial Internet of Things	

ECEN 5783 Embedded Interface Design

### Open 5000 Level Electives

Choose three 5000-level electives from the ESE core, ESE electives, other ECEE courses, or courses in other departments, with approval of academic advisor. 9

**Total Credit Hours 30**

For more information, visit the department's Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>) webpage.

### High-Speed Digital Engineering (HSDE) Track

This program track consists of 10 courses totaling 30 credits. Five of the courses (15 credits) must be the core courses of the curriculum. A minimum of two additional courses (6 credits) must be chosen from the HSDE PMP elective courses list. The remaining three courses (9 credits) may be chosen from the HSDE PMP elective courses list OR from the courses that fulfill general ECEE Master's degree requirements.

A grade of C or better is required for each course applied towards the HSDE PMP track for degree-seeking students.

For HSDE courses taken non-degreed, and subsequently wanting to transfer maximally 9 credit hours toward a degree, the minimal grade in each course must be a solid B or better.

Code	Title	Credit Hours
<b>HSDE Core Courses</b>		
All five required:		
ECEN 5224	High Speed Digital Design (spring)	3
ECEN 5514	Principles of Electromagnetics for High-Speed Digital Engineering (spring)	3
ECEN 5524	Principles of Computational Electromagnetics for Signal and Power Integrity (spring)	3
ECEN 5534	Signal Integrity Measurements for High Speed Digital Engineering (fall)	3
ECEN 5730	Practical Printed Circuit Board Design and Manufacture (fall, spring)	3
<b>HSDE Program Electives</b>		
Choose two: 6		
ECEN 5013	Special Topics (Advanced PCB Design for high-speed serial links (fall))	
ECEN 5414	Essential Principles of Signal Integrity (spring)	
ECEN 5424	High Speed Channel Design for Signal Integrity (spring 2024)	
ECEN 5434	S-Parameters for Signal Integrity in High Speed Digital Engineering (fall)	
ECEN 5444	Electromagnetic Compatibility (EMC) for High-Speed Digital Engineering (fall)	
ECEN 5544	EM Signal Modeling for HSDE using Ansys HFSS and Q3D (spring)	
ECEN 5554	Designing PCB Memory Systems using Keysight ADS (fall)	

Choose three more from the above HSDE electives list, or from other STEM electives 9

**Total Credit Hours 30**

- For more information, visit the department's High-Speed Digital Engineering (<https://www.colorado.edu/ecee/academics/graduate-programs/professional-masters/high-speed-digital-engineering/>) webpage.

### Next-Generation Power and Energy Systems (PPS) Track

Code	Title	Credit Hours
<b>Core Courses</b>		
ECEN 5797	Introduction to Power Electronics	3
ECEN 5407	Renewable Energy and the Future Power Grid (Renewable Energy and the Future Power Grid)	3
ECEN 5417	Power System Analysis (Power Systems Analysis)	3
ECEN 5427	Power System Planning & Operations (Power System Operations & Planning)	3
ECEN 5437	Distribution System Analysis (Distribution System Analysis)	3

### Elective Courses

At least 3 credit hours of ECEN courses at the 5000 level or above.

AREN 5010	Energy System Modeling and Control	
AREN 5570	Building Electrical Systems Design 1 (Building Electrical Systems)	
AREN 5060		
AREN 5830	Architectural Engineering Special Topic (Grid-Connected Systems)	
ECEN 5007	Special Topics (Power System Protection)	
ECEN 5447	Power System Dynamics with Renewable Energy	
ECEN 5457	Energy Systems Optimization	
ECEN 5467	Data Analytics and Data-Driven Decision Making for Modern Power and Energy Systems	
ECEN 5517	Power Electronics and Photovoltaic Power Systems Laboratory	
ECEN 5807	Modeling and Control of Power Electronic Systems	
ENVM 5005	The Business of Renewable and Sustainable Energy	
ENVM 5006	Sustainable Energy Policy	

### Power Electronics (PPE) Track

This curriculum is built around a core of three theory courses and two laboratory courses that provide practical laboratory and design experience of specific relevance to the practice of power electronics.

Code	Title	Credit Hours
<b>Required Theory Courses</b>		
ECEN 5797	Introduction to Power Electronics	3

ECEN 5807	Modeling and Control of Power Electronic Systems	3
ECEN 5817	Resonant and Soft-Switching Techniques in Power Electronics	3
<b>Required Laboratory Courses</b>		
ECEN 5517	Power Electronics and Photovoltaic Power Systems Laboratory	3
Choose one 5000-level project laboratory in power electronics (offered every fall).		
<b>Electives</b>		
Select one of the following power electronics electives:		
ECEN 5007	Special Topics (Power Electronics for Electric Drivetrain Vehicles)	3
ECEN 5737	Adjustable-Speed AC Drives (spring)	
ECEN 5827	Analog IC Design (fall)	
<i>Grid Integration of Renewables</i>		
ECEN 5XX7	Control of Power Electronics in AC Systems and Microgrids	
ECEN 5407	Renewable Energy and the Future Power Grid	
ECEN 5417	Power System Analysis	
ECEN 5427	Power System Planning & Operations	
ECEN 5437	Distribution System Analysis	
ECEN 5447	Power System Dynamics with Renewable Energy	
ECEN 5457	Energy Systems Optimization	
ECEN 5467	Data Analytics and Data-Driven Decision Making for Modern Power and Energy Systems	
<b>Technical Electives</b>		
Choose three technical electives with advisor approval. Recommended electives include courses in control systems, RF/microwaves and engineering management.		
<b>Open Elective</b>		
Choose an additional elective course.		
<b>Total Credit Hours</b>		<b>30</b>

For more information, visit the department's Power Electronics (<http://www.colorado.edu/ecee/graduate-program/degrees/power-electronics-certificate/>) webpage.

## Electrical Engineering - Doctor of Philosophy (PhD)

The Doctor of Philosophy (PhD) is the terminal degree for those seeking a technical or research career in electrical engineering.

Students typically complete their PhD within 4 to 6 years, depending on whether they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program directly without a master's degree.

The primary focus of a PhD student is to perform novel research and support their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. Most of our PhD students are supported through research and teaching assistantships,

and are also encouraged to apply for their own source of funding. Others are self-funded.

For more information, visit the department's Prospective Students (<https://www.colorado.edu/ecee/academics/graduate-programs/doctor-philosophy/degree-requirements/>) webpage.

## Requirements

### Course Requirements

- A minimum of 30 credit hours of engineering, math and science courses numbered 5000 or above (at least 18 of these must be in technical ECEN; none can be TLEN/CYBR, EMEN or ATLS) with a minimum of 3.00 GPA (with no lower than a B- in any single course).
- 30 credit hours of dissertation credit are required for the degree.
- A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a PhD degree if approved by the graduate committee of the department and the Graduate School.
- All courses taken for the master's degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the university, however, the technical requirements in the first bullet point still apply.

### Preliminary Examination

PhD students must take a preliminary examination, generally completed within their first two years. They are given two chances to pass. If a student takes an exam in one research area on their first attempt and a different area on their second attempt, those comprise their two maximum attempts.

Preliminary exams are given by faculty in respective research groups. Depending on the research area, the exam could consist of oral and written parts, or a literature search and an oral report, or some other form of exam. If a student passes one part on the first attempt, then they need only take and pass the remaining part during their subsequent attempt. The outcome of an exam can also be a conditional pass, in which the student is required to carry out additional activities such as problem solving or taking a course to build foundational knowledge.

Those who do not pass after two attempts can earn a master's degree pending fulfilling the other academic requirements for that program; their tenure in the PhD will be at a close.

### Comprehensive Examination

Students must pass an oral comprehensive examination before the student's doctoral committee of five or more graduate faculty members, three of which must be rostered in the ECEE department, chosen by the student and approved by the department and the Graduate School. The oral examination before the committee is based primarily on a written proposal for the thesis research provided by the student to committee members in advance.

### PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

### Time Limit

All degree requirements must be completed within six years of the date of commencing coursework. Extensions beyond this timeline may be

granted via petition to the Graduate College and approval by the ECEE Chair of Graduate Studies.

## Photonics - Graduate Certificate

While 20th-century technology was defined by the growth of electronics, the field of photonics is coming of age in the 21st century. LEDs are lighting households powered by photovoltaic panels and connected to the internet via optical fiber. Holographic displays and virtual reality glasses are providing new forms of visualization. New microscopes are peering into living cells with resolutions that break previous limits. Photons are being used to interrogate atoms for quantum computations. Photonics graduates will command skills in theory, design, fabrication and laboratory practice to place them at the forefront of these industries and many more not yet invented.

Photonics is the electrical engineering sub-discipline concerned with the generation, modulation, radiative or guided transmission, sensing and detection of optical-frequency signals. Application areas include optical telecommunications and instrumentation, optical computing and data transmission, medical imaging, renewable energy, and environmental sensing. While some of these industries are mature, photonics continues to rapidly grow into emerging technologies such as quantum computing and cryptography, optogenetics, and virtual reality.

Photonics courses at CU Boulder engage high-caliber students from around the world. The courses typically run at a fast pace, often involving a mixture of fundamental theory, design in relevant industry standard CAD tools and individual projects.

For more information visit the department website (<https://www.colorado.edu/ecee/graduate-program/degrees/photonics/>).

## Requirements

Admission to a graduate degree-seeking program in the ECEE department is not required for students pursuing the certificate.

Graduate students pursuing a photonics certificate are not required to matriculate into the program subplan through a master's degree, although degree-seeking students enrolled in the program will be given course registration priority.

Photonics certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student. However, credit hours may not count toward both a BS and a master's degree.

## Required Courses

Nine credit hours of graduate-level coursework, made up of any three of the six core photonics courses, will be required to complete the certificate program. Students must earn at least a B in each course and a minimum GPA of 3.0 is required to remain in good academic standing.

Code	Title	Credit Hours
<b>Photonics Core Courses</b>		
ECEN 5616	Optoelectric System Design	3
ECEN 5606	Optics Laboratory	3
ECEN 5156	Physical Optics	3
ECEN 5696	Fourier Optics	3
ECEN 5626	Active Optical Devices	3

ECEN 5345	Introduction to Solid State Physics	3
<b>Total Credit Hours</b>		<b>18</b>

## Engineering & Applied Science Robotics - Master of Science (MS)

The Master of Science in Robotics provides advanced training and study in robotics-related topics consistent with the program focus on autonomy and AI, field robotics, human-robot interaction, smart materials, security, controls and estimation, bio-inspired systems and advanced manufacturing.

The program provides a strong foundation in mathematics and engineering, while also allowing flexibility to select courses across departments to achieve the breadth and depth required for research advances beyond the state of the art. Students will achieve their educational goals through a combination of cross-disciplinary coursework and research under the supervision of one or more of the program's faculty members.

For more information, see the Robotics (<https://www.colorado.edu/program/robotics/academics/>) website.

## Required Courses and Credits

The non-thesis and thesis MS options both require a minimum of 30 credit hours of coursework in courses numbered 5000 or above, with a minimum GPA of 3.00. MS thesis option students must complete 4–6 hours of thesis credit as part of the 30 credit hour requirement and meet thesis examination and submission requirements. Non-thesis option students are not required to complete a final examination. All courses listed on the Application for Admission to Candidacy must have been taught by members of the graduate faculty, must have grades of C or better, and must be at the 5000 level or above. For policies concerning academic probation, refer to the graduate school rules in the University Catalog. A maximum of 9 credit hours of graduate coursework may be transferred from another accredited institution, assuming the courses meet program and Graduate School standards.

The MS degree in Robotics will provide a flexible curriculum that provides depth of study across the disciplines from departments and programs hosted in CEAS, including Architectural Engineering (AREN), Aerospace Engineering (ASEN), Biomedical Engineering (BMEN), Chemical Engineering (CHEN), Civil Engineering (CVEN), Computer Science (CSCI), Electrical, Computing and Energy Engineering (ECEN), Electrical Engineering (EEEN), Engineering Management (EMEN), Environmental Engineering (EVEN), Mechanical Engineering (MCEN) or ATLAS. Of the 30 credit hours of coursework required, at least 18 credit hours will be specifically in designated robotics (ROBO) courses, with the remaining credit hours obtained, as needed, from other departments listed above. Of the 18 credit hours of robotics coursework required, one core course is required: ROBO 5000 Introduction to Robotics, which provides a foundation for advanced study. This allows for maximum flexibility for students to tailor coursework for a variety of post-graduate career goals. Additionally, the Robotics Graduate Program will provide guidance on recommended courses in the basic concentration areas, but each student is required to develop a course plan and submit to the graduate committee for approval.

## Thesis Examination

A minimum of 4 and maximum of 6 thesis credit hours are required for the thesis option of the MS degree. Students must also write a thesis based on original research conducted under the supervision of a graduate faculty member. The MS thesis must fulfill all Graduate School requirements. After the thesis is completed, a final oral examination is conducted by the student's thesis committee of at least three faculty members. The approved thesis must be submitted to the program and the Graduate School.

## Time Limit

All requirements for the MS degree must be completed within four years of admission to the MS program. Courses may be selected to maximize the number of credits obtained by a student in a given semester (e.g., for an accelerated MS degree), or spread out over multiple years (e.g., for working professionals). A waiver from the Graduate Committee is required for every semester beyond the time limit listed above.

## Course Requirements

A minimum of 18 credit hours is required (3 core plus 15 robotics electives).

Code	Title	Credit Hours
<b>Core Course Requirement</b>		
ROBO 5000	Introduction to Robotics	3

### *Robotics Courses in Atlas*

ATLS/CSCI 5616	Introduction to Virtual Reality	3
----------------	---------------------------------	---

### Technical Electives

12

Courses in STEM fields will be considered, provided they are related to the research goals of the student.

## Learning Outcomes

Upon completing the program, students will:

- Possess a working knowledge of the tools specific to their research area. (Non-thesis and thesis)
- Communicate effectively (orally and written) about their research area to roboticists within and outside of their focus area. (Thesis only)

## Engineering Education - Doctor of Philosophy (PhD)

The Engineering Education (ENED) doctoral program is designed for students with a background in engineering and an interest in improving the education of engineers. Our vision of engineering education goes beyond curriculum design and pedagogy to include attracting and graduating diverse students with a well-rounded education and a desire to improve society and the environment. ENED graduates will be prepared to conduct research to study significant problems in engineering education, apply research-based instructional strategies in engineering courses, and understand policy implications for student success. The flexible and cross-disciplinary Engineering Education PhD program is designed to allow students to tailor their curriculum and research and to prepare them to achieve their goals in engineering education.

The PhD program is open to first-time graduate students as well as those who hold master's degrees.

For more information, visit the Engineering Education PhD Program (<https://www.colorado.edu/program/ide/phd-engineering-education/>) page.

## Requirements

### Required Courses and Credits

All Engineering Education PhD students must complete a minimum of 30 credit hours of coursework at the 5000 level or higher, plus 30 credit

hours of dissertation credits. Some research advisors will require that their students complete more than 30 course credits, and the department recommends that specific course decisions should be agreed upon through individual faculty/student discussions. Students must receive a minimum grade of B- (2.7) in each class to count towards the degree. Students must also maintain a cumulative GPA of 3.0 or higher to be in good standing with the graduate school.

Code	Title	Credit Hours
<b>Required Courses <sup>1</sup></b>		
	Engineering or computer science technical courses	9
	Designated engineering education related courses. Approved courses include but are not limited to ENED and EDUC. <sup>2</sup>	12
	Additional relevant credit hours from engineering, education, or other fields (e.g., business, sociology, psychology)	9
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Up to 21 credit hours of graduate-level coursework may be transferred or applied to meet the 30-credit hour course requirement for the PhD. Courses transferred or applied must be relevant to the PhD degree, and their acceptance is at the discretion of the program faculty and the Graduate School.

<sup>2</sup> See table below for list of approved graduate-level engineering cognate area and education courses.

### Engineering Cognate Area and Education Courses

Code	Title	Credit Hours
<b>Engineering Cognate Area</b>		
	Graduate-level engineering courses at the 5000-level or higher; from departments and programs hosted in CEAS, including AREN, ASEN, BMEN, CHEN, CVEN, CSCI, ECEN, EEEN, EMEN, EVEN and MCEN.	9
<b>Education Courses</b>		
	Graduate-level courses related to engineering education research and teaching at the 5000-level or higher; from EDEN, EDUC, INFO, PHYS, PSYC, SOCY, etc. For example:	12
EDUC 5445	Curriculum for Multicultural Education	
EDUC 5835	Teaching K-12 Mathematics: Geometry & Measurement	
EDUC 5844	Teaching and Learning Computational Thinking	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6240	African American Education in the United States	
EDUC 6245	Latinx Education Across the Americas	
EDUC 6250	Higher Education in the United States	
EDUC 6318	Psychological Foundations of Education	
EDUC 6405	College Student Development and Counseling Theories	
EDUC 6504/ PSYC 6200	Issues and Methods in Cognitive Science	
EDUC 6705	Leadership in Higher Education	
EDUC 6928	Readings in Learning Sciences and Human Development	

EDUC 7326	Quasi-Experimental Design in Causal Inference in Social Sciences
EDUC 7376	Theory and Practice of Educational and Psychological Measurement
EDUC 7386	Educational Evaluation
EDUC 7446	Policy Issues in Education
EDUC 8025	Seminar: Curriculum Theories
EDUC 8210	Ways of Knowing in Educational Research
EDUC 8230 & EDUC 8240	An Introduction to Quantitative Methods in Educational Research and Applied Regression Analysis
EDUC 8250 & EDUC 8260	Qualitative Research Methods in Education and Qualitative Methods II
EDUC 8348	Human Development in Cultural, Historical, and Sociopolitical Contexts
EDUC 8358	Critical Introduction to Learning Theory and Practice, Part 1
EDUC 8710	Measurement in Survey Research
ENED 5100	Foundations of Engineering Education 1
ENED 5200	Foundations of Engineering Education 2
ENED 5400	Teaching Design
ENED 6599	Special Topics in Engineering Education
ENED 6999	Graduate Seminar in Engineering Education
ENED 7999	
ENED 8999	Doctoral Dissertation
INFO 5602	Information Visualization
PHYS 5460	Teaching and Learning Physics
PSYC 5145	Advanced Cognitive Psychology
PSYC 5835	Thinking Proseminar
SOCY 5031	Research Design
SOCY 5111	Statistics 1: Introduction to Social Statistics
SOCY 5181	Logics of Qualitative Inquiry
SOCY 6111	Stats 2: Statistic Analysis
SOCY 6121	Qualitative Methods
SOCY 7111	Data III--Advanced Data Analysis
SOCY 7121	Qualitative Analysis
STAT 5000	Statistical Methods and Application I
STAT 5010	Statistical Methods and Applications II

### Additional Coursework

The remaining credit hours can be related to either the engineering cognate area or education courses as described above as befits the individual student, with the approval of their faculty advisor and dissertation committee.

**Total Credit Hours** **30**

### Preliminary Examination

Satisfactory completion of a preliminary examination. Engineering Education PhD students are required to pass a preliminary examination that will include written and/or oral components, per the discretion of a group of 3 or more faculty affiliated with the ENED program in

consultation with the student. This is typically completed within the first three semesters after matriculation into the program.

## Comprehensive Examination

Satisfactory completion of a comprehensive examination to defend the PhD thesis proposal. The Comprehensive Examination is an important second evaluation step required to advance the student to candidacy for the PhD degree. It is typically completed within the first three years after matriculation to the program and more than one year prior to graduation. It consists of a written research proposal in addition to an oral exam with a selected committee of faculty advisors, both focusing on the proposed course of research.

## PhD Dissertation

Satisfactory completion of a minimum of 30 semester hours of dissertation credits. Satisfactory completion and defense of a PhD dissertation under the supervision of a research advisor who is a CU Boulder faculty member affiliated with the ENED program. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All degree requirements for the Engineering Education PhD must be completed within six years of the date commencing coursework.

# Robotics - Doctor of Philosophy (PhD)

The doctoral program in robotics provides advanced training and study in robotics-related topics consistent with the program focus on autonomy and AI, field robotics, human-robot interaction, smart materials, security, controls and estimation, bio-inspired systems and advanced manufacturing. The program prepares students for careers in local and national industry, government, national labs, academic research laboratories and university faculty positions.

The program provides a strong foundation in mathematics and engineering, while also allowing flexibility to select courses across departments to achieve the breadth and depth required for research advances beyond the state of the art. Students will achieve their educational goals through a combination of cross-disciplinary coursework and research under the supervision of one or more of the program's faculty members.

For more information, see the Robotics (<https://www.colorado.edu/program/robotics/academics/>) website.

## Required Courses and Credits

The degree requires a minimum of 30 credit hours of coursework in courses numbered 5000 or above, with a minimum GPA of 3.00, plus 30 hours of dissertation credit. More coursework may be required at the faculty advisor's discretion. All courses listed on the Application for Admission to Candidacy must have grades of B- or better. For policies concerning academic probation, refer to the Graduate School rules in the University Catalog. A maximum of 21 credit hours of graduate coursework may be transferred from another accredited institution, assuming the courses meet program and Graduate School standards. All courses taken in a master's degree program at CU Boulder may be

applied toward the doctoral degree at the university, provided they are at the 5000 level or above and meet doctoral standards.

The PhD in Robotics provides a flexible curriculum that provides depth of study across the disciplines from departments and programs hosted in CEAS, including Architectural Engineering (AREN), Aerospace Engineering (ASEN), Biomedical Engineering (BMEN), Chemical Engineering (CHEN), Civil Engineering (CVEN), Computer Science (CSCI), Electrical, Computing and Energy Engineering (ECEN), Electrical Engineering (EEEN), Engineering Management (EMEN), Environmental Engineering (EVEN), Mechanical Engineering (MCEN) or ATLAS. Of the 30 credit hours of coursework required, at least 18 credit hours will be specifically in designated robotics (ROBO) courses, with the remaining credit hours obtained, as needed, from other STEM fields. Of the 18 credit hours of robotics coursework required, one core course is required: ROBO 5000 Introduction to Robotics, which provides a foundation for advanced study. This allows for maximum flexibility for students to tailor coursework for a variety of post-graduate career goals. Additionally, the Robotics Graduate Program will provide guidance on recommended courses in the basic concentration areas but each student and advisor are required to develop a course plan and submit to the graduate committee for approval.

## Preliminary Examination

Every student desiring to pursue the PhD degree must pass a preliminary examination. As a part of this evaluation, students must pass a multiple subject area oral examination to test fundamental robotics competency. Subject areas are based on the tracks within the robotics program and selected by the student. Overall performance in the required examinations will determine pass/fail status.

## Comprehensive Examination

After passing the preliminary examination, students continue their coursework and prepare a written dissertation prospectus. When ready, they take an oral comprehensive examination covering the graduate coursework and the dissertation prospectus. The oral examination is based primarily on a written proposal for the dissertation research provided by the student to committee members in advance. This examination is conducted before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the program and the Graduate School.

## PhD Dissertation

A minimum of 30 dissertation credit hours are required for the PhD degree. Up to 10 credit hours may be taken in any given semester. Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee of at least five members. The approved dissertation must be submitted to the program and the Graduate School.

## Time Limit

All requirements for the Robotics PhD must be completed within six years of admission to the PhD program. A waiver from the Graduate Committee is required for each semester beyond this limit.

## Course Requirements

A minimum of 18 credit hours is required (3 core plus 15 robotics electives).

Code	Title	Credit Hours
<b>Core Course Requirement</b>		
ROBO 5000	Introduction to Robotics	3
<b>Robotics Electives</b>		<b>15</b>
<i>Robotics Courses in Computer Science</i>		
CSCI 5254	Convex Optimization and Its Applications	3
CSCI 5302	Advanced Robotics	3

CSCI 5622	Machine Learning	3
CSCI 5922	Neural Networks and Deep Learning	3
<i>Robotics Courses In Aerospace Engineering Sciences</i>		
ASEN 5014	Linear Control Systems	3
ASEN 5044	Statistical Estimation for Dynamical Systems	3
ASEN 5067	Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems	3
ASEN 5254	Algorithmic Motion Planning	3
ASEN 5264	Decision Making under Uncertainty	3
ASEN 6024	Nonlinear Control Systems	3
ASEN 6044	Advanced State Estimation	3
ASEN 6519	Special Topics (Hybrid Systems)	3
<i>Robotics Courses in Mechanical Engineering</i>		
MCEN 5115	Mechatronics and Robotics I	3
MCEN/ECEN 5138	Feedback Control	3
MCEN 5155	Automated Mechanical Design Synthesis	3
MCEN 5157	Modeling of Human Movement	3
MCEN 5173	Finite Element Analysis	3
MCEN 5195	Bioinspired Robotics	3
MCEN 5228	Special Topics in Mechanical Engineering (Advanced Dynamics)	3
MCEN 5228	Special Topics in Mechanical Engineering (Industrial Automation)	3
MCEN 5293	Mechanics of Soft Matter	3
MCEN/ECEN 5448	Linear Systems	3
MCEN 5636	Micro-Electro-Mechanical Systems 1	3
MCEN 6228	Special Topics in Mechanical Engineering (Robust Multivariable Control)	3
<i>Robotics Courses in Electrical Engineering</i>		
ECEN 5008	Special Topics (Game Theory)	3
ECEN/MCEN 5138	Control Systems Analysis	3
ECEN/MCEN 5448	Advanced Linear Systems	3
ECEN 5458	Sampled Data and Digital Control Systems	3
ECEN 5478	Online Convex Optimization and Learning	3
ECEN 5638	Control Systems Laboratory	3
ECEN 5738	Theory of Nonlinear Systems	3
<i>Robotics Courses in Atlas</i>		
ATLS/CSCI 5616	Introduction to Virtual Reality	3
<b>Technical Electives</b>		<b>12</b>

Courses in STEM fields will be considered, provided they are related to the research goals of the student.

## Learning Outcomes

Upon completing the program, students will:

- Possess a deep knowledge of their specific research area that includes a thorough understanding of the fundamental science and mathematics that underlies their research.
- Be well-versed in the current state of knowledge of their area as described in the literature as well as the fundamental questions that are of critical importance to the field.
- Communicate effectively (orally and written) about their research area to roboticists within and outside of their focus area.
- Independently plan, perform, analyze and report high quality research in robotics.
- Be experts in a set of modern research tools used in performance of research.

## Architectural Lighting - Graduate Certificate

The Architectural Lighting certificate is offered to nondegree students from the professional community to help them build their confidence and competence, contribute more fully to their companies and further advance their careers.

### Requirements

In order to be admitted to the certificate students must have previously earned a bachelor's degree.

To earn the certificate, students must receive a minimum grade of a B- or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.

Depth of understanding and proficiency grows throughout a two-semester online course sequence that begins in September and ends in April, and the certificate program culminates in a capstone course that includes hands-on practical experience with lighting measurements, equipment and software tools during an on-campus week-long intensive as part of a six-week course in July and August. The professional graduate Architectural Lighting certificate is awarded to students who complete this series of three 3-credit courses.

Code	Title	Credit Hours
AREN 5510	Architectural Lighting I	3
AREN 5520	Architectural Lighting II	3
AREN 5530	Architectural Lighting Capstone	3
<b>Total Credit Hours</b>		<b>9</b>

## Biomedical Engineering - Graduate Certificate

The graduate certificate in biomedical engineering trains next-generation professional engineers to interface engineering and medicine with design and problem solving to improve human health.

- Apply knowledge and skills to a broad range of biomedical fields, from the establishment of disruptive imaging technologies or fabrication of new biomimetic tissue replacements to conception of innovative medical devices.

- Engage with clinical, veterinary, and entrepreneurial partners at cutting edge institutions along the Front Range such as Anschutz Medical Campus, Colorado State University for veterinary medicine and local companies, such as Allosource, Medtronic and Terumo, among others.
- Gain unique experience in translational and applied medicine.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admission Requirements

Applicants must provide the following items for admission to the certificate program:

- Statement of purpose (1-2 pages) explaining how the graduate certificate in biomedical engineering will benefit their professional and/or personal interests.
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree in engineering or a related field.
- One letter of support from a professional supervisor or a faculty member.

For more information, please contact the graduate advisor (find contact information on this program's Overview (p. 1627) tab)

### Required Courses and Credits

Nine credit hours of graduate level coursework will be required to complete the certificate program with a B grade or above in each course. A minimum GPA of 3.0 is required to remain in good academic standing.

Code	Title	Credit Hours
MCEN 5117	Anatomy and Physiology for Engineers	3
MCEN 5127	Biomedical Ultrasound	3
MCEN 5133	Intro to Tissue Biomechanics	3
MCEN 5228	Special Topics in Mechanical Engineering (Topics: Materials and Devices in Medicine; Biometric Materials; Mechanobiology; Mechanics of Soft Matter)	3
MCEN 6228	Special Topics in Mechanical Engineering	3

## Embedded Systems Engineering - Graduate Certificate

Most of us will casually encounter dozens of embedded systems by mid-morning each day throughout our residences, roadways and workplaces. Fundamentally, an embedded system is some combination of hardware and software that is designed for a particular function. It senses a real-world condition, does some computing, then produces output data or control of some kind.

These intelligent machines are a permanent part of our global landscape and are continuously being expanded and upgraded by a world of forward-thinking engineers and entrepreneurs. Application domains include aerospace and defense, energy, industrial automation, medical, networking and communication, security, transportation and more. Also expected to fuel much more growth is an overarching megatrend referred to as the Internet of Things (IoT), which involves connecting more embedded systems to the internet, enabling countless human-to-machine and machine-to-machine applications ranging from home automation to security and many beyond.

Fueled by dramatic reductions in size, cost and power consumption, combined with ever increasing availability of wireless networking technology, the industry estimates that there could be 100 billion connected devices by 2027. Revenue projections for IoT nodes, gateways, platforms, software and services could be as high as \$1,149 billion by 2027. This trend ushers in greater hardware and software design challenges for low-power and effectively managing and securing connected devices, as well as capturing and harnessing vast amounts of data produced by business operations. From whatever perspective students prefer to examine, the magnitude and breadth of opportunities is very clear across a multitude of end markets.

The embedded systems engineering certificate, which is offered by the Department of Electrical, Computer and Energy Engineering, provides students the competitive hardware and software knowledge and skills needed to design and implement these systems.

For more information, visit the department's Embedded Systems Engineering (<http://www.colorado.edu/ecee/graduate-program/degrees/embedded-systems/>) webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Application Requirements

Applicants for the certificate program must have been or currently be enrolled for a baccalaureate degree from an accredited institution and have satisfied the prerequisites for each course through coursework or work experience. They need not be enrolled in a degree-granting program at CU Boulder.

Graduate students pursuing an ESE certificate are not required to matriculate into the ESE program subplan through a master's degree.

Admission to a graduate degree-seeking program in the ECEE Department is *not* required for students pursuing only the certificate.

### Program Requirements

The embedded systems engineering (ESE) certificate curriculum consists of two core courses and one elective course from an approved list, totaling at least 9 credit hours. A grade of C or higher is required for each course applied toward the standalone certificate (or, toward a certificate being taken simultaneous to a degree in electrical engineering), along with a cumulative GPA of 3.0 for certificate qualification. A grade of B or higher is required to qualify for transfer from the nondegree to the master's degree program.

ESE certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student. However, credit hours may not count toward both a bachelor's and a master's degree.

Code	Title	Credit Hours
<b>Core Courses</b>		
Choose two of the following: <sup>1</sup>		6
ECEN 5613	Embedded System Design	
ECEN 5623	Real-Time Embedded Systems	
ECEN 5803	Mastering Embedded Systems Architecture	
<b>Elective</b>		
Choose one course from the approved ESE course list (core or elective). <sup>2</sup>		3
<b>Total Credit Hours</b>		<b>9</b>

<sup>1</sup> Students may complete the certificate by taking all three core courses, rather than taking two core courses and an ESE elective.

<sup>2</sup> Embedded Systems course list (<https://www.colorado.edu/ecee/graduate-program/degrees-programs/professional-masters-programs/embedded-systems/embedded-systems/>).

## Food Engineering - Graduate Certificate

This certificate introduces students to the local food industry in Colorado and potential career opportunities in the food industry. Students will learn key scientific concepts and engineering principles of food products. The certificate focuses on the science and engineering of foods like specialty coffee and chocolate. Students will receive both a broad overview and in-depth content on food engineering and food product design, in addition to learning about food sustainability.

### Requirements

To earn this certificate, students must complete 9 graduate level credits, or three 3-credit graduate courses. These credits may be chosen by the student, in consultation with certificate program faculty and the graduate advisors, based on the available courses and description of curriculum in subsection c) below. Courses offered each semester will depend on the availability of faculty. However, beginning with the Spring 2023 semester, at least one relevant course will be offered each fall and spring semester to ensure that students are able to make progress toward completion of the certificate.

All degree and non-degree seeking certificate students must meet the following minimum academic standards for successful completion of the certificate:

- Students must receive a minimum grade of a B or higher in each course applied towards certificate requirements; and
- A cumulative GPA of 3.0 or higher in certificate courses.

### Required Courses

Code	Title	Credit Hours
Students must take two of the following three courses:		
MCEN 5228	Special Topics in Mechanical Engineering (Design of Coffee)	3
MCEN 5228	Special Topics in Mechanical Engineering (Design of Chocolate)	3
MCEN 5228	Special Topics in Mechanical Engineering (Design of Beer)	3
Strongly recommended electives:		
MCEN 5228	Special Topics in Mechanical Engineering (Farm to Table: Sustainability in Contemporary Food Systems)	3
MDST 6351	Media, Culture & Food Politics	3
MCEN 5021	Introduction to Fluid Dynamics (Recommended only for students with engineering/math/physics undergraduate degree)	3
MCEN 5042	Heat Transfer (recommended only for students with engineering/math/physics undergraduate degree)	3
<b>Elective Courses</b>		
MCEN 5228	Special Topics in Mechanical Engineering (Household Energy Systems in the Global South)	3
MCEN 5022	Classical Thermodynamics (Recommended only for students with engineering/math/physics undergraduate degree)	3
MCEN/BMEN 5117	Anatomy and Physiology for Engineers	3
MSEN 5919	Special Topics in MSE: Mass Transport (Membranes)	1-5
ENVM 6100	Special Topics for Master of the Environment Program (Introduction to Food Systems)	3
ENVS 6305	Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions	3
ENVM 6100	Special Topics for Master of the Environment Program (Quantitative Analysis in Food Systems)	3

### Learning Outcomes

Students will:

- Be introduced to potential career opportunities in the food industry.
- Be introduced to the local food industry in Colorado.
- Learn the key scientific concepts and engineering principles of food products.
- Focus on the science and engineering of specialty coffee, food engineering and food product design.
- Understand the role of food at the intersection of science, engineering and culture.

# Power Electronics - Graduate Certificate

Power electronics is a key enabling technology in essentially all electronic systems ranging from wireless communication devices, portable and desktop computers, to telecommunication infrastructure systems, renewable energy systems, and industrial systems. The necessity for power electronics technology in these rapidly expanding areas creates a rising need for design engineers equipped with knowledge and skills to follow sound engineering principles and actively participate in multidisciplinary teams. The power electronics field has evolved rapidly with the advances in technology and introduction of many new application areas. As a result, it is likely that the required knowledge and skills were not in the curricula when many of today's professionals were in college. This creates a strong ongoing demand for continuing education of the workforce in the area of power electronics. The certificate program addresses the ongoing demand for skilled power electronics design engineers.

This program offers an opportunity for electrical engineers to obtain the specialized knowledge required to practice power electronics. It is intended for students and engineers having a BS degree in electrical engineering or equivalent.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

The Power Electronics Certificate (<https://www.colorado.edu/ecee/academics/graduate-programs/professional-masters/power-electronics/>) program was initiated by the Colorado Power Electronics Center, and is operated through the Department of Electrical, Computer, and Energy Engineering (<http://www.colorado.edu/ecee/>) and through Boulder Connect (<http://www.colorado.edu/connect/>). A grade of C or better is required for each course applied toward the certificate, along with a cumulative GPA of 3.0 in certificate courses.

Power electronics certificate credit hours may be applied towards a full master's degree, provided the student is admitted to the electrical engineering graduate program as a degree-seeking student. However, credit hours may not count toward both a BS and a master's degree.

## Required Courses and Semester Credit Hours

Code	Title	Credit Hours
ECEN 5797	Introduction to Power Electronics	3
ECEN 5807	Modeling and Control of Power Electronic Systems	3
ECEN 5817	Resonant and Soft-Switching Techniques in Power Electronics	3
<b>Total Credit Hours</b>		<b>9</b>

## Engineering Management

The Lockheed Martin Engineering Management Program (EMP) is a management and leadership program that prepares students in the engineering and technical fields for early to mid-career positions. It

is designed for students who are looking to advance in management, successfully contribute to the overall business or venture, and develop leadership skills.

The program offers a Master of Engineering, four engineering dual degrees and graduate certificates. Courses are offered both on campus and online (available in real-time distance class participation, as well as recorded videos for later viewing) to meet the needs of busy professionals. Courses are taught by faculty whose expertise in the engineering and technical industry and business leadership bring real-world experiences to the classroom.

For more information, visit the Lockheed Martin Engineering Management Program (EMP) (<http://www.colorado.edu/emp/>) website.

Course code for this program is EMEN.

## Master's Degree

- Engineering Management - Master of Engineering (ME) (p. 1635)

## Certificates

- Design for the Circular Economy (p. 1638)
- Design for the Circular Economy (Online) (p. 1636)
- Engineering Management in the Aerospace Industry (p. 1639)
- Innovation and Entrepreneurship in Engineering (p. 1639)
- Leadership and Management (p. 1639)
- Project Management (p. 1640)

## Partnership Certificate

- Water Engineering and Management (p. 1683)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Thomas, John ([https://experts.colorado.edu/display/fisid\\_167167/](https://experts.colorado.edu/display/fisid_167167/))  
Scholar in Residence; PhD, Arizona State University

Tobey, Kathryn  
Scholar in Residence; ME, University of Colorado Boulder

Van Atten, Bill  
Lecturer; MS, Johns Hopkins University

## Courses

### EMEN 5000 (3) Engineering Principles

Provides an appreciation, understanding, and perspective of the tasks and challenges faced in engineering disciplines. This introductory course offers non-engineers insight into how engineers think and approach problems. Explores different engineering disciplines by evaluating the tools used, main concepts, and how the discipline impacts daily life. Through a series of case studies, students will review successful and unsuccessful engineering projects.

**Requisites:** Restricted to graduate students in Engineering Management Program (EMEN) only.

### EMEN 5005 (3) Introduction to Applied Statistical Methods

Covers statistical reasoning and analysis in support of business and engineering decision making. Topics include: engineering and applied research, descriptive and inferential statistics to include estimation and hypothesis testing using both traditional parametric as well as nonparametric procedures for research situations involving one or two groups of treatment conditions. The R statistical analysis and programming system is used.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

### EMEN 5010 (3) Introduction to Engineering Management

Learn concept, methods, activities and philosophies of business and be encouraged to utilize them in your professional activities. Interact with engineering management faculty who share what works based upon their engineering management experiences. Engage with our classmates on their business experience, thereby preparing you to interact more thoughtfully and knowledgeably with your professional colleagues.

**Requisites:** Restricted to Engineering Management (EMEN) graduate students or Graduate Certificate Engineering (CRTGE) students only.

### EMEN 5015 (3) Engineering Communication

Enables students to communicate their thoughts and ideas in written and oral form in professional environments. Understand and demonstrate the ability to write a correctly-formed document. Develop active listening skills, particularly when providing and receiving feedback. Learn to orally communicate ideas by speaking clearly, persuasively, energetically, and with appropriate non-verbal elements. Present in various environments and to various audiences.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

### EMEN 5020 (3) Finance for Engineering Managers

This course empowers technical managers to make better financial management decisions about issues like capital budgeting, project selection, financial planning, and working capital management. The course also covers topics essential to engineering managers communicating outside of engineering, including interpreting financial statements, the time value of money, and determining financial metrics of NPV and IRR in project valuation. Special topics covered include triple bottom line accounting and sustainability reporting as part of corporate risk management initiatives.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**Recommended:** Prerequisites beginning algebra and familiarity working with Excel spreadsheets.

### EMEN 5030 (3) Fundamentals of Project Management

Project managers work cross-functionally to plan, monitor, and manage projects to successful completion. This course provides an introduction to the project management discipline, including the processes, tools and techniques used in the management and leadership of projects. Key topics covered include the role of the project manager; the project team; stakeholder communications and management; cost, schedule and risk management; quality in projects; and the project lifecycle.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5031 (3) Software Project Management**

Introduces software project management as a critical element of software development activities throughout every area of human endeavor. Learn the software life cycle, software configuration management, code reviews, architectural influences and quality assurance with automated testing. Explore the impact on project success of the Capability Maturity Model (CMM) and Unified Modeling Language (UML).

**Requisites:** Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

**Recommended:** Prerequisite software development experience.

**EMEN 5032 (3) Advanced Project Management**

Advances and elevates the practice of leading technical teams in pursuit of challenging timeline and budget objectives. Emphasizes the study of real-world, judgment-intensive decision-making via case studies drawn from well-known engineering projects. Acquire industry skills and knowledge relevant throughout one's career as engineering manager. Sophisticated tools such as Monte Carlo Analysis are investigated and assessed for real-world utility.

**Requisites:** Requires prereq courses of EMEN 5030 or MBAX 6440 (all min grade B). Restricted to Coll of Engineering grad students, Grad Certificate Engineering (CRTGE), Engr EMEN BAM students students w/ subplans C-ASENEMEN, C-ECENEMEN, C-EEEN-EME or C-MCENEMEN.

**EMEN 5033 (3) Aerospace Program Management**

Addresses project/program management as it is implemented in the aerospace industry. A significant portion of the aerospace industry is project based and these projects typically have responsibilities to two distinct primary stakeholders: the sponsor/customer and the business executing the project. This course expands on the traditional project management scope, specifically studying how the traditional scope of project management is tailored to aerospace projects, and studies how projects fit within the context of an aerospace business. A common, but not exclusive, theme of the course is the management of projects for which the U.S. Government (NASA, Department of Defense) is the customer.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**Recommended:** Prerequisite EMEN 5030 Fundamentals of Project Management.

**Grading Basis:** Letter Grade

**EMEN 5042 (3) Quality Management**

Focuses on the principles and practices of quality management in modern organizations. Students will develop an understanding of theories, methodologies, and tools used to achieve and maintain high levels of quality in products and services. Topics covered include Total Quality Management, Six Sigma, Lean Management, ISO 9001, and Continuous Improvement. Students will learn how to design and implement quality management systems, conduct process improvement initiatives, measure / analyze performance data, lead organizational change.

**Requisites:** Restricted to graduate students and Engineering Management BAM students only.

**EMEN 5043 (3) Systems for Quality Improvement**

Advanced study of methods, tools, techniques and systems associated with advanced quality applications. Includes a survey of advanced process control technologies, control schemes and measurement system analysis.

**Requisites:** Requires prerequisite course of EMEN 5042 (minimum grade B). Restricted to College of Engineering graduate students or Graduate Certificate Engineering (CRTGE) students only.

**EMEN 5050 (3) Leading Oneself**

The "Leading Oneself" course offers a comprehensive blueprint for professional's keen on honing their leadership capabilities, starting with the cornerstone of personal excellence. The curriculum delves into essential areas such as personal accountability, genuine leadership traits, individual brand development, enhanced self-awareness, fostering a growth mindset, mastering emotional intelligence, and achieving personal mastery. This content lays the foundation for all leadership to follow.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5052 (3) Leading Others**

Understand and apply leadership techniques that develop and sustain a high-powered technical organization. Specifically, students evaluate qualities associated with successful leaders, learn practical leadership skills such as defining roles and responsibilities, setting vision, coaching, and dealing with conflicts. The course then addresses team building, from hiring the right team members, to managing the team, and conducting effective team meetings.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5053 (3) Leading Technical Organizations**

Leadership of technical, complex organizations is challenged by the pace of technology development, innovation, hyper competition by new entrants and a workforce that demands to be engaged and recognized. Examining relevant technical organization leadership skills using the context of stakeholder value creation is the basis of this course. The class explores how leaders multiply their abilities by leading through others, develop an accountable team, build enduring relationships, exhibit leadership presence, and create executable strategies.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5054 (3) Neuroscience of Leadership**

Examines leadership techniques through the lens of social cognitive neuroscience and psychology. Utilizing the latest research, we develop a leadership practice based on neuroscience. Consideration for leading oneself, leading others and leading organizations is covered. Topics include neuroplasticity, psychological safety, resilience, mental toughness, primal power of storytelling, improv and creativity, as well as the subtle power of influence.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5055 (3) Leading for Diversity, Equity and Inclusion in Engineering**

This course focuses on the importance of embedding diversity equity inclusion (DEI) in engineering workplace environments. Students focus on the historical narrative of institutions and institutional structures that have shaped instances of inclusion and exclusion in engineering, how their own identity and background shape their thoughts and actions, and how transformational leadership is enacted for DEI in a challenging atmosphere.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5065 (3) Global Topics in Aerospace**

Examining current international space topics including civil, military, and commercial activities forms the basis for this course. The origins and evolution of space policy and laws, current organizational and governance structures, space economics, space sustainability, human exploration strategies, the future of space exploration, and recent developments in the commercial space sector will be analyzed. The course exposes students to the current context of the industry to prepare them for a career in the space economy.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5080 (3) Ethical Decision-Making in Engineering Management**

Learn how to recognize ethical issues and dilemmas affecting managers in the workplace. Understand various models and practices offering solutions to these issues and how to create a culture of ethics and integrity in supporting and/or building a profitable, healthy and responsible organization.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5090 (3) Marketing and Technology Ventures**

Why do great products often lose in tech markets? This course analyzes processes for developing the customer bases essential for commercial success. Student teams develop strategic launch programs for actual tech startups of their choosing. Students will analyze and discuss real-world case studies and alternative strategies. Structured towards professional applicability for engineers in large enterprises as well as startups.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5094 (3) Technology Entrepreneurship**

This course is designed for engineers, project managers, and technical leaders interested in learning how to leverage technology to solve problems and meet emerging market demands. Students learn how to apply a holistic approach that engages an entrepreneurial mindset with methods like entrepreneurial systems thinking and opportunity pattern recognition to identify and address target customer needs. The course empowers students with the knowledge, skills, and methods needed to create and launch a new technology company.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5215 (3) Applied Sustainability for Engineering Managers**

Provides students the tools to integrate sustainability into business. The course explores why social and environmental sustainability are important, and how successful companies are incorporating sustainability as a core strategy. It then addresses the engineer's role in developing sustainable products through principles of the circular economy and life cycle assessment. The course culminates with a discussion of triple bottom line accounting, and how companies use the sustainability report to demonstrate progress toward their sustainability goals.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students and Engineering Management BAM students only.

**EMEN 5220 (3) Product Design for the Circular Economy**

Product Design for the Circular Economy provides the tools and knowledge necessary to implement Circular Economy (CE) principles, including design frameworks defined by Design for  $\text{2R}$ , Cradle-to-Cradle, Biomimicry, ISO 14000 and several EU Directives. Products can be certified if they meet certain criteria, and the course covers the major certifications available today. Finally, the course shows how companies report their progress using methods prescribed by the Global Reporting Initiative (GRI).

**EMEN 5225 (3) Sustainable and Resilient Operations and Supply Chains**

Innovative organizations need leaders and managers who understand the complex nature of corporate social responsibility, sustainability, and resilience. In this course, students will learn strategies to become good corporate citizens while still creating value for stakeholders. Students will learn concepts and practices companies employ to manage business processes that meet business needs while reducing negative impacts on the pollution and waste. You will also learn to build a more sustainable and socially responsible supply chains.

**EMEN 5230 (3) Resilience Engineering and Leadership in Crisis**

This course examines the qualities, concepts, and methodologies of resilience leadership amid conditions of chaos, uncertainty, and catastrophic breakdowns of complex social, ecological, and technological systems. The curriculum draws on topics from resilience policy, resilience engineering, crisis leadership, contemporary literature, and current events. These components collectively build a comprehensive understanding of resilience as a dynamic blend of processes embedded within and across complex systems like critical infrastructure essential to public health, safety, security, and well-being.

**Requisites:** Restricted to graduate students and Engineering Management BAM students only.

**Grading Basis:** Letter Grade

**EMEN 5315 (3) Business Law for Engineering Managers**

Provides engineering students an introduction to important areas of business law likely to be encountered as technology and engineering managers. Topics include fundamental legal concepts, intellectual property and strategy, contracts, data privacy and product liability. The course uses experiential and practical approaches and exercises to enable the student to identify and address critical legal issues in real-world business contexts.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5316 (3) Engineering and the Legal Process**

Provides engineering students the experience of working through a product litigation case, beginning with understanding why products fail, to the various stages of the litigation process culminating in a mock trial where engineers are on the stand as expert witnesses. This course meets concurrently with LAWS 7343, engaging both engineering and law students in the same learning environment.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5400 (3) Technical Product Development**

Product Development introduces contemporary methods like design thinking and sustainability for the circular economy to identify and create products and services that address verified customer needs and problems. By focusing on solutions and benefits offered, the course takes a project-based approach from ideation, concept development, and prototyping to customer validation, pricing, and productization. Students learn how to present their product concepts to senior management or potential investors and showcase their prototypes in a tradeshow-like setting.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5405 (3) Fundamentals of Systems Engineering**

Examines the disciplined process of designing a complex system to meet a specified customer need. We begin with identifying the needed capability through operational and functional analysis, then progress through defining requirements that articulate operational and environmental capabilities that address reliability, maintainability, and producibility considerations across the system lifecycle. The course also introduces technical management tasks to include risk management, technology readiness assessment, and program controls using real-world, current aerospace industry examples.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5415 (3) Systems Requirements, Verification and Validation Fundamentals**

This course introduces the concepts of Requirements, Verification and Validation as applied during system development. Students completing this course will understand the terminology, usage, planning, organization roles, as well as how these methods are used during the system development lifecycle and how to determine what methods are appropriate for the type of project they may be working.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**Grading Basis:** Letter Grade

**EMEN 5500 (3) Lean and Agile Management**

Learn lean and agile concepts and tools to improve customer value, improve processes and reduce waste. Examine and apply lean and agile principles in diverse circumstances including hardware/software, product development/ongoing operations and manufacturing products/providing services. Apply your learning to improving performance in current responsibilities, whether as an individual contributor or as a manager.

**Equivalent - Duplicate Degree Credit Not Granted:** OPIM 6080

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 5825 (3) Intrapreneurship & Innovation**

Learn a comprehensive set of business concepts, skills and tools to launch and manage intrapreneurial ventures. Engage with faculty, classmates, guest speakers, industry professionals, potential customers and one's leadership team to help you launch your venture. Develop the necessary skills, tools and awareness to be successful colleagues, managers and leaders in scientific and engineering industries. Gain valuable business acumen using a hands-on and learning environment.

**EMEN 5830 (3) Special Topics**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students and Engineering Management BAM students only.

**EMEN 5840 (1-3) Independent Study Project**

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. Non-EMP students require instructor permission.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**EMEN 6805 (1) Capstone Preparation**

Students determine capstone research question, conduct literature review, develop research methodology and project plan, write a proposal, and select capstone committee.

**Requisites:** Requires prerequisite course of EMEN 5825 or EMEN 5900 (minimum grade C+). Restricted to graduate students in Engineering Management Program (EMEN) only.

**EMEN 6810 (3) Capstone**

Students use skills developed from their previous EMP courses to conduct an agreed-upon project (applied research, critical review, business proposal, management tool, etc.) on a topic of their interest. The course instructor and a specialized technical advisor will help guide the student to produce a high-quality project to be presented to the capstone committee for evaluation.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Engineering graduate students, Graduate Certificate Engineering (CRTGE) students and Engineering Management BAM students.

**Grading Basis:** Letter Grade

**EMEN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students in Engineering Management Program (EMEN) only.

## Engineering Management - Master of Engineering (ME)

The Master of Engineering in engineering management is an excellent alternative to an MBA for engineers, scientists and technical professionals who want to move into management. The program facilitates technically minded people to learn and practice data-driven management, develop leadership capabilities and apply proven principles for business performance improvement.

The core curriculum addresses the business basics of engineering management, project management, finance, technical communication and leadership. Elective courses provide in-depth skills in areas such as quality management, product management, R&D, ethical decision-making, lean and agile management, systems engineering and entrepreneurship. Graduates of the program are prepared to lead people and organizations and respond to the challenges that go along with managing engineering and technology businesses.

For more information, visit the program's Master of Engineering in Engineering Management (<http://www.colorado.edu/emp/programs/graduate-degree/master-engineering-management/>) webpage.

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

### Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Aerospace Engineering Sciences - Bachelor of Science (BSAE) (p. 742)
- Electrical and Computer Engineering - Bachelor of Science (BSEC) (p. 858)
- Electrical Engineering - Bachelor of Science (BSEE) (p. 861)
- Mechanical Engineering - Bachelor of Science (BSME) (p. 923)

### Requirements

The following course requirements are subject to change; for the most current information, visit the program's Degree Requirements (<http://www.colorado.edu/emp/degree-requirements/>) webpage.

#### Degree Requirements

The ME degree requires 30 credit hours. Students have the option to complete coursework only, consisting of four core courses and six elective courses, or the capstone option. The capstone is a 3-credit course that replaces one of the six electives required for the degree.

Code	Title	Credit Hours
<b>Required Courses</b>		
EMEN 5015	Engineering Communication	3
EMEN 5020	Finance for Engineering Managers	3
EMEN 5030	Fundamentals of Project Management	3
or EMEN 5031	Software Project Management	
or EMEN 5405	Fundamentals of Systems Engineering	
EMEN 5050	Leading Oneself	3
<b>Elective Courses</b>		
18 credits of EMEN coursework 5000 level or above will count, except for EMEN 5000		18
<b>Total Credit Hours</b>		<b>30</b>

### Dual Degree Programs

In addition to the Master of Engineering in engineering management, the Engineering Management Program also offers dual degrees in the following areas:

- Aerospace engineering sciences
- Computer science
- Electrical, computer and energy engineering
- Mechanical engineering

For more information, visit the program's Dual Graduate Degree Programs (<http://www.colorado.edu/emp/programs/graduate-degree/dual-degree-program/>) webpage.

### Engineering Management - Master of Engineering (ME) Online

The Master of Engineering in Engineering Management (ME-EM) degree hosted online through the Coursera platform is a fully accredited master's degree. ME-EM on Coursera students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts and diplomas.

The ME-EM is an excellent alternative to an MBA for engineers, scientists and technical professionals who want to move into management. The ME-EM prepares individuals for leadership roles within technology-driven industries. This highly multidisciplinary program integrates contemporary concepts of authentic leadership, organizational management and quantitative analysis to provide students the specific tools and knowledge to succeed in today's rapidly evolving business environment.

The program's core curriculum builds foundational skills in technical communication, project management, finance and leadership. Students then have the opportunity to dive deeper into subject of interest through a variety of elective courses including product development, technology entrepreneurship, systems engineering, innovation management, and more.

### Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1833) section of the catalog for more information.

## Program Requirements

The ME-EM on Coursera utilizes performance-based admissions for enrollment. There is no traditional application for admission to the degree. Students do not need to take the GRE or submit letters of recommendation or proof of language proficiency. Neither a prior degree nor university transcripts are required for admission. Because this is a purely online program, students do not need to complete a background check to enroll.

A student desiring admission to the ME-EM on Coursera must complete four required protocols:

1. Take one of the following two pathway specializations for credit:

- a. **Finance for Technical Managers (3 credit)**

Product Cost & Investment Cash Flow Analysis (1 credit)

Project Valuation and the Capital Budgeting Process (1 credit)

Financial Forecasting and Reporting (1 credit)

- b. **Project Management (3 credits)**

Foundations and Initiation (1 credit)

Project Planning and Execution (1 credit)

Agile Project Management (1 credit)

2. Achieve a computed pathway specialization grade-point average (GPA) of at least 3.00.
3. Have a cumulative GPA of at least 3.00 for all for-credit courses taken to date.
4. Declare their intent to seek the degree via the enrollment form, which they can do before, during, or after any work in a pathway specialization.

Upon completion of these four steps, the student is admitted to the ME-EM on Coursera. Students may successfully complete a designated pathway specialization and declare intent at any point in their academic journey. Completion of a pathway specialization is not required for students to begin earning academic credit, only to earn the degree.

Nondegree seeking students may enroll in for-credit courses. All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

## Prerequisites & Assumed Background Knowledge

There are no course prerequisites or corequisites for EMP courses on Coursera. Nevertheless, it is important that students are prepared for individual courses. Course descriptions will advise students of assumed incoming knowledge, and students are strongly encouraged to take course sequences in the order they are presented on the Coursera platform. *Students are also encouraged to take a non-credit version in some form before moving to the for-credit version to test whether they can succeed, especially if they are unsure whether they have the background knowledge required for a course.*

## Course Requirements

The ME-EM on Coursera is a non-thesis degree that requires 30 credit hours of coursework. Students must complete the following 12 credits of core coursework and 18 credits hours of elective courses (any EMEA courses count). Please note, 9 elective credit hours can be accepted from the MS-DS, MS-EE and MS-CS on Coursera programs.

Code	Title	Credit Hours
<b>Core Courses</b>		<b>12</b>
EMEA 5016	Communication as a Technical Leader	
EMEA 5017	Technical Managerial Written Skills	
EMEA 5018	Speaking to a Technical Group	
EMEA 5021	Product Cost and Investment Cash Flow Analysis	
EMEA 5022	Project Valuation and the Capital Budgeting Process	
EMEA 5023	Financial Forecasting and Reporting	
EMEA 5031	Project Management: Foundations and Initiation	
EMEA 5032	Project Planning and Execution	
EMEA 5033	Agile Project Management	
EMEA 5051	Leading Oneself with Self-Knowledge	
EMEA 5052	Leading Oneself with Purpose and Meaning	
EMEA 5053	Leading Oneself with Personal Excellence	
<b>Elective Courses</b>		<b>18</b>
Any EMEA course, along with up to 9 credits from the MS-DS, MS-EE and MS-CS programs on Coursera.		
<b>Total Credit Hours</b>		<b>30</b>

## Learning Outcomes

Upon completing the program, students will be able to:

- Identify, explain, and use engineering management concepts and theories.
- Analyze personal leadership awareness.
- Communicate effectively to technical and non-technical professionals.
- Evaluate the ethical and environmental implications of engineering and management practices.
- Analyze and design complex systems using multiple tools and systems.
- Interpret quantitative and qualitative data to make sound engineering and managerial decisions.
- Manage complex projects with a systems-approach.
- Understand the financial implications of engineering decisions.

## Design for the Circular Economy - Graduate Certificate (Online)

The design for the circular economy certificate on the Coursera platform provides students and working professionals the skills necessary to succeed in the emerging field of the circular economy, where businesses

are focused on redesigning products to be less resource intensive and can readily be transformed into new products at the end of their life.

Career opportunities in this field are expanding rapidly within business, government and nonprofit enterprises.

The curriculum focuses on the unique requirements of technical management of circular business models and product development initiatives within an organization, including cradle-to-cradle design methodologies, sustainable and resilient operations and supply chains, and leadership.

This program is offered 100% online, enabling students' greater flexibility with their work schedule and providing for broad reach to students across the globe.

## Requirements

The online Design for the Circular Economy Graduate Certificate is a 9-credit hour, 100% online program. The program offers three specializations consisting of nine 1-credit hour courses, as outlined below.

There are no prerequisites for any of the courses offered within the program, and students must achieve a B or better to obtain credit for the course.

Code	Title	Credit Hours
<b>Required Courses</b>		
EMEA 5216	Sustainability and the Circular Economy	1
EMEA 5217	Applied Sustainability Engineering	1
EMEA 5218	Leading the Circular and Sustainable Business	1
EMEA 5221	Defining the Circular Economy	1
EMEA 5222	Product Design for the Circular Economy	1
EMEA 5223	Circular Product Design Frameworks and Certifications	1
EMEA 5226	Sustainable and Resilient Operations Management	1
EMEA 5227	Developing and Managing Sustainable Supply Chains	1
EMEA 5228	Impacts of Sustainable Operations and Supply Chains	1
<b>Total Credit Hours</b>		<b>9</b>

## Learning Outcomes

Learning outcomes for completion of the certificate include foundational technical knowledge and practical professional skills. Students will be able to integrate sustainability and circular economy concepts with the design of products and services that have positive environmental and social impacts, while creating and leading organizations that incorporate principles and practices of the circular economy as core strategic initiatives.

Our graduates will be specialists in the rapidly emerging field of the circular economy. They will understand the underlying foundations of sustainability engineering, the context of how this knowledge can be successfully applied in a business setting, and the leadership

skills to drive transformational change within their organizations and communities. As specialists, students will be able to:

- Have a science and fact-based discussion with friends, family and work colleagues that explains the need to rapidly move to a more circular economy.
- Describe our current economic and industrial model of “take-make-waste” and the need to transition to a more resilient and sustainable circular economy.
- Design sustainable products and packaging using cradle-to-cradle methodologies.
- Quantitatively assess a product and organization's social and environmental impacts using the latest data scoring frameworks, including life-cycle analysis, carbon and water footprint analyses.
- Employ brand management strategies to communicate the organizations values and value proposition to their customers;
- Establish operations and supply chains consistent with the organization's sustainability and circular economy goals.
- Identify and apply international frameworks (i.e., ISO 14000) within the organization.

## Engineering Management - Graduate Certificate (Online)

Advancing your career as a successful manager of technical and engineering teams means demonstrating effective leadership and possessing a range of real-world competencies. In this online graduate certificate program through the Coursera platform, students will master the key elements of engineering management and business-related functions, including finance, project management and authentic leadership. Through this comprehensive approach to management, students will be well-prepared to make an immediate and significant impact within their organizations.

The Engineering Management Graduate Certificate is an affordable way to gain new skills, earn an industry-recognized credential, and prepare for career advancement. For students interested in continuing their education, the certificate consists of the first three specializations within the ME-EM on Coursera master's degree (<https://www.colorado.edu/emp/coursera/>) and can be stacked toward the full degree.

ME-EM and Engineering Management Graduate Certificate on Coursera students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts and diplomas.

## Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1833) section of the catalog for more information.

## Requirements

### Admission Requirements

There are no admission processes for learners seeking to earn the Engineering Management Graduate Certificate on the Coursera platform. All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

## Program Requirements

To earn the Engineering Management Graduate Certificate, students must earn 9 credit hours in the required courses listed below. To earn the certificate, students must have a separately computed minimum cumulative GPA of 3.00 across courses applicable toward the certificate. Certificate courses in which grades below C+ (2.3) are received may not be applied toward the certificate requirements.

## Prerequisite Knowledge

There are no formal prerequisites for the Engineering Management Graduate Certificate, but we recommend that prospective students have an undergraduate degree in engineering, science, or a technical field (including areas such as physics, applied mathematics, and computer science). If they do not have an undergraduate degree in engineering or a technical field, we recommend that students try the non-credit versions of courses to test their readiness before upgrading to the for-credit versions.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Finance for Technical Managers</b>		
EMEA 5021	Product Cost and Investment Cash Flow Analysis	1
EMEA 5022	Project Valuation and the Capital Budgeting Process	1
EMEA 5023	Financial Forecasting and Reporting	1
<b>Project Management</b>		
EMEA 5031	Project Management: Foundations and Initiation	1
EMEA 5032	Project Planning and Execution	1
EMEA 5033	Agile Project Management	1
<b>Leading Oneself</b>		
EMEA 5051	Leading Oneself with Self-Knowledge	1
EMEA 5052	Leading Oneself with Purpose and Meaning	1
EMEA 5053	Leading Oneself with Personal Excellence	1
<b>Total Credit Hours</b>		<b>9</b>

## Learning Outcomes

Upon completing the program, students will be able to:

- Analyze personal leadership awareness.
- Manage complex projects with a systems-approach.
- Understand the financial implications of engineering decisions.

## Design for the Circular Economy - Graduate Certificate

The certificate in design for the circular economy provides students and working professionals the skills necessary to succeed in the emerging field of the circular economy, where businesses are focused on redesigning products to be less resource intensive and can readily be transformed into new products at the end of their life.

Career opportunities in this field are expanding rapidly within business, government, and nonprofit enterprises.

The curriculum focuses on the unique requirements of technical management of circular business models and product development initiatives within an organization, including cradle-to-cradle design methodologies, sustainable and resilient operations and supply chains, and leadership.

## Requirements

Design for the circular economy is a 9-credit hour certificate program, with courses outlined below. There are no prerequisites for any of the courses offered within the program, and students must achieve a B or better in order to obtain credit for the course.

Code	Title	Credit Hours
<b>Required Courses</b>		
EMEN 5215	Applied Sustainability for Engineering Managers	3
EMEN 5220	Product Design for the Circular Economy	3
EMEN 5225	Sustainable and Resilient Operations and Supply Chains	3
<b>Total Credit Hours</b>		<b>9</b>

## Learning Outcomes

Learning outcomes for completion of the certificate include foundational technical knowledge and practical professional skills. Students will be able to integrate sustainability and circular economy concepts with the design of products and services that have positive environmental and social impacts, while creating and leading organizations that incorporate principles and practices of the circular economy as core strategic initiatives.

Our graduates will be specialists in the rapidly emerging field of the circular economy. They will understand the underlying foundations of sustainability engineering, the context of how this knowledge can be successfully applied in a business setting, and the leadership skills to drive transformational change within their organizations and communities. As specialists, students will be able to:

- Have a science and fact-based discussion with friends, family and work colleagues that explains the need to rapidly move to a more circular economy.
- Describe our current economic and industrial model of “take-make-waste” and the need to transition to a more resilient and sustainable circular economy.
- Design sustainable products and packaging using cradle-to-cradle methodologies.
- Quantitatively assess a product and organization’s social and environmental impacts using the latest data scoring frameworks, including life-cycle analysis, carbon and water footprint analyses.
- Employ brand management strategies to communicate the organizations values and value proposition to their customers.
- Establish operations and supply chains consistent with the organization’s sustainability and circular economy goals.
- Identify and apply international frameworks (i.e., ISO 14000) within the organization.

## Engineering Management in the Aerospace Industry - Graduate Certificate

The certificate in engineering management in the aerospace industry is designed for students enrolled in the MS in Aerospace Engineering or ME Engineering Management, as well as other master's degree programs (computer science, electrical engineering and mechanical engineering).

Learn leadership and program management skills widely employed by the aerospace industry in this jointly sponsored program between the Ann and H. J. Smead Aerospace Engineering Science Department and the Engineering Management Program.

For more information, visit the Engineering Management in the Aerospace Industry Certificate (<https://www.colorado.edu/emp/graduate-programs/traditional-semester-based-graduate-certificates/engineering-management-aerospace/>) webpage.

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

### Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
<b>Required Courses</b>		
EMEN 5030	Fundamentals of Project Management <sup>1</sup>	3
EMEN 5033	Aerospace Program Management	3
EMEN 5053	Leading Technical Organizations	3
EMEN 5065	Global Topics in Aerospace	3
<b>Total Credit Hours</b>		<b>12</b>

<sup>1</sup> May be waived for another course with experience or PMP; see department.

## Innovation and Entrepreneurship in Engineering - Graduate Certificate

Whether forming a new company, or being part of a larger organization, students interested in the innovation & entrepreneurship in engineering graduate certificate will learn how to develop new and innovative products, and the processes required to successfully introduce into the marketplace.

The certificate is a hands-on, practical series of courses that begins with a focus on the product development process, emphasizing where good product ideas come from, and identifying the characteristics that resonate with customers. From there, students learn how products are commercialized within the framework of an existing company and the methods necessary in launching a new high-tech startup.

All courses are taught by faculty that have successfully launched new products or new companies, and have therefore lived what they teach. Finally, the courses are project-based, culminating with student

presentations suitable for potential customers, their company's C-Suite or venture capitalists.

For more information, visit the Innovation & Entrepreneurship in Engineering Certificate (<http://www.colorado.edu/emp/Engineering-Entrepreneurship-Certificate/>) webpage.

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

### Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
<b>Required Courses</b>		
Choose four from the following:		12
EMEN 5020	Finance for Engineering Managers	
EMEN 5090	Marketing and Technology Ventures	
EMEN 5094	Technology Entrepreneurship	
EMEN 5215	Applied Sustainability for Engineering Managers	
EMEN 5400	Technical Product Development	
EMEN 5710	Enterprise Strategic Management	
EMEN 5315	Business Law for Engineering Managers	
<b>Total Credit Hours</b>		<b>12</b>

## Leadership and Management - Graduate Certificate

With the leadership and management graduate certificate from the Engineering Management Program, you'll gain an in-depth understanding of management, leadership and strategy deployment to improve performance quality; discover how to use natural strengths to become the best leader possible; learn to navigate ethical decisions and maintain integrity as a leader; and find the leverage points in an organization for delivering exceptional results.

For more information, see the Leadership and Management (<https://www.colorado.edu/emp/graduate-programs/traditional-semester-based-graduate-certificates/leadership-management-certificate/>) certificate webpage.

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

### Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
<b>Required Courses</b>		
EMEN 5020	Finance for Engineering Managers	3

EMEN 5030 or EMEN 5031 or EMEN 5405	Fundamentals of Project Management Software Project Management Fundamentals of Systems Engineering	3
EMEN 5050 or EMEN 5052 or EMEN 5053	Leading Oneself Leading Others Leading Technical Organizations	3
EMEN 5080	Ethical Decision-Making in Engineering Management	3
<b>Total Credit Hours</b>		<b>12</b>

## Project Management - Graduate Certificate

Project management is the leadership and control of unique, limited-duration undertakings to produce a new service, product or other desired outcome. Projects typically entail the formation and oversight of a team comprised of highly diverse staff, perhaps varying in experience, skills, location and employer, as well as personal background. The project manager assumes responsibility for ensuring overall success of the endeavor given an array of challenges. Fundamental to those is of course the nature of limited resources, generally defined in terms of cost and time, with engineering projects aggregating additional factors of quality and scope.

Projects are fundamental to nearly all engineering sectors, including aerospace, civil, software, medical devices, electronics, materials science and environmental. Project managers apply their skill and knowledge, both of engineering process/systems as well as of team leadership, to ensure the successful progression and completion of the undertaking at hand. Successful PMs thrive in dynamic, complex environments under continual change. Many times PMs are tapped to lead organizations through significant crises. PMs have the talent and experience to lead ad-hoc groups towards an effective and strategic response, in real-time and under challenging demands.

Individuals who aspire to be agents of change and assume a central role in balancing many forces should consider a project management certificate towards entry into this thriving profession.

For more information, see the Project Management (<http://www.colorado.edu/emp/programs/graduate-program/certificates/project-management/>) certificate webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

This certificate requires 12 credit hours.

Code	Title	Credit Hours
EMEN 5030 or EMEN 5031	Fundamentals of Project Management Software Project Management	3
EMEN 5032	Advanced Project Management	3
EMEN 5033	Aerospace Program Management	3

EMEN 5405	Fundamentals of Systems Engineering	3
<b>Total Credit Hours</b>		<b>12</b>

## Environmental Engineering

The Environmental Engineering Graduate Program (<http://www.colorado.edu/even/>) focuses on the fundamental and applied understanding of the processes which govern our natural and engineered environmental systems.

The program consists of over 35 research and instructional faculty members and about 70 graduate students, covers topics ranging from drinking and wastewater treatment, water reuse, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering. The program offers MS, Professional MS, and PhD degrees in environmental engineering.

For more information, visit the Environmental Engineering Program (<https://www.colorado.edu/even/prospective-students/>) website.

**Course code for this program is EVEN.**

## Master's Degrees

- Environmental Engineering - Master of Science (MS) (p. 1642)
- Environmental Engineering - Professional Master of Science (MSENV) (p. 1644)

## Doctoral Degree

- Environmental Engineering - Doctor of Philosophy (PhD) (p. 1645)

## Certificate

- Architectural Lighting - Graduate Certificate (p. 1627)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Senior Instructor; PhD, University of Colorado Boulder

## Courses

### **EVEN 5131 (3) Air Pollution Control Engineering**

Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 5131 and MCEN 4131 and EVEN 4131

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering or Environmental Engineering undergraduate majors only.

### **EVEN 5444 (3) Analytical Methods, Experimental Design, and Applied Data Analysis**

Focuses on experimental design and applied statistical methods for data analysis in the environmental engineering field. Students learn how to design and interpret experiments considering multiple variables, avoid confounding effects, and identify interactions between variables. Statistical tools are applied to analytical methods to validate environmental analytical samples. Students learn how to decipher analytical methods to ensure that environmental samples are collected and analyzed following robust quality assurance/quality control procedures.

**Requisites:** Restricted to College of Engineering and Applied Science graduate students or BS/MS Concurrent Degree Students only.

**Recommended:** Prerequisite an undergraduate statistics course.

**Grading Basis:** Letter Grade

### **EVEN 5514 (3) Bioremediation**

Advanced study on biological processes used to treat toxic organic and inorganic compounds contained in contaminated water, air, and soil; design and evaluation of in situ toxic compound biotransformation; fundamentals of phytoremediation; critical reviews of current literature on bioremediation.

**Equivalent - Duplicate Degree Credit Not Granted:** CVEN 5514

**EVEN 5584 (3) Sustainable Engineering Design**

Introduces students to sustainable design and quantitative sustainability assessment methods. Students will develop an understanding of quantitative sustainable design and how to navigate engineering decision-making. Students will learn tools for economic (life cycle costing, LCC) and environmental (life cycle assessment, LCA) sustainability assessments, and how to link these tools to engineering design decisions under uncertainty. Students will design engineered technologies individually and in teams, with special attention to energy and water technologies. Main course objectives are that students will have the ability to assess the relative sustainability of design alternatives using quantitative tools and to complete the detailed design of civil/environmental engineering infrastructure while navigating trade-offs across and within dimensions of sustainability.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**EVEN 5830 (1-3) Environmental Engineering Special Topic**

Supervised study of special topics of interest to students under instructor guidance.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**EVEN 5959 (3) International Environmental Impact Assessment**

Provide elements needed to develop Environmental Impact Assessments (EIA) in countries around the world. Familiarizes students with terms and definitions used in environmental practice. Explains the application of methodologies/tools used globally in EIA studies, taking into consideration the cause-effect relationships between project activities and the environment. Overview of World Bank and regional evaluation criteria driven by local ecosystems, society, and regulations. Case studies focus on the application of tools/methodologies and criteria in various international scenarios.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 4959

**Requisites:** Requires prerequisite or corequisite course of EVEN 3414 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

**Recommended:** Prerequisite or corequisite EVEN 3550.

**EVEN 5979 (1-3) Introduction to Humanitarian Aid**

Addresses the humanitarian-development nexus and gives an overview of the main ethical and professional principles, standards, and key stakeholders involved in humanitarian aid. Students will learn the historical and legal frameworks that shaped these principles, and examine their applicability to the challenges faced by humanitarian actors today. Increasing frequency, intensity, complexity, and length of emergency situations require new approaches and coordination among historically divided humanitarian and development actors.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.

**Recommended:** Prerequisite CVEN 4839/5919 Global Development for Engineers.

**Grading Basis:** Letter Grade

**EVEN 5989 (1-3) Disaster Risk Reduction**

Explores disaster governance, the decentralization of disaster resources and responsibilities, and best practices and tools in preparedness and mitigation. Students will examine the intersection of development, climate change, and disasters, by studying the impact of crisis events on human, social, and political behavior, and associated responses from impacted populations. Students will learn how to use data, tools, and geospatial techniques (GIS) that can inform and enhance vulnerability assessments, mitigation planning, and response operations.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.

**Recommended:** Prerequisite CVEN 4839/5919 Global Development for Engineers, or EVEN 5979, Introduction to Humanitarian Aid.

**Grading Basis:** Letter Grade

**EVEN 5999 (1-3) Refugees and Displacement**

Examines the processes and policies contributing to and driving refugee and migration flows, as well as response strategies. The focus will be on forced displacement, which currently impact the lives of almost 80 million people worldwide. This course covers solutions, particularly in the settlement context, for the appropriate provision of covered living space to adequately shelter displaced populations, while also promoting safer, healthier settlements that link emergency shelter and settlement assistance to longer-term recovery efforts. Previously offered as a special topics course.

**Requisites:** Restricted to students with 57-180 credits (Junior or Senior) or graduate students only.

**Recommended:** Prerequisites CVEN 4839/5919, EVEN 5979 and EVEN 5989.

**Grading Basis:** Letter Grade

**EVEN 6504 (3) Advanced Physical-Chemical Processes for Water and Water Reuse Treatment**

Teaches the process fundamentals of (1) granular activated carbon adsorption (2) UV, ozone and advanced oxidation processes (3) membrane filtration and reverse osmosis treatment and (4) ion exchange. These processes, as applied to impaired water sources, including brackish/saline/saltwater and wastewater reuse, will address water quality parameters including pathogenic microorganism, background organic matter, specific organic contaminants, metals and salts.

**Requisites:** Requires prerequisite course of CVEN 5524 (minimum grade C-).

**Grading Basis:** Letter Grade

**EVEN 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**EVEN 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**EVEN 6960 (1-3) Master's Report**

Offers report research under faculty supervision. Faculty advisor consent required.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**EVEN 8990 (1-10) Doctoral Dissertation**

**Repeatable:** Repeatable for up to 10.00 total credit hours.

## Environmental Engineering - Master of Science (MS)

The Master of Science in the Environmental Engineering Program focuses on fundamental and applied understanding of the processes that govern our natural and engineered environmental

systems. The program of over 35 research and instructional faculty members and about 70 graduate students covers topics ranging from drinking and wastewater treatment, water re-use, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering.

For more information, visit the Environmental Engineering Program (<https://www.colorado.edu/even/prospective-students/>) website.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): BSEV in Environmental Engineering (p. 805)

## Requirements

### General Requirements

The following course requirements are subject to change; for the most current information, visit the Program's Curriculum and Courses (<http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/>) webpage.

Students must complete at least 30 credit hours.

For students who have undertaken prior graduate study, up to 9 hours of relevant graduate-level coursework may be transferred to meet the course requirements for the MS degree, following the rules established by the Graduate School for transfer credit.

### Degree Plans

Requirements for the Master of Science in environmental engineering can be fulfilled in two ways.

#### Plan I: Thesis Option

In addition to 24 credit hours of coursework, candidates complete 4–6 credit hours of thesis credit with a sum of course and thesis credit of at least 30 hours. Additionally, the successful completion and defense of an MS thesis is required.

#### Plan II: Non-Thesis Option

In addition to 24 credit hours of coursework, candidates complete an additional 6 credit hours of elective courses or independent study.

### Course Requirements

Code	Title	Credit Hours
<b>Required Common Core</b>		<b>6</b>
CVEN 5464	Environmental Engineering Processes	3
CVEN 5404	Water Chemistry	3
or CHEM 5151	Atmospheric Chemistry	
<b>Emphasis Area</b>		<b>12-18</b>
See list below		
<b>Electives</b>		<b>0-9</b>
Elective courses will be determined in consultation with the student's faculty advisor.		

#### Environmental Engineering Graduate Seminar 0

Two semesters of Environmental Engineering graduate seminar, a non-credit seminar requiring attendance at 2/3 of the seminars each semester for satisfactory completion.

#### Plan I: Thesis Option 4-6

Thesis Credits

#### Plan II: Non-Thesis Option 6

Additional elective or independent study credits

## Requirements for Recommended Emphasis Areas

### General Environmental Engineering Emphasis

Code	Title	Credit Hours
CVEN 5484	Applied Microbiology and Toxicology	3
MCEN 5131	Air Pollution Control Engineering	3
CVEN 5524	Drinking Water Treatment	3
or CVEN 5534	Wastewater Treatment	
Select one of the following:		
CVEN 5537	Numerical Methods in Civil Engineering	3
or CVEN 5454	Statistical Methods for Natural and Engineered Systems	
<b>Total Credit Hours</b>		<b>12</b>

### Drinking Water, Wastewater and Water Reuse Treatment Emphasis

Code	Title	Credit Hours
CVEN 5484	Applied Microbiology and Toxicology	3
CVEN 5524	Drinking Water Treatment	3
CVEN 5534	Wastewater Treatment	3
Select one of the following:		
CVEN 5537	Numerical Methods in Civil Engineering	3
or CVEN 5454	Statistical Methods for Natural and Engineered Systems	
<b>Total Credit Hours</b>		<b>12</b>

### Natural Waters Emphasis

Code	Title	Credit Hours
CVEN 5424	Environmental Organic Chemistry	3
CVEN 5353	Groundwater Hydrology	3
CVEN 5333	Physical Hydrology	3
CVEN 5323	Applied Stream Ecology	3
CVEN 5537	Numerical Methods in Civil Engineering	3
or CVEN 5454	Statistical Methods for Natural and Engineered Systems	
<b>Total Credit Hours</b>		<b>15</b>

### Global Engineering Emphasis

Code	Title	Credit Hours
CVEN 5919	Global Development for Engineers	3
CVEN 5939	Global Development Practicum	3
CVEN 5969	Water, Sanitation, and Hygiene	3
CVEN 5484	Applied Microbiology and Toxicology	3
CVEN 5524	Drinking Water Treatment	3

or CVEN 5534	Wastewater Treatment
or MCEN 5131	Air Pollution Control Engineering

**Total Credit Hours** **15**

### Air Quality Emphasis

Code	Title	Credit Hours
MCEN 5131	Air Pollution Control Engineering	3
MCEN 5021	Introduction to Fluid Dynamics	3
or CVEN 5313	Environmental Fluid Mechanics	

Select one of the following:

MCEN 5141	Indoor Air Pollution	3
or MCEN 5161	Aerosols	
or CVEN 5484	Applied Microbiology and Toxicology	

Select one of the following:

CVEN 5537	Numerical Methods in Civil Engineering	3
or CVEN 5454	Statistical Methods for Natural and Engineered Systems	

**Total Credit Hours** **12**

### Water & Engineering Management Emphasis

Code	Title	Credit Hours
CVEN 5564	Water Profession: Communication and Utility Finance	3
CVEN 5574	Water Utility Management: Current Issues and Future Challenges	3
CVEN 5584	Water Profession: Leadership and Management	3

## Environmental Engineering - Professional Master of Science (MSENV)

The professional master's degree (MSENV) in environmental engineering is a coursework-only program that offers possibilities for a range of prospective students.

Whether a prospective student is a working engineer or an undergraduate considering widening their exposure to areas of environmental engineering, we have program options to meet their needs. Prospective professional master's degree students may choose between three different tracks:

- Environmental engineering
- Water reuse
- Water engineering & management

For more information, visit the department's Curriculum and Courses (<http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/>) webpage.

## Requirements

### General Requirements

The following course requirements are subject to change; for the most current information, visit the Program's Curriculum and Courses (<http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/>) webpage.

[www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/](http://www.colorado.edu/even/prospective-students/graduate-studies/curriculum-and-courses/)) webpage.

The professional master's degree requires 30 credit hours of graduate-level courses with a minimum cumulative GPA of 3.00.

For students who have undertaken prior graduate study, up to 9 semester credit hours of relevant graduate-level course work may be transferred to meet the course requirements for the MSENV degree, following the rules established by the Graduate School for transfer credit.

## Program Tracks

### General Environmental Engineering Track

Code	Title	Credit Hours
<b>Required Courses</b>		
CVEN 5464	Environmental Engineering Processes	3
CVEN 5404	Water Chemistry	3
or CHEM 5151	Atmospheric Chemistry	
CVEN 5484	Applied Microbiology and Toxicology	3
MCEN 5131	Air Pollution Control Engineering	

### Electives

Choose one of the following:	3
CVEN 5524	Drinking Water Treatment
CVEN 5534	Wastewater Treatment
Choose five additional electives in consultation with the student's faculty advisor.	15

**Total Credit Hours** **27**

### Water Reuse Track

Code	Title	Credit Hours
<b>Required Courses</b>		
CVEN 5464	Environmental Engineering Processes	3
CVEN 5484	Applied Microbiology and Toxicology	3
CVEN 5404	Water Chemistry	3
CVEN 5524	Drinking Water Treatment	3
CVEN 5534	Wastewater Treatment	3

### Water Reuse Required Courses

CVEN 5594	Water Reuse and Reclamation	3
CVEN 5834	Special Topics (Water Reuse Planning and Implementation)	3

### Elective Courses

<i>General Water Reuse Track:</i>	9
Choose one of the following	3
CVEN 5393	Water Resources System and Management
CVEN 5834	Special Topics (Advanced Water Treatment)

And choose two from the following or above: 6

CVEN 5564	Water Profession: Communication and Utility Finance
CVEN 5574	Water Utility Management: Current Issues and Future Challenges
CVEN 5424	Environmental Organic Chemistry
EVEN 5584	Sustainable Engineering Design

<i>Water Reuse Management Track</i>		9
CVEN 5393	Water Resources System and Management	
CVEN 5564	Water Profession: Communication and Utility Finance	
CVEN 5574	Water Utility Management: Current Issues and Future Challenges	
<i>Water Reuse Advanced Technology Track</i>		9
CVEN 5834	Special Topics (Advanced Water Treatment)	
EVEN 5584	Sustainable Engineering Design	
CVEN 5424	Environmental Organic Chemistry	
<b>Total Credit Hours</b>		<b>30</b>

### Global Environmental Engineering Track

Code	Title	Credit Hours
<b>Required Courses</b>		
CVEN 5464	Environmental Engineering Processes	3
CVEN 5404	Water Chemistry	3
or CHEM 5151	Atmospheric Chemistry	
CVEN 5484	Applied Microbiology and Toxicology	3
CVEN 5919	Global Development for Engineers	3
CVEN 5939	Global Development Practicum	3
<b>Global Engineering Series <sup>1</sup></b>		
Choose one of the following:		3
CVEN 5969	Water, Sanitation, and Hygiene	
MCEN 5228	Special Topics in Mechanical Engineering (Household Energy Systems in the Global South)	
Choose 6 one-credit modules from remaining Global Engineering Series offerings:		6
EVEN 5004	Introduction to Humanitarian Aid	
EVEN 5014	Disaster Risk Reduction	
EVEN 5024	Refugees and Displacement	
CVEN 5837	Special Topics for Seniors/Grads (Program & Project Management (1), Solution Identification & Proposal Development (1), Community Appraisal (1), Study Design & Impact Evaluation (1), Data Collection & Analysis Tools (1))	
CVEN 5838	Special Topics (Intro to Development Economics for Engineers (1), Intro to Global Health for Engineers (1))	
<b>Electives</b>		
Choose one of the following:		3
CVEN 5524	Drinking Water Treatment	
CVEN 5534	Wastewater Treatment	
MCEN 5131	Air Pollution Control Engineering	
Choose one additional elective in consultation with the student's faculty advisor.		3
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Global Engineering Series course options can be found on the Mortenson Center website (<https://www.colorado.edu/center/mortenson/graduate-education/professional-masters-degrees/>).

## Environmental Engineering - Doctor of Philosophy (PhD)

The Environmental Engineering Graduate Program (<http://www.colorado.edu/even/>) focuses on fundamental and applied understanding of the processes that govern our natural and engineered environmental systems. The program of over 35 research and instructional faculty members and about 70 graduate students covers topics ranging from drinking and wastewater treatment, water re-use, ecosystem processes, fate and transport of contaminants, alternative energy, air quality, sustainability and global engineering.

For more information, visit the Environmental Engineering Program (<https://www.colorado.edu/even/prospective-students/>) website.

### Requirements

The PhD in environmental engineering requires 30 credit hours of relevant graduate-level coursework, plus 30 credit hours of thesis credit. PhD students are also required to successfully complete a preliminary exam, a comprehensive exam and a final dissertation defense.

Applicants for this degree must demonstrate the capability for both rigorous academic accomplishments and independent research.

All doctoral students must have completed the environmental engineering core courses (6 credit hours), and a quantitative analysis class (3 credit hours). Coursework must be completed with a minimum cumulative GPA of 3.00.

Graduates of the department's MS program may transfer up to 30 credit hours of relevant graduate-level courses, pending program approval. Up to 21 credit hours of previous graduate-level work from another institution may be transferred with advisor and Graduate School approval.

### Preliminary Examination

Students must pass a preliminary examination based on MS degree-level coursework in environmental engineering topics. Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. The student must pass this examination in order to continue in the doctoral program.

### Comprehensive Examination

By no later than the fifth semester, students must also take and pass a comprehensive examination. The comprehensive examination shall consist of a written and an oral examination. The exam may not be attempted until the student's last semester of formal coursework. At the comprehensive examination, the student shall present a plan for the dissertation research to the advisory committee for approval. Failure to pass the comprehensive examination may be remedied by repeating the examination after an interval of not less than four months.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member who is a member of the Environmental Engineering Program faculty.

## Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

# Materials Science and Engineering

The Materials Science and Engineering (MSE) program at CU Boulder is an interdisciplinary, graduate-level program that allows students to explore science at the intersection of advanced chemistry, biology, engineering and physics. Our faculty members work across a broad range of scientific and engineering disciplines (<https://www.colorado.edu/mse/news-events-0/>), but all share expertise and passion for materials development and application. Students will achieve their educational goals through a combination of cross-disciplinary coursework and research under the supervision of one or more of the program's science and engineering faculty members.

The program offers two degrees to provide students with the necessary skills to be successful in industry. At CU Boulder, students have the opportunity to choose from seven unique program tracks for specialization including:

- Electronic, magnetic and photonics materials
- Soft materials
- Structural materials
- Materials characterization and processing
- Materials for energy
- Biomaterials
- Computational materials science

The MSE program is directed by Professor Stephanie Bryant of the Department of Chemical and Biological Engineering. For more information, see the Materials Science & Engineering Program (<https://www.colorado.edu/mse/>) website.

## Master's Degree

- Materials Science and Engineering - Professional Master of Science (MS) (p. 1648)

## Doctoral Degree

- Materials Science and Engineering - Doctor of Philosophy (PhD) (p. 1649)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Research Professor; PhD, Tel Aviv Univ (Israel)

## Courses

### **MSEN 5000 (1-3) Fundamentals of Materials Science and Engineering**

Discusses fundamental topics in materials science and engineering.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MSEN 5064 (3) Soft Machines**

Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4046 and MCEN 5046

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

**Grading Basis:** Letter Grade

**MSEN 5270 (3) Materials Characterization for Engineering**

Rigorous materials characterization is at the heart of understanding property-structure-processing relationships of materials, including soft matter. The goal of the course is to prepare graduate students to understand the basic principles behind material characterization tools and techniques. This class will offer students (1) an introduction to the principles and practice of diffraction, (2) introductory exposure to common characterization methods for the determination of structure, composition, and defects in inorganic and organic solids.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MSEN 5370 (3) Materials Thermodynamics and Kinetics**

Reviews fundamentals of thermodynamics and kinetics and applies them to understand the chemical, thermal, and mechanical behavior of materials. Examines equations of state, solution theory, equilibrium diagrams, and phase changes. Examines kinetics of phase transformations including theories of diffusion, nucleation and growth, and solidification.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MSEN 5430 (3) Transmission Electron Microscopy in Materials Science & Engineering**

This course provides a comprehensive introduction to transmission electron microscopy (TEM) as a powerful characterization tool in materials science. It is aimed at beginners and intermediate users of TEM and covers both the theoretical and practical aspects of advanced electron microscopy techniques. By taking this course, students will be able to interpret and analyze TEM data and understand electron microscopy publications. Students will learn the necessary theoretical basis for taking practical training on modern aberration-corrected TEMs. Previously offered as a special topics course.

**Requisites:** Restricted to students with 87-180 credits (Senior, 5th Yr Senior) or graduate students only.

**Recommended:** Prerequisite Experience on electron microscopy is recommended but not necessary.

**Grading Basis:** Letter Grade

**MSEN 5470 (3) Materials Composition and Structure**

The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.

**MSEN 5840 (1-6) Independent Study**

Offers an opportunity for students to do independent work. Subject arranged to fit the needs of the student.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to MS and PhD students in the Materials Science and Engineering program (MTEN) only.

**MSEN 5919 (1-5) Special Topics in MSE: Mass Transport**

Mass Transport Phenomena for Materials & Membranes: Fundamentals of mass transport with particular attention to design problems associated with materials science (reactive 3d printing), electrochemistry and energy systems (fuel cells & batteries), environmental concerns (CO<sub>2</sub> capture), and general separations (water desalination). The principles of transport phenomena in material systems, involving multiple components, phases, chemical reaction, and simultaneous momentum, heat and mass transport will be discussed

**Repeatable:** Repeatable for up to 10.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**MSEN 6101 (1) Seminar in Materials Science and Engineering**

Required of all materials science and engineering PhD students. Student, faculty, and guest presentations and discussions of current research in materials science and engineering.

**Recommended:** first- and second-year materials science and engineering PhD MSE students.

**Grading Basis:** Letter Grade

**MSEN 6930 (3) Materials Science and Engineering Professional Internship**

This class provides a mechanism for MSE graduate students to receive academic credit for internships with industry partners that include an academic component suitable for graduate-level work. Participation in the course will consist of an internship agreement between the student and an industry partner who will employ the student in a role that supports the academic goals of the MSE program and the internship. Instructor participation will include facilitation of the mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term after one semester of coursework in MSE graduate program.

**Grading Basis:** Letter Grade

**MSEN 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to MS students in the Materials Science and Engineering program (MTEN) only.

**MSEN 8990 (1-10) Doctoral Dissertation**

Doctoral Dissertation hours

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to PhD students in the Materials Science and Engineering program (MTEN) only.

## Materials Science and Engineering - Professional Master of Science (MS)

CU Boulder's Professional Master of Science degree in Materials Science and Engineering provides students with a wide range of knowledge within the broad industry of materials engineering. Students in the professional master's program complete 30 hours of coursework covering cutting-

edge industry topics, such as traditional and emerging materials systems, experimental methods and advanced computational analyses.

For more information, visit the program's Professional Master's Degree (<http://www.colorado.edu/mse/professional-masters-degree/>) webpage.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Biological Engineering - Bachelor of Science (BSCB) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/chemical-biological-engineering/biological-engineering-bachelor-science-bscb/#acceleratedmasterstext>)
- Chemical Engineering - Bachelor of Science (BSCHE) (p. 780)
- Mechanical Engineering - Bachelor of Science (BSME) (p. 923)

## Requirements

All Professional Master's students must declare a track by their second semester. Students enrolled in the professional master's program are not eligible to hold a teaching assistantship or research assistantship appointment. The following course requirements are subject to change; for the most current information, visit the department's coursework (<https://www.colorado.edu/mse/current-students/coursework/>) webpage.

Code	Title	Credit Hours
<b>Required Core Courses for All Tracks</b>		
MSEN 5919	Special Topics in MSE: Mass Transport (Functional Materials Chemistry)	3
MSEN 5370	Materials Thermodynamics and Kinetics	3
MSEN 5919	Special Topics in MSE: Mass Transport (Materials Characterization in Engineering)	3
<b>Specialized Track Courses</b>		<b>12</b>
Students must take four approved track-specific courses		
<b>Breadth Electives</b>		<b>9</b>
Students must select three breadth electives with approval of the MSE Graduate Advisor. Independent study and MSEN 5000 may count as breadth electives. Prof. MS students may also take up to 6 credit hours of Engineering Management courses.		
<b>Total Credit Hours</b>		<b>30</b>

## Materials Science and Engineering - Doctor of Philosophy (PhD)

The Materials Science and Engineering (MSE) program is an interdisciplinary PhD program aimed at providing a rigorous education

in materials science and engineering and the fundamental physics, engineering, chemistry and biology that underlie this discipline.

Educational goals are achieved through both coursework and training in cross-disciplinary research supervised by one or more science and engineering faculty members.

For more information, visit the Materials Science and Engineering (<http://www.colorado.edu/mse/>) website.

## Requirements

All PhD students must declare a track by the second semester. With the approval of their advisor, the student can change tracks. The course program should represent a coordinated approach to the attainment of the student's ultimate goals, including class work, professional preparation and research.

The following course requirements are subject to change; for the most current information, visit the department's Coursework (<http://www.colorado.edu/mse/graduate-study/coursework/>) webpage.

Code	Title	Credit Hours
<b>Required Core Courses for All Tracks</b>		
MSEN 5919	Special Topics in MSE: Mass Transport (Functional Materials Chemistry)	3
MSEN 5370	Materials Thermodynamics and Kinetics	3
MSEN 5919	Special Topics in MSE: Mass Transport (Materials Characterization in Engineering)	3
<b>Specialized Track Courses</b> <sup>1</sup>		<b>12</b>
Students must take four approved track-specific courses		
<b>Breadth Electives</b>		<b>9</b>
Students must select three breadth electives with approval of the PhD research advisor and program. Independent study and MSEN 5000 may count as breadth electives.		
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Required track-specific courses and approved track-specific electives are listed on the department's Coursework (<http://www.colorado.edu/mse/graduate-study/coursework/>) webpage.

## Preliminary Examination

The preliminary exam will normally be given in the spring of the student's second year. If the first attempt is failed, a second attempt will be scheduled in the following months. The second prelim attempt should be completed before the beginning of the third academic year. Students who have a master's degree should complete the preliminary exam in the third semester of study. If a student fails their first attempt, then they must retake the exam at latest in the following semester. Two successive failures result in a terminal MS as the highest possible degree.

## Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All degree requirements must be completed within six years of the date of commencing course work.

# Mechanical Engineering

CU Boulder's Mechanical Engineering Graduate Program (<http://www.colorado.edu/mechanical/prospective-students/graduate/>) is one of the top ranked programs in the U.S. News & World Report Best Graduate Schools issue among public universities. Students receive a strong education and conduct groundbreaking tier-one research. We have 50+ faculty members conducting fundamental and applied research in air quality, biomedical, materials, mechanics of materials, micro/nanoscale, robotics and systems design, and thermo fluid sciences.

Boulder is also home to research and development operations for many large companies and four federal research labs: the National Center for Atmospheric Research, the National Institute for Standards and Technology, the National Oceanic and Atmospheric Administration, and the National Renewable Energy Laboratory.

Recent doctoral and master's graduates accepted employment at companies including, but not limited to: ConocoPhillips, Ford, Google, NASA Jet Propulsion Laboratory, Lockheed Martin, Nike, Sandia National Laboratories and Seagate. Many of our graduating PhD students also enter careers in academia.

## Master's Degrees

- Mechanical Engineering - Master of Science (MS) (p. 1660)
- Mechanical Engineering - Professional Master of Science (MSME) (p. 1661)

## Doctoral Degree

- Mechanical Engineering - Doctor of Philosophy (PhD) (p. 1661)

## Certificates

- Advanced Mechanics and Failure Analysis - Graduate Certificate (p. 1662)
- Mechanical Design and Product Development - Graduate Certificate (p. 1662)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Affrunti, Andrew J. ([https://experts.colorado.edu/display/fisid\\_149937/](https://experts.colorado.edu/display/fisid_149937/))  
Instructor; MSEE, University of Illinois at Urbana–Champaign

Ahmed, Alaa A. ([https://experts.colorado.edu/display/fisid\\_144736/](https://experts.colorado.edu/display/fisid_144736/))  
Professor; PhD, University of Michigan

Ban, Chunmei ([https://experts.colorado.edu/display/fisid\\_165780/](https://experts.colorado.edu/display/fisid_165780/))  
Associate Professor; PhD, SUNY at Binghamton

Barthelat, Francois ([https://experts.colorado.edu/display/fisid\\_164866/](https://experts.colorado.edu/display/fisid_164866/))  
Professor; PhD, Northwestern University

Blacklock, Jenifer L. ([https://experts.colorado.edu/individual/fisid\\_159680/](https://experts.colorado.edu/individual/fisid_159680/))  
Faculty Director, Senior Instructor, Visiting Instructor; PhD, Wayne State University

Borden, Mark A. ([https://experts.colorado.edu/display/fisid\\_148514/](https://experts.colorado.edu/display/fisid_148514/))  
Professor; PhD, University of California, Davis

Bottenus, Nick ([https://experts.colorado.edu/individual/fisid\\_165371/](https://experts.colorado.edu/individual/fisid_165371/))  
Assistant Professor; PhD, Duke University

Branch, Melvyn C.  
Professor Emeritus

Bright, Victor Mark ([https://experts.colorado.edu/display/fisid\\_112696/](https://experts.colorado.edu/display/fisid_112696/))  
Professor; PhD, Georgia Institute of Technology

Bruns, Carson J. ([https://experts.colorado.edu/display/fisid\\_159851/](https://experts.colorado.edu/display/fisid_159851/))  
Assistant Professor; PhD, Northwestern University

Burleson, Grace  
Visiting Assistant Professor; PhD, University of Michigan

Calve, Sarah ([https://experts.colorado.edu/individual/fisid\\_165779/](https://experts.colorado.edu/individual/fisid_165779/))  
Assistant Professor; PhD, University of Michigan

Carlson, Lawrence E.  
Professor Emeritus; D.Eng, University of California Berkeley

Castro, Francisco ([https://experts.colorado.edu/display/fisid\\_147992/](https://experts.colorado.edu/display/fisid_147992/))  
Senior Instructor; PhD, University of Colorado Boulder

Cui, Longji ([https://experts.colorado.edu/display/fisid\\_164283/](https://experts.colorado.edu/display/fisid_164283/))  
Assistant Professor; ME, Beihang University (China)

Daily, John W. ([https://experts.colorado.edu/display/fisid\\_100131/](https://experts.colorado.edu/display/fisid_100131/))  
Research Professor; PhD, Stanford University

Datta, Subhendu K.  
Professor Emeritus

Ding, Xiaoyun ([https://experts.colorado.edu/display/fisid\\_158563/](https://experts.colorado.edu/display/fisid_158563/))  
Professor; PhD, Pennsylvania State University

Ding, Yifu ([https://experts.colorado.edu/display/fisid\\_146088/](https://experts.colorado.edu/display/fisid_146088/))  
Professor; PhD, University of Akron

Ferguson, Virginia L. ([https://experts.colorado.edu/display/fisid\\_110131/](https://experts.colorado.edu/display/fisid_110131/))  
Professor; PhD, University of Colorado Boulder

Geers, Thomas L.  
Professor Emeritus

Greenberg, Alan R.  
Professor Emeritus

Gupta, Mohit  
Instructor Adjunct

Hamlington, Peter Edward ([https://experts.colorado.edu/display/fisid\\_149800/](https://experts.colorado.edu/display/fisid_149800/))  
Associate Professor, Chair, Faculty Fellow; PhD, University of Michigan Ann Arbor

Hampson, Gregory ([https://experts.colorado.edu/display/fisid\\_166888/](https://experts.colorado.edu/display/fisid_166888/))  
Scholar in Residence; PhD, University of Wisconsin–Madison

Hannigan, Michael P. ([https://experts.colorado.edu/display/fisid\\_122655/](https://experts.colorado.edu/display/fisid_122655/))  
Professor, Endowed Chair; PhD, California Institute of Technology

Henze, Daven K. ([https://experts.colorado.edu/display/fisid\\_144858/](https://experts.colorado.edu/display/fisid_144858/))  
Professor, Associate Chair; PhD, California Institute of Technology

Hertzberg, Jean R. ([https://experts.colorado.edu/display/fisid\\_105315/](https://experts.colorado.edu/display/fisid_105315/))  
Professor; PhD, University of California, Berkeley

Humbert, J. Sean ([https://experts.colorado.edu/display/fisid\\_156202/](https://experts.colorado.edu/display/fisid_156202/))  
Professor, Associate Chair; PhD, California Institute of Technology

Jayaram, Kaushik ([https://experts.colorado.edu/display/fisid\\_165370/](https://experts.colorado.edu/display/fisid_165370/))  
Assistant Professor; PhD, University of California-Berkeley

Kassoy, David R.  
Professor Emeritus

Knappe, Svenja A. ([https://experts.colorado.edu/display/fisid\\_139588/](https://experts.colorado.edu/display/fisid_139588/))  
Associate Research Professor; PhD, Rheinische Friedrich-Wilhelms-Universität (Germany)

Knight, Daniel  
Associate Research Professor; PhD, University of Tennessee

Knutsen, Jeffrey S. ([https://experts.colorado.edu/display/fisid\\_145534/](https://experts.colorado.edu/display/fisid_145534/))  
Associate Teaching Professor; PhD, University of Colorado Boulder

Koch, Jeremy ([https://experts.colorado.edu/display/fisid\\_166589/](https://experts.colorado.edu/display/fisid_166589/))  
Assistant Teaching Professor; PhD, University of Illinois

Kotys-Schwartz, Daria ([https://experts.colorado.edu/display/fisid\\_144738/](https://experts.colorado.edu/display/fisid_144738/))  
Teaching Professor; PhD, University of Colorado Boulder

Labbe, Nicole J. ([https://experts.colorado.edu/display/fisid\\_157742/](https://experts.colorado.edu/display/fisid_157742/))  
Assistant Professor; PhD, University of Massachusetts, Amherst

Lee, Sehee ([https://experts.colorado.edu/display/fisid\\_144739/](https://experts.colorado.edu/display/fisid_144739/))  
Professor; PhD, Seoul National University (South Korea)

Lee, Yung-Cheng ([https://experts.colorado.edu/display/fisid\\_103170/](https://experts.colorado.edu/display/fisid_103170/))  
Professor Emeritus

Long, Rong ([https://experts.colorado.edu/display/fisid\\_151301/](https://experts.colorado.edu/display/fisid_151301/))  
Associate Professor; PhD, Cornell University

Lynch, Maureen Ellen ([https://experts.colorado.edu/display/fisid\\_163404/](https://experts.colorado.edu/display/fisid_163404/))  
Assistant Professor; PhD, Cornell University

MacCurdy, Robert B. ([https://experts.colorado.edu/display/fisid\\_163307/](https://experts.colorado.edu/display/fisid_163307/))  
Assistant Professor; PhD, Cornell University

McConnell, Katherine ([https://experts.colorado.edu/display/fisid\\_147567/](https://experts.colorado.edu/display/fisid_147567/))  
Scholar in Residence; EdD, University of Colorado Denver

McNeill, Nathan John ([https://experts.colorado.edu/display/fisid\\_151518/](https://experts.colorado.edu/display/fisid_151518/))  
Associate Teaching Professor; PhD, Purdue University

Michelsen, Hope ([https://experts.colorado.edu/individual/fisid\\_165261/](https://experts.colorado.edu/individual/fisid_165261/))  
Associate Professor; PhD, Stanford University

Milford, Jana B. ([https://experts.colorado.edu/display/fisid\\_103268/](https://experts.colorado.edu/display/fisid_103268/))  
Professor Emerita

Miller, Shelly L. ([https://experts.colorado.edu/display/fisid\\_110394/](https://experts.colorado.edu/display/fisid_110394/))  
Professor; PhD, University of California, Berkeley

Mitrano, Peter P. ([https://experts.colorado.edu/display/fisid\\_155075/](https://experts.colorado.edu/display/fisid_155075/))  
Assistant Teaching Professor; PhD, University of Colorado, Boulder

Mizzi, Arthur  
Assistant Research Professor; PhD, University of Colorado Boulder

Mukherjee, Debanjan ([https://experts.colorado.edu/individual/fisid\\_164181/](https://experts.colorado.edu/individual/fisid_164181/))  
Assistant Professor; PhD, University of California, Berkeley

Murray, Todd W. ([https://experts.colorado.edu/display/fisid\\_146549/](https://experts.colorado.edu/display/fisid_146549/))  
Professor, Associate Chair; PhD, Johns Hopkins University

Neu, Corey P. ([https://experts.colorado.edu/display/fisid\\_156210/](https://experts.colorado.edu/display/fisid_156210/))  
Professor; PhD, University of California, Davis

Norris, Jan Adam ([https://experts.colorado.edu/display/fisid\\_101412/](https://experts.colorado.edu/display/fisid_101412/))  
Instructor Adjunct; PhD, University of Colorado Boulder

Pacheco, Carmen Consuelo ([https://experts.colorado.edu/display/fisid\\_148773/](https://experts.colorado.edu/display/fisid_148773/))  
Scholar in Residence; MS, University of Arizona

Pellegrino, John ([https://experts.colorado.edu/display/fisid\\_130902/](https://experts.colorado.edu/display/fisid_130902/))  
Research Professor; PhD, University of Colorado Boulder

Raj, Rishi ([https://experts.colorado.edu/display/fisid\\_108413/](https://experts.colorado.edu/display/fisid_108413/))  
Professor; PhD, Harvard University

Reamon, Derek T. ([https://experts.colorado.edu/display/fisid\\_120538/](https://experts.colorado.edu/display/fisid_120538/))  
Teaching Professor; PhD, Stanford University

Rentschler, Mark E. ([https://experts.colorado.edu/display/fisid\\_146091/](https://experts.colorado.edu/display/fisid_146091/))  
Professor; PhD, University of Nebraska-Lincoln

Rieker, Gregory Brian ([https://experts.colorado.edu/display/fisid\\_151727/](https://experts.colorado.edu/display/fisid_151727/))  
Associate Professor, Faculty Fellow; PhD, Stanford University

Riffell, Daniel J. ([https://experts.colorado.edu/display/fisid\\_154141/](https://experts.colorado.edu/display/fisid_154141/))  
Associate Professor, Lecturer; MS, University of Colorado Boulder

Ruben, Shalom D. ([https://experts.colorado.edu/display/fisid\\_149492/](https://experts.colorado.edu/display/fisid_149492/))  
Associate Teaching Professor; PhD, University of California, Los Angeles

Segil, Jacob Lionel ([https://experts.colorado.edu/display/fisid\\_155128/](https://experts.colorado.edu/display/fisid_155128/))  
Research Professor; PhD, University of Colorado Boulder

Steinbrenner, Julie E. ([https://experts.colorado.edu/display/fisid\\_152041/](https://experts.colorado.edu/display/fisid_152041/))  
Associate Teaching Professor, Associate Chair; PhD, Stanford University

Stoldt, Conrad R. ([https://experts.colorado.edu/display/fisid\\_126290/](https://experts.colorado.edu/display/fisid_126290/))  
Professor Emeritus; PhD, Iowa State University

Tan, Wei ([https://experts.colorado.edu/display/fisid\\_141464/](https://experts.colorado.edu/display/fisid_141464/))  
Associate Professor; PhD, University of Illinois at Chicago

Tsai, Janet Yi-Jen ([https://experts.colorado.edu/display/fisid\\_156447/](https://experts.colorado.edu/display/fisid_156447/))  
Associate Teaching Professor, Associate Chair; PhD, University of Colorado Boulder

Vance, Marina E. ([https://experts.colorado.edu/display/fisid\\_158217/](https://experts.colorado.edu/display/fisid_158217/))  
Assistant Professor; PhD, Virginia Polytechnic Institute and State University

Vanderbeek, Greg ([https://experts.colorado.edu/display/fisid\\_159741/](https://experts.colorado.edu/display/fisid_159741/))  
Assistant Teaching Professor; MS, Colorado School of Mines

Vernerey, Franck J. ([https://experts.colorado.edu/display/fisid\\_144760/](https://experts.colorado.edu/display/fisid_144760/))  
Professor; PhD, Northwestern University

Vriend, Nathalie Maria ([https://experts.colorado.edu/display/fisid\\_165036/](https://experts.colorado.edu/display/fisid_165036/))  
Associate Professor; PhD, California Institute of Technology

Walker, Michael Edward ([https://experts.colorado.edu/display/fisid\\_155103/](https://experts.colorado.edu/display/fisid_155103/))  
Associate Teaching Professor; PhD, Illinois Institute of Technology

Weidman, Patrick D.  
Professor Emeritus

Welker, Cara ([https://experts.colorado.edu/display/fisid\\_168549/](https://experts.colorado.edu/display/fisid_168549/))  
Assistant Professor; Ph.D., Stanford University

Whiting, Gregory L. ([https://experts.colorado.edu/display/fisid\\_159727/](https://experts.colorado.edu/display/fisid_159727/))  
Associate Professor; PhD, University of Cambridge (England)

Wiedinmeyer, Christine  
Research Professor; PhD, University of Texas at Austin

Xiao, Jianliang ([https://experts.colorado.edu/display/fisid\\_149777/](https://experts.colorado.edu/display/fisid_149777/))  
Associate Professor; PhD, Northwestern University

Xu, Nicole ([https://experts.colorado.edu/display/fisid\\_172095/](https://experts.colorado.edu/display/fisid_172095/))  
Assistant Professor; PhD, Stanford University

Zable, Jack L.  
Professor Emeritus

## Courses

### MCEN 5010 (3) Microsystems Integration

A microsystem consists of microelectronic, optoelectronic, microwave, microelectromechanical and energy components interconnected. Thermal, electrical, fabrication and assembly issues for microsystems represented by iPhone series will be studied. The packaging and interconnection technologies used to establish the design and manufacturing infrastructure of microsystems will be reviewed. Other optoelectronic, MEMS and batter components for microsystems will also be studied.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4010

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

**Grading Basis:** Letter Grade

### MCEN 5012 (3) Renewable Fuels, Fuel Cells and Internal Combustion Engines

With the accelerated availability of carbon-free and renewable fuels, we will explore high-efficiency, low-emissions fuel cell and internal combustion engine energy conversion technologies, preparing students to enter the rapidly changing fields of power and propulsion on the path to net-zero greenhouse gas emissions. Through thermodynamic modeling, systems engineering, and requirements flow-down, students will apply the fundamentals of thermodynamics, fluids and heat transfer, combustion and electrochemistry for fuel cells and IC Engines.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4012

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

### MCEN 5014 (3) Energy Materials Characterization

Introduces theoretical framework for characterization techniques including X-ray diffraction, X-ray photoelectron spectroscopy and imaging methods used in the structural and morphological characterization of energy materials. Helps students determine characterization techniques suitable for their study and understand their data. Uses energy storage case studies to provide the methodologies for determining the nature and composition of materials. Helps students learn new characterization techniques from the literature and seek the characterization resources from DOE funded user facilities.

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) majors with 57+ credits (Junior or Senior).

**Recommended:** Prerequisite MCEN 1024 Chemistry or equivalent, and MCEN 2024 Materials Science or equivalent.

### MCEN 5020 (3) Methods of Engineering Analysis 1

Studies selected topics from linear algebra, multi-variable calculus, differential equations, and Fourier series. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications. Prior courses in Calculus I, II, differential equations, and linear algebra strongly recommend.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Math

**MCEN 5021 (3) Introduction to Fluid Dynamics**

Focuses on physical properties of gases and liquids, and kinematics of flow fields. Analyzes stress; viscous, heat-conducting Newtonian fluids; and capillary effects and surface-tension-driven flow. Other topics include vorticity and circulation, ideal fluid flow theory in two and three dimensions, Schwartz-Christoffel transformations, free streamline theory, and internal and free-surface waves.

**Requisites:** Requires corequisite course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Fluids

**MCEN 5022 (3) Classical Thermodynamics**

First and second laws of thermodynamics. Entropy and availability. Cycle analysis. Thermodynamic properties of pure substances and mixtures. Property relations. Chemical reactions and chemical availability. Energy systems analysis.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Thermal

**MCEN 5023 (3) Solid Mechanics 1**

Introduces stress, strain and motion of a continuous system. Discusses material derivative; fundamental laws of mass, momentum, energy and entropy; constitutive equations and applications to elastic and plastic materials.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 5012

**Requisites:** Requires coreq course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Solids

**MCEN 5024 (3) Materials Chemistry and Structures**

Provides graduate level students with a comprehensive overview of the chemistry and structure of material systems, with a focus on chemical bonding, the resulting material structures and their properties. This course is intended to become one of the four core courses offered in the new Materials Science curriculum. Course topics include: bonding in solids, crystalline and amorphous states, basic group theory, diffraction, metals and alloys, ceramics, and an intro to mat. characterization.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Materials

**MCEN 5027 (1) Graduate Seminar**

Offers weekly presentations by visiting speakers, faculty, and students.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5030 (3) Introduction to Research**

Provides students with fundamental skills important for success in research. Covers approaches to generating project and program ideas, securing funding, performing a literature search to understand the state of a field, communicating results through presentations and papers, understanding scientific ethics, developing a network of trusted peers, establishing and negotiating collaborations, fostering diversity, ensuring equity and inclusivity, and establishing a professional profile and becoming a leader in your field.

**Requisites:** Restricted to undergraduate or graduate Mechanical Engineering students only.

**MCEN 5032 (3) Sustainable Energy**

Examines sustainability of our current energy systems, including transportation, using environmental and economic indicators. Uses systems analysis that addresses energy supply and demand. Explores the science and technology as well as environmental and economic feasibility of efficiency measures and renewable energy technologies. Additional emphasis is given to the global nature of the challenges and the potential for locally optimal solutions.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4032

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Thermal

**MCEN 5034 (3) Thermodynamics of Materials**

Provides a unified presentation of fundamental concepts applicable to the thermodynamics of engineering materials. Develops quantitative tools for understanding the physical principles that govern phase equilibrium and transformation. Generates binary and ternary phase diagrams and determine the resulting materials structures and corresponding physical and mechanical properties.

**Recommended:** Prerequisites MCEN 2024 and MCEN 3012.

**Additional Information:** Departmental Category: Materials

**MCEN 5040 (3) Methods of Engineering Analysis 2**

Studies selected topics from the theory of complex variables, integral transform methods, partial differential equations, and variational methods. Assigns computer exercises. Correlates with analysis topics in other mechanical engineering graduate courses, and emphasizes applications.

**Requisites:** Requires prerequisite course of MCEN 5020 (minimum grade D-). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Math

**MCEN 5041 (3) Advanced Fluid Mechanics 1**

Highlights exact solution of Navier-Stokes equations and fundamentals of rotating fluids. Considers Low Reynolds number flow; similarity solutions; viscous boundary layers, jets, and wakes; and unsteady viscous flow.

**Requisites:** Requires corequisite course of MCEN 5020. Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Fluids

**MCEN 5042 (3) Heat Transfer**

Studies development of equations governing transport of heat by conduction, convection, and radiation, and their solution. Includes analytical and numerical solution of initial and boundary value problems representative of heat conduction in solids. Describes heat transfer in free and forced convection, including laminar and turbulent flow. Also involves radiation properties of solids, liquids, and gases and transport of heat by radiation.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Thermal

**MCEN 5044 (3) Mechanical Behavior of Materials**

This introductory-level graduate course incorporates relevant aspects of materials science, solid mechanics, thermodynamics and mathematics, and applies them to achieve a fundamental understanding of the mechanical behavior of crystalline and non-crystalline engineering materials.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Materials

**MCEN 5045 (3) Design for Manufacturability**

Topics include general design guidelines for manufacturability; aspects of manufacturing processes that affect design decisions; design rules to maximize manufacturability; economic considerations; value engineering and design for assembly. Presents case studies of successful products exhibiting DFMA principles. Prerequisite of MCEN 4026 required for undergraduate students.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering (MCEN) majors only.

**Additional Information:** Departmental Category: Materials

**MCEN 5055 (3) Advanced Product Design**

Introduces engineering design and development of consumer products. Includes learning sketching, brainstorming, idea generation, design thinking, user-centered design, product requirements and specifications, product constraints, human factors, aesthetics, industrial design, intellectual property, concept prototyping, idea selection, tolerancing, cost estimating, design for assembly, and materials selection. Entails a semester-long team re-design of a consumer product.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Design

**MCEN 5057 (3) Environmental Modeling**

Enables students to develop and evaluate pollutant transport, fate, exposure, and risk models for air, water, and multi-media systems, with a special emphasis on air. Emphasizes the fundamental physics and chemistry that govern contaminant fate and transport and the basic mathematical equations and numerical approaches for describing these processes.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4057

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5064 (3) Soft Machines**

Introduces soft machines as a new paradigm of engineering that starts to impact healthcare, consumer electronics, renewable energy and collaborative robotics. Prepares students to participate in research on soft machines by starting with fundamentals of soft materials and by covering soft robotics, stretchable electronics, energy harvesting and functional polymers. Includes guest lectures, a literature review and a hands-on lab project.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4046 and MSEN 5046

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

**Grading Basis:** Letter Grade

**MCEN 5065 (3) Graduate Design I**

First part of a two-course graduate product design experience in mechanical engineering. Covers problem definition and specifications, determining design requirements, user feedback, alternative design concepts, engineering analysis, concept prototypes and CAD drawings. Students make several oral design reviews, a final design presentation and prepare a written report. Entails a team product design, fabrication and testing cycle of sponsored project. Students who complete this course are encouraged to take MCEN 5075 Graduate Design II.

**Requisites:** Requires prerequisite course of MCEN 5055 (minimum grade C-).

**Additional Information:** Departmental Category: Design

**MCEN 5075 (3) Graduate Design II**

Second part of two-course graduate product design experience in mechanical engineering. Includes refinement of prototype, design optimization, fabrication, testing, and evaluation. Students orally present the final design and prepare a written report and operation manual for the product. Entails a team product design, fabrication, and testing cycle of a sponsored project, leading to a fully-functional product.

**Requisites:** Requires prerequisite course of MCEN 5065 (minimum grade C-).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Design

**MCEN 5110 (3) Regenerative Biology and Tissue Repair**

Presents the regenerative biology behind tissue systems, along with the regenerative medicine of that tissue with an emphasis on engineering principles, using the assigned reading as a guideline. Follows lectures with class discussions of current papers on the regenerative biology of the same tissue system. In the final 1 & 2 classes assigned to this topic, individual graduate students give 20 min presentations on a relevant regenerative medicine/engineering-focused paper.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4110 and BMEN 4110 and BMEN 5110

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**MCEN 5111 (3) Introduction to Microfluidics**

Microfluidics deals with the behavior of fluids in small scale. It is a highly multidisciplinary field at the intersection of engineering, physics, chemistry, biology, medicine, nanotechnology, and biotechnology. This course covers the fundamentals and fabrication of microfluidic devices and their applications, particularly in lab-on-a-chip. Includes lectures, literature discussion, team presentations, and possibly one lab on microfluidic devices. Enhances your understanding of microfluidic technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 5111 and MCEN 4111 and BMEN 4111

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Recommended:** Prerequisite MCEN 3021 or CHEN 3200 or CVEN 3313.

**MCEN 5112 (3) Introduction to Nanoscale Transport**

Introduces the basic concepts, theoretical methods, and experimental techniques related to nanoscience and nanoengineering that are ubiquitous in microelectronics, renewable energy technology, heat transfer, nano-optics, MEMS/NEMS, and emerging quantum technologies. Discusses microscopic pictures and theories of various energy transport and conversion phenomena and real-world examples and demonstrations.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4112

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors with 57+ credits only.

**MCEN 5113 (3) Mechanics of Cancer**

Cancer is considered to be an organ or an ecosystem, in which a critical component of the tumor microenvironment is mechanical forces. This course will cover the role of mechanics in cancer and cancer-related processes, with a focus on solid mechanics and fluid mechanics. In this course, you will apply engineering principles to come away with an appreciation of how mechanics influences cancer and its etiology as well as the development of future treatments.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 5113 and BMEN 4113 and MCEN 4113

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical and Biomedical Engineering undergraduate majors only.

**MCEN 5115 (3) Mechatronics and Robotics I**

Focuses on design and construction of microprocessor-controlled electro-mechanical systems. Lectures review critical circuit topics, introduce microprocessor architecture and programming, discuss sensor and actuator component selection, robotic systems and design strategies for complex, multi-system devices. Lab work reinforces lectures and allows hands-on experience with robotic design. Students must design and build an autonomous robotic device. Project expenses may be incurred (\$50 maximum).

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4115

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Design

**MCEN 5117 (3) Anatomy and Physiology for Engineers**

Explores human physiological function from an engineering, specifically mechanical engineering, viewpoint. Provides an introduction to human anatomy and physiology with a focus on learning fundamental concepts and applying engineering (mass transfer, fluid dynamics, mechanics, modeling) analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 4117 and BMEN 5117 MCEN 4117

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5121 (3) Compressible Flow**

Applies energy, continuity, and momentum principles to compressible flow. Topics include normal and oblique shocks; Prandtl-Meyer expansion; methods of characteristics; and one-, two-, and three-dimensional subsonic, supersonic, and hypersonic flows.

**Requisites:** Requires prerequisite course of MCEN 5021 (minimum grade D-). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Fluids

**MCEN 5122 (3) Statistical Thermodynamics**

Axiomatic formulation of macroscopic thermodynamics. Quantum mechanical description of atomic and molecular structure. Statistical mechanics description of thermodynamic properties of gases, liquids and solids. Elementary kinetic theory of gases and evaluation of transport properties. Department enforced requisite: undergraduate thermodynamics.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Thermal

**MCEN 5125 (3) Optimal Design**

Focuses on linear optimization and will introduce non-linear optimization. Formulating engineering applications as optimization problems that can be solved using industry known solvers will be learned. Some of these applications will include minimum cost mechanical design, wind farm power maximization, minimum energy control, production control, and more. Previous programming experience required.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4125

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Design

**MCEN 5127 (3) Biomedical Ultrasound**

Covers the design of ultrasound systems for medical imaging and therapy, including the physics of wave propagation, transducers, pulse-echo imaging, flow and tissue characterization, and microbubble contrast, with an emphasis on current topics in biomedical ultrasound. Includes lectures on theory, practice and special topics; a laboratory on wave propagation; oral presentations on current literature; programming exercises for data processing; and a team design project.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 5127 and MCEN 4127 and BMEN 4127

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) and Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5131 (3) Air Pollution Control Engineering**

Introduces air quality regulations, meteorology and modeling. Examines methods for controlling major classes of air pollutants, including particulate matter and oxides of sulfur and nitrogen, as well as control technology for industrial sources and motor vehicles. Requires interdisciplinary design projects.

**Equivalent - Duplicate Degree Credit Not Granted:** EVEN 5151 and MCEN 4131 and EVEN 4131

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering or Environmental Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Fluids

**MCEN 5133 (3) Intro to Tissue Biomechanics**

Focuses on developing an understanding of the fundamental mechanical principles that govern the response of hard and soft biological tissue to mechanical loading. Specifically, covers mechanical behavior of biological materials/tissues, classical biomechanics problems in various tissues, the relationship between molecular, cellular and physiological processes and tissue biomechanics and critical analysis of related journal articles.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4133

**Additional Information:** Departmental Category: Materials

**MCEN 5135 (3) Wind Energy and Wind Turbine Design**

Focuses on understanding and applying principles related to current wind energy technologies. Students will apply technical coursework from throughout the engineering curriculum (environmental, fluids, statics, dynamics, power, economics, etc.) to the process of designing wind turbines and wind farms. Practical, real world examples will be integrated into the lessons and problems.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4135

**Requisites:** Restricted to Mechanical (MCEN), Civil (CVEN) or Aerospace (ASEN) Engineering graduate students only.

**Additional Information:** Departmental Category: Design

**MCEN 5137 (3) Anatomy and Physiology 2**

Provides in-depth understandings of anatomy and physiology as well as introductions to transport phenomena, flow mechanics and solid mechanics in several organ systems: the cardiovascular, pulmonary, kidney, endocrine and digestive systems. Introduces artificial physiological systems to replace or assist physiological functions and introduce the concepts of physiological barriers that prevent diagnosis or effective therapeutics.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4137

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5138 (3) Feedback Control**

Introduction to fundamental principles and techniques for analysis and synthesis of feedback control systems in the time and frequency domains. Laplace transforms, transfer functions and block diagrams. Stability, dynamic response, and steady-state analysis. Analysis and design of control systems using root locus and frequency response methods. Computer aided design and analysis. Introduction to state space representations and state feedback control.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4138 ECEN 4138 or ECEN 5138

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Recommended:** Prerequisite MCEN 4043 or comparable knowledge gained through outside coursework.

**MCEN 5141 (3) Indoor Air Pollution**

Describes the impact of indoor air pollutants on human health, including an introduction to key pollutants and their sources. Students will estimate emission factors, calculate generation/ventilation rates, quantify the impact of deposition and chemical reactions and explore relevant control technology. Current issues will also be addressed, including climate change, green building design, economic concerns and relevance to the developing world.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4141

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Fluids

**MCEN 5147 (3) Mechanobiology**

Studies how mechanical forces modulate the morphological and structural fitness of biological tissues. Current molecular mechanisms by which cells convert mechanical stimulus into chemical activity and the literature supporting them will be discussed. Students will acquire an understanding and expertise from the analysis of primary literature and completion of a synthesis project.

**Requisites:** Restricted to students with 87-180 credits (Senior, Fifth Year Senior) Mechanical (MCEN) majors or College of Engineering graduate students only.

**Grading Basis:** Letter Grade

**MCEN 5151 (3) Flow Visualization**

Explores techniques for the visualization of the physics of fluid flows including seeding with dyes, particles and bubbles, and shadowgraphy and schlieren. Reviews optics and fluid physics, especially atmospheric clouds. Assignments are student-driven, to individuals and mixed teams of graduates, undergraduates, engineering majors and photography/video majors.

**Equivalent - Duplicate Degree Credit Not Granted:** CINE 4200, MCEN 4151, ARTF 5200, ATLS 4151 and ATLS 5151

**Additional Information:** Departmental Category: Fluids

**MCEN 5152 (3) Introduction to Combustion**

Focuses on the mechanisms by which fuel and oxidizers are converted into combustion products. Application to practical combustion devices such as Otto, Diesel, gas turbine and power plant combustion systems. Consideration of combustion-generated air pollution, fire safety and combustion efficiency.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4152

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Thermal

**MCEN 5153 (3) Introduction to Fracture Mechanics**

This course will introduce fundamental concepts, analytical approaches, and experimental methods to characterize the fracture of solid materials. Topics to be discussed include: linear elastic analysis of 2D cracks, energy flows and criteria for elastic fracture, experimental methods for elastic fracture, application of fracture mechanics in adhesion, introduction to elastic plastic fracture, and nonlinear fracture mechanics of soft materials.

**Requisites:** Requires prerequisite course of MCEN 2063 or CVEN 3161 or MCEN 5023 or ASEN 5012 (all minimum grade C).

**MCEN 5154 (3) Biocolloids and Biomembranes**

Covers the thermodynamics and mechanics of biological membranes and biomedical colloids. Considers intermolecular and surface forces, self-assembly and colloidal stability. Addresses structure-property relationships and design principles for biomedical applications. Focuses on monolayers, bilayers, micelles, filomicelles, liposomes, polymersomes, emulsions, microbubbles, polyplexes and polyelectrolyte multilayer capsules.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4154

**Recommended:** Prerequisites APPM 2360 and PHYS 1120.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Materials

**MCEN 5155 (3) Automated Mechanical Design Synthesis**

Introduces computational approaches to automatically generate complex multimaterial mechanical designs that satisfy predefined high-level specifications, discusses algorithms to solve design as a constrained non-convex multi-objective optimization problem. Topics: expert-driven design process; computational analysis tools based on mechanical simulation (finite element methods, mesh-free methods); topological optimization; compositional design; multi-objective optimization; evolutionary design; design for manufacturing with additives (FDM, SLA, Inkjet). Students design a part to specifications, fabricate using advanced (3D printing, laser cutting, CNC, etc) tools.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4155

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Recommended:** Prerequisite students should be comfortable with MATLAB, PDEs, linear algebra, free body diagrams, mechanical modeling/design; exposure to finite-element modeling and state-space representations.

**MCEN 5157 (3) Modeling of Human Movement**

Human movement analysis is used in physical rehabilitation, sport training, human-robot interaction, animation, and more. Course provides a systematic overview of human movement on multiple levels of analysis, with an emphasis on the phenomenology amenable to computational modeling. Covers muscle physiology, movement-related brain areas, musculoskeletal mechanics, forward and inverse dynamics, optimal control and Bayesian inference, learning and adaptation. Inspires students to see and appreciate the complexities of movement control in all aspects of daily life.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 5157 and MCEN 4157

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) and Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

**MCEN 5161 (3) Aerosols**

Introduces atmospheric aerosols and properties of their distributions, followed by fundamental descriptions of single particle dynamics, thermodynamics, nucleation, coagulation, mass transfer and populations dynamics. During the second half of the course, the focus will shift to sources and sinks of atmospheric aerosols, their impacts on atmospheric chemistry and radiation, and the impacts of these processes on air quality and climate.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Fluids

**MCEN 5171 (3) Biofluids on the Micro Scale**

Introduces fundamental physical concepts and basic mechanisms of biological fluids in microscale. Elaborates on the application of fluid mechanics principles to major biological systems, including human organ systems and animal locomotion in microscale. Covers physiologically relevant fluid flow phenomena on the cellular level and the underlying physical mechanisms from an engineering perspective. Related state-of-art technologies such as organ-on-a-chip and micro/nano fabrication will be emphasized. Will enhance your understanding of organ-on-a-chip technologies and their broad applications.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 5171 and MCEN 4171 and BMEN 4171

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) and Biomedical Engineering (BMEN) majors with 57+ credits (Junior or Senior).

**MCEN 5173 (3) Finite Element Analysis**

Introduces the theory behind and applications of the finite element method as a general and powerful tool to model a variety of phenomena in mechanical engineering. Applications include structural mechanics, mechanics of elastic continua and heat conduction.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4173

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Solids

**MCEN 5174 (3) Failure of Engineering Materials**

Examines the fundamental concepts regarding the failure of engineering materials. Case studies are used to integrate a basic understanding of material failure mechanisms with analysis techniques and tools. Topics include the elastic properties (isotropic and anisotropic materials) and the origin of elastic behavior, viscoelasticity, plasticity (dislocation mechanisms, yielding criteria, strengthening mechanisms), creep, fracture and fatigue.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4174

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Materials

**MCEN 5183 (3) Mechanics of Composite Materials**

Introduces various kinds of composite materials, composite fabrication techniques, the physical and mechanical behavior of composites, and analytical and experimental methodologies.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4183

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Solids

**MCEN 5193 (3) Design of Coffee**

Serves as an introduction to how engineers use their disciplinary training to approach and solve problems outside of the traditional confines of their discipline, as illustrated by the roasting and brewing of coffee. In addition to focusing on the science, engineering and craftsmanship of making a cup of coffee from bean to cup, we will also study the global sourcing and sustainability aspects of coffee.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4193

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**MCEN 5194 (3) Electrochemical Energy Conversion and Storage**

Presents the fundamentals, principles and experimental techniques of electrochemistry, the background of ionic or electronic conduction of metal, semiconductor, inorganic and polymer materials and applications in the areas of batteries, fuel cells, electrochemical double layer capacitors, electrochemical photonics, sensors and semiconductor electrochemistry.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4194

**Recommended:** Prerequisites MCEN 2024 and MCEN 3032.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Materials

**MCEN 5195 (3) Bioinspired Robotics**

Bioinspired design views the process of how we learn from nature as an innovation strategy translating principles of function, performance, and aesthetics, from biology to human technology. The creative design process is driven by interdisciplinary exchange among engineering, biology, medicine, art, architecture and business. Diverse teams of students will collaborate on, create, and present original bioinspired design projects in the ITLL.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4195

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) majors with 57+ credits (Junior or Senior).

**Recommended:** Prerequisite MCEN 3017 and MCEN 3025 or comparable electronics and design knowledge.

**MCEN 5208 (1-4) Special Topics**

Credit hours and subject matter to be arranged.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to undergraduate or graduate Mechanical Engineering students only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5228 (1-4) Special Topics in Mechanical Engineering**

Subject matter to be selected from topics of current interest.

**Repeatable:** Repeatable for up to 30.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students in the College of Engineering and Applied Science or undergraduate Mechanical Engineering (MCEN) majors with 57+ credits (Junior or Senior).

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5231 (3) Computational Fluid Dynamics**

This course is an in-depth introduction to the basic principles and applications of computational fluid dynamics (CFD). Students learn about fundamental CFD concepts such as discretization, meshing, error and accuracy; and focus on computational solutions of flow and transport problems using the finite element method. Students conduct multiple hands-on simulation-based activities and exercises on canonical and realistic engineering flow/transport problems. Final project for the course culminates in a mini-conference/symposium where students present their work.

**Equivalent - Duplicate Degree Credit Not Granted:** BMEN 5231 and MCEN 4231 and BMEN 4231

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**MCEN 5255 (3) Design for Mfg**

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Design

**MCEN 5258 (1-3) Sp Tpcs-Combustion Seminar**

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Special Topics

**MCEN 5279 (3) Aesthetics in Design**

Focuses on aesthetic aspects of design via hands-on design-build experiences. Students individually create dynamic artifacts of their own choice with the assistance of teammates. Content includes major design movements since 1900, constructive critique practice, hand sketching techniques and other selected industrial design topics. Students publish their design work on an archival public blog which provides a professional portfolio element.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5279 and MCEN 4279 and ATLS 4279

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**MCEN 5291 (1-2) Project Based Learning in Rural Schools**

Focuses on the use of low cost air quality monitoring tools, dubbed Pods, to implement PBL curriculum in high school environmental science classes in rural communities in Colorado. Each student will be paired with a high school class and will serve as curriculum and technology advisors as well as science experts. During the fall semester, students will be trained to effectively work in those roles and will also travel to their schools to be introduced. During the spring semester, students will support high school teachers in implementing an existing PBL air quality curriculum with the Pods. This will include monthly visits to schools in the spring and reporting back to the class. Enrollment during Fall is required for enrollment during Spring. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4291

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**MCEN 5292 (3) Materials and Devices in Medicine**

The main objective of this multidisciplinary course is to provide students with a broad survey of biomaterials and their use in medical devices for restoring or replacing the functions of injured, diseased, or aged human tissues and organs. The topics to be covered include: evolution in the medical device industry, a broad introduction to the materials used in medicine and their chemical, physical, and biological properties, discovery of medical problems, potential impacts of treatment innovations, existing devices and design considerations for several major physiological systems (cardiovascular, neuromuscular, skeletal, pulmonary, renal, dermal), materials interaction with the human body, basic mechanisms of wound healing, biocompatibility issues, testing methods and techniques in accordance with standards and relevant regulations, biofunctionalities required for specific applications, as well as state-of-the-art approaches for the development of new regenerative materials targeting cellular mechanisms. Rec

**Requisites:** Requires prerequisite course of MCEN 4117 or MCEN 5117 (minimum grade C). Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**MCEN 5293 (3) Mechanics of Soft Matter**

Provides a general overview of fundamental concepts behind the mechanical behavior of soft matter. The term soft matter (which includes polymers, colloids, liquid crystals and surfactants, to name a few) is typically used to describe classes of materials whose structural unit is much larger than atoms, making their response more complex and often richer than that of traditional solids. The objective of this class is to understand how chemical and mechanical forces between these small units yield macroscopic behaviors that one can observe in everyday life. Key engineering applications will also be discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4293

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Recommended:** Prerequisite knowledge comparable to that gained through MCEN 2063.

**MCEN 5298 (3) Introduction to Polymers**

Polymers represent a major class of engineering materials that are used by mechanical engineers. In this class, we will discuss the most fundamental concepts regarding polymeric materials. Topics include synthesis/manufacturing and chemical properties of polymers, statistical properties of polymer chains, multiphase polymers including polymer solutions and polymer blends, crystallization and glass transition of polymers, and viscoelastic properties of polymers.

**Equivalent - Duplicate Degree Credit Not Granted:** MCEN 4298

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Recommended:** Prerequisite knowledge comparable to that gained through MCEN 2024.

**MCEN 5299 (3) Household Energy Systems**

Cooking, heating and lighting in the developing world often involves inefficient and incomplete combustion of solid or liquid fuels. The Global Burden of Disease Study in 2010, ranked this combustion as the 4th largest risk factor, causing 4 million premature deaths per year. There is a strong societal need to tackle this problem. Students leaving this course will be able to meet this need as they will have the skills to assess existing and new technology used in the developing world for cooking, heating and lighting. The course will cover (1) food conversion chemistry with the focus on increasing useable calories, (2) combustion and heat transfer as related to cooking, heating and lighting, and (3) combustion emissions and stove use assessment. There will be case studies interlaced throughout the content and the bulk of the workload will be homeworks and projects. Recommended prerequisite: knowledge comparable to that gained through MCEN 3022 or concurrent enrollment in MC

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering or Environmental Engineering undergraduate majors only.

**MCEN 5448 (3) Linear Systems**

Introduces the theory of linear systems, including state space descriptions of dynamic systems, linear spaces, linear mappings, structure of linear operators, stability, controllability, observability, state variable estimation and feedback control methods.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5448

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Recommended:** Prerequisite MCEN 4138 or MCEN 5138 and strong foundational knowledge of linear algebra and differential equations.

**MCEN 5488 (3) Geometric Control Theory**

Introduce geometric approaches to study dynamical control systems over manifolds. Cover fundamental control-theoretical results, such as controllability, observability, feedback stabilizability, symmetries and group actions, that are beyond linear control systems. Establish connections between control theory and mathematics, especially topology, differential geometry, Lie groups and Lie algebras. Final project focuses on engineering applications related to students' own research interests.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5488

**MCEN 5498 (3) Stochastic Control Theory**

Introduce a toolbox for dealing with stochastic control systems. Cover topics such as stochastic calculus, linear and nonlinear filtering, and dynamic programming. Discuss system theoretic issues and derive optimal control laws for a variety of stochastic control problems, including, e.g., the separation principle for Linear-quadratic-Gaussian problems. Final project focuses on engineering applications related to students' own research interests.

**Equivalent - Duplicate Degree Credit Not Granted:** ECEN 5498

**MCEN 5636 (3) Micro-Electro-Mechanical Systems 1**

Addresses issues of micro-electro-mechanical systems (MEMS) modeling, design, and fabrication. Emphasizes the design and fabrication of sensors and actuators due to significance of these devices in optics, medical instruments, navigation components, communications, and robotics. Department consent required.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Manufacturing and Systems

**MCEN 5832 (3) Special Topics**

**Additional Information:** Departmental Category: Special Topics

**MCEN 5848 (1-6) Independent Study**

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student. May be repeated for up to 6 total credits.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering graduate students only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5858 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5868 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5878 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5888 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 5930 (1-3) Professional Internship**

This class provides a structure for Mechanical Engineering graduate students to receive academic credit for internships with industry partners that have an academic component to them suitable for graduate-level work. Participation in the program will consist of an internship agreement between a student and an industry partner who will employ the student in a role that supports the academic goals of the internship. Instructor participation will include facilitation of mid-term and final assessments of student performance as well as support for any academic-related issues that may arise during the internship period. May be taken during any term following initial enrollment and participation in ME graduate programs. Department permission required to enroll.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Mechanical Engineering graduate students only.

**MCEN 6001 (3) Reacting Flows**

Provides an introduction to reacting flows and combustion. Covers chemical kinetics, including global and detailed mechanisms and the variable density flow equations are derived. Relevant non-dimensional parameters and limiting behaviors are discussed. The Rankine-Hugoniot relations are presented and various aspects of diffusion, kinetically dominated and balanced combustion are outlined. Flame structures are discussed, including laminar and turbulent flames, and the Burke-Schumann solution is outlined. The turbulent forms of the motion equations are derived, and the reactive scalar transport equation and mixture fraction variable are presented. The flamelet progress variable approach is outlined, including a comparison of steady and unsteady flamelet models. Specific topics in spray combustion, triple flames, solid-gas reactors and detonations are discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** ASEN 6001

**Requisites:** Requires prerequisite course of MCEN 5021 (minimum grade C-). Restricted to College of Engineering and Applied Science graduate students or BS/MS Concurrent Degree Students only.

**Additional Information:** Departmental Category: Fluids

**MCEN 6184 (3) Structure and Properties of Polymers**

Emphasizes the relationships between molecular structures and macroscopic properties of polymers. Structural aspects include chain conformation, configuration, and the crystalline and amorphous states. Discusses physical, mechanical and dynamic properties with a focus on solution and phase behavior, transitions of bulk polymers, and rubber and viscoelastic behavior.

**Requisites:** Restricted to College of Engineering graduate students only.

**Recommended:** Prerequisite an intro-level polymer course.

**Additional Information:** Departmental Category: Materials

**MCEN 6228 (1-4) Special Topics in Mechanical Engineering**

Subject matter to be selected from topics of current interest.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Engineering graduate students only.

**Additional Information:** Departmental Category: Special Topics

**MCEN 6848 (1-6) Independent Study**

Available only through approval of graduate advisor. Subjects arranged to fit the needs of the particular student.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 6858 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 6868 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 6878 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 6888 (1-6) Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Additional Information:** Departmental Category: Miscellaneous

**MCEN 6949 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Additional Information:** Departmental Category: Thesis

**MCEN 6959 (1-6) Master's Thesis**

**Additional Information:** Departmental Category: Thesis

**MCEN 7221 (3) Turbulence**

Hydrodynamic stability theory, equations for turbulent flows, free shear flows and boundary layers, homogeneous and isotropic turbulence, overview of turbulent combustion, reaction kinetics, energy equation, Favre averaging, Pdfs, premixed and nonpremixed flame modeling, and recent developments.

**Requisites:** Restricted to any College of Engineering and Applied Science graduate students or to Mechanical Engineering undergraduate majors only.

**Additional Information:** Departmental Category: Fluids

**MCEN 7228 (3) Special Topics**

**Additional Information:** Departmental Category: Special Topics

**MCEN 8999 (1-10) Doctoral Dissertation**

**Additional Information:** Departmental Category: Thesis

## Mechanical Engineering - Master of Science (MS)

The Master of Science Thesis is a degree program that is well suited for students pursuing a career in academia or industry with a research component. MS Thesis students may choose from focus areas including (but not limited to) air quality, biomedical, design, energy and environment, materials, mechanics of materials, microsystems, and robotics/control. Students declare the MS Thesis program only after confirmation of a faculty member willing to serve as their thesis advisor. With support from the thesis advisor, students in this program have the option of smoothly transitioning into the PhD program.

If a student plans to earn a master's degree and then immediately continue on to a PhD, they can apply directly to the PhD program (p. 1661); it is not necessary to earn a master's degree separately.

For more information, visit the department's Master of Science Thesis (<https://www.colorado.edu/mechanical/current-students/graduate/master-science-thesis/>) webpage.

## Requirements

The mechanical engineering Master of Science Thesis curriculum is designed to provide a balance between a modern technological focus and disciplinary depth.

Students must complete at least 30 graduate-level credit hours, to include at least 18 credits in mechanical engineering, including 6 credits of thesis work. Students must also take MCEN 5020 Methods of Engineering Analysis 1 and MCEN 5208 Introduction to Research Methods as a part of the thesis degree requirements. Up to 12 credits may be taken outside of the department. To have courses count towards the degree, they must be numbered 5000-level or above secure a thesis advisor for research and earn a C or above.

Students must secure a thesis advisor for research and course guidance.

For more information, visit the department's Master of Science Thesis (<https://www.colorado.edu/mechanical/current-students/graduate/master-science-thesis/>) webpage.

## Mechanical Engineering - Professional Master of Science (MSME)

The Master of Science Professional is a degree program that offers possibilities for a wide range of prospective students. This coursework-focused degree program emphasizes both project-based and curriculum-driven learning. It is targeted at working engineers and undergraduates considering, or already pursuing, a career in industry, but can also be completed with the ultimate goal of matriculating in a PhD program.

A thesis is not required to earn this degree. If a student plans to earn a master's degree and then immediately continue on to a PhD, they can apply directly to the PhD program (p. 1661); it is not necessary to earn a master's degree separately.

For more information, visit the department's Master of Science Professional (<https://www.colorado.edu/mechanical/current-students/graduate/master-science-professional/>) webpage.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): BSEV in Environmental Engineering (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/civil-environmental-architectural-engineering/environmental-engineering-bachelor-science-bsev/#acceleratedmasterstext>)

## Requirements

Students must complete at least 30 graduate-level credit hours, to include at least 18 credits in mechanical engineering. Up to 12 credits may be taken outside of the department.

Students must attend a select number of mechanical engineering graduate seminars. A thesis is not required for this degree.

For more information, visit the department's Master of Science Professional (<https://www.colorado.edu/mechanical/current-students/graduate/master-science-professional/>) webpage.

## Mechanical Engineering - Doctor of Philosophy (PhD)

Mechanical engineering PhD students at CU Boulder take part in cutting edge, tier-one research, learning from nationally and internationally recognized faculty.

Our research harnesses state-of-the-art experimental, theoretical and computational approaches to expand the frontiers of technology, while advancing fundamentals in the underlying disciplines of fluid and solid mechanics, thermal engineering and materials science and engineering.

PhD students choose from focus areas in air quality, biomedical, materials, mechanics of materials, micro/nanoscale, robotics and systems design, and thermo fluid sciences.

The PhD program in mechanical engineering is available to students entering graduate studies for the first time as well as those who already have a master's degree. While a master's is not required to enroll, our PhD students will typically earn one on the way to a PhD. The best way to do that is by following an MS thesis curriculum (see the department's Master of Science - Thesis Option (<http://www.colorado.edu/mechanical/prospective-students/graduate/master-science-thesis-option/>) webpage).

PhD students consult with a faculty advisor throughout the duration of their degree to review their research progress and course selection.

For more information, visit the department's PhD (<http://www.colorado.edu/mechanical/prospective-students/graduate/phd/>) webpage.

## Requirements

### Course Requirements

The PhD requires a minimum of 30 credit hours of coursework in courses numbered 5000 or above, with a minimum GPA of 3.25, plus 30 credit hours of dissertation credit. More coursework may be required at the faculty advisor's discretion.

A maximum of 21 credit hours of graduate coursework may be transferred from another accredited institution. All courses taken for the master's degree at the 5000 level or above at CU Boulder may be applied toward the doctoral degree at the university.

For more information, visit the department's PhD (<http://www.colorado.edu/mechanical/prospective-students/graduate/phd/>) and Focus Areas (<http://www.colorado.edu/mechanical/research/focus-areas/>) webpages.

### Preliminary Examination

Every student desiring to pursue the PhD degree must pass a preliminary examination. As a part of this evaluation, students must pass a written math examination, as well as two oral examinations designed to test research and fundamental mechanical engineering competency. Students must also pass a research presentation given to a committee of at least three faculty members. Overall performance in the required examinations will determine pass/fail status.

### Comprehensive Examination

After passing the preliminary examination, students continue their coursework and prepare a written thesis prospectus. When ready, they take an oral comprehensive examination covering the graduate coursework and the thesis prospectus. The oral examination is based

primarily on a written proposal for the thesis research provided by the student to committee members in advance. This examination is conducted before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School.

## PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

## Time Limit

All requirements for the mechanical engineering PhD must be completed within six years of the date of commencing coursework.

# Advanced Mechanics and Failure Analysis - Graduate Certificate

The certificate provides training in engineering mechanics that goes beyond the typical undergraduate curriculum in two aspects. First, students will have the opportunity to establish systematic fundamental knowledge in advanced engineering mechanics through the courses on solid mechanics, finite element analysis and continuum mechanics. Second, students will be able to learn specialized methods in failure analysis, composite materials, soft materials, and vibration to address challenging problems in engineering design.

Students who complete this certificate will have the necessary knowledge and skills for a broad range of industrial sectors that involve structural design and reliability assessment.

## Requirements

To complete the certificate program, students will be required to complete 9 graduate level credits. These credits can be chosen by the student, in consultation with certificate program faculty and the graduate advisors, based on the available courses and description of curriculum in subsection b) below. Courses offered each semester will depend on the availability of faculty. At least one relevant course will be offered each fall and spring semester to ensure that students are able to make progress toward completion of the certificate. In accordance with university policy, degree-seeking students will only be eligible for award of the certificate upon completion of their MS degree.

All degree and non-degree seeking certificate students must meet the following minimum academic standards for successful completion of the certificate:

- Students must receive a minimum grade of a B or higher in each course applied towards certificate requirements; and
- A cumulative GPA of 3.0 or higher in certificate courses.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
Students must take two of the following three courses:		
MCEN 5228/6228	Special Topics in Mechanical Engineering (Continuum Mechanics)	

MCEN 5023	Solid Mechanics 1
MCEN 5173	Finite Element Analysis
<b>Electives</b>	
Strongly recommended electives:	
MCEN 5174	Failure of Engineering Materials
MCEN 5183	Mechanics of Composite Materials
MCEN 5228	Special Topics in Mechanical Engineering (Vibrations)
MCEN 5228	Special Topics in Mechanical Engineering (Fracture Mechanic)
MCEN 5293	Mechanics of Soft Matter

Other electives may be considered in consultation with the certificate director.

# Mechanical Design and Product Development - Graduate Certificate

This certificate provides training in mechanical design and product development. Students will build on methods from across the field of design to create learning experiences that will directly influence their potential career path in product design and development. Students will be challenged throughout the certificate coursework with complex, ambiguous design problems with solutions that are uncertain, and they will be challenged to solve those issues creatively and communicate those solutions to others effectively.

Students who complete this certificate will have the necessary knowledge and skills for a broad range of industrial sectors that involve product design and development.

## Requirements

To earn this certificate, students must complete 12 graduate level credits. These credits can be chosen by the student, in consultation with certificate program faculty and the graduate advisors, based on the available courses and description of curriculum below.

Courses offered each semester will depend on the availability of faculty. At least one relevant course will be offered each fall and spring semester to ensure that students are able to make progress toward completion of the certificate. In accordance with university policy, degree-seeking students will only be eligible for award of the certificate upon completion of their M.S. degree.

All degree-seeking and nondegree certificate students must meet the following minimum academic standards for successful completion of the certificate:

- A minimum grade of a B or higher in each course applied towards certificate requirements; and
- A cumulative GPA of 3.0 or higher in certificate courses.

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
MCEN 5055	Advanced Product Design	3
MCEN 5045	Design for Manufacturability	3
<b>Electives</b>		

**Elective Option 1<sup>1</sup>**

Choose any two:

MCEN 5228	Special Topics in Mechanical Engineering (Aesthetics of Design)
MCEN 5228	Special Topics in Mechanical Engineering (Automated Mechanical Design Synthesis)
MCEN 5228	Special Topics in Mechanical Engineering (Design for Inclusion)
EMEN 5400	Technical Product Development
COEN 5550	

**Elective Option 2<sup>2</sup>**

MCEN 5065	Graduate Design I	3
MCEN 5075	Graduate Design II	3

<sup>1</sup> Degree-seeking and nondegree students.<sup>2</sup> Nondegree students are ineligible to complete Elective Option 2; degree-seeking students must apply separately to complete Elective Option 2.

## Learning Outcomes

Educational and scholarly goals of the certificate:

- To introduce students to potential career opportunities in the mechanical design and product development industry.
- To introduce students to industry tools and expectations for product development.
- To teach students the key concepts and engineering principles of mechanical design and product development.
- To understand the role of engineering design at the intersection of science, engineering, and culture.

## Interdisciplinary Programs

CU Boulder offers interdisciplinary master's degrees as well as graduate certificate programs to complement a traditional education.

New graduate certificates must be approved by the Graduate School's Executive Advisory Council (EAC). For an updated list of graduate interdisciplinary certificates, visit the Graduate School Admissions (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>) webpage.

## Master's Degrees

- Computational Linguistics - Master of Science (MS) (p. 1663)
- Data Science - Master of Science (MS) (p. 1664)
- Data Science - Master of Science (MS) Online (p. 1668)
- Organizational Leadership - Master of Science (MS) (p. 1671)

## Certificates

- College Teaching - Graduate Certificate (p. 1672)
- Data Science - Graduate Certificate (p. 1667)
- Data Science - Graduate Certificate (Online) (p. 1670)
- Digital Humanities - Graduate Certificate (p. 1672)
- Earth Data Analytics - Foundations - Graduate Certificate (p. 1673)
- Future Faculty Development - Graduate Certificate (p. 1674)
- Hydrologic Sciences - Graduate Certificate (p. 1675)

- Interdisciplinary Quantitative Biology - Graduate Certificate (p. 1676)
- International Affairs - Graduate Certificate (p. 1677)
- Native American and Indigenous Studies - Graduate Certificate (p. 1678)
- Quantitative Methods for Behavioral Sciences - Graduate Certificate (p. 1679)
- Satellite System Design - Graduate Certificate (p. 1680)
- Social Innovation - Graduate Certificate (p. 1681)
- Space Weather and Applications - Graduate Certificate (p. 1682)
- Water Engineering and Management - Graduate Certificate (p. 1683)

## Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS)

This unique interdisciplinary degree provides a solid foundation in both computer science and linguistics as well as in current methods used in natural language processing and artificial intelligence. CLASIC training is aimed at preparing students for careers in language modeling, automatic question-answering, machine translation and interactive virtual agents.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Due to the hands-on learning experience, some courses for the CLASIC degree must be taken on campus. This program cannot be completed entirely through distance learning.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 831)
- Computer Science - Bachelor of Arts (BA) (p. 824)
- Computer Science - Bachelor of Science (BSCS) (p. 829)
- Linguistics - Bachelor of Arts (BA) (p. 468)

## Requirements

Students must complete at least 32 hours of approved graduate study, including a 2-credit capstone course focused on a publishable research project, which will run in conjunction with an internship or a CU-based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will also prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. A minimum course grade is a B and a minimum GPA for graduation is a 3.0.

To fulfill core requirements defined below, students must take graduate breadth courses in 3 different breadth bins. This includes core computer science (bins 1 and 3) and core CLASIC (bin 2).

## Required Courses and Credits

Code	Title	Credit Hours
<b>Core Linguistics Courses</b>		<b>9</b>
Choose two of the following:		
LING 5030	Linguistic Phonetics	
LING 5420	Morphology and Syntax	
or LING 6450	Syntactic Analysis	
LING 5430	Semantics and Pragmatics	
Choose one:		
Any LING course at the 5000-, 6000- or 7000-level (subject to advisor approval)		
<b>Core Computer Science Courses</b>		<b>6</b>
<i>Bin 1 (choose one)</i> <sup>1</sup>		
Recommended options:		
CSCI 5454	Design and Analysis of Algorithms	
or CSCI 5444	Introduction to Theory of Computation	
or CSCI 5714	Formal Languages	
CSCI 5606	Principles of Numerical Computation	
or CSCI 5646	Numerical Linear Algebra	
<i>Bin 3 (choose one)</i> <sup>1</sup>		
Recommended options:		
CSCI 5253	Datacenter Scale Computing - Methods, Systems and Techniques	
CSCI 5448	Object-Oriented Analysis and Design	
CSCI 5535	Fundamental Concepts of Programming Languages	
<b>CLASIC Capstone</b>		
LING/CSCI 5140	CLASIC Capstone	2
<b>Core CLASIC Courses</b>		
CSCI/LING 5832	Natural Language Processing (Required for everyone. Satisfies Bin 2 requirement)	3
Choose two of the following:		
CSCI 7000/ LING 7800	Current Topics in Computer Science (Topics: Computational Lexical Semantics or Computational Models of Discourse)	6
CSCI/LING 7565	Computational Phonology and Morphology	
Choose two of the following:		
CSCI 5352	Network Analysis and Modeling	6
CSCI 5502	Data Mining	
CSCI 5622	Machine Learning	
CSCI 5922	Neural Networks and Deep Learning	
CSCI 6622	Advanced Machine Learning	
CSCI 7000	Current Topics in Computer Science (Inference, Models & Simulation for Complex Systems)	
CSCI 7222	Topics in Nonsymbolic Artificial Intelligence (Probabilistic Models of Human & Machine Intelligence)	

CSCI 7222	Topics in Nonsymbolic Artificial Intelligence (Representation Learning for Language)
LING 5200	Introduction to Computational Corpus Linguistics
LING 5800	Open Topics in Linguistics (Machine Learning and Linguistics)
LING 6300/3800	Topics in Language Use (Formal Models of Linguistics)
LING 6520	Topics in Comparative Linguistics (Computational Grammars)
PHIL 5440	Topics in Logic
PHIL 5460	Modal Logic
Any other CSCI or LING course at the 5000-, 6000- or 7000-level	
Any Core course listed above (not already taken)	
<b>Total Credit Hours</b>	<b>32</b>

<sup>1</sup> Visit the computer science department website (<http://www.colorado.edu/cs/current-students/graduate-students/graduate-breadth-courses/>) for a full list of course options in each of the 3 breadth bins. (Updated every two years.)

## Learning Outcomes

The program is intended to:

- Provide a solid foundation in computer science, data-driven linguistics and natural language processing graduate coursework.
- Educate graduates to be specialists in the application of computers to the processing of natural languages, from major world languages like English, Chinese, Arabic and Urdu to low-resource languages, such as those spoken by indigenous peoples around the world.
- Prepare students for jobs in natural language processing, text analytics and artificial intelligence, fields critical to the success of mainstream global businesses who compete for qualified employees.

## Data Science - Master of Science (MS)

The on-campus Master of Science in Data Science program focuses on developing knowledge and skills in interdisciplinary and collaborative data science competencies including statistical analysis, data structures and algorithms, data mining, machine learning, big data architecture and data visualization.

Data science is a multidisciplinary field that focuses on the extraction of knowledge and insight from large datasets. Data scientists are tasked with using a range of skills in applied mathematics, statistics and computer science, and in domain applications such as information science, geography, business, media and the humanities.

The MS-DS provides learners with a strong foundation in acquiring, cleaning and managing data. Learners will learn to analyze large datasets using data mining and machine learning techniques. Students will also design, conduct and run statistical experiments and models; draw rational conclusions from data using probability theory and statistics; and more.

Graduates of the MS-DS program will be well-prepared to apply data science skills to a specific domain area. Graduates will also be able to clearly communicate the results of data science analysis to a non-technical audience; structure effective meetings and projects using collaboration skills; and act ethically in the role of professional data scientist.

## Topic Areas

### Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics.

### Computer Science

Computer science is an exciting and challenging field that impacts many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, and they advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

### General Data Science

Data science is a multidisciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from structured and unstructured data.

### Information Science

Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena and translate those findings to the design and development of useful and meaningful technology.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Applied Computer Science - Post-Baccalaureate Bachelor of Science (BSACS) (p. 830)
- Computer Science - Bachelor of Arts (BA) (p. 822)
- Computer Science - Bachelor of Science (BSCS) (p. 825)

## Requirements

### Admission Requirements

Applicants are eligible to apply to the program if they have earned a bachelor's degree or its equivalent from a regionally accredited college or university. Applicants must show promise of their ability to pursue advanced study and research, as judged by the student's scholastic record. Applicants must have a minimum of a 2.75 cumulative GPA in their prior degree program to be considered. International students may have country-specific requirements and/or English proficiency requirements.

Strong applicants will also have an undergraduate GPA of 3.2 or higher on a 4.0 scale (3.0 = B)

### Prerequisite Knowledge

Applicants with the following prior knowledge or equivalent experience are eligible for admission to the Direct to Data Science Pathway and can complete the degree with 30 total credits:

- **Mathematics:** Applicants should be familiar with differential calculus (including derivatives), integral calculus, linear algebra, and have some experience with infinite sequences and series. Multivariate calculus is preferred but not required.
- **Programming:** Applicants should have some programming experience, whether it is formal, informal or on the job. Some advanced knowledge of R is also helpful before starting the program.

Applicants without the specific math and programming experience above are eligible for admission to the Bridge to Data Science Pathway and can complete the degree with 30–34 total credits as determined by the graduate committee upon a review of the student's prior experience.

### Potential Additional Curriculum

The graduate committee may require students in this pathway to complete one or more of the following courses (up to 7 credits). Courses should be taken in the first year and are subject to Graduate School grade and cumulative GPA standards. Up to 3 hours of bridge courses which meet applicable standards can count toward the degree in the electives category.

- INFO 5651 Fundamental Concepts in Data Science (3)
- INFO 5652 Statistical Programming in R (3)
- DTSC 5003 Programming for Data Science - Python for Data Science (1)

### Application Requirements

To apply, applicants must submit the following:

- A completed graduate admission application
- An application fee
- Unofficial undergraduate transcripts and, if applicable, any graduate transcripts
- A statement of purpose that briefly describes the applicant's background, academic goals, and professional goals
- Two to three letters of recommendation
- A current curriculum vitae or resume

An applicant whose native language is not English must provide proof of English proficiency by submitting documents. A TOEFL score of at least 80, IELTS score of at least 6, or Duolingo score of at least 100 is

required. To report TOEFL and IELTS scores, students should request that the testing agency submit scores directly to the Office of Admissions. They can also ask the agency to automatically submit TOEFL scores to CU Boulder using institution code 4841. To report official Duolingo scores, click Send Results from inside the application, then choose University of Colorado Boulder – Undergraduate.

See the Data Science website for details about application deadlines.

For information about application deadlines, please see the Graduate School's Admissions Deadlines (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>).

## Program Requirements

The on-campus data science master's degree seeks to shape tomorrow's leaders by providing learners with the skills, competencies and knowledge necessary to fuel creative problem-solving, adaptability, and the capability to communicate effectively across diverse organizations.

The MS degree is a non-thesis degree, though students may have the opportunity to complete a capstone or project as part of the 30 required credit hours. Students in the Bridge to Data Science Pathway may be required to complete up to 4 additional credits as determined by the graduate committee upon a review of the student's prior experience.

All students must complete 21 credits of core coursework in statistics, computer science and general core concepts as well as 9 credits of elective coursework. The degree does not require a master's final/comprehensive examination.

## Data Science - Graduate Certificate

The on-campus Master of Science in Data Science program focuses on developing knowledge and skills in interdisciplinary and collaborative data science competencies including statistical analysis, data structures and algorithms, data mining, machine learning, big data architecture and data visualization. The on-campus program offers a stackable graduate certificate that can be earned on its own or applied toward the full master's degree.

Graduates of the certificate and/or full master's degree program will be well-prepared to apply data science skills to a specific domain area. Graduates will also be able to clearly communicate the results of data science analysis to a non-technical audience; structure effective meetings and projects using collaboration skills; and act ethically in the role of professional data scientist.

## Admission Requirements

Initially, the proposed Residential Data Science Graduate Certificate will be primarily for students who meet either of the following criteria:

- Currently matriculated CU Boulder residential or online (Canvas) graduate student in a participating department on Main Campus.
- Graduate or non-degree seeking students in other disciplines with an interest in data science.

Students are required to have an awarded bachelor's degree to be admitted into the residential Data Science or Online (Canvas) Graduate Certificate and will be subject to graduate main campus graduate certificate policies for admission/award. Further admission requirements and processes will be refined by the Data Science Faculty Director and oversight committee.

## Required Courses and Credits

The residential Data Science Graduate Certificate requires 12 credit hours of coursework. Students must complete the required courses listed below.

In order to earn a certificate, students must receive a minimum grade of a C or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.

Code	Title	Credit Hours
<b>Required Courses</b>		
CSCI 5502	Data Mining	3
STAT 5000	Statistical Methods and Application I	3
Choose two:		6
STAT 5600	Methods in Statistical Learning	
CSCI 5622	Machine Learning	

## Learning Outcomes

- Acquire, clean, wrangle, and manage data
- Correctly perform exploratory data analysis in order to assist with the generation of scientific hypotheses
- Apply principles and methods of probability theory and statistics to draw rational conclusions from data
- Construct an appropriate statistical model in order to answer important scientific or business-related questions
- Assess the validity of a statistical model when applied to a particular dataset
- Use statistical techniques to design an experiment
- Understand and be able to apply the main computational techniques used to analyze large data sets, including a variety of data mining and machine learning approaches
- Understand the principles of computer representation, storage and access of large data sets and be able to determine the appropriate approaches for specific problem
- Clearly communicate the results of a data science analysis to a non-technical audience

## Data Science - Master of Science (MS) Online

The online Master of Science degree in Data Science (MS-DS) on Coursera is an interdisciplinary degree program offered through the University of Colorado Boulder and hosted online through Coursera's learning platform. With performance-based admissions and no application process, the MS-DS is ideal for individuals with a broad range of undergraduate education and/or professional experience in computer science, information science, mathematics and statistics.

Data science is a multidisciplinary field that focuses on the extraction of knowledge and insight from large datasets. Data scientists are tasked with using a range of skills in applied mathematics, statistics, and computer science, and in domain applications such as information science, geography, business, media and the humanities.

The MS-DS on Coursera provides learners with a strong foundation in acquiring, cleaning and managing data. Students will learn to analyze large datasets using data mining and machine learning techniques. Students will also design, conduct, and run statistical experiments and models; draw rational conclusions from data using probability theory and statistics; and more.

Graduates of the MS-DS on Coursera program will be well-prepared to apply data science skills to a specific domain area. Graduates will also be able to clearly communicate the results of data science analysis to a non-technical audience; structure effective meetings and projects using collaboration skills; and act ethically in the role of professional data scientist.

## Topic Areas

### General Data Science

Data science is a multidisciplinary field that uses scientific methods, processes, applications, algorithms and systems to extract knowledge and insights from structured and unstructured data.

### Applied Mathematics

The Department of Applied Mathematics in the College of Arts and Sciences offers a range of courses and research opportunities in many areas, including computational mathematics, mathematical biology, nonlinear phenomena, physical applied mathematics, and probability and statistics.

### Computer Science

Computer science is an exciting and challenging field that has an impact on many parts of our lives. Computer scientists craft the technologies that enable the digital devices we use every day. They develop the large-scale software that powers business and industry, advance the computational techniques and write the software that supports scientists in their study of the world around us. Many new applications of computing technology remain to be discovered. Computing will be at the heart of future revolutions in business, science and society. Students who study computer science will be at the forefront of these important advances.

### Information Science

Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena, and translate those findings to the design and development of useful and meaningful technology.

## Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1833) section of the catalog for more information.

## Requirements

### Admission Requirements

Students are automatically admitted to the degree program after meeting all admission requirements below. #All admitted students receive an official offer letter via email. See the program website for details.

- Pass one pathway with a pathway GPA of 3.0 or higher
- Earn a C or better in all pathway courses within their chosen pathway
- Earn an overall cumulative GPA of 3.0 or higher
- Indicate interest in degree admission (via the enrollment form)

### Performance-Based Admission

To be admitted to the MS-DS on Coursera as a degree-seeking student, students must enroll in and complete a pathway with a 3.00 GPA or better. A pathway is a series of 3 one-credit courses with a focus on either statistics or computer science—students choose the pathway that is right for them. Pathway courses are an important part of the required curriculum, so students make direct progress toward their degree as they complete their pathway.

## Prerequisite Knowledge

There are no formal prerequisites for the MS-DS on Coursera, but students should be knowledgeable in the following:

- Python
- R programming
- Calculus including derivatives and integrals
- Linear algebra including matrix multiplication, matrix inversion and solving linear systems using matrices

If students do not yet feel ready to complete their pathway courses, the program suggests reviewing courses on the Coursera platform. Students can enroll in a pathway as a non-credit learner, which gives them the option of previewing course content. Then, they can upgrade to the for-credit version and pay tuition when they are ready.

## Required Courses and Credits

The MS-DS is a non-thesis degree that requires 30 credit hours of coursework. Students must complete 21 credits of core coursework in statistics, computer science, and general core concepts as well as 9 credits of elective coursework. Students will also participate in practical, hands-on projects that utilize cloud-based programming environments and Jupyter Notebooks. Coursework includes access to real-world big data sets to prepare students for their future careers.

## Learner Journeys

Students may complete courses in any order, but are advised to follow one of the recommended learner journeys below.

## Statistics Pathway

We recommend that students who are skilled in statistics complete their courses in the following order:

Code	Title	Credit Hours
<b>Data Science Foundations: Statistical Inference Courses</b>		<b>3</b>
DTSA 5001	Probability Theory: Foundation for Data Science	
DTSA 5002	Statistical Inference for Estimation in Data Science	
DTSA 5003	Hypothesis Testing for Data Science	
<b>Vital Skills for Data Scientists Courses</b>		<b>4</b>
DTSA 5301	Data Science as a Field	
DTSA 5302	Cybersecurity for Data Science	
DTSA 5303	Ethical Issues in Data Science	
DTSA 5304	Fundamentals of Data Visualization	
<b>Core Courses</b>		
Complete in any order		
<b>Statistical Modeling for Data Science Courses</b>		<b>3</b>
DTSA 5011	Modern Regression Analysis in R	
DTSA 5012	ANOVA and Experimental Design	
DTSA 5013	Generalized Linear Models and Nonparametric Regression	
<b>Data Science Foundations: Data Structures &amp; Algorithms Courses</b>		<b>3</b>
DTSA 5501	Algorithms for Searching, Sorting, and Indexing	
DTSA 5502	Trees and Graphs: Basics	
DTSA 5503	Dynamic Programming, Greedy Algorithms	

<b>Data Mining: Foundations &amp; Practice</b>		<b>3</b>
DTSA 5504	Data Mining Pipeline	
DTSA 5505	Data Mining Methods	
DTSA 5506	Data Mining Project	
<b>Machine Learning Courses</b>		<b>3</b>
DTSA 5509	Introduction to Machine Learning - Supervised Learning	
DTSA 5510	Unsupervised Algorithms in Machine Learning	
DTSA 5511	Introduction to Deep Learning	
<b>Databases Courses</b>		<b>2</b>
DTSA 5733	Relational Database Design	
DTSA 5734	The Structured Query Language (SQL)	
<b>Data Science Elective Courses</b>		<b>9</b>
<b>Total Credit Hours</b>		<b>30</b>

## Computer Science Pathway

We recommend that students who are skilled in computer science complete their courses in the following order:

Code	Title	Credit Hours
<b>Data Science Foundations: Data Structures and Algorithms Courses</b>		<b>3</b>
DTSA 5501	Algorithms for Searching, Sorting, and Indexing	
DTSA 5502	Trees and Graphs: Basics	
DTSA 5503	Dynamic Programming, Greedy Algorithms	
<b>Vital Skills for Data Scientists Courses</b>		<b>4</b>
DTSA 5301	Data Science as a Field	
DTSA 5302	Cybersecurity for Data Science	
DTSA 5303	Ethical Issues in Data Science	
DTSA 5304	Fundamentals of Data Visualization	1
<b>Core Courses</b>		
Complete in any order		
<b>Data Science Foundations: Statistical Inference for Data Science Courses</b>		<b>3</b>
DTSA 5001	Probability Theory: Foundation for Data Science	
DTSA 5002	Statistical Inference for Estimation in Data Science	
DTSA 5003	Hypothesis Testing for Data Science	
<b>Statistical Modeling for Data Science Courses</b>		<b>3</b>
DTSA 5011	Modern Regression Analysis in R	
DTSA 5012	ANOVA and Experimental Design	
DTSA 5013	Generalized Linear Models and Nonparametric Regression	
<b>Data Mining Foundations and Practice Courses</b>		<b>3</b>
DTSA 5504	Data Mining Pipeline	
DTSA 5505	Data Mining Methods	
DTSA 5506	Data Mining Project	
<b>Machine Learning Courses</b>		<b>3</b>
DTSA 5509	Introduction to Machine Learning - Supervised Learning	

DTSA 5510	Unsupervised Algorithms in Machine Learning	
DTSA 5511	Introduction to Deep Learning	
<b>Databases Courses</b>		<b>2</b>
DTSA 5733	Relational Database Design	
DTSA 5734	The Structured Query Language (SQL)	
<b>Data Science Elective Courses</b>		<b>9</b>
<b>Total Credit Hours</b>		<b>31</b>

### Engineering Management Electives

Up to 6 credits offered by the ME-EM on Coursera from the list of courses below may be applied as elective credit toward the Data Science MS degree. Courses must be graduate level and meet all applicable academic standards, and may not be double counted toward two credentials of the same level. Only courses offered through Coursera may be used.

Code	Title	Credit Hours
<b>Project Management Courses</b>		<b>3</b>
EMEA 5031	Project Management: Foundations and Initiation	
EMEA 5032	Project Planning and Execution	
EMEA 5033	Agile Project Management	
<b>Product Development Courses</b>		<b>3</b>
EMEA 5021	Product Cost and Investment Cash Flow Analysis	
EMEA 5022	Project Valuation and the Capital Budgeting Process	
EMEA 5023	Financial Forecasting and Reporting	
<b>Total Credit Hours</b>		<b>6</b>

## Data Science - Graduate Certificate (Online)

The Master of Science in Data Science program hosted online through the Coursera platform offers stackable graduate-level courses, a graduate certificate, and a fully accredited master's degree in data science. Students earn the same credentials as on-campus students. There are no online or Coursera designations on official CU transcripts or diplomas.

### Program Policies

This specialized program does not align with standard campus policies. Please refer to the Special Online Programs (p. 1833) section of the catalog for more information.

### Program Requirements

#### Admission Requirements

There are no admission processes for learners seeking to earn the Data Science Graduate Certificate.

All courses attempted and/or completed for credit will appear on an official CU Boulder transcript (unless dropped by the drop deadline) and will count toward the cumulative GPA.

#### Prerequisite Knowledge

There are no formal prerequisites for the Data Science Graduate Certificate, but we recommend that prospective students be

knowledgeable in Python, R Programming, Calculus including derivatives and integrals, and Linear Algebra including matrix multiplication, matrix inversion, and solving linear systems using matrices. If they are not, we encourage them to try out non-credit coursework before attempting for-credit courses.

### Required Courses and Credits

To earn the Data Science Graduate Certificate (12 credits), students must complete the following required specializations:

- Data Mining Foundations and Practice (3 credits)
- Data Science Foundations: Statistical Inference (3 credits)

As well as two specializations from the following:

- Introduction to Statistical Learning for Data Science (3 credits)
- Machine Learning (3 credits)
- Statistical Modeling for Data Science (3 credits)

In order to earn a certificate, students must receive a minimum grade of a C or higher in each course. The cumulative GPA for certificate courses must be 3.0 or higher.

The Data Science Graduate Certificate requires 12 credit hours of coursework. Students must complete the follow required courses:

Code	Title	Credit Hours
<b>Required Courses</b>		
DTSA 5504	Data Mining Pipeline	1
DTSA 5505	Data Mining Methods	1
DTSA 5506	Data Mining Project	1
DTSA 5001	Probability Theory: Foundation for Data Science	1
DTSA 5002	Statistical Inference for Estimation in Data Science	1
DTSA 5003	Hypothesis Testing for Data Science	1
<b>Additional Requirements</b>		<b>6</b>
Students must complete an additional 6 credits and can choose to complete any 2 of the following 3 specializations		
DTSA 5020	Statistical Learning for Data Science: Regression and Classification	
DTSA 5021	Statistical Learning for Data Science: Resampling, Selection and Splines	
DTSA 5022	Statistical Learning for Data Science: Trees, SVM and Unsupervised Learning	
DTSA 5509	Introduction to Machine Learning - Supervised Learning	
DTSA 5510	Unsupervised Algorithms in Machine Learning	
DTSA 5511	Introduction to Deep Learning	
DTSA 5011	Modern Regression Analysis in R	
DTSA 5012	ANOVA and Experimental Design	
DTSA 5013	Generalized Linear Models and Nonparametric Regression	
<b>Total Credit Hours</b>		<b>12</b>

## Learning Outcomes

- Acquire, clean, wrangle, and manage data
- Correctly perform exploratory data analysis in order to assist with the generation of scientific hypotheses
- Apply principles and methods of probability theory and statistics to draw rational conclusions from data
- Construct an appropriate statistical model in order to answer important scientific or business-related questions
- Assess the validity of a statistical model when applied to a particular dataset
- Use statistical techniques to design an experiment
- Understand and be able to apply the main computational techniques used to analyze large data sets, including a variety of data mining and machine learning approaches
- Understand the principles of computer representation, storage and access of large data sets and be able to determine the appropriate approaches for specific problem
- Clearly communicate the results of a data science analysis to a non-technical audience

## Organizational Leadership - Master of Science (MS)

The Master of Science in Organizational Leadership is an interdisciplinary, fully online professional master's degree that prepares early- to mid-career professionals to succeed as tomorrow's dynamic leaders. Through coursework that blends business, communications and social sciences, the program develops the knowledge and skills students need to think critically about organizational challenges and how to address them using best practices. Students learn to align others around a shared vision, build and manage effective teams, and apply the leadership skills necessary to excel in an increasingly fast-paced and complex working world.

For more information, visit the Master of Science in Organizational Leadership (<http://msol.colorado.edu/>) webpage.

## Requirements

Students must complete at least 30 credit hours of graduate coursework. The program is composed of 10 courses: six core courses and four specialized track courses.

### Core Courses

Core courses ensure that students have the necessary understanding of the complexities of organizational leadership and the varied dimensions of change within the context of public, private and nonprofit organizations. The curriculum prepares graduates to be successful in understanding organizational cultures, anticipating and managing change, and enhancing performance and human capital management. Core courses include:

Code	Title	Credit Hours
ORGL 5005	Leadership and Organizations	3
ORGL 5010	Leading Change and Innovation	3
ORGL 5015	Analytics and Data-Driven Decision Making	3
ORGL 5020	Strategic Communication	3

ORGL 5025	Performance Management	3
ORGL 6830	Master's Capstone (MSOL)	3

The purpose of the capstone, the final course of the program, is for students to apply knowledge and skills acquired during their program to addressing actual challenges facing an organization. Students do this—under the guidance of the instructor and other subject matter experts—by collecting, processing and analyzing data and information about the organization and applying appropriate analytic methods to develop, propose and substantiate their recommended solution to the organization's problem.

### Specialized Track Courses

Students may choose to specialize in one of the following tracks.

#### Human Resources Track

This track is ideal for students who wish to enter or advance a career in Human Resources or who want to focus on enhancing employee satisfaction and organizational performance as they assume increasing management and leadership responsibilities. Courses include:

Code	Title	Credit Hours
ORGL 5105	Negotiation and Conflict Resolution	3
ORGL 5110	Human Resources Law	3
ORGL 5115	Total Rewards Strategies	3
ORGL 5120	Training and Development	3

#### Strategic Leadership Track

This track is geared for students who want to hone their ability to think, plan, and operate strategically, lead personnel in the allocation of organizational resources and accomplish organizational objectives in a deliberate and systematic manner. Courses include:

Code	Title	Credit Hours
ORGL 5205	Strategic Planning in Organizations	3
ORGL 5210	Competitive Analysis and Positioning	3
ORGL 5215	Organizations and the Law	3
ORGL 5220	Operations and Designs of Organizations	3

#### Leading Innovation Track

The leading innovation track explores leadership at the intersection of business and innovation and helps students learn to drive strategic organizational transformation. It addresses the gap that exists between the aspirations of executives to innovate and their ability to execute. It focuses on the question: why and how should leadership, innovations and technologies be leveraged to shape and support strategic and entrepreneurial initiatives in the global competitive landscape. Courses include:

Code	Title	Credit Hours
ORGL 5305	Leadership and Intrapreneurship	3
ORGL 5310	Design Thinking	3
ORGL 5315	Strategy and Innovation	3
ORGL 5320	Building and Leading Innovative Work Teams	3

### Organizational Communication Track

Communication is the key social process that creates and sustains all features of organizational life—including assumptions about power, knowledge, diversity, culture and teamwork that shape the practice of leadership. The organizational communication track offers a perspective that puts communication at the center of our understanding and explanation of all organizational and leadership phenomena. Courses include:

Code	Title	Credit Hours
ORGL 5405	Diversity and Organizational Communication	3
ORGL 5410	Dynamics of Group Communication	3
ORGL 5415	Organizational Culture	3
ORGL 5420	Knowledge Management	3

### Organizational Leadership (Broad Perspective) Track

This is a great track option for those who want to customize their degree to obtain broad exposure to the field of organizational leadership. Students select any four track courses from the offerings available under the other tracks (Human Resources, Leading Innovation, Organizational Communication and/or Strategic Leadership). With pre-approval, students also have the option of transferring in up to three relevant graduate courses from other programs and colleges.

## College Teaching - Graduate Certificate

The certificate in college teaching (CCT) is designed for graduate students and postdoctoral scholars who teach laboratories, recitations or courses on the CU Boulder campus.

This certificate is offered by the Center for Teaching & Learning (<https://www.colorado.edu/center/teaching-learning/>), which supports graduate students who teach on the Boulder campus and provides continued professional development opportunities for all graduate students. The Center for Teaching & Learning prepares graduate students for success on the job market in higher education or in the private sector as professionals.

To that end, we offer:

- Comprehensive college teacher training (workshops on teaching, individual consultation on any aspect of the graduate experience, video consultation on teaching in labs, recitations and courses).
- Workshops and guidance to support the scholarship of teaching and learning.
- Academic and nonacademic career preparation opportunities through conferences, seminars and individual consultations on curriculum vitae, job letters, teaching statements, diversity statements and interviewing skills.

## Requirements

The certificate is open to graduate students in good standing who hold, have held or will hold a teaching position on the CU Boulder campus.

For more information and completion requirements, visit the Center for Teaching & Learning website's Certificate in College Teaching webpage

(<https://www.colorado.edu/center/teaching-learning/programs/graduate-certificates/certificate-college-teaching/>).

## Digital Humanities - Graduate Certificate

The digital humanities graduate certificate welcomes students from all disciplines, including the humanities and arts, social sciences, natural sciences, computational and mathematical sciences, engineering, and communication, media and information science. The certificate prepares students to:

- create, utilize and evaluate digital methods and tools for research;
- integrate methods and tools into their teaching;
- assess the diverse impacts of technologies on people and society; and
- leverage digital technologies for public outreach and engagement.

Through an interdisciplinary curriculum, the certificate provides graduate students from across campus the opportunity to explore the evolution and variety of digital humanities theories and practices and to study approaches in the field in-depth. Moreover, the certificate is intended to stimulate collaborations among graduate students in a range of fields, thus preparing them for work in a team-based environment.

For additional details, including the procedures to declare and complete the certificate, visit the Digital Humanities Graduate Certificate (<https://www.colorado.edu/crdds/dhgc/>) webpage.

## Requirements

### Required Course and Credits

The certificate consists of course requirements only, at least 9 credit hours at the graduate level with an average GPA of 3.0 (B) or better.

In addition to the core course, students must choose two elective courses to complete the certificate. Certain special topics courses also count as electives. For a full list, please visit the certificate website's Elective Courses (<https://www.colorado.edu/crdds/what-we-do/digital-scholarship/digital-humanities-graduate-certificate/elective-courses/>) webpage.

Code	Title	Credit Hours
<b>Core Course</b>		<b>3</b>
DHUM 5000	Introduction to Digital Humanities: Movements, Methods, and Tools	
<b>Electives</b>		<b>6</b>
ARTS 5316/ IAWP 6700	History and Theory of Digital Art	
ATLS 5040	Game Design	
ATLS 5120	Mobile Application Development	
ATLS 5214	Big Data Architecture	
ATLS 5244	Empathy and Technology	
ATLS 5410	Creative Technologies	
ATLS 5440	Design Studio	
ATLS 5630	Web Front-End Development	
CMDP 7100	Historical Overview of Media Arts and Technology	

CMDP 7200	Research and Methodologies I
CMDP 7500	Production Methods I
COMM 5720	Readings in Communication and Technology
CSCI 5352	Network Analysis and Modeling
CSCI 5502	Data Mining (Same as CSCI 4502)
CSCI/LING 5832	Natural Language Processing
GEOG 5043	Advanced Geovisualization and Web Mapping
GEOG 5103	Geographic Information Science: Spatial Analytics
GEOG 5203	Geographic Information Science: Spatial Modeling
GEOG 5403	Geographic Information Science: Space Time Analytics
GEOG 5603	GIS in the Social and Natural Sciences
HIST 6790	Readings in Digital History
IAWP 6100	Theory and Practice of Doing
IAWP 6800	Intermedia Seminar (Media Archaeologies, Old and New)
INFO 5501	Open Collaboration
INFO 5502	Online Communities
INFO 5504	Digital Identity
INFO 5506	Online Fandom
INFO 5507	Data and the Humanities
INFO 5601	Ethical and Policy Dimensions of Information and Technology
INFO 5602	Information Visualization
INFO 5604	Applied Machine Learning
INFO 5613	Network Science
INFO 6301	Computation for Research in Information Science
JRNL 5001	Media Technology Boot Camp
JRNL 5344	Video Documentary Production
JRNL 5521	Data Journalism
JRNL 5562	Digital Journalism
LING 5200	Introduction to Computational Corpus Linguistics
MDST 5001	Connected Media Practices
PSCI 7185	Political Network Analysis
STAT 5680	Statistical Collaboration
STAT 5700	Philosophical and Ethical Issues in Statistics

**Total Credit Hours** 9

### Capstone Project

Though not required to complete the certificate, students may also complete a 1-3 credit Digital Humanities capstone project in collaboration with other students under the guidance of a faculty advisor.

## Earth Data Analytics - Foundations - Graduate Certificate

The Earth Data Analytics - Foundations (<https://earthlab.colorado.edu/earth-data-analytics->

[professional-graduate-certificate/?utm\\_source=course-catalog&utm\\_medium=website&utm\\_campaign=certificate-2019](https://earthlab.colorado.edu/earth-data-analytics-professional-graduate-certificate/?utm_source=course-catalog&utm_medium=website&utm_campaign=certificate-2019)) professional certificate provides students with skills to launch or advance their careers in the rapidly expanding world of earth data science. The three-course program can be completed online at a student's own pace or in person in as little as ten months. Students do not need any background in programming or science to enroll.

Data are becoming increasingly available as technology grows and improves. This data can help address some of the world's most pressing environmental problems. As a result of this, earth and environmental scientists with data science expertise (earth data scientists) are now in high demand in the job market. All skills taught in the program are identified through market research on in-demand skills in industry and government.

Through this nine-credit program students will learn:

- Applied data science skills
- Skills needed to work with different types of data
- Interdisciplinary communication & collaboration techniques and approaches
- Skills needed to address scientific challenges using data

Students will emerge from the program with skills in:

- Scientific programming
- GIS and remote sensing
- Using APIs
- Creating automated workflows using data that anyone can use
- Open reproducible science
- And more

Visit the Earth Lab website (<https://www.earthdatascience.org/>) to explore lessons and tutorials related to this program.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

The professional graduate certificate requires three sequential courses beginning in the fall semester and ending in June, and can be completed entirely online.

### Required Courses and Credits

Code	Title	Credit Hours
GEOG 5463	Earth Analytics Data Science Bootcamp	3
GEOG 5563	Earth Analytics	3
GEOG 5663	Earth Analytics Applications	3
<b>Total Credit Hours</b>		<b>9</b>

## Plan of Study

The three certificate courses must be completed sequentially and can be completed in as little as ten months or up to three years. All certificate courses are offered once annually on the following schedule:

Fall Semester		Credit Hours
GEOG 5463	Earth Analytics Data Science Bootcamp	3
<b>Credit Hours</b>		<b>3</b>
Spring Semester		Credit Hours
GEOG 5563	Earth Analytics	3
<b>Credit Hours</b>		<b>3</b>
Summer		Credit Hours
GEOG 5663	Earth Analytics Applications	3
<b>Credit Hours</b>		<b>3</b>
<b>Total Credit Hours</b>		<b>9</b>

Through completing the certificate, students will learn to:

- Apply data science skills to scientific challenges related to earth systems.
- Code using Python and Jupyter Notebooks.
- Use the command line and other tools to work with environmental and earth systems data.
- Use version control systems like Git and GitHub to work collaboratively as well as back-up and document workflows.
- Use different data types and formats including GIS, remote sensing, social media, text, time series, and more.
- Communicate and collaborate with people across different disciplines using different tools.
- Create fully automated and reproducible data workflows.

## Environmental Justice - Graduate Certificate

Environmental justice (EJ) refers to the right to a safe and healthy environment for everyone, regardless of race, class, gender, ability or other considerations, as well as a place at decision-making tables. From this perspective, the environment is not separate from society, but includes spaces where people live, work, play, learn and pray. Research demonstrates that environmental and climate-related problems and hazards often disproportionately impact the health and economic opportunities of communities of color, Indigenous communities and working-class communities. These patterns are related to systemic forms of inequality in society, including unequal representation in environmental decision-making and leadership, racism and other forms of oppression, and the neglect of diverse value systems.

The graduate certificate in environmental justice provides training in the interdisciplinary and dynamic field of environmental justice studies, as well as opportunities for engaged interactions with the challenges and solutions environmental justice communities face today.

The certificate program is open to CU Boulder graduate students from all units and programs, as well as to nondegree students, and seeks to include scholars and practitioners from diverse disciplinary and experiential backgrounds in its development.

For more information, visit the Graduate Certificate in Environmental Justice (<https://www.colorado.edu/certificate/ej/>) website.

## Requirements

Students must complete 12 credits, including the 3-credit pillar course and three approved electives.

At least one of the electives must be taken outside of the student's home department. To satisfactorily complete each course, students must earn a grade of B or higher.

Code	Title	Credit Hours
<b>Required Course</b>		
ENVS/GEOG/PSCI/COMM 7118	Foundations of Environmental Justice	3
<b>Electives</b>		
Choose three of the following:		9
COMM 5225	Environmental Communication (focused on an EJ-related topic such as Toxic Bodies)	
ENVS 5100	Special Topics in Environmental Studies ("Power, Justice and Climate Change" or "Conflict Management and Collaboration for Human-Environment Systems")	
ETHN 5233	Native American and Indigenous Environmental Issues	
ETHN 6101	Topics: Specialized Comparative Studies (Topic: Indigenous Political Ecologies)	
ETHN 6103	Indigenous Thought and Theory: Foundations in NAIS	
GEOG 5662	Seminar: Topics in Economic Geography (Topic: Geographies of Dispossession)	
GEOG 6402	Seminar: Political Ecology	
HIST 6410	Readings in Environmental History	
LAWS 7202	Environmental Law	
PHIL/ENVS 5240	Seminar in Environmental Philosophy	
PSCI 7024	Seminar: Selected Political Theories (Topic: Environment and Political Theory)	
SOCY/ENVS 6007	Foundations of Environmental Sociology	
SOCY/ENVS 6017	Inequality, Democracy, and the Environment	

**Total Credit Hours** **12**

## Future Faculty Development - Graduate Certificate

The future faculty development certificate (FFD) allows graduate students and postdoctoral scholars who do not teach the chance to do a project to learn about postsecondary teaching or institutions.

The certificate is sponsored by the Center for Teaching & Learning (<https://www.colorado.edu/center/teaching-learning/>), which supports graduate students on the Boulder campus and provides continued professional development opportunities. The Center for Teaching & Learning prepares graduate students for success on the job market in higher education or in the private sector as professionals.

To that end, we offer:

- Comprehensive college teacher training (workshops on teaching, individual consultation on any aspect of the graduate experience, video consultation on teaching in labs, recitations and courses).
- Workshops and guidance to support the scholarship of teaching and learning.
- Academic and nonacademic career preparation opportunities through conferences, seminars and individual consultations on curriculum vitae, job letters, teaching statements, diversity statements and interviewing skills.

## Requirements

The certificate is open to all graduate students in good standing.

For more information and completion requirements, visit the Center for Teaching & Learning website's Future Faculty Development webpage (<https://www.colorado.edu/center/teaching-learning/programs/graduate-certificates/future-faculty-development-certificate/>).

## Hydrologic Sciences - Graduate Certificate

The hydrologic sciences graduate program focuses on quantitative studies of water in the environment including its role in geologic and biogeochemical processes, ecosystem functions and global elemental cycling. The program is interdisciplinary, interdepartmental and designed to encourage students with a variety of academic backgrounds to enter the field. It is intended for science and engineering graduate students, allowing them to obtain recognition for their accomplishments in hydrologic sciences and to demonstrate the quantitative multidisciplinary education desired by many prospective employers.

All hydrologic sciences graduate program students are admitted through one of the participating departments: Atmospheric and Oceanic Sciences (ATOC) (<https://www.colorado.edu/atoc/academics/prospective-graduate-students/>); Civil, Environmental and Architectural Engineering (CEAE) (<https://www.colorado.edu/ceae/prospective-students/graduate-studies/>); Ecology and Evolutionary Biology (EBIO) (<https://www.colorado.edu/ebio/graduate-overview/>); Environmental Studies (ENVS) (<https://www.colorado.edu/envs/graduate-studies/>); Geography (GEOG) (<https://www.colorado.edu/geography/grad-program/graduate-curriculum/>); or Geological Sciences (GEOL) (<https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/>). Graduate students may apply for admission (<https://www.colorado.edu/program/hydrosociences/academics/admissions/>) to hydrologic sciences after admission to one of these departments.

The program offers a certificate in hydrologic sciences to research-oriented graduate students in the participating departments. PhD students in ATOC, ENVS, GEOG and GEOL may enroll in the hydrologic sciences PhD subplan or the certificate. Course requirements are identical for the subplan and certificate.

Hydrologic sciences students conduct research within participating departments, research institutes and centers (e.g., INSTAAR (<https://instaar.colorado.edu/>)), or partnering government agency labs in the Boulder area (e.g., USGS (<https://www.usgs.gov/>), NOAA (<https://www.noaa.gov/>)). Primary supervision of the student's research may be provided by any faculty member approved by their department, though the hydrologic sciences program requires representation from program faculty on students' comprehensive exam and defense committees.

For additional information, please visit the program webpage (<https://www.colorado.edu/program/hydrosociences/>) or contact the Graduate Coordinator ([hydrograd@colorado.edu](mailto:hydrograd@colorado.edu)).

## Requirements

- Completion of all hydrologic sciences program courses with a grade of B or better.
- Completion of degree requirements for graduate degree within the student's home department.
- For the graduate certificate: The thesis topic includes substantial use of hydrologic science and the thesis committee includes at least one Hydrologic Sciences Program faculty member (<https://www.colorado.edu/program/hydrosociences/people/faculty/>).
- For the PhD subplan: The dissertation topic is approved by Hydrologic Sciences Program co-director and the dissertation committee includes at least two Hydrologic Sciences Program faculty member (<https://www.colorado.edu/program/hydrosociences/people/faculty/>)s (<https://www.colorado.edu/program/hydrosociences/people/faculty/>).

Students are referred to their home department (ATOC, CEAE, EBIO, ENVS, GEOG or GEOL) and the University Catalog for general information on requirements for their degree. In case of a conflict between those documents and the requirements stated here, the rules of the Graduate School apply.

### Research Supervision

Primary supervision of the student's research may be provided by any faculty member approved by the student's home department.

### Course Prerequisites

All students entering the program are expected to have advanced-level knowledge of mathematics: a full year of college level calculus including differential and integral calculus. (Linear algebra and differential equations are strongly encouraged.) Students are expected to have completed one semester of college-level physics (mechanics).

In addition, students are encouraged to work with their advisors and committees to identify and fulfill any other specialized degree and/or research-related required courses. For example, students interested in the physical aspects of hydrologic sciences are expected to have advanced-level knowledge of physics (mechanics and thermodynamics) and fluid mechanics. Similarly, students interested in the chemical aspects of hydrologic sciences may be expected to have advanced-level knowledge of organic and/or physical chemistry, students interested in the biological or ecological aspects of hydrologic sciences are expected to have an advanced-level knowledge of biology and/or ecology.

Students may also need to complete other specific undergraduate prerequisites required by their home department.

### Required Courses and Credits

Five courses are required for the Hydrologic Sciences Certificate and PhD Subplan. The number of courses is intentionally kept low, so that the student is free to design an overall academic program that meets their needs in terms of specialized scholarly interests. Hydrologic sciences courses are included in the minimum semester hours required for all graduate students. The coursework is designed to assure competency in appropriate subject matter at the graduate level.

The five courses are required, as follows:

- One course from List A
- One course from List A or B
- Three elective courses

Code	Title	Credit Hours
<i>List A</i>		
ATOC 5050	Atmospheric Thermodynamics and Dynamics	3
ATOC 5060	Dynamics of the Atmosphere and Oceans	3
CVEN 5313	Environmental Fluid Mechanics	3
CVEN 5353	Groundwater Hydrology	3
GEOL 5110	Geomechanics	3
<i>List B</i>		
ATOC 5051	Introduction to Physical Oceanography	3
ATOC 5061	Advanced Ocean Dynamics and Air-Sea Coupled ENSO Mechanisms	3
CVEN 5333	Physical Hydrology	3
CVEN 5404	Water Chemistry	3
GEOG 5321	Snow Hydrology	3-4
GEOL 5080	Advanced Hydrogeology and Modeling Concepts	3

### Electives

Code	Title	Credit Hours
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	3
ATOC 5500	Special Topics in Atmospheric and Oceanic Sciences (Field Observations and Measurements)	1-3
ATOC 5550	Mountain Meteorology	3
ATOC 5600	Physics and Chemistry of Clouds and Aerosols	3
ATOC 5730	Physical Oceanography and Climate	3
ATOC 5750	Desert Meteorology and Climate	3
ATOC 5780	Ice Sheets and Climate	3
ATOC 5850	Numerical Methods Laboratory	3
CHEM 5141	Environmental Water and Soil Chemistry	3
CVEN 5323	Applied Stream Ecology	3
CVEN 5343	Transport and Dispersion in Surface Water	3
CVEN 5363	Modeling of Hydrologic Systems	3
CVEN 5383	Applied Groundwater Modeling	3
CVEN 5404	Water Chemistry	3
CVEN 5454	Statistical Methods for Natural and Engineered Systems	3
CVEN 5833	Special Topics (Analysis of Urban Water Systems)	1-3
CVEN 5537	Numerical Methods in Civil Engineering	3
CVEN 5833	Special Topics (Environmental Transport and Dispersion Processes)	1-3
CVEN 6383	Flow and Transport through Porous Media	3
CVEN 6414	Aquatic Surfaces and Particles	3

EBIO 5030	Limnology	3
ENVS 5840	Global Biogeochemical Cycles	3
GEOG 5023	Advanced Quantitative Methods for Spatial Data	4
GEOG 5093	Remote Sensing of the Environment	4
GEOG 5241	Topics in Physical Geography (Watershed Biogeochemistry)	1-3
GEOG 5241	Topics in Physical Geography (Fluvial Geomorphology)	1-3
GEOG 5251	River Systems and Landforms	4
GEOG 5271	The Arctic Climate System	3
GEOG 5303	Geographic Information Science: Spatial Programming	4
GEOL 5060	Oceanography	4
GEOL 5093	Remote Sensing of the Environment	4
GEOL 5270	Marine Chemistry and Geochemistry	3
GEOL 5280	Aqueous and Environmental Geochemistry	3
GEOL 5305	Global Biogeochemical Cycles	3
GEOL 5430	Paleoceanography and Paleoclimatology	3
GEOL 5700	Geological Topics Seminar (Terrestrial Hydrology)	3-4
GEOL 5700	Geological Topics Seminar (Sedimentary Modeling)	1-4

## Interdisciplinary Quantitative Biology - Graduate Certificate

The Interdisciplinary Quantitative Biology (IQ Biology) PhD Certificate Program is designed for students in life sciences, engineering, computer science, and applied mathematics who are interested in learning the essential competencies of researchers who work and collaborate effectively across disciplines, and want to unravel the complexity of biological systems. These competencies are attained in a number of ways, including integrative coursework, lab rotations, team science, internships and outreach activities.

## Requirements

### Core Courses

These courses cover cutting-edge quantitative techniques, and include one course in the fall and two courses in the spring. IQ Biology core courses count simultaneously toward a student's chosen academic department's electives. Core courses have included topics like quantitative optical imaging, mathematical and computational biology, bioinformatics and genomics, biologically-inspired multi-agent systems, and biophysics.

### Gap-Filling Courses

Students take one to three courses outside of their primary discipline(s). These courses allow students to explore other areas of quantitative biology and fill any "gaps" in their background to benefit their future interdisciplinary research.

### Lab Rotations

Students rotate through four different research labs in at least two different disciplines. These rotations allow students to explore their

interests, learn new techniques and work with prospective thesis advisors.

## Additional Coursework and Research

During the second year, students begin taking the courses required by their chosen academic department, and those advised by their departmental thesis committee.

## Engagement

While pursuing the PhD degree, IQ biology student remain engaged with the IQ biology program by:

- Volunteering in academic outreach and teaching projects.
- Pursuing industry or government internships.
- Attending seminars with the IQ biology community, as well as meeting with the speaker.
- Developing and presenting research in a student-run IQ biology symposium on campus.
- Mentoring or tutoring new IQ biology students.
- Attending social gatherings held for the entire IQ biology community.

After completing all program requirements, graduating students will receive a certificate in Interdisciplinary Quantitative Biology in addition to their PhD from their chosen academic department.

# International Affairs - Graduate Certificate

The graduate certificate in international affairs allows currently matriculated graduate students across CU Boulder to examine global issues and position their own graduate research in a global context. It will also allow graduate students in specific disciplines to study international affairs in an interdisciplinary way and with access to courses across the social sciences, humanities and natural sciences.

## Requirements

### Admission Requirements

Students must be enrolled in a graduate degree program at the University of Colorado Boulder. They may apply for the graduate certificate at any point in their graduate career by emailing the International Affairs Program at [iafs@colorado.edu](mailto:iafs@colorado.edu) with the following:

- A brief essay indicating how their research, professional or creative work, or teaching will relate to international affairs
- A statement of approval from their graduate advisor or graduate program in their home department

Requirements fulfilled at CU prior to admission to the Graduate Certificate in International Affairs may be counted towards certificate requirements.

### Required Courses and Credits

The certificate requires successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from our list of approved graduate courses. A maximum of 6 credits can be taken from any one discipline. This list is built upon our undergraduate interdisciplinary model and draws from our main cognate units in the Social Sciences, Arts & Humanities, and Natural Sciences divisions, and includes courses taught by faculty on the International Affairs Committee.

Students may request that the IAFS Graduate Director approve courses (including independent study courses) from outside this list, if the course contains significant international content and the student's completed work for that course is related to international affairs. The courses may be drawn from the Social Sciences, Arts & Humanities, or Natural Sciences divisions in the College of Arts of Sciences, as well as from other schools and colleges at CU Boulder.

In addition to the 9 credit hours of graduate coursework, the certificate requires participation in the International Affairs Colloquium. The colloquium is intended for graduate students to present their works-in-progress for discussion and feedback from faculty and participants. Works-in-progress encompass various aspects of intellectual and professional life. Projects may include academic papers, thesis and dissertation chapters, grant proposals, conference presentations, or job applications. Two semesters of participation in the colloquium will be required. One semester of participation is defined as attendance at a colloquium session and presentation of a work in progress during that semester.

Code	Title	Credit Hours

## Native American and Indigenous Studies - Graduate Certificate

The Center for Native American and Indigenous Studies (CNAIS) offers both a graduate and undergraduate certificate in Native American and Indigenous Studies (NAIS). These certificate programs offer students the opportunity to strengthen their interdisciplinary knowledge and experience in this increasingly important area. The rise of global and scholarly attention to issues of indigeneity signals a larger transformation in conceptions of nation, citizenship, and transnationalism in the context of globalization.

A founding principle of CNAIS is to value and expand upon the connections and interdisciplinary nature of Native American & Indigenous scholarly work. The issues facing Native American and Indigenous peoples today require expertise from multiple disciplines and draw from scholarship in a number of fields, including art & art history, anthropology, ethnic studies, environmental studies, geography, history, law, linguistics, literature, political science, religion and sociology.

CU Boulder has recruited an unprecedented number of faculty working in a wide array of areas related to NAIS, and already enjoys a high national and international reputation in several of these areas. In pursuing the NAIS certificate, students join a vibrant and growing community at CU Boulder, including graduate and undergraduate students and more than 40 professors.

For more information, visit the Center for Native American and Indigenous Studies (<http://www.colorado.edu/cnais/>) website or contact [cnais@colorado.edu](mailto:cnais@colorado.edu).

## Requirements

This interdisciplinary certificate requires a total of four courses (12 credits). One introductory course (ETHN 6103) is required of all students; the other courses can be taken electively, with the provision that two of the four courses be outside the student's home department.

*Note:* some courses listed in the catalog are taught by revolving faculty member who are not affiliated with CNAIS. Catalog course content is subject to change from semester to semester. For questions regarding course sections or more information on approved courses, please visit the department's graduate certificate webpage (<https://www.colorado.edu/cnais/certificate-program/graduate-certificate/>) or contact [cnais@colorado.edu](mailto:cnais@colorado.edu).

## Required Courses and Semester Credit Hours

Code	Title	Credit Hours
<b>Required Course</b>		
ETHN 6103	Indigenous Thought and Theory: Foundations in NAIS	3

**Electives**<sup>1</sup> **9**

At least three of the four required elective courses must be taken outside the student's home department.

### Approved Anthropology Courses

ANTH 5045	Introduction to Museum Anthropology
ANTH 5210	Southwestern Archaeology
ANTH 5220	From Olmec to Aztec: The Archaeology of Mexico
ANTH 5224	Archaeology of the Maya and Their Neighbors
ANTH 5270	Plains Archaeology
ANTH 5630	Nomadic Peoples of East Africa
ANTH 6150	Critical and Theoretical Issues in Museums

### Approved Art and Art History Courses

ARTH 6939	Graduate Seminar: Open Topics in Art History (Topic: Visual, Material and Artistic Culture of the Plains and Plateau regions, 1800-1900)
-----------	--

### Approved English Courses

ENGL 5169	Multicultural/Postcolonial Studies
ENGL 7179	Advanced Multicultural/Postcolonial Studies

### Approved Ethnic Studies Courses

ETHN 5233	Native American and Indigenous Environmental Issues
ETHN 5353	Indigenous Traditions and Law: A Global Perspective
ETHN 6101	Topics: Specialized Comparative Studies (Indigenous Film & Media)
ETHN 6841	Advanced Directed Readings in Ethnic Studies (Indigenous Topics)

### Approved Geography Courses

GEOG 6402	Seminar: Political Ecology
<i>Approved Law School Courses</i>	
LAWS 6602	Cultural Property Law
LAWS 7715	Indigenous Peoples in International Law
LAWS 7725	American Indian Law I
LAWS 7735	American Indian Law II
LAWS 7846	Independent Legal Research (on an American Indian Law topic)
LAWS 8725	Seminar: Advanced Topics in American Indian Law
<i>Approved Linguistics Courses</i>	
LING 7800	Open Topics in Linguistics (Language Revitalization)
<i>Approved Music Courses</i>	
MUSC 5112	Proseminar in Ethnomusicology
MUSC 5142	American Indian Music
<i>Approved Museum and Field Studies Courses</i>	
MUSM 5045	Introduction to Museum Anthropology
MUSM 5912	Collections Research Practicum in Cultural Anthropology

**Total Credit Hours** **12**

<sup>1</sup> Elective courses not taught by CNAIS core or affiliate faculty must be approved by the CNAIS director.

## Quantitative Methods for Behavioral Sciences - Graduate Certificate

The purpose of the graduate certificate in quantitative methods is fourfold:

- to strengthen interdepartmental links and communication among social and human science departments at CU Boulder, both in general and specifically with regards to quantitative research methodology and statistical analysis,
- to provide incentive and recognition to graduate students from a diverse set of departments who choose to cultivate expertise in quantitative research methods and methods of statistical analysis,
- to increase the visibility of and promote courses in quantitative research methods (possibly with the benefit that additional quantitative courses can be developed and taught), and
- as a consequence of all of the above, to improve the quality of quantitative training of graduate students at CU Boulder, increasing students' chances of employment upon completion of their graduate studies.

## Requirements

### Application Process

1. Review the course requirements below.
2. Complete the application form (<https://www.colorado.edu/education/node/3115/attachment/>) (see also example form (<https://www.colorado.edu/education/node/3113/attachment/>)).
3. Review application with the advisor to ensure the courses meet the advisor's expectations for expertise in quantitative methods training.

4. Submit the application electronically—along with all available syllabi and an unofficial transcript—to [soe.gradvise@colorado.edu](mailto:soe.gradvise@colorado.edu). ([allison.atteberry@colorado.edu](mailto:allison.atteberry@colorado.edu))

Note: If a student's course plan meets the requirements and all courses have already been completed at the time of application, the student will receive approval for the certificate. If some of the intended coursework will take place in future semesters, then the student will be given "conditional" approval. Once all coursework is completed, the student must submit an updated application that includes an unofficial transcript showing that the courses were satisfactorily completed.

Applications will be reviewed once per semester. Deadlines are Nov. 1 and March 1.

## Course Requirements

Students will be awarded the certificate if they complete a two-semester foundational sequence in statistics (e.g., EDUC 8230/EDUC 8240, PSYC 5741/PSYC 5751, SOCY 5111/SOCY 6111) as well as a minimum of four additional courses from the approved list below, at least one of which must be outside the student's home department.

The guidelines serve as a minimum threshold for the application process. However, each student's advisor may require their students to take more than the minimum of 6 courses, or to decide that certain courses are not sufficiently rigorous to count towards the certificate. The application will then be reviewed by a cross-disciplinary committee to evaluate whether the course plan meets the certificate requirements.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Foundational Sequence in Statistics</b>		
Sequence examples: <sup>1</sup>		6
EDUC 8230 & EDUC 8240	An Introduction to Quantitative Methods in Educational Research and Applied Regression Analysis	
PSYC 5741 & PSYC 5751	General Statistics 1 and General Statistics 2	
SOCY 5111 & SOCY 6111	Statistics 1: Introduction to Social Statistics and Stats 2: Statistic Analysis	
<b>Approved Electives</b>		
Choose a minimum of four: <sup>2</sup>		12
EDUC 7326	Quasi-Experimental Design in Causal Inference in Social Sciences	
EDUC 7386	Educational Evaluation	
EDUC 7456	Multilevel Modeling	
EDUC 7396	Latent Variable and Structural Equation Modeling	
EDUC 8710	Measurement in Survey Research	
EDUC 8720	Advanced Topics in Measurement	
IPHY 5300	Statistical Genetics for Complex Traits	
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	
MKTG 7310	Design and Analysis of Experiments in Business	
ORMG 7830	Research Design and Methods in Management	

PSCI 7108	Special Topics
PSCI 7155	Maximum Likelihood Estimation and Generalized Linear Models
PSYC 5122	Quantitative Genetics
PSYC 5242	Biometrical Methods in Behavioral Genetics
PSYC 5541	Special Topics in Psychology
PSYC 5761	Structural Equation Modeling
PSYC 6200	Issues and Methods in Cognitive Science
PSYC 6761	Topics in Advanced Structural Equations Modeling
SOCY 5031	Research Design
SOCY 7111	Data III-Advanced Data Analysis

**Total Credit Hours** **18**

<sup>1</sup> Students from a department that does not offer a two-semester sequence of this nature are welcome to take one of the three sequences listed above, and are encouraged to contact the instructors of those sequences to determine which of them would provide the best fit.

<sup>2</sup> At least one must be outside the student's home department.

## Satellite System Design - Graduate Certificate

The certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in Satellite System Design (SSD). It blends courses from the Smead Department of Aerospace Engineering Sciences, Electrical, Computer and Energy Engineering and Engineering Management Departments. The certificate allows students to develop interdisciplinary skills in the area of satellite design and be more desirable to potential employers.

This certificate is available to degree-seeking and non-matriculated students. Additional certificate information can be found on the department's Satellite System Design Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/satellite-system-design-certificate/>) webpage.

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admissions Requirements

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education or its equivalent.
- Undergraduate courses in calculus, linear algebra and differential equations; two semesters of undergraduate calculus-based physics; and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates (<https://www.colorado.edu/aerospace/academics/>

[graduates/curriculum/certificates/](https://www.colorado.edu/aerospace/academics/)) webpage; nondegree-seeking and non-matriculated students may visit the AES Certificates & Continuing Education (<https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/>) webpage.

### Certificate Requirements

Grades of B or higher are required for fulfillment of requirements and certificate award. Students also pursuing other graduate certificates may *not* use the same courses to count for both certificates.

### Program Tracks

The certificate in satellite system design (SSD) offers two track options.

#### Track 1: Hands-on (recommended for on-campus students.)

Code	Title	Credit Hours
<b>Required Courses</b>		<b>12</b>
ASEN 5018	Graduate Projects I (Project must have a satellite or rocket focus)	3
ASEN 5148	Spacecraft Design	3
ASEN 6028	Graduate Projects II (Project must have a satellite or rocket focus)	3
One course from the Elective list below		3

#### Track 2: Distance Compatible

Code	Title	Credit Hours
<b>Required Courses</b>		<b>12</b>
ASEN 5148	Spacecraft Design	3
EMEN 5405	Fundamentals of Systems Engineering	3
Two elective courses from list below (no more than one EMEN course)		6

### Elective List

Students are required to meet course prerequisites. Questions should be directed to the course instructor.

To develop cross-disciplinary breadth, students are strongly encouraged, but not required, to choose elective courses outside of their major.

Code	Title	Credit Hours
<b>Electives</b>		
ASEN 5010	Spacecraft Attitude Dynamics and Control <sup>1</sup>	3
ASEN 5050	Space Flight Dynamics <sup>1</sup>	3
	or ASEN 5052 Analytical Astrodynamics	
ASEN 5067	Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems <sup>2</sup>	3
ASEN 5090	Introduction to Global Navigation Satellite Systems <sup>1</sup>	3
ASEN 5335	Aerospace Environment	3
ECEN 5134	Electromagnetic Radiation and Antennas	3
ECEN 5264	Electromagnetic Absorption, Scattering, and Propagation	3
ECEN 5517	Power Electronics and Photovoltaic Power Systems Laboratory	3
ECEN 5613	Embedded System Design	3

ECEN 5623	Real-Time Embedded Systems	3	EDUC 6220	Gender Issues in Education	3
ECEN 5634	Microwave and RF Laboratory	3	EDUC 6240	African American Education in the United States	3
ECEN 5692	Principles of Digital Communication	3	EDUC 6260	Transnational Migration, Education, and Citizenship	3
ECEN 5797	Introduction to Power Electronics	3	EDUC 7446	Policy Issues in Education	3
ECEN 5813	Principles of Embedded Software	3	EMEN 5020	Finance for Engineering Managers	3
EMEN 5010	Introduction to Engineering Management	3	EMEN 5030	Fundamentals of Project Management	3
EMEN 5030	Fundamentals of Project Management	3	EMEN 5052	Leading Others	3
EMEN 5031	Software Project Management	3	EMEN 5215	Applied Sustainability for Engineering Managers	3
EMEN 5405	Fundamentals of Systems Engineering	3	EMEN 5220	Product Design for the Circular Economy	3

<sup>1</sup> Core ASN certificate courses. Cannot be counted for both certificates.

<sup>2</sup> Course enrollment limited to non-Electrical Engineering students.

## Social Innovation - Graduate Certificate

The graduate certificate in social innovation trains students to be social innovation catalysts and maximize their social impact in a world that rewards professionals comfortable with change, experimentation and working across disciplines. Its two required classes are taught by faculty in business and the social sciences and with a focus on designing, implementing, evaluating and sustaining solutions to society's most pressing problems.

This certificate may be of special interest to graduate students who do not plan to pursue a career in academia but are interested in working in nonprofits, public service, and other fields whose primary mission is to advance human welfare. All students enrolled in a degree-granting graduate program at CU Boulder are eligible to petition for admission to this certificate program.

## Requirements

The certificate requires successful completion of two graduate methods courses (6 credit hours) and one elective graduate course in a substantive area (3 credit hours) with a grade of B or higher. The required methods classes are MBAX 6130 and a 5000-level version of SOCY 4160.

Participants can apply one of the following electives to the certificate:

Code	Title	Credit Hours
<b>Electives</b>		
ANTH 5700	Practicing Anthropology	3
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology (Anthropology of Policy)	3
ATLS 5519	Advanced Special Topics in Creative Technology and Design (Venture Capital and Private Equity; limited to 5 students.)	3
BMEN 5117	Anatomy and Physiology for Biomedical Engineering	3
EDUC 5301	Queer(ing) Topics in Education	3
EDUC 5010	Race and Equity in Higher Education	3
EDUC 5075	Sociology of Education	3
EDUC 6245	Latinx Education Across the Americas	3
EDUC 6211	Education Law and Litigation Workshop	3

EDUC 6220	Gender Issues in Education	3
EDUC 6240	African American Education in the United States	3
EDUC 6260	Transnational Migration, Education, and Citizenship	3
EDUC 7446	Policy Issues in Education	3
EMEN 5020	Finance for Engineering Managers	3
EMEN 5030	Fundamentals of Project Management	3
EMEN 5052	Leading Others	3
EMEN 5215	Applied Sustainability for Engineering Managers	3
EMEN 5220	Product Design for the Circular Economy	3
EMEN 5225	Sustainable and Resilient Operations and Supply Chains	3
EMEN 5230	Resilience Engineering and Leadership in Crisis	3
ENVM 5050	Social Innovation and Sustainable Cities	3
ENVS 5340	Conservation Biology and Practice in Brazil's Atlantic Forest	4
ENVS 5750	Climate Politics and Science-Policy	3
ENVS 5820	Energy Policy in the 21st Century	3
ENVS 6301	Environmental and Energy Economics	3
ENVS 6305	Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions	3
JRNL 5812	Science Writing	3
JRNL 5822	Reporting on the Environment	3
JRNL 7021	Environmental Journalism and Science Communication	3
JRNL 7030	Media Sociology	3
JRNL 7034	Media and Health Communication	3
PHIL 5120	Philosophy and Animals	3
PHIL 5150	Topics in Applied Ethics	3
PHIL 5210		
PHIL 5230	Bioethics and Public Policy	3
PHIL 5240	Seminar in Environmental Philosophy	3
PHIL 5290	Topics in Values and Social Policy	3
SLHS 7550	Prevention of Hearing Loss from a Public Health Perspective (subject to availability)	3
SOCY 7171	Special Topics (Work and Organizations)	3

## Plan(s) of Study

### Year One

#### Fall Semester

		Credit Hours
SOCY 4160	Designing Social Innovations	3
<b>Credit Hours</b>		<b>3</b>

#### Spring Semester

MBAX 6130	Sustainable Venturing	3
<b>Credit Hours</b>		<b>3</b>

**Year Two****Fall Semester**

LAWS 7271	Venture Capital and Private Equity	3
<b>Credit Hours</b>		<b>3</b>
<b>Total Credit Hours</b>		<b>9</b>

## Learning Outcomes

Upon earning the certificate, students will be able to:

- Understand the different forms of social innovation.
- Cultivate the mindset and values of a problem solver.
- Illuminate the various contexts within which social innovation occurs.
- Appreciate the role of empathy in innovation.
- Grasp the different approaches to problem solving.
- Develop and critically assess a novel design for social change.
- Master a set of skills for operationalizing and implementing social solutions.
- Learn tools for critically evaluating the success and sustainability of solutions.

## Space Weather and Applications - Graduate Certificate

This certificate provides students with interdisciplinary skills in the field of space weather of both fundamental processes in science and practical applications to space-based and ground-based technology.

This certificate is available to degree-seeking and non-matriculated students. Additional certificate information can be found on the department's Space Weather and Applications Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/space-weather-and-applications/>) webpage.

## Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

## Requirements

### Admission Requirements

- Completed undergraduate degree from an institution accredited by an agency recognized by the U.S. Department of Education or its equivalent.
- Undergraduate courses in calculus, linear algebra and differential equations; two semesters of undergraduate calculus-based physics; and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Ability to program at a level that will enable successful completion of graduate course assignments.

For more information, degree-seeking students may visit the AES Certificates (<https://www.colorado.edu/aerospace/academics/graduates/curriculum/certificates/>) webpage; nondegree-seeking and non-matriculated students may visit the AES Certificates & Continuing Education (<https://www.colorado.edu/aerospace/admissions/graduates/degree-programs/certificates-continuing-education/>) webpage.

## Required Courses and Credits

Students are required to complete 12 credit hours total for this certificate, including ASEN 5335, two courses from the Tier 1 electives list and one additional 3-credit course from the Tier 2 electives list. At least one course must be outside of the student's home department.

Grades of B or higher are required for fulfillment of requirements and certificate award. Students also pursuing other graduate certificates may *not* use the same courses to count for both certificates.

Code	Title	Credit Hours
<b>Required Course</b>		
ASEN 5335	Aerospace Environment	3
<b>Tier 1 Foundational Electives<sup>1,2</sup></b>		
Choose two:		6
ASEN 6050	Space Instrumentation	
ASEN 6365	Lidar Remote Sensing	
ASTR 5140	Astrophysical and Space Plasmas	
ASTR 5150	Introductory Plasma Physics	
ASTR 5300	Introduction to Magnetospheres	
ATOC 5050	Atmospheric Thermodynamics and Dynamics	
ATOC 5235	Introduction to Atmospheric Radiative Transfer and Remote Sensing	
<b>Tier 2 Concentration/Focus Electives<sup>2</sup></b>		
Choose one:		3
<i>Applications</i>		
ASEN 5016	Space Life Sciences	
ASEN 5090	Introduction to Global Navigation Satellite Systems	
ASEN 6265	Fundamentals of Spectroscopy for Optical Remote Sensing	
<i>Design &amp; Instrumentation</i>		
ASEN 5158	Space Habitat Design	
ASEN 5168		
ASEN 5440/ ASTR 5780	Mission Design and Development for Space Sciences	
<i>Radiative Processes &amp; Atmosphere Coupling</i>		
ASTR 5120	Radiative and Dynamical Processes	
ATOC/ASTR 5560	Radiative Processes in Planetary Atmospheres	
<i>Electromagnetics &amp; Plasma</i>		
ASTR/PHYS 7160	Intermediate Plasma Physics	
<i>Data Science</i>		
ASEN 6055	Data Assimilation & Inverse Methods for Earth & Geospace Observations	
APPM 5510	Data Assimilation in High Dimensional Dynamical Systems	
or STAT 5250	Data Assimilation in High Dimensional Dynamical Systems	
STAT 5000	Statistical Methods and Application I	
STAT 5010	Statistical Methods and Applications II	
<i>Selected Topics<sup>3</sup></i>		
ASEN 5519/6519	Special Topics	

ASTR/ATOC/GEOL Topics in Planetary Science  
5830

ASTR 7500 Special Topics in Astrophysical and  
Planetary Sciences<sup>2</sup>

ATOC 5500 Special Topics in Atmospheric and  
Oceanic Sciences<sup>2</sup>

**Total Credit Hours** 12

- <sup>1</sup> Students are required to meet each course's prerequisites, though exceptions can be made by course instructors.
- <sup>2</sup> If cross-listed in the student's home department, a course cannot count as the outside course within the certificate.
- <sup>3</sup> For courses with rotating topics, a particular offering must be on a topic relevant to space weather in order to count for this certificate. These courses will need approval from the program director.

## Water Engineering and Management - Graduate Certificate

The water engineering and management (WE&M) graduate certificate provides students with the tools they need to produce results and solve increasingly complex problems in the water profession. Young and mid-career professionals can build non-technical competencies with courses on leadership, management, communication, finance and governance. Courses are delivered on campus and live streamed/recorded options over the internet, allowing working professionals and distance students from around the world to earn a graduate certificate while continuing to put the learning into practice in their work.

Current students include young and mid-career professionals working for utilities, consulting firms, government and regulatory agencies, and degree-seeking graduate students at CU Boulder. With faculty of senior water professionals from across the country, including those from utilities, consulting firms and global professional organizations, students gain an opportunity to network and learn through real work case studies.

Upon completion of the three core courses and an additional elective, students are granted a certificate by the WE&M program, from the University of Colorado, Department of Civil Environmental and Architectural Engineering. The certificate courses count towards the Civil Engineering - Master of Science (MS) (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/civil-engineering-master-science-ms/>) degree or the Engineering Management - Master of Engineering (ME) (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/engineering-management/engineering-management-master-engineering-me/>) degree.

### Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

- Water & Engineering Management Graduate Program (<https://www.colorado.edu/ceae/research/interdisciplinary-programs/water-engineering-management/>)
- Water & Engineering Management Professional Master's Program (<https://www.colorado.edu/ceae/water-engineering-management-professional-masters-program/>)

- Water & Engineering Management Graduate Certificate (<https://www.colorado.edu/ceae/water-engineering-management-certificate/>)

## Requirements

The certificate consists of three required courses plus one elective course, for a total of 12 credit hours.

Code	Title	Credit Hours
<b>Required Courses</b>		
CVEN 5564	Water Profession: Communication and Utility Finance	3
CVEN 5574	Water Utility Management: Current Issues and Future Challenges	3
CVEN 5584	Water Profession: Leadership and Management	3
<b>Electives</b>		
Choose one:		3
CVEN 5147	Civil Engineering Systems (Engineering Economics and System Design)	
CVEN 5834	Special Topics (Water Reuse Planning and Implementation)	
CVEN 5834	Special Topics (Small System Water/Wastewater Treatment)	
PUAD 5631	Seminar in Environmental Politics & Policy <sup>1</sup>	
Other electives with permission of WE&M Program Director		
<b>Total Credit Hours</b>		<b>12</b>

- <sup>1</sup> CU Denver course.

## Media, Communication & Information

The College of Media, Communication and Information (CMCI) prepares students for careers as engaged and effective citizens endowed with deep understanding of the historical and contemporary context of human communication and expression. Mindful of the active role communication plays in shaping human relationships, CMCI trains graduates to study and practice constructive interaction among people, communities, industries and publics. The college equips students with the skills needed to produce, gather, archive, curate, analyze and evaluate the flood of information, messages, images, sounds and ideas that populate our complex and rapidly evolving global media landscape.

To these ends, CMCI resourcefully combines disciplines newly extended and empowered by digital media and the social and cultural transformations those media engender. These include established scholarly, creative and professional fields such as media studies, communication, the history and interpretation of film and television, journalism, advertising and video production in its cinematic, documentary and broadcast forms. But the college also houses both the fast-growing field of information science—a discipline that, through inquiry and innovation, tackles the problems and opportunities facing an increasingly networked society—and the emergent disciplines of intermedia art, design, music, writing and performance.

In giving these activities a collaborative home, CMCI facilitates innovative interactions among them. Its academic structure accordingly stimulates cross-disciplinary cooperation at all levels of curriculum, research and creative work. Further, CMCI promotes the transformational exchanges

it nurtures within its own walls for campus-wide benefit. Its organization thus fosters outreach to—and student and faculty participation from—other schools, colleges, centers and facilities throughout CU Boulder and the wider Colorado community.

CMCI's collaborative character is even more visible at the graduate level and in terms of its faculty's scholarly and creative work. Examples include the doctoral program in information science (p. 1708), the master's in interdisciplinary documentary media practices (p. 1700), the doctoral program in intermedia art, writing and performance (p. 1710) and the doctoral program in media research and practice (p. 1718), which offers three PhD tracks, each lodged in a different yet related department. CMCI's signature spirit of collaboration is further reflected in the various centers the college contains:

- the Center for Environmental Journalism (CEJ)
- the Center for Media, Religion and Culture (CMRC)
- the Center for the Study of Conflict, Collaboration and Creative Governance (3CG)

It is also reflected in the close relations the new college hopes to entertain with centers elsewhere on campus—for example, with the Center for Humanities and the Arts (CHA); the B2 Center for Media, Arts and Performance (B2); and the Stan Brakhage Center.

## Statement of Core Skills, Competencies and Scholarly and Creative Initiatives

Given its mission, CMCI attracts students, faculty and industry and creative professionals from across the closely related fields of media, communication and information. All of those either rostered in or affiliated with the new college accordingly share a set of skills, competencies and scholarly and creative interests that form a common core. This core is expressed at all levels of the college, from undergraduate curriculum and graduate training to the research and creative work of its faculty and both internal and external affiliates.

## The Graduate Experience and Faculty Research and Creative Work

CMCI's collaborative character is even more visible at the graduate level and in terms of its faculty's scholarly and creative work. A prime example is the doctoral program in media research and practice (p. 1718), which combines the emphases of the participating departments—advertising, public relations and design, journalism and media studies—and encourages students to develop research agendas that bridge disciplines and cross between academic research and professional practice. In addition to creating efficiencies by combining resources, the program underscores the shared technical and intellectual as well as logistical needs of the units involved, turning streamlined administration into scholarly and creative synergy.

Journalists learn from information scholars about the nature and uses of big data while sharing with them their skills in narrative and communication. Members of the communication faculty deepen colleagues' insights into the underlying forms and principles of organizational, interpersonal and public conversation that structure the worlds in which advertising and strategic communication operate while gaining access from colleagues in these areas to problems and case studies they might have overlooked. Meanwhile, faculty in media studies benefit from direct exposure to the technologies and creative processes explored by media production faculty, offering in return a

deeper historical, social and theoretical insight into the way media shape, even as they are shaped by, the wider society they serve.

Centers like CMRC, CEJ and 3CG already harness CU's exceptional multidisciplinary resources in everything from cultural studies to environmental science and from journalism to media design in focused collaborative initiatives of all sorts. By bringing practitioners in all of these areas together with artists and researchers in information science, media production and intermedia art, writing and performance, CMCI provides the environment for many more such common enterprises in the future.

## Programs of Study

### Advertising, Public Relations and Media Design

The Department of Advertising, Public Relations and Media Design (APRD) offers the graduate programs listed below.

The MA in Corporate Communication (<https://www.colorado.edu/cmci/aprd/macc/>) is an online professional master's degree designed for early and mid-career professionals who want to advance their career in corporate communication in an increasingly globalized corporate environment. It is well-suited for corporate communication practitioners in business, governmental and non-governmental organizations, as well as mid-career professionals from allied disciplines such as journalism, advertising and marketing who want to switch to corporate communication jobs due to increased demand in this sector. The program's coursework blends conceptual knowledge and practical techniques to make students invaluable and nimble communicators in a globally relevant profession.

The MA in Strategic Communication Design (<https://www.colorado.edu/cmci/STCMstudio/>) (MSTCM) is an immersive 39-credit hour program typically completed in a full calendar year. Located in a state-of-the-art studio in the heart of Boulder's entrepreneurial tech community, the MSTCM is entirely project-based. With the guidance of industry-driven instructors, our students leverage design's potential as a critical problem-solving tool in a rapidly changing world. This human-centered program evolves students into branding design and entrepreneurial professionals through innovative, intensive, and progressive learning experiences. MSTCM graduates have been appointed to leadership design positions in top companies, including Google, Apple, Uber, Twitter and Dropbox—to name just a few.

The **Marketing Analytics track of the MS in Business Analytics** is an APRD, CMCI and Leeds School of Business partnership. In this advertising and marketing specialization in the Leeds Master's in Business Analytics (<https://www.colorado.edu/business/ms-programs/masters-program-business-analytics/>) graduate program, students become experts in cutting edge digital advertising techniques and learn how to find, create, and analyze advertising data. The ten-month MS degree starts every July. Students leave the program ready to work in analytical roles at digital advertising agencies, DSPs, DMPs, programmatic shops and digital marketing departments.

Strategic Communication is a distinct track of the PhD in Media Research and Practice (<https://www.colorado.edu/cmci/aprd/phd/>) program. Students gain an understanding of scholarship through coursework, independent studies and research assistantships that explore theories and methods that shape strategic communication

research. We welcome and appreciate both qualitative and quantitative approaches to research. The program emphasizes how theory informs practice, critically analyzing how advertising and public relations operate in ways that can—or could—constructively contribute to the successful, ethical and resilient functioning of society. Students taking this track focus their research and teaching in the areas of advertising, public relations and various types of promotional communication such as health communication, political communication, social media and video gaming.

The department actively encourages students to enroll in courses offered both within and outside CMCI and APRD graduate course are open to students in other units.

**Course code for these programs is APRD.**

## Master's Degrees

- Corporate Communication - Master of Arts (MA) (p. 1689)
- Strategic Communication Design - Master of Arts (MA) (p. 1691)

## Doctoral Degree

- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1718)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Barrett, Bridget ([https://experts.colorado.edu/display/fisid\\_173429/](https://experts.colorado.edu/display/fisid_173429/))  
Assistant Professor; PhD, University of North Carolina at Chapel Hill

Cheval, Melinda Kiger  
Associate Teaching Professor Emerita

Doty, Dawn ([https://experts.colorado.edu/display/fisid\\_158312/](https://experts.colorado.edu/display/fisid_158312/))  
Associate Teaching Professor; MA, Johns Hopkins University

Assistant Teaching Professor; M.A., George Washington University

## Courses

### APRD 5001 (3) Foundations of Brand Design

Focuses on the challenges of designing brands targeted at customer needs and desires. Working through a series of projects, students learn both the theory and practice of identifying brand opportunities, idea generation, global design strategies, testing, and brand launch. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5002 (3) Foundations of Experience Design

Introduces the mindset, skills, and methodologies that are core to the practice of human-centered design in digital environments. By applying different design methods and applications across UX, UI, and IxD capabilities, students will learn to design a holistic experience and develop creative problem-solving skills using interaction design principles, design thinking, and customer journey mapping. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5003 (3) Advanced Brand Design

Builds on core concepts introduced in APRD 5001 by expanding executional skillsets and conceptual frameworks through the development of a unified theory of branding. This course encourages students to establish their core principles as art directors and visual designers. They will learn how to create opportunities for complex, meaning-centered relationships between people and products through research, strategic definition, identity development, expression, communication, and behavioral analysis.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5004 (3) Designing the Customer Journey

Focuses on bridging the gap between designing digital products and understanding the customer journey as they utilize those products. Using concepts and applications introduced in APRD 5002, students will learn to integrate prototyping activities, along with research and testing techniques, into every stage of the design process to quickly adapt designs based on customer feedback and testing insights. Topics include journey mapping, user research methods and high/low fidelity prototyping.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5006 (3) Design for Startups

Introduces the basic concepts of entrepreneurship as a discipline, with special emphasis given to the ways that design and creativity impact the entrepreneurial process and how designers can meaningfully engage in a startup studio environment. With a broad overview of early-stage entrepreneurial activities, this course prepares students to create a new business, work for a startup, or launch a new venture within an existing organization. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5008 (3) Designing for Scale

Tailored specifically for designers and creative professionals, this course highlights the role that design plays in driving measurable business results for organizations. With the ROI-driven strategic mindset required in today's competitive landscape, students learn essential business skills needed to deliver not only exceptional design but also measurable impacts for brands and businesses.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5009 (3) Principles of Visual Design

Examines essential principles that drive innovation and creativity in the design field. Through hands-on projects and critical analysis of historical and contemporary creative communication trends, students work on developing their own design philosophy and visual aesthetic. By the end of the course, students should have the expertise needed to craft compelling, impactful visual design solutions that make branding more engaging and effective. Graduate students from other departments who have the appropriate background may be allowed to register on a space-available basis with consent of the Program Director.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5011 (3) Digital Design Portfolio

Dedicated to the meticulous curation of an industry-ready professional portfolio. Students receive guidance in crafting their online digital portfolios and fostering professional development tailored to their post-graduation career aspirations. Interaction with industry professionals and successful program alumni allows students to gain valuable advice, tips, and feedback to enhance their portfolios.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

### APRD 5012 (3) Advanced Tools for Startup Design

Equips students with the tools, strategies, and knowledge necessary to thrive in entrepreneurial business environments. Students will develop a practical understanding of how to validate business strategies by applying the principles of human-centered design and iterative design culture. Practical skills, especially business prototyping, are honed to ensure that students can apply their knowledge in real-world situations and make a profound impact on startup success.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

**APRD 5014 (3) Advanced Tools for Interaction Design**

Introduces advanced practices and tools of the digital design profession with an emphasis on preparing students for the increasingly sophisticated nature of modern digital product design. Students get an overview of the architecture of design systems, gain an understanding of what a design system means across different industries and design practices, and learn to build their own design system.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

**APRD 5015 (3) Brand Design for Sustainable Futures**

An in-depth look at the challenges of designing for sustainability by moving students beyond the confines of a standard project brief to examine the purpose and implications of a brand or service's existence. Immersed in design ethics and the power of visual communication, students will gain the expertise to design with purpose and intention, and to align with circular economy principles to reduce waste and pollution.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

**APRD 5018 (3) Innovative Technologies for Design**

Explores the fusion of design, technology, and coding. The course aims to prepare students to seamlessly integrate technology into design work that addresses real-world challenges. Topics covered in this course include virtual reality, augmented reality, data visualization, and foundational skills in web development using JavaScript, HTML and CSS, and contemporary AI capabilities.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

**APRD 5020 (3) Design Leadership**

Explores the art of using design to drive innovation, impact, and change. Through collaboration and empathy, students will discover the power of design to bring people together to create meaningful solutions to real world problems. From managing design teams, project management processes, product development models, and organizational design, students will gain the skills needed for managing design in today's complex world and discover how to work effectively with others across disciplines and sectors to create impact at scale.

**Requisites:** Restricted to graduate students in Strategic Communication Design (STCM-MAP)

**Grading Basis:** Letter Grade

**APRD 5841 (1-3) Graduate Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**APRD 5851 (1-6) Graduate Professional Project**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**APRD 5931 (1-3) Internship**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**APRD 6342 (3) Digital Advertising**

Covers both traditional and emerging digital advertising methods, the popular platforms used to execute ads, and the leading analytic tools that can be used to assess advertising performance. Core advertising platforms covered include search, display, social media, native advertising, sponsored content and mobile. This class focuses on best practices and Key Performance Indicators that go with each advertising platform. Department consent required.

**Requisites:** Restricted to MS Business Analytics (BUAN-MS) majors and MKAG-CERG students only.

**Grading Basis:** Letter Grade

**APRD 6343 (3) Applications of Advanced Statistical Techniques in Advertising**

Building upon prior data acquisition and analysis coursework, students will effectively and flexibly generate advanced statistical models in a digital advertising-specific context. This course will focus on data originating from a variety of digital advertising sources. In addition to technical skill acquisition, students will learn how to interpret results and present them to clients and management. Department consent required.

**Requisites:** Restricted to Business Analytics (BUAN-MS) majors only.

**Grading Basis:** Letter Grade

**APRD 6871 (1-3) Special Topics**

Graduate special topics. Topics vary by instructor and semester.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**APRD 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**APRD 6951 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**APRD 7001 (3) ProSeminar in Mass Communication Theory 1**

Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7001

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7002 (3) Research Design**

Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7002

**Requisites:** Requires prerequisite courses of APRD 7003 and MDRP 7051 and MDRP 7061 (all minimum grade C-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7003 (3) ProSeminar in Mass Communication Theory II**

Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion. Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL7003

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7004 (1) Doctoral Professionalization Seminar**

Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7004

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7010 (3) Qualitative Interviewing as a Research Method**

Develops the necessary skills to conceptualize, plan, and execute interview-based research projects. Covers topics such as brainstorming and implementing a research idea, formulating research questions, designing a thorough research plan, navigating the IRB, recruiting participants, creating the interview guide, conducting interviews, and analyzing and writing up data. Course also examines reflexivity and ethical issues that are inherent in interview studies, especially ones involving certain populations.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7010

**APRD 7011 (3) Seminar in Strategic Public Relations**

Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7011

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7012 (3) Ethnography and Media**

Provides a ¿how to¿ concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7012

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7013 (3) Mixed Research Methods in Mass Communication**

Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7013

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7014 (3) Experimental Design in Mass Communication**

Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7014

**Requisites:** Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.

**APRD 7020 (3) Controls of Media and Information**

Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7020

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7021 (3) Environmental Journalism and Science Communication**

Focuses on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7021

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7030 (3) Media Sociology**

Examines a range of theories for how media messages and media institutions turn out the way they do. `Media sociology¿ refers to theorizing about the media as the `dependent variable;¿ even though many of the `independent variables¿ explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7030

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7031 (3) Moral Psychology and Media Ethics**

Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7031

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7034 (3) Media and Health Communication**

Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7034

**Requisites:** Restricted to graduate students only.

**APRD 7051 (3) Qualitative Methods in Mass Communication**

Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7051

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**APRD 7061 (3) Quantitative Research Methods**

Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students for dissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7061

**Grading Basis:** Letter Grade

**APRD 7062 (3) Advanced Statistical Analysis for Mass Communication**

Provides instruction on the following topics: ordinary least squares regression, statistical mediation and moderation, path analysis, count and categorical data modeling, and factor analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7062

**Requisites:** Requires prerequisite course of APRD 7061 or JRNL 7061 (minimum grade D-).

**Grading Basis:** Letter Grade

**APRD 7063 (3) Text Analytics for Computational Mass Communication Research**

This course tackles advanced advertising and marketing analytics through three advanced methods aimed at solving these problems: text classification, text topic modeling, and semantic network analysis. Each key area will involve a deep dive into the leading computer science methods aimed at solving these methods using Python. Students will walkthrough conceptual overviews of the methods, and dive into real-world datasets through instructor-led tutorials. Students will also conduct a major project for each of the 3 key methods.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7063

**Requisites:** Requires prerequisite course of APRD 7061 or JRNL 7061 (minimum grade D-).

**Grading Basis:** Letter Grade

**APRD 7133 (3) Digital Games**

Seminar that explores digital games, analog games, and play, and looks at the relatively new field of game studies; the field has moved toward issues of culture and social justice.

**Requisites:** Restricted to doctoral students.

**APRD 7841 (1-3) Independent Study**

Provides opportunities for independent study and research on the graduate level. Students perform independent research under faculty supervision.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Grading Basis:** Letter Grade

**APRD 7871 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**APRD 7880 (3) Persuasion Theory**

This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 7880

**Requisites:** Restricted to graduate students only.

**APRD 8991 (1-10) Doctoral Dissertation**

Dissertation research and writing. A minimum of 30 hours is required.

**Repeatable:** Repeatable for up to 40.00 total credit hours.

**Requisites:** Restricted to PhD students only.

**MDRP 7871 (3) Special Topics**

Special topics.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

## Corporate Communication - Master of Arts (MA)

Organizations of all types (for-profit corporations, government agencies and not-for-profits) need to build and maintain symbiotic relationships with their key stakeholders (publics). These stakeholders are both internal to an organization (such as employees and suppliers) and external (such as the mass media, government regulators, consumers, citizens and activist groups). The Master of Arts in Corporate Communication (MACC) provides students with the knowledge and skills to use communication in order to build and maintain relationships with these strategic stakeholders (publics). In addition, students will also learn to measure the quality of these relationships and its effect on the reputation of their organizations.

The MACC program is especially designed for:

- Early and mid-career practitioners of corporate communication with a desire to increase their knowledge potentially for career advancement.
- Mid-career professionals from allied disciplines such as journalism, advertising and marketing who might want to switch to corporate communication given the increased demand in this sector.

This program equips students with the conceptual knowledge and practical skills to be effective communicators whether they work for for-profit corporations or not-for-profit organizations.

Key program highlights:

- Corporate communication is fundamentally a practice, but scholarship built over the past fifty years has demonstrated that in order to be effective, this practice needs to be based on sound strategic knowledge. This program emphasizes that purposeful and effective corporate communication blends sound strategies with techniques.
- The program emphasizes the need for corporate communication to take place in a global environment because ethnocentricity in communication results in ineffectiveness in communication. Cultural sensitivity also equips graduates of the program to navigate the ethical challenges that arise in their life as communicators no matter where they practice—in Colorado, within the U.S. or internationally.
- Practicing strategic corporate communication is not possible without basing such practice on empirical evidence—whether the evidence is culled through qualitative, quantitative or mixed methods. The MACC program seeks to train students on sound methodological principles thereby preparing them to be thoughtful communicators. Evidence reveals that organizational leaders appreciate, and value, communicators who bring theory and evidence-based value to organizational activities.

For more information, visit the Master of Arts in Corporate Communication website (<https://www.colorado.edu/cmci/aprd/macc/>).

## Requirements

### Admission Requirements

The evaluation of applications is based on a set of criteria that seek to value several key qualities in students, such as professional background and experience, academic record, professional achievements, and career goals (based on a statement of purpose). The evaluation will also be guided by standards set by the Graduate School. The desired qualifications of successful applicants include:

- A baccalaureate degree from a regionally accredited college or university, or its equivalent.
- Professional experience in corporate communication or an allied field such as journalism, advertising or communication.
- An aptitude for corporate communication and potential to pursue academic and research-based work in the field.
- An undergraduate GPA of at least 2.75.

To apply for admission, applicants should submit:

- All academic transcripts.
- A resume or Curriculum Vitae that establishes at least 3–5 years of relevant work experience.
- A statement of purpose describing their preparation for the proposed study as well as future career path relevant to the study.
- Two letters of recommendation, including at least one professional reference.
- Evidence of proficiency in English (international students only).
- Optional: GRE or GMAT scores (even if they are older than 5 years).

### Program Requirements

The Master of Arts in Corporate Communication requires 30 credits of coursework. The program consists of accelerated courses, allowing students to take only one course at a time while still completing two courses during the span of a regular semester.

CU Boulder's Master of Arts in Corporate Communication curriculum was strategically crafted not only to be flexible and serve working professionals around the world, but also to provide the knowledge, skills, and tools needed to practice corporate communication in a globalizing environment. The program offers a focused 10-course, 30-credit curriculum consisting of: five core courses (3 credits each) and five specialty courses (3 credits each).

The courses are designed to provide students with a blend of conceptual and practical knowledge and skills that can be immediately applied in your day-to-day work.

All of the courses are required of all students because they cover the conceptual foundations of sound corporate communication. These courses orient students to theories and frameworks in public relations and corporate communication.

The specialty courses are designed to expose students to the variety of work handled by corporate communication practitioners. Corporate communication is a diverse practice with many skillset areas often divided based on the stakeholders involved: employees (internal publics who are key to an organization's success), investors (that often invest in for-profit corporations or donors to not-for-profit organizations), media, etc.

Code	Title	Credit Hours
<b>Core Courses</b>		
CCOM 5101	Strategic Corporate Communication Management	3
CCOM 5103	Corporate Communication and Ethics	3
CCOM 5104	Research Methods for Corporate Communication	3
CCOM 5102	Strategic Global Corporate Communication	3
CCOM 5105	Measurement for Corporate Communication	3
<b>Specialty Courses</b>		
CCOM 5106	Internal Communication	3
CCOM 5109	Issues Management and Public Affairs	3
CCOM 5110	Corporate Communication and Digital and Social Media	3
CCOM 5108	Corporate Communication Techniques and Media Relations	3
CCOM 5107	Risk and Crisis Communication	3
<b>Total Credit Hours</b>		<b>30</b>

### Learning Outcomes

Some of the learning objectives of this program are:

- To help increase students' ability to draw abstractions of reality and assess their professional activities with critical thinking.

- To use conceptual and critical skills to develop effective oral and written communication skills.
- To negotiate cultural diversity and operate effectively in a globalized environment.
- To base one's global communication practice on sound ethical principles and analysis thereby working for social good.
- To appreciate that effective communication is based on formative research, sound program planning, effective implementation of planned program, and sound program evaluation.
- To integrate multiple media for communication, including digital and social media.
- To develop collaboration skills and ability to work in groups.

## Strategic Communication Design - Master of Arts (MA)

The Master of Strategic Communication Design (MSCD) is an immersive 39-credit hour program typically completed in a single year. Located in a state-of-the-art studio in the heart of Boulder's entrepreneurial tech community, the MSCD is entirely project-based. With the guidance of industry-driven instructors, our students leverage design's potential as a critical problem-solving tool in a rapidly changing world. This human-centered program evolves students into branding design and entrepreneurial professionals through innovative, intensive and progressive learning experiences.

MSCD graduates have been appointed to leadership design positions in top companies, including Google, Apple, Uber, Saatchi and Saatchi, Twitter and Dropbox—to name just a few.

## Requirements

### Application Requirements

All MSCD applicants are expected to hold a bachelor's degree from an accredited college or university and to have a minimum undergraduate GPA of 2.75. In certain circumstances, we will consider students who discovered design after an unexceptional experience with an ancillary degree like pre-law or business.

### How to Apply

The application is listed under Strategic Communication Design on the Graduate School (<https://grad.apply.colorado.edu/apply/>) website. Required forms that should be linked to the application are as follows:

1. **Personal statement.** This statement is an essential part of the application. This is where you write and explain your discovery and path to design. In a maximum of 1500 words, please supply long-form answers to the following questions:
  - What attracts you to the MSCD program; why are you a good fit for it, and what do you hope to get out of it?
  - What particular experiences—personal or professional—have prepared you for work in design?
  - What do you envision as the most compelling opportunities for you as a designer and a future leader?
2. **Design portfolio.** If you have a design portfolio, include a link to it in your personal statement. If you do not have a portfolio, include some examples of your creative potential. Examples to demonstrate your creative abilities might be photographs, painting, drawing, digital designs, curation of creative events/exhibitions, etc.
3. **Two letters of recommendation.** These need to come from professionals and/or professors. Personal recommendations are not accepted.
4. **Unofficial transcripts** from *all* colleges attended. We expect applicants to have a minimum undergraduate GPA of 2.75; the average among successful applicants is 3.45 (on a 4.0 scale).
5. **Writing sample.** Submit a sample of your writing that you feel is exemplary and representative of your writing abilities.
6. International students may also need to submit official scores from a test of English proficiency. Applicants should have at a minimum:
  - a TOEFL score of 75 (internet-based),
  - an IELTS score of 6.0, or
  - a Duolingo score of 100.
7. A non-refundable **application fee** of \$60 is also required (\$80 for international applicants).

### Contact

For questions regarding the application, please contact the Graduate Program Manager ([cmcigrad@colorado.edu](mailto:cmcigrad@colorado.edu)) who can also discuss your ambitions and what to expected of the program.

### Program Requirements

The STCM is a 39-hour professional masters degree program to be completed within a single calendar year—from August to August—over four semesters: Fall, Spring, Maymester and Summer Session D. We follow the CU Boulder calendar (<https://www.colorado.edu/academics/academic-calendar/>) and, in doing so, are guided by a year-long arc from **Foundations** (fall semester) to **Variations and Explorations** (spring semester), to **Solutions** (Maymester and Summer Session D).

The master's degree is awarded for successful completion of 39 credits over four contiguous semesters. Students must maintain a 3.0 cumulative grade point average and fulfill all requirements in a timely manner.

## Plan of Study

### Year One

Fall Semester		Credit Hours
Foundations		
CORE (required)		
APRD 5005		3
APRD 5006	Design for Startups	3
APRD 6871	Special Topics	3
ELECTIVES (required)		
APRD 5002	Foundations of Experience Design	3
<b>Credit Hours</b>		<b>12</b>

### Spring Semester

Variations and Explorations		
CORE (required)		
APRD 5007		3
APRD 5008	Designing for Scale	3
APRD 5017		3
APRD 6871	Special Topics	3
ELECTIVES		
APRD 5001	Foundations of Brand Design	
APRD 5003	Advanced Brand Design	

APRD 5004	Designing the Customer Journey	
APRD 5014	Advanced Tools for Interaction Design	
<b>Credit Hours</b>		<b>15</b>
<b>Summer</b>		
Solutions		
CORE (required)		
APRD 5010	Maymester	3
APRD 6871	Special Topics	3
ELECTIVES		6
APRD 5013		
APRD 5015	Brand Design for Sustainable Futures	
APRD 5016		
APRD 5019		
APRD 6871	Special Topics	
<b>Credit Hours</b>		<b>12</b>
<b>Total Credit Hours</b>		<b>39</b>

## Communication

Graduate study in communication foregrounds the symbolic and material dimensions of social life, with special attention to the role communication plays in both transmitting messages and constituting relationships. Contexts of study include interpersonal interaction, workplaces and institutions, communities and public/civic life.

Graduate students pursue research within three main areas—community & social interaction, organizational communication, and rhetoric & culture—crafting unique programs of study to meet individual needs.

The master's program provides students with knowledge of key bodies of communication scholarship and develops their skills in analyzing complex communication situations. The program prepares graduates for positions in businesses, nonprofit institutions and community groups, in addition to doctoral study in communication.

The doctoral program provides students with opportunities to conduct theoretically grounded and methodologically rigorous research on pressing communication issues, while also traversing traditional academic boundaries. The program prepares graduates primarily for faculty positions at leading universities, although some graduates pursue positions in business, the nonprofit sector, social services or government.

**Course code for this program is COMM.**

### Master's Degree

- Communication - Master of Arts (MA) (p. 1696)

### Doctoral Degree

- Communication - Doctor of Philosophy (PhD) (p. 1697)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### COMM 5000 (3) Organizational Culture

Focuses on theory and practice associated with the successful development of organizational culture. Topics covered include symbolic artifacts, beliefs, and assumptions that distinguish organizational, corporate, and occupational/professional identities. Related coverage of the communication practices (e.g., performance, ritual, etc.) through which the cultural elements of organizing are created, maintained and transformed. Special emphasis placed on issues of cultural leadership, cultural control, and cultural change in the contexts of contemporary globalization and technological innovation.

**Requisites:** Restricted to Organizational Leadership (ORGL-MS) students only.

**Grading Basis:** Letter Grade

### COMM 5210 (3) Readings in Communication Theory

Provides a critical overview of influential theoretical traditions in communication studies. Emphasizes the discipline's social scientific and humanistic heritage, while also considering emerging trends. Introduces standards for evaluating and critiquing communication theories.

**Requisites:** Restricted to graduate students only.

### COMM 5220 (3) Seminar: Functions of Communication

Topical seminar on the functions of communication across interpersonal, group, organizational, and public contexts. Reviews current theory and research on topics such as communication and conflict, persuasion, and ethical dimensions of communication practices.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### COMM 5225 (3) Environmental Communication

Investigates key concepts in environmental communication and considers which theoretical frameworks and practical actions can inform the effects of various constituents to address environmental issues.

**Requisites:** Restricted to graduate students only.

### COMM 5230 (3) Applied Communication

Examines the study of applications of communication concepts, theories, methods, interventions, and other practices to address real-world issues and problems. Discusses conceptual issues framing applied communication, examines purposes and methods informing such scholarship, and provides opportunity to evaluate and propose research.

**Requisites:** Restricted to graduate students only.

### COMM 5300 (3) Seminar: Rhetoric

Reviews current theory and research on topics such as rhetoric and publics, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### COMM 5310 (3) Contemporary Rhetorical Criticism

Advanced critical analysis of rhetorical texts in terms of how they shape issues and appeals for judgment, create identities for speakers and their audiences, and construct perceptions of time, space, and the human condition.

**Requisites:** Restricted to graduate students only.

### COMM 5320 (3) Readings in Rhetoric

Survey of classical and contemporary readings in rhetoric. Required for doctoral students in communication; optional for master's students.

**Requisites:** Restricted to graduate students only.

### COMM 5435 (3) Readings in Community and Social Interaction

Focuses on how everyday communication practices shape and are shaped by community contexts. Contains theoretical and empirical readings that illustrate how interactions among group members negotiate and maintain distinct communities and how group communication practices reflect shared norms among community members. Also reviews methods to study everyday interactions among community members (e.g., discourse analysis, qualitative coding, surveys and applied approaches/methods).

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### COMM 5600 (3) Seminar: Organizational Communication

Reviews current theory and research on topics such as communication and organizational decision making, organizational culture, gender relations, communication technology, and power and control in organizations.

**Equivalent - Duplicate Degree Credit Not Granted:** COMM 4600

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### COMM 5610 (3) Organizational Ethnography

Focuses on the historical influence of the ethnographic tradition in organizational communication studies. Reviews landmark studies of organizational culture and power/control, emphasizing issues of ethics and politics associated with the writing and reading of organizational ethnography. Reviews trends in contemporary organizing such as neoliberal globalization and the adoption of artificial intelligence, and their implications for the future of ethnography.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### COMM 5620 (3) Readings in Organizational Communication

Survey of historical and contemporary readings in organizational communication. Treats theory, research, and application from a variety of perspectives.

**Requisites:** Restricted to graduate students only.

### COMM 5720 (3) Readings in Communication and Technology

Survey of multidisciplinary research that examines various relationships between communication and technology. Students are encouraged to develop critical skills in perceiving assumptions and perspectives that motivate major theories in this area, and to examine how these phenomena have changed over time.

**Requisites:** Restricted to graduate students only.

**COMM 5930 (1-6) Graduate Internship**

Offers opportunities for graduate-level communication related work projects. Limited to 3 hours in spring and fall semesters, 6 hours in summer. The 6-hour limit at MA level and 9-hour limit at PhD level applies to any combination of independent study and internship credit.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**COMM 6010 (3) Communication Research and Theory**

Provides an introduction to graduate study of communication, offering an overview of the discipline and its scholarship. Required for MA and Ph.D. communication students.

**Requisites:** Restricted to Communication (COMM or COMN) graduate students only.

**COMM 6020 (3) Quantitative Research Methods**

Introduces students to the practice of quantitative research in communication: conceptualization and critique of research projects, measurements, methods (e.g., experimental and survey), statistical data analysis, and written reports.

**Requisites:** Restricted to graduate students only.

**COMM 6030 (3) Qualitative Research Methods**

Introduction to the epistemology, methodology, and representational practices associated with qualitative communication research. Fieldwork methods emphasized include participant observation, interviewing, and document/artifact analysis.

**Requisites:** Restricted to graduate students only.

**COMM 6200 (3) Seminar: Selected Topics**

Facilitates understanding of current and past theory and research on a selected topic in communication and the ability to develop new theory and research on that topic.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**COMM 6310 (3) Advanced Rhetorical Criticism**

Reviews current critical methods and issues related to rhetorical criticism and rhetorical field methods.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites COMM 5310 and COMM 5320.

**COMM 6320 (3) Rhetorical Theory**

Reviews current theory and research on topics such as contemporary rhetorical theory, rhetoric and public life, rhetoric as an interpretive social science, and rhetoric of social movements and political campaigns.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5320.

**COMM 6330 (3) Rhetoric of Inquiry**

Surveys foundational texts and contemporary research in the rhetoric of inquiry. Focuses on the role of persuasion in the production of knowledge. Critical analysis of major theoretical and methodological traditions and topics, with an emphasis on social dimensions of inquiry.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5320.

**COMM 6340 (3) Rhetoric and Civic Community**

Considers performances of public life as rhetorical inducements of civitas. Topics include negotiation of self-regulation among interdependent partners, rhetorical exclusions and/or counterpublics, and dialectical tensions of public/private as these contribute to and have civic consequences for publicness, community, and social will.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5320.

**COMM 6350 (3) Seminar in Argumentation**

Surveys foundational texts and contemporary research in argumentation. Analysis of distinctions between philosophical and rhetorical approaches to argument. Critical analysis of major theoretical and methodological traditions and topics with an emphasis on social dimensions of argument.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5320.

**COMM 6360 (3) Social and Cultural Theory**

Traces select traditions in social and/or cultural theory, emphasizing how those traditions affect and are affected by the field of rhetoric studies.

Examines the origins and resolutions of major debates in social and/or cultural theory from a rhetorical perspective.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5320.

**COMM 6370 (3) Rhetorics of Transgression and Resistance**

This course examines contemporary philosophies, analyses, and practices of transgression and resistance. Overall, it encourages greater reflexivity about why, how, and for what ends we study the intersections of rhetoric, culture, and social change, including but not limited to choices about naming, stories, discourses, tactics, coalitions, and movements.

**Recommended:** graduate students only.

**Grading Basis:** Letter Grade

**COMM 6410 (3) Discourse Analysis**

Acquaints students with the main types of discourse analysis: conversation analysis, critical discourse analysis, and rhetorically informed discourse approaches. Teaches how to conduct discourse analysis, including transcribing, selecting excerpts, documenting inferences, and linking findings to scholarly controversies.

**Requisites:** Restricted to graduate students only.

**COMM 6420 (3) Interaction Analysis**

Educates students in one of a selected set of methodological specializations used in the study of human interaction.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**COMM 6425 (3) Writing, Reporting, and Publishing**

Helps students hone their abilities to write, report, and publish a scholarly article in the field of communication and beyond. Students gain familiarity with the genre of the scholarly article, engage with theories of writing genres, delve into the politics of scholarly publishing, and learn various strategies for crafting a scholarly article. Students are expected to develop a manuscript for submission to a peer-reviewed journal or other scholarly forum.

**Grading Basis:** Letter Grade

**COMM 6440 (3) Grounded Practical Theory**

Examines theory, method, and application of grounded practical theory, an approach to building normative theory through description, critique, and theoretical reconstruction of situated communicative practices. Semester project involves analysis of a sample of discourse from a public or field observation setting.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5210.

**COMM 6445 (3) Intercultural Communication**

Focuses on cultural foundations of social interaction, with a special emphasis on ideology (including potentially contested cultural norms, values and premises) as a basic condition of meaningful interaction. Identities are discussed as culturally variable, historically embedded interactional accomplishments, constructed from communicative resources such as language and other types of signs, that serve the purpose of participation in communal life.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**COMM 6455 (3) Community-based Research Methods**

Facilitates and supports graduate student-led community-based research. Working from multiple CBR traditions, students develop a thoughtful rationale for conducting CBR and practice a repertoire of CBR methods (e.g., group decision-making, managing ethical dilemmas, collaborative data collection and analysis, and communicating findings).

**Grading Basis:** Letter Grade

**COMM 6460 (3) Ethnography of Communication**

Introduces graduate students to the theory, methodology, and practice of the ethnography of communication. Students read existing literature in the tradition, and design and implement a field-based project that centers on culturally patterned forms and styles of communicative conduct. Prior graduate-level coursework in basic qualitative research methods is required.

**Grading Basis:** Letter Grade

**COMM 6470 (3) Public Deliberation and Dialogue**

Explores the theory, research and practices of deliberative democracy and dialogue. Considers "ideal" communicative conduct and common interactional troubles, cross-cultural differences and routine communication practices.

**Requisites:** Restricted to graduate students only.

**COMM 6730 (3) Constitutive Approaches to Organizational Communication**

Explores theory and research that explain how organizing processes are constituted through communication. Course themes might include collaboration, authority, identity, knowledge, risk/resilience, or socio-material arrangements.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisites COMM 5620 and COMM 6010.

**COMM 6740 (3) Theory and Philosophy of Organizing and Organizations**

Reviews theory and philosophy of organizations and organizing where communication processes are seen as constitutive. Focuses on discursive and material practices in the formation and change of organizational structure, culture, and operation.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5620.

**COMM 6750 (3) Critical-Cultural Approaches to Organizational Communication**

Addresses critical and cultural approaches to communicating and organizing. Topics include relations of culture, power, resistance, identity, and difference as theorized in and around organizational life. Major theoretical works on these topics are highlighted throughout, although specific themes may vary.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Recommended:** Prerequisite COMM 5620.

**Grading Basis:** Letter Grade

**COMM 6780 (3) Roles, Relationships, and Identities in Interaction**

Examines how social roles influence communicative practices, the development of relationships, and the impact of relationships on identity. Considers these processes in contexts, such as personal relationships and institutional settings. Topic varies.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**COMM 6840 (1-3) Master's Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**COMM 6910 (1) Communication Research and Theory Practicum**

Focuses primarily on the professionalization of graduate students new to CU's Department of Communication. Introduces them to the department, university, and discipline; develops practical skills related to professionalization (e.g., submitting to conferences, publishing research, and mentoring students); and considers the politics of professionalization. Runs concurrently with COMM 6010, "Communication Research and Theory."

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**COMM 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**COMM 6950 (1-6) Master's Thesis**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**COMM 7118 (3) Foundations of Environmental Justice**

Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it. Formerly offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** GEOG 7118, ENVS 7118 and PSCI 7118

**Requisites:** Restricted to graduate students only.

**COMM 8840 (1-6) Doctoral Independent Study**

**Repeatable:** Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

**COMM 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

## Communication - Master of Arts (MA)

The master's degree provides students with knowledge of communication scholarship and develops their ability to analyze complex communication situations. The program is intended to serve two main groups of students: those planning to pursue the PhD degree and those seeking employment in businesses, nonprofit institutions and community groups.

MA students typically pursue studies in one or more of the department's three main areas:

- Community & social interaction
- Organizational communication
- Rhetoric & culture

Students may choose a thesis or comprehensive examination option.

### Requirements

Students wishing to pursue graduate work toward this degree should carefully read the Graduate School requirements, review the coursework offered in this catalog, and attend to the detailed degree requirements on the department website.

### Application Guidelines

Visit the department's Admissions (<http://www.colorado.edu/communication/graduate-degrees/admissions/>) webpage for details.

### Course Requirements

To complete the MA, students are required to take COMM 6010, at least one methods course and at least two readings courses (see tables below).

For both the thesis option and the comprehensive examination option, coursework may include a maximum of 6 hours of independent study and/or internship combined. A maximum of 9 hours may be transferred from graduate work completed in/at other programs and/or institutions (including other CU campuses, such as CU Denver). A maximum of 9 credit hours of courses may be taken outside the department. Transfer and outside department courses combined may not exceed 12 credit hours. Courses in which a grade of C- or below is received are not counted toward the master's degree.

### Degree Plans

#### Plan I: Thesis Option

Students pursuing the thesis option are required to complete a minimum of 30 graduate credit hours, including 24 credit hours of graduate-level coursework (at the 5000 level or higher) and 6 thesis hours (including oral defense of the thesis; additional thesis hours cannot be taken).

Code	Title	Credit Hours
<b>Required Courses</b>		
COMM 6010	Communication Research and Theory	3
COMM 6950	Master's Thesis	6
<b>Electives</b>		
At least one methods course:		3
COMM 6020	Quantitative Research Methods	
COMM 6030	Qualitative Research Methods	
COMM 6310	Advanced Rhetorical Criticism	

At least two readings courses:		6
COMM 5210	Readings in Communication Theory	
COMM 5320	Readings in Rhetoric	
COMM 5425		
COMM 5435	Readings in Community and Social Interaction	
COMM 5620	Readings in Organizational Communication	
COMM 5720	Readings in Communication and Technology	
Four additional graduate-level courses		12
<b>Total Credit Hours</b>		<b>30</b>

Students choosing the thesis option should select a permanent graduate faculty advisor prior to completing 12 credit hours. In consultation with their advisor, students should select two additional committee members and, by the beginning of the second year (assuming a course load of 9 hours per semester), complete the MA Program of Study Form and a written thesis proposal (with the thesis designed such that it can be completed during student's final planned semester in residence).

After the committee has read the thesis, a final oral defense is conducted in conformity with the graduate school's rules. Students must have an affirmative vote from the majority of committee members to pass the thesis. Students who fail the thesis defense may attempt it once more after a period of time that is determined by the committee. Students who fail the second defense are dismissed from the master's program. The final submitted thesis must comply with the CU Boulder Graduate School rules regarding the formatting of theses and dissertations.

#### Plan II: Comprehensive Examination Option

Students pursuing the coursework with comprehensive examination option are required to complete a minimum of 30 graduate credit hours (at the 5000 level or higher), a written comprehensive examination and an oral defense of that written comprehensive examination.

Code	Title	Credit Hours
<b>Required Course</b>		
COMM 6010	Communication Research and Theory	3
<b>Electives</b>		
At least one methods course:		3
COMM 6020	Quantitative Research Methods	
COMM 6030	Qualitative Research Methods	
COMM 6310	Advanced Rhetorical Criticism	
At least two readings courses:		6
COMM 5210	Readings in Communication Theory	
COMM 5320	Readings in Rhetoric	
COMM 5425		
COMM 5435	Readings in Community and Social Interaction	
COMM 5620	Readings in Organizational Communication	
COMM 5720	Readings in Communication and Technology	
Six additional graduate-level courses		18
<b>Total Credit Hours</b>		<b>30</b>

Master's students choosing the comprehensive examination option should select a permanent graduate faculty advisor prior to completing 12 credit hours. The associate chair of graduate studies automatically serves as a committee member. Students, in consultation with their advisor, select a third committee member.

By the beginning of the second year of graduate work (assuming a course load of 9 hours per semester), students should complete the MA Program of Study Form.

The comprehensive examination includes two standardized questions created by the associate chair of graduate studies that are completed by all master's students taking the examination at the same time that semester. One is about communication theory (90 minutes), and the other is about research methods (90 minutes). A third question, created by the student's advisor, is unique to the student's area of expertise (2 hours).

A one-hour oral defense must be held within two weeks of completing the written comprehensive examination. Students must have an affirmative vote from the majority of committee members to pass the comprehensive examination.

Should the majority of committee members judge the written and/or oral performance unsatisfactory, students may be required to retake relevant portions of the examination (with a maximum of one opportunity to retake the examination). Prior to retaking the comprehensive examination, students may be required to complete additional coursework and/or research projects. Retaking the comprehensive examination must include another oral defense. Students who retake the comprehensive examination but do not complete it in a satisfactory manner are dismissed from the master's program.

## Communication - Doctor of Philosophy (PhD)

The PhD in communication typically serves students interested in pursuing academic careers. Students are admitted to the PhD program after having completed an MA degree or equivalent.

PhD students generally specialize in one or more of the department's three main areas:

- community & social interaction
- organizational communication
- rhetoric & culture

Depending on the extent of the student's prior academic work in communication and their rate of progress, the degree can be achieved in three to four years. PhD students are expected to complete all degree requirements within six years from the semester in which they begin coursework in the doctoral program.

## Requirements

### Application Guidelines

For application guidelines, visit the department's Admissions (<http://www.colorado.edu/communication/graduate-degrees/admissions/>) webpage.

### General Requirements

All PhD students are required to take COMM 6910 and two of three methods courses (COMM 5310, COMM 6020 and COMM 6030). PhD

students entering without a background in communication must also take COMM 6010.

Beyond those specific requirements, PhD students develop expertise in four areas: broad-based background in communication, advanced expertise in a primary area of specialization, expertise in a secondary area of specialization and advanced expertise in a primary methodology.

Students' individual coursework requirements must be specified in a PhD plan of study document that is approved by their advisor and committee. A minimum of 54 graduate credit hours of coursework is required, plus 30 hours of dissertation credit, for a minimum total of 84 credit hours. At least 30 graduate credit hours of coursework must be in communication courses.

PhD students may transfer in a maximum of 12 credits from prior graduate coursework. Any graduate courses completed at CU Boulder (including courses completed for the master's in communication) can be applied to the PhD program if they are included in the student's approved PhD plan of study. Students may take a maximum of nine independent study and/or internship credit hours combined.

Students wishing to pursue graduate work toward this degree should carefully read the Graduate School requirements, review the coursework offered in this catalog and attend to the detailed degree requirements on the department website (<http://www.colorado.edu/communication/graduate-degrees/phd-communication/>).

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
<i>Research and Theory</i>		1-3
COMM 6010	Communication Research and Theory (required for students without a background in Communication)	
COMM 6910	Communication Research and Theory Practicum (required for students with a background in Communication)	
<i>Methods</i>		
Choose at least two:		6
COMM 5320	Readings in Rhetoric	
COMM 6020	Quantitative Research Methods	
COMM 6030	Qualitative Research Methods	
<b>Primary Area of Specialization</b>		
This requirement is satisfied by taking courses, seminars and/or independent studies (including those outside the department) in the primary specialty declared in the student's approved PhD plan of study.		
<b>Secondary Area of Specialization</b>		
This requirement is satisfied by taking courses, seminars and/or independent studies (including those outside the department) in the student's approved PhD plan of study.		
<b>Primary Methodology</b>		6
This requirement is satisfied by taking methodology courses in communication and/or cognate disciplines; methodological expertise also can be developed through independent studies and participation in research projects.		

## Critical Media Practices

Critical media practices (CMDP) addresses the changing landscape of electronic media making by developing both analytical and production skills across a wide range of platforms, practices and technologies while simultaneously placing them within the broader perspective of culture and history. The department explores cross-platform media production, computational media and creative ethnography, as well as other time-based media arts practices such as locative media and performance art. Our convergent approach to media spans a variety of media tools including digital photography, audio/video editing and single camera video production, open source programming and digital single lens reflex cameras, as well as emergent tools under development. With an emphasis on the interaction between critical theory and media production practices, students are encouraged to not only thoughtfully engage with the diversity of media cultures but to also become active entrepreneurial media producers, directors, writers, editors and scholars at the forefront of emerging cultural industries. CMDP prepares students to make productive use of the tools to engage creatively with the future trajectories of media, wherever they may lead.

CMDP students will be exposed to a variety of approaches concerning the study of media, information and communication through core CMCI classes. The undergraduate program is designed to provide basic hands-on grounding in production theory, aesthetics, techniques and approaches emphasizing innovative approaches to media making. As such, the department provides a rich and varied resource for cross-pollination and collaboration. At the graduate level, the program features a terminal MFA. The department also supports a practice-based PhD in emergent technologies and art practices. This innovative merger of theory and praxis, spanning undergraduate through graduate education, places CU on the cutting edge of institutions exploring innovative models for educating twenty-first-century students as well as publishing and disseminating scholarship.

Course code for this program is CMDP.

### Master's Degree

- Interdisciplinary Documentary Media Practices - Master of Fine Arts (MFA) (p. 1700)

### Doctoral Degree

- Emergent Technologies and Media Art Practices - Doctor of Philosophy (PhD) (p. 1701)

### Certificate

- Emergent Technologies and Media Art Practices - Graduate Certificate (p. 1702)
- Interdisciplinary Documentary Media Practices - Graduate Certificate (p. 1702)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### **CMDP 5100 (3) Research and Methodologies Seminar**

Explores documentary media preproduction tactics and strategies, including basic research approaches, planning, pre-visualization, stylistic approaches, scheduling, working with archive and documentary materials, and documentary ethics.

**Requisites:** Restricted to graduate students only.

### **CMDP 5370 (3) Choreography, Cinematograph: Writing in Motion**

Examine media and moving image aesthetics, tactic and strategies by creating work involving movement and expanded notions of choreography. Within this course students compose images and sounds, structuring them temporally as they explore narrative and non-narrative forms.

**Requisites:** Restricted to graduate students only.

### **CMDP 5450 (3) Contemporary Documentary Media**

Explores cross platform documentary media practices and contemporary debates in documentary through a study of documentary history, genre, ethics and changing forms. It develops skills in critically analyzing documentary media.

**Requisites:** Restricted to graduate students only.

### **CMDP 5500 (3) Documentary Production Workshops**

Workshopping and developing technical skills in documentary media production.

**Requisites:** Restricted to graduate students only.

### **CMDP 5600 (3) Documentary Lab Seminar**

Explores and workshops documentary media projects and ideas from a variety of disciplines. A team-taught course, with affiliated faculty working in design groups within the documentary lab in one or more areas, such as Art and Art History, Anthropology or Geography. A total of 12 hours is required for IDMP MFA candidates.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

### **CMDP 5650 (3) Documentary Field Work**

Explores distinctive and varied approaches to documentary field work and the uses of media for creative ethnography and other nonfiction practices. A team-taught course, with affiliated faculty from one or more areas such as Art and Art History, Anthropology and Geography.

**Requisites:** Requires a prerequisite course of CMDP 5100 (minimum grade C-). Restricted to graduate students only.

### **CMDP 5900 (3) Documentary Production Topics**

Incorporates reflective study and practice in a course that consists of rotating topics in contemporary documentary practices, such as media essays, observation and participation, personal histories and voices, emergent technologies and documentary media, and interpretive ethnography.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

### **CMDP 5910 (3) Individual Project Study**

Requires students to conduct self-directed research and production in a seminar setting. Topics relate to individual projects

**Repeatable:** Repeatable for up to 15.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### **CMDP 6500 (5) Producing Practicum**

Explores advanced producing principles through the preproduction of the MFA thesis project, including the development of a professional project proposal.

**Requisites:** Requires a prerequisite course of CMDP 5650 (minimum grade C-).

**Grading Basis:** Letter Grade

### **CMDP 6600 (5) Documentary MFA Thesis Seminar I**

Explores production of MFA thesis product. Focus is on production strategies, ethical challenges and other practical production issues.

**Requisites:** Requires a prerequisite course of CMDP 6500 (minimum grade C-).

**Grading Basis:** Letter Grade

### **CMDP 6650 (5) Documentary MFA Thesis Seminar II**

Explores editing and post-production of the MFA thesis project.

Emphasizes aesthetic choices (structure, narration and music), distribution, contracts and audience.

**Requisites:** Requires a prerequisite course of CMDP 6600 (minimum grade C-).

**Grading Basis:** Letter Grade

### **CMDP 6841 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### **CMDP 6871 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

### **CMDP 7100 (3) Historical Overview of Media Arts and Technology**

Explores a survey of historical trends in art and technology from the Renaissance to the contemporary global scene. Students investigate how artistic disciplines inform one another and how parallel developments in technology have played a significant role in the history of the arts. This course locates media arts within this broader historical context.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### **CMDP 7150 (3) Theoretical Overview of Media Arts and Technology**

Surveys major theories of art, culture and technology formulated by both practitioners and theoreticians and examines conversations among technology studies, media theory and artistic practice. Students will investigate a variety of approaches, locating media arts within a broad range of theoretical perspectives.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### **CMDP 7200 (3) Research and Methodologies I**

Introduces students to modalities of research and methodological practices in the context of media arts and technology. Strategies from a variety of academic disciplines will be critically engaged to provide a foundation for future work.

**Grading Basis:** Letter Grade

**CMDP 7300 (3) Theories of the Avant-Garde**

Explores various manifestations of avant-garde and experimental literature, art and media performance in the 20th century such as Cubism, Futurism, Dada, Surrealism, Theatre of the Absurd, the Situationists, Fluxus, Oulipo and others. Media forms analyzed will include manifestos, sound poetry, theatre, the novel, happenings, cinema, installation and other forms of historical avant-garde art practices.

**Grading Basis:** Letter Grade

**CMDP 7400 (3) Contemporary Practices**

Provides students with access to contemporary practices and discourses in media art and culture. The class engages professional practitioners through performances, field work and workshop encounters that may be open to the public. Students research, coordinate and present on biweekly guest presentations, with alternating weeks for reflection and discussion. Readings complement guest presentations.

**Grading Basis:** Letter Grade

**CMDP 7450 (3) Comprehensive Exam Seminar**

Designed in a seminar format, this course reviews literature and concepts in all prior coursework and guides studies in their preparation for comprehensive exams. All ETMAP students must demonstrate their understanding of the fundamental concepts explored and developed in prior coursework in relation to individual areas of research.

**Requisites:** Requires prerequisite courses of CMDP 7100 and CMDP 7150 and CMDP 7250 and CMDP 7550 (all minimum grade C-).

**Grading Basis:** Letter Grade

**CMDP 7500 (3) Production Methods I**

Provides technical resources for students to work with emergent technologies in a media arts context. This is a team-taught, practice-based course addressing various production methods, from moving image and video to web and network media to computational media.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**CMDP 7560 (3) Emergent Technologies: Theory and Practice**

Explores how discreet modalities of media arts practices and their underpinning theoretical perspectives inform each other through the use of technology. Students investigate and develop theoretical perspectives on the exchange between art, technology and theory within their own research and the broader context of the contemporary social and cultural landscape.

**Grading Basis:** Letter Grade

**CMDP 7841 (1-9) Independent Study**

Independent Study

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**CMDP 7871 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**CMDP 8100 (3) Dissertation Development**

Designed in a seminar format, this course guides students through the development of a practice-based dissertation in which constant critical thinking is required. Through intensive workshoping and close reading, this class guides students from the dissertation proposal to the opening stages of tangible, original research.

**Grading Basis:** Letter Grade

**CMDP 8500 (3) Collaborative Studio Practice I**

Explores approaches to media arts collaboration across disciplines. Through technological and social systems, students investigate the role of the artist. In analyzing contemporary work in an ongoing cycle of discussion, reading and art practice, students will respond to projects, texts and media in form of creative practice.

**Requisites:** Requires a prerequisite course of CMDP 7450 (minimum grade C-).

**Grading Basis:** Letter Grade

**CMDP 8600 (1-6) Independent Studio Critique**

Work under faculty supervision with individual and group critiques focusing on the development of a practice-based dissertation. Designed to be taken in conjunction with CMDP 8100.

**Grading Basis:** Letter Grade

**CMDP 8991 (1-10) Doctoral Dissertation**

**Repeatable:** Repeatable for up to 40.00 total credit hours.

**Requisites:** Restricted to graduate students only.

## Interdisciplinary Documentary Media Practices - Master of Fine Arts (MFA)

The MFA in Interdisciplinary Documentary Media Practices, a terminal degree, is a three-year program in which students learn and experiment with a variety of documentary media practices as they work toward the completion of a thesis project. The core of the program is the Documentary Lab, in which students from a wide range of disciplines develop and workshop projects at various stages of completion. The program also takes advantage of masterclasses and other opportunities offered by the Center for Documentary and Ethnographic Media.

## Requirements

### Admission Requirements

*DCMP is not currently accepting applications for the MFA program. View the department website (<https://www.colorado.edu/cmci/dcmp/mfa/>) for updates.*

### Application Deadlines

The deadline for U.S. and international students is December 1.

### Application Guidelines and Resources

MFA applicants must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university and provide transcripts from every institution attended.
- Have an undergraduate grade point average of at least 2.75.
- If international, provide TOEFL or IELTS scores.
- Provide three letters of recommendation.
- Provide a statement of purpose.
- Provide a portfolio of relevant media work, such as video, photographs, sound pieces, websites, and other media art projects. Format preference is Vimeo. Please include a link to your online portfolio in your personal statement.

In the online application, select IDMP-MFA as the academic plan.

### Transcripts

For review and decision purposes, applicants are required to upload an unofficial copy of their transcript(s) in the online application. The program requires a copy of the scanned transcript from each undergraduate and

graduate institution that you attended. This includes community colleges, summer sessions, and extension programs. While credits from one institution may appear on the transcript of another institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether or not courses were completed. *Failure to list and submit transcripts from all institutions previously attended is considered to be a violation of academic ethics and may result in the cancellation of a student's admission or dismissal from the university.*

Candidates will only need to provide official transcripts *only* after they are recommended for admission.

For more information about this program, visit the department website (<https://www.colorado.edu/cmci/dcmp/mfa/>) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

## Program Requirements

The IDMP MFA is a three-year degree program requiring the successful completion of 60 credit hours of coursework, a first year review, second year review and thesis defense. The thesis consists of an original, media-based project and a written reflection that situates the project within the field of documentary media practices.

# Emergent Technologies and Media Art Practices - Doctor of Philosophy (PhD)

The emergent technologies and media arts practices (ETMAP) PhD is a practice-led program of scholarly research and exploration of media practices, theories and innovations in art and technology. Students both experiment with and research the media and artistic practices that they study. The ultimate goal is a substantive dissertation and media-based project that situate media art making within broad cultural and art historical perspectives.

Designed to be completed in four years, the program requires 72 credit hours, a first year review, comprehensive exam, prospectus defense and dissertation defense. There is a high degree of flexibility in the curriculum, with students choosing up to 15 credit hours of guided electives and independent study, including courses and independent study with faculty in other departments. After admission to candidacy, students conduct scholarly and creative research over three semesters (30 credit hours), culminating in a dissertation that makes a unique contribution to the field of media arts and technology.

The program takes seriously the balance of theory and practice. The dissertation consists of two equally important components: a written dissertation and a media-based project. Students are expected to be both scholars and creative artists.

## Requirements

### Admission Requirements

An overview of admission requirements may be found below. For additional information, view the program page on the department website (<https://www.colorado.edu/cmci/dcmp/phd/>).

### Application Deadlines

The application deadline for U.S. and international applicants is December 1.

## Application Guidelines and Resources

PhD applicants must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university and provide transcripts from every institution attended.
- Have an undergraduate grade point average of at least 2.75.
- If international, provide TOEFL or IELTS scores.
- Provide three letters of recommendation.
- Provide a statement of purpose.
- Provide a portfolio of relevant media work, such as video, photographs, sound pieces, websites, and other media art projects. Format preference is Vimeo. Please include a link to your online portfolio in your personal statement.
- Provide a writing sample of at least 2500 words.

In the online application, select ETMAP-PHD as the academic plan.

## Transcripts

For review and decision purposes, applicants are required to upload an unofficial copy of their transcript(s) in the online application. The program requires a copy of the scanned transcript from each undergraduate and graduate institution that you attended. This includes community colleges, summer sessions, and extension programs. While credits from one institution may appear on the transcript of another institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether or not courses were completed. *Failure to list and submit transcripts from all institutions previously attended is considered to be a violation of academic ethics and may result in the cancellation of a student's admission or dismissal from the university.*

Candidates will only need to provide official transcripts *only* after they are recommended for admission.

## Program Requirements

The ETMAP PhD is a four-year degree program requiring the successful completion of 72 credit hours of coursework, a first year review, comprehensive exam, prospectus defense and dissertation defense.

In the comprehensive exam, students must demonstrate their proficiency and understanding of the fundamental historical and theoretical concepts explored and developed in prior coursework. Students advance to candidacy after the prospectus defense.

The dissertation must include practical as well as written theoretical components. Students are expected to publicly present their media-based project before the dissertation defense.

## Required Courses

Code	Title	Credit Hours
<b>ETMAP Fundamentals</b>		
CMDP 7100	Historical Overview of Media Arts and Technology	3
CMDP 7200	Research and Methodologies I	3
CMDP 7300	Theories of the Avant-Garde	3
CMDP 7450	Comprehensive Exam Seminar	3
CMDP 7500	Production Methods I (x4)	12
<b>Dissertation Development</b>		
CMDP 8100	Dissertation Development	3
<b>Guided Electives and/or Independent Study</b>		<b>15</b>

Guided Elective, within or outside DCMP (repeatable)	
Independent Study, within or outside DCMP (repeatable)	
<b>Dissertation</b>	<b>30</b>
CMDP 8991	Doctoral Dissertation
<b>Total Credit Hours</b>	<b>72</b>

## Emergent Technologies and Media Arts Practices - Graduate Certificate

The graduate certificate in emergent technologies and media arts practices (ETMAP) is a 9-credit-hour certificate program that is open to any student pursuing a graduate degree in any department at CU Boulder. In the program, students integrate media practices, theories and innovations in art and technology into their research. Students both experiment with and research the media and artistic practices that they study. The program will be of particular interest to students whose media research is practice-led and students who wish to integrate media arts practices into their research.

### Requirements

#### Application Guidelines

To be accepted into the program, students must be a graduate student in good standing with the Graduate School, submit a statement of interest to the Associate Chair of Graduate Studies and meet with the Associate Chair to discuss to their goals as a student in the program. Acceptance into the program is at the discretion of the Associate Chair.

For more information about this program, view the department website (<https://www.colorado.edu/cmci/dcmp/cert-etmap/>) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

#### Required Courses and Credits

The ETMAP certificate requires the successful completion of 9 credit hours in critical studies and media arts practices, as described below.

The certificate program can usually be completed in one to two years. After the course requirements are met, students must provide a transcript to the Associate Chair of Graduate Studies. The certificate will appear on the student's record at that time or upon graduation.

Code	Title	Credit Hours
<b>Critical Studies</b>		<b>3</b>
Choose one:		
CMDP 7100	Historical Overview of Media Arts and Technology	
CMDP 7300	Theories of the Avant-Garde	
CMDP 7871	Special Topics	
<b>Media Arts Practices</b>		<b>6</b>
Choose two:		
CMDP 7200	Research and Methodologies I	
CMDP 7500	Production Methods I (repeatable)	
CMDP 7871	Special Topics	
<b>Total Credit Hours</b>		<b>9</b>

### Resources

Students have access to DCMP equipment, facilities and other resources as long as they are enrolled in a course that fulfills certificate requirements.

## Interdisciplinary Documentary Media Practices - Graduate Certificate

The graduate certificate in interdisciplinary documentary media practices (IDMP) is a 12-credit-hour certificate program that is open to any student pursuing a graduate degree in any department at CU Boulder. In the program, students integrate documentary media practices into their research. The core of the program is the documentary lab, in which students from a wide range of disciplines develop and workshop projects at various stages of completion. The program also takes advantage of masterclasses and other opportunities offered by the Center for Documentary and Ethnographic Media.

### Requirements

#### Application Guidelines

To be accepted into the program, students must be a graduate student in good standing with the Graduate School, submit a statement of interest to the Associate Chair of Graduate Studies, and meet with the Associate Chair to discuss to their goals as a student in the program. Acceptance into the program is at the discretion of the Associate Chair.

For more information about this program, view the department website (<https://www.colorado.edu/cmci/dcmp/cert-idmp/>) or contact the Associate Chair of Graduate Studies or CMCI Graduate Advising.

#### Required Courses and Credits

The IDMP certificate requires the successful completion of 9 credit hours of any seminar courses, production workshops and topics course listed below.

The certificate program can usually be completed in one to two years. After the course requirements are met, students must provide a transcript to the Associate Chair of Graduate Studies. The certificate will appear on the student's record at that time or upon graduation.

Code	Title	Credit Hours
CMDP 5100	Research and Methodologies Seminar	3
CMDP 5450	Contemporary Documentary Media	3
CMDP 5500	Documentary Production Workshops	3
CMDP 5600	Documentary Lab Seminar	3
CMDP 5650	Documentary Field Work	3
CMDP 5900	Documentary Production Topics	3
CMDP 6500	Producing Practicum	5
CMDP 6841	Independent Study	1-3
CMDP 6871	Special Topics	3

### Resources

Students have access to DCMP equipment, facilities and other resources as long as they are enrolled in a course that fulfills certificate requirements.

## Information Science

Information science considers the relationships between people, places and technology and the information those interactions yield. The internet is a broad example of a socio-technical system that is comprised of hardware and software, but in daily life is better understood as a constantly changing social infrastructure upon which complex forms of human-human and human-information interaction rest. Scholars and students of information science develop new methods to study these socio-technical phenomena, and translate those findings to the design and development of useful and meaningful technology.

The department will equip students with the conceptual machinery to succeed in a future characterized by new ways of working with information and communication technology.

The knowledge and skills of our graduates will enable them to participate in and shape new structures of enterprise. Customized, creative production—as in the “maker culture” movement—is expanding notions of the enterprise, as are distributed and mobile workforces.

The MS and PhD degrees align with standards set by other universities. Both include liberal arts education combined with empirical work and computing knowledge, and both incorporate the grant-driven, collaborative “lab model” research that characterizes the natural and engineering sciences.

Course code for this program is INFO.

## Master's Degree

- Information Science - Master of Science (MS) (p. 1707)

## Doctoral Degree

- Information Science - Doctor of Philosophy (PhD) (p. 1708)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### INFO 5301 (3) Computation for Research in Information Science

Introduces principles of computational thinking through the manipulation, transformation and creation of data artifacts used in research. Students will be exposed to a high-level overview of algorithms, functions, data structures, recursion and object-oriented computer programming through a series of assignments that emphasize the use of computation as a means of scholarship.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### INFO 5501 (3) Open Collaboration

Analyzes the mechanisms of peer production and crowdsourcing systems like Wikipedia and OpenStreetMap. Students will investigate how these crowdsourced platforms work socially and technically, develop skills using tools for their analysis and critically evaluate platform and community limitations.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3501

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### INFO 5502 (3) Online Communities

Explores practical and theoretical topics in online communities through inquiry into one or more particular online communities. Student projects will explore online communities as social and technical systems, including their alignment with conceptualizations of community, expressed and apparent interests, nature of membership and participation, history, participants' motivations for involvement, and explicit, implicit, and infrastructural features that enable and constrain behaviors.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3502

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### INFO 5503 (3) Everyday Information Behavior

Familiarizes students with practical and theoretical topics in the discipline of information behavior and its application to everyday events, activities and environments. Explores the information dimension of various everyday activities such as buying a car, playing a game or looking up health information online. Students learn to analyze the informational dimensions that occur in their everyday lives.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3503

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5504 (3) Digital Identity**

Explores and analyzes identity in a digital era. Through applied research, students investigate both social and technical aspects of how identity is captured, represented and experienced through technology using theoretical, empirical and design-based inquiry. Methods and platforms studied vary by semester.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3504

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5505 (3) Designing for Creative Learning**

Analyzes learning technologies, discusses learning theories and develops prototypes to investigate strategies for engaging people in creative and inclusive learning experiences. Students explore design, learning and technology by examining sociotechnical systems like construction kits, online communities and makerspaces with a critical lens on equity and inclusion. Studio format enables students to apply constructionist ideas into the design of technology-enabled environments.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3505

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5506 (3) Online Fandom**

Explores and analyzes fan communities in a digital context. Through applied research, students will investigate online spaces devoted to participatory and remix culture, media fandom, and fan creation. This class will draw concepts and methods from fan studies, social computing, ethnography, data science, and sociology to drive project-based inquiry.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3506

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5507 (3) Data and the Humanities**

Introduces students to foundational computing and statistical concepts for analyzing humanities data. This course discusses the influence of digitization and data on humanist inquiry and exposes students to techniques for working with data in different areas of the humanities, including literature, history, and art. The course emphasizes technical practices involved in humanist data analysis. Comfort with programming is strongly encouraged.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 3507

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5601 (3) Ethical and Policy Dimensions of Information and Technology**

Explores ethical and legal complexities of information and communication technology. By combining real-world inquiry with creative speculation, students will probe everyday ethical dilemmas they face as digital consumers, creators and coders, as well as relevant policy. Explores themes such as privacy, intellectual property, social justice, free speech, artificial intelligence, social media and ethical lessons from science fiction.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4601

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5602 (3) Information Visualization**

Explores the design, development and evaluation of information visualizations. Covers visual representations of data and provides hands-on experience with using and building exploratory tools and data narratives. Students create visualizations for a variety of domains and applications, working with stakeholders and their data. Covers interactive systems, user-centered and graphic design, perception, data storytelling and analysis, and insight generation. Programming knowledge is strongly encouraged.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4602

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5603 (3) Survey Research Design**

Familiarizes students with practical and theoretical topics in using survey methods for conducting information science research. Through discussion and real world assignments, students will learn when and why to use surveys for collecting data; effective, efficient and ethical approaches to maximizing response; sampling issues; development of valid items and scales; and how to implement, analyze and report on survey data collection.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4603

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5604 (3) Applied Machine Learning**

Introduces algorithms and tools for building intelligent computational systems. Methods will be surveyed for classification, regression and clustering in the context of applications such as document filtering and image recognition. Students will learn the theoretical underpinnings of common algorithms (drawing from mathematical disciplines including statistics and optimization) as well as the skills to apply machine learning in practice.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4604

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5605 (3) Ethnographic Research in Applied Settings**

Demonstrates the power of ethnography as an investigative approach that is useful in design, evaluation and question formation for information scientists across all workforce sectors. Teaches students how to be keen observers of the unusual as well as the everyday to reveal meaningful insights that elaborate information science projects.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4605

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5606 (3) Critical Technical Practice**

Surveys design theory and methods that can be used to question relationships between technology, culture, and the environment. Students will discuss readings and synthesize those readings through design exercises. The course will equip students with resources for thinking more critically and creatively about design and possible future human-technology relationships.

**Equivalent - Duplicate Degree Credit Not Granted:** ATLS 5606, ATLS 4606 and INFO 4606

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5607 (3) Software Engineering for Data-Centered Systems**

Explores design and engineering of systems for data storage and analysis. Introduces fundamental development concepts used in real-world data systems. By combining software engineering with knowledge from data science and human-centered computing, prepares students to develop systems, interpret and modify codebases, understand modern concepts for managing data at scale, and work in teams to create cutting-edge applications for consumer use.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4607

**Requisites:** Requires prerequisites of INFO 2201 or CSCI 2270 (all minimum grade C-). Restricted to students with 57-180 credits (Junior or Senior)

**Grading Basis:** Letter Grade

**INFO 5608 (3) Community-Based Design**

Surveys techniques in cooperative design with community members as collaborators rather than subjects. Students will explore approaches such as participatory design and co-design. Students will work in teams in partnership with community stakeholders to create tools, experiences, or systems that meet the needs of communities, contribute to social change, and/or lead to advancing academic knowledge.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4608

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5609 (3) User-Centered Design**

Surveys the theoretical and practical foundations of human-computer interaction and user-centered design. Students learn theories of interaction (including cognitive, organizational, collaborative, and task-based approaches), user interface design techniques, design guidelines, and usability testing in the context of developing technology. Course content is explored through a variety of interfaces (desktop, mobile, touch, vision, audio, etc.) and contexts (personal, organizational, cross-cultural, etc.).

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4609

**Requisites:** Restricted to graduate students only.

**INFO 5611 (3) Ubiquitous Computing Experience Design**

Introduces the field of ubiquitous computing, including sensors, ambient displays, tangibles, mobility, location awareness and context awareness. These topics are explored from a user-centered design perspectives, focusing on how a situated models of computing affect requirements gathering, interaction design, prototyping and evaluation. Students gain mastery with contemporary "UbiComp" technologies and learn to incorporate them into a user-centered design process.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4611

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5612 (3) Recommender Systems**

Explores the space of personalized information access applications known as recommender systems. This class will introduce students to a range of approaches for building recommender systems including collaborative, content-based, knowledge-based, and hybrid methods. Students will also explore a variety of applications for recommendation including consumer products, music, social media, and online advertising. The course will also examine controversies surrounding recommendation, including Pariser's "filter bubble", and questions of algorithmic bias. Proficiency in Python programming required.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5613 (3) Network Science**

Introduces theories and methods for analyzing relational data in social, information, and other complex networks. Students will understand the processes and theories explaining network structure and dynamics as well as develop skills analyzing and visualizing real-world network data. No math or statistics training required, but course will assume familiarity with Python.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4613

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 5620 (3) Race and Technology**

This course is designed with the understanding that race and racial inequality have been central to how societies and societal systems of power have been shaped and reshaped over time. Students will critically examine how race is created by and through sociotechnical systems. Students will explore how the design, implementation, and use of digital platforms and their data continue to perpetuate and embody white, cisgender, heteronormative systems of power. This course will cover a wide range of foundational and emergent scholarship, giving voice to Scholars of Color, providing students with a foundation through which they can continue to critique and explore sociotechnical and other societal arrangements more broadly.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4620

**Requisites:** Restricted to graduate students only.

**INFO 5651 (3) Fundamental Concepts in Data Science**

This intensive course provides a general understanding of the mathematical concepts required for success in data science. This course will cover a wide range of mathematical tools in data science including an overview of calculus and linear algebra along with selected topics from numerical analysis. The course will also explore computational implementations of these ideas. This course provides a bridge for students without these advanced math concepts to learn to apply them within a data science career or within a graduate program in data science.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4651

**INFO 5652 (3) Statistical Programming in R**

This intensive course covers foundational data science tools and techniques in the R programming language, including acquiring, cleaning, exploring, and analyzing data, programming, and conducting reproducible research. The course will emphasize the use of data management best practices such as the tidyverse toolkit in R.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4652

**INFO 5653 (3) Text Mining**

Introduces students to techniques for extracting information from text data, including text gathering and cleaning, and text processing methods, such as dimensionality reduction, normalization, and text visualization. It will introduce applications and methodologies of machine learning for text, such as sentiment analysis, association rule mining, and topic modeling.

**INFO 5747 (4) Defamiliarizing Data: The Ethnography and Design of Making Data Strange**

Introduces students to the design and use of data in an unfamiliar, international context. Develops students' ethnographic and design skills for defamiliarizing data, seeing, characterizing, and designing for data in ways that render it as unfamiliar and strange in order to gain new perspectives and insights about those data and the contexts in which they are produced and consumed.

**Equivalent - Duplicate Degree Credit Not Granted:** INFO 4747

**INFO 5841 (1-3) Independent Study**

Independent Study

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**INFO 5871 (1-4) Special Topics**

Topics will vary by semester.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**INFO 5919 (3) HCC Survey and Synthesis: Foundations and Trajectories**

Examines the interdisciplinary field of human-centered computing through a comprehensive content and historical survey. Considers new trajectories of inquiry and how the field merges with others. Social computing, is emphasized as a central topic. Students across disciplines will find the course foundational for understanding human-centered technology matters, including computer scientists, information scientists, social scientists, and business and media arts students.

**Equivalent - Duplicate Degree Credit Not Granted:** CSCI 5919

**Requisites:** Restricted to graduate students only.

**INFO 5931 (1-3) Internship**

Internship

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**INFO 6101 (3) Theories and Concepts in Information Science**

Surveys foundational theories and concepts in information science. Students will learn to read and reflect critically about seminal texts, tracing their intellectual genealogies from a variety of originating disciplines to their appropriation by information science. Students will apply these theories to contemporary issues and problems.

**Requisites:** Restricted to Information Science (INFO) Ph.D. graduate students only.

**Grading Basis:** Letter Grade

**INFO 6201 (3) Interdisciplinary Ways of Knowing**

Introduces principles of research design and surveys the breadth of research methods appropriated by the field of information science. Students will explore the diversity of epistemological orientations that make up the field, that influence the types of often mixed research methods applied and that shape the kinds of questions that are and are not explored.

**Requisites:** Restricted to Information Science (INFO) Ph.D. graduate students only.

**Grading Basis:** Letter Grade

**INFO 6301 (3) Computation for Research in Information Science**

Examines the diversity of roles that computation can play in information science research, ranging from an overview of some data-driven practices to prototyping and infrastructure development to computation-as-research-support. Provides students with a level of computational literacy to engage with the multiplicity of roles that computation serves in the different kinds of research work that is happening across the domain, including exemplars of different kinds of technical contributions and approaches.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 6401 (3) Information and Ideas in Design Disciplines**

Introduces fundamental principles and practices from user-centered design disciplines and examines how those principles and practices intersect with contemporary issues in information science. Theory, research and exemplary practices from interaction, graphic, product, communication and experience design are introduced through readings, problems and case histories. Projects provide direct experience with common design tools and exposure to leading practitioners.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 6500 (1) Information Science Seminar**

Enculturates graduate students in the discipline of Information Science through weekly seminar series that hosts guest speakers, internal faculty and graduate speakers and other community building and professional development activities.

**Repeatable:** Repeatable for up to 8.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**INFO 6871 (3) Special Topics**

Topics will vary by semester.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**INFO 6940 (1-6) Supervised Master's Research Project**

Students enrolling in this course will conduct supervised research in Information Science under the supervision of one or more faculty advisors, to include preparation of academic literature reviews, laboratory or field experiments, surveys or interviews with technology stakeholders, interface or system design and development, system evaluation, or other examples of rigorous scholarship in the discipline of Information Science. Some research projects may be carried out in collaboration with other graduate students and faculty members. Although contribution to publishable scholarship (e.g., posters, demonstrations, conference papers, or journal articles) is one possible outcome of this educational experience, the student and his/her advisor(s) may agree to determine alternate mechanisms for assessing mastery of the academic research process, depending on the scope of work carried out as part of this experience, the publishability of the research, and the specific needs and career goals of the student.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**INFO 6950 (1-6) Master's Thesis**

Designing, researching and writing a master's thesis under the supervision of the student's advisors.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**INFO 7000 (3) Introduction to Doctoral Studies in Information Science**

Introduces students to practices associated with successful advancement in a doctoral program, rigorous scholarship in information science and more expert and early participation in their scholarly community of practice.

**Requisites:** Restricted to Information Science (INFO) Ph.D. graduate students only.

**Grading Basis:** Letter Grade

**INFO 7841 (1-3) Independent Study**

Independent Study

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to PhD students only.

**INFO 7871 (3) Special Topics**

Topics will vary by semester.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to PhD students only.

**INFO 8991 (1-10) Doctoral Dissertation**

**Repeatable:** Repeatable for up to 40.00 total credit hours.

**Requisites:** Restricted to PhD students only.

## Information Science - Master of Science (MS)

The Master of Science degree in Information Science is are intended for BS students who desire additional study and experience conducting supervised research to make their résumés even more attractive to industry upon graduation, as well as students considering a PhD in Information Science but lacking either master's-level coursework in the field or demonstrated research experience at the graduate level.

There are two options under this degree:

- Thesis plan: 6 thesis hour credits, typically taken over two semesters (3 credit hours each). A thesis defense with 3 committee members and submission of the thesis to the Graduate School are required.
- Non-thesis plan: 6 credits taken as a graduate-level independent study over two semesters (3 credit hours each) with an INFO faculty member. Students will complete one or more in-depth research projects as part of this plan; however, a formal thesis document and oral presentation/defense are not required.

If an MS elects to continue as a PhD student Information Science—and is admitted, via an explicit and separate application to the program—then up to seven of the courses taken as part of this MS (a maximum of 21 credit hours) could be “rolled-up” to meet PhD curriculum requirements, pending approval of the student’s PhD preliminary exam committee and the graduate director.

## Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Information Science - Bachelor of Science (BS) (p. 986)

## Requirements

### Application Guidelines

Applicants must hold at least a bachelor's degree or its equivalent. They must also provide the following documents:

- A CV or resume
- An unofficial transcript from each college or university attended
- Scores from the general GRE are optional; international students must also have a TOEFL score of at least 600 (IBT 100)
- Three letters of recommendation from people qualified to judge the student's potential for success in graduate school (Note: The most

compelling recommendation letters will provide specific observations about the candidate's promise in analytical thinking, oral and written scientific communication, and research and teaching, as well as demonstration of teamwork and collegiality)

- A statement of purpose (two pages maximum) that describes a question, problem or topic in information science the student has a passion to address; explains how the student's previous academic training, professional experience and/or personal passions led them to this question, problem or topic and drew them to this degree program; and identifies the faculty members with whom the student is interested in working and why
- Optional: A writing sample in addition to the statement of purpose

We encourage applications from individuals representing the broad range of disciplines. We welcome students that bring diverse skills and perspectives on the range of issues related to understanding and shaping the future of information science. All students admitted to the program will be expected to develop a breadth of competencies that are essential to being a researcher in this diverse, interdisciplinary field. One's ability and willingness to expand skill sets should be demonstrated in the statement of purpose.

Students are required to upload an unofficial copy of their transcript(s) in the online application. We require one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed. Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Only after a student is recommended for admission will they need to provide official transcripts. Assistance with graduate programs is available by phone (303-492-7977) or email (cmcigrad@colorado.edu).

## Required Courses and Credits

Refer to Plan of Study tab for sample plan of study by semester.

Code	Title	Credit Hours
<b>Course Category A: Depth/Specialization</b>		
<i>Methods Course</i>		3
Choose one:		
INFO 5507	Data and the Humanities	
INFO 5602	Information Visualization

<b>Credit Hours</b>		<b>10</b>
<b>Total Credit Hours</b>		<b>30</b>

## Information Science - Doctor of Philosophy (PhD)

Information science considers the relationships between people, places and technology—as well as the information or data those interactions yield. It unites a number of interdisciplinary approaches for understanding and shaping a future characterized by pervasively available digital technology. Drawing on knowledge from social science, computer science, data science and the humanities, information scientists support the study and innovation of "socio-technical systems."

Information science takes as a core idea that data are a common denominator for both social and technical systems. By focusing on the transformation of data across systems of people, places, and technology in ways that then make data truly useful and meaningful, students will be in the best possible position to invent what society can do with technology, and what technology can do for society.

The PhD program offers an education that combines training in the liberal arts, empirical investigation and computing knowledge, and incorporates the collaborative "lab model" research that characterizes the natural and engineering sciences.

## Requirements

### Application Guidelines

PhD applicants must:

- Hold at least a bachelor's degree or its equivalent.
- Provide the following documents:
  - A CV or resume
  - An unofficial transcript from each college or university attended
  - Scores from the general GRE are optional; international students must also have a TOEFL score of at least 600 (IBT 100)
  - Three letters of recommendation from people qualified to judge the student's potential for success in graduate school (Note: The most compelling recommendation letters will provide specific observations about the candidate's promise in analytical thinking, oral and written scientific communication, and research and teaching, as well as demonstration of teamwork and collegiality)

- A statement of purpose (two pages maximum) that describes a question, problem or topic in information science the student has a passion to address; explains how the student's previous academic training, professional experience and/or personal passions led them to this question, problem or topic and drew them to this degree program; and identifies the faculty members with whom the student is interested in working and why
- Optional: A writing sample in addition to the statement of purpose

We encourage applications from individuals representing the broad range of disciplines. We welcome students that bring diverse skills and perspectives on the range of issues related to understanding and shaping the future of information science. All students admitted to the program will be expected to develop a breadth of competencies that are essential to being a researcher in this diverse, interdisciplinary field. One's ability and willingness to expand skill sets should be demonstrated in the statement of purpose.

Students are required to upload an unofficial copy of their transcript(s) in the online application. We require one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed. Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

Only after a student is recommended for admission will they need to provide official transcripts. Assistance with graduate programs is available by phone (303-492-7977) or email (cmcigrad@colorado.edu).

## Required Courses and Credits

Code	Title	Credit Hours
<b>Required Courses</b>		
INFO 7000	Introduction to Doctoral Studies in Information Science	3
INFO 6101	Theories and Concepts in Information Science	3
INFO 6201	Interdisciplinary Ways of Knowing	3
INFO 6500	Information Science Seminar (six 1-credit sessions)	6
Twenty-one credit hours of graduate-level elective coursework must be taken. Elective specialization courses can be within or outside of INFO, under the guidance of the student's advisor and committee. Students will also take an additional 30 dissertation hours, typically after finishing their initial coursework.		21
<b>Total Credit Hours</b>		<b>36</b>

## PhD Milestones

In addition to coursework, program requirements include the successful completion of the following PhD milestones: preliminary exam, comprehensive exam/dissertation proposal and dissertation.

## Intermedia Art, Writing and Performance

The intermedia art, writing and performance (IAWP) program is an interdisciplinary digital arts and humanities research unit with a practice-based PhD. Faculty investigate past and present forms of digital art, writing and performance, offering graduate students an environment in which to practice and research emerging forms of creativity.

**Course code for this program is IAWP.**

## Doctoral Degree

- Intermedia Art, Writing and Performance - Doctor of Philosophy (PhD) (p. 1710)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; PhD, University of California, San Diego

## Courses

### IAWP 6000 (3) Introduction to Practice-Based Research

Introduces students to practice-based research methods in intermedia art, writing and performance.

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

### IAWP 6100 (3) Theory and Practice of Doing

Introduces students to the theory of doing and making. Guiding questions include: what does it mean to place "doing" at the center of one's research agenda? What does it mean to do hands-on work in an art/design studio, a digital humanities lab, a media lab, a media archaeology lab, a makerspace or a hackerspace?

**Grading Basis:** Letter Grade

**IAWP 6200 (3) Intermedia Collaboratory**

Collaborative studio course in which students focus on emerging practices in intermediate art, writing and performance while collaboratively building art, writing and/or performance projects that are presented to the community as public events and programs including exhibitions, publications and performances.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

**IAWP 6700 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

**IAWP 6800 (3) Intermedia Seminar**

Focuses on intermedia arts, writing and performance as they relate to digital media, communication and information.

**Requisites:** Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

**Grading Basis:** Letter Grade

**IAWP 6871 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**IAWP 7841 (1-3) Independent Study**

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**IAWP 7871 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**IAWP 8991 (1-10) Doctoral Dissertation**

**Repeatable:** Repeatable for up to 40.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

## Intermedia Art, Writing and Performance - Doctor of Philosophy (PhD)

The intermedia art, writing and performance (IAWP) program is an interdisciplinary digital arts and humanities research unit with a practice-based PhD.

Traditional scholarly and creative work outputs, such as the single-authored print book or conventional gallery exhibitions, have already been challenged by the emergence of Internet art sites, electronic literature, live audio/visual performance, multi-platform storytelling or transmedia narratives, software art, artificial intelligence, 3D animation, interactive installations for public spaces, virtual reality, video games, networked media activism and innovative art applications for mobile devices and tablets.

IAWP's internationally renowned and affiliated faculty collaborate with graduate students to probe the significance of a digitally expanded, process-based research environment located in a cluster of interdisciplinary research labs. The program provides a flexible pedagogical structure that will lead to the creation of new and hybridized

forms of art, writing, performance, scholarship, theory, design, curation, exhibition and publication appropriate for our current cultural moment.

The program concentrates its curriculum on digital forms of creativity and cultivates cutting-edge investigations into the practice, theory, history and philosophy of intermedia art, and scholarship.

## Requirements

### Application Guidelines

Applicants to the PhD program in intermedia art, writing and performance (IAWP) are expected to hold a master's degree (MFA or MA preferred) or its equivalent from an accredited college or university, and must provide transcripts from every institution attended. In exceptional cases, applicants without a master's degree may be considered for admission.

The program encourages applications from interdisciplinary digital artists and/or humanists who have already started developing experimental modes of practice-based research in contemporary forms of artistic expression.

Domestic applications must be received by the program no later than Jan. 15 prior to the fall semester for which entrance is sought. International applications should be submitted by Dec. 1. Late applications may be considered under special circumstances.

Successful applicants typically meet or exceed the following criteria:

- Provide transcripts from all institutions the applicant has attended as an undergraduate and graduate.
- Have an undergraduate cumulative GPA of at least 3.2 and a cumulative GPA of at least 3.5 in previous graduate work.
- Provide three letters of recommendation.
- Provide a 1000-word artist statement and proposal for a practice-based research project.
- Provide a resume or CV that includes academic and employment experience.
- Provide a portfolio of intermedia artwork, such as Internet art sites, electronic literature, video and/or film work, sound works, digital humanities projects, creative writing, mobile and web applications, etc. Format preference is web-based and could include links to Vimeo, Soundcloud, online publication and/or exhibition sites, PDFs, personal websites, etc. DVDs or flash drives with QuickTime files, images, texts, etc., are also accepted.

Meeting these criteria does not guarantee acceptance into the program. The program accepts relatively few new doctoral students each fall; qualified applicants may exceed available openings.

For review and decision purposes, students are required to upload an unofficial copy of their transcript(s) in the online application. The program requires one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed.

Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.

## Program Overview

Doctoral students in the IAWP PhD program take 30 credit hours of required coursework in the first two years of the program, followed by 30 dissertation credit hours, for a total of 60 hours.

The required coursework will include an interdisciplinary set of IAWP classes that introduces students to collaborative, practice-based research processes in the digital arts and humanities. The coursework includes Introduction to Practice-Based Research (IAWP 6000), Intermedia Collaboratory (IAWP 6200), Theory and Practice of Doing (IAWP 6100) and the Intermedia Seminar (IAWP 6800). Students are also encouraged to take approved courses offered by departments inside and outside the College of Media, Communication and Information.

At the end of their second year, students will take their general examination. Once they have passed the general examination, their research will focus on the creation of an original and substantial project centered on practice-based research. The final outcome of their research will result in a creative work accompanied by a written dissertation.

## Time Limit

Students are expected to complete the program and their practice-based research project in four years.

## Journalism

The Department of Journalism is founded on the principle that a well-informed and engaged public is essential to democracy—perhaps more so now, at a time of dizzying change, than it has ever been—and that, in the face of this change, journalism retains a unique role in contributing to civic life and to the quality of public discourse.

We put this principle to work by helping students become constructive participants in an ever-evolving global media landscape, where distinctions between producers and consumers of content have blurred. More specifically, we prepare them, at both the undergraduate and graduate levels, for careers in journalism and other fields of public communication. We train students to gather information from a diversity of sources, to analyze it critically, and to report what is significant through stories and other media forms across multiple media platforms. We encourage ethical awareness so that students will think independently, being prepared to reflect on and to help shape media practices and norms rather than take them at face value.

We believe in the integration of classroom instruction with practical experience. Many of our students work for, and manage, campus online news and entertainment sites, television programs and a radio station. They intern at broadcast stations, newspapers, magazines, websites and social media companies. Lastly, as a faculty, and with the help of colleagues elsewhere in our College who are working on new and innovative forms of human communication, we are committed to improving journalism through pioneering research and creative work.

Course code for this program is JRNL.

## Master's Degrees

- Journalism - Master of Arts (MA) (p. 1716)
- Journalism Entrepreneurship - Master of Arts (MA) (p. 1717)

## Doctoral Degree

- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1718)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### JRNL 5001 (3) Media Technology Boot Camp

Offers a foundation in the technologies of journalistic storytelling across a variety of established and emerging media platforms, such as print, television, radio, online publications, blogs, social media and emerging forms of communication. Students will emerge from the course with basic competence in the technical tools they will need as journalists.

**Requisites:** Restricted to graduate students only.

### JRNL 5011 (3) Newsgathering and Multimedia Storytelling

Develops skills in research and reporting on public issues and news events, and in the construction of narrative in the journalistic and documentary traditions, using a variety of media platforms.

**Requisites:** Restricted to graduate students only.

### JRNL 5102 (3) Photojournalism Portfolio

Advanced course intended to give students a forum in which technical skills will be brought to professional standards. Build a polished portfolio of work to present to editors and buyers.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4102

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

### JRNL 5201 (3) Principles of American Journalism

Acquaints students with concepts and functions of journalism in America. It will explore the underlying principles of journalism, relationships among journalism and other institutions, and current issues and problems facing journalists. Students will develop familiarity with how journalism works, as well as some perspective on how well (or not) journalism performs its function in American society.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### JRNL 5211 (3) Funding Journalism in the 21st Century

Explores new business models and strategies that could sustain the news industry as it makes the transition to primarily digital platforms. The course examines both for-profit and nonprofit models in the United States, while also investigating projects around the world. The class answers the question: If journalism is funded this way, how can I use this in my own career?

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### JRNL 5221 (3) Entrepreneurial Journalism

Study the practices of entrepreneurial journalistic ventures, both in start-ups to "intrapreneurial" undertakings at legacy media companies. Throughout the course, students will learn skills to enhance their own entrepreneurial journalism, from understanding freelance markets to seeking commercial and nonprofit funding for media ventures.

**Requisites:** Requires prerequisite course of JRNL 5211 (minimum grade D-).

**Grading Basis:** Letter Grade

### JRNL 5231 (3) Video Newsgathering

Explores the principles and techniques involved in the preparation of mobile- and social-based video storytelling. Students will learn the basics of video journalism: gathering sound and picture simultaneously, the fundamentals of exposure and composition, the grammar of video, writing to picture, selecting sound bites, and the basic concepts of editing.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### JRNL 5241 (3) Coding for Journalists

Prepare non-coders to work successfully with developers-for students to learn what they need to know to collaborate with technologists. Students will also learn the basics of front-end web development languages (HTML, CSS, Javascript), which will help them develop their own portfolios, and essentially become more marketable and versatile.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### JRNL 5311 (3) Literary Journalism

Studies the contributions of American literary journalists from Sara Davidson, Joan Didion, Normal Mailer, Hunter S. Thompson and Tom Wolfe; to established writers of nonfiction, including Annie Dillard, Jon Krakauer, Jane Kramer, Adrian Nichole LeBlanc and Terry Tempest Williams; to the newest wave of long-form journalists. Explores the boundaries between fiction and nonfiction and the literary techniques that distinguish creative nonfiction and literary journalism from other reportorial and storytelling forms. Formerly JRNL 6321.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4311

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

### JRNL 5344 (3) Video Documentary Production

Designed to give students the experience of researching, writing, shooting and editing their own documentaries.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4344

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Broadcast Journalism

### JRNL 5402 (3) Journalism and Social Identity

Provides a discussion-based inquiry into the role of journalism and journalists in the representation of intersectional identities, focusing on race, gender, sexual expression and socioeconomic class in the United States. The study and practice of journalism in this course will address issues of trust, power, privilege and ethics inherent in reporting across difference.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4402

**Requisites:** Restricted to graduate students only.

### JRNL 5411 (3) Global Journalism and International News

This graduate course provides students with an overview of the field of international and global journalism with particular foci on comparative media research and international affairs reporting. The course seeks to expose students to theoretical foundations and key concepts in the news media systems and journalistic practices around the world. It also addresses the political, social, and economic consequences of global journalism and the challenges related to it.

**JRNL 5502 (3) Newsgathering 2**

Involves writing news and features about actual events for publication under deadline pressure. Lab to be arranged.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4502

**Requisites:** Requires prerequisite courses of JOUR 5511 and JRNL/JOUR 5552 (all minimum grade C-). Restricted to College of Media, Communication, and Information (CMCI) graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5512 (3) In-Depth Reporting**

Shows how to dig beneath the surface of issues and events. Focuses on research, interviewing, and writing.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5514 (3) Newsgathering for Television**

Teaches advanced principles and techniques involved in the preparation of news for broadcasting.

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 5521 (3) Data Journalism**

Instructs students in data-driven investigative reporting. Includes hands-on, in-depth instruction in gathering data from census reports, commercial databases, information networks, and other sources, and utilizing statistical analysis software and spreadsheets to analyze the information in ways that can help deepen and strengthen journalistic stories on a wide variety of subjects.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 5552 (3) Multimedia Editing**

Discusses principles and practice in copy editing and writing headlines for local and wire stories. Practice in page makeup, picture editing, and electronic editing.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5562 (3) Digital Journalism**

Builds upon digital production skills through the creation of multimedia project. Applies media theory to evaluate digital media content and explore how digital forms influence the news industry, politics, culture and society.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4562

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5572 (3) News Corps**

Provides students the opportunity to immerse themselves in an explanatory/investigative news project that gives students a chance to use in-depth research to produce content for Colorado news outlets and practice the skills they've learned in previous reporting classes. Students spend several weeks studying the subject in question before reporting and producing their stories.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 5573 (3) News Corps Investigative Reporting and Leadership**

Take lessons learned from the CU News Corps capstone to the next level with this course designed to give elite students the opportunity to broaden and deepen their investigative reporting by either expanding on their capstone project's subject matter, or beat, or by taking a deep dive into a different field of research. Further develop brainstorming and editing skills.

**Requisites:** Requires prerequisite course of JRNL 4572 (minimum grade B).

**JRNL 5602 (3) Opinion Writing**

Concentrates on several of the subjective areas of journalism.

Emphasizes editorial and column writing, editorial pages and blogging.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4602

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5624 (4) NewsTeam**

Students participate in Newsteam Boulder a program broadcast live over the Boulder cable television system.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4624

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 5634 (1-3) Broadcast Projects**

Covers interpretation, preparation, and/or reporting in programs for broadcast media. Prepares radio or television documentaries and informational/entertainment programs. Instructor consent required.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4634

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 5651 (3) Journalism Law & Ethics**

Explores the legal and ethical frameworks of journalistic practice and media production. Covers historical as well as current frameworks used in examining the legal and ethical issues that arise in newsgathering and publication. Examines the relationships between ethics and the law in various media context.

**Requisites:** Restricted to graduate students only.

**JRNL 5684 (3) The Art of Visual Storytelling**

Teaches students how to raise the production value of their work based on standards used by professionals. Students learn how lenses, lights and contrast can affect an image; how to assemble their shots with pacing and rhythm; how to apply color grading techniques to give video a cinematic look; and how to create motion graphics for titles and lower thirds.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4684

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 and JRNL 5514 (all minimum grade C-). Restricted to graduate students only.

**JRNL 5702 (3) Arts/Cultural Reporting and Criticism**

Emphasizes composition of criticism for the performing arts and other areas of entertainment.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4702

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5704 (3) Sports Journalism**

Prepares students for the world of sport journalism. Combines the skills of a hard news reporter, the perspective of an entertainment reporter and the persuasive abilities of an editorial writer. The class focuses on how to cover sports from all angles.

**Recommended:** recommended for students in the Journalism Entrepreneurship (JRNL-MAJE) program.

**JRNL 5802 (3) Feature Writing**

Provides practice in writing freelance articles. Considers types, sources, methods, titles, illustrations, and freelance markets. Students submit work for publication.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4802

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5804 (3) Sports, Media and Society**

Examines how sports and journalism intersect and impact society. Class focuses on how sports, specifically areas of sports such as law and politics, race, gender, sexuality and disability, impact culture and society as a whole.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 5810 (3) Community-Based Storytelling**

Offers students the opportunity to produce a story or series for publication in local media. A collaboration between the newsroom and the Center for Environmental Journalism, the course operates as a pop-up newsroom where students collaborate on a single project, working together to dive deeply into an underreported topic of importance to the community. Formerly offered as a special topics course.

**Requisites:** Requires prerequisite course of JRNL 5011 (minimum grade D-).

**JRNL 5812 (3) Science Writing**

Helps students acquire the basic skills and knowledge required of science journalists. Also examines issues of scientific importance such as climate change, the nature of scientific knowledge, and how science is covered in various media.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5822 (3) Reporting on the Environment**

This class examines media coverage of environmental topics, and explores the ways that environmental crises intersect with other stories in the news. Students read contemporary environmental journalism, discuss the complex issues involved in reporting on the environment, and produce their own stories on topics including climate change, energy, water, biodiversity, and food.

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4822

**Requisites:** Requires prerequisite courses of JRNL 5001 and JRNL 5011 (all minimum grade C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5841 (1-3) Graduate Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 5851 (1-6) Graduate Professional Project**

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 5871 (1-3) Special Topics**

Special Topics

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 5872 (1-3) Special Topics: Print**

**Equivalent - Duplicate Degree Credit Not Granted:** JRNL 4872

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Print Online Journalism

**JRNL 5874 (1-3) Special Topics: Electronic Media**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Journalism (JRNL) graduate students only.

**Additional Information:** Departmental Category: Broadcast Journalism

**JRNL 5931 (1-3) Internship**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Requires pre-requisite of JRNL 5001 and JRNL 5011 and JRNL 5521 (all minimum grade of C-). Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 6551 (3) News Media Representation and Identity**

Examines the role of race, gender, immigration status, religion, and other identities in journalistic representations. Students will apply the work of journalism scholars to historic and current case studies in print, broadcast, and online media. They will apply quantitative and qualitative research methods to more deeply investigate the role of journalism in constructing social identity. Formerly JRNL 5551.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 6651 (3) Media Law**

Graduate seminar in communications law. Studies changing law and applied legal research techniques.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**JRNL 6862 (3) Visual Communication and Mass Media**

Visual communication involves understanding both perception of messages and construction of them. Students analyze their visual thinking abilities and develop habits of visual analysis and criticism, as well as visual communication skills.

**Requisites:** Restricted to graduate students only.

**JRNL 6871 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**JRNL 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**JRNL 7001 (3) ProSeminar in Mass Communication Theory I**

Discusses prominent theoretical and methodological points of view in journalism studies and strategic communication that range from social science to critical studies to the humanities. The premise is that methods are driven by research questions, so there is no best way to conduct research. You should leave this course with an understanding of how to address various mass communication phenomena.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7001

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7002 (3) Research Design**

Adopts a holistic and creative approach to bridging theory with method for the purpose of research design. Students learn how to bridge theory and method, exploring research designs that effectively address research questions and hypotheses through elaboration of theoretical and operational linkages.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7002

**Requisites:** Requires prerequisite course of JRNL 7003 or APRD 7003 (minimum grade C-). Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7003 (3) ProSeminar in Mass Communication Theory II**

Continues introducing and discussing theoretical and methodological points of view in areas of communication, journalism and persuasion. Discusses the most important qualitative and quantitative methodological points of view, and from theoretical viewpoints that range from social science to critical studies. The idea is to develop an appreciation for theories and methodologies that can be employed depending upon the research question.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7003

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7004 (1) Doctoral Professionalization Seminar**

Introduces you to the university and gives you a chance to think out loud about what your academic future might look like. The course is designed to be responsive to your needs regarding your career, getting a job, getting tenure and teaching. In short, the course prepares you for a career in academia.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7004

**Repeatable:** Repeatable for up to 4.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7010 (3) Qualitative Interviewing as a Research Method**

Develops the necessary skills to conceptualize, plan, and execute interview-based research projects. Covers topics such as brainstorming and implementing a research idea, formulating research questions, designing a thorough research plan, navigating the IRB, recruiting participants, creating the interview guide, conducting interviews, and analyzing and writing up data. Course also examines reflexivity and ethical issues that are inherent in interview studies, especially ones involving certain populations.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7010

**Requisites:** Requires prerequisite course of JRNL 7051 or APRD 7051 (all minimum grade D-). Restricted to graduate students only.

**JRNL 7011 (3) Seminar in Strategic Public Relations**

Analyzes the various dimensions of public relations based on scholarship. The seminar seeks to expose students to key public relations specialties such as issues management, risk and crisis communication, corporate social responsibility, communication campaigns, public diplomacy. It also aims to train students to recognize public relations as a strategic practice that can contribute significantly to organizational effectiveness and social good.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7011

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7012 (3) Ethnography and Media**

Provides a ¿how to¿ concerning the intersection of ethnography and the media. During which, the course examines the epistemology of fieldwork. We will critically examine aspects and approaches to doing and writing ethnography, including with and without social science theory. We will discuss the challenges of entering, being in, and leaving the field. And we will explore data collection techniques.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7012

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7013 (3) Mixed Research Methods in Mass Communication**

Examines the practice of mixed-methods research in the social sciences with an emphasis on the pragmatic considerations necessary for such projects. The class will discuss the development and execution, the analyses of data obtained, and the practical tools required for such studies. Throughout the course, students will examine and discuss specific applications of mixed methods research.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7013

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7014 (3) Experimental Design in Mass Communication**

Introduces all facets of experimental design for studies of forms of communication. This course study experiments, both for your own research and to help you evaluate the work of others, and provide an overview of research in the field and the various ways in which media can be utilized in experimental research. This is a hands-on, nuts-and-bolts methods course. You will not only learn about the various theories and methodologies, but also implement your own.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7014

**Requisites:** Requires prerequisite course of JRNL 7061 or APRD 7061 (minimum grade D-). Restricted to graduate students only.

**JRNL 7020 (3) Controls of Media and Information**

Investigates the role media play in the public sphere and democratic practices. Does media facilitate support or opposition to political and economic policies and cultural frames that become part of publics? Which institutions best inform publics and why? This course traces the development of U.S. and selected international media institutions. We analyze and debate the relationship of differing media content to political power, freedom of critical inquiry, and the facilitation or inhibition of democratic practices.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7020

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7021 (3) Environmental Journalism and Science Communication**

Focuses on mass communication of issues related to science and follows two lines of inquiry. The seminar takes a cultural perspective, and explores the concept of scientific uncertainty in media. It will use these as a springboard for examining how we use media to conceptualize science, environment, health, etc., and how that impacts the way we live on this planet.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7021

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7030 (3) Media Sociology**

Examines a range of theories for how media messages and media institutions turn out the way they do. `Media sociology; refers to theorizing about the media as the `dependent variable; even though many of the `independent variables; explored are not narrowly sociological. It connects media actors, organizations, and institutions to sociological concepts such as socialization, interaction, roles, and structures.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7030

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7031 (3) Moral Psychology and Media Ethics**

Explores the psychological structures and processes that come into play as individuals interpret moral problems, and formulate, select and execute a moral action in response. The seminar will explore the work of Jean Piaget, Lawrence Kohlberg, and James Rest, among others, and apply moral psychology theories and methods to contemporary issues and cases in media professions.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7031

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7034 (3) Media and Health Communication**

Advanced seminar that examines and critiques the literature on health communication in two specific areas: news about health and its impact on individuals, and health promotion campaigns.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7034

**JRNL 7051 (3) Qualitative Methods in Mass Communication**

Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data. Previously offered as a special topics course.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7051

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

**JRNL 7061 (3) Quantitative Research Methods**

Introduces graduate students to concepts and applications in quantitative research methods. The course prepares students for dissertation writing through hands-on experience in developing research designs and conducting independent quantitative research.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7061

**Grading Basis:** Letter Grade

**JRNL 7062 (3) Advanced Statistical Analysis for Mass Communication**

Provides instruction on the following topics: ordinary least squares regression, statistical mediation and moderation, path analysis, count and categorical data modeling, and factor analysis.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7062

**Grading Basis:** Letter Grade

**JRNL 7063 (3) Text Analytics for Computational Mass Communication Research**

This course tackles advanced advertising and marketing analytics through three advanced methods aimed at solving these problems: text classification, text topic modeling, and semantic network analysis. Each key area will involve a deep dive into the leading computer science methods aimed at solving these methods using Python. Students will walkthrough conceptual overviews of the methods, and dive into real-world datasets through instructor-led tutorials. Students will also conduct a major project for each of the 3 key methods.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7063

**Grading Basis:** Letter Grade

**JRNL 7871 (3) Special Topics**

Special Topics

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**JRNL 7880 (3) Persuasion Theory**

This seminar acts as an overview of psychological knowledge as it pertains to capturing consumer insight, and includes a consideration of how the brain works, what factors influence consumer choice, and a critical evaluation of psychological assessment tools.

**Equivalent - Duplicate Degree Credit Not Granted:** APRD 7880

**JRNL 8991 (1-10) Doctoral Dissertation**

Working on dissertation.

**Repeatable:** Repeatable for up to 30.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**MDRP 7871 (3) Special Topics**

Special topics.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

## Journalism - Master of Arts (MA)

The master's degree in journalism prepares students for professional success in news outlets, digital and social media platforms, and corporate communications.

The program offers two options, both of which are designed for students with limited academic or professional experience in journalism.

The professional practice option is for students who wish to focus on quickly obtaining advanced journalistic skills. It can be completed with as few as 30 credits and in as little as two semesters plus a summer.

The area of expertise option is for students wishing not only to acquire advanced journalistic skills, but also to complement them with an area of expertise, such as environmental science and policy. This option can be completed with a minimum of 36 credits and in four semesters.

Regardless of option, the degree's focus is on multimedia training and experience. Students develop skills in information-gathering, storytelling and analysis across a variety of platforms and professional contexts, including video, online interactivity, social media, photography and, of

course, the printed word. They produce in-depth reporting projects in collaboration with professional media outlets in Colorado, and they complete internships at award-winning radio and television stations, newspapers, magazines, websites and other news organizations nationwide.

## Requirements

### Application Guidelines

Applicants to the MA in journalism must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university
- Have an undergraduate grade point average of at least 2.75
- Have a GRE verbal score of at least 153 (62%). International applicants must also have a TOEFL score of at least 600 (IBT 100)
- Provide three letters of recommendation
- Provide a 500-word statement of purpose
- Provide a resume

### Program Requirements

#### Professional Practice Option

This option can be completed with a minimum of 30 credits and in as little as two semesters plus a summer.

Code	Title	Credit Hours
<b>Required Courses</b>		
JRNL 5001	Media Technology Boot Camp	3
JRNL 5011	Newsgathering and Multimedia Storytelling <sup>1</sup>	3
JRNL 5521	Data Journalism	3
JRNL 5651	Journalism Law & Ethics	3

## Journalism Entrepreneurship - Master of Arts (MA)

The online master's degree in journalism entrepreneurship prepares students for professional careers at news outlets, and in digital and social media platforms, corporate communications and the freelance market. It particularly focuses on entrepreneurship and preparing students for today's media environment, one in which skills in both journalism and business are essential.

This degree is designed for students with a limited range of experience in journalism. Courses are offered in differing online environments. The entire program can be completed in one calendar year with students starting classes in the Augmester, then continuing in the fall and spring semesters, and finishing their professional project over the summer. The Master of Arts in Journalism Entrepreneurship also offers flexibility in that its online courses can be taken at a student's own pace over a longer time period.

Regardless of schedule, the degree's focus is on multimedia journalism and business training. Students develop skills in information gathering, storytelling and analysis across a variety of platforms and professional contexts, including video, online interactivity, social media, photography—and, of course, the printed word. They will also take conceptual courses concerning the journalism industry and the business of journalism.

## Requirements

### Application Guidelines

Applicants to the MA in journalism must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university
- Have an undergraduate grade point average of at least 2.75
- International applicants must also have a TOEFL score of at least 600 (IBT 100)
- Provide three letters of recommendation
- Provide a 500-word statement of purpose
- Provide a resume

### Program Requirements

The program required is 30 credits. Students come to Boulder in early August for a one-week media boot camp in residency, which will include another two weeks of class work completed remotely. This 3-credit course begins the program. Students will then take up to 12 credits in the fall and another 12 in the spring semesters. These courses are a mixture of traditional 15-week classes and five-week terms; each is 3 credits.

There are two tracks to choose from, Sports Journalism or Journalism Entrepreneurship. Out of the 30 credits required for the program, 6 of them are specific to the chosen track.

Code	Title	Credit Hours
<b>Core Courses</b>		
JRNL 5001	Media Technology Boot Camp	3
JRNL 5011	Newsgathering and Multimedia Storytelling	3
JRNL 5201	Principles of American Journalism	3
JRNL 5241	Coding for Journalists	3
JRNL 5512	In-Depth Reporting	3
JRNL 5521	Data Journalism	3
JRNL 5651	Journalism Law & Ethics	3
<b>Track Course Options</b>		<b>6</b>
Choose from the two track options below:		
<i>Journalism Entrepreneurship</i>		
JRNL 5211	Funding Journalism in the 21st Century	
JRNL 5221	Entrepreneurial Journalism	
<i>Sports Journalism</i>		
JRNL 5704	Sports Journalism	
JRNL 5804	Sports, Media and Society	
<b>Capstone Course</b>		
JRNL 5851	Graduate Professional Project	3
<b>Total Credit Hours</b>		<b>30</b>

## Media Research and Practice - Doctor of Philosophy (PhD)

The media research and practice (MDRP) PhD program is an umbrella that includes three distinct doctoral tracks in three separate departments in the College of Media, Communication and Information:

1. Strategic communication, offered by the Department of Advertising, Public Relations and Media Design.
2. Journalism studies, offered by the Department of Journalism.
3. Media studies, offered by the Department of Media Studies.

### Program Tracks

#### Strategic Communication Track

The strategic communication PhD track offered by the Department of Advertising, Public Relations and Media Design is one of three separate and distinct tracks of the Media Research and Practice doctoral program within the College of Media, Communication and Information.

Strategic communication is a distinct track that is designed to provide students with rigorous training in theory and research through coursework, independent studies and research assistantships. Students gain an understanding of scholarship through required coursework that explores theories and methods that shape strategic communication research and elective coursework that expands into areas of sociology, psychology, gender studies, politics, economics, business and ethics. The program emphasizes how theory informs practice, critically analyzing how advertising and public relations operate in ways that can—or could—constructively contribute to the successful, ethical and resilient functioning of society. Students taking this track focus their research and

teaching in the areas of advertising, public relations and various types of promotional communication such as health communication, political communication, social media and video gaming.

The strategic communication and journalism studies tracks for the PhD are administered together by the departments of Advertising, Public Relations and Design and Journalism. Students in both tracks are taught by and have access to the faculties of both departments. The curriculum includes an overview of mass/public communication literature with specific modules and courses dedicated to advertising, journalism and public relations. Classes also focus on areas that straddle each industry such as social media, political communication, ethics, media organizations, health communication and video games. We welcome and appreciate both qualitative and quantitative approaches to research. Graduates pursue teaching and research positions at universities as well as work in the private sector.

#### Journalism Studies Track

The journalism studies PhD track focuses on exploring the intersection of journalism, journalism practice and society. Students gain a solid foundation through coursework that explores the theories and methods that shape mass communication research. The multidisciplinary program examines not only traditional journalism, but also the ever-increasing boundaries of the industry, including user-generated content, citizen journalism, the audience's impact on news production, the new technologies shaping practice, social media's role in news, new quasi-journalistic outlets, etc.

Students research institutions, content, audiences and publics—and they can approach these subjects through a multitude of methodologies and theoretical lenses: sociological, psychological, historical, cultural, political, economic, legal and more. Students are encouraged to develop their own approach (both theoretical and methodological) to the study of mass communication and journalism, all while learning and collaborating with faculty who have a diverse range of specialties. An integral part of our doctoral students' education is their participation in the department's research and teaching missions through their assignments as research assistants, teaching assistants and graduate instructors.

The strategic communication and journalism studies tracks for the PhD are administered together by the departments of Advertising, Public Relations and Design, and Journalism. Students in both tracks are taught by and have access to the faculties of both departments. The curriculum includes an overview of mass/public communication literature with specific modules and courses dedicated to advertising, journalism and public relations. Classes also focus on areas that straddle each industry such as social media, political communication, ethics, media organizations, health communication and video games. We welcome and appreciate both qualitative and quantitative approaches to research. Graduates pursue teaching and research positions at universities as well as work in the private sector.

#### Media Studies Track

Drawing largely from contemporary cultural and critical theory, the media studies track focuses on interactions among the major components of modern communication—media institutions, their contents and messages, and their audiences—as a process by which cultural meaning is generated. It examines this process on an interdisciplinary basis through social, economic, political, historical, legal/policy/regulatory and international perspectives, with a strong emphasis on issues involving new communication technology and policy.

Students graduate from the program with broad knowledge of the intellectual history of media studies as an important interdisciplinary field of research—its origins; its perennial questions and controversies; its evolution in response to technological, political, economic and cultural change; the full range of methods it employs, both humanistic and social scientific—and a demonstrated capacity to design and execute original and socially significant research about media and their historical and contemporary power and importance. The program strives to produce graduates who demonstrate intellectual leadership, nationally and internationally, in the area(s) of research specialization they choose and/or pioneer, and an interest in and aptitude for generating public awareness and conversation about their scholarship. An important part of doctoral students' education is their participation in the department's research and teaching missions through their assignments as research assistants, teaching assistants and instructors.

## Requirements

### Application Guidelines

Applicants to the PhD program in media research and practice are expected to hold a master's degree or have completed equivalent graduate work. In exceptional cases, applicants without a master's degree may be considered for admission.

Completed domestic applications must be received by the program no later than Jan. 10 prior to the fall semester for which entrance is sought. International applications should be submitted by Dec. 1. Late applications may be considered under special circumstances.

Successful applicants typically meet or exceed the following criteria:

- Have an undergraduate cumulative GPA of at least 3.2 and a cumulative GPA of at least 3.5 in previous graduate work.
- Provide three letters of recommendation, with at least two being academic references.
- Provide a 700-word statement of purpose.
- Provide a resume or CV that includes academic and employment experience.
- Provide a writing sample that exhibits the ability to undertake the conceptual and empirical studies required of doctoral students (e.g., a chapter from a master's thesis or graduate-level term paper).
- International applicants must also have a TOEFL score of 625 (IBT 106).

Meeting these criteria does not guarantee acceptance into the program. The program accepts relatively few new doctoral students each fall; there may be more qualified applicants than there are available openings.

In the online application, select "Advertising, Public Relations and Design" as the department, select "Media Research & Practice" as the degree, and then select your chosen program track.

For review and decision purposes, students are required to upload an unofficial copy of their transcript(s) in the online application. The program requires one copy of the scanned transcript from each undergraduate and graduate institution attended. This includes community colleges, summer sessions and extension programs. While credits from one institution may appear on the transcript of a second institution, unofficial transcripts must be submitted from each institution, regardless of the length of attendance and whether courses were completed.

*Failure to list and submit transcripts from all institutions previously attended is considered a violation of academic ethics and may result in the cancellation of admission or dismissal from the university.*

## General Requirements

Students take a minimum of 72 hours to complete their degrees, although they may take additional coursework if there is a justified need. Students are expected to complete their coursework and defend their dissertations in 4–5 years.

It is expected that students will devote their full time to the doctoral program and assistantship duties during the fall and spring semesters while enrolled in the program, unless other arrangements have been made with the department.

## Program Tracks

### Journalism Studies and Strategic Communication Tracks

Students are expected to complete the required courses listed below, in addition to 30 credits of electives.

Students are expected to take courses at the 6000 level or above. There are some exceptions to this in which doctoral students may receive permission to take 5000-level courses.

Students may take a maximum of two independent study courses in their course of study, either inside APRD and JRNL or outside of those home departments. Generally, these will be taken no earlier than the third semester of the program.

Code	Title	Credit Hours
<b>Required Courses</b>		
JRNL/APRD 7001	ProSeminar in Mass Communication Theory I	3
JRNL/APRD 7003	ProSeminar in Mass Communication Theory II	3
JRNL/APRD 7004	Doctoral Professionalization Seminar (1 credit per semester)	4
JRNL/APRD 7061	Quantitative Research Methods (Quantitative Methods in Mass Communication)	3
JRNL/APRD 7051	Qualitative Methods in Mass Communication	3
JRNL/APRD 7002	Research Design	3
JRNL/APRD 8991	Doctoral Dissertation	30
<b>Electives</b>		
Three additional graduate research methods courses (taken inside or outside the departments).		9
A minimum of 18 hours of coursework selected on the basis of the student's area(s) of research interest (taken inside or outside the departments).		18
<b>Total Credit Hours</b>		<b>76</b>

### Media Studies Track

Students may take up to 15 credit hours of coursework outside the Department of Media Studies, through a required outside emphasis (9 hours), which complements the student's plan of study, and through advanced methods in media research and practice (6 hours), which may include relevant courses offered either inside or outside of the department.

In general, courses in the media studies track emphasize the following cross-cutting themes that are treated throughout the curriculum:

- sophistication in the treatment of theoretical issues
- rigor and high ethical standards in the collection, analysis and presentation of research
- thorough knowledge of the historical context of media institutions and practices
- sustained focus on issues of social and cultural diversity (race, ethnicity, gender, class, sexuality), and on issues arising due to the increase in transnational media and information flows and influences

Code	Title	Credit Hours
<b>Required Courses</b>		
MDST 7011	Proseminar in Media Communication Theory 1	3
MDST 7021	Proseminar in Media and Communication Theory 2	3
MDST 7061	Quantitative Research Methods in Media 1	3
MDST 7051	Qualitative Research Methods in Media	3
MDRP 8991	Dissertation	30
<b>Electives</b>		
Advanced research methods		3
One additional graduate research methods course or one media practice course		3
Inside emphasis (4-5 Media Studies courses)		12-15
Outside emphasis (3-4 courses in other units)		12-9
<b>Total Credit Hours</b>		<b>72</b>

<sup>1</sup> Or comparable approved course on data methodologies.

## Comprehensive Examinations

Each doctoral student will be required to pass comprehensive examinations, consisting of four questions, which are generally administered after the last semester in which the student takes coursework. The examinations are individually tailored for each student and comprise both written and oral examinations.

## Dissertation

A minimum of 30 hours of dissertation credit, JRNL 8991/MDST 8991, must be taken. Various restrictions apply to these hours, including:

- No more than 10 dissertation credit hours may be taken in any one semester
- No more than 10 dissertation credit hours may be taken prior to the semester in which comprehensive examinations are taken
- No more than 10 dissertation credit hours may be taken in the semester in which comprehensive examinations are taken
- After passing comprehensive examinations, student must enroll for at least 5 dissertation credit hours (full time) or 3 dissertation credit hours (part time) each semester until graduation

Typically students enroll for 10 dissertation hours in the semester in which they are taking comprehensive examinations and 10 dissertation hours each in the following fall and spring terms. Students must be aware

of Graduate School rules (<http://www.colorado.edu/GraduateSchool/policies/>) regarding registration for dissertation hours.

## Time Limit

Students are expected to complete the program and defend the dissertation in four years.

## Media Studies

Contemporary media practitioners, both professional and amateur, influence the values and behaviors of national and global populations, challenging and shaping the authority, legitimacy and control exercised by governments and other powerful social institutions. Because of this, media and cultural studies are central to research about the complex intersections of culture, politics and economics from the local to the global levels. Appropriately, the Department of Media Studies emphasizes the history, nature and impact of mediated sounds, images and texts from a wide range of inter- and cross-disciplinary perspectives.

The Department of Media Studies examines ways of thinking about and conducting research into the intersection of media, communication and cultural practices in both historical and contemporary perspectives. Encompassing humanistic, social scientific and artistic approaches to the study of media and culture, and interdisciplinary in its theoretical and methodological approaches, the degree spans traditional boundaries between theory and practice. It fosters media "literacy" in the broadest sense by providing students with critical skills to analyze contemporary media and culture, along with technical, aesthetic and intellectual principles that facilitate strong media practices.

**Course code for this program is MDRP and MDST.**

## Master's Degree

- Media and Public Engagement - Master of Arts (MA) (p. 1724)

## Doctoral Degree

- Media Research and Practice - Doctor of Philosophy (PhD) (p. 1718)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

## Courses

### MDST 5001 (3) Connected Media Practices

Provides a crucial frame through which students understand the evolution of film, television and gaming in the digital era. Explores an impending revolution in how screen media are created, circulated and consumed. Relates to a larger trend across the media industries to integrate digital technology and socially networked communication with traditional screen media practices.

**Requisites:** Restricted to graduate students only.

### MDST 5002 (3) Media Activism and Public Engagement

Explores politics of media activism. Relies on survey of existing theory and scholarship on media activism and close analyses of activist practices within both old and new media and on local, national and global scale. Special attention paid to questions of relativity and efficacy and value of media activism as both aesthetic and political activity.

**Requisites:** Requires a prerequisite course of MDST 5001 (minimum grade C-). Restricted to graduate students only.

### MDST 5003 (3) Digital Media Production and Design

Introduces techniques, technologies of online development and online media presentation. Contextualizes the technical and social implications of the Internet through historical and critical perspectives. Students engage in online media projects designed to emphasize the affordances, conventions and usability considerations of effective online communication.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 4003

**Requisites:** Restricted to graduate students only.

**Grading Basis:** Letter Grade

### MDST 5005 (1) MAPE Workshop

Connects classroom work to community practice. Students will discuss applied projects and collaborate on public initiatives.

**Repeatable:** Repeatable for up to 4.00 total credit hours.

### MDST 5071 (3) Screenwriting

Students will learn the fundamentals of screenwriting, but will also learn from peers. Students will workshop scenes, share, and discuss. Students will work scenes through description, dialogue, and action, combine those scenes into sequences, and those sequences into scripts. Students will learn how to create dramatic tension, how to write compelling dialogue, how to deal with character development.

### MDST 5121 (3) Deconstructing Disney: Mediated American Mythology

Explores various Disney cultural products  $\zeta$  some with which students will be very familiar, some students may have never seen  $\zeta$  in order to discuss the cultural messaging The Walt Disney Company has presented over its long and illustrious history. Students will conduct analysis research in popular culture studies.

**Requisites:** Restricted to graduate students only.

### MDST 5211 (3) Asian Media and Culture

Offers an understanding of the various people, cultures and nations of East Asia through their media systems. Provides a critical overview of the historical, cultural, social, political and economic dimensions of East Asian communication systems in today's digitally connected/disconnected world.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 4211

**Requisites:** Restricted to graduate students only.

### MDST 5220 (3) Viral Video & Media

Students will examine how viral videos are produced and shared on social media platforms by developing an understanding of the components that make a viral video as well as by engaging in a critical analysis of those viral videos. Students will engage in critical analysis, consider strategies for virality, and learn about production and publishing. Students will analyze their own and their peers' work in terms of genre, convention, format, structure, and audience.

**Requisites:** Restricted to graduate students only.

### MDST 5311 (3) Mass Communication Criticism

Introduces the critical perspectives most often employed in qualitative media analysis: semiology, structuralism, Marxism, psychoanalytical criticism, sociological criticism. Texts from contemporary print and broadcast media.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 4311

**MDST 5331 (3) Gender, Race, Class, and Sexuality in Popular Culture**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 5341 (3) Designing Alternative Media Platforms**

This course helps students construct alternative form of media to exhibit their research and build connections with relevant community leaders.

Through the practice and examination alternative exhibition traditions of such as Social Practice and Relational Aesthetics students connect with community members to design alternative platforms for media projects that respond to the needs of external communities.

**Requisites:** Restricted to graduate students only.

**MDST 5401 (3) Fan and Audience Studies**

Drawing upon a variety of theoretical perspectives and tools of measurement, students will explore the structures, forces and environments that produce culture. Students will also interpret popular culture as a site of cultural meaning, and to understand the historical approaches scholars have used to analyze meaning in media messages, fan practices, and institutional responses.

**Requisites:** Restricted to graduate students only.

**MDST 5402 (3) Transmedia Worldbuilding**

Guides students to develop entertainment concepts for transmedia delivery. Students will develop concepts and characters built around storytelling themes capable of producing serial and multimedia storylines. This course considers essential elements of storytelling; how to design and actively participate across media platforms; essential elements of meta-narratives; and how to create an immersive and interactive experience for audiences using digital communication tools.

**Requisites:** Restricted to graduate students only.

**MDST 5405 (3) Queer and Trans Identities in Popular Culture**

Give students the theory, media history, and cultural frameworks to advocate for better queer & trans presentation in popular media. Uses queer studies, critical theory, media surveys, and trans theory as a tool for discussing and addressing gaps in media representation. Explores the emergence, codification, and rejection of queer and trans identities and deconstructs the popular media that contributed to the formation of these identities.

**Equivalent - Duplicate Degree Credit Not Granted:** MDST 4405

**Requisites:** Restricted to graduate students only.

**MDST 5841 (1-3) Graduate Independent Study**

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**MDST 5851 (1-6) Graduate Professional Project**

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**MDST 5871 (1-3) Special Topics**

Special topics in Media Studies.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**MDST 5931 (1-3) Internship**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**MDST 6031 (3) Documentary and Social Change**

Explores how local, national and international filmmakers use documentaries to provide cultural observation, education, entertainment and memories with the hope of making sense of, and transforming, the realities of contemporary societies. The course emphasizes contemporary issues and practices in the production of documentaries, including the participatory means such as the crowd-sourcing of documentary footage, and the use of newer, non-theatrical means of distribution, including YouTube, Vimeo and other digital outlets.

**Requisites:** Restricted to graduate students only.

**MDST 6051 (3) Media Theories**

Studies theories and perspectives of mass and networked communication and explores the role of media in society.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6061 (3) Media Research**

Introduces concepts, theoretical approaches and research methods of media research. Students apply these frameworks in research on mediated communication. Covers qualitative and quantitative methods of gathering and analyzing data.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6071 (3) Critical Theories of Media and Culture**

Introduces students to critical theories and analysis of media and popular culture. Examines major theoretical traditions and/or theorists that significantly inform media studies (e.g., culturalism, structuralism, Marxism, critical theory, feminism, psychoanalysis, post-structuralism) and applies these to media analysis and criticism.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6201 (3) Global Media and Culture**

Explores the historical, cultural, social, political and economic dimensions of media systems in various parts of the world and their relationship with technological and cultural processes. Aims to provide a critical overview of the profound changes in media and culture in today's digitally connected/disconnected world. Formerly MDST 6201.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6211 (3) Communication and International Development**

Studies and analyzes communications technologies and techniques used in addressing social problems in developing countries.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6241 (3) Visual Epistemologies: Theory and Practice**

Examines visuals as a form of knowledge on its own terms with an emphasis on both theory and practice. It first considers how social, cultural and cognitive mechanisms shape visual ways of knowing, and it discusses methodological approaches for working with and in images. Then it traces the complicated status of visual knowledge over time and across institutional contexts; religion, art, science, the law, journalism and politics.

**MDST 6250 (3) Algorithms, Culture, and Power**

Explores how automated computational processes (algorithms) affect the production, distribution, exchange, and consumption of media and other cultural goods. Also examines the history and politics of algorithms with respect to their growing prevalence in daily life. Foregrounds themes of power, identity, bias, aesthetics, infrastructure, epistemology, and political economy. Employs theories and methods from media studies, science and technology studies, digital humanities, and/or cultural studies.

**Requisites:** Restricted to graduate students only.

**MDST 6301 (3) Communication, Media, and Concepts of the Public**

Introduces students to historical and contemporary uses of fundamental concepts in research and theory about media institutions, particularly public, community, mass, publicity, public space, public opinion, public interest, and the public sphere.

**Equivalent - Duplicate Degree Credit Not Granted:** CMCI 6301

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6311 (3) Power, Politics and Mediated Culture**

Examines various literatures that consider the role of power in shaping social orders and the social beings that constitute that order and the place of media in both processes.

**Requisites:** Restricted to graduate students only.

**MDST 6341 (3) Children, Youth and the Media**

Examines the concepts of children and childhood from the historical, social, cultural, economic and political perspectives, this course explores the interaction between mass media and the socialization and cultivation process of children and youth. Multiple theoretical traditions are used as a framework to study a variety of issues related to children and the media.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6350 (3) Media & Cultural Policy**

Survey the research literature and practical significance of cultural policy as it relates to culture as a basis of social definition, inclusion, exclusion and conflict. The study of cultural policy does not focus exclusively on the role of government, but rather on a broader range of institutions that play central roles in governing contemporary culture, including museums, libraries, and media industries.

**Requisites:** Restricted to graduate students only.

**MDST 6351 (3) Media, Culture & Food Politics**

Stresses intersections among media industries, food industries, and politics, with an emphasis on how public knowledge and activism about food relate to questions of a sustainable environment, human health and safety, and social justice for food producers and consumers. Examines a wide range of political discourses about food, the politics of food labeling, the globalization and hybridization of food, public policies governing food, food activism, the biopolitics of food, and food-related manifestations of cultural capital. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**MDST 6551 (3) Media and Communication Policy**

Surveys historical and contemporary developments in media and communications policy, emphasizing social and cultural dimensions.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6552 (3) Media and Public Scholarship**

Historicizes the role of the public intellectual through readings and discussions of biographies of selected scholars and accounts of historical changes in the habitats & the spaces of politics & in which particular types of public engagement by intellectuals occurred in the past. The course will include a &media practicum& to enable students to understand what it means to become a scholar who has a public voice through direct and indirect engagement in a media-saturated age. Previously offered as a special topics course.

**Requisites:** Restricted to graduate students only.

**MDST 6671 (3) Media, Myth, and Ritual**

Explores cultural practices of media audiences. Addresses theoretical and methodological implications of studying audiences from a culturalist perspective, with particular focus on media audience practices. Students engage in field research projects related to course content. Formerly MDST 6671.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6711 (3) Media and Popular Culture**

Introduces fundamental methods for understanding the construction of meaning in film, television, popular music and advertising. Traces the study of popular culture through film theory, mass media analysis and cultural studies. Surveys various strands of research that seek to understand popular culture and its effects.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6721 (3) Feminist Media Studies**

Explores the complex relation between feminism and global media consumption and production. Students will be introduced to key theoretical approaches to engage critically with film, print and broadcast media, digital media, and art. Students will engage with themes that frame feminist media studies today: intersectionality, gaze, (in)visibility, consumerism, resistance, bodies, representational narratives, queer identities, decolonial feminism as a theoretical tool of relationality, and explorations of decolonizing feminist practices originating in the global South.

**Requisites:** Restricted to graduate students only.

**MDST 6771 (3) History of Media and Communication**

Examines history of communication, including the means (technologies) of communication, social practices (institutional, collective, individual) that intersect with the study of communication and media, and cultural forms (texts, products). Situates the study of media, technology, and culture within historical contexts, comparative historical research, media archaeology, genealogy and media history.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6781 (3) Political Economy of Media**

Examines economic problems and political issues relevant to media institutions and industries.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 6871 (1-3) Special Topics**

Special topics. May be repeated up to 15 total credit hours

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**MDST 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

**Requisites:** Restricted to graduate students only.

**MDST 6951 (1-6) Master's Thesis**

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 7001 (1) PhD Colloquium Series**

Introduce the new doctoral students to the Media Research and Practice program and its faculty members and their research. The colloquium series will also include workshops on program planning, publishing, attending conferences, writing a dissertation, preparing and presenting a job talk, etc.

**Repeatable:** Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

**MDST 7011 (3) Proseminar in Media Communication Theory 1**

Introduces the principal concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Formerly MDST 7011.

**Requisites:** Restricted to doctoral students in Media Studies (MDST), Journalism (JRNL) or Advertising, PR and Media Design (APRD) only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 7021 (3) Proseminar in Media and Communication Theory 2**

Continues the introduction of principle concepts, literature, and theoretical and paradigmatic perspectives of media studies and mass communication and their ties and contributions to parallel domains in the social sciences and humanities. Formerly MDST 7021.

**Requisites:** Requires prerequisite course of MDRP 7011 (minimum grade C-). Restricted to doctoral students in Media Studies (MDST), Journalism (JRNL) or Advertising, PR and Media Design (APRD).

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 7051 (3) Qualitative Research Methods in Media**

Provides a survey of various qualitative modes of inquiry, attending to the philosophical, conceptual, and practical foundations of qualitative research in media, communication, and information. The course is designed to support students in developing a critical understanding of the different considerations in and stages of qualitative research, including the development of research questions, theoretical and conceptual frameworks, methodological approaches, data collection, data analysis, and assessment of reliability and validity of qualitative data.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 7061 (3) Quantitative Research Methods in Media**

Examines various methods of quantitative data gathering methods and analysis in mass media and social media contexts.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 7841 (1-6) Independent Study**

Independent study.

**Repeatable:** Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 7871 (3) Special Topics**

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDST 8991 (1-10) Doctoral Dissertation**

**Repeatable:** Repeatable for up to 40.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Core Curriculum and General Electives

**MDRP 7871 (3) Special Topics**

Special topics.

**Repeatable:** Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to graduate students only.

## Media and Public Engagement - Master of Arts (MA)

The Master of Arts in media and public engagement (MAPE) trains critical advocates for social change. It is a two-year, interdisciplinary program that spans traditional boundaries between theory and practice, offering opportunities for critical study of the history, institutions, economics and social implications of the media, both nationally and globally. It also offers practice-based media training geared toward civic engagement and community building. In addition to completing courses in media theory and other fields of interest, students learn how to create thoughtful and engaging projects using a variety of media practices, including online platforms, multimedia documentary, social media campaigns and other kinds of tools both longstanding and cutting-edge.

During their two years in the program, MAPE students will collaborate with faculty, community leaders, nonprofit organizations and companies to devise innovative interventions for social change. They may also choose to complete one of several subject-area certificate programs available through the university.

The MAPE prepares students for entering and transforming a variety of professions, both at the national and international level, in government, media, public relations, cultural organizations and the nonprofit sector.

## Requirements

### Application Guidelines

Students are admitted to the program based on the quality of their proposed project and their commitment to social change and the public good. Applicants to the MA in media and public engagement must:

- Hold at least a baccalaureate degree or its equivalent from an accredited college or university.
- Have an undergraduate grade point average of at least 2.75.

- Have a GRE verbal score of at least 153 (62%). International applicants must also have a TOEFL score of at least 600 (IBT 100).
- Provide three letters of recommendation.
- Provide a 500-word statement of purpose.
- Provide a resume.

Graduate advising is available by phone (303-492-7977), email (cmcigrad@colorado.edu) or in person (Hellems 96D).

## Program Requirements

Students in the MAPE program take a total of 30 credit hours, comprised of:

- 24 hours of coursework selected from a range of courses offered by the Media Studies department and/or courses crosslisted with other departments inside and outside the College of Media, Communication and Information (CMCI)
- 6 hours for a thesis project

## Required Courses and Credit Hours

<sup>1</sup> May consist of an internship or practicum.

<sup>2</sup> Students may take a wide range of electives, including graduate seminars in media studies, hands-on courses throughout CMCI and topical offerings throughout the university.

## Music

The CU Boulder College of Music inspires artistry and discovery, together.

The College of Music provides specialized training designed to prepare students for a variety of careers in music. The college offers seven undergraduate and graduate degrees in 24 fields of study, along with an array of interdisciplinary opportunities, including certificates in music technology, entrepreneurship and arts administration.

Established by the Regents of the University of Colorado in 1920, the College of Music is a fully accredited member of the National Association of Schools of Music.

The widely varied functions of music in the world today present many challenging and interesting opportunities for teachers, performers, creative artists, technicians and commercial personnel. While these different pursuits require specialized emphases, the faculty of the College of Music recognize the musical and educational experiences that are common to all. Therefore, each curriculum of the College of Music is designed to present music as an integrated whole. Solo performance and technique, ensemble performance, historical and theoretical studies, concert and recital opportunities and elective courses both inside and outside the college are intended to give students a balanced approach to musical understanding and musicianship.

## Entrepreneurship Center

The Entrepreneurship Center for Music (ECM) is a national leader in professional development for musicians. The ECM equips today's music students with the skills and tools they need to create sustainable careers in the arts. ECM students are encouraged to develop entrepreneurial skills to explore the vast opportunities inherent in a changing marketplace, and to develop plans to implement career-enhancing ventures across the artistic spectrum. Offerings include courses for credit, an undergraduate Certificate in Music Entrepreneurship, workshops and internships with a wide range of arts organizations and businesses nationwide.

## Facilities

The College of Music has several beautiful performance halls, including the 2,000-seat Macky Auditorium, the 500-seat Grusin Music Hall, the 270-seat Music Theatre and the 111-seat Recital Hall. The college is located primarily in the Warner Imig Music Building, a large complex of practice rooms, faculty studios, offices, ensemble rehearsal areas, seminar facilities and classrooms. An addition to the east side of the building features a 4,300 square foot rehearsal space with a 35-foot ceiling and acoustical draping. Additional rehearsal and classroom facilities are located in Macky Auditorium.

The college's outstanding Howard B. Waltz Music Library is considered to be among the nation's most comprehensive. The library contains over 150,000 volumes, scores, recordings and periodicals. Computerized facilities are provided for listening to recordings and work stations are available for computer-based reference searching.

The college also features extensive facilities for music technology and electronic music study. The Computer-Assisted Music Laboratories (I and II) are multi-purpose labs designed primarily for classroom instruction. They feature numerous workstations, each with a Musical Instrument Digital Interface, sampling keyboard and a computer. The CRUNCH Lab is a fully-featured electronic music project studio. This lab is optimized for computer music research (including live interactive performance systems), as well as sound recording and editing projects and audio/video production. The Class Piano Laboratory is equipped with 12 digital pianos.

## Performances

Each year the College of Music presents over 400 concerts by students, faculty and guests. In addition to individual musical pursuits, students at all levels have the opportunity to perform in a variety of outstanding ensembles including orchestras, choirs, bands, world music ensembles, chamber and early music groups, jazz ensembles and combos, opera productions and musicals. Many of these groups have been invited to perform at prestigious national and international events. Recitals by students and faculty are supplemented by visits from world-class guest artists, all of which provide the Boulder community with the chance to hear some of the finest music being performed today. The vast majority of these excellent performances are free and open to the public.

Other music programs presented by CU Presents include:

- Artist Series
- Eklund Opera Program
- Takács Quartet Series
- Holiday Festival

For a schedule of all College of Music performances, call 303-492-8008 or visit the College of Music (<http://www.colorado.edu/music/>) website.

## Student Organizations

The student body of the College of Music has its own government, represented by the College of Music Student Government. Honorary music fraternities are Sigma Alpha Iota, Mu Phi Epsilon and Kappa Kappa Psi. Pi Kappa Lambda, a national music honor society, and the Music Teachers National Association both have active chapters within the College of Music. Music education majors are eligible for membership in student chapters of the National Association for Music Educators, the American Choral Directors Association and the American String Teachers Association. Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

Additional organizations include CU Trombone Society, CU Trumpet Alliance and Diverse Musicians Alliance.

## Policies & Requirements

### Scholarships and Awards

A number of scholarships and awards are designed specifically for students in the College of Music.

Graduate students must enroll as full-time students, maintaining a 3.00 GPA, and make adequate progress toward their degrees. The college offers approximately 100 graduate assistantships as well as graduate fellowships and a variety of endowed scholarships for graduate students.

### Academic Ethics

Students are expected to conduct themselves in accordance with the highest standards of honesty and integrity. Cheating, plagiarism, illegitimate possession and disposition of examinations, alteration, forgery, or falsification of official records and similar acts or the attempt to engage in such acts are grounds for suspension or expulsion from the university.

In particular, students are advised that plagiarism consists of any act involving the offering of the work of someone else as their own. It is recommended that students consult with their instructors as to the proper preparation of reports, papers, etc., in order to avoid this and similar offenses. Students are expected to be acquainted with and abide by provisions of the University of Colorado Boulder Honor Code.

### Scholastic Requirements

A student is required to maintain at least a B (3.0) grade point average in all work attempted while enrolled in the Graduate School, and a student must have at least an overall 3.0 average to receive a graduate degree. Courses in which grades below C (2.0) are received are not accepted for master's degree programs or for the removal of academic deficiencies.

Students whose cumulative grade point average falls below 3.0 at any time during their graduate career will be placed on academic warning by the Graduate School.

Music majors are eligible for scholarships or renewal of their scholarships as long as they make satisfactory progress in their major (as determined by the faculty), demonstrate satisfactory proficiency in jury exams and auditions, participate in ensemble (when required in degree plan) and maintain a minimum cumulative GPA of 3.00. Students who have a cumulative GPA below 3.00 will be placed on scholarship

warning for a maximum of two semesters (consecutive or cumulative), provided the GPA improves each semester. Students on scholarship probation who do not earn a cumulative GPA of 3.00 or higher by the end of the probationary period will have their scholarships revoked.

## Admission Requirements

Admission requirements for specific degree programs that supplement the Graduate School requirements are discussed in the degree program descriptions that follow. The GRE general test (<http://www.ets.org/gre/>) is required for the PhD program in Music Education. The GRE is strongly encouraged, but not required, for the PhD in Musicology and MM in Music Theory degrees. Applicants to the Master of Music Education program with an undergraduate GPA below 3.0 must submit GRE scores to be considered for admission.

## Preliminary Examinations

Before the beginning of their first semester of work toward a master's or doctoral degree, students are given preliminary exams covering the major field, several areas of music theory and music history. Specific requirements vary with the student's degree and program. Students pursuing the master's and doctoral degrees in voice also must pass proficiency requirements in piano and diction (English, French, German and Italian). Choral students must pass diction requirements in French, German, Italian and Latin.

Results from the major-field examination serve as one basis for recommending specific coursework in the program. Conducting majors should be knowledgeable in areas of repertoire, score analysis and conducting techniques. Select performance majors are examined in the areas of technique, repertoire, stylistically informed performance and pedagogy. Students enrolled in the master's degree in Jazz Performance and Pedagogy must demonstrate knowledge of jazz theory and history and jazz keyboard proficiency.

## College Teaching and Professional Development

Most graduate degrees in music require coursework in music pedagogy. Students who plan to teach at the college level are urged to be involved in the many offerings of CU Boulder's renowned Center for Teaching and Learning. Workshops, observations, consultations and other professional development opportunities are scheduled throughout the academic year. These include campus-level offerings as posted at the Center for Teaching and Learning (<https://www.colorado.edu/center/teaching-learning/>) website, as well as music-specific events organized by the Lead Teaching Assistants in the College of Music. The program offers three certificates that graduate students may pursue during their studies at CU Boulder: the Certificate in College Teaching (CCT), Professional Development Certificate for Preparing Future Faculty (PDC:PFF) (<http://www.colorado.edu/gtp/certificates/professional-development-certificate-preparing-future-faculty/>), and Professional Development Certificate for Preparing Future Professionals in Business, Government, Industry and the Arts (PDC:BGIA). For details, see Graduate Certificates (<https://www.colorado.edu/center/teaching-learning/programs/graduate-certificates/>).

## Financial Aid

In addition to the opportunities for financial aid described in the Graduate School section, the College of Music grants merit aid in the form of teaching assistantships, graduate assistantships and graduate part-time instructorships (GPTI) to numerous graduate students each year.

The assistantships and instructorships, which are usually one-quarter time (25 percent), include both a stipend and the waiver of 5 or 6 credit hours of tuition each semester. There are also scholarships offered by the individual departments and external fellowships awarded through the Graduate School. All prospective students who have completed their applications by December 1 will automatically be considered for available scholarships and assistantships.

## English Language Requirements

A student who is noticeably deficient in the use of the English language may not obtain an advanced degree from the University of Colorado. Satisfaction of this requirement depends not so much upon ability to pass formal tests, although these may be required, as upon the consistent use of good English in all oral and written work.

Therefore, an English assessment exam (TOEFL, IELTS, DuoLingo) are currently accepted, see here for an updated list ([https://www.colorado.edu/music/admissions/prospective-graduate-students/#step\\_two\\_upload\\_supplemental\\_materials-2284](https://www.colorado.edu/music/admissions/prospective-graduate-students/#step_two_upload_supplemental_materials-2284)) of acceptable exams) is required of **all** international graduate applicants whose native language is not English. *This includes applicants who have already completed a degree or studied in an English-speaking country for any length of time.* An acceptable score must be reported directly to the CU Boulder Office of Admissions by the December 1 deadline in order for the applicant to be considered.

## Graduate Auditions

Auditions are required for all performance and performance/pedagogy programs. A personal audition is strongly preferred and required for consideration of a Graduate Assistantship position. Note that some studios require a preliminary, recorded audition before a student may be invited to schedule an audition on campus. For specific information and audition dates, refer to the Prospective Graduate Students Auditions (<http://www.colorado.edu/music/admissions/prospective-graduate-students/auditions/>) website or contact the office of the associate dean for graduate studies at 303-492-2207 or [gradmusc@colorado.edu](mailto:gradmusc@colorado.edu).

## Programs of Study

### Music

The College of Music's renowned faculty will guide students through the Master of Music, Doctor of Musical Arts, Doctor of Philosophy in Music or Artist Diploma programs, while a variety of ensembles are available for honing performance skills.

Visit the College of Music (<http://www.colorado.edu/music/>) website for more information about the school, academics, ensembles and more.

### Master's Degree

- Music - Master of Music (MMus) (p. 1738)

### Doctoral Degree

- Music - Doctor of Philosophy (PhD) (p. 1745)

### Artist Diplomas

- Chamber Music Performance (p. 1746)
- Opera and Solo Vocal Performance (p. 1746)
- Orchestral Performance (p. 1747)

- Solo Instrumental Performance (p. 1747)
- String Quartet Performance (p. 1748)
- Vocal Coaching (p. 1748)

## Certificates

- Arts Administration - Graduate Certificate (p. 1749)
- Music Theory - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/music/programs-study/music/music-theory-graduate-certificate/>)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Wetherbee, Charles Tyler  
Associate Professor; BM, Curtis Institute of Music

Wolzien, Charles  
Professor Emeritus

## Courses

### MUSC 5002 (3) Proseminar in Historical Musicology

Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

### MUSC 5011 (2) 16th Century Counterpoint

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4011

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

### MUSC 5012 (3) African Music

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4012 and MUEL 4012

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5021 (2) 18th Century Counterpoint**

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Offered fall terms only.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5026 (2) Percussion Literature**

In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Offered fall semester of even numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5036 (2) Brass Literature**

Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring term.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5041 (3) Advanced Orchestration**

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5061 (3) Advanced Tonal Analysis**

Surveys tonal repertory and analytical techniques. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5071 (3) Post-tonal Theory and Analysis I**

Focuses on theory and analysis of post-tonal literature pre-1945. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5078 (1) Piano Technician for Pianists**

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4078

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite piano majors.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5081 (3) Applications in Music Technology**

Presents advanced strategies for applying computer technology in music creation. Synthesis, DSP, MIDI and audio sequencing, as well as advanced music engraving, will be explored through the use of various software platforms including Logic, Reason, MAX and Finale. Offered fall term only.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5091 (3) Contemporary Theory - Jazz and Modal Music**

Studies the composition and improvisation of Herbie Hancock, Wayne Shorter, Chick Corea and their contemporaries. Broadly examines modality in jazz and its similarities to music of Ravel and Debussy, as well as systems of organization in Messiaen and others. Strategies for analysis and integration of the material into a personal vocabulary as a composer and improviser are explored. Offered spring of even-numbered years.

**Requisites:** Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5103 (3) Teaching General Music**

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Offered fall of odd-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5112 (3) Proseminar in Ethnomusicology**

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5121 (3) Advanced Topics in Music Technology**

Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 5081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5136 (2) Advanced Conducting**

Offers advanced work in conducting.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5141 (2) Instrument Design Lab: Sound, Perception & Creativity**

Explore fundamental physical concepts of sound and music in a hands-on laboratory environment. Survey a number of topics through the construction of PVC overtone flutes, an investigation in the timbral intention of Dolly Parton's vocal technique, physical modeling through the testing of 3D-printed vowel flutes, the construction of a "Long String Instrument," and more. Specific topics include: tuning and temperament, harmony and timbre, and preparing the piano (digital and analog).

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4141

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5142 (3) American Indian Music**

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4142

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5143 (2) Topics in Choral Music Education**

Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4143

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5151 (3) Topics in Music Analysis**

Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies and produce original analyses. Student must have passed graduate preliminary exams or completed remediation before enrolling in this course.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 5061 or MUSC 5071 as appropriate to the topic, or instructor consent required.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5153 (1) Advanced Topics in K-12 Music Pedagogy**

Examines the literature, skills, and pedagogical applications of selected topics applicable to all K-12 Music Educators such as curriculum, music listening, and composition.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Music Education (MMED-MMUE) students only.

**Grading Basis:** Letter Grade

**MUSC 5156 (2) Symposium in Choral Music**

Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5163 (1) Advanced Topics in Secondary Choral Music Education Pedagogy**

Examines the literature, skills, and pedagogical applications of selected topics in choral music classrooms, such as adolescent vocal development, vocal jazz ensemble directing, and development of piano skills.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5168 (3) World Music Theories**

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4168

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5173 (1) Advanced Instrumental Techniques and Pedagogy**

Reviews and expands knowledge of brass, woodwind, percussion, or string instrumental techniques and pedagogical tools, extending upon skills gained in a typical introductory class teachers complete prior to licensure. Students complete a project based on synthesizing new pedagogical resources and materials. Intended for music educators who teach in K-12 school settings.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Music Education (MMED-MMUE) students only.

**Grading Basis:** Letter Grade

**MUSC 5176 (2) Conducting 3**

This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4176

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Music Education (MMED) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5183 (2) Research in Music Teaching**

Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Offered fall of odd-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5203 (2) Topics in Music Education**

Provides an in-depth examination of contemporary topics in music education. Students implement and design relevant projects.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5215 (1-2) Studies in Piano Teaching**

Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisites: MUSC 5305 and MUSC 5315.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5246 (3) Jazz Improvisation and Analysis**

Application of performance skills for the advanced improviser through specific harmonic, melodic and rhythmic techniques. Also includes analysis of transcriptions and varied harmonic contexts as well as a focus on the development of repertoire. Offered fall semester of odd-numbered years. Requires prerequisite course or instructor consent.

**Requisites:** Requires prerequisite course of MUSC 3071 (minimum grade D-). Restricted to Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5256 (3) Jazz Studies Administration and Pedagogy**

Surveys approaches, techniques, philosophies and materials available for teaching jazz at both pre-college and collegiate level. Subject areas covered include improvisation, composition and arranging, studio teaching and directing ensembles. Studies the organization and administration of collegiate jazz programs. Topics include curriculum, program philosophy, teaching techniques, funding, teacher training and evaluation. Offered fall terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 3253.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5273 (2) Comprehensive String Pedagogy**

Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Offered fall of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5285 (3) Organ Survey**

Survey of organ repertoire and the history of organ building from the 16th century to the present.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4285

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5305 (2) Piano Pedagogy Group Techniques**

Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5313 (3) Teaching Choral Music**

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4313

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5315 (2) Piano Pedagogy: Intermediate Literature**

Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5325 (2) Keyboard Literature 1**

Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5335 (2) Keyboard Literature 2**

Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring terms of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5336 (2) Brass Pedagogy**

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring term.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4336

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5345 (2) Research: Piano Literature and Pedagogy**

Looks at individual or group research related to piano pedagogy or literature for piano.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5346 (2) Woodwind Pedagogy**

Provides the knowledge and skills to teach woodwind instruments in both individual studio and collegiate class settings. Considers pedagogical techniques for all levels of instruction. Offered fall terms of odd-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4346

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5356 (2) Jazz Studies Practicum**

Implements independent, project-based studies for further developing knowledge and experience in jazz pedagogy, performance and composition. Student is assessed and guided by faculty to develop specific skills needed toward becoming a more effective jazz educator. Offered spring of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 5256.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5365 (2) Advanced Accompanying**

An in-depth study of collaborative repertoire in individually assigned projects, coached by collaborative piano faculty and others.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5375 (2) Opera Coaching for Pianists**

Teaches skills for opera coaches and rehearsal pianists.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5405 (2) Basso-Continuo Accompaniment**

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4405

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion**

Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered fall terms of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5435 (2) Collaborative Literature for Piano with Strings**

Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered spring terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5443 (3) Teaching Instrumental Music**

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4443

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5444 (2) Vocal Pedagogy**

In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5446 (1) Supervised Teaching Practicum**

Designed to provide supervised teaching experience that includes feedback on weekly teaching; weekly and longer-term planning; and reflection on the impact of teacher characteristics and actions on student development.

**Repeatable:** Repeatable for up to 5.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 5273 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5454 (2) Repertory for Young Voices**

Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5464 (2) Voice Literature I: French Song Literature and Oratorio/Concert Solo Literature**

Explores the vocal literature of French Art Song and Oratorio/Concert Solo Literature in a graduate-level survey course taught in two modules.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Voice

**MUSC 5484 (2) Graduate Seminar in Vocal Pedagogy**

A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique.

**Requisites:** Requires prerequisite course of MUSC 5444 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5564 (2) Voice Literature II: German, British & American Song Literature**

Explores the rich variety of German, British and American Song Literature from the late Middle Ages to the present in a graduate-level survey course taught in two modules.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5583 (2) Inclusive Music Classroom**

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4583

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5608 (1) Wellness for Musicians 1**

Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing and vocal health.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5642 (3) Jazz History and Literature**

Studies musical trends and cultural forces influencing jazz, with analysis of improvisational styles, melodic and motivic variations, transcriptions and orchestrations from significant periods in its history. Offered spring terms only.

**Requisites:** Requires prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5666 (2) Chamber Music Literature: Woodwinds**

Provides a stylistic-historical survey in various genres from Baroque era to present. Offered fall terms of even numbered years.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5708 (2) Introduction to Music Bibliography and Research**

Explores basic informational sources about music and musicians; a study of citation formats, research methodologies and writing techniques employed in music research papers, theses and dissertations. Intended to increase students' information fluency. Required in all master's degree programs.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5712 (3) Renaissance Music**

Provides a repertory and analysis of polyphonic music, 1400-1600.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4712

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5742 (3) Performance Practice of Early Music**

Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5752 (3) Women in Music**

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4752

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5762 (3-4) History of Choral Literature**

Provides a seminar in analysis of musical style and history of choral repertory. Those wishing review of literature and repertory may enroll for 4 credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5772 (3) History of Opera**

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4772

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5802 (3) Studies in 20th Century Music**

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4802

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5808 (1) Wellness for Musicians 2**

Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander's conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4608

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 5608 (minimum grade C-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5822 (3) Ancient and Medieval Music**

Surveys sources from the ancient Greeks to the early Christian era and music from the 8th to the 14th century.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5832 (3) Studies in American Music**

Offers intensified work in folk, popular, and art music of the United States.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5842 (3) Aesthetics of Music**

Surveys various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics and historians.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5852 (3) 17th and Early 18th Century Music**

Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4852

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5872 (3) Late 18th and 19th Century Music**

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4872

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Recommended:** Prerequisite or corequisite MUSC 3812.

**Additional Information:** Departmental Category: Musicology

**MUSC 5882 (3) Studies in 18th and 19th Century Music**

Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5892 (3) Latin American Music**

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4892

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5908 (1-3) Internship in Music Business**

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4908

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5918 (2) Building Your Music Career**

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 2918

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5938 (3) Management and Leadership in the Arts**

Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4968

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5948 (3) Sustainable Arts Organizations: Forecasting and Fundraising**

Equips students to create comprehensive fundraising plans rooted in strategic business planning for arts organizations, which depend on contributed income for sustainability. Students will learn the basics of planning, budgeting and forecasting, along with proven, effective fundraising strategies and techniques. Includes case studies and guest speakers with extensive professional expertise in the field.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5958 (2) Community Performances**

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4958

**Requisites:** Requires prerequisite course of MUSC 5918 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5978 (3) Introduction to Arts Administration**

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4978

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5988 (3) The Entrepreneurial Artist**

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4988

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 5918.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 6041 (3) Advanced Orchestration**

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

**Requisites:** Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 6051 (3) Pedagogy of Music Theory**

Explores methods, materials, practical techniques for teaching undergraduate music theory, aural skills and analysis. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course. Offered spring of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 6113 (2) Foundations of Music Education**

Surveys historical and philosophical bases of contemporary music education. Offered fall of even-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6133 (2) Comprehensive Musicianship through Performance**

Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Offered spring terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6193 (1-3) Selected Studies in Music Education**

Instructor consent required.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED-MMUE) students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6203 (2) Psychology of Music Learning**

Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Offered spring terms only.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6213 (2) Assessment of Music Learning**

Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Offered on a rotating basis during summer session.

**Requisites:** Restricted to Music Education (MMED-MMUE) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6223 (2) Sociology of Music Education**

Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Offered fall of even-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Recommended:** Prerequisite MUSC 6113.

**Additional Information:** Departmental Category: Music Education

**MUSC 6233 (2) Pedagogy of Music Teaching and Learning**

Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers' lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring terms of odd numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 6113 and/or significant teaching experience.

**Additional Information:** Departmental Category: Music Education

**MUSC 6243 (1) Applications of Music Pedagogy**

Provides a structured, collaborative environment for graduate students with K-12 teaching duties to apply the content from music education courses to their current pedagogical environments. Students will apply inquiry strategies as they design and implement an applied project that synthesizes specific theoretical or conceptual areas. Offered fall term only.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to Music Education (MMED-MMUE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Music Education

**MUSC 6325 (2) Seminar in Piano Literature**

Provides an intensive study of a selected area of repertoire or history. Offered fall terms only.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 6343 (1) Capstone Portfolio Project**

Designed as the capstone course for students enrolled in the Summer MME degree program. Students are guided in their composition of three summative essays involving reflection on connections between two or more courses, comparisons between their entrance essays and current thinking, and identification of pedagogical impacts on their K-12 teaching.

**Requisites:** Restricted to Music Education (MMED-MMUE) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 6801 (3) Advanced Topics in Music Theory**

Intensive study of a specialized topics in theory and analysis through critical reading and analysis, class presentations and independent research. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 6822 (3) Advanced Studies in Musicology**

Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 7046 (3) Seminar in Jazz Literature**

Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. Offered spring semester only.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Recommended:** Prerequisites MUSC 5091 and MUSC 5642.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 7103 (3) Historical Research in Music Education**

Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. Offered spring of even-numbered years.

**Requisites:** Restricted to Music Education (MMED-MMUE) doctoral students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7113 (3) Quantitative Research in Music Education**

Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Offered fall of even-numbered years.

**Requisites:** Restricted to Music Education (MMED-MMUE) students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7138 (3) Contemporary Issues in College Teaching**

Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered terms.

**Requisites:** Restricted to College of Music (MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 7143 (3) Qualitative Research in Music Education**

Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Offered fall of odd-numbered years.

**Requisites:** Restricted to MUED students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7203 (3) Doctoral Seminar in Music Education**

Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Offered fall of even-numbered years.

**Requisites:** Restricted to MUED students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7801 (3) Doctoral Seminar in Music Theory**

Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

**Requisites:** Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to College of Music (MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 7822 (3) Seminar in Musicology**

Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. Offered fall only.

**Requisites:** Restricted to Music (MUSD) graduate students only.

**Additional Information:** Departmental Category: Musicology

## Music - Master of Music (MMus)

The Master of Music degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. The purpose of Master of Music degree work is to refine skills in music performance, music composition, research and writing, and pedagogy. There are numerous fields of study within the Master of Music program as listed below. The musicology program admits students only at the PhD level.

The Master of Music degree provides advanced studies in performance, performance/pedagogy, composition (with an optional emphasis in technology), music theory, and conducting (choral, orchestral and wind). Areas of emphasis in performance and performance/pedagogy include all band and orchestral instruments, guitar, harp, harpsichord, jazz, piano and voice. Each of the MM degrees incorporates studies in the major area, support courses in music electives and thesis/recital work. The minimum credit hours required for a MM degree varies from 30 to 32 depending on the area of study. For specific major area requirements, see the list of Master of Music degrees (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>) at the College of Music website.

Brass, conducting, percussion, string, voice and woodwind majors are required to participate in a music ensemble. A student's ensemble placement will be determined by an audition during the first week of classes.

## Requirements

### Prerequisites

Students should have completed undergraduate preparation equivalent to that expected for the bachelor's degree at this university. Normally this is a bachelor of music degree in the proposed area of concentration.

Before admission, composition majors should upload representative scores and recordings (to the digital portfolio on the application) and a list of completed compositions. Theory majors should upload two scholarly writing samples that demonstrate ability in critical analysis, appropriate research techniques and skill in the cogent use of English. For further details, see the Application Process section of the website.

### Program Requirements

The master of music (MM) degree, which the Graduate School considers a Plan II program, requires a minimum of 30–32 credit hours of graduate coursework, including thesis projects. Many students find it necessary to exceed this minimum in order to meet the musical and academic standards demanded by the MM preliminary examinations. Specific degree requirements (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>) for each program are available online at the College of Music website.

Each student's program is directed by a three-member advisory committee headed by the major advisor (the student's major professor). A second member is chosen from the major area; the third member is usually from outside the major area. (Major areas include: composition, music education, music theory and performance.) By the second semester of residence, the student should complete a tentative degree plan and obtain the approval of the advisory committee and the associate dean for graduate studies. Students must complete the master's degree within four years of matriculation into the program.

### Examinations

In addition to preliminary examinations, master's degree students in music must take the Master's Qualifying Examination. The procedures, guidelines for registration and deadlines for taking these examinations are announced by the Music Graduate Office.

### Recital/Thesis Requirements

The recital/thesis requirement for the MM in composition is a body of work(s) lasting at least 20 minutes in duration. This could be comprised of one or more original works for varying forces. For the major in conducting, the requirement is a public practicum and a performance-related or other scholarly document. For the major in music theory, it is two thesis papers. Or, with consent of the faculty advisory committee, a single, extended thesis for four credit hours. For the major in performance, presentation of two public recitals fulfills the requirement. For the major in performance and pedagogy, a full-length recital and a research document in pedagogy are required.

### Required Courses and Credits

#### Composition

Code	Title	Credit Hours
<b>Category I: Composition</b>		
PMUS 5526	Composition (variable from 2-3 per semester) <sup>1</sup>	9

*Thesis*

A body of work(s) lasting at least 20 minutes in duration. This could be comprised of one or more original works of varying forces for each Thesis project.

TMUS 6956	Master's Thesis	2
TMUS 6957	Master's Thesis 2	2

#### Category II: Other Requirements in Music

MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 5XX1	Electives in Music Theory	9
<i>Electives</i>		3
Maximum 2 credits of ensemble		

**Total Credit Hours** **30**

<sup>1</sup> Regular attendance at composition seminar is expected.

### Composition with an Emphasis in Music Technology

Code	Title	Credit Hours
<b>Category I: Composition</b>		
PMUS 5526	Composition (Emphasis in traditional techniques) <sup>1</sup>	3
PMUS 5526	Composition (Emphasis in Music Technology - variable 2 or 3 credits) <sup>1</sup>	6

#### *Thesis*

One major composition for musical ensemble and electronic media to be approved in advance by the composition faculty

TMUS 6956	Master's Thesis	2
TMUS 6957	Master's Thesis 2	2

#### Other Requirements in Music

MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 5XX1	Electives in Music Theory	6
MUSC 5081	Applications in Music Technology	3
Electives (maximum 2 credits of ensemble)		3

**Total Credit Hours** **30**

<sup>1</sup> Regular attendance at Composition Seminar is expected

### Music Theory

Code	Title	Credit Hours
<b>Category I: Music Theory</b>		
MUSC 5151	Topics in Music Analysis (Schenkerian Analysis)	3
MUSC 5071	Post-tonal Theory and Analysis I	3
MUSC 5XX1	Electives in Music Theory	6
TMUS 6956	Master's Thesis <sup>1</sup>	2
TMUS 6957	Master's Thesis 2 <sup>1</sup>	2

#### Category II: Other Requirements in Music

MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 6051	Pedagogy of Music Theory	3
Music Electives outside of the major area <sup>2</sup>		3

<b>Category III: Free Electives</b>	
Free Electives <sup>2</sup>	3
<b>Total Credit Hours</b>	<b>30</b>

<sup>1</sup> With the consent of the faculty advisory committee, the student may write a single, extended thesis for 4 credit hours (TMUS 6956 and TMUS 6957). The master's thesis project(s) culminates in an oral defense before the three members of the student's advisory committee. This is in addition to the MM Qualifying Oral Examination.

<sup>2</sup> Electives may include ensemble participation (limited to 3 credits for the degree) or private applied instruction. Free electives may be in or outside of the College of Music, but must be outside of the major area or germane to the program of study. Reading proficiency in a foreign language is strongly recommended.

### Choral Conducting

Code	Title	Credit Hours
<b>Category I: Choral Conducting</b>		
MUSC 5156	Symposium in Choral Music	4
MUSC 5136	Advanced Conducting	2
PMUS 5536	Intermed Conducting (Intermediate Conducting - to be taken concurrently with Thesis Practicum where possible)	6
TMUS 6956	Master's Thesis <sup>1</sup>	2
TMUS 6957	Master's Thesis 2 <sup>1</sup>	2
<b>Category II: Other Requirements in Music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5712	Renaissance Music	3
PMUS 5726	Voice (Voice Pedagogy)	4
or MUSC 5444	Vocal Pedagogy	
or MUSC 5454	Repertory for Young Voices	
<b>Electives</b>		<b>2</b>
Maximum 2 credits of ensemble		
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> See degree plan for details on thesis projects

<sup>2</sup> Choral Ensemble (required each semester of residence; credit is attached to applied study)

### Choral Conducting with an Emphasis in Voice Performance

Code	Title	Credit Hours
<b>Category I: Choral Conducting</b>		
MUSC 5156	Symposium in Choral Music	4
MUSC 5136	Advanced Conducting	2
PMUS 5536	Intermed Conducting <sup>1</sup>	6
TMUS 6956	Master's Thesis (Conducting Practicum) <sup>2</sup>	2
<b>Category II: Other Requirements in Music</b>		
<i>Voice Performance</i> <sup>3</sup>		
PMUS 5726	Voice (Three semesters)	6
MUSC 5444	Vocal Pedagogy	2

TMUS 6957	Master's Thesis 2 (Voice recital or research paper) <sup>4</sup>	2
-----------	--	---

### Academic Courses

MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5712	Renaissance Music	3
Choral Ensemble required each semester of residence; credit attached to applied study		
<b>Total Credit Hours</b>		<b>32</b>

<sup>1</sup> To be taken concurrently with Thesis Practicum where possible.

<sup>2</sup> See degree plan for details for the conducting practicum.

<sup>3</sup> Acceptance for Emphasis in Voice requires an audition with the Voice Faculty.

<sup>4</sup> A recital may be presented if the student regularly studies voice or an instrument at the 5000-level and if the particular applied Faculty approves the recital in preview.

### Orchestral Conducting

Code	Title	Credit Hours
<b>Category I: Orchestral Conducting</b>		
PMUS 5536	Intermed Conducting (Intermediate Conducting)	6
MUSC 5136	Advanced Conducting	2
TMUS 6956	Master's Thesis (Conducting Practicum)	2
TMUS 6957	Master's Thesis 2 (Research Paper)	2
<b>Category II: Other Requirements in Music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 5156	Symposium in Choral Music	2
PMUS 5XXX	(Applied Music Instruction)	4
Instrumental Ensemble (Required each semester of residence - credit attached to applied study)		
Electives (maximum 2 credits of ensemble)		4
<b>Total Credit Hours</b>		<b>30</b>

### Wind Band Conducting

Code	Title	Credit Hours
<b>Category I: Wind Band Conducting</b>		
PMUS 5536	Intermed Conducting (Intermediate Conducting)	8
MUSC 5136	Advanced Conducting	2
TMUS 6956	Master's Thesis (Conducting Practicum)	2
TMUS 6957	Master's Thesis 2 (Research Paper)	2
<b>Category II: Other Requirements in Music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 5156	Symposium in Choral Music	2

Instrumental Ensemble required each semester of residence, credit attached to applied study

Music elective outside Conducting	2
Electives (maximum 2 credits of ensemble)	4
<b>Total Credit Hours</b>	<b>30</b>

### Brass Performance

Code	Title	Credit Hours
<b>Category I: Brass Performance</b>		
PMUS 5XX6	(Applied Brass Instruction) <sup>1</sup>	10
EMUS 5507	Chamber Music	2
TMUS 6956	Master's Thesis <sup>2</sup>	2
TMUS 6957	Master's Thesis 2 <sup>2</sup>	2
<b>Category II: Other Requirements in Music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5036	Brass Literature	2
MUSC 5336	Brass Pedagogy	2
Graduate-level electives in Music Theory 5XX1; Musicology/Ethnomusicology 5XX2, or Music Education 6XX3		6
<b>Electives</b>		<b>2</b>
Maximum 2 credits of ensemble		
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Four semesters of applied study are required. University ensemble participation is required during each semester of applied study.

<sup>2</sup> Two recitals; one may be a chamber recital.

### Guitar

Code	Title	Credit Hours
<b>Category I: Guitar Performance</b>		
PMUS 5566	Guitar (Applied Guitar Instruction)	9
TMUS 6956	Master's Thesis <sup>1</sup>	2
TMUS 6957	Master's Thesis 2 <sup>1</sup>	2
<b>Category II: Other Requirements in Music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
Other music electives (outside Guitar Performance) <sup>2</sup>		2
<b>Electives</b> (maximum 2 credits of ensemble)		<b>7</b>
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Two recitals *or* one recital and a major paper.

<sup>2</sup> A two-credit Special Studies in guitar literature (TMUS 5564) is recommended before the Qualifying Examination is taken.

### Collaborative Piano

Code	Title	Credit Hours
<b>Category I: Collaborative Piano</b>

MUSC 5335	Keyboard Literature 2	2
<b>Category III: Additional Courses in Music</b>		<b>4-6</b>
Choose two or three of the following in consultation with advisor:		
MUSC 5365	Advanced Accompanying	
MUSC 5305	Piano Pedagogy Group Techniques	
MUSC 5315	Piano Pedagogy: Intermediate Literature	

MUSC 5375	Opera Coaching for Pianists
MUSC 5405	Basso-Continuo Accompaniment
MUSC 5464	Voice Literature I: French Song Literature and Oratorio/Concert Solo Literature
MUSC 5564	Voice Literature II: German, British & American Song Literature

<b>Electives</b>	<b>2-3</b>
Additional music electives in music or non-music other than piano performance	
<b>Total Credit Hours</b>	<b>30-33</b>

#### String Performance (Bowed)

Code	Title	Credit Hours
<b>Category I: String Performance</b>		
PMUS 5XX6	Applied String Instrument Instruction	10
TMUS 6956	Master's Thesis (Recital)	2
TMUS 6957	Master's Thesis 2 <sup>1</sup>	2
<b>Category II: Other Requirements in Music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
<b>Electives</b> <sup>2</sup>		<b>6</b>
Outside of string performance; maximum 2 credits of ensemble		2
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> A research paper and/or a performance from a repertory list before a jury may substitute for a second recital.

<sup>2</sup> Orchestra may not be included.

#### Voice Performance

Code	Title	Credit Hours
<b>Category I: Voice Performance</b>		
PMUS 5726	Voice (Applied Voice Instruction)	8
TMUS 6956	Master's Thesis <sup>1</sup>	2
TMUS 6957	Master's Thesis 2 <sup>1</sup>	2
<i>Ensemble</i>		2
One credit hour of Opera Theatre Practicum (PMUS 5157) plus one hour of one of the following: EMUS 5217, EMUS 5227 or EMUS 5367 or an additional hour of Opera Theatre Practicum		
<b>Category II: Other Requirements in Music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
MUSC 5XX1	Electives in Music Theory	3
MUSC 5XX2	Musicology or Ethnomusicology Elective	3
MUSC 5444	Vocal Pedagogy	2
MUSC 5484	Graduate Seminar in Vocal Pedagogy	2
MUSC 5464	Voice Literature I: French Song Literature and Oratorio/Concert Solo Literature	2
or MUSC 5564	Voice Literature II: German, British & American Song Literature	
<b>Electives</b> <sup>2</sup>		<b>4</b>
PMUS 5497	Vocal Repertoire Coaching	

PMUS 5137	Opera Theatre 1
PMUS 5147	Opera Theatre 2

**Total Credit Hours** 32

<sup>1</sup> TMUS 6956 must be a full-length recital, but may be fulfilled by one of the following: a traditional full-length recital; a lecture recital with supporting program notes; a major opera role; a mid-sized opera role and a half-hour recital; a concert of oratorio solo involving significant singing time and difficulty level.

<sup>2</sup> May take additional vocal literature course to fulfill requirement.

### Woodwind Performance

Code	Title	Credit Hours
<b>Category I: Woodwind Performance</b>		
PMUS 5XX6	Applied Woodwind Instruction Ensemble <sup>1</sup>	10
TMUS 6956	Master's Thesis (Recital)	2

<b>Electives</b>		
<b>Total Credit Hours</b>		<b>30</b>

<sup>1</sup> Required each semester of residence up to four semesters; credit is attached to applied study. See Faculty Chair regarding the specific ensemble required.

## Dual Degree Program

### Master's Degree in Two College of Music Programs

Students may apply for a dual master's degree that combines any two master's programs (with approval from both departments) in the College of Music. To guarantee the ability to pursue a dual master's degree, the student must apply separately and be admitted by the faculty in each of the degree programs under their respective admissions procedures and standards. The student must be accepted into both degree programs at the time of the initial application. If a student is already accepted to the College of Music in one degree program and is interested in adding a second degree (dual degree plan), the second master's degree must be approved by both area Department Chairs and the Associate Dean of the College of Music.

In consultation with the Department Chairs, Associate Dean and Graduate Studies Coordinator, a comprehensive degree plan will be devised for all requirements expected for the student to earn the dual degree. This plan must be completed before the last anticipated semester of study in the student's original degree. With the exception of thesis credit hours, courses that fulfill requirements in both degree programs need only be taken once to be counted for both degrees. A minimum of 45 credit hours must be earned.

## Music - Doctor of Philosophy (PhD)

The PhD in Music emphasizes research in the principal areas of music education or musicology (either historical musicology or ethnomusicology). Each program plan is developed through collaboration between student and advisor, keeping the specific goals of each student in mind. The objective is to prepare the student for a career in research and college teaching. Minimum requirements for PhD degrees are: 60 credit hours beyond the bachelor degree for musicology and 75 for music education, including 30 hours of thesis credit. Graduate-level courses taken at the University of Colorado Boulder for a master of music degree are automatically applied; graduate courses taken at another university may be considered for transfer (up to 21 credits).

### Areas of Emphasis

The two principal areas of study are music education and musicology.

#### Music Education Emphasis

The Doctor of Philosophy degree in music, with music education as a field of specialization, is offered through the Graduate School for students who demonstrate both scholarly potential and a superior commitment to the music education profession.

This degree program requires that individuals think abstractly, generalize knowledge, apply research results to areas of specialization, and communicate effectively in both oral and written forms.

Coursework emphasizes the study of historical, philosophical, psychological and sociological foundations of music education; the theoretical and pedagogical principles of music teaching and learning; curriculum development; testing and assessment; and research techniques.

Graduates typically pursue careers in music education at the college level or supervisory positions in elementary and secondary schools.

#### Musicology Emphasis

For the musicology student, the Doctor of Philosophy in music degree is intended to emphasize research in music history, music theory, ethnomusicology or some other aspect of music in culture.

An advanced degree will not be conferred merely because a student completes a specified period of residence and passes a given number of courses. One should not expect to gain from formal courses all the training, knowledge, and understanding of ideas necessary to meet the requirements for an advanced degree. The culminating work on a PhD is the dissertation, a substantial document based upon original investigation and showing mature scholarship and critical judgment, as well as a command of the tools and methods of research in music.

## Requirements

### Prerequisites

Students applying to the PhD program should have a bachelor's degree or equivalent in a music field related to their intended area of study. Applicants for the PhD with an emphasis in music education should hold an MME degree.

Letters of recommendation, representative research papers and satisfactory scores on the GRE (the general test) are required elements of the student's application for the degree in Music Education. The GRE is not required for Musicology.

Upon entrance to the degree program, students must pass the preliminary examinations and begin working toward basic requirements.

### Degree Requirements

#### Music Education Emphasis Course Requirements

Students must complete a minimum of 45 credit hours of courses numbered 5000 or above, 15 of which may be transferred from the master's degree, and a minimum of 30 credit hours of doctoral dissertation credit.

#### Dissertation Requirements

Each candidate must complete a dissertation based on original investigation that demonstrates mature scholarship. Following successful completion of the comprehensive examination, the student designates a dissertation committee, develops a dissertation prospectus and presents it to the committee for approval. After the dissertation has been accepted, a final oral examination on the dissertation and related topics is conducted by the student's dissertation committee.

For more details, consult the PhD in Music Education ([https://www.colorado.edu/music/sites/default/files/attached-files/phd\\_music\\_ed\\_degree\\_plan-2.pdf](https://www.colorado.edu/music/sites/default/files/attached-files/phd_music_ed_degree_plan-2.pdf)) program description at the College of Music website.

#### Musicology Emphasis Course Requirements

Students must complete a minimum of 30 credit hours of courses numbered 5000 or above, although the minimum number is almost always exceeded. At least six doctoral seminars (7000 level) in musicology are required and must be taken at CU Boulder as part of PhD course work. Additionally, certain seminars in related disciplines, such as Music Theory and Analysis, Religious Studies, Anthropology, Sociology, and so on, may count in lieu of the former requirement, with the consent of the student's advisory committee. Students are expected to complete with distinction all work in the formal courses in which they enroll.

Students must also complete at least 30 credit hours of dissertation credit, with not more than 10 of those credit hours in any one semester.

Up to 21 credit hours of graduate work taken at another institution may be considered for transfer. All requests for credit transfer, however, must be approved by the chair of the musicology faculty and other college and university officers as specified on a form for that purpose.

The College of Music requires proficiency in two foreign languages appropriate to the student's program of study. Normally, the language requirement is met by a translation examination scheduled through the graduate music office.

#### Dissertation Requirements

The dissertation should be an original and worthwhile contribution to knowledge in the field of musicology. It is expected that the student work closely with a major professor who will serve as the first reader and critic before the dissertation is submitted to the other dissertation committee members.

For more details, consult the PhD Musicology ([https://www.colorado.edu/music/sites/default/files/attached-files/phd\\_musicology\\_degree\\_plan\\_0.pdf](https://www.colorado.edu/music/sites/default/files/attached-files/phd_musicology_degree_plan_0.pdf)) program description at the College of Music website.

## Artist Diploma: Chamber Music Performance - Graduate Certificate

This graduate program is for pre-professionals who exhibit potential for a national and/or international performing career.

The program offers exceptionally gifted instrumentalists the opportunity to deepen their artistry, broaden their musical perspective and refine their performance skills under the guidance of College of Music faculty. In addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music. Students are provided both coaching and individualized instruction, with extensive opportunities for performance, in preparation for a performance career.

### Requirements

#### Admission Requirements

An earned baccalaureate degree and a successful audition are required for admission into this program.

#### Required Courses and Credits

Code	Title	Credit Hours
<b>Category I: Requirements in Music</b>		
PMUS 6XX6	Applied Instruction (Four semesters required, one-hour weekly lesson plus weekly studio class)	8
EMUS 5507	Chamber Music (Four semesters required)	4
TMUS 6956	Master's Thesis (Two chamber recitals)	4
TMUS 6957	Master's Thesis 2 (Chamber recital - A public performance with lecture/demonstration)	2
EMUS 5XX7	Conducted Ensemble (Two semesters required.) <sup>1</sup>	2
<b>Category II: Other requirements in Music</b> <sup>2</sup>		
Entrepreneurship (selected from the following)		2-3
MUSC 5918	Building Your Music Career	
MUSC 5908	Internship in Music Business	
MUSC 5988	The Entrepreneurial Artist	
MUSC 5978	Introduction to Arts Administration	
<b>Electives</b>		
Additional coursework in literature, pedagogy, entrepreneurship, musicology, ethnomusicology or music theory. <sup>3</sup>		2
<b>Total Credit Hours</b>		<b>24-25</b>

<sup>1</sup> Pianists not participating in a conducted ensemble are required to take two extra credits of chamber music and/or accompanying.

<sup>2</sup> A maximum of two credits at the 4000-level may be used to fulfill requirements.

<sup>3</sup> Students who wish to take academic classes at the 5000-level or above must pass the appropriate preliminary exam.

## Artist Diploma: Opera and Solo Vocal Performance - Graduate Certificate

This program is designed to provide intensive performance studies for those who have the talent and potential for a career in opera, chamber and solo vocal performance.

Studies include individualized voice instruction, vocal coaching, and performance opportunities in opera, solo, oratorio and other concert work, with elective studies in entrepreneurship, as preparation for a performance career.

### Requirements

#### Admission Requirements

Admissions requirements for this program include completing all required university graduate admission requirements, submitting a CU Boulder application, three letters of recommendation, a pre-screening recorded audition, and then performing a live on-campus audition and being interviewed by the faculty.

An earned baccalaureate degree in voice performance is the minimum requirement for admission into this program.

#### Required Courses and Credits

Code	Title	Credit Hours
<b>Requirements in Major Area</b>		
PMUS 6726	Voice (four semesters required; 1 credit each) <sup>1</sup>	4
PMUS 5497	Vocal Repertoire Coaching (four semesters required; 1 credit each)	4

Additional coursework in vocal literature, voice pedagogy, entrepreneurship, or musicology/music theory at the 4000- or 5000-level. <sup>3</sup>		2
<b>Total Credit Hours</b>		<b>20</b>

<sup>1</sup> One-hour weekly lesson, plus one-hour weekly performance class.

<sup>2</sup> A maximum of two credits at the 4000-level may be taken in fulfillment of the certificate requirements.

<sup>3</sup> Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exams.

## Artist Diploma: Orchestral Performance - Graduate Certificate

This program is for pre-professionals who exhibit potential for successfully gaining employment in an orchestra.

The program offers exceptionally gifted instrumentalists the opportunity to deepen their artistry, broaden their musical perspective, and refine their performance skills under the guidance of College of Music faculty. In addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music. Students are provided both coaching and individualized instruction, with extensive opportunities for performance, in preparation for an orchestral performance career.

### Requirements

#### Admission Requirements

Professional performance level on an orchestral instrument, an earned baccalaureate degree and a successful audition are required for admission into this program.

<b>Total Credit Hours</b>		<b>22</b>

<sup>1</sup> Students awarded an assistantship position will be considered for additional performance-related service to the College. String students will participate in University Symphony Orchestra each semester.

<sup>2</sup> A maximum of two credits at the 4000-level may be used to fulfill certificate requirements.

<sup>3</sup> A maximum of two credits at the 4000-level may be used to fulfill certificate requirements.

<sup>4</sup> Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exam.

## Artist Diploma: String Quartet Performance - Graduate Certificate

The professional certificate in string quartet performance is designed to provide intensive performance experiences and coaching for those that have the potential for a career in string quartet performance. An earned baccalaureate degree in performance is the minimum requirement for admission into this program.

Students are provided both coaching and individualized instruction, with extensive opportunities for performance, as well as elective studies in entrepreneurship, in preparation for a performance career.

Applications are open to:

1. Pre-formed string quartets.
2. Individuals who would like to be considered for placement in a new graduate string quartet formed by the Takács Quartet. The Takács Graduate Quartet Residency is a two-year position with only one ensemble in residence at a time.

## Requirements

### Admission Requirements

Admissions requirements for this program include completing all required university graduate admission requirements, submitting a CU Boulder application, three letters of recommendation, a pre-screening recorded audition, performing a live audition and being interviewed by faculty.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Requirements in Major Area</b>		
PMUS 6696 or PMUS 6706 or PMUS 6716	Viola (two semesters for one year) <sup>1</sup> Violin Violoncello	4
TMUS 6956	Master's Thesis (chamber music recitals; two semesters) <sup>2</sup>	4
TMUS 6957	Master's Thesis 2 (chamber music recitals; two semesters) <sup>2</sup>	4
EMUS 5327	Symphony Orchestra (two semesters) <sup>3</sup>	2
<b>Other Requirements in Music</b>		
Entrepreneurship (selected from the following)		2
MUSC 5918	Building Your Music Career	
MUSC 5988	The Entrepreneurial Artist	
MUSC 5978	Introduction to Arts Administration	
<b>Electives</b>		
Additional credits in the College of Music at the 4000- or 5000-level. <sup>4,5</sup>		4
<b>Total Credit Hours</b>		<b>20</b>

<sup>1</sup> Applied string instruction. Registration for applied study is for two credit hours per semester, entitling each member of the quartet to one hour of private lessons per week.

<sup>2</sup> This four-recital requirement entitles the quartet to one hour of coaching per week. The string faculty will decide if one of these recitals should be a solo recital.

<sup>3</sup> Two fall semesters as principals in the Chamber Orchestra (1 credit each).

<sup>4</sup> A maximum of two credits at the 4000-level may be taken in fulfillment of the certificate requirements.

<sup>5</sup> Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary examinations.

## Artist Diploma: Vocal Coaching - Graduate Certificate

This graduate program is for pre-professionals who exhibit potential for a specialized career in vocal accompanying.

The program offers exceptionally gifted collaborative pianists the opportunity to deepen their artistry, broaden their musical perspective, and refine their performance skills under the guidance of College of Music faculty. In addition, all Artist Diploma students have access to courses and career advising offered by the Entrepreneurship Center for Music. Students are provided both coaching and individualized instruction, with extensive opportunities for performance, in preparation for a career as a professional vocal coach.

## Requirements

### Admission Requirements

An earned master of music degree in collaborative piano with commensurate language and diction training (or equivalent professional experience) and a successful audition are required for admission into this program.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Category I: Requirements in Music</b>		
PMUS 6636	Applied Instruction (Four semesters required, one-hour weekly lesson plus weekly studio class; to be divided equally between collaborative piano and vocal coaching)	8
TMUS 6956	Master's Thesis (Two collaborative recitals - vocal)	4
TMUS 6957	Master's Thesis 2 (Collaborative recital - instrumental)	2
TMUS 6957	Master's Thesis 2 (Opera Scenes Performance)	2
PMUS 5157	Opera Theatre Practicum (Serve as rehearsal pianist and continuo player for all major operas, as well as outreach presentations and special events) <sup>1</sup>	0-4
<b>Category II: Other Requirements in Music</b>		
MUSC 5375	Opera Coaching for Pianists	2
<b>Electives</b>		
Additional coursework in collaborative literature, song literature, pedagogy, musicology, ethnomusicology or theory. <sup>2</sup>		2
<b>Total Credit Hours</b>		<b>20-24</b>

<sup>1</sup> Student enrolls for variable credit according to faculty recommendation.

<sup>2</sup> Students who wish to take academic classes at the 5000-level or above will be required to pass the appropriate preliminary exam.

## Arts Administration - Graduate Certificate

CU Boulder's professional graduate certificate in arts administration provides students with the managerial skills and knowledge to work in the performing arts industry. Students will gain knowledge and insights into the opportunities and challenges facing today's arts administration professionals. This program offers the skills and education needed for a successful career in arts management in music, dance and theater.

### Requirements

#### Admission Requirements

Applicants should have either an undergraduate degree in an arts discipline, or a bachelor's degree in any other discipline *plus* at least 3 years of professional experience working in an arts organization. This certificate program is also open to all students already enrolled in a graduate degree in music, theatre or dance.

#### Required Courses and Credits

The graduate certificate in arts administration is comprised of three 3-credit courses:

Code	Title	Credit Hours
MUSC 5978	Introduction to Arts Administration	3
MUSC 5938	Management and Leadership in the Arts	3
MUSC 5948	Sustainable Arts Organizations: Forecasting and Fundraising	3

For application instructions and deadlines, please consult the Graduate School's Admissions (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/program-information-deadlines/>) webpage and the College of Music.

## Music Theory - Graduate Certificate

The Graduate Certificate in Music Theory provides advanced studies in music theory and theory pedagogy without the full requirements of the master's degree in music theory. This credential enhances the professional training and future employment options for students in existing graduate degrees across the College of Music. The curricular requirements of the Music Theory Certificate are readily combined with theory coursework required in all MM and DMA degree programs.

### Requirements

The Graduate Certificate in Music Theory requires 12 credit hours. Required coursework includes MUSC 6051 Pedagogy of Music Theory (3) and TMUS 5524 Special Study-Music Theory (3), which culminates in a research project and public presentation of research.

For the remaining 6 credit hours, students also must complete two of the three following 3-credit courses: MUSC 5151 Topics in Music Analysis-Schenkerian Analysis; MUSC 5071 Post-tonal Theory and Analysis I (3); and a further elective, either MUSC 5151 Topics in Music Analysis (3) for MM students, or Advanced Topics in Music Theory (MUSC 6801 Advanced Topics in Music Theory (3) for DMA and PhD students.

Any of the required courses listed here may also be applied toward theory coursework required in the student's major degree program.

## Music Education

Students in this degree program complete advanced studies that are designed to refine their teaching philosophy and practices. These studies include courses in historical and philosophical foundations of music education, psychological theories of music learning, basic research methods, curriculum development and assessment. The minimum number of credit hours required is 30.

The college also offers a master of music education degree/certification with K-12 teaching for students who have completed an undergraduate degree in music, but in a major area other than music education. Coursework leads to a master's degree and a Colorado K-12 music teaching license. The entire program requires a minimum of 71 credit hours.

### Master's Degree

- Music Education - Master of Music Education (MMusEd) (p. 1758)

### Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

### Courses

#### MUSC 5002 (3) Proseminar in Historical Musicology

Prepares students to pursue independent research in the history of music. Meeting as a seminar, the course focuses on the nature of evidence, methods and tools of research, and theoretical or historiographic issues.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5011 (2) 16th Century Counterpoint**

Provides a stylistic study of the main contrapuntal genres of the period including free, two- and three-part imitative counterpoint in the style of Palestrina. Provides a foundation in species counterpoint, working towards free counterpoint; stresses composing in 16th century styles. Offered fall of even-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4011

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5012 (3) African Music**

Studies music cultures of Africa and the Black Diaspora, including folk and art music traditions, religious and popular music genres. Specific course topics could cover any or all of these styles, including exploring interconnections of musical stylistics of Africa and the Black Diaspora.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4012 and MUEL 4012

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5021 (2) 18th Century Counterpoint**

Provides a stylistic study of main contrapuntal genres of the period including inventions, suite movements and fugues. Provides a foundation in species counterpoint; stresses analysis and composing in the styles. Offered fall terms only.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5026 (2) Percussion Literature**

In-depth investigation of major original solo works for percussion, significant ensemble literature including chamber and large ensembles, and selected transcriptions. Offered fall semester of even numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5036 (2) Brass Literature**

Investigates major original solo works for trumpet, horn, trombone, euphonium, and tuba, and ensemble literature including chamber and large settings. Offered every other spring term.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5041 (3) Advanced Orchestration**

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5061 (3) Advanced Tonal Analysis**

Surveys tonal repertory and analytical techniques. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5071 (3) Post-tonal Theory and Analysis I**

Focuses on theory and analysis of post-tonal literature pre-1945. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5078 (1) Piano Technician for Pianists**

Familiarizes pianists with the development of the modern grand piano, its construction and the proper terminology of parts and specifications. Trains pianists in minor repairs and adjustments of the grand piano action and in minor tuning tasks.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4078

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite piano majors.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5081 (3) Applications in Music Technology**

Presents advanced strategies for applying computer technology in music creation. Synthesis, DSP, MIDI and audio sequencing, as well as advanced music engraving, will be explored through the use of various software platforms including Logic, Reason, MAX and Finale. Offered fall term only.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5091 (3) Contemporary Theory - Jazz and Modal Music**

Studies the composition and improvisation of Herbie Hancock, Wayne Shorter, Chick Corea and their contemporaries. Broadly examines modality in jazz and its similarities to music of Ravel and Debussy, as well as systems of organization in Messiaen and others. Strategies for analysis and integration of the material into a personal vocabulary as a composer and improviser are explored. Offered spring of even-numbered years.

**Requisites:** Requires prerequisite course of MUSC 3081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5103 (3) Teaching General Music**

Provides an in-depth examination of teaching and learning processes in the elementary general music classroom, based on the integration of child development and musical development theories with content and delivery skills appropriate for K-5 general music classrooms. Students implement and evaluate music instruction, design curricular projects, and build a repertoire of vocal, instrumental, and speech-based arrangements. Offered fall of odd-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5112 (3) Proseminar in Ethnomusicology**

Examines the definition, scope, and methods of ethnomusicology, the discipline that focuses on approaches to the study of music theory, history, and performance practices of world cultures.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5121 (3) Advanced Topics in Music Technology**

Conducts advanced research in techniques and tools of music technology. Topics vary from term to term and may include: user interfaces for computer music; advanced sound design; digital modeling of acoustic sounds; computer-aided analysis of sound; modeling music intelligence in real time. Lectures and work sessions will support student projects.

**Repeatable:** Repeatable for up to 9.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 5081 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5136 (2) Advanced Conducting**

Offers advanced work in conducting.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5141 (2) Instrument Design Lab: Sound, Perception & Creativity**

Explore fundamental physical concepts of sound and music in a hands-on laboratory environment. Survey a number of topics through the construction of PVC overtone flutes, an investigation in the timbral intention of Dolly Parton's vocal technique, physical modeling through the testing of 3D-printed vowel flutes, the construction of a "Long String Instrument," and more. Specific topics include: tuning and temperament, harmony and timbre, and preparing the piano (digital and analog).

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4141

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5142 (3) American Indian Music**

Examines Native North American musical cultures, emphasizing music as an integral part of religious expression and community life.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4142

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5143 (2) Topics in Choral Music Education**

Prepares students to teach, conduct and facilitate music making in various choral ensembles. Examines skills, teaching techniques and administrative procedures necessary for developing and maintaining various choirs at the elementary through high school levels. Includes discussion of current topics in choral music education and community choral field experiences. Offered fall terms, every two years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4143

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5151 (3) Topics in Music Analysis**

Analytical study of a specific topic to be determined by the instructor (e.g., German Lieder, Bartok quartets, tonal rhythm, Schenker, etc). Study published analyses representing a variety of methodologies and produce original analyses. Student must have passed graduate preliminary exams or completed remediation before enrolling in this course.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 5061 or MUSC 5071 as appropriate to the topic, or instructor consent required.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5153 (1) Advanced Topics in K-12 Music Pedagogy**

Examines the literature, skills, and pedagogical applications of selected topics applicable to all K-12 Music Educators such as curriculum, music listening, and composition.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Music Education (MMED-MMUE) students only.

**Grading Basis:** Letter Grade

**MUSC 5156 (2) Symposium in Choral Music**

Provides an advanced study of choral repertoire by style period. Required of all choral graduate students for a minimum of two semesters.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5163 (1) Advanced Topics in Secondary Choral Music Education Pedagogy**

Examines the literature, skills, and pedagogical applications of selected topics in choral music classrooms, such as adolescent vocal development, vocal jazz ensemble directing, and development of piano skills.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5168 (3) World Music Theories**

Examines music rules, concepts or music theories and sociocultural elements that musicians use in creating musical sound, with emphasis on music practices from a variety of world traditions; observing shared and diverging principles, making cross-cultural comparisons and developing a new pedagogy that supports the substantive study of global musics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4168

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 5173 (1) Advanced Instrumental Techniques and Pedagogy**

Reviews and expands knowledge of brass, woodwind, percussion, or string instrumental techniques and pedagogical tools, extending upon skills gained in a typical introductory class teachers complete prior to licensure. Students complete a project based on synthesizing new pedagogical resources and materials. Intended for music educators who teach in K-12 school settings.

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to Music Education (MMED-MMUE) students only.

**Grading Basis:** Letter Grade

**MUSC 5176 (2) Conducting 3**

This is a study in advanced conducting techniques. Demonstration of advanced score study techniques as well as the application to gesture and rehearsal techniques linked with conducting will be explored. Participation fully in discussion readings and contribute to the learning of all is expected.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4176

**Repeatable:** Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Restricted to Music Education (MMED) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5183 (2) Research in Music Teaching**

Introduces basic descriptive, experimental, and qualitative research methods, including sampling, design, data collection, and analysis. Students review published music research and conduct one original research study. Offered fall of odd-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5203 (2) Topics in Music Education**

Provides an in-depth examination of contemporary topics in music education. Students implement and design relevant projects.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5215 (1-2) Studies in Piano Teaching**

Studies the practical aspects and techniques for teaching piano at the intermediate and advanced levels in pre-college and college settings, as well as teaching group piano at the college level.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisites: MUSC 5305 and MUSC 5315.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5246 (3) Jazz Improvisation and Analysis**

Application of performance skills for the advanced improviser through specific harmonic, melodic and rhythmic techniques. Also includes analysis of transcriptions and varied harmonic contexts as well as a focus on the development of repertoire. Offered fall semester of odd-numbered years. Requires prerequisite course or instructor consent.

**Requisites:** Requires prerequisite course of MUSC 3071 (minimum grade D-). Restricted to Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5256 (3) Jazz Studies Administration and Pedagogy**

Surveys approaches, techniques, philosophies and materials available for teaching jazz at both pre-college and collegiate level. Subject areas covered include improvisation, composition and arranging, studio teaching and directing ensembles. Studies the organization and administration of collegiate jazz programs. Topic include curriculum, program philosophy, teaching techniques, funding, teacher training and evaluation. Offered fall terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 3253.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5273 (2) Comprehensive String Pedagogy**

Comparative study and application of the principles of string teaching. In-depth analysis of individual instrument pedagogy and application to advanced studio and class teaching. Historical survey of major violin, viola, cello, and double bass pedagogues. Includes apprenticeship teaching. Offered fall of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5285 (3) Organ Survey**

Survey of organ repertoire and the history of organ building from the 16th century to the present.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4285

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5305 (2) Piano Pedagogy Group Techniques**

Discusses materials and techniques for teaching beginning piano students of various ages in studio and class settings. Special attention given to adult classes. Includes an introduction to educational technology used in group instruction. Offered fall of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5313 (3) Teaching Choral Music**

Examines choral music curricula, instructional materials and teaching techniques appropriate for secondary choral settings. Also addresses administrative strategies for choral music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4313

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5315 (2) Piano Pedagogy: Intermediate Literature**

Surveys repertoire at the intermediate level and discusses teaching techniques. Explores issues related to intermediate and advanced piano performance, such as performance anxiety, physical and psychological well-being of the performer, and the development of technique. Introduces educational technology relevant to intermediate teaching. Offered spring of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5325 (2) Keyboard Literature 1**

Examines areas of style, genre, and performance practice in selected keyboard music from 1600 to 1830. Emphasizes student presentation of specific topic areas. Offered fall terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5335 (2) Keyboard Literature 2**

Examines areas of style, genre, and performance practice in selected areas of keyboard music from 1830 to the present. Emphasizes student presentation of specific topic areas. Offered spring terms of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5336 (2) Brass Pedagogy**

Analyzes pedagogical techniques and philosophies of teaching brass instruments, and examines materials. Offered every other spring terms.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4336

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5345 (2) Research: Piano Literature and Pedagogy**

Looks at individual or group research related to piano pedagogy or literature for piano.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5346 (2) Woodwind Pedagogy**

Provides the knowledge and skills to teach woodwind instruments in both individual studio and collegiate class settings. Considers pedagogical techniques for all levels of instruction. Offered fall terms of odd-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4346

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5356 (2) Jazz Studies Practicum**

Implements independent, project-based studies for further developing knowledge and experience in jazz pedagogy, performance and composition. Student is assessed and guided by faculty to develop specific skills needed toward becoming a more effective jazz educator. Offered spring of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 5256.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5365 (2) Advanced Accompanying**

An in-depth study of collaborative repertoire in individually assigned projects, coached by collaborative piano faculty and others.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5375 (2) Opera Coaching for Pianists**

Teaches skills for opera coaches and rehearsal pianists.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5405 (2) Basso-Continuo Accompaniment**

Studies the history, theory and practice of Basso-continuo accompaniment. Provides practical instruction in realizing harmony from a given bass line (figured or unfigured), projecting affect and creating dynamics at the harpsichord. Emphasizes individual cognition and creativity. Offered fall term only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4405

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5425 (2) Collaborative Literature for Piano with Winds, Brass, and Percussion**

Study of all forms of wind, brass and percussion repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered fall terms of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5435 (2) Collaborative Literature for Piano with Strings**

Study of all forms string repertoire involving collaboration with piano including sonatas, duos, short pieces and concerti. Collaborative piano major or instructor consent required. Offered spring terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 5443 (3) Teaching Instrumental Music**

Examines instrumental music curricula, instructional materials and teaching techniques appropriate for rehearsal, class, and lesson settings. Also addresses administration strategies for instrumental music programs. Offered spring only.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4443

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5444 (2) Vocal Pedagogy**

In depth study of the physiology, acoustics, and health aspects of the singing voice. Recommended for all graduate students in voice.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5446 (1) Supervised Teaching Practicum**

Designed to provide supervised teaching experience that includes feedback on weekly teaching; weekly and longer-term planning; and reflection on the impact of teacher characteristics and actions on student development.

**Repeatable:** Repeatable for up to 5.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 5273 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5454 (2) Repertory for Young Voices**

Survey of the solo repertoire for young voices, the physiological aspects of mutational voices, techniques of vocalizing young voices, and class voice procedure.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5464 (2) Voice Literature I: French Song Literature and Oratorio/Concert Solo Literature**

Explores the vocal literature of French Art Song and Oratorio/Concert Solo Literature in a graduate-level survey course taught in two modules.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Voice

**MUSC 5484 (2) Graduate Seminar in Vocal Pedagogy**

A thorough investigation of the challenges of studio voice pedagogy, including corrective techniques, psychological philosophies, and video analysis of student teaching. Examination and evaluation of comparative methodologies of vocal technique.

**Requisites:** Requires prerequisite course of MUSC 5444 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5564 (2) Voice Literature II: German, British & American Song Literature**

Explores the rich variety of German, British and American Song Literature from the late Middle Ages to the present in a graduate-level survey course taught in two modules.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Voice

**MUSC 5583 (2) Inclusive Music Classroom**

Surveys strategies necessary for teaching music to all students, including those with special needs. Offered fall of even-numbered years.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4583

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 5608 (1) Wellness for Musicians 1**

Explores strategies that help musicians maintain health while achieving peak performance. Investigate and employ powerful somatic methodologies including Alexander Technique and Body Mapping that improve physical functioning and prevent injury. Incorporates a variety of wellness aspects such as performance psychology, mental health, effective exercise, nutrition, breathing, hearing and vocal health.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5642 (3) Jazz History and Literature**

Studies musical trends and cultural forces influencing jazz, with analysis of improvisational styles, melodic and motivic variations, transcriptions and orchestrations from significant periods in its history. Offered spring terms only.

**Requisites:** Requires prerequisite course of MUSC 3642 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5666 (2) Chamber Music Literature: Woodwinds**

Provides a stylistic-historical survey in various genres from Baroque era to present. Offered fall terms of even numbered years.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 5708 (2) Introduction to Music Bibliography and Research**

Explores basic informational sources about music and musicians; a study of citation formats, research methodologies and writing techniques employed in music research papers, theses and dissertations. Intended to increase students' information fluency. Required in all master's degree programs.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5712 (3) Renaissance Music**

Provides a repertory and analysis of polyphonic music, 1400-1600.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4712

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5742 (3) Performance Practice of Early Music**

Examines instrumental and vocal performance practices through the 18th century. Topics may vary from year to year.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5752 (3) Women in Music**

Examines the role of women as creators and performers of Western Music. Explores related issues in musicology, including canon formation, reception history and feminist aesthetics.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4752

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5762 (3-4) History of Choral Literature**

Provides a seminar in analysis of musical style and history of choral repertory. Those wishing review of literature and repertory may enroll for 4 credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5772 (3) History of Opera**

Examines representative operas from the 17th through the 21st centuries. Emphasizes both cultural and analytical aspects and surveys related musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4772

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5802 (3) Studies in 20th Century Music**

Offers intensified work in history of music in the 20th century. Topics vary from year to year.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4802

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5808 (1) Wellness for Musicians 2**

Develops and further integrates material covered in Wellness for Musicians 1. Deeper exploration of somatic and wide-ranging wellness strategies, including FM Alexander's conception of Inhibition and other approaches for proactive self-care and improvement. Consideration of how to integrate methodologies in teaching, pedagogy, and practice. Students will complete several projects related to their specific musical pursuits and interests.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4608

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Requires prerequisite course of MUSC 5608 (minimum grade C-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 5822 (3) Ancient and Medieval Music**

Surveys sources from the ancient Greeks to the early Christian era and music from the 8th to the 14th century.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5832 (3) Studies in American Music**

Offers intensified work in folk, popular, and art music of the United States.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5842 (3) Aesthetics of Music**

Surveys various philosophies of music in writings of philosophers, psychologists, sociologists, composers, critics and historians.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5852 (3) 17th and Early 18th Century Music**

Examines music and writings about music from the Baroque era. Emphasizes cultural and musical analysis and surveys current musicological literature.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4852

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5872 (3) Late 18th and 19th Century Music**

Studies European and American music from the last developments of the styles through romanticism and its later 19th century reverberations.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4872

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Recommended:** Prerequisite or corequisite MUSC 3812.

**Additional Information:** Departmental Category: Musicology

**MUSC 5882 (3) Studies in 18th and 19th Century Music**

Meets as a seminar and examines selected topics in Classic and Romantic music, 1750-1900. Topics vary from year to year.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5892 (3) Latin American Music**

Explores music of cultures of the Americas south of the United States and in the diaspora, emphasizing the relationships of music and culture in folk, popular and arts styles.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4892

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 5908 (1-3) Internship in Music Business**

Engage with music/music business organizations in the community (for profit or non-profit) to pursue specific tasks or projects relevant to the student's career goals. A minimum of 48 hours is required per semester for one credit.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4908

**Repeatable:** Repeatable for up to 3.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5918 (2) Building Your Music Career**

Develop a broad range of tools needed for a professional career in music. Topics include networking, development and use of promotional materials, funding, social media and the internet and financial management, among others - all taught through an entrepreneurial lens. A range of career opportunities is explored, using the entrepreneurial process to assess and explore a variety of paths and opportunities.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 2918

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5938 (3) Management and Leadership in the Arts**

Focus on management, leadership, and communication strategies and their application to arts organizations. Concepts and approaches for leaders of small, medium, and large arts organizations in both the for-profit and nonprofit sectors, including human resource management, problem solving, and effective communication will be examined. Students will practice and refine their written communication skills by writing clearly and concisely throughout the course.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4968

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5948 (3) Sustainable Arts Organizations: Forecasting and Fundraising**

Equips students to create comprehensive fundraising plans rooted in strategic business planning for arts organizations, which depend on contributed income for sustainability. Students will learn the basics of planning, budgeting and forecasting, along with proven, effective fundraising strategies and techniques. Includes case studies and guest speakers with extensive professional expertise in the field.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 5958 (2) Community Performances**

Explore the real-world issues of planning and presenting concerts. Learn to program music for all types of audiences, gain confidence speaking about your music and handle the logistics of concert production. Discuss the role of concerts in the 21st century and examine new styles of presentation, audience engagement and outreach. Course culminates in a concert presented in a local venue.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4958

**Requisites:** Requires prerequisite course of MUSC 5918 (minimum grade D-). Restricted to College of Music (MUSC) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5978 (3) Introduction to Arts Administration**

Introduce students to current trends in arts administration, explore the fundamentals of managing arts organizations and develop concrete tools for managing boards, volunteers and staff, effective fund raising, strategic planning and program development. Current issues, the role of the arts and arts advocacy will be discussed.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4978

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 5988 (3) The Entrepreneurial Artist**

Learn the core principles of entrepreneurship, such as idea formation, venture models, opportunity assessment, market analysis and strategies for launching a venture and apply them to entrepreneurial ideas. Lectures, projects, entrepreneur interviews and case studies will culminate in a feasibility study for an original entrepreneurial concept.

**Equivalent - Duplicate Degree Credit Not Granted:** MUSC 4988

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 5918.

**Additional Information:** Departmental Category: Music Entrepreneurship

**MUSC 6041 (3) Advanced Orchestration**

Provides an advanced study of orchestration techniques through score analysis and student projects. Offered spring of even-numbered years.

**Requisites:** Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 6051 (3) Pedagogy of Music Theory**

Explores methods, materials, practical techniques for teaching undergraduate music theory, aural skills and analysis. Student must have passed general written theory and aural skills preliminary exam or completed remediation before enrolling in course. Offered spring of odd-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 6113 (2) Foundations of Music Education**

Surveys historical and philosophical bases of contemporary music education. Offered fall of even-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6133 (2) Comprehensive Musicianship through Performance**

Explores curricular models for music education. Emphasizes comprehensive musicianship and standards-based frameworks for curriculum and development. Offered spring terms of even-numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6193 (1-3) Selected Studies in Music Education**

Instructor consent required.

**Repeatable:** Repeatable for up to 12.00 total credit hours.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED-MMUE) students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6203 (2) Psychology of Music Learning**

Provides an overview of psychological concepts relevant to music teaching and learning. Topics include learning theories, selected individual difference variables (motivation, anxiety, creativity, and personality), physiological structures related to hearing, psychoacoustics, and approaches to examining musical ability (e.g. brain research, music aptitude, and skill acquisition). Offered spring terms only.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6213 (2) Assessment of Music Learning**

Provides an overview of traditional and contemporary approaches to music assessment. Topics include psychometrics, standardized tests, test construction, grade reports, and student portfolios. Offered on a rotating basis during summer session.

**Requisites:** Restricted to Music Education (MMED-MMUE) graduate students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 6223 (2) Sociology of Music Education**

Studies sociological perspectives related to music education. Topics include functions and uses of music; teacher and student role/identity development; social aspects of music performance, and cultural perspectives on music learning. Offered fall of even-numbered years.

**Requisites:** Restricted to Music (MUSD) or Music Education (MMED or MUED) graduate students only.

**Recommended:** Prerequisite MUSC 6113.

**Additional Information:** Departmental Category: Music Education

**MUSC 6233 (2) Pedagogy of Music Teaching and Learning**

Explores four topics (reflective/critical thinking, teacher effectiveness, cultural/program contexts, teachers' lives/career development) relevant to long-term teacher development. Includes individualized feedback on teaching. Open to graduate students in music education and performance-pedagogy. Offered spring terms of odd numbered years.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Recommended:** Prerequisite MUSC 6113 and/or significant teaching experience.

**Additional Information:** Departmental Category: Music Education

**MUSC 6243 (1) Applications of Music Pedagogy**

Provides a structured, collaborative environment for graduate students with K-12 teaching duties to apply the content from music education courses to their current pedagogical environments. Students will apply inquiry strategies as they design and implement an applied project that synthesizes specific theoretical or conceptual areas. Offered fall term only.

**Repeatable:** Repeatable for up to 2.00 total credit hours.

**Requisites:** Restricted to Music Education (MMED-MMUE) graduate students only.

**Grading Basis:** Letter Grade

**Additional Information:** Departmental Category: Music Education

**MUSC 6325 (2) Seminar in Piano Literature**

Provides an intensive study of a selected area of repertoire or history. Offered fall terms only.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to College of Music (MUSCG) graduate students only.

**Additional Information:** Departmental Category: Keyboard

**MUSC 6343 (1) Capstone Portfolio Project**

Designed as the capstone course for students enrolled in the Summer MME degree program. Students are guided in their composition of three summative essays involving reflection on connections between two or more courses, comparisons between their entrance essays and current thinking, and identification of pedagogical impacts on their K-12 teaching.

**Requisites:** Restricted to Music Education (MMED-MMUE) graduate students only.

**Grading Basis:** Letter Grade

**MUSC 6801 (3) Advanced Topics in Music Theory**

Intensive study of a specialized topics in theory and analysis through critical reading and analysis, class presentations and independent research. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

**Repeatable:** Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 6822 (3) Advanced Studies in Musicology**

Intensive study of a specialized topic in musicology. Students will be guided in critical reading, historical or ethnographic issues, analysis, oral presentations, and independent research.

**Repeatable:** Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

**Requisites:** Requires prerequisite course of MUSC 5708 (minimum grade D-). Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Musicology

**MUSC 7046 (3) Seminar in Jazz Literature**

Provides advanced study in jazz literature and styles. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires class presentations and a major paper or project. Offered spring semester only.

**Repeatable:** Repeatable for up to 6.00 total credit hours.

**Requisites:** Restricted to Music (MUAD, MUED or MUSD) graduate students only.

**Recommended:** Prerequisites MUSC 5091 and MUSC 5642.

**Additional Information:** Departmental Category: Choral and Instrumental Music

**MUSC 7103 (3) Historical Research in Music Education**

Topics include oral history, archival collections, data verification, and critiquing/publishing research. Students conduct one original research study. Offered spring of even-numbered years.

**Requisites:** Restricted to Music Education (MMED-MMUE) doctoral students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7113 (3) Quantitative Research in Music Education**

Topics include sampling, questionnaire development, research design, intermediate and advanced statistics, presenting/publishing research, and research ethics. Students conduct an original research study. Offered fall of even-numbered years.

**Requisites:** Restricted to Music Education (MMED-MMUE) students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7138 (3) Contemporary Issues in College Teaching**

Examines music teaching within colleges and universities, including the evolution of university music programs, undergraduate and graduate music curricula, music professors and their work, and sociopolitical issues. Offered spring of odd-numbered terms.

**Requisites:** Restricted to College of Music (MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Interdepartmental Courses

**MUSC 7143 (3) Qualitative Research in Music Education**

Topics include qualitative research traditions, site and participant selection, data collection and analysis methods, quality standards, and research ethics. Students conduct an original research study. Offered fall of odd-numbered years.

**Requisites:** Restricted to MUED students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7203 (3) Doctoral Seminar in Music Education**

Provides an advanced study of topics central to the music education profession. Requires class presentations and a major paper or project. Offered fall of even-numbered years.

**Requisites:** Restricted to MUED students only.

**Additional Information:** Departmental Category: Music Education

**MUSC 7801 (3) Doctoral Seminar in Music Theory**

Provides advanced study in theory. Students present results of research on individually chosen topics or aspects of a topic central to the class. Requires a major paper or project. Student must have passed graduate preliminary exams and completed 6 credits hours of graduate-level theory before enrolling in course. Instructor determined prerequisite will be enforced as appropriate to the topic.

**Requisites:** Requires a prerequisite course of MUSC 5708 (minimum grade D-). Restricted to College of Music (MUED or MUSD) graduate students only.

**Additional Information:** Departmental Category: Theory and Composition

**MUSC 7822 (3) Seminar in Musicology**

Required of all musicology majors before completion of comprehensive examinations. A different research area is designated each semester. Offered fall only.

**Requisites:** Restricted to Music (MUSD) graduate students only.

**Additional Information:** Departmental Category: Musicology

**NCMU 5093 (0.2-3) Special Topics in Music**

**Repeatable:** Repeatable for up to 3.00 total credit hours.

## Music Education - Master of Music Education (MMusEd)

The Master of Music Education program addresses the professional development needs of music teachers in the field. Students are challenged to develop a greater understanding and mastery of music teaching-learning processes, to improve personal musicianship, and to become committed leaders within the music education profession.

Students in this degree program complete advanced studies that are designed to refine their teaching philosophy and practices. These studies include courses in historical and philosophical foundations of music education, psychological theories of music learning, basic research methods, curriculum development, and assessment. The minimum number of credit hours required is 30.

The college also offers a Master of Music Education degree/certification with K–12 teaching for students who have completed an undergraduate degree in music, but in a major area other than music education. Coursework leads to a master's degree and a Colorado K–12 music teaching license. The entire program requires a minimum of 71 credit hours.

## Requirements

### Admission Requirements

Applicants are expected to provide evidence of undergraduate preparation equivalent to that required for the bachelor of music education degree at this university. Applicants also must possess a music teaching certificate/license or agree to work toward a Colorado music teaching license. GRE scores are not required for admission, but can be helpful in determining merit-based financial aid. Individuals who wish to pursue music performance or conducting as their cognate area must demonstrate at least senior-level proficiency on their particular medium through an audition.

### Program Requirements

#### Program of Study

Students earning the MMusEd degree must complete a minimum of 30 credit hours of course work, including 12 credit hours in music education, 12 credit hours in music and 6 credit hours of open electives in a specialization area or other areas of interest. Of the 12 credit hours in music, a 2-credit-hour course in bibliography and research is required, as well as 6 credit hours of study in a cognate area, which includes musicology/ethnomusicology, music theory/music technology or performance (including conducting, pedagogy and jazz studies).

The music component of the degree should assist students in developing their musical knowledge and skills. One member of the student's graduate advisory committee should be from the cognate area, and it is assumed that at least some part of the student's study is with that faculty member. All music studies must be at the 5000 level or above.

Under special circumstances, up to 6 credit hours at the 4000-level may be applied to the open electives portion of the degree.

Students typically complete the degree in two academic years, or one academic year plus two summers. Degree work must be completed within four years of the semester in which the student is accepted into a degree program and begins studies. A summers-only MMusEd program (completed in three summers) is also available; for details, see the Summer MMusEd webpage (<https://www.colorado.edu/music/summer-college-music/summer-mme/>) or contact the music education faculty. Because most master's level music education courses are offered in late afternoons, students who live within commuting distance can earn a significant portion of credit toward the degree while continuing to work full time.

### Required Courses and Credits

Code	Title	Credit Hours
<b>Category I - Music Education</b>		
MUSC 6113	Foundations of Music Education	2
MUSC 6203	Psychology of Music Learning	2
MUSC 5183	Research in Music Teaching	2
MUSC 6233	Pedagogy of Music Teaching and Learning (Required for Summer MME students; optional for AY students)	2
Music Education electives and workshops		4-6
<b>Category II - Other requirements in music</b>		
MUSC 5708	Introduction to Music Bibliography and Research	2
<i>Cognate Area</i> <sup>1</sup>		6
Courses accepted for this requirement include:		
5000- or 6000-level MUSC course		
5000-level PMUS course (Applied Lessons)		
IMUS 5093	Contemporary Topics in Music Education <sup>2</sup>	
PMUS 5536	Intermed Conducting <sup>2</sup>	
MUSC 5156	Symposium in Choral Music <sup>2</sup>	
MUSC 6243	Applications of Music Pedagogy <sup>2</sup>	
MUSC 5136	Advanced Conducting	
IMUS 5018	Conducting Symposium <sup>3</sup>	
5000-level TMUS course <sup>2</sup>		
<i>Music Electives and Workshops (outside of major)</i>		4
Courses accepted for this requirement include:		
5000- or 6000- MUSIC course (except MUSC 5XX3 or MUSC 6XX3)		
5000-level PMUS course (Applied Lessons) <sup>4</sup>		
5000- or 6000-level EMUS course <sup>4</sup>		
IMUS 5093	Contemporary Topics in Music Education <sup>4</sup>	
5000-level TMUS course <sup>4</sup>		
<b>Electives</b>		
Elective courses and workshops/intensives. Courses accepted for this requirement include:		6
Any 5000- or 6000-level course (music or non-music)		
5000-level PMUS course <sup>2</sup>		
4000-, 5000- or 6000-level EMUS course <sup>2</sup>		

4000-level MUSC course<sup>2</sup>IMUS 5093 Contemporary Topics in Music Education<sup>2</sup>5000-level TMUS course<sup>2</sup>**Total Credit Hours** **30-32**

<sup>1</sup> Summer MME: Technology, Musicology, Ethnomusicology, Conducting. Academic Year MME: Technology, Theory, Musicology, Ethnomusicology, Conducting, Performance, Performance & Pedagogy, Piano Pedagogy, Vocal Pedagogy, Jazz Studies.

<sup>2</sup> Repeatable up to 6 hours.

<sup>3</sup> Repeatable up to 2 hours.

<sup>4</sup> Repeatable up to 4 hours.

## Dual Degree Program

### Master's Degree in Two College of Music Programs

Students may apply for a dual master's degree that combines any two master's programs (with approval from both departments) in the College of Music. To guarantee the ability to pursue a dual master's degree, the student must apply separately and be admitted by the faculty in each of the degree programs under their respective admissions procedures and standards. The student must be accepted into both degree programs at the time of the initial application. If a student is already accepted to the College of Music in one degree program and is interested in adding a second degree (dual degree plan), the second master's degree must be approved by both area Department Chairs and the Associate Dean of the College of Music. In consultation with the Department Chairs, Associate Dean and Graduate Studies Coordinator, a comprehensive degree plan will be devised for all requirements expected for the student to earn the dual degree. This plan must be completed before the last anticipated semester of study in the student's original degree. With the exception of thesis credit hours, courses that fulfill requirements in both degree programs need only be taken once to be counted for both degrees. A minimum of 45 credit hours must be earned.

## Musical Arts

The faculty of the College of Music has modeled the DMA degree programs at CU Boulder after the guiding principles outlined by the National Association of Schools of Music (NASM). As defined by NASM, the Doctor of Musical Arts degree is intended for those seeking "the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works, or pedagogy... Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice" (*NASM Handbook*, 2009–10: 116).

## Doctoral Degree

- Doctor of Musical Arts (DMA) (p. 1762)

## Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; BM, Curtis Institute of Music

Wolzien, Charles  
Professor Emeritus

## Musical Arts - Doctor of Musical Arts (DMA)

The DMA degree programs at CU Boulder are modeled after the guiding principles outlined by the National Association of Schools of Music. As defined by the NASM, the Doctor of Musical Arts degree is intended for those seeking "the highest level of professional practice emphasizing the creation or performance of musical works and the application and transmission of knowledge about musical works, or pedagogy... Creation, performance, and teaching are highly disciplined efforts; inquiry and investigation, and often research and scholarship, are components of performance practice" (*NASM Handbook*, 2016-17: 135).

This professional degree is intended for composers, conductors and performers who possess both creative and scholarly abilities. Graduates of this program go on to careers as composers and performers in solo, chamber music, opera, jazz or orchestra, or as choral, jazz, band and/or orchestral conductors. A particular focus of the DMA is the preparation for a career as a college, conservatory or university teacher. Students work closely with an advisor in developing a degree plan that reflects their needs and interests. This degree requires a minimum of 30 hours beyond the master's level, including 12 hours in seminar and other coursework, and a minimum of 18 hours of performance and written projects (constituting the dissertation portion of the degree).

For outlines of specific programs, visit the college's Degrees (<http://www.colorado.edu/music/academics/graduate-advising/degrees/>) webpage or contact the Music Graduate Studies office.

## Requirements

### Prerequisites

Entrance requirements include a master's degree in music or demonstrated background comparable to that of the master of music degree at this university. All graduate applicants must complete an audition, interview, or some other demonstration of their ability in the major field. If at all possible, a visit to the campus is strongly encouraged. As part of the application, composition majors should upload representative scores and recordings (to the digital portfolio tab on the application), and a list of completed compositions. Performance majors should submit a repertoire list and arrange for a personal audition and interview, if at all possible. Some areas require applicants to send a pre-audition screening recording of their performance. Conducting majors must upload a video of a performance. All DMA applicants must also submit a scholarly writing sample that demonstrates ability in critical thinking, appropriate research techniques, and skill in the cogent use of English. For full details concerning audition and application requirements, visit the college's Prospective Graduate Students (<http://www.colorado.edu/music/admissions/prospective-graduate-students/>) webpage.

## Course Requirements

Students must take a minimum of 30 credit hours of coursework, of which at least 18 credit hours are dissertation projects. Students take two doctoral topic classes (at the 6000 level), one each in musicology and music theory; prerequisites are stipulated by the theory and musicology faculties. Some areas require specific coursework prior to or in conjunction with work on dissertation projects. In other instances students may be advised to take coursework in preparation for the comprehensive examination. Applied music instruction may be elected for the duration of the residency requirement.

## Advisory Committee

Each DMA program is directed by a five-member advisory committee headed by the major advisor, who is usually the student's main studio teacher. At least one member must hold the PhD degree in musicology, music theory, composition or music education.

## Residence Requirements

The minimum residence requirement is six semesters of work beyond the attainment of an acceptable bachelor's degree. Two semesters of residence credit may be allowed for a master's degree from another institution of approved standing, but at least four semesters of residence credit, two of which must be consecutive in one academic year, must be earned for coursework and/or dissertation work taken at this university.

Not more than one-half semester of residence credit may be earned in a summer session. Students must be registered full-time to earn residence credit. For employed students, only those with one-fourth time or less in work that does not contribute directly to their degree program may earn full residence credit.

## Continuous Registration

After the residence requirements for the doctor of musical arts program have been satisfied, a student must enroll for fall and spring semesters of each year until attaining the degree. If a student has enrolled in all required dissertation courses but is still working on dissertation projects to complete the degree requirements, they should enroll in TMUS 8019, or TMUS 8029, until the degree is completed.

## Degree Plans

A degree plan approved by the advisory committee will be presented to the associate dean for graduate studies at the beginning of the second semester of residence. The student's major professor is responsible for helping the student formulate this plan. The plan should include members of the student's doctoral committee, projected remedial and supporting coursework, proposed dissertation projects, and tentative dates for the comprehensive and final examinations. In consultation with the major advisor, the student should form the five-member faculty advisory committee by the third semester in residence.

The following degree plans are available for the doctor of musical arts degree:

- Brass Performance and Pedagogy
- Percussion Performance and Pedagogy
- Composition
- Conducting and Literature - Choral
- Conducting and Literature - Orchestral
- Conducting and Literature - Wind
- Jazz Performance

- Solo Piano - Thesis
- Solo Piano - Non-thesis
- Collaborative Piano
- String Performance
- Voice Performance and Pedagogy
- Woodwinds Performance and Pedagogy

Learn more about degree plans on the College of Music's Degrees webpage (<https://www.colorado.edu/music/academics/graduate-advising/degrees/>).

## Language Requirement

Brass + percussion; collaborative piano; choral conducting; orchestral conducting; voice; and musicology students are required to demonstrate foreign language proficiency before being allowed to take the comprehensive examination. The choice of the language(s) must be approved by the student's advisory committee. Specific requirements include:

- Brass + percussion: Passing score on a foreign language repertoire terms exam
- Collaborative piano: instrumental emphasis: One year of French, German, or Italian; vocal emphasis: One year of two languages (selected from French, German, or Italian)
- Choral conducting: Two years of one language
- Orchestral conducting: Two years of one language
- Voice: One year of three languages. Students may petition the voice faculty for an exception to this policy. Please see the DMA Voice Performance & Pedagogy degree plan for more information.
- Musicology: Two years of two languages or specialty language training (with approval)

## Dissertation

The DMA dissertation consists of a specified number of performances, projects, and documents. The student's permanent advisory committee must approve all dissertation projects.

## Time Limit

DMA degree work must be completed within six years of first registration.

## Program Tracks

### Brass Performance and Pedagogy

Code	Title	Credit Hours
<b>Academic Requirements</b>		
MUSC 6822	Advanced Studies in Musicology	3
MUSC 6801	Advanced Topics in Music Theory	3

# LAW CATALOG

Welcome to Colorado Law. We are a diverse and inclusive community of outstanding students, faculty, staff and alumni who help one another succeed. Our selective admissions process keeps our student body small, enabling our faculty, staff, alumni and professional network to invest deeply in each student's success. Because we take our responsibility to educate and train future lawyers very seriously, our curriculum, research centers, and experiential learning opportunities are designed to prepare students for success in today's changing legal environment.

**Our students** have extraordinary credentials and life experiences (<http://www.colorado.edu/law/node/1759/>). In addition to being intelligent, congenial, hard-working and entrepreneurial, our students are engaged with the community. A plethora of active student organizations (<http://www.colorado.edu/law/node/239/>), rich externship opportunities (<http://www.colorado.edu/law/node/117/>) and a robust Public Service Pledge Program (<http://www.colorado.edu/law/node/123/>) enable our students to foster Colorado Law's tradition of service.

**Our faculty** (<http://lawweb.colorado.edu/profiles/allFaculty.jsp>) are national and international leaders in their fields and are committed to helping Colorado Law students develop the legal knowledge, critical thinking, writing and problem-solving skills necessary for professional success. Our intentionally designed low student-to-faculty ratio of 6.4 to 1 enables meaningful interaction between faculty and students, giving students abundant opportunities to develop deep substantive expertise and long-lasting professional relationships.

**Our staff** is devoted to helping students and alumni succeed. From the moment our students commit to attending Colorado Law and throughout their professional careers, we provide unwavering personal and professional support. Our admissions (<http://www.colorado.edu/law/node/1/>) office welcomes students to the Colorado Law community, and our student affairs (<http://www.colorado.edu/law/node/235/>) office provides support for students as they develop their professional identity and skills. Our career development office (<http://www.colorado.edu/law/node/177/>) helps students secure and retain rewarding employment. Those unsure about their field of interest can rely on our wealth of career exploration opportunities and resources.

**Our alumni** (<http://www.colorado.edu/law/node/255/>) represent Colorado Law in a variety of professional settings and fields across Colorado and nationwide. They thrive in a variety of professional domains: national law firms, regional law firms, government organizations (both at the federal and state levels), business organizations (often utilizing their legal skills in business roles), and public interest organizations. Not only do our alumni thrive professionally, but they also enthusiastically work with current Colorado Law students in a number of key ways that foster students' career success.

**We are educating students for success.** Our relevant and challenging curriculum prepares students to thrive in a variety of sectors and settings. Our three research centers enable students to develop unique connections and insights in today's most important fields, including:

- Natural Resources, Energy, and Environmental Law and Policy—the Getches Wilkinson Center (<http://www.colorado.edu/law/node/149/>).
- Technology and Entrepreneurship/Business—the Silicon Flatirons Center (<https://siliconflatirons.org/>).

- Public Law/Public Service—the White Center (<http://www.colorado.edu/law/node/135/>).

In addition, our Schaden Experiential Learning Program and Clinical Program (with nine clinics (<http://www.colorado.edu/law/node/53/>) representing a range of practice areas) allow students to develop and hone their legal skills through extensive real-world experiences while in school.

We invite you to learn more about what makes the Colorado Law experience (<http://www.colorado.edu/law/node/4079/>) so special. Please contact us (<http://www.colorado.edu/law/node/231/>) for more information or, even better, come visit us (<http://www.colorado.edu/law/node/219/>).

Thanks for taking the time to get to know us better.

Sincerely,

Lolita Buckner Inniss (<https://lawweb.colorado.edu/profiles/profile.jsp?id=1033>), Dean and Provost's Professor of Law

## About Colorado Law

The University of Colorado Law School, established in 1892, has a long and proud history as a top public law school. The first students of color entered in 1898. The school became a charter member of the Association of American Law Schools, organized in 1901. The first woman graduated in 1908. And the school has been on the American Bar Association's list of accredited law schools since its first publication in 1923.

Today, Colorado Law, housed in the beautiful new "green" Wolf Law Building with one of the largest law libraries in the country, is also one of the most technologically advanced law schools in the country. Most importantly, it provides one of the best comprehensive legal educations in the nation, featuring:

- A favorable faculty-student ratio (6.4:1) that produces class sizes that encourage discussion
- 60 highly published resident faculty dedicated to interacting with students inside and outside the classroom
- First-year students who are placed in small sections for more class participation opportunities and to build relationships with classmates and professors
- Full-time, three-year Juris Doctor (JD) degree, one-year Master of Laws (LLM) degree, one-year Master of Studies in Law (MSL) degree, eight dual degrees, eight certificates, three centers and three journals
- An Experiential Learning Program that integrates lawyering activities, including nine legal clinics, externships, public service pledge and trial and moot court competitions
- Comprehensive program to prepare students for a wide range of careers; many graduates obtain judicial clerkships

## Law School Vision

With our roots in Colorado and a global outlook, we are a supportive and diverse community of scholars and students in a place that inspires vigorous pursuit of ideas, critical analysis and civic engagement in order to advance the rule of law in an open, sustainable society.

## Our Mission

To be an outstanding public law school that: provides students with a state-of-the-art legal education and prepares them to serve wisely and with professionalism; advances the development of knowledge through

scholarship, testing of new ideas, and challenges to the status quo; and serves as a vehicle and catalyst for meaningful public service, all of which deliver high value to our students and have positive impacts—both locally and globally—on the legal profession and society.

## Wolf Law Building

The five-story Wolf Law Building was completed in 2006 and was only possible through the financing of alumni, friends, law firms and 61 percent by students.

- Top "green" certification, from construction to operation, including 88 percent renewable energy and electricity, 40 percent water use reduction and 59 percent regionally manufactured materials
- Technologically advanced wireless networking, video conferencing, videotaping capabilities for distance learning and digital kiosks
- All classrooms have electrical outlets for each student and complete audio-visual equipment (LCD projectors, DVD, VHS, cable) with built-in touch-screen control systems
- Student commons with café and patio, study and interview rooms, individual lockers and mailboxes, law bookstore and courtyard with barbeque
- Suites and offices for centers, clinics, student organizations, journals and all faculty offices
- A 250-seat main courtroom with judge's chambers, 30-seat teaching courtroom with jury box and witness stand and a mock trial practice room for competition and clinic training

The three-story William A. Wise Law Library is housed in the Wolf Law Building.

- Most comprehensive law library in the 12-state Rocky Mountain region, one of the largest in the country, serving as a selective federal government depository
- Six computer stations, five group study rooms, 12 study pods, and 459 total seats
- Access in print or online to more than 500,000 volumes

## Student Life

Students who choose the University of Colorado Law School generally seek the very best all-around legal education combined with a great location, a supportive community, top specialties, interdisciplinary study, dedicated faculty, a public service tradition and so much more. Colorado Law is distinguished by the extraordinary quality of its students. As a competitively selective school, its students rank in the top tier, represent a rich blend of geographic and ethnic backgrounds and bring experiences of leadership, career achievement and community service. Although competitiveness among students with such elite qualifications is typical at many law schools, CU Law students have a proud history of putting collegiality first.

## Commitment to Diversity

Colorado Law is proud to have been one of the earliest law schools in the nation to graduate lawyers of color. The first students of color entered the University of Colorado Law School in 1898 and the first woman graduated in 1908. Colorado Law's commitment to diversity is evident throughout the Law School. We seek students with not only the academic credentials to excel in a rigorous legal education program, but also a desire to join a diverse community of future lawyers committed to the service of others. Student organizations offer support and networking opportunities.

## Academic Support

From the student's first day, Colorado Law invests in her or his academic success. Through the Rothgerber Academic Assistance Program, upper-division law students tutor first-year students in their courses, except Legal Writing. The program is open to all first-year students, and more than 50 percent of the class participates in this free opportunity.

## Honor System

Members of the legal profession are held to the highest standards of ethical and professional conduct, and Law School faculty and students are expected to maintain the same level of professional competence and integrity in their work. The Colorado Law School Honor Code, subscribed to by all students, is a system of rules administered by student officers and demands the highest ethical conduct.

## Legal Research and Writing

Colorado Law's Legal Research and Writing Program ensures that its graduates are proficient in legal research, analysis and writing, and capable of adapting these skills to varying contexts. All first-year Legal Writing courses are taught by resident legal writing faculty, and legal research and research strategy is guided by professional librarian instructors. Upper-division courses are designated as writing classes and students spend a seminar preparing a substantial paper requiring significant legal research and writing.

## Journals

Colorado Law is home to three nationally respected student-led law journals. These journals provide legal research, writing, editorial and publishing experience to competitively chosen second- and third-year law students, with a select number of third-year students serving as prestigious Editorial Board members. Subscribers include government agencies, judicial courts, law school and government libraries, judges, attorneys, faculty and alumni.

- *University of Colorado Law Review* (founded in 1928)
- *Colorado Natural Resources, Energy and Environmental Law Review*
- *Colorado Technology Law Journal*

## Student Organizations

Colorado Law's student organizations reflect the diverse interests and concerns of its active student body. Students increase their knowledge in specific areas, gain leadership experience and work closely with fellow students, faculty, alumni and legal professionals with similar passions. The Student Bar Association serves as the school's student government, represents the interests of law students generally, allocates funding to other organizations and administers the school's honor code with the Honor Council.

- American Bar Association, Law Student Division
- Arab Law Student Association
- Asian Pacific American Law Students Association
- Barristers' Council
- Black Law Students Association
- Breakthrough Student Group
- Business and Tax Law Association
- Cannabis Law League
- Christian Legal Society

- Colorado Law Student Parents Group
- Construction and Real Estate Law Association
- Criminal Prosecution Society
- Doman Society of International Law
- Environmental Law Society
- Federalist Society for Law and Public Policy Studies
- Health Law Society
- If/When/How
- Immigration Law and Policy Society
- Intellectual Property Association
- International Law Student Society
- International Moot Court
- Jewish Law Students Association
- Juvenile and Family Law Club
- Korey Wise Innocence Project Club
- LatinX Law Student Association
- Military Law Society
- Muslim Law Student Association
- National Lawyers Guild
- Native American Law Students Association
- OUTlaw
- People's Parity Project
- Privacy Law Association
- Public Defense Association
- Public Interest Students Association
- Silicon Flations Students Group
- Space Law Society
- Sports and Entertainment Law Student Association
- Student Bar Association
- Women of Color Collective
- Women's Law Caucus

## Career Development

Colorado Law prepares students for a wide variety of careers. The Career Development Office offers students and alumni individualized career counseling and professional development advice to help them identify and achieve their career goals. The office has career counselors with JDs who have many years of experience in a wide range of law practice areas. It maintains state-of-the-art career development and job search resources and helps students prepare for and pursue job opportunities during and after law school.

### Services and Programs

- **Career Counseling:** Each first-year student meets with a career counselor who helps with résumés and job search action plans.
- **Employer Outreach:** Counselors conduct extensive employer outreach in- and out-of-state.
- **Career Fairs/Symposia:** The office organizes employer networking opportunities on and off campus.
- **On-Campus Interviews:** Each year approximately 100 employers come on campus to interview students for summer clerkships, internships and associate attorney positions with law firms and government agencies.

- **Résumé Collections:** Résumés from interested students are sent to in- and out-of-state employers.
- **Brown Bag Speaker Series:** Practicing attorneys from the local and national legal community are regularly invited to speak to students during weekly lunch-hour informational sessions about what it's like to work in a variety of legal areas.
- **Job Postings:** Through a secure web-based system, students and alumni can review current job listings and an online resources library.
- **Mock Interviews:** Counselors set up appointments with students for practice interviews with the counselors or with volunteer attorneys. Students receive tips and feedback to help them improve.
- **Referrals:** Counselors help students connect with alumni and other legal professionals as resources for information about a field or practice area of law in Colorado or any other part of the country or world.
- **Mentoring and Community Involvement:** The office regularly helps students get involved in the legal community by referring them to mentor programs (including the Student Alumni Mentoring Program), bar associations, Inns of Court and other law-related organizations.

### Job Opportunities

Colorado Law helps students pursue numerous job opportunities and helps connect them to valuable part-time and permanent legal positions, including:

- **Paid internships** are academic year or summer, part or full-time positions with law firms, businesses, government agencies and nonprofits.
- **For-credit externships** are for students working as volunteers for government agencies and non-profits for academic credit under the supervision of a field and faculty supervisor.
- **Fellowships** provide funding for law students and graduates to work with public service organizations or academic programs.
- **Honors programs** are prestigious summer and post-graduate programs for students and graduates to work within federal government agencies.
- **Judicial clerkships** are prestigious paid positions for new graduates working for state and federal judges across the country.

## Experiential Learning

Experiential education encompasses lawyering activities in which students receive experience outside the classroom—clinics, externships, appellate and trial competitions and voluntary public service work. Colorado Law's Experiential Learning Program gives greater coherence to our entire curriculum and builds linkages with faculty involved in experiential education and those involved in traditional classroom teaching.

### Legal Clinics

Colorado Law's Clinical Education Program started in 1948 and now serves almost 900 clients each year. Clinics are courses that provide practical learning experiences for our students, much-needed assistance to those less fortunate in our community and invaluable service to the public good. By handling actual cases, students make the transition from legal theory to legal practice, enabling them to take classroom knowledge and turn it into real-world understanding. Under the supervision of expert clinical faculty, student practitioners take primary responsibility for understanding the goals of their clients, and working to represent those

clients' interests persuasively and competently. Clinics are available to all interested students.

- American Indian Law Clinic
- Civil Practice Clinic
- Criminal Defense Clinic
- Criminal/Immigration Defense Clinic
- Entrepreneurial Law Clinic
- Juvenile and Family Law Clinic
- Natural Resources and Environmental Law Clinic
- Technology Law and Policy Clinic
- Sustainable Community Development Clinic

## Public Service Pledge Program

Colorado Law is a public institution with a public spirit. The faculty and the students have a passion for and deep appreciation of a lawyer's civic responsibilities to serve the underprivileged and the community. Students who complete a voluntary pledge of at least 50 hours of law-related public service work, not for credit or other compensation, receive recognition on their transcripts. Such service provides students with valuable skills and values, such as legal research and writing, client interviewing and legal argument development. Students can perform pro bono work for any government agency engaged in legal work (administrative agencies, public defenders, district attorney offices and judiciary), nonprofits that provide legal services, public interest law firms or private firms on pro bono projects.

## Trial Advocacy and Moot Court

Appellate advocacy, mock trials and moot court competitions help to develop skills in appellate brief writing and oral argument, and gain valuable trial practice experience. Colorado Law teams have consistently been extremely competitive and participate in and host more and more competitions each year. Coaching and support come from an experienced group of faculty, fellow students, alumni who recently competed and judges and lawyers in the community. Students may earn academic credit for their participation. Examples of recent competitions are:

- Constance Baker Motley National Moot Court Competition
- Emory Civil Rights and Liberties Competition
- Hispanic National Bar Association Moot Court
- Jessup International Law Moot Court Competition
- Jim R. Carrigan Trial Advocacy Competition
- Mardi Gras National Moot Court Competition
- National Moot Court Competition
- National Moot Court Competition in Child Welfare and Adoption Law
- National Student Trial Advocacy Competition
- National Telecommunications Moot Court Competition
- The National Trial Competition
- Native American Law Students Association Moot Court Competition
- Pace National Environmental Law Moot Court Competition
- Philip C. Jessup International Law Moot Court Competition:
- The Rothgerber Moot Court Competition
- Saul Lefkowitz National Moot Court Competition

## Externships

Students may gain academic credit for performing substantive legal work with government agencies, public institutions and not-for-profit organizations. Students develop professional lawyering skills, gain

insight into various aspects of the legal system and profession and cultivate a sense of professional responsibility. While uncompensated, students receive credit hours (1 credit hour per 50 hours of work) toward their degrees.

## Research Centers

Widely recognized for its intellectual diversity and originality, the faculty at Colorado Law encompasses an array of prominent legal scholars. The faculty's record of scholarly publication is both extensive and frequently cited. Together with the faculty's commitment to public service, this work has positioned the faculty of Colorado Law to exert important and constructive influences on legal and public policy debates at the local, national, and international levels.

Colorado Law's three research centers have earned national prominence for their research, publications and leading conferences that debate legal and policy issues, foster practical solutions and innovative ideas, facilitate networking and produce scholarship. Students are an integral part of the centers. Students may work as volunteers, externs or research assistants on research projects, reports, newsletters and events. In addition, students will have unique access to national and local policymakers, researchers, scientists, entrepreneurs and legal practitioners in many areas of the law.

### Byron R. White Center for the Study of American Constitutional Law

Named in honor of the retired Supreme Court Justice and CU alumnus, the Byron White Center (<http://www.colorado.edu/law/node/135/>) for the Study of American Constitutional Law was founded in 1990 to enhance the study and teaching of Constitutional law and stimulate public debate and understanding of our Constitutional system. Each year, the center gathers politicians, academics and practitioners for the Ira C. Rothgerber, Jr. Conference. Recent topics have included home rule, reapportioning Colorado, state initiatives, academic freedom and conscience and the free exercise of religion. The center is the cornerstone of Colorado Law's public service (<http://www.colorado.edu/law/node/1125/>) commitment.

### Getches-Wilkinson Center for Natural Resources, Energy and the Environment

The Getches-Wilkinson Center (<http://www.colorado.edu/law/node/149/>) for Natural Resources, Energy, and the Environment is the 21st century name of the Natural Resources Law Center (NRLC) and crown jewel of Colorado Law's dedication to natural resources, energy, and the environment. The center is dedicated to serving the people of the American West, the nation and the world through creative, interdisciplinary research, bold, inclusive teaching and innovative problem solving in order to further true sustainability for our lands, waters and environment. The Getches-Wilkinson Center is building on the successful legacies not only of the NRLC, but also of other existing programs in natural resources, energy and the environment at Colorado Law.

The Getches-Wilkinson Center regularly hosts an array of conferences and distinguished speakers, including the Annual Martz Summer Conference, the Energy Innovation Speaker Series and various seminars for practitioners and the interested public. Students are invited to join these events and visit some of the center's ongoing projects, such as the longstanding work to improve western water management, to develop and deploy best management practices for oil and gas production and

to develop practical strategies and solutions to provide appropriate sustainable energy technologies.

## Silicon Flatirons Center for Law, Technology and Entrepreneurship
